Form 10-Q/A
June 18, 2003

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q/A
(Amendment No. 1)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended March 31, 2003

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-10804

XL CAPITAL LTD

(Exact name of registrant as specified in its charter)

CAYMAN ISLANDS
(State or other Jurisdiction of
incorporation or organization)

98-0191089
(I.R.S. Employer
Identification No.)

XL House, One Bermudiana Road, Hamilton, Bermuda HM 11
(address of principal executive offices and zip code)

(441) 292-8515
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

As of May 5, 2003, there were 136,595,532 outstanding Class A Ordinary Shares, \$0.01 par value per share, of the registrant.

Explanatory Note

This Quarterly Report on Form 10-Q/A amends the Registrant's Form 10-Q for the quarterly period ended March 31, 2003. This Quarterly Report on Form 10-Q/A for the quarterly period ended March 31, 2003 is being filed solely to eliminate the Registrant's reference to net operating income in Management's Discussion and Analysis of Financial Condition and Results of Operations.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
(U.S. dollars in thousands)

1. Basis of Preparation and Consolidation

These unaudited consolidated financial statements include the accounts of the Company and all of its subsidiaries and have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, these unaudited financial statements reflect all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of financial position and results of operations as at the end of and for the periods presented. The results of operations for any interim period are not necessarily indicative of the results for a full year. All significant intercompany accounts and transactions have been eliminated. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

To facilitate period-to-period comparisons, certain reclassifications have been made to prior period consolidated financial statement amounts to conform to current period presentation. There was no effect on net income from this change in presentation.

Unless the context otherwise indicates, references herein to the Company include XL Capital Ltd and its consolidated subsidiaries.

2. Accounting Pronouncements

In December 2002, the Financial Accounting Standards Board (FASB) issued FAS 148, Accounting for Stock-Based Compensation - Transition and Disclosure . FAS 148 amends FAS 123, Accounting for Stock-Based Compensation, by providing alternative methods of transition for a voluntary change to the fair value-based method of accounting for stock-based employee compensation. In addition, FAS 148 amends the disclosure requirements of FAS 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results.

Effective January 1, 2003, the Company has adopted the fair value recognition provisions of FAS 123, as amended by FAS 148, under the prospective method for options granted subsequent to January 1, 2003. Prior to 2003, the Company accounted for options under the disclosure-only provisions of FAS 123 and no stock-based employee compensation cost was included in net income as all options granted had an exercise price equal to the market value of the Company's ordinary shares on the date of the grant. Awards under the Company's stock plans vest over periods ranging from three to four years. If the fair value based method had been applied to all awards since the original effective date of FAS 123, the cost related to employee stock based compensation included in the determination of net income would have been higher. The following table illustrates the net effect on net income and earnings per ordinary share if the fair value method had been applied to all outstanding and unvested awards in each period presented:

	Quarter ended March 31,	
	2003	2002
Net income available to ordinary shareholders as reported	\$ 239,857	\$ 89,493
Add: Stock based employee compensation expense included in reported net income, net of related tax	800	
Deduct: Total stock based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(11,290)	(10,361)

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

Pro forma net income available to ordinary shareholders	\$	229,367	\$	79,132
Earnings per ordinary share:				
Basic as reported	\$	1.76	\$	0.66
Basic pro forma	\$	1.68	\$	0.59
Diluted as reported	\$	1.74	\$	0.65
Diluted pro forma	\$	1.67	\$	0.57

9

XL CAPITAL LTD NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued) (U.S. dollars in thousands)

2. Accounting Pronouncements (continued)

In April 2003, FASB issued Statement No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities* (FAS 149). FAS 149 amends and clarifies financial accounting and reporting for derivative instruments, including certain derivative instruments embedded in other contracts and for hedging activities under FAS 133. In particular, FAS 149 amends FAS 133 for decisions made (1) as part of the Derivative Implementation Group process that effectively required amendments to FAS 133, (2) in connection with other Board projects dealing with financial instruments, and (3) in connection with implementation issues raised in relation to the application of the definition of a derivative. In particular, FAS 149 clarifies the types of financial guarantee contracts that are included in the scope exception of FAS 133, the circumstances when a contract with an initial net investment meets the characteristics of a derivative, the characteristics of a derivative that contains financing components and amends certain other existing pronouncements. FAS 149 is effective for contracts entered into or modified after June 30, 2003 and should be applied prospectively. The provisions that relate to forward purchases or sales of when issued securities or other securities that do not yet exist, should be applied to both existing contracts and new contracts entered into after June 30, 2003. The Company is currently evaluating the effects implementing FAS 149; however, the Company does not expect that its adoption will have a material effect on the Company's financial condition and results of operations.

In January 2003, FASB issued Interpretation No. 46, *Consolidation of Variable Interest Entities* (FIN 46). The objective of FIN 46 is to improve financial reporting by companies involved with variable interest entities. This new model for consolidation applies to an entity in which either (1) the powers or rights of the equity holders do not give them sufficient decision making powers or (2) the equity investment at risk is insufficient to finance that entity's activities without receiving additional subordinated financial support from other parties. FIN 46 requires a variable interest entity to be consolidated into the company that is subject to a majority of the risk of loss from the variable interest entity's activities or that is entitled to receive a majority of the entity's residual returns or both. The consolidation requirements of FIN 46 apply immediately to variable interest entities created after January 31, 2003. For entities created on or prior to January 31, 2003, the consolidation requirements apply in the first fiscal year or interim period beginning after June 15, 2003. The effect of adoption of this standard on the Company's financial condition is currently being evaluated with a possible increase in both assets and liabilities of up to approximately \$2.4 billion at March 31, 2003, based on structures and contracts currently in place. Management is pursuing alternatives with regard to restructuring these variable interest entities.

In April 2003, the FASB cleared Derivative Implementation Guidance Issue No. B36, *Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposures Than Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor under Those Instruments* . The accounting guidance states that modified coinsurance arrangements, in which funds are withheld by the ceding insurer and a return on those withheld funds is paid based on the ceding company's return on certain of its investments, contain an embedded derivative feature that will require bifurcation. Companies that have ceded insurance under existing modified coinsurance arrangements may reclassify securities related to embedded derivatives from the held-to-maturity and available-for-sale categories into the trading category on the date the guidance is initially applied. This guidance is effective for the periods beginning after September 15, 2003. The Company is currently evaluating the effects of implementing Issue B36, however, the Company does not expect that its adoption will have a material effect on the Company's financial condition and results of operations.

3. Segment Information

The Company is organized into three operating segments insurance, reinsurance and financial products and services in addition to a corporate segment that includes the investment and financing operations of the Company. General operations and life operations are disclosed separately within each segment. General operations include property and casualty lines of business and financial products and services.

The Company evaluates the performance of each segment based on underwriting results for general operations and net income from life operations. Other items of revenue and expenditure of the Company are not evaluated at the segment level for general operations. In addition, the Company does not allocate assets by segment for its general operations. Investment assets related to the Company's life operations are held in separately identified portfolios. Net investment income from these assets is included in net income from life operations.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)
(U.S. dollars in thousands, except ratios)

3. Segment Information (continued)

Certain lines of business within general operations written by the Company have loss experience generally characterized as low frequency and high severity. This may result in volatility in both the Company's results and operational cash flows.

The following is an analysis of results by segment together with a reconciliation to net income:

Quarter Ended March 31, 2003:

	<u>Insurance</u>	<u>Reinsurance</u>	<u>Total Insurance and Reinsurance</u>	<u>Financial Products and Services</u>	<u>Total</u>
General Operations:					
Net premiums earned	\$ 881,227	\$ 550,660	\$ 1,431,887	\$ 26,973	\$ 1,458,860
Fee income and other	2,148	11,450	13,598	(1,342)	12,256

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)
(U.S. dollars in thousands)

4. Notes Payable and Debt and Financing Arrangements

The Company entered into a new \$100.0 million letter of credit facility in January 2003 to provide additional capacity to support the Company's U.S. non-admitted business. The facility was fully utilized at March 31, 2003.

