MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

GENERAL

State Street Corporation, referred to as the parent company, is a financial holding company organized in 1969 under the laws of the Commonwealth of Massachusetts. Our executive offices are located at One Lincoln Street, Boston, Massachusetts 02111 (telephone (617) 786-3000). For purposes of this Form 10-Q, unless the context requires otherwise, references to "State Street," "we," "us," "our" or similar terms mean State Street Corporation and its subsidiaries on a consolidated basis. The parent company is a source of financial and managerial strength to our subsidiaries. Through our subsidiaries, including our principal banking subsidiary, State Street Bank and Trust Company, referred to as State Street Bank, we provide a broad range of financial products and services to institutional investors worldwide, with \$29.18 trillion of AUCA and \$2.45 trillion of AUM as of September 30, 2016.

As of September 30, 2016, we had consolidated total assets of \$256.14 billion, consolidated total deposits of \$198.77 billion, consolidated total shareholders' equity of \$22.15 billion and 33,332 employees. We operate in more than 100 geographic markets worldwide, including in the U.S., Canada, Europe, the Middle East and Asia.

Our operations are organized for management reporting purposes into 2 lines of business: Investment Servicing and Investment Management, which are defined based on products and services provided.

Investment Servicing provides services for institutional clients, including mutual funds, collective investment funds and other investment pools, corporate and public retirement plans, insurance companies, foundations and endowments worldwide. Products include custody; product- and participant-level accounting; daily pricing and administration; master trust and master custody; record-keeping; cash management; foreign exchange, brokerage and other trading services; securities finance; deposit and short-term investment facilities; loans and lease financing; investment manager and alternative investment manager operations outsourcing; and performance, risk and compliance analytics to support institutional investors.

Investment Management, through SSGA, provides a broad array of investment management, investment research and investment advisory services to corporations, public funds and other sophisticated investors. SSGA offers active and passive asset management strategies across equity, fixed-income, alternative, multi-asset solutions (including OCIO), and cash asset classes. Products

are distributed directly and through intermediaries using a variety of investment vehicles, including ETFs, such as the SPDR® ETF brand.

For financial and other information about our lines of business, refer to "Line of Business Information" included in this Management's Discussion and Analysis and Note 17 to the consolidated financial statements included in this Form 10-Q.

This Management's Discussion and Analysis is part of our Quarterly Report on Form 10-Q for the quarter ended September 30, 2016, and updates the Management's Discussion and Analysis in our 2015 Form 10-K previously filed with the SEC. You should read the financial information contained in this Management's Discussion and Analysis and elsewhere in this Form 10-Q in conjunction with the financial and other information contained in our 2015 Form 10-K. Certain previously reported amounts presented in this Form 10-Q have been reclassified to conform to current-period presentation.

We prepare our consolidated financial statements in conformity with U.S. GAAP. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions in its application of certain accounting policies that materially affect the reported amounts of assets, liabilities, equity, revenue and expenses.

The significant accounting policies that require us to make judgments, estimates and assumptions that are difficult, subjective or complex about matters that are uncertain and may change in subsequent periods include accounting for fair value measurements; other-than-temporary impairment of investment securities; impairment of goodwill and other intangible assets; and contingencies. These significant accounting policies require the most subjective or complex judgments, and underlying estimates and assumptions could be subject to revision as new information becomes

available. Additional information about these significant accounting policies is included under “Significant Accounting Estimates” in Management's Discussion and Analysis in our 2015 Form 10-K. We did not change these significant accounting policies in the first nine months of 2016.

Certain financial information provided in this Form 10-Q, including this Management's Discussion and Analysis, is prepared on both a U.S. GAAP, or reported basis, and a non-GAAP basis, including certain non-GAAP measures used in the calculation of identified regulatory ratios. We measure and compare certain financial information on a non-GAAP basis, including information (such as capital ratios

State Street Corporation | 5

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

calculated under regulatory standards scheduled to be effective in the future) that management uses in evaluating our business and activities.

Non-GAAP financial information should be considered in addition to, not as a substitute for or superior to, financial information prepared in conformity with U.S. GAAP. Any non-GAAP financial information presented in this Form 10-Q, including this Management's Discussion and Analysis, is reconciled to its most directly comparable currently applicable regulatory ratio or U.S. GAAP-basis measure.

We further believe that our presentation of fully taxable-equivalent net interest revenue, which reports non-taxable revenue, such as interest revenue associated with tax-exempt investment securities, on a fully taxable-equivalent basis, facilitates an investor's understanding and analysis of our underlying financial performance and trends.

We provide additional disclosures required by applicable bank regulatory standards, including supplemental qualitative and quantitative information with respect to regulatory capital (including market risk associated with our trading activities), summary results of semi-annual State Street-run stress tests which we conduct under the Dodd-Frank Act, and resolution plan disclosures required under the Dodd-Frank Act. These additional disclosures are accessible on the "Investor Relations" section of our corporate website at www.statestreet.com.

We have included our website address in this report as an inactive textual reference only. Information on our website is not incorporated by reference into this Form 10-Q.

We use acronyms and other defined terms for certain business terms and abbreviations, as defined on the acronyms list following the table of contents to this Form 10-Q.

Forward-Looking Statements

This Form 10-Q, as well as other reports and proxy materials submitted by us under the Securities Exchange Act of 1934, registration statements filed by us under the Securities Act of 1933, our annual report to shareholders and other public statements we may make, contain statements (including statements in the Management's Discussion and Analysis) that are considered "forward-looking statements" within the meaning of U.S. securities laws, including statements about our goals and expectations regarding our business, financial and capital condition, results of operations, strategies, financial portfolio performance, dividend and stock purchase programs, expected outcomes of legal proceedings, market growth, acquisitions, joint ventures and divestitures and new technologies, services and opportunities, as well as regarding industry, regulatory, economic and market

trends, initiatives and developments, the business environment and other matters that do not relate strictly to historical facts.

Terminology such as "plan," "expect," "intend," "objective," "forecast," "outlook," "believe," "priority," "anticipate," "estimate," "may," "will," "trend," "target," "strategy" and "goal," or similar statements or variations of such terms, are intended to identify forward-looking statements, although not all forward-looking statements contain such terms.

Forward-looking statements are subject to various risks and uncertainties, which change over time, are based on management's expectations and assumptions at the time the statements are made, and are not guarantees of future results. Management's expectations and assumptions, and the continued validity of the forward-looking statements, are subject to change due to a broad range of factors affecting the national and global economies, regulatory environment and the equity, debt, currency and other financial markets, as well as factors specific to State Street and its subsidiaries, including State Street Bank. Factors that could cause changes in the expectations or assumptions on which forward-looking statements are based cannot be foreseen with certainty and include, but are not limited to: the financial strength and continuing viability of the counterparties with which we or our clients do business and to which we have investment, credit or financial exposure, including, for example, the direct and indirect effects on counterparties of the sovereign-debt risks in the U.S., Europe and other regions; increases in the volatility of, or declines in the level of, our net interest revenue, changes in the composition or valuation of the assets recorded in our consolidated statement of condition (and our ability to measure the fair value of investment securities) and the possibility that we may change the manner in which we fund those assets;

the liquidity of the U.S. and international securities markets, particularly the markets for fixed-income securities and inter-bank credits, and the liquidity requirements of our clients;
the level and volatility of interest rates, the valuation of the U.S. dollar relative to other currencies in which we record revenue or accrue expenses and the performance and volatility of securities, credit, currency and other markets in the U.S. and internationally;
the credit quality, credit-agency ratings and fair values of the securities in our investment

State Street Corporation | 6

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

securities portfolio, a deterioration or downgrade of which could lead to other-than-temporary impairment of the respective securities and the recognition of an impairment loss in our consolidated statement of income;
our ability to attract deposits and other low-cost, short-term funding, our ability to manage levels of such deposits and the relative portion of our deposits that are determined to be operational under regulatory guidelines and our ability to deploy deposits in a profitable manner consistent with our liquidity needs, regulatory requirements and risk profile;
the manner and timing with which the Federal Reserve and other U.S. and foreign regulators implement changes to the regulatory framework applicable to our operations, including implementation of the Dodd-Frank Act, the Basel III final rule and European legislation (such as the Alternative Investment Fund Managers Directive, Undertakings for Collective Investment in Transferable Securities Directives and Markets in Financial Instruments Directive II); among other consequences, these regulatory changes impact the levels of regulatory capital we must maintain, acceptable levels of credit exposure to third parties, margin requirements applicable to derivatives, and restrictions on banking and financial activities. In addition, our regulatory posture and related expenses have been and will continue to be affected by changes in regulatory expectations for global systemically important financial institutions applicable to, among other things, risk management, liquidity and capital planning, resolution planning, and compliance programs, and changes in governmental enforcement approaches to perceived failures to comply with regulatory or legal obligations;

we may not successfully implement our plans to have a credible resolution plan by July 2017, including the sufficiency of the actions taken to address the deficiencies jointly identified by the Federal Reserve and the FDIC in April 2016 with respect to our 2015 resolution plan, or those plans may not be considered to be sufficient by the Federal Reserve and the FDIC, due to a number of factors, including, but not limited to challenges we may experience in interpreting and addressing regulatory expectations, failure to implement remediation in a timely

manner, the complexities of development of a comprehensive plan to resolve a global custodial bank and related costs and dependencies. If we fail to meet regulatory expectations to the satisfaction of the Federal Reserve and the FDIC in our resolution plan submission filed on October 1, 2016 or in any future submission, we could be subject to more stringent capital, leverage or liquidity requirements, or restrictions on our growth, activities or operations;

- adverse changes in the regulatory ratios that we are required or will be required to meet, whether arising under the Dodd-Frank Act or the Basel III final rule, or due to changes in regulatory positions, practices or regulations in jurisdictions in which we engage in banking activities, including changes in internal or external data, formulae, models, assumptions or other advanced systems used in the calculation of our capital ratios that cause changes in those ratios as they are measured from period to period;

increasing requirements to obtain the prior approval of the Federal Reserve or our other U.S. and non-U.S. regulators for the use, allocation or distribution of our capital or other specific capital actions or programs, including acquisitions, dividends and stock purchases, without which our growth plans, distributions to shareholders, share repurchase programs or other capital initiatives may be restricted;

changes in law or regulation, or the enforcement of law or regulation, that may adversely affect our business activities or those of our clients or our counterparties, and the products or services that we sell, including additional or increased taxes or assessments thereon, capital adequacy requirements, margin requirements and changes that expose us to risks related to the adequacy of our controls or compliance programs;

economic or financial market disruptions in the U.S. or internationally, including that which may result from recessions or political instability, for example, the U.K.'s referendum to exit from the European Union may continue to disrupt financial markets or economic growth in Europe;

our ability to develop and execute State Street Beacon, our multi-year transformation program to digitize our business, deliver significant value and innovation for our clients and lower expenses across the organization, any failure of which, in whole or in part, may

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

among other things, reduce our competitive position, diminish the cost-effectiveness of our systems and processes or provide an insufficient return on our associated investment;

our ability to promote a strong culture of risk management, operating controls, compliance oversight, ethical behavior and governance that meet our expectations and those of our clients and our regulators, and the financial, regulatory, reputation and other consequences of our failure to meet such expectations;

the results of our review of our billing practices, including additional amounts we may be required to reimburse clients, as well as potential consequences of such review, including damage to our client relationships and adverse actions by governmental authorities;

the results of, and costs associated with, governmental or regulatory inquiries and investigations, litigation and similar claims, disputes, or civil or criminal proceedings;

the potential for losses arising from our investments in sponsored investment funds;

the possibility that our clients will incur substantial losses in investment pools for which we act as agent, and the possibility of significant reductions in the liquidity or valuation of assets underlying those pools;

our ability to anticipate and manage the level and timing of redemptions and withdrawals from our collateral pools and other collective investment products;

the credit agency ratings of our debt and depositary obligations and investor and client perceptions of our financial strength;

adverse publicity, whether specific to State Street or regarding other industry participants or industry-wide factors, or other reputational harm;

our ability to control operational risks, data security breach risks and outsourcing risks, our ability to protect our intellectual property rights, the possibility of errors in the quantitative models we use to manage our business and the possibility that our controls will prove insufficient, fail or be circumvented;

our ability to expand our use of technology to enhance the efficiency, accuracy and reliability of our operations and our dependencies on information technology and our ability to control related risks, including cyber-crime and other threats to our information technology infrastructure and systems (including those of our third-party service providers) and their effective operation both independently and with external systems, and complexities and costs of protecting the security of such systems and data;

our ability to grow revenue, manage expenses, attract and retain highly skilled people and raise the capital necessary to achieve our business goals and comply with regulatory requirements and expectations;

changes or potential changes to the competitive environment, including changes due to regulatory and technological changes, the effects of industry consolidation and perceptions of State Street as a suitable service provider or counterparty;

changes or potential changes in the amount of compensation we receive from clients for our services, and the mix of services provided by us that clients choose;

our ability to complete acquisitions, joint ventures and divestitures, including the ability to obtain regulatory approvals, the ability to arrange financing as required and the ability to satisfy closing conditions;

the risks that our acquired businesses and joint ventures will not achieve their anticipated financial and operational benefits or will not be integrated successfully, or that the integration will take longer than anticipated, that expected synergies will not be achieved or unexpected negative synergies or liabilities will be experienced, that client and deposit retention goals will not be met, that other regulatory or operational challenges will be experienced, and that disruptions from the transaction will harm our relationships with our clients, our employees or regulators;

our ability to recognize emerging needs of our clients and to develop products that are responsive to such trends and profitable to us, the performance of and demand for the products and services we offer, and the potential for new products and services to impose additional costs on us and expose us to increased operational risk;

• changes in accounting standards and practices; and
• changes in tax legislation and in the interpretation of existing tax laws by U.S. and non-U.S. tax authorities that affect the amount of taxes due.

State Street Corporation | 8

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Actual outcomes and results may differ materially from what is expressed in our forward-looking statements and from our historical financial results due to the factors discussed in this section and elsewhere in this Form 10-Q or disclosed in our other SEC filings, including the risk factors discussed in our 2015 Form 10-K. Forward-looking statements in this Form 10-Q should not be relied on as representing our expectations or beliefs as of any date subsequent to the time this Form 10-Q is filed with the SEC. We undertake no obligation to revise our forward-looking statements after the time they are made. The factors discussed herein are not intended to be a complete statement of all risks and uncertainties that may affect our businesses. We cannot anticipate all developments that may adversely affect our business or operations or our consolidated results of operations, financial condition or cash flows.

Forward-looking statements should not be viewed as predictions, and should not be the primary basis on which investors evaluate State Street. Any investor in State Street should consider all risks and uncertainties disclosed in our SEC filings, including our filings under the Securities Exchange Act of 1934, in particular our annual reports on Form 10-K, our quarterly reports on Form 10-Q and our current reports on Form 8-K, or registration statements filed under the Securities Act of 1933, all of which are accessible on the SEC's website at www.sec.gov or on the "Investor Relations" section of our corporate website at www.statestreet.com.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The following "Highlights" and "Financial Results" sections provide information related to significant events, as well as highlights of our consolidated financial results for the quarter ended September 30, 2016 presented in Table 1: Overview of Financial Results. More detailed information about our consolidated financial results, including comparisons of our financial results for the quarter ended September 30, 2016 to those for the quarter ended September 30, 2015 and for the nine months ended September 30, 2016 to those for the nine months ended September 30, 2015, is provided under "Consolidated Results of Operations," which follows these sections. In this Management's Discussion and Analysis, where we describe the effects of changes in foreign exchange rates, those effects are determined by applying applicable weighted average foreign exchange rates from the relevant 2015 period to the relevant 2016 results.

Highlights

We secured new asset servicing mandates of \$212 billion in the third quarter and \$1,225 billion in the first nine months of 2016, of which approximately \$95 billion and \$886 billion was installed in the third quarter and first nine months of 2016, respectively. The remaining amount is expected to be installed in the remainder of 2016 or later. On July 1, 2016, we completed our previously announced acquisition of GE Asset Management ("GEAM") from General Electric Company, with a total initial purchase price of approximately \$437 million and approximately \$46 million in potential incremental purchase price related to future opportunities with General Electric. This acquisition extends our core investment management capabilities, including in the high growth OCIO markets, and enhances our capabilities in connection with the delivery of value-added solutions to our client base. In the third quarter of 2016, we incurred acquisition and restructuring costs associated with the acquisition of approximately \$29 million and expect to incur approximately \$80 million of such costs through 2018, including the third quarter costs. Excluding AUM associated with the acquired GEAM operations of \$112 billion, net outflows of AUM totaled \$36 billion and \$58 billion in the quarter and nine months ended September 30, 2016, respectively. We declared common stock dividends of \$0.38 per share, totaling approximately \$147 million, in the third quarter of 2016.

In the third quarter of 2016, we purchased approximately 4.7 million shares of our common stock at an average per-share cost of \$69.03 and an aggregate cost of approximately \$325 million under our current common stock purchase program approved by our Board in July 2016.

Additional information with respect to our common stock purchase program is provided under "Financial Condition - Capital" in this Management's Discussion and Analysis.

Financial Results

Total revenue in the third quarter of 2016 increased slightly compared to the third quarter of 2015, primarily due to a 28% increase in management fee revenue, partially offset by a decrease in processing fees and other revenue.

Servicing fee revenue increased 1% in the third quarter of 2016 compared to the third quarter of 2015, due to net new business.

Management fee revenue increased 28% in the third quarter of 2016 compared to the third quarter of 2015, primarily due to the impact of the acquired GEAM business and lower money market fee waivers and higher global equity markets.

Return on average common shareholders' equity decreased to 10.6% in the third quarter of 2016 compared to 11.3% in the third quarter of 2015.

In the third quarter of 2016, we recorded restructuring charges of \$10 million related to State Street Beacon, our multi-year transformation program to digitize our business, deliver significant value and innovation for our clients and lower expenses across the organization. We are on track to generate at least \$165 million in estimated annual year-over-year pre-tax savings in 2016 related to State Street Beacon, all else equal. These savings include the effects of the targeted staff reductions announced in October 2015. The full effect of these 2016 savings will be felt in 2017. Actual expenses may increase or decrease in the future due to other factors.

In the third quarter of 2016, we recorded a pre-tax charge of approximately \$42 million to establish a legal reserve related to previously disclosed investigations by U.S. governmental agencies concerning our transition management business activities in 2010 and 2011.

State Street Corporation | 10

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Total expenses in the third quarter of 2016 increased 1% compared to the third quarter of 2015, primarily driven by increases in acquisition costs, primarily associated with the acquired GEAM business, and information systems and communications expenses, partially offset by decreases in compensation and employee benefits and professional services expenses.

CONSOLIDATED RESULTS OF OPERATIONS

This section discusses our consolidated results of operations for the third quarter and first nine months of 2016 compared to the same periods in 2015, and should be read in conjunction with the consolidated financial statements and accompanying condensed notes to the consolidated financial statements included in this Form 10-Q.

FEE REVENUE

Table 2: Total Revenue, provides the breakout of fee revenue for the quarters and nine months ended September 30, 2016 and 2015.

Servicing and management fees collectively made up approximately 80% and 77% of our total fee revenue in the third quarter and first nine months of 2016, respectively, compared to approximately 75% and 76% in the third quarter and first nine months of 2015, respectively. The level of these fees is influenced by several factors, including the mix and volume of our assets under custody and administration and our assets under management, the value and type of securities positions held (with respect to assets under custody), the volume of portfolio transactions, and the types of products and services used by our clients, and is generally affected by changes in worldwide equity and fixed-income security valuations and trends in market asset class preferences.

Generally, servicing fees are affected by changes in daily average valuations of assets under custody and administration. Additional factors, such as the relative mix of assets serviced, the level of transaction volumes, changes in service level, the nature of services provided, balance credits, client minimum balances, pricing concessions, the geographical location in which services are provided and other factors, may have a significant effect on our servicing fee revenue.

Management fees are generally affected by changes in month-end valuations of assets under management.

Management fees for certain components of managed assets, such as ETFs, are affected by daily average valuations of assets under management. Management fee revenue is more sensitive to market valuations than servicing fee revenue, as a higher proportion of the underlying services provided, and the associated management fees earned, are dependent on equity and fixed-income security valuations. Additional factors, such as the relative mix of assets managed, may have a significant effect on our management fee revenue. While certain management fees are directly determined by the values of assets under management and the investment strategies employed, management fees may reflect other factors as well, including performance fee arrangements, as well as our relationship pricing for clients using multiple services.

Asset-based management fees for actively managed products are generally charged at a higher percentage of assets under management than for passive products. Actively managed products may also include performance fee arrangements which are recorded when the performance period is complete.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Performance fees are generated when the performance of certain managed portfolios exceeds benchmarks specified in the management agreements. Generally, we experience more volatility with performance fees than with more traditional management fees.

In light of the above, we estimate, using relevant information as of September 30, 2016 and assuming that all other factors remain constant, that:

A 10% increase or decrease in worldwide equity valuations, over the relevant periods for which our servicing and management fees are calculated, would result in a corresponding change in our total revenue of approximately 2%; and

A 10% increase or decrease in worldwide fixed income security valuations, over the relevant periods for which our servicing and management fees are calculated, would result in a corresponding change in our total revenue of approximately 1%.

See Table 3: Daily, Month-End and Quarter-End Indices, for selected equity market indices. While the specific indices presented are indicative of general market trends, the asset types and classes relevant to individual client portfolios can and do differ, and the performance of associated relevant indices can therefore differ from the performance of the indices presented.

Daily averages and the averages of month-end indices demonstrate worldwide changes in equity markets that affect our servicing and management fee revenue. Quarter-end indices affect the values of assets under custody and administration and assets under management as of those dates. The index names listed in the table are service marks of their respective owners.

Further discussion of fee revenue is provided under "Line of Business Information" in this Management's Discussion and Analysis.

NET INTEREST REVENUE

See Table 2: Total Revenue, for the breakout of interest revenue and interest expense for the quarters and nine months ended September 30, 2016 and 2015.

Net interest revenue is defined as interest revenue earned on interest-earning assets less interest expense incurred on interest-bearing liabilities. Interest-earning assets, which principally consist of investment securities, interest-bearing deposits with banks, repurchase agreements, loans and leases and other liquid assets, are financed primarily by client deposits, short-term borrowings and long-term debt.

