Risk Factors

An investment in the senior notes involves certain risks that you should carefully evaluate prior to making an investment in the senior notes. In particular, you should evaluate the specific risk factors under [Risk Factors] on page S-4 of this prospectus supplement and the disclosure contained in the documents incorporated by reference into this prospectus supplement and the accompanying prospectus for a discussion of certain risks involved with an investment in the senior notes.

S-3

RISK FACTORS

Investing in the senior notes involves risk. In deciding whether to invest in the senior notes, you should carefully consider the following risk factors related to the senior notes, in addition to the other information contained in this prospectus supplement, the accompanying prospectus and the information incorporated by reference herein and therein.

Because we are a holding company and substantially all of our operations are conducted by our subsidiaries, our obligations under the senior notes are effectively subordinated to the obligations of our subsidiaries.

We currently conduct substantially all of our operations through our subsidiaries, and our subsidiaries generate substantially all of our operating income and cash flow. Our ability to pay our obligations under the senior notes depends on our ability to obtain cash dividends or other cash payments or obtain loans from our subsidiaries, which are separate and distinct legal entities that will have no obligations to pay any dividends or to lend or advance us funds and which may be restricted from doing so by contract, including other financing arrangements, charter provisions or applicable legal or regulatory requirements and may also depend on the financial condition and regulatory requirements of our subsidiaries. As a result, our obligations under the senior notes will be effectively subordinated to all of the obligations of our subsidiaries. For a description of certain regulatory restrictions on the payments of dividends by our subsidiaries, see Note 25 of the notes to the consolidated financial statements of XL Capital incorporated by reference to our Annual Report on Form 10-K for the year ended December 31, 2003.

In addition, because we are a holding company, except to the extent that we have priority or equal claims against our subsidiaries as a creditor, our obligations under the senior notes will be effectively subordinated to the obligations of our subsidiaries.

As of September 30, 2004, on a pro forma basis after giving effect to this offering, the aggregate amount of our outstanding consolidated indebtedness for money borrowed was approximately \$2.7 billion. All such outstanding indebtedness is unsecured and unsubordinated. As of September 30, 2004, the aggregate amount of outstanding indebtedness for money borrowed of our subsidiaries (other than XL Capital Finance (Europe) plc), which would effectively rank senior to the senior notes, was approximately \$355.0 million. The senior notes will also be structurally subordinated to losses and loss expenses and other obligations of our subsidiaries.

The secondary market for the senior notes may be illiquid.

We are unable to predict how the senior notes will trade in the secondary market or whether that market will be liquid or illiquid. While a secondary market for the 2014 Notes currently exists, we can give you no assurance as to the liquidity of such market, your ability to sell the 2014 Notes or whether such market will continue. There is currently no secondary market for the 2024 Notes and we give you no assurance as to the liquidity of any market that may develop for the 2024 Notes, your ability to sell the 2024 Notes or whether a trading market, if it develops, will continue. We have no obligation to apply for any listing of the senior notes on any stock exchange.

The trading price of the senior notes may not fully reflect the value of their accrued but unpaid interest.

The senior notes may trade at a price that does not fully reflect the value of their accrued but unpaid interest. If you dispose of your senior notes between record dates for interest payments, you will be required to include in gross income for U.S. federal income tax purposes accrued interest through the date of disposition as ordinary income.

- \bullet the other factors set forth in our other documents on file with the Securities and Exchange Commission, or the []SEC.[]

The foregoing review of important factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included herein or elsewhere. We undertake no obligation to update publicly or revise any forward-looking statement, whether as a result of new information, future developments or otherwise.

USE OF PROCEEDS

We estimate our net proceeds from our sale of \$650,000,000 aggregate principal amount of senior notes in this offering, after deducting underwriting discounts and commissions and estimated offering expenses, to be approximately \$644.8 million. Consummation of the offering of the 2014 Notes and consummation of the offering of the 2024 Notes are conditioned upon each other.

We intend to use the net proceeds from this offering, together with available cash, to redeem all of our outstanding Zero-Coupon Convertible Debentures due 2021, or [CARZ,] on November 29, 2004. At September 30, 2004, the aggregate accreted value of CARZ outstanding was approximately \$654,991,000. Interest on the CARZ for the six months ended November 23, 2004 accretes at a rate of 2.625% per annum. The maturity date of the CARZ is May 23, 2021.

S-7

RATIO OF EARNINGS TO FIXED CHARGES

Our ratio of earnings to fixed charges for each of the periods indicated is as follows:

	Nine Months Ended September 30, 2004	F	'iscal Yeaı	Ended I	December 3	31,
		2003	2002	2001	2000**	1999**
Ratio of Earnings to Fixed Charges	5.4x	3.1x	3.3x	*	6.5x	8.3x

^{*} For the year ended December 31, 2001, earnings were insufficient to cover fixed charges by \$832.4 million.

^{**} The ratio reflects certain reclassifications of interest expense related to the accretion of deposit liabilities that were implemented retroactively effec- tive March 31, 2002.

We have computed the foregoing ratio by dividing (1) income from continuing operations before income taxes, minority interest and income or loss from affiliate investments plus the sum of fixed charges, amortization of capitalized interest and distributed income of equity investments, less minority interest, by (2) fixed charges. Fixed charges consist of interest expense on all indebtedness (including amortization of deferred financing costs), the portion of operating lease rental expense that is representative of the interest factor (deemed to be 30% of operating lease rentals) and interest credited to policyholders consisting of accretion of deposit liability transactions.

