MSB FINANCIAL CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Note 1 – Organization and Business

MSB Financial Corp. (the “Company”) is a federally-chartered corporation organized in 2004 for the purpose of acquiring all of the capital stock that Millington Savings Bank (the “Savings Bank”) issued in its mutual holding company reorganization. The Company’s principal executive offices are located at 1902 Long Hill Road, Millington, New Jersey 07946-0417 and its telephone number at that address is (908) 647-4000.

A Registration Statement on Form S-1 (File No. 333-137294), as amended, was filed by the Company with the Securities and Exchange Commission pursuant to the Securities Act of 1933, as amended, relating to the offer for sale of up to 2,199,375 shares (subject to increase to 2,529,281 shares) of its common stock at $10.00 per share. The offering closed on January 4, 2007 and 2,529,281 shares were sold for gross proceeds of $25,292,810, including 202,342 shares sold to the Savings Bank’s newly established Employee Stock Ownership Plan (“ESOP”). Net proceeds of the offering totaled approximately $24.5 million. Concurrent with closing of the offering, the MHC received 3,091,344 shares of Company stock in exchange for the 10,000 shares previously owned by the MHC. The MHC is the majority stockholder of the Company owning 60.68% of the outstanding common stock at December 31, 2011.

MSB Financial, MHC (the “MHC”) is a federally-chartered mutual holding company that was formed in 2004 in connection with the mutual holding company reorganization. The MHC has not engaged in any significant business since its formation. So long as MHC is in existence, it will at all times own a majority of the outstanding stock of the Company.

The Savings Bank is regulated by the New Jersey Department of Banking and Insurance and the Federal Deposit Insurance Corporation. The MHC and the Company are now regulated as savings and loan holding companies by the Board of Governors of the Federal Reserve System (“FRB”), as successor to the Office of Thrift Supervision (“OTS”) under the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”).

Note 2 – Basis of Consolidated Financial Statement Presentation

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiary, the Savings Bank, and the Savings Bank’s wholly-owned subsidiary, Millington Savings Service Corp. All significant inter-company accounts and transactions have been eliminated in consolidation. These consolidated financial statements were prepared in accordance with instructions for Form 10-Q and Regulation S-X, and therefore, do not include information or notes necessary for a complete presentation of financial condition, results of operations, and cash flows in conformity with accounting principles generally accepted in the United States of America (“GAAP”). The Millington Savings Service Corp. is inactive.

In the opinion of management, all adjustments, consisting of only normal recurring adjustments or accruals, which are necessary for a fair presentation of the consolidated financial statements have been made at December 31, 2011 and June 30, 2011 and for the three and six months ended December 31, 2011 and 2010. The results of operations for the three and six months ended December 31, 2011 are not

necessarily indicative of the results which may be expected for an entire fiscal year or other interim periods.

The data in the consolidated statement of financial condition for June 30, 2011 was derived from the Company's audited consolidated financial statements as of and for the year then ended. That data, along with the interim financial information presented in the consolidated statements of financial position, income and comprehensive income, and cash flows should be read in conjunction with the audited consolidated financial statements as of and for the year ended June 30, 2011, including the notes thereto included in the Company's Annual Report on Form 10-K.

The consolidated financial statements contained herein have been prepared in conformity with GAAP. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated statements of financial position, and revenues and expenses for the periods then ended. Actual results could differ significantly from those estimates.

A material estimate for the Company that is particularly susceptible to significant change relates to the determination of the allowance for loan losses. The allowance for loan losses represents management's best estimate of losses known and inherent in the portfolio that are both probable and reasonable to estimate. While management uses the most current information available to estimate losses on loans, actual losses are dependent on future events and, as such, increases in the allowance for loan losses may be necessary. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Savings Bank's allowance for loan losses. Such agencies may require the Company to recognize additions to the allowance for loan losses based on their judgments about information available to them at the time of their examinations.

Note 3 – Subsequent Events

In accordance with Financial Accounting Standards Board (the "FASB") Accounting Standards Codification (the "ASC") Topic 855, Subsequent Events, management has evaluated potential subsequent events through the date the consolidated financial statements were issued.

Note 4 – Earnings Per Share

Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding during the period, exclusive of the unallocated shares held by the Employee Stock Ownership Plan ("ESOP") and unvested shares of restricted stock. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock, such as outstanding stock options, were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Company. Diluted earnings per share is calculated by adjusting the weighted average number of shares of common stock outstanding to include the effect of contracts or securities exercisable (such as stock options) or which could be converted into common stock, if dilutive, using the treasury stock method. Diluted earnings per share did not differ from basic earnings per share for the three and six months ended December 31, 2011 and 2010, as the 275,410 weighted average number of outstanding stock options were all anti-dilutive.

Note 5 – Stock Based Compensation

On March 10, 2008 the Company's stockholders approved the 2008 Stock Compensation and Incentive Plan. This plan permits the granting of up to 275,410 options to purchase Company common stock. Pursuant to this plan, on May 9, 2008, the Board of Directors granted 275,410 options having an

exercise price of $10.75 per share, the fair market value of the shares at the grant date. The grant date fair value of the options was estimated to be $2.99 per share based on the Black-Scholes option pricing model. Options are exercisable for 10 years from date of grant. At December 31, 2011, stock based compensation expense not yet recognized in income amounted to $220,000 which is expected to be recognized over a weighted average remaining period of 1.4 years. The Company recognized stock based compensation expense related to these awards of $41,000 and $82,000 for the three and six month periods ended December 31, 2011 and 2010, respectively.

On November 9, 2009 the Company's stockholders approved an Amendment to the 2008 Stock Compensation and Incentive Plan. The primary purpose of the Amendment to the 2008 Plan was to increase the number of shares of Company common stock authorized for issuance under the 2008 Plan from 275,410 to 385,574; with such additional shares to be available for awards in the form of restricted stock awards. Such restricted stock awards may be granted to officers, employees and directors of the Company or its subsidiary, the Savings Bank. On November 24, 2009, the Company re-purchased 110,164 shares of the Company common stock for an aggregate purchase price of $932,000. On December 14, 2009, the Board of Directors granted the 110,164 shares to certain employees and directors. The restricted stock awards are to be vested over a five year period and expensed over that time based on the fair value of the Company's common stock at the date of grant. During the three and six month periods ended December 31, 2011, the Company recognized stock based compensation expense related to these awards of $45,000 and $90,000, with tax benefits of $18,000 and $36,000, respectively. As of December 31, 2011, $531,000 in stock based compensation expense related to these awards remains to be recognized.

Note 6 - Fair Value Measurements

The Company uses fair value measurements to record fair value adjustments to certain assets and to determined fair value disclosures.

FASB ASC Topic 820, Fair Market Value Disclosures ("ASC 820"), defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

ASC 820 requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability

developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, ASC 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

- Level 1 Inputs – Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

- Level 2 Inputs – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

- Level 3 Inputs – Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. An asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

The following table summarizes financial assets measured at fair value on a recurring basis as of December 31, 2011 and June 30, 2011, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	December 31, 2011			
	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
	(In Thousands)			
Trading securities	$48	$—	$—	$48

	June 30, 2011			
	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
	(In Thousands)			
Trading securities	$60	$—	$—	$60

8

Securities classified as trading securities are reported at fair value utilizing Level 1 inputs. For these securities, the Company arrives at the fair value based upon the quoted market price at the close of business on the last business day on or prior to the statement of financial position date.

