EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2010

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission File Number: 001-12991

BANCORPSOUTH, INC.

(Exact name of registrant as specified in its charter)

Mississippi

(State or other jurisdiction of incorporation or
organization)

64-0659571

(I.R.S. Employer Identification No.)

**One Mississippi Plaza, 201 South Spring Street
Tupelo, Mississippi**

(Address of principal executive offices)

38804

(Zip Code)

Registrant's telephone number, including area code: (662) 680-2000

NOT APPLICABLE

(Former name, former address, and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check One):

Large accelerated filer

Accelerated filer

Non-accelerated filer
(Do not check if a smaller
reporting company)

Smaller reporting
company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of August 4, 2010, the registrant had outstanding 83,481,737 shares of common stock, par value \$2.50 per share.

FORWARD-LOOKING STATEMENTS

Certain statements contained in this Report may not be based on historical facts and are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements may be identified by reference to a future period(s) or by the use of forward-looking terminology, such as anticipate, assume, believe, estimate, expect, might, will, intend, indicated, could, or would, or future or conditional verb tenses, and variations or negative terms. These forward-looking statements include, without limitation, those relating to net interest revenue, estimates of fair value discount rates, fair values of held-to-maturity and available-for-sale securities, the amount of the Company's non-performing loans and leases, credit quality, credit losses, off-balance sheet commitments and arrangements, valuation of mortgage servicing rights, allowance and provision for credit losses, continued weakness in the economic environment, early identification and resolution of credit issues, utilization of non-GAAP financial measures, real estate values, fully-indexed interest rates, interest rate risk, average interest rate earned, interest rate sensitivity, pension benefits, calculation of economic value of equity, diversification of the Company's revenue stream, liquidity needs and strategies, the Company's net interest margin, ratio of tangible equity to tangible assets, payment of dividends, the impact of federal and state regulatory requirements for capital on the Company's ability to meet its cash obligations, additional share repurchases under the Company's stock repurchase program, the impact of pending litigation and the implementation and effect of remedial actions to address the material weakness in internal control over financial reporting. We caution you not to place undue reliance on the forward-looking statements contained in this report, in that actual results could differ materially from those indicated in such forward-looking statements as a result of a variety of factors. These factors include, but are not limited to, conditions in the financial markets and economic conditions generally, the soundness of other financial institutions, levels of market volatility, the availability of capital if the Company elects or is compelled to seek additional capital, liquidity risk, the credit risk associated with real estate construction, estimates of costs and values associated with acquisition and development loans in the Company's loan portfolio, the adequacy of the Company's allowance for credit losses to cover actual credit losses,

governmental regulation and supervision of the Company's operations, changes in interest rates, the impact of monetary policies and economic factors on the Company's ability to attract deposits or make loans, the impact of hurricanes or other adverse weather events, risks in connection with completed or potential acquisitions, dilution caused by the Company's issuance of any additional shares of its common stock to acquire other banks, bank holding companies, financial holding companies and insurance agencies, restrictions on the Company's ability to declare and pay dividends, the Company's growth strategy, diversification in the types of financial services the Company offers, competition with other financial services companies, interruptions or breaches in security of the Company's information systems, the Company's ability to improve its internal controls adequately, any requirement that the Company write down goodwill or other intangible assets and other factors detailed from time to time in the Company's press releases and filings with the Securities and Exchange Commission. We undertake no obligation to update these forward-looking statements to reflect events or circumstances that occur after the date of this report.

BANCORPSOUTH, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements
(Unaudited)

NOTE 1 BASIS OF FINANCIAL STATEMENT PRESENTATION AND PRINCIPLES OF CONSOLIDATION

The accompanying unaudited interim consolidated financial statements of BancorpSouth, Inc. (the Company) have been prepared in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) and follow general practices within the industries in which the Company operates. For further information, refer to the audited consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009. In the opinion of management, all adjustments necessary for a fair presentation of the consolidated financial statements have been included and all such adjustments were of a normal, recurring nature. The results of operations for the three-month and six-month periods ended June 30, 2010 are not necessarily indicative of the results to be expected for the full year. Certain 2009 amounts have been reclassified to conform with the 2010 presentation.

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiaries, BancorpSouth Bank (the Bank), Risk Advantage, Inc. and Gumtree Wholesale Insurance Brokers, Inc., and the Bank's wholly-owned subsidiaries, Century Credit Life Insurance Company, Personal Finance Corporation of Tennessee, BancorpSouth Insurance Services, Inc., BancorpSouth Investment Services, Inc. and BancorpSouth Municipal Development Corporation.

NOTE 2 LOANS AND LEASES

The composition of the loan and lease portfolio by collateral type as of the dates indicated was as follows:

	June 30,		December
	2010	2009	31,
		(In thousands)	2009
Commercial and industrial	\$ 1,499,152	\$ 1,323,524	\$ 1,514,419
Real estate			
Consumer mortgages	2,019,187	2,054,666	2,017,067
Home equity	555,281	532,337	550,085
Agricultural	260,489	242,034	262,069
Commercial and industrial-owner occupied	1,407,704	1,394,852	1,449,554
Construction, acquisition and development	1,381,591	1,652,052	1,459,503
Commercial	1,794,644	1,719,044	1,806,766
Credit cards	102,784	101,844	108,086
All other	670,791	786,382	655,437
Total	\$ 9,691,623	\$ 9,806,735	\$ 9,822,986

The Company does not have any loan concentrations, other than those reflected in the preceding table, which exceed 10% of total loans.

A substantial portion of construction, acquisition and development loans are secured by real estate in markets in which the Company is located. These loans are often structured with interest reserves to fund interest costs during the construction and development period. Additionally, certain loans are structured with interest-only terms. A portion of the consumer mortgage and commercial real estate portfolios originated through the permanent financing of construction, acquisition and development loans. The prolonged economic downturn has negatively impacted many borrowers' and guarantors' ability to make payments under these terms as their liquidity has been depleted.

Table of Contents

Accordingly, the ultimate collectability of a substantial portion of these loans and the recovery of a substantial portion of the carrying amount of other real estate owned are susceptible to changes in real estate values in these areas. Continued economic distress could negatively impact additional borrowers' and guarantors' ability to repay their debt which will make more of our loans collateral dependent.

Non-performing loans and leases (NPLs) consist of non-accrual loans and leases, loans and leases 90 days or more past due and still accruing, and loans and leases that have been restructured because of the borrower's weakened financial condition. The following table presents information concerning NPLs as of the dates indicated:

	June 30, 2010	June 30, 2009	December 31, 2009
	(In thousands)		
Non-accrual loans and leases	\$ 263,758	\$ 45,542	\$ 144,013
Loans and leases 90 days or more past due, still accruing	17,696	43,866	36,301
Restructured loans and leases still accruing	20,813	8,264	6,161
Total non-performing loans	\$ 302,267	\$ 97,672	\$ 186,475

The Bank's policy provides that loans and leases are generally placed in non-accrual status if, in management's opinion, payment in full of principal or interest is not expected or payment of principal or interest is more than 90 days past due, unless the loan or lease is both well-secured and in the process of collection. At June 30, 2010, the Company's geographic NPL distribution was concentrated primarily in its Alabama and Tennessee markets, including the greater Memphis, Tennessee area, a portion of which is in Northwest Mississippi.

Loans considered impaired under Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 310, Receivables (FASB ASC 310) are loans for which, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement and include troubled debt restructurings (TDRs). The Company's recorded investment in loans considered impaired at June 30, 2010 and December 31, 2009 was \$188.3 million and \$128.5 million, respectively. At June 30, 2010 and December 31, 2009, \$109.8 million and \$73.2 million of those impaired loans had a valuation allowance of \$40.7 million and \$22.7 million, respectively. The remaining balance of impaired loans of \$78.5 million and \$55.3 million at June 30, 2010 and December 31, 2009, respectively, have been charged down to fair value, less estimated selling costs which would approximate net realizable value, therefore, they do not have an associated valuation allowance. Impaired loans that were characterized as TDRs totaled \$75.5 million and \$72.6 million at June 30, 2010 and December 31, 2009, respectively.

At June 30, 2010, other real estate owned which had been acquired, usually through foreclosure, from borrowers totaled \$67.6 million compared to \$59.3 million at December 31, 2009. Substantially all of these amounts related to one-to-four family residential properties and development projects that were either completed or were in various stages of construction. The Company incurred total foreclosed property expenses of \$3.8 million and \$1.3 million for the three months ended June 30, 2010 and 2009, respectively. The Company incurred total foreclosed property expenses of \$7.4 million and \$3.6 million for the six months ended June 30, 2010 and 2009, respectively. Realized net losses on dispositions and holding losses on valuations of these properties, a component of total foreclosed property expenses, were \$3.2 million and approximately \$739,000 for the three months ended June 30, 2010 and 2009, respectively, and were \$5.9 million and \$2.3 million for the six months ended June 30, 2010 and 2009, respectively.

NOTE 3 ALLOWANCE FOR CREDIT LOSSES

The following table summarizes the changes in the allowance for credit losses for the periods indicated:

Table of Contents

	Six months ended		Year ended
	June 30, 2010	2009	December 31, 2009
	(In thousands)		
Balance at beginning of period	\$ 176,043	\$ 132,793	\$ 132,793
Provision charged to expense	105,873	32,539	117,324
Recoveries	2,570	2,032	4,139
Loans and leases charged off	(83,742)	(28,617)	(78,213)
Balance at end of period	\$ 200,744	\$ 138,747	\$ 176,043

NOTE 4 SECURITIES

A comparison of amortized cost and estimated fair values of held-to-maturity securities as of June 30, 2010 and December 31, 2009 follows:

	Amortized Cost	June 30, 2010		Estimated Fair Value
		Gross Unrealized Gains	Gross Unrealized Losses	
		(In thousands)

		(In thousands)		
U.S. Government agencies	\$ 798,660	\$ 39,685	\$	\$ 838,345
Obligations of states and political subdivisions	234,162	6,238	670	239,730
Total	\$ 1,032,822	\$ 45,923	\$ 670	\$ 1,078,075

Gross gains of approximately \$45,000 and no gross losses were recognized on held-to-maturity securities during the first six months of 2010, while gross gains of approximately \$3,000 and gross losses of approximately \$2,000 were recognized during the first six months of 2009. These gains and losses were a result of held-to-maturity securities being called prior to maturity.

The amortized cost and estimated fair value of held-to-maturity securities at June 30, 2010 by contractual maturity are shown below. Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Table of Contents

	June 30, 2010	
	Amortized Cost	Estimated Fair Value
	(In thousands)

Total	\$ 7,016	\$ (146)	\$ 6,431	\$ (281)	\$ 13,447	\$ (427)

Based upon a review of the credit quality of these securities, and considering that the issuers were in compliance with the terms of the securities, management had no intent to sell these securities, and it was more likely than not that the Company would not be required to sell the securities prior to recovery of costs. Therefore, the impairments related to these securities were determined to be temporary. During the second quarter and first six months of 2010,

approximately \$637,000 and \$1.3 million were recorded as other-than-temporary impairment related to investments in pooled trust preferred securities.

NOTE 5 PER SHARE DATA

The computation of basic earnings per share (EPS) is based on the weighted average number of shares of common stock outstanding. The computation of diluted earnings per share is based on the weighted average number of shares of common stock outstanding plus the shares resulting from the assumed exercise of all outstanding share-based awards using the treasury stock method. Due to the net loss attributable to common shareholders for the three and six months ended June 30, 2010, no potentially dilutive shares were included in the loss per share calculations as including such shares would have been antidilutive. Stock options of 2.6 million and

Table of Contents

2.7 million with a weighted average exercise price of \$22.39 and \$22.36 per share for the three months and six months ended June 30, 2010, respectively, were excluded from diluted shares. Other equity awards of approximately 99,000 and 270,000 for the three months and six months ended June 30, 2010, respectively, were also excluded from diluted shares.

