CellStar Corporation and Subsidiaries
Notes to Consolidated Financial Statements
(Unaudited)

(1) Basis for Presentation

Although the interim consolidated financial statements of CellStar Corporation and subsidiaries (the "Company") are unaudited, Company management is of the opinion that all adjustments (consisting of only normal recurring adjustments) necessary for a fair statement of the results have been reflected therein. Operating revenues and net income for any interim period are not necessarily indicative of results that may be expected for the entire year.

These statements should be read in conjunction with the consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K for the year ended November 30, 2001.

Edgar Filing: CELLSTAR CORP - Form 10-Q

Certain prior period financial statement amounts have been reclassified to conform to the current year presentation.

On February 12, 2002, the stockholders approved a one-for-five reverse stock split. The reverse stock split was effective February 22, 2002. Where appropriate, share numbers in this Form 10-Q have been adjusted to reflect the one-for-five reverse stock split.

(2) Net Income Per Share

Basic net income per common share is based on the weighted average number of common shares outstanding for the relevant period. Diluted net income per common share is based on the weighted average number of common shares outstanding plus the dilutive effect of potentially issuable common shares pursuant to stock options and convertible notes.

7

A reconciliation of the numerators and denominators of the basic and diluted net income per share computations for the three months ended February 28, 2002 and 2001, follows (in thousands, except per share data):

	2002	2001
	-----	-----
Basic:		
Income before extraordinary gain	\$ 458	4,192
Extraordinary gain on early extinguishment of debt, net of tax	10,937	-

Edgar Filing: CELLSTAR CORP - Form 10-Q

5% Senior convertible notes	697	-
5% Convertible subordinated notes	-	-

Weighted average number of share outstanding including effect of dilutive securities	12,725	12,029
=====		
Income per share before extraordinary gain	\$ 0.04	0.35
Extraordinary gain per share on early extinguishment of debt net of tax	0.86	-

Net income per share	\$ 0.90	0.35
=====		

Options outstanding at February 28, 2002 and 2001, to purchase 1.5 million and 1.0 million shares of common stock for the three months ended February 28, 2002 and 2001 were not included in the computation of diluted earnings per share (EPS) because their inclusion would have been anti-dilutive.

The \$39.1 million of 5% senior convertible notes issued in the exchange offer (footnote 5) are convertible into 7.8 million shares of the Company's common stock on or before November 30, 2002 and are considered as dilutive securities beginning February 20, 2002. The 5% convertible subordinated notes were not dilutive for the three months ended February 28, 2002 and 2001, respectively.

(3) Segment and Related Information

The Company operates predominately within one industry, wholesale and retail sales of wireless telecommunications products. The Company's management evaluates operations primarily on income before interest and income taxes in the following reportable geographical regions: Asia-Pacific, North America, Latin America, including Mexico and the Company's Miami, Florida operations ("Miami"), and Europe. Revenues and operations of Miami are included in Latin America since Miami's product sales are primarily for export to

8

South American and Caribbean countries, either by the Company or through its exporter customers. The Corporate segment includes headquarter operations, income and expenses not allocated to reportable segments and interest expense on the Company's domestic revolving line of credit and 5% convertible subordinated notes. Corporate segment assets primarily consist of cash, cash equivalents and deferred income tax assets. Intersegment sales and transfers are not significant.

Segment asset information as of February 28, 2002, and November 30, 2001, follows (in thousands):

	Asia-Pacific	North America	Latin America	Europe	Corporate

(4) Notes Payable

Notes payable consisted of the following at February 28, 2002 and November 30, 2001 (in thousands):

	2002	2001
Revolving credit facility	\$ 40,239	-
Peoples' Republic of China ("PRC") credit facilities	50,680	39,078
Peoples' Republic of China ("PRC") notes payable	5,799	5,799
Taiwan notes payable	6,163	7,767
	\$ 102,881	52,644
	=====	=====

As of September 28, 2001, the Company had negotiated and finalized a new, five-year, \$60.0 million Loan and Security Agreement ("the Facility") with a bank and terminated its previous multicurrency

revolving credit facility. On October 12, 2001 the Company finalized an amendment to the Facility increasing the commitment amount from \$60.0 million to \$85.0 million.

Fundings under the Facility are limited by a borrowing base test, which is measured weekly. Interest on borrowings under the Facility is at the London Interbank Offered Rate or at the bank's prime lending rate, plus an applicable margin. The Facility is also secured by a pledge of 100% of the outstanding stock of all U.S. subsidiaries and 65% of the outstanding stock of all first tier foreign subsidiaries. The Facility is further secured by the Company's domestic accounts receivable, inventory, property, plant and equipment and all other domestic real property and intangible assets. The Facility contains, among other provisions, covenants relating to the maintenance of minimum net worth and certain financial ratios, exchanging, refinancing or extending of the Company's 5% convertible subordinated notes, dividend payments, additional debt, mergers and acquisitions and disposition of assets.

