U.S. PHYSICAL THERAPY, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2010

(unaudited)

1. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements include the accounts of U.S. Physical Therapy, Inc. and its subsidiaries. All significant intercompany transactions and balances have been eliminated. The Company primarily operates through subsidiary clinic partnerships, in which the Company generally owns a 1% general partnership interest and a 64% limited partnership interest. The managing therapist of each clinic owns, directly or indirectly, the remaining limited partnership interest in the majority of the clinics (hereinafter referred to as *Clinic Partnership*). To a lesser extent, the Company operates some clinics, through wholly-owned subsidiaries, under profit sharing arrangements with therapists (hereinafter referred to as *Wholly-Owned Facilities*).

The Company continues to seek to attract physical and occupational therapists who have established relationships with physicians by offering therapists a competitive salary and a share of the profits of the clinic operated by that therapist. The Company has developed satellite clinic facilities of existing clinics, with the result that many clinic groups operate more than one clinic location. In addition, the Company has acquired a majority interest in a number of clinics through acquisitions.

During the three months ended March 31, 2010, the Company opened one new clinic, acquired five, sold five and closed two. The clinic opened was a new Clinic Partnership. On February 26, 2010, the Company acquired a 70% interest in five clinics and, on March 31, 2010, the Company sold its 51% interest in five Texas clinics. The Company ended March 2010 with 367 clinics.

The Company intends to continue to focus on developing new clinics and on opening satellite clinics where deemed appropriate. The Company will also continue to evaluate acquisition opportunities.

The accompanying unaudited consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and in accordance with the instructions for Form 10-Q. However, the statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements.

Management believes this report contains all necessary adjustments (consisting only of normal recurring adjustments) to present fairly, in all material respects, the Company's financial position, results of operations and cash flows for the interim periods presented. For further information regarding the Company's accounting policies, please read the audited financial statements included in the Company's Form 10-K for the year ended December 31, 2009.

The Company believes, and the Chief Executive Officer, Chief Financial Officer and Corporate Controller have certified, that the financial statements included in this report present fairly, in all material respects, the Company's financial position, results of operations and cash flows for the interim periods presented.

Operating results for the three months ended March 31, 2010 are not necessarily indicative of the results the Company expects for the entire year. Please also review the Risk Factors section included in our Form 10-K for the year ended December 31, 2009.

Clinic Partnerships

For Clinic Partnerships, the earnings and liabilities attributable to the noncontrolling interests, typically owned by the managing therapist, directly or indirectly, are recorded within the balance sheets and income statements as noncontrolling interests.

Wholly-Owned Facilities

For Wholly-Owned Facilities with profit sharing arrangements, an appropriate accrual is recorded for the amount of profit sharing due the profit sharing therapists. The amount is expensed as compensation and included in clinic operating costs—salaries and related costs. The respective liability is included in current liabilities—accrued expenses on the balance sheet.

Table of Contents

Significant Accounting Policies

Cash

The Company maintains its cash at financial institutions. The combined account balances at several institutions may exceed the Federal Deposit Insurance Corporation (FDIC) insurance coverage and, as a result, there is a concentration of credit risk related to amounts on deposit in excess of FDIC insurance coverage. Management believes that this risk is not significant.

Long-Lived Assets

Fixed assets are stated at cost. Depreciation is computed on the straight-line method over the estimated useful lives of the related assets. Estimated useful lives for furniture and equipment range from three to eight years and for software purchased from three to seven years. Leasehold improvements are amortized over the shorter of the related lease term or estimated useful lives of the assets, which is generally three to five years.

Impairment of Long-Lived Assets and Long-Lived Assets to Be Disposed Of

The Company reviews property and equipment and intangible assets with finite lives for impairment upon the occurrence of certain events or circumstances which indicate that the related amounts may be impaired. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Goodwill

For 2010 acquisitions, goodwill represents the excess of the amount paid and fair value of the noncontrolling interests over the fair value of the acquired business assets. Historically, goodwill has been derived from acquisitions and, prior to 2009, from the purchase of some or all of a particular local management 's equity interest in an existing clinic. Effective January 1, 2009, if the purchase price of a noncontrolling interest by the Company exceeds or is less than the book value at the time of purchase, any excess or shortfall is recognized as an adjustment to additional-paid-in-capital. The fair value of goodwill and other intangible assets with indefinite lives are tested for impairment at least annually and upon the occurrence of certain events, and are written down to fair value if considered impaired. The Company evaluates goodwill for impairment on at least an annual basis (in its third quarter) by comparing the fair value of each reporting unit to the carrying value of the reporting unit including related goodwill. The Company operates a one segment business which is made up of various clinics within partnerships. A reporting unit refers to the acquired interest of a single clinic or group of clinics. Local management typically continues to manage the acquired clinic or group of clinics. For each clinic or group of clinics, the Company maintains discrete financial information and both corporate and local management regularly review the operating results. Historically, the Company has not combined any of the reporting units for impairment testing because they did not meet the criteria for aggregation. For each purchase of the equity interest, goodwill is assigned to the respective clinic or group of clinics, if deemed appropriate. An impairment loss generally would be recognized when the carrying amount of the net assets of the reporting unit, inclusive of goodwill and other intangible assets, exceed the estimated fair value of the reporting unit. The estimated fair value of a reporting unit is determined using two factors: (i) earnings prior to taxes, depreciation and amortization for the reporting unit multiplied by a price/earnings ratio used in the industry and (ii) a discounted cash flow analysis. A weight is assigned to each factor and the sum of each weight times the factor is considered the estimated fair value. During the three months ended March 31, 2010, the Company did not identify any triggering events that would require the performance of impairment testing during the period.