The following table provides a reconciliation of the numerators and denominators of the basic and diluted earnings per share computations for the periods shown:

	Three months ended June 30,

NOTE 7 GOODWILL AND OTHER INTANGIBLE ASSETS

The carrying amounts of goodwill by operating segment for the six months ended June 30, 2010 were as follows:

	Community Banking	Insurance Agencies (In thousands)	Total
Balance as of December 31, 2009	\$ 217,618	\$ 52,479	\$ 270,097
Goodwill recorded during the period			
Balance as of June 30, 2010	\$ 217,618	\$ 52,479	\$ 270,097

The Company's policy is to assess goodwill for impairment at the reporting unit level on an annual basis or sooner if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value. Accounting standards require management to estimate the fair value of each reporting unit in assessing impairment at least annually. The Company's annual assessment date is during the Company's fourth quarter. No events occurred during the second quarter that would indicate the necessity of an earlier goodwill impairment assessment. In the current environment, forecasting cash flows, credit losses and growth in addition to valuing the Company's assets with any degree of assurance is very difficult and subject to significant changes over

Table of Contents

very short periods of time. Management will continue to update its analysis as circumstances change. As market conditions continue to be volatile and unpredictable, impairment of goodwill related to the Company's reporting units may be necessary in future periods.

The following tables present information regarding the components of the Company's identifiable intangible assets for the dates and periods indicated:

Net periodic benefit costs	\$ 975	\$ 2,003	\$ 1,832	\$ 4,059

NOTE 9 RECENT PRONOUNCEMENTS

In June 2009, the FASB issued a new accounting standard regarding accounting for transfers of financial assets. This new accounting standard eliminates the concept of a qualifying special-purpose entity, changes the requirements for derecognizing financial assets, and requires additional disclosures in order to enhance information reported to users of financial statements by providing greater transparency about transfers of financial assets, including securitization transactions, and an entity's continuing involvement in and exposure to the risks related to transferred financial assets. This new accounting standard is effective for fiscal years beginning after November 15, 2009. The adoption of this new accounting standard regarding accounting for transfers of financial assets has had no material impact on the financial position or results of operations of the Company.

In June 2009, the FASB issued a new accounting standard regarding consolidation of variable interest entities. This new accounting standard amends existing accounting literature regarding consolidation of variable interest entities to improve financial reporting by enterprises involved with variable interest entities and to provide more relevant and reliable information to users of financial statements. This new accounting standard is effective for fiscal years beginning after November 15, 2009. The adoption of this new accounting standard regarding consolidation of variable interest entities has had no material impact on the financial position or results of operations of the Company.

In July 2010, the FASB issued a new accounting standard regarding disclosures about the credit quality of financing receivables and the allowance for credit losses. This new accounting standard amends existing accounting literature regarding disclosures about the credit quality of financing receivables and the allowance for credit losses to provide additional information to assist financial statement users in assessing an entity's credit risk exposures and evaluating the adequacy of its allowance for credit losses. This new accounting standard is effective for fiscal years and interim reporting periods ending on or after December 15, 2010. This new accounting standard regarding disclosures about the credit quality of financing receivables and the allowance for credit losses will impact disclosures only and will not have an impact on the financial position or results of operations of the Company.

NOTE 10 SEGMENT REPORTING

The Company is a financial holding company with subsidiaries engaged in the business of banking and activities closely related to banking. The Company determines reportable segments based upon the services offered, the significance of those services to the Company's financial condition and operating results and management's regular review of the operating results of those services. The Company's primary segment is Community Banking, which includes providing a full range of deposit products, commercial loans and consumer loans. The Company has also designated two additional reportable segments—Insurance Agencies and General Corporate and Other. The Company's insurance agencies serve as agents in the sale of title insurance, commercial lines of insurance and full lines of property and casualty, life, health and employee benefits products and services. The General Corporate and Other operating segment includes leasing, mortgage lending, trust services, credit card activities, investment services and other activities not allocated to the Community Banking or Insurance Agencies operating segments.

Table of Contents

The decrease in performance of the General Corporate and Other operating segment for the three months and six months ended June 30, 2010 is primarily related to mortgage lending.

Results of operations and selected financial information by operating segment for the three-month and six-month periods ended June 30, 2010 and 2009 were as follows:

	Community Banking	Insurance Agencies	General Corporate and Other (In thousands)	Total
Three months ended June 30, 2010:

NOTE 11 MORTGAGE SERVICING RIGHTS

Mortgage servicing rights (MSRs), which are recognized as a separate asset on the date the corresponding mortgage loan is sold, are recorded at fair value as determined at each accounting period end. An estimate of the fair value of the Company's MSRs is determined utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. Data and assumptions used in the fair value calculation related to MSRs for the six months ended June 30, 2010 were as follows:

(Dollars in thousands)

Unpaid principal balance	\$ 3,552,221
Weighted-average prepayment speed (CPR)	21.1
Discount rate (annual percentage)	10.3
Weighted-average coupon interest rate (percentage)	5.5
Weighted-average remaining maturity (months)	321.0
Weighted-average servicing fee (basis points)	28.8

Because the valuation is determined by using discounted cash flow models, the primary risk inherent in valuing the MSR is the impact of fluctuating interest rates on the estimated life of the servicing revenue stream. The use of different estimates or assumptions could also produce different fair values. The Company does not hedge the change in fair value of MSRs and, therefore, the Company is susceptible to significant fluctuations in the fair value of its MSRs in changing interest rate environments.

The Company has only one class of mortgage servicing asset comprised of closed end loans for one-to-four family residences, secured by first liens. The following table presents the activity in this class for the periods indicated:

Table of Contents

	2010	2009
	(In thousands)	
Fair value as of January 1	\$ 35,560	\$ 24,972
Additions:		
Origination of servicing assets	4,859	9,066
Changes in fair value:		
Due to payoffs/paydowns	(2,736)	(4,001)
Due to change in valuation inputs or assumptions used in the valuation model	(8,315)	3,495
Other changes in fair value	(5)	(8)
Fair value as of June 30	\$ 29,363	\$ 33,524

All of the changes to the fair value of the MSR's are recorded as part of mortgage lending noninterest revenue on the income statement. As part of mortgage lending noninterest revenue, the Company recorded contractual servicing fees of \$2.6 million and \$2.3 million and late and other ancillary fees of approximately \$333,000 and \$217,000 for the three months ended June 30, 2010 and 2009, respectively. The Company recorded contractual servicing fees of \$5.1 million and \$4.6 million and late and other ancillary fees of approximately \$684,000 and \$529,000 for the six months ended June 30, 2010 and 2009, respectively.

NOTE 12 DERIVATIVE INSTRUMENTS

The derivatives held by the Company include commitments to fund fixed-rate mortgage loans to customers and forward commitments to sell individual fixed-rate mortgage loans. The Company's objective in obtaining the forward commitments is to mitigate the interest rate risk associated with the commitments to fund the fixed-rate mortgage loans. Both the commitments to fund fixed-rate mortgage loans and the forward commitments to sell individual fixed-rate mortgage loans are reported at fair value, with adjustments being recorded in current period earnings, and are not accounted for as hedges. At June 30, 2010, the notional amount of forward commitments to sell individual fixed-rate mortgage loans was \$158.4 million with a carrying value and fair value reflecting a loss of \$1.8 million. At June 30, 2009, the notional amount of forward commitments to sell individual fixed-rate mortgage loans was \$181.7 million with a carrying value and fair value reflecting a loss of approximately \$515,000. At June 30, 2010, the notional amount of commitments to fund individual fixed-rate mortgage loans was \$127.8 million with a carrying value and fair value reflecting a gain of approximately \$2.2 million. At June 30, 2009, the notional amount of commitments to fund individual fixed-rate mortgage loans was \$82.9 million with a carrying value and fair value reflecting a gain of approximately \$918,000.

The Company also enters into derivative financial instruments in the form of interest rate swaps to meet the financing, interest rate and equity risk management needs of its customers. Upon entering into these interest rate swaps to meet customer needs, the Company enters into offsetting positions to minimize interest rate and equity risk to the Company. These derivative financial instruments are reported at fair value with any resulting gain or loss recorded in current period earnings. These instruments and their offsetting positions are recorded in other assets and other liabilities on the consolidated balance sheets. As of June 30, 2010, the notional amount of customer related derivative financial instruments was \$482.6 million with an average maturity of 77 months, an average interest receive rate of 2.7% and an average interest pay rate of 6.1%.

NOTE 13 FAIR VALUE DISCLOSURES

Fair value is defined by FASB ASC 820, Fair Value Measurements and Disclosure (FASB ASC 820), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. FASB ASC 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity's. Unobservable inputs are inputs that reflect the reporting entity's assumptions

about the assumptions that market participants would use in pricing the asset or

Table of Contents

liability developed based on the best information available under the circumstances. The hierarchy is broken down into the following three levels, based on the reliability of inputs:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities that are accessible at the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs for the asset or liability that reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

Determination of Fair Value

The Company uses the valuation methodologies listed below to measure different financial instruments at fair value. An indication of the level in the fair value hierarchy in which each instrument is generally classified is included. Where appropriate, the description includes details of the valuation models, the key inputs to those models as well as any significant assumptions.

Available-for-sale securities. Available-for-sale securities are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are determined by matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities. The Company's available-for-sale securities that are traded on an active exchange, such as the New York Stock Exchange, are classified as Level 1. Available-for-sale securities valued using matrix pricing are classified as Level 2. Available-for-sale securities valued using matrix pricing that has been adjusted to compensate for the present value of expected cash flows, market liquidity, credit quality and volatility are classified as Level 3.

Mortgage servicing rights. The Company records MSRMs at fair value on a recurring basis with subsequent remeasurement of MSRMs based on change in fair value. An estimate of the fair value of the Company's MSRMs is determined by utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. All of the Company's MSRMs are classified as Level 3.

Derivative instruments. The Company's derivative instruments consist of commitments to fund fixed-rate mortgage loans to customers, forward commitments to sell individual fixed-rate mortgage loans and interest rate swaps. Fair value of these derivative instruments is measured on a recurring basis using either observable market price or a discounted cash flow model using observable market inputs. The Company's interest rate swaps are classified as Level 2. The Company's commitments to fund fixed-rate mortgage loans to customers and forward commitments to sell individual fixed-rate mortgage loans are classified as Level 3.

Loans held for sale. Loans held for sale are carried at the lower of cost or estimated fair value and are subject to nonrecurring fair value adjustments. Estimated fair value is determined on the basis of existing commitments or the current market value of similar loans. All of the Company's loans held for sale are classified as Level 2.

Impaired loans. Loans considered impaired under FASB ASC 310 are loans for which, based on current information and events, it is probable that the creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. Impaired loans are subject to nonrecurring fair value adjustments to reflect (1) partial write-downs that are based on the observable market price or current appraised value of the collateral, or (2) the full charge-off of the loan carrying value. All of the Company's impaired loans are classified as Level 3.

Other real estate owned. Other real estate owned (OREO) is carried at the lower of cost or estimated fair value, less estimated selling costs and is subject to nonrecurring fair value adjustments. Estimated fair value is determined

Table of Contents

on the basis of independent appraisals and other relevant factors. All of the Company's OREO is classified as Level 3.
Assets and Liabilities Recorded at Fair Value on a Recurring Basis

The following table presents the balances of the assets and liabilities measured at fair value on a recurring basis as of June 30, 2010 and 2009:

Table of Contents**NOTE 14 FAIR VALUE OF FINANCIAL INSTRUMENTS**

FASB ASC 825, Financial Instruments (FASB ASC 825), requires that the Company disclose estimated fair values for its financial instruments. Fair value estimates, methods and assumptions are set forth below for the Company's financial instruments.