At February 28, 2002, the Company's operations in China had two lines of credit, one for USD \$12.5 million and the second for RMB (Chinese People's Currency) 316 million (approximately USD \$38.2 million), bearing interest at 7.16%, and from 5.28% to 5.56% respectively. The loans have maturity dates through September 2002. The lines of credit are partially collateralized by U.S. dollar cash deposits and accounts receivable from the Company's operations in China. The cash deposits were made via intercompany loans from the operating entity in Hong Kong as a mechanism to secure repatriation of these funds. At February 28, 2002, the U.S. dollar equivalent of \$50.7 million had been borrowed against the lines of credit in China. As a result of this method of funding operations in China, the consolidated balance sheet at February 28, 2002 reflects USD \$35.6 million in cash that is restricted as collateral on these advances and a corresponding USD \$50.7 million in notes payable. At February 28, 2002, China also had a \$5.8 million promissory note to a bank which matures December 2002 and bears interest at 5.85%. In addition, the Company has notes payable in Taiwan totaling \$6.2 million, which matured December 2001 and have been extended with payments through August 2002 by oral agreement of the parties, and bears interest at 4.03%.

Based upon current and anticipated levels of operations, the Company anticipates that its cash flows from operations, together with amounts available under its Facility and existing unrestricted cash balances, will be adequate to meet its anticipated cash requirements in the foreseeable future. In the event that existing unrestricted cash balances, cash flows and available borrowings under the Facility are not sufficient to meet future cash requirements, the Company may be required to reduce planned expenditures or seek additional financing. The Company can provide no assurances that reductions in planned expenditures would be sufficient to cover shortfalls in available cash or that additional financing would be available or, if available, offered on terms acceptable to the Company.

(5) Exchange Offer

On January 14, 2002, the Company filed an S-4 registration statement (the "Exchange Offer"), with the Securities and Exchange Commission ("SEC"), offering to exchange, for each \$1,000 principal amount of its existing 5% Convertible Subordinated Notes (the "Subordinated Notes") due October 2002, \$366.67 in cash and, at the election of the holder, one of the following options: a) \$400.94 principal amount of 12% Senior Subordinated Notes due

Edgar Filing: CELLSTAR CORP - Form 10-Q

January 2007 (the "Senior Notes") or, b) \$320.75 principal amount of Senior Notes and \$80.19 principal amount of 5% Senior Subordinated Convertible Notes due November 2002 (the "Senior Convertible Notes") or, c) \$400.94 principal amount of Senior Convertible Notes.

On February 20, 2002, the Company completed its exchange offer for its \$150 million of Subordinated Notes due October 2002. Holders owning \$128.6 million of Subordinated Notes exchanged them for \$47.2 million in cash, \$12.4 million of Senior Notes due January 2007, and \$39.1 million of Senior Convertible notes due November 2002. Holders owning \$21.4 million of the Subordinated Notes did not exchange them, and they are now subordinate to the Company's Facility, the Senior Notes and the Senior Convertible Notes.

The Company realized a pre-tax extraordinary gain on early extinguishment of debt of \$17.1 million during the first quarter of fiscal 2002 (\$10.9 million after-tax) as a result of the exchange. The exchange was accounted for as a troubled debt restructuring in accordance with Financial Accounting Standards Board Statement No. 15. Accordingly the total future interest payments of \$8.8 million on the Senior Notes and Senior Convertible Notes have been accrued upon completion of the exchange and are included in accrued expenses (\$3.0 million) and other long-term liabilities (\$5.8 million) in the

10

accompanying February 28, 2002 balance sheet. The Company will not recognize these payments as interest expense in future periods.

The following summarizes the gain on early extinguishment of debt (in millions):

Face amount of Subordinated Notes exchanged	\$ 128.6
Deferred loan costs related to Subordinated Notes exchanged	(0.5)

Book value of Subordinated Notes	128.1
Consideration and expenses	
Cash	47.2
Senior Convertible Notes issued	39.1
Senior Notes issued	12.4
Future interest payments on notes issued	8.8
Expenses incurred	3.5

Gain on exchange	17.1
Taxes	6.2

Gain, net of tax	\$ 10.9
	=====

The Senior Convertible Notes are mandatorily convertible into the Company's common stock on November 30, 2002, and bear interest at 5%, payable semi-annually in arrears, in either cash or stock, at the Company's option, on August 15, 2002, and November 30, 2002. In the event of bankruptcy the

Edgar Filing: CELLSTAR CORP - Form 10-Q

Senior Convertible Note holders are entitled to cash equal to the face value of the Senior Convertible Note plus accrued interest. The Senior Convertible Notes are convertible into the Company's common stock at a conversion price of \$5.00 per share (adjusted for the effect of the one-for-five reverse stock split effective on February 22, 2002) and may be converted at any time prior to maturity at the option of the holders.

The \$39.1 million in Senior Convertible Notes issued in the Exchange Offer are convertible into 7.8 million shares of the Company's common stock.

The Senior Notes mature January 15, 2007, and bear interest at 12%, payable in cash in arrears semi-annually on February 15 and August 15, commencing August 15, 2002. The Senior Notes contain certain covenants that restrict the Company's ability to incur additional indebtedness, make investments, loans and advances, declare dividends or certain other distributions, create liens, enter into sale-leaseback transactions, consolidate, merge, sell assets and enter into transactions with affiliates.

(6) Contingencies

Refer to Part II, Item 1, "Legal Proceedings".

11

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The Company reported net income, including an extraordinary gain on early extinguishment of debt, of \$11.4 million, or \$0.90 per diluted share, for the first quarter of 2002, compared with net income of \$4.2 million, or \$0.35 per diluted share, for the same quarter last year. Net income before the extraordinary gain was \$0.5 million, or \$0.04 per diluted share for the quarter ended February 28, 2002. Revenues for the quarter ended February 28, 2002 were \$629.2 million, a decrease of \$16.0 million compared to \$645.2 million in 2001. Gross profit decreased from \$36.8 million in 2001 to \$34.7 million in 2002. Selling, general and administrative expenses for the first quarter of 2002 were \$31.2 million compared to \$28.9 million in 2001.

