COMMISSION FILE NUMBER 001-34653

First Interstate BancSystem, Inc.

(Exact name of registrant as specified in its charter)

Montana

81-0331430

(State or other jurisdiction of
incorporation or organization)

(IRS Employer
Identification No.)

401 North 31st Street, Billings, MT

59116-0918

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code: 406/255-5390

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files.)

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting
company

(Do not check if a smaller
reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the Registrant's classes of common stock:

June 30, 2010 Class A common stock

14,802,093

June 30, 2010 Class B common stock

Table of Contents**FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES****Notes to Unaudited Consolidated Financial Statements***(In thousands, except share and per share data)***(1) Basis of Presentation**

In the opinion of management, the accompanying unaudited consolidated financial statements of First Interstate BancSystem, Inc. (the Parent Company or FIBS) and subsidiaries (the Company) contain all adjustments (all of which are of a normal recurring nature) necessary to present fairly the financial position of the Company at June 30, 2010 and December 31, 2009, the results of operations for each of the three and six month periods ended June 30, 2010 and 2009 and cash flows for the six months ended June 30, 2010 and 2009, in conformity with U.S. generally accepted accounting principles (GAAP). The balance sheet information at December 31, 2009 is derived from audited consolidated financial statements. Certain reclassifications, none of which were material, have been made to conform prior year financial statements to the June 30, 2010 presentation. These reclassifications did not change previously reported net income or stockholders equity.

These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in the Company s Annual Report on Form 10-K for the year ended December 31, 2009. Operating results for the three and six months ended June 30, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010.

On March 5, 2010, the Company s shareholders approved proposals to recapitalize the Company s existing common stock. The recapitalization included, among other things, a redesignation of existing common stock as Class B common stock; a four-for-one stock split of the Class B common stock; and, the creation of a new class of common stock designated as Class A common stock. All share and per share information included in the accompanying consolidated financial statements, including the notes thereto, has been adjusted to give effect to the recapitalization of the common stock, including the four-for-one stock split of Class B common stock, as if the recapitalization had occurred on January 1, 2009, the earliest date presented. For additional information regarding the recapitalization, see Note 5 Common Stock.

(2) Investment Securities

The amortized cost and approximate fair values of investment securities are summarized as follows:

<i>Available-for-Sale</i>	Amortized	Gross	Gross	Estimated
June 30, 2010	Cost	Unrealized	Unrealized	Fair
		Gains	Losses	Value
Obligations of U.S. government agencies	\$ 713,850	\$ 5,746	\$ (5)	\$ 719,591

The investment portfolio is evaluated quarterly for other-than-temporary declines in the market value of each individual investment security. Consideration is given to the length of time and the extent to which the fair value has been less than cost; the financial condition and near term prospects of the issuer; and, the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. As of June 30, 2010, the Company had 35 individual investment securities that were in an unrealized loss position. As of December 31, 2009, the Company had 75 individual investment securities that were in an unrealized loss position. Unrealized losses as of June 30, 2010 and December 31, 2009 related primarily to fluctuations in the current interest rates. As of June 30, 2010, the Company had the intent and ability to hold these investment securities for a period of time sufficient to allow for an anticipated recovery. Furthermore, the Company does not have the intent to sell any of the available-for-sale securities in the above table and it is more likely than not that the Company will not have to sell any such securities before a recovery of cost. No impairment losses were recorded during the three and six months ended June 30, 2010 and 2009.

Maturities of investment securities at June 30, 2010 are shown below. Maturities of mortgage-backed securities have been adjusted to reflect shorter maturities based upon estimated prepayments of principal. All other investment securities maturities are shown at contractual maturity dates.

	Available-for-Sale		Held-to-Maturity	
	Amortized	Estimated	Amortized	Estimated
June 30, 2010	Cost	Fair Value	Cost	Fair Value

Allowance for loan losses specifically allocated to impaired loans	\$ 27,415	\$ 20,182	\$ 14,555

(4) Long-Term Debt

As of December 31, 2009, the Company had \$33,929 outstanding on variable rate term notes (*Term Notes*) issued pursuant to its credit agreement with four syndicated banks (*Credit Agreement*) and maturing on December 31, 2010. On March 29, 2010, the Company repaid the Term Notes and terminated the Credit Agreement. A loss of \$306 on the early extinguishment of the debt, comprised of unamortized debt issuance costs, was included in other expenses in the Company's consolidated statement of income for the six months ended June 30, 2010.

(5) Common Stock

On March 5, 2010, the Company's shareholders approved proposals to recapitalize the Company's existing common stock. The recapitalization included a redesignation of existing common stock as Class B common stock with five votes per share, convertible into Class A common stock on a share for share basis; a four-for-one stock split of the Class B common stock; an increase in the authorized number of Class B common shares from 20,000,000 to 100,000,000; and, the creation of a new class of common stock designated as Class A common stock, with one vote per share, with 100,000,000 shares authorized.

On March 29, 2010, the Company concluded its initial public offering of 10,000,000 shares of Class A common stock, and an additional 1,500,000 shares of Class A common stock pursuant to the full exercise of the underwriters' option to purchase Class A common shares in the offering. The Company received net proceeds of \$153,017 from the sale of the shares, after deducting the underwriting discount, commissions and other offering expenses.

As of June 30, 2010, the Company had 14,802,093 shares of Class A common stock outstanding, including 10,000,000 shares issued in the initial public offering, 1,500,000 issued pursuant to the underwriter's option, 6,503 issued under the Company's stock compensation plans and 3,295,590 shares converted from Class B common stock.

The Company had 28,001,256 and 31,349,588 shares of Class B common stock outstanding as of June 30, 2010 and December 31, 2009, respectively.

(6) Earnings per Common Share

Basic earnings per common share is calculated by dividing net income by the weighted average number of common shares outstanding during the period presented. Diluted earnings per common share is calculated by dividing net income by the weighted average number of common shares and potential common shares outstanding during the period.

Table of Contents**FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES****Notes to Unaudited Consolidated Financial Statements***(In thousands, except share and per share data)*

The following table sets forth the computation of basic and diluted earnings per share for the three and six month periods ended June 30, 2010 and 2009.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Net income	\$ 6,659	\$ 13,336	\$ 17,789	\$ 30,024
Less preferred stock dividends	853	853	1,697	1,697
Net income available to common stockholders, basic and diluted	\$ 5,806	\$ 12,483	\$ 16,092	\$ 28,327
Weighted average common shares outstanding	42,620,563	31,389,876	37,133,376	31,393,352
Weighted average common shares issuable upon exercise of stock options and non-vested stock awards	283,433	355,124	269,087	440,640
Weighted average common and common equivalent shares outstanding	42,903,996	31,745,000	37,402,463	31,833,992
Basic earnings per common share	\$ 0.14	\$ 0.40	\$ 0.43	\$ 0.90
Diluted earnings per common share	\$ 0.14	\$ 0.39	\$ 0.43	\$ 0.89

The Company had outstanding options to purchase 2,325,441 and 2,380,371 shares of common stock for the three and six months ended June 30, 2010, respectively, that were not included in the computation of diluted earnings per common share because their effect would be anti-dilutive. The Company had outstanding options to purchase 1,891,552 and 1,304,828 shares of common stock for the three and six months ended June 30, 2009, respectively, that were not included in the computation of diluted earnings per common share because their effect would be anti-dilutive.

(7) Regulatory Capital

The Company is subject to the regulatory capital requirements administered by federal banking regulators and the Federal Reserve. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. Quantitative measures established by regulation to ensure capital adequacy require the Company to maintain minimum amounts and ratios of total and tier 1 capital to risk-weighted assets, and of tier 1 capital to average assets, as defined in the regulations. As of June 30, 2010 and December 31, 2009, the Company exceeded all capital adequacy requirements to which it is subject. The Company's June 30, 2010 capital ratios were positively impacted by the issuance of Class A common stock pursuant to the initial public offering concluded March 29, 2010.

Actual capital amounts and ratios and selected minimum regulatory thresholds for the Company and its bank subsidiary, First Interstate Bank (FIB), as of June 30, 2010 and December 31, 2009 are presented in the following table:

Edgar Filing: FIRST INTERSTATE BANCSYSTEM INC - Form 10-Q

	Actual		Adequately Capitalized		Well Capitalized

(8) Commitments and Contingencies

In the normal course of business, the Company is involved in various claims and litigation. In the opinion of management, following consultation with legal counsel, the ultimate liability or disposition thereof is not expected to have a material adverse effect on the consolidated financial condition, results of operations, or liquidity of the Company.

The Company had commitments under construction contracts of \$298 as of June 30, 2010.

The Company had commitments to purchase held-to-maturity municipal investment securities of \$750 and available-for-sale obligations of U.S. government agencies of \$59,996 as of June 30, 2010.

(9) Financial Instruments with Off-Balance Sheet Risk

The Company is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the commitment contract. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. At June 30, 2010, commitments to extend credit to existing and new borrowers approximated \$1,023,836, which includes \$265,235 on unused credit card lines and \$272,350 with commitment maturities beyond one year.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. At June 30, 2010, the Company had outstanding standby letters of credit of \$80,654. The estimated fair value of the obligation undertaken by the Company in issuing the standby letters of credit is included in other liabilities in the Company's consolidated balance sheet.

(10) Supplemental Disclosures to Consolidated Statement of Cash Flows

The Company transferred loans of \$14,202 and \$26,731 to OREO during the six months ended June 30, 2010 and 2009, respectively.

The Company transferred equipment pending disposal of \$1,513 and \$1,487 to other assets during the six months ended June 30, 2010 and 2009, respectively.

The Company transferred accrued liabilities of \$59 to common stock in conjunction with the vesting of liability-classified non-vested stock awards during the six months ended June 30, 2010.

The Company transferred internally originated mortgage servicing rights of \$1,379 and \$7,358 from loans to mortgage servicing assets during the six months ended June 30, 2010 and 2009, respectively.