Securities. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are determined by matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities relationship to other benchmark quoted securities.

Loans and Leases. Fair values are estimated for portfolios of loans and leases with similar financial characteristics. The fair value of loans and leases is calculated by discounting scheduled cash flows through the estimated maturity using rates the Company would currently offer customers based on the credit and interest rate risk inherent in the loan or lease. Assumptions regarding credit risk, cash flows and discount rates are judgmentally determined using available market and borrower information. Estimated maturity represents the expected average cash flow period, which in some instances is different than the stated maturity. This entrance price approach results in a calculated fair value that would be different than an exit or estimated actual sales price approach and such differences could be significant.

Loans Held for Sale. Loans held for sale are carried at the lower of cost or estimated fair value and are subject to nonrecurring fair value adjustments. Estimated fair value is determined on the basis of existing commitments or the prevailing market value of similar loans.

Deposit Liabilities. Under FASB ASC 825, the fair value of deposits with no stated maturity, such as noninterest bearing demand deposits, interest bearing demand deposits and savings, is equal to the amount payable on demand as of the reporting date. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the prevailing rates offered for deposits of similar maturities.

Debt. The carrying amounts for federal funds purchased and repurchase agreements approximate fair value because of their short-term maturity. The fair value of the Company's fixed-term Federal Home Loan Bank (FHLB) advance securities is based on the discounted value of contractual cash flows. The discount rate is estimated using the prevailing rates available for advances of similar maturities. The fair value of the Company's junior subordinated debt is based on market prices or dealer quotes.

Derivative Instruments. The Company has commitments to fund fixed-rate mortgage loans and forward commitments to sell individual fixed-rate mortgage loans. The fair value of these derivative instruments is based on observable market prices. The Company also enters into interest rate swaps to meet the financing, interest rate and equity risk management needs of its customers. The fair value of these instruments is either an observable market price or a discounted cash flow valuation using the terms of swap agreements but substituting original interest rates with prevailing interest rates.

Lending Commitments. The Company's lending commitments are negotiated at prevailing market rates and are relatively short-term in nature. As a matter of policy, the Company generally makes commitments for fixed-rate loans for relatively short periods of time. Therefore, the estimated value of the Company's lending commitments approximates the carrying amount and is immaterial to the financial statements.

The following table presents carrying and fair value information at June 30, 2010 and December 31, 2009:

Table of Contents

	June 30, 2010		December 31, 2009

NOTE 16 COMMITMENTS AND CONTINGENT LIABILITIES

The Company and its subsidiaries are engaged in lines of business that are heavily regulated and involve a large volume of financial transactions with numerous customers through offices in nine states. Although the Company and its subsidiaries have developed policies and procedures to minimize the impact of legal non-compliance and disputes, litigation presents an ongoing risk.

The Company and its subsidiaries are defendants in various lawsuits, including the litigation discussed below and claims arising out of the ordinary course of business. Some of these claims are against entities of which the Company is a successor as a result of business combinations. Management of the Company evaluates lawsuits based on information currently available, including advice of counsel and assessment of available insurance coverage. Management is currently of the opinion that the ultimate resolution or financial liability with respect to pending lawsuits will not have a material adverse effect on the Company's business, consolidated financial position or results of operations. Litigation is, however, inherently uncertain, and management cannot provide any assurance that the Company and/or its subsidiaries will prevail in any of these actions, nor can management estimate with reasonable certainty the amount of damages that the Company or any of its subsidiaries might incur.

On May 12, 2010, the Company and its Chief Executive Officer, President and Chief Financial Officer were named in a purported class-action lawsuit filed in the U.S. District Court for the Middle District of Tennessee on behalf of certain purchasers of the Company's common stock. The complaint alleges that the defendants issued materially false and misleading statements regarding the Company's business and financial results. The plaintiff seeks class certification, an unspecified amount of damages and awards of costs and attorneys' fees and such other equitable relief as the Court may deem just and proper. No class has been certified and, at this stage of the lawsuit, management cannot determine the probability of an unfavorable outcome to the Company. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management is currently of the opinion that the outcome of this lawsuit will not have a material adverse effect on the Company's business, consolidated financial position or results of operations.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**OVERVIEW**

BancorpSouth, Inc. (the Company) is a regional financial holding company headquartered in Tupelo, Mississippi with \$13.4 billion in assets at June 30, 2010. BancorpSouth Bank (the Bank), the Company's wholly-owned banking subsidiary, has commercial banking operations in Mississippi, Tennessee, Alabama, Arkansas, Texas,

Table of Contents

Louisiana, Florida and Missouri. The Bank's insurance agency subsidiary also operates an office in Illinois. The Bank and its consumer finance, credit insurance, insurance agency and brokerage subsidiaries provide commercial banking, leasing, mortgage origination and servicing, insurance, brokerage and trust services to corporate customers, local governments, individuals and other financial institutions through an extensive network of branches and offices. Management's discussion and analysis provides a narrative discussion of the Company's financial condition and results of operations. For a complete understanding of the following discussion, you should refer to the unaudited consolidated financial statements for the three-month and six-month periods ended June 30, 2010 and 2009 and the notes to such financial statements found under Part I, Item 1. Financial Statements of this report. This discussion and analysis is based on reported financial information.

As a financial holding company, the financial condition and operating results of the Company are heavily influenced by economic trends nationally and in the specific markets in which the Company's subsidiaries provide financial services. Generally, during the past two years, the pressures of the national and regional economic cycle have created a difficult operating environment for the financial services industry. The Company is not immune to such pressures and the continuing economic downturn has had a negative impact on the Company and its customers in all of the markets that it serves. The impact was reflected in a decline in credit quality and increases in the Company's measures of non-performing loans and leases (NPLs) and net charge-offs, compared to the first six months of 2009. While these measures have increased, management believes that the Company is well positioned with respect to overall credit quality and the strength of its allowance for credit losses to meet the challenges of the current economic cycle. Management believes, however, that continued weakness in the economic environment could adversely affect the strength of the credit quality of the Company's assets overall. Therefore, management will continue to focus on early identification and decisive resolution of potential credit issues.

Most of the revenue of the Company is derived from the operation of its principal operating subsidiary, the Bank. The financial condition and operating results of the Bank are affected by the level and volatility of interest rates on loans, investment securities, deposits and other borrowed funds, and the impact of economic downturns on loan demand, collateral value and creditworthiness of existing borrowers. The financial services industry is highly competitive and heavily regulated. The Company's success depends on its ability to compete aggressively within its markets while maintaining sufficient asset quality and cost controls to generate net income.

On April 20, 2010, BP's Deepwater Horizon oil rig exploded and subsequently sank in the Gulf of Mexico just off the Louisiana coast. While the ultimate economic and ecological impact of the Gulf Oil Spill is unknown, the Company has nominal exposure to businesses located in the coastal regions and affected by the Gulf Oil Spill.

The information that follows is provided to enhance comparability of financial information between periods and to provide a better understanding of the Company's operations.

Table of Contents

In addition to financial ratios defined by U.S. GAAP, the Company utilizes tangible shareholders' equity and tangible asset measures when evaluating the performance of the Company. Tangible shareholders' equity is defined by the Company as total shareholders' equity less goodwill and identifiable intangible assets. Tangible assets are defined by the Company as total assets less goodwill and identifiable intangible assets. Management believes the ratio of tangible equity to tangible assets to be an important measure of financial strength of the Company. The following table reconciles tangible assets and tangible shareholders' equity as presented above to U.S. GAAP financial measures as reflected in the Company's unaudited consolidated financial statements:

	June 30,	
	2010	2009
	(In thousands)	
Tangible Assets:		
Total assets	\$ 13,421,004	\$ 13,297,819
Less: Goodwill	270,097	270,097
Other identifiable intangible assets	21,534	25,502
 Total tangible assets	 \$ 13,129,373	 \$ 13,002,220
 Tangible Shareholders' Equity		
Total shareholders' equity	\$ 1,240,259	\$ 1,274,947
Less: Goodwill	270,097	270,097
Other identifiable intangible assets	21,534	25,502
 Total tangible shareholders' equity	 \$ 948,628	 \$ 979,348

FINANCIAL HIGHLIGHTS

The Company reported a net loss of \$12.6 million for the second quarter of 2010, compared to net income of \$33.9 million for the same quarter of 2009. For the first six months of 2010, the Company recorded a net loss of \$4.2 million compared to net income of \$63.3 million for the first six months of 2009. The provision for credit losses was the most significant factor contributing to this decrease in earnings as the charge in the second quarter and first six months of 2010 was \$62.4 million and \$105.9 million, respectively, compared to a charge of \$17.6 million and \$32.5 million for the second quarter and first six months of 2009, respectively. The larger provision reflected the impact of a significant increase in NPLs, from \$97.7 million at June 30, 2009 to \$302.3 million at June 30, 2010, as the length and severity of the recession, as well as the lackluster current economic environment affected even some of the most well-established borrowers of the Company. This pressure continues to be evident on real estate construction, acquisition, and development loans and more specifically on residential construction, acquisition and development and consumer mortgage loans. Many of these loans became collateral-dependent in the second quarter requiring recognition of an impairment loss to reflect the decline in real estate values. While encouraged by some recent indicators that suggest economic stabilization, management expects real estate values to remain under pressure, at least over the near term. The Company could still experience future losses once recovery of real estate values becomes evident.

The primary source of revenue for the Company is the amount of net interest revenue earned by the Bank. Net interest revenue is the difference between interest earned on loans and investments and interest paid on deposits and other obligations. During the second quarter of 2010 and first six months of 2010, the Company experienced a \$24.8 million and \$115.7 million decline in average interest earning assets, respectively, and a \$109.8 million and \$227.7 million decline in average interest costing liabilities, respectively, when compared to the second quarter and first six months of 2009. As a result of a declining interest rate environment, average interest-bearing liabilities declining at a faster rate than average interest-earning assets and a 5.6% and 6.3% increase in average noninterest-bearing demand deposits for the second quarter and first six months of 2010, respectively, net interest revenue only decreased 1.5% for the second quarter of 2010 compared to the second quarter of 2009 and remained relatively stable at \$221.2 million

for the first six months of 2010 compared to \$220.8 million for the same period of 2009.

Table of Contents

While loan demand has been weak, the Company has managed to replace loan runoff with new loan production. During these periods, East Texas and Louisiana have provided most of the new loan production. The Company attempts to diversify its revenue stream by increasing the amount of revenue received from mortgage lending operations, insurance agency activities, brokerage and securities activities and other activities that generate fee income. Management believes this diversification is important to reduce the impact of fluctuations in net interest revenue on the overall operating results of the Company. Noninterest revenue decreased 29.1% for the second quarter of 2010 compared to the second quarter of 2009 and 18.8% for the first six months of 2010 compared to the first six months of 2009. One of the primary contributors to the decrease in noninterest revenue was mortgage lending revenue, which decreased 116.5% to a negative \$2.3 million for the second quarter of 2010 compared to \$14.0 million for the second quarter of 2009 and decreased 87.4% to \$2.7 million for the first six months of 2010 compared to \$21.6 million for the first six months of 2009. The decrease in mortgage lending revenue was a result of the decrease in the fair value of MSR's of \$8.3 million for the second quarter of 2010 compared to an increase in the fair value of MSR's of \$5.0 million for the second quarter of 2009 and the decrease in the fair value of MSR's of \$8.3 million for the first six months of 2010 compared to an increase in the fair value of MSR's of \$3.5 million for the first six months of 2009. The decrease in mortgage lending revenue was also a result of the decrease in mortgage originations, which fell to \$290.6 million for the second quarter of 2010 compared to originations of \$507.6 million for the same period of 2009 and fell to \$498.0 million for the first six months of 2010 compared to \$931.9 million for the first six months of 2009. The majority of originations in the first six months of 2009 were refinancings resulting from low mortgage interest rates.