- (1) Results for all periods subsequent to July 1, 2001 include the results of Winterthur International, which was acquired with effect from this date. The results also include the consolidation of XL Re Europe, which is accounted for as a subsidiary with effect from January 1, 2002. In the years ended December 31, 2001, 2000 and 1999, our share of net income of Le Mans Ré (now known as XL Re Europe) was included in equity in net income of insurance and operating affiliates. Our net income for the years ended December 31, 2003, 2002 and 2001 was impacted by the September 11 event. See Item 8, Note 4 to our consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2003. The effect of all of these items should be considered when making period to period comparisons of our results of operations and financial condition and liquidity. See Item 7, []Management[]s Discussion and Analysis of Financial Condition and Results of Operations[] in our Annual Report on Form 10-K for the year ended December 31, 2003 for further discussion and analysis.
- (2) Information includes the financial results of NAC for the full year then ended.
- (3) The loss and loss expense ratio is calculated by dividing the losses and loss expenses incurred by the net premiums earned for general insurance and reinsurance operations.
- (4) The underwriting expense ratio is the sum of acquisition expenses and operating expenses for general insurance and reinsurance operations divided by net premiums earned for general insurance and reinsurance operations. See Item 8, Note 3 to our consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2003 for further information.
- (5) The combined ratio is the sum of the loss and loss expense ratio and the underwriting expense ratio. A combined ratio under 100% represents an underwriting profit and over 100% represents an underwriting loss.

DESCRIPTION OF THE SENIOR NOTES

We will issue the 2014 Notes and the 2024 Notes under a senior indenture that we have entered into and a supplemental indenture that we will enter into with The Bank of New York, as trustee. Certain terms of the 2014 Notes offered hereby are also set forth in a supplemental indenture that we entered into with The Bank of New York, as trustee, pursuant to which we issued \$300.0 million aggregate principal amount of 5.25% Senior Notes due 2014 on August 23, 2004. Copies of the indenture and the supplemental indenture pursuant to which we issued the 5.25% Senior Notes due 2014 on August 23, 2004 are on file with the SEC and may be obtained by accessing the internet address provided or contacting us as described under []Where You Can Find More Information[] in the accompanying prospectus. The following description is not complete, and is qualified in all respects by reference to the indenture and the supplemental indentures, the forms of which will be, or have been, filed as exhibits on Form 8-K. You should read the indenture, the supplemental indentures, as applicable, and the associated documents carefully to fully understand the terms of the senior notes. In addition, to the extent that the following description is not consistent with that contained in the accompanying prospectus under []Description of XL Capital Debt Securities,]] you should rely on this description.

Maturity and Interest

The 2014 Notes will mature on September 15, 2014 and the 2024 Notes will mature on November 15, 2024. Unless previously redeemed in full as provided herein, we will repay the 2014 Notes and the 2024 Notes at their respective principal amounts plus accrued and unpaid interest on September 15, 2014 and November 15, 2024, respectively.

The 2014 Notes will bear interest at the rate of 5.25% per annum from August 23, 2004 to maturity or early redemption. Interest on the 2014 Notes will be payable semi-annually on March 15 and September 15 of each year, commencing on March 15, 2005, to the persons in whose names such senior notes were registered at the close of business on the preceding March 1 and September 1, respectively.

The 2024 Notes will bear interest at the rate of 6.375% per annum from November 12, 2004 to maturity or early redemption. Interest on the 2024 Notes will be payable semi-annually on May 15 and November 15 of each

year, commencing on May 15, 2005, to the persons in whose names such senior notes were registered at the close of business on the preceding May 1 and November 1, respectively.

Interest on the senior notes will be computed on the basis of a 360-day year comprised of twelve 30-day months. The amount of interest payable for any period shorter than a full semi-annual period for which interest is computed will be computed on the basis of the actual number of days elapsed in the 180-day period. Principal and interest will be payable, and the senior notes will be transferable or exchangeable, at the office or offices or agency maintained by us for this purpose.

General Terms of the Senior Notes

The senior notes will be the direct, unsecured and unsubordinated obligations of XL Capital Ltd. The senior notes will rank equal in right of payment with all of our other unsecured and unsubordinated indebtedness. As of September 30, 2004, on a pro forma basis after giving effect to this offering, the aggregate amount of our outstanding consolidated indebtedness for money borrowed was approximately \$2.7 billion. All such outstanding indebtedness is unsecured and unsubordinated. The senior notes will be structurally subordinated to losses and loss expenses and other obligations of our subsidiaries. As of September 30, 2004, the aggregate amount of indebtedness for money borrowed of our subsidiaries (other than XL Capital Finance (Europe) plc), which would effectively rank senior to the senior notes, was \$355.0 million.

The 2014 Notes offered hereby constitute an additional issuance of 5.25% Senior Notes due 2014 and, together with the \$300.0 million aggregate principal amount of 5.25% Senior Notes due 2014 issued on August 23, 2004, will constitute a single series of senior notes for all purposes under the indenture and the applicable supplemental indenture.