Certain financial and non-financial assets are measured at fair value on a non-recurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

The following table summaries those assets measured at fair value on a non-recurring basis as of December 31, 2011 and June 30, 2011:

	December 31, 2011			
	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
	(In Thousands)			
Impaired loans	$—	$—	$7,488	$7,488

	June 30, 2011			
	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
	(In Thousands)			
Impaired loans	$—	$—	$2,918	$2,918

An impaired loan is measured for impairment at the time the loan is identified as impaired. Loans are considered impaired when based on current information and events it is probable that payments of interest and principal will not be made in accordance with the contractual terms of the loan agreement. The Company's impaired loans are generally collateral dependent and, as such, are carried at the lower of cost or estimated fair value less estimated selling costs. Fair values are estimated through current appraisals and adjusted as necessary to reflect current market conditions and as such are classified as Level 3.

Other real estate owned is carried at the lower of cost or fair value less estimated selling costs. The fair value of other real estate is determined based upon independent third-party appraisals of the properties. These assets are included as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements. As of December 31, 2011 and June 30, 2011 there was no further impairment of the other real estate owned balance below the cost basis established at the time the other real estate owned was originally recognized. In addition, the Company had no other real estate owned at December 31, 2011. Accordingly, the table above does not include other real estate owned.

Fair value of a financial instrument is defined above. Significant estimates were used for the purposes of disclosing fair values. Estimated fair values have been determined using the best available data and estimation methodology suitable for each category of financial instruments. However, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Company could have realized in a sales transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective reporting dates, and have not been reevaluated or updated for purposes of these consolidated financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported.

The following information should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is only provided for a limited portion of the Company's assets and

9

liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company's disclosures and those of other companies may not be meaningful.

The carrying amounts and estimated fair values of the Company's financial instruments as of December 31, 2011 and June 30, 2011, were as follows:

	December 31, 2011		June 30, 2011	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
	(In Thousands)			
Financial assets:				
Cash and cash equivalents	$18,518	$18,518	$30,976	$30,976
Trading securities	48	48	60	60
Securities held to maturity	64,276	65,057	41,693	41,602
Loans receivable (1)	244,684	249,200	253,251	259,165
Federal Home Loan Bank stock	1,384	1,384	1,384	1,384
Accrued interest receivable	1,487	1,487	1,334	1,334
Financial liabilities:				
Deposits	287,090	289,826	286,175	282,191
Advances from Federal Home Loan Bank of New York	20,000	23,117	20,000	19,917
Accrued interest payable	74	74	68	68

(1) Includes impaired loans measured at fair value on a non-recurring basis as discussed above.

Methods and assumptions used to estimate fair values of financial assets and liabilities are as follows:

Cash and Cash Equivalents

For cash and cash equivalents, the carrying amount is a reasonable estimate of fair value.

Trading Securities

Securities classified as trading securities are reported at fair value utilizing Level 1 inputs. For these securities, the Company arrives at the fair value based upon the quoted market price at the close of business on the last business day on or prior to the consolidated statement of financial condition date.

Securities Held to Maturity

The fair value for securities held to maturity is based on quoted market prices, where available. If quoted market prices are not available, fair value is estimated using quoted market prices for similar securities.

Loans Receivable

The fair value of loans is based upon a multitude of sources, including assumed current market rates by category and the Company's current offering rates. Both fixed and variable rate loan fair values are derived at using a discounted cash flow methodology. For variable rate loans, repricing term, including next reprice date, reprice frequency and reprice rate are factored into the discounted cash flow formula.

10

Federal Home Loan Bank of New York Stock

The carrying amount of Federal Home Loan Bank of New York stock approximates fair value since the Company is generally able to redeem this stock at par.

Accrued Interest Receivable and Payable

The carrying amounts of accrued interest receivable and payable approximate fair value due to the short term nature of these instruments.

Deposits

Fair values for demand deposits, savings accounts and club accounts are, by definition, equal to the amount payable on demand at the reporting date. Fair values of fixed-maturity certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on similar instruments with similar maturities.

Advances from Federal Home Loan Bank of New York

Fair values of advances are estimated using discounted cash flow analyses, based on rates currently available to the Company for advances from the Federal Home Loan Bank of New York with similar terms and remaining maturities.

Off-Balance Sheet Financial Instruments

Fair values of commitments to extend credit are estimated using the fees currently charged to enter into similar agreements, taking into account market interest rates, the remaining terms, and the present credit worthiness of the counterparties. As of December 31, 2011 and June 30, 2011, the fair value of the commitments to extend credit was not considered to be material.

Note 7 - Loans Receivable and Allowance for Credit Losses

The composition of loans receivable at December 31, 2011 and June 30, 2011 was as follows:

	December 31, 2011	June 30, 2011
	(In Thousands)	
Residential mortgage:		
One-to-four family	$ 144,533	$ 149,399
Home equity	50,132	50,240
	194,665	199,639
Commercial real estate	31,685	32,559
Construction	12,965	16,633
Commercial and industrial	9,989	9,325
	54,639	58,517
Consumer:		
Deposit accounts	786	491
Automobile	224	236
Personal	19	20
Overdraft protection	186	194
	1,215	941
	250,519	259,097
Loans in process	(2,901)	(3,452)
Deferred loan fees	(271)	(224)
	$ 247,347	$ 255,421

Loans are stated at their outstanding unpaid principal balances, net of an allowance for loan losses and any deferred fees or costs. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct loan origination costs, are deferred and recognized as an adjustment of the yield (interest income) of the related loans. The Company is generally amortizing these amounts over the contractual life of the loan.

For all classes of loans receivable, the accrual of interest is discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectability of principal or interest, even though the loan is currently performing. Certain loans may remain on accrual status if they are in the process of collection and are either guaranteed or well secured. When a loan is placed on nonaccrual status, unpaid interest credited to income in the current year is reversed and unpaid interest accrued in prior years is charged against the allowance for loan losses. Interest received on nonaccrual loans, including impaired loans, generally is either applied against principal or reported as interest income, according to management's judgment as to the collectability of principal. Generally, loans are restored to accrual status when the obligation is brought current, has performed in accordance with the contractual terms for a reasonable period of time (generally six months) and the ultimate

collectability of the total contractual principal and interest is no longer in doubt. The past due status of all classes of loans receivable is determined based on contractual due dates for loan payments.

12

The allowance for credit losses consists of the allowance for loan losses and the reserve for unfunded lending commitments. The allowance for loan losses represents management's estimate of losses inherent in the loan portfolio as of the statement of financial condition date and is recorded as a reduction to loans. The reserve for unfunded lending commitments represents management's estimate of losses inherent in its unfunded loan commitments and is recorded in other liabilities, when required, on the consolidated statement of financial condition. The allowance for credit losses is increased by the provision for loan losses, and decreased by charge-offs, net of recoveries. All, or part, of the principal balance of loans receivable that are deemed uncollectible are charged against the allowance when management determines that the repayment of that amount is highly unlikely. Any subsequent recoveries are credited to the allowance. Non-residential consumer loans are generally charged off no later than 120 days past due on a contractual basis, earlier in the event of bankruptcy, or if there is an amount deemed uncollectible.