In February 2003, the Company entered into an aggregate of \$300.0 million of commercial paper-based credit facilities (the Credit Facilities) and expects to increase these facilities to \$500.0 million later in 2003. At maturity, the Company will be obligated to make payments in an amount equal to the principal and accrued interest outstanding under the Credit Facilities. The Company could face additional obligations under the Credit Facilities prior to the stated maturity of February 25, if certain events were to occur, including, but not limited to the Company's insolvency, withdrawal of assets from the Trust by the ceding company, the downgrade of the Company's credit ratings below certain specified levels, or the failure of the agent to have a first priority perfected security interest in the collateral posted by the Company.

5. Exposures under Guaranties

The Company provides and reinsures financial guaranties issued to support public and private borrowing arrangements. Financial guaranties are conditional commitments that guarantee the performance of an obligor to a third party, typically the timely repayment of principal and interest. The Company's potential liability in the event of non-payment by the issuer of the insured obligation is represented by its proportionate share of the aggregate outstanding principal and interest payable (insurance in force) on such insured obligation. In synthetic transactions, the Company guarantees payment obligations of counterparties under credit default swaps. The Company does not record a carrying value for future installment premiums on financial guaranties as they are recognized over the term of the contract.

The net outstanding exposure as at March 31, 2003 of financial guaranty aggregate insured portfolios was \$39.0 billion, which includes credit default swap exposures of \$9.4 billion. The liability for these credit default swaps is a carrying value of \$139.4 million.

6. Derivative Instruments

The Company enters into derivative instruments for both risk management and trading purposes. The Company is exposed to potential loss from various market risks and manages its market risks based on guidelines established by management. These derivative instruments are carried at fair value with the resulting gains and losses recognized in income in the period in which they occur.

In the fourth quarter of 2002, the Company amended the presentation of its derivative transactions in the consolidated statements of income to include the change in fair value of all its derivative transactions in one line item under net realized and unrealized (losses) gains on derivative instruments. Previously, certain components of the change in fair value were included in net premiums earned, net losses and loss expenses incurred, and fee income and other. There was no effect on net income for this change and prior period results have been reclassified to reflect this change.

The following table summarizes the net realized and unrealized gains (losses) on derivative instruments included in net income for the three months ended March 31, 2003 and 2002:

	Three Months Ended March 31, 2003	Three Months Ended March 31, 2002
Credit default swaps	\$ (566)	\$ 1,356
Weather and energy risk management products	10,410	919
Investment derivatives	4,649	(11,751)
Net realized and unrealized gains (losses) on derivatives	\$ 14,493	\$ (9,476)

7. XL Capital Finance (Europe) plc

XL Capital Finance (Europe) plc (XLFE) is a wholly owned finance subsidiary of the Company. In January 2002, XLFE issued \$600 million par value 6.5% Guaranteed Senior Notes due January 2012. These Notes are fully and unconditionally guaranteed by the Company. The Company's ability to obtain funds from its subsidiaries is subject to certain contractual restrictions, applicable laws and statutory requirements of the various countries in which the Company operates including Bermuda, the U.S. and the U.K., among others. Required statutory capital and surplus for the principal operating subsidiaries of the Company was \$2.5 billion as of December 31, 2002.

8. Computation of Earnings Per Ordinary Share and Ordinary Share Equivalent

	Three Months Ended March 31	
	2003	2002
Basic earnings per ordinary share:

Diluted earnings per ordinary share	\$ 1.74	\$ 0.65
Dividends per ordinary share	\$ 0.48	\$ 0.47

(1) Net of shares repurchased under the treasury stock method.

Future weighted average number of shares outstanding may be affected by the convertible debt issued during 2001. Due to the contingent nature of the conversion features of the debt, there was no effect on diluted earnings per share for the three months ended March 31, 2003 and March 31, 2002.

9. Annuity and Life Re Holdings Ltd

The Company recognized an other than temporary decline in the value of its investment in Annuity & Life Re Holdings Ltd, an insurance affiliate, of \$40.9 million in the quarter ended March 31, 2003. The investment is carried at its fair value of \$2.1 million.

15

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General

The following is a discussion of the Company's financial condition and liquidity and results of operations. Certain aspects of the Company's business have loss experience characterized as low frequency and high severity. This may result in volatility in both the Company's and an individual segment's results of operations and financial condition.

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements which involve inherent risks and uncertainties. Statements that are not historical facts, including statements about the Company's beliefs and expectations, are forward-looking statements. These statements are based upon current plans, estimates and projections. Actual results may differ materially from those projected in such forward-looking statements, and therefore undue reliance should not be placed on them. See Cautionary Note Regarding Forward-Looking Statements below for a list of factors that could cause actual results to differ materially from those contained in any forward-looking statement.

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

This discussion and analysis should be read in conjunction with the Management's Discussion and Analysis of Financial Condition and Results of Operations, and the audited Consolidated Financial Statements and notes thereto presented under Item 7 and Item 8, respectively, of the Company's Form 10-K for the year ended December 31, 2002.

Critical Accounting Policies

See the discussion of the Company's critical accounting policies in Item 7 of the Company's Form 10-K for the year ended December 31, 2002.

16

Results of Operations

The following table presents an after-tax analysis of the Company's net income available to ordinary shareholders for the three months ended March 31, 2003 and 2002:

(U.S. dollars in thousands, except per share amounts)

	(Unaudited) Three Months Ended March 31	
	2003	2002
Net income available to ordinary shareholders	\$ 239,857	\$ 89,493
Earnings per ordinary share - basic	\$ 1.76	\$ 0.66
Earnings per ordinary share - diluted	\$ 1.74	\$ 0.65
Weighted average number of ordinary shares and ordinary share equivalents - basic	136,216	135,119
Weighted average number of ordinary shares and ordinary share equivalents - diluted	137,631	137,843

Net income available to ordinary shareholders increased significantly in the first quarter of 2003 compared to the first quarter of 2002 primarily due to two factors. First, there was an increase in the underwriting profit from the Company's general insurance and reinsurance operations from \$91.7 million in the first quarter of 2002 to \$203.4 million in the first quarter of 2003. This increase in underwriting profit was mainly the result of growth in net premium earned from pricing increases in renewal and new business written. This is discussed further in each of the segments below. Second, in the quarter ended March 31, 2003, net realized losses on investments were \$4.7 million that included \$70.4 million of net realized gains on sales of securities that was offset by \$75.1 of a charge for an other than temporary decline in fixed income and equity securities. Net income in the quarter ended March 31, 2002

17

was reduced by net realized investment losses of \$106.0 million. This included approximately \$36.7 million of realized losses on sales of securities and \$69.3 million of a write-down of certain of the Company's fixed income and equity investments in circumstances where the Company believed that there was an other than temporary decline in the value of those investments.

Partially offsetting the increase in net income in the first quarter of 2003 as compared to the first quarter of 2002 was an other than temporary decline of \$40.9 million in the value of the Company's investment in Annuity and Life Re, an insurance affiliate, in the first quarter of

18

2003 to its then current market value.

Segments

Insurance Operations

General insurance business written includes risk management and specialty lines. Risk management products comprise global property and casualty insurance programs for large multinational companies, including umbrella liability, products recall, integrated risk and primary master property and liability coverages. Specialty lines products include directors and officers liability insurance, environmental liability insurance, political risk insurance, professional liability insurance, aviation and satellite insurance, employment practices liability insurance, surety, marine and energy insurance, specie, bloodstock and other insurance covers including program business. No life insurance business has been written in this segment. A large part of the Company's casualty insurance business written has loss experience that is low frequency and high severity. As a result, large losses, though infrequent, can have a significant impact on the Company's results of operations, financial condition and liquidity. The Company attempts to mitigate this risk by using strict underwriting guidelines and various reinsurance arrangements.