On February 20, 2002, the Company completed its exchange offer for its \$150 million 5% Convertible Subordinated Notes (the "Subordinates Notes") due October 2002. Holders owning \$128.6 million of Subordinated Notes exchanged them for \$47.2 million in cash, \$12.4 million of 12% Senior Subordinated Notes (the "Senior Notes") due January 2007, and \$39.1 million of 5% Senior Subordinated Convertible Notes (the "Senior Convertible Notes") due November 2002. Holders owning \$21.4 million of the Subordinated Notes did not exchange them, and they are now subordinate to the Company's domestic credit facility, the Senior Notes and the Senior Convertible Notes.

The Company realized a pre-tax extraordinary gain on early extinguishment of debt of \$17.1 million during the first quarter of fiscal 2002 (\$10.9 million after-tax) as a result of the exchange. The exchange was accounted for as a troubled debt restructuring in accordance with Financial Accounting Standards Board Statement No. 15.

Cautionary Statements

The Company's success will depend upon, among other things, economic and

Edgar Filing: CELLSTAR CORP - Form 10-Q

wireless market conditions, and its ability to improve its operating margins, continue to secure an adequate supply of competitive products on a timely basis and on commercially reasonable terms, service its indebtedness and meet covenant requirements, secure adequate financial resources, continually turn its inventories and accounts receivable, successfully manage growth (including monitoring operations, controlling costs, maintaining adequate information systems and effective inventory and credit controls), manage operations that are geographically dispersed, achieve significant penetration in existing and new geographic markets, and hire, train and retain qualified employees who can effectively manage and operate its business.

The Company's foreign operations are subject to various political and economic risks including, but not limited to, the following: political instability; economic instability; currency controls; currency devaluations; exchange rate fluctuations; potentially unstable channels of distribution; increased credit risks; export control laws that might limit the markets the Company can enter; inflation; changes in laws related to foreign ownership of businesses abroad; foreign tax laws; changes in cost of and access to capital; changes in import/export regulations, including enforcement policies; "gray market" resales; and tariff and freight rates. Such risks, and political and other factors beyond the control of the Company, including trade disputes among nations, internal political or economic instability in any nation where the Company conducts business, and terrorist acts, could have a material adverse effect on the Company.

Special Cautionary Notice Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements relating to such matters as anticipated financial performance and business prospects. When used in the Quarterly Report, the words "estimates", "may", "intends", "expects", "anticipates", "could", "should", "will" and similar expressions are intended to be among the statements that identify forward-looking statements. From time to time, the Company may also publish forward-looking statements. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. In order to comply with the terms of the safe harbor, the Company notes that a variety of factors, including those listed under "Cautionary Statements" above, could cause the Company's actual results and experience to differ materially from anticipated results or other expectations expressed in the Company's forward-looking statements.

12

Results of Operations

The following table sets forth certain unaudited consolidated statements of operations data for the Company expressed as a percentage of revenues for the three months ended February 28, 2002 and 2001:

	2002	2001
	-----	-----
Revenues	100.0%	100.0
Cost of sales	94.5	94.3
	-----	-----
Gross profit	5.5	5.7
Selling, general and administrative expenses	5.0	4.5

	=====	=====

Three Months Ended February 28, 2002 Compared to Three Months Ended February 28, 2001

Revenues. The Company's revenues decreased \$16.0 million, or 2.5%, from \$645.2 million to \$629.2 million.

Revenues in the Asia-Pacific Region increased \$52.6 million, or 17.6%, from \$298.5 million to \$351.1 million. The Company's operations in the People's Republic of China, including Hong Kong ("PRC"), provided \$308.9 million in revenues, an increase of \$54.6 million, or 21.5%, from \$254.3 million. Growth in the PRC, where market penetration of handsets is approximately 10% of the total population, was driven by increased market penetration. Revenues from the Company's operations in Singapore increased \$14.0 million to \$31.1 million, or 82.3%, due to carrier promotions introduced last year and increased sales to customers in the India, Malaysia, and Middle Eastern markets. Revenues from Taiwan decreased \$11.9 million, or 83.4% to \$2.4 million. The Company's supplier base in Taiwan is limited, and there are no compelling new products from its major supplier. The Company's operations in Taiwan were also affected by economic and political turmoil in the country and the high market penetration rate. Revenues in the Philippines declined from \$12.9 million to \$8.5 million, primarily due to a large customer purchasing directly from the manufacturer.

North American Region revenues were \$144.9 million, a decrease of \$1.6 million compared to \$146.5 million in 2001. Early in the first quarter of 2001, the Company converted a major U.S. account to a consignment basis with fulfillment fees. Revenues for the quarter ended February 28, 2001 on a comparable basis were \$115.7 million. The conversion to consignment did not significantly impact net income, but reduced inventory risk and the need for working capital. By converting to consignment basis, the Company is not required to purchase and hold inventory for this customer and therefore eliminates the Company's exposure to declines in market prices. The increase of \$29.2 million, after adjusting for the conversion to consignment, was primarily attributable to market expansion by a regional carrier customer.