Also contributing to the decrease in noninterest revenue was net security losses of approximately \$585,000 during the second quarter of 2010 resulting from the recognition of approximately \$637,000 in other-than-temporary impairment on pooled trust preferred securities. For the six months ended June 30, 2010, the Company recognized \$1.3 million in other-than-temporary impairment on pooled trust preferred securities, which somewhat offset the \$2.0 million gains recognized on the sales and calls of available-for-sale securities and the calls of held-to-maturity securities. Security gains during the three and six months ended June 30, 2009 were not significant. Other miscellaneous noninterest revenue decreased \$9.5 million, or 74.7%, for the second quarter of 2010 compared to the second quarter of 2009 and decreased \$11.7 million, or 62.2%, for the first six months of 2010 compared to the first six months of 2009. During the second quarter of 2009, the Company recorded interest on tax refunds of \$2.8 million, gains on the sale of student loans of \$3.7 million, a gain of \$1.8 million on the sale of the Company's remaining shares of MasterCard, Inc. common stock, and an insurance recovery on a casualty loss of \$1.3 million.

Noninterest expense decreased 3.2% for the second quarter of 2010 compared to the same period in 2009 and decreased 1.4% for the first six months of 2010 compared to the same period in 2009. This decrease in noninterest expense for the second quarter and first six months of 2010 was primarily a result of the Company being assessed a \$6.1 million special FDIC assessment during the second quarter of 2009 as part of the restoration plan for the Deposit Insurance Fund. The Company continues to focus attention on controlling noninterest expense. The major components of net income are discussed in more detail in the various sections that follow.

The Company's capital and liquidity remained strong during the second quarter of 2010. Total shareholders' equity to total assets ratio was 9.24% at June 30, 2010, compared to 9.59% at June 30, 2009. Also, demand deposits increased 15.5%, contributing to an overall deposit increase of 10.5% at June 30, 2010 compared to June 30, 2009. This increase in deposits allowed the Company to reduce its reliance on short-term borrowings, which decreased \$746.0 million, or 60.6%, at June 30, 2010 compared to June 30, 2009.

RESULTS OF OPERATIONS**Net Interest Revenue**

Net interest revenue is the difference between interest revenue earned on assets, such as loans, leases and securities, and interest expense paid on liabilities, such as deposits and borrowings, and continues to provide the Company with its principal source of revenue. Net interest revenue is affected by the general level of interest rates, changes in interest rates and changes in the amount and composition of interest earning assets and interest bearing liabilities. The Company's long-term objective is to manage interest earning assets and interest bearing liabilities to maximize

Table of Contents

net interest revenue, while balancing interest rate, credit and liquidity risk. Net interest margin is determined by dividing fully taxable equivalent net interest revenue by average earning assets. For purposes of the following discussion, revenue from tax-exempt loans and investment securities has been adjusted to a fully taxable equivalent (FTE) basis, using an effective tax rate of 35%. The following tables present average interest earning assets, average interest bearing liabilities, net interest revenue-FTE, net interest margin-FTE and net interest rate spread for the three months and six months ended June 30, 2010 and 2009:

- (5) Includes taxable equivalent adjustment to interest of \$0.9 million for the six months ended June 30, 2010 and 2009 using an effective tax rate of 35%.

Table of Contents

Net interest revenue-FTE for the three-month period ended June 30, 2010 decreased \$1.5 million, or 1.4%, compared to the same period in 2009. Net interest revenue-FTE for the six-month period ended June 30, 2010 increased \$0.3 million or 0.6%, compared to the same period in 2009. The decrease in net interest revenue for the three month period was the result of the continued deposit growth, combined with a lack of loan growth, resulting in an increase in short-term investments that have lower average rates earned than the average rates paid on the deposit growth. The slight increase in net interest revenue for the first six months of 2010 was primarily a result of the increase in low cost demand deposits coupled with the decline in other time deposit rates and average short-term borrowings which more than offset the declining loan and investment yields experienced by the Company as a result of reduced interest rates. Interest revenue-FTE for the three-month period ended June 30, 2010 decreased \$8.1 million, or 5.1%, compared to the same period in 2009. Interest revenue-FTE for the six-month period ended June 30, 2010 decreased \$3.9 million, or 1.2%, compared to the same period in 2009. The decrease in interest revenue-FTE for the second quarter and the first six months of 2010 was primarily a result of the declining loan yields as interest rates were at historically low levels resulting in an overall decrease in the yield on average interest-earning assets of 25 basis points for the second quarter of 2010, compared to the same period in 2009 and decreased 19 basis points for the first six months of 2010, compared to the same period in 2009. Average interest-earning assets decreased \$24.8 million, or 0.2%, for the three-month period ended June 30, 2010, compared to the same period in 2009 and decreased \$115.7 million, or 1.0% for the six-month period ended June 30, 2010, compared to the same period in 2009. The decrease in average interest earning assets for the second quarter and first six months of 2010 was primarily a result of the decrease in loans held for sale as the Company sold its remaining portfolio of student loans during the first six months of 2009, lower levels of mortgages held for sale resulting from lower loan production volume and lower levels of held-to-maturity securities as the proceeds from some maturing securities were used to pay off short-term borrowings.

Interest expense for the three-month period ended June 30, 2010 decreased \$6.5 million, or 15.1%, compared to the same period in 2009. Interest expense for the six-month period ended June 30, 2010 decreased \$15.5 million, or 17.4% compared to the same period in 2009. The decrease in interest expense for the second quarter and first six months of 2010 was a result of the increase in lower cost interest bearing demand deposits combined with the decrease in other time deposit and short-term borrowing rates resulting in an overall decrease in the average rate paid of 24 basis points for the second quarter of 2010 and 28 basis points for the first six months of 2010. Average interest bearing liabilities decreased \$109.8 million, or 1.1%, for the three-month period ended June 30, 2010 compared to the same period in 2009 and decreased \$227.7 million, or 2.2% for the six-month period ended June 30, 2010 compared to the same period in 2009. The decrease in average interest bearing liabilities for the second quarter and first six months of 2010 was primarily a result of the decrease in short-term borrowings, with this decrease somewhat offset by the increase in lower cost interest bearing demand deposits.

Net interest margin decreased to 3.71% for the three months ended June 30, 2010 from 3.75% for the three months ended June 30, 2009 and increased to 3.79% for the six months ended June 30, 2010 from 3.75% for the six months ended June 30, 2009. The decrease in the net interest margin for the second quarter of 2010 was primarily a result of the higher level of average nonaccrual loans and the reversal of current year interest for loans placed on nonaccrual status or charged off during the second quarter. The increase in the net interest margin for the first six months of 2010 was a result of the Company's ability to reduce higher rate time deposits while increasing lower cost demand deposits and short-term Federal Home Loan Bank (FHLB) and other borrowings. The Company also experienced a decrease in average earning assets, primarily as a result of the decrease in loans held for sale as the Company sold its remaining portfolio of student loans during 2009 and lower levels of mortgages held for sale resulting from lower loan production volume.

Interest Rate Sensitivity

The interest rate sensitivity gap is the difference between the maturity or repricing opportunities of interest sensitive assets and interest sensitive liabilities for a given period of time. A prime objective of the Company's asset/liability management is to maximize net interest margin while maintaining a reasonable mix of interest sensitive assets and liabilities. The following table presents the Company's interest rate sensitivity at June 30, 2010:

Table of Contents

	Interest Rate Sensitivity - Maturing or Repricing Opportunities			
	0 to 90 Days	91 Days to One Year	Over One Year to Five Years	Over Five Years
	(In thousands)			
Interest earning assets:				
Interest bearing deposits with banks	\$ 111,040	\$	\$	\$
Federal funds sold and securities purchased under agreement to resell	75,000			
Held-to-maturity securities	65,344	285,306	501,427	295,080
Available-for-sale and trading securities	108,450	27,220	387,962	439,060
Loans and leases, net of unearned income	4,927,029	1,730,306	2,759,595	229,972
Loans held for sale	68,024	387	2,314	25,262
Total interest earning assets	5,354,887	2,043,219	3,651,298	989,374
Interest bearing liabilities:				
Interest bearing demand deposits and savings	5,495,569			
Other time deposits	825,243	1,581,427	1,396,097	24,328
Federal funds purchased and securities sold under agreement to repurchase, short-term FHLB borrowings and other short-term borrowings	482,609	2,000		
Long-term FHLB borrowings and junior subordinated debt securities			54,249	216,812
Other				86
Total interest bearing liabilities	6,803,421	1,583,427	1,450,346	241,226
Interest rate sensitivity gap	\$ (1,448,534)	\$ 459,792	\$ 2,200,952	\$ 748,148
Cumulative interest sensitivity gap	\$ (1,448,534)	\$ (988,742)	\$ 1,212,210	\$ 1,960,358

In the event interest rates increase after June 30, 2010, based on this interest rate sensitivity gap, it is likely that the Company would experience slightly decreased net interest revenue in the following one-year period, as the cost of funds would increase at a more rapid rate than interest revenue on interest-earning assets. Conversely, in the event interest rates decrease after June 30, 2010, based on this interest rate sensitivity gap, the Company would likely experience increased net interest revenue in the following one-year period. It should be noted that the balances shown in the table above are at June 30, 2010 and may not be reflective of positions at other times during the year or in subsequent periods. Allocations to specific interest rate sensitivity periods are based on the earlier of maturity or repricing dates.

As of June 30, 2010, the Bank had \$2.6 billion in variable rate loans with interest rates determined by a floor, or minimum rate. This portion of the loan portfolio had an average interest rate earned of 4.36%, an average maturity of 25 months and a fully-indexed interest rate of 3.72% at June 30, 2010. The fully-indexed interest rate is the interest rate that these loans would be earning without the effect of interest rate floors. While the Bank benefits from interest rate floors in the current interest rate environment, loans currently earning their floored interest rate may not experience an immediate impact on the interest rate earned should key indices rise. Examples of key indices include the Wall Street Journal prime rate, the Bank's prime rate and the London Interbank Offering Rate. The Bank's average

interest rate earned will be negatively impacted by the timing and magnitude of a rise in key indices.

Interest Rate Risk Management

Interest rate risk refers to the potential changes in net interest income and the economic value of equity (EVE) resulting from adverse movements in interest rates. EVE is defined as the net present value of the balance sheet 's cash flow. EVE is calculated by discounting projected principal and interest cash flows under the current interest

Table of Contents

rate environment. The present value of asset cash flows less the present value of liability cash flows derives the net present value of the Company's balance sheet. The Company's Asset / Liability Committee utilizes financial simulation models to measure interest rate exposure. These models are designed to simulate the cash flow and accrual characteristics of the Company's balance sheet. In addition, the models incorporate assumptions about the direction and volatility of interest rates, the slope of the yield curve, and the changing composition of the Company's balance sheet arising from both strategic plans and customer behavior. Finally, management makes assumptions regarding loan and deposit growth, pricing, and prepayment speeds.

The sensitivity analysis included below delineates the percentage change in net interest income and EVE derived from instantaneous parallel rate shifts of plus and minus 200 basis points. The impact of a minus 200 basis point rate shock as of June 30, 2010 and 2009 was not considered meaningful because of the historically low interest rate environment. Variances were calculated from the base case scenario, which reflected prevailing market rates. Management assumed all non-maturity deposits have an average life of one day for calculating EVE, which management believes is the most conservative approach.