The allowance for loan losses is maintained at a level considered adequate to provide for losses that can be reasonably anticipated. Management performs a quarterly evaluation of the adequacy of the allowance. The allowance is based on the Company's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions and other relevant factors. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revision as more information becomes available.

The allowance calculation methodology includes segregation of the total loan portfolio into segments. The Company's loans receivable portfolio is comprised of the following segments: residential mortgage, commercial real estate, construction, consumer and commercial and industrial. Some segments of the Company's loan receivable portfolio are further disaggregated into classes which allows management to better monitor risk and performance.

The residential mortgage loan segment is disaggregated into two classes: one-to-four family loans, which are primarily first liens, and home equity loans, which consist of first and second liens. The commercial real estate loan segment includes owner and non owner occupied loans which have medium risk based on historical experience with these type loans. The construction loan segment is further disaggregated into two classes: one-to-four family owner occupied, which includes land loans, whereby the owner is known and there is less risk, and other, whereby the property is generally under development and tends to have more risk than the one-to-four family owner occupied loans. The commercial and industrial loan segment consists of loans made for the purpose of financing the activities of commercial customers. The majority of commercial and industrial loans are secured by real estate and thus carry a lower risk than traditional commercial and industrial loans. The consumer loan segment consists primarily of installment loans (direct and indirect) and overdraft lines of credit connected with customer deposit accounts.

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are classified as impaired. For loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers pools of loans by loan class. These pools of loans are evaluated for loss exposure based upon historical loss rates for each of these classes of loans, adjusted for qualitative factors. These qualitative risk factors include:

1. Lending policies and procedures, including underwriting standards and collection, charge-off, and recovery practices.
2. National, regional, and local economic and business conditions as well as the condition of various market segments, including the value of underlying collateral for collateral dependent loans.
3. Nature and volume of the portfolio and terms of loans.
4. Experience, ability, and depth of lending management and staff.

13

5. Volume and severity of past due, classified and nonaccrual loans as well as and other loan modifications.
6. Quality of the Company's loan review system, and the degree of oversight by the Company's Board of Directors.
7. Existence and effect of any concentrations of credit and changes in the level of such concentrations.
8. Effect of external factors, such as competition and legal and regulatory requirements.

Each factor is assigned a value to reflect improving, stable or declining conditions based on management's best judgment using relevant information available at the time of the evaluation.

An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

Impaired Loans

Management evaluates individual loans in all of the loan segments (including loans in residential mortgage and consumer segments) for possible impairment if the loan is greater than $200,000 and if the loan is either in nonaccrual status or is risk rated Substandard or worse. A loan is considered impaired when, based on current information and events, it is probable that the Savings Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed.

Loans whose terms are modified are classified as troubled debt restructurings ("TDRs") if the Company grants such borrowers concessions and it is deemed that those borrowers are experiencing financial difficulty. Concessions granted under a troubled debt restructuring generally involve a reduction in interest rate or an extension of a loan's stated maturity date. Non-accrual troubled debt restructurings are restored to accrual status if principal and interest payments, under the modified terms, are current for six consecutive months after modification. Loans classified as troubled debt restructurings are designated as impaired until they are ultimately repaid in full or foreclosed and sold. The nature and extent of impairment of TDRs, including those which experienced a subsequent default, is considered in the determination of an appropriate level of allowance for loan losses.

Once the determination has been made that a loan is impaired, impairment is measured by comparing the recorded investment in the loan to one of the following: (a) present value of expected cash flows (discounted at the loan's effective interest rate), (b) the loan's observable market price or (c) the fair value of collateral adjusted for expected selling costs. The method is selected on a loan by loan basis with management primarily utilizing the fair value of collateral method.

The estimated fair values of the real estate collateral are determined primarily through third-party appraisals. When a real estate secured loan becomes impaired, a decision is made regarding whether an updated certified appraisal of the real estate is necessary. This decision is based on various considerations, including the age of the most recent appraisal, the loan-to-value ratio based on the original appraisal and the condition of the property. Appraised values are discounted to arrive at the estimated selling price of the collateral, which is considered to be the estimated fair

value. The discounts also include estimated costs to sell the property.

14

The estimated fair values of the non-real estate collateral, such as accounts receivable, inventory and equipment, are determined based on the borrower's financial statements, inventory reports, accounts receivable agings or equipment appraisals or invoices. Indications of value from these sources are generally discounted based on the age of the financial information or the quality of the assets.

The evaluation of the need and amount of the allowance for impaired loans and whether a loan can be removed from impairment status is made on a quarterly basis. The Company's policy for recognizing interest income on impaired loans does not differ from its overall policy for interest recognition.

The following tables present impaired loans by class, segregated by those for which a related allowance was required and those for which a related allowance was not necessary as of December 31, 2011 and June 30, 2011. The average recorded investment and interest income recognized is presented for the three and six month periods ended December 31, 2011.

	As of December 31, 2011

Credit Quality Indicators

Management uses a ten point internal risk rating system to monitor the credit quality of the loans in the Company's commercial real estate, construction and commercial and industrial loan segments. The borrower's overall financial condition, repayment sources, guarantors and value of collateral, if appropriate, are evaluated annually or when credit deficiencies, such as delinquent loan payments, arise. The criticized rating categories utilized by management generally follow bank regulatory definitions. The first six risk rating categories are considered not criticized, and are aggregated as "Pass" rated. The "Special Mention" category includes assets that are currently protected, but are potentially weak, resulting in increased credit risk and deserving management's close attention. If uncorrected, the potential weaknesses may result in deterioration of the repayment prospects. Loans classified "Substandard" have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt and have a distinct possibility that some loss will be sustained if the weaknesses are not corrected. These include loans that are inadequately protected by the current sound net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans classified "Doubtful" have all the weaknesses inherent in loans classified "Substandard" with the added characteristic that collection or liquidation in full, on the basis of current conditions and facts, is highly improbable. Loans classified as a "Loss" are considered uncollectible and subsequently charged off.

The following tables present the classes of the loans receivable portfolio summarized by the aggregate "Pass" and the criticized categories of "Special Mention", "Substandard", "Doubtful" and "Loss" within the internal risk rating system as of December 31, 2011 and June 30, 2011:

As of December 31, 2011	Pass	Special Mention	Substandard	Doubtful	Loss	Total
			(In Thousands)			
Commercial real estate	$ 28,078	$ 895	$ 2,650	$ -	$ 35	$ 31,658

In addition to internal reviews, the Savings Bank utilizes an external consultant to perform a stress test of its loan portfolio, at least annually, and the results are reviewed in conjunction with the overall evaluation of the adequacy of the allowance.

Allowance for Loan Losses

The following tables summarize the allowance for loan losses, by the portfolio segment segregated into the amount required for loans individually evaluated for impairment and the amount required for loans collectively evaluated for impairment as of December 31, 2011 and June 30, 2011. The activity in the allowance for loan losses is presented for the three and six month periods ended December 31, 2011 (in thousands):

	As of December 31, 2011						
	Residential Mortgage	Commercial Real Estate	Construction	Commercial and Industrial	Consumer	Unallocated	Total
Allowance for loan losses:							
Ending balance	$ 1,637	$ 337	$ 393	$ 270	$ 14	$ 12	2,663

Federal regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses and may require the Company to recognize additions to the allowance based on their judgments about information available to them at the time of their examination, which may not be currently available to management. Based on management's comprehensive analysis of the loan portfolio, management believes the current level of the allowance for loan losses is adequate.