The Company's operations in the Latin America Region provided \$86.2 million of revenues, compared to \$139.1 million in 2001, a 38.0% decrease. Revenues in Mexico, the region's largest revenue contributor, were \$45.4 million compared to \$76.1 million in 2001 due to reduced business with a large carrier customer. Revenues from the Company's Miami export operations were \$13.4 million compared to \$10.6 million in the first quarter a year ago, primarily due to increased business with customers in Central America and the Caribbean.

Edgar Filing: CELLSTAR CORP - Form 10-Q

Combined revenues from CellStar's Argentina, Chile, Colombia and Peru operations were \$27.4 million in 2002 and \$51.1 million in 2001. The decline is a result of significant promotional activity during the first quarter of 2001 by a major carrier in Colombia.

The Company's European Region operations recorded revenues of \$47.1 million, a decrease of \$13.9 million from \$61.0 million in 2001. The handset market in Europe is highly penetrated and is increasingly driven by replacement sales, which are depressed due to delays in the rollout and acceptance of new handset technologies and services.

Gross Profit. Gross profit decreased \$2.1 million from \$36.8 million to \$34.7 million. Gross profit as a percentage of revenues was 5.5% for the quarter ended February 28, 2002, compared to 5.7% for the prior year quarter.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$2.3 million from \$28.9 million to \$31.2 million. This increase is primarily attributable to an increase in payroll and benefits, including \$1.1 million in senior management transition costs, advertising and marketing, and insurance premiums. These increases were partially offset by a decrease in bad debt expense from \$3.7 million to \$1.7 million. Selling, general and administrative expenses as a percentage of revenues were 5.0% and 4.5%, for the first quarter of 2002 and 2001, respectively.

Gain on Sale of Assets. During the first quarter ended 2001, the Company recorded a gain on sale of assets of \$0.9 million in 2001 primarily associated with the sale of its Venezuela operations in December 2000.

Equity in Loss of Affiliated Companies. Equity in loss of affiliated companies was \$0.7 million in 2001 due to losses from the Company's 49% minority interest in CellStar Amtel. As a result of the continuing deterioration in the Malaysia market, the Company is in the process of divesting its ownership in CellStar Amtel. Until the divestiture is finalized, the Company will be required to recognize future losses, if any, of CellStar Amtel up to the amount of debt and payables of CellStar Amtel guaranteed by the Company. The Company currently does not anticipate that any further losses will be recognized.

Interest Expense. Interest expense decreased to \$3.0 million from \$5.1 million. The decrease was primarily a result of lower borrowing levels and a lower interest rate on the Company's domestic credit facility.

Other, Net. Other, net decreased \$2.5 million, from income of \$2.7 million to income of \$0.2 million, primarily due to a gain of \$1.1 million in the first quarter of 2001 on foreign currencies related to European operations compared to a loss of \$0.1 million in 2002 and to a reduction in interest income from \$1.5 million in 2001 compared to \$0.4 million in 2002.

Income Taxes. Income tax expense decreased from an expense of \$1.6 million in 2001 to an expense of \$0.2 million in 2002 primarily due to lower pre-tax income. The Company's annual effective tax rate was 29% for the first quarter of 2002 compared to 27% for the first quarter of 2001.

Critical Accounting Policies

Financial Reporting Release No. 60, which was recently released by the Securities and Exchange Commission, requires all companies to include a discussion of critical accounting policies or methods used in the preparation of financial statements. Note 1 of the Notes to the Consolidated Financial

Edgar Filing: CELLSTAR CORP - Form 10-Q

Statements, included in the Company's Annual Report on Form 10-K for the year ended November 30, 2001, includes a summary of the significant accounting policies and methods used in the preparation of the Company's Consolidated Financial Statements. The following is a brief discussion of the more critical accounting policies and methods used by the Company.

(a) Significant Estimates

Management of the Company has made a number of estimates and assumptions related to the reporting of assets and liabilities in preparation of the consolidated financial statements in conformity with generally accepted accounting principles. The most significant estimates relate to the allowance for doubtful accounts, the reserve for inventory obsolescence, the deferred tax asset valuation allowance and the determination of the recoverability of goodwill.

In determining the adequacy of the allowance for doubtful accounts, management considers a number of factors including the aging of the receivable portfolio, customer payment trends, financial condition of the customer, economic conditions in the customer's country, and industry conditions. In some years, the Company has experienced significant amounts of bad debt, including \$51.5 million in fiscal year 2000. In 2000, the decline in the redistributor market, the decision to exit the Brazil market, and the competitive market conditions significantly

14

impacted bad debt expense. Actual amounts could differ significantly from management's estimates.

In determining the adequacy of the reserve for inventory obsolescence, management considers a number of factors including the aging of the inventory, recent sales trends, industry market conditions, and economic conditions. In assessing the reserve, management also considers price protection credits or other incentives the Company expects to receive from the vendor. In some years, the Company has experienced significant amounts of inventory obsolescence, including \$32.3 million in fiscal year 2000. After a supply shortage in 1999, there was an oversupply of product resulting in intense price competition in 2000 which significantly impacted obsolescence. Actual amounts could differ significantly from management's estimates.

In assessing the realizability of deferred income tax assets, management considers whether it is more likely than not that the deferred income tax assets will be realized. The ultimate realization of deferred income tax assets is dependent on the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred income tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred income tax assets are deductible, management determines if it is more likely than not that the Company will realize the benefits of these deductible differences. The amount of the deferred income tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carry-forward period are reduced.