Table of Contents**FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES****Notes to Unaudited Consolidated Financial Statements***(In thousands, except share and per share data)***(11) Other Comprehensive Income**

Total other comprehensive income for the six months ended June 30, 2010 and 2009 is reported in the accompanying statements of changes in stockholders' equity. Total other comprehensive income for the three months ended June 30, 2010 and 2009 was \$12,334 and \$11,523, respectively.

Information related to net other comprehensive income is as follows:

For the six months ended June 30,	2010	2009
Other comprehensive income:		
Investment securities available-for-sale:		
Change in net unrealized gain during the period	\$ 11,223	\$ 3,904
Reclassification adjustment for gains included in income	(42)	(52)
Change in the net actuarial loss on defined benefit post-retirement benefit plans	49	(1,226)
Total other comprehensive income	11,230	2,626
Deferred tax expense	4,419	1,033
Net other comprehensive income	\$ 6,811	\$ 1,593

The components of accumulated other comprehensive income, net of income taxes, are as follows:

	June 30, 2010	December 31, 2009
Net unrealized gain on investment securities available-for-sale	\$ 22,853	\$ 16,072
Net actuarial loss on defined benefit post-retirement benefit plans	(967)	(997)
Net accumulated other comprehensive income	\$ 21,886	\$ 15,075

(12) Fair Value Measurements

Financial assets and financial liabilities measured at fair value on a recurring basis are as follows:

Balance	Fair Value Measurements at Reporting Date Using		
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
as of 6/30/2010			

Investment securities available-for-sale:

Edgar Filing: FIRST INTERSTATE BANCSYSTEM INC - Form 10-Q

Obligations of U.S. government agencies	\$ 719,591	\$	\$ 719,591	\$
Residential mortgage-backed securities	779,849		779,849	
Private mortgage-backed securities	1,219		1,219	
Mortgage servicing rights	16,647		16,647	
Derivative liability contract	127			127
	14			

Table of Contents**FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES****Notes to Unaudited Consolidated Financial Statements***(In thousands, except share and per share data)*

	Fair Value Measurements at Reporting Date Using			
	Balance	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
<i>As of December 31, 2009</i>	as of 12/31/2009			
Investment securities available-for-sale:				
Obligations of U.S. government agencies	\$571,446	\$	\$ 571,446	\$
Residential mortgage-backed securities	743,640		743,640	
Private mortgage-backed securities	1,343		1,343	
Mortgage servicing rights	17,746		17,746	
Derivative liability contract	245			245

The following table reconciles the beginning and ending balances of the derivative liability contract measured at fair value on a recurring basis using significant unobservable (Level 3) inputs during the six months ended June 30, 2010 and 2009:

<i>For the Six Months Ended June 30,</i>	2010	2009
Balance, beginning of period	\$ 245	\$
Additions during the period		
Deletions during the period	(118)	
Balance, end of period	\$ 127	

The following methods were used to estimate the fair value of each class of financial instrument above:

Investment Securities Available-for-Sale. The Company obtains fair value measurements for investment securities available-for-sale from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the investment s terms and conditions, among other things.

Mortgage Servicing Rights. Mortgage servicing rights are initially recorded at fair value based on comparable market quotes and are amortized in proportion to and over the period of estimated net servicing income. Mortgage servicing rights are evaluated quarterly for impairment using an independent valuation service. The valuation service utilizes discounted cash flow modeling techniques, which consider observable data that includes market consensus prepayment speeds and the predominant risk characteristics of the underlying loans including loan type, note rate and loan term. Management believes the significant inputs utilized in the valuation model are observable in the market.

Derivative Liability Contract. In conjunction with the sale of all of its Class B shares of Visa, Inc. (Visa) common stock in 2009, the Company entered into a derivative liability contract with the purchaser whereby the Company will make or receive cash payments based on subsequent changes in the conversion rate of the Class B shares into Class A shares of Visa. The conversion rate is dependent upon the resolution of certain litigation involving Visa U.S.A. Inc. card association or its affiliates. The value of the derivative liability contract is estimated based on the Company s

expectations regarding the ultimate resolution of that litigation, which involves a high degree of judgment and subjectivity. On May 28, 2010, Visa disclosed it had provided additional funding to its litigation escrow account thereby reducing the conversion rate of the Class B shares into Class A shares. In conjunction with the change in conversion rate, the Company made a cash payment to the purchaser of \$118, which reduced the fair value of the derivative liability contract to \$127 as of June 30, 2010.

Additionally, from time to time, certain assets are measured at fair value on a non-recurring basis. Adjustments to fair value generally result from the application of lower-of-cost-or-market accounting or write-downs of individual assets due to impairment.

Table of Contents**FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES****Notes to Unaudited Consolidated Financial Statements***(In thousands, except share and per share data)*

The following table presents information about the Company's assets and liabilities measured at fair value on a non-recurring basis.

	Balance as of 6/30/2010	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans	\$ 55,141	\$	\$	\$ 55,141
OREO	13,443			13,443
Long-lived assets to be disposed of by sale	1,513			1,513

	Balance as of 12/31/2009	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans	\$ 41,343	\$	\$	\$ 41,343
OREO	14,515			14,515
Long-lived assets to be disposed of by sale	1,169			1,169

Impaired Loans. Certain impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from collateral. The impaired loans are reported at fair value through specific valuation allowance allocations. In addition, when it is determined that the fair value of an impaired loan is less than the recorded investment in the loan, the carrying value of the loan is adjusted to fair value through a charge to the allowance for loan losses. Collateral values are estimated using inputs based upon observable market data and customized discounting criteria.

OREO. The fair values of OREO are determined by independent appraisals or are estimated using observable market data and customized discounting criteria. Upon initial recognition, write-downs based on the foreclosed asset's fair value at foreclosure are reported through charges to the allowance for loan losses. Periodically, the fair value of foreclosed assets is remeasured with any subsequent write-downs charged to OREO expense in the period in which they are identified.

Long-lived Assets to be Disposed of by Sale. Long-lived assets to be disposed of by sale are carried at the lower of carrying value or fair value less estimated costs to sell. The fair values of long-lived assets to be disposed of by sale are based upon observable market data and customized discounting criteria.

Mortgage Loans Held for Sale. Mortgage loans held for sale are required to be measured at the lower of cost or fair value. The fair value of mortgage loans held for sale is based upon binding contracts or quotes or bids from third party

investors. As of June 30, 2010 and December 31, 2009, all mortgage loans held for sale were recorded at cost. The Company is required to disclose the fair value of financial instruments for which it is practical to estimate fair value. The methodologies for estimating the fair value of financial instruments that are measured at fair value on a recurring or non-recurring basis are discussed above. The methodologies for estimating the fair value of other financial instruments are discussed below. For financial instruments bearing a variable interest rate where no credit risk exists, it is presumed that recorded book values are reasonable estimates of fair value.

Financial Assets. Carrying values of cash, cash equivalents and accrued interest receivable approximate fair values due to the liquid and/or short-term nature of these instruments. Fair values for investment securities held-to-maturity are obtained from an independent pricing service, which considers observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the investment's terms and conditions, among other things. Fair values of fixed rate loans and variable rate loans that reprice on an infrequent basis are estimated by discounting future cash flows using current interest rates at which similar loans with similar terms would be made to borrowers of similar credit quality. Carrying values of variable rate loans that reprice frequently, and with no change in credit risk, approximate the fair values of these instruments.

Table of Contents**FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES****Notes to Unaudited Consolidated Financial Statements***(In thousands, except share and per share data)*

Financial Liabilities. The fair values of demand deposits, savings accounts, securities sold under repurchase agreements and accrued interest payable are the amount payable on demand at the reporting date. The fair values of fixed-maturity certificates of deposit are estimated using external market rates currently offered for deposits with similar remaining maturities. The carrying values of the interest bearing demand notes to the United States Treasury are deemed an approximation of fair values due to the frequent repayment and repricing at market rates. The fair value of the derivative contract was estimated by discounting cash flows using assumptions regarding the expected outcome of related litigation. The floating rate term notes, floating rate subordinated debentures, floating rate subordinated term loan and unsecured demand notes bear interest at floating market rates and, as such, carrying amounts are deemed to approximate fair values. The fair values of notes payable to the FHLB, fixed rate subordinated term debt and capital lease obligation are estimated by discounting future cash flows using current rates for advances with similar characteristics.

Commitments to Extend Credit and Standby Letters of Credit. The fair value of commitments to extend credit and standby letters of credit, based on fees currently charged to enter into similar agreements, is not significant.

A summary of the estimated fair values of financial instruments follows:

	June 30, 2010		December 31, 2009	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial assets:				
Cash and cash equivalents	\$ 502,484	\$ 502,484	\$ 623,482	\$ 623,482
Investment securities available-for-sale	1,500,659	1,500,659	1,316,429	1,316,429

Long-term debt	38,023	41,133	73,353	74,913
Subordinated debentures held by subsidiary trusts	123,715	130,069	123,715	128,802
Total financial liabilities	\$6,445,574	\$6,465,853	\$6,518,518	\$6,533,580

(13) Authoritative Accounting Guidance

FASB ASC Topic 310, Receivables. New authoritative accounting guidance under Accounting Standard Codification (ASC) Topic 310, Receivables, clarifies that modifications of loans that are accounted for within a pool under Subtopic 310-30 do not result in the removal of those loans from the pool even if the modification of those loans would otherwise be considered a troubled debt restructuring. An entity will continue to be required to consider whether the pool of assets in which the loan is included is impaired if expected cash flows for the pool change. This guidance becomes effective prospectively for modifications of loans accounted for within pools under Subtopic 310-30 occurring in the first interim or annual period on or after July 15, 2010 with early application permitted. The adoption of this new authoritative guidance under ASC Topic 310 is not expected to have a material impact on the Company s consolidated financial statements, results of operations or liquidity.