	Net Interest Income % Variance from Base Case Scenario	
	June 30, 2010	June 30, 2009
Rate Shock		
+200 basis points	-4.9%	-6.8%
-200 basis points	n/a	n/a

	Economic Value of Equity % Variance from Base Case Scenario	
	June 30, 2010	June 30, 2009
Rate Shock		
+200 basis points	-10.8%	-10.1%
-200 basis points	n/a	n/a

In addition to instantaneous rate shocks, the Company monitors interest rate exposure through simulations of gradual interest rate changes over a 12-month time horizon. The results of these analyses are included in the following table:

	Net Interest Income % Variance from Base Case Scenario	
	June 30, 2010	June 30, 2009
Rate Ramp		
+200 basis points	-4.1%	-5.5%
-200 basis points	n/a	n/a

Provision for Credit Losses and Allowance for Credit Losses

In the normal course of business, the Bank assumes risks in extending credit. The Bank manages these risks through underwriting in accordance with its lending policies, loan review procedures and the diversification of its loan portfolio. Although it is not possible to predict credit losses with certainty, management regularly reviews the characteristics of the loan portfolio to determine its overall risk profile and quality.

The provision for credit losses is the periodic cost of providing an allowance or reserve for estimated probable losses on loans and leases. The Loan Loss Committee bases its estimates of losses on three primary components:

(1) estimates of inherent losses which may exist in various segments of performing loans and leases; (2) specifically identified losses in individually analyzed credits; and (3) qualitative factors which may impact the performance of the portfolio. Inherent losses are estimated based upon the probability of default of individual borrowers and the amount

of losses expected in the event of any such default. Factors such as financial condition of the borrower and guarantor, recent credit performance, delinquency, liquidity, cash flows, collateral type and value are used to assess credit risk. Expected loss estimates are influenced by the historical losses experienced by the Bank for loans and leases of comparable creditworthiness and structure. Specific loss assessments are performed for loans and leases of significant size and delinquency based upon the collateral protection and expected future cash flows to determine

Table of Contents

the amount of impairment under FASB ASC 310, Receivables (FASB ASC 310). In addition, qualitative factors such as changes in economic and business conditions, concentrations of risk, loan and lease growth, acquisitions and changes in portfolio risk due to regulatory changes are considered in determining the adequacy of the level of the allowance for credit losses.

Attention is paid to the quality of the loan portfolio through a formal loan review process. An independent loan review department of the Bank is responsible for reviewing the credit rating and classification of individual credits and assessing trends in the portfolio, adherence to internal credit policies and procedures and other factors that may affect the overall adequacy of the allowance. The Board of Directors of the Bank has appointed a loan loss reserve valuation committee (the Loan Loss Committee) that is responsible for ensuring that the allowance for credit losses provides coverage of both known and inherent losses. The Loan Loss Committee meets at least quarterly to determine the amount of adjustments to the allowance for credit losses. The Loan Loss Committee is composed of senior management from the Bank's loan administration and finance departments. In 2010, the Company established a real estate risk management group and an Impairment Committee. The real estate risk management group oversees full compliance with laws, regulations and U.S. GAAP related to lending activities where real estate is the primary collateral. The Impairment Committee meets on a monthly basis in order to review individual loans that have previously been identified as candidates for specific impairment.

Loans of \$200,000 or more which become 60 or more days past due are identified for review and the Impairment Committee decides whether an impairment exists and to what extent a specific allowance for loss should be made. Loans not yet meeting these requirements may also be identified by management for impairment review. Loans subject to such review are evaluated as to collateral dependency, current collateral value, guarantor or other financial support and likely disposition. Each such loan is evaluated for impairment individually. The evaluation for impairment of real estate loans generally focus on the fair value of collateral obtained from appraisals as the repayment of these loans may be dependent on the liquidation of the underlying collateral. In certain circumstances other information such as comparable sales data is deemed to be a more reliable indicator of value than the most recent appraisal. In these instances, that information is used in determining the impairment recorded for such loans. As the repayment of commercial and industrial loans is dependent upon cash flows of a business or guarantor support, the evaluation for impairment generally focuses on the discounted future cash flows of the borrower or guarantor support while considering the projected liquidation of any pledged collateral. The Impairment Committee reviews the results of each evaluation and approves the final impairment amounts which are then included in the analysis of the adequacy of the allowance for loan and lease losses in accordance with FASB ASC 310. Loans identified for impairment are placed in non-accrual status.

At June 30, 2010, impaired loans totaled \$188.3 million which was net of cumulative charge offs of \$54.9 million and had specific reserves of \$40.7 million included in the allowance for credit losses. All impaired loans at June 30, 2010 were from the Company's commercial or residential real estate portfolios and, accordingly, were evaluated for impairment based on the fair value of the underlying collateral. As part of the impairment review process, appraisals are used to determine the property values. The appraised values that are used are based on the disposition value of the property which assumes Bank ownership of the property as-is and a 180 day marketing period. If a current appraisal or one with an inspection date within the past 12 months using the necessary assumptions is not in the file, a new appraisal is ordered. In cases where an impairment exists and a current appraisal is not available at the time of review, a staff appraiser may determine an estimated value based upon earlier appraisals, sales contract, approved foreclosure bids, comparable sales, officer estimates or current market conditions until a new appraisal is received. Once a current appraisal is received, the value used in the review will be updated and any adjustments to reflect further impairments are made. Appraisals are obtained from State-certified Appraisers based on certain assumptions which may include foreclosure status, bank ownership, other real estate owned marketing period of 180 days, costs to sell, construction or development status and the highest and best use of the property. A staff appraiser may make adjustments to appraisals based on sales contracts, comparable sales and other pertinent information if an appraisal does not incorporate the effect of these assumptions.

When a guarantor is relied upon as a source of repayment, the Company makes an analysis of the strength of the guaranty. This analysis consists of a review of the guarantor's personal and business financial statements and credit

history and, as needed, a review of the guarantor's tax returns and the preparation of a cash flow analysis of the guarantor. Management will continue to update its analysis on individual guarantors as circumstances change. Due

Table of Contents

to the continued weakness in the economy, subsequent analysis may result in the identification of the inability of some guarantors to perform under the agreed upon terms.

Any loan or portion thereof which is classified as loss by regulatory examiners or which is determined by management to be uncollectible, because of factors such as the borrower's failure to pay interest or principal, the borrower's financial condition, economic conditions in the borrower's industry or the inadequacy of underlying collateral, is charged off.

The following table provides an analysis of the allowance for credit losses for the periods indicated:

Ratios:				
Net charge-offs to average loans (annualized)	2.08%	0.55%	1.67%	0.55%

Edgar Filing: BANCORPSOUTH INC - Form 10-Q

Provision for credit losses to average loans and leases, net of unearned (annualized)	2.57%	0.72%	2.18%	0.67%
Allowance for credit losses to loans and leases, net of unearned	2.08%	1.42%	2.08%	1.42%
Allowance for credit losses to net charge- offs (annualized)	99.39%	257.34%	123.65%	260.95%

The increase in the provision for credit losses in the second quarter and first six months of 2010 compared to the second quarter and first six months of 2009 continues to be primarily a result of the increased credit risk experienced by the Company attributable to the impact the length and severity of the recession is having on the liquidity of our borrowers and guarantors, as well as the lackluster prevailing economic environment. Increases in

Table of Contents

net charge-offs in the second quarter and first six months of 2010 along with a significant increase in NPLs resulted in a provision for credit losses of \$62.4 million during the second quarter of 2010 compared to a provision of \$17.6 million in the same quarter of 2009 and a provision for credit losses of \$105.9 million during the first six months of 2010 compared to a provision of \$32.5 million for the same period in 2009. Annualized net charge-offs as a percentage of average loans and leases increased to 2.08% for the second quarter of 2010 compared to net charge-offs of 0.55% for the second quarter of 2009 and increased to 1.67% for the first six months of 2010 compared to 0.55% for the first six months of 2009. The Company continues to experience increased losses within the real estate construction, acquisition and development segment of its loan portfolio and in its consumer mortgage portfolio. These portfolios experienced increased losses in the second quarter and first six months of 2010 compared to the same periods in 2009. This was primarily a result of the weakened financial condition of such borrowers and guarantors. Their weakened state has hindered their ability to service their loans with the Company which has caused a number of loans to become collateral dependent. Once it is determined the loans repayment is dependent upon the underlying collateral, the loan is charged down to net realizable value or there is a specific reserve allocated to the loan. This process has resulted in an increased level of charge-offs in the first half of 2010. The increased level of charge-offs has caused the ratio of the allowance for credit losses to annualized charge-offs to decline below historic levels. We continue to believe that the current levels of the allowance for credit losses to be adequate as 70% of nonaccrual loans have been charged down to net realizable value or have specific reserves to reflect recent appraised values. This has resulted in impaired loans having a net book value of 61% of their principal balance. Another important factor considered is the coverage of non-performing loans that are not impaired by reserves that have not been specifically identified for impaired loans. As of June 30, 2010, that coverage was 140% compared to 219% at June 30, 2009. While some recent indicators suggest economic stabilization, management expects real estate values to remain under pressure, at least over the near term.

The breakdown of the allowance by loan and lease category is based, in part, on evaluations of specific loan and lease histories and on economic conditions within specific industries or geographical areas. Accordingly, because all of these conditions are subject to change, the allocation is not necessarily indicative of the breakdown of any future allowance or losses. The following table presents (i) the breakdown of the allowance for credit losses by loan and lease category and (ii) the percentage of each category in the loan and lease portfolio to total loans and leases at the dates indicated:

	June 30, 2010		June 30, 2009		December 31, 2009	
	Allowance for Credit Losses	% of Total Loans and Leases	Allowance for Credit Losses	% of Total Loans and Leases	Allowance for Credit Losses	% of Total Loans and Leases

The Company's revenue from mortgage lending typically fluctuates as mortgage interest rates change and is primarily attributable to two activities—origination and sale of new mortgage loans and servicing mortgage loans. The Company's normal practice is to originate mortgage loans for sale in the secondary market and to either retain or release the associated MSR with the loan sold.

Origination revenue, a component of mortgage lending revenue, is comprised of gains or losses from the sale of the mortgage loans originated, origination fees, underwriting fees and other fees associated with the origination of loans. Mortgage loan origination volumes of \$290.6 million and \$507.6 million produced origination revenue of \$4.5 million and \$8.5 million for the quarters ended June 30, 2010 and 2009, respectively. Origination volume of \$498.0 million and \$931.9 million produced origination revenue of \$8.0 million and \$17.0 million for the six months ended June 30, 2010 and 2009, respectively. Origination volumes for the first six months of 2009 were driven by significant volumes of refinancings during that low mortgage interest rate period.

Revenue from the servicing process, another component of mortgage lending revenue, includes fees from the actual servicing of loans. Revenue from the servicing of loans was \$2.9 million and \$2.6 million for the quarters ended June 30, 2010 and 2009, respectively. For the six months ended June 30, 2010 and 2009, revenue from the servicing of loans was \$5.8 million and \$5.1 million, respectively. Mortgage lending revenue is also impacted by principal payments, prepayments and payoffs on loans in the servicing portfolio. Decreases in value from principal payments, prepayments and payoffs were \$1.4 million and \$2.1 million for the quarters ended June 30, 2010 and

Table of Contents

2009, respectively. Decreases in value from principal payments, prepayments and payoffs were \$2.7 million and \$4.0 million for the six months ended June 30, 2010 and 2009, respectively. Changes in the fair value of the Company's MSR's are generally a result of changes in mortgage interest rates from the previous reporting date. An increase in mortgage interest rates typically results in an increase in the fair value of the MSR's while a decrease in mortgage interest rates typically results in a decrease in the fair value of MSR's. The Company does not hedge the change in fair value of its MSR's and is susceptible to significant fluctuations in their value in changing interest rate environments. Reflecting this sensitivity to interest rates, the fair value of MSR's decreased \$8.3 million for the second quarter of 2010 and increased \$5.0 million for the second quarter of 2009. The fair value of MSR's decreased \$8.3 million for the six months ended June 30, 2010 and increased \$3.5 million for the six months ended June 30, 2009.

