SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

Title of each class	Name of each exchange on which registered
Common Stock (\$.25 par value)	New York Stock Exchange

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to the Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller Reporting Company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Edgar Filing: CENTEX CORP - Form 10-K

On September 30, 2007, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was \$3.23 billion based upon the last sale price reported for such date on the New York Stock Exchange. As of May 9, 2008, 123,483,356 shares of the registrant's common stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Certain of the information contained in the definitive Proxy Statement for the registrant's Annual Meeting of Stockholders to be held on July 10, 2008 is incorporated by reference into Part III hereof.

PART I**ITEM 1. BUSINESS****General Development of Business**

Centex Corporation is a Nevada corporation. Our common stock, par value \$.25 per share, began trading publicly in 1969. Our common stock is currently traded on the New York Stock Exchange, or the NYSE. As of May 9, 2008, 123,483,356 shares of our common stock were outstanding. Any reference herein to we, us, our or the Company refers to Centex Corporation and its subsidiary companies or, if the context requires, the particular segment or unit of our business that is being discussed.

Since our founding in 1950 as a Dallas, Texas-based residential construction company, we expanded our business to include a broad range of activities related to construction, construction products and financing, but have more recently refocused our operations on residential construction and related activities, including mortgage financing to our homebuyers. As of March 31, 2008, our subsidiary companies operated in two principal lines of business: Home Building and Financial Services. We provide a brief overview of each line of business below, with a more detailed discussion of each line of business later in this section.

Home Building's operations currently involve the construction and sale of detached and attached single-family homes. The land used for the construction of our homes is acquired through the purchase of finished or partially finished lots and through the purchase of raw land that must be developed.

Financial Services' operations consist primarily of mortgage lending, title agency services and the sale of title insurance and other insurance products. These activities include mortgage origination and other related services for homes sold by our subsidiaries and others. We have been in the mortgage lending business since 1973.

Over the last several fiscal years, we have simplified our business portfolio as a result of a number of transactions. The following table summarizes these transactions over the last five fiscal years.

Business	Date	Description
Home Services	April 2008	We sold our home services operations, which were previously included in our Other segment.
Construction Services	March 2007	We sold our commercial construction operations, which were previously a separate reporting segment.
Home Equity	July 2006	We sold our sub-prime home equity lending operations, which were previously included in the Financial Services segment.
International Homebuilding	September 2005	We sold our international homebuilding operations, which were previously included in the Home Building segment.
Commercial Real Estate	February 2004	We simplified the organizational structure of the Company and its affiliates by acquiring a primarily commercial real estate company whose publicly traded securities had previously traded in tandem with our common stock. Those operations have been substantially liquidated.
	January 2004	

Edgar Filing: CENTEX CORP - Form 10-K

Construction
Products

We made a tax-free spin-off to our stockholders of our equity interests in our construction products operations, which were previously a separate reporting segment.

Manufactured
Homes

June 2003

We made a tax-free spin-off to our stockholders of substantially all of our manufactured housing operations, which were previously included in our Other segment.

For all businesses sold or spun off in the table above, the results of operations and financial position of such businesses are reported as discontinued operations for all periods presented. For additional information on our

1

discontinued operations, please refer to Note (O), Discontinued Operations of the Notes to Consolidated Financial Statements.

We have refocused our strategy to concentrate on our core homebuilding operations and related activities. Our mortgage lending and title agency services provide our homebuyers with a streamlined home-closing and settlement process, which we believe is important to ensuring customer satisfaction in our homebuilding business. The sales of our construction services and sub-prime home equity operations in fiscal year 2007 and our home service operations in April 2008 are consistent with this strategy. All prior year segment information has been revised in this Report to conform to the current year presentation.

Within our homebuilding operations, we determined that our operating segments are our divisions, which have been aggregated into seven reporting segments. Our homebuilding operations, or Home Building, consist of the following reporting segments: East, Southeast, Central, Texas, Northwest, Southwest and Other homebuilding. For a complete description of the states and markets in each of our homebuilding segments, please refer to the Home Building markets table later in this section.

Our mortgage lending, title agency services and insurance products continue to represent one reporting segment, Financial Services.

Financial Information about Segments

Note (I), Business Segments, of the Notes to Consolidated Financial Statements contains additional information about our business segments for fiscal years 2008, 2007 and 2006.

Description of Business

Beginning in fiscal year 2006, the U.S. housing industry began to experience a significant downturn. We believe the principal factors that have caused this downturn include: increased inventory of new and existing homes for sale, including homes in foreclosure, a decrease in the affordability of housing in selected markets, and a decline in homebuyer demand due to lower consumer confidence in the consumer real estate market and an inability of many homebuyers to sell their existing homes. Moreover, during fiscal year 2008, the mortgage markets experienced significant disruptions, which led to an unprecedented combination of reduced investor demand for mortgage loans and mortgage-backed securities, tightened credit requirements for homebuyers, reduced mortgage loan liquidity and increased credit risk premiums. These events contributed to a significant overall downturn in the U.S. homebuilding and residential mortgage industries and negatively impacted the economy in many local markets. These factors have had a significant negative impact on the homebuilding and mortgage finance industries and on our business and results of operations.

HOME BUILDING

The business of Home Building consists of constructing and selling detached and attached single-family homes. The land used for the construction of our homes is acquired through the purchase of finished or partially finished lots and through the purchase of raw land that must be developed. In fiscal year 2008, approximately 80% of the homes closed were single-family, detached homes.

Markets

Home Building follows a strategy of maximizing its relative market share in those local markets that reward market leaders and provide the highest potential returns. We participate in a wide variety of geographically and economically diverse markets that may fluctuate year to year. As of March 31, 2008, Home Building had substantive homebuilding operations in 74 market areas located in 22 states and the District of Columbia. Each active market is listed below within the reporting segment to which it belongs.

Other homebuilding

Other homebuilding includes certain resort/second home projects in Florida that we plan to build-out and liquidate, and holding companies. In addition, Other homebuilding includes amounts consolidated under the caption land held under option agreements not owned and capitalized interest for all regions.

In fiscal year 2008, Home Building closed the sale of 27,202 homes, including first-time, move-up and, in some markets, luxury homes, generally ranging in price from \$65 thousand to \$3.0 million. The average revenue per unit in fiscal year 2008 was \$276,788.

We believe that our business requires in-depth knowledge of each market in order to acquire land in desirable locations, to procure labor and materials, to anticipate consumer preferences and to assess the regulatory environment. Our organizational structure is designed to utilize local market expertise. Additionally, we believe our business requires strong corporate and regional leadership to approve land acquisitions, to procure labor and materials on a national or regional basis when available and to develop, deploy and measure our core business practices. Our regional and corporate structures are designed to develop and leverage these core competencies.

Our neighborhood development process generally consists of three phases: land acquisition, land development and home construction and sale. Generally, we seek to acquire land that is properly zoned and is either ready for development or, to some degree, already developed. We acquire land only after we have completed appropriate due diligence and typically after we have obtained the rights or entitlements to begin development. Before we acquire lots or tracts of land, we will, among other things, complete a feasibility study, which includes soil tests, independent environmental studies and other engineering work, and evaluate the status of necessary zoning and other governmental entitlements required to develop and use the property for home construction. Although we purchase and develop land or lots primarily to support our homebuilding activities, we also sell land or lots to investors and other developers and homebuilders.

Our goal is to own less than two years' supply of land and to control, through option agreements, approximately two more years of land that we can acquire over specified time periods or, in certain cases, as the land or lots are needed. At March 31, 2008, Home Building owned 70,222 lots and had options to purchase 18,147 lots. This is considerably less than the 98,311 owned lots and 61,709 optioned lots we held at March 31, 2007. We are transitioning to a strategy that emphasizes the purchase of finished lots on more of a just-in-time basis and away from a strategy where we acquire raw land and undertake all development work. In addition, Home Building enters into joint ventures with other builders and developers for land acquisition and development. For additional discussion of our lot option agreements and participation in joint ventures, see Note (C), Inventories, and Note (G), Commitments and Contingencies, of the Notes to Consolidated Financial Statements.

Following the purchase of land and, if necessary, the entitlement and development process, we begin to market, sell and construct homes. Substantially all of our construction work is performed by independent contractors. Home Building is moving to an operating model of constructing homes from a sold backlog. This operating model will provide more predictable scheduling of independent contractors which will eventually result in increased efficiency and improved profitability.

We market and sell our homes through commissioned employees and independent real estate brokers. We typically conduct home sales from sales offices located in furnished model homes in each neighborhood. Our sales personnel assist prospective homebuyers by providing them with floor plans, price information, tours of the neighborhood and model homes and assisting them with the selection of upgrades and options. As market conditions warrant, we may provide potential homebuyers with a variety of incentives, including discounts and free upgrades, to remain competitive.

Our growth strategy for Home Building has been focused primarily on organically growing our relative market share in those local markets that reward market leaders and provide the highest potential returns. To a lesser extent, we have also grown through the acquisition of other homebuilding companies. There have been no acquisitions of homebuilding companies in the last five fiscal years.

Home Building sells its homes principally under the Centex name and, in certain markets, under a variety of other brand names including several from previous acquisitions. Fox & Jacobs, one of our brand names, primarily markets to first-time buyers. Centex Homes primarily markets its homes to first-time and move-up buyers.

Edgar Filing: CENTEX CORP - Form 10-K

The table below summarizes by reporting segment Home Building's units closed, sales orders and backlog units for the five most recent fiscal years.

Units Closed:

	2008	<i>For the Years Ended March 31,</i>			
		2007	2006	2005	2004
East	5,345	6,720	7,116	5,674	5,064

Other homebuilding	3	212	1,008	1,398	1,320
	7,746	10,651	17,387	18,589	15,414

For each unit in backlog, we have received a signed customer contract and a customer deposit, which is refundable under certain circumstances. The backlog units included in the table above are net of cancellations. Cancellations occur for a variety of reasons, including a customer's inability to obtain financing, customer relocations or other customer financial hardships. Substantially all of the orders in sales backlog as of March 31, 2008 are scheduled to close during fiscal year 2009.

Competition and Other Factors

The homebuilding industry is highly competitive and fragmented. Traditionally, competition in the industry has occurred at a local level among national, regional and local homebuilders. In recent years, national homebuilders have been able to compete more effectively and increase their share of the national homebuilding market. The top ten builders in calendar year 2007 accounted for approximately 22% of the nation's new housing stock. We believe we ranked fourth in the largest homebuilders in the United States at March 31, 2008, based on publicly reported homebuilding revenues for the most recent twelve-month period for which information is available. Our operations accounted for an estimated 4% of new homes sold in the United States for the twelve months ended March 31, 2008. We calculate our market share by dividing our new home sales by the total single family new home sales as reported by the U. S. Census Bureau. Our top four competitors based on revenues for their most recent fiscal year-end are as follows (listed alphabetically): D. R. Horton, Inc., Lennar Corporation, KB Home and Pulte Homes, Inc. The main competitive factors affecting our operations are location/market, sales price, availability of mortgage financing for customers, construction costs, design and quality of homes, customer service, marketing expertise, availability of land, price of land and reputation. We believe that Home Building competes effectively by building a high quality home, and responding to the specific demands of each market by managing operations at a local level.

We conduct targeted market research to identify what features, amenities and options will be attractive to prospective customers and whether we can satisfy their preferences profitably. Customer preferences can vary across geographical regions and even within them, and can change over time in response to personal or regional factors (such as the interest in some markets for housing with high energy efficiency or for housing located near public transportation) and to changes in economic conditions, such as affordability of housing and availability of financing, which can lead customers to accept smaller or attached housing despite a preference for larger or detached housing. We also use market research techniques to quantify housing supply and demand in a particular market and use this information to guide our strategy for meeting customer demand in the market.

The downturn in the homebuilding industry has significantly impacted competition among the homebuilders. The excess supply of homes for sale and the need for builders to generate cash have caused homebuilders and other home sellers to reduce prices. This increased competition has also resulted in increases in discounts and sales incentives, including increases in seller-paid financing and closing costs, and increases in sales commissions to help stimulate sales and close homes. We believe the increased competition in the homebuilding industry affected all categories of builders, but has had a disproportionate effect on smaller homebuilders that may not be capitalized as well as most of the large homebuilders.

We have used the downturn in the industry as an opportunity to adjust certain of our product offerings and marketing efforts. To simplify our business, reduce costs and offer products that homebuyers can afford, we have reduced the number of floor plans offered across our neighborhoods and also reduced the number of available options and upgrades.

The homebuilding industry will continue to be affected by changes in national and local economic conditions, the supply of new and existing homes for sale, job growth, long-term and short-term interest rates, availability of mortgage products, consumer confidence, governmental policies, zoning restrictions and, to a lesser extent, changes in property taxes, energy costs, federal income tax laws, federal mortgage financing programs and various other demographic factors. The political and economic environments affect both the demand for housing constructed and the subsequent cost of financing. Unexpected weather conditions, such as unusually heavy or prolonged rain or snow, or hurricanes, may affect operations in certain areas.

The homebuilding industry is subject to extensive regulation. Home Building and its contractors must comply with various federal, state and local laws and regulations, including worker health and safety, zoning and land entitlement, building standards, advertising, consumer credit rules and regulations and the extensive and changing federal, state and local laws, regulations and ordinances governing the protection of the environment, including laws related to erosion and storm water pollution control and the protection of endangered species and waters of the United States. We are also subject to other rules and regulations in connection with our construction and sales activities, including requirements as to incorporated building materials and building designs, such as requirements for the use of energy efficient materials or designs. While these regulatory requirements are generally applicable to all regions in which we

operate, regulations in coastal markets tend to be more extensive. All of these regulatory requirements are applicable to all homebuilding companies, and, to date, compliance with these requirements has not had a material impact on Home Building. We believe that we are in compliance with these requirements in all material respects.

As discussed further in Item 3. Legal Proceedings, in May 2008, Home Building agreed to sign a consent decree with the United States Environmental Protection Agency, which we refer to as the EPA, and various states with respect to our prior and future storm water pollution prevention practices at all of Home Building's sites. When the consent decree is signed by all parties, the Justice Department will file suit in Federal Court in accordance with the accepted practice in matters of this nature and simultaneously submit the proposed consent decree for approval by the Court. We anticipate that the consent decree will become final during the second quarter of the fiscal year ending March 31, 2009. Under the proposed consent decree, Home Building will agree to certain management practices related to controlling storm water discharges at all of Home Building's sites, which may result in increased capital expenditures.

We purchase materials, land and services from numerous sources. The principal raw materials required for home construction include concrete and wood products. In addition, we use a variety of other building materials, including roofing, gypsum, insulation, plumbing, and electrical components in the homebuilding process. We attempt to maintain efficient operations by utilizing standardized materials available from a variety of sources. A number of our vendor purchase agreements also allow us to leverage our volume through quantity purchase discounts for the purchasing of a number of product categories. We use many contractors in our various markets and are not dependent on any single contractor.

FINANCIAL SERVICES

Our Financial Services operations include mortgage lending and other related services for purchasers of homes sold by our homebuilding operations and other homebuilders, refinancing of existing mortgages, title agency services and the sale of title insurance and other insurance products, including property and casualty.

We established the predecessor of CTX Mortgage Company, LLC to provide mortgage financing for homes built by Home Building. By opening mortgage offices in Home Building's housing markets, we have been able to provide mortgage financing for an average of 76% of Home Building's non-cash unit sales over the past five years and for 79% of such closings in fiscal year 2008. In 1985, we expanded our mortgage operations to include the origination of mortgage loans that are not associated with the sale of homes built by Home Building. We refer to mortgage financing for homes built by Home Building as Builder loans and to mortgage financing for homes built by others, loans for existing homes and loans to refinance existing mortgages as Retail loans.

As a result of the significant disruptions in the mortgage markets and the related reductions in the mortgage market liquidity, during fiscal year 2006, we began to focus our mortgage operations on Builder loans to support Home Building. Retail mortgage originations represented approximately 54.8%, 53.0%, and 61.3% of total mortgage originations during the fiscal years ended March 31, 2008, 2007, and 2006, respectively. However, we expect Retail mortgage originations to decline during the fiscal year ending March 31, 2009. We anticipate the reduction in total Retail mortgage originations may have a negative impact on Financial Services operating results.

At March 31, 2008, Financial Services loan officers originated Builder loans from 48 offices licensed in 31 states and the District of Columbia and Retail loans from 86 offices licensed in 47 states and the District of Columbia. The offices vary in size depending on loan volume.

The following table shows the unit breakdown of Builder and Retail loans for the five years ended March 31, 2008:

		<i>For the Years Ended March 31,</i>			
	2008	2007	2006	2005	2004
Loan Types (originations):					
Builder	20,431	27,141	27,364	22,517	20,865
Retail ⁽¹⁾	24,729	30,638	43,319	44,816	67,481
	45,160	57,779	70,683	67,333	88,346
Origination Volume (in millions)	\$ 9,991.3	\$ 13,826.0	\$ 15,827.4	\$ 13,039.0	\$ 15,116.0

**Percent of Home Building s
 Closings Financed ⁽²⁾**

79%

80%

75%

73%

74%

(1) *Over the last five fiscal years, the reduction in retail loan originations is primarily attributable to decreases in refinancing activity and homebuyer demand, and our strategic decision to reduce the number of retail loan officers. In fiscal year 2008, retail loan originations were also affected by adverse market conditions that further reduced demand and resulted in a reduction of mortgage loan products.*

- (2) *Excludes non-financed cash-only closings.*

We provide mortgage origination and other mortgage-related services for Federal Housing Administration (FHA) loans, Department of Veterans Affairs (VA) loans and conventional loans. Our loans are generally first-lien mortgages secured by the home. Substantially all of our loans qualify for inclusion in programs sponsored by the Government National Mortgage Association (GNMA), the Federal National Mortgage Association (FNMA), or the Federal Home Loan Mortgage Corporation (FHLMC). Loans qualifying for inclusion in FNMA or FHMLC sponsored programs are known in the industry as conforming loans. The remainder of the loans are either pre-approved and individually underwritten by us or by private investors who subsequently purchase the loans, or are funded by private investors who pay a broker fee to us for broker services rendered.

Financial Services revenues and operating earnings are derived primarily from the sale of mortgage loans, together with all related servicing rights, broker fees, title and other various insurance coverages, interest income and other fees. For substantially all mortgage loans originated, we sell our right to service the mortgage loans and retain no residual interests.

Generally, our business strategy is to originate and sell loans rather than hold them, which reduces our capital investment and related risks. Until the second quarter of fiscal year 2008, mortgage loans held for sale were primarily funded by CTX Mortgage Company, LLC's sale of substantially all the mortgage loans it originated to Harwood Street Funding I, LLC, which we refer to as HSF-I. Following unprecedented disruptions in the mortgage markets during the second quarter of fiscal year 2008, CTX Mortgage Company LLC discontinued sales of mortgage loans to HSF-I, and is now relying on committed bank warehouse credit facilities to provide funding for its loan originations. In November 2007, we terminated HSF-I and all of its outstanding obligations were redeemed. HSF-I was a variable interest entity of which we were the primary beneficiary, and it was consolidated in our financial statements.

Financial Services also holds other mortgage loans, including performing and nonperforming construction loans and other nonperforming mortgage loans. During the year ended March 31, 2008, Financial Services ceased originating new construction loans; however, it will fulfill its existing funding commitments.

We offer title agent, title underwriting, closing and other settlement services in 23 states under the Commerce Title name, including Commerce Title Company, Commerce Title Agency and Commerce Title Insurance Company. Through Westwood Insurance, including Centex Insurance Agency, a multi-line property and casualty insurance agency, we market homeowners and auto insurance to Home Building and Financial Services customers and customers of 10 other homebuilders in 44 states. Westwood Insurance also provides coverage for some commercial customers.

Competition and Other Factors

The financial services industry in the United States is highly competitive. Financial Services competes with the mortgage banking subsidiaries of large commercial banks, mortgage companies, and savings and other financial institutions to supply mortgage financing at attractive rates to homebuyers. Key competitive factors among industry participants are varied and include convenience in obtaining a loan, customer service, marketing and distribution channels, amount and term of the loan, loan origination fees and interest rates. Any increase in competition may lower the rates we can charge borrowers, thereby potentially reducing gain on future loan sales. Our title and insurance operations compete with other providers of title and insurance products to sell their products to purchasers of our homes, as well as to the general public. Many of these competitors have greater resources than we do.

The disruptions in the mortgage markets and downturn in the residential mortgage industry during the fiscal year significantly impacted competition. Many mortgage lenders were unable to finance the origination of new mortgage loans, and as a result, some mortgage lenders ceased or severely restricted operations. Additionally, the decline in homebuyer demand reduced the population of potential mortgage customers. In addition, the disruptions in the mortgage and credit markets significantly reduced the ability of mortgage lenders to sell nonconforming mortgage loans as there are fewer investors willing to accept the risks associated with these loan products. As a result, many mortgage lenders limit their mortgage loan originations to conforming loan products.

Financial Services operations are subject to extensive state and federal regulations, as well as rules and regulations of, and examinations by, FNMA, FHLMC, FHA, VA, Department of Housing and Urban Development, or HUD, GNMA and state regulatory authorities with respect to originating, processing, underwriting, making and selling loans and providing title and other insurance products. In addition, there are other federal and state statutes and

regulations affecting such activities. These rules and regulations, among other things, impose licensing obligations on our Financial Services operations, specify standards for origination procedures, establish eligibility criteria for mortgage loans, provide for inspection and appraisals of properties, regulate payment features and, in some cases, fix maximum interest rates, fees, loan amounts and premiums for title and other insurance. Certain of our Financial Services operations are required to maintain specified net worth levels and submit annual audited financial statements to HUD, VA, FNMA, FHLMC, GNMA and some state regulators.

As an approved FHA lender, CTX Mortgage Company, LLC is subject to examination by the Federal Housing Commissioner at all times to ensure compliance with FHA regulations, policies and procedures. Our title and insurance operations are subject to examination by state authorities. Mortgage origination activities are subject to the Equal Credit Opportunity Act, the Fair Housing Act, the Fair Credit Reporting Act, the Federal Truth-In-Lending Act, the Real Estate Settlement Procedures Act, the Riegle Community Development and Regulatory Improvement Act, the Home Ownership and Equity Protection Act and regulations promulgated under such statutes, as well as other federal and state consumer credit laws. The Real Estate Settlement Procedures Act also applies to our insurance operations. These statutes prohibit discrimination and unlawful kickbacks and referral fees and require the disclosure of certain information to borrowers concerning credit and settlement costs. Many of these regulatory requirements seek to protect the interest of consumers, while others protect the owners or insurers of mortgage loans. Failure to comply with these requirements can lead to loss of approved status, demands for indemnification or loan repurchases from investors, lawsuits by borrowers (including class actions), administrative enforcement actions and, in some cases, rescission or voiding of the loan by the consumer.

EMPLOYEES

The following table presents a breakdown of our employees as of March 31, 2008:

Line of Business	Employees
Home Building	4,143
Financial Services	1,920
Other	467
Total	6,530

The 467 Other employees include our corporate employees. Employees related to our home services operations are not included in the table above as these operations are included in discontinued operations.

NYSE AND SEC CERTIFICATIONS

We submitted our 2007 Annual CEO Certification to the New York Stock Exchange on July 23, 2007. The certification was not qualified in any respect. Additionally, we filed with the Securities and Exchange Commission, or SEC, as exhibits to our Form 10-K for the year ended March 31, 2007, the CEO and CFO certifications required under Section 302 of the Sarbanes-Oxley Act.

AVAILABLE INFORMATION

Anyone seeking information about our business operations and financial performance can receive copies of the 2008 Annual Report to Stockholders, Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, all amendments to those reports and other documents filed with the SEC, without charge, by contacting our Investor Relations office at (214) 981-5000; by writing to Centex Corporation, Investor Relations, P.O. Box 199000, Dallas, Texas 75219 or via email at ir@centex.com. In addition, all filings with the SEC, news releases and quarterly earnings announcements, including live audio and replays of recent quarterly earnings web casts, can be accessed free of charge on our web site (<http://www.centex.com>). We make our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, or Exchange Act, available on our web site as soon as reasonably practicable after we electronically file the material with, or furnish it to, the SEC. To retrieve any of this information, go to <http://www.centex.com>, select Investors and select SEC Filings. Our web site also includes our Corporate Governance Guidelines, The Centex Way (our Code of Business Conduct and Ethics) and the

charters for the Audit Committee, the Corporate Governance and Nominating Committee and the Compensation and Management Development Committee of our Board of Directors. Each of these documents is also available in print to any stockholder who requests a copy by addressing a request to Centex Corporation, attention: Corporate Secretary,

2728 N. Harwood, Dallas, Texas 75201. The reference to our web site is merely intended to suggest where additional information may be obtained by investors, and the materials and other information presented on our web site are not incorporated in and should not otherwise be considered part of this Report.

ITEM 1A. RISK FACTORS

The foregoing discussion of our business and operations should be read together with the risk factors set forth below. They describe various risks and uncertainties to which we are or may become subject, many of which are outside of our control. These risks and uncertainties, together with other factors described elsewhere in this Report, have affected, or may in the future affect, our business, financial condition, results of operations, cash flows, strategies or prospects in a material and adverse manner.

HOME BUILDING

The homebuilding industry is undergoing a significant downturn; this downturn has had a material adverse effect on our business and results of operations and is expected to continue through our next fiscal year.

Beginning in fiscal year 2006, the U.S. housing industry began to experience a significant downturn, which has had and continues to have a material adverse effect on our business and results of operations. We believe the principal factors that have caused this downturn include each of the following, the impact of which varies based upon geographic market, product segment and the time since commencement of the downturn:

- increased inventory of new and existing homes for sale, including the impact of increases in residential foreclosures,

- reduced availability and increased cost of mortgage financing due to the significant mortgage market disruptions,

- a decrease in the affordability of housing in selected markets as a result of significant price appreciation in the years preceding the downturn and tightened credit standards for homebuyers,

- a decline in homebuyer demand due to lower consumer confidence in the consumer real estate market and an inability of many homebuyers to sell their existing homes, and

- pricing pressures resulting from a variety of factors, including the decision of homebuilders to offer significant discounts and sales incentives, to liquidate unsold inventories in order to generate cash, and the need for home prices to fall within mortgage qualification limits.

These conditions have led to, among other things, (i) significant decreases in our homebuilding revenues, (ii) substantial land-related and goodwill impairments, (iii) significant losses on land sales, (iv) write-offs of land deposits and pre-acquisition costs, and (v) joint ventures' impairments. As a result, our homebuilding operations incurred substantial losses and may continue to do so for some time. Any worsening in market conditions in the homebuilding industry would have a further material adverse effect on our business and results of operations.

Although we were successful in generating positive operating cash flow and reducing our inventories in fiscal year 2008, we incurred significant operating losses and recorded substantial asset impairment charges which contributed to the substantial net loss we recognized in this period. Many of the factors that have resulted in these losses are beyond our control, and we have limited means at our disposal to mitigate or respond to the effects of these factors on our results of operations.

The market value of land is subject to significant fluctuations, which have resulted in significant impairments and write-offs in our land holdings and may continue to do so.

The risk of owning land can be substantial for homebuilders. There is often a significant lag time between when we acquire land for development and when we sell homes in neighborhoods we have planned, developed and constructed. Inventory carrying costs for land can be significant and can result in reduced margins or losses in a poorly performing project or market. In addition, the market value of land, finished lots and housing inventories can fluctuate significantly as a result of changing economic and market conditions, including the availability of financing, such as the industry downturn we are currently experiencing. If the market value of home inventories, land/lots or other

property decline during this period, we may need to sell homes or other property at a loss or at prices that generate lower margins than we anticipated when we acquired the land. To the extent projected sales prices do not exceed the carrying value of the related assets, or if other market conditions deteriorate, we may be required to record an impairment of our land or home inventories.