Net interest margin represents the relationship between annualized fully taxable-equivalent net interest revenue and average total interest-earning assets for the period. It is calculated by dividing fully taxable-equivalent net interest revenue by average interest-earning assets. Revenue that is exempt from income taxes, mainly that earned from certain investment securities (state and political subdivisions), is adjusted to a fully taxable-equivalent basis using a federal statutory income tax rate of 35%, adjusted for applicable state income taxes, net of the related federal tax benefit.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

See Table 4: Average Balances and Interest Rates - Fully Taxable-Equivalent Basis, for the breakout of net interest revenue on a fully taxable-equivalent basis for the quarters and nine months ended September 30, 2016 and 2015. Net interest revenue increased 4% on a fully taxable-equivalent basis in the third quarter of 2016 compared to the third quarter of 2015. Benefits during the third quarter of 2016 from the U.S. rate hike in December 2015 were partially offset by lower global interest rates that affected our revenue from certain floating-rate assets, the rate at which payments from the maturity or prepayment of portfolio holdings could be reinvested, and the effect of the stronger U.S. dollar. The third quarter of 2016 also reflects our management actions toward the end of the third quarter of 2015 to manage the size and composition of our investment portfolio as we seek to optimize our capital and liquidity positions in light of the evolving regulatory environment. Net interest revenue decreased 2% in the nine months ended September 30, 2016 compared to the same period in 2015. The decrease is primarily the result of the previously mentioned management actions, which contributed to a reduction of average interest and non-interest bearing deposits of \$22 billion for the nine months ended September 30, 2016 compared to the same period in 2015.

The effect of the stronger U.S. dollar relative to other currencies, particularly the GBP, also negatively impacted our net interest revenue. The stronger U.S. dollar had the effect of reducing fully taxable-equivalent net interest revenue by approximately \$5 million in the third quarter of 2016 compared to the third quarter of 2015.

We recorded aggregate discount accretion in interest revenue of \$42 million and \$72 million for the third quarter and first nine months of 2016, respectively, related to the assets we consolidated onto our balance sheet in 2009 from our asset-backed commercial paper conduits. Subsequent to the commercial paper conduit consolidation in 2009, we have recorded total discount accretion in interest revenue as follows:

TABLE 5: TOTAL DISCOUNT ACCRETION IN
INTEREST REVENUE

(In millions)	Discount Accretion in Interest Revenue
Twelve Months Ended December 31, 2009	\$ 621
Twelve Months Ended December 31, 2010	712
Twelve Months Ended December 31, 2011	220
Twelve Months Ended December 31, 2012	215
Twelve Months Ended December 31, 2013	137
Twelve Months Ended December 31, 2014	119
Twelve Months Ended December 31, 2015	98
Nine Months Ended September 30, 2016	72
Total Discount Accretion	\$ 2,194

The timing and ultimate recognition of any applicable discount accretion depends, in part, on factors that are outside of our control, including anticipated prepayment speeds and credit quality. The impact of these factors is uncertain and can be significantly influenced by general economic and financial market conditions. The timing and recognition of any applicable discount accretion can also be influenced by our ongoing management of the risks and other characteristics associated with our investment securities portfolio, including sales of securities which would otherwise generate interest revenue through accretion.

Depending on the factors discussed above, among others, we anticipate that until the former conduit securities remaining in our investment portfolio mature or are sold, discount accretion will continue to contribute to our net interest revenue, though generally in declining amounts. Assuming that we hold them to maturity, all else being equal, we expect the remaining former conduit securities carried in our investment portfolio as of September 30, 2016 to generate aggregate discount accretion in future periods of approximately \$173 million over their remaining terms,

with approximately one third of this discount accretion to be recorded through 2019. We estimate that we will have approximately \$10 million to \$15 million of discount accretion in the fourth quarter of 2016, excluding the impact of potential significant prepayments.

Changes in the components of interest-earning assets and interest-bearing liabilities are discussed in more detail below. Additional detail about the components of interest revenue and interest expense is provided in Note 14 to the consolidated financial statements included in this Form 10-Q.

Average total interest-earning assets were lower for the third quarter and first nine months ended September 30, 2016 compared to the same periods in 2015 as a result of the previously described management actions.

Even though we have seen reductions in the overall level of excess deposits during the past year, our clients have continued to place elevated levels of deposits with us, as central bank actions have resulted in high levels of liquidity and low global interest rates. We evaluate deposits as either inherent in our relationship with our custodial clients, which we generally invest in our investment portfolio, or transient, or excess deposits, which we generally deposit with central banks. Deposits with central banks generate low returns. Consequently, the elevated levels of these transient deposits have contributed to a reduction of our net interest margin relative to historical levels.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The deposits with central banks are also included in our total consolidated assets, and lower deposit levels impact our regulatory leverage ratios. If global interest rates increase, we would expect to see some additional decreases in client deposits. In general, we continue to anticipate higher levels of client deposits when compared to longer-term historical trends, irrespective of the interest rate environment, particularly during periods of market stress. If ECB monetary policy continues to pressure European interest rates downward and the U.S. dollar remains strong or strengthens, the negative effects on our net interest revenue may continue or worsen.

Interest-bearing deposits with banks averaged \$57.58 billion and \$52.42 billion for the third quarter and first nine months of 2016, respectively, compared to \$73.47 billion and \$74.83 billion for the same periods in 2015, respectively. These decreases reflect management's effort to reduce elevated client deposit levels as a component of our balance sheet management actions. These lower levels of deposits reflected our maintenance of cash balances at the Federal Reserve, the ECB and other non-U.S. central banks both to satisfy regulatory reserve requirements, and elevated levels of client deposits and our investment of the excess deposits with central banks.

We expect to continue to invest deposits we deem as elevated in investment securities or short-term assets, including central bank deposits, depending on our assessment of the underlying characteristics of the deposits.

Loans and leases averaged \$18.74 billion and \$18.67 billion for the third quarter and first nine months of 2016, respectively, compared to \$17.61 billion and \$17.71 billion for the same periods in 2015, respectively. The increase in average loans and leases resulted from growth in municipal loans and our continued investment in senior secured loans, offset by a reduction in mutual fund lending.

TABLE 6: U.S. AND NON-U.S. SHORT-DURATION ADVANCES

(Dollars in millions, except where otherwise noted)	Quarters Ended		
	September 30,		
	2016	2015	
Average U.S. short-duration advances	\$2,114	\$2,226	
Average non-U.S. short-duration advances	1,299	1,325	
Average total short-duration advances	\$3,413	\$3,551	
Average short-duration advances to average loans and leases	18	% 20	%

(Dollars in millions, except where otherwise noted)	Nine Months		
	Ended September 30,		
	2016	2015	
Average U.S. short-duration advances	\$2,163	\$2,284	
Average non-U.S. short-duration advances	1,345	1,432	
Average total short-duration advances	\$3,508	\$3,716	
Average short-duration advances to average loans and leases	19	% 21	%

Average loans and leases also includes short-duration advances. The decline in the proportion of average short-duration advances to average loans and leases is primarily due to growth in the other segments of the loan and lease portfolio. Short-duration advances provide liquidity to clients in support of their investment activities.

Average other interest-earning assets decreased to \$21.72 billion and \$22.32 billion for the third quarter and first nine months of 2016, respectively, from \$24.00 billion and \$22.73 billion for the same periods in 2015, respectively. Our average other interest-earning assets, largely associated with our enhanced custody business, comprised approximately 11% of our average total interest-earning assets for both the third quarter and first nine months of 2016, compared to approximately 11% and 10% of our average total interest-earning assets for the same periods in 2015, respectively. The enhanced custody business, which is our principal securities financing business for our custody clients, generates securities finance revenue. The net interest revenue earned on these transactions is generally lower than the interest

earned on other alternative investments.

Aggregate average interest-bearing deposits decreased to \$129.29 billion and \$125.40 billion for the third quarter and first nine months of 2016, respectively, from \$137.33 billion and \$136.83 billion for the same periods in 2015, respectively. The lower levels in the third quarter and first nine months of 2016 were primarily the result of management's actions to reduce both U.S. and non-U.S. transaction accounts, offset by increases in time deposits.

Future deposit levels will be influenced by the underlying asset servicing business, client deposit behavior, as well as market conditions, including the general levels of U.S. and non-U.S. interest rates.

Average other short-term borrowings declined to \$1.57 billion and \$1.73 billion for the third quarter and first nine months of 2016, respectively, from \$3.79 billion and \$4.21 billion for the same periods in 2015, respectively. The decrease was the result of the phase-out of our commercial paper program during 2015, consistent with the objectives of our 2015 recovery and resolution plan developed pursuant to the requirements of the Dodd-Frank Act.

Average long-term debt increased to \$11.89 billion and \$11.31 billion for the third quarter and first nine months of 2016, respectively, from \$10.50 billion and \$9.78 billion for the same periods in 2015, respectively. The increase primarily reflected the issuance of \$3.0 billion of senior debt in August 2015 and \$1.5 billion of senior debt in May 2016 which was offset by a \$900 million extendible note called at the end of February 2015 and the maturities of \$200

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

million of senior debt in December 2015, \$400 million of senior debt in January 2016 and \$1.0 billion of senior debt in March 2016.

Average other interest-bearing liabilities were \$5.65 billion and \$5.55 billion for the third quarter and first nine months of 2016, respectively, compared to \$4.46 billion and \$6.84 billion for the same periods in 2015, respectively, primarily the result of changes in the level of cash collateral received from clients in connection with our enhanced custody business, which is presented on a net basis in accordance with enforceable netting agreements.

Several factors could affect future levels of our net interest revenue and margin, including the volume and mix of client liabilities; actions of various central banks; changes in U.S. and non-U.S. interest rates; changes in the various yield curves around the world; revised or proposed regulatory capital or liquidity standards, or interpretations of those standards; the amount of discount accretion generated by the former conduit securities that remain in our investment securities portfolio; the yields earned on securities purchased compared to the yields earned on securities sold or matured; and changes in our enhanced custody business.

Based on market conditions and other factors, including regulatory requirements, we continue to reinvest the majority of the proceeds from pay-downs and maturities of investment securities in highly-rated securities, such as U.S. Treasury and agency securities, municipal securities, federal agency mortgage-backed securities and U.S. and non-U.S. mortgage- and asset-backed securities. The pace at which we continue to reinvest and the types of investment securities purchased will depend on the impact of market conditions, the implementation of regulatory standards, and other factors over time. We expect these factors and the levels of global interest rates to influence what effect our reinvestment program will have on future levels of our net interest revenue and net interest margin.

EXPENSES

Table 7: Expenses, provides the breakout of expenses for the quarters and nine months ended September 30, 2016 and 2015.

TABLE 7: EXPENSES

(Dollars in millions, except where otherwise noted)	Quarters Ended September 30,		% Change
	2016	2015

Other	352	680	(48)	
Total other	860	1,360	(37)	
Total expenses	\$5,894	\$6,193	(5)	

Compensation and employee benefits expenses decreased 4% in the third quarter of 2016 compared to the third quarter of 2015. The decrease was primarily due to lower severance costs and savings related to State Street Beacon, partially offset by higher costs related to the acquired GEAM business and increased costs to support regulatory initiatives and new business.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Information systems and communications expenses increased 8% in the third quarter of 2016 compared to the third quarter of 2015 and 9% in the nine months ended September 30, 2016 compared to the same period in 2015. The increase for both comparative periods was primarily related to investments supporting new business and State Street Beacon, the impact of the acquired GEAM business, and costs related to regulatory initiatives.

Other expenses increased 4% in the third quarter of 2016 compared to the third quarter of 2015 and decreased 37% in the nine months ended September 30, 2016 compared to the same period in 2015. The increase in the third quarter of 2016 was primarily due to establishing a legal reserve of approximately \$42 million related to the previously disclosed investigations by U.S. governmental agencies concerning our transition management business activities and the impact of the acquired GEAM business, partially offset by lower professional services expenses. The decrease in the nine months ended September 30, 2016 was primarily due to legal accruals of approximately \$400 million recorded in 2015, relating to our indirect foreign exchange business, as well as lower levels of professional services, securities processing, travel and insurance expenses in 2016.

Our compliance obligations have increased due to new regulations in the U.S. and internationally that have been adopted or proposed in response to the financial crisis. As a systemically important financial institution, we are subject to enhanced supervision and prudential standards. Our status as a G-SIB has also resulted in heightened prudential and conduct expectations of our U.S. and international regulators with respect to our capital and liquidity management and our compliance and risk oversight programs. These heightened expectations have increased our regulatory compliance costs, including personnel and systems, as well as significant additional implementation and related costs to enhance our regulatory compliance programs. We anticipate that these evolving and increasing regulatory compliance requirements and expectations, including our efforts

to complete our 2017 resolution plan (due to be submitted on July 1, 2017), as discussed within the Liquidity Risk Management section included in this Form 10-Q, will continue to affect our expenses. Our employee compensation and benefits, information systems and other expenses could increase, as we further adjust our operations in response to new or proposed requirements and heightened expectations.

Acquisition Costs

We recorded acquisition costs of \$33 million in the third quarter of 2016 compared to \$7 million in the third quarter of 2015, and \$47 million in the nine months ended September 30, 2016 compared to \$15 million during the nine months ended September 30, 2015. These amounts include approximately \$29 million related to our acquisition of GEAM on July 1, 2016. As we integrate GEAM's operations into our business, we expect to incur total merger and integration costs of approximately \$80 million through 2018. For further information on the GEAM acquisition, refer to Note 1 to the consolidated financial statements included in this Form 10-Q.

Restructuring Charges

We expect to incur aggregate pre-tax restructuring charges of approximately \$300 million to \$400 million beginning in 2016 through December 31, 2020 to implement State Street Beacon, our previously announced multi-year transformation program to fully digitize our business, deliver significant value and innovation for our clients and lower expenses across the organization. We estimate those charges will include approximately \$250 million to \$300 million in severance and benefits costs associated with targeted staff reductions (a substantial portion of which will result in future cash expenditures) and approximately \$50 million to \$100 million in information technology application rationalization and real estate actions.

In the third quarter and nine months ended September 30, 2016, we recorded net restructuring charges of \$10 million and \$120 million, respectively, associated with State Street Beacon.

The following table presents aggregate restructuring activity for the periods indicated.

TABLE 8: RESTRUCTURING CHARGES

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

INCOME TAX EXPENSE

Income tax expense was \$72 million in the third quarter of 2016 compared to \$67 million in the third quarter of 2015. In the first nine months of 2016 and 2015, income tax expense was \$226 million and \$215 million, respectively. Our effective tax rate for the first nine months of 2016 was 12.8% compared to 13.3% for the same period in 2015. The effective tax rate for the first nine months 2016 reflects a benefit from additional alternative energy investments in 2016. The 2015 tax rate benefited from the approval of a prior year tax refund and the reduction of an Italian deferred tax liability, partially offset by a change in New York tax law and a non-deductible legal accrual.

LINE OF BUSINESS INFORMATION

Our operations are organized for management reporting purposes into two lines of business: Investment Servicing and Investment Management, which are defined based on products and services provided. The results of operations for these lines of business are not necessarily comparable with those of other companies, including companies in the financial services industry. For information about our two lines of business, as well as the revenues, expenses and capital allocation methodologies associated with them, refer to Note 24 to the consolidated financial statements included in our 2015 Form 10-K and Note 17 to the consolidated financial statements included in this Form 10-Q.

^{nm} Not meaningful

Net interest revenue increased 4% in the third quarter of 2016 compared to the same period in 2015. Benefits during the third quarter of 2016 from the U.S. rate hike in December 2015 were partially offset by lower global interest rates that affected our revenue from certain floating-rate assets, the rate at which payments from the maturity or prepayment of portfolio holdings could be reinvested, and the effect of the stronger U.S. dollar. The third quarter of 2016 also reflects our management actions toward the end of the third quarter of 2015 to manage the size and composition of our investment portfolio as we seek to optimize our capital and liquidity positions in light of the evolving regulatory environment.

Net interest revenue decreased 2% in the first nine months of 2016 compared to the same period in 2015. The decrease is primarily the result of the previously mentioned management actions, which contributed to a reduction of average

interest and non-interest bearing deposits, as well as lower global interest rates, that affected our revenue from floating-rate assets, and the effect of the stronger U.S. dollar, partially offset by the benefit of higher levels of certain interest-earning assets. A discussion of net interest revenue is provided under “Net Interest Revenue” in

“Total Revenue” in this Management's Discussion and Analysis.

Total expenses decreased 2% and 9% in the third quarter and first nine months of 2016, respectively, compared to the same periods in 2015. The decreases primarily resulted from savings related to State Street Beacon and other expense reduction initiatives, partially offset by higher regulatory spending, net new business activity, and expenses for legal accruals recorded in the first nine months of 2015 in connection with outstanding and potential claims arising out of our indirect FX client activities.

In December 2015, we announced a review of the manner in which we invoiced certain expenses to certain of our Investment Servicing clients, primarily in the United States, during a period going back to 1998. We have informed our clients that we will pay to them the expenses we concluded were incorrectly invoiced to them, plus interest. In conjunction with that review, we are evaluating other aspects of invoicing relating to billing our Investment Servicing clients, including calculation of asset-based fees. See Note 10 to the consolidated financial statements included in this Form 10-Q.

AND RESULTS OF OPERATIONS (Continued)

Servicing Fees

Servicing fees increased 1% in the third quarter of 2016 compared to the same period in 2015, primarily due to net new business. Servicing fees decreased 2% in the first nine months of 2016 compared to the same period in 2015, primarily due to lower international market levels and the effect of the strong U.S. dollar, partially offset by net new business.

Servicing fees generated outside the U.S. were approximately 43% and 42% of total servicing fees in the third quarter and first nine months of 2016, respectively, compared to approximately 41% for the same periods in 2015, respectively.

⁽¹⁾ Geographic mix is based on the location in which the assets are serviced.

Asset levels as of September 30, 2016 did not reflect the estimated \$506 billion of new business in assets to be serviced, which was awarded to us in the second quarter of 2016 and prior periods but not installed prior to September 30, 2016. This new business will be reflected in AUCA in future periods after installation and will generate servicing fee revenue in subsequent periods.

With respect to these new assets, we will provide various services, including accounting, bank loan servicing, compliance reporting and monitoring, custody, depository banking services, foreign exchange, fund administration, hedge fund servicing, middle-office outsourcing, performance and analytics, private equity administration, real estate administration, securities finance, transfer agency, and wealth management services.

Trading Services

Total brokerage and other trading services	299	322	(7)
Total trading services revenue	\$771	\$869	(11)

Trading services revenue is composed of revenue generated by FX trading, as well as revenue generated by brokerage and other trading services. We primarily earn FX trading revenue by acting as a principal market-maker. We offer a range of FX products, services and execution models. Most of our FX products and execution services can be grouped into three broad categories, which are further explained below: “direct sales and trading,” “indirect FX trading” and “electronic FX services.” With respect to electronic FX services, we provide an execution venue, but do not act as agent or principal.

We also offer a range of brokerage and other trading products tailored specifically to meet the needs of the global pension community, including transition management and commission recapture. In addition, we act as distribution agent for the SPDR® Gold ETF. These products and services are generally differentiated by our role as an agent of the institutional investor. Revenue earned from these services is recorded in other trading, transition management and brokerage revenue within brokerage and other trading services revenue.

Our FX trading revenue is influenced by multiple factors, including: the volume and type of client FX transactions and related spreads; currency volatility, reflecting market conditions; and our management of exchange rate, interest rate and other market risks associated with our foreign exchange activities. The

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

relative impact of these factors on our total FX trading revenues often differs from period to period. For example, assuming all other factors remain constant, increases or decreases in volumes or spreads across product mix tend to result in increases or decreases, as the case may be, in client-related FX revenue. Revenue earned from direct sales and trading and indirect FX trading is recorded in FX trading revenue.

Total FX trading revenue decreased 10% and 14% in the third quarter and first nine months of 2016, respectively, compared to the same periods in 2015, primarily due to lower volumes and market volatility. In 2015, significant market events in Europe and China stimulated trading activity, in contrast to the same periods in 2016, which included reduced trading volumes during the first and second quarters of 2016 in advance of the U.K.'s referendum to exit from the European Union, or "Brexit," which largely leveled off during the third quarter of 2016.

We enter into FX transactions with clients and investment managers that contact our trading desk directly. These trades are all executed at negotiated rates. We refer to this activity, and our principal market-making activities, as "direct sales and trading" and it includes many transactions for funds serviced by third party custodians or prime brokers, as well as those funds under custody at State Street. Direct sales and trading revenue represented 59% and 57% of total foreign exchange trading revenue in the third quarter and first nine months of 2016, respectively, compared to 61% for each of the same periods in 2015.

Alternatively, clients or their investment managers may elect to route FX transactions to our FX desk through our asset-servicing operation; we refer to this activity as "indirect FX trading" and, in all cases, we are the funds' custodian. We execute indirect FX trades as a principal at rates disclosed to our clients. Estimated indirect sales and trading revenue represented 41% and 43% of total foreign exchange trading revenue in the third quarter and first nine months of 2016, respectively, as compared to 39% for each of the same periods in 2015. We calculate revenue for indirect FX trading using an attribution methodology. This methodology takes into consideration estimated mark-ups/downs and observed client volumes. Direct sales and trading revenue is all other FX trading revenue other than the revenue attributed to indirect FX trading.

Our clients that utilize indirect FX trading can, in addition to executing their FX transactions through dealers not affiliated with us, transition from indirect FX trading to either direct sales and trading execution, including our "Street FX" service, or to one of our electronic trading platforms. Street FX, in which we continue to act as a principal market-maker,

enables our clients to define their FX execution strategy and automate the FX trade execution process, both for funds under custody with us as well as those under custody at another bank.

Our direct sales and trading revenue decreased by 13% and 18% for the third quarter and first nine months of 2016, respectively, compared to the same periods in 2015. The decreases are primarily due to lower volumes and volatility. Our estimated indirect FX trading revenue decreased 6% and 7% in the third quarter and first nine months of 2016, respectively, as compared to the same periods in 2015. The decreases mainly resulted from lower volumes and volatility.

We continue to expect that some clients may choose, over time, to reduce their level of indirect FX trading transactions in favor of other execution methods, including either direct sales and trading transactions or electronic FX services which we provide. To the extent that clients shift to other execution methods that we provide, our FX trading revenue may decrease, even if volumes remain consistent.

Total brokerage and other trading services revenue decreased 10% and 7% in the third quarter and first nine months of 2016, respectively, compared to the same periods in 2015. The decreases were primarily due to lower transition management revenues, a non-recurring gain in the prior year, and reduced client volumes.

Our clients may choose to execute FX transactions through one of our electronic trading platforms. These transactions generate revenue through a "click" fee. Revenue from such electronic FX services decreased 11% and 7% in the third quarter and first nine months of 2016, respectively, compared to the same periods in 2015, mainly due to reduced client volumes.

Other trading, transition management and brokerage revenue decreased 10% and 7% in the third quarter and first nine months of 2016, respectively, compared to the same periods in 2015, primarily due to a non-recurring gain in the prior year.