The Company does not provide for U.S. Federal income taxes or tax benefits on the undistributed earnings and/or losses of its international subsidiaries because earnings are reinvested and, in the opinion of management, should continue to be reinvested indefinitely. At February 28, 2002, the Company had not provided U.S. Federal income taxes on earnings of international subsidiaries

Edgar Filing: CELLSTAR CORP - Form 10-Q

of approximately \$188.9 million. On distribution of these earnings in the form of dividends or otherwise, the Company would be subject to both U.S. income taxes and certain withholding taxes in the various international jurisdictions. Determination of the related amount of unrecognized deferred U.S. income tax liability is not practicable because of the complexities associated with this hypothetical calculation.

Goodwill represents the excess of the purchase price over the fair value of net assets acquired and is amortized using the straight-line method over 20 years. The Company assesses the recoverability of this intangible asset by determining the estimated future cash flows related to such acquired assets. In the event that goodwill is found to be carried at an amount that is in excess of estimated future operating cash flows, then the goodwill will be adjusted to a level commensurate with a discounted cash flow analysis using a discount rate reflecting the Company's average cost of funds.

Management's estimates of future cash flows are based in part upon prior performance, industry conditions, economic conditions, and vendor and customer relationships. Changes in these factors or other factors could result in significantly different cash flow estimates and an impairment charge. In 1999, due to changing market conditions in Poland, the Company considered the remaining \$4.5 million in goodwill related to its Poland operations to be impaired. In 2000, due to the current and expected future economic conditions in Venezuela, the Company considered the goodwill related to the Venezuela operations impaired and recorded a \$3.9 million impairment charge. In 2000, a major customer proposed change to an existing contract that adversely changed the long-term prospects of the Peru operations resulted in the Company recording a goodwill impairment charge of \$6.4 million.

At February 28, 2002, the Company had goodwill, net of accumulated amortization, of \$21.7 million related to its Asia-Pacific operations (\$13.0 million) and its Europe operations (\$8.7 million).

The Financial Accounting Standards Board has issued Statements No. 141 and No. 142 which will impact the Company's accounting policy for goodwill. A more complete discussion of Statements No. 141 and No. 142 is included in Management's Discussion and Analysis of Financial Condition and Results of Operations under the caption Accounting Pronouncements Not Yet Adopted in this Form 10-Q.

(b) Revenue Recognition

For the Company's wholesale business, revenue is recognized when the customer takes title and assumes risk of loss. If the customer takes title and assumes risk of loss upon shipment, revenue is recognized on the shipment date. If the customer takes title and assumes risk of loss upon delivery, revenue is recognized on the delivery date. In accordance with contractual agreements with wireless service providers, the Company receives an activation commission for obtaining subscribers for wireless services in connection with the Company's retail operations. The agreements contain various provisions for additional commissions ("residual commissions") based on subscriber usage. The agreements also provide for the reduction or elimination of activation commissions if subscribers deactivate service within stipulated periods. The Company recognizes revenue for activation commissions on the wireless service providers' acceptance of subscriber contracts and residual commissions when earned and provides an allowance for estimated wireless service deactivations, which is reflected as a reduction of accounts receivable and revenues in the accompanying consolidated financial statements. The Company recognizes fee service revenue when the service is completed.

Edgar Filing: CELLSTAR CORP - Form 10-Q

(c) Vendor Credits

The Company recognizes price protection credits and other incentives from vendors when such credits are received in writing, or if the credits are based on sell-through to customers, when the credits have been received in writing and the related product is sold. Vendor credits, excluding sell-through credits, are applied against inventory and cost of goods sold, depending on whether the related inventory is on-hand or has been previously sold at the time the credits are received in writing. Sell-through credits are recorded as a reduction in cost of goods sold in the period received.

International Operations

The Company's foreign operations are subject to various political and economic risks including, but not limited to, the following: political instability; economic instability; currency controls; currency devaluations; exchange rate fluctuations; potentially unstable channels of distribution; increased credit risks; export control laws that might limit the markets the Company can enter; inflation; changes in laws related to foreign ownership of businesses abroad; foreign tax laws; changes in cost of and access to capital; changes in import/export regulations, including enforcement policies; "gray market" resales; tariffs and freight rates. Such risks, and political and other factors beyond the control of the Company, including trade disputes among nations, internal political or economic instability in any nation where the Company conducts business, and terrorist acts, could have a material adverse effect on the Company.

Revenues from the Company's operations in the PRC, including Hong Kong, were \$308.9 million and \$254.3 million for the quarter ended February 28, 2002 and 2001 respectively. As the availability in China of in-country manufactured product increases, sales to the Company's Hong Kong based customers that ship products to the remainder of China may decrease. Additionally, the Company's primary supplier in Hong Kong has recently significantly reduced the supply of product available in Hong Kong to encourage the purchase in China of in-country manufactured product. Revenues from the Hong Kong operation were \$26.7 million and \$39.6 million for the quarter ended February 28, 2002 and 2001, respectively.

In December 2001, the Argentine government removed the fixed exchange rate maintained between the Argentine peso and the U.S. dollar. Based upon the Company's current level of operations in Argentina, there was not a significant impact as a result of the Argentine peso devaluation in the first quarter of 2002. The Company expects to continue to monitor and evaluate the economic and wireless market outlook in Argentina.

In the fourth quarter of 2000, the Company recorded a non-cash goodwill impairment charge of \$6.4 million related to the operations in Peru due to a major carrier customer's proposed changes to an existing contract that adversely changed the long-term prospects of the Peru operations. Since the second quarter of 2001, the Company has incurred losses in its operations in Peru.