During the year ended March 31, 2008, we decided not to pursue development and construction in certain areas where we held land or had made option deposits, which resulted in \$120.4 million in write-offs of option deposits and pre-acquisition costs. During the year ended March 31, 2008, we recognized losses of \$388.7 million on land sales. In addition, market conditions led to recorded land-related impairments on neighborhoods and land during the year ended March 31, 2008 of \$1,792.4 million, including \$14.9 million of direct construction impairments. Land-related impairments during the quarter ended March 31, 2008 represented 94 neighborhoods and land investments, some of which have been impaired more than once. These market conditions also adversely affected land values in our Home Building joint ventures. Our share of joint ventures' impairments was \$100.5 million for the year ended March 31, 2008. These land-related impairments contributed to the significant operating losses we incurred during the year ended March 31, 2008. If market conditions do not improve in future periods, we may experience additional write-offs of option deposits and pre-acquisition costs, losses on land sales, land related impairments and impairments relating to our ownership interest in joint ventures. Additionally, our land-related impairment analyses are affected by market conditions and certain assumptions, such as sales prices, sales rates and discount rates used, and relatively small changes in these assumptions could lead to significant land-related impairments.

Continued cancellations of home sales contracts may have a material adverse effect on our business.

Our backlog reflects the number and value of homes for which we have entered into a sales contract with a customer but have not yet closed the home. We have received a customer deposit for each home reflected in our backlog, and generally we have the right to compel the customer to complete the purchase. In many cases, however, a customer may cancel the contract and receive a complete or partial refund of the deposit for reasons such as his or her inability to obtain mortgage financing or to sell his or her current home. Customers may also decide to run the risk of failing to perform under the contract without legal justification. If the current industry downturn continues, or if mortgage financing becomes less available, more homebuyers may cancel their contracts with us. Significant cancellations have had, and could have in the future, a material adverse effect on our business and results of operations.

Increases in interest rates, decreases in the availability of mortgage financing or other changes in market conditions could make it more difficult or costly for customers to purchase our homes.

Most of our homebuilding customers finance their home purchases through our Financial Services operations or, in some cases, third-party lenders. In general, housing demand is adversely affected by increases in interest rates or by decreases in the availability of mortgage financing as a result of increased credit standards, deteriorating customer credit quality or disruptions or other adverse conditions in mortgage lending markets. Any increases in interest rates could cause potential homebuyers to be less willing or able to purchase our homes. In general, if mortgage rates increase, it could become more difficult or costly for customers to purchase our homes, which would have an adverse effect on our results of operations.

Certain of our homebuyers use down payment assistance programs, which allow homebuyers to receive gift funds from non-profit corporations to be used as a down payment. Homebuilders are a source of funding for these programs. The HUD and Congress are considering limitations and further regulation of these programs. Such restrictions may limit the ability of seller-funded non-profit corporations to fund down payment assistance programs for government-insured mortgage loans. HUD has issued a rule that eliminates seller-funded down payment assistance as an acceptable minimum investment in the property for FHA insured loans. However, the implementation of that rule has been delayed as a result of litigation filed by certain down payment assistance providers. The ultimate outcome of this litigation is uncertain. If, as a result of legislative, regulatory or other action, certain of the gift fund programs that our customers use would no longer be available to them, we would expect to work to provide other financing alternatives, and seek different down payment programs for our customers that meet applicable guidelines. There can be no assurance, however, that any such alternative programs would be as attractive to our customers as the programs offered today and that our sales would not suffer.

Competition for homebuyers could reduce our closings or decrease our profitability.

The homebuilding industry is highly competitive. We compete in each of our markets with many national, regional and local homebuilders. In recent years, national homebuilders have been able to compete more effectively and increase their share of the national homebuilding market. The current downturn in the homebuilding industry has

significantly increased competition among homebuilders, as evidenced by price reductions, increases in discounts and sales commissions and increased sales commissions in an effort to stimulate sales. Any further increases in the level of competition from other national homebuilders or from regional and local homebuilders in the markets in which we operate could reduce the number of homes we close, or cause us to accept reduced margins or losses on home sales.

We also compete with resales of existing or foreclosed homes, homes offered by investors and housing speculators and available rental housing. Increased competitive conditions in the residential resale or rental market in the markets where we operate could decrease demand for new homes, cause us to increase our sales incentives or price discounts in order to maintain sales volumes, increase the volatility of the market for new homes or lead to cancellations of sales contracts in backlog, any of which could adversely affect our operating results.

We conduct certain of our homebuilding operations through joint ventures with independent third parties in which we do not have a majority interest, and we can be adversely impacted by joint venture partners' failure to fulfill their obligations.

We conduct a portion of our land acquisition, development and other activities through our participation in joint ventures in which we hold less than a majority interest. These land-related activities typically require substantial capital, and by partnering with other homebuilders or developers and, to a lesser extent, financial partners, Home Building is able to share the risks and rewards of ownership and obtain other strategic advantages.

Total joint venture debt outstanding as of March 31, 2008 and 2007 was \$423.2 million and \$1.0 billion, respectively. Debt agreements for joint ventures vary by lender in terms of structure and level of recourse. For certain of the joint ventures, we are also liable on a contingent basis, through other guarantees, letters of credit or other arrangements, with respect to a portion of the construction debt. Additionally, we have agreed to indemnify the construction lender for certain environmental liabilities in the case of most joint ventures and most guarantee arrangements provide that we are liable for our proportionate share of the outstanding debt if the joint venture files for voluntary bankruptcy. To date, we have not been requested to perform under the environmental liabilities or voluntary bankruptcy guarantees for any of our joint ventures.

Four of our joint ventures are in default of their joint venture debt agreements. In addition, we expect two other joint ventures to be in default of their joint venture debt agreements subsequent to March 31, 2008. Our joint venture partner to one of these joint ventures filed for bankruptcy during the year ended March 31, 2008. We are in discussions with the joint venture partners and lenders with respect to each joint venture and are evaluating alternatives to mitigate our exposure. We expect to fulfill our contractual obligations under the joint venture agreements. Costs associated with fulfilling such contractual obligations may be less than our share of the joint ventures' debt. Recourse under joint venture debt agreements is limited to either the underlying collateral or completion obligations of the joint venture partners. Based upon the terms and debt amounts outstanding for these joint ventures and the terms of the joint venture agreements, we do not believe our exposure related to these joint venture defaults will be material to our financial position or results of operations.

In general, we are subject to various risks of the type described above related to joint venture debt, construction debt and other obligations and liabilities of the joint ventures in which we participate, and these debts, liabilities and obligations may in some cases be material. In the case of many joint ventures, we have the right to be reimbursed by our joint venture partners for any amounts which we pay that exceed our pro rata share of the joint ventures' obligations. However, particularly if our joint venture partners have filed for bankruptcy protection or are having financial problems, we may have difficulty collecting the sums they owe us, and therefore, we may be required to pay a disproportionately large portion of the guaranteed amounts. In addition, because we lack a controlling interest in these joint ventures, we are usually unable to require that the joint venture sell assets, return invested capital or take any other action without the consent of at least one of our joint venture partners. As a result, without the consent of one or more joint venture partners, we may be unable to liquidate our joint venture investments to generate cash. If we are able to liquidate joint venture investments, the amounts received upon liquidation may be insufficient to cover the costs we have incurred.

Compliance with regulatory requirements affecting our business could have substantial costs both in time and money, and some regulations could prohibit or restrict some homebuilding activity.

We are subject to extensive and complex laws and regulations that affect the land development and homebuilding process, including laws and regulations related to zoning, permitted land uses, levels of density, building design, warranties, storm water pollution prevention and use of open spaces. In addition, we are subject to a variety of laws and regulations concerning safety and the protection of health and the environment. The particular environmental laws that apply to any given neighborhood vary greatly according to the neighborhood site, the site's environmental

conditions and the present and former uses of the site. In some of the markets where we operate, we are required to pay environmental impact fees, use energy-saving construction materials, such as extra insulation or double-paned windows, and make commitments to municipalities to provide certain infrastructure such as roads and sewage systems. We and the contractors that we engage to work on our jobsites are also subject to laws and

regulations related to workers' health and safety, wage and hour practices and immigration. We generally are required to obtain permits and approvals from local authorities to commence and complete residential development or home construction. Such permits and approvals may from time to time be opposed or challenged by local governments, neighboring property owners or other interested parties, adding delays, costs and risks of non-approval to the process. Our obligation to comply with the laws and regulations under which we operate, or the obligation of our independent contractors to comply with these and other laws and regulations, could result in delays in land development and homebuilding activity, cause us to incur substantial costs and prohibit or restrict land development and construction.

It is possible that increasingly stringent requirements will be imposed on developers and homebuilders in the future. Although we cannot predict with any certainty either the nature of the requirements or the effect on our business, they could result in time-consuming and expensive compliance programs and in substantial expenditures, which could cause delays and increase our cost of operations. The additional costs associated with new regulatory requirements or compliance programs may not be recoverable from our homebuyers in the form of higher sales prices which could adversely affect our results of operations.

We may incur increased costs related to repairing construction defects in the homes we sell.

Our Home Building operations are subject to warranty and other claims related to construction defects and other construction-related issues, including compliance with building codes. The costs we incur to resolve those warranty and other claims reduce our profitability, and if we were to experience an unusually high level of claims, or unusually severe claims, our profitability could be adversely affected.

An inability to obtain bonding could limit the number of projects we are able to pursue, and we could be adversely affected if we are required to post additional collateral in respect of bonds issued in connection with past construction projects.

As is customary in the homebuilding industry, we often are required to provide surety bonds to secure our performance under construction contracts, development agreements and other arrangements. Our ability to obtain surety bonds primarily depends upon our credit rating, capitalization, working capital, past performance, management expertise and certain external factors, including the overall capacity of the surety market. Under certain circumstances, such as a claim on a bond, a breach of the contract to which the bond applies, or a material breach of a representation made to a surety, we may be required to provide one or more sureties with additional collateral to support our bond obligations. In addition, in some cases, upon request of a surety, we may be required to cause the surety to be discharged from all bond obligations by providing collateral sufficient to cover all of such surety's bond exposure or alternative funding of such bond obligations. If one or more of our third-party sureties were to request additional collateral, our obligations could be significant, which could have a material adverse effect on our financial position or results of operations.

FINANCIAL SERVICES

General business, economic and market conditions may significantly affect the results of operations of our Financial Services operations.

Our Financial Services operations are sensitive to general business and economic conditions in the United States. These conditions include the liquidity and availability of financing in mortgage finance markets, short-term and long-term interest rates, inflation, fluctuations in both debt and equity capital markets, and the strength of the U.S. economy, as well as the local economies in which we conduct business. If any of these conditions worsen, our Financial Services business could be adversely affected. Also, because Financial Services focuses on providing services to customers who are considering the purchase of a home from Home Building or third parties, reduced home sales will likely also impact Financial Services' business in the form of reduced home loans, title services and insurance services.

In addition, our Financial Services business is significantly affected by the fiscal and monetary policies of the federal government and its agencies. We are particularly affected by the policies of the Federal Reserve Board, which regulates the supply of money and credit in the United States. The Federal Reserve Board's policies influence the size of the mortgage origination market. The Federal Reserve Board's policies also influence the yield on our interest-earning assets and the cost of our interest-bearing liabilities. Changes in those policies are beyond our control and difficult to predict and can have a material effect on the results of operations of our Financial Services segment.

The mortgage financing industry is highly competitive.

Our Financial Services business operates in a highly competitive industry that could become even more competitive as a result of economic, legislative, regulatory and technological changes. Competition for mortgage loans comes primarily from mortgage banking subsidiaries of large commercial banks, mortgage companies, and savings and other financial institutions. We face competition in such areas as mortgage product offerings, rates and fees, and customer service. Competition has been significantly affected by recent disruptions in the mortgage market, which have significantly reduced the pool of qualified homebuyers. In addition, technological advances such as developments in e-commerce activities have increased consumers' accessibility to products and services generally. This has intensified competition among banking as well as nonbanking companies in offering mortgage loans and similar financial products and services.

Changes in lending laws could hurt our Financial Services operations.

Our Financial Services operations are subject to extensive and complex laws and regulations that affect loan origination. These include eligibility requirements for participation in federal loan programs and compliance with consumer lending and similar requirements such as disclosure requirements, prohibitions against discrimination and real estate settlement procedures. They may also subject our operations to examination by applicable agencies. These may limit our ability to provide mortgage financing or title services to potential purchasers of our homes.

FACTORS AFFECTING MULTIPLE BUSINESS SEGMENTS

Market conditions in the mortgage lending and mortgage finance industries have worsened significantly in fiscal year 2008, which adversely affected the availability of credit for some purchasers of our homes, reduced the population of potential mortgage customers and reduced mortgage liquidity. Further tightening of mortgage lending or mortgage financing requirements or further reduced mortgage liquidity could have a material adverse effect on our homebuilding and mortgage lending operations and their respective results of operations.

In fiscal year 2008, the mortgage lending industry experienced significant disruptions due to, among other things, defaults on a variety of nonconforming loan products and a resulting decline in the market value of such loans. In light of these developments, lenders, investors, regulators and other third parties questioned the adequacy of loan documentation and credit requirements for certain types of loan programs made available to borrowers in recent years. This led to reduced investor demand for mortgage loans and mortgage-backed securities, tightened credit underwriting requirements, reduced liquidity and increased credit risk premiums. Among other things, deterioration in credit quality among nonconforming loan borrowers has caused almost all lenders to eliminate most loan products that are not conforming loans, FHA/VA-eligible loans or jumbo loans meeting conforming underwriting guidelines except as to the size of the loan. In general, fewer loan products and tighter loan qualifications make it more difficult for some categories of borrowers to finance the purchase of our homes or obtain mortgage loans from us to finance the purchase of homes sold by others. These developments have resulted in a reduction in demand for the homes that we sell and in the demand for the mortgage loans that we originate. These developments have had and are expected to continue to have a material adverse effect on our business and results of operations.

The adverse market conditions in the mortgage lending industry described above have affected our business in a number of respects. For example, CTX Mortgage Company, LLC has essentially ceased originating sub-prime or other nonconforming loans. Furthermore, due to the reduction in available mortgage loan liquidity, CTX Mortgage Company, LLC decided in the second quarter of fiscal year 2008 to discontinue the origination of new construction loans. In addition, in the second and third quarters of fiscal year 2008, CTX Mortgage Company, LLC ceased selling loans to HSF-I, which had been the principal financing vehicle for its operations, and terminated this financing vehicle.

Further tightening of the mortgage lending markets in the form of reduced numbers or types of loan products, or tighter loan qualification requirements (including credit score and down payment requirements), could further reduce the demand for our homes or the mortgages we originate, which could have a material adverse effect on our business or results of operations. In addition, further disruptions or other adverse conditions in the mortgage finance markets leading to further reduced mortgage liquidity or decreased demand for mortgage loans could result in an inability to sell or finance the loans we originate, or less favorable terms of sale or reduced yield or greater reserves pending sale, which could have a material adverse effect on our business or results of operations.

We could be adversely affected by a change in our credit rating or a disruption in the capital markets.

Our ability to sustain or grow our business and to operate in a profitable manner depends to a significant extent upon our ability to access capital. We use capital principally to finance operations, purchase and develop land, construct houses and originate mortgage loans. Until recently, our access to capital was enhanced by the fact that our senior debt securities had an investment-grade credit rating from each of the principal credit rating agencies, and we were able to issue commercial paper. During the quarter ended December 31, 2007, Moody's Investors Service, which we refer to as Moody's, and Standard & Poors, which we refer to as S&P, lowered their ratings of our senior debt, and changed our commercial paper rating to non-prime. On May 7, 2008, S&P further lowered its ratings of our senior debt. See Financial Condition and Liquidity in Item 7 of this Report for additional information about our credit rating. As a result of our current rating, we do not have access to many financing strategies that are available to companies with investment grade ratings. As a consequence, it may become more difficult and costly for us to access the capital that is required in order to implement our business plans and operate our business. We may experience a further downgrade in our credit rating by the rating agencies that would likely result in increased costs for certain of our financing and also further restrict our ability to finance mortgage loan originations.

As a result of the more recent adverse market conditions affecting mortgage loans, which worsened significantly in August 2007, CTX Mortgage Company, LLC no longer relies on asset-backed funding vehicles, such as HSF-I, for its mortgage funding needs. Instead, CTX Mortgage Company, LLC uses committed bank warehouse credit facilities.

On May 7, 2008, S&P lowered our debt rating from BB+ to BB. This downgrade triggered a provision in CTX Mortgage Company, LLC's \$450 million committed bank warehouse credit facility which allows the bank to convert the facility to an amortizing loan based on the ultimate sale of the underlying collateral and not to purchase any additional mortgage loans. On May 9, 2008, CTX Mortgage Company, LLC executed an amendment to the bank warehouse credit facility which lowered the commitment to \$375 million, reset the debt ratings trigger that provides the bank the option to convert the facility to an amortizing loan if our credit rating falls below BB by S&P and Fitch or below Ba2 by Moody's. A further downgrade in our credit rating by a rating agency could result in the wind-down of the \$375 million warehouse credit facility. For more information about our current mortgage financing, see the Financial Condition and Liquidity section of Item 7 of this Report.

A long-term or further disruption in the mortgage finance or capital markets could make it more difficult or more expensive for us to raise capital for use in our business, for our customers to obtain home loans or for us to sell loans originated by our Financial Services operations. Further, a reduction of the positive spread between the rate at which we can borrow and the rate at which we can lend could hurt our ability to profit from our loan origination business.

Our income tax provision and other tax reserves may be insufficient if any taxing authorities are successful in asserting tax positions that are contrary to our position.

Significant judgment is required to determine our provision for income taxes and for our reserves for federal, state, local and other taxes. In the ordinary course of our business, there may be matters for which the ultimate tax outcome is uncertain. Although we believe our approach to determining the tax treatment is appropriate, no assurance can be given that the final tax authority review will not be materially different than that which is reflected in our income tax provision and other tax reserves. Such differences could have a material adverse effect on our income tax provision or benefits, or other tax reserves, in the period in which such determination is made and, consequently, on our results of operations for such period.

From time to time, we are audited by various federal, state and local authorities regarding tax matters. We fully cooperate with all audits. Our audits are in various stages of completion; however, no outcome for a particular audit can be determined with certainty prior to the conclusion of the audit, appeal and, in some cases, litigation process. As each audit is concluded, we record appropriate adjustments, if any, in our financial statements in the period determined. We maintain reserves to provide for potential tax exposures relating to uncertain tax positions, based on reasonable estimates of our potential exposure (including interest and penalties, when applicable) that may result from audits. However, if the reserves are insufficient upon completion of any audit process, there could be an adverse impact on our financial position and results of operations.

New federal laws that adversely affect liquidity in the secondary mortgage market could hurt our business.

The Government-sponsored enterprises, principally FNMA and FHLMC, play a significant role in buying home mortgages and creating investment securities that they either sell to investors or hold in their portfolios. These organizations provide liquidity to the secondary mortgage market. Any new federal laws that restrict or curtail their activities could affect the ability of our customers to obtain mortgage loans or increase mortgage interest rates, which could reduce demand for our homes and/or the loans that we originate and adversely affect our results of operations.

Reductions in tax benefits could make home ownership more expensive or less attractive.

Significant expenses of owning a home, including mortgage interest expense and real estate taxes, generally are deductible expenses for an individual's federal, and in some cases state, income taxes, subject to various limitations under current tax law and policy. If the federal government or a state government changes income tax laws to eliminate or substantially modify these income tax deductions, the after-tax costs of owning a new home would increase for the typical homeowner. If such tax law changes were enacted without other offsetting provisions or effects, they could adversely impact the demand for, and/or sales prices of, new homes, mortgage loans and home equity loans, and our operations might be negatively affected.

Failure to comply with the covenants and conditions imposed by our credit facilities could restrict future borrowing or cause our debt to become immediately due and payable.

We are required to maintain compliance with certain financial covenants in our multi-bank revolving credit facility. Material covenants include a maximum leverage ratio, a minimum tangible net worth requirement and a borrowing base limiting the amount of available borrowings. There can be no assurance that we will continue to comply with the covenants in our multi-bank revolving credit facility, and depending on our future results of operations, we may need to seek waivers or amendments from our lenders in future periods. Furthermore, there can be no assurance that our lenders will agree to such waivers or amendments on terms we regard as satisfactory.

In addition, our committed bank warehouse credit facilities and loan agreements relating to certain of our joint ventures contain various affirmative and negative covenants and guarantees requested by lenders for facilities of these types. In order to continue to borrow funds under these facilities, we will need to continue to be in compliance with these covenants and guarantees.

In general, with respect to our multi-bank revolving credit facility, bank warehouse credit facilities and loan agreements relating to certain of our joint ventures, if we fail to comply with any of the covenants or guarantees contained therein, which may occur if we experience additional asset impairments or incur additional net losses, we may be unable to obtain future financing for working capital, capital expenditures, letters of credit, acquisitions, debt service requirements or other requirements, or the credit providers could cause our debt to become immediately due and payable, or we may be required to make certain payments in connection with our joint venture indebtedness.

We may be subject to claims and liabilities in connection with sales of assets or discontinued businesses.

Over the past several fiscal years, we have completed the sale of our international homebuilding operations, Home Equity and Construction Services in separate transactions to unrelated third parties. In addition, in March 2008, we sold a portfolio of 27 developed, partially developed and undeveloped properties to a joint venture and sold a portfolio of five resort/second home properties to a third party. Finally, in April 2008, we completed the sale of our home services operations. In connection with each of these transactions, we made representations and warranties to the purchasers of the applicable businesses or assets, agreed to retain responsibility for certain actual or contingent liabilities and agreed to indemnify the purchasers against breaches of representations and warranties and other liabilities. In addition, certain of the businesses we sold had bonds or letters of credit outstanding at the date of sale, which were assumed by the purchasers, but for which we retain responsibility under indemnities or other direct contractual relationships with the sureties issuing the bonds or letters of credit. To date, we have not incurred any material losses in respect of claims asserted by the purchasers in connection with these transactions or claims asserted by sureties in respect of outstanding bonds or letters of credit. In addition, our liability to the purchasers is subject to certain limitations, including limitations on the time period during which claims may be asserted and the amounts for which we are liable. However, there can be no assurance that we will not incur future liabilities to the purchasers in connection with these transactions or the sureties issuing any bonds or letters of credit or that the amount of such liabilities will not be material.

We may not realize our net deferred tax assets.

As of March 31, 2008, we had gross deferred tax assets of \$1.02 billion for which an \$830 million valuation allowance was established in fiscal year 2008. The ultimate realization of the deferred tax assets is dependent upon a variety of factors, including taxable income in prior carryback years, estimates of future taxable income, tax planning strategies and reversals of existing taxable temporary differences. The Financial Accounting Standards Board (FASB) provides in Statement of Financial Accounting Standards (SFAS) No. 109, Accounting for Income Taxes, (SFAS 109) that a cumulative loss in recent years is significant negative evidence in considering whether deferred tax assets are realizable. Based on our assessment, including the implementation of certain tax planning strategies, the realization of approximately \$830 million of our deferred tax assets is dependent upon future taxable income and, accordingly, we have established a valuation allowance equal to such amount.

The valuation allowance may be increased or decreased as conditions change or if we are unable to implement certain tax planning strategies. An increase in the valuation allowance would reduce the carrying value of the deferred tax assets and increase the provision for income taxes in the reporting period, which would reduce net income for the period and could have a material adverse effect on our financial position and results of operations.

FORWARD-LOOKING STATEMENTS

This report includes various forward-looking statements, which are not facts or guarantees of future performance and which are subject to significant risks and uncertainties.

Certain information included in this Report or in other materials we have filed or will file with the SEC, as well as information included in oral statements or other written statements made or to be made by us, contains or may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Exchange Act and the Private Securities Litigation Reform Act of 1995, as amended. You can identify these statements by the fact that they do not relate to matters of a strictly factual or historical nature and generally discuss or relate to forecasts, estimates or other expectations regarding future events. Generally, the words believe, expect, intend, estimate, anticipate, project, may, can, could, might, will and similar expressions identify forward-looking statements, including statements related to expected operating and performing results, planned transactions, planned objectives of management, future developments or conditions in the industries in which we participate and other trends, developments and uncertainties that may affect our business in the future. Such statements include information related to anticipated operating results, financial resources, changes in interest rates and other developments and conditions in financing markets, changes in revenues, changes in profitability, interest expense, growth and expansion, our investment in unconsolidated entities, the ability to acquire land, the ability to gain approvals and to open new neighborhoods, the ability to sell homes and properties, the ability to deliver homes from backlog, the ability to secure materials and contractors, the ability to produce the liquidity and capital necessary for our business, the completion of and effects from planned transactions and stock market valuations. From time to time, forward-looking statements also are included in our other periodic reports on Forms 10-K, 10-Q and 8-K, press releases and presentations, on our web site and in other material released to the public.

Forward-looking statements are not historical facts or guarantees of future performance but instead represent only our beliefs at the time the statements were made regarding future events, which are subject to significant risks, uncertainties, and other factors, many of which are outside of our control and certain of which are listed above. Any or all of the forward-looking statements included in this Report and in any other reports or public statements made by us may turn out to be materially inaccurate. This can occur as a result of incorrect assumptions or as a consequence of known or unknown risks and uncertainties. Many of the risks and uncertainties mentioned in this Report or another report or public statement made by us, such as those discussed in the risk factors contained in this Item 1A, will be important in determining whether these forward-looking statements prove to be accurate. Consequently, neither our stockholders nor any other person should place undue reliance on our forward-looking statements and should recognize that actual results may differ materially from those anticipated by us.

All forward-looking statements made in this Report are made as of the date hereof, and the risk that actual results will differ materially from expectations expressed in this Report will increase with the passage of time. We undertake no obligation, and disclaim any duty, to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changes in our expectations or otherwise. However, we may make further

disclosures regarding future events, trends and uncertainties in our subsequent reports on Forms 10-K, 10-Q and 8-K to the extent required under the Exchange Act. The above cautionary discussion of risks, uncertainties and possible inaccurate assumptions relevant to our business include factors we believe could cause our actual results to differ materially from expected and historical results. Other factors beyond those listed above, including factors unknown to us and factors known to us which we have not determined to be material, could also adversely affect us.

This discussion is provided as permitted by the Private Securities Litigation Reform Act of 1995 and all of our forward-looking statements are expressly qualified in their entirety by the cautionary statements contained or referenced in this section.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

In addition to land held as inventory in connection with our residential construction activities, we own the following properties:

Home Building owns property in Phoenix, Arizona; Albemarle, North Carolina; Plant City, Florida and Prosper, Texas. These properties consist of office and warehouse space used to support our business.

In addition to land we own and use in our operations, we lease office space under operating leases in the markets in which we operate throughout the United States. We believe that our existing facilities are suitable and adequate for our current and planned levels of operation. For additional information on our operating leases, see Note (G), Commitments and Contingencies, of the Notes to Consolidated Financial Statements.

See Item 1. Business for additional information relating to our properties including land owned or controlled by our Home Building segment.

ITEM 3. LEGAL PROCEEDINGS

In the normal course of our business, we and/or our subsidiaries are named as defendants in certain suits filed in various state and federal courts. We believe that none of the litigation matters in which we, or any of our subsidiaries, are involved, including those described below, are likely to have a material adverse effect on our consolidated financial condition or operations.