Noncontrolling interests

The Company recognizes noncontrolling interests as equity in the consolidated financial statements separate from the parent entity 's equity. The amount of net income attributable to noncontrolling interests is included in consolidated net income on the face of the income statement. Changes in a parent entity 's ownership interest in a subsidiary that do not result in deconsolidation are treated as equity transactions if the parent entity retains its controlling financial interest. The Company recognizes a gain or loss in net income when a subsidiary is deconsolidated. Such gain or loss is measured using the fair value of the noncontrolling equity investment on the deconsolidation date. When the purchase price of a noncontrolling interest by the Company exceeds or is less than the book value at the time of purchase, any excess or shortfall is recognized as an adjustment to additional-paid-in-capital. Additionally, operating losses are allocated to noncontrolling interests even when such allocation creates a deficit balance for the noncontrolling interest partner.

Table of Contents**Revenue Recognition**

Revenues are recognized in the period in which services are rendered. Net patient revenues (patient revenues less estimated contractual adjustments) are reported at the estimated net realizable amounts from third-party payors, patients and others for services rendered. The Company has agreements with third-party payors that provide for payments to the Company at amounts different from its established rates. The allowance for estimated contractual adjustments is based on terms of payor contracts and historical collection and write-off experience.

The Company determines allowances for doubtful accounts based on the specific agings and payor classifications at each clinic. The provision for doubtful accounts is included in clinic operating costs in the statement of net income. Net accounts receivable, which are stated at the historical carrying amount net of contractual allowances, write-offs and allowance for doubtful accounts, includes only those amounts the Company estimates to be collectible. Since 1999, reimbursement for outpatient therapy services provided to Medicare beneficiaries has been made according to a Medicare Physician Fee Schedule (MPFS) published by the Department of Health and Human Services (HHS). Under the Balanced Budget Act of 1997, the total amount paid by Medicare in any one year for outpatient physical therapy or occupational therapy (including speech-language pathology) to any one patient is subjected to a stated dollar amount (the Medicare Cap or Limit), except for services provided in hospitals. Outpatient therapy services rendered to Medicare beneficiaries by the Company s therapists are subject to the Medicare Cap, except to the extent these services are rendered pursuant to certain management and professional services agreements with inpatient facilities. In 2006, Congress passed the Deficit Reduction Act (DRA), which allowed the Centers for Medicare & Medicaid Services (CMS) to grant exceptions to the Medicare Cap for services provided during the year, as long as those services met certain qualifications. The exception process initially allowed for automatic and manual exceptions to the Medicare Cap for medically necessary services. CMS subsequently revised the exceptions procedures and eliminated the manual exceptions process. Beginning January 1, 2008, all services that required exceptions to the Medicare Cap were processed as automatic exceptions. While the basic procedure for obtaining an automatic exception remained the same, CMS expanded requirements for documentation related to the medical necessity of services provided above the cap. Under the Medicare Improvements for Patients and Providers Act as passed July 16, 2008, the extension process remained through December 31, 2009. The Temporary Extension Act of 2010, enacted on March 2, 2010, extended the therapy cap exceptions process through March 31, 2010, retroactive to January 1, 2010. With respect to the MPFS, in April the Continuing Extension Act of 2010 was signed into law extending the zero percent update through May 31, 2010.

On March 23, 2010, the President signed into law the Patient Protection and Affordable Care Act, which extended the exceptions process for the outpatient therapy Medicare Cap. Outpatient therapy service providers may continue to submit claims when an exception is appropriate, for services furnished on or after January 1, 2010 through December 31, 2010. For physical therapy and speech language pathology service combined, and for occupational therapy services, the Medicare Cap for 2010 is \$1,860.

Since the Medicare Cap was implemented, patients who have been impacted by the cap and those who do not qualify for an exception may choose to pay for services in excess of the cap themselves; however, it is assumed that the Medicare Cap will result in some lost revenues to the Company.

Laws and regulations governing the Medicare program are complex and subject to interpretation. The Company believes that it is in compliance in all material respects with all applicable laws and regulations and is not aware of any pending or threatened investigations involving allegations of potential wrongdoing that would have a material effect on the Company s financial statements as of March 31, 2010. Compliance with such laws and regulations can be subject to future government review and interpretation, as well as significant regulatory action including fines, penalties, and exclusion from the Medicare program.

Management contract revenues are derived from contractual arrangements whereby the Company manages a clinic for third party owners. The Company does not have any ownership interest in these clinics. Typically, revenues are determined based on the number of visits conducted at the clinic and recognized when services are performed.

Contractual Allowances

Contractual allowances result from the differences between the rates charged for services performed and expected reimbursements for such services by both insurance companies and government sponsored healthcare programs.