Table of Contents**FIRST INTERSTATE BANCSYSTEM, INC. AND SUBSIDIARIES****Notes to Unaudited Consolidated Financial Statements***(In thousands, except share and per share data)*

Additional new authoritative accounting guidance (Accounting Standards Update (ASU) No. 2010-20) under ASC Topic 310, Receivables, requires significant new disclosures about the allowance for credit losses and the credit quality of financing receivables. The requirements are intended to enhance transparency regarding credit losses and the credit quality of loan and lease receivables. Under this statement, allowance for credit losses and fair value are to be disclosed by portfolio segment, while credit quality information, impaired financing receivables and non-accrual status are to be presented by class of financing receivable. Disclosure of the nature and extent, the financial impact and segment information of troubled debt restructurings will also be required. The disclosures are to be presented at the level of disaggregation that management uses when assessing and monitoring the portfolio's risk and performance. This ASU is effective for interim and annual reporting periods after December 15, 2010. The Company will include these disclosures in the notes to the financial statements beginning December 31, 2010.

FASB ASC Topic 855, Subsequent Events. New authoritative accounting guidance under ASC Topic 855,

Subsequent Events, amends prior guidance. Under this amended guidance, SEC filers are no longer required to disclose the date through which subsequent events have been evaluated in originally issued and revised financial statements. This guidance became effective immediately and the Company adopted these new requirements for the period ended March 31, 2010.

FASB ASC Topic 810, Consolidation. Authoritative accounting guidance under ASC Topic 810, Consolidation, amends prior guidance to change how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. The new authoritative accounting guidance requires additional disclosures about the reporting entity's involvement with variable-interest entities and any significant changes in risk exposure due to that involvement as well as its affect on the entity's financial statements. The new authoritative accounting guidance under ASC Topic 810 became effective for the Company's financial statements for periods ending after January 1, 2010. The adoption of this authoritative guidance did not have a significant impact on the Company's consolidated financial statements, results of operations or liquidity.

FASB ASC Topic 820, Fair Value Measurements and Disclosures. New authoritative accounting guidance (ASU No. 2010-06) under ASC Topic 820 requires a reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers; and, present separately information about purchases, sales, issuances and settlements in the reconciliation for fair value measurements using Level 3 inputs. In addition, ASU No. 2010-06 clarifies that reporting entities must use judgment in determining the appropriate classes of assets and liabilities for purposes of reporting fair value measurements and disclose valuation techniques and inputs used to measure both recurring and nonrecurring fair value measurements. ASU No. 2010-06 became effective for the Company on January 1, 2010, except for disclosures about purchases, sales, issuances and settlements in the reconciliation for fair value measurements using Level 3 inputs. Those disclosures are effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. The adoption of this new authoritative guidance under ASC Topic 820 did not and is expected not to have a material impact on the Company's consolidated financial statements, results of operations or liquidity.

FASB ASC Topic 860, Transfers and Servicing. New authoritative accounting guidance (ASU No. 2009-16) under ASC Topic 860, Transfers and Servicing, amends prior accounting guidance to enhance reporting about transfers of financial assets, including securitizations, and where companies have continuing exposure to the risks related to transferred financial assets. The new authoritative accounting guidance eliminates the concept of a qualifying special-purpose entity and changes the requirements for derecognizing financial assets. The new authoritative accounting guidance also requires additional disclosures about all continuing involvements with transferred financial assets including information about gains and losses resulting from transfers during the period. The new authoritative accounting guidance under ASC Topic 860, which became effective for the Company on January 1, 2010, did not

have a significant impact on the Company's consolidated financial statements, results of operations or liquidity.

(14) Subsequent Events

Subsequent events have been evaluated for potential recognition and disclosure through the date financial statements were filed with the Securities and Exchange Commission. No events requiring disclosure were identified.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2009, including the audited financial statements contained therein, filed with the SEC.

When we refer to we, our, and us in this report, we mean First Interstate BancSystem, Inc. and our consolidated subsidiaries, unless the context indicates that we refer only to the parent company, First Interstate BancSystem, Inc.

Cautionary Note Regarding Forward-Looking Statements and Factors that Could Affect Future Results

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Rule 175 promulgated thereunder, and Section 21E of the Securities Exchange Act of 1934, as amended, and Rule 3b-6 promulgated thereunder, that involve inherent risks and uncertainties. Any statements about our plans, objectives, expectations, strategies, beliefs, or future performance or events constitute forward-looking statements. Such statements are identified as those that include words or phrases such as believes, expects, anticipates, plans, trend, objective, continue or similar expressions or future or conditional verbs such as will, would, should, could, might, may or similar expressions. Forward-looking statements involve known and unknown risks, uncertainties, assumptions, estimates and other important factors that could cause actual results to differ materially from any results, performance or events expressed or implied by such forward-looking statements. The following factors, among others, may cause actual results to differ materially from current expectations in the forward-looking statements, including those set forth in this report:

- credit losses;
- concentrations of real estate loans;
- economic and market developments, including inflation;
- commercial loan risk;
- adequacy of the allowance for loan losses;
- impairment of goodwill;
- changes in interest rates;
- access to low-cost funding sources;
- increases in deposit insurance premiums;
- inability to grow business;
- adverse economic conditions affecting Montana, Wyoming and western South Dakota;
- governmental regulation and changes in regulatory, tax and accounting rules and interpretations;
- changes in or noncompliance with governmental regulations;
- effects of recent legislative and regulatory efforts to stabilize financial markets;
- dependence on the Company's management team;

ability to attract and retain qualified employees;

failure of technology;

disruption of vital infrastructure and other business interruptions;

illiquidity in the credit markets;

inability to meet liquidity requirements;

lack of acquisition candidates;

failure to manage growth;

competition;

inability to manage risks in turbulent and dynamic market conditions;

ineffective internal operational controls;

environmental remediation and other costs;

failure to effectively implement technology-driven products and services;

litigation pertaining to fiduciary responsibilities;

capital required to support the Company's bank subsidiary;

soundness of other financial institutions;

impact of Basel II capital standards;

inability of our bank subsidiary to pay dividends;

change in dividend policy;

lack of public market for our common stock;

volatility of Class A common stock;

voting control;

decline in market price of Class A common stock;

dilution as a result of future equity issuances;

use of net proceeds;

Table of Contents

uninsured nature of any investment in Class A common stock;

anti-takeover provisions;

intent to qualify as a controlled company; and

subordination of common stock to Company debt.

A more detailed discussion of each of the foregoing risks is included in our most recently filed prospectus dated March 23, 2010, filed March 24, 2010. These factors and the other risk factors described in our periodic and current reports filed with the SEC from time to time, however, are not necessarily all of the important factors that could cause our actual results, performance or achievements to differ materially from those expressed in or implied by any of our forward-looking statements. Other unknown or unpredictable factors also could harm our results. Investors and others are encouraged to read the more detailed discussion of our risks contained in our most recently filed prospectus, which discussion is incorporated herein by reference.

All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements set forth above. Forward-looking statements speak only as of the date they are made and we do not undertake or assume any obligation to update publicly any of these statements to reflect actual results, new information or future events, changes in assumptions or changes in other factors affecting forward-looking statements, except to the extent required by applicable laws. If we update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements.

Executive Overview

We are a financial and bank holding company headquartered in Billings, Montana. As of June 30, 2010, we had consolidated assets of \$7,225 million, deposits of \$5,802 million, loans of \$4,562 million and total stockholders' equity of \$740 million. We currently operate 72 banking offices in 42 communities located in Montana, Wyoming and western South Dakota. Through our bank subsidiary, First Interstate Bank, or the Bank, we deliver a comprehensive range of banking products and services to individuals, businesses, municipalities and other entities throughout our market areas. Our customers participate in a wide variety of industries, including energy, healthcare and professional services, education and governmental services, construction, mining, agriculture, retail and wholesale trade and tourism.

Our principal business activity is lending to and accepting deposits from individuals, businesses, municipalities and other entities. We derive our income principally from interest charged on loans and, to a lesser extent, from interest and dividends earned on investments. We also derive income from non-interest sources such as fees received in connection with various lending and deposit services; trust, employee benefit, investment and insurance services; mortgage loan originations, sales and servicing; merchant and electronic banking services; and from time to time, gains on sales of assets. Our principal expenses include interest expense on deposits and borrowings, operating expenses, provisions for loan losses and income tax expense.

Our loan portfolio consists of a mix of real estate, consumer, commercial, agricultural and other loans, including fixed and variable rate loans. Our real estate loans comprise commercial real estate, construction (including residential, commercial and land development loans), residential, agricultural and other real estate loans. Fluctuations in the loan portfolio are directly related to the economies of the communities we serve. While each loan originated generally must meet minimum underwriting standards established in our credit policies, lending officers are granted discretion within pre-approved limits in approving and pricing loans to assure that the banking offices are responsive to competitive issues and community needs in each market area. Loans exceeding the pre-approved lending limits of our lending officers are subject to additional review and approval by management. We fund our loan portfolio primarily with the core deposits from our customers, generally without utilizing brokered deposits and with minimal reliance on wholesale funding sources.

On March 5, 2010, our shareholders approved proposals to recapitalize our existing common stock. The recapitalization included a redesignation of existing common stock as Class B common stock with five votes per share, convertible into Class A common stock on a share for share basis; a four-for-one stock split of the Class B

common stock; an increase in the authorized number of Class B common shares from 20,000,000 to 100,000,000; and the creation of a new class of common stock designated as Class A common stock, with one vote per share, with 100,000,000 shares authorized. The Class A common stock and Class B common stock are collectively referred to as common stock in this report. All share and per share information included in this report has been adjusted to give effect to the recapitalization of the common stock, including the four-for-one stock split of Class B common stock, as if the recapitalization had occurred on January 1, 2009, the earliest date presented.

Table of Contents

On March 29, 2010, we concluded our initial public offering, or IPO, of 10,000,000 shares of Class A common stock, and an additional 1,500,000 shares of Class A common stock pursuant to the full exercise of the underwriters option to purchase Class A common shares in the offering. We received net proceeds of \$153 million from the sale of the shares, after deducting the underwriting discount, commissions and other offering expenses.

Primary Factors Used in Evaluating Our Business

As a banking institution, we manage and evaluate various aspects of both our financial condition and our results of operations. We monitor our financial condition and performance on a monthly basis, at our holding company, at the Bank and at each banking office. We evaluate the levels and trends of the line items included in our balance sheet and statements of income, as well as various financial ratios that are commonly used in our industry. We analyze these ratios and financial trends against both our own historical levels and the financial condition and performance of comparable banking institutions in our region and nationally.