In January 2003, we received a request for information from the United States Environmental Protection Agency, which we refer to as the EPA, pursuant to Section 308 of the Clean Water Act seeking information about compliance with permits regulating storm water discharges at projects that we had completed or were building. Subsequently, the EPA limited its request to Home Building's operations at 30 neighborhoods. Home Building has provided the requested information and the United States Department of Justice, which we refer to as the Justice Department, acting on behalf of the EPA, has asserted that some of these and certain other neighborhoods have violated regulatory requirements applicable to storm water discharges, and that injunctive relief and civil penalties may be warranted. Home Building has been exploring methods of settling this matter. In May 2008, Home Building agreed to sign a consent decree with the EPA and various states with respect to our prior and future storm water pollution prevention practices at all of Home Building's sites. When the consent decree is signed by all parties, the Justice Department will file suit in Federal Court in accordance with the accepted practice in matters of this nature and simultaneously submit the proposed consent decree for approval by the Court. A notice of lodging of the proposed consent decree will then be published in the Federal Register, which triggers the opening of a public comment period. The public comment period is typically 30 days. The Justice Department will review and respond to any comments it receives and will then ask the Court to sign and enter the proposed consent decree. The Court may require a hearing before it rules. Once the Court is satisfied, it will sign and enter the consent decree. We anticipate that the consent decree will become final during the second quarter of the fiscal year ending March 31, 2009. Under the proposed consent decree, Home Building will pay a civil penalty of \$1,485,000, and will agree to certain management practices related to controlling storm water discharges at all of Home Building's sites.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 4A. EXECUTIVE OFFICERS OF THE REGISTRANT

The following is an alphabetical listing of our executive officers as of May 11, 2008, as such term is defined under the rules and regulations of the SEC. Officers are generally elected by the Board of Directors at its meeting immediately following our annual stockholders meeting, with each officer serving at the pleasure of the Board of Directors until a successor has been elected and qualified. There is no family relationship among any of these officers.

Name	Age	Positions with the Company or Business Experience
David L. Barclay	55	President, Western Region, of Centex Real Estate Corporation (since April 2007); Co-President and Co-Chief Operating Officer (West Operating Region) of Centex Real Estate Corporation from March 2006 to April 2007; Executive Vice President West Coast Region of Centex Real Estate Corporation from May 2002 to March 2006; President Northern California Division of Centex Real Estate Corporation from June 1996 to May 2002
Joseph A. Bosch	50	Senior Vice President Human Resources since July 2006; Senior Vice President Human Resources at Tenet Healthcare Corporation from August 2004 to June 2006; Chief People Officer at Pizza Hut, a unit of YUM! Brands, Inc. from June 1997 to July 2004
Timothy R. Eller	59	Chairman of the Board, Chief Executive Officer, President and Chief Operating Officer of Centex Corporation (Chairman of the Board and Chief Executive Officer since April 2004; President and Chief Operating Officer since April 2002); Executive Vice President of Centex Corporation from August 1998 to April 2002; Chairman of the Board of Centex Real Estate Corporation from April 1998 to April 2003, and since April 2006; Chief Executive Officer of Centex Real Estate Corporation from July 1991 to April 2002, and since April 2006; President and Chief Operating Officer of Centex Real Estate Corporation from January 1990 to May 1996
Mark D. Kemp	46	Senior Vice President and Controller of Centex Corporation since September 2004; interim Chief Financial Officer from June 2006 to October 2006; Vice President and Controller of Centex Corporation from December 2002 to September 2004; Partner and employee at Arthur Andersen LLP from December 1983 to August 2002
Catherine R. Smith	44	Executive Vice President and Chief Financial Officer of Centex Corporation since October 2006; Executive Vice President and Chief Financial Officer of Kennametal, Inc. from April 2005 to October 2006; Executive Vice President and Chief Financial Officer of Bell Systems, a business segment of Textron, Inc., from October 2003 to April 2005; various financial positions including Vice President and Chief Financial Officer of the Intelligence and Information Systems business segment of Raytheon Company from August 1986 to September 2003
Robert S. Stewart	54	

Edgar Filing: CENTEX CORP - Form 10-K

Senior Vice President Strategy, Sales, Marketing and Corporate Development of Centex Corporation since July 2007; Senior Vice President Strategy and Corporate Development from April 2005 to June 2007; Senior Vice President Strategic Planning and Marketing from May 2000 to March 2005; Employee at the Weyerhaeuser Company from March 1977 to May 2000, during which time he held a range of key management positions, including positions in strategic planning

Brian J. Woram

47

Senior Vice President, Chief Legal Officer, General Counsel and Assistant Secretary of Centex Corporation (Secretary from December 2004 to March 2005); Senior Vice President, General Counsel and Assistant Secretary of Centex Real Estate Corporation from September 1998 to December 2004

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Stock Prices and Dividends

Quarter	Year Ended March 31, 2008			Year Ended March 31, 2007		
	Price High	Price Low	Dividends	Price High	Price Low	Dividends
First	\$ 49.85	\$ 39.59	\$.04	\$ 64.62	\$ 44.13	\$.04
Second	\$ 44.23	\$ 24.55	\$.04	\$ 55.70	\$ 42.90	\$.04
Third	\$ 30.75	\$ 17.77	\$.04	\$ 58.42	\$ 48.34	\$.04
Fourth	\$ 30.29	\$ 18.17	\$.04	\$ 56.45	\$ 40.41	\$.04

The principal market for our common stock is the New York Stock Exchange (ticker symbol CTX). The approximate number of record holders of our common stock at May 9, 2008 was 2,917.

The remaining information called for by this item relating to securities authorized for issuance under equity compensation plans is reported in Note (K), Capital Stock and Employee Benefit Plans, of the Notes to Consolidated Financial Statements.

Share Repurchases

From time to time, we have repurchased shares of our common stock pursuant to publicly announced share repurchase programs. The following table details our common stock repurchases for the three months ended March 31, 2008:

Period	Issuer Purchases of Equity Securities			
	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan	Maximum Number of Shares that May Yet Be Purchased Under the Plan
January 1-31		\$		9,399,700
February 1-29		\$		9,399,700
March 1-31	8,338	\$ 24.21		9,399,700
Total ⁽¹⁾	8,338	\$ 24.21		

(1) The 8,338 shares repurchased for the quarter ended March 31, 2008 represent the

delivery to us by employees or directors of previously issued shares to satisfy the exercise price of options and/or withholding taxes that arise on the exercise of options or the vesting of restricted stock. These transactions are authorized under the terms of the equity plans under which the options or other equity were awarded; however, these transactions are not considered repurchases pursuant to our share repurchase program.

On May 11, 2006, our Board of Directors authorized the repurchase of 12 million shares of our common stock. After giving effect to repurchases after that date, the current approved repurchase authorization is 9,399,700 shares. Purchases are made in the open market or in block purchases, and such transactions may be effected from time to time or pursuant to share repurchase plans under SEC Rule 10b5-1. The share repurchase authorization has no stated expiration date.

Performance Graph

The following graph compares the yearly change in the cumulative total stockholder return on our common stock during the five fiscal years ended March 31, 2008 with the S&P 500 Index and the S&P Home Building Index.

The comparison assumes \$100 was invested on March 31, 2003 in our common stock and in each of the foregoing indices, and assumes reinvestment of dividends in the form of cash or property. This graph is not intended to forecast the future performance of our common stock and may not be indicative of such future performance.

On January 30, 2004, we spun-off shares of common stock and Class B common stock of Eagle Materials Inc. f/k/a Centex Construction Products, Inc., which we refer to as Construction Products, to its stockholders. For each share of Centex common stock owned, stockholders received 0.044322 shares of Construction Products common stock and 0.149019 shares of Construction Products Class B common stock. On June 30, 2003, we spun-off our stock in Cavco Industries, Inc. to our stockholders. For each share of Centex common stock owned, stockholders received 0.05 shares of Cavco. On the respective distribution dates, this number of shares had a public market value of \$4.32, \$8.13 and \$0.97, respectively. For purposes of the following graph, it is assumed that each share of Construction Products and Cavco received in the distribution was immediately sold for its market value and the proceeds reinvested in additional shares of Centex common stock. The value of Centex common stock at March 31, 2008 therefore includes the value of the spin-off shares but not the separate performance of those securities since the respective dates of the spin-offs.

Comparative Five Year Cumulative Total Stockholder Return
Centex Corporation

	2003	2004	2005	2006	2007	2008
Centex Corporation	\$ 100	\$ 212	\$ 225	\$ 245	\$ 165	\$ 96

(1) The selected financial data presented in this table, excluding stock prices for the periods covered by the financial statements included in this Report and all prior periods, have been derived from our audited financial statements and adjusted to reflect home services operations (sold in April 2008),

Construction Services (sold in March 2007), Home Equity (sold in July 2006), International Homebuilding (sold in September 2005), Construction Products (spun off in January 2004) and Manufactured Homes (spun off in June 2003) as discontinued operations.

- (2) *Earnings (Loss) from Continuing Operations are Before Cumulative Effect of a Change in Accounting Principle adopted in fiscal year 2004 associated with the initial consolidation of HSF-I pursuant to the provisions of FIN 46.*
- (3) *Represents a supplemental presentation that reflects the Financial Services segment as if accounted for under the equity method. We believe that separate disclosure of the consolidating information is useful because the*

Financial Services subsidiaries and related companies operate in a distinctly different financial environment, and we have limited obligations with respect to the indebtedness of our Financial Services subsidiaries and related companies. Management uses this information in its financial and strategic planning. We also use this presentation to allow investors to compare us to homebuilders that do not have financial services operations.

- (4) *Capitalization is composed of Debt, Minority Interest and Stockholders Equity. In the calculation of Capitalization, minority interest in fiscal years 2008, 2007, 2006, 2005 and 2004 excludes \$75.3 million, \$152.9 million, \$492.1 million, \$415.4 million and \$332.7 million, respectively, of*

minority interests recorded in connection with the consolidation of certain entities with which Home Building has lot option agreements. This supplemental presentation is used by management in its financial and strategic planning and allows investors to compare us to other homebuilders, which may not have similar arrangements.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion is intended to help the reader gain a better understanding of our financial condition and our results of operations. It is provided as a supplement to, and should be read in conjunction with, our financial statements and accompanying notes included in this Report.

Executive Summary

Fiscal year 2008 was a very challenging year. Our results of operations for the year ended March 31, 2008 were materially affected by continuing adverse conditions impacting our homebuilding and mortgage lending operations. The market conditions continued to deteriorate significantly during the year ended March 31, 2008, and we are unable to predict whether they will deteriorate further, improve or what effects any future changes in market conditions would have on our business or results of operations. A summary of our results of operations by line of business is as follows (dollars in thousands):

	<i>For the Year Ended March 31,</i>		
	2008	2007	2006
Revenues			
Home Building	\$ 7,965,614	\$ 11,414,827	\$ 12,272,203
Financial Services	309,948	468,001	462,223
Other		4,773	8,240
Total	\$ 8,275,562	\$ 11,887,601	\$ 12,742,666
Earnings (Loss) from Continuing Operations			
Before Income Taxes			
Home Building	\$(2,603,118)	\$ 205,353	\$ 2,084,829
Financial Services	(138,153)	84,530	84,465
Other	(133,887)	(183,097)	(288,556)
Total	\$(2,875,158)	\$ 106,786	\$ 1,880,738

Revenues for the year ended March 31, 2008 were \$8.28 billion, which represents a 30.4% decrease compared to the year ended March 31, 2007. Earnings (loss) from continuing operations before income taxes for the year ended March 31, 2008 decreased to a loss of \$2.88 billion. The decrease in our revenues and the loss from continuing operations before income taxes during the year ended March 31, 2008 are primarily attributable to continuing adverse conditions affecting our homebuilding and mortgage lending operations.

Beginning in fiscal year 2006, the U.S. housing industry began to experience a significant downturn, which directly and adversely affected, and continues to adversely affect, our business and results of operations. We believe the principal factors that have caused this downturn include each of the following, the impact of which varies based upon geographic market, product segment and the time since commencement of the downturn:

- increased inventory of new and existing homes for sale, including the impact of increases in residential foreclosures,

- reduced availability and increased cost of mortgage financing due to the significant mortgage market disruptions,

- a decrease in the affordability of housing in selected markets as a result of significant price appreciation in the years preceding the downturn and tightened credit standards for homebuyers,

a decline in homebuyer demand due to lower consumer confidence in the consumer real estate market and an inability of many homebuyers to sell their existing homes, and

pricing pressures resulting from a variety of factors, including the decision of homebuilders to offer significant discounts and sales incentives, to liquidate unsold inventories in order to generate cash, and the need for home prices to fall within mortgage qualification limits.

The inventory of new and existing homes for sale remains high as homebuilders have continued to build homes and attempt to liquidate unsold inventory as residential foreclosures continue to increase. The decline in homebuyer demand can be attributed to, in part, concerns of prospective homebuyers that prices will continue to decline and, in fact, the excess supply of homes for sale and the need for builders to generate cash have caused homebuilders and other home sellers to reduce prices. In addition, many prospective homebuyers have been unable to sell their existing homes. Moreover, during fiscal year 2008, the mortgage markets experienced significant disruptions

which led to an unprecedented combination of reduced investor demand for mortgage loans and mortgage-backed securities, tightened credit requirements for homebuyers, reduced mortgage loan liquidity and increased credit risk premiums. As a result, prospective borrowers experienced more difficulty or greater expense in obtaining loans, or were subject to increased credit score or down payment requirements, which further reduced the demand for homes and mortgage loans during the year.

These market conditions materially impacted Home Building's operating results for the year ended March 31, 2008 as evidenced by the following:

a \$3,449.2 million decrease in homebuilding revenues, net of discounts,

\$1,792.4 million in land-related impairments,

\$388.7 million in losses on land sales,

\$120.4 million in write-offs of land deposits and pre-acquisition costs,

\$100.5 million in our share of joint ventures' impairments, and

\$78.2 million in goodwill impairments.

During the year, we assessed our neighborhoods and land for possible land-related impairments. The market conditions during the year adversely impacted anticipated future selling prices, sales rates and other assumptions included in our impairment evaluations, and we recorded significant impairments totaling \$1,792.4 million. During the year ended March 31, 2008, 410 land-related impairments were recorded representing 296 neighborhoods and land investments, certain of which have been impaired more than once. Land-related impairments during the year ended March 31, 2007 represented 83 neighborhoods and land investments. During the fourth quarter of fiscal year 2008, we recorded \$300.0 million in impairments. At March 31, 2008, the remaining carrying value of neighborhoods and land investments for which an impairment was recorded in the quarter ended March 31, 2008 was \$174.8 million. If market conditions worsen, or if any of our assumptions are adjusted negatively in future periods, we may have additional land-related impairments, which could be significant.

In March 2008, we sold a portfolio of 27 developed, partially-developed and undeveloped properties to a joint venture funded principally by certain investment funds for \$161.2 million in cash. The portfolio of assets sold includes properties that represent 8,545 lots in 27 neighborhoods across 11 states, with the majority located in California and Nevada. In March 2008, we also sold a portfolio of five resort/second home properties to a third party for \$53.7 million in cash, net of \$14.9 million in seller financing for one of the properties. The resort/second home properties sold include properties located in Texas, North Carolina and New Hampshire. Total losses related to these transactions were approximately \$442.1 million. These transactions resulted in the realization of significant tax losses and a refund from tax authorities of taxes paid in prior years.

These transactions are consistent with our near-term goals of reducing our land supply and generating cash. These land sales accelerate our move to a more asset-light operating model, sharpen our focus on core markets and consumer segments, reduce future land development cash obligations and monetize approximately \$350 million of our deferred tax assets. For additional information on these land sale transactions, please refer to the Home Building discussion later in this section.

Our homebuilding operations also experienced a significant decline in operating margin primarily attributable to lower home prices, increases in discounts and sales incentives, including increases in seller-paid financing and closing costs, and increases in sales commissions to help stimulate sales and close homes. In addition, customer cancellation rates remain elevated when compared to historical levels. Customer discounts have increased since the fourth quarter of fiscal year 2006. Customer discounts increased to 12.3% of housing revenues for the year ended March 31, 2008, up from 7.1% for the year ended March 31, 2007. As a percentage of revenues, closing and financing costs have increased from 3.0% to 3.3% for the year ended March 31, 2008 as compared to the year ended March 31, 2007. Sales commissions, as a percentage of revenues, have increased from 4.2% to 4.6% for the year ended March 31, 2008 as

compared to the year ended March 31, 2007.

Financial Services' operating loss for the year ended March 31, 2008 was \$138.2 million as compared to operating earnings of \$84.5 million for the year ended March 31, 2007. For the year ended March 31, 2008, mortgage loan origination volume decreased 27.7%. This change is primarily attributable to the adverse conditions in the mortgage markets described above, which also resulted in a significant decrease in revenues and a \$158.5 million increase in provisions for losses on mortgages loans for the year ended March 31, 2008. Continued adverse market conditions and further declines in homebuyer demand could have a negative impact on Financial Services' future operating results.

We anticipate that our business and results of operations will continue to be affected by the difficult industry conditions for some time. In general, we believe that our existing sources of funding, including cash flow from operations and our committed credit facilities are adequate to meet our currently anticipated operating needs, capital expenditures and debt service requirements for at least the next twelve months. However, further deterioration in market conditions, including lower demand or prices for our homes or further disruptions of the mortgage markets, would likely result in declines in sales of our homes, accumulation of unsold inventory and margin deterioration, as well as potential additional land-related impairments and write-offs of deposits and pre-acquisition costs, which could reduce cash flow and profits and require that we seek amendments or waivers to our credit facilities to ensure continued availability of committed debt financing.

We believe the fundamentals that support homebuyer demand in the long-term remain solid and the current market conditions will moderate and improve over time; however, we cannot predict the duration of the current market conditions. We continue to adjust our operations in response to market conditions by reducing our unsold inventory, reducing our land position, and lowering our costs. Our unsold inventory has decreased from 4,909 units as of March 31, 2007 to 1,754 units as of March 31, 2008. Since March 31, 2007, our total land position has decreased by 71,651 lots or 44.8%. Further, Home Building's selling, general and administrative expenses have decreased from \$1,523.0 million for the year ended March 31, 2007 to \$1,111.6 million for the year ended March 31, 2008. We are also working to reduce the costs of constructing our homes, although in many cases, cost savings will not be realized until future periods.

During the year ended March 31, 2008, we generated \$1,480.6 million in cash flows from operating activities, which was primarily derived through decreases in Home Building's inventories and Financial Services' proceeds from sales of mortgage loans that were not reinvested in new mortgage loans. The decreases in Home Building's inventories were primarily the result of units closed and reductions in land acquisition and development.

FISCAL YEAR 2008 COMPARED TO FISCAL YEAR 2007

HOME BUILDING

The following summarizes the results of our Home Building operations for the two-year period ended March 31, 2008 (dollars in thousands except per unit data):

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Revenues Housing	\$ 7,529,191	(31.6%)	\$ 11,014,975	(7.6%)
Revenues Land Sales and Other	436,423	9.1%	399,852	13.7%
Cost of Sales Housing	(6,543,086)	(23.9%)	(8,599,465)	1.7%
Cost of Sales Land Sales and Other	(2,721,219)	160.5%	(1,044,455)	251.7%
Selling, General and Administrative Expenses	(1,111,641)	(27.0%)	(1,523,001)	0.4%

financial measure to aid in evaluating the performance of its ongoing housing projects. Operating earnings from housing operations is equal to Housing Revenues less Housing Cost of Sales and Selling, General and Administrative Expenses, all of which are set forth in the table above.

Home Building consists of the following reporting segments with operations located in the following states:

East: Georgia (Savannah only), Maryland, New Jersey, North Carolina, South Carolina and Virginia

Southeast: Florida, Georgia (Atlanta only) and Tennessee

Central: Indiana, Illinois, Michigan, Minnesota and Missouri

Texas: Texas

Northwest: Colorado, Hawaii, Nevada (except Las Vegas), Northern California, Oregon, Washington

Southwest: Arizona, Southern California, Nevada (Las Vegas only), New Mexico

Other homebuilding ⁽¹⁾

(1) *Other homebuilding includes certain resort/second home projects in Florida that we plan to build-out and liquidate, and holding companies. In addition, Other homebuilding includes amounts consolidated under the caption land held under option agreements not owned and capitalized interest for all regions.*

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Units Closed

Revenues

Housing revenues decreased for the year ended March 31, 2008 as compared to fiscal year 2007 due to decreases in units closed and average revenue per unit. For the year ended March 31, 2008, average revenue per unit (which is net of customer discounts) decreased primarily as a result of increases in discounts and lower prices experienced in many of our markets. Customer discounts increased to 12.3% of housing revenues for the year ended March 31, 2008, up from 7.1% for fiscal year 2007. For the year ended March 31, 2008, our closings declined when compared to the prior year as a result of decreases in sales orders caused principally by the challenging market conditions as described above.

Revenues from land sales and other increased 9.1% to \$436.4 million for the year ended March 31, 2008 as compared to the prior year. Although the timing and amount of land sales vary from period to period, the increase in revenues from land sales is primarily the result of the sale of a portfolio of 27 properties to a joint venture, the sale of a portfolio of five resort/second home properties and other sales of land that required significant future development

spending and did not meet our strategic objectives.

Changes in average operating neighborhoods and closings per average neighborhood are outlined in the table below.

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Average Operating Neighborhoods ⁽¹⁾	646	(6.0%)	687	9.7%
Closings Per Average Neighborhood	42.1	(19.2%)	52.1	(16.9%)
<i>(1) We define a neighborhood as an individual active selling location targeted to a specific buyer segment that has completed at least one sale and has ten or more units remaining to sell.</i>				

Our neighborhood count as of March 31, 2007 was 690 neighborhoods, and it has steadily decreased to a neighborhood count of 602 as of March 31, 2008. The drop in neighborhood count is primarily the result of our decision to build-out and not reinvest in certain markets and our decision to sell certain properties that did not meet our strategic initiatives.

Operating Margins

Homebuilding operating margins (consisting of operating earnings or loss as a percentage of revenues) declined to (32.7%) for the year ended March 31, 2008 as compared to 1.8% for the year ended March 31, 2007. The decrease in homebuilding operating margins as compared to the prior year is primarily attributable to the following factors: (1) decreases in revenues, net of discounts, (2) land-related and goodwill impairments, (3) losses on land sales, (4) write-offs of land deposits and pre-acquisition costs, and (5) our share of joint ventures' impairments. The \$128.9 million in losses from unconsolidated entities for the year ended March 31, 2008 includes \$100.5 million of our share of joint ventures' impairments and losses.

Home Building's operating margins were impacted by \$388.7 million in losses on land sales. In March 2008, we sold a portfolio of 27 developed, partially-developed and undeveloped properties to a joint venture funded principally by certain investment funds for \$161.2 million in cash. The portfolio of assets sold includes properties that represent 8,545 lots in 27 properties across 11 states, with the majority located in California and Nevada. The joint venture is led by RSF Partners, Inc. and includes funds under management by Farallon Capital Management, L.L.C. and Greenfield Partners, L.L.C. We have a 5% interest in the joint venture, and we have the right to receive a greater share of distributions if certain financial targets are met.

We deposited with the joint venture \$1.9 million for options to purchase 350 lots. Included in revenues' land sales and other is \$150.5 million related to this transaction which excludes proceeds for lots sold and subsequently optioned back from the joint venture which was accounted for as a financing transaction. The book value of the properties sold was \$528.5 million, excluding capitalized interest of \$28.6 million. In connection with the sale, we incurred \$12.8 million in transaction costs. Cost of sales' land sales and other includes \$542.4 million and cost of sales' housing includes \$27.5 million related to this transaction.

In March 2008, we also sold a portfolio of five resort/second home properties to a third party for \$53.7 million in cash, net of \$14.9 million in seller financing for one of the properties. The resort/second home properties sold include properties located in Texas, North Carolina and New Hampshire. We have agreed to finance future construction on two of the properties sold for a maximum commitment of \$23.9 million. We have a contingent receivable of \$8.1 million that will be recognized if and when the contingency is resolved.

These transactions are consistent with our near-term goals of reducing our land supply and generating cash. These land sales accelerate our move to a more asset-light operating model, sharpen our focus on core markets and consumer segments, reduce future land development cash obligations and monetize a portion of our deferred tax assets through the expected receipt of a tax refund of approximately \$350 million.

Homebuilding operating margins were also significantly impacted by \$1,792.4 million of land-related impairments in the year ended March 31, 2008. We regularly assess our land holdings, including our lot options, taking into consideration changing market conditions and other factors. In connection with our quarterly neighborhood assessments, during the quarter ended March 31, 2008, we reviewed approximately 970 housing projects and land investments for potential land-related impairments. Approximately 868 of these housing projects are owned land positions that are either designated as active neighborhoods, are under development but are not considered active neighborhoods, are currently held for sale or will be developed in future periods. The remaining 102 housing

projects represent controlled land positions approved for purchase. Land-related impairments during the quarter ended March 31, 2008 represented 94 neighborhoods and land investments, some of which have been impaired more than once.

In addition to land-related impairments, we recorded \$78.2 million in goodwill impairments, which represents 64.4% of our total homebuilding goodwill balance at the beginning of our fiscal year. The goodwill impairments contributed to the decrease in homebuilding operating margins for the year ended March 31, 2008.

Also, during the year ended March 31, 2008, we determined it was probable we would not exercise certain lot option contracts, which resulted in a write-off of 108 option contracts and related pre-acquisition costs, resulting in a remaining balance of 145 outstanding option contracts and deposits (including contracts in the due diligence process) at March 31, 2008.

The following table summarizes Home Building's impairments and write-offs of deposits and pre-acquisition costs, excluding our share of joint ventures' impairments (dollars in thousands):

	<i>For the Years Ended March 31,</i>					
	2008			2007		
	Goodwill Impairments	Land-related Impairments⁽¹⁾	Land-related Write-offs	Goodwill Impairments	Land-related Impairments	Land-related Write-offs
East	\$ 559	\$ 62,904	\$ 45,673	\$ 63,023	\$ 58,886	\$ 58,886
Southeast	24,202	260,834	16,798	51,321	30,286	30,286
Central	5,359	74,485	13,782	30,440	39,105	39,105
Texas	3,499	1,230	2,141	3,502	522	522
Northwest	20,316	478,118	22,701	61,119	66,845	66,845
Southwest	24,301	742,824	19,199	104,296	162,165	162,165
Other homebuilding		172,034	131	10,212	2,190	2,190
	\$ 78,236	\$ 1,792,429	\$ 120,425	\$ 323,913	\$ 359,999	\$ 359,999

(1) *Land-related impairments include direct construction impairments of \$14.9 million for the year ended March 31, 2008.*

We assess the recoverability of our investment in land holdings on a quarterly basis. Continued deterioration in demand and market conditions could result in significant additional impairments and a decision to not exercise additional lot option contracts, which would result in additional write-offs. In addition, we could incur additional losses and impairments related to our joint ventures. Please refer to "Inventory Valuation" in the Critical Accounting Estimates and to Note (C), "Inventories," of the Notes to Consolidated Financial Statements for additional details on our land holdings.