Medicare regulations and the various third party payors and managed care contracts are often complex and may include multiple reimbursement mechanisms payable for the services provided in Company clinics. The Company estimates contractual allowances based on its interpretation of the applicable regulations, payor contracts and historical calculations. Each month the Company estimates its contractual allowance for each clinic based on payor contracts and the historical

Table of Contents

collection experience of the clinic and applies an appropriate contractual allowance reserve percentage to the gross accounts receivable balances for each payor of the clinic. Based on the Company's historical experience, calculating the contractual allowance reserve percentage at the payor level is sufficient to allow us to provide the necessary detail and accuracy with its collectibility estimates. However, the services authorized and provided and related reimbursement are subject to interpretation that could result in payments that differ from the Company's estimates. Payor terms are periodically revised necessitating continual review and assessment of the estimates made by management. The Company's billing systems may not capture the exact change in our contractual allowance reserve estimate from period to period in order to assess the accuracy of our revenues, and hence, our contractual allowance reserves. Management regularly compares its cash collections to corresponding net revenues measured both in the aggregate and on a clinic-by-clinic basis. In the aggregate, historically the difference between net revenues and corresponding cash collections has generally reflected a difference within approximately 1% of net revenues. Additionally, analysis of subsequent period's contractual write-offs on a payor basis shows a less than 1% difference between the actual aggregate contractual reserve percentage as compared to the estimated contractual allowance reserve percentage associated with the same period end balance. As a result, the Company believes that a change in the contractual allowance reserve estimate would not likely be more than 1% at March 31, 2010.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount to be recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority.

The Company recognizes accrued interest expense and penalties associated with unrecognized tax benefits as income tax expense. The Company did not have any accrued interest or penalties associated with any unrecognized tax benefits nor was any interest expense recognized during the three months ended March 31, 2010 and 2009.

Fair Value of Financial Instruments

The carrying amounts reported in the balance sheet for cash and cash equivalents, accounts receivable, accounts payable and notes payable approximate their fair values due to the short-term maturity of these financial instruments. The carrying amount of the revolving line of credit approximates its fair value. The interest rate on the revolving line of credit, which is tied to the Eurodollar Rate, is set at various short-term intervals as detailed in the credit agreement.

Segment Reporting

Operating segments are components of an enterprise for which separate financial information is available that is evaluated regularly by chief operating decision makers in deciding how to allocate resources and in assessing performance. The Company identifies operating segments based on management responsibility and believes it meets the criteria for aggregating its operating segments into a single reporting segment.

Use of Estimates

In preparing the Company's consolidated financial statements, management makes certain estimates and assumptions, especially in relation to, but not limited to, goodwill impairment, allowance for receivables, tax provision and contractual allowances, that affect the amounts reported in the consolidated financial statements and related disclosures. Actual results may differ from these estimates.

Self-Insurance Program

The Company utilizes a self-insurance plan for its employee group health insurance coverage administered by a third party. Predetermined loss limits have been arranged with the insurance company to limit the Company's maximum liability and cash outlay. Accrued expenses include the estimated incurred but unreported costs to settle unpaid claims and estimated future claims. Management believes that the current accrued amounts are sufficient to pay claims

arising from self insurance incurred through March 31, 2010.

Table of Contents**Stock Options**

The Company measures and recognizes compensation expense for all stock-based payments at fair value. Compensation cost recognized includes (i) compensation for all stock-based payments granted prior to, but not yet vested, on January 1, 2006, based on the grant-date fair value estimated at the time of grant and (ii) compensation cost for the stock-based payments granted subsequent to January 1, 2006, based on the grant-date fair value. No stock options were granted during the three months ended March 31, 2010.

Restricted Stock

Restricted stock issued to employees and directors is subject to continued employment or continued service on the board, respectively. Typically the transfer restrictions for shares granted to employees lapse in equal installments on the following five annual anniversaries of the date of grant. Compensation expense for grants of restricted stock is recognized based on the fair value per share on the date of grant amortized over the vesting period. The restricted stock issued is included in basic and diluted shares for the earnings per share computation. There were no shares of restricted stock granted during the three months ended March 31, 2010.

2. EARNINGS PER SHARE

The computations of basic and diluted earnings per share for the Company are as follows (in thousands, except per share data):

	Three Months Ended March 31,	
	2010	2009
Numerator:		
Net income attributable to common shareholders	\$ 3,172	\$ 2,754
Denominator:		
Denominator for basic earnings per share - weighted-average shares	11,614	12,020
Effect of dilutive securities - Stock options	226	5
Denominator for diluted earnings per share - adjusted weighted-average shares	11,840	12,025
Earnings per share attributable to common shareholders:		
Basic	\$ 0.27	\$ 0.23
Diluted	\$ 0.27	\$ 0.23

Options to purchase 110,000 and 881,000 shares for the three months ended March 31, 2010 and 2009, respectively, were excluded from the diluted earnings per share calculations for the respective periods because the options' exercise prices were greater than the average market price of the common shares during the periods.

The restricted stock issued is included in basic and diluted shares for the earnings per share computation.