In recent years, our transition management revenue was adversely affected by compliance issues in our U.K. business during 2010 and 2011. The reputational and regulatory impact of those compliance issues continues and may adversely affect our results in future periods. See Note 10 to the consolidated financial statements included in this Form 10-Q.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Securities Finance

Our securities finance business consists of three components:

- (1) an agency lending program for SSGA-managed investment funds with a broad range of investment objectives, which we refer to as the SSGA lending funds;
- (2) an agency lending program for third-party investment managers and asset owners, which we refer to as the agency lending funds; and
- (3) security lending transactions which we enter into as principal, which we refer to as our enhanced custody business. See Table 9: Investment Servicing Line of Business Results, for the comparison of securities finance revenue for the quarters and nine months ended September 30, 2016 and 2015.

Securities finance revenue earned from our agency lending activities, which is composed of our split of both the spreads related to cash collateral and the fees related to non-cash collateral, is principally a function of the volume of securities on loan, the interest-rate spreads and fees earned on the underlying collateral, and our share of the fee split. As principal, our enhanced custody business borrows securities from the lending client and then lends such securities to the subsequent borrower, either a State Street client or a broker/dealer. We act as principal when the lending client is unable to, or elects not to, transact directly with the market and execute the transaction and furnish the securities. In our role as principal, we provide support to the transaction through our credit rating. While we source a significant proportion of the securities furnished by us in our role as principal from third parties, we have the ability to source securities through our assets under custody and administration from clients who have designated State Street as an eligible borrower.

Securities finance revenue increased 20% and 15% in the third quarter and first nine months of 2016, respectively, compared to the same periods in 2015. The increase was primarily the result of growth in our enhanced custody business and higher agency lending.

Market influences may continue to affect client demand for securities finance, and as a result our revenue from, and the profitability of, our securities lending activities in future periods. In addition, the constantly evolving regulatory environment may affect the volume of our securities lending activity and related revenue and profitability in future periods.

Processing Fees and Other

Processing fees and other revenue includes diverse types of fees and revenue, including fees from our structured products business, fees from software licensing and maintenance, equity income from our joint venture investments, gains and losses on sales of leased equipment and other assets, and amortization of our tax-advantaged investments. Processing fees and other revenue, presented in Table 9: Investment Servicing Line of Business Results, decreased 95% in the third quarter of 2016 compared to the same period in 2015. The decrease was primarily due to a non-recurring gain of \$83 million on the sale of commercial real estate in the third quarter of 2015. Processing fees and other revenue decreased 28% in the first nine months of 2016 compared to the same period in 2015, primarily due to the aforementioned non-recurring gain as well as lower earnings from equity method investments, partially offset by a pre-tax gain of \$53 million on the sale of WM/Reuters in the second quarter of 2016.

Total revenue for our Investment Management Line of Business, presented in Table 14: Investment Management Line of Business Results, increased 33% and 7% in the third quarter and first nine months of 2016, respectively, compared to the same periods

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

in 2015. Total fee revenue increased 32% and 7% in the third quarter and first nine months of 2016, respectively, compared to the same periods in 2015.

Total expenses increased in the third quarter of 2016 and first nine months of 2016 compared to the same periods in 2015 primarily due to costs related to the acquisition of GEAM, partially offset by savings related to State Street Beacon.

In July 2016, we completed our acquisition of GEAM in a cash transaction with a total initial purchase price of approximately \$437 million and approximately \$46 million in potential incremental purchase price related to future opportunities with General Electric. AUM associated with the acquired GEAM operations totaled \$112 billion as of September 30, 2016. Our consolidated financial statements include the operating results for the acquired business from the date of acquisition, July 1, 2016.

Management Fees

Through SSGA, we provide a broad range of investment management strategies, specialized investment management advisory services, OCIO and other financial services for corporations, public funds, and other sophisticated investors. SSGA offers an array of investment management strategies, including passive and active, such as enhanced indexing, using quantitative and fundamental methods for both U.S. and global equity and fixed income securities. SSGA also offers ETFs, such as the SPDR® ETF brand. While certain management fees are directly determined by the values of assets under management and the investment strategies employed, management fees reflect other factors as well, including our relationship pricing for clients who use multiple services, and the benchmarks specified in the respective management agreements related to performance fees.

Management fees increased 28% in the third quarter of 2016 compared to the same period in 2015, primarily due to the acquisition of GEAM on July 1, 2016 and a decline in money market fee waivers. Management fees increased 4% in the first nine months of 2016 compared to the same period in 2015, primarily due to the aforementioned acquisition and a decline in money market fee waivers, partially offset by weaker international markets and the effect of the strong U.S. dollar.

Management fees generated outside the U.S. were approximately 29% and 33% of total management fees in the third quarter and first nine months of 2016, respectively, compared to 34% and 35% for the same periods in 2015, respectively.

(1) Amounts represent long-term portfolios, excluding ETFs.

(2) Includes both floating- and constant-net-asset-value portfolios held in commingled structures or separate accounts.

(3) Includes real estate investment trusts, currency and commodities, including SPDR® Gold Fund, for which State Street is not the investment manager, but acts as distribution agent.

(4) Includes assets under management acquired as part of the acquisition of GEAM on July 1, 2016.

The preceding table did not include new asset management business which was awarded to SSGA but not installed as of September 30, 2016. New business will be reflected in AUM in future periods after installation and will generate management fee revenue in subsequent periods. Total AUM as of September 30, 2016 included managed assets lost but not liquidated. Lost business occurs from time to time and it is difficult to predict the timing of client behavior in transitioning these assets. This timing can vary significantly.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

FINANCIAL CONDITION

The structure of our consolidated statement of condition is primarily driven by the liabilities generated by our Investment Servicing and Investment Management lines of business. Our clients' needs and our operating objectives determine balance sheet volume, mix, and currency denomination. As our clients execute their worldwide cash management and investment activities, they utilize deposits and short-term investments that constitute the majority of our liabilities. These liabilities are generally in the form of interest-bearing transaction account deposits, which are denominated in a variety of currencies; non-interest-bearing demand deposits; and repurchase agreements, which generally serve as short-term investment alternatives for our clients.

Deposits and other liabilities resulting from client initiated transactions are invested in assets that generally have contractual maturities significantly longer than our liabilities; however, we evaluate the operational nature of our deposits and seek to maintain appropriate short-term liquidity of those liabilities that are not operational in nature and maintain longer-termed assets for our operational deposits. Our assets consist primarily of securities held in our available-for-sale or held-to-maturity portfolios and short-duration financial instruments, such as interest-bearing deposits with banks and securities purchased under resale agreements. The actual mix of assets is determined by the characteristics of the client liabilities and our desire to maintain a well-diversified portfolio of high-quality assets.

Collateralized mortgage obligations	1,437	1,687
Total	\$ 28,368	\$ 29,952

⁽¹⁾ Primarily composed of securities guaranteed by the federal government with respect to at least 97% of defaulted principal and accrued interest on the underlying loans.

Additional information about our investment securities portfolio is provided in Note 3 to the consolidated financial statements included in this Form 10-Q.

We manage our investment securities portfolio to align with the interest-rate and duration characteristics of our client liabilities that we consider to be operational deposits and in the context of the overall structure of our consolidated statement of condition, in consideration of the global interest-rate environment. We consider a well-diversified, high-credit quality investment securities portfolio to be an important element in the management of our consolidated statement of condition.

Approximately 92% of the carrying value of the portfolio was rated “AAA” or “AA” as of both September 30, 2016 and December 31, 2015.

TABLE 21: INVESTMENT
PORTFOLIO BY EXTERNAL CREDIT
RATING

	September 30, 2016		December 31, 2015	
AAA ⁽¹⁾	78	%	80	%
AA	14		12	
A	5		5	
BBB	2		2	
Below BBB	1		1	
	100	%	100	%

⁽¹⁾ Includes U.S. Treasury and federal agency securities that are split-rated, “AAA” by Moody’s Investors Service and “AA+” by Standard & Poor’s.

As of September 30, 2016, the investment portfolio of 12,194 securities was diversified with respect to asset class. Approximately 51% of the aggregate carrying value of the portfolio as of September 30, 2016 and December 31, 2015 was composed of mortgage-backed and asset-backed securities. The asset-backed securities portfolio, of which approximately 92% of the carrying value as of both September 30, 2016 and December 31, 2015 was floating-rate, consisted primarily of student loan-backed and credit card-backed securities. Mortgage-backed securities were composed of securities issued by the Federal National Mortgage Association and Federal Home Loan Mortgage Corporation, as well as U.S. and non-U.S. large-issuer collateralized mortgage obligations.

In December 2013, U.S. regulators issued final regulations to implement the Volcker rule. The Volcker rule will prohibit banking entities, including us and our affiliates, from engaging in certain prohibited proprietary trading activities, as defined in the final Volcker rule regulations, subject to exemptions for market making-related activities, risk-mitigating hedging, underwriting and certain other activities. The Volcker rule will require banking entities to either restructure or divest certain ownership interests in, and relationships with, covered funds (as such terms are defined in the final Volcker rule regulations).

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The Volcker rule became effective in July 2012, and the final implementing regulations became effective in April 2014. Under a 2016 conformance period extension issued by the Federal Reserve, all investments in and relationships with investments in a covered fund made or entered into after December 31, 2013 by a banking entity and its affiliates, and all proprietary trading activities of those entities, were required to be in conformance with the Volcker rule and its final implementing regulations by July 21, 2016. On July 7, 2016, the Federal Reserve announced a final one-year extension of the general conformance period for banking entities to conform ownership interests in and relationships with legacy covered funds to July 21, 2017.

Whether certain types of investment securities or structures such as CLOs constitute covered funds, as defined in the final Volcker rule regulations, and do not benefit from the exemptions provided in the Volcker rule, and whether a banking organization's investments therein constitute ownership interests remain subject to (1) market, and ultimately regulatory, interpretation, and (2) the specific terms and other characteristics relevant to such investment securities and structures.

As of September 30, 2016, we held approximately \$1.39 billion of investments in CLOs. As of the same date, these investments had an aggregate pre-tax net unrealized gain of approximately \$17 million, composed primarily of gross unrealized gains of \$17 million. Comparatively, as of December 31, 2015, we held approximately \$2.10 billion of investments in CLOs which had an aggregate pre-tax net unrealized gain of approximately \$43 million, composed of gross unrealized gains of \$46 million and gross unrealized losses of \$3 million. In the event that we or our banking regulators conclude that such investments in CLOs, or other investments, are covered funds under the Volker rule, we may be required to divest of such investments. If other banking entities reach similar conclusions with respect to similar investments held by them, the prices of such investments could decline significantly, and we may be required to divest of such investments at a significant discount compared to the investments' book value. This could result in a material adverse effect on our consolidated results of operations or on our consolidated financial condition in the period in which such a divestiture occurs.

The final Volcker rule regulations also require banking entities to establish extensive programs designed to ensure compliance with the restrictions of the Volcker rule. We have established a compliance program which we believe complies with the final Volcker rule regulations as currently in effect. Such compliance program restricts our ability in the future to engage in certain activities including priority trading

and service certain types of funds, in particular covered funds for which SSGA acts as an advisor and certain types of trustee relationships. Consequently, Volcker rule compliance entails both the cost of a compliance program and loss of certain revenue and future opportunities.

Non-U.S. Debt Securities

Approximately 24% of the aggregate carrying value of our investment securities portfolio was non-U.S. debt securities as of September 30, 2016, compared to approximately 23% as of December 31, 2015.

TABLE 22: NON-U.S. DEBT SECURITIES

(In millions)	September 30, 2016	December 31, 2015
Available-for-sale:		
United Kingdom	\$ 5,694	\$ 5,754

Ireland	118	29
Other ⁽¹⁾	160	106
Total	\$ 21,593	\$ 19,527
Held-to-maturity:		
Netherlands	\$ 673	\$ 684
United Kingdom	607	1,067
Australia	539	917
Germany	449	832
Singapore	174	129
Spain	106	108
Italy	53	59
Ireland	—	10
Other ⁽²⁾	84	115
Total	\$ 2,685	\$ 3,921

⁽¹⁾ Included approximately \$91 million and \$26 million as of September 30, 2016 and December 31, 2015, respectively, related to Portugal and Austria, all of which were related to mortgage-backed securities and auto loans.

⁽²⁾ Included approximately \$38 million and \$31 million as of September 30, 2016 and December 31, 2015, respectively, related to Portugal and Norway, all of which were related to mortgage-backed securities and auto loans. Approximately 88% and 89% of the aggregate carrying value of these non-U.S. debt securities was rated “AAA” or “AA” as of September 30, 2016 and December 31, 2015, respectively. The majority of these securities comprised senior positions within the security structures; these positions have a level of protection provided through subordination and other forms of credit protection. As of September 30, 2016 and December 31, 2015, approximately 66% and

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

70%, respectively, of the aggregate carrying value of these non-U.S. debt securities was floating-rate, and accordingly, we consider these securities to have minimal interest-rate risk.

As of September 30, 2016, our non-U.S. debt securities had an average market-to-book ratio of 100.7%, and an aggregate pre-tax net unrealized gain of approximately \$171 million, composed of gross unrealized gains of \$203 million and gross unrealized losses of \$32 million. These unrealized amounts included a pre-tax net unrealized gain of \$100 million, composed of gross unrealized gains of \$114 million and gross unrealized losses of \$14 million, associated with non-U.S. debt securities available-for-sale.

As of September 30, 2016, the underlying collateral for non-U.S. mortgage- and asset-backed securities primarily included U.K. prime mortgages, Australian and Dutch mortgages and German automobile loans. The securities listed under "Canada" were composed of Canadian government securities and corporate debt and covered bonds. The securities listed under "France" were composed of automobile loans, prime mortgages, and corporate debt and covered bonds. The securities listed under "Japan" were substantially composed of Japanese government securities and corporate debt. The securities listed under "South Korea" were composed of South Korean government securities.

Additional information on our exposures relating to Spain, Italy, Ireland and Portugal as of September 30, 2016 is provided under "Financial Condition - Cross-Border Outstandings" in this Management's Discussion and Analysis.

Municipal Obligations

We carried approximately \$10.76 billion of municipal securities classified as state and political subdivisions in our investment securities portfolio as of September 30, 2016 as shown in Table 20: Carrying Values of Investment Securities. Substantially all of these securities were classified as AFS, with the remainder classified as HTM. As of the same date, we also provided approximately \$9.17 billion of credit and liquidity facilities to municipal issuers.

TABLE 23: STATE AND MUNICIPAL OBLIGORS⁽¹⁾

(In millions)	Total Municipal Securities	Credit and Liquidity Facilities ⁽²⁾	Total	% of Total Municipal Exposure	
September 30, 2016

Massachusetts	927	731	1,658	9	
Maryland	454	413	867	5	
Total	\$ 3,892	\$ 6,585	\$10,477		

⁽¹⁾ Represented 5% or more of our aggregate municipal credit exposure of approximately \$19.93 billion and \$18.50 billion across our businesses as of September 30, 2016 and December 31, 2015, respectively.

⁽²⁾ Includes municipal loans which are also presented within Table 25.

Our aggregate municipal securities exposure presented in Table 23: State and Municipal Obligors, was concentrated primarily with highly-rated counterparties, with approximately 92% of the obligors rated “AAA” or “AA” as of September 30, 2016. As of that date, approximately 51% and 43% of our aggregate municipal securities exposure was associated with general obligation and revenue bonds, respectively. In addition, we had no exposures associated with industrial development or land development bonds. The portfolios are also diversified geographically, with the states that represent our largest exposures widely dispersed across the U.S.

Impairment

Impairment exists when the fair value of an individual security is below its amortized cost basis. Impairment of a security is further assessed to determine whether such impairment is other-than-temporary. When the impairment is deemed to be other-than-temporary, we record the loss in our consolidated statement of income. In addition, for AFS and HTM debt securities, we record impairment in our consolidated statement of income when management intends to sell (or may be required to sell) the securities before they recover in value, or when management expects the present value of cash flows expected to be collected from the securities to be less than the amortized cost of the impaired security (a credit loss).

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The increase in the net unrealized gain position as of September 30, 2016 as compared to December 31, 2015, presented in Table 24: Amortized Cost, Fair Value and Net Unrealized Gains (Losses) of Investment Securities, was primarily attributable to the decline in interest rates.

TABLE 24: AMORTIZED COST, FAIR VALUE AND NET UNREALIZED GAINS (LOSSES) OF INVESTMENT SECURITIES

(In millions)	September 30, 2016			December 31, 2015		
	Amortized Cost	Net Unrealized Gains(Losses)	Fair Value	Amortized Cost	Net Unrealized Gains(Losses)	Fair Value
Available-for-sale ⁽¹⁾	\$70,795	\$ 725	\$71,520	\$69,843	\$ 227	\$70,070
Held-to-maturity ⁽¹⁾	28,368	412	28,780	29,952	(154)	29,798
Total investment securities	\$99,163	\$ 1,137	\$100,300	\$99,795	\$ 73	\$99,868
Net after-tax unrealized gain (loss)		\$ 682			\$ 44	

⁽¹⁾ AFS securities are carried at fair value, with after-tax net unrealized gains and losses recorded in AOCI. HTM securities are carried at amortized cost, and unrealized gains and losses are not recorded in our consolidated financial statements.

We conduct periodic reviews of individual securities to assess whether OTTI exists. Our assessment of OTTI involves an evaluation of economic and security-specific factors. Such factors are based on estimates, derived by management, which contemplate current market conditions and security-specific performance. To the extent that market conditions are worse than management's expectations or due to idiosyncratic bond performance, OTTI could increase, in particular the credit-related component that would be recorded in our consolidated statement of income.

In the nine months ended September 30, 2016 and 2015, we recorded \$2 million and \$1 million, respectively, of OTTI. Management considers the aggregate decline in fair value of the remaining investment securities and the resulting gross unrealized losses of \$366 million as of September 30, 2016 to be temporary and not the result of any material changes in the credit characteristics of the securities. Additional information with respect to OTTI, net impairment losses and gross unrealized losses is provided in Note 3 to the consolidated financial statements included in this Form 10-Q.

Our evaluation of potential OTTI of structured credit securities with collateral in the U.K. takes into account the outcome from the Brexit referendum and assumes no disruption of payments on these securities.

Our evaluation of potential OTTI of mortgage-backed securities with collateral in Spain, Italy, Ireland, and Portugal takes into account slow economic growth, austerity measures, and government intervention in the corresponding mortgage markets and assumes a conservative baseline macroeconomic environment. Our baseline view assumes a recessionary period characterized by high unemployment and by additional declines in housing prices between 3% and 21%. Our evaluation of OTTI in our base case does not assume a disorderly sovereign debt restructuring or a break-up of the Eurozone.

Loans and Leases

TABLE 25: U.S. AND NON- U.S. LOANS AND LEASES

(In millions)	September 30, 2016	December 31, 2015
Institutional:		
U.S.	\$ 17,598	\$ 16,237
Non-U.S.	3,877	2,534
Commercial real estate:		

U.S.	27	28
Total loans and leases	\$ 21,502	\$ 18,799

The increase in loans in the institutional segment as of September 30, 2016 as compared to December 31, 2015 was primarily driven by higher levels of short-duration advances, partially offset by a decrease in other commercial and financial loans.

Short-duration advances to our clients included in the institutional segment were \$5.70 billion and \$2.62 billion as of September 30, 2016 and December 31, 2015, respectively. These short-duration advances provide liquidity to fund clients in support of their transaction flows associated with securities settlement activities.

As of September 30, 2016 and December 31, 2015, our investment in senior secured loans totaled approximately \$3.38 billion and \$3.14 billion, respectively. In addition, we had binding unfunded commitments as of September 30, 2016 and December 31, 2015 of \$107 million and \$186 million, respectively, to participate in such syndications.

These senior secured loans, which are primarily rated “speculative” under our internal risk-rating framework (refer to Note 4 to the consolidated financial statements included in this Form 10-Q), are externally rated “BBB,” “BB” or “B,” with approximately 93% of the loans rated “BB” or “B” as of both September 30, 2016 and December 31, 2015. Our investment strategy involves generally limiting our investment to larger, more liquid credits underwritten by major global financial institutions, applying our internal credit analysis process to each potential investment, and diversifying our exposure by

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

counterparty and industry segment. However, these loans have significant exposure to credit losses relative to higher-rated loans.

As of September 30, 2016 and December 31, 2015, unearned income deducted from our investment in leveraged lease financing was \$96 million and \$102 million, respectively, for U.S. leases and \$198 million and \$231 million, respectively, for non-U.S. leases.

The CRE loans are composed of the loans acquired in 2008 pursuant to indemnified repurchase agreements with an affiliate of Lehman as a result of the Lehman Brothers bankruptcy. Additional information about all of our loan-and-lease segments, as well as underlying classes, is provided in Note 4 to the consolidated financial statements included in this Form 10-Q.

No loans, including CRE loans, were modified in troubled debt restructurings in the first nine months of 2016 and 2015.

TABLE 26: ALLOWANCE FOR LOAN AND
LEASE LOSSES

	Nine Months Ended September 30,	
(In millions)	2016	2015
Allowance for loan and lease losses:		
Beginning balance	\$ 46	\$ 37
Provision for loan losses	8	11
Charge-offs	(3)	—
Ending balance	\$ 51	\$ 48

The provision of \$8 million and the charge-offs of \$3 million recorded in the first nine months of 2016 were associated with our exposure to senior secured loans to non-investment grade institutional borrowers, which were purchased in connection with our participation in syndicated loans.

As of September 30, 2016, approximately \$43 million of our allowance for loan and lease losses was related to senior secured loans included in the institutional segment. As this portfolio grows and matures, our allowance for loan and lease losses related to these loans may increase through additional provisions for credit losses. The remaining \$8 million was related to other institutional segment loans.

Cross-Border Outstandings

Cross-border outstandings are amounts payable to us by non-U.S. counterparties which are denominated in U.S. dollars or other non-local currency, as well as non-U.S. local currency claims not funded by local currency liabilities. Our cross-border outstandings consist primarily of deposits with banks; loans and lease financing, including short-duration advances; investment securities; amounts related to foreign exchange and interest-rate contracts; and securities finance. In addition to credit risk, cross-border outstandings have the risk that, as a result of political or economic conditions in a country, borrowers may be unable to meet their contractual repayment obligations of principal and/or interest when due because of the unavailability of, or restrictions on, foreign exchange needed by borrowers to repay their obligations.

We place deposits with non-U.S. counterparties that have strong internal State Street risk ratings. Counterparties are approved and monitored by our Country Risk Committee. This process includes financial analysis of non-U.S. counterparties and the use of an internal risk-rating system. Each counterparty is reviewed at least annually and potentially more frequently based on deteriorating credit fundamentals or general market conditions. We also utilize risk mitigation and other facilities that may reduce our exposure through the use of cash collateral and/or balance

sheet netting where we deem appropriate. In addition, the Country Risk Committee performs country-risk analyses and monitors limits on country exposure.