Home Building's selling, general and administrative expenses decreased \$411.4 million for the year ended March 31, 2008 when compared to fiscal year 2007. Although the decrease in Home Building's selling, general and administrative expenses during the year ended March 31, 2008 was substantial, representing a decrease of 27.0% as compared to the prior year, the percentage decrease did not keep pace with the percentage decrease in Home Building's revenues, which were 30.2% less than the prior year. The decrease in selling, general and administrative expenses for the year ended March 31, 2008 is primarily due to decreases in compensation and benefit costs as a result of

Edgar Filing: CENTEX CORP - Form 10-K

reductions in personnel and decreases in our estimated performance-related incentive compensation. As a percentage of revenues during the year ended March 31, 2008, we increased advertising and marketing costs, sales commissions and sales incentives, when compared to the prior year, to help stimulate sales orders and sell our existing inventory. The following table summarizes Home Building's selling, general and administrative expenses (dollars in thousands):

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Compensation and Benefits	\$ 408,932	(35.8%)	\$ 636,748	(10.8%)
Sales Commissions	364,236	(21.6%)	464,469	6.7%
Advertising and Marketing	145,919	(26.9%)	199,488	18.6%
Other	192,554	(13.4%)	222,296	11.0%
Selling, General and Administrative Expenses	\$ 1,111,641	(27.0%)	\$ 1,523,001	0.4%
SG&A as a Percentage of Revenues	14.0%	0.7	13.3%	0.9

Sales Orders, Backlog Units and Land Holdings

The following tables summarize sales orders and backlog units:

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Sales Orders (in Units)				
East	4,787	(12.9%)	5,495	(19.7%)
Southeast	3,234	(5.6%)	3,425	(39.9%)
Central	3,310	(22.5%)	4,271	(24.2%)
Texas	5,413	(21.7%)	6,914	(1.1%)
Northwest	3,629	(15.6%)	4,300	(6.5%)
Southwest	4,124	(9.1%)	4,539	(36.9%)
Other homebuilding	160	52.4%	105	(90.1%)
	24,657	(15.1%)	29,049	(23.6%)
Sales Per Average Neighborhood	38.2	(9.7%)	42.3	(30.4%)

	<i>As of March 31,</i>			
	2008	Change	2007	Change
Backlog Units				
East	1,290	(30.2%)	1,848	(39.9%)
Southeast	1,336	(12.0%)	1,519	(56.2%)
Central	1,116	(36.0%)	1,744	(22.9%)
Texas	1,877	(7.1%)	2,020	(7.7%)
Northwest	1,250	(30.7%)	1,805	(18.5%)
Southwest	874	(41.8%)	1,503	(52.6%)
Other homebuilding	3	(98.6%)	212	(79.0%)
	7,746	(27.3%)	10,651	(38.7%)

For the year ended March 31, 2008, sales orders declined in all of the regions in which we do business when compared to the prior year except for the Other homebuilding segment. We expect that the decreases in sales orders will have a negative impact on our closings in fiscal year 2009.

As previously discussed, some of the factors we believe are contributing to the decrease in sales orders are a continued decline in homebuyer demand due to lower consumer confidence in the consumer real estate market, as well as the inability of some prospective buyers to sell their existing homes. The decline in homebuyer demand has also been caused by the tightened homebuyer credit requirements. These factors are evidenced by lower customer traffic and cancellation rates that are much higher than our long-term average cancellation rates ranging from 18% to 26%. For the years ended March 31, 2008 and 2007, cancellation rates were 32.1% and 35.5%, respectively.

In light of the continuing adverse market conditions, our strategy is to focus on selling homes and reducing inventories, reducing costs, generating cash and simplifying our business. We curtailed speculative housing starts so that we could reduce our speculative inventory and facilitate our transition to an operating model more focused on constructing homes from a sold backlog. Total speculative inventory decreased 64.3% to 1,754 units, excluding models, at March 31, 2008 compared to 4,909 units at March 31, 2007. We have also taken steps to reduce our land position. The following table summarizes our land position:

				<i>As of March 31,</i>		
	Lots	2008	Total	Lots	2007	Total Lots
	Owned	Controlled	Lots	Owned	Controlled	
East	15,417	7,043	22,460	18,604	25,829	44,433
Southeast	21,187	2,442	23,629	25,485	7,113	32,598
Central	5,163	1,948	7,111	8,851	5,303	14,154
Texas	13,057	3,467	16,524	16,113	10,405	26,518
Northwest	5,887	2,217	8,104	10,388	6,224	16,612
Southwest	8,419	1,030	9,449	14,694	6,755	21,449
Other homebuilding	1,092		1,092	4,176	80	4,256
	70,222	18,147	88,369	98,311	61,709	160,020
Change	(28.6%)	(70.6%)	(44.8%)	(9.7%)	(67.0%)	(45.9%)

Capitalized costs related to lots owned are included in land under development and land held for development and sale. Lot counts related to completed homes or homes under construction are excluded from the totals above. The dollar amounts related to these lot counts are classified as direct construction, a component of housing projects, in our Consolidated Balance Sheets. The direct construction lot counts as of March 31, 2008 and March 31, 2007 were 7,324 and 13,301 respectively, including 1,323 and 1,608 respectively, of lots for model homes completed or under construction.

We decreased our total land position when compared to March 31, 2007 with the most pronounced declines occurring in lots controlled. The decrease in our land position for the year ended March 31, 2008 is a result of our decision to decrease land purchases and new lot option arrangements and our decision to sell certain parcels of land. Based on current market conditions, we believe we are oversupplied in total lots in certain markets and will continue to seek opportunities to reduce our land position. These steps may include one or more sales of land. As compared to March 31, 2007, our total land position has decreased by 71,651 lots or 44.8%. Included in our total land position are 3,429 and 6,115 lots controlled through joint venture arrangements as of March 31, 2008 and 2007, respectively. We have completed due diligence on 11,093 lots of the 18,147 lots we control. Generally, lots where we have completed due diligence have more substantial deposits and pre-acquisition costs incurred, and the deposits are non-refundable.

Regional Discussion

Changes in revenues and operating earnings for our homebuilding reporting segments are outlined in the table below:

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Revenues				
East	\$ 1,673,236	(25.8%)	\$ 2,255,702	(7.7%)

East

Revenues decreased 25.8% for the year ended March 31, 2008 primarily due to significant decreases in revenues in the Hilton Head, Washington, D.C., Myrtle Beach and New Jersey markets. These same four markets were also primarily the reason for the 20.5% decrease in units closed when compared to the year ended March 31, 2007. Average revenue per unit decreased 6.5% when compared to the prior year, with the largest decrease occurring in the Washington, D.C. market. Discounts as a percentage of housing revenues increased to 11.2%, as all markets in the East region experienced an increase in discounts. Sales orders decreased 12.9% when compared to the prior year primarily due to decreases in customer traffic and neighborhood counts, while cancellation rates improved slightly from 25.8% to 24.2% for the current fiscal year.

Operating earnings decreased \$233.3 million to a loss of \$81.4 million for the year ended March 31, 2008 as compared to the prior year with most of the decrease occurring in the Washington, D.C., Myrtle Beach and New Jersey markets. The decrease in operating earnings is primarily the result of losses on land sales and a decrease in average revenue per unit and increases in discounts and sales incentives.

Southeast

For the year ended March 31, 2008, a 36.4% decrease in units closed was the primary contributor to the 44.2% decrease in revenues when compared to the year ended March 31, 2007. All markets in the Southeast region experienced substantial decreases in revenues and units closed. Average revenue per unit decreased 14.1% when compared to the prior year primarily due to an increase in discounts from 8.7% for the year ended March 31, 2007 to

15.4% for the year ended March 31, 2008. Although cancellation rates improved from 40.6% to 28.5% for the current fiscal year, sales orders decreased 5.6%. Significant sales order increases were experienced in the Southwest Florida and Nashville markets primarily due to improvements in cancellation rates and traffic counts.

The Southeast region incurred an operating loss of \$422.4 million for the year ended March 31, 2008 as compared to earnings of \$108.9 million in the prior year. The Nashville market was the only market in the Southeast region that reported operating earnings for the year ended March 31, 2008. A substantial portion of the operating loss for fiscal year 2008 can be attributed to the Southwest Florida and Southeast Florida markets, which also recorded the majority of the land-related impairments, losses on land sales and goodwill impairments in the region.

Central

Revenues for the year ended March 31, 2008 decreased 27.1% primarily due to a 22.4% decrease in units closed as compared to the year ended March 31, 2007. All markets in the Central region experienced significant decreases in units closed. Discounts as a percentage of housing revenues increased to 12.5% for the year ended March 31, 2008, which contributed to the 7.0% decrease in average revenue per unit. Sales orders decreased 22.5% as the region experienced a 32.7% decrease in customer traffic. Cancellation rates improved slightly from 33.4% to 31.9% when compared to the prior year.

The majority of the Central region's operating loss of \$136.1 million for the year ended March 31, 2008 can be attributed to land-related impairments and losses on land sales. The Detroit market recognized the majority of the Central region's land-related impairments. All markets within the Central region reported a decrease in operating earnings for the year ended March 31, 2008.

Texas

Revenues for the Texas region for the year ended March 31, 2008 decreased 15.4% compared to the prior year. The decrease in revenues was primarily due to an 18.5% decrease in units closed, which was partially offset by a 4.8% increase in average revenue per unit. All markets within the Texas region experienced decreases in revenues and units closed. The largest dollar decrease in revenues occurred in the Dallas/Ft. Worth market, which also experienced the largest decrease in units closed. Average revenue per unit increased in all markets in the Texas region, despite an increase in discounts from 3.6% to 5.1% for the year ended March 31, 2008. Sales orders decreased 21.7%. The largest decrease in sales orders occurred in the Dallas/Ft. Worth market where customer traffic has declined and cancellation rates have increased.

Operating earnings for the year ended March 31, 2008 were \$32.3 million, a \$61.0 million decrease when compared to the same period in the prior year. The Texas region was the only one of our regions to realize operating earnings. The decrease in operating earnings is primarily the result of discounts and sales incentives, and a loss on a land sale in the Dallas/Ft. Worth market. To date, the Texas region has been less affected by the challenging market conditions experienced in other regions, which we believe results from the moderate growth rates and price appreciation realized in this region in prior periods. In addition, the Texas region has been the least impacted by land-related impairments and write-offs of deposits and pre-acquisition costs.

Northwest

Revenues for the year ended March 31, 2008 decreased 21.1% as compared to the year ended March 31, 2007, which was due to a combination of a 10.4% decrease in average revenue per unit and a 13.7% decrease in units closed. All markets in the Northwest region experienced decreases in revenues with the exception of the Reno market. The Reno market was the only market within the Northwest region to experience an increase in average revenue per unit and units closed. Discounts as a percentage of housing revenues increased to 14.6% for the year ended March 31, 2008, with the largest increase occurring in the Sacramento market. Sales orders for the year ended March 31, 2008 decreased 15.6% primarily due to decreases in customer traffic and neighborhood counts. The Reno market was the only market within the Northwest region to experience an increase in sales orders.

The Northwest region experienced an operating loss of \$595.8 million for the year ended March 31, 2008 as compared to earnings of \$112.8 million in the prior year. Almost all of the operating loss, which includes significant land-related impairments and losses on land sales, was realized in the Reno, Bay Area and Sacramento markets. The Portland and Hawaii markets were the only markets within the region to generate operating earnings.

Southwest

The decrease in the Southwest region's revenues for the year ended March 31, 2008 was primarily due to a 26.9% decrease in units closed and an 18.1% decrease in average revenue per unit when compared to the prior year. The largest decreases in units closed were experienced in the Southern California Coastal and Inland Empire markets. The Southwest region experienced the largest decrease in average revenue per unit of all of our regions. Additionally, discounts as a percentage of housing revenues increased to 13.7% for the year ended March 31, 2008, with the most significant discounts offered in the Phoenix market. Sales orders decreased 9.1% when compared to the year ended March 31, 2007 despite the fact that cancellation rates improved from 45.3% to 38.7% for the year ended March 31, 2008.

The Southwest region experienced operating losses of \$1,163.6 million and \$180.0 million for the years ended March 31, 2008 and 2007, respectively. The Southwest region incurred the most substantial operating losses of all of our regions for the year. The most significant operating losses occurred in the Phoenix and Inland Empire markets. The operating loss for the year ended March 31, 2008 includes \$742.8 million in land-related impairments and \$156.9 million in losses on land sales. The operating loss is also reflective of a decrease in average revenue per unit, which was not offset by commensurate reductions in construction costs, and increases in discounts and sales incentives.

Other homebuilding

Other homebuilding is primarily comprised of certain operating segments that are not part of our long-term strategy. The projects in these operating segments will be built out and liquidated. Certain homebuilding ancillary businesses and certain income and expenses that are not allocated to our operating segments are reported in this segment.

The Other homebuilding region experienced an operating loss of \$236.0 million for the year ended March 31, 2008 as compared to a loss of \$27.2 million in the prior year. This decrease in operating earnings is primarily the result of \$172.0 million in land-related impairments in the year ended March 31, 2008. These land-related impairments were all recognized on projects located in Texas, North Carolina and New Hampshire in connection with the sale of certain resort/second home properties.

FINANCIAL SERVICES

The Financial Services segment is primarily engaged in the residential mortgage lending business, as well as other financial services that are in large part related to the residential mortgage market. Its operations include mortgage lending and other related services for purchasers of homes sold by our homebuilding operations and other homebuilders, refinancing of existing mortgages, title agency services and the sale of title insurance and other insurance products, including property and casualty.

As a result of the significant disruptions in the mortgage markets and the related reductions in the mortgage market liquidity, during fiscal year 2006, we began to focus our mortgage operations on Builder loans to support Home Building. Retail mortgage originations represented approximately 54.8%, 53.0%, and 61.3% of total mortgage originations during the fiscal years ended March 31, 2008, 2007, and 2006, respectively. However, we expect Retail mortgage originations to decline during the fiscal year ending March 31, 2009. We anticipate the reduction in total Retail mortgage originations may have a negative impact on Financial Services' operating results.

Financial Services' revenues and operating earnings are derived primarily from the sale of mortgage loans, together with all related servicing rights, broker fees, title and other various insurance coverages, interest income and other fees. Net origination fees, mortgage servicing rights, and other revenues derived from the origination of mortgage loans are deferred and recognized when the related loan is sold to a third-party purchaser. Interest revenues on mortgage loans receivable are recognized using the interest (actuarial) method. Other revenues, including fees for title insurance, mortgage broker and other services performed in connection with mortgage lending activities, are recognized as earned.

In the normal course of our activities, we carry inventories of loans pending sale to third-party investors and earn an interest margin, which we define as the difference between interest revenue on mortgage loans and interest expense on debt used to fund the mortgage loans.

Generally, our business strategy is to originate and sell loans rather than hold them, which reduces our capital investment and related risks. Following unprecedented disruptions in the mortgage markets during the second quarter of fiscal year 2008, CTX Mortgage Company, LLC discontinued sales of mortgage loans to HSF-I, and is now relying on committed bank warehouse credit facilities to provide funding for its loan originations. HSF-I was a variable interest entity of which we were the primary beneficiary, and it was consolidated in our financial statements. In November 2007, we terminated HSF-I and all of its outstanding obligations were redeemed.

The following summarizes Financial Services results for the two-year period ended March 31, 2008 (dollars in thousands):

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Revenues	\$ 309,948	(33.8%)	\$ 468,001	1.3%
Cost of Sales	(54,380)	(39.8%)	(90,328)	37.1%
Selling, General and Administrative Expenses	(393,721)	34.3%	(293,143)	(6.0%)
Operating Earnings (Loss)	\$ (138,153)	(263.4%)	\$ 84,530	0.1%
Operating Margin	(44.6%)	(62.7)	18.1%	(0.2)
Financial Services Margin ⁽¹⁾	(54.1%)	(76.5)	22.4%	1.1
Net Interest Income	\$ 16,024	(49.1%)	\$ 31,478	(17.6%)
Average Interest Earning Assets	\$ 1,016,653	(37.0%)	\$ 1,612,851	2.4%
Average Yield	6.93%	(0.62)	7.55%	0.94
Average Interest Bearing Liabilities	\$ 909,213	(42.1%)	\$ 1,571,509	(0.2%)
Average Rate Paid	6.13%	0.34	5.79%	1.61

(1) *Financial*

Services margin is a non-GAAP financial measure, which we believe is useful as it allows investors to assess the operating performance of our Financial Services operations by netting the cost of funding mortgage originations (interest expense) against the related interest income. Financial Services margin is equal to Operating Earnings as a

*percentage of
Financial
Services
Revenues less
interest expense,
all of which are
set forth in the
table above.*

Financial Services revenues for the year ended March 31, 2008 decreased as compared to the prior year due to decreases in gain on sale of mortgage loans, broker fees and interest income. Contributing to the decrease in interest income and average yield was an increase in contractually delinquent loans that are not accruing interest. Interest accruals are suspended, except for interest accruals related to insured mortgage loans, when the mortgage loan becomes contractually delinquent for 90 days or more. At March 31, 2008 and 2007, mortgage loans, on which revenue was not being accrued, were \$162.9 million and \$37.8 million, respectively. For the year ended March 31, 2008, cost of sales, which is solely comprised of interest expense, declined as compared to the prior year as a result of decreases in average interest bearing liabilities. These decreases in average interest bearing liabilities were partially offset by the effect of higher short-term borrowing costs.

During the year ended March 31, 2008, Financial Services recorded significant mortgage loan loss provisions as a component of selling, general and administrative expenses. The most significant provision during the year ended March 31, 2008 was recorded in connection with Financial Services construction loans. A construction loan is a loan supporting the construction of a home on the borrower's lot. Construction on the home must be completed before a construction loan can be modified into a permanent loan (i.e., a mortgage loan held for sale) and sold to a third party. Due to their lengthy holding period, construction loans are susceptible to market value and credit risks. Recent significant changes in the mortgage markets, declining property values and increasing delinquencies were the primary drivers behind the significant loss provisions recorded by Financial Services during the year ended March 31, 2008. These factors also contributed to Financial Services' decision in the second quarter of fiscal year 2008 to discontinue the origination of new construction loans. For additional information on Financial Services' provisions, please refer to our Critical Accounting Estimates, Mortgage Loan Allowances and Related Reserve. The following table summarizes Financial Services' provisions (dollars in thousands):

	<i>For the Years Ended March</i>	
	<i>31,</i>	
	2008	2007
Provision for Losses on Mortgage Loans	\$ 170,365	\$ 11,843
Provision for Losses on Real-estate Owned	5,744	114
Anticipated Losses for Loans Originated	6,291	(459)
Total Provisions	\$ 182,400	\$ 11,498

In addition to the provisions discussed above, Financial Services recorded a \$6.9 million impairment on its construction loans during the year ended March 31, 2007. The increase in selling, general and administrative expenses discussed above was partially offset by decreases in branch operating expenses, branch and corporate compensation, and sales incentives. Operating margin and Financial Services margin for the year ended March 31, 2008 decreased primarily due to increases in loss provisions.

The following table provides a comparative analysis of: (1) the volume of loan sales to investors (third parties) and the gains on those sales and related derivative activity, known collectively as gain on sale of mortgage loans, and (2) loans brokered to third party lenders and fees received for related broker services for the years ended March 31, 2008 and 2007 (dollars in thousands, except for average loan size and volume):

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Loan Sales to Investors				
Volume (in millions)	\$ 9,258.0	(14.0%)	\$ 10,766.4	(9.1%)
Number of Loans Sold	44,687	(12.7%)	51,170	(17.4%)
Gain on Sale of Mortgage Loans	\$ 125,600	(23.9%)	\$ 164,995	0.1%
Loans Brokered to Third Party Lenders				
Volume (in millions)	\$ 1,807.1	(46.1%)	\$ 3,353.8	(6.0%)
Number of Brokered Loans	5,378	(51.1%)	11,005	(14.5%)
Broker Fees	\$ 32,382	(50.7%)	\$ 65,663	(4.8%)
Average Loan Size				
Loans Sold to Investors	\$ 207,176	(1.5%)	\$ 210,407	10.1%
Loans Brokered to Third Party Lenders	\$ 336,016	10.3%	\$ 304,767	10.0%

In addition to a decrease in the volume of loan sales to investors, gain on sale of mortgage loans decreased for the year ended March 31, 2008 primarily as a result of unfavorable pricing on: (1) the sale of mortgage loan products that have been eliminated due to the disruptions in the mortgage markets, and (2) accelerated mortgage loan sales necessitated by the termination of HSF-I which negatively impacted Financial Services liquidity. The unfavorable pricing on mortgage loans was partially offset by a shift in the product mix of loans originated to more conforming loans, which generate higher service release premiums than nonconforming loans. Broker fee income decreased for the year ended March 31, 2008 as a result of a decrease in the volume of loans brokered to third party lenders. The decrease in broker volume is also primarily due to the significant disruptions in the mortgage markets, including the significant reduction of homebuyers access to nonconforming mortgage products.

We track loan applications until such time as the loan application is closed as an originated loan or cancelled. The application data presented below includes loan applications, which resulted in originated loans in the period presented and applications for loans scheduled to close in subsequent periods.

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Open Applications Beginning	17,648	(24.0%)	23,219	(6.8%)
New Applications	127,956	33.5%	95,868	(14.4%)
Cancelled Applications	(85,337)	95.5%	(43,660)	1.4%
Originated Loans	(45,160)	(21.8%)	(57,779)	(18.3%)

Open Applications	Ending	15,107	(14.4%)	17,648	(24.0%)
-------------------	--------	---------------	----------------	--------	---------

The table below provides a comparative analysis of mortgage loan originations for the years ended March 31, 2008 and 2007.

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Origination Volume (in millions)	\$ 9,991.3	(27.7%)	\$ 13,826.0	(12.6%)
Number of Originated Loans				
Builder	20,431	(24.7%)	27,141	(0.8%)
Retail	24,729	(19.3%)	30,638	(29.3%)
	45,160	(21.8%)	57,779	(18.3%)
Average Loan Size	\$ 221,200	(7.6%)	\$ 239,300	6.9%

Total originations for the year ended March 31, 2008 decreased primarily as a result of a decline in homebuyer demand and a reduction in the number of mortgage product offerings. Refinancing activity accounted for 20% and 18% of our originations for the years ended March 31, 2008 and 2007, respectively. For the years ended March 31, 2008 and 2007, Financial Services originated 79% and 80%, respectively, of the non-cash unit closings of Home Building's customers.

Beginning in early 2007, the mortgage markets were affected by declines in values and increased default levels of sub-prime mortgage loans. The deterioration of the mortgage markets accelerated during the second quarter of fiscal year 2008, which resulted in the virtual elimination of the nonconforming mortgage market which would include sub-prime mortgage loans. As a result, Financial Services has essentially ceased originating sub-prime or other nonconforming loans. Further disruptions in the mortgage markets could further reduce the population of potential mortgage customers and/or the profit on loans we originate, and in turn, negatively impact Financial Services' future operating results.

OTHER

Our Other segment includes corporate general and administrative expense. The following summarizes the components of the Other segment's loss from continuing operations before income tax (dollars in thousands):

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Corporate General and Administrative Expense	\$ (154,308)	(16.9%)	\$ (185,585)	(33.5%)
Interest Expense	(8,642)	100.0%		(100.0%)
Other	29,063	NM	2,488	44.7%
Operating Loss	\$ (133,887)	(26.9%)	\$ (183,097)	(36.5%)

Included in other for the year ended March 31, 2008 is a \$13.4 million gain on the sale of an airplane and interest income. Corporate general and administrative expense represents corporate employee compensation and benefits, professional services and other corporate costs such as investor communications, insurance, rent, utilities and travel costs. The following table summarizes corporate general and administrative expense (dollars in thousands):

	<i>For the Years Ended March 31,</i>			
	2008	Change	2007	Change
Compensation and Benefits	\$ 113,544	(28.5%)	\$ 158,723	(28.8%)
Professional Services	21,876	8.5%	20,170	(18.0%)
Rent and Utilities	6,667	(1.9%)	6,795	(0.9%)
Travel	5,230	(23.4%)	6,828	(30.3%)
Other ⁽¹⁾	6,991	(200.9%)	(6,931)	(146.0%)
General and Administrative Expense	\$ 154,308	(16.9%)	\$ 185,585	(33.5%)

(1) Among other items, other general and administrative expense includes reimbursement of certain costs that have been billed to the Home Building operating segments.

The decrease in corporate general and administrative expense in fiscal year 2008 versus the prior year is primarily related to decreases in compensation and benefits. The decrease in compensation and benefits is a result of reductions in personnel at our corporate offices and decreases in our performance-related incentive compensation.

INCOME TAXES

We recognized an income tax benefit of \$214.2 million for the year ended March 31, 2008 as compared to the previous fiscal year's tax provision of \$116.3 million. Our effective tax rate of 7% for the year ended March 31, 2008 differed from the statutory rate primarily as a result of the recognition of a deferred tax asset valuation allowance and the recognition of a liability for unrecognized tax benefits and related accrued interest and penalties. See Note (J),

Income Taxes, of the Notes to Consolidated Financial Statements regarding our valuation allowance. The Company's effective tax rate was 109% for the year ended March 31, 2007 which differed from the statutory rate primarily due to provisions for tax contingencies.

DISCONTINUED OPERATIONS

On March 30, 2007, we sold Construction Services to an unrelated third party and received \$344.8 million in cash, net of related expenses and as adjusted for the estimated settlement of post-closing adjustments. The effect of the post-closing adjustment was estimated in our calculation of the gain on sale of Construction Services for the year ended March 31, 2007, but was subject to change. During the first quarter of fiscal year 2008, the amount of the post-closing adjustment was determined. In connection with the sale, we will also receive an aggregate of \$60.0 million in cash to be paid in annual installments of \$4.0 million over a 15-year period. During the fourth quarter of fiscal year 2008, we received our first \$4.0 million annual installment payment. The post-closing adjustment and the

\$4.0 million annual installment payment are reflected as additional gain on sale of Construction Services for the year ended March 31, 2008.

In March 2008, we signed a definitive agreement to sell our home services operations to an unrelated third party. As a result, our home services operations are now reflected as a discontinued operation in our financial statements. On April 3, 2008 we completed the sale and received \$134.6 million in cash, which is subject to post-closing adjustments.

For additional information on our discontinued operations, see Note (O), Discontinued Operations, of the Notes to Consolidated Financial Statements.

Construction Services

Discontinued operations for Construction Services are as follows (dollars in thousands):

	<i>For the Years Ended March</i>	
	<i>31,</i>	
	2008	2007
Revenues	\$	\$ 2,108,620
Operating Earnings	\$	\$ 27,062
Pre-tax Gain on Sale	\$ 8,341	\$ 344,752

After the sale of Construction Services, we remain responsible for certain surety bond obligations relating to Construction Services projects commenced prior to March 30, 2007. At March 31, 2008, these surety bonds have a total face amount of \$3.09 billion, although the risk of liability with respect to these surety bonds declines as the relevant construction projects are performed. We estimate that \$584.6 million of work remains to be performed on these projects at March 31, 2008. In connection with certain of these surety bond obligations, we provided certain sureties with a \$100 million letter of credit. In connection with the sale of Construction Services, the purchaser has agreed to indemnify us against losses relating to such surety bond obligations, including amounts that may be drawn under such letter of credit. In addition, we have purchased for our benefit an additional back-up indemnity provided by a financial institution with an A+ (S&P) and A1 (Moody's) credit rating. The obligation of such financial institution under the back-up indemnity is \$856.8 million as of March 31, 2008, which declines to \$400 million over time and terminates in 2016.

Home Services

Discontinued operations for our home services operations are as follows (dollars in thousands):

	<i>For the Years Ended March</i>	
	<i>31,</i>	
	2008	2007
Revenues	\$ 130,118	\$ 126,966
Operating Loss	\$ (1,876)	\$ (4,013)

The increase in home services revenues as compared to the prior year is the result of an expanded customer base. We had 421 thousand pest defense customers as of March 31, 2008 as compared to 360 thousand as of March 31, 2007. The decrease in operating losses realized by our home services operations for the year ended March 31, 2008 is primarily due to the increase in revenues and leverage in selling, general and administrative expenses.