Troubled Debt Restructurings

The recorded investment balance of TDRs totaled $15.0 million and $15.5 million at December 31, 2011 and June 30, 2011, respectively. The majority of the Savings Bank TDRs are on accrual status. TDRs on accrual status were $10.0 million and $12.3 million at December 31, 2011 and June 30, 2011, while TDRs on non-accrual status were $5.0 million and $3.2 million at these respective dates. At December 31, 2011 and June 30, 2011, the allowance for loan losses included specific reserves of $54,000 and $145,000 related to TDRs respectively.

The following table summarizes by class loans modified in troubled debt restructurings during the six month period ended December 30, 2011. There were no loans modified in troubled debt restructurings during the three months ended December 31, 2011. The Company had four loans modified in troubled debt restructuring during the six month period ended December 31, 2011. Two of the loans were restructured as interest only for a one year period, while the remaining two loans were re-amortized, one over thirty years, the other over forty years.

		(In thousands)	
Residential Mortgage			
One-to-four family	4	$ 1,334	$ 1,334
Total	4	$ 1,334	$ 1,334

The following table summarizes loans modified in troubled debt restructuring during the previous 12 months and for which there was a subsequent payment default during the six months ended December 31, 2011. A loan is considered to be in payment default once it is 90 days contractually past due under the modified terms.

	Number of Contracts	Pre-Modification Outstanding Recorded Investments	Post-Modification Outstanding Recorded Investments
		(In thousands)	
Residential Mortgage			
One-to-four family	4	$ 1,994	$ 2,015
Commercial and industrial	1	205	205
Total	5	$ 2,199	$ 2,220

Note 8 - Securities Held to Maturity

The amortized cost of securities held to maturity and their estimated fair values as of December 31, 2011 and June 30, 2011, are summarized as follows:

December 31, 2011	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In Thousands)			
U.S U.S. Government Agencies:				
Due after one year to five years	$3,000	$12	$-	$3,012
Due after five through ten years	2,019	7	-	2,026
Due after ten years	53,004	521	3	53,522
	58,023	540	3	58,560
Mortgage-backed securities	6,253	244	-	6,497
	$64,276	$784	$3	$65,057

June 30, 2011	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In Thousands)			
U.S U.S. Government Agencies:				
Due after five years through ten years	$9,020	$-	$84	$8,936
Due after ten years	31,246	200	303	31,143
	40,266	200	387	40,079
Mortgage-backed securities	1,427	96	—	1,523
	$41,693	$296	$387	$41,602

All mortgage-backed securities at December 31, 2011 have been issued by FNMA, FHLMC or GNMA and are secured by one-to-four family residential real estate. The amortized cost and estimated fair value of securities held to maturity at December 31, 2011 and June 30, 2011, as shown above, are reported by contractual maturity. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

There were no sales of trading securities or securities held to maturity during the three and six months ended December 31, 2011 or 2010. At December 31, 2011 and June 30, 2011, securities held to maturity with a fair value of approximately $833,000 and $1,094,0000, respectively, were pledged to secure public funds on deposit.

The following tables set forth the gross unrealized losses and estimated fair value of securities in an unrealized loss position as of December 31, 2011 and June 30, 2011, and the length of time that such securities have been in a continuous unrealized loss position:

	Less than 12 Months		More than 12 Months		Total	
	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses
			(In Thousands)			
December 31, 2011:						
U.S. Government agencies	$4,000	$3	$-	$-	$4,000	$3

	Less than 12 Months		More than 12 Months		Total	
	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses
			(In Thousands)			
June 30, 2011:						
U.S. Government agencies	$29,859	$387	$—	$—	$29,859	$387

Management concluded that the unrealized losses above (which related to one U.S. Government agency bond as of December 31, 2011 and to nine U.S. Government agency bonds as of June 30, 2011) are temporary in nature since they are not related to the underlying credit quality of the issuer. The Company does not intend to sell these securities and it is not more-likely-than-not that the Company would be required to sell these securities prior to the anticipated recovery of the remaining amortized cost. Management believes that the losses above are primarily related to the change in market interest rates. Accordingly, the Company has not recognized an other-than-temporary impairment loss on these securities. The Company did not have any mortgage-backed securities in an unrealized loss position as of December 31, 2011 or June 30, 2011.

Note 9 – Retirement Plans

Periodic expenses for the Company's retirement plans, which include the Directors' Retirement Plan and the Executive Incentive Retirement Plan, were as follows:

	Three Months Ended December 31,		Six Months Ended December 31,	
	2011	2010	2011	2010
	(In thousands)		(In thousands)	
Service cost	$ 17	$ 17	$ 34	$ 34
Interest cost	23	17	46	34
Amortization of unrecognized gain	3	(2)	6	(4)
Amortization of past service liability	3	3	6	6
	$ 46	$ 35	$ 92	$ 70

As of December 31, 2011, the Company expects to contribute $37,000 to the plans for the remainder of the fiscal year.

Note 10 – Stock Repurchase Plan

On January 29, 2008, the Board of Directors authorized a stock repurchase program pursuant to which the Company intended to repurchase up to 5% of its outstanding shares (excluding shares held by the MHC), representing up to 126,464 shares. The timing of the repurchases depended on certain factors, including but not limited to, market conditions and prices, the Company's liquidity requirements and alternative uses of capital. Repurchased shares are held as treasury stock and are available for general corporate purposes. During the year ended June 30, 2008, the Company purchased 55,992 shares under this program at a cost of $609,000 or approximately $10.88 per share. The remaining 70,472 shares under this program were repurchased during the year ended June 30, 2009.

On August 21, 2008, the Company announced the Board of Directors had authorized a second stock repurchase program pursuant to which the Company intended to repurchase up to an additional 5%, or 120,140 shares. As of December 31, 2008, the Company repurchased all 120,140 shares authorized under this repurchase program.

On February 9, 2009, the Board of Directors authorized a third stock repurchase program pursuant to which the Company intended to repurchase up to 114,134 shares or approximately 5% of its outstanding shares. As of June 30, 2009, the Company repurchased 63,100 shares authorized under this repurchase program.

On August 17, 2009, the Company announced the Board of Directors had authorized a fourth stock repurchase program pursuant to which the Company intended to repurchase the balance of shares that were still outstanding from the third stock repurchase program which expired on August 10, 2009. Under this program, the Company intended to repurchase up to 51,034 shares. During the year ended June 30, 2010, the Company repurchased 51,034 shares authorized under this repurchase program at a cost of $460,000 or $9.01 per share.

On March 12, 2010, the Company announced the Board of Directors had authorized a fifth stock repurchase program pursuant to which the Company intended to repurchase up to an additional 5%, or 108,427 shares. During the years ended June 30, 2010 and 2011, the Company repurchased 76,419 and

3,300 shares respectively authorized under this repurchase program at a cost of $637,000 or $7.99 per share.