The total cross-border outstandings presented in Table 27: Cross-Border Outstandings, represented approximately 28% and 25% of our consolidated total assets as of September 30, 2016 and December 31, 2015, respectively.

Portugal	26	—	26

As market and economic conditions change, the major independent credit rating agencies may downgrade U.S. and non-U.S. financial institutions and sovereign issuers which have been, and may in the future be, significant counterparties to us, or whose financial instruments serve as collateral on which we rely for credit risk mitigation purposes, and may do so again in the future. As a result, we may be exposed to increased counterparty risk, leading to negative ratings volatility.

Risk Management

In the normal course of our global business activities, we are exposed to a variety of risks, some inherent in the financial services industry, others more specific to our business activities. Our risk management framework focuses on material risks, which include the following:

- credit and counterparty risk;
- liquidity risk, funding and management;
- operational risk;
- information technology risk;
- market risk associated with our trading activities;
- market risk associated with our non-trading activities, which we refer to as asset-and-liability management, and which consists primarily of interest-rate risk;
- strategic risk;
- model risk; and
- reputational, fiduciary and business conduct risk.

Many of these risks, as well as certain of the factors underlying each of these risks that could affect our businesses and our consolidated financial statements, are discussed in detail under Item 1A, “Risk Factors,” included in our 2015 Form 10-K.

For additional information on our risk management, including our risk appetite framework and risk governance committee structure, refer to pages 77 to 82 in our 2015 Form 10-K.

Credit Risk Management

We define credit risk as the risk of financial loss if a counterparty, borrower or obligor, collectively referred to as a counterparty, is either unable or unwilling to repay borrowings or settle a transaction in accordance with underlying contractual terms. We assume credit risk in our traditional non-trading lending activities, such as loans and contingent commitments, in our investment securities portfolio, where recourse to a counterparty exists, and in our direct and indirect trading activities, such as principal securities lending and foreign exchange and indemnified agency securities lending. We also assume credit risk in our day-to-day treasury and securities and other settlement operations, in the form of deposit placements and other cash balances, with central banks or private sector institutions.

For additional information on our credit risk management, including our core policies and principles, structure and organization, credit ratings, risk parameter estimates, credit risk mitigation, credit limits, reporting, monitoring, controls and reserve for credit losses, refer to pages 82 to 87 in our 2015 Form 10-K.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Liquidity Risk Management

Our liquidity framework contemplates areas of potential risk based on our activities, size, and other appropriate risk-related factors. In managing liquidity risk we employ limits, maintain established metrics and early warning indicators, and perform routine stress testing to identify potential liquidity needs. This process involves the evaluation of a combination of internal and external scenarios which assist us in measuring our liquidity position and in identifying potential increases in cash needs or decreases in available sources of cash, as well as the potential impairment of our ability to access the global capital markets.

We manage our liquidity on a global, consolidated basis. We also manage liquidity on a stand-alone basis at the parent company, as well as at certain branches and subsidiaries of State Street Bank. State Street Bank generally has access to markets and funding sources limited to banks, such as the federal funds market and the Federal Reserve's discount window. Our parent company is managed to a more conservative liquidity profile, reflecting narrower market access. Our parent company typically holds enough cash, primarily in the form of interest-bearing deposits or time deposits with its banking subsidiaries, to meet its current debt maturities and cash needs, as well as those projected over the next one-year period. As of September 30, 2016, the value of our parent company's net liquid assets totaled \$4.47 billion, compared with \$5.73 billion as of December 31, 2015. As of September 30, 2016, our parent company and State Street Bank had approximately \$450 million of senior notes outstanding that will mature in the next twelve months.

For additional information on our liquidity risk management, as well as liquidity risk metrics, refer to pages 87 to 88 in our 2015 Form 10-K. For additional information on our liquidity ratios, including LCR and Net Stable Funding Ratio, refer to page 9 in our 2015 Form 10-K. Beginning in July 2015, we were required to report our LCR to the Federal Reserve on a daily basis. As of September 30, 2016, our LCR was in excess of 100%.

Asset Liquidity

Central to the management of our liquidity is asset liquidity, which consists primarily of unencumbered highly liquid securities, cash and cash equivalents reported on our consolidated statement of condition. We restrict the eligibility of securities of asset liquidity to U.S. Government and federal agency securities (including mortgage-backed securities), selected non-U.S. Government and supranational securities as well as certain other high-quality securities which generally are more liquid than

other types of assets even in times of stress. Our asset liquidity metric is similar to the HQLA under the U.S. LCR, and our HQLA, under the LCR final rule definition, were estimated to be \$109.47 billion and \$109.39 billion as of September 30, 2016 and December 31, 2015, respectively.

TABLE 29: COMPONENTS OF HQLA BY TYPE OF ASSET

(In millions)	September 30, December 31,	
	2016	2015
Excess Central Bank Balances	\$ 68,937	\$ 66,063
U.S. Treasuries	19,563	22,518
Other Investment securities	15,771	16,952
Foreign government	5,202	3,861
Total	\$ 109,473	\$ 109,394

With respect to highly liquid short-term investments presented in the preceding table, due to the continued elevated level of client deposits as of September 30, 2016, we maintained cash balances in excess of regulatory requirements governing deposits with the Federal Reserve of approximately \$68.94 billion at the Federal Reserve, the ECB and other non-U.S. central banks, compared to \$66.06 billion as of December 31, 2015. The higher levels of deposits with central banks as of September 30, 2016 compared to December 31, 2015 was due to normal deposit volatility. The increase in other investment securities as of September 30, 2016 compared to December 31, 2015, presented in the

table above, was primarily associated with repositioning the investment portfolio in light of the liquidity requirements of the LCR.

Liquid securities carried in our asset liquidity include securities pledged without corresponding advances from the FRBB, the FHLB, and other non-U.S. central banks. State Street Bank is a member of the FHLB. This membership allows for advances of liquidity in varying terms against high-quality collateral, which helps facilitate asset-and-liability management.

Access to primary, intra-day and contingent liquidity provided by these utilities is an important source of contingent liquidity with utilization subject to underlying conditions. As of September 30, 2016 and December 31, 2015, we had no outstanding primary credit borrowings from the FRBB discount window or any other central bank facility, and as of the same dates, no FHLB advances were outstanding.

In addition to the securities included in our asset liquidity, we have significant amounts of other unencumbered investment securities. The aggregate fair value of those securities was \$40.16 billion as of September 30, 2016, compared to \$41.00 billion as of December 31, 2015. These securities are available sources of liquidity, although not as rapidly deployed as those included in our asset liquidity.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Uses of Liquidity

Significant uses of our liquidity could result from the following: withdrawals of client deposits; draw-downs of unfunded commitments to extend credit or to purchase securities, generally provided through lines of credit; and short-duration advance facilities. Such circumstances would generally arise under stress conditions including deterioration in credit ratings. We had unfunded commitments to extend credit with gross contractual amounts totaling \$21.72 billion and \$22.58 billion as of September 30, 2016 and December 31, 2015, respectively. These amounts do not reflect the value of any collateral. As of September 30, 2016, approximately 75% of our unfunded commitments to extend credit expire within one year. Since many of our commitments are expected to expire or renew without being drawn upon, the gross contractual amounts do not necessarily represent our future cash requirements.

State Street, like other bank holding companies with total consolidated assets of \$50 billion or more, periodically submits a plan for rapid and orderly resolution in the event of material financial distress or failure--commonly referred to as a resolution plan or a living will--to the Federal Reserve and the FDIC under Section 165(d) of the Dodd-Frank Act. Through resolution planning, we seek, in the event of the insolvency of State Street, to maintain State Street Bank's role as a key infrastructure provider within the financial system, while minimizing risk to the financial system and maximizing value for the benefit of our stakeholders. We have and will continue to focus management attention and resources to meet regulatory expectations with respect to resolution planning. In the event of material financial distress or failure, our preferred resolution strategy, referred to as the single point of entry strategy, provides for the recapitalization of State Street Bank and our other material entities by the parent company (for example, by forgiving inter-company indebtedness of State Street Bank owed, directly or indirectly, to the parent company) prior to the parent company's entry into bankruptcy proceedings. The recapitalization, if successful, is intended to enable State Street Bank and our other material entities to continue operating. To implement this strategy, we anticipate establishing a pre-funded intermediate holding company that would support State Street Bank and our other material entities throughout the resolution period. The amount of assets available to the intermediate holding company is anticipated to vary over time and may not be sufficient to meet the liquidity and capital needs of State Street Bank and our other material entities. The parent company and the intermediate holding company would obligate themselves to recapitalizing and/or providing liquidity to State Street Bank and all of our other material entities in the event

of material financial distress, under a contract known as a support agreement. The parent company and the intermediate holding company would secure their obligations under the support agreement by entering into a contract known as a security agreement and by pledging their rights in the assets that the parent company and the intermediate holding company would use to fulfill their support obligations to State Street Bank and our other material entities. The parent company intends to pre-fund the intermediate holding company upon the execution of the support agreement by transferring assets to it that will be available for the subsequent provision of capital and liquidity to State Street Bank and all of our other material entities. Under this single point of entry strategy, State Street Bank and our material entities would not themselves enter into resolution proceedings; they would instead be transferred to a newly organized holding company held by a reorganization trust for the benefit of the parent company's claimants. In the event that such recapitalization actions occur and were unsuccessful in stabilizing State Street Bank, the parent company's financial condition would be adversely impacted and equity and debt holders of the parent company may, as a consequence, be in a worse position than if the recapitalization did not occur.

On April 13, 2016, the Federal Reserve and the FDIC announced the completion of their review of our resolution plan submitted in July 2015. While the Federal Reserve and the FDIC noted improvements in the plan over our prior resolution plans, the regulatory authorities jointly determined that the 2015 resolution plan is not credible or would not facilitate an orderly resolution. We responded to the deficiencies jointly identified by the Federal Reserve and the FDIC in our 2016 resolution plan submission filed on October 1, 2016. Although our October 2016 submission describes the actions we have taken to address the deficiencies identified by the regulatory authorities, those authorities may consider those actions to be insufficient due to a number of factors, including, but not limited to,

challenges we may experience in interpreting and addressing regulatory expectations, failure to implement remediation in a timely manner, the complexities of development of a comprehensive plan to resolve a global custodial bank and related costs and dependencies. If we fail to meet regulatory expectations to the satisfaction of the Federal Reserve and the FDIC in our resolution plan submission filed on October 1, 2016 or in any future submission, we could be subject to more stringent capital, leverage or liquidity requirements, or restrictions on our growth, activities or operations.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Funding

Deposits

We provide products and services including custody, accounting, administration, daily pricing, foreign exchange services, cash management, financial asset management, securities finance and investment advisory services. As a provider of these products and services, we generate client deposits, which have generally provided a stable, low-cost source of funds. As a global custodian, clients place deposits with State Street entities in various currencies. We invest these client deposits in a combination of investment securities and short-duration financial instruments whose mix is determined by the characteristics of the deposits.

For the past several years, we have frequently experienced higher client deposit inflows toward the end of each fiscal quarter or the end of the fiscal year. As a result, we believe average client deposit balances are more reflective of ongoing funding than period-end balances.

TABLE 30: CLIENT DEPOSITS

	September 30,		Average Balance Nine Months Ended September 30,	
	2016	2015	2016	2015
(In millions)				
Client deposits ⁽¹⁾	\$183,900	\$168,757	\$153,612	\$178,313

⁽¹⁾ Balance as of September 30, 2016 and September 30, 2015 excluded term wholesale CDs of \$14.87 billion and \$17.61 billion, respectively; average balances for the periods ended September 30, 2016 and September 30, 2015 excluded average CDs of \$15.59 billion and \$12.67 billion, respectively.

Short-Term Funding

We phased out our commercial paper program prior to December 31, 2015, consistent with the objectives of our 2015 recovery and resolution plan developed pursuant to the requirements of the Dodd-Frank Act. Accordingly, we had no commercial paper outstanding at September 30, 2016 or December 31, 2015.

Our on-balance sheet liquid assets are also an integral component of our liquidity management strategy. These assets provide liquidity through maturities of the assets, but more importantly, they provide us with the ability to raise funds by pledging the securities as collateral for borrowings or through outright sales. In addition, our access to the global capital markets gives us the ability to source incremental funding at reasonable rates of interest from wholesale investors. As discussed earlier under "Asset Liquidity," State Street Bank's membership in the FHLB allows for advances of liquidity with varying terms against high-quality collateral.

Short-term secured funding also comes in the form of securities lent or sold under agreements to repurchase. These transactions are short-term in

nature, generally overnight, and are collateralized by high-quality investment securities. These balances were \$4.36 billion and \$4.50 billion as of September 30, 2016 and December 31, 2015, respectively.

State Street Bank currently maintains a line of credit with a financial institution of CAD 1.40 billion, or approximately \$1.08 billion as of September 30, 2016, to support its Canadian securities processing operations. The line of credit has no stated termination date and is cancelable by either party with prior notice. As of September 30, 2016, there was no balance outstanding on this line of credit.

Long-Term Funding

As of September 30, 2016, State Street Bank had Board authority to issue unsecured senior debt securities from time to time, provided that the aggregate principal amount of such unsecured senior debt outstanding at any one time does not exceed \$5 billion. As of September 30, 2016, \$4 billion was available for issuance pursuant to this authority. As of September 30, 2016, State Street Bank also had Board authority to issue an additional \$500 million of subordinated debt.

State Street Corporation maintains an effective universal shelf registration that allows for the public offering and sale of debt securities, capital securities, common stock, depositary shares and preferred stock, and warrants to purchase such securities, including any shares into which the preferred stock and depositary shares may be convertible, or any combination thereof. We have issued in the past, and we may issue in the future, securities pursuant to our shelf registration. The issuance of debt or equity securities will depend on future market conditions, funding needs and other factors.

Agency Credit Ratings

Our ability to maintain consistent access to liquidity is fostered by the maintenance of high investment-grade ratings as measured by the major independent credit rating agencies. Factors essential to maintaining high credit ratings include diverse and stable core earnings; relative market position; strong risk management; strong capital ratios; diverse liquidity sources, including the global capital markets and client deposits; strong liquidity monitoring procedures; and preparedness for current or future regulatory developments. High ratings limit borrowing costs and enhance our liquidity by providing assurance for unsecured funding and depositors, increasing the potential market for our debt and improving our ability to offer products, serve markets, and engage in transactions in which clients value high credit ratings. A downgrade or reduction of our credit ratings could have a material adverse effect on our liquidity by restricting our ability to access the capital

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

markets, which could increase the related cost of funds. In turn, this could cause the sudden and large-scale withdrawal of unsecured deposits by our clients, which could lead to draw-downs of unfunded commitments to extend credit or trigger requirements under securities purchase commitments; or require additional collateral or force terminations of certain trading derivative contracts.

A majority of our derivative contracts have been entered into under bilateral agreements with counterparties who may require us to post collateral or terminate the transactions based on changes in our credit ratings. We assess the impact of these arrangements by determining the collateral or termination payments that would be required assuming a downgrade by all rating agencies. The additional collateral or termination payments related to our net derivative liabilities under these arrangements that could have been called by counterparties in the event of a downgrade in our credit ratings below levels specified in the agreements is disclosed in Note 7 to the consolidated financial statements included in this Form 10-Q. Other funding sources, such as secured financing transactions and other margin requirements, for which there are no explicit triggers, could also be adversely affected.

Operational Risk Management

We consider operational risk to be the risk of loss resulting from inadequate or failed internal processes and systems, human error, or from external events. Operational risk encompasses fiduciary risk and legal risk. Fiduciary risk is defined as the risk that State Street fails to properly exercise its fiduciary duties in its provision of products or services to clients. Legal risk is the risk of loss resulting from failure to comply with laws and contractual obligations as well as prudent ethical standards in business practices in addition to exposure to litigation from all aspects of State Street's activities.

For additional information about our operational risk framework, refer to pages 92 to 95 in our 2015 Form 10-K.

Market Risk Management

Market risk is defined by U.S. banking regulators as the risk of loss that could result from broad market movements, such as changes in the general level of interest rates, credit spreads, foreign exchange rates or commodity prices. We are exposed to market risk in both our trading and certain of our non-trading, or asset-and-liability management, activities.

Information about the market risk associated with our trading activities is provided below under "Trading Activities." Information about the market risk associated with our non-trading activities, which consists primarily of interest-rate risk, is provided below under "Asset-and-Liability Management Activities."

Trading Activities

In the conduct of our trading activities, we assume market risk, the level of which is a function of our overall risk appetite, business objectives and liquidity needs, our clients' requirements and market volatility, and our execution against those factors.

For additional information about the market risk associated with our trading activities, refer to pages 95 to 96 in our 2015 Form 10-K.

As part of our trading activities, we assume positions in the foreign exchange and interest-rate markets by buying and selling cash instruments and entering into derivative instruments, including foreign exchange forward contracts, foreign exchange and interest-rate options and interest-rate swaps, interest-rate forward contracts, and interest-rate futures. As of September 30, 2016, the notional amount of these derivative contracts was \$1.34 trillion, of which \$1.32 trillion was composed of foreign exchange forward, swap and spot contracts. We seek to match positions closely with the objective of minimizing related currency and interest-rate risk. All foreign exchange contracts are valued daily at current market rates.

Value-at-Risk, Stress Testing and Stressed VaR

We use a variety of risk measurement tools and methodologies, including VaR, which is an estimate of potential loss for a given period within a stated statistical confidence interval. We use a risk measurement methodology to measure trading-related VaR daily. We have adopted standards for measuring trading-related VaR, and we maintain regulatory

capital for market risk associated with our trading activities in conformity with currently applicable bank regulatory market risk requirements.

For additional information about our VaR measurement tools and methodologies, refer to pages 97 to 101 in our 2015 Form 10-K.

State Street Corporation | 34

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Stress Testing and Stressed VaR

We have a corporate-wide stress testing program in place that incorporates an array of techniques to measure the potential loss we could suffer in a hypothetical scenario of adverse economic and financial conditions. We also monitor concentrations of risk such as concentration by branch, risk component, and currency pairs. We conduct stress testing on a daily basis based on selected historical stress events that are relevant to our positions in order to estimate the potential impact to our current portfolio should similar market conditions recur, and we also perform stress testing as part of the Federal Reserve's CCAR process. Stress testing is conducted, analyzed and reported at the corporate, trading desk, division and risk-factor level (for example, exchange risk, interest-rate risk and volatility risk).

We calculate a stressed VaR-based measure using the same model we use to calculate VaR, but with model inputs calibrated to historical data from a range of continuous twelve-month periods that reflect significant financial stress. The stressed VaR model identifies the second-worst outcome occurring in the worst continuous one-year rolling period since July 2007. This stressed VaR meets the regulatory requirement as the rolling ten-day period with an outcome that is worse than 99% of other outcomes during that twelve-month period of financial stress. For each portfolio, the stress period is determined algorithmically by seeking the one-year time horizon that produces the largest ten-business-day VaR from within the available historical data. This historical data set includes the financial crisis of 2008, the highly volatile period surrounding the Eurozone sovereign debt crisis and the Standard & Poor's downgrade of U.S. Treasury debt in August 2011. As the historical data set used to determine the stress

period expands over time, future market stress events will be automatically incorporated.

Stress testing results and limits are actively monitored on a daily basis by ERM and reported to the TMRC. Limit breaches are addressed by ERM risk managers in conjunction with the business units, escalated as appropriate, and reviewed by the TMRC if material. In addition, we have established several action triggers that prompt immediate review by management and the implementation of a remediation plan.

Validation and Back-Testing

We perform frequent back-testing to assess the accuracy of our VaR-based model in estimating loss at the stated confidence level. This back-testing involves the comparison of estimated VaR model outputs to daily, actual profit-and-loss outcomes, or P&L, observed from daily market movements. We back-test our VaR model using "clean" P&L, which excludes non-trading revenue such as fees, commissions and net interest revenue, as well as estimated revenue from intra-day trading. Our VaR definition of trading losses excludes items that are not specific to the price movement of the trading assets and liabilities themselves, such as fees, commissions, changes to reserves and gains or losses from intra-day activity.

We had no back-testing exceptions in the quarters ended September 30, 2016 and June 30, 2016.

The following tables present VaR and stressed VaR associated with our trading activities for covered positions held during the quarters ended September 30, 2016 and June 30, 2016, and as of September 30, 2016 and June 30, 2016, as measured by our VaR methodology:

TABLE 31: TEN-DAY VaR ASSOCIATED WITH TRADING ACTIVITIES FOR COVERED POSITIONS

	Quarter Ended September 30, 2016			Quarter Ended June 30, 2016			As of September 30, 2016	As of June 30, 2016
(In thousands)	Average	Maximum	Minimum	Average	Maximum	Minimum	VaR	VaR
Global Markets	\$7,594	\$ 14,160	\$ 4,215	\$6,051	\$ 12,827	\$ 3,605	\$ 9,393	\$5,830

Total Stressed VaR	\$37,194	\$ 53,771	\$ 23,077	\$35,410	\$ 44,846	\$ 24,726	\$ 45,019	\$32,378

State Street Corporation | 35

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The three month average of our stressed VaR-based measure was approximately \$37 million for the quarter ended September 30, 2016, compared to an average of approximately \$35 million for the quarter ended June 30, 2016. The increase in the total VaR and stressed VaR-based measures as of September 30, 2016, compared to June 30, 2016, was driven primarily by increased customer flows and larger FX end of day positions in G10 currencies on September 30, 2016 compared to June 30, 2016.

The VaR-based measures presented in the preceding tables are primarily a reflection of the overall level of market volatility and our appetite for taking market risk in our trading activities. Overall levels of volatility have been low both on an absolute basis and relative to the historical information observed at the beginning of the period used for the calculations. Both the ten-day VaR-based measures and the stressed VaR-based measures are based on historical changes observed during rolling ten-day

periods for the portfolios as of the close of business each day over the past one-year period.

We may in the future modify and adjust our models and methodologies used to calculate VaR and stressed VaR, subject to regulatory review and approval, and these modifications and adjustments may result in changes in our VaR-based and stressed VaR-based measures.

The following tables present the VaR and stressed-VaR associated with our trading activities attributable to foreign exchange risk, interest-rate risk and volatility risk as of September 30, 2016 and June 30, 2016. The totals of the VaR-based and stressed VaR-based measures for the three attributes for each VaR and stressed-VaR component exceeded the related total VaR and total stressed VaR presented in the foregoing tables as of each period-end, primarily due to the benefits of diversification across risk types.