FISCAL YEAR 2007 COMPARED TO FISCAL YEAR 2006
HOME BUILDING

The following summarizes the results of our Home Building operations for the two-year period ended March 31, 2007 (dollars in thousands except per unit data and lot information):

	<i>For the Years Ended March 31,</i>			
	2007	Change	2006	Change
Revenues Housing	\$ 11,014,975	(7.6%)	\$ 11,920,634	32.3%
Revenues Land Sales and Other	399,852	13.7%	351,569	(0.3%)
Cost of Sales Housing	(8,599,465)	1.7%	(8,458,995)	30.4%
Cost of Sales Land Sales and Other	(1,044,455)	251.7%	(296,938)	13.6%
Selling, General and Administrative Expenses	(1,523,001)	0.4%	(1,517,439)	33.7%
Earnings (Loss) from Unconsolidated Entities	(73,782)	(194.8%)	77,824	44.0%
Other Income	31,229	282.1%	8,174	(44.5%)
Operating Earnings	\$ 205,353	(90.2%)	\$ 2,084,829	34.9%
Operating Earnings as a Percentage of Revenues:				
Housing Operations	8.1%	(8.2)	16.3%	0.9

Revenues

Housing revenues decreased for the year ended March 31, 2007 as compared to fiscal year 2006 primarily due to decreases in units closed. For the year ended March 31, 2007, average revenue per unit increased primarily as a result of price increases being largely offset by increases in discounts and lower prices experienced in many of our markets. Customer discounts increased to 7.1% of housing revenues for the year ended March 31, 2007, up from 2.6% for fiscal year 2006. For the year ended March 31, 2007, our closings declined when compared to fiscal year 2006 as a result of decreases in sales orders caused principally by increased cancellations and decreased customer traffic. This decrease in closings was a direct result of challenging market conditions.

Revenues from land sales and other increased 13.7% to \$399.9 million for the year ended March 31, 2007 as compared to the year ended March 31, 2006. We increased our land sales in fiscal year 2007 to address our oversupply of land in certain markets.

Changes in average operating neighborhoods and closings per average neighborhood are outlined in the table below.

	<i>For the Years Ended March 31,</i>			
	2007	Change	2006	Change
Average Operating Neighborhoods	687	9.7%	626	6.3%
Closings Per Average Neighborhood	52.1	(16.9%)	62.7	10.6%

The increase in average operating neighborhoods for the year ended March 31, 2007 was a result of closing out of neighborhoods at a slower rate as compared to fiscal year 2006 due to a decrease in sales. For the year ended March 31, 2007, we opened 224 new neighborhoods and closed out of 199 neighborhoods. For the year ended March 31, 2006, we opened 340 new neighborhoods and closed out of 278 neighborhoods.

Operating Margins

Homebuilding operating margins declined to 1.8% for the year ended March 31, 2007 as compared to 17.0% for the year ended March 31, 2006. The decrease in homebuilding operating margins as compared to the year ended March 31, 2006 was primarily attributable to the following factors: (1) decreases in revenues, net of discounts, (2) land-related write-offs of deposits and pre-acquisition costs, (3) land-related impairments, and (4) our share of joint ventures' impairments and our decision to exit one joint venture. The losses from joint ventures were the primary cause of the significant decrease in earnings from unconsolidated entities when compared to fiscal year 2006.

Homebuilding operating margins were also significantly impacted by a \$747.5 million increase in cost of sales land sales and other. We periodically reassess our land holdings, including our lot options, while taking into consideration changing market conditions and other factors. During the year ended March 31, 2007, we determined it was probable we would not exercise certain lot option contracts, which resulted in a write-off of certain option contracts and related pre-acquisition costs. These determinations were made in light of increased housing inventory, a decline in homebuyer demand, increased cancellations and deteriorating market conditions in the homebuilding industry. The deteriorating market conditions also resulted in significant land-related impairments.

In connection with our quarterly neighborhood assessments, during the quarter ended March 31, 2007, we reviewed approximately 1,200 housing projects and land investments for potential land-related impairments. Approximately 1,060 of these housing projects were owned land positions that were either designated as active neighborhoods or were under development and were not considered active. The remaining 140 housing projects represented controlled land positions approved for purchase. During fiscal year 2007, we recorded land-related impairments on 83 neighborhoods and land investments. Also during fiscal year 2007, we wrote off land deposits and pre-acquisition costs related to 226 option contracts, resulting in 259 outstanding option contracts and deposits (including contracts in the due diligence process) at March 31, 2007. The following table summarizes Home Building's land-related write-offs of deposits and pre-acquisition costs and land-related impairments included in cost of sales land sales and other (dollars in thousands):

	<i>For the Years Ended March 31,</i>			
	2007	2007	2006	2006
	Land-related Impairments	Land-related Write-offs	Land-related Impairments	Land-related Write-offs

	\$ 323,913	\$ 359,999	\$	\$ 35,155

40

Operating margins also decreased due to increases in operating segments selling, general and administrative expenses as a percentage of revenues. Selling, general and administrative expenses increased for the year ended March 31, 2007 due to increases in advertising, marketing and sales commissions to stimulate sales in light of current housing industry conditions. This increase in selling-related expenses was offset by decreases in compensation and benefit costs, including bonuses and profit sharing. The following table summarizes Home Building's selling, general and administrative expenses (dollars in thousands):

	<i>For the Years Ended March 31,</i>			
	2007	Change	2006	Change
Compensation and Benefits	\$ 636,748	(10.8%)	\$ 713,514	29.2%
Sales Commissions	464,469	6.7%	435,413	33.4%
Advertising and Marketing	199,488	18.6%	168,156	34.6%
Other	222,296	11.0%	200,356	52.1%
Selling, General and Administrative Expenses	\$ 1,523,001	0.4%	\$ 1,517,439	33.7%
SG&A as a Percentage of Revenues	13.3%	0.9	12.4%	0.3

Sales Orders, Backlog Units and Land Holdings

The following tables summarize sales orders and backlog units:

	<i>For the Years Ended March 31,</i>			
	2007	Change	2006	Change

Edgar Filing: CENTEX CORP - Form 10-K

Texas	2,020	(7.7%)	2,189	4.5%
Northwest	1,805	(18.5%)	2,214	0.8%
Southwest	1,503	(52.6%)	3,173	14.8%
Other homebuilding	212	(79.0%)	1,008	(27.9%)
	10,651	(38.7%)	17,387	(6.5%)

For the year ended March 31, 2007, sales orders declined in all of the regions in which we do business with significant declines in most regions and more moderate declines in the Texas and Northwest regions. These declines led to a significant decrease in backlog in substantially all regions.

As previously discussed, some of the factors we believe were contributing to the decrease in sales orders and backlog were a continued decline in homebuyer demand due to lower consumer confidence in the consumer real estate market, increased inventory of new and existing homes for sale, and lower prices resulting from the imbalance

between supply and demand. These factors were evidenced by lower customer traffic and increased cancellation rates. For the year ended March 31, 2007 and 2006, cancellation rates were 35.5% and 25.2%, respectively.

In light of the challenging market conditions, our strategy was to focus on increasing our inventory turns and generating cash. As a result, we increased advertising costs, sales commissions and sales incentives to help stimulate sales orders and sell our existing inventory. We also curtailed speculative housing starts to reduce our speculative inventory. We also reduced our land position. The following table summarizes our land position as of March 31, 2007 and 2006:

	<i>As of March 31,</i>					
	2007		Total Lots	2006		Total Lots
	Lots Owned	Lots Controlled		Lots Owned	Lots Controlled	
East	18,604	25,829	44,433	20,036	49,421	69,457
Southeast	25,485	7,113	32,598	26,570	38,227	64,797
Central	8,851	5,303	14,154	10,793	15,994	26,787
Texas	16,113	10,405	26,518	18,823	12,774	31,597
Northwest	10,388	6,224	16,612	11,286	28,451	39,737
Southwest	14,694	6,755	21,449	17,986	38,827	56,813
Other homebuilding	4,176	80	4,256	3,334	3,199	6,533
	98,311	61,709	160,020	108,828	186,893	295,721
Change	(9.7%)	(67.0%)	(45.9%)	12.3%	11.0%	11.5%

We decreased our total land position when compared to March 31, 2006 with the most pronounced declines occurring in lots controlled. The decrease in our land position for the year ended March 31, 2007 was a result of our decision to decrease land purchases and new lot option arrangements, as well as our determination that it was probable we would not acquire certain existing lots controlled under option agreements. Included in our total land position were 6,115 and 35,063 lots controlled through joint venture arrangements as of March 31, 2007 and 2006, respectively.

Regional Discussion

Changes in revenues and operating earnings for our homebuilding reporting segments are outlined in the table below:

	<i>For the Years Ended March 31,</i>			
	2007	Change	2006	Change

	\$ 205,353	(90.2%)	\$ 2,084,829	34.9%

East

Revenues decreased 7.7% primarily due to a 5.6% decrease in units closed when compared to fiscal year 2006. The largest decrease in unit closings occurred in the New Jersey and Washington D.C. markets. The decrease in unit closings experienced in the New Jersey and Washington D.C. markets were partially offset by increases in unit closings in the North Carolina markets. Sales orders in New Jersey and Washington D.C. markets also decreased 32.2% and 27.5% as compared to fiscal year 2006. The sales orders decrease in the Washington D.C. market can primarily be attributed to a 30.1% cancellation rate versus 19.1% in fiscal year 2006. Discounts as a percentage of revenues in the East region increased from 2.2% in fiscal year 2006 to 6.0% in fiscal year 2007.

Operating earnings decreased \$297.8 million as compared to the year ended March 31, 2006 primarily due to declines in operating earnings in the Washington D.C. and New Jersey markets where earnings decreased 124.4% and 84.0%, respectively, versus fiscal year 2006. The primary factors that led to the decrease in operating earnings in the Washington D.C. and New Jersey markets were decreases in housing margins resulting from additional discounts and sales incentives offered in these markets to stimulate sales orders. In addition, we recorded \$94.9 million of land-related impairments and land-related write-offs of deposits and pre-acquisition costs in the Washington D.C. market during fiscal year 2007.

Southeast

Revenues decreased 15.0% when compared to fiscal year 2006. All markets in the Southeast region experienced double-digit percentage decreases in revenues except for the Nashville and West Florida markets. The decrease in revenues for the Southeast region was primarily due to a 16.4% decrease in closings as compared to fiscal year 2006, offset slightly by a 3.4% increase in average revenue per unit. The decrease in closings was the result of a 39.9% decrease in sales orders versus the year ended March 31, 2006. We experienced double-digit percentage decreases in sales orders in all markets in the Southeast region. The primary factor contributing to the decrease in sales orders was the increase in cancellation rates from 24.7% in fiscal year 2006 to 40.6% in fiscal year 2007.

Operating earnings for the region decreased \$265.0 million as compared to fiscal year 2006. The most pronounced declines in operating earnings were experienced in the Southwest and Southeast Florida markets, which totaled 70.9% of the decrease. The decrease in operating earnings in the Southeast Florida market was partially the result of \$52.0 million in land-related impairments and land-related write-offs of deposits and pre-acquisition costs.

Central

Revenues decreased 19.9% primarily due to a 19.8% decrease in units closed as compared to the year ended March 31, 2006. The Indianapolis market was the only market within the Central region to experience increases in revenues and closings. All markets within the Central region experienced double-digit percentage decreases in sales orders when compared to fiscal year 2006, with the most pronounced decline in the Columbus market at 43.8%. Despite an increase in discounts from 4.5% in fiscal year 2006 to 7.6% in fiscal year 2007, average revenue per unit held relatively stable, with only a 0.4% decrease over the year ended March 31, 2006.

Operating earnings decreased \$141.7 million when compared to fiscal year 2006. The Detroit, Minnesota and Illinois markets combined for a total of 88.9% of the total decrease in operating earnings. The decrease in operating earnings in the Detroit, Minnesota and Illinois markets was partially the result of a \$59.4 million increase in land-related impairments and land-related write-offs of deposits and pre-acquisition costs.

Texas

Revenues increased 8.6% as compared to the year ended March 31, 2006 primarily due to revenue increases in the San Antonio and Central Texas markets of 39.3% and 23.2%, respectively, partially offset by a decrease in the Dallas/Fort Worth market. The increase in revenues was attributable to a 6.2% increase in average revenue per unit. All markets within the Texas region experienced increases in average revenue per unit with the largest increases in the San Antonio and Houston markets.

Operating earnings increased \$7.9 million as compared to fiscal year 2006. The increase in operating earnings was primarily due to an increase in housing margin in all markets in the Texas region except for the Dallas/Fort Worth market.

Northwest

Revenues decreased 1.0% as compared to fiscal year 2006. Double-digit percentage decreases in revenues experienced in the Reno, Denver and Sacramento markets were largely offset by double-digit percentage increases in the Seattle and Central Valley markets. Closings increased 2.8% in the Northwest region, but were more than offset by an increase in discounts as a percentage of revenues from 2.6% to 8.7% in fiscal year 2007.

Operating earnings decreased \$383.9 million when compared to fiscal year 2006. The primary contributors to the decrease in operating earnings in the Northwest region were a decrease in housing margin and an increase in land-related impairments and land-related write-offs of deposits and pre-acquisition costs of \$119.8 million as compared to the year ended March 31, 2006. In addition, we recorded \$79.4 million in our share of joint ventures impairments in the Sacramento market in fiscal year 2007. Hawaii, Seattle and Portland were the only markets within the Northwest region to experience slight to moderate increases in housing margin and operating earnings.

Southwest

Revenues decreased 3.9% primarily due to an 8.5% decrease in units closed. The largest decreases in units closed occurred in the Southern California markets, but were partially offset by an increase in units closed in the Inland Empire market. Overall, average revenue per unit increased 1.9% for the region despite increases in discounts as a percentage of revenue from 1.5% in fiscal year 2006 to 6.8% in fiscal year 2007. In addition, sales orders decreased 36.9% as compared to the year ended March 31, 2006. All markets within the Southwest region experienced double-digit percentage decreases in sales orders, and cancellation rates have averaged 45.3% in fiscal year 2007 versus 26.7% in fiscal year 2006.

Operating earnings decreased \$701.3 million when compared to fiscal year 2006. All markets within the Southwest region experienced decreases in operating earnings with the exception of the New Mexico market. The most significant decreases were experienced in the Southern California and Las Vegas markets. The decreases in operating earnings in Southern California and Las Vegas markets were attributable to decreases in housing margin and increases in land-related impairments and land-related write-offs of deposits and pre-acquisition costs. Land-related impairments and land-related write-offs of deposits and pre-acquisition costs in our Southern California and Las Vegas markets totaled \$215.9 million. In addition, we recorded \$45.1 million in our share of joint ventures impairments and our decision to exit one joint venture in the Southern California Coastal market in fiscal year 2007.

Other homebuilding

Revenues decreased 14.0% primarily due to the wind down of our Salt Lake City and Greenville/Columbia South Carolina operations. Total revenues for these two divisions were \$113.5 million in fiscal year 2006 compared to \$1.1 million in fiscal year 2007. The decrease in revenues was partially offset by an increase in revenues for our resort operations in our Texas markets.

Operating earnings decreased as additional sales incentives and discounts were used to stimulate sales activity in certain markets. Additionally, a \$10.2 million land-related impairment was recorded for one of our projects in the Southeast Florida market.

FINANCIAL SERVICES

The following summarizes Financial Services results for the two-year period ended March 31, 2007 (dollars in thousands):

	<i>For the Years Ended March 31,</i>			
	2007	Change	2006	Change
Revenues	\$ 468,001	1.3%	\$ 462,223	9.6%
Cost of Sales	(90,328)	37.1%	(65,904)	105.0%
Selling, General and Administrative Expenses	(293,143)	(6.0%)	(311,854)	6.2%
Operating Earnings	\$ 84,530	0.1%	\$ 84,465	(12.0%)
Operating Margin	18.1%	(0.2)	18.3%	(4.5)
Net Interest Income	\$ 31,478	(17.6%)	\$ 38,201	(22.9%)
Average Interest Earning Assets	\$ 1,612,851	2.4%	\$ 1,574,856	12.8%
Average Yield	7.55%	0.94	6.61%	0.76
Average Interest Bearing Liabilities	\$ 1,571,509	(0.2%)	\$ 1,574,235	15.4%
Average Rate Paid	5.79%	1.61	4.18%	1.84

Revenues for the year ended March 31, 2007 increased slightly as compared to the year ended March 31, 2006. An increase in interest income was offset by a decrease in revenues from our title operations. Loan funding costs increased as a result of higher short-term interest rates. This increase in funding costs was the primary factor contributing to the increase in cost of sales and the decrease in net interest income for the year ended March 31, 2007. The decrease in selling, general and administrative expenses for the year ended March 31, 2007 was primarily the result of decreases in branch operating, branch support and sales management expenses. These reductions were partially offset by an increase in additions to the loan origination reserve. Operating margin for the year ended March 31, 2007 declined slightly since revenues only increased slightly and the increase in cost of sales was offset by a decrease in selling, general and administrative expenses.

The following table provides a comparative analysis of: (1) the volume of loan sales to investors (third parties) and the gains recorded on those sales and related derivative activity and (2) loans brokered to third party lenders and fees received for related broker services for the years ended March 31, 2007 and 2006 (dollars in thousands, except average loan size and volume):

	<i>For the Years Ended March 31,</i>			
	2007	Change	2006	Change
Loan Sales to Investors				
Volume (in millions)	\$ 10,766.4	(9.1%)	\$ 11,845.5	27.0%
Number of Loans Sold	51,170	(17.4%)	61,961	17.1%
Gain on Sale of Mortgage Loans	\$ 164,995	0.1%	\$ 164,804	16.3%
Loans Brokered to Third Party Lenders				
Volume (in millions)	\$ 3,353.8	(6.0%)	\$ 3,566.3	11.1%
Number of Brokered Loans	11,005	(14.5%)	12,867	(3.5%)
Broker Fees	\$ 65,663	(4.8%)	\$ 69,005	(3.7%)

Average Loan Size

Loans Sold to Investors	\$ 210,407	10.1%	\$ 191,178	8.5%
Loans Brokered to Third Party Lenders	\$ 304,767	10.0%	\$ 277,166	15.1%

The volume and number of loans sold to investors decreased for the year ended March 31, 2007 as compared to the year ended March 31, 2006. The decreases experienced in the volume and number of these loans sold for the year ended March 31, 2007 were offset by an increase in average income received from the sale of mortgage servicing rights for each loan.

Edgar Filing: CENTEX CORP - Form 10-K

The application data presented below includes loan applications, which resulted in originated loans in the period presented and applications for loans scheduled to close in subsequent periods.

	<i>For the Years Ended March 31,</i>			
	2007	Change	2006	Change
Open Applications Beginning	23,219	(6.8%)	24,912	(7.1%)
New Applications	95,868	(14.4%)	112,033	3.8%
Cancelled Applications	(43,660)	1.4%	(43,043)	1.2%
Originated Loans	(57,779)	(18.3%)	(70,683)	5.0%
Open Applications Ending	17,648	(24.0%)	23,219	(6.8%)

The table below provides a comparative analysis of mortgage loan originations for the years ended March 31, 2007 and 2006.

	<i>For the Years Ended March 31,</i>			
	2007	Change	2006	Change
Origination Volume (in millions)	\$ 13,826.0	(12.6%)	\$ 15,827.4	21.4%
Number of Originated Loans				
Builder	27,141	(0.8%)	27,364	21.5%
Retail	30,638	(29.3%)	43,319	(3.3%)
	57,779	(18.3%)	70,683	5.0%

Average Loan Size Originated Loans	\$ 239,300	6.9%	\$ 223,900	15.7%
------------------------------------	------------	------	------------	-------

Total originations for the year ended March 31, 2007 decreased primarily as a result of a decrease in Retail originations, which is the result of a decline in homebuyer demand and the strategic decision to reduce the number of Retail loan officers. Refinancing activity accounted for 18% and 20% of originations for the years ended March 31, 2007 and 2006, respectively. For the years ended March 31, 2007 and 2006, Financial Services originated 80% and 75%, respectively, of the non-cash unit closings of Home Building's customers.

OTHER

Our Other segment includes our corporate general and administrative expense and interest expense. The following summarizes the components of the Other segment's loss from continuing operations before income tax (dollars in thousands):

	<i>For the Years Ended March 31,</i>			
	2007	Change	2006	Change
Corporate General and Administrative Expense	\$ (185,585)	(33.5%)	\$ (279,172)	12.0%
Interest Expense		(100.0%)	(11,103)	(40.7%)
Other	2,488	44.7%	1,719	(92.0%)
Operating Loss	\$ (183,097)	(36.5%)	\$ (288,556)	17.0%

The following table summarizes corporate general and administrative expense (dollars in thousands):

	<i>For the Years Ended March 31,</i>			
	2007	Change	2006	Change
Compensation and Benefits	\$ 158,723	(28.8%)	\$ 222,874	10.5%
Professional Services	20,170	(18.0%)	24,593	74.4%
Rent and Utilities	6,795	(0.9%)	6,854	37.4%
Travel	6,828	(30.3%)	9,795	16.7%
Other	(6,931)	(146.0%)	15,056	(25.5%)
General and Administrative Expense	\$ 185,585	(33.5%)	\$ 279,172	12.0%

The decrease in corporate general and administrative expense in fiscal year 2007 was primarily related to decreases in compensation and benefits and in professional services. The decrease in compensation and benefits was a result of reductions in head count at our corporate offices and decreases in our performance-related incentive compensation.

During the year ended March 31, 2007, we recorded a tax provision of \$116.3 million as compared to a tax provision of \$668.1 million during the year ended March 31, 2006. Our effective tax rate for fiscal year 2007 was 109% as compared to the effective tax rate of 36% for fiscal year 2006.

During fiscal year 2007, we increased our reserve for tax contingencies (including interest and penalties, if applicable) resulting in a tax provision of \$65.5 million. Excluding the effect of the adjustment to tax reserves, our effective tax rate for the year ended March 31, 2007 was 48% as compared to 36% for the year ended March 31, 2006. The increase in the effective tax rate primarily results from the net impact of various permanent tax differences compared to the decrease in earnings from continuing operations. Additionally, the effective tax rate for fiscal year 2007 increased as compared to fiscal year 2006 due to a nonrecurring tax benefit in fiscal year 2006 of \$28.1 million resulting from a payment received from the U.S. Treasury that was, effectively, a tax refund. See Note (J), Income Taxes, of the Notes to Consolidated Financial Statements for additional information on tax contingencies.

DISCONTINUED OPERATIONS

Home Equity

Discontinued operations for Home Equity are as follows (dollars in thousands):

	<i>For the Years Ended March 31,</i>	
	2007	2006
Revenues	\$ 171,170	\$ 834,526
Operating (Loss) Earnings	\$ (42,691)	\$ 118,198
Pre-tax Gain on Sale	\$ 125,365	\$

Construction Services

Discontinued operations for Construction Services are as follows (dollars in thousands):

	<i>For the Years Ended March 31,</i>	
	2007	2006
Revenues	\$ 2,108,620	\$ 1,547,805
Operating Earnings	\$ 27,062	\$ 23,217
Pre-tax Gain on Sale	\$ 344,752	\$

Revenues for the year ended March 31, 2007 increased as compared to the year ended March 31, 2006 primarily due to a substantial increase in backlog in prior periods resulting in a portfolio of larger jobs in terms of size from which revenue was realized. The increase in operating earnings for the year ended March 31, 2007 was primarily the result of the larger portfolio of jobs and improved job profit margins.

Home Services

Discontinued operations for our home services operations were as follows (dollars in thousands):

	<i>For the Years Ended March 31,</i>	
	2007	2006
Revenues	\$ 126,966	\$ 109,198
Operating Loss	\$ (4,013)	\$ (7,498)

Our home services revenues increased 16.3% to \$127.0 million in fiscal year 2007. This increase in revenues was the result of an expanded customer base. We had 360 thousand pest defense customers as of March 31, 2007 as compared to 305 thousand as of March 31, 2006. The decrease in our home services division's operating loss for the year ended March 31, 2007 was primarily due to the increase in revenues and leverage in selling, general and administrative expenses.

FINANCIAL CONDITION AND LIQUIDITY

The consolidating net cash used in or provided by the operating, investing and financing activities for the years ended March 31, 2008, 2007 and 2006 is summarized below (dollars in thousands). See Statements of Consolidated Cash Flows with Consolidating Details for the detail supporting this summary.

	<i>For the Years Ended March 31,</i>		
	2008	2007	2006
Net Cash (Used in) Provided by Centex*			
Operating Activities	\$ 558,792	\$ 930,116	\$ (667,292)
Investing Activities	(315,340)	46,120	77,133
Financing Activities	(551,346)	(142,259)	138,041
Effect of Exchange Rate on Cash			(1,479)
	(307,894)	833,977	(453,597)
Financial Services			
Operating Activities	1,004,093	580,684	12,996
Investing Activities	77,691	76,538	786,790
Financing Activities	(1,069,806)	(656,400)	(800,820)
	11,978	822	(1,034)
Centex Corporation and Subsidiaries			
Operating Activities	1,480,634	950,193	(763,381)
Investing Activities	32,602	87,485	900,261
Financing Activities	(1,809,152)	(202,879)	(590,032)
Effect of Exchange Rate on Cash			(1,479)
Net (Decrease) Increase in Cash	\$ (295,916)	\$ 834,799	\$ (454,631)

* Centex represents a

supplemental presentation that reflects the Financial Services segment as if accounted for under the equity method. We believe that separate disclosure of the consolidating information is useful because the Financial Services subsidiaries and related companies operate in a distinctly different financial environment, and Centex has limited obligations with respect to the indebtedness of our Financial Services subsidiaries and related companies. Management uses this information in its financial and strategic planning. We also use this presentation to allow investors to compare us to homebuilders that do not have financial services operations.

In accordance with the provisions of SFAS No. 95, Statement of Cash Flows, the Statements of Consolidated Cash Flows have not been restated for discontinued operations. As a result, all international homebuilding (sold in September 2005), Construction Services (sold in March 2007) and home services operations (sold in April 2008) cash flows are included with the Centex cash flows and all Home Equity (sold in July 2006) cash flows are included with the Financial Services cash flows in the table above. Significant components of cash flows from discontinued operations are discussed below.

Centex

We generally fund our Centex operating and other short-term liquidity needs through cash provided by operations, short-term borrowings and the issuance of senior debt. Centex's operating cash is derived primarily through home and land sales from our homebuilding operations. During the year ended March 31, 2008, Centex's cash from operating activities was primarily provided by a decrease in inventory, which was partially offset by an increase in taxes receivable and reductions in accounts payable and accrued liabilities. Centex's cash used in investing activities during the year ended March 31, 2008 primarily relates to net capital contributions of \$188.0 million made to Financial Services in order to meet the equity requirements under its committed warehouse facilities and to facilitate the funding of Financial Services' construction loan program, and to a lesser extent, cash contributions to Home Building joint ventures. During fiscal year 2008, Financial Services ceased originating new construction loans. Cash used in Centex's financing activities during the year ended March 31, 2008 was primarily for the repayment of \$581.4 million in long-term debt.

During fiscal year 2007, Centex's cash from operating activities was primarily provided by dividends received from Financial Services and the net reduction in Home Building inventories. Included in Centex's financing activities for the year ended March 31, 2007 was cash used to fund share repurchases. In addition, Centex's financing activities for the year ended March 31, 2007 included the refinancing of scheduled debt maturities, the repayment of short-term borrowings and cash received from option exercises. During fiscal year 2006, cash was primarily used in Centex's operating activities to finance increases in Home Building inventories relating to the increased level of sales and resulting units under construction during the year, and for the acquisition of land held for development. The funds provided by Centex's financing activities for the year ended March 31, 2006 were primarily from debt issuances.

Financial Services

We generally fund our Financial Services' operating and other short-term liquidity needs through committed warehouse facilities, proceeds from the sale of mortgage loans and cash flows from operations. Financial Services' operating cash is derived through sales of mortgage loans and origination and servicing fees. During the year ended March 31, 2008, cash from operations was provided by proceeds from sales of mortgage loans that were not reinvested in new mortgage loans and origination and servicing fees. These funds were used in financing activities to repay short-term and long-term debt. The capital contribution made by Centex to Financial Services described above is also reflected as a financing activity during the year ended March 31, 2008.