Results of Operations

Principal factors used in managing and evaluating our results of operations include net interest income, non-interest income, non-interest expense and net income.

Net interest income. Net interest income, the largest source of our operating income, is derived from interest, dividends and fees received on interest earning assets, less interest expense incurred on interest bearing liabilities. Interest earning assets primarily include loans and investment securities. Interest bearing liabilities include deposits and various forms of indebtedness. Net interest income is affected by the level of interest rates, changes in interest rates and changes in the composition of interest earning assets and interest bearing liabilities. The most significant impact on our net interest income between periods is derived from the interaction of changes in the rates earned or paid on interest earning assets and interest bearing liabilities, which we refer to as interest rate spread. The volume of loans, investment securities and other interest earning assets, compared to the volume of interest bearing deposits and indebtedness, combined with the interest rate spread, produces changes in our net interest income between periods. Non-interest bearing sources of funds, such as demand deposits and stockholders' equity, also support earning assets. The impact of free funding sources is captured in the net interest margin, which is calculated as net interest income divided by average earning assets. Given the interest free nature of free funding sources, the net interest margin is generally higher than the interest rate spread. We seek to increase our net interest income over time, and we evaluate our net interest income on factors that include the yields on our loans and other earning assets, the costs of our deposits and other funding sources, the levels of our net interest spread and net interest margin and the provisions for loan losses required to maintain our allowance for loan losses at an adequate level.

Non-interest income. Our principal sources of non-interest income include (1) income from the origination and sale of loans, (2) other service charges, commissions and fees, (3) service charges on deposit accounts, (4) wealth management revenues and (5) other income. Income from the origination and sale of loans includes origination and processing fees on residential real estate loans held for sale and gains on residential real estate loans sold to third parties. Fluctuations in market interest rates have a significant impact on revenues generated from the origination and sale of loans. Higher interest rates can reduce the demand for home loans and loans to refinance existing mortgages. Conversely, lower interest rates generally stimulate refinancing and home loan origination. Other service charges, commissions and fees primarily include debit and credit card interchange income, mortgage servicing fees, insurance and other commissions and ATM service charge revenues. Wealth management revenues principally comprises fees earned for management of trust assets and investment services revenues. Other income primarily includes company-owned life insurance revenues, check printing income, agency stock dividends and gains on sales of miscellaneous assets. We seek to increase our non-interest income over time, and we evaluate our non-interest income relative to the trends of the individual types of non-interest income in view of prevailing market conditions.

Non-interest expense. Non-interest expenses include (1) salaries, wages and employee benefits expense, (2) occupancy expense, (3) furniture and equipment expense, (4) Federal Deposit Insurance Corporation, or FDIC, insurance premiums, (5) outsourced technology services expense, (6) impairment of mortgage servicing rights, (7) other real estate owned, or OREO, expense, (8) core deposit intangibles and (9) other expenses, which primarily includes professional fees; advertising and public relations costs; office supply, postage, freight, telephone and travel expenses; donations expense; debit and credit card expenses; board of director fees; and other losses. OREO expense

is recorded net of OREO income. Variations in net OREO expense between periods is primarily due to write-downs of the estimated fair value of OREO properties, fluctuations in gains and losses recorded on sales of OREO properties, fluctuations in the number of OREO properties held and the carrying costs and/or operating expenses associated with those properties. We seek to manage our non-interest expenses in consideration of the growth of our business and our community banking model that emphasizes customer service and responsiveness. We evaluate our non-interest expense on factors that include our non-interest expense relative to our average assets, our efficiency ratio and the trends of the individual categories of non-interest expense.

Net Income. We seek to increase our net income and provide favorable stockholder returns over time, and we evaluate our net income relative to the performance of other banks and bank holding companies on factors that include return on average assets, return on average equity and consistency and rates of growth in our earnings.

Table of Contents*Financial Condition*

Principal areas of focus in managing and evaluating our financial condition include liquidity, the diversification and quality of our loans, the adequacy of our allowance for loan losses, the diversification and terms of our deposits and other funding sources, the re-pricing characteristics and maturities of our assets and liabilities, including potential interest rate exposure and the adequacy of our capital levels. We seek to maintain sufficient levels of cash and investment securities to meet potential payment and funding obligations, and we evaluate our liquidity on factors that include the levels of cash and highly liquid assets relative to our liabilities, the quality and maturities of our investment securities, our ratio of loans to deposits and our reliance on brokered certificates of deposit or other wholesale funding sources.

We seek to maintain a diverse and high quality loan portfolio, and we evaluate our asset quality on factors that include the allocation of our loans among loan types, credit exposure to any single borrower or industry type, non-performing assets as a percentage of total loans and OREO, and loan charge-offs as a percentage of average loans. We seek to maintain our allowance for loan losses at a level adequate to absorb potential losses inherent in our loan portfolio at each balance sheet date, and we evaluate the level of our allowance for loan losses relative to our overall loan portfolio and the level of non-performing loans and potential charge-offs.

We seek to fund our assets primarily using core customer deposits spread among various deposit categories, and we evaluate our deposit and funding mix on factors that include the allocation of our deposits among deposit types, the level of our non-interest bearing deposits, the ratio of our core deposits (i.e. excluding time deposits above \$100,000) to our total deposits and our reliance on brokered deposits or other wholesale funding sources, such as borrowings from other banks or agencies. We seek to manage the mix, maturities and re-pricing characteristics of our assets and liabilities to maintain relative stability of our net interest rate margin in a changing interest rate environment, and we evaluate our asset-liability management using complex models to evaluate the changes to our net interest income under different interest rate scenarios.

Finally, we seek to maintain adequate capital levels to absorb unforeseen operating losses and to help support the growth of our balance sheet. We evaluate our capital adequacy using the regulatory and financial capital ratios including leverage capital ratio, tier 1 risk-based capital ratio, total risk-based capital ratio, tangible common equity to tangible assets and tier 1 common capital to total risk-weighted assets.

Trends and Developments

Our success is highly dependent on economic conditions and market interest rates. Because we operate in Montana, Wyoming and western South Dakota, the local economic conditions in each of these areas are particularly important. Most of our local economies have not been impacted as severely by the national economic and real estate downturn, sub-prime mortgage crisis and ongoing financial market turbulence as many areas of the United States. The continuing impact of the national recession and related real estate and financial market conditions is uncertain and could have a material negative effect on our cash flows, results of operations, financial condition and prospects.

Capital Resources

On March 5, 2010, our shareholders approved proposals to recapitalize our existing common stock. The recapitalization included a redesignation of existing common stock as Class B common stock with five votes per share, convertible into Class A common stock on a share for share basis; a four-for-one stock split of the Class B common stock; an increase in the authorized number of Class B common shares from 20,000,000 to 100,000,000; and the creation of a new class of common stock designated as Class A common stock, with one vote per share, with 100,000,000 shares authorized.

On March 29, 2010, we concluded our IPO of 10,000,000 shares of Class A common stock, and an additional 1,500,000 shares of Class A common stock pursuant to the full exercise of the underwriters' option to purchase Class A common shares in the offering. We received net proceeds of \$153 million from the offering, after deducting the underwriting discount, commissions and other offering expenses.

Table of Contents*Asset Quality*

Challenging economic conditions continue to have a negative impact on businesses and consumers in some of our market areas. General declines in the real estate and housing markets resulted in continued deterioration in the credit quality of our loan portfolio, which is reflected by increases in non-performing and internally risk classified loans. Our non-performing assets increased to \$200 million, or 4.35% of total loans and OREO, as of June 30, 2010, from \$163 million, or 3.57% of total loans and OREO, as of December 31, 2009. Loan charge-offs, net of recoveries, totaled \$11.5 million and \$20.1 million during the three and six months ended June 30, 2010, respectively, compared to \$5.5 million and \$10.2 million during the same respective periods in 2009, with all major loan categories reflecting increases. Based on our assessment of the adequacy of our allowance for loan losses, we recorded provisions for loan losses of \$19.5 million and \$31.4 million during the three and six months ended June, 30, 2010, respectively, compared to \$11.7 million and \$21.3 million during the same respective periods in 2009. Increased provisions for loan losses reflect our estimation of the effect of current economic conditions on our loan portfolio. During the first six months of 2010, we have continued to experience elevated provisions for loan losses and higher levels of non-performing assets, which will continue to affect our earnings. Given the current economic conditions and trends, management believes we will continue to experience higher levels of non-performing loans in future quarters, which will likely have an adverse impact on our business, financial condition, results of operations and prospects.

Dodd-Frank Wall Street Reform and Consumer Protection Act

On July 21, 2010 the Dodd-Frank Wall Street Reform and Consumer Protection Act, or the Act, was signed into legislation. The Act dramatically rewrites the rules governing financial service providers and products, and implementation of the Act will require new mandatory and discretionary rulemakings by numerous Federal regulatory agencies over the next several years. Key provisions of the Act include, among other things, (i) a new risk-based approach to financial services regulation giving Federal bank regulatory agencies new authority to monitor the systemic safety of the financial system, take proactive steps to reduce or eliminate risks, impose strict controls on large bank holding companies and significant non-bank financial companies and take direct control of troubled financial companies; (ii) new regulation of systemically risky institutions by putting into place several new entities and a statutory liquidation process; (iii) increased bank supervision through establishment of the equivalent of a prompt corrective action program for large bank holding companies, requiring capital requirements for holding companies that are at least as strict as capital requirement for depository institutions and direction to Federal bank regulators to develop specific capital requirements for holding companies and depository institutions that address activities that pose risk to the financial system; (iv) establishment of a new independent Federal regulatory body for consumer protection known as the Bureau of Consumer Financial Protection that will assume responsibility for most consumer protection laws; and, (v) placement of certain restrictions on investment and other activities by depository institutions, holding companies and affiliates including significant increases in the regulation of mortgage lending and servicing by banks and non-banks.