3. ACQUISITIONS AND DIVESTITURE**Acquisition of Businesses**

On February 26, 2010, the Company acquired a 70% interest in a five clinic outpatient therapy group (February Acquisition). The purchase price for the 70% interest in the February Acquisition was \$9.0 million, which consisted of \$8.8 million in cash and \$200,000 in seller notes, which are payable in two principal installments totaling \$100,000 each in February 2011 and 2012. The seller notes accrue interest at 4% per annum. For the February Acquisition, the

Table of Contents

Company incurred acquisition costs totaling \$0.1 million which was expensed. The consideration paid for the February Acquisition was derived through arm's length negotiations. Funding for the cash portion of the purchase price was provided by the Company's credit facility.

Because of the proximity of the February Acquisition to quarter ended March 31, 2010, the purchase price plus the fair value of the noncontrolling interest was allocated to the fair value of the assets acquired and liabilities assumed based on the preliminary estimates of the fair values at the acquisition date, with the amount exceeding the estimated fair values being recorded as goodwill. The Company is in the process of completing its formal valuation analysis to identify and determine the fair value of tangible and intangible assets acquired and the liabilities assumed. Thus, the final allocation of the purchase price may differ from the preliminary estimates used at March 31, 2010 based on additional information obtained. Changes in the estimated valuation of the tangible and intangible assets acquired and the completion by the Company of the identification of any unrecorded pre-acquisition contingencies, where the liability is probable and the amount can be reasonably estimated, will result in adjustments to goodwill.

The preliminary purchase price allocation is as follows (in thousands):

Cash paid, net of cash acquired	\$ 8,710
Seller notes	200
Total consideration	\$ 8,910
Estimated fair value of net tangible assets acquired:	
Total current assets	\$ 991
Total non-current assets	360
Total liabilities	(106)
Net tangible assets acquired	\$ 1,245
Goodwill	11,523
Fair value of noncontrolling interest	(3,858)
	\$ 8,910

On March 1, 2010, a subsidiary of the Company purchased an outpatient therapy practice for \$100,000 (March Acquisition), which consisted of \$75,000 of cash and a payable of \$25,000. The purchase price was allocated \$30,000 to non-current assets and \$70,000 to goodwill. The practice was consolidated into an existing clinic.

The results of operations of the February Acquisition and March Acquisition have been included in the Company's consolidated financial statements since the respective dates acquired. Unaudited proforma consolidated financial information for these two acquisitions has not been included as the results were not material to current operations.

Divestiture of business

On March 31, 2010, the Company sold its 51% interest in a joint venture of five Texas clinics. The Company recorded a pre-tax gain of \$578,000, which is included in other income in the consolidated statements of net income. Of the \$974,000 sales price, \$213,000 was received on March 31, 2010 and the remaining \$761,000 (included in accounts receivable other on the March 31, 2010 balance sheet) was received in April 2010.

The operating results of these locations were not material to the operations of the Company, and therefore, the operating results of these clinics were not reclassified and reported as discontinued operations. The cash flow impact of these clinics was determined to be immaterial for the consolidated statements of cash flows.

Table of Contents**4. Goodwill**

The changes in the carrying amount of goodwill consisted of the following (in thousands):

	Three Months Ended March 31, 2010
Beginning balance	\$ 57,247
Goodwill acquired during the year	11,593
Goodwill written off	(39)
Ending balance	\$ 68,801

The goodwill written off relates to the five Texas clinics sold in March 2010.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**EXECUTIVE SUMMARY****Our Business**

We operate outpatient physical and/or occupational therapy clinics that provide preventive and post-operative care for a variety of orthopedic-related disorders and sports-related injuries, treatment for neurologically-related injuries and rehabilitation of injured workers. During the three months ended March 31, 2010, the Company opened one new clinic, acquired five, sold five and closed two. The clinic opened was a new Clinic Partnership. On February 26, 2010, the Company acquired a 70% interest in five clinics and, on March 31, 2010, the Company sold its 51% interest in five Texas clinics. At March 31, 2010, we operated 367 clinics in 43 states. The average age of our clinics at March 31, 2010 was 7.1 years.

In addition to our owned clinics, we also manage physical therapy facilities for third parties, primarily physicians, with 14 third-party facilities under management as of March 31, 2010.

Selected Operating and Financial Data

The following table presents selected operating and financial data that we believe are key indicators of our operating performance.

	For the Three Months Ended March 31,	
	2010	2009
Number of clinics, at the end of period	367	365
Working Days	63	63
Average visits per day per clinic	20.2	20.3
Total patient visits	468,651	462,958
Net patient revenue per visit	\$ 104.08	\$ 100.80
Statement of operations per visit:		
Net revenues	\$ 107.55	\$ 104.05
Salaries and related costs	57.12	54.87
Rent, clinic supplies, contract labor and other	21.55	22.06
Provision for doubtful accounts	2.21	1.53
Closure costs	0.06	
Contribution from clinics	26.61	25.59
Corporate office costs	12.39	11.64

Operating income from continuing operations	\$ 14.22	\$ 13.95
---	----------	----------

Table of Contents

RESULTS OF OPERATIONS

Three Months Ended March 31, 2010 Compared to the Three Months Ended March 31, 2009

Net revenues increased to \$50.4 million for the three months ended March 31, 2010 (2010 First Quarter) from \$48.2 million for the three months ended March 31, 2009 (2009 First Quarter) due to an increase of \$3.28 from \$100.80 to \$104.08 in net patient revenue per visit and a 1.2% increase in patient visits from 463,000 to 469,000. Our net patient revenue per visit has increased due to our continuing efforts to provide additional services and to negotiate more favorable reimbursement rates with certain payors.