During fiscal year 2007, cash was provided by sales of mortgage loans and origination and servicing fees; whereas, during fiscal year 2006, cash was used to fund these mortgage loans. The funds provided by Financial Services' investing activities in fiscal year 2007 was primarily related to the cash proceeds received from the sales of Home Equity and our technology operations. This was substantially offset by an increase in funding construction loans and Home Equity's mortgage loans held for investment prior to its sale (see further explanation below).

Discontinued Operations

Included in Centex's operating cash flows for the year ended March 31, 2007 were general contracting fees obtained through our Construction Services segment. For the year ended March 31, 2007, cash provided by Construction Services' operating cash flows was \$16.4 million. Additionally, Construction Services had \$18.1 million in cash and cash equivalents when this business was sold on March 30, 2007. Prior to the sale of Construction Services, cash generated by the operations of Construction Services was frequently used to finance the operations of our other businesses. After the sale of Construction Services, we no longer had access to this source of internal financing.

Included in Financial Services' operating cash flows for the year ended March 31, 2007 were funds from securitizations and interest income on mortgage loans held by Home Equity for investment. Financial Services' cash provided by investing activities in fiscal year 2006 was primarily from a reduction in Home Equity's mortgage loans held for investment. Home Equity originated mortgage loans with the intent to securitize; however, whole loan sales periodically occurred. Financial Services' cash used in financing activities in fiscal years 2007 and 2006 was primarily from the repayment of debt from the liquidation of Home Equity's mortgage loans held for investment.

Construction Services and Home Equity did not require significant capital resources nor did they provide significant liquidity. As a result, our liquidity and capital resources have not been materially impacted by the sale of

these operations.

Contractual and Other Obligations

Our future cash requirements for contractual obligations, excluding discontinued operations, as of March 31, 2008 (in thousands) are illustrated in the following table:

	Payments Due by Period				Total
	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years	
Centex					
Long-term Debt	\$ 345,632	\$ 1,277,730	\$ 889,071	\$ 1,756,790	\$ 4,269,223
Operating Leases	46,284	72,422	42,125	15,647	176,478
Joint Venture Obligations	145,350	29,375	24,402		199,127
Purchase Obligations	1,636	1,953			3,589
	538,902	1,381,480	955,598	1,772,437	4,648,417
Financial Services					
Operating Leases	10,648	10,323	1,291	172	22,434
	\$ 549,550	\$ 1,391,803	\$ 956,889	\$ 1,772,609	\$ 4,670,851

As outlined above, our primary contractual obligations are principal and interest payments under long-term debt agreements and lease payments under operating leases.

Effective April 1, 2007, we adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of FASB No. 109, which we refer to as FIN 48. The cumulative effect of the adoption of FIN 48 was recorded as a \$208.3 million reduction to beginning retained earnings in the first quarter of fiscal year 2008. In accordance with FIN 48, at March 31, 2008, accrued liabilities include \$492.3 million in unrecognized tax benefits, accrued interest and penalties (which excludes the tax benefit relating to the deductibility of interest and state income tax). Due to the nature of these liabilities and ongoing examinations by taxing authorities, we are unable to reasonably estimate during which future periods these amounts will ultimately be settled. For further information regarding FIN 48, see Note (J), *Income Taxes*, of the Notes to Consolidated Financial Statements.

Our homebuilding operations also have certain obligations under our joint venture arrangements, community district development bonds and other special financing districts. Additionally, Financial Services has committed to fund certain loans. See Note (G), *Commitments and Contingencies*, of the Notes to Consolidated Financial Statements for further discussion of these obligations.

We expect to fund our contractual and other obligations in the ordinary course of business through our operating cash flows, cash on-hand and through our credit facilities.

Credit Facilities and Liquidity

Our existing credit facilities and available capacity as of March 31, 2008 are summarized below (dollars in thousands):

	Existing Credit Facilities	Available Capacity
Centex		
Multi-Bank Revolving Credit Facility		
Revolving Credit	\$ 750,000	\$ 141,897
Letters of Credit	600,000	193,753

Financial Services	1,350,000	335,650 ⁽¹⁾
Secured Credit Facilities	605,000	267,947 ⁽²⁾
	\$ 1,955,000	\$ 603,597

(1) *This is an unsecured, committed, multi-bank revolving credit facility, maturing in July 2010, that serves as funding for general corporate purposes and provides \$600 million of letter of credit capacity. As of March 31, 2008, there were no borrowings under the revolving credit facility. The revolving credit facility's available capacity is subject to a borrowing base limitation when our senior unsecured debt does not have an investment grade rating from at least two of the following: Moody's, S&P and Fitch Ratings, which we refer to as Fitch. Under the*

*borrowing base
limitation, the
sum of our net
senior debt and
any*

amounts drawn on the revolving credit facility may not exceed an amount based on certain percentages of various categories of our unencumbered inventory and other assets.

Available capacity amounts above reflect the borrowing base limitation.

Financial letters of credit reduce the available capacity under the revolving credit facility and letters of credit.

Financial letters of credit are generally issued as a form of financial or payment guarantee.

- (2) *At March 31, 2008, CTX Mortgage Company, LLC maintained \$605 million of secured, committed mortgage warehouse facilities. Subsequent to March 31, 2008, existing credit*

facilities were reduced \$75.0 million to \$530.0 million with a corresponding decrease in available capacity. See Note (P), Subsequent Events of the Notes to Consolidated Financial Statements for additional information.

Our outstanding debt (in thousands) as of March 31, 2008 was as follows (due dates are presented in fiscal years):

Centex

Short-term Debt:

Short-term Note Payable	\$ 4,050
Senior Debt:	
Senior Notes, weighted-average 6.00%, due through 2017	3,319,190
Other Indebtedness, weighted-average 8.98%, due through 2018	1,927
	3,325,167

Financial Services

Short-term Debt:

Short-term Notes Payable	337,053
	\$ 3,662,220

As of March 31, 2008, our short-term debt was \$341.1 million, most of which was applicable to Financial Services. As of March 31, 2008, we had no borrowings under our revolving credit facility. From time to time, we borrow under our facility for general working capital purposes. Amounts are repaid using cash flows from operations.

We are required to maintain compliance with certain financial covenants in our multi-bank revolving credit facility. In addition, our committed bank warehouse credit facilities contain various affirmative and negative covenants that are generally customary for facilities of this type. At March 31, 2008, we were in compliance with all our financial covenants. We monitor compliance with these covenants on a quarterly basis, including forward-looking projections.

Prior to the second quarter of fiscal year 2008, substantially all of the mortgage loans originated by CTX Mortgage Company, LLC were funded through the sale of such mortgage loans to HSF-I. HSF-I was a variable interest entity of which we were the primary beneficiary, and it was consolidated in our financial statements. HSF-I obtained the funds needed to purchase eligible mortgage loans from CTX Mortgage Company, LLC, by issuing short-term secured liquidity notes and other securities. Since the second quarter of fiscal year 2008, HSF-I has not been able to issue short-term liquidity notes to finance the purchase of mortgage loans from CTX Mortgage Company, LLC as a result of current market conditions affecting the mortgage finance industry. Accordingly, CTX Mortgage Company, LLC discontinued sales of mortgage loans to HSF-I. In November 2007, we terminated HSF-I and all of its outstanding

obligations were redeemed. Our decision to terminate HSF-I was influenced by external market conditions and not by any quality or performance issues related to HSF-I or its underlying collateral. For additional information regarding HSF-I and certain related arrangements, see Note (F), Indebtedness, of the Notes to Consolidated Financial Statements.

Due to the unavailability of HSF-I as a funding source for CTX Mortgage Company, LLC's mortgage loan originations, CTX Mortgage Company, LLC increased its use of committed bank mortgage warehouse credit facilities. Under one such warehouse credit facility amounting to \$450 million at March 31, 2008, the bank had the option to convert the facility to an amortizing loan based on the ultimate sale of the underlying collateral and not to purchase any additional mortgage loans if our long-term unsecured debt ratings fell below BB+ by S&P, below BBB by Fitch or below Ba1 by Moody's. At March 31, 2008, our long-term unsecured debt was rated BB+ by S&P, BBB by Fitch and Ba1 by Moody's.

On May 7, 2008, S&P lowered our debt rating from BB+ to BB. This downgrade triggered the provision in the \$450 million committed bank warehouse credit facility which allows the bank to convert the facility to an amortizing loan based on the ultimate sale of the underlying collateral and not to purchase any additional mortgage loans. On May 9, 2008, CTX Mortgage Company, LLC executed an amendment to the bank warehouse credit facility which lowered the commitment to \$375 million, reset the debt ratings trigger that provides the bank the option to

convert the facility to an amortizing loan if our credit rating falls below BB by S&P and Fitch, or below Ba2 by Moody's. Our long-term unsecured debt is currently rated BB by S&P, BBB by Fitch and Ba1 by Moody's. CTX Mortgage Company, LLC may seek to enter into additional mortgage warehouse facilities with other lenders. A further downgrade in our credit rating by a rating agency could result in the wind-down of the \$375 million warehouse credit facility. The rating change by S&P is not currently anticipated to have a material adverse impact on our ability to access the capital we need to fund our operations.

In order to reduce debt and to decrease future cash interest payments, as well as principal payments that are due at maturity or would be required to be made upon redemption, we may, from time to time, repurchase our outstanding debt securities for cash in open market purchases or privately negotiated transactions. We will evaluate any such transactions in light of market conditions prevailing at the time, taking into account our liquidity, our future debt service requirements and our requirements for future access to capital.

If the current funding sources were to become unavailable, Financial Services would need to make other financing arrangements to fund its mortgage loan origination activities, or we may be required to fund Financial Services' loan originations and make additional capital contributions to Financial Services. Although we believe that Financial Services could broker loans to other mortgage companies, sell loans directly to FNMA, or arrange for alternative financing that is common for other homebuilders and mortgage companies, there can be no assurance that such financing would be available on satisfactory terms, and any delay in obtaining such financing could adversely affect the results of operations of Financial Services.

In general, we believe that our existing cash and future sources of funding, cash flow from operations, including anticipated federal tax refunds, and our committed credit facilities are adequate to meet our currently anticipated operating needs, capital expenditures and debt service requirements for at least the next twelve months. As a supplement to our cash provided by operations, we may elect to sell certain non-strategic assets. There can be no assurance that such sales could be completed on terms or within a timeframe acceptable to us in order to create additional cash flow. In addition, our future cash flow from operations may vary depending on a number of factors, including market conditions in the homebuilding industry, the availability of financing to homebuyers, the level of competition and general and economic factors beyond our control. We cannot predict what effect these factors will have on our future liquidity. For additional information on factors impacting our liquidity and capital resources, please refer to Part I, Item 1A, Risk Factors.

Seasonality and Inflation

We have historically experienced variability in our quarterly results of operations due to the seasonal nature of the homebuilding industry. Due to the deteriorating market conditions and our strategic responses to such downturn, we can make no assurances as to whether our historical seasonal pattern will provide guidance as to future results of operations.

Periods of high inflation may adversely affect us and the homebuilding industry in general, as it may contribute to higher land, financing, labor and construction costs. In addition, higher mortgage interest rates, which may accompany inflation, significantly affect the affordability of permanent mortgage financing to prospective homebuyers. Traditionally, we have attempted to pass increases in our costs to our customers through increased sales prices, however, current market instability may limit our ability to offset our cost increases with higher selling prices. If we are unable to raise sales prices enough to compensate for higher costs, or if mortgage interest rates increase significantly, affecting our prospective homebuyers' ability to adequately finance home purchases, our results of operations would be adversely affected.

CERTAIN OFF-BALANCE SHEET OBLIGATIONS

The following is a summary of certain off-balance sheet arrangements and other obligations and their possible effects on our liquidity and capital resources.

Joint Ventures

We conduct a portion of our land acquisition, development and other activities through our participation in joint ventures in which we hold less than a majority interest. These land-related activities typically require substantial capital, and partnering with other homebuilders or developers and, to a lesser extent, financial partners, allows Home Building to share the risks and rewards of ownership and to provide broader strategic advantages.

A summary of our Home Building joint ventures is presented below (dollars in thousands):

	Number of JVs (1)	2008		As of March 31, 2007		
		Investments	Centex's Share of Debt	Number of JVs (1)	Investments	Centex's Share of Debt
Unleveraged Joint Ventures	29	\$ 70,043	\$	28	\$ 33,369	\$
Joint Ventures with Debt:	13			21		
Limited Maintenance Guarantee (2) (3) (4)		43,311	27,500		108,057	162,425
Repayment Guarantee (2) (5)		3,154	13,692		2,247	16,045
Completion Guarantee (4)		78,274	133,935		126,469	209,927
No Recourse or Guarantee		12,040	24,000		11,502	24,000
	42	\$ 206,822	\$ 199,127	49	\$ 281,644	\$ 412,397

(1) The number of joint ventures includes unconsolidated Home Building joint ventures for which we have an investment balance as of the end of the period and/or current fiscal year activity. We were the managing member of 23 and 28 of the joint ventures as of March 31, 2008 and 2007, respectively. The number of joint ventures includes 17 and 14 joint ventures as of March 31, 2008 and 2007,

respectively, for which substantially all the joint ventures activities are complete.

(2) These amounts represent our maximum exposure related to the joint ventures debt at each respective date.

(3) We have guaranteed that certain of the joint ventures will maintain a specified loan to value ratio. For certain joint ventures, we have contributed additional capital in order to maintain loan to value requirements. At March 31, 2008, we had one remaining joint venture with a limited maintenance guarantee. In April 2008, this joint venture repaid its outstanding debt.

(4) Certain joint venture agreements require us to guarantee the

completion of a project or phase if the joint venture does not perform the required land development. A portion of these completion guarantees are joint and several with our partners.

- (5) *We have guaranteed repayment of a portion of certain joint venture debt limited to our ownership percentage of the joint venture or a percentage thereof.*

Total joint venture debt outstanding as of March 31, 2008 and 2007 was \$423.2 million and \$1.0 billion, respectively. Debt agreements for joint ventures vary by lender in terms of structure and level of recourse. For certain of the joint ventures, we are also liable on a contingent basis, through other guarantees, letters of credit or other arrangements, with respect to a portion of the construction debt. Additionally, we have agreed to indemnify the construction lender for certain environmental liabilities in the case of most joint ventures and most guarantee arrangements provide that we are liable for our proportionate share of the outstanding debt if the joint venture files for voluntary bankruptcy. To date, we have not been requested to perform under the environmental liabilities or voluntary bankruptcy guarantees for any of our joint ventures.

Four of our joint ventures are in default of their joint venture debt agreements. In addition, we expect two other joint ventures to be in default of their joint venture debt agreements subsequent to March 31, 2008. Our joint venture partner to one of these joint ventures filed for bankruptcy during the year ended March 31, 2008. Our share of the total debt of these joint ventures is \$64.0 million and is included in the table above. We are in discussions with the joint venture partners and lenders with respect to each joint venture and are evaluating alternatives to mitigate our exposure. We expect to fulfill our contractual obligations under the joint venture agreements. Costs associated with fulfilling such contractual obligations may be less than our share of the joint ventures' debt. Recourse under joint venture debt agreements is limited to either the underlying collateral or completion obligations of the joint venture partners. Based upon the terms and debt amounts outstanding for these joint ventures and the terms of the joint venture agreements, we do not believe our exposure related to these joint venture defaults will be material to our financial position or results of operations.

A summary of the estimated maturities of our share of joint ventures' debt is provided below (dollars in thousands). We have estimated the debt maturities with the assumption that all payments are first applied to pay down the outstanding debt balances as of March 31, 2008. Our share of joint ventures' debt for which the joint ventures are in default is included in fiscal year ending 2009 in the table below.

	<i>For the Fiscal Years Ending March 31,</i>	
2009	\$	168,941
2010		2,268
2011		3,918
2012		24,000
	\$	199,127

CRITICAL ACCOUNTING ESTIMATES

Some of our critical accounting policies require the use of judgment in their application or require estimates of inherently uncertain matters. Our accounting policies are in compliance with generally accepted accounting principles; however, a change in the facts and circumstances of the underlying transactions could significantly change the application of the accounting policies and the resulting financial statement impact. Listed below are those policies that we believe are critical and require the use of complex judgment in their application. Our critical accounting estimates have been discussed with the members of the Audit Committee of the Board of Directors.

Mortgage Loan Allowances and Related Reserve

Financial Services has established a liability for anticipated losses associated with mortgage loans originated and sold based upon, among other things, historical loss rates and current trends in loan originations. This liability includes losses and settlements associated with certain borrower payment defaults, credit quality issues, or misrepresentations and reflects our judgment of the loss exposure at the end of the reporting period. Please refer to Note (G), *Commitments and Contingencies* of the Notes to Consolidated Financial Statements for additional information on this reserve as of March 31, 2008 and 2007.

Financial Services also periodically reviews its construction loan commitments for collectibility. To establish the appropriate allowance, we first classify our construction loans into risk categories. These categories are based on, among other things, the loan product, the borrower's credit profile, the draw activity on the loan, the loan delinquency rate, and the historical realization on construction loans. Each category of loans is then evaluated for potential credit and market-related risks. The allowance for loans we expect to convert to permanent loans that will be held for sale is based on the estimated market value of the loans. The allowance for loans we expect to eventually default is based on the credit risk of the loan.

From time to time, Financial Services will be required to repurchase certain loans we originated and sold to third parties under the representations and warranty provisions in our loan sale agreements. If a repurchased loan is performing, it is classified as a mortgage loan held for sale and will most likely be sold to a third party. If a repurchased loan is nonperforming, the loan and its related allowance are classified as other mortgage loans. In addition, Financial Services will foreclose on certain nonperforming construction loans. We establish an allowance for loans in foreclosure based on our historical loss experience and current loss trends. Please refer to Note (B), *Mortgage Loans*, of the Notes to Consolidated Financial Statements for additional information on our other mortgage loans and the related allowance as of March 31, 2008 and 2007.

If a nonperforming loan becomes current, it is reclassified to mortgage loans held for sale. On all other nonperforming loans, we proceed to foreclose on the loan. Once we have received title to the underlying collateral, we classify the loan amount, net of its allowance, as real-estate owned. We establish an allowance for real-estate owned based upon the estimated value of the property. Real-estate owned is reflected as a component of other inventory. At

March 31, 2008 and 2007, real-estate owned was \$10.9 million and \$8.7 million, respectively, which were net of allowances of \$12.8 million and \$2.7 million, respectively.

Although we consider our mortgage loan allowances and related reserve reflected in our Consolidated Balance Sheets at March 31, 2008 to be adequate, there can be no assurance that these allowances and related reserve will prove to be sufficient over time to cover ultimate losses in connection with our loan originations. These

allowances and related reserve may prove to be inadequate due to unanticipated adverse changes in the economy, the mortgage market, or discrete events adversely affecting specific customers.

Inventory Valuation

Land acquisition, land development, and home construction costs include costs incurred (land acquisition and development, direct construction, capitalized interest and real estate taxes), as well as certain estimated costs. These estimated costs include accruals for estimated costs incurred but not yet paid and estimates of remaining costs. These estimates are based on homebuilding and land development budgets that are assembled from historical experience and local market conditions. Actual results may differ from anticipated costs due to a variety of factors including, but not limited to, a change in the length of construction period, a change in cost of construction materials and contractors, and a change in housing demand. To mitigate these factors, we regularly review and revise our construction budgets and estimates of costs to complete.

On a quarterly basis we assess each neighborhood and land investment, which include housing projects and land held for development and sale, in order to identify underperforming neighborhoods and to identify land investments that may not be recoverable through future operations. Each neighborhood is assessed as an individual project. This quarterly assessment is an integral part of our local market level processes. We measure the recoverability of assets by comparing the carrying amount of an asset to its estimated future undiscounted net cash flows. These evaluations are significantly impacted by the following key assumptions related to the project:

estimates of average future selling prices,

estimates of future construction and land development costs, and

estimated future sales rates.

These key assumptions are dependent on project specific local market (or neighborhood) conditions and are inherently uncertain. Local market-specific factors that may impact our project assumptions include:

historical project results such as average sales price and sales rates, if closings have occurred in the project,

competitors local market (or neighborhood) presence and their competitive actions,

project specific attributes such as location desirability and uniqueness of product offering,

potential for alternative product offerings to respond to local market conditions, and

current local market economic and demographic conditions and related trends and forecasts.

These and other factors are considered by our local personnel as they prepare or update the project level assumptions. The key assumptions included in our estimated future undiscounted net cash flows are interrelated. For example, a decrease in estimated sales price due to increased discounting may result in a complementary increase in sales rates. Based on the results of our assessments, if the carrying amount of the neighborhood exceeds the estimated undiscounted cash flows, an impairment is recorded to reduce the carrying value of the project to fair value. Fair value is determined based on discounted estimated cash flows for a neighborhood. Discount rates used in our evaluations are based on a risk free interest rate, increased for estimates of market risks associated with a neighborhood. Market risks considered in our discount rate include, among others:

geographic location of project,

product type (for example, multifamily high rise product or single family product),

average sales price of the product, and

estimated project life.

For the quarter ended March 31, 2008, discount rates used in our estimated discounted cash flow assessments ranged from 12% to 20%, with an average discount rate of 15%.

Our quarterly assessments reflect management's estimates, which we believe are reasonable; however, if homebuilding market conditions continue to deteriorate, or if the current challenging market conditions continue for an extended period, future results could differ materially from management's judgments and estimates.

Land Held Under Option Agreements Not Owned and Other Land Deposits

Under certain land option agreements with unaffiliated entities, we pay a stated deposit in consideration for the right to purchase land at a future time, usually at predetermined prices. We evaluate these entities in accordance with the provisions of FIN 46 which require us to consolidate the financial results of a variable interest entity if we are its primary beneficiary. Variable interest entities are entities in which (1) equity investors do not have a controlling financial interest and/or (2) the entity is unable to finance its activities without additional subordinated financial support from other parties. The primary beneficiary of a variable interest entity is the owner or investor that absorbs a majority of the variable interest entity's expected losses and/or receives a majority of the variable interest entity's expected residual returns. If we determine that we are the primary beneficiary, we consolidate the assets and liabilities of the variable interest entity.

We determine if we are the primary beneficiary based upon analysis of the variability of the expected gains and losses of the variable interest entity. Expected gains and losses of the variable interest entity are highly dependent upon our estimates of the variability and probabilities of future land prices and the probabilities of expected cash flows and entitlement risks related to the underlying land, among other factors. We perform our analysis at the inception of each lot option agreement. Local market personnel are actively involved in our evaluation, including the development of our estimates of expected gains and losses of the variable interest entity. To the extent an option agreement is significantly modified or amended, the agreement is reevaluated pursuant to FIN 46. Based on our evaluation, if we are the primary beneficiary of those entities for which we have entered into land option agreements, the variable interest entity is consolidated. To the extent financial statements or other information is available, we consolidate the assets and liabilities of the variable interest entity. If financial statements for the variable interest entity are not available, we record the remaining purchase price of land in the Consolidated Balance Sheets under the caption, land held under option agreements not owned, with a corresponding increase in minority interests. See Note (C), Inventories, of the Notes to Consolidated Financial Statements for further discussion on the results of our analysis of land option agreements.

In addition to land options recorded pursuant to FIN 46, we evaluate land options in accordance with the provisions of SFAS No. 49, Product Financing Arrangements. When our deposits and pre-acquisition development costs exceed certain thresholds, or we have determined it is likely we will exercise our option, we record the remaining purchase price of land in the Consolidated Balance Sheets under the caption land held under option agreements not owned, with a corresponding increase to accrued liabilities.

In addition to the land options recorded pursuant to FIN 46 and SFAS No. 49 discussed above, we have other land option deposits for which the underlying asset is not consolidated. These land option agreements and related pre-acquisition costs are capitalized in accordance with SFAS No. 67, Accounting for Costs and Initial Rental Operations of Real Estate Projects.

Land option deposits (including those consolidated) and pre-acquisition costs are expensed if the option agreement terminates, is in default, expires by its terms or if we determine it is probable that the property will not be acquired. On a periodic basis, we assess the probability of acquiring the land we control under option agreements. This assessment is performed for each option agreement by local market personnel. The key factors that impact our assessment include:

local market housing inventory levels for both existing and new homes,

our existing local supply of owned and controlled lots,

contract purchase price and terms,

evaluation of local regulatory environment and, if not fully entitled, likelihood of obtaining required approvals, and

local market economic and demographic factors such as job growth, long- and short-term interest rates, consumer confidence, population growth and immigration.

Goodwill

Goodwill represents the excess of purchase price over net assets of businesses acquired. Goodwill is tested for impairment at the reporting unit level on an annual basis (at January 1) or when management determines that due to certain circumstances the carrying amount of goodwill may not be recoverable. Goodwill is tested for impairment using a two-step process with the first step comparing the fair value of the reporting unit with its carrying amount, including goodwill. If the carrying amount exceeds the fair value, the second step is performed to measure the amount

of impairment loss to be recognized defined as the carrying value of the reporting unit goodwill that exceeds the implied fair value of that goodwill.

We periodically evaluate whether events and circumstances have occurred that indicate the remaining balance of goodwill may not be recoverable. Fair value is estimated using a discounted cash flow or market valuation approach. Key assumptions utilized in our discounted cash flow model include estimated future sales levels, estimated costs of sales, varying discount rates and working capital constraints as they principally relate to estimated future inventory levels. Material variations of these assumptions may have a significant impact to the carrying value of goodwill.

For the year ended March 31, 2008, we recorded \$78.2 million in goodwill impairments. We had no impairments of goodwill for the years ended March 31, 2007 and 2006. Please refer to Note (E), Goodwill, of the Notes to Consolidated Financial Statements for additional information on our goodwill impairments.

Warranty Accruals

Home Building offers a ten-year limited warranty for most homes constructed and sold. The warranty covers defects in materials or workmanship in the first two years of the home and certain designated components or structural elements of the home in the third through tenth years. Home Building estimates the costs that may be incurred under its warranty program for which it will be responsible and records a liability at the time each home is closed. Factors that affect Home Building's warranty liability include the number of homes closed, historical and anticipated rates of warranty claims and cost per claim. Home Building periodically assesses the adequacy of its recorded warranty liability and adjusts the amounts as necessary. Although we consider the warranty accruals reflected in our Consolidated Balance Sheets to be adequate, there can be no assurance that this accrual will prove to be sufficient over time to cover ultimate losses.

Insurance Accruals

We have certain self-insured retentions and deductible limits under our workers' compensation, automobile and general liability insurance policies. We establish reserves for our self-insured retentions and deductible limits based on an analysis of historical claims and an estimate of claims incurred but not yet reported. Projection of losses concerning these liabilities is subject to a high degree of variability due to factors such as claim settlement patterns, litigation trends and legal interpretations, among others. On an annual basis, we engage actuaries to assist in the evaluation and development of claim rates and required reserves for self insurance including reserves related to construction defects and general liability claims. We periodically assess the adequacy of our insurance accruals and adjust the amounts as necessary. Although we consider the insurance accruals reflected in our Consolidated Balance Sheets to be adequate, there can be no assurance that this accrual will prove to be sufficient over time to cover ultimate losses.

Income Taxes

We account for income taxes on the deferral method whereby deferred tax assets and liabilities are provided for the tax effect of differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases.