The following table summarizes the underwriting results for this segment:

(U.S. dollars in thousands)

	(Unaudited) Three Months Ended March 31,		
	2003	2002	% Change
Net premiums earned	\$ 881,227	\$ 589,801	49.4%
Fee income and other	2,148	6,545	(67.2)%
Net losses and loss expenses	521,285	374,586	39.2%
Acquisition costs	124,450	91,965	35.3%
Operating expenses	98,096	88,973	10.3%
Exchange losses (gains)	7,717	(2,112)	NM
Underwriting profit	\$ 131,827	\$ 42,934	207.0%

* NM Not Meaningful

Net premiums earned increased in the quarter ended March 31, 2003 compared to the quarter ended March 31, 2002 primarily due to strong growth in net premiums written from significant pricing increases, new business written, and increased net retentions. The largest pricing increases in 2003 were in the professional liability, casualty and marine lines of business. Casualty insurance net premiums earned increased from \$291.9 million in the first quarter of 2002 to \$437.6 million in the first quarter of 2003. Aviation and U.S. property prices however appear to have reached a plateau as compared to the prior year. Growth in net premiums earned in the first quarter of 2003 over 2002 was partially offset by a reduction in net premiums written related to the non-renewal of certain business written by the Company's Lloyd's syndicates and the return of premium to Winterthur Swiss Insurance Company in the second quarter of 2002 related to accident and health business which was previously written by Winterthur International.

Fee income and other declined in the first quarter of 2003 as compared to the first quarter of 2002 primarily due to the discontinuance at the end of 2002 of consulting and administration services provided by Winterthur International for employee benefit plans of unrelated companies.

Exchange losses in the quarter ended March 31, 2003 related primarily to the decline in value of U.K. sterling against the U.S. dollar where the value of certain monetary net assets denominated in this currency decreased. In February 2003, the Company entered into a series of forward exchange contracts to cover approximately 60%, or

\$110.4 million (£70 million), of the Company's exposure to a U.K. sterling reinsurance recoverable balance at one of its U.K. based insurance operations. The mark to market value of these contracts was a gain of \$0.8 million. The exchange gain in the quarter ended March 31, 2002 was mainly due to an increase in the value of U.K. sterling against the U.S. dollar.

The following table presents the ratios for this segment:

	(Unaudited) Three Months Ended March 31	
	2003	2002
Loss and loss expense ratio	59.2%	63.5%
Underwriting expense ratio	25.2%	30.7%
Combined ratio	84.4%	94.2%

The loss and loss expense ratio decreased in the quarter ended March 31, 2003 compared to the quarter ended March 31, 2002 primarily due to premium rate increases and improving terms and conditions on new business written and earned in 2003.

The underwriting expense ratio was lower in the quarter ended March 31, 2003 compared to the quarter ended March 31, 2002 due a lower acquisition expense ratio (14.1% as compared to 15.6%) and a lower operational expense ratio (11.1% as compared to 15.1%). The lower acquisition expense ratio was primarily due to a change in the mix of business being earned. Casualty, aviation, and professional lines generally have lower brokerage and commission costs than other lines and net premium earned for these lines have increased as compared to the first quarter of 2002. Partially offsetting this reduction was a decrease of approximately \$9.7 million in acquisition expenses in the first quarter of 2002 related to the purchase accounting treatment of deferred acquisition costs related to the acquired Winterthur International operations. The reduction in the operational expense ratio is due primarily to the growth in net premiums earned which was greater than the increase in operating expenses. Operating expenses generally do not change in direct proportion to changes in net premiums earned. The growth in the absolute level of operating expenses is due to the continued build up of infrastructure and ongoing integration costs relating to the acquired Winterthur International operations.

Reinsurance Operations

Reinsurance General Operations

General reinsurance business written includes casualty, property, accident and health and other specialty reinsurance on a global basis. The Company's reinsurance property business generally has loss experience characterized as low frequency and high severity that can have a negative impact on the Company's results of operations, financial condition and liquidity. The Company endeavors to manage its exposures to catastrophic events by limiting the amount of its exposure in each geographic zone worldwide and requiring that its property catastrophe contracts provide for aggregate limits and varying attachment points.

The following table summarizes the underwriting results for the general operations of this segment:

(U.S. dollars in thousands)

	(Unaudited) Three Months Ended March 31		
	2003	2002	% Change
Net premiums earned	\$ 550,660	\$ 421,167	30.7%
Fee income and other	11,450	899	NM
Net losses and loss expenses	350,506	264,632	32.5%
Acquisition costs	104,649	92,214	13.5%

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

Operating expenses	34,560	18,686	85.0%
Exchange gains	(10,419)	(6,252)	(66.7)%
Underwriting profit	\$ 82,814	\$ 52,786	56.9%

19

Net premiums earned in the first quarter of 2003 increased 30.7% compared to the first quarter of 2002 in part, due to strong growth and pricing increases in business written in 2003 and 2002. Pricing increases and improvements in underwriting terms and conditions in the first quarter of 2003 were primarily experienced in the casualty lines and international property lines. U.S. property rate increases were generally unchanged as compared to the first quarter of 2002.

Fee income and other increased in the first quarter of 2003 due to fees earned on a deposit liability contract. Fee income and other is expected to decline in future periods as earning patterns are due to contractual terms and conditions.

The net exchange gains in the quarter ended March 31, 2003 and 2002 are primarily due to a decline in the value of the U.S. dollar against other currencies, primarily euros, in those operations that transact in multiple currencies.

The following table presents the ratios for this segment:

	(Unaudited) Three Months Ended March 31	
	2003	2002
Loss and loss expense ratio	63.7%	62.8%
Underwriting expense ratio	25.2%	26.4%
Combined ratio	88.9%	89.2%

There were no significant catastrophic losses in the first quarter of 2003 or 2002. The increase in the loss and loss expense ratio in the quarter ended March 31, 2003 compared to the same quarter of 2002 primarily reflects an increase in losses related to a Lloyd's stop loss cover that was partially offset by a reduction in loss ratios on certain lines of business due to improved terms and conditions on new business written.

The decrease in the underwriting expense ratio in the first quarter of 2003 as compared to the first quarter of 2002 is primarily due to a reduction in the acquisition expense ratio to 19.0% as compared to 21.9% in the first quarter of 2002. This reduction reflects an adjustment for grossing up of certain casualty business from Lloyd's that was reported to the Company net of commissions. Acquisitions costs are expected to revert to historical levels in subsequent quarters. Partially offsetting this is an increase in the operating expense ratio from 4.5% to 6.2%. The operational expense ratio was lower in the first quarter of 2002 as compared to the first quarter of 2003 due primarily to a reduction in expenses of approximately \$8.0 million relating to the curtailment of a pension plan.

Reinsurance Life Operations

Life business written by the reinsurance operations is primarily European life reinsurance. This includes term assurances, group life, critical illness cover, immediate annuities and disability income business. Due to the nature of these contracts, premium volume may vary significantly from period to period.

Net investment income is included in the calculation of net income from life operations as it relates to income earned on portfolios of separately identified and managed life investment assets and other allocated assets. The accretion of the related policy benefit reserves is included in claims and policy benefit reserves.

The following summarizes net (loss) income from life operations:

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

(U.S. dollars in thousands)

(Unaudited) Three Months Ended March 31				
	2003		2002	% Change
Net premiums earned	\$ 83,237		\$ 39,193	112.4%
Fee income and other			2	NM
Claims and policy benefits	110,472		47,763	131.3%
Acquisition costs	6,953		595	NM
Operating expenses	2,265		1,083	109.1%
Net investment income	31,548		15,518	103.3%
Net (loss) income from life operations	\$ (4,905)		\$ 5,272	NM

20

All of the above items increased in the first quarter of 2003 as compared to 2002 as a result of new business written and earned as the Company continues to expand its life reinsurance operations in London, South America and in Europe. In particular, approximately \$23.0 million of net earned premium in the first quarter of 2003 related to two new regular premium annuity treaties that were written after March 31, 2002 and therefore had no earned premium in the first quarter of 2002. In addition, the Company commenced writing new term assurance business that generated approximately \$10.0 million of net premium earned in the first quarter of 2003.

Claims and policy benefits also increased in line with the growth in net premiums earned and include the accretion of policy benefit reserves related to contracts where investment assets are acquired with the assumption of the policy benefit reserves at the inception of the contract. Net investment income earned on these assets is included above in the calculation of net income or loss from life operations. Claims and policy benefits in the quarter ended March 31, 2003 also included a charge of approximately \$8.0 million where the value of guaranteed minimum death benefits exceeded the value of related account balances, for business written by Le Mans Ré.