The following tables present the Company's mortgage lending operations for the three months and six months ended June 30, 2010 and 2009:

	Three months ended June 30,		% Change

NM=not meaningful

Credit card, debit card and merchant fees increased for the comparable three-month and six-month periods as a result of an increase in the number and monetary volume of items processed. Service charges on deposit accounts

Table of Contents

increased slightly for the comparable three-month periods but remained relatively stable for the comparable six-month periods. Trust income increased for the comparable three-month and six-month periods primarily as a result of increases in the value of assets under management or in custody.

Net security losses for the three-month period ending June 30, 2010 were primarily a result of the approximately \$637,000 other-than-temporary impairment charge related to the Company's investment in pooled trust preferred securities. Net security gains for the six-month period ending June 30, 2010 was a result of sales and calls of securities from the available-for-sale portfolio and calls of securities from the held-to-maturity portfolio, with these net gains offset by the \$1.3 million other-than-temporary impairment charge related to the Company's investment in pooled trust preferred securities.

Insurance commissions remained relatively stable for the comparable six-month periods. Annuity fees decreased for the comparable three-month and six-month periods as a result of the prevailing interest rate environment. Brokerage commissions and fees increased for the comparable three-month and six-month periods because activity increased as the financial markets recovered somewhat. Other miscellaneous income decreased for the comparable three-month and six-month periods as other miscellaneous income in the first six months of 2009 included various non-recurring items such as interest on tax refunds of \$2.8 million, a gain of \$3.4 million from the sale of student loans, a gain of \$1.8 million on the sale of the Company's remaining shares of MasterCard, Inc. common stock, and an insurance recovery of \$1.3 million related to a casualty loss.

Noninterest Expense

The components of noninterest expense for the three months and six months ended June 30, 2010 and 2009 and the corresponding percentage changes are shown in the following tables:

	Three months ended June 30,		% Change
	2010	2009	
	(Dollars in thousands)		
Salaries and employee benefits	\$ 68,189	\$ 70,092	(2.7)%
Occupancy, net	10,527	10,492	0.3

Amortization of intangibles	1,999	2,623	(23.8)
Legal	2,641	2,477	6.6
Postage and shipping	2,538	2,470	2.8
Other miscellaneous expense	30,446	29,679	2.6
Total noninterest expense	\$ 240,499	\$ 243,984	(1.4)%

Salaries and employee benefits expense for the three months and six months ended June 30, 2010 decreased slightly compared to the same period in 2009, primarily because the Company employed fewer people during 2010 combined with a decrease in the amounts accrued under the Company's incentive plans. Equipment expense remained stable for the three months ended June 30, 2010 compared to the same period in 2009 but decreased for the comparable six-month periods primarily because of decreased depreciation. The decrease in deposit insurance assessments for the three months and six months ended June 30, 2010 was primarily a result of the special FDIC assessment of \$6.1 million during the second quarter of 2009 with no special assessment during 2010, offset somewhat by deposit growth, accrual adjustments and a slightly higher assessment rate.

Foreclosed property expense increased for the three months and six months ended June 30, 2010 compared with the same periods in 2009 as the Company experienced larger losses on the sale and writedown of other real estate owned as a result of the decline in property values attributable to the prevailing economic environment. The following tables present the components of foreclosed property expense for the three months and six months ended June 30, 2010 and 2009:

	Three months ended June 30,		% Change
	2010	2009	
	(Dollars in thousands)		
Loss on sale of other real estate owned	\$ 830	\$ 263	215.6%
Writedown of other real estate owned	2,388	476	401.7
Other foreclosed property expense	595	575	3.5

	June 30,		
	2010	2009	% Change
	(Dollars in thousands)		
Loss on sale of other real estate owned	\$ 1,455	\$ 1,603	(9.2)%
Writedown of other real estate owned	4,478	661	577.5
Other foreclosed property expense	1,418	1,352	4.9
Total foreclosed property expense	\$ 7,351	\$ 3,616	103.3%

Table of Contents

While the Company experienced some minor fluctuations in various components of other noninterest expense, including advertising, telecommunications, legal, data processing, and amortization of intangibles, total noninterest expense remained relatively stable for the three months and six months ended June 30, 2010, compared with the same periods in 2009.

Income Tax

The Company recorded an income tax benefit of \$3.4 million for the second quarter of 2010, compared to income tax expense of \$16.0 million for the second quarter of 2009. For the six-month period ended June 30, 2010, income tax benefit was approximately \$578,000, compared to income tax expense of \$29.2 million for the same period in 2009. The income tax benefit for the second quarter and first six months of 2010 resulted from net loss before tax of \$12.6 million and \$4.2 million for the second quarter and first six months of 2010 compared to net income before tax of \$49.8 million and \$92.6 million for the second quarter and first six months of 2009. The effective tax rates for the second quarters of 2010 and 2009 were 21.3% and 32.0%, respectively. The effective tax rates for the first six months of 2010 and 2009 were 12.2% and 31.6%, respectively. The decrease in the effective tax rate for the second quarter and first six months of 2010 compared to the second quarter and first six months of 2009 was a result of tax-exempt income remaining relatively stable while taxable income decreased.

FINANCIAL CONDITION

The percentage of earning assets to total assets measures the effectiveness of management's efforts to invest available funds into the most efficient and profitable uses. Earning assets at June 30, 2010 were \$12.0 billion, or 89.7% of total assets, compared with \$11.9 billion, or 90.7% of total assets, at December 31, 2009.

Loans and Leases

The Bank's loan and lease portfolio represents the largest single component of the Company's earning asset base, comprising 81.1% of average earning assets during the second quarter of 2010. The Bank's lending activities include both commercial and consumer loans and leases. Loan and lease originations are derived from a number of sources, including direct solicitation by the Bank's loan officers, existing depositors and borrowers, builders, attorneys, walk-in customers and, in some instances, other lenders, real estate broker referrals and mortgage loan companies. The Bank has established systematic procedures for approving and monitoring loans and leases that vary depending on the size and nature of the loan or lease, and applies these procedures in a disciplined manner. The Company's loans and leases are widely diversified by borrower and industry. Loans and leases, net of unearned income, totaled \$9.6 billion at June 30, 2010, representing a slight decrease from \$9.8 billion at December 31, 2009. The decrease in loans and leases, net of unearned income, was primarily a result of continued low loan demand in the markets served by the Company; however, the Company was able to replace loan runoff with new loan production, particularly out of its East Texas and Louisiana markets.

The following table shows the composition of the Company's gross loans and leases by collateral type at the dates indicated:

Table of Contents

	2010	June 30, 2009 (In thousands)	December 31, 2009

Commercial and Industrial - Commercial and industrial loans are loans and leases to finance business operations, equipment and owner-occupied facilities primarily for small and medium-sized enterprises. These include both lines of credit for terms of one year or less and term loans which are amortized over the useful life of the assets financed. Personal guarantees are generally required for these loans. Also included in this category are loans to finance agricultural production and business credit card lines.

Real Estate Consumer Mortgages Consumer mortgages are first- or second-lien loans to consumers secured by a primary residence or second home. These loans are generally amortized over terms up to 15 or 20 years with maturities of 3 to 5 years. The loans are secured by properties located within the local market area of the community bank which originates and services the loan. These loans are underwritten in accordance with the Bank's general loan policies and procedures which require, among other things, proper documentation of each borrower's financial condition, satisfactory credit history and property value. Consumer mortgages outstanding declined during 2009 as the housing sector slowed and lower long-term mortgage rates were available. In addition to loans originated through the Bank's branches, the Bank originates and services consumer mortgages sold in the secondary market which are underwritten and closed pursuant to investor and agency guidelines. The Bank's exposure to sub-prime mortgages is minimal.

Table of Contents

Real Estate Home Equity Home equity loans include revolving credit lines which are secured by a first or second lien on a borrower's residence. Each loan is underwritten individually by lenders who specialize in home equity lending and must conform to Bank lending policies and procedures for consumer loans as to borrower's financial condition, ability to repay, satisfactory credit history and the condition and value of collateral. Properties securing home equity loans are located in the local market areas of the community bank originating and servicing the loan. The Bank has not purchased home equity loans from brokers or other lending institutions.

Real Estate Agricultural Agricultural loans include loans to purchase agricultural land and production lines secured by farm land. Agricultural loans outstanding remain stable.

Real Estate Commercial and Industrial-Owner Occupied Commercial and industrial-owner occupied loans include loans secured by business facilities to finance business operations, equipment and owner-occupied facilities primarily for small and medium-sized enterprises. These include both lines of credit for terms of one year or less and term loans which are amortized over the useful life of the assets financed. Personal guarantees are generally required for these loans.

Real Estate Construction, Acquisition and Development Construction, acquisition and development loans include both loans and credit lines for the purpose of purchasing, carrying and developing land into commercial or residential subdivisions. Also included are loans and lines for construction of residential, multi-family and commercial buildings. These loans are often structured with interest reserves to fund interest costs during the construction and development period. Additionally, certain loans are structured with interest only terms. The Bank engages in construction and development lending only in local markets served by its branches. The weakened economy and housing market has negatively impacted builders and developers in particular. Sales of finished houses slowed during 2009 and activity remained slow during the first six months of 2010 which has resulted in lower demand for residential lots and development land. The Company curtailed the origination of new construction and development projects significantly during 2009 and the Company maintained that stance during the first six months of 2010.

The underwriting process for construction, acquisition and development loans with interest reserves is essentially the same as that for a loan without interest reserves and may include analysis of borrower and guarantor financial strength, market demand for the proposed project, experience and success with similar projects, property values, time horizon for project completion and the availability of permanent financing once the project is completed.

Construction, acquisition and development loans with or without interest reserves are inspected periodically to ensure that the project is on schedule and eligible for requested draws. For performing construction, acquisition and development loans, interest is generally recorded as interest income as it is earned. At June 30, 2010, the Company had \$169.8 million in loans that provide for the use of interest reserves with \$1.1 million and \$2.3 million recognized as interest income for the second quarter and first six months of 2010, respectively.

Interest reserves are not included for any renewal period after construction is completed or otherwise ceases, requiring borrowers to make interest payments no less than quarterly. Loans for which construction is complete, or has ceased, and where interest payments are not made on a timely basis are considered non-performing and are generally placed in nonaccrual status. Procedures are in place to restrict the advancement of funds to keep a loan from becoming non-performing with any such advancement identified as a troubled debt restructure.

On a case by case basis, a construction, acquisition and development loan may be extended, renewed or restructured. The real estate risk management group is responsible for reviewing and approving the structure and classification of all construction, acquisition and development loan renewals and modifications above a certain threshold. The analysis performed by the real estate risk management group may include the review of updated appraisals, borrower and guarantor financial condition, construction status and proposed loan structure. If the new terms of the loan meet the criteria of a troubled debt restructuring as set out in FASB ASC 310, the loan is identified as such.

The construction, acquisition and development portfolio may be further categorized by risk characteristics into the following six categories: commercial acquisition and development, residential acquisition and development, multi-family construction, one-to-four family construction, commercial construction and recreation and all other loans.

Table of Contents

Real estate construction, acquisition and development loans were \$1.4 billion at June 30, 2010. The following table shows the Company's real estate construction, acquisition and development portfolio by geographical location at June 30, 2010:

Real Estate Construction,	Alabama and Florida					Texas and Louisiana	Corporate and other
Acquisition and Development	Panhandle	Arkansas	Mississippi	Missouri (In thousands)	Tennessee*

Total	\$ 152,902	\$ 113,520	\$ 360,369	\$ 116,208	\$ 413,017	\$ 203,829	\$ 21,746

* The totals for Tennessee include the greater Memphis, Tennessee area, a portion of which is in northwest Mississippi.