Net income attributable to our common shareholders for the 2010 First Quarter was \$3.2 million versus \$2.8 million for the 2009 First Quarter. Net income was \$0.27 per diluted share for the 2010 First Quarter as compared to \$0.23 per diluted share for the 2009 First Quarter. Total diluted shares were 11.8 million for the 2010 First Quarter and 12.0 million for the 2009 First Quarter.

Net Patient Revenues

Net patient revenues increased to \$48.8 million for the 2010 First Quarter from \$46.7 million for the 2009 First Quarter, an increase of \$2.1 million, or 4.5%, due to an increase of \$3.28 in net patient revenues per visit from \$100.80 to \$104.08 and a 1.2% increase in patient visits from 463,000 to 469,000.

The growth in patient visits was attributable to an increase of 14,000 visits in clinics opened or acquired between April 1, 2009 and March 31, 2010 (New Clinics) offset by a decrease of 8,000 for clinics opened or acquired prior to April 1, 2009 (Mature Clinics).

The \$2.1 million net patient revenues increase for the 2010 First Quarter included \$1.5 million from New Clinics and \$0.6 million from Mature Clinics, especially from those opened in 2009 First Quarter due to increased business.

Net patient revenues are based on established billing rates less allowances and discounts for patients covered by contractual programs and workers' compensation. Net patient revenues are after contractual and other adjustments relating to patient discounts from certain payors. Payments received under these programs are based on predetermined rates and are generally less than the established billing rates of the clinics.

Management Contract and Other Revenues

Management contract and other revenues increased by \$121,000 from \$1,505,000 to \$1,626,000 due to additional management contracts in place. During the 2010 First Quarter, we had 14 management contracts versus 11 for the 2009 First Quarter.

Clinic Operating Costs

Clinic operating costs as a percentage of net revenues were 75.3% for the 2010 First Quarter and 75.4% for the 2009 First Quarter.

Clinic Operating Costs – Salaries and Related Costs

Salaries and related costs increased to \$26.8 million for the 2010 First Quarter from \$25.4 million for the 2009 First Quarter, an increase of \$1.4 million, or 5.4%. The \$1.4 million increase included costs of \$1.0 million attributable to the New Clinics. The remaining increase was due to slightly higher costs of \$0.4 million at the Mature Clinics. Salaries and related costs as a percentage of net revenues were 53.1% for the 2010 First Quarter and 52.7% for the 2009 First Quarter.

Clinic Operating Costs – Rent, Clinic Supplies, Contract Labor and Other

Rent, clinic supplies, contract labor and other decreased to \$10.1 million for the 2010 First Quarter from \$10.2 million for the 2009 First Quarter. For New Clinics, rent, clinic supplies, contract labor and other amounted to \$0.4 million for the 2010 First Quarter. For Mature Clinics, rent, clinic supplies, contract labor and other decreased by \$0.5 million in the 2010 First Quarter. Rent, clinic supplies, contract labor and other as a percentage of net revenues was 20.0% for the 2010 First Quarter and 21.2% for the 2009 First Quarter.

Table of Contents**Clinic Operating Costs Provision for Doubtful Accounts**

The provision for doubtful accounts was \$1.0 million for the 2010 First Quarter and \$0.7 million for the 2009 First Quarter. The provision for doubtful accounts for patients accounts receivable as a percentage of net patient revenues was 2.1% for the 2010 First Quarter and 1.5% for the 2009 First Quarter. Our allowance for bad debts for patients accounts receivable as a percentage of total patient accounts receivable was 7.9% at March 31, 2010, as compared to 7.6% at December 31, 2009. Our days sales outstanding was 46 days at March 31, 2010 compared to 45 days at December 31, 2009.

Corporate Office Costs

Corporate office costs, consisting primarily of salaries and benefits of corporate office personnel, rent, insurance costs, depreciation and amortization, travel, legal, professional, and recruiting fees, were \$5.8 million, or 11.5% of net revenues, for the 2010 First Quarter and \$5.4 million, or 11.2% of net revenues for the 2009 First Quarter. This increase of \$0.4 million is due to increased salaries and benefits, increased accrual for incentive compensation and legal fees associated with the February Acquisition. In accordance with current accounting guidance, costs related to acquisition activity are expensed as incurred.

Interest and Other Income

Other income in the 2010 First Quarter included a pre-tax gain of \$578,000 from the sale of our 51% interest in a five clinic Texas joint venture.

Interest Expense

Interest expense was \$64,000 for the 2010 First Quarter and \$88,000 for the 2009 First Quarter, which represents a decrease of \$24,000, or 27.3%, due to a decrease in average borrowings outstanding during the period in 2010 compared to 2009. At March 31, 2010, \$10.9 million was outstanding under our revolving credit facility. See

Liquidity and Capital Resources below for a discussion of the terms of our revolving credit facility contained in the Credit Agreement.

Provision for Income Taxes

The provision for income taxes increased to \$2.1 million for the 2010 First Quarter from \$1.8 million for the 2009 First Quarter. During the 2010 First Quarter, the Company accrued state and federal income taxes at an effective tax rate (provision for taxes divided by the difference between income from operations and net income attributable to noncontrolling interest) of 39.3% versus 39.2% for the 2009 First Quarter.