Acquisition costs have increased by a larger percentage than the increase in net premiums earned in the first quarter of 2003 as compared to 2002 due to the change in mix of new business being earned, including the new term assurance business that carries a higher brokerage and commission cost as compared to other life business.

Financial Products and Services Operations

Financial products and services business written includes insurance, reinsurance and derivative solutions for complex financial risks including financial guaranty insurance and reinsurance, institutional life products and weather and energy risk management products. Each of these transactions is unique and tailored to the specific needs of the insured or user.

Financial guaranty insurance and reinsurance generally guarantees payments of interest and principal on an issuer's obligations when due. Obligations guaranteed or enhanced by the Company range in duration and premiums are received either on an installment basis or upfront. Guaranties written in credit default swap form provide coverage for losses upon the occurrence of specified credit events set forth in the swap documentation.

The Company commenced writing municipal reinvestment contracts in 2002 whereby the Company receives deposits at a contractual interest rate. The Company has investment risk related to its ability to generate sufficient investment income to enable the total invested assets to cover the payment of the estimated ultimate liability.

The Company's weather and energy risk management products are customized solutions designed to assist corporate customers, primarily energy companies and utilities, to manage their financial exposure to variations in underlying weather conditions and related energy markets. The Company attempts to hedge a significant portion of these risks written within the capital markets.

The following table summarizes the underwriting results for this segment:

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

(U.S. dollars in thousands)

	(Unaudited) Three Months Ended March 31		
	2003	2002	% Change
Net premiums earned	\$ 26,973	\$ 14,554	85.3%

Net realized and unrealized gains on weather and energy risk management derivatives	\$ 10,410	\$ 919	NM

21

Net premiums earned increased in the first quarter of 2003 as compared to the first quarter of 2002 primarily due to growth and new financial guaranty business written. This increase is partially due to credit rating issues of the Company's competitors with recognized agencies which is critical in this line of business.

Net losses and loss expenses in the quarter ended March 31, 2003 increased greater than the growth in net premiums earned due to an increase in losses notified of approximately \$6.0 million related to business assumed from a primary monoline insured. The Company continues to monitor its credit exposures and establish reserves as required.

Acquisition costs increased by a greater percentage than the increase in net premium earned in the first quarter of 2003 as compared to 2002 due to a reduction in the amount of ceding commissions received in line with a reduction of the amount of premiums ceded.

Operating expenses increased in the first quarter of 2003 as compared to the first quarter of 2002 due to the continued expansion of these operations. Operating expenses includes all expenses associated with the segment's weather and energy activities, as well as all expenses related to the financial guarantee business.

In prior periods, the Company's credit default swap transactions written at primary layers on a partially funded or finite basis were included in the insurance segment. Effective January 1, 2003 the Company now manages all credit default swap transactions in this segment and prior period segment results have been amended to conform to this change. The Company recorded net unrealized losses of \$0.6 million and gains of \$1.4 million in the quarters ended March 31, 2003 and 2002, respectively, related to the fair value adjustment for credit default swaps. The vast majority of financial guaranty coverage that is written in swap form pertains to tranches of collateralized debt obligations and asset backed securities, particularly the higher rated tranches with 91% covering A to AAA tranches.

The fair value adjustment for weather and energy risk management derivative products in the first quarter of 2003 increased as compared to the first quarter of 2002 due primarily to gains on natural gas option contracts taken out to hedge new outage products written. Offsetting positions were then taken, realizing these gains prior to the subsequent fall in prices later in the quarter ended March 31, 2003.

Financial Products and Services Life Operations

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

The Company commenced writing life business in this segment in the fourth quarter of 2002.

The following summarizes net income from life operations:

(U.S. dollars in thousands)

	(Unaudited) Three Months Ended March 31	
	2003	2002
Net premiums earned	\$ 9,534	\$
Fee income and other	21	
Claims and policy benefits	9,086	
Acquisition costs	1,057	
Operating expenses	2,433	
Net investment income	3,775	
Net income from life operations	\$ 754	\$

Net premiums earned related to certain blocks of U.S. based term life mortality reinsurance business written that was novated to the Company from Annuity and Life Re, one of its insurance affiliates in December 2002.

Claims and policy benefits and acquisition costs also related primarily to this novated block of business.

Operating expenses reflect the continued build-out of the overall life business, including expenses associated with the municipal reinvestment contract business.

22

Net investment income in the first quarter of 2003 related to the Company's receipt of cash of \$41.5 million in December 2002 in connection with the acquisition of future policy benefit reserves from Annuity and Life Re and interest earned on the municipal reinvestment contracts written.

Investment Activities General Operations

The following table illustrates the change in net investment income and net realized and unrealized losses on investments and investment derivative instruments for the quarters ended March 31, 2003 and 2002:

(U.S. dollars in thousands)

	(Unaudited) Three Months Ended March 31		
	2003	2002	% Change
Net investment income general operations	\$ 156,581	\$ 155,609	0.6%
Net realized losses on investments	(4,663)	(106,020)	NM
Net realized and unrealized gains (losses) on investment derivative instruments	4,649	(11,751)	NM

Net investment income related to general operations increased moderately in the first quarter of 2003 as compared to the first quarter of 2002 due primarily to a higher investment base which was partially offset by the decline in investment yields on the portfolio. The growth in the

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

investment base included the receipt of funds related to new debt and preferred shares issued by the Company in 2002 and net cash provided by operations and deposit liabilities. The yield to maturity on the fixed income portfolio was 4.1% at March 31, 2003 as compared to 6.2% at March 31, 2002.

At March 31, 2003 and 2002, approximately 60% of the investment portfolio could not be meaningfully compared to applicable public market indices. This includes the deposit and regulatory holdings that are subject to investment restrictions and the Company's structured portfolio (i.e. assets supporting deposit liabilities and future policy benefit reserves) where, due to the unique nature of the underlying liabilities, customized benchmarks are used to measure performance. For those portions of the investment portfolio (approximately 40%) that could be meaningfully compared to public market indices, the following is a summary of the investment performance for the first quarters of 2003 and 2002:

23

	Quarter ended March 31, 2003	Quarter ended March 31, 2002

Net realized losses on investments in the first quarter of 2003 included net realized gains of \$70.4 million from sales of investments and net realized losses of approximately \$75.1 million related to the write-down of certain of the Company's fixed income and equity investments where the Company determined that there was an other than temporary decline in the value of those investments. The other than temporary decline in value in the first quarter of 2003 was due primarily to declines in the U.S. and non-U.S. equity markets.

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

Net realized losses on investments in the first quarter of 2002 included net realized losses of approximately \$36.7 million from sales of investments and \$69.3 million related to the write-down of securities due to an other than temporary decline in the value of those investments. The other than temporary decline in the first quarter of 2002 was due to a decline in certain of the fixed income and equity markets. There has been a continued general economic decline in the U.S. and elsewhere causing a general rise in corporate defaults and a deterioration in values across various sectors of the investment markets since 2001.

The Company's process for identifying declines in the fair value of investments that are other than temporary involves consideration of several factors. These factors include: (i) the time period during which there has been a significant decline in value; (ii) an analysis of the liquidity, business prospects and overall financial condition of the issuer; (iii) the significance of the decline; (iv) an analysis of the collateral structure and other credit support, as applicable, of the securities in question; and (v) the Company's intent and ability to hold the investment for a sufficient period of time for the value to recover. Where the Company's analysis of the above factors results in the Company's conclusion that declines in fair values are other than temporary, the cost of the security is written down to fair value and the previously unrealized loss is therefore realized.

Net Unrealized Gains and Losses on Investments

At March 31, 2003, the Company had net unrealized gains on fixed income securities of \$397.4 million and net unrealized losses on equities of \$54.7 million. Of these amounts, gross unrealized losses on fixed income securities and equities were \$84.6 million and \$55.2 million respectively. The information presented below for the gross unrealized losses on the Company's investments at March 31, 2003 shows the potential affect upon future earnings and financial position should management later conclude that some of the current declines in the fair value of these investments are other than temporary declines.