In accordance with the provisions of SFAS 109, we assess, on a quarterly basis, the realizability of our deferred tax assets. A valuation allowance must be established when, based upon the evaluation of all available evidence, it is more likely than not that all or a portion of the deferred tax assets will not be realized. Realization of deferred tax assets is dependent upon taxable income in prior carryback years, estimates of future taxable income, tax planning strategies and reversals of existing taxable temporary differences. SFAS 109 provides that forming a conclusion that a valuation allowance is not needed is difficult when there is negative evidence such as cumulative losses in recent years or losses expected in early future years. Please refer to Note (J), Income Taxes, of the Notes to Consolidated Financial Statements regarding our valuation allowance.

On April 1, 2007, we adopted FIN 48. The cumulative effect of the adoption of FIN 48 was recorded as a \$208.3 million reduction to beginning retained earnings in the first quarter of fiscal year 2008. For further discussion regarding the adoption of FIN 48, please refer to Note (J), Income Taxes, of the Notes to Consolidated Financial Statements.

In accordance with the provisions of FIN 48, we recognize in our financial statements the impact of tax return positions or future tax positions if it is more likely than not to prevail (defined as a likelihood of more than fifty percent of being sustained upon audit, based on the technical merits of the tax position). Tax positions that meet the more likely than not threshold are measured (using a probability weighted approach) at the largest amount of tax benefit that has a greater than fifty percent likelihood of being realized upon settlement.

Prior to the adoption of FIN 48, we applied SFAS No. 5, Accounting for Contingencies, to assess and provide for potential income tax exposures. In accordance with SFAS No. 5, we maintained reserves for tax contingencies based on reasonable estimates of the tax liabilities, interest, and penalties (if any) that may result from tax audits. FIN 48 substantially changes the applicable accounting model and is likely to cause greater volatility in income statements and effective tax rates as more items are recognized and/or derecognized discretely within income tax expense.

The federal statute of limitations has expired for our federal tax returns filed for tax years through March 31, 2000. In July 2007, we received a revenue agent's report from the Internal Revenue Service, or IRS, relating to the ongoing audit of our federal income tax returns for fiscal years 2001 through 2004. We believe that our tax return positions are supported and will vigorously dispute the proposed adjustments. The IRS has commenced an examination of our federal income tax returns for fiscal years 2005 and 2006. The estimated liability for unrecognized tax benefits is periodically assessed for adequacy and may be affected by changing interpretations of laws, rulings by tax authorities, certain changes and/or developments with respect to audits, and expiration of the statute of limitations. The outcome for a particular audit cannot be determined with certainty prior to the conclusion of the audit and, in some cases, appeal or litigation process. The actual benefits ultimately realized may differ from our estimates. As each audit is concluded, adjustments, if any, are appropriately recorded in our financial statements. Additionally, in future periods, changes in facts, circumstances, and new information may require us to adjust the recognition and measurement estimates with regard to individual tax positions. Changes in recognition and measurement estimates are recognized in the period in which the change occurs.

RECENT ACCOUNTING PRONOUNCEMENTS

In September 2006, the FASB issued SFAS No. 157, or SFAS 157, Fair Value Measurements, that serves to define fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 will be effective for us as of April 1, 2008. However, in February 2008, the FASB issued FASB Staff Position, or FSP, FAS 157-2 which delays the effective date of SFAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). Examples of items to which this FSP applies include, but are not limited to, reporting units measured at fair value in the first step of a goodwill impairment test and long-lived assets (asset groups) measured at fair value for an impairment assessment (i.e. inventory impairment assessments). This FSP defers the effective date of SFAS 157 for nonfinancial assets and nonfinancial liabilities for us to April 1, 2009. We do not expect the adoption of SFAS 157 related to financial assets and financial liabilities to have a material impact on our results of operations or financial position. We are currently evaluating the impact, if any, of SFAS 157 related to nonfinancial assets and nonfinancial liabilities on our results of operations or financial position.

In February 2007, the FASB issued SFAS No. 159, or SFAS 159, The Fair Value Option for Financial Assets and Financial Liabilities. Under the provisions of SFAS 159, companies may elect to measure specified financial instruments, warranty and insurance contracts at fair value on a contract-by-contract basis, with changes in fair value recognized in earnings. The election, called the fair value option, will enable some companies to reduce the volatility in reported earnings caused by measuring related assets and liabilities differently, and it is simpler than using the complex hedge-accounting requirements in FASB Statement No. 133, or SFAS 133, Accounting for Derivative Instruments and Hedging Activities to achieve similar results. SFAS 159 will be effective for us as of April 1, 2008. We do not expect the adoption of SFAS 159 to have a material impact on our results of operations or financial position.

In November 2007, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 109, or SAB 109, Written Loan Commitments Recorded at Fair Value Through Earnings. SAB 109 required that the expected net future cash flows related to the associated servicing of a loan be included in the measurement of all written loan commitments that were accounted for at fair value through earnings. The provisions of SAB 109 were applicable to

written loan commitments issued or modified beginning January 1, 2008. We adopted SAB 109 in the fourth quarter of fiscal year 2008, and it did not have a material impact on our results of operations or financial position.

In December 2007, the FASB issued SFAS No. 160, or SFAS 160, Noncontrolling Interests in Consolidated Financial Statements, an Amendment of ARB No. 51. Under the provisions of SFAS 160, a noncontrolling interest in a subsidiary, or minority interest, must be classified as equity and the amount of consolidated net income specifically attributable to the minority interest must be clearly identified in the statement of consolidated earnings. SFAS 160 also requires consistency in the manner of reporting changes in the parent's ownership interest and requires fair value measurement of any noncontrolling interest retained in a deconsolidation. SFAS 160 will be effective for us as of April 1, 2009. We do not expect the adoption of SFAS 160 to have a material impact on our financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risks related to fluctuations in interest rates on our direct debt obligations and mortgage loans receivable. We utilize derivative instruments, including interest rate swaps, in conjunction with our overall strategy to manage the outstanding debt that is subject to changes in interest rates. We utilize forward sale commitments to mitigate the risk associated with the majority of our mortgage loan portfolio. Other than the forward commitments and interest rate swaps discussed earlier, we do not utilize forward or option contracts on foreign currencies or commodities, or other types of derivative financial instruments. The following analysis provides a framework to understand our sensitivity to hypothetical changes in interest rates as of March 31, 2008.

Centex

We use both short-term and long-term debt in our financing strategy. For fixed-rate debt, changes in interest rates generally affect the fair market value of the debt instrument but not our earnings or cash flows. Conversely, for variable-rate debt, changes in interest rates generally do not impact the fair market value of the debt instrument but do affect our future earnings and cash flows. We do not have an obligation to prepay any of our fixed-rate debt prior to maturity, and as a result, interest rate risk and changes in fair market value should not have a significant impact on the fixed-rate debt until we refinance such debt.

As of March 31, 2008, short-term debt was \$341.1 million, most of which was applicable to Financial Services. Financial Services' debt is collateralized by mortgage loans. We borrow on a short-term basis under our committed revolving credit facility at prevailing market rates. The weighted-average interest rate on short-term borrowings outstanding at March 31, 2008 was 3.65%.

The maturities of Centex's long-term debt outstanding at March 31, 2008 were as follows:

	Maturities through March 31,							
	2009	2010	2011	2012	2013	Thereafter	Total	Fair Value
Centex ⁽¹⁾								
Fixed-Rate

Variable-Rate								
Debt	\$ 190,333	\$	\$	\$	\$	\$	\$ 190,333	\$ 192,378
Average								
Interest Rate	5.70%						5.70%	

(1) Centex represents a supplemental presentation that reflects the Financial Services segment as if accounted for under the equity method.

Financial Services

Financial Services enters into interest rate lock commitments, or IRLCs, with its customers under which it agrees to make mortgage loans at agreed upon rates within a period of time, generally from one to 30 days, if certain conditions are met. Initially, the IRLCs are treated as derivative instruments and their fair value is recorded on the balance sheet in other assets or accrued liabilities. The fair value of these loan commitment derivatives includes future cash flows related to the associated servicing of the loan, but does not include the value of any internally-developed intangible assets. Subsequent changes in the fair value of the IRLCs are recorded as an adjustment to earnings.

To offset the interest rate risk related to its IRLCs, Financial Services executes forward trade commitments. Certain forward trade commitments are not designated as hedges under SFAS 133 and are derivative instruments. Their initial fair value is recorded on the balance sheet in other assets or accrued liabilities. Subsequent changes in the fair value of these forward trade commitments are recorded as an adjustment to earnings.

Financial Services enters into certain forward trade commitments designated as fair value hedges to hedge the interest rate risk related to its portfolio of mortgage loans held for sale. Accordingly, changes in the fair value of the forward trade commitments and the mortgage loans, for which the hedge relationship is deemed effective, are recorded as an adjustment to earnings. To the extent the hedge is effective, gains or losses in the value of the hedged loans due to interest rate movement will be offset by an equal and opposite gain or loss in the value of the forward trade commitment. This will result in no impact to earnings. To the extent the hedge contains some ineffectiveness, the ineffectiveness is recognized immediately in earnings.

Centex Corporation and Subsidiaries
Notes to Consolidated Financial Statements
(Dollars in thousands, except per share data)

(A) SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The consolidated financial statements include the accounts of Centex Corporation and all subsidiaries, partnerships and other entities in which Centex Corporation has a controlling interest (the Company). Also, included in the consolidated financial statements are certain variable interest entities, as discussed in Note (C), Inventories, and Note (F), Indebtedness. All significant intercompany balances and transactions have been eliminated.

Balance sheet and cash flow data is presented in the following categories:

Centex Corporation and Subsidiaries. This represents the consolidation of Centex, Financial Services and all of their consolidated subsidiaries, related companies and certain variable interest entities. The effects of transactions among related companies within the consolidated group have been eliminated.

Centex. This information is presented as supplemental information and represents the consolidation of all subsidiaries and certain variable interest entities other than those included in Financial Services, which are presented on an equity basis of accounting.

Financial Services. This information is presented as supplemental information and represents Centex Financial Services, its subsidiaries and related companies.

Certain operations have been classified as discontinued. For additional information, refer to Note (O), Discontinued Operations. Associated results of operations and financial position are separately reported for all periods presented. Information in these Notes to Consolidated Financial Statements, unless otherwise noted, does not include the accounts of discontinued operations.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Revenue Recognition

Revenues from Home Building projects are recognized when homes are sold, profit is determinable, title passes to the buyer, there are no significant obligations on the part of the seller, and the buyer's commitment to pay is supported by a substantial initial and continuing investment in accordance with Statement of Financial Accounting Standards (SFAS) No. 66, Accounting for Sales of Real Estate (SFAS 66). For home closings that do not meet the minimum investment criteria under SFAS 66, the Company records such closings under the cost recovery method. Under this method, the gross profit is deferred until sufficient cash has been paid by the buyer or the loan is sold to a third-party. Revenues from land sales are recognized when payments of at least 20% of the total purchase price are received, the Company has no continuing obligations related to such land sold and the collection of any remaining receivable is reasonably assured.

Net origination fees, mortgage servicing rights, and other revenues derived from the origination of mortgage loans are deferred and recognized when the related loan is sold to a third-party purchaser. Other revenues, including fees for title insurance, mortgage broker and other services performed in connection with mortgage lending activities, are recognized as earned.

Interest revenues on mortgage loans receivable are recognized as revenue using the interest (actuarial) method. Interest accruals are suspended, except for interest accruals related to insured mortgage loans, when the mortgage loan becomes contractually delinquent for 90 days or more. The accrual is resumed when the mortgage loan becomes less than 90 days contractually delinquent. At March 31, 2008 and 2007, mortgage loans, on which revenue was not being accrued, were \$162.9 million and \$37.8 million, respectively.

Sales Discounts and Incentives

Sales discounts and incentives include items such as cash discounts, discounts on options included in the home, option upgrades (such as upgrades for cabinetry, carpet and flooring), and seller-paid financing or closing costs. In addition, from time to time, the Company may also provide homebuyers with retail gift certificates and/or other nominal retail merchandise. Cash discounts are accounted for as a reduction in the sales price of the home. All other sales incentives are recognized as a cost of selling the home.

Advertising Costs

Advertising costs are expensed as incurred. Advertising costs for the years ended March 31, 2008 and 2007 and 2006 (fiscal year 2008, fiscal year 2007 and fiscal year 2006) were \$101.4 million, \$138.9 million and \$114.3 million respectively.

Interest Expense

Interest expense relating to the Financial Services segment is included in Financial Services costs and expenses. Home Building capitalizes interest incurred as a component of housing projects inventory cost. Capitalized interest is included in Home Building s costs and expenses as related housing inventories are sold or otherwise charged to costs and expenses. In prior years, the Company s inventory subject to interest capitalization exceeded its debt levels. Due to the reduction in homebuilding inventories, the Company s debt level exceeded its inventory subject to capitalization during the year the ended March 31, 2008. As a result, a portion of the interest incurred during the year ended March 31, 2008 was charged directly to interest expense.

(1) *Includes the Company s home services operations, Home Equity, and the Company s international homebuilding operations.*

Income Taxes

The Company accounts for income taxes on the deferral method whereby deferred tax assets and liabilities are provided for the tax effect of differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. In accordance with the provisions of Financial Accounting Standards Board (FASB) Statement No. 109, Accounting for Income Taxes (SFAS 109), the Company assesses, on a quarterly basis, the realizability of its deferred tax assets. A valuation allowance must be established when, based upon the evaluation

of all available evidence, it is more likely than not that all or a portion of the deferred tax assets will not be realized. Realization of deferred tax assets is dependent upon taxable income in prior carryback years, estimates of future taxable income, tax planning strategies and reversals of existing taxable temporary differences. SFAS 109 provides that a cumulative loss in recent years is significant negative evidence in considering whether deferred tax assets are realizable. For additional information regarding the Company's valuation allowance, please refer to Note (J), Income Taxes.

On April 1, 2007, the Company adopted FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109, (FIN 48). The cumulative effect of the adoption of FIN 48 was recorded as a \$208.3 million reduction to beginning retained earnings in the first quarter of fiscal year 2008. Please refer to Note (J), Income Taxes, for additional information relating to the adoption of FIN 48.

In accordance with the provisions of FIN 48, the Company recognizes in its financial statements the impact of tax return positions or future tax positions if it is more likely than not to prevail (defined as a likelihood of more than fifty percent of being sustained upon audit, based on the technical merits of the tax position). Tax positions that meet

the more likely than not threshold are measured (using a probability weighted approach) at the largest amount of tax benefit that has a greater than fifty percent likelihood of being realized upon settlement.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in the financial statements as a component of the income tax provision, which is consistent with the Company's historical accounting policy. The Company's liability for unrecognized tax benefits, combined with accrued interest and penalties, is reflected as a component of accrued liabilities.

The Company periodically assesses its estimated liability for unrecognized tax benefits. The estimated liability for unrecognized tax benefits may be affected by changing interpretations of laws, rulings by tax authorities, certain changes and/or developments with respect to audits, and expiration of the statute of limitations. The outcome for a particular audit cannot be determined with certainty prior to the conclusion of the audit and, in some cases, appeal or litigation process. The actual benefits ultimately realized may differ from the Company's estimates. As each audit is concluded, adjustments, if any, are appropriately recorded in the Company's financial statements. Additionally, in future periods, changes in facts, circumstances, and new information may require the Company to adjust the recognition and measurement estimates with regard to individual tax positions. Changes in recognition and measurement estimates are recognized in the period in which changes occur.

Prior to the adoption of FIN 48, the Company applied SFAS No. 5, Accounting for Contingencies (SFAS 5), to assess and provide for potential income tax exposures. In accordance with SFAS 5, the Company maintained reserves for tax contingencies based on reasonable estimates of the tax liabilities, interest, and penalties (if any) that may result from tax audits. FIN 48 substantially changes the applicable accounting model and is likely to cause greater volatility in the income statements and effective tax rates as more items are recognized and/or derecognized discretely within income tax expense.

Earnings Per Share

Basic earnings (loss) per share are computed based on the weighted-average number of shares of common stock, par value \$.25 per share (Common Stock), outstanding, including vested shares of restricted stock and vested restricted stock units under the long-term incentive plan. Diluted earnings (loss) per share are computed based upon the basic weighted-average number of shares plus the dilution of the stock options, unvested shares of restricted stock and unvested restricted stock units under the long-term incentive plan. Stock options, unvested shares of restricted stock and unvested restricted stock units under the long-term incentive plan are not considered in the diluted earnings (loss) per share calculation when the Company has a loss from continuing operations.

Cash and Cash Equivalents

Cash equivalents represent highly liquid investments with an original maturity of three months or less when purchased.

Restricted Cash

Restricted cash primarily consists of: (1) cash restricted pursuant to insurance related regulatory requirements, (2) customer deposits that are temporarily restricted in accordance with regulatory requirements, and (3) required cash balances for structured finance arrangements. Cash restricted pursuant to insurance related regulatory requirements includes the restricted cash of the Company's title, property and casualty insurance operations, the restricted cash of a subsidiary that issues surety bonds, and cash restricted pursuant to the Company's casualty insurance. Customer deposits are restricted as certain states, in which the Company operates, require it to restrict customers' cash deposits until a home is closed. The Company is also required to restrict cash it receives from customers for future mortgage origination costs, including credit report fees and appraisal fees. The changes in these restricted cash balances are directly related to the Company's operations and are therefore, classified as operating activity in the Statements of Consolidated Cash Flows.

The restricted cash balances associated with structured finance arrangements represent cash collateral associated with the Company's warehoused mortgage loans. The changes in these restricted cash balances are reflected as financing activity in the Statements of Consolidated Cash Flows.

Mortgage Loans

Mortgage loans receivable consist of mortgage loans held for sale and other mortgage loans, net of their related allowances. Mortgage loans held for sale represent mortgage loans originated by Financial Services, which will be sold to third parties. The carrying value of these loans designated as hedged is adjusted for changes in the fair value to the extent the hedge is deemed effective. Unhedged loans or loans hedged ineffectively are stated at the lower of cost or market. Market is determined by forward sale commitments, current investor yield requirements and current market conditions. Substantially all of the mortgage loans held for sale are delivered to third-party purchasers within three months after origination. These loans are subject to hedge instruments during the time they are held in inventory. Substantially all of the mortgage loans held for sale are pledged as collateral for secured financings.

Financial Services has established a liability for anticipated losses associated with mortgage loans originated and sold based upon, among other things, historical loss rates and current trends in loan originations. This liability includes losses and settlements associated with certain borrower payment defaults, credit quality issues, or misrepresentation and reflects management's judgment of the loss exposure at the end of the reporting period.

Financial Services also holds other mortgage loans, which are carried at cost, net of their related allowance. Other mortgage loans include performing and nonperforming construction loans and other nonperforming mortgage loans. During the year ended March 31, 2008, Financial Services ceased originating new construction loans. Under its discontinued construction loan program, Financial Services entered into an agreement to finance a specified amount for the construction of a home. As the construction of the home progressed, the borrower draws on the committed amount. These loans were intended to be modified into a permanent loan (i.e., a mortgage loan held for sale) once the total committed amount was funded. Financial Services will continue to fulfill its existing funding commitments.

Financial Services also periodically reviews its construction loan commitments for collectibility. To establish the appropriate allowance, Financial Services first classifies its construction loans into risk categories. These categories are based on, among other things, the loan product, the borrower's credit profile, the draw activity on the loan, the loan delinquency rate, and the historical realization on construction loans. Each category of loans is then evaluated for potential credit and market-related risks. The allowance for loans Financial Services expects to convert to permanent loans that will be held for sale is based on the estimated market value of the loans. The allowance for loans Financial Services expects to eventually default is based on the credit risk of the loan.

From time to time, Financial Services will be required to repurchase certain loans it originated and sold to third parties under the representations and warranty provisions in its loan sale agreements. If a repurchased loan is performing, it is classified as a mortgage loan held for sale and will most likely be sold to a third party. If a repurchased loan is nonperforming, the loan and its related allowance are classified as other mortgage loans. In addition, Financial Services will foreclose on certain nonperforming construction loans. Financial Services establishes an allowance for loans in foreclosure based on its historical loss experience and current loss trends. Please refer to Note (B), Mortgage Loans, for additional information on Financial Services' other mortgage loans and the related allowance as of March 31, 2008 and 2007.

If a nonperforming loan becomes current, it is reclassified to mortgage loans held for sale. On all other nonperforming loans, Financial Services proceeds to foreclose on the loan. Once Financial Services has received title to the underlying collateral through the foreclosure process, Financial Services classifies the loan amount, net of its allowance, as real-estate owned. Financial Services establishes an allowance for real-estate owned based upon the estimated value of the property. Real-estate owned is reflected as a component of other inventory. At March 31, 2008 and 2007, real-estate owned was \$10.9 million and \$8.7 million, respectively, which were net of allowances of \$12.8 million and \$2.7 million, respectively.

Although Financial Services considers its mortgage loan allowances and related reserves reflected in the Consolidated Balance Sheets at March 31, 2008 to be adequate, there can be no assurance that these allowances and related reserve will prove to be sufficient over time to cover ultimate losses in connection with its loan originations. These allowances and related reserve may prove to be inadequate due to unanticipated adverse changes in the economy, the mortgage market, or discrete events adversely affecting specific customers.

Trade Accounts and Notes Receivable

Trade accounts receivable primarily consist of income taxes receivable, insurance claims receivable, funds in transit or in escrow for homes closed and vendor rebate receivables and are net of an allowance for doubtful accounts. The allowance for doubtful accounts was \$40.6 million and \$9.1 million as of March 31, 2008 and 2007, respectively.

Notes receivable at March 31, 2008 are collectible primarily over four years with \$5.3 million being due within one year.

Housing Projects

Housing projects are stated at cost (including land acquisition and development, direct construction, capitalized interest and real estate taxes), net of any impairment. The relief of capitalized costs is included in the Home Building costs and expenses in the Statements of Consolidated Earnings when related revenues are recognized. Housing projects include direct construction costs and land under development. A summary of these amounts is included in Note (C), Inventories.

Home construction costs are accumulated on a specific identification basis. Under the specific identification basis, costs and expenses include all applicable land acquisition, land development and specific construction costs (including direct and indirect costs) of each home paid to third parties. Land acquisition, land development and home construction costs do not include employee related compensation and benefit costs. The specific construction and allocated land costs of each home are included in direct construction. Allocated land acquisition and development costs are estimated based on the total costs expected in a project. Direct construction also includes amounts paid through the closing date of the home for construction materials and contractor costs, plus an accrual for estimated costs incurred but not yet paid, based on an analysis of budgeted construction costs. Any changes to the estimated total development costs identified subsequent to the initial home closings in a project are generally allocated to the remaining homes in the project; however, such costs are charged to expense for neighborhoods where all or substantially all homes have already been closed. Land acquisition and land development costs are included in land under development.

Land Held for Development and Sale

Land held for development and sale is stated at cost, net of impairment. Land option agreements and related pre-acquisition costs are capitalized in accordance with SFAS No. 67, Accounting for Costs and Initial Rental Operations of Real Estate Projects. Land held for development and sale consists of owned land that is currently not being developed and is not anticipated to be developed for at least two years, land held for sale, deposits for land purchases and related acquisition costs. Carrying costs for land held for development and sale such as property taxes and insurance are expensed as incurred. The Company enters into certain land option purchase agreements with unaffiliated entities. Under certain land option agreements, the Company pays a stated deposit in consideration for the right to purchase land at a future time, usually at predetermined prices. These options generally do not contain performance requirements from the Company nor obligate the Company to purchase the land. To the extent the Company does not exercise its option to purchase such land, the amount of the land option deposit, any letters of credit, as well as development costs incurred to date, represent the Company's maximum exposure to loss except in certain circumstances, which would not be material.

Land option deposits (including those consolidated and included in land held under option agreements not owned) and pre-acquisition costs are expensed if the option agreement terminates, is in default, expires by its terms or if the Company determines it is probable that the property will not be acquired. On a periodic basis, the Company assesses the probability of acquiring the land it controls under option agreements. This assessment is performed for each option agreement by local market personnel. The key factors that impact the Company's assessment include:

local market housing inventory levels for both existing and new homes,

the Company's existing local supply of owned and controlled lots,

contract purchase price and terms,

the availability of other or more desirable land in the local markets,

evaluation of local regulatory environment and, if not fully entitled, likelihood of obtaining required approvals, and

local market economic and demographic factors such as job growth, long- and short-term interest rates, consumer confidence, population growth and immigration.

During the years ended March 31, 2008, 2007 and 2006, \$120.4 million, \$360.0 million and \$35.2 million, respectively, of land deposits and related pre-acquisition costs were written off to cost of land sales and other.

Land Held Under Option Agreements Not Owned and Other Land Deposits

The Company has evaluated those entities with which the Company entered into land option agreements in accordance with the provisions of FASB Interpretation No. 46, Consolidation of Variable Interest Entities, as revised (FIN 46). The provisions of FIN 46 require the Company to consolidate the financial results of a variable interest entity if the Company is the primary beneficiary. Variable interest entities are entities in which (1) equity investors do not have a controlling financial interest and/or (2) the entity is unable to finance its activities without additional subordinated financial support from other parties. The primary beneficiary of a variable interest entity is the owner or investor that absorbs a majority of the variable interest entity's expected losses and/or receives a majority of the variable interest entity's expected residual returns. If the Company determines that it is the primary beneficiary, the Company consolidates the assets and liabilities of the variable interest entity.

The Company determines if it is the primary beneficiary based upon analysis of the variability of the expected gains and losses of the variable interest entity. Expected gains and losses of the variable interest entity are highly dependent upon management's estimates of the variability and probabilities of future land prices and the probabilities of expected cash flows and entitlement risks related to the underlying land, among other factors. The Company performs its analysis at the inception of each lot option agreement. Local market personnel are actively involved in the evaluation, including the development of management's estimates of expected gains and losses of the variable interest entity. To the extent an option agreement is significantly modified or amended, the agreement is reevaluated pursuant to FIN 46. Based on its evaluation, if the Company is the primary beneficiary of those entities for which it has entered into land option agreements, the variable interest entity is consolidated. To the extent financial statements or other information is available, the Company consolidates the assets and liabilities of the variable interest entity. If financial statements for the variable interest entity are not available, the Company records the remaining purchase price of land in the Consolidated Balance Sheets under the caption, land held under option agreements not owned, with a corresponding increase in minority interests. See Note (C), Inventories, for further discussion on the results of the Company's analysis of land option agreements.

In addition to land options consolidated pursuant to FIN 46, the Company evaluates land options in accordance with the provisions of SFAS No. 49, Product Financing Arrangements (SFAS 49). When the Company's deposits and pre-acquisition development costs exceed certain thresholds, or the Company has determined it is likely it will exercise its option, the Company records the remaining purchase price of land in the Consolidated Balance Sheets under the caption, land held under option agreements not owned, with a corresponding increase to accrued liabilities.

Investments in Joint Ventures

The Company is a participant in certain joint ventures with interests ranging from 5.0% to 67.0%. Investments in joint ventures in which the Company's interest exceeds 50% have been consolidated. The equity method of accounting is used for joint ventures over which the Company has significant influence but not control; generally this represents partnership equity or common stock ownership interests of at least 20% and not more than 50%. In determining whether the Company has control over its joint ventures, the Company also considers Emerging Issues Task Force (EITF) Issue No. 04-5 Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights (EITF 04-5). EITF 04-5 creates a framework for evaluating whether a general partner or a group of general partners controls a limited partnership whereby the presumption of general partner control would be overcome only when the limited partners have certain specific rights as outlined in EITF 04-5.

The Company defers recognition of its share of intercompany profits from joint ventures until realized in a third party transaction. For the year ended March 31, 2008, the Company did not defer any profits associated with its purchases from joint ventures. For the years ended March 31, 2007 and 2006, the Company deferred \$20.9 million and \$26.9 million, respectively, related to profits associated with the Company's land purchases from joint ventures.