In April 2000, the Company curtailed a significant portion of its U.K. international trading operations following third party theft and fraud losses. The trading business involves the purchase of products from suppliers other than manufacturers and the sale of those products to customers other than network operators or their dealers and other representatives. As a result of the curtailment, the Company experienced a reduction in revenues for the U.K. operation after the first quarter of 2000 compared to 1999. Since the curtailment, the Company has experienced operating losses in its U.K. operation.

Edgar Filing: CELLSTAR CORP - Form 10-Q

In 2000 and 2001, the Company incurred losses of \$1.8 million and \$0.7 million, respectively related to its minority interest in CellStar Amtel. As a result of the continuing deterioration in the Malaysia market, the Company is in the process of divesting its 49% ownership in CellStar Amtel. The carrying value of the investment at February 28, 2002 was zero. Until the divestiture is finalized, the Company will be required to recognize future losses, if any, of CellStar Amtel up to the amount of debt and payables of CellStar Amtel guaranteed by the Company. The Company currently does not anticipate any further losses to be recognized.

During the fourth quarter of 2001, the Company recorded a \$3.0 million charge for a value added tax prepaid asset in the Company's Mexico operations for which the recoverability is uncertain.

16

Liquidity and Capital Resources

The following table summarizes the Company's contractual obligations at February 28, 2002 (amounts in thousands):

	Payments Due By Period				
	Total	Less than One Year	One to Three Years	Four to Five Years	More than Five Years
Notes payable	\$102,881	102,881	-	-	-
Senior Convertible Notes (mandatorily convertible)	39,148	39,148	-	-	-
Subordinated Notes	21,384	21,384	-	-	-
Senior Notes	12,374	-	-	12,374	-
Operating leases	8,339	3,647	3,278	1,244	170
Total	\$184,126	167,060	3,278	13,618	170

During the period ended February 28, 2002, the Company relied primarily on cash available at November 30, 2001, funds generated from operations and borrowings under its revolving credit facilities to fund working capital, capital expenditures and expansions.

At February 28, 2002, the Company's operations in China had two lines of credit, one for USD \$12.5 million and the second for RMB (Chinese People's currency) 316 million (approximately USD \$38.2 million), bearing interest at 7.16%, and from 5.28% to 5.56% respectively. The loans have maturity dates through September 2002. The lines of credit are partially collateralized by U.S. dollar cash deposits and accounts receivable from the Company's operations in China. The cash deposits were made via intercompany loans from the operating entity in Hong Kong as a mechanism to secure repatriation of these funds. At February 28, 2002, the U.S. dollar equivalent of \$50.7 million had been borrowed against the lines of credit in China. As a result of this method of funding operations in China, the consolidated balance sheet at February 28, 2002 reflects USD \$35.6 million in cash that is restricted as collateral on these advances and a corresponding USD \$50.7 million in notes payable. At February 28, 2002, China also had a \$5.8 million promissory note to a bank which matures December 2002 and bears interest

Edgar Filing: CELLSTAR CORP - Form 10-Q

at 5.85%. In addition, the Company has notes payable in Taiwan totaling \$6.2 million, which matured December 2001, and have been extended with payments through August 2002 by oral agreement of the parties and bear interest at 4.03%.

As of September 28, 2001, the Company had negotiated and finalized a new, five-year, \$60.0 million Loan and Security Agreement ("the Facility") with a bank and terminated the previously existing facility. On October 12, 2001 the Company finalized an amendment to the Facility increasing the commitment amount from \$60.0 million to \$85.0 million.

Fundings under the Facility are limited by a borrowing base test, which is measured weekly. Interest on borrowings under the Facility is at the London Interbank Offered Rate or at the bank's prime lending rate, plus an applicable margin. The Facility is also secured by a pledge of 100% of the outstanding stock of all U.S. subsidiaries and 65% of the outstanding stock of all first tier foreign subsidiaries. The Facility is further secured by the Company's domestic accounts receivable, inventory, property, plant and equipment and all other domestic real property and intangible assets. The Facility contains, among other provisions, covenants relating to the maintenance of minimum net worth and certain financial ratios, exchanging, refinancing or extending of the Company's 5% convertible subordinate notes, dividend payments, additional debt, mergers and acquisitions and disposition of assets. At April 5, 2002, the Company had \$38.1 million in borrowings and \$24.3 million in availability under the Facility.

At November 30, 2001, long-term debt consisted of \$150.0 million of the Company's Subordinated Notes which are convertible into a 1.1 million shares of common stock at \$138.34 per share (adjusted for the effect of the one-for-five reverse stock split effective on February 22, 2002) at any time prior to maturity.

17

On January 14, 2002, the Company filed an S-4 registration statement with the Securities and Exchange Commission offering to exchange, for each \$1,000 principal of the Subordinated Notes \$366.67 in cash and, at the election of the holder, one of the following options: a) \$400.94 principal amount of Senior Notes due January 2007 or, b) \$320.75 principal amount of Senior Notes and \$80.19 principal amount of Senior Convertible Notes due November 2002 or, c) \$400.94 principal amount of Senior Convertible Notes.