TABLE 33: TEN-DAY VaR ASSOCIATED WITH TRADING
ACTIVITIES BY RISK FACTOR⁽¹⁾

Global Treasury	184	576	—	161	595	—
Total VaR	\$7,082	\$4,589	\$ 160	\$3,353	\$3,012	\$ —

TABLE 34: TEN-DAY STRESSED VaR ASSOCIATED WITH
TRADING ACTIVITIES BY RISK FACTOR⁽¹⁾

(In thousands)	As of September 30, 2016			As of June 30, 2016		
	Foreign Exchange Risk	Interest Rate Risk	Volatility Risk	Foreign Exchange Risk	Interest Rate Risk	Volatility Risk
By component:						
Global Markets	\$23,236	\$47,093	\$ 183	\$5,704	\$33,817	\$ —
Global Treasury	229	10,310	—	183	12,665	—
Total Stressed VaR	\$22,837	\$43,256	\$ 183	\$5,730	\$37,141	\$ —

⁽¹⁾ For purposes of risk attribution by component, foreign exchange refers only to the risk from market movements in period-end rates. Forwards, futures, options and swaps with maturities greater than period-end have embedded interest-rate risk that is captured by the measures used for interest-rate risk. Accordingly, the interest-rate risk

embedded in these foreign exchange instruments is included in the interest-rate risk component.

Asset-and-Liability Management Activities

The primary objective of asset-and-liability management is to provide sustainable NIR under varying economic conditions, while protecting the economic value of the assets and liabilities carried in our consolidated statement of condition from the adverse effects of changes in interest rates. While many market factors affect the level of NIR and the economic value of our assets and liabilities, one of the most significant factors is our exposure to movements in interest rates. Most of our NIR is earned from the investment of client deposits generated by our businesses. We invest these client deposits in assets that conform generally to the characteristics of our balance sheet liabilities,

including the currency composition of our significant non-U.S. dollar denominated client liabilities.

We quantify NIR sensitivity using an earnings simulation model that includes our expectations for new business growth, changes in balance sheet mix and investment portfolio positioning. This measure compares our baseline view of NIR over a twelve-month horizon, based on our internal forecast of interest rates, to a wide range of instantaneous and gradual rate shocks. Economic value of equity sensitivity is a discounted cash flow model designed to estimate the fair value of assets and liabilities under a series of interest rate shocks over a long-term horizon. Each approach is routinely monitored as market conditions change and within internally-approved risk limits and guidelines.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

For additional information on our Asset-and-Liability Management Activities, refer to pages 101 to 104 in our 2015 Form 10-K.

In the table below, we report the expected change in NIR over the next twelve months from +/-100 basis point instantaneous and gradual parallel rate shocks. Each scenario assumes no management action is taken to mitigate the adverse effects of interest rate changes on our financial performance. While investment securities balances can fluctuate due to prepayment assumptions in our rate shocks, our deposit balances are consistent with the baseline forecast.

TABLE 35: NIR SENSITIVITY

(In millions)	September 30, 2016	December 31, 2015
Rate change:	Exposure/Benefit	
+100 bps shock	\$ 546	\$ 471
-100 bps shock	(232)	(181)
+100 bps ramp	240	198
-100 bps ramp	(139)	(96)

As of September 30, 2016, NIR sensitivity remains positioned to benefit from a rise in interest rates. The increase in asset sensitivity is primarily driven by fixed-rate deposit growth and slower forecasted re-pricing on interest-bearing deposits. Gradual rate shocks have a similar positioning compared with instantaneous shocks, but are less impactful due to the severity of the rate shift.

The following table highlights our economic value of equity sensitivity to a +/-200 basis point instantaneous rate shock, relative to spot interest rates. Management compares the change in EVE sensitivity against State Street's aggregate tier 1 and tier 2 risk-based capital, calculated in conformity with current applicable regulatory requirements. Economic value of equity sensitivity is dependent on the timing of interest and principal cash flows. Also, the measure only evaluates the spot balance sheet and does not include the impact of new business assumptions.

TABLE 36: EVE SENSITIVITY

(In millions)	September 30, 2016	December 31, 2015 (pro forma)	December 31, 2015 (as reported)
Rate change:	Exposure/Benefit		
+200 bps shock	\$(389)	\$(791)	\$(2,355)
-200 bps shock	27	(25)	1,655

As of September 30, 2016, economic value of equity sensitivity remains exposed to upward shifts in interest rates. The change in each scenario was primarily driven by an increase in our modeled deposit duration and the significant decline in long-term market rates. In the second quarter of 2016, we refined our deposit modeling framework to better reflect recent client activity and pricing actions. These

enhancements extended our expected deposit duration resulting in a significant exposure reduction in the up 200 basis point scenario. To allow for comparison between periods, we have included December 31, 2015 pro-forma information to show what the results would have been under the same model refinements that are included as of September 30, 2016.

Model Risk Management

The use of quantitative models is widespread throughout the financial services industry, with large and complex organizations relying on sophisticated models to support numerous aspects of their financial decision making. The models contemporaneously represent both a significant advancement in financial management and a new source of risk. In large banking organizations like State Street, model results influence business decisions, and model failure could have a harmful effect on our financial performance. As a result, we manage model risk within a model risk

management framework.

For additional information on our model risk management, including our governance and model validation, refer to pages 104 to 105 in our 2015 Form 10-K.

Capital

Managing our capital involves evaluating whether our actual and projected levels of capital are commensurate with our risk profile, are in compliance with all applicable regulatory requirements, and are sufficient to provide us with the financial flexibility to undertake future strategic business initiatives. We assess capital adequacy based on relevant regulatory capital requirements, as well as our own internal capital goals, targets and other relevant metrics.

We have a hierarchical structure supporting appropriate committee review of relevant risk and capital information. The ongoing responsibility for capital management rests with our Treasurer. The Capital Management group within Global Treasury is responsible for the Capital Policy and guidelines, development of the Capital Plan, the management of global capital, capital optimization, as well as enterprise stress testing, including stress revenue and expense modeling and information technology related matters associated with stress testing models.

MRAC provides oversight of our capital management, our capital adequacy, our internal targets and the expectations of the major independent credit rating agencies. In addition, MRAC approves our balance sheet strategy and related activities. The Board's RC assists the Board in fulfilling its oversight responsibilities related to the assessment and management of risk and capital. Our

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Capital Policy is reviewed and approved annually by the Board's RC.

For additional information about our capital, refer to pages 105 to 115 in our 2015 Form 10-K.

Global Systemically Important Bank

We are one among a group of 30 institutions worldwide that have been identified by the FSB and the BCBS as G-SIBs. Our designation as a G-SIB will require us to maintain an additional capital buffer above the Basel III final rule minimum common equity tier 1 capital ratio of 4.5%, based on a number of factors, as evaluated by banking regulators.

In addition to the U.S. Basel III final rule, the Dodd-Frank Act requires the Federal Reserve to establish more stringent capital requirements for large bank holding companies, including State Street. On August 14, 2015, the Federal Reserve published a final rule on the implementation of capital requirements that impose a capital surcharge on U.S. G-SIBs. The surcharge requirements within the final rule began to phase-in on January 1, 2016 and will be fully effective on January 1, 2019. The eight U.S. banks deemed to be G-SIBs, including State Street, are required to calculate the G-SIB surcharge according to two methods, and be bound by the higher of the two:

• Method 1: Assesses systemic importance based upon five equally-weighted components: size, interconnectedness, complexity, cross-jurisdictional activity and substitutability

• Method 2: Alters the calculation from Method 1 by factoring in a wholesale funding score in place of substitutability and applying a 2x multiplier to the sum of the five components

As part of the final rule, the Federal Reserve published estimated G-SIB surcharges for the eight U.S. G-SIBs based on relevant data from 2012 to 2014. Method 2 is identified as the binding methodology for State Street and the applicable surcharge on January 1, 2016 is calculated to be 1.5%. Assuming completion of the phase-in period for the capital conservation buffer, and a countercyclical buffer of 0%, the minimum capital ratios as of January 1, 2019, including a capital conservation buffer of 2.5% and G-SIB surcharge of 1.5% in 2019, would be 10.0% for tier 1 risk-based capital, 12.0% for total risk-based capital, and 8.5% for common equity tier 1 capital, in order for State Street to make capital distributions and discretionary bonus payments without limitation. Not all of our competitors have similarly been designated as systemically important, and therefore some of our competitors may not be subject to the same additional capital requirements.

Regulatory Capital

We and State Street Bank, as advanced approaches banking organizations, are subject to the current U.S. Basel III minimum risk-based capital and leverage ratio guidelines. The Basel III final rule incorporates several multi-year transition provisions for capital components and minimum ratio requirements for common equity tier 1 capital, tier 1 capital and total capital. The transition period started in January 2014 and will be completed by January 1, 2019 which is concurrent with the full implementation of the Basel III final rule in the U.S.

Among other things, the U.S. Basel III final rule introduced a minimum common equity tier 1 risk-based capital ratio of 4.5% and raises the minimum tier 1 risk-based capital ratio from 4% to 6%. In addition, for advanced approaches banking organizations such as State Street, the U.S. Basel III final rule imposes a minimum supplementary tier 1 leverage ratio of 3%, the numerator of which is tier 1 capital and the denominator of which includes both on-balance sheet assets and certain off-balance sheet exposures.

The U.S. Basel III final rule also introduced a capital conservation buffer and a countercyclical capital buffer that add to the minimum risk-based capital ratios. Specifically, the final rule limits a banking organization's ability to make capital distributions and discretionary bonus payments to executive officers if it fails to maintain a common equity tier 1 capital conservation buffer of more than 2.5% of total risk-weighted assets and, if deployed during periods of excessive credit growth, a common equity tier 1 countercyclical capital buffer of up to 2.5% of total risk-weighted assets, above each of the minimum common equity tier 1, and tier 1 and total risk-based capital ratios. Banking regulators have initially set the countercyclical capital buffer at zero.

To maintain the status of our parent company as a financial holding company, we and our insured depository institution subsidiaries are required to be “well-capitalized” by maintaining capital ratios above the minimum requirements. Effective on January 1, 2015, the “well-capitalized” standard for our banking subsidiaries was revised to reflect the higher capital requirements in the U.S. Basel III final rule.

In addition to introducing new capital ratios and buffers, the U.S. Basel III final rule revises the eligibility criteria for regulatory capital instruments and provides for the phase-out of existing capital instruments that do not satisfy the new criteria. For example, existing trust preferred capital securities were phased out from tier 1 capital over a two-year period that ended on January 1, 2016, and subsequently, the qualification of these securities as

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

tier 2 capital will be phased out over a multi-year transition period beginning on January 1, 2016 and ending on January 1, 2022. As of September 30, 2016 we had \$890 million of trust preferred securities included in tier 2 regulatory capital.

Under the U.S. Basel III final rule, certain new items are deducted from common equity tier 1 capital and certain regulatory capital deductions were modified as compared to the previously applicable capital regulations. Among other things, the final rule requires significant investments in the common stock of unconsolidated financial institutions, as defined, and certain deferred tax assets that exceed specified individual and aggregate thresholds to be deducted from common equity tier 1 capital. As an advanced approaches banking organization, after-tax unrealized gains and losses on AFS investment securities flow through to and affect State Street's and State Street Bank's common equity tier 1 capital, subject to a phase-in schedule.

We are required to use the advanced approaches framework as provided in the Basel III final rule to determine our risk-based capital requirements. The Dodd-Frank Act applies a "capital floor" to advanced approaches banking organizations, such as State Street and State Street Bank. We are subject to the more stringent of the risk-based capital ratios calculated under the standardized approach and those calculated under the advanced approaches in the assessment of our capital adequacy under the PCA framework.

The following table sets forth the transition to full implementation and the minimum risk-based capital ratio requirements under the Basel III final rule. This does not include the potential imposition of an additional countercyclical capital buffer.

TABLE 37: BASEL III FINAL RULES TRANSITION ARRANGEMENTS AND MINIMUM RISK-BASED CAPITAL RATIOS^{(1) (2)}

	2015	2016	2017	2018	2019
Capital conservation buffer (Common Equity Tier 1)	— %	0.625 %	1.250 %	1.875 %	2.500 %
G-SIB surcharge (CET1) ⁽¹⁾	—	0.375	0.750	1.125	1.500
Minimum common equity tier 1 ⁽³⁾	4.5	5.500	6.500	7.500	8.500
Minimum tier 1 capital ⁽³⁾	6.0	7.000	8.000	9.000	10.000
Minimum total capital ⁽³⁾	8.0	9.000	10.000	11.000	12.000

⁽¹⁾ As part of the G-SIB Surcharge final rule, the Federal Reserve published estimated G-SIB surcharges for the eight U.S. G-SIBs based on relevant data from 2012-2014 and the estimated resulting G-SIB surcharge for State Street is 1.5%. Including the 1.5% surcharge, State Street's minimum risk-based capital ratio requirements, as of January 1, 2019 would be 8.5% for common equity tier 1, 10.0% for tier 1 capital and 12.0% for total capital.

⁽²⁾ Minimum ratios shown above do not reflect the countercyclical buffer, currently set at zero by U.S. banking regulators.

⁽³⁾ Minimum common equity tier 1 capital, minimum tier 1 capital and minimum total capital presented include the transitional capital conservation buffer as well as the estimated transitional G-SIB surcharge being phased-in beginning January 1, 2016 through January 1, 2019 based on an estimated 1.5% surcharge in all periods.

The specific calculation of State Street's and State Street Bank's risk-based capital ratios will change as the provisions of the Basel III final rule related to the numerator (capital) and denominator (risk-weighted assets) are phased in, and as our risk-weighted assets calculated using the advanced approaches change due to potential changes in methodology. These ongoing methodological changes will result in differences in our reported capital ratios from one reporting period to the next that are independent of applicable changes to our capital base, our asset composition, our off-balance sheet exposures or our risk profile.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The following table presents the regulatory capital structure and related regulatory capital ratios for State Street and State Street Bank as of the dates indicated. As a result of changes in the methodologies used to calculate our regulatory capital ratios from period to period, as the provisions of the Basel III final rule are phased in, the ratios presented in the table for each period are not directly comparable. Refer to the footnotes following the table.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

As of January 1, 2015 we used the standardized provisions of the Basel III final rule in addition to the advanced approaches provisions which were previously implemented in the second quarter of 2014, and the lower of our regulatory capital ratios calculated under the advanced approaches and those ratios calculated under the standardized approach are applied in the assessment of our capital adequacy for regulatory capital purposes. Beginning in the second quarter of 2014, until January 1, 2015, we used the advanced approaches provisions in the Basel III final rule, and transitional provisions of the Basel III final rule, and the lower of our regulatory capital ratios calculated under the advanced approaches and those ratios calculated under the transitional provisions were applied in the assessment of our capital adequacy for regulatory capital purposes.

Our common equity tier 1 capital decreased \$164 million as of September 30, 2016 compared to December 31, 2015 as a result of purchases by us of our common stock of approximately \$1.04 billion, declarations of common and preferred stock dividends of \$551 million, the impact of the phase-in provisions of the Basel III final rule related to other intangible assets and the impact of the acquired GEAM business on deductions for goodwill and intangibles. The decreases in common equity tier 1 capital were mostly offset by net income and the positive effect of unrealized gains related to AFS investment securities on accumulated other comprehensive income. In the same comparative period, our tier 1 capital increased \$143 million, due to the \$500 million issuance of preferred stock in April 2016, partly offset by the phase-out of trust preferred capital securities from tier 1 capital into tier 2 capital and the decrease in common equity tier 1 capital. Total capital increased \$211 million under advanced approaches and increased \$229 million under standardized approach due to the changes to tier 1 capital, and the inclusion of trust preferred capital securities in tier 2 capital. State Street Bank's tier 1 capital increased \$1.17 billion, and total capital increased \$1.07 billion and \$1.08 billion under the advanced and standardized approaches, respectively, as of September 30, 2016, compared to December 31, 2015. The increase resulted from year-to-date net income, the GEAM acquisition and the previously-described impact to accumulated other comprehensive income, partly offset by the phase-in provisions of the Basel III final rule related to other intangible assets and dividends paid to State Street.

The table below presents a roll-forward of common equity tier 1 capital, tier 1 capital and total capital for the nine months ended September 30, 2016 and for the year ended December 31, 2015.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The following table presents a roll-forward of the Basel III advanced approaches risk-weighted assets for the nine months ended September 30, 2016 and for the year ended December 31, 2015.

TABLE 40: ADVANCED APPROACHES RWA ROLL-FORWARD

(In millions)	State Street	
	Nine Months Ended September 30, 2016	Year Ended December 31, 2015
Total risk-weighted assets, beginning of period	\$99,552	\$107,827
Changes in credit risk-weighted assets:		
Net increase (decrease) in investment securities-wholesale	(629)	597)
Net increase (decrease) in loans and leases	492	(944)
Net increase (decrease) in securitization exposures	(2,588)	(9,569)
Net increase (decrease) in repo-style transaction exposures	475	842
Net increase (decrease) in OTC derivatives exposures	296	(1,317)
Net increase (decrease) in all other ⁽¹⁾	2,137	(4,750)
Net increase (decrease) in credit risk-weighted assets	183	(15,141)
Net increase (decrease) in credit valuation adjustment	(88)	(618)
Net increase (decrease) in market risk-weighted assets	(672)	(532)
Net increase (decrease) in operational risk-weighted assets	761	8,016
Total risk-weighted assets, end of period	\$99,736	\$99,552

⁽¹⁾ Includes assets not in a definable category, cleared transactions, non-material portfolio, other wholesale, cash and due from, and interest-bearing deposits with banks, equity exposures, and 6% credit risk supervisory charge. As of September 30, 2016, total advanced approaches risk-weighted assets increased \$184 million compared to December 31, 2015, mainly due to an increase in operational risk and credit risk, mostly offset by a decrease in market risk resulting from a lower stressed VaR. The slight increase in credit risk-weighted assets was mainly due to an increase in cash and placements driven by an increase in customer deposits; an increase in securities finance agency and principal lending and an increase in short-duration advances to clients, mostly offset by maturities and amortization of the securitized investment portfolio and a decrease in wholesale investments due to calls of agency debt securities.

As of December 31, 2015, total advanced approaches risk-weighted assets decreased \$8.28 billion compared to December 31, 2014, primarily the result of a reduction in credit risk due to sales, maturities and amortization of the securitized investment portfolio and the subsequent reinvestment in HQLA, a decrease associated with the usage of the alternative modified look through approach for investments in investment funds, and a decline in

over-the-counter foreign exchange derivatives mainly due to a decrease in volumes and the addition of new netting agreements. The decreases were partially offset by an \$8.02 billion increase in operational risk, which reflects adjustments to the model inputs.

The following table presents a roll-forward of the Basel III standardized approach risk-weighted assets for the nine months ended September 30, 2016 and for the year ended December 31, 2015.

TABLE 41: STANDARDIZED APPROACH RWA ROLL-FORWARD

(In millions)	State Street	
	Nine Months	Year Ended

Edgar Filing: STATE STREET CORP - Form 10-Q

	Ended September 30, 2016	December 31, 2015
Total estimated risk-weighted assets, beginning of period ⁽¹⁾	\$ 95,893	\$ 125,011
Changes in credit risk-weighted assets:		
Net increase (decrease) in investment securities- wholesale	(1,038)	(2,579)
Net increase (decrease) in loans and leases	2,339	(539)
Net increase (decrease) in securitization exposures	(2,589)	(9,569)
Net increase (decrease) in repo-style transaction exposures	4,409	(7,535)
Net increase (decrease) in OTC derivatives exposures	(1,617)	(4,007)
Net increase (decrease) in all other ⁽²⁾	1,649	(4,357)
Net increase (decrease) in credit risk-weighted assets	3,153	(28,586)
Net increase (decrease) in market risk-weighted assets	(672)	(532)
Total risk-weighted assets, end of period	\$ 98,374	\$ 95,893

⁽¹⁾ Standardized approach risk-weighted assets as of the periods noted above were calculated using State Street's estimates, based on our then current interpretation of the Basel III final rule.

⁽²⁾ Includes assets not in a definable category, cleared transactions, other wholesale, cash and due from, and interest-bearing deposits with banks and equity exposures.

As of September 30, 2016, total standardized approach risk-weighted assets increased \$2.48 billion compared to December 31, 2015, primarily the result of an increase in securities finance agency lending, an increase in short-duration advances to clients and an increase in cash and placements driven by an increase in customer deposits. The increases were partly offset by maturities and amortization of the securitized investment portfolio, a decrease in over-the-counter foreign exchange derivatives resulting from lower market values, a decrease in wholesale investments due to calls of agency debt securities and a reduction in market risk resulting from a lower stressed VaR.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

As of December 31, 2015, total standardized approach risk-weighted assets decreased \$29.12 billion compared to December 31, 2014, primarily the result of a reduction in credit risk due to sales, maturities and pay-downs of both securitized and wholesale investment portfolio and the subsequent reinvestment in HQLA, a decrease in securities financing exposure, a decrease associated with the usage of the alternative modified look through approach for investments in investment funds and a decline in over-the-counter foreign exchange derivatives primarily due to a decrease in volumes and the addition of new netting agreements.

The regulatory capital ratios as of September 30, 2016, presented in Table 38: Regulatory Capital Structure and Related Regulatory Capital Ratios, are calculated under the standardized approach and advanced approaches in conformity with the Basel III final rule. The advanced approaches-based ratios (actual and estimated pro forma) reflect calculations and determinations with respect to our capital and related matters as of September 30, 2016, based on State Street and external data, quantitative formulae, statistical models, historical correlations and assumptions, collectively referred to as "advanced systems," in effect and used by State Street for those purposes as of the time we first reported such ratios in a quarterly report on Form 10-Q. Significant components of these advanced systems involve the exercise of judgment by us and our regulators, and our advanced systems may not, individually or collectively, precisely represent or calculate the scenarios, circumstances, outputs or other results for which they are designed or intended.

Due to the influence of changes in these advanced systems, whether resulting from changes in data inputs, regulation or regulatory supervision or interpretation, State Street-specific or market activities or experiences or other updates or factors, we expect that our advanced systems and our capital ratios calculated in conformity with the Basel III final rule will change and may be volatile over time, and that those latter changes or volatility could be material as calculated and measured from period to period. Models implemented under the Basel III final rule, particularly those implementing the advanced approaches, remain subject to regulatory review and approval. The full effects of the Basel III final rule on State Street and State Street Bank are therefore subject to further evaluation and also to further regulatory guidance, action or rule-making.