On October 12, 2010, the Company announced the Board of Directors had authorized a sixth stock repurchase program pursuant to which the Company intended to repurchase the balance of shares that were still outstanding from the fifth stock repurchase program. Under this program, the Company intended to repurchase up to 28,708 shares. As of December 31, 2010, the date of this program's expiration, the Company repurchased 6,065 shares authorized under this repurchase program at a cost of $37,000 or $6.06 per share.

On March 3, 2011, the Company announced the Board of Directors had authorized a seventh repurchase program pursuant to which the Company intended to repurchase the balance of shares that were still outstanding from the sixth stock repurchase program which expired on December 31, 2010. Under this program, the Company intended to repurchase up to 22,643 shares. As of June 30, 2011, the Company repurchased 7,600 shares authorized under this repurchase program at a cost of $44,000 or $5.74 per share.

On June 20, 2011, the Company announced the Board of Directors had authorized an eighth stock repurchase program pursuant to which the Company intended to repurchase the balance of shares that were still outstanding from the seventh stock repurchase program. Under this program, the Company intended to repurchase up to 15,043 shares. For the three months ended September 30, 2011, the Company repurchased 1,699 shares authorized under the seventh repurchase program at a cost of $9,000 or $5.50 per share.

On September 12, 2011, the Company announced the Board of Directors had authorized a ninth stock repurchase program pursuant to which the Company intended to repurchase the balance of shares that were still outstanding from the eighth stock repurchase program. Under this program, the Company intended to repurchase up to 13,344 shares. On October 27, 2011, the Company repurchased 13,344 shares authorized under this repurchase program at a cost of $67,000 or $5.05 per share.

On November 9, 2011, the Company announced the Board of Directors had authorized a tenth stock repurchase program pursuant to which the Company intends to repurchase up to an additional 5%, or 103,005 shares. As of February 10, 2012, the Company repurchased 63,668 shares authorized under this repurchase program.

As of December 31, 2011 the Company repurchased 56,724 shares authorized under the tenth repurchase program. During the six months ended December 31, 2011, an aggregate of 71,767 shares were repurchased under the aforementioned plans at a cost of $374,000 or $5.21 per share.

Note 11 – Dividends on Common Stock

The MHC has waived its right, upon the non-objection of the Board of Governors of the Federal Reserve System, to receive cash dividends declared on the 3,091,344 shares of Company common stock that it owned during the three and six months ended December 31, 2011. Such dividends amounted to approximately $92,000 and $185,000 during the three and six months ended December 31, 2011, respectively. As of December 31, 2011, the aggregate amount of dividends waived by the MHC was approximately $1,532,000.

Note 12 – Recent Accounting Pronouncements

In May 2011, the FASB issued ASU 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in US GAAP and International Financial Reporting Standards ("IFRS") which amends FASB ASC Topic 820, Fair Value Measurements, to bring U.S. GAAP for fair value measurements in line with International Accounting Standards. The ASU clarifies existing guidance for items such as: the application of the highest and best use concept to non-financial assets and liabilities; the application of fair value measurement to financial instruments classified in a reporting entity's stockholder's equity; and disclosure requirements regarding quantitative information about unobservable inputs used in the fair value measurements of level 3 assets. The ASU also creates an exception to Topic 820 for entities which carry financial instruments within a portfolio or group, under which the entity is now permitted to base the price used for fair valuation upon a price that would be received to sell the net asset position or transfer a net liability position in an orderly transaction. The ASU also allows for the application of premiums and discounts in a fair value measurement if the financial instrument is categorized in level 2 or 3 of the fair value hierarchy. Lastly, the ASU contains new disclosure requirements regarding fair value amounts categorized as level 3 in the fair value hierarchy such as: disclosure of the valuation process used; effects of and relationships between unobservable inputs; usage of nonfinancial assets for purposes other than their highest and best use when that is the basis of the disclosed fair value; and categorization by level of items disclosed at fair value, but not measured at fair value for financial statement purposes. For public entities, this ASU is effective for interim and annual periods beginning after December 15, 2011. Early adoption is not permitted. There was no impact to amounts recognized and no significant impact to amounts disclosed in the consolidated financial statements from the adoption of this update.

In June 2011, the FASB issued ASU 2011-05, Presentation of Comprehensive Income which amends FASB ASC Topic 220, Comprehensive Income, to facilitate the continued alignment of U.S. GAAP with International Accounting Standards. The ASU prohibits the presentation of the components of comprehensive income in the statement of stockholder's equity. Reporting entities are allowed to present either: a statement of comprehensive income, which reports both net income and other comprehensive income; or separate, but consecutive, statements of net income and other comprehensive income. Under previous GAAP, all three presentations were acceptable. Regardless of the presentation selected, the reporting entity is required to present all reclassifications between other comprehensive and net income on the face of the new statement or statements. The provisions of this ASU are effective for fiscal years and interim periods beginning after December 15, 2011 for public entities. As the two remaining options for presentation existed prior to the issuance of this ASU, early adoption is permitted. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

In December, 2011, the FASB issued ASU 2011-12, Deferral of the Effective Date to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update 2011-05. In response to stakeholder concerns regarding the operational ramifications of the presentation of these reclassifications for current and previous years, the FASB has deferred the implementation date of this provision to allow time for further consideration. The requirement in ASU 2011-05, Presentation of Comprehensive Income, for the presentation of a combined statement of comprehensive income or separate, but consecutive, statements of net income and other comprehensive income is still effective for fiscal years and interim periods beginning after December 15, 2011 for public companies.

ITEM 2 – MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Form 10-Q contains forward-looking statements, which can be identified by the use of words such as "believes," "expects," "anticipates," "estimates" or similar expressions. Forward – looking statements include:

- Statements of our goals, intentions and expectations;
- Statements regarding our business plans, prospects, growth and operating strategies;
- Statements regarding the quality of our loan and investment portfolios; and
- Estimates of our risks and future costs and benefits.

These forward-looking statements are subject to significant risks and uncertainties. Actual results may differ materially from those contemplated by the forward-looking statements due to, among others, the following factors:

- General economic conditions, either nationally or in our market area, that are worse than expected;
- The volatility of the financial and securities markets, including changes with respect to the market value of our financial assets;
- Changes in government regulation affecting financial institutions and the potential expenses associated therewith;
- Changes in the interest rate environment that reduce our interest margins or reduce the fair value of financial instruments;
- Our ability to enter into new markets and/or expand product offerings successfully and take advantage of growth opportunities;
- Increased competitive pressures among financial services companies;
- Changes in consumer spending, borrowing and savings habits;
- Legislative or regulatory changes that adversely affect our business;
- Adverse changes in the securities markets;
- Our ability to successfully manage our growth; and
- Changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board or the Public Company Accounting Oversight Board.

No forward-looking statement can be guaranteed and we specifically disclaim any obligation to update any forward-looking statement.

Critical Accounting Policies

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the dates of the consolidated statements of financial position and revenues and expenses for the periods then ended. Actual results could differ significantly from those estimates. A material estimate that is particularly susceptible to significant change relates to the determination of the allowance for loan losses.