At March 31, 2003, approximately 1,300 fixed income securities out of a total of approximately 10,300 securities were in an unrealized loss position. The largest unrealized loss in the fixed income portfolio was \$2.4 million. Approximately 1,300 equity securities out of a total of approximately 1,800 securities were in an unrealized loss position at March 31, 2003 with the largest individual loss being \$2.3 million.

25

The following is an analysis of how long each of those securities with an unrealized loss at March 31, 2003 had been in a continual unrealized loss position:

(U.S. dollars in thousands)

Type of Securities	Length of time in a continual unrealized loss position	Amount of unrealized loss at March 31, 2003
Fixed Income and Short-Term	Less than six months	\$ 38,471
	At least 6 months but less than 12 months	28,013
	At least 12 months but less than 2 years	17,043
	At least 2 years but less than 3 years	920
	At least 3 years but less than 4 years	78
	At least 4 years but less than 5 years	39
	Total	\$ 84,564
Equities	Less than six months	\$ 21,898
	At least 6 months but less than 12 months	27,615
	At least 12 months but less than 2 years	4,370
	At least 2 years but less than 3 years	1,274
	At least 3 years but less than 4 years	57

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

Total \$ 55,214

At March 31, 2003, the following was the maturity profile of the fixed income securities that were in a gross unrealized loss position:

(U.S. dollars in thousands)

Maturity profile in years of fixed income securities in a continual unrealized loss position	Amount of unrealized loss at March 31, 2003
Less than 1 year remaining	402
More than 1 and less than 5 years remaining	8,976
More than 5 and less than 10 years remaining	22,057
More than 10 and less than 20 years remaining	11,568
20 years or more remaining	31,046
Mortgage backed securities	10,515
Total	\$ 84,564

The Company operates a risk asset portfolio that includes high yield (below investment grade) fixed income securities. These represented approximately 5.1% of the total fixed income portfolio market value at March 31, 2003. These securities have a higher volatility to changes in fair values than investment grade securities. Of the total gross unrealized losses in the Company's fixed income portfolio at March 31, 2003, \$36.0 million related to securities that were below investment grade or not rated. The following is an analysis of how long each of these below investment grade and unrated securities had been in a continual unrealized loss position at the date indicated:

26

(U.S. dollars in thousands)

Length of time in a continual unrealized loss position	Amount of unrealized loss at March 31, 2003
Less than six months	7,189
At least 6 months but less than 12 months	15,814
At least 12 months but less than 2 years	12,289
At least 2 years but less than 3 years	724
Total	\$ 36,016

Net realized and unrealized gains on investment derivatives in the first quarter of 2003 result from the Company's investment strategy to economically hedge against interest and foreign exchange risk within the investment portfolio. In the first quarter of 2002, the Company incurred an unrealized loss of \$11.7 million from the decline in fair value of warrants related to one of the Company's other investments. See Item 3, Quantitative and Qualitative Disclosure About Market Risk, for a more detailed analysis.

Other Revenues and Expenses

The following table sets forth other revenues and expenses for the three months ended March 31, 2003 and 2002:

(U.S. dollars in thousands)

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

(Unaudited)
Three Months Ended
March 31

	2003	2002	% Change
Equity in net income of investment affiliates	\$ 26,798	\$ 32,185	(16.7)%
Equity in net (loss) income of insurance and operating affiliates	(41,087)	32	NM
Amortization of intangible assets	375	614	(38.9)%
Corporate operating expenses	33,008	21,413	54.1%
Interest expense	46,140	41,622	10.9%
Minority interest	1,862	2,255	(17.4)%
Income tax expense	20,030	13,954	43.5%

Equity in net income of investment affiliates decreased in the first quarter of 2003 compared to the first quarter of 2002 due mainly to a decrease in the Company's share of fees earned by the investment management companies.

The equity in net loss of insurance and operating affiliates for the quarter ended March 31, 2003 includes an other than temporary decline of \$40.9 million in the value of the Company's investment in Annuity and Life Re. The investment is carried at its fair value of \$2.1 million.

Corporate operating expenses in the first quarter ended March 31, 2003 increased compared to the three months ended March 31, 2002 due to the continued build out of the Company's global infrastructure in developing its network of shared service organizations to support operations in certain locations, new costs related to the Company's global branding campaign and increased premiums for Directors and Officers insurance purchased by the Company.

The increase in interest expense primarily reflected a higher accretion charge on the deposit liabilities due to growth in this business. Accretion on the deposit liabilities for the three months ended March 31, 2003 and 2002 were \$24.1 million and \$13.9 million, respectively. Interest expense relating to notes payable and debt declined from \$27.7 million to \$22.0 million due to the inclusion of amortization of debt issuance expenses in the first quarter of 2002 related to the issue of the Zero Coupon Convertible Debentures (CARZ) and the Liquid Yield Option Notes (LYONS) (TM) in 2001. For more information on the Company's financing structure, see Financial Condition and Liquidity.

27

The decrease in minority interest in the first quarter of 2003 as compared to the first quarter of 2002 is due to a decline in the profitability of XL Financial Assurance Ltd. of which 15% is held by a minority shareholder.

The increase in the Company's income taxes arose principally from an improvement in the profitability of the Company's U.S. and European operations.

Financial Condition and Liquidity

As a holding company, the Company's assets consist primarily of its investments in subsidiaries, and the Company's future cash flows depend on the availability of dividends or other statutorily permissible payments from its subsidiaries. The ability to pay such dividends is limited by the applicable laws and regulations of the various countries the Company operates in including, among others, Bermuda, the United States, Ireland, Switzerland and the United Kingdom, and those of the Society of Lloyd's and certain contractual provisions. No assurance can be given that the Company or its subsidiaries will be permitted to pay dividends in the future.

The Company and its subsidiaries provide no guarantees or other commitments (express or implied) of financial support to the Company's subsidiaries or affiliates, except for express written financial support provided by XL Insurance (Bermuda) Ltd in connection with the Company's financial guaranty subsidiaries and where other express written guarantee or other financial support arrangements are in place.

The Company's ability to underwrite business is dependent upon the quality of its claims paying and financial strength ratings as evaluated by independent rating agencies. As a result, in the event that the Company is downgraded, its ability to write business would be adversely affected in financial guaranty and long-tailed insurance and reinsurance lines of business. In the normal course of business, the Company evaluates its capital needs to support the volume of business written in order to maintain its claims paying and financial strength ratings. As measured by Standard & Poor's, the Company currently has a group rating of AA-, and its financial guaranty subsidiaries are rated

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

AAA. As measured by Moody's, the Company currently has an Aa2 and Aaa financial strength rating for its principal insurance and reinsurance subsidiaries and financial guarantee subsidiaries, respectively. The Company regularly provides financial information to these agencies to both maintain and enhance existing ratings.

Financial Condition

At March 31, 2003, total investments available for sale and cash, net of unsettled investment trades, were \$20.8 billion compared to \$20.2 billion at December 31, 2002. This increase in investment assets related primarily to cash flow generated from operating activities for the quarter of \$579.2 million and the receipt of deposit liabilities of \$60.2 million. The Company's total investments available for sale, including fixed maturities, short-term investments and equity securities, at March 31, 2003 represented approximately 90.0% of invested assets and were managed by several outside investment management firms. Approximately 95.0% of fixed maturity and short-term investments are investment grade, with 73.7% rated Aa or AA or better by a nationally recognized rating agency. Using the Standard & Poor's rating scale, the average quality of the fixed income portfolio was AA.

As a significant portion of the Company's net premium written incepts in the first quarter of the year, certain assets and liabilities have increased at March 31, 2003 as compared to December 31, 2002. This includes deferred acquisition costs, unearned premiums, premiums receivable and prepaid reinsurance premiums. For the three months ended March 31, 2003, currency translation adjustment losses were \$4.2 million. This is shown as part of accumulated other comprehensive income and primarily related to unrealized losses on foreign currency exchange rate movement at Winterthur International and Le Mans Ré, where most operations have a functional currency that is not the U.S. dollar.