Estimated Basel III Fully Phased-in Capital Ratios

Table 42: Regulatory Capital Structure and Related Regulatory Capital Ratios - State Street, and Table 43: Regulatory Capital Structure and Related Regulatory Capital Ratios - State Street Bank, present our capital ratios for State Street and State Street Bank as of September 30, 2016, calculated in conformity with the advanced approaches provisions and standardized approach of the Basel III final rule on a, pro forma basis under the fully phased-in provisions of the Basel III final rule.

Table of ContentsMANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

Fully phased-in pro-forma estimates of common shareholders' equity include 100% of accumulated other comprehensive income, including accumulated other comprehensive income attributable to available-for-sale securities, cash flow hedges and defined benefit pension plans. Fully phased-in pro-forma estimates of common equity tier 1 capital reflect 100% of applicable deductions, including but not limited to, intangible assets net of deferred tax liabilities. Fully phased-in tier 1 capital reflects the transition of trust preferred capital securities from tier 1 capital to tier 2 capital. For both Basel III advanced and standardized approaches, fully phased-in pro-forma estimates of risk-weighted assets reflect the exclusion of intangible assets, offset by additions related to non-significant equity exposures and deferred tax assets related to temporary differences.

The Volcker rule, including the required capital deduction for investments in a covered fund, became effective on July 21, 2015, for investments in and relationships with a covered fund made after December 31, 2013. The Federal Reserve issued an order extending the Volcker rule's general conformance period until July 21, 2016 for legacy covered funds and announced its intention to grant banking entities an additional one-year extension of the conformance period until July 21, 2017. As a result, for legacy covered funds, the Volcker rule capital deduction will not become effective until July

21, 2017. On July 7, 2016, the Federal Reserve formally announced the extension of the general conformance period to July 21, 2017. For additional information on the Volcker rule, refer to pages 10 to 11 in our 2015 Form 10-K.

Supplementary Leverage Ratio

In 2014, U.S. banking regulators issued final rules implementing an SLR, for certain bank holding companies, like State Street, and their insured depository institution subsidiaries, like State Street Bank, which we refer to as the SLR final rule. Upon implementation, the SLR final rule requires that, as of January 1, 2018, (i) State Street Bank maintain an SLR of at least 6% to be well capitalized under the U.S. banking regulators' PCA framework and (ii) State Street maintain an SLR of at least 5% to avoid limitations on capital distributions and discretionary bonus payments. In addition to the SLR, State Street is subject to a minimum tier 1 leverage ratio of 4%, which differs from the SLR primarily in that the denominator of the tier 1 leverage ratio is only a quarterly average of on-balance sheet assets and does not include any off-balance sheet exposures. Beginning with reporting for March 31, 2015, State Street was required to include SLR disclosures, calculated on a transitional basis, with its other Basel disclosures.

TABLE 44: SUPPLEMENTARY LEVERAGE RATIO

September 30, 2016

(Dollars in millions, except as otherwise noted)	Transitional SLR	Phase-In Provisions	Fully Phased-in Pro Forma SLR Estimate

Common Stock

In June 2016, our Board approved a common stock purchase program authorizing the purchase of up to \$1.4 billion of our common stock through June 30, 2017 (the 2016 Program). In March 2015, our Board approved a common stock purchase program authorizing the purchase of up to \$1.8 billion of our common stock through June 30, 2016 (the 2015 Program). The table below presents the activity under both the 2016 Program and the 2015 Program during the periods indicated.

			\$0.98	\$ 401

Federal and state banking regulations place certain restrictions on dividends paid by subsidiary banks to the parent holding company. In addition, banking regulators have the authority to prohibit bank holding companies from paying dividends. For information concerning limitations on dividends from our subsidiary banks, refer to "Related Stockholder Matters" included under Item 5, and in Note 15 to the consolidated financial statements in our 2015 Form 10-K.

Stock purchases may be made using various types of mechanisms, including open market purchases or transactions off market, and may be made under Rule 10b5-1 trading programs. The timing of stock purchases, types of transactions and number of shares purchased will depend on several factors, including, market conditions and State Street's capital positions, its financial performance and investment opportunities. The common stock purchase program does not have specific price targets and may be suspended at any time.

OFF-BALANCE SHEET ARRANGEMENTS

On behalf of clients enrolled in our securities lending program, we lend securities to banks, broker/dealers and other institutions. In most circumstances, we indemnify our clients for the fair market value of those securities against a failure of the borrower to return such securities. Though these transactions are collateralized, the substantial volume of these activities necessitates detailed credit-based underwriting and monitoring processes. The aggregate amount of indemnified securities on loan totaled \$344.19 billion as of September 30, 2016, compared to \$320.44 billion as of December 31, 2015. We require the borrower to provide collateral in an amount in excess of 100% of the fair market value of the securities borrowed. We hold the collateral received in connection with these securities lending services

as agent, and the collateral is not recorded in our consolidated statement of condition. We revalue the securities on loan and the collateral daily to determine if additional collateral is necessary or if excess collateral is required to be returned to the borrower. We held, as agent, cash and securities totaling \$359.11 billion and \$335.42 billion as collateral for indemnified securities on loan as of September 30, 2016 and December 31, 2015, respectively.

State Street Corporation | 48

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS (Continued)

The cash collateral held by us as agent is invested on behalf of our clients. In certain cases, the cash collateral is invested in third-party repurchase agreements, for which we indemnify the client against loss of the principal invested. We require the counterparty to the indemnified repurchase agreement to provide collateral in an amount in excess of 100% of the amount of the repurchase agreement. In our role as agent, the indemnified repurchase agreements and the related collateral held by us are not recorded in our consolidated statement of condition. Of the collateral of \$359.11 billion and \$335.42 billion, referenced above, \$64.98 billion and \$63.06 billion was invested in indemnified repurchase agreements as of September 30, 2016 and December 31, 2015, respectively. We or our agents held \$69.03 billion and \$67.02 billion as collateral for indemnified investments in repurchase agreements as of September 30, 2016 and December 31, 2015, respectively.

Additional information about our securities finance activities and other off-balance sheet arrangements is provided in Notes 7 and 9 to the consolidated financial statements included in this Form 10-Q.

RECENT ACCOUNTING DEVELOPMENTS

Information with respect to recent accounting developments is provided in Note 1 to the consolidated financial statements included in this Form 10-Q.

Table of Contents

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information provided under “Financial Condition - Market Risk Management” in Management’s Discussion and Analysis, included in this Form 10-Q, is incorporated by reference herein. For more information on our market risk associated with our trading activities, market risk governance, covered positions, VaR, stress testing and stressed VaR, refer to pages 95 to 101 in our 2015 Form 10-K.

CONTROLS AND PROCEDURES

State Street has established and maintains disclosure controls and procedures that are designed to ensure that material information related to State Street and its subsidiaries on a consolidated basis required to be disclosed in its reports filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to State Street's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. For the quarter ended September 30, 2016, State Street's management carried out an evaluation, with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of State Street's disclosure controls and procedures. Based on the evaluation of these disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that State Street's disclosure controls and procedures were effective as of September 30, 2016.

State Street has also established and maintains internal control over financial reporting as a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in conformity with GAAP. In the ordinary course of business, State Street routinely enhances its internal controls and procedures for financial reporting by either upgrading its current systems or implementing new systems. Changes have been made and may be made to State Street's internal controls and procedures for financial reporting as a result of these efforts. During the quarter ended September 30, 2016, no change occurred in State Street's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, State Street's internal control over financial reporting.

STATE STREET CORPORATION

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Note 1. Summary of Significant Accounting Policies

Basis of Presentation:

The accounting and financial reporting policies of State Street Corporation conform to U.S. GAAP. State Street Corporation, the parent company, is a financial holding company headquartered in Boston, Massachusetts. Unless otherwise indicated or unless the context requires otherwise, all references in these notes to consolidated financial statements to "State Street," "we," "us," "our" or similar references mean State Street Corporation and its subsidiaries on a consolidated basis. Our principal banking subsidiary is State Street Bank.

The accompanying Consolidated Financial Statements should be read in conjunction with the financial and risk factor information included in our 2015 Form 10-K, which we previously filed with the SEC.

The consolidated financial statements accompanying these condensed notes are unaudited. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, which are necessary for a fair statement of the consolidated results of operations in these financial statements, have been made. Certain previously reported amounts presented in this Form 10-Q have been reclassified to conform to current-period presentation. Events occurring subsequent to the date of our consolidated statement of condition were evaluated for potential recognition or disclosure in our consolidated financial statements through the date we filed this Form 10-Q with the SEC.

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions in

the application of certain of our significant accounting policies that may materially affect the reported amounts of assets, liabilities, equity, revenue, and expenses. As a result of unanticipated events or circumstances, actual results could differ from those estimates. These accounting estimates reflect the best judgment of management, but actual results could differ.

Our consolidated statement of condition as of December 31, 2015 included in the accompanying consolidated financial statements was derived from the audited financial statements as of that date, but does not include all notes required by U.S. GAAP for a complete set of consolidated financial statements.

Acquisition

On July 1, 2016, we completed our acquisition of GE Asset Management ("GEAM") from General Electric Company, with a total initial purchase price of approximately \$437 million and approximately \$46 million in potential incremental purchase price related to future opportunities with General Electric.

The acquisition of GEAM extends our core investment management capabilities, including in the high growth OCIO markets, and enhances our capabilities in connection with the delivery of value-added solutions to our client base.

AUM associated with the acquired GEAM operations was \$112 billion as of September 30, 2016.

We accounted for this acquisition as a business combination and, in accordance with ASC Topic 805, Business Combinations, we have recorded assets acquired and liabilities assumed at their respective fair values as of the acquisition date. Our consolidated financial statements include the operating results for the acquired business from the date of acquisition, July 1, 2016.

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

Recent Accounting Developments:

Relevant standards that were recently issued but not yet adopted

Standard	Description	Date of Adoption	Effects on the financial statements or other significant matters
ASU 2014-09, Revenue from Contracts with Customers (Topic 606)	The standard, and its related amendments, will replace existing revenue recognition standards and significantly expand the disclosure requirements for revenue arrangements with customers. It may be adopted either retrospectively or on a modified retrospective basis to new contracts and existing contracts with remaining performance obligations as of the effective date.	January 1, 2018	We are currently assessing the impact of the standard and its amendments on our consolidated financial statements and evaluating the alternative methods of adoption.
ASU 2016-01, Financial Instruments-Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities	The standard makes limited amendments to the guidance on the classification and measurement of financial instruments. Under the new standard, all equity securities will be measured at fair value through earnings with certain exceptions, including investments accounted for under the equity method of accounting. In addition, the FASB clarified the guidance related to valuation allowance assessments when recognizing deferred tax assets on unrealized losses on available-for-sale debt securities. This standard must be applied on a retrospective basis.	January 1, 2018	We are currently assessing the impact of the standard on our consolidated financial statements.
ASU 2016-02, Leases (Topic 842)	The standard represents a wholesale change to lease accounting and requires all leases, other than short-term leases, to be reported on balance sheet through recognition of a right-of-use asset and a corresponding liability for future lease obligations. The standard also requires extensive disclosures for assets, expenses, and cash flows associated with leases, as well as a maturity analysis of lease liabilities.	January 1, 2019	We are currently assessing the impact of the standard on our consolidated financial statements, but we anticipate an increase in assets and liabilities due to the recognition of the required right-of-use asset and corresponding liability for all lease obligations that are currently classified as operating leases, as well as additional disclosure on our leases.

Edgar Filing: STATE STREET CORP - Form 10-Q

<p>ASU 2016-05, Derivatives and Hedging (Topic 815): Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships (a consensus of the Emerging Issues Task Force)</p>	<p>The standard clarifies that a change in the counterparty to a derivative instrument that is designated as a hedging instrument would result in dedesignation of the hedging relationship. This may be applied on a prospective or modified retrospective basis.</p>	<p>January 1, 2017</p>	<p>Our adoption of the standard will not have a material impact on our consolidated financial statements.</p>
<p>ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting</p>	<p>The standard simplifies the guidance related to stock compensation, including the accounting for income taxes by eliminating the windfall pool and requiring recognition of all excess tax benefits and deficiencies within the statement of income, as well as changes in the accounting for forfeitures, classification in the statement of cash flows and tax withholding requirements. The standard requires all expected credit losses for financial assets held at the reporting date to be measured based on historical experience, current conditions, and reasonable supportable forecasts.</p>	<p>January 1, 2017</p>	<p>We anticipate increased income statement volatility due to the recognition of all excess tax benefits and deficiencies within the statement of income. We do not anticipate early adoption of this standard.</p>
<p>ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments</p>	<p>The standard will utilize forward-looking information to determine credit loss estimates. It will require immediate recognition of the full amount of credit losses that are expected for certain financial assets.</p>	<p>January 1, 2020</p>	<p>We are currently assessing the impact of the standard on our consolidated financial statements.</p>
<p>ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force)</p>	<p>The standard amends the statement of cash flow guidance to address specific cash flow issues with the objective of reducing the existing diversity in practice.</p>	<p>January 1, 2018</p>	<p>We are currently assessing the impact of the standard on our consolidated financial statements, however based on our current presentation we do not anticipate a significant change to our financial statement presentation of the statement of cash flows.</p>

Relevant standards that were adopted during the nine months ended September 30, 2016:
 We adopted ASU 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis, effective January 1, 2016. The implementation of the new standard did not result in any changes to our previous consolidation conclusions.

We adopted ASU 2015-03, Simplifying the Presentation of Debt Issuance Costs, effective January 1, 2016 with retrospective application for all prior periods presented. The implementation of this standard resulted in debt issuance costs of \$40 million and \$37 million as of September 30, 2016 and December 31, 2015, respectively, being netted against long-term debt in our consolidated statement of condition.

Note 2. Fair Value

Fair-Value Measurements:

We carry trading account assets, AFS investment securities and various types of derivative financial instruments at fair value in our consolidated statement of condition on a recurring basis. Changes in the fair values of these financial assets and liabilities are recorded either as components of our consolidated statement of income or as components of AOCI within shareholders' equity in our consolidated statement of condition.

We measure fair value for the above-described financial assets and liabilities in conformity with U.S. GAAP that governs the measurement of the fair value of financial instruments. Management believes that its valuation techniques and underlying assumptions used to measure fair value conform to the provisions

of U.S. GAAP. We categorize the financial assets and liabilities that we carry at fair value based on a prescribed three-level valuation hierarchy. For information about our valuation techniques for financial assets and financial liabilities measured at fair value and the fair value hierarchy, refer to Note 2 to the consolidated financial statements on pages 132 to 142 of our 2015 Form 10-K.

The following tables present information with respect to our financial assets and liabilities carried at fair value in our consolidated statement of condition on a recurring basis as of the dates indicated. No transfers of financial assets or liabilities between levels 1 and 2 occurred in the nine months ended September 30, 2016 or the year ended December 31, 2015.

(UNAUDITED)

The following tables present activity related to our level-3 financial assets and liabilities during the three and nine months ended September 30, 2016 and 2015, respectively. Transfers into and out of level 3 are reported as of the beginning of the period presented. During the three and nine months ended September 30, 2016 and 2015, transfers out of level 3 were mainly related to certain mortgage- and asset-backed securities, including non-U.S. debt securities, for which fair value was measured using prices for which observable market information became available.

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

The following table presents total realized and unrealized gains and losses for our level-3 financial assets and liabilities and where they are presented in our consolidated statement of income for the periods indicated:

	Three Months Ended		Nine Months Ended			
	September 30,		September 30,			
(In millions)	Total Realized and Unrealized Change in Gains (Losses) Recorded in Revenue		Total Realized Change in Unrealized Gains (Losses) Related to Financial Instruments Held as of September 30,		Total Realized Change in Unrealized Gains (Losses) Related to Financial Instruments Held as of September 30,	
	2016	2015	2016	2015	2016	2015
Fee revenue:						
Trading services	\$—	\$(1)	\$—	\$(1)	\$(2)	\$25
Total fee revenue	—	(1)	—	(1)	(2)	25
Net interest revenue	13	21	—	—	30	48
Total revenue	\$13	\$20	\$—	\$(1)	\$28	\$73

The following table presents quantitative information, as of the dates indicated, about the valuation techniques and significant unobservable inputs used in the valuation of our level-3 financial assets and liabilities measured at fair value on a recurring basis for which we use internally-developed pricing models. The significant unobservable inputs for our level-3 financial assets and liabilities whose fair value is measured using pricing information from non-binding broker or dealer quotes are not included in the table, as the specific inputs applied are not provided by the broker/dealer.

(Dollars in millions, except where otherwise noted)	Fair Value		Valuation Technique	Significant Unobservable Input ⁽¹⁾	Weighted-Average	
	As of September 30, 2016	As of December 31, 2015			As of September 30, 2016	As of December 31, 2015
Significant unobservable inputs readily available to State Street:						
Assets:						
Asset-backed securities, other	\$14	\$28	Discounted cash flows	Credit spread	0.7 %	(0.1)%
State and political subdivisions	40	33	Discounted cash flows	Credit spread	2.0	2.2
Derivative instruments, foreign exchange contracts	—	5	Option model	Volatility	—	9.3
Total	\$54	\$66				
Liabilities:						
Derivative instruments, foreign exchange contracts	\$—	\$5	Option model	Volatility	—	9.2
Total	\$—	\$5				

⁽¹⁾ Significant changes in these unobservable inputs would result in significant changes in fair value measure.

Total	\$ 66	\$ 2,403	\$ 2,469
Liabilities:			
Derivative instruments, foreign exchange contracts	\$ 5	\$ —	\$ 5
Total	\$ 5	\$ —	\$ 5

- (1) Information with respect to these model-priced financial assets and liabilities is provided in a separate table.
- (2) Fair value for these financial assets is measured using non-binding broker or dealer quotes.

We use internally-developed pricing models that incorporate discounted cash flow and option model techniques to measure the fair value of certain level-3 financial assets and liabilities. Use of these techniques requires the determination of relevant inputs and assumptions, some of which represent significant unobservable inputs as indicated in the preceding tables. Accordingly, changes in these unobservable inputs may have a significant impact on fair value.

Fair Value Estimates:

Estimates of fair value for financial instruments not carried at fair value on a recurring basis in our consolidated statement of condition are generally subjective in nature, and are determined as of a specific point in time based on the characteristics of the financial instruments and relevant market information.

(UNAUDITED)

Note 3. Investment Securities

Investment securities held by us are classified as either trading, AFS, or HTM at the time of purchase and reassessed periodically, based on management's intent.

Generally, trading assets are debt and equity securities purchased in connection with our trading activities and, as such, are expected to be sold in the near term. Our trading activities typically involve active and frequent buying and selling with the objective of generating profits on short-term movements. AFS investment securities are those securities that we intend to hold for an indefinite period of time. AFS investment securities include securities utilized as part of our asset-and-liability management activities that may be sold in response to changes in interest rates, prepayment risk, liquidity needs or other factors. HTM securities are debt securities that management has the intent and the ability to hold to maturity.

Trading assets are carried at fair value. Both realized and unrealized gains and losses on trading assets are recorded in trading services revenue in our consolidated statement of income. Debt and marketable equity securities classified as AFS are carried at fair value, and after-tax net unrealized gains and losses are recorded in AOCI. Gains or losses realized on sales of AFS investment securities are computed using the specific identification method and are recorded in gains (losses) related to investment securities, net, in our consolidated statement of income. HTM investment securities are carried at cost, adjusted for amortization of premiums and accretion of discounts.

The following table presents contractual maturities of debt investment securities by carrying amount as of September 30, 2016. The maturities of certain asset-backed securities, mortgage-backed securities, and collateralized mortgage obligations are based on expected principal payments. Actual maturities may differ from these expected maturities since certain borrowers have the right to prepay obligations with or without prepayment penalties.

STATE STREET CORPORATION

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

The following table presents a roll-forward with respect to net impairment losses that have been recognized in income for the periods indicated.

(In millions)	Nine Months Ended September 30, 2016 2015	
Balance, beginning of period	\$92	\$115
Additions:		
Losses for which OTTI was previously recognized	2	1
Deductions:		
Previously recognized losses related to securities sold or matured	(26)	(22)
Balance, end of period	\$68	\$94

Interest revenue related to debt securities is recognized in our consolidated statement of income using the effective interest method, or on a basis approximating a level rate of return over the contractual or estimated life of the security. The level rate of return considers any nonrefundable fees or costs, as well as purchase premiums or discounts, resulting in amortization or accretion, accordingly.

For debt securities acquired for which we consider it probable as of the date of acquisition that we will be unable to collect all contractually required principal, interest and other payments, the excess of our estimate of undiscounted future cash flows from these securities over their initial recorded investment is accreted into interest revenue on a level-yield basis over the securities' estimated remaining terms. Subsequent decreases in these securities' expected future cash flows are either recognized prospectively through an adjustment of the yields on the securities over their remaining terms, or are evaluated for other-than-temporary impairment. Increases in expected future cash flows are recognized prospectively over the securities' estimated remaining terms through the recalculation of their yields. For certain debt securities acquired which are considered to be beneficial interests in securitized financial assets, the excess of our estimate of undiscounted future cash flows from these securities over their initial recorded investment is accreted into interest revenue on a level-yield basis over the securities' estimated remaining terms. Subsequent decreases in these securities' expected future cash flows are either recognized prospectively through an adjustment of the yields on the securities over their remaining terms, or are evaluated for other-than-temporary impairment. Increases in expected future cash flows are recognized prospectively over the securities' estimated remaining terms through the recalculation of their yields.

Impairment:

We conduct periodic reviews of individual securities to assess whether OTTI exists. For more information about the review of securities for impairment, refer to Note 3 in the consolidated financial statements on pages 149 to 152 in our 2015 Form 10-K.

In the nine months ended September 30, 2016 and 2015, we recorded \$2 million and \$1 million, respectively, of OTTI, which resulted from adverse changes in the timing of expected future cash flows from the securities.

After a review of the investment portfolio, taking into consideration current economic conditions, adverse situations that might affect our ability to fully collect principal and interest, the timing of future payments, the credit quality and performance of the collateral underlying mortgage- and asset-backed securities and other relevant factors, and excluding the OTTI recorded in the nine months ended September 30, 2016, management considers the aggregate decline in fair value of the investment securities portfolio and the resulting gross pre-tax unrealized losses of \$366 million related to 962 securities as of September 30, 2016 to be temporary, and not the result of any material changes in the credit characteristics of the securities.

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

Note 4. Loans and Leases

We segregate our loans and leases into two segments: institutional and CRE. Within the institutional and CRE segments, we further segregate the receivables into classes based on their risk characteristics, their initial measurement attributes and the methods we use to monitor and assess credit risk. For additional information on our loans and leases, including our internal risk-rating system used to assess our risk of credit loss for each loan or lease, refer to Note 4 to the consolidated financial statements on pages 152 to 156 in our 2015 Form 10-K.