The allowance for loan losses represents our best estimate of losses known and inherent in our loan portfolio that are both probable and reasonable to estimate. In determining the amount of the allowance for loan losses, we consider the losses inherent in our loan portfolio and changes in the nature and volume of our loan activities, along with general economic and real estate market conditions. We

utilize a two tier approach: (1) identification of impaired loans for which specific reserves may be established; and (2) establishment of general valuation allowances on the remainder of the loan portfolio. We maintain a loan review system which provides for a systematic review of the loan portfolio and the early identification of potential impaired loans. Such system takes into consideration, among other things, delinquency status, size of loan, type of collateral and the financial condition of the borrower. Specific loan loss allowances are established for identified loans based on a review of such information and/or appraisals of the underlying collateral. General loan loss allowances are based upon a combination of factors including, but not limited to, actual loan loss experience, composition of the loan portfolio, current economic conditions and management's judgment.

In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Savings Bank's allowance for loan losses. Such agencies may require the Savings Bank to recognize additions to the allowance based on their judgments about information available to them at the time of their examinations.

Although specific and general loan loss allowances are established in accordance with management's best estimate, actual losses are dependent upon future events and, as such, further provisions for loan losses may be necessary in order to increase the level of the allowance for loan losses. For example, our evaluation of the allowance includes consideration of current economic conditions, and a change in economic conditions could reduce the ability of our borrowers to make timely repayments of their loans. This could result in increased delinquencies and increased non-performing loans, and thus a need to make increased provisions to the allowance for loan losses, which would be a charge to income during the period the provision is made, resulting in a reduction to our earnings. A change in economic conditions could also adversely affect the value of the properties collateralizing our real estate loans, resulting in increased charge-offs against the allowance and reduced recoveries, and thus a need to make increased provisions to the allowance for loan losses. Furthermore, a change in the composition of our loan portfolio or growth of our loan portfolio could result in the need for additional provisions.

Comparison of Financial Condition at December 31, 2011 and June 30, 2011

General. Total assets were $350.4 million at December 31, 2011, compared to $349.5 million at June 30, 2011, an increase of $897,000. During the six month period ended December 31, 2011, securities held to maturity increased by $22.6 million, while cash and cash equivalents decreased by $12.5 million and loans receivable, net of allowance for loan losses decreased by $8.6 million. The decrease in loans receivable, net, was primarily due to loan payments exceeding new loan originations. Deposits increased by $915,000 or 0.3%, while advances from the Federal Home Loan Bank of NY remained the same at December 31, 2011 and June 30, 2011.

Total assets increased by $897,000 between periods, while total liabilities increased by $818,000, and the ratio of average interest-earning assets to average-interest bearing liabilities increased to 108.83% for the six months ended December 31, 2011 as compared to 107.25% for year ended June 30, 2011. Stockholders' equity increased by $79,000 to $40.8 million at December 31, 2011 compared to $40.7 million at June 30, 2011.

Loans. Loans receivable, net, declined $8.6 million, or 3.3% from $253.3 million at June 30, 2011 to $244.7 million at December 31, 2011. As a percentage of assets, loans decreased to 70.0% from 72.5%. The Savings Bank's commercial and industrial loan portfolio grew by $664,000 or 7.1%, as did the deposit account loan portfolio by $295,000 or 60.1% between June 30, 2011 and December 31, 2011. One-to-four family loans decreased $4.9 million or 3.3%, construction loans decreased by $3.1 million or 18.7%, commercial real estate loans decreased by $874,000 or 2.7%, and home equity loans decreased by $108,000 or 0.2%,

and automobile, overdraft and personal loans which decreased by $12,000 or 5.1%, $8,000 or 4.1%, and $1,000 or 5.0%, respectively, between June 30, 2011 and December 31, 2011.

Securities. Our portfolio of securities held to maturity was at $64.3 million at December 31, 2011 as compared to $41.7 million at June 30, 2011. Maturities, calls and principal repayments during the six months ended December 31, 2011 totaled $17.4 million. We purchased $40.0 million of new securities during the six months ended December 31, 2011.

Deposits. Total deposits at December 31, 2011 were $287.1 million, a $915,000 increase as compared to $286.2 million at June 30, 2011. Certificate of deposit accounts increased by $1.3 million, as did demand accounts, in the aggregate by $763,000, while savings and club accounts decreased by $1.1 million.

Borrowings. Total borrowings at December 31, 2011 and June 30, 2011 amounted to $20.0 million. The Bank did not make any long term borrowings during the six months ended December 31, 2011 and did not have short-term borrowings at December 31, 2011 and June 30, 2011.

Equity. Stockholders' equity was $40.8 million at December 31, 2011 compared to $40.7 at June 30, 2011. Treasury stock increased by $374,000 due to repurchases. Other changes in equity were due to $335,000 in net income, $7,000 in other comprehensive income, $48,000 in ESOP shares earned and $172,000 in stock based compensation, offset by the declaration of $109,000 in minority cash dividends declared on our common stock.

Comparison of Operating Results for the Three Months and Six Months Ended December 31, 2011 and 2010

General. Our net income for the three months ended December 31, 2011 was $224,000, compared to net income of $120,000, for the three months ended December 31, 2010, an increase of $104,000 or 86.7%. This was primarily the result of a decrease in non-interest expense, offset by a decrease in net interest income and an increase in the provision for loan losses. Net interest income for the three months ended December 31, 2011 decreased $80,000 compared to the three months ended December 31, 2010. The provision for loan losses reflected an increase of $25,000 to $375,000 for the three month period ended December 31, 2011, compared to $350,000 for the three month period ended December 31, 2010. Non-interest income reflected a decrease of $16,000 or 8.5%, to $173,000 for the three months ended December 31, 2011 compared to $189,000 for the three months ended December 31, 2010. Non-interest expense decreased by $308,000 or 13.0% to $2.1 million for the three months ended December 31, 2011 compared to $2.4 million for the three months ended December 31, 2010.

Our net income was $335,000 for both six month periods ended December 31, 2011 and December 31, 2010. Net interest income for the six months ended December 31, 2011 was $5.4 million compared to $5.5 million for the six months ended December 31, 2010, a decrease of $99,000 or 1.8%. The provision for loan losses increased $163,000 or 19.8% to $988,000 for the six months ended December 31, 2011, compared to $825,000 for the six months ended December 31, 2010. Non-interest income decreased by $129,000 or 28.9% from $446,000 for the six months ended December 31, 2010 to $317,000 for the six moths ended December 31, 2011. Non-interest expense decrease $401,000 or 8.9% to $4.1 million for the six months ended December 31, 2011, compared to $4.5 million for the six month period ended December 31, 2010.

Net Interest Income. Net interest income decreased $80,000 or 2.9% for the three month period ended December 31, 2011, compared to the three months ended December 31, 2010. Interest income

decreased by $277,000 or 7.2%, and interest expense decreased by $197,000 or 18.3%, for the same three month comparative period.