The Company establishes reserves to provide for estimated claims, the general expenses of administering the claims adjustment process and for losses incurred but not reported. These reserves are calculated using actuarial and other reserving techniques to project the estimated ultimate net liability for losses and loss expenses. The Company's reserving practices and the establishment of any particular reserve reflect management's judgment concerning sound financial practice and does not represent any admission of liability with respect to any claims made against the Company. No assurance can be given that actual claims made and payments related thereto will not be in excess of the amounts reserved.

Inflation can, among other things, potentially result in larger claims. The Company's underwriting philosophy is to adjust premiums in response to inflation.

28

Liquidity

Certain business written by the Company has loss experience generally characterized as having low frequency and high severity. This may result in volatility in both the Company's results and operational cash flows. Operational cash flows during the first three months of 2003 increased from the same period of 2002 primarily due to the receipt of general and life premiums, in line with the significant growth in net premiums written. In the three months ended March 31, 2003 and 2002, the net amount of losses paid by the Company for general operations was \$667 million and \$608 million, respectively. The increase in net paid losses in the first quarter of 2003 is due to growth in operations and \$39.1 million of net losses paid related to the September 11 event.

In the three months ended March 31, 2003, the Company did not make any significant investments in affiliates or other investments.

Capital Resources

As at March 31, 2003, the Company had bank, letter of credit and loan facilities available from a variety of sources including commercial banks totaling \$4.7 billion, of which \$1.9 billion in debt was outstanding. In addition, \$2.3 billion of letters of credit were outstanding, 6% of which were collateralized by the Company's investment portfolio, principally supporting U.S. non-admitted business and the Company's Lloyd's capital requirements.

The following tables present the Company's indebtedness under outstanding securities and lenders' commitments as at March 31, 2003:

(U.S. dollars in thousands)

Payments Due By Period

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

Notes Payable And Debt	Commitment	In Use	Year Of Expiry	Amount Of Commitment Expiration Per Period			
				Less Than 1 Year	1 To 3 Years	4 To 5 Years	After 5 Years
364-day revolver	\$ 500,000	\$	2002	\$	\$	\$	\$
7.15% Senior Notes	99,979	99,979	2005		100,000		
6.58% Guaranteed Senior Notes	255,000	255,000	2011				255,000
6.50% Guaranteed Senior Notes (1)	597,199	597,199	2012				600,000
Zero Coupon Convertible Debentures (CARZ) (1)	629,817	629,817	2021				1,010,833
Liquid Yield Option Notes(TM) (LYONS) (1)	302,163	302,163	2021				511,351
Total	\$ 2,384,082	\$ 1,884,158		\$	\$ 100,000	\$	\$ 2,377,184

- (1) Commitment and In Use data represent March 31, 2003 accreted values. Payments due by period represents ultimate redemption values. The convertibles may be put or converted by the bondholders at various times prior to the 2021 redemption dates. The next put date is September 7, 2003 for the LYONS, as described below, and May 23, 2004 for the CARZ. The Company may also choose to call the debt from May and September 2004 onwards for the CARZ and LYONS, respectively.

The total pre-tax interest expense on the borrowings described above was \$22.0 million and \$27.7 million for the three months ended March 31, 2003 and 2002, respectively.

The following table presents, as at March 31, 2003, the Company's letter of credit facilities available, in use and when those facilities are due to expire:

Other Commercial Commitments	Commitment	In Use	Year Of Expiry	Amount Of Commitment Expiration Per Period			
				Less Than 1 Year	1 To 3 Years	4 To 5 Years	After 5 Years
Letter of Credit Facilities	\$ 2,863,521	\$ 2,294,226	2003	\$ 2,294,226	\$	\$	\$

The Company has several letter of credit facilities provided on a syndicated and bilateral basis from commercial banks. These facilities (as well as the off balance sheet collateral arrangement described below) are principally utilized to support non-admitted insurance and reinsurance operations in the U.S. and capital requirements at Lloyd's. All of the commercial facilities are scheduled for renewal during the remainder of 2003. In

addition to letters of credit, the Company has established insurance trusts in the U.S. that provide cedants with statutory relief under state insurance regulations in the U.S. It is anticipated that the commercial facilities will be renewed on expiry but such renewals are subject to the availability of credit from banks utilized by the Company. In the event that such credit support is insufficient, the Company could be required to provide alternative security to cedants. This could take the form of additional insurance trusts supported by the Company's investment portfolio or funds withheld using the Company's cash resources. The value of letters of credit required is driven by, among other things, loss development of existing reserves, the payment pattern of such reserves, the expansion of business written by the Company and the loss experience of such business.

The Company entered into a new \$100.0 million letter of credit facility in January 2003 to provide additional capacity to support the Company's U.S. non-admitted business. The facility was fully utilized at March 31, 2003.

In February 2003, the Company entered into an aggregate of \$300.0 million of commercial paper-based credit facilities (the Credit Facilities) and expects to increase these facilities to \$500.0 million later in 2003. At maturity, the Company will be obligated to make payments in an amount equal to the principal and accrued interest outstanding under the Credit Facilities. The Company could face additional obligations under the Credit Facilities prior to the stated maturity of February 25, if certain events were to occur, including, but not limited to the Company's insolvency, withdrawal of assets from the Trust by the ceding company, the downgrade of the Company's credit ratings below certain specified levels, or the failure of the agent to have a first priority perfected security interest in the collateral posted by the Company.

For information regarding cross-default and certain other provisions in the Company's debt and convertible securities documents, see Item 7 of the Company's Form 10-K for the year ended December 31, 2002.

The Company has had several share repurchase programs in the past as part of its capital management strategy. On January 9, 2000, the Board of Directors authorized a program for the repurchase of shares up to \$500.0 million. Under this plan, the Company has purchased 6.6 million shares at an aggregate cost of \$364.6 million or an average cost of \$55.24 per share. The Company has \$135.4 million remaining in its share repurchase authorization. During the three months ended March 31, 2003, no shares were repurchased in the open market. The Company has repurchased shares from employees and directors in relation to withholding tax on restricted stock.

Current Outlook

The Company believes that current premium rate increases and favorable terms and conditions generally will continue through 2004 for most lines of property and casualty business that the Company writes. While cash flow from operations is expected to be strong for the remainder of 2003, lower average yields on the investment portfolio could adversely affect future investment income.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

The Company enters into derivatives and other financial instruments primarily for risk management purposes. The Company's derivative transactions can expose the Company to credit default swap risk, weather and energy risk, investment market risk, and foreign currency exchange rate risk. The Company attempts to manage these risks based on guidelines established by senior management. Derivative instruments are carried at fair value with resulting changes in fair value recognized in income in the period in which they occur.

Value-at-risk (VaR) is one of the tools used by management to estimate potential losses in fair values using historical rates, market movements and credit spreads to estimate the volatility and correlation of these factors to calculate the potential loss that could occur over a defined period of time given a certain probability.

This risk management discussion and the estimated amounts generated from the sensitivity and VaR analyses presented in this document are forward-looking statements of market risk assuming certain adverse market conditions occur. Actual results in the future may differ materially from these estimated results due to, among other things, actual developments in the global financial markets. The results of analysis used by the Company to assess and mitigate risk should not be considered projections of future events of losses. See generally Cautionary Note Regarding Forward-Looking Statements.

Credit Default Swaps

The Company has written certain financial guaranty transactions in derivative or swap form. The Company does not actively trade these transactions and generally issues and holds these contracts to maturity. Changes in fair

value can result from changes in market credit spreads, supply and demand for similar type instruments, changes in future loss and/or recovery estimates, interest rates and credit rating upgrades or downgrades. The Company therefore is at risk for changes in fair value due to changes in any of the above factors.

Weather and Energy Risk

The Company offers weather and energy risk management products in insurance or derivative form to end-users, while managing the risks in the over-the-counter and exchange traded derivatives markets. In addition to entering into transactions with end-users (which represents the majority of the Company's weather and energy derivative transactions), the Company also maintains a smaller weather and energy derivatives trading portfolio. The fair values of these transactions are determined using available market data and internal pricing models using consistent statistical methodologies.