The following table presents our recorded investment in loans and leases, by segment and class, as of the dates indicated:

(In millions)	September 30, 2016	December 31, 2015
Institutional:		
Investment funds:		
U.S.	\$ 13,647	\$ 11,136
Non-U.S.	3,092	1,678
Commercial and financial:		
U.S.	3,540	4,671
Non-U.S.	275	278
Purchased receivables:		
U.S.	74	93
Non-U.S.	—	—
Lease financing:		
U.S.	337	337
Non-U.S.	510	578
Total institutional	21,475	18,771
Commercial real estate:		
U.S.	27	28
Total loans and leases	21,502	18,799
Allowance for loan and lease losses	(51) (46
Loans and leases, net of allowance for loan and lease losses	\$ 21,451	\$ 18,753

Short-duration advances to our clients included in the institutional segment were \$5.70 billion and \$2.62 billion as of September 30, 2016 and December 31, 2015, respectively. These short-duration advances provide liquidity to fund clients in support of their transaction flows associated with securities settlement activities.

The commercial-and-financial class in the institutional segment presented in the preceding table included approximately \$3.38 billion and \$3.14 billion of senior secured loans as of September 30, 2016 and December 31, 2015, respectively. These senior secured loans are included in the "speculative", "special mention" and "substandard" categories in the credit-quality-indicator tables presented below. As of September 30, 2016 and December 31, 2015, our allowance for loan and lease losses included approximately \$43 million and \$35 million, respectively, related to these loans.

Certain loans are pledged as collateral for access to the Federal Reserve's discount window. As of September 30, 2016 and December 31, 2015, these loans and leases pledged as collateral totaled \$1.7 billion and \$2.5 billion, respectively.

STATE STREET CORPORATION

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

The following tables present our recorded investment in each class of loans and leases by credit quality indicator as of the dates indicated:

September 30, 2016 (In millions)	Institutional		Purchased Receivables	Lease Financing	Commercial Real Estate	Total Loans and Leases
	Investment Funds	Commercial and Financial				
Investment grade ⁽¹⁾	\$ 15,828	\$ 422	\$ 74	\$ 847	\$ 27	\$ 17,198
Speculative ⁽²⁾	908	3,378	—	—	—	4,286
Special mention ⁽³⁾	3	—	—	—	—	3
Substandard ⁽⁴⁾	—	15	—	—	—	15
Total	\$ 16,739	\$ 3,815	\$ 74	\$ 847	\$ 27	\$ 21,502

December 31, 2015 (In millions)	Institutional		Purchased Receivables	Lease Financing	Commercial Real Estate	Total Loans and Leases
	Investment Funds	Commercial and Financial				
Investment grade ⁽¹⁾	\$ 12,415	\$ 1,780	\$ 93	\$ 888	\$ 28	\$ 15,204
Speculative ⁽²⁾	399	3,138	—	27	—	3,564
Special mention ⁽³⁾	—	31	—	—	—	31
Total	\$ 12,814	\$ 4,949	\$ 93	\$ 915	\$ 28	\$ 18,799

(1) Investment-grade loans and leases consist of counterparties with strong credit quality and low expected credit risk and probability of default. Ratings apply to counterparties with a strong capacity to support the timely repayment of any financial commitment.

(2) Speculative loans and leases consist of counterparties that face ongoing uncertainties or exposure to business, financial, or economic downturns. However, these counterparties may have financial flexibility or access to financial alternatives, which allow for financial commitments to be met.

(3) Special mention loans and leases consist of counterparties with potential weaknesses that, if uncorrected, may result in deterioration of repayment prospects.

(4) Substandard loans and leases consist of counterparties with well-defined weakness that jeopardizes repayment with the possibility we will sustain some loss.

The following table presents our recorded investment in loans and leases, disaggregated based on our impairment methodology, as of the dates indicated:

(In millions)	September 30, 2016			December 31, 2015		
	Institutional	Commercial Real Estate	Total Loans and Leases	Institutional	Commercial Real Estate	Total Loans and Leases
Loans and leases ⁽¹⁾ :						
Collectively evaluated for impairment	\$ 21,475	\$ 27	\$ 21,502	\$ 18,771	\$ 28	\$ 18,799
Total	\$ 21,475	\$ 27	\$ 21,502	\$ 18,771	\$ 28	\$ 18,799

(1) For those portfolios where there are a small number of loans each with a large balance, we review each loan annually for indicators of impairment. For those loans where no such indicators are identified, the loans are collectively evaluated for impairment. As of September 30, 2016 and December 31, 2015, zero of the allowance for loan and lease loss related to institutional loans individually evaluated for impairment. As of September 30, 2016 and December 31, 2015, all of the allowance for loan and lease loss related to institutional loans collectively evaluated for

impairment.

The following table presents information related to our recorded investment in impaired loans and leases for the dates or periods indicated:

(In millions)	As of September 30, 2016	As of December 31, 2015
	Recorded Investment Unpaid Principal Balance ⁽¹⁾	Recorded Investment Unpaid Principal Balance
With no related allowance recorded:

CRE—other—acquired credit-impaired	— 22	— 22
Total CRE	\$ —\$ 56	\$ —\$ 56

⁽¹⁾ As of September 30, 2016 and December 31, 2015, all of the allowance for loan and lease losses of \$51 million and \$46 million, respectively, related to loans that were not impaired.

State Street Corporation | 76

Table of Contents

STATE STREET CORPORATION

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

In certain circumstances, we restructure troubled loans by granting concessions to borrowers experiencing financial difficulty. Once restructured, the loans are generally considered impaired until their maturity, regardless of whether the borrowers perform under the modified terms of the loans. No loans were modified in troubled debt restructurings during the nine months ended September 30, 2016 and the year ended December 31, 2015.

As of September 30, 2016 and December 31, 2015, no institutional loans or leases and no CRE loans were on non-accrual status or 90 days or more contractually past due.

The following table presents activity in the allowance for loan and lease losses for the periods indicated:

(In millions)	Three Months Ended September 30,	
	2016	2015
	Total Loans and Leases	Total Loans and Leases
Allowance for loan and lease losses ⁽¹⁾ :		
Beginning balance	\$ 51	\$ 43
Provision for loan losses	—	5
Charge-offs	—	—
Ending balance	\$ 51	\$ 48

(In millions)	Nine Months Ended September 30,	
	2016	2015
	Total Loans and Leases	Total Loans and Leases
Allowance for loan and lease losses ⁽¹⁾ :		
Beginning balance	\$ 46	\$ 37
Provision for loan losses	8	11
Charge-offs	(3)	—
Ending balance	\$ 51	\$ 48

⁽¹⁾ As of September 30, 2016, approximately \$43 million of our allowance for loan and lease losses was related to senior secured loans included in the institutional segment; the remaining \$8 million was related to other institutional segment loans.

The provision of \$8 million and \$11 million recorded in the nine months ended September 30, 2016 and 2015, respectively, as well as the charge-offs of \$3 million recorded in the nine months ended September 30, 2016 were a result of exposure to senior secured loans to non-investment grade borrowers, purchased in connection with our participation in syndicated loans.

Loans and leases are reviewed on a regular basis, and any provisions for loan losses that are recorded reflect management's estimate of the amount necessary to maintain the allowance for loan and lease losses at a level considered appropriate to absorb estimated incurred losses in the loan-and-lease portfolio.

Total	\$ 36,320	\$ 33,903

⁽¹⁾ Includes amounts held in escrow accounts at third parties related to the negotiated settlements in the indirect foreign exchange legal matter (see Note 10).

Note 7. Derivative Financial Instruments

We use derivative financial instruments to support our clients' needs and to manage our interest-rate and currency risk. In undertaking these activities, we assume positions in both the foreign exchange and interest-rate markets by buying and selling cash instruments and using derivative financial instruments, including foreign exchange forward contracts, foreign exchange and interest-rate options and interest-rate swaps, interest-rate forward contracts and interest-rate futures. For information on our derivative instruments, including the related accounting policies, refer to Note 10 to the consolidated financial statements on pages 162 to 168 in our 2015 Form 10-K.

Derivative financial instruments are also subject to credit and counterparty risk, which we manage by performing credit reviews, maintaining individual counterparty limits, entering into netting arrangements and requiring the receipt of collateral. Cash collateral received from and provided to counterparties in connection with derivative financial instruments is recorded in accrued expenses and other liabilities and other assets, respectively, in our consolidated statement of condition. As of September 30, 2016 and December 31, 2015, we had recorded approximately \$1.70 billion and \$1.40 billion, respectively, of cash collateral received from counterparties and approximately \$971 million and \$1.65 billion, respectively, of cash collateral provided

to counterparties in connection with derivative financial instruments in our consolidated statement of condition. Certain of our derivative assets and liabilities as of September 30, 2016 and December 31, 2015 are subject to master netting agreements with our derivative counterparties. Certain of these agreements contain credit risk-related contingent features in which the counterparty has the right to declare us in default and accelerate cash settlement of our net derivative liabilities with the counterparty in the event that our credit rating falls below specified levels. The aggregate fair value of all derivative instruments with credit risk-related contingent features that were in a net liability position as of September 30, 2016 totaled approximately \$757 million, against which we provided \$2 million of underlying collateral. If our credit rating were downgraded below levels specified in the agreements, the maximum additional amount of payments related to termination events that could have been required pursuant to these contingent features, assuming no change in fair value, as of September 30, 2016 was approximately \$755 million. Such accelerated settlement would be at fair value and therefore not affect our consolidated results of operations.

Derivatives Not Designated as Hedging Instruments:

In connection with our trading activities, we use derivative financial instruments in our role as a financial intermediary and as both a manager and servicer of financial assets, in order to accommodate our clients' investment and risk management needs. In addition, we use derivative financial instruments for risk management purposes as economic hedges, which are not formally designated as accounting hedges, in order to contribute to our overall corporate earnings and liquidity. These activities are designed to generate trading services revenue and to manage volatility in our net interest revenue. The level of market risk that we assume is a function of our overall objectives and liquidity needs, our clients' requirements and market volatility. For additional information on derivatives not designated as hedging instruments, refer to Note 10 to the consolidated financial statements on pages 163 to 164 in our 2015 Form 10-K.

Derivatives Designated as Hedging Instruments:

In connection with our asset-and-liability management activities, we use derivative financial instruments to manage our interest-rate risk and foreign currency risk. Interest-rate risk, defined as the sensitivity of income or financial condition to

Table of Contents

STATE STREET CORPORATION

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

variations in interest rates, is a significant non-trading market risk to which our assets and liabilities are exposed. We manage our interest-rate risk by identifying, quantifying and hedging our exposures, using fixed-rate portfolio securities and a variety of derivative financial instruments, most frequently interest-rate swaps and options (for example, interest-rate caps and floors). Interest-rate swap agreements alter the interest-rate characteristics of specific balance sheet assets or liabilities. When appropriate, forward-rate agreements, options on swaps, and exchange-traded futures and options are also used. We use foreign exchange forward and swap contracts to hedge foreign exchange exposure to various foreign currencies with respect to certain assets and liabilities. Our hedging relationships are formally designated, and qualify for hedge accounting, as fair value, cash flow or net investment hedges. For additional information on derivatives designated as hedging instruments, refer to Note 10 to the consolidated financial statements on pages 164 to 168 in our 2015 Form 10-K.

Fair Value Hedges

We have entered into interest-rate swap agreements to modify our interest revenue from certain available-for-sale investment securities from a fixed rate to a floating rate. The hedged AFS investment securities included hedged trusts that had a weighted-average life of approximately 4.8 years as of September 30, 2016, compared to 5.4 years as of December 31, 2015.

We have entered into interest-rate swap agreements to modify our interest expense on eight senior notes and two subordinated notes from fixed rates to floating rates. The senior and subordinated notes are hedged with interest-rate swap contracts with notional amounts, maturities and fixed-rate coupon terms that align with the hedged notes. The table below summarizes the maturities and the paid fixed interest rates for the hedged senior and subordinated notes:

September 30, 2016 Maturity Paid Fixed Interest Rate

Senior Notes

2018	1.35%
2020	2.55
2021	1.95
2021	4.38
2023	3.70
2024	3.30
2025	3.55
2026	2.65

Subordinated Notes

2018	4.96
2023	3.10

We have entered into foreign exchange swap contracts to hedge the change in fair value attributable to foreign exchange movements in our foreign currency denominated investment securities and deposits. These forward contracts convert the foreign currency risk to U.S. dollars, thereby mitigating our exposure to fluctuations in the fair value of the securities and deposits attributable to changes in foreign exchange rates.

Cash Flow Hedges

We have entered into foreign exchange contracts to hedge the change in cash flows attributable to foreign exchange movements in foreign currency denominated investment securities. These foreign exchange contracts convert the foreign currency risk to U.S. dollars, thereby mitigating our exposure to fluctuations in the cash flows of the securities attributable to changes in foreign exchange rates.

Net Investment Hedges

We have entered into foreign exchange contracts to protect the net investment in our foreign operations against adverse changes in exchange rates. These forward contracts convert the foreign currency risk to U.S. dollars, thereby

mitigating our exposure to fluctuations in the fair value of our net investments in our foreign operations attributable to changes in foreign exchange rates. Effectiveness of net investment hedges is based on the overall changes in the fair value of the forward contracts.

The following table presents the aggregate contractual, or notional, amounts of derivative financial instruments entered into in connection with our trading and asset-and-liability management activities as of the dates indicated:

Note 8. Offsetting Arrangements

We manage credit and counterparty risk by entering into enforceable netting agreements and other collateral arrangements with counterparties to derivative contracts and secured financing transactions, including resale and repurchase agreements, and principal securities borrowing and lending agreements. These netting agreements mitigate our counterparty credit risk by providing for a single net settlement with a counterparty of all financial transactions covered by the agreement in an event of default as defined under such agreement. In limited cases, a netting agreement may also provide

for the periodic netting of settlement payments with respect to multiple different transaction types in the normal course of business. For additional information on offsetting arrangements, refer to Note 11 to the consolidated financial statements on pages 169 to 172 in our 2015 Form 10-K.

As of September 30, 2016 and December 31, 2015, the fair value of securities received as collateral where we are permitted to transfer or re-pledge the securities totaled \$2.26 billion and \$3.05 billion, respectively, and the fair value of the portion that had been transferred or re-pledged as of the same date was \$287 million and \$262 million, respectively.

Edgar Filing: STATE STREET CORP - Form 10-Q

Total	\$29,656	\$(120)	\$(25,942)) \$ 3,594	\$28,302	\$(63)	\$(23,217)) \$ 5,022

(1) Includes securities in connection with our securities borrowing transactions.

(2) Includes amounts secured by collateral not determined to be subject to enforceable netting arrangements.

State Street Corporation | 85

Edgar Filing: STATE STREET CORP - Form 10-Q

	Presented in Statement of Condition				Presented in Statement of Condition			
Derivatives	\$3,562	\$—	\$(8)	\$ 3,554	\$4,132	\$—	\$(64)	\$ 4,068
Repurchase agreements and securities lending	9,783	(120)	(7,461)	2,202	7,769	(63)	(5,287)	2,419
Total	\$13,345	\$(120)	\$(7,469)	\$ 5,756	\$11,901	\$(63)	\$(5,351)	\$ 6,487

(1) Includes securities provided in connection with our securities lending transactions.

(2) Includes amounts secured by collateral not determined to be subject to enforceable netting arrangements.

The securities transferred under resale and repurchase agreements typically are U.S. Treasury, agency and agency mortgage-backed securities. In our principal securities borrowing and lending arrangements, the securities transferred in exchange for the collateral are predominantly equity securities and some corporate debt securities. The fair value of the securities transferred may increase in value to an amount greater than the amount received under our

repurchase and securities lending arrangements, which exposes the Company with counterparty risk. We require the review of the price of the underlying securities in relation to the carrying value of the repurchase agreements and securities lending arrangements on a daily basis and when appropriate, adjust the cash or security to be obtained or returned to counterparties that is reflective of the required collateral levels.

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

Note 9. Commitments and Guarantees

For additional information regarding our commitments and guarantees, refer to Note 12 in the consolidated financial statements on pages 173 to 174 in our 2015 Form 10-K.

Commitments:

We had unfunded off-balance sheet commitments to extend credit generally through lines of credit and short-duration advance facilities totaling \$21.72 billion and \$22.58 billion as of September 30, 2016 and December 31, 2015, respectively. The maximum possible losses associated with these commitments, excluding the value of any collateral, equal the gross contractual amounts. As of September 30, 2016, approximately 75% of our unfunded commitments to extend credit expire within one year. Since many of these commitments are expected to expire or renew without being drawn upon, the gross contractual amounts do not necessarily represent our future cash requirements.

Guarantees:

Off-balance sheet guarantees comprise indemnified securities financing, stable value protection, asset purchase agreements, and standby letters of credit. The following table, which presents the aggregate gross contractual amounts of our off-balance sheet guarantees as of the dates indicated, does not consider the value of any collateral, which may mitigate any potential loss. Amounts presented do not reflect participations to independent third parties.

(In millions)	September 30, December 31,	
	2016	2015
Indemnified securities financing	\$ 344,191	\$ 320,436
Stable value protection	27,319	24,583
Asset purchase agreements	4,989	3,990
Standby letters of credit	3,597	4,700

Indemnified Securities Financing

On behalf of our clients, we lend their securities, as agent, to brokers and other institutions. In most circumstances, we indemnify our clients for the fair market value of those securities against a failure of the borrower to return such securities.

The following table summarizes the aggregate fair values of indemnified securities financing and related collateral, as well as collateral invested in indemnified repurchase agreements, as of the dates indicated:

(In millions)	September 30, December 31,	
	2016	2015
Fair value of indemnified securities financing	\$ 344,191	\$ 320,436
Fair value of cash and securities held by us, as agent, as collateral for indemnified securities financing	359,107	335,420
Fair value of collateral for indemnified securities financing invested in indemnified repurchase agreements	64,982	63,055
Fair value of cash and securities held by us or our agents as collateral for investments in indemnified repurchase agreements	69,031	67,016

In certain cases, we participate in securities finance transactions as a principal. As a principal, we borrow securities from the lending client and then lend such securities to the subsequent borrower, either a State Street client or a broker/dealer. Collateral provided and received in connection with such transactions is recorded in other assets and accrued expenses and other liabilities, respectively, in our consolidated statement of condition. As of September 30, 2016 and December 31, 2015, we had approximately \$23.71 billion and \$20.12 billion, respectively, of collateral provided and approximately \$5.42 billion and \$3.27 billion, respectively, of collateral received from clients in connection with our participation in principal securities finance transactions.

Stable Value Protection

In the normal course of our business, we offer products that provide book-value protection, primarily to plan participants in stable value funds managed by non-affiliated investment managers of post-retirement defined contribution benefit plans, particularly 401(k) plans. The book-value protection is provided on portfolios of intermediate investment grade fixed-income securities, and is intended to provide safety and stable growth of principal invested. The protection is intended to cover any shortfall in the event that a significant number of plan participants withdraw funds when book value exceeds market value and the liquidation of the assets is not sufficient to redeem the participants. The investment parameters of the underlying portfolios, combined with structural protections, are designed to provide cushion and guard against payments even under extreme stress scenarios.

State Street Corporation | 88

Table of Contents

STATE STREET CORPORATION

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

These contingencies are individually accounted for as derivative financial instruments. The notional amounts of the stable value contracts are presented as “derivatives not designated as hedging instruments” in the table of aggregate notional amounts of derivative financial instruments provided in Note 7. We have not made a payment under these contingencies that we consider material to our consolidated financial condition, and management believes that the probability of payment under these contingencies in the future, that we would consider material to our consolidated financial condition, is remote.

Note 10. Contingencies

Legal and Regulatory Matters:

In the ordinary course of business, we and our subsidiaries are involved in disputes, litigation, and governmental or regulatory inquiries and investigations, both pending and threatened. These matters, if resolved adversely against us or settled, may result in monetary damages, fines and penalties or require changes in our business practices. The resolution or settlement of these matters is inherently difficult to predict. Based on our assessment of these pending matters, we do not believe that the amount of any judgment, settlement or other action arising from any pending matter is likely to have a material adverse effect on our consolidated financial condition. However, an adverse outcome in certain of the matters described below could have a material adverse effect on our consolidated results of operations for the period in which such matter is resolved, or an accrual is determined to be required, on our consolidated financial condition, or on our reputation.

We evaluate our needs for accruals of loss contingencies related to legal proceedings on a case-by-case basis. When we have a liability that we deem probable and that we deem can be reasonably estimated as of the date of our consolidated financial statements, we accrue for our estimate of the loss. We also consider a loss probable and establish an accrual when we make, or intend to make, an offer of settlement. Once established, an accrual is subject to subsequent adjustment as a result of additional information. The resolution of proceedings and the reasonably estimable loss (or range thereof) are inherently difficult to predict, especially in the early stages of proceedings. Even if a loss is probable, due to many complex factors, such as speed of discovery and the timing of court decisions or rulings, a loss or range of loss might not be reasonably estimated until the later stages of the proceeding.

As of September 30, 2016, our aggregate accruals for legal loss contingencies and regulatory matters totaled approximately \$622 million (excluding our accrual in connection with errors in invoicing certain of our Investment Servicing clients, described below). To the extent that we have established accruals in our consolidated statement of condition for probable loss contingencies, such accruals may not be sufficient to cover our ultimate financial exposure associated with any settlements or judgments. We may be subject to proceedings in the future that, if adversely resolved, would have a material adverse effect on our businesses or on our future consolidated financial statements. Except where otherwise noted below, we have not established accruals with respect to the claims discussed and do not believe that potential exposure is probable and can be reasonably estimated.

The following discussion provides information with respect to significant legal and regulatory matters.

Foreign Exchange

We offer our custody clients and their investment managers the option to route foreign exchange transactions to our foreign exchange desk through our asset servicing operation. We record as revenue an amount approximately equal to the difference between the rates we set for those trades and indicative interbank market rates at the time of settlement of the trade.

As discussed more fully below, claims have been asserted on behalf of certain current and former custody clients, and future claims may be asserted, alleging that our indirect foreign exchange rates (including the differences between those rates and indicative interbank market rates at the time we executed the trades) were not adequately disclosed or were otherwise improper, and seeking to recover, among other things, the full amount of the revenue we obtained from our indirect foreign exchange trading with them.

Attorneys general and other government authorities from a number of jurisdictions, as well as U.S. Attorney's offices, the U.S. Department of Labor and the SEC, have requested information or issued subpoenas in connection with inquiries into the pricing of our indirect foreign exchange trading.

In February 2011, a putative class action was filed in federal court in Boston seeking unspecified damages, including treble damages, on behalf of all custodial clients that executed certain foreign exchange transactions with State Street from 1998 to 2009. The putative class action alleges, among other things, that the rates at which State Street executed

State Street Corporation | 89

Table of Contents

STATE STREET CORPORATION

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

foreign currency trades constituted an unfair and deceptive practice under Massachusetts law and a breach of the duty of loyalty.