Noncontrolling Interests

Net income attributable to noncontrolling interests was \$2.0 million for the 2010 First Quarter and \$1.8 million for the 2009 First Quarter. Net income attributable to noncontrolling interests as a percentage of operating income before corporate office costs was 15.7% for the 2010 First Quarter and 15.5% for the 2009 First Quarter.

LIQUIDITY AND CAPITAL RESOURCES

We believe that our business is generating sufficient cash flow from operating activities to allow us to meet our short-term and long-term cash requirements, other than those with respect to future acquisitions. At March 31, 2010, we had \$11.4 million in cash compared to cash of \$6.4 million at December 31, 2009, an increase of 78.4%. At March 31, 2010, cash included those funds required for payroll which occurred on April 2, 2010. Although the start-up costs associated with opening new clinics and our planned capital expenditures are significant, we believe that our cash and availability under our revolving credit facility are sufficient to fund the working capital needs of our operating subsidiaries, corporate costs, purchases of our common stock, clinic closure costs accrued, future clinic development and investments through at least March 2011. Significant acquisitions would likely require financing under our existing revolving credit facility.

The increase in cash of \$5.0 million from December 31, 2009 to March 31, 2010 was due to \$6.0 million provided by operations, \$10.5 million of net proceeds from our Credit Agreement and \$0.1 million proceeds from the sale of fixed asset and business, offset by major uses of cash which included: purchase of businesses (\$8.8 million), purchase of fixed assets (\$0.6 million) and distributions to noncontrolling interest partners (\$2.2 million).

Effective August 27, 2007, we entered into the Credit Agreement with a commitment for a \$30.0 million revolving credit facility which was increased to \$50.0 million effective June 4, 2008. Effective March 18, 2009, we amended the Credit Agreement to permit the Company to purchase up to \$15,000,000 of its common stock subject to compliance

with certain covenants, including the requirement that after giving effect to any stock purchase, our consolidated leverage ratio (as

Table of Contents

defined in the Credit Agreement) be less than 1.0 to 1.0 and that any stock repurchased be retired within seven days of purchase. In addition, the Credit Agreement was amended to adjust the pricing grid which is based on our consolidated leverage ratio with the applicable spread over LIBOR ranging from 1.5% to 2.5%. The Credit Agreement has a four year term maturing August 31, 2011, is unsecured and includes standard financial covenants. Proceeds from the Credit Agreement may be used for acquisitions, working capital, purchases of our common stock, capital expenditures and other corporate purposes. Fees under the Credit Agreement include a closing fee of .25% and an unused commitment fee ranging from .1% to .35% depending on our consolidated leverage ratio and the amount of funds outstanding under the Credit Agreement. On March 31, 2010, the outstanding balance on the revolving credit facility was \$10.9 million leaving \$39.1 million in availability, and we were in compliance with all of the covenants thereunder.

Historically, we have generated sufficient cash from operations to fund our development activities and to cover operational needs. We plan to continue developing new clinics and making additional acquisitions in selected markets. We have from time to time purchased the noncontrolling interests in our Clinic Partnerships. We may purchase additional noncontrolling interests in the future. Generally, any acquisition or purchase of noncontrolling interests is expected to be accomplished using a combination of cash and financing. Any large acquisition would likely require financing.

We make reasonable and appropriate efforts to collect accounts receivable, including applicable deductible and co-payment amounts, in a consistent manner for all payor types. Claims are submitted to payors daily, weekly or monthly in accordance with our policy or payor's requirements. When possible, we submit our claims electronically. The collection process is time consuming and typically involves the submission of claims to multiple payors whose payment of claims may be dependent upon the payment of another payor. Claims under litigation and vehicular incidents can take a year or longer to collect. Medicare and other payor claims relating to new clinics awaiting Medicare Rehab Agency status approval initially may not be submitted for six months or more. When all reasonable internal collection efforts have been exhausted, accounts are written off prior to sending them to outside collection firms. With managed care, commercial health plans and self-pay payor type receivables, the write-off generally occurs after the account receivable has been outstanding for at least 120 days.

In connection with the February Acquisition, we incurred notes payable in the aggregate totaling \$200,000 payable in two equal annual installments totaling \$100,000 on February 26, 2011 and 2012, plus any accrued and unpaid interest. Interest accrues at a fixed rate of 4.00% per annum. In addition, we assumed leases with remaining terms ranging from three to nine and one-half years for the operating facilities.

In connection with the acquisition of a 65% interest in an outpatient rehabilitation practice with four clinics in November 2008, we incurred a note payable in the amount of \$400,400 payable in equal annual installments totaling \$200,200 beginning November 18, 2009, plus any accrued and unpaid interest. Interest accrues at a fixed rate of 4.00% per annum. The final principal payment and any accrued and unpaid interest then outstanding is due and payable on November 18, 2010. In addition, we assumed leases with remaining terms ranging from nine months to three years for the operating facilities. At March 31, 2010, the principal amount outstanding related to this note was \$200,200.