We are currently evaluating the potential impact of the Act on our business, financial condition and results of operations and expect that some provisions of the Act may have adverse effects on us, such as the cost of complying with the numerous new regulations and reporting requirements mandated by the Act, a potential increase in competition for deposits resulting from the rise in cost of funding using non-deposit liabilities which will now be subject to Federal Deposit Insurance Corporation, or FDIC, assessments and the potential loss of interchange fee income from debit and credit card transactions.

Temporary Liquidity Guarantee Program

In April 2010, the FDIC approved an interim rule that extends the Transaction Account Guarantee (TAG) component of the Temporary Liquidity Guarantee Program. The TAG program provides full FDIC insurance coverage for non-interest bearing transaction deposit accounts, certain Negotiable Order of Withdrawal (NOW) accounts and Interest on Lawyers Trust accounts. Participants in the TAG program had a one-time, irrevocable opportunity to opt out of the TAG extension by notifying the FDIC by April 30, 2010. We opted out of the TAG extension effective July 1, 2010.

Critical Accounting Estimates and Significant Accounting Policies

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States and follow general practices within the industries in which we operate. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. The most significant accounting policies we follow are presented in Note 1 of the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2009.

Table of Contents

Our critical accounting estimates are summarized below. Management considers an accounting estimate to be critical if: (1) the accounting estimate requires management to make particularly difficult, subjective and/or complex judgments about matters that are inherently uncertain and (2) changes in the estimate that are reasonably likely to occur from period to period, or the use of different estimates that management could have reasonably used in the current period, would have a material impact on our consolidated financial statements, results of operations or liquidity.

Allowance for Loan Losses

The provision for loan losses creates an allowance for loan losses known and inherent in the loan portfolio at each balance sheet date. The allowance for loan losses represents management's estimate of probable credit losses inherent in the loan portfolio.

We perform a quarterly assessment of the risks inherent in our loan portfolio, as well as a detailed review of each significant asset with identified weaknesses. Based on this analysis, we record a provision for loan losses in order to maintain the allowance for loan losses at appropriate levels. In determining the allowance for loan losses, we estimate losses on specific loans, or groups of loans, where the probable loss can be identified and reasonably determined. Determining the amount of the allowance for loan losses is considered a critical accounting estimate because it requires significant judgment and the use of subjective measurements, including management's assessment of the internal risk classifications of loans, historical loan loss rates, changes in the nature of the loan portfolio, overall portfolio quality, industry concentrations, delinquency trends and the impact of current local, regional and national economic factors on the quality of the loan portfolio. Changes in these estimates and assumptions are possible and may have a material impact on our allowance, and therefore our consolidated financial statements, liquidity or results of operations. The allowance for loan losses is maintained at an amount we believe is sufficient to provide for estimated losses inherent in our loan portfolio at each balance sheet date, and fluctuations in the provision for loan losses result from management's assessment of the adequacy of the allowance for loan losses. Management monitors qualitative and quantitative trends in the loan portfolio, including changes in the levels of past due, internally classified and non-performing loans. Note 1 of the Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2009 describes the methodology used to determine the allowance for loan losses. A discussion of the factors driving changes in the amount of the allowance for loan losses is included herein under the heading *Asset Quality*.

Goodwill

The excess purchase price over the fair value of net assets from acquisitions, or goodwill, is evaluated for impairment at least annually and on an interim basis if an event or circumstance indicates that it is likely an impairment has occurred. In testing for impairment, the fair value of net assets is estimated based on an analysis of our market value. Determining the fair value of goodwill is considered a critical accounting estimate because of its sensitivity to market-based trading of our Class A common stock. In addition, any allocation of the fair value of goodwill to assets and liabilities requires significant management judgment and the use of subjective measurements. Variability in the market and changes in assumptions or subjective measurements used to allocate fair value are reasonably possible and may have a material impact on our consolidated financial statements, liquidity or results of operations. Note 1 of the Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2009 describes our accounting policy with regard to goodwill.

Valuation of Mortgage Servicing Rights

We recognize as assets the rights to service mortgage loans for others, whether acquired or internally originated. Mortgage servicing rights are carried on the consolidated balance sheet at the lower of amortized cost or fair value. We utilize the expertise of a third-party consultant to estimate the fair value of our mortgage servicing rights quarterly. In evaluating the mortgage servicing rights, the consultant uses discounted cash flow modeling techniques, which require estimates regarding the amount and timing of expected future cash flows, including assumptions about loan repayment rates based on current industry expectations, costs to service, predominant risk characteristics of the underlying loans as well as interest rate assumptions that contemplate the risk involved. During a period of declining interest rates, the fair value of mortgage servicing rights is expected to decline due to anticipated prepayments within the portfolio. Alternatively, during a period of rising interest rates, the fair value of mortgage servicing rights is

expected to increase because prepayments of the underlying loans would be anticipated to decline. Impairment adjustments are recorded through a valuation allowance. The valuation allowance is adjusted for changes in impairment through a charge to current period earnings. Management believes the valuation techniques and assumptions used by the consultant are reasonable.

Table of Contents

Determining the fair value of mortgage servicing rights is considered a critical accounting estimate because of the assets' sensitivity to changes in estimates and assumptions used, particularly loan prepayment speeds and discount rates. Changes in these estimates and assumptions are reasonably possible and may have a material impact on our consolidated financial statements, liquidity or results of operations. Notes 1 and 8 of the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2009 describe the methodology we use to determine fair value of mortgage servicing rights.

OREO

Real estate acquired in satisfaction of loans is initially carried at current fair value less estimated selling costs. The value of the underlying loan is written down to the fair value of the real estate acquired by charge to the allowance for loan losses, if necessary, at or within 90 days of foreclosure. Subsequent declines in fair value less estimated selling costs are included in OREO expense. Subsequent increases in fair value less estimated selling costs are recorded as a reduction in OREO expense to the extent of recognized losses. Carrying costs, operating expenses, net of related income, and gains or losses on sales are included in OREO expense. Note 1 of the Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2009 describes our accounting policy with regard to OREO.

Results of Operations

The following discussion and analysis is intended to provide greater details of the results of our operations and financial condition.

Net Interest Income. Deposit growth combined with corresponding increases in interest earning assets and stable market interest rates resulted in increases in net interest income, on a fully taxable equivalent, or FTE basis. Our FTE net interest income increased \$3.9 million, or 6.4%, to \$64.3 million for the three months ended June 30, 2010, as compared to \$60.4 million for the same period in 2009 and increased \$6.4 million, or 5.3%, to \$127.1 million for the six months ended June 30, 2010, as compared to \$120.8 million for the same period in 2009.

Despite increases in our FTE net interest income, our FTE net interest margin decreased 8 basis points to 3.96% for the three months ended June 30, 2010, from 4.04% during the same period in the prior year and decreased 10 basis points to 3.98% for the six months ended June 30, 2010, from 4.08% during the same period in the prior year. Compression in our FTE net interest margin ratio during the first half and second quarter of 2010, as compared to the first half and second quarter of 2009, is largely due to a shift in the mix of interest earning assets from higher-yielding loans to lower-yielding investments.

Table of Contents

The following table presents, for the periods indicated, condensed average balance sheet information, together with interest income and yields earned on average interest earning assets and interest expense and rates paid on average interest bearing liabilities.

Average Balance Sheets, Yields and Rates*(Dollars in thousands)*

	Average Balance	Three Months Ended June 30,		Average Balance	Average Rate	
		2010 Interest	2009 Interest			
<i>Interest earning assets:</i>						
Loans (1)(2)	\$ 4,520,119	\$ 67,964	6.03%	\$ 4,693,750	\$ 70,116	5.99%
Investment securities (2)	1,586,080	12,780	3.23	1,030,885	12,119	4.72
Interest bearing deposits in banks	407,656	257	0.25	126,041	88	0.28
Federal funds sold	4,408	5	0.45	145,360	79	0.22
Total interest earning assets	6,518,263	81,006	4.98%	5,996,036	82,402	5.51%
Non earning assets	679,514			689,942		
Total assets	\$ 7,197,777			\$ 6,685,978		
<i>Interest bearing liabilities:</i>						
Demand deposits	\$ 1,116,216	\$ 870	0.31%	\$ 1,087,671	\$ 1,072	0.40%

(1) Average loan balances include non-accrual loans. Interest income on loans includes amortization of deferred loan fees net of deferred loan costs, which is not material.

(2) Interest income and average rates for tax exempt loans and securities are presented on a FTE basis.

(3) Includes interest on federal funds purchased and other borrowed funds. Excludes long-term debt.

(4) Net FTE interest margin during the period equals (i) the difference between interest income on interest earning assets and the interest expense on interest bearing

liabilities,
divided by
(ii) average
interest earning
assets for the
period.

Table of Contents

The table below sets forth, for the periods indicated, a summary of the changes in interest income and interest expense resulting from estimated changes in average asset and liability balances (volume) and estimated changes in average interest rates (rate). Changes which are not due solely to volume or rate have been allocated to these categories based on the respective percent changes in average volume and average rate as they compare to each other.

Analysis of Interest Changes Due To Volume and Rates

(Dollars in thousands)

(2) Includes interest on Federal funds purchased and other

borrowed funds.
Excludes
long-term debt.

Provision for Loan Losses. The provision for loan losses was \$19.5 million for second quarter 2010, as compared to \$11.9 million during first quarter 2010 and \$11.7 million for second quarter 2009. The provision for loan losses increased \$10.1 million, or 47.4%, to \$31.4 million for the six months ended June 30, 2010, compared to \$21.3 million for the same period in 2009. Fluctuations in provisions for loan losses reflect management's estimate of the estimated effects of current economic conditions on our loan portfolio. Ongoing stress from weakening economic conditions continues to negatively impact the performance of many of our real estate loans. For information regarding our non-performing loans, see *Non-Performing Assets* included herein.

Non-interest Income. Our principal sources of non-interest income include other service charges, commissions and fees; service charges on deposit accounts; income from the origination and sale of loans; and, revenues from wealth management. Non-interest income decreased \$6.2 million, or 22.8%, to \$21.0 million for the three months ended June 30, 2010, as compared to \$27.3 million for the same period in 2009. Non-interest income decreased \$12.9 million, or 24.2%, to \$40.5 million for the six months ended June 30, 2010, as compared to \$53.5 million for the same period in 2009. Significant components of these decreases are discussed below.