The Company's aggregate average, low and high seasonal VaR amounts for its weather risk management portfolio, calculated at a 99% confidence level, during the period ended March 31, 2003 were \$164.9 million, \$154.6 million and \$175.6 million, respectively. The corresponding levels for the weather risk management portfolio during the period ended March 31, 2002 were \$44.9 million, \$25.8 million and \$56.3 million, respectively. The Company calculates its aggregate VaR by summing the VaR amounts for each of its seasonal holding portfolios. The Company's aggregation methodology yields a conservative aggregate portfolio VaR, as current weather events and patterns have an immaterial effect on expectations for future seasons. Therefore, the Company could greatly reduce or eliminate its VaR on future seasons by selling its positions prior to the beginning of a season. At present, the Company's VaR calculation does not exceed \$60 million in any one season. Since VaR statistics are estimates based on historical data and market information, VaR should not be viewed as an absolute, predictive gauge of future financial performance or as a way for the Company to predict risk. There can be no assurance that the Company's actual future losses will not exceed its VaR amounts.

For the Company's energy portfolio, VaR is calculated using a one-day holding period. Management has established a daily VaR limit for this portfolio of \$3.5 million. The Company's average, low and high daily VaR amounts calculated at a 99% confidence level, during the period ended March 31, 2003 were \$2.3 million, \$2.0 and \$2.7 million, respectively. The corresponding amounts during the period ended March 31, 2002 were \$0.5 million, \$0.2 million and \$1.1 million, respectively.

The following table summarizes the movement in the fair value of weather and energy contracts outstanding during the three months ended March 31, 2003:

(U.S. dollars in thousands)

	Three Months Ended March 31, 2003	
Fair value of contracts outstanding, beginning of the year	\$	(6,024)
Option premiums received, net of premiums realized (1)		(110,851)
Reclassification of settled contracts to realized (2)		68,198
Other changes in fair value (3)		(25,947)
Fair value of contracts outstanding, end of period	\$	(74,624)

- (1) The Company collected \$142.7 million of paid premiums and realized \$31.8 million of premiums on expired transactions for a net increase in the balance sheet derivative liability of \$110.9 million.
- (2) The Company paid \$68.2 million to settle derivative positions during the quarter resulting in a reclassification of this amount from unrealized to realized and reduces the derivative liability on the balance sheet.
- (3) This represents the effects of changes in commodity prices, the time value of options, and other valuation adjustments of \$25.9 million on the Company's derivative positions, primarily attributable to hedges of the positions that realized \$31.8 million of premiums.

The change in the fair value of contracts outstanding at March 31, 2003 as compared to the beginning of the year is primarily due to the increased volume of weather and energy risk management contracts written during the first quarter of 2003.

31

The following table summarizes the maturity of contracts outstanding as of March 31, 2003:

Source Of Fair Value	Less Than 1 Year	1-3 Years	4-5 Years	Greater Than 5 Years	Total Fair Value
Prices actively quoted	\$ (1,745)	\$	\$	\$	\$ (1,745)
Prices based on models and other valuation methods	(84,765)	6,715	5,171		(72,879)
Total fair value of contracts outstanding	\$ (86,510)	\$ 6,715	\$ 5,171	\$	\$ (74,624)

In managing its weather and energy risk management business, the Company seeks to identify, assess, monitor and manage its market, credit, operational and legal risks in accordance with defined policies and procedures. The Company's senior management takes an active role in the risk management process and has developed and implemented policies and procedures that require specific administrative and business functions to assist in the identification, assessment and control of various risks within the operation. Due to the changing nature of the global marketplace, the Company's risk management policies, procedures and methodologies are constantly evolving and are subject to ongoing review and modification. Market, credit, operational, legal and other risks are inherent in the Company's weather and energy risk management business and cannot be wholly eliminated despite the Company's risk management policies, procedures and methodologies.

Investment Market Risk

The Company's investment portfolio consists of exposures to fixed income securities, equities, alternative investments, derivatives, business and other investments, and cash. These securities and investments are denominated in both U.S. dollar and foreign currencies.

Through the structure of the Company's investment portfolio, the Company's earnings are directly affected by changes in the valuations of the securities and investments held in the investment portfolio. These valuation changes reflect changes in interest rates (eg: changes in the level, slope and curvature of the yield curves, volatility of interest rates, mortgage prepayment speeds and credit spreads), credit quality, equity prices (e.g. changes in prices and volatilities of individual securities, equity baskets and equity indices) and foreign currency exchange rates (e.g. changes in spot prices, forward prices and volatilities of currency rates). Market risk therefore arises due to the uncertainty surrounding the future valuations of these different assets, the factors that impact their values and the impact that this could have on the Company's earnings.

The Company seeks to manage the risks of the investment portfolio through a combination of asset class, country, industry and security level diversification and investment manager allocations. Further, individual security and issuer exposures are controlled and monitored at the investment portfolio level, via specific investment constraints outlined in investment guidelines and agreed with the external investment professionals. Additional constraints are agreed with the external investment professionals that may address exposures to eligible securities, prohibited investments/transactions, credit quality and general concentration limits.

The Company's direct use of investment derivatives includes futures, forwards, swaps and option contracts that derive their value from underlying assets, indices, reference rates or a combination of these factors. When investment guidelines allow for the use of derivatives, these can generally only be used for the purposes of managing interest rate risk, foreign exchange risk and credit risk, provided the use of such instruments is incorporated in the overall portfolio duration, spread, convexity and other relevant portfolio metrics. The direct use of derivatives

is not permitted to economically leverage the portfolio outside of the stated guidelines. Derivatives may also be used to add value to the investment portfolio where market inefficiencies are perceived to exist, to utilize cash holdings to purchase equity indexed derivatives and to adjust the duration of a portfolio of fixed income securities to match the duration of related deposit liabilities.

Investment Value-At-Risk

The VaR of the total investment portfolio at March 31, 2003, based on a 95% confidence level with a one month holding period, was approximately \$382.4 million. The VaR of all investment related derivatives excluding investments in affiliates and other investments was approximately \$7.0 million. The Company's investment portfolio VaR as at March 31, 2003 is not necessarily indicative of future VaR levels.

32

To complement the VaR analysis which is based on normal market environments, the Company considers the impact on the investment portfolio in several different historical stress periods to analyze the effect of unusual market conditions. The Company establishes certain historical stress test scenarios which are applied to the actual investment portfolio. As these stress tests and estimated gains and losses are based on historical events, they will not necessarily reflect future stress events or gains and losses from such events. The results of the stress test scenarios are reviewed on a regular basis to ensure they reflect current shareholders equity, market conditions and the Company's total risk profile. Given the investment portfolio allocations as at March, 31 2003, the Company would expect to lose approximately 4.8% of the portfolio if the most damaging event stress tested was repeated, all other things held equal. Given the investment portfolio allocations as at 31 March 2003, the Company would expect to gain approximately 14.2% of the portfolio if the most favorable event stress tested was repeated, all other things held equal. The Company assumes that no action is taken during the stress period to either liquidate or rebalance the portfolio and believes that this fairly reflects the potential decreased liquidity that is often associated with stressed market environments.

Investment Credit Risk

The Company is exposed to credit risk through its portfolio of debt securities which has historically been a significant exposure in the investment portfolio. As at March 31, 2003, the average credit quality of the Company's total fixed income portfolio, which includes fixed maturities, short term investments, cash and cash equivalents and net payable for investments purchased, was AA.

The Company's total fixed income portfolio credit quality breakdown as at March 31, 2003 is shown in the following table:

Rating	Percentage of Total Fixed Income Exposure(1)
AAA	59.7%
AA	14.0%
A	13.5%
BBB	7.8%
BB and Below	5.1%

(1) Portfolio includes fixed maturities, short term investments, cash and cash equivalents and net payable for investments purchased.

Individual corporate holdings in the portfolio are diversified, exceeding 1,000 separate issuer exposures. As at March 31, 2003, the top 10 corporate exposures represented approximately 5% of the total fixed income portfolio (excluding operating cash balances) and approximately 15% of the corporate holdings. The top 10 corporate holdings listed below utilizes a conservative approach to aggregation as it includes unsecured as well as securitized, credit enhanced and collateralized securities issued by parent companies and their affiliates.

