Table of Contents**CAPITALIZATION**

We may offer and sell up to 5,000,000 of our common shares from time to time through the Sales Manager as our agent for the offer and sale of the common shares under this prospectus supplement and the accompanying prospectus. There is no guaranty that there will be any sales of our common shares pursuant to this prospectus supplement and the accompanying prospectus. The table below assumes that we will sell 5,000,000 common shares, at a price of \$15.60 per share (the last reported sale price per share of our common shares on the NYSE Amex on July 22, 2010). Actual sales, if any, of our common shares under this prospectus supplement and the accompanying prospectus may be less than as set forth in the table below. In addition, the price per share of any such sale may be greater or less than \$15.60, depending on the market price of our common shares at the time of any such sale. To the extent that the market price per share of our common shares on any given day is less than the net asset value per share on such day, we will instruct the Sales Manager not to make any sales on such day.

The following table sets forth the audited capitalization of the Fund as of December 31, 2009, and its adjusted capitalization assuming the common shares offered in this prospectus supplement had been issued.

	As of December 31, 2009

Accumulated distributions in excess of net investment income and net realized gains	(9,282,970)	(9,282,970)

* As Adjusted paid-in surplus reflects a deduction for the estimated underwriting discounts of \$2,572,900 and estimated offering expenses of common shares offerings borne by the Fund of \$79,833. The total estimated

underwriting discounts and offering expenses borne by the Fund for common shares offered by the Fund in the fiscal year ended December 31, 2009 were \$3,797,829 and \$421,000, respectively. Table of Contents**TABLE OF FEES AND EXPENSES**

The following tables are intended to assist you in understanding the various costs and expenses directly or indirectly associated with investing in our common shares as a percentage of net assets attributable to common shares. Amounts are for the current fiscal year after giving effect to anticipated net proceeds of the offering, assuming that we incur the estimated offering expenses, including any preferred share offering expenses.

Shareholder Transaction Expenses

Sales Load (as a percentage of offering price)	1.00%
Offering Expenses Borne by the Fund (as a percentage of offering price)	0.05%
Dividend Reinvestment Plan Fees	None (1)

	Percentage of Net Assets Attributable to Common Shares
Annual Expenses	
Management Fees	1.11% (2)
Interest on Borrowed Funds	None
Other Expenses	0.19% (2)
Total Annual Expenses	1.30% (2)

- (1) You will be charged a \$1.00 service charge and pay brokerage charges if you direct the plan agent to sell your common shares held in a dividend reinvestment account.
- (2) The Investment Adviser's fee is 1.00% annually of the Fund's average weekly net assets, with no deduction for the liquidation preference of any outstanding preferred shares. Consequently, inasmuch as the Fund has preferred shares outstanding, the investment management fees and other expenses as a percentage of net assets attributable to common shares are higher than if the Fund did not utilize a leveraged capital structure. Other Expenses are based on estimated amounts for the current year assuming completion of the proposed issuances.

Example

The following example illustrates the expenses you would pay on a \$1,000 investment in common shares, assuming a 5% annual portfolio total return.*

	1 Year	3 Years	5 Years	10 Years
Total Expenses Incurred	\$ 24	\$ 51	\$ 81	\$ 166

* **The example should not be considered a representation of future expenses.** The example assumes that the amounts set forth in the Annual Expenses table are accurate and that all distributions are reinvested at net asset value. Actual expenses may be greater or less than those assumed. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

Table of Contents**USE OF PROCEEDS**

Sales of our common shares, if any, under this prospectus supplement and the accompanying prospectus may be made in negotiated transactions or transactions that are deemed to be "at the market" as defined in Rule 415 under the 1933 Act, including sales made directly on the NYSE Amex or sales made to or through a market maker other than on an exchange. There is no guaranty that there will be any sales of our common shares pursuant to this prospectus supplement and the accompanying prospectus. Actual sales, if any, of our common shares under this prospectus supplement and the accompanying prospectus may be less than as set forth in this paragraph. In addition, the price per share of any such sale may be greater or less than the price set forth in this paragraph, depending on the market price of our common shares at the time of any such sale. As a result, the actual net proceeds we receive may be more or less than the amount of net proceeds estimated in this prospectus supplement. Assuming the sale of all of our common shares offered under this prospectus supplement and the accompanying prospectus, at the last reported sale price of \$15.60 per share for our common shares on the NYSE Amex as of July 22, 2010, we estimate that the net proceeds of this offering will be approximately \$77,181,000 after deducting the estimated underwriting discount and our estimated offering expenses.

The Investment Adviser anticipates that the investment of the proceeds will be made in accordance with the Fund's investment objectives and policies as appropriate investment opportunities are identified, which is expected to substantially be completed within three months; however, changes in market conditions could result in the Fund's anticipated investment period extending to as long as six months.

Effective in 2008, a change in accounting policy was adopted with regard to the calculation of the portfolio turnover rate to include cash proceeds due to mergers. Had this policy been adopted retroactively, the portfolio turnover rate for the year ended December 31, 2007 and the period ended December 31, 2005 would have been 77.7% and 143.3%, respectively. The portfolio turnover rate for the year ended 2006 would have been as shown.

* Based on net asset value per share at commencement of operations of \$19.06 per share.

** Based on market value per share at initial public offering of \$20.00 per share.

- (a) Calculated based upon average common shares outstanding on the record dates throughout the periods.
- (b) The Fund incurred interest expense during the years ended December 31, 2008, 2007, and 2006. If interest expense had not been incurred, the ratio of operating expenses to average net assets attributable to common shares would have been 1.54%, 1.33%, and 1.16%, respectively, and for 2008 and 2007, the ratio of operating expenses to average net assets including liquidation value of preferred shares as discussed in Note 1 below, would have been 1.25% and 1.27%, respectively. For the year ended December 31, 2009, the effect of interest expense was minimal.
- (c) Based on weekly prices.
- (d) Amount represents less than \$0.005 per share.
- (e) The Fund commenced investment operations on March 31, 2005.
- (f) The beginning of period NAV reflects a \$0.04 reduction for costs associated with the initial public offering.
- (g) Annualized.

Note 1 The ratio of operating expenses to average net assets including liquidation value of preferred shares, for the years ended December 31, 2009, 2008, and 2007 was 1.35%, 1.37%, and 1.39%, respectively.