Other service charges, commissions and fees primarily include debit and credit card interchange income, mortgage servicing fees, insurance and other commissions and ATM service charge revenues. Other service charges, commissions and fees increased \$764 thousand, or 11.5%, to \$7.4 million during the three months ended June 30, 2010, as compared to \$6.6 million during the same period in 2009 and \$685 thousand, or 5.0%, to \$14.3 million for the six months ended June 30, 2010, as compared to \$13.6 million for the same period in 2009. These increases were primarily due to additional fee income from higher volumes of debit card transactions. Interchange fee income from debit and credit card transactions totaled \$4.2 million and \$8.0 million during the three and six months ended June 30, 2010, respectively, as compared to \$4.0 million and \$7.4 million during the three and six months ended June 30, 2009, respectively.

Table of Contents

Service charges on deposit accounts decreased \$312 thousand, or 6.2%, to \$4.8 million during the three months ended June 30, 2010, as compared to \$5.1 during the same period in 2009 and \$492 thousand, or 5.0%, to \$9.4 million during the six months ended June 30, 2010, as compared to \$9.8 million during the same period in 2009, primarily due to decreases in the number of overdraft fees assessed. In November 2009, the Federal Reserve Board issued a final rule that, effective July 1, 2010, prohibits financial institutions from charging consumers fees for paying overdrafts on automated teller machine and one-time debit card transactions, unless the consumer consents, or opts in, to the overdraft service for those types of transactions. Management does not expect this rule will have a significant impact because we generally do not assess overdraft fees on automated teller machine and one-time debit card transactions. However, we cannot provide any assurances as to the ultimate impact of this rule on the amount of overdraft fees recorded in future periods.

Income from the origination and sale of loans includes origination and processing fees on residential real estate loans held for sale and gains on residential real estate loans sold to third parties. Income from the origination and sale of loans decreased \$6.2 million, or 59.6%, to \$4.2 million for the three months ended June 30, 2010, as compared to \$10.4 million for the same period in 2009 and decreased \$13.1 million, or 63.6%, to \$7.5 million for the six months ended June 30, 2010, as compared to \$20.6 million for the same period in 2009. With long-term interest rates remaining relatively low since late 2008, refinancing activity has declined substantially. Refinancing activity accounted for approximately 41% of our residential real estate loan originations during the first six months of 2010, as compared to approximately 82% during the same period in 2009. Lower income due to declines in refinancing activity was partially offset by income from the origination of loans for new home purchases, which increased approximately 21% during the first six months of 2010, as compared to the same period in 2009. Income from the origination and sale of loans is expected to continue to remain below levels reported in 2009.

Income from the origination and sale of loans increased \$886 thousand, or 26.8%, to \$4.2 million during second quarter 2010, as compared to \$3.3 million during the first quarter of 2010, primarily due to seasonal fluctuations in new home purchases combined with an increase in closings on new home loans due to the expected June 30, 2010 expiration of tax incentives for first time homebuyers.

Wealth management revenues are comprised principally of fees earned for management of trust assets and investment services revenues. Fees earned for management of trust assets are generally based on the market value of assets managed. Wealth management revenues increased \$536 thousand, or 20.1%, to \$3.2 million for the three months ended June 30, 2010, as compared to \$2.7 million for the same period in 2009. Wealth management revenues increased \$1.0 million, or 19.8%, to \$6.2 million for the six months ended June 30, 2010, as compared to \$5.2 million for the same period in 2009. Quarter and year-to-date increases were principally due to higher trust management fees resulting from the introduction of revised fee schedules in April 2009, the addition of new trust customers and increases in the market values of new and existing assets under trust management.

Other income decreased \$1.1 million, or 41.3%, to \$1.5 million for the three months ended June 30, 2010, compared to \$2.6 million for the same period in 2009, and decreased \$1.0 million, or 24.5%, to \$3.2 million for the six months ended June 30, 2010, compared to \$4.2 million for the same period in 2009. Quarter and year-to-date decreases are primarily due to lower earnings on securities held in trust under deferred compensation plans.

Non-interest Expense. Non-interest expense increased \$689 thousand, or 1.3%, to \$55.4 million for the three months ended June 30, 2010, as compared to \$54.7 million for the same period in 2009. Non-interest expense increased \$3.0 million, or 2.8%, to \$108.2 million for the six months ended June 30, 2010, as compared to \$105.2 million for the same period in 2009. Significant components of the increase are discussed below.

Furniture and equipment expense increased \$345 thousand, or 11.5%, to \$3.4 million for the three months ended June 30, 2010, as compared to \$3.0 million for the same period in 2009. Furniture and equipment expense increased \$674 thousand, or 11.2%, to \$6.7 million for the six months ended June 30, 2010, as compared to \$6.0 million for the same period in 2009. The increases are primarily due to higher depreciation and maintenance expenses resulting from the addition of a new operations building and branch banking office during fourth quarter 2009.

FDIC insurance premiums decreased \$2.9 million, or 51.8%, to \$2.7 million for the three months ended June 30, 2010, compared to \$5.5 million for the same period in 2009. FDIC insurance premiums decreased

\$2.2 million, or 30.4%, to \$5.1 million for the six months ended June 30, 2010, compared to \$7.4 million for the same period in 2009. Current year decreases, as compared to the prior year, were due to a special FDIC insurance assessment levied during second quarter 2009. The special assessment, which was applicable to all insured depository institutions, resulted in additional FDIC insurance expense of \$3.1 million during second quarter 2009. Current year decreases were partially offset by increases in fee assessment rates. We expect FDIC insurance premiums to remain at high levels for the foreseeable future.

Table of Contents

Outsourced technology services expense decreased \$834 thousand, or 25.4%, to \$2.4 million for the three months ended June 30, 2010, compared to \$3.3 million for the same period in 2009. Outsourced technology services expense decreased \$1.3 million, or 21.1%, to \$4.7 million for the six months ended June 30, 2010, compared to \$6.0 million for the same period in 2009. On December 31, 2008, we sold our technology services subsidiary and entered into a service contract with the purchaser to receive technology services. First and second quarter 2009 outsourced technology services expense accruals were estimated resulting in an over-accrual of expense during these periods. The over-accrual was adjusted during third quarter 2009.

Mortgage servicing rights are amortized in proportion to and over the period of estimated net servicing income. Changes in estimated servicing period and growth in the serviced loan portfolio cause amortization expense to vary between periods. The period of estimated net servicing income is significantly influenced by market interest rates and refinancing activity. We determine our amortization of mortgage servicing rights based on prepayment assumptions on the first day of each quarter. During the first half of 2010, as compared to the first half of 2009, the estimated period over which we expect to receive servicing income increased resulting in a decrease in amortization taken during the period. Mortgage servicing rights amortization decreased \$1.0 million, or 48.0%, to \$1.1 million for the three months ended June 30, 2010, as compared to \$2.1 million for the same period in 2009. Mortgage servicing rights amortization decreased \$2.8 million, or 55.6%, to \$2.2 million for the six months ended June 30, 2010, as compared to \$5.1 million for the same period in 2009.

Mortgage servicing rights are evaluated quarterly for impairment based on the fair value of the mortgage servicing rights. The fair value of mortgage servicing rights is estimated by discounting the expected future cash flows, taking into consideration the estimated level of prepayments based on current industry expectations and the predominant risk characteristics of the underlying loans. Impairment adjustments are recorded through a valuation allowance. The valuation allowance is adjusted for changes in impairment through a charge to current period earnings. Fluctuations in the fair value of mortgage servicing rights are primarily due to changes in assumptions regarding prepayments of the underlying mortgage loans, which typically correspond with changes in market interest rates. During second quarter 2010, we recorded impairment of \$271 thousand, as compared to a reversal of previously recorded impairment of \$4.4 million during second quarter 2009. During the six months ended June 30, 2010, we recorded impairment of \$221 thousand, as compared to a reversal of previously recorded impairment of \$7.3 million during the same period in 2009.

Income Tax Expense. Our effective federal income tax rate was 26.8% for the six months ended June 30, 2010 and 29.4% for the six months ended June 30, 2009. State income tax applies primarily to pretax earnings generated within Montana and South Dakota. Our effective state tax rate was 4.3% for the six months ended June 30, 2010, and 4.2% for the six months ended June 30, 2009. Changes in effective federal and state income tax rates are primarily fluctuations in tax exempt interest income as a percentage of total income.

Financial Condition

Total assets increased \$88 million, or 1.2%, to \$7,225 million as of June 30, 2010, from \$7,138 million as of December 31, 2009.

Loans. Our loan portfolio consists of a mix of real estate, consumer, commercial, agricultural and other loans, including fixed and variable rate loans. Fluctuations in the loan portfolio are directly related to the economies of the communities we serve. Total loans increased \$34 million, or 0.8%, to \$4,562 million as of June 30, 2010 from \$4,528 million as of December 31, 2009, with the most significant growth occurring in commercial and commercial real estate loans.

Commercial real estate loans of \$1,595 million, increased \$39 million, or 2.5%, as of June 30, 2010, from \$1,556 million as of December 31, 2009. Management attributes this increase to advances to both new and existing borrowers, and, to a lesser extent, permanent financing of construction loans.

Construction loans of \$581 million as of June 30, 2010, decreased \$56 million, or 8.9%, from \$637 million as of December 31, 2009. This decrease occurred primarily in land acquisition and development loans, and, to a lesser extent, residential and commercial construction loans. Management attributes these decreases to general declines in demand for housing, particularly in three of our markets dependent upon resort and second home communities, the replacement of construction loans with permanent financing loans and the movement of lower quality loans out of the

loan portfolio through charge-off, pay-off or foreclosure.

Commercial loans of \$778 million, increased \$27 million, or 3.6%, from \$751 million as of December 31, 2009, due to advances to both new and existing commercial borrowers in our market areas.