In connection with the acquisition of a 65% interest in Rehab Management Group in October 2008, we incurred a note payable in the amount of \$157,100 payable in equal annual installments totaling \$78,550 beginning October 8, 2009, plus any accrued and unpaid interest. Interest accrues at a fixed rate of 5.00% per annum. The final principal payment and any accrued and unpaid interest then outstanding is due and payable on October 8, 2010. The purchase agreement also provides for possible contingent consideration of up to \$3,781,000 based on the achievement of a designated level of operating results within a three-year period following the acquisition. In 2009, we paid \$1.2 million of additional consideration related to this acquisition related to operating results for the first year. Such amount was recorded as goodwill. At March 31, 2010, the principal amount outstanding related to this note was \$78,550.

In connection with the acquisition of a 65% interest in a multi-partner outpatient rehabilitation practice with nine clinics in June 2008, we incurred notes payable in the aggregate totaling \$950,625 payable in equal annual installments totaling \$475,312, plus any accrued and unpaid interest, which began June 11, 2009. Interest accrues at a fixed rate of 5.00% per annum. The final principal payment and any accrued and unpaid interest then outstanding is

due and payable on June 11, 2010. The purchase agreement also provides for possible contingent consideration of up to \$1,500,000 based on the achievement of a designated level of operating results within a three-year period following the acquisition. There was no contingent consideration earned based on the operating results of the first year. At March 31, 2010, the principal amount outstanding related to these notes was \$475,312.

In connection with the acquisition of a 70% interest in STAR Physical Therapy, LP in September 2007, we incurred notes payable in the aggregate totaling \$1,000,000 payable in equal annual installments totaling \$333,333, plus any accrued and unpaid interest, with the first payment due September 6, 2008. Interest accrues at a fixed rate of 8.25% per annum. The remaining principal and any accrued and unpaid interest then outstanding is due and payable on September 6, 2010. In

Table of Contents

addition, we assumed leases with remaining terms ranging from two months to six years for the operating facilities. At March 31, 2010, the principal amount outstanding related to these notes was \$258,333.

Except for RMG, in conjunction with the above mentioned acquisitions, in the event that a noncontrolling interest partner's employment ceases at any time after three years from the acquisition date, we have agreed to repurchase that individual's interest at a predetermined multiple of earnings before interest and taxes.

In September 2001 through December 31, 2008, the Board authorized us to purchase, in the open market or in privately negotiated transactions, up to 2,250,000 shares of our common stock; however, the terms of the Company's bank credit agreement had prohibited such purchases since August 2007. As of December 31, 2008, there were approximately 50,000 shares remaining that could be purchased under these programs. In March 2009, the Board authorized the repurchase of up to 10% or approximately 1,200,000 shares of our common stock (March 2009 Authorization). In connection with the March 2009 Authorization, we amended our bank credit agreement to permit the share repurchases. We are required to retire shares purchased under the March 2009 Authorization. Since there is no expiration date for these share repurchase programs, additional shares may be purchased from time to time in the open market or private transactions depending on price, availability and our cash position. During the three months ended March 31, 2010, we did not purchase any shares. As of March 31, 2010, there were approximately 730,000 shares remaining that could be purchased under these programs.

FACTORS AFFECTING FUTURE RESULTS

The risks related to our business and operations include:

The uncertain economic conditions and the historically high unemployment rate may have material adverse impacts on our business and financial condition that we currently cannot predict.

We depend upon reimbursement by third-party payors.

We depend upon the cultivation and maintenance of relationships with the physicians in our markets.

We also depend upon our ability to recruit and retain experienced physical and occupational therapists.

Our revenues may fluctuate due to weather.

Our operations are subject to extensive regulation.

Healthcare reform legislation may affect our business.

We operate in a highly competitive industry.

We may incur closure costs and losses.

Future acquisitions may use significant resources, may be unsuccessful and could expose us to unforeseen liabilities.

Certain of our internal controls, particularly as they relate to billings and cash collections, are largely decentralized at our clinic locations.

See Risk Factors in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2009 and in Part II Other Information - Item 1A. Risk Factors of this report.

Table of Contents

FORWARD LOOKING STATEMENTS

Forward-Looking Statements

We make statements in this report that are considered to be forward-looking within the meaning under Section 21E of the Securities Exchange Act of 1934. These statements contain forward-looking information relating to the financial condition, results of operations, plans, objectives, future performance and business of our Company. These statements (often using words such as believes, expects, intends, plans, appear, should and similar words) involve risks and uncertainties that could cause actual results to differ materially from those we project. Included among such statements are those relating to opening new clinics, availability of personnel and the reimbursement environment. The forward-looking statements are based on our current views and assumptions and actual results could differ materially from those anticipated in such forward-looking statements as a result of certain risks, uncertainties, and factors, which include, but are not limited to:

revenue and earnings expectations;

general economic conditions;

business and regulatory conditions including federal and state regulations;

changes as the result of government enacted national healthcare reform;

availability and cost of qualified physical and occupational therapists;

personnel productivity;

changes in Medicare guidelines and reimbursement or failure of our clinics to maintain their Medicare certification status;

competitive, economic or reimbursement conditions in our markets which may require us to reorganize or close certain clinics and thereby incur losses and/or closure costs including the possible write-down or write-off of goodwill and other intangible assets;

changes in reimbursement rates or payment methods from third party payors including government agencies and deductibles and co-pays owed by patients;

maintaining adequate internal controls;

availability, terms, and use of capital;

acquisitions and the successful integration of the operations of the acquired businesses; and

weather and other seasonal factors.