Real Estate Commercial Commercial loans include loans to finance income-producing commercial and multi-family properties. Lending in this category is generally limited to properties located in the Bank's trade area with only limited exposure to properties located elsewhere but owned by in-market borrowers. Loans in this category include loans for neighborhood retail centers, medical and professional offices, single retail stores, warehouses and apartments leased generally to local businesses and residents. The underwriting of these loans takes into consideration the occupancy and rental rates as well as the financial health of the borrower. The Bank's exposure to national retail tenants is minimal. The Bank has not purchased commercial real estate loans from brokers or third-party originators.

Credit Cards Credit cards include consumer MasterCard accounts, Visa accounts and private label accounts for local merchants. The Bank offers credit cards primarily to its deposit and loan customers. Credit card balances outstanding continue to be stable.

All Other All other loans include consumer installment loans and loans and leases to state, county and municipal governments and non-profit agencies. Consumer installment loans include term loans of up to five years secured by automobiles, boats and recreational vehicles. The Bank offers lease financing for vehicles and heavy equipment to state, county and municipal governments and medical equipment to healthcare providers across the southern states.

NPLs consist of non-accrual loans and leases, loans and leases 90 days or more past due, still accruing, and accruing loans and leases that have been restructured (primarily in the form of reduced interest rates and modified payment terms) because of the borrower's and guarantor's weakened financial condition. The Bank's policy provides that loans and leases are generally placed in non-accrual status if, in management's opinion, payment in full of principal or interest is not expected or payment of principal or interest is more than 90 days past due, unless the loan or lease is both well-secured and in the process of collection. The Bank's NPAs consist of NPLs and other real estate owned, which consists of foreclosed properties. The Bank's NPAs, which are carried either in the loan account or other assets on the consolidated balance sheets, depending on foreclosure status, were as follows at the end of each period presented:

45

Table of Contents

	June 30,		December
	2010	2009	31, 2009

NPAs to net loans and leases	3.83%	1.53%	2.51%

NPLs continued to increase at June 30, 2010 compared to December 31, 2009 and June 30, 2009. NPLs were \$302.3 million at the end of the second quarter of 2010, an increase of \$115.8 million from December 31, 2009 and an increase of \$204.6 million from June 30, 2009. Included in NPLs at June 30, 2010 were \$188.3 million of loans that had been subjected to impairment testing. These impaired loans had a specific reserve of \$40.7 million included in the allowance for credit losses of \$200.8 million at June 30, 2010, and were net of \$54.9 million in partial charge-downs previously taken on these impaired loans. NPLs at December 31, 2009 included \$128.5 million of loans that had been subjected to impairment testing. These impaired loans had a specific reserve of \$22.7 million included in the allowance for credit losses of \$176.0 million at December 31, 2009. NPLs at June 30, 2009 included \$36.1 million of loans that had been subjected to impairment testing. These impaired loans had a specific reserve of \$4.0 million included in the allowance for credit losses of \$138.7 million at June 30, 2009.

The following table provides additional details related to the Company's non-performing loans and leases and the allowance for credit losses at the dates indicated:

Table of Contents

	June 30, 2010	2009 (Dollars in thousands)	December 31, 2009

the allowance for all other loans and leases 140% 219% 265%

The increase in other real estate owned from June 30, 2009 to June 30, 2010 was reflective of the general slow-down in the residential real estate sector in certain of the Bank's markets, resulting in increased foreclosures. The Bank recorded losses from the loans that were secured by these foreclosed properties in the allowance for credit losses at the time of foreclosure. The increase in non-accrual loans from June 30, 2009 to June 30, 2010 also reflected the effects of the recent economic environment on the Bank's loan portfolio as a significant portion of the rise in the Bank's NPLs was attributable to problems developing for established customers with real estate related loans, primarily in the Bank's more urban markets in the fourth quarter of 2009 and the first six months of 2010. These problems resulted primarily from the decreased liquidity of certain borrowers and third party guarantors, as well as the declines in appraised real estate values for loans which became collateral dependent in the second quarter, and certain other borrower specific factors. Of the Bank's real estate construction, acquisition and development loans, which totaled \$1.4 billion at June 30, 2010, \$565.9 million represented loans made by the Bank's locations in Alabama and Tennessee, including the greater Memphis, Tennessee area, a portion of which is in northwest Mississippi. These areas have experienced a higher incidence of non-performing loans, primarily as a

Table of Contents

result of a severe downturn in the housing market. Of the Company's total non-performing loans of \$302.3 million at June 30, 2010, \$161.3 million, or 53.4%, were loans made within these markets. These markets continue to be affected by high inventories of unsold homes, unsold lots and undeveloped land intended for use as housing developments. The following table presents the Company's non-performing loans by geographical location:

	Outstanding	90+ Days Past Due still Accruing	Non-accruing Loans (Dollars in thousands)	Restructured Loans, still accruing	NPLs	NPLs as a % of Outstanding
Alabama and Florida Panhandle	\$ 804,746	\$ 728	\$ 43,292	\$ 8,702	\$ 52,722	6.6%
Arkansas	1,334,114	247	10,533	421	11,201	0.8
Mississippi	2,783,367	6,658	47,425	6,003	60,086	2.1
Missouri	689,350	7,383	33,935	353	41,671	6.0
Tennessee*	1,566,054	1,199	105,942	1,429	108,570	6.9
Texas and Louisiana	1,602,263	1,481	9,077	28	10,586	0.7
Corporate and other	867,009		13,554	3,877	17,431	2.0
Total	\$ 9,646,903	\$ 17,696	\$ 263,758	\$ 20,813	\$ 302,267	3.1%

* The totals for Tennessee include the greater Memphis, Tennessee area, a portion of which is in northwest Mississippi.

The ultimate impact of the economic downturn on the Company's financial condition and results of operations will depend on its severity and duration. Continued weakness in the economy could adversely affect the Bank's volume of NPLs. The Bank will continue to remain focused on early identification and effective resolution of potential credit problems. Loans identified as meeting the criteria set out in FASB ASC 310 are identified as troubled debt restructures. The concessions granted most frequently involve reductions or delays in required payments of principal and interest for a specified time, the rescheduling of payments in accordance with a bankruptcy plan or the charge-off of a portion of the loan. In many cases, the conditions of the credit also warrant non-accrual status, even after the restructure occurs. For reporting purposes, if a restructured loan is 90 days or more past due or has been placed in non-accrual status, the restructured loan is included in the loans 90 days or more past due category or the non-accrual loan category of NPAs. At June 30, 2010, restructured loans of \$77.9 million were included in the non-accrual loan category.

At June 30, 2010, the Company did not have any concentration of loans or leases in excess of 10% of total loans and leases outstanding which were not otherwise disclosed as a category of loans or leases. Loan concentrations are considered to exist when there are amounts loaned to multiple borrowers engaged in similar activities which would cause them to be similarly impacted by economic or other conditions. The Bank conducts business in a geographically concentrated area and has a significant amount of loans secured by real estate to borrowers in varying activities and

businesses, but does not consider these factor alone in identifying loan concentrations. The ability of the Bank's borrowers to repay loans is somewhat dependent upon the economic conditions prevailing in the Bank's market areas. In the normal course of business, management becomes aware of possible credit problems in which borrowers exhibit potential for the inability to comply with the contractual terms of their loans and leases, but which do not yet meet the criteria for disclosure as non-performing loans and leases. Historically, some of these loans and leases are ultimately restructured or placed in non-accrual status. At June 30, 2010, the Bank had \$11.2 million of potential problem loans or leases that were not included in the non-accrual loans and leases or in the loans 90 days or more past due categories, but for which management had concerns as to the ability of such borrowers to comply with the contractual terms of their loans and leases.

Collateral for some of the Bank's loans and leases is subject to fair value evaluations that fluctuate with market conditions and other external factors. In addition, while the Bank has certain underwriting obligations related to such evaluations, the evaluations of some real property and other collateral are dependent upon third-party independent appraisers employed either by the Bank's customers or as independent contractors of the Bank. During the current economic cycle, some subsequent fair value appraisals have reported lower values than were originally reported. These declining collateral values could impact future losses and recoveries.

Table of Contents

The following table provides additional details related to the make-up of the Company's loan and lease portfolio and the distribution of NPLs at June 30, 2010:

Loans and leases, net of unearned	Outstanding	90+ Days Past Due still Accruing	Non-accruing Loans	Restructured Loans, still accruing	NPLs	NPLs as a % of Outstanding

Securities

The Company uses the Bank's securities portfolios to make various term investments, to provide a source of liquidity and to serve as collateral to secure certain types of deposits. Held-to-maturity securities increased 11.1% to \$1.1 billion at June 30, 2010, compared to \$1.0 billion at December 31, 2009. Available-for-sale securities were

\$962.7 million at June 30, 2010, compared to \$960.8 million at December 31, 2009, a 0.2% increase.

The following table shows the held-to-maturity and available-for-sale securities portfolios by credit rating as obtained from Moody's rating service as of June 30, 2010:

(1) Not rated securities primarily consist of Mississippi and Arkansas municipal bonds.

Goodwill

The Company's policy is to assess goodwill for impairment at the reporting unit level on an annual basis or sooner if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value. Accounting standards require management to estimate the fair value of each reporting unit in assessing impairment at least annually. The Company's annual assessment date is during the Company's fourth quarter. No events occurred during the second quarter that would indicate the necessity of an earlier goodwill impairment assessment. In the current environment, forecasting cash flows, credit losses and growth in addition to valuing the Company's assets with any degree of assurance is very difficult and subject to significant changes over very short periods of time. Management will continue to update its analysis as circumstances change. As market conditions continue to be volatile and unpredictable, impairment of goodwill related to the Company's reporting units may be necessary in future periods. Goodwill was \$270.1 million at June 30, 2010 and December 31, 2009.

Deposits and Other Interest-Bearing Liabilities

Deposits originating within the communities served by the Bank continue to be the Bank's primary source of funding its earning assets. The Company has been able to compete effectively for deposits in its primary market areas, while continuing to manage the exposure to rising interest rates. The distribution and market share of deposits by type of deposit and by type of depositor are important considerations in the Company's assessment of the stability of its fund sources and its access to additional funds. Furthermore, management attempts to shift the mix and maturity of the deposits depending on economic conditions and within established loan and investment policies, to minimize cost and maximize net interest margin.

The Company's noninterest-bearing, interest-bearing, savings and other time deposits are shown in the following table:

50

Table of Contents

	June 30,	December	
	2010	2009	%
	(Dollars in millions)		Change
Noninterest bearing demand	\$ 1,898	\$ 1,902	(0.2)%
Interest bearing demand	4,726	4,324	9.3
Savings	770	725	6.2
Other time	3,827	3,727	2.7
Total deposits	\$ 11,221	\$ 10,678	5.1%

The increase in deposits at June 30, 2010 compared to December 31, 2009 has been experienced broadly across all of the Company's markets and is a result of the expansion of existing customer relationships and some new customer relationships.

Liquidity and Capital Resources

One of the Company's goals is to provide adequate funds to meet increases in loan demand or any potential increase in the normal level of deposit withdrawals. The Company accomplishes this goal primarily by generating cash from the Bank's operating activities and maintaining sufficient short-term liquid assets. These sources, coupled with a stable deposit base and a strong reputation in the capital markets, allow the Company to fund earning assets and maintain the availability of funds. Management believes that the Bank's traditional sources of maturing loans and investment securities, sales of loans held for sale, cash from operating activities and a strong base of core deposits are adequate to meet the Company's liquidity needs for normal operations over both the short-term and the long-term.