Two other putative class actions are currently pending in federal court in Boston alleging various violations of ERISA on behalf of all ERISA plans custodied with us that executed indirect foreign exchange trades with State Street from 1998 onward. The complaints allege that State Street caused class members to pay unfair and unreasonable rates on indirect foreign exchange trades with State Street. The complaints seek unspecified damages, disgorgement of profits, and other equitable relief. Other claims may be asserted in the future, including in response to developments in the actions discussed above or governmental proceedings.

If these matters were to proceed to trial, we expect that plaintiffs would seek to recover their share of all or a portion of the revenue that we have recorded from indirect foreign exchange trades. We cannot predict whether a court, in the event of an adverse resolution, would consider our revenue to be the appropriate measure of damages.

The following table summarizes our estimated total revenue worldwide from indirect foreign exchange trading for the periods indicated:

(In millions)	Revenue from Indirect Foreign Exchange Trading
Twelve Months Ended December 31, 2008	\$ 462
Twelve Months Ended December 31, 2009	369

Nine Months Ended September 30, 2016	201

We believe that the amount of our revenue from such trading has been of a similar or lesser order of magnitude for many years prior to 2008. Our revenue calculations related to indirect foreign exchange trading reflect a judgment concerning the relationship between the rates we charge for indirect foreign exchange execution and indicative interbank market rates near in time to execution. Our revenue from foreign exchange trading generally depends on the difference between the rates we set for those indirect trades and indicative interbank market rates at the time of settlement of the trade.

As of September 30, 2016, we have accrued a total of \$565 million associated with our indirect foreign exchange business. On July 26, 2016, we announced that we have negotiated settlement agreements which we expect, subject to final approval, to resolve these matters. Settlements have been reached with the Department of Justice, the Department of Labor and the Massachusetts Attorney General and, subject to court approval, the class plaintiffs. State Street has also reached an agreement in principle with the Securities and Exchange Commission. Each of these agreements depend upon certification, for settlement purposes, of a class of State Street's U.S. custody customers that executed indirect foreign exchange transactions with State Street between 1998 and 2009, and final approval by the United States District Court for the District of Massachusetts of the settlement agreement between State Street and the class. On November 2, 2016, the Court entered an order certifying the settlement class and approving the class settlement. The settlement approval order will become final in 30 days if it is not appealed. If the order becomes final, our settlements with the various government agencies will also become final. Although our current legal accrual is

sufficient to satisfy our obligations under these settlements if they become final, there can be no assurance that the settlements will become final or that other, potentially material, claims relating to our indirect foreign exchange business will not be asserted against us in the United States or elsewhere. These settlements or an adverse outcome with respect to one or more other currently unasserted claims, relating to our indirect foreign exchange business could have a material adverse effect on our reputation, and any additional claims not currently asserted could have a material adverse effect on our consolidated results of operations for the period in which the adverse outcome occurs (or an accrual is determined to be required), or on our consolidated financial condition.

Transition Management

In January 2014, we entered into a settlement with the U.K. FCA, pursuant to which we paid a fine of £22.9 million (approximately \$37.8 million), as a result of our having charged six clients of our U.K. transition management business during 2010 and 2011 amounts in excess of the contractual terms. The SEC and the U.S. Attorney are conducting separate investigations into this matter. In April 2016, the U.S. Attorney's office in Boston charged two former employees in our transition management business with criminal fraud in connection with their alleged role in this matter, and, in May 2016, the SEC commenced a parallel civil enforcement proceeding

Table of Contents

STATE STREET CORPORATION

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

against one of these individuals. Any action by the SEC or U.S. Attorney with respect to State Street could include civil or criminal proceedings and could involve significant fines or other sanctions, any of which could have a material adverse effect on our reputation or on client demand for our products and services. We are in discussions with the SEC and the U.S. Attorney regarding a possible resolution of this matter. As of September 30, 2016, we had accrued \$44 million in connection with these discussions and for indemnification costs associated with this matter.

GovEx

We are cooperating in an ongoing inquiry by the SEC relating to the GovEx electronic trading platform, which was offered and operated by State Street Global Markets, LLC from September 2009 to July 2015. The subjects of the inquiry are our communications related to volume, pricing and functionalities of the platform. We are currently engaged in discussions with the SEC concerning a possible resolution of this matter. As of September 30, 2016, we had accrued \$1 million for this matter.

Federal Reserve/Massachusetts Division of Banks Written Agreement

On June 1, 2015, we entered into a written agreement with the Federal Reserve and the Massachusetts Division of Banks relating to deficiencies identified in its compliance programs with the requirements of the Bank Secrecy Act, AML regulations and U.S. economic sanctions regulations promulgated by OFAC. As part of this enforcement action, State Street is required to, among other things, implement improvements to our compliance programs and to retain an independent firm to conduct a review of account and transaction activity covering a prior three-month period to evaluate whether any suspicious activity not previously reported should have been identified and reported in accordance with applicable regulatory requirements. If deficiencies in our historical reporting are identified as a result of the transaction review or if we fail to comply with the terms of the written agreement, we may become subject to fines and other regulatory sanctions, which may have a material adverse effect on us.

Invoicing Matter

In December 2015, we announced a review of the manner in which we invoiced certain expenses to certain of our Investment Servicing clients, primarily in the United States, during an 18-year period going back to 1998 and our determination that we had incorrectly invoiced clients for certain expenses. We have informed our clients that we will pay to them the

expenses we concluded were incorrectly invoiced to them, plus interest. Through September 30, 2016, we had identified approximately \$292 million (excluding interest), of such expenses and we are continuing to reimburse affected clients. In conjunction with that review, we are evaluating other aspects of invoicing relating to billing our Investment Servicing clients, including calculation of asset-based fees. We are in communication with certain governmental authorities about these matters, including the Department of Justice, the SEC, the Department of Labor and the Massachusetts Attorney General. In April 2016, the Massachusetts Secretary of State commenced an administrative enforcement proceeding against State Street Global Markets, LLC, alleging that our allegedly unethical behavior concerning expense invoices caused State Street Global Markets, LLC to violate state law governing the securities industry by virtue of our alleged control of State Street Global Markets, LLC. The complaint seeks to impose a censure, a fine and to provide for reimbursement or other relief. In addition, we have received a purported class action demand letter alleging that our invoicing practices were unfair and deceptive under Massachusetts law. It is possible that we may be required to reimburse clients for additional amounts, potentially including double or treble damages under Massachusetts law, clients or governmental authorities may assert other theories of liability, or we may become subject to other regulatory proceedings and litigation in connection with these matters, any of which could have a material adverse effect on our reputation or business, including on client demand for our products and services.

Income Taxes:

In determining our provision for income taxes, we make certain judgments and interpretations with respect to tax laws in jurisdictions in which we have business operations. Because of the complex nature of these laws, in the normal

course of our business, we are subject to challenges from U.S. and non-U.S. income tax authorities regarding the amount of income taxes due. These challenges may result in adjustments to the timing or amount of taxable income or deductions or the allocation of taxable income among tax jurisdictions. We recognize a tax benefit when it is more likely than not that our position will result in a tax deduction or credit. Unrecognized tax benefits have increased from approximately \$63 million as of December 31, 2015 to \$66 million as of September 30, 2016.

We are presently under audit by a number of tax authorities and the Internal Revenue Service is currently reviewing our U.S. income tax returns for the tax years 2012 and 2013. The earliest tax year

(UNAUDITED)

open to examination in jurisdictions where we have material operations is 2009. Management believes that we have sufficiently accrued liabilities as of September 30, 2016 for tax exposures.

Note 11. Variable Interest Entities

For additional information on our VIEs, refer to Note 14 to the consolidated financial statements on pages 176 to 177 in our 2015 Form 10-K.

Tax-Exempt Investment Program:

In the normal course of our business, we structure and sell certificated interests in pools of tax-exempt investment-grade assets, principally to our mutual fund clients. We structure these pools as partnership trusts, and the assets and liabilities of the trusts are recorded in our consolidated statement of condition as AFS investment securities and other short-term borrowings. As of September 30, 2016 and December 31, 2015, we carried AFS investment securities, composed of securities related to state and political subdivisions, with a fair value of \$1.76 billion and \$2.10 billion, respectively, and other short-term borrowings of \$1.39 billion and \$1.75 billion, respectively, in our consolidated statement of condition in connection with these trusts. The interest revenue and interest expense generated by the investments and certificated interests, respectively, are recorded as components of net interest revenue when earned or incurred.

The trusts had a weighted-average life of approximately 4.8 years as of September 30, 2016, compared to approximately 5.4 years as of December 31, 2015.

Under separate legal agreements, we provide standby bond-purchase agreements to these trusts and, with respect to certain securities, letters of credit. As of September 30, 2016, our commitments to the trusts under these standby bond-purchase agreements and letters of credit totaled \$1.62 billion and \$530 million, respectively, and \$81 million of the standby bond-purchase agreements were utilized.

Interests in Sponsored Investment Funds:

As of September 30, 2016, the aggregate assets and liabilities of our consolidated sponsored investment funds totaled \$409 million and \$327 million, respectively. As of December 31, 2015, the aggregate assets and liabilities of our consolidated sponsored investment funds totaled \$321 million and \$228 million, respectively.

As of September 30, 2016, our potential maximum total exposure associated with the consolidated sponsored investment funds totaled \$51 million and represented the value of our economic ownership interest in the fund. Subsequently, we divested our interests in the funds as of October 31, 2016 and no longer consolidate the sponsored investment funds.

As of September 30, 2016 and December 31, 2015, we managed certain sponsored investment funds, considered VIEs, in which we held a variable interest but for which we were not deemed to be the primary beneficiary. Our potential maximum loss exposure related to these unconsolidated funds totaled \$92 million and \$75 million as of September 30, 2016 and December 31, 2015, respectively, and represented the carrying value of our seed capital investment, which is recorded in either AFS investment securities or other assets in our consolidated statement of condition. The amount of loss we may recognize during any period is limited to the carrying amount of our seed capital investment in the unconsolidated fund.

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

Note 13. Regulatory Capital

We are subject to various regulatory capital requirements administered by federal banking agencies. Failure to meet minimum regulatory capital requirements can initiate certain mandatory and discretionary actions by regulators that, if undertaken, could have a direct material effect on our consolidated financial condition. Under current regulatory capital adequacy guidelines, we must meet specified capital requirements that involve quantitative measures of our consolidated assets, liabilities and off-balance sheet exposures calculated in conformity with regulatory accounting practices. Our capital components and their classifications are subject to qualitative judgments by regulators about components, risk weightings and other factors. For additional information on regulatory capital, and the requirements to which we are subject, refer to Note 16 to the consolidated financial statements on pages 180 and 181 in our 2015 Form 10-K.

As required by the Dodd-Frank Act, State Street and State Street Bank, as advanced approaches banking organizations, are subject to a permanent "capital floor" in the calculation and assessment of their regulatory capital adequacy by U.S. banking regulators. Beginning on January 1, 2015, we were required to calculate our risk-based capital ratios using both the advanced approaches and the standardized approach. As a result, from January 1, 2015 going forward, our risk-based capital ratios for regulatory assessment purposes are the lower of each ratio calculated under the standardized approach and the advanced approaches.

The methods for the calculation of our and State Street Bank's risk-based capital ratios will change as the provisions of the Basel III final rule related to the numerator (capital) and denominator (risk-weighted assets) are phased in, and as we begin calculating our risk-weighted assets using the advanced approaches. These ongoing methodological changes will result in differences in our reported capital ratios from one reporting period to the next that are independent of applicable changes to our capital base, our asset composition, our off-balance sheet exposures or our risk profile.

As of September 30, 2016, State Street and State Street Bank exceeded all regulatory capital adequacy requirements to which they were subject. As of September 30, 2016, State Street Bank was categorized as "well capitalized" under the applicable regulatory capital adequacy framework, and exceeded all "well capitalized" ratio guidelines to which it was subject. Management believes that no conditions or events have occurred since September 30, 2016 that have changed the capital categorization of State Street Bank.

Tier 1 capital	7.0	6.0	15.4	15.7	15.3	15.9	16.7	16.8	15.4	16.0	
Total capital	9.0	8.0	17.6	17.9	17.4	18.1	18.0	18.3	16.9	17.6	
Tier 1 leverage	4.0	4.0	6.8	6.8	6.9	6.9	7.1	7.1	6.7	6.7	

NA: Not applicable.

⁽¹⁾ Common equity tier 1 capital, tier 1 capital and total capital ratios as of September 30, 2016 and December 31, 2015 were calculated in conformity with the advanced approaches provisions of the Basel III final rule. Tier 1 leverage ratio as of September 30, 2016 and December 31, 2015 were calculated in conformity with the Basel III final rule.

⁽²⁾ Common equity tier 1 capital, tier 1 capital and total capital ratios as of September 30, 2016 and December 31, 2015 were calculated in conformity with the standardized approach provisions of the Basel III final rule. Tier 1 leverage ratio as of September 30, 2016 and December 31, 2015 were calculated in conformity with the Basel III final rule.

rule.

(3) Amounts for State Street and State Street Bank as of September 30, 2016 consisted of goodwill, net of associated deferred tax liabilities, and 60% of other intangible assets, net of associated deferred tax liabilities. Amounts for State Street and State Street Bank as of December 31, 2015 consisted of goodwill, net of deferred tax liabilities and 40% of other intangible assets, net of associated deferred tax liabilities. Intangible assets, net of associated deferred tax liabilities is phased in as a deduction from capital, in conformity with the Basel III final rule.

(4) Market risk risk-weighted assets reported in conformity with the Basel III advanced approaches included a CVA which reflected the risk of potential fair-value adjustments for credit risk reflected in our valuation of over-the-counter derivative contracts. The CVA was not provided for in the final market risk capital rule; however, it was required by the advanced approaches provisions of the Basel III final rule. State Street used the simple CVA approach in conformity with the Basel III advanced approaches.

(5) Minimum requirements will be phased in up to full implementation beginning on January 1, 2019; minimum requirements listed are as of September 30, 2016.

(6) Minimum requirements will be phased in up to full implementation beginning on January 1, 2019; minimum requirements listed are as of December 31, 2015.

Securities processing	10	40	20	75
Other	71	44	231	186
Total other expenses	\$187	\$141	\$437	\$845

Acquisition Costs

We recorded acquisition costs of \$33 million in the third quarter of 2016 compared to \$7 million in the third quarter of 2015, and \$47 million in the nine months ended September 30, 2016 compared to \$15 million during the nine months ended September 30, 2015. These amounts include approximately \$29 million related to our acquisition of GEAM on

July 1, 2016. As of September 30, 2016, we have recorded approximately \$29 million in acquisition costs associated with the acquisition of GEAM. For further information on the GEAM acquisition, refer to Note 1.

Restructuring Charges

We expect to incur aggregate pre-tax restructuring charges of approximately \$300 million to \$400 million beginning in 2016 through December 31, 2020 to implement State Street Beacon, our previously announced multi-year transformation program to fully digitize our business, deliver significant value and innovation for our clients and lower expenses across the organization. We estimate those charges will include approximately \$250 million to \$300 million in severance and benefits costs associated with targeted staff reductions (a substantial portion of which will result in future cash expenditures) and approximately \$50 million to \$100 million in information technology application rationalization and real estate actions.

In the third quarter and nine months ended September 30, 2016, we recorded net restructuring charges of \$10 million and \$120 million, respectively, due to State Street Beacon.

The following table presents aggregate restructuring activity for the periods indicated.

(In millions)	Employee Related Costs	Real Estate Consolidation	Asset and Other Write-offs	Total
Balance at December 31, 2015	\$ 9	\$ 11	\$ 3	\$23
Accruals for State Street Beacon	86	—	11	97
Payments and Other Adjustments	(4)	(1)	(7)	(12)

(UNAUDITED)

Note 16. Earnings Per Common Share

Basic EPS is calculated pursuant to the “two-class” method, by dividing net income available to common shareholders by the weighted-average common shares outstanding during the period. Diluted EPS is calculated pursuant to the two-class method, by dividing net income available to common shareholders by the total weighted-average number of common shares outstanding for the period plus the shares representing the dilutive effect of common stock options and other equity-based awards. The effect of common stock options and other equity-based awards is excluded from the calculation of diluted EPS in periods in which their effect would be anti-dilutive.

The two-class method requires the allocation of undistributed net income between common and participating shareholders. Net income available to common shareholders, presented separately in our consolidated statement of income, is the basis for the calculation of both basic and diluted EPS. Participating securities are composed of unvested restricted stock and fully vested deferred director stock awards, which are equity-based awards that contain non-forfeitable rights to dividends, and are considered to participate with the common stock in undistributed earnings.

The following table presents the computation of basic and diluted earnings per common share for the periods indicated:

	Three Months Ended September 30,	
(Dollars in millions, except per share amounts)	2016	2015
Net income	\$563	\$581
Less:		
Preferred stock dividends	(55)	(42)
Dividends and undistributed earnings allocated to participating securities ⁽¹⁾	(1)	—
Net income available to common shareholders	\$507	\$539
Average common shares outstanding (In thousands):		
Basic average common shares	388,358	406,612
Effect of dilutive securities: common stock options and common stock awards	4,854	5,555
Diluted average common shares	393,212	412,167
Anti-dilutive securities ⁽²⁾	2,166	619
Earnings per Common Share:		
Basic	\$1.31	\$1.33
Diluted ⁽³⁾	1.29	1.31
	Nine Months Ended September 30,	
(Dollars in millions, except per share amounts)	2016	2015
Net income	\$1,550	\$1,404
Less:		
Preferred stock dividends	(137)	(102)
Dividends and undistributed earnings allocated to participating securities ⁽¹⁾	(2)	(1)
Net income available to common shareholders	\$1,411	\$1,301
Average common shares outstanding (In thousands):		
Basic average common shares	393,959	409,816
Effect of dilutive securities: common stock options and common stock awards	4,454	5,956
Diluted average common shares	398,413	415,772

Edgar Filing: STATE STREET CORP - Form 10-Q

Anti-dilutive securities ⁽²⁾	3,027	675
Earnings per Common Share:		
Basic	\$3.58	\$3.18
Diluted ⁽³⁾	3.54	3.13

⁽¹⁾ Represents the portion of net income available to common equity allocated to participating securities, composed of fully vested deferred director stock and unvested restricted stock that contain non-forfeitable rights to dividends during the vesting period on a basis equivalent to dividends paid to common shareholders.

⁽²⁾ Represents common stock options and other equity-based awards outstanding but not included in the computation of diluted average common shares, because their effect was anti-dilutive.

⁽³⁾ Calculations reflect allocation of earnings to participating securities using the two-class method, as this computation is more dilutive than the treasury stock method.

Note 17. Line of Business Information

Our operations are organized for management reporting purposes into two lines of business: Investment Servicing and Investment Management, which are defined based on products and services provided. The results of operations for these lines of business are not necessarily comparable with those of other companies, including companies in the financial services industry. For information about our two lines of business, as well as revenues, expenses and capital allocation methodologies associated with

them, refer to Note 24 to the consolidated financial statements on pages 188 to 189 in our 2015 Form 10-K.

The following is a summary of our line-of-business results for the periods indicated. The “Other” column represents costs incurred that are not allocated to a specific line of business, including certain severance and restructuring costs, acquisition costs and certain provisions for legal contingencies.

Note 18. Non-U.S. Activities

We define our non-U.S. activities as those revenue-producing business activities that arise from clients which are generally serviced or managed outside the U.S. Due to the integrated nature of our business, precise segregation of our U.S. and non-U.S. activities is not possible. Subjective estimates, assumptions and other judgments are applied to quantify the financial results and assets related to our

non-U.S. activities, including our application of funds transfer pricing, our asset-and-liability management policies and our allocation of certain indirect corporate expenses. Management periodically reviews and updates its processes for quantifying the financial results and assets related to our non-U.S. activities.

The following table presents our U.S. and non-U.S. financial results for the periods indicated:

(In millions)	Three Months Ended			Three Months Ended		
	September 30, 2016			September 30, 2015		
	Non-U.S.	U.S.	Total	Non-U.S.	U.S.	Total
Total revenue	\$1,117	\$1,503	\$2,620	\$1,088	\$1,526	\$2,614
Income before income taxes	314	322	636	255	392	647

(In millions)	Nine Months Ended			Nine Months Ended		
	September 30, 2016			September 30, 2015		
	Non-U.S.	U.S.	Total	Non-U.S.	U.S.	Total
Total revenue	\$3,278	\$4,399	\$7,677	\$3,385	\$4,437	\$7,822
Income before income taxes	835	940	1,775	946	672	1,618

Non-U.S. assets were \$86.7 billion and \$63.3 billion as of September 30, 2016 and 2015, respectively.

REVIEW REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Shareholders and Board of Directors of
State Street Corporation

We have reviewed the consolidated statement of condition of State Street Corporation (the "Corporation") as of September 30, 2016, and the related consolidated statements of income and comprehensive income for the three- and nine-month periods ended September 30, 2016 and 2015, and changes in shareholders' equity and cash flows for the nine-month periods ended September 30, 2016 and 2015. These financial statements are the responsibility of the Corporation's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole.

Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statement of condition of State Street Corporation as of December 31, 2015, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for the year then ended, not presented herein and we expressed an unqualified audit opinion on those consolidated financial statements in our report dated February 19, 2016. In our opinion, the information set forth in the accompanying consolidated statement of condition of State Street Corporation as of December 31, 2015, is fairly stated, in all material respects, in relation to the consolidated statement of condition from which it has been derived.

PART II. OTHER INFORMATION

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(c) In June 2016, our Board approved a common stock purchase program authorizing the purchase of up to \$1.4 billion of our common stock through June 30, 2017 (the 2016 Program).

Stock purchases may be made using various types of mechanisms, including open market purchases or transactions off market, and may be made under Rule 10b5-1 trading programs. The timing of stock purchases, types of transactions and number of shares purchased will depend on several

factors, including, market conditions and State Street's capital positions, its financial performance and investment opportunities. The common stock purchase program does not have specific price targets and may be suspended at any time.

The following table presents purchases of our common stock under the 2016 Program and related information for each of the months in the quarter ended September 30, 2016. We may employ third-party broker/dealers to acquire shares on the open market in connection with our common stock purchase programs.

(Dollars in millions, except per share amounts, shares in thousands)	Total Number of Shares Purchased Under Publicly Announced Program	Average Price Paid Per Share	Approximate Dollar Value of Shares Purchased Under Publicly Announced Program	Approximate Dollar Value of Shares Yet to be Purchased Under Publicly Announced Program