On February 20, 2002, the Company completed its exchange offer for its Subordinated Notes. Holders owning \$128.6 million of Subordinated Notes exchanged them for \$47.2 million in cash, \$12.4 million of Senior Notes and \$39.1 million of Senior Convertible Notes. Holders owning \$21.4 million of the Subordinated Notes did not exchange them, and they are now subordinate to the Company's Facility, the Senior Notes and the Senior Convertible Notes.

The Senior Convertible Notes are mandatorily convertible into the Company's common stock on November 30, 2002, and bear interest at 5%, payable semi-annually in arrears, in either cash or stock, at the Company's option, on August 15, 2002, and November 30, 2002. In the event of bankruptcy the Senior Convertible Note holders are entitled to cash equal to the face value of the Senior Convertible Note plus accrued interest. The Senior Convertible Notes are convertible into the Company's common stock at a split adjusted conversion price of \$5.00 per share (adjusted for the effect of the one-for-five reverse stock split effective on February 22, 2002) and may be converted at any time prior to maturity at the option of the holders. The \$39.1 million of Senior Convertible Notes are convertible into 7.8 million shares of common stock and are considered as dilutive securities in calculating earnings per share in the first quarter of

Edgar Filing: CELLSTAR CORP - Form 10-Q

2002.

The Senior Notes mature January 15, 2007, and bear interest at 12%, payable in cash in arrears semi-annually on February 15 and August 15, commencing August 15, 2002. The Senior Notes contain certain covenants that restrict the Company's ability to incur additional indebtedness; make investments, loans and advances; declare dividends or certain other distributions; create liens; enter into sale-leaseback transactions; consolidate; merge; sell assets and enter into transactions with affiliates.

Cash, cash equivalents, and restricted cash at February 28, 2002 were \$122.3 million, compared to \$89.3 million at November 30, 2001. The cash balance at February 28, 2002 was unusually high due to a cash receipt of approximately \$15.0 million on February 28, 2002 and the timing of approximately \$10.0 million in quarter-end cash disbursements.

Compared to November 30, 2001, accounts receivable decreased from \$216.0 million to \$198.3 million at February 28, 2002. Inventories declined to \$146.5 million at February 28, 2002, from \$218.9 million at November 30, 2001. Management has worked aggressively to reduce accounts receivable and inventory levels through tightening of credit policies, aggressive collection efforts, and better purchasing and inventory management. Accounts payable declined to \$169.2 million at February 28, 2002 compared to \$229.0 million at November 30, 2001, primarily due to lower inventory levels.

Based upon current and anticipated levels of operations, the Company anticipates that its cash flows from operations, together with amounts available under its Facility and existing unrestricted cash balances, will be adequate to meet its anticipated cash requirements in the foreseeable future. In the event that existing unrestricted cash balances, cash flows and available borrowings under the Facility are not sufficient to meet future cash requirements, the Company may be required to reduce planned expenditures or seek additional financing. The Company can provide no assurances that reductions in planned expenditures would be sufficient to cover shortfalls in available cash or that additional financing would be available or, if available, offered on terms acceptable to the Company.

Accounting Pronouncements Not Yet Adopted

In June 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("Statement") No. 141, "Business Combinations." Statement No. 141 changes the accounting for business combinations to eliminate the pooling-of-interests method and requires all business combinations initiated after June 30, 2001 to be accounted for using the purchase method. This statement also requires intangible assets that arise from contractual or other legal rights, or that are capable of being separated or divided from the acquired entity, be recognized separately from goodwill. Existing intangible assets and goodwill that were acquired in a prior purchase business combination must be evaluated and any necessary reclassifications must be made in order to conform with

18

the new criteria in Statement No. 141 for recognition apart from goodwill. The Company does not expect the adoption of this statement to have a material impact on its consolidated results of operations or financial position.

In June 2001, the FASB issued Statement No. 142, "Goodwill and Other Intangible Assets." Statement No. 142 addresses the initial recognition and measurement of intangible assets acquired (other than those acquired in a business combination, which is addressed by Statement No. 141) and the subsequent accounting for

Edgar Filing: CELLSTAR CORP - Form 10-Q

goodwill and other intangible assets after initial recognition. Statement No. 142 eliminates the amortization of goodwill and intangible assets with indefinite lives. Intangible assets with lives restricted by contractual, legal, or other means will continue to be amortized over their useful lives. Adoption of this statement will also require the Company to reassess the useful lives of all intangible assets acquired, and make any necessary amortization period adjustments. Goodwill and other intangible assets not subject to amortization will be tested for impairment annually, or more frequently if events or changes in circumstances indicate that the asset might be impaired. Statement No. 142 requires a two-step process for testing goodwill for impairment. First, the fair value of each reporting unit will be compared to its carrying value to determine whether an indication of impairment exists. If an impairment is indicated, then the fair value of the reporting unit's goodwill will be determined by allocating the unit's fair value to its assets and liabilities (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination. The amount of impairment for goodwill and other intangible assets will be measured as the excess of its carrying value over its fair value. Goodwill and intangible assets acquired after June 30, 2001 will be immediately subject to the impairment provisions of this statement. For goodwill and other intangible assets acquired on or before June 30, 2001, the Company is required to adopt Statement No. 142 no later than the beginning of fiscal 2003. The Company has not yet determined the impact of the adoption of this statement will have on its consolidated results of operations or financial position.