Table of Contents

The following table presents the composition of our loan portfolio as of the dates indicated:

Loans Outstanding

(Dollars in thousands)

	June 30, 2010	December 31, 2009
Real estate loans:		
Commercial	\$ 1,594,780	\$ 1,556,273
Construction:		
Land acquisition & development	371,191	403,866
Residential	122,452	134,970
Commercial	86,883	98,056
Total construction loans	580,526	636,892
Residential	540,255	539,098
Agriculture	193,764	195,045
Mortgage loans originated for sale	48,478	36,430
Total real estate loans	2,957,803	2,963,738
Consumer:		
Indirect consumer loans	428,738	423,104
Other consumer loans	193,462	195,331
Credit card loans	58,574	59,113
Total consumer loans	680,774	677,548
Commercial	777,918	750,647
Agricultural	142,279	134,470
Other loans, including overdrafts	3,514	1,601
Total loans	\$ 4,562,288	\$ 4,528,004

Non-performing Assets. Non-performing assets include loans past due 90 days or more and still accruing interest, non-accrual loans, loans renegotiated in troubled debt restructurings and OREO.

Non-performing assets increased \$37 million, or 22.9%, to \$200 million, or 4.35% of total loans and OREO, as of June 30, 2010, from \$163 million, or 3.57% of total loans and OREO, as of December 31, 2009. Difficult economic conditions continued to have a negative impact on businesses and consumers in our market areas during the first half of 2010, especially in three market areas with economies dependent upon resort and second home communities. These market areas include the Flathead area around Kalispell, Montana, the Gallatin Valley area around Bozeman, Montana and the Jackson Hole, Wyoming market area. Residential and second home subdivisions in these market areas were overbuilt and these markets are now experiencing severely depressed real estate values and limited sales activity. The Jackson, Gallatin Valley and Flathead market areas accounted for approximately 56% of our non-performing assets as of June 30, 2010 versus 21% of our total loans as of the same date. The continuing significant impact of current economic conditions, particularly in the Jackson, Gallatin Valley and Flathead market areas, is expected to further increase non-performing assets in future quarters.

Table of Contents

The following table sets forth information regarding non-performing assets as of the dates indicated:

Non-Performing Assets

(Dollars in thousands)

	June 30, 2010	March 31, 2010	December 31, 2009	September 30, 2009	June 30, 2009
Non-performing loans:					
Non-accrual loans	\$ 139,975	\$ 122,341	\$ 115,030	\$ 120,026	\$ 120,500
Accruing loans past due 90 days or more	7,550	3,041	4,965	4,069	13,954
Restructured loans	10,588	7,660	4,683	988	1,030
Total non-performing loans	158,113	133,042	124,678	125,083	135,484
OREO	42,338	43,980	38,400	31,875	31,789
Total non-performing assets	\$ 200,451	\$ 177,022	\$ 163,078	\$ 156,958	\$ 167,273
Non-performing loans to total loans	3.47%	2.97%	2.75%	2.72%	2.90%
Non-performing assets to total loans and OREO	4.35%	3.91%	3.57%	3.38%	3.56%
Non-performing assets to total assets	2.77%	2.45%	2.28%	2.27%	2.47%

Total non-performing loans increased \$33 million, or 26.8%, to \$158 million as of June 30, 2010, from \$125 million as of December 31, 2009, primarily due to increases in non-accrual loans. Non-accrual loans of \$140 million increased \$25 million, or 21.7%, from \$115 million as of December 31, 2009. Approximately 83% and 85% of loans with balances exceeding \$1 million that were placed on non-accrual during the second quarter and first six months of 2010, respectively, were located in the Jackson, Gallatin Valley and Flathead market areas and were comprised primarily of commercial real estate, commercial construction and land acquisition and development loans. Non-performing loans in these three market areas increased to approximately 53% of total non-performing loans as of June 30, 2010, as compared to approximately 35% as of December 31, 2009.

The following table sets forth the allocation of our non-performing loans among our various loan categories as of the dates indicated:

Non-Performing Loans by Loan Type

(Dollars in thousands)

	June 30, 2010	Percent of Total	December 31, 2009	Percent of Total
Real estate:				
Commerical	\$ 54,038	34.2%	\$ 28,514	22.9%
Construction:				
Land acquisition and development	44,041	27.8%	42,195	33.8%

Edgar Filing: FIRST INTERSTATE BANCSYSTEM INC - Form 10-Q

Residential	15,330	9.7%	15,489	12.4%
Commercial	11,215	7.1%	4,460	3.6%
Total construction	70,586	44.6%	62,144	49.8%
Residential	8,518	5.4%	10,308	8.3%
Agricultural	1,878	1.2%	785	0.6%
Total real estate	135,020	85.4%	101,751	81.6%
Consumer	2,987	1.9%	2,265	1.8%
Commercial	18,710	11.8%	19,774	15.9%
Agricultural	1,396	0.9%	888	0.7%
Total non-performing loans	\$ 158,113	100.0%	\$ 124,678	100.0%

In addition to the non-performing loans included in the non-performing loans table above, as of June 30, 2010 and December 31, 2009, we had potential problem loans of \$286 million and \$223 million, respectively. Potential problem loans consist of performing loans that have been internally risk classified due to uncertainties regarding the borrowers ability to continue to comply with the contractual repayment terms of the loans. Although these loans have been identified as potential non-performing loans, they may never become delinquent, non-performing or impaired. These loans are generally secured by commercial real estate or other assets, thus reducing the potential for loss should they become non-performing. Potential problem loans are considered in the determination of our allowance for loan losses. As of June 30, 2010, \$23 million, or 8%, of our potential problem loans were more than 60 days past due, as compared to \$2 million, or 1%, as of December 31, 2009. Approximately 66% of the increase in potential problem loans past due more than 60 days as of June 30, 2010, compared to December 31, 2009, was related to the Jackson, Gallatin Valley and Flathead market areas.

OREO consists of real property acquired through foreclosure on the related collateral underlying defaulted loans. We record OREO at the lower of carrying value or fair value less estimated costs to sell. Estimated losses that result from the ongoing periodic valuation of these properties are charged to earnings in the period in which they are identified. OREO increased \$4 million, or 10.3%, to \$42 million as of June 30, 2010, from \$38 million as of December 31, 2009. As of June 30, 2010, approximately 65% of our OREO was located in the Jackson, Gallatin Valley and Flathead market

Table of Contents

areas. During second quarter 2010, we wrote-down \$3.1 million of the estimated fair values of one residential real estate property located in our Jackson market and one land development property pending sale in the Flathead market area. In addition, we sold OREO with a book value of \$8 million during the six months ended June 30, 2010. Decreases in OREO due to write-downs and sales were more than offset by the addition of new OREO properties totaling \$14 million, of which approximately 54% related to three real estate development properties transferred from non-accrual loans during the six months ended June 30, 2010.

Allowance for Loan Losses. In determining the allowance for loan losses, we estimate losses on specific loans, or groups of loans, where the probable loss can be identified and reasonably determined. The balance of the allowance for loan losses is based on internally assigned risk classifications of loans, historical loan loss rates, changes in the nature of the loan portfolio, overall portfolio quality, industry concentrations, delinquency trends, current economic factors and the estimated impact of current economic conditions on certain historical loan loss rates.

The following table sets forth information regarding our allowance for loan losses as of and for the periods indicated.

Allowance for Loan Losses

(Dollars in thousands)

	Three Months Ended				
	June 30,	March 31,	December	September	June 30,
	2010	2010	31,	30,	2009
			2009	2009	
Balance at beginning of period	\$ 106,349	103,030	101,748	98,395	\$ 92,223
Provision charged to operating expense	19,500	11,900	13,500	10,500	11,700
Less loans charged off	(12,107)	(9,398)	(12,793)	(7,641)	(6,350)
Add back recoveries of loans previously charged off	586	817	575	494	822
Net loans charged-off	(11,521)	(8,581)	(12,218)	(7,147)	(5,528)
Balance at end of period	\$ 114,328	106,349	103,030	101,748	\$ 98,395
Period end loans \$	4,562,288	4,481,019	4,528,004	4,606,454	\$ 4,665,550
Average loans	4,520,119	4,502,713	4,561,237	4,623,749	4,693,750
Annualized net loans charged off to average loans	1.02%	0.77%	1.06%	0.61%	0.47%
Allowance to period end loans	2.51%	2.37%	2.28%	2.21%	2.11%

Although we believe that we have established our allowance for loan losses in accordance with accounting principles generally accepted in the United States and that the allowance for loan losses was adequate to provide for known and inherent losses in the portfolio at all times, future provisions will be subject to on-going evaluations of the risks in the loan portfolio. If the economy declines or asset quality deteriorates, material additional provisions could be required.

Investment Securities. We manage our investment portfolio to obtain the highest yield possible, while meeting our risk tolerance and liquidity guidelines and satisfying the pledging requirements for deposits of state and political subdivisions and securities sold under repurchase agreements. Investment securities increased \$189 million, or 13.1%, to \$1,635 million, or 22.6% of total assets, as of June 30, 2010 from \$1,446 million, or 20.3% of total assets, as of

December 31, 2009. During the third quarter of 2009, we began investing excess liquidity into investment securities classified as available-for-sale. With lower market interest rates and the purchase of relatively short-term securities, the estimated duration of the Company's investment securities portfolio decreased to 1.7 years as of June 30, 2010, from 2.5 years as of June 30, 2009.

We evaluate our investment portfolio quarterly for other-than-temporary declines in the market value of individual investment securities. This evaluation includes monitoring credit ratings; market, industry and corporate news; volatility in market prices; and, determining whether the market value of a security has been below its cost for an extended period of time. As of June 30, 2010, we had investment securities with fair values of \$1 million that had been in a continuous loss position more than twelve months. Gross unrealized losses on these securities totaled \$26 thousand as of June 30, 2010, and were primarily attributable to changes in interest rates. No impairment losses were recorded during the three and six months ended June 30, 2010 or 2009.