Many factors are beyond our control. Given these uncertainties, you should not place undue reliance on our forward-looking statements. Please see our periodic reports filed with the Securities and Exchange Commission (the SEC) for more information on these factors. Our forward-looking statements represent our estimates and assumptions only as of the date of this press release. Except as required by law, we are under no obligation to update any forward-looking statement, regardless of the reason the statement is no longer accurate.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We do not maintain any derivative instruments, interest rate swap arrangements, hedging contracts, futures contracts or the like. The Company's primary market risk exposure is the changes in interest rates obtainable on our revolving credit agreement. The interest on our revolving credit agreement is based on a variable rate. Based on the balance of

the revolving credit facility at March 31, 2010, any change in the interest rate of 1% would yield a decrease or increase in annual interest expense of \$109,000.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES.

(a) Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, the Company's management completed an evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures. Based on this evaluation, our principal executive officer and principal financial officer concluded (i) that our disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure (ii) that our disclosure controls and procedures are effective.

(b) Changes in Internal Control

There have been no changes in our internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1A. Risk Factors.

The risk factor presented below updates and replaces a risk factor disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2009, and should be considered in addition to the risk factors disclosed in that Annual Report. There have been no other material changes to the Company's risk factors as set forth in Item 1A. Risk Factors, in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2009.

We depend upon reimbursement by third-party payors.

Substantially all of our revenues are derived from private and governmental third-party payors. In 2009, approximately 80% of our revenues were derived collectively from managed care plans, commercial health insurers, workers' compensation payors, and other private pay revenue sources and approximately 20% of our revenues were derived from Medicare and Medicaid. Initiatives undertaken by industry and government to contain healthcare costs affect the profitability of our clinics. These payors attempt to control healthcare costs by contracting with healthcare providers to obtain services on a discounted basis. We believe that this trend will continue and may limit reimbursements for healthcare services. If insurers or managed care companies from whom we receive substantial payments were to reduce the amounts they pay for services, our profit margins may decline, or we may lose patients if we choose not to renew our contracts with these insurers at lower rates. In addition, in certain geographical areas, our clinics must be approved as providers by key health maintenance organizations and preferred provider plans. Failure to obtain or maintain these approvals would adversely affect our financial results.

Since 1999, reimbursement for outpatient therapy services provided to Medicare beneficiaries has been made according to a Medicare Physician Fee Schedule (MPFS) published by the HHS. Under the Balanced Budget Act of 1997, the total amount paid by Medicare in any one year for outpatient physical therapy or occupational therapy (including speech-language pathology) to any one patient is subjected to a stated dollar amount, except for services provided in hospitals. Outpatient therapy services rendered to Medicare beneficiaries by the Company's therapists are subject to the Medicare Cap, except to the extent these services are rendered pursuant to certain management and professional services agreements with inpatient facilities. In 2006, Congress passed the DRA, which allowed the CMS to grant exceptions to the Medicare Cap for services provided during the year, as long as those services met certain qualifications. The exception process initially allowed for automatic and manual exceptions to the Medicare Cap for medically necessary services. CMS subsequently revised the exceptions procedures and eliminated the manual exceptions process. Beginning January 1, 2008, all services that required exceptions to the Medicare Cap were processed as automatic exceptions. While the basic procedure for obtaining an automatic exception remained the same, CMS expanded requirements for documentation related to the medical necessity of services provided above the cap. Under the MIPPA, the extension process remained through December 31, 2009. The Temporary Extension Act of 2010, enacted on March 2, 2010, extends the therapy cap exceptions process through March 31, 2010, retroactive to January 1, 2010. With respect to the MPFS, in April, the Continuing Extension Act of 2010 was signed into law extending the zero percent update through May 31, 2010.

Table of Contents

On March 23, 2010, the President signed into law the Patient Protection and Affordable Care Act, which extended the exceptions process for the outpatient therapy Medicare Cap. Outpatient therapy service providers may continue to submit claims when an exception is appropriate, for services furnished on or after January 1, 2010 through December 31, 2010. For physical therapy and speech language pathology service combined, and for occupational therapy services, the limit for 2010 is \$1,860.

Since the Medicare Cap was implemented, patients who have been impacted by the cap and those who do not qualify for an exception may choose to pay for services in excess of the cap themselves; however, it is assumed that the Medicare Cap will continue to result in some lost revenues to the Company.

For a further description of this and other laws and regulations involving governmental reimbursements, see *Business Sources of Revenue* and *Regulation and Healthcare Reform* in Item 1 in our Annual Report on Form 10-K for the year ended December 31, 2009.

ITEM 6. EXHIBITS.

Exhibit Number	Description
10.1+	U. S. Physical Therapy, Inc. Objective Long-Term Incentive Plan for Senior Management, effective March 30, 2010 (incorporated by reference to Exhibit 99.1 to the Company's current report on Form 8-K filed with the SEC on March 29, 2010).
10.2+	U. S. Physical Therapy, Inc. Discretionary Long-Term Incentive Plan for Senior Management for 2010, effective March 30, 2010 (incorporated by reference to Exhibit 99.2 to the Company's current report on Form 8-K filed with the SEC on March 29, 2010).