In June 2001, the FASB issued Statement No. 143, Accounting for Asset Retirement Obligations, which addresses financial accounting and reporting obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. The standard applies to legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development and (or) normal use of the asset. Statement No. 143 requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The fair value of the liability is added to the carrying amount of the associated asset and this additional carrying amount is depreciated over the life of the asset. The liability is accrued at the end of each period through charges to operating expense. If the obligation is settled for other than the carrying amount of the liability, the Company will recognize a gain or loss on settlement. The Company is required to adopt the provisions of Statement No. 143 no later than the beginning of fiscal year 2003, with early adoption permitted. The Company does not expect the adoption of this statement to have a material effect on its consolidated results of operations or financial position.

In October 2001, the FASB issued Statement No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. While Statement No. 144 supersedes FASB Statement No. 121, Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of, it retains many of the fundamental provisions of that Statement. Statement No. 144 becomes effective for fiscal years beginning after December 15, 2001, with early applications encouraged. The Company does not expect the adoption of this statement to have a material effect on its consolidated results of operations or financial position.

19

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Foreign Exchange Risk

Edgar Filing: CELLSTAR CORP - Form 10-Q

For the quarter ended February 28, 2002 and 2001, the Company recorded net foreign currency gains (losses) of \$0.2 million and (\$0.4) million, respectively in costs of goods sold. For the quarter ended February 28, 2002 and 2001, the Company recorded in other income (expense), net foreign currency gains and (losses) of \$(0.1) million and \$1.1 million, respectively. The gain in 2001 was primarily due to the revaluations of foreign currencies related to the European operations.

The Company manages foreign currency risk by attempting to increase prices of products sold at or above the anticipated exchange rate of the local currency relative to the U.S. dollar, by indexing certain of its accounts receivable to exchange rates in effect at the time of their payment and by entering into foreign currency hedging instruments in certain instances. The Company consolidates the bulk of its foreign exchange exposure related to intercompany transactions in its international finance subsidiary. These transactional exposures are managed using various derivative alternatives depending on the length and size of the exposure. The Company continues to evaluate foreign currency exposures and related protection measures.

The Company does have foreign exchange exposure on the intercompany advances from the Hong Kong entity to the China entity as the funds have been effectively converted into RMB (Chinese People's currency). The Company also has foreign exchange exposure on the RMB lines of credit in China as they are collateralized by U.S. dollars. For the quarter ended February 28, 2002, \$282.2 million, or 44.9%, of the Company's revenues were from the Company's operation in China. With the exception of intercompany activity, all revenues and expenses of the China operations are in RMB. The Company does not hold derivative instruments related to the RMB.

In December 2001, the Argentine government removed the fixed exchange rate maintained between the Argentine peso and the U.S. dollar. Based upon the Company's current level of operations in Argentina, there was not a significant impact in the first quarter of 2002 as a result of the Argentine peso devaluation.

Derivative Financial Instruments

The Company periodically uses various derivative financial instruments as part of an overall strategy to manage its exposure to market risk associated with interest rate and foreign currency exchange rate fluctuations. The Company periodically uses foreign currency forward contracts to manage the foreign currency exchange rate risks associated with international operations. The Company evaluates the use of interest rate swaps and cap agreements to manage its interest risk on debt instruments, including the reset of interest rates on variable rate debt. The Company does not hold or issue derivative financial instruments for trading purposes. The Company's risk of loss in the event of non-performance by any counterparty under derivative financial instrument agreements is not significant. Although the derivative financial instruments expose CellStar to market risk, fluctuations in the value of the derivatives are mitigated by expected offsetting fluctuations in the matched instruments. The Company uses foreign currency forward contracts to reduce exposure to exchange rate risks primarily associated with transactions in the regular course of its international operations. The forward contracts establish the exchange rates at which the Company purchases or sells the contracted amount of local currencies for specified foreign currencies at a future date. The Company uses forward contracts, which are short-term in nature (45 days to one year), and receive or pay the difference between the contracted forward rate and the exchange rate at the settlement date.

At February 28, 2002, the Company had no forward contracts and does not hold any other derivative instruments.

Edgar Filing: CELLSTAR CORP - Form 10-Q

Interest Rate Risk

The interest rate of the Company's Facility is an index rate at the time of borrowing plus an applicable margin on certain borrowings. The interest rate is based on either the agent bank's prime lending rate or the London Interbank Offered Rate. During the quarter ended February 28, 2002, the interest rates of borrowings under the Facility ranged from 5.75% to 6.00%. A one percent change in variable interest rates will not have a material impact on the Company.

The Company manages its borrowings under the Facility each business day to minimize interest expense. The Company has short-terms borrowings in China as discussed in Liquidity and Capital Resources. The notes payable in Taiwan bear interest at 4.03%. The Subordinated Notes have a fixed coupon interest rate of 5.0% and are due in October 2002. The Senior Convertible Notes issued in February 2002 bear interest at 5.0% and mature November 30, 2002. The Senior Notes issued in February 2002 bear interest at 12.0% and mature January 15, 2007.

Part II - OTHER INFORMATION

Item 1. Legal Proceedings

On October 15, 2001, the Company announced that the results for the three and six months ended May 31, 2001 would be restated to reflect certain accounting adjustments. In October 2001, the Company received an inquiry from the SEC requesting information concerning the restatement of earnings for the quarter ended May 31, 2001. The Company believes that it has fully responded to such request.

The Company is a party to various other claims, legal actions and complaints arising in the ordinary course of business.

Management believes that the disposition of these matters will not have a materially adverse effect on the consolidated financial condition or results of operations of the Company.

Item 6. Exhibits and Reports on Form 8-K