The decrease of $277,000 or 7.2% in total interest income for the three months ended December 31, 2011, resulted from a 33 basis point decrease in yield and a 0.3% decrease in average balance of interest-earning assets. Average interest earning assets decreased $1.1 million, to $317.7 million for the three months ended December 31, 2011, compared to $318.8 million for the three months ended December 31, 2010. Interest income on loans decreased by $364,000 or 10.8% for the three months ended December 31, 2011, compared to the same period in 2010 primarily due to a 22 basis point reduction in average yield and a $17.9 million or 6.7% decrease in average loan balances. Interest on securities held to maturity increased by $97,000 or 23.0% for the three months ended December 31, 2011, compared to the three months ended December 31, 2010, as a result of a $16.4 or 35.2% million increase in average balance, offset by a 33 basis point reduction in average yield. Other interest income reflected a slight decrease of $10,000 or 32.2% in interest income primarily due to a 78 basis point decrease in average yield offset by an average balance increase of $432,000 for the three month period ended December 31, 2011 compared to the same period ended December 31, 2010.

Total interest expense decreased by $197,000 or 18.3% for the three months ended December 31, 2011, compared to the three months ended December 31, 2010. Average interest-bearing liabilities decreased $4.9 million or 1.6%, from $296.6 million for the three months ended December 31, 2010, to $291.7 million for the three months ended December 31, 2011, as did the average rate paid which decreased by 25 basis points from 1.46% to 1.21%, for the respective periods. Interest expense on deposits decreased by $197,000 or 21.7% for the three months ended December 31, 2011, compared to the three months ended December 31, 2010, as a result of a $4.9 million or 1.8% decrease in average interest-bearing deposits from $276.6 million to $271.7 million and a 26 basis point reduction in average rate form 1.31% to 1.05%, for the respective periods. Time deposit average balances decreased $4.3 million or 3.3%, as did average savings deposit balances by $3.2 million or 2.8%, while NOW average balances increased by $2.6 million or 8.9% for the three months ended December 31, 2011 compared to the three months ended December 31, 2010. Savings deposit average rates decreased by 32 basis points, as did the average rates on time deposits and NOW accounts by 22 and 16 basis points, respectively, for the three months ended December 31, 2011, compared to the three months ended December 31, 2010. Federal Home Loan Bank advance average balances were $20.0 million for both three month periods ended December 31, 2011 and December 31, 2010, as was the average rate of 3.44% for the same three month comparative periods.

Net interest income decreased $99,000 or 1.8% for the six months ended December 31, 2011, from $5.5 million for the six months ended December 31, 2010. Interest income decreased by $569,000 or 7.4%, and interest expense decrease by $470 million or 20.8% for the six month period ended December 31, 2011, compared to the six month period ended December 31, 2010.

The decrease of $569,000 or 7.4% in interest income for the six months ended December 31, 2011 resulted from a $3.7 million decrease in average earning assets and a 30 basis point decrease in yield to 4.52%, compared to the six months ended December 31, 2010. Interest income on loans decreased by $705,000 or 10.3% for the six months ended December 31, 2011, compared to the six months ended December 31, 2010. Average loan receivable balances decreased $17.2 million or 6.4% to $250.6 million for the six months ended December 31, 2011, compared to $267.8 million for the six months ended December 31, 2010, while the average yield declined to 4.89% from 5.09%. Interest income on securities held to maturity increased $150,000 or 17.6% for the six months ended December 31, 2011, compared to the six months ended December 31, 2010, due to a $14.7 million increase in average balances from $45.1 million for the six months ended December 31, 2010 to $59.8 million for the six months ended December 31, 2011, while the average yield declined 42 basis points from 3.78% to 3.36% for the same six month

comparative periods. Interest income on other interest-earning assets decreased by $14,000 or 24.1% for the six month period ended December 31, 2011, compared to the same six month period in 2010 as the average yield declined by 18 basis points to 1.29% and average other interest earning-asset balances decreased $1.0 million or 13.9%.

The $470,000 or 24.5% decrease in interest expense for the six months ended December 31, 2011, compared to the six months ended December 31, 2010, was primarily due to a decrease of $9.2 million in average interest-bearing liabilities balances and an average rate decrease of 28 basis points to 1.23%. Interest expense on deposits decreased by $470,000 or 24.5% for the six months ended December 31, 2011, compared to the six months ended December 31, 2010, as a result of a $9.3 million or 3.3% decrease in average interest-bearing deposits from $300.7 million to $291.4 million and a 26 basis point reduction in average rate from 1.51% to 1.23%, for the respective periods. NOW account average balances increased by $2.7 million or 8.9% for the six month period ended December 31, 2011 compared to the six months ended December 31, 2010, while time deposit and savings average balances decreased by $6.9 million and $5.0 million, or 5.3% and 4.2%, respectively, for the same comparative period. The average rates on savings, time deposits and NOW accounts decreased by 34 basis points, 26 basis points and 16 basis points, respectively, for the six months ended December 31, 2011, compared to the same six month period ended December 31, 2010. Federal Home Loan Bank advance average balances were $20.0 million for both six month periods ended December 31, 2011 and December 31, 2010, as was the average rate of 3.45% for same six month comparative periods.

Provision for Loan Losses. For the three month period ended December 31, 2011, a $375,000 provision for loan losses was made, whereas a $350,000 provision was made for the same period in 2010. There were charge-offs of $463,000 for the three months ended December 31, 2011, compared to $34,000 of charge-offs for the three months ended December 31, 2010. There were no recoveries of previously charged-off loans in either of the three month periods ended December 31, 2011 or December 31, 2010. For the six month period ended December 31, 2011, a $988,000 provision was made as compared to a $825,000 provision for the same period in 2010. There were charge-offs of $495,000 for the six month period ended December 31, 2011, compared to charge-offs of $267,000 for the six month period ended December 31, 2010. There were no recoveries of previously charged-off loans in either of the six month period ended December 31, 2011 and December 31, 2010. The allowance for loan losses totaled $2.7 million, $2.2 million and $3.1 million, respectively, at December 31, 2011, June 30, 2011 and December 31, 2010, representing 1.1%, 0.8% and 1.2%, respectively, of total loans. The ratio of non-performing loans to total loans was 6.3% at December 31, 2011, as compared to 6.3% at June 30, 2011 and 6.1% at December 31, 2010. The allowance for loan losses reflects our estimation of the losses inherent in our loan portfolio to the extent they are both probable and reasonable to estimate based on both qualitative and quantitative risk characteristics. The increase in the provision was primarily due to the increase in non-performing loans and the current economic environment.

Non-Interest Income. This category includes fees derived from checking accounts, ATM transactions and debit card use and mortgage related fees. It also includes increases in the cash-surrender value of the bank owned life insurance and any unrealized gain or loss on trading securities.

Non-interest income decreased by $16,000 or 8.5% to $173,000 for the three months ended December 31, 2011 from $189,000 for the three months ended December 31, 2010, primarily due to a $19,000 or 18.8% reduction in fees and service charges and a $4,000 unrealized gain on the Company's trading security portfolio for the three months ended December 31, 2011 compared to a $13,000 unrealized gain for the three months ended December 31, 2010. Other non-interest fee income increased by $10,000 or 38.5% during the three months ended December 31, 2011, as did income from bank owned life insurance by $2,000 or 4.1% for the same period. Total non-interest income decreased $129,000 or 29.9% from $446,000 for the six months ended December 31, 2010 to $317,000 for the six months ended

December 31, 2011, primarily due to a $78,000 investment security prepayment penalty fee that was realized in the prior year period only and an $11,000 unrealized loss on trading securities in the Company's trading security portfolio during the current period as compared to an $18,000 unrealized gain in the prior year period. In addition, other non-interest fee income increased by $10,000 or 19.2%, as did income from bank owned life insurance by $3,000 or 3.1% for the same comparative period.