To provide additional liquidity, the Company utilizes short-term financing through the purchase of federal funds and securities sold under agreement to repurchase. Securities sold under agreements to repurchase are accounted for as collateralized financing transactions and are recorded at the amounts at which the securities were acquired or sold plus accrued interest. Further, the Company maintains a borrowing relationship with the FHLB which provides access to short-term and long-term borrowings. In addition, the Company also has access to the Federal Reserve discount window and other bank lines. The Company had short-term advances from the FHLB and the Federal Reserve totaling \$3.5 million and \$203.5 million at June 30, 2010 and December 31, 2009, respectively. The Company had federal funds purchased and securities sold under agreement to repurchase of \$481.1 and \$539.9 million at June 30, 2010 and December 31, 2009, respectively. The Company had long-term advances totaling \$110.7 million and \$112.8 million at June 30, 2010 and December 31, 2009, respectively. The Company has pledged eligible mortgage loans to secure the FHLB borrowings and had \$2.8 billion in additional borrowing capacity under the existing FHLB borrowing agreement at June 30, 2010.

If the Company's traditional sources of liquidity were constrained, the Company would find it necessary to evaluate other avenues of funding not typically used by the Company and the Company's net interest margin could be impacted negatively. The Company utilizes, among other tools, maturity gap tables, interest rate shock scenarios and an active Asset/Liability Committee to analyze, manage and plan asset growth and to assist in managing the Company's net interest margin and overall level of liquidity. The Company does not anticipate any short- or long-term changes to its liquidity strategies.

Off-Balance Sheet Arrangements

In the ordinary course of business, the Company enters into various off-balance sheet commitments and other arrangements to extend credit that are not reflected in the consolidated balance sheets of the Company. The business purpose of these off-balance sheet commitments is the routine extension of credit. While most of the commitments to extend credit are made at variable rates, included in these commitments are forward commitments to fund individual fixed-rate mortgage loans. Fixed-rate lending commitments expose the Company to risks associated with increases in interest rates. As a method to manage these risks, the Company enters into forward commitments to sell individual

fixed-rate mortgage loans. The Company also faces the risk of deteriorating credit

Table of Contents

quality of borrowers to whom a commitment to extend credit has been made; however, no significant credit losses are expected from these commitments and arrangements.

Regulatory Requirements for Capital

The Company is required to comply with the risk-based capital guidelines established by the Board of Governors of the Federal Reserve System. These guidelines apply a variety of weighting factors that vary according to the level of risk associated with the assets. Capital is measured in two Tiers : Tier I consists of common shareholders' equity and qualifying non-cumulative perpetual preferred stock, less goodwill and certain other intangible assets; and Tier II consists of general allowance for losses on loans and leases, hybrid debt capital instruments and all or a portion of other subordinated capital debt, depending upon remaining term to maturity. Total capital is the sum of Tier I and Tier II capital. The required minimum ratio levels to be considered adequately capitalized for the Company's Tier I capital, total capital, as a percentage of total risk-adjusted assets, and Tier I leverage capital (Tier I capital divided by total assets, less goodwill) are 4%, 8% and 4%, respectively. The Company exceeded the required minimum levels for these ratios at June 30, 2010 and December 31, 2009 as follows:

	June 30, 2010		December 31, 2009	
	Amount	Ratio	Amount	Ratio
	(Dollars in thousands)			
BancorpSouth, Inc.				
Tier I capital (to risk-weighted assets)	\$ 1,080,007	10.53%	\$ 1,143,019	11.17%
Total capital (to risk-weighted assets)	1,209,265	11.79	1,271,634	12.42
Tier I leverage capital (to average assets)	1,080,007	8.35	1,143,019	8.95

The Federal Deposit Insurance Corporation's capital-based supervisory system for insured financial institutions categorizes the capital position for banks into five categories, ranging from well capitalized to critically undercapitalized. For a bank to be classified as well capitalized, the Tier I capital, total capital and leverage capital ratios must be at least 6%, 10% and 5%, respectively. The Bank met the criteria for the well capitalized category at June 30, 2010 and December 31, 2009 as follows:

	June 30, 2010		December 31, 2009	
	Amount	Ratio	Amount	Ratio
	(Dollars in thousands)			
BancorpSouth Bank				
Tier I capital (to risk-weighted assets)	\$ 1,050,629	10.26%	\$ 1,119,612	10.95%
Total capital (to risk-weighted assets)	1,179,746	11.52	1,248,227	12.21
Tier I leverage capital (to average assets)	1,050,629	8.14	1,119,612	8.79

There are various legal and regulatory limits on the extent to which the Bank may pay dividends or otherwise supply funds to the Company. In addition, federal and state regulatory agencies have the authority to prevent a bank, bank holding company or financial holding company from paying a dividend or engaging in any other activity that, in the opinion of the agency, would constitute an unsafe or unsound practice. The Company does not expect these limitations to cause a material adverse effect with regard to its ability to meet its cash obligations.

Uses of Capital

The Company may pursue acquisitions of depository institutions and businesses closely related to banking that further the Company's business strategies, including FDIC-assisted transactions. The Company anticipates that consideration for any transactions other than FDIC-assisted transactions would include shares of the Company's common stock, cash or a combination thereof.

On March 21, 2007, the Company announced a new stock repurchase program whereby the Company may acquire up to three million shares of its common stock in the open market at prevailing market prices or in privately negotiated transactions during the period from May 1, 2007 through April 30, 2009. The original expiration date for this stock repurchase program has been extended until April 30, 2011. The extent and timing of any repurchases

Table of Contents

will depend on market conditions and other corporate considerations. Repurchased shares will be held as authorized but unissued shares. These authorized but unissued shares will be available for use in connection with the Company's stock option plans, other compensation programs, other transactions or for other general corporate purposes as determined by the Company's Board of Directors. At June 30, 2010, 460,700 shares had been repurchased under this program, but the Company has not repurchased any shares of its common stock since March 2008. The Company will continue to evaluate additional share repurchases under this repurchase program and will evaluate whether to adopt a new stock repurchase program before the current program expires. The Company conducts its stock repurchase program by using funds received in the ordinary course of business. The Company has not experienced, and does not expect to experience, a material adverse effect on its capital resources or liquidity in connection with its stock repurchase program.

Certain Litigation Contingencies

The Company and its subsidiaries are engaged in lines of business that are heavily regulated and involve a large volume of financial transactions with numerous customers through offices in nine states. Although the Company and its subsidiaries have developed policies and procedures to minimize the impact of legal non-compliance and disputes, litigation presents an ongoing risk.

The Company and its subsidiaries are defendants in various lawsuits, including the litigation discussed below and claims arising out of the ordinary course of business. Some of these claims are against entities of which the Company is a successor as a result of business combinations. Management of the Company evaluates lawsuits based on information currently available, including advice of counsel and assessment of available insurance coverage. Management is currently of the opinion that the ultimate resolution or financial liability with respect to pending lawsuits will not have a material adverse effect on the Company's business, consolidated financial position or results of operations. Litigation is, however, inherently uncertain, and management cannot provide any assurance that the Company and/or its subsidiaries will prevail in any of these actions, nor can management estimate with reasonable certainty the amount of damages that the Company or any of its subsidiaries might incur.

On May 12, 2010, the Company and its Chief Executive Officer, President and Chief Financial Officer were named in a purported class-action lawsuit filed in the U.S. District Court for the Middle District of Tennessee on behalf of certain purchasers of the Company's common stock. The complaint alleges that the defendants issued materially false and misleading statements regarding the Company's business and financial results. The plaintiff seeks class certification, an unspecified amount of damages and awards of costs and attorneys' fees and such other equitable relief as the Court may deem just and proper. No class has been certified and, at this stage of the lawsuit, management cannot determine the probability of an unfavorable outcome to the Company. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management is currently of the opinion that the outcome of this lawsuit will not have a material adverse effect on the Company's business, consolidated financial position or results of operations.

CRITICAL ACCOUNTING POLICIES

During the three months ended June 30, 2010, there was no significant change in the Company's critical accounting policies and no significant change in the application of critical accounting policies as presented in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

During the three months ended June 30, 2010, there were no significant changes to the quantitative and qualitative disclosures about market risks presented in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting, except for the remediation efforts management commenced in the first quarter and continued in the second quarter of 2010 related to a material weakness in internal control over financial reporting identified as of December 31, 2009 and reported on in the Company's Annual Report on Form 10-K for the year ended December 31, 2009. Following management's determination of the material weakness, management promptly began taking the following remedial actions:

The creation of a real estate risk management group to oversee full compliance with laws, regulations and U.S. GAAP related to lending activities;

Testing of significant loans, with a focus on higher risk loans, for impairment on a quarterly basis;

Reporting by management to the Board of Directors on a quarterly basis regarding significant problem loans and potentially problematic portfolios; and

The commitment of additional resources to the Bank's appraisal group, as necessary, for compliance with appraisal policies and procedures.

Management anticipates that these remedial actions will strengthen the Company's internal control over financial reporting and will, over time, address the material weakness that was identified as of December 31, 2009. Because some of these remedial actions will take place on a quarterly basis, their successful implementation may need to be evaluated over several quarters before management is able to conclude that the material weakness has been remediated. The Company cannot provide any assurance that these remediation efforts will be successful or that the Company's internal control over financial reporting will be effective as a result of these efforts.

Evaluation of Disclosure Controls and Procedures

As of June 30, 2010, the end of the period covered by this Quarterly Report on Form 10-Q, an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13(a)-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act)) was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer. Based on that evaluation and the identification of a material weakness in the Company's internal control over financial reporting as described in the Company's Annual Report on Form 10-K for the year ended December 31, 2009, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were not effective to ensure that information required to be disclosed by the Company in its reports that it files or submits under the Exchange Act is recorded, processed, summarized and reporting within the time periods specified in the Securities Exchange Commission rules and forms.

**PART II
OTHER INFORMATION**

ITEM 1A. RISK FACTORS.

There have been no material changes from the risk factors previously disclosed in the Company's annual report on Form 10-K for the year ended December 31, 2009 with the exception of the following risk factors.

Recently enacted financial regulatory reforms could have a significant impact on our business, financial condition and results of operations.

Table of Contents

On July 21, 2010, the President signed the Dodd-Frank Wall Street Reform and Consumer Protection Act into law. The law includes, among other things:

The creation of a Financial Services Oversight Council to identify emerging systemic risks and improve interagency cooperation;

The elimination of the Office of Thrift Supervision and the transfer of oversight of federally chartered thrift institutions to the Office of the Comptroller of the Currency;

The creation of a Consumer Financial Protection Agency authorized to promulgate and enforce consumer protection regulations relating to financial products, which would affect both banks and non-bank finance companies;

The establishment of strengthened capital and prudential standards for banks and bank holding companies;

Enhanced regulation of financial markets, including derivatives and securitization markets;

The elimination of certain trading activities from banks;

A permanent increase of the previously implemented temporary increase of FDIC deposit insurance to \$250,000; and

The creation of an Office of National Insurance within Treasury.

While the bill has been signed into law, a number of provisions of the law remain to be implemented through the rulemaking process at various regulatory agencies. We are unable to predict what the final form of these rules will be when implemented by the respective agencies, but management believes that certain aspects of the new legislation, including without limitations, the additional cost of higher deposit insurance and the costs of compliance with disclosure and reporting requirements and examinations by the new Consumer Financial Protection Agency, could have a significant impact on our business, financial condition and results of operations. Additionally, we cannot predict whether there will be additional proposed laws or reforms that would affect the U.S. financial system or financial institutions, whether or when such changes may be adopted, how such changes may be interpreted and enforced or how such changes may affect us.

We obtain a significant portion of our noninterest revenue through service charges on core deposit accounts, and recent legislation impacting service charges could reduce our fee income.

A significant portion of our noninterest revenue is derived from service charge income. The largest component of this service charge income is overdraft-related fees. Changes in banking regulations, and in particular the Federal Reserve's new rules pertaining to certain overdraft payments on consumer accounts effective July 1, 2010, could have a significant adverse impact on our service charge income and overall results. Additionally, changes in customer behavior as well as increased competition from other financial institutions could result in declines in deposit accounts or in overdraft frequency resulting in a decline in service charge income. A reduction in deposit account fee income could have a material adverse effect on our earnings.