Cash and Cash Equivalents. Cash and cash equivalents include cash on hand, amounts due from banks, federal funds sold for one day periods and interest bearing deposits in banks with original maturities of less than three months. IPO proceeds of \$119 million, net of IPO costs and after the repayment of our variable rate term notes, were included in interest bearing deposits in banks as of June 30, 2010. Cash and cash equivalents decreased \$121 million, or 19.4%, to \$502 million as of June 30, 2010, from \$623 million as of December 31, 2009. Increases in interest bearing deposits in banks due to IPO proceeds were offset by decreases in cash on hand and federal funds sold, as excess liquidity was invested in higher yielding assets, primarily loans and investment securities.

Deposits. Our deposits consist of non-interest bearing and interest bearing demand, savings, individual retirement and time deposit accounts. Total deposits decreased \$22 million, or less than 1.0%, to \$5,802 million as of June 30, 2010, from \$5,824 million as of December 31, 2009. During the first half of 2010, there was a slight shift in the mix of deposits from higher costing time deposits to lower costing savings and non-interest bearing deposits.

Table of Contents

The following table summarizes our deposits as of the dates indicated:

Deposits

(Dollars in thousands)

	June 30, 2010	December 31, 2009
Non-interest bearing demand	\$ 1,040,072	\$ 1,026,584
Interest bearing:		
Demand	1,090,162	1,197,254
Savings	1,487,746	1,362,410
Time, \$100 and over	996,478	996,839
Time, other (1)	1,187,864	1,240,969
Total interest bearing	4,762,250	4,797,472
Total deposits	\$ 5,802,322	\$ 5,824,056

(1) Included in Time, other are Certificate of Deposit Account Registry Service, or CDAR, deposits of \$222 million as of June 30, 2010 and \$263 million as of December 31, 2009.

Other Borrowed Funds. Other borrowed funds increased \$2 million, or 32.7% to \$7 million as of June 30, 2010, from \$5 million as of December 31, 2009 primarily due to timing of tax deposits made by customers and the subsequent withdrawal of funds by the federal government.

Long-Term Debt. Long-term debt decreased \$35 million, or 48.2%, to \$38 million as of June 30, 2010, from \$73 million as of December 31, 2009 due to the early repayment of \$34 million of variable rate term notes and, to a lesser extent, scheduled repayments of long-term Federal Home Loan Bank borrowings.

Capital Resources and Liquidity Management

Capital Resources. On March 5, 2010, our shareholders approved proposals to recapitalize our existing common stock. The recapitalization included a redesignation of existing common stock as Class B common stock with five votes per share, convertible into Class A common stock on a share for share basis; a four-for-one stock split of the Class B common stock; an increase in the authorized number of Class B common shares from 20,000,000 to 100,000,000; and the creation of a new class of common stock designated as Class A common stock, with one vote per share, with 100,000,000 shares authorized.

Stockholders' equity is influenced primarily by earnings, dividends, sales of common stock and changes in the unrealized holding gains or losses, net of taxes, on available-for-sale investment securities. Stockholders' equity increased \$166 million, or 28.9%, to \$740 million as of June 30, 2010, from \$574 million as of December 31, 2009, primarily due to the completion of our IPO of Class A common stock, which closed on March 29, 2010 and included the issuance of 11,500,000 Class A common stock shares at a price of \$14.50 per share. We received net proceeds of \$153 million from the offering, after deducting underwriting discounts, commissions and other offering expenses of \$14 million. The remaining increase in stockholders' equity was largely attributable to fluctuations in other comprehensive income, primarily unrealized gains and losses on available-for-sale investment securities.

On May 27, 2010, we declared a quarterly dividend to common stockholders of \$0.1125 per share that was paid on July 12, 2010 to shareholders of record as of July 1, 2010. During the first half of 2010, we paid aggregate cash dividends of \$8.3 million, or \$0.225 per share, to common stockholders and \$1.7 million to preferred stockholders, as compared to aggregate cash dividends of \$8.7 million, or \$0.275 per share, to common stockholders and \$1.7 million to preferred stockholders during the same period in 2009.

Pursuant to the Federal Deposit Insurance Corporation Improvement Act, the Federal Reserve and FDIC have adopted regulations setting forth a five-tier system for measuring the capital adequacy of the financial institutions they supervise. At June 30, 2010 and December 31, 2009, the Bank had capital levels that, in all cases, exceeded the well-capitalized guidelines. As of June 30, 2010, we had consolidated leverage, tier 1 and total risk-based capital ratios of 9.43%, 12.87% and 14.81%, respectively, as compared to 7.30%, 9.74% and 11.68%, respectively, as of December 31, 2009. The significant increases in our capital ratios reflect the impact of additional capital raised from our IPO in March 2010.

Table of Contents

Liquidity. Liquidity measures our ability to meet current and future cash flow needs on a timely basis and at a reasonable cost. We manage our liquidity position to meet the daily cash flow needs of customers, while maintaining an appropriate balance between assets and liabilities to meet the return on investment objectives of our shareholders. Our liquidity position is supported by management of liquid assets and liabilities and access to alternative sources of funds. Liquid assets include cash, interest bearing deposits in banks, federal funds sold, available-for-sale investment securities and maturing or prepaying balances in our held-to-maturity investment and loan portfolios. Liquid liabilities include core deposits, federal funds purchased, securities sold under repurchase agreements and borrowings. Other sources of liquidity include the sale of loans, the ability to acquire additional national market, non-core deposits, the issuance of additional collateralized borrowings such as FHLB advances, the issuance of debt securities, additional borrowings through the Federal Reserve's discount window and the issuance of preferred or common securities.

Our short-term and long-term liquidity requirements are primarily to fund on-going operations, including payment of interest on deposits and debt, extensions of credit to borrowers, capital expenditures and shareholder dividends. These liquidity requirements are met primarily through cash flow from operations, redeployment of prepaying and maturing balances in our loan and investment portfolios, debt financing and increases in customer deposits.

As a holding company, we are a corporation separate and apart from the Bank and, therefore, we provide for our own liquidity. Our main sources of funding include management fees and dividends declared and paid by the Bank and access to capital markets. There are statutory and regulatory limitations that affect the ability of our subsidiary bank to pay dividends to us. Management believes that such limitations will not impact our ability to meet our ongoing short-term cash obligations.

Asset Liability Management

The goal of asset liability management is the prudent control of market risk, liquidity and capital. Asset liability management is governed by policies, goals and objectives adopted and reviewed by the Bank's board of directors. The Bank board delegates its responsibility for development of asset liability management strategies to achieve these goals and objectives to the Asset Liability Committee, or ALCO, which is comprised of members of senior management.

We target a mix of interest earning assets and interest bearing liabilities such that no more than 5% of the net interest margin will be at risk over a one-year period should short-term interest rates shift up or down 2%. As of June 30, 2010, our income simulation model predicted net interest income would decrease \$2.4 million, or less than 1.0%, assuming a 2% increase in short-term and long-term interest rates over a twelve-month period. This scenario predicts that our funding sources will reprice faster than our interest earning assets. In addition, during 2009 we began to implement interest rate floors on certain variable rate loans. Interest rate floors mitigate benefits obtained in a rising interest rate environment until such time as market interest rates exceed the interest rate floors established. We do not engage in derivatives or hedging activities to manage our interest rate risk.

We did not simulate a decrease in interest rates due to the extremely low rate environment as of June 30, 2010. Prime rate has historically been set at a rate of 300 basis points over the targeted federal funds rate, which is currently set between 0 and 25 basis points. Our income simulation model has an assumption that prime will continue to be set at a rate of 300 basis points over the targeted federal funds rate. Additionally, rates that are currently below 2% are modeled not to fall below 0% with an overall decrease of 2% in interest rates. In a declining rate environment, our income simulation model predicts our net interest income and net interest rate spread will decrease and our net interest margin will compress because interest expense will not decrease in direct proportion to a simulated downward shift in interest rates.

Recent Accounting Pronouncements

See Note 13 "Authoritative Accounting Guidance" in the accompanying Notes to Unaudited Consolidated Financial Statements included in this report for details of recently issued accounting pronouncements and their expected impact on our financial statements.

Item 3.**QUANTITATIVE AND QUALITATIVE DISCLOSURES
ABOUT MARKET RISK**

As of June 30, 2010, there have been no material changes in the quantitative and qualitative information about market risk provided pursuant to Item 305 of Regulation S-K as presented in our Annual Report on Form 10-K for the

year ended December 31, 2009.

**Item 4T.
CONTROLS AND PROCEDURES**

Disclosure Controls and Procedures

Our management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined under Rules 13a-15(e) and 15d-15(e) of the Exchange Act. As of June 30, 2010, an evaluation was performed, under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of June 30, 2010, were effective in ensuring that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods required by the SEC's rules and forms, and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting for the quarter ended June 30, 2010, that have materially affected, or are reasonably likely to materially affect, such control.

Limitations on Controls and Procedures

The effectiveness of our disclosure controls and procedures and our internal control over financial reporting is subject to various inherent limitations, including cost limitations, judgments used in decision making, assumptions about the likelihood of future events, the soundness of our systems, the possibility of human error, and the risk of fraud. Moreover, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions and the risk that the degree of compliance with policies or procedures may deteriorate over time. Because of these limitations, any system of disclosure controls and procedures or internal control over financial reporting may not be successful in preventing all errors or fraud or in making all material information known in a timely manner to the appropriate levels of management.

**PART II.
OTHER INFORMATION**

Item 1. Legal Proceedings

There have been no material changes in legal proceedings as described in our Annual Report on Form 10-K for the year ended December 31, 2009.

Item 1A. Risk Factors

Risk factors described in our Annual Report on Form 10-K for the year ended December 31, 2009, were updated and are included in our most recently filed prospectus dated March 23, 2010, as filed with the SEC on March 24, 2010. There have been no material changes in risk factors as described in such prospectus.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

- (a) There were no unregistered sales of equity securities during the six months ended June 30, 2010.
- (b) Not applicable.
- (c) There were no purchases made by or on behalf of us or any affiliated purchases (as defined in Rule 10b-18(a)(3) under the Exchange Act), of our common stock during the three months ended June 30, 2010.

Item 3. Defaults upon Senior Securities

None.

Item 4. (Removed and Reserved)

Item 5. Other Information

Not applicable or required.