Non-Interest Expenses. Total non-interest expenses decreased by $308,000 or 13.0% to $2.1 million for the three months ended December 31, 2011, compared to $2.4 million the three months ended December 31, 2010. Other non-interest expense decreased by $193,000 or 43.3%, as did FDIC insurance by $52,000 or 40.9%, occupancy and equipment expense by $43,000 or 10.2%, salaries and employee benefits expense by $27,000 or 2.7% and advertising expense by $4,000 or 7.7%, while directors' compensation increased by $5,000 or 4.5%, as did professional services by $5,000 or 4.2% and service bureau fees by $1,000 or 0.9% for the three months ended December 31, 2011 as compared to the three months ended December 31, 2010. The decrease in other non-interest expense was primarily attributable to a decrease in other real estate owned expense and other non-operating expenses. The decrease in FDIC insurance was attributable to the revised regulatory methodology used in calculating quarterly assessments that went into effect beginning with the April 30, 2011 assessment period. The decrease in occupancy expense was primarily attributable to a reduction in property taxes as the result of an adjustment that took place in the prior year. The decrease in salaries and employee benefits expense was primarily due to a decrease in the number of employees and related salary expense, which was offset by an increase in employee benefit expense, while the decrease in advertising expense was due to a reduction in spending. The increase in directors' compensation expense was due to an increase in compensation, while the increase in professional services was primarily due to an increase in consulting expense.

Our non-interest expense for the six months ended December 31, 2011, decreased $401,000 or 8.9% to $4.1 million from $4.5 million for the six months ended December 31, 2010. Other non-interest expense decreased by $292,000 or 40.1% for the six months ended December 31, 2011 compared to the six months ended December 31, 2010. The decrease in other non-interest expense was primarily attributable to a decrease in other real estate owned expenses and other non-operating expenses. FDIC assessment expense decreased by $105,000 or 41.5%, as did advertising expense by $22,000 or 18.6%, occupancy and equipment expense by $18,000 or 2.2%, and salaries and employee benefits expense by $11,000 or 0.6% for the six months ended December 31, 2011, compared to the six months ended December 31 2010. Professional services expense increased by $26,000 or 11.0%, as did directors' compensation by $11,000 or 5.0% and service bureau fees by $10,000 or 4.9% for the three months ended December 31, 2011 as compared to the three months ended December 31, 2010. The decrease in FDIC insurance was attributable to the revised regulatory methodology used in calculating quarterly assessments that went into effect beginning with the April 30, 2011 assessment period. The decrease in advertising expense was due to a reduction in spending, while the decrease in occupancy and equipment expense was related to a decrease in depreciation expense, while the decrease in salary and employee expense was primarily due to a reduction in the number of employees and related salary expense, which was offset by an increase in employee benefit expense, for the six months ended December 31, 2011 compared to the six months ended December 31, 2010.

Income Taxes. Income tax expense for the three months ended December 31, 2011 was $182,000 or 44.8% of income before income taxes as compared to $99,000 or 45.2% of income before income taxes for the three months ended December 31, 2010. Income tax expense for the six months ended December 31, 2011 was $240,000 or 41.7% of income before income taxes as compared to $230,000 or 40.7% of income before income taxes for the six months ended December 31, 2010.

Liquidity, Commitments and Capital Resources

The Savings Bank must be capable of meeting its customer obligations at all times. Potential liquidity demands include funding loan commitments, cash withdrawals from deposit accounts and other funding needs as they present themselves. Accordingly, liquidity is measured by our ability to have sufficient cash reserves on hand, at a reasonable cost and/or with minimum losses.

Senior management is responsible for managing our overall liquidity position and risk and is responsible for ensuring that our liquidity needs are being met on both a daily and long term basis. The Financial Review Committee, comprised of senior management and chaired by President and Chief Executive Officer Michael Shriner, is responsible for establishing and reviewing our liquidity procedures, guidelines, and strategy on a periodic basis.

Our approach to managing day-to-day liquidity is measured through our daily calculation of investable funds and/or borrowing needs to ensure adequate liquidity. In addition, senior management constantly evaluates our short-term and long-term liquidity risk and strategy based on current market conditions, outside investment and/or borrowing opportunities, short and long-term economic trends, and anticipated short and long-term liquidity requirements. The Savings Bank's loan and deposit rates may be adjusted as another means of managing short and long-term liquidity needs. We do not at present participate in derivatives or other types of hedging instruments to meet liquidity demands, as we take a conservative approach in managing liquidity.

At December 31, 2011, the Savings Bank had outstanding commitments to originate loans of $1.1 million, construction loans in process of $2.9 million, unused lines of credit of $23.0 million (including $17.9 million for home equity lines of credit), and standby letters of credit of $371,000. Certificates of deposit scheduled to mature in one year or less at December 31, 2011, totaled $71.8 million.

As of September 30, 2011, the Savings Bank had contractual obligations related to the long-term operating leases for the three branch locations that it leases (Dewy Meadow, RiverWalk and Martinsville).

The Savings Bank generates cash through deposits and/or borrowings from the Federal Home Loan Bank to meet its day-to-day funding obligations when required. At December 31, 2011, the total loans to deposits ratio was 85.2%. At December 31, 2011, the Savings Bank's collateralized borrowing limit with the Federal Home Loan Bank was $78.7 million, of which $20.0 million was outstanding. As of December 31, 2011, the Savings Bank also had a $20.0 million line of credit with a financial institution for reverse repurchase agreements (which is a form of borrowing) that it could access if necessary.

Consistent with its goals to operate a sound and profitable financial organization, the Savings Bank actively seeks to maintain its status as a well-capitalized institution in accordance with regulatory standards. As of December 31, 2011, the Savings Bank exceeded all applicable regulatory capital requirements.

ITEM 3 – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

This item is not applicable to the Company as it is a smaller reporting company.

ITEM 4 – CONTROLS AND PROCEDURES

An evaluation was performed under the supervision, and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of

37

the design and operation of the Company’s disclosure controls and procedures (as defined in Rule l3a-l5(e) promulgated under the Securities Exchange Act of 1934, as amended) as of December 31, 2011. Based on such evaluation, the Company’s Chief Executive Officer and Chief Financial Officer have concluded that the Company’s disclosure controls and procedures are effective as of December 31, 2011.

No change in the Company’s internal controls over financial reporting (as defined in Rule l3a-l5(f) promulgated under the Securities Exchange Act of 1934, as amended) occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company’s internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1 – LEGAL PROCEEDINGS

There were no material pending legal proceedings at December 31, 2011 to which the Company or its subsidiaries is a party other than ordinary routine litigation incidental to their respective businesses.

ITEM 1A – RISK FACTORS

This item is not applicable to the Company as it is a smaller reporting company.

ITEM 2 – UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table sets forth information regarding the Company’s repurchases of its common stock during the quarter ended December 31, 2011.

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part Of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
October 1 through 31, 2011	13,344	$ 5.05	13,344	-
November 1 through 31, 2011	39,208	5.32	39,208	63,797
December 1 through 30, 2011	17,516	5.05	17,516	46,281
Total	70,068	$ 5.20	70,068