Top 10 Corporate Exposures as at March 31, 2003(1)	Percentage of Total Fixed Income Exposure
Citigroup	0.77%

JP Morgan Chase	0.72%
General Electric	0.68%
Ford Motor	0.61%
Credit Suisse Group	0.49%
Morgan Stanley Dean Witter	0.44%
Verizon	0.43%
General Motors	0.42%
Daimler Chrysler	0.42%
American International Group	0.41%

- (1) Corporate exposures include parent and affiliated companies that issue fixed income securities. In some cases a portion of the market value may be invested in bonds that are securitized or have sufficient credit

enhancement that provides a long-term credit rating that is higher than the rating of the unsecured debt of the parent company.

Interest Rate and Equity Price Risk

The Company believes that VaR is an appropriate indicator of the risk of the portfolio, however an immediate 100 basis point adverse shift in global treasury government bond curves would result in a decrease in total return of 5.1% or \$780.0 million in the Company's fixed income portfolio at March 31, 2003. It is unlikely that all global yield curves would shift at the same time. In evaluating the impact of price changes in the equity portfolio, a 10% change in equity prices would affect total return by approximately \$53.0 million at March 31, 2003.

At March 31, 2003, bond and stock index futures outstanding were \$221.9 million with underlying investments having a market value of \$1.0 billion. Losses of \$0.02 million were realized on these contracts for the three months ended March 31, 2003. The Company reduces its exposure to these futures through offsetting transactions, including options and forwards.

Foreign Currency Exchange Risk

The Company uses foreign exchange contracts to manage its exposure to the effects of fluctuating foreign currencies on the value of certain of its foreign currency fixed maturities and equity investments. These contracts are not designated as specific hedges for financial reporting purposes and therefore, realized and unrealized gains and losses on these contracts are recorded in income in the period in which they occur. These contracts generally have maturities of three months or less. In addition, where the Company's investment managers believe potential gains exist in a particular currency, a forward contract may not be entered into. At March 31, 2003 and 2002, forward foreign exchange contracts with notional principal amounts totaling \$33.1 million and \$61.3 million, respectively were outstanding. The fair value of these contracts as at March 31, 2003 and 2002 was \$33.8 million and \$60.8 million, respectively, with an unrealized loss of \$0.7 million in 2003 and an unrealized gain of \$0.5 million in 2002. For the years ended March 31, 2003 and 2002, realized gains of \$3.4 million and realized losses of \$0.8 million, respectively, and unrealized losses of \$1.2 million and unrealized gains of \$0.4 million, respectively, were recorded in net realized and unrealized gains and losses on derivative instruments.

The Company attempts to manage the exchange volatility arising on certain administration costs denominated in foreign currencies. Throughout the year, forward contracts are entered into to acquire foreign currencies at an agreed rate in the future. At March 31, 2003, the Company had forward contracts outstanding for the purchase of \$6.6 million of Euros at fixed rates. The unrealized gain on these contracts at March 31, 2003 was \$0.6 million.

In February 2003, the Company entered into a series of forward exchange contracts to cover approximately 60%, or \$110.4 million (£70 million), of the Company's exposure to a U.K. sterling reinsurance recoverable balance at one of its U.K. based insurance operations. The mark to market value of these contracts was an unrealized gain of \$0.8 million at March 31, 2003.

ITEM 4. CONTROLS AND PROCEDURES

Within the 90 days prior to the date of filing this quarterly report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and the Company's Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the Company's Chief Executive Officer and the Company's Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no significant changes in the Company's internal controls or in other factors which could significantly affect internal controls subsequent to the date the Company carried out its evaluation.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 (PSLRA) provides a safe harbor for forward-looking statements. Any prospectus, prospectus supplement, the Company's Annual Report to ordinary shareholders, any proxy statement, any other Form 10-K, Form 10-Q or Form 8-K of the Company or any other written or oral statements made by or on behalf of the Company may include forward-looking statements which reflect the Company's current views with respect to future events and financial performance. Such statements include forward-looking statements both with respect to the Company in general, and to the insurance, reinsurance and financial products and services sectors in particular (both as to underwriting and investment matters). Statements which include the words expect, intend, plan, believe, project, anticipate, will, and similar statements of a future or forward-looking nature identify forward-looking statements for purposes of the PSLRA or otherwise.

All forward-looking statements address matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in such statements. The Company believes that these factors include, but are not limited to, the following: (i) rate increases and improvements in terms and conditions may not be as large or significant as the Company is currently projecting; (ii) the timely and full recoverability of reinsurance placed by the Company with third parties, or other amounts due to the Company, including, without limitation, amounts due to the Company from the Seller in connection with the Company's acquisition of Winterthur International; (iii) the projected amount of ceded reinsurance recoverables and the ratings and creditworthiness of reinsurers may change; (iv) the timing of claims payments being faster or the receipt of reinsurance recoverables being slower than anticipated by the Company; (v) ineffectiveness or obsolescence of the Company's business strategy due to changes in current or future market conditions; (vi) increased competition on the basis of pricing, capacity, coverage terms or other factors; (vii) greater frequency or severity of claims and loss activity, including as a result of natural or man-made catastrophic events, than the Company's underwriting, reserving or investment practices anticipate based on historical experience or industry data; (viii) developments in the world's financial and capital markets which adversely affect the performance of the Company's investments and the Company's access to such markets; (ix) the potential impact on the Company from government-mandated insurance coverage for acts of terrorism; (x) the potential impact of off-balance sheet arrangements on the Company; (xi) developments in bankruptcy proceedings or other developments related to bankruptcies of companies insofar as they affect property and casualty insurance and reinsurance coverages or claims that the Company may have as a counterparty; (xii) availability of borrowings and letters of credit under the Company's credit facilities; (xiii) changes in regulation or tax laws applicable to the Company or its subsidiaries, brokers or customers; (xiv) acceptance of the Company's products and services, including new products and services; (xv) changes in the availability, cost or quality of reinsurance; (xvi) changes in the distribution or placement of risks due to increased consolidation of insurance and reinsurance brokers; (xvii) loss of key personnel; (xviii) the effects of mergers, acquisitions and divestitures; (xix) changes in rating agency policies or practices; (xx) changes in accounting policies or practices or the application thereof; (xxi) legislative or regulatory developments; (xxii) changes in general economic conditions, including inflation, foreign currency exchange rates and other factors; (xxiii) the effects of business disruption or economic contraction due to war, terrorism or other hostilities; and (xxiv) the other factors set forth in the Company's other documents on file with the SEC. The foregoing review of important factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included herein or elsewhere. The Company undertakes no obligation to update publicly or revise any forward-looking statement, whether as a result of new information, future developments or otherwise.

XL CAPITAL LTD
PART II OTHER INFORMATION

Item 1. Legal Proceedings

The Company is a party to various legal proceedings, including arbitrations, arising in the ordinary course of business. Such legal proceedings generally relate to claims asserted by or against the Company's subsidiaries in the ordinary course of their respective insurance, reinsurance and financial products and services operations. The Company does not believe that the eventual resolution of any of the legal proceedings to which it is a party will result in a material adverse effect on its financial condition or results of operations.

Item 4. Submission of Matters to a Vote of Shareholders

None.

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

99.1* XL Capital Assurance Inc. unaudited condensed financial statements for the three month periods ended March 31, 2003 and 2002.

99.2* XL Financial Assurance Ltd. unaudited condensed financial statements for the three month periods ended March 31, 2003 and 2002.

99.3** Certification pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

* Previously filed with XL Capital Ltd's Quarterly Report on Form 10-Q for the quarter ended March 31, 2003, filed on May 15, 2003.

** Filed herewith.

(b) Reports on Form 8-K

None.

36

SIGNATURES

Pursuant to the requirements of the Securities and Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

XL CAPITAL LTD
(Registrant)

**CERTIFICATION
OF CHIEF EXECUTIVE OFFICER**

XL CAPITAL LTD

**Pursuant to section 302 of the Sarbanes-Oxley Act of 2002
(Chapter 63, Title 18 U.S.C.§§.1350(a) and (b))**

I, Brian M. O Hara, certify that:

1. I have reviewed this quarterly report on Form 10-Q/A of XL Capital Ltd;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the Evaluation Date); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

Edgar Filing: XL CAPITAL LTD - Form 10-Q/A

6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