For the years ended March 31, 2008 and 2007, loss from unconsolidated entities includes \$100.5 million and \$124.5 million, respectively, of the Company's share of joint ventures' impairments. There were no significant joint venture impairments recorded in the year ended March 31, 2006.

Property and Equipment, net

Property and equipment is carried at cost less accumulated depreciation. Depreciation is recorded using the straight-line method over the estimated useful life of the asset. The depreciable life for Buildings and Improvements is typically 20 years; depreciable lives for Machinery, Equipment and Other typically range from three to five years. Major renewals and improvements are capitalized and depreciated. Leasehold improvements are depreciated over the shorter of the estimated useful life or the life of the respective lease. Repairs and maintenance are expensed as incurred. Costs and accumulated depreciation applicable to assets retired or sold are eliminated from the accounts and any resulting gains or losses are recognized at such time.

Impairment of Long-Lived Assets

The Company assesses housing projects, land held for development and sale and property and equipment for recoverability in accordance with the provisions of SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS 144). Land held for development and sale includes the purchase price plus any land development incurred to date, capitalized interest, real estate taxes, deposits and pre-acquisition costs. SFAS 144 requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets is measured by comparing the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. These evaluations for impairment are significantly impacted by estimates of revenues, costs and expenses, sales rates and other factors. If long-lived assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Fair value of housing projects, land held for development and sale and property, plant and equipment is determined primarily based on estimated cash flows discounted for market risks associated with the long-lived assets. The Company recorded \$1,792.4 million and \$323.9 million in land-related impairments to housing projects and land held for development and sale during the years ended March 31, 2008 and 2007, respectively. No significant land-related impairments were recorded during the year ended March 31, 2006. See Note (C), *Inventories*, for a discussion of land option write-offs.

Goodwill

Goodwill represents the excess of purchase price over net assets of businesses acquired. Goodwill is tested for impairment at the reporting unit level on an annual basis (at January 1) or when management determines that due to certain circumstances the carrying amount of goodwill may not be recoverable. Goodwill is tested for impairment using a two-step process with the first step comparing the fair value of the reporting unit with its carrying amount, including goodwill. If the carrying amount exceeds the fair value, the second step is performed to measure the amount of impairment loss to be recognized defined as the carrying value of the reporting unit goodwill that exceeds the implied fair value of that goodwill.

The Company periodically evaluates whether events and circumstances have occurred that indicate the remaining balance of goodwill may not be recoverable. Fair value is estimated using a discounted cash flow or market valuation approach. Key assumptions utilized in the Company's discounted cash flow model include estimated future sales levels, estimated costs of sales, varying discount rates and working capital constraints as they principally relate to estimated future inventory levels. Material variations of these assumptions may have a significant impact to the carrying value of goodwill.

For the year ended March 31, 2008, the Company recorded \$78.2 million of goodwill impairments. The Company had no impairment of goodwill in fiscal years 2007 or 2006. Please refer to Note (E), *Goodwill*, for additional information on the Company's goodwill impairments.

Deferred Charges and Other

Deferred charges and other are primarily composed of prepaid expenses, Company deposits, financing costs, investments and interest rate lock commitments.

Off-Balance Sheet Obligations

The Company enters into various off-balance-sheet transactions in the normal course of business in order to facilitate homebuilding activities. Further discussion regarding these transactions can be found in Note (G), Commitments and Contingencies.

Insurance Accruals

The Company has certain self-insured retentions and deductible limits under its workers compensation, automobile and general liability insurance policies. The Company establishes reserves for its self-insured retentions and deductible limits based on an analysis of historical claims and an estimate of claims incurred but not yet reported. Projection of losses concerning these liabilities is subject to a high degree of variability due to factors such as claim settlement patterns, litigation trends and legal interpretations, among others. On an annual basis, the Company engages actuaries to assist in the evaluation and development of claim rates and required reserves for self insurance including reserves related to construction defects and general liability claims. The Company periodically assesses the adequacy of its insurance accruals and adjusts the amounts as necessary. Although the Company considers the insurance accruals reflected in its Consolidated Balance Sheets to be adequate, there can be no assurance that this accrual will prove to be sufficient over time to cover ultimate losses. Expenses associated with insurance claims up to the Company's deductible limits were \$47.0 million, \$51.4 million and \$60.7 million for fiscal years 2008, 2007 and 2006, respectively. As of March 31, 2008 and 2007, accrued insurance included in accrued liabilities in the accompanying Consolidated Balance Sheets was \$221.0 million and \$179.2 million, respectively.

Stock-Based Employee Compensation Arrangements

Prior to January 1, 2006, the Company accounted for its stock-based compensation arrangements in accordance with the provisions of SFAS No. 123, Accounting for Stock-Based Compensation, under which the Company recognized compensation expense of a stock option award over the vesting period based on the fair value of the award on the grant date. Effective January 1, 2006, the Company adopted the provisions of SFAS No. 123(R) entitled Share-Based Payment, (SFAS 123R) using the modified-prospective transition method. Accordingly, prior periods have not been restated. The adoption of SFAS 123R was not significant.

The following information represents the Company's grants of stock-based compensation to employees and directors during the years ended March 31, 2008 and 2007:

Period of Grant	Grant Type	Number of Shares Granted	Fair Value of Grant
For the year ended March 31, 2007	Stock Options	1,420.3	\$28,603.0
	Stock Units	366.2	\$19,955.4
	Restricted Stock	121.2	\$ 6,379.9
For the year ended March 31, 2008	Stock Options	646.6	\$10,116.9
	Stock Units	283.3	\$11,901.2
	Restricted Stock	160.1	\$ 5,035.0

The Company recognizes compensation expense of a stock-based award over the vesting period based on the fair value of the award on the grant date, net of forfeitures. The fair value of stock units and restricted stock are based on the fair market value of the Company's stock on the date of grant, while the fair value of stock options granted is calculated under the Black-Scholes option-pricing model.

In addition to the stock-based awards in the above table, the Company issued to officers and employees during the first quarter of fiscal year 2008 long-term performance awards that vest after three years with an initial aggregate value of \$18.9 million. These awards will be settled in cash and adjusted based on the Company's performance relative to its peers in earnings per share growth and return on equity, as well as changes in the Company's stock price between the date of grant and the end of the performance period. At March 31, 2008, these awards were adjusted to an

aggregate value of \$8.9 million. In accordance with the provisions of SFAS 123(R), these awards are accounted for as liability awards for which compensation expense will be recognized over the vesting period with a corresponding increase in accrued liabilities.

Statements of Consolidated Cash Flows Supplemental Disclosures

In accordance with the provisions of SFAS No. 95, Statement of Cash Flows, the Statements of Consolidated Cash Flows have not been restated for discontinued operations. For further information on the sale of the Company's construction services operations (Construction Services), sub-prime lending operations (Home Equity) and international homebuilding operations, see Note (O), Discontinued Operations. As a result, all Construction Services and international homebuilding cash flows are included with the Centex cash flows and all Home Equity cash flows are included with the Financial Services cash flows.

The following table provides supplemental disclosures related to the Statements of Consolidated Cash Flows:

	<i>For the Years Ended March 31,</i>		
	2008	2007	2006
Cash Paid for Interest ⁽¹⁾	\$ 280,649	\$ 469,133	\$ 656,525
Net Cash Paid for Taxes	\$ 164,037	\$ 325,224	\$ 772,153

(1) Amounts include capitalized interest.

As explained in Note (C), Inventories, pursuant to the provisions of FIN 46, as of March 31, 2008 and 2007, the Company consolidated \$75.3 million and \$152.9 million, respectively, of land as inventory under the caption land held under option agreements not owned. The Company also recorded \$38.1 million and \$90.5 million as of March 31, 2008 and 2007, respectively, of lot option agreements for which the Company's deposits exceeded certain thresholds.

In addition to the items noted above, the Company's adoption of FIN 48 was treated as a non-cash item in the Statements of Consolidated Cash Flows. The adoption of FIN 48 resulted in a \$116.0 million increase to deferred income taxes, a \$329.2 million increase in accrued liabilities and a \$213.2 million reduction in stockholders' equity in the first quarter of fiscal year 2008. Transfers of mortgage loans between categories (i.e., loans in foreclosure included in trade and other receivables, real-estate owned included in other inventories, etc.) have been treated as non-cash items.

Recent Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157), that serves to define fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 will be effective for the Company as of April 1, 2008. However, in February 2008, the FASB issued FASB Staff Position (FSP) FAS 157-2 which delays the effective date of SFAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). Examples of items to which this FSP applies include, but are not limited to, reporting units measured at fair value in the first step of a goodwill impairment test and long-lived assets (asset groups) measured at fair value for an impairment assessment (i.e. inventory impairment assessments). This FSP defers the effective date for nonfinancial assets and nonfinancial liabilities of SFAS 157 for the Company to April 1, 2009. The adoption of SFAS 157 related to financial assets and financial liabilities is not expected to have a material impact on the Company's results of operations or financial position. The Company is currently evaluating the impact, if any, of SFAS 157 related to nonfinancial assets and nonfinancial liabilities on the Company's results of operations or financial position.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159). Under the provisions of SFAS 159, companies may elect to measure specified financial instruments, warranty and insurance contracts at fair value on a contract-by-contract basis, with changes in fair value recognized in earnings. The election, called the fair value option, will enable some companies to reduce the volatility

in reported earnings caused by measuring related assets and liabilities differently, and it is simpler than using the complex hedge-accounting requirements in FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, to achieve similar results. SFAS 159 will be effective for the Company as of April 1, 2008. The Company does not expect the adoption of SFAS 159 to have a material impact on the Company's results of operations or financial position.

In November 2007, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 109, *Written Loan Commitments Recorded at Fair Value Through Earnings* (SAB 109). SAB 109 required that the

expected net future cash flows related to the associated servicing of a loan be included in the measurement of all written loan commitments that were accounted for at fair value through earnings. The provisions of SAB 109 were applicable to written loan commitments issued or modified beginning January 1, 2008. The Company adopted SAB 109 in the fourth quarter of fiscal year 2008, and it did not have a material impact on its results of operations or financial position.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements, an Amendment of ARB No. 51 (SFAS 160). Under the provisions of SFAS 160, a noncontrolling interest in a subsidiary, or minority interest, must be classified as equity and the amount of consolidated net income specifically attributable to the minority interest must be clearly identified in the statement of consolidated earnings. SFAS 160 also requires consistency in the manner of reporting changes in the parent's ownership interest and requires fair value measurement of any noncontrolling interest retained in a deconsolidation. SFAS 160 will be effective for the Company as of April 1, 2009. The Company does not expect the adoption of SFAS 160 to have a material impact on its financial statements.

Reclassifications

Certain prior year balances have been reclassified to be consistent with the March 31, 2008 presentation, including reclassification of the other mortgage loan allowance against the related mortgages, reclassification of certain inventory amounts from housing projects to other inventory, reclassification of nonperforming mortgage loans from trade receivable to other mortgage loans and reclassifications of discontinued operations.

(B) MORTGAGE LOANS

Mortgage loans receivable consist of the following:

	<i>As of March 31,</i>	
	2008	2007
Mortgage Loans Held for Sale, net of Allowance of \$4,092 and \$2,365	\$ 384,293	\$ 1,311,196
Other Mortgage Loans, net of Allowance of \$151,604 and \$12,513	131,587	399,152
Mortgage Loans Receivable, net	\$ 515,880	\$ 1,710,348

For the years ended March 31, 2008 and 2007, the Company recorded provisions for losses on mortgage loans of \$170.4 million and \$11.8 million, respectively. As of March 31, 2008, Financial Services is committed, under existing construction loan agreements, to fund an additional \$26.3 million. During the year ended March 31, 2008, Financial Services ceased originating new construction loans; however, it will fulfill its existing funding commitments.

(C) INVENTORIES

Housing Projects and Land Held for Development and Sale

A summary of housing projects is provided below:

	<i>As of March 31,</i>	
	2008	2007
Direct Construction	\$ 1,746,016	\$ 3,041,290
Land Under Development	2,882,844	5,433,593
Housing Projects	\$ 4,628,860	\$ 8,474,883

For the year ended March 31, 2008, the Company recorded \$1,792.4 million in land-related impairments due to challenging market conditions. For the year ended March 31, 2007, the Company recorded \$323.9 million in land-related impairments. No significant land-related impairments were recorded for the year ended March 31, 2006. During the year ended March 31, 2008, 410 land-related impairments were recorded representing 296 neighborhoods and land investments, certain of which have been impaired more than once. Land-related impairments during the year ended March 31, 2007 represented 83 neighborhoods and land investments. During the fourth quarter of fiscal year

2008, the Company recorded \$300.0 million in impairments. At March 31, 2008, the remaining carrying value of neighborhoods and land investments for which an impairment was recorded in the quarter ended March 31, 2008 was \$174.8 million.

Land Held Under Option Agreements Not Owned and Other Land Deposits

The Company enters into land option purchase agreements. Under the option agreements, the Company pays a stated deposit or issues a letter of credit in consideration for the right to purchase land at a future time, usually at predetermined prices. These options generally do not contain performance requirements from the Company nor obligate the Company to purchase the land, and expire on various dates. At March 31, 2008, the Company had 145 land option agreements.

In accordance with the provisions of FIN 46, the Company is the primary beneficiary of certain option agreements to purchase land, for which the remaining purchase price of the land was \$75.3 million and \$152.9 million as of March 31, 2008 and 2007, respectively. Land consolidated under FIN 46 is recorded under the caption land held under option agreements not owned, with a corresponding increase to minority interests. At March 31, 2008, 12 land option agreements were consolidated pursuant to FIN 46.

In addition to land options recorded pursuant to FIN 46, the Company determined that 11 land option agreements represent financing arrangements pursuant to the provisions of SFAS 49, Product Financing Arrangements (SFAS 49). As a result, the Company recorded \$38.1 million and \$90.5 million as of March 31, 2008 and 2007, respectively, which represents the remaining purchase price of the land. Land consolidated pursuant to SFAS 49 is recorded under the caption land held under option agreements not owned, with a corresponding increase to accrued liabilities.

A summary of the Company's deposits for land options and the total purchase price of such options is provided below:

	<i>As of March 31,</i>	
	2008	2007
Cash Deposits included in:		
Land Held for Development and Sale	\$ 20,711	\$ 89,737
Land Held Under Option Agreements Not Owned	33,230	38,642
Total Cash Deposits in Inventory	53,941	128,379
Letters of Credit	943	12,854
Total Invested through Deposits or Secured with Letters of Credit	\$ 54,884	\$ 141,233
Total Purchase Price of Land Option Agreements	\$ 1,131,976	\$ 3,324,636

In addition to deposits, the Company capitalizes pre-acquisition development costs related to land held under option agreements. As of March 31, 2008 and 2007, pre-acquisition development costs were \$11.9 million and \$48.0 million, respectively. Included in land held for development and sale is owned land that is not currently anticipated to be developed for more than two years and land that the Company intends to sell within one year, which amounted to \$527.2 million and \$20.5 million as of March 31, 2008 and 2007, respectively.

The Company writes off deposits and pre-acquisition costs when it determines it is probable the property will not be acquired. Write-offs of land deposits and pre-acquisition costs amounted to \$120.4 million, \$360.0 million and \$35.2 million for the years ended March 31, 2008, 2007 and 2006, respectively.

(D) PROPERTY AND EQUIPMENT

Property and equipment cost by major category and accumulated depreciation are summarized below:

	March 31,	
	2008	2007
Land, Buildings and Improvements	\$ 70,554	\$ 78,979
Machinery, Equipment and Other	210,691	254,391
	281,245	333,370
Accumulated Depreciation and Amortization	(203,314)	(198,629)
	\$ 77,931	\$ 134,741

The Company had depreciation and amortization expense related to property and equipment of \$41.8 million, \$46.5 million, and \$41.6 million for fiscal years 2008, 2007, and 2006, respectively.

(E) GOODWILL

A summary of changes in goodwill by segment for the years ended March 31, 2008 and 2007 are presented below:

	As of March 31, 2006	Goodwill Disposed	Goodwill Impairments	As of March 31, 2007
Home Building				
East	\$ 27,945	\$	\$	\$ 27,945
Southeast	29,160			29,160
Central	7,654			7,654
Texas	9,720			9,720

(F) INDEBTEDNESS

A summary of the balances of short-term and long-term debt (debt instruments with original maturities greater than one year) and weighted-average interest rates at March 31, 2008 and 2007 is presented below. Due dates are presented in fiscal years.

	<i>March 31,</i>			
	2008	Weighted- Average Interest Rate	2007	Weighted- Average Interest Rate
Short-term Debt:				
Centex	\$ 4,050	5.25%	\$ 1,807	
Financial Services				
Financial Institutions	337,053	3.63%	428,144	5.56%
Harwood Street Funding I, LLC Secured Liquidity Notes			1,174,896	5.38%
Consolidated Short-term Debt	341,103		1,604,847	
Long-term Debt:				
Centex				
Medium-term Note Program			170,000	5.61%
Senior Notes, due through 2017	3,319,190	6.00%	3,708,976	5.89%
Other Indebtedness, due through 2018	1,927	8.98%	21,334	6.65%
	3,321,117		3,900,310	
Financial Services				
Harwood Street Funding I, LLC Variable-Rate Subordinated Extendable Certificates			60,000	7.32%
Consolidated Long-term Debt	3,321,117		3,960,310	
Total Debt	\$ 3,662,220		\$ 5,565,157	

Centex's short-term debt as of March 31, 2008 consisted of land and land-related acquisition notes of \$4.1 million. Centex's short-term debt as of March 31, 2007 consisted of land and land-related acquisition notes of \$1.8 million.

The weighted-average interest rates for short-term and long-term debt during the years ended March 31, 2008, 2007, and 2006 were:

	<i>For the Years Ended March 31,</i>		
	2008	2007	2006
Short-term Debt			
Centex	2.89%	5.35%	4.23%
Financial Services	5.97%	5.59%	4.04%
Long-term Debt:			
Centex			
Medium-term Note Programs	5.68%	6.00%	5.54% ⁽¹⁾
Senior Notes	5.90%	5.89%	5.90%
Other Indebtedness	7.15%	6.43%	5.60%
Subordinated Debentures		8.75%	8.56%
Financial Services			
Harwood Street Funding I, LLC Variable-Rate Subordinated Extendable Certificates	7.42%	7.34%	5.85%

(1) *Interest rate includes the effects of an interest rate swap agreement.*

Maturities of the Company's long-term debt during the next five years ending March 31 of each year and thereafter are:

	<i>For the Fiscal Years</i>	
	<i>Ending March 31,</i>	
2009	\$	151,091
2010		225,101
2011		700,104
2012		349,321
2013		315,135
Thereafter		1,580,365
	\$	3,321,117

The Company is required to maintain compliance with certain financial covenants in the Company's multi-bank revolving credit facility. Material covenants include a maximum leverage ratio, a minimum tangible net worth requirement and a borrowing base limitation on the availability of borrowings. The Company's credit facility also includes an interest coverage ratio. This ratio is a determinant of the maximum leverage ratio covenant and certain of

the credit facility's pricing provisions. In addition, Financial Services' committed bank warehouse credit facilities contain various affirmative and negative covenants that are generally customary for a facility of this type. At March 31, 2008, the Company was in compliance with its financial covenants.

Credit Facilities

The Company's existing credit facilities and available borrowing capacity as of March 31, 2008 are summarized below:

	Existing Credit Facilities	Available Capacity
Centex		
Multi-Bank Revolving Credit Facility		
Revolving Credit	\$ 750,000	\$ 141,897
Letters of Credit	600,000	193,753
	1,350,000	335,650 ⁽¹⁾
Financial Services		
Secured Credit Facilities	605,000	267,947 ⁽²⁾
	\$ 1,955,000	\$ 603,597

(1) *This is an unsecured, committed, multi-bank revolving credit facility, maturing in July 2010, which serves as funding for general corporate purposes and provides \$600 million of letter of credit capacity. As of March 31, 2008, there were no borrowings under the revolving credit facility. The revolving credit facility's available capacity is subject to a*

borrowing base limitation when the Company's senior unsecured debt does not have an investment grade rating from at least two of the following:

Moody's, S&P and Fitch.

Under the borrowing base limitation, the sum of the Company's net senior debt and any amounts drawn on the revolving credit facility may not exceed an amount based on certain percentages of various categories of the Company's unencumbered inventory and other assets.

Available capacity amounts above reflect the borrowing base limitation.

Financial letters of credit reduce the available capacity under the revolving credit facility and letters of credit.

Financial letters of credit are generally issued as a form of

*financial or
payment
guarantee.*

- (2) *At March 31,
2008, CTX
Mortgage
Company, LLC
maintained
\$605 million of
secured,

information.*

Funding of Mortgage Loans

CTX Mortgage Company, LLC has historically funded its origination of mortgage loans through the sale of such mortgage loans to Harwood Street Funding I, LLC (HSF-I) and, to a lesser extent, through borrowings under more traditional committed bank warehouse credit facilities and mortgage loan sale agreements. As a result of the significant disruptions in the mortgage and asset-backed commercial paper markets, beginning in the second quarter of fiscal year 2008, HSF-I was unable to finance the purchase of mortgage loans from CTX Mortgage Company, LLC. In November 2007, HSF-I and the related swap arrangements were terminated and all outstanding obligations were redeemed. The termination of HSF-I was entirely due to these external market factors and not to any quality or performance issues related to HSF-I or its underlying collateral.

CTX Mortgage Company, LLC is currently funding its mortgage originations primarily through borrowings under committed bank warehouse credit facilities. The warehouse facilities generally allow CTX Mortgage Company, LLC to sell to the bank, on a revolving basis, mortgage loans up to an aggregate specified amount. Simultaneously, the bank has entered into an agreement to transfer such mortgage loans back to CTX Mortgage Company, LLC on a specified date or on the Company's demand for subsequent sale by CTX Mortgage Company, LLC to third parties. Mortgage loans eligible for sale by CTX Mortgage Company, LLC under the warehouse facilities are conforming loans, FHA/VA eligible loans, and jumbo loans meeting conforming underwriting guidelines except as to the size of the loan. Under one such warehouse credit facility amounting to \$450 million at March 31, 2008, the bank had the option to convert the facility to an amortizing loan based on the ultimate sale of the underlying collateral and not to purchase any additional mortgage loans if our long-term unsecured debt ratings fell below BB+ by Standard & Poors

(S&P), below BBB by Fitch Ratings (Fitch,) or below Ba1 by Moody s Investors Service (Moody s). At March 2008, the Company s long-term unsecured debt was rated BB+ by S&P, BBB by Fitch and Ba1 by Moody s. CTX Mortgage Company, LLC may also seek to enter into additional mortgage warehouse facilities with other lenders. Borrowings under the warehouse facilities constitute short-term debt of Financial Services.

On May 7, 2008, S&P lowered the Company s debt rating from BB+ to BB which triggered the debt ratings provision in the \$450 million committed bank warehouse credit facility discussed above. On May 9, 2008, CTX Mortgage Company, LLC executed an amendment to the bank warehouse credit facility to effectively reset the debt ratings trigger. See note (P), Subsequent Events, for further discussion.

CTX Mortgage Company, LLC bears the credit risk associated with loans originated until such loans are sold to third parties. In connection with the loans it originates and sells to third parties, CTX Mortgage Company, LLC makes representations and warranties to the effect that each mortgage loan sold satisfies the criteria of the sale agreement. CTX Mortgage Company, LLC may be required to repurchase mortgage loans sold to third parties if such mortgage loans are determined to breach the representations and warranties of CTX Mortgage Company, LLC, as seller. CTX Mortgage Company, LLC records a liability for its estimated losses for these obligations and such amount is included in its loan origination reserve.

If the current funding sources were to become unavailable, Financial Services would need to make other financing arrangements to fund its mortgage loan origination activities, or the Company may be required to fund Financial Services' loan originations and make additional capital contributions to Financial Services. Although the Company believes that Financial Services could broker loans to other mortgage companies, sell loans directly to the Federal National Mortgage Association or arrange for alternative financing that is common for other homebuilders and mortgage companies, there can be no assurance that such financing would be available on satisfactory terms, and any delay in obtaining such financing could adversely affect the results of operations of Financial Services.

Prior to August 2007, substantially all of the mortgage loans originated by CTX Mortgage Company, LLC were funded through the sale of such mortgage loans to HSF-I under the terms of a mortgage loan purchase agreement. HSF-I was a variable interest entity of which the Company was the primary beneficiary, and it was consolidated in the Company's financial statements. HSF-I obtained the funds needed to purchase eligible mortgage loans from CTX Mortgage Company, LLC by issuing (1) short-term secured liquidity notes, (2) medium-term debt and (3) subordinated certificates. As of March 31, 2008, HSF-I had no outstanding secured liquidity notes, medium-term debt or subordinated certificates. All of HSF-I's outstanding secured liquidity notes were redeemed in accordance with their scheduled maturity dates, and in November 2007, all outstanding subordinated certificates were redeemed.

CTX Mortgage Company, LLC and its related companies sold \$9.3 billion and \$10.8 billion of mortgage loans to investors during the years ended March 31, 2008 and 2007, respectively. CTX Mortgage Company, LLC and its related companies recognized gains on sales of mortgage loans and related derivative activity of \$125.6 million, \$165.0 million and \$164.8 million during the years ended March 31, 2008, 2007 and 2006, respectively.

(G) COMMITMENTS AND CONTINGENCIES

Joint Ventures

The Company conducts a portion of its land acquisition, development and other activities through its participation in joint ventures in which the Company holds less than a majority interest. These land-related activities typically require substantial capital, and partnering with other homebuilders or developers and, to a lesser extent, financial partners, allows Home Building to share the risks and rewards of ownership and to provide broader strategic advantages.

A summary of the Company's Home Building joint ventures is presented below (dollars in thousands):

	2008		As of March 31,			
	Number of JVs ⁽¹⁾	Investments	Centex's		2007	
			Share of Debt	Number of JVs ⁽¹⁾	Investments	Centex's Share of Debt
Unleveraged Joint Ventures	29	\$ 70,043	\$	28	\$ 33,369	\$
Joint Ventures with Debt:	13			21		
Limited Maintenance Guarantee ⁽²⁾⁽³⁾⁽⁴⁾		43,311	27,500		108,057	162,425
Repayment Guarantee ⁽²⁾⁽⁵⁾		3,154	13,692		2,247	16,045
Completion Guarantee ⁽⁴⁾		78,274	133,935		126,469	209,927

No Recourse or Guarantee		12,040	24,000		11,502	24,000
	42	\$ 206,822	\$ 199,127	49	\$ 281,644	\$ 412,397

(1) *The number of joint ventures includes unconsolidated Home Building joint ventures for which the Company has an investment balance as of the end of the period and/or current fiscal year activity. The Company was the managing member of 23 and 28 of the joint ventures as of March 31, 2008 and 2007, respectively. The number of joint ventures includes 17 and*

14 joint ventures as of March 31, 2008 and 2007, respectively, for which substantially all the joint ventures activities are complete.

(2) These amounts represent the Company's maximum exposure related to the joint ventures debt at each respective date.

(3) The Company has guaranteed that certain of the joint ventures will maintain a specified loan to value ratio. For certain joint ventures, the Company has contributed additional capital in order to maintain loan to value requirements. At March 31, 2008, the Company had one remaining joint venture with a limited maintenance guarantee. In April 2008, this joint venture

*repaid its
outstanding
debt.*

*(4) Certain joint
venture
agreements
require the
Company to
guarantee the
completion of a
project or phase
if the joint
venture does not
perform the
required land
development. A
portion of these
completion
guarantees are
joint and
several with the
Company's
partners.*

*(5) The Company
has guaranteed
repayment of a
portion of
certain joint
venture debt
limited to its
ownership
percentage of
the joint venture
or a percentage
thereof.*

Total joint venture debt outstanding as of March 31, 2008 and 2007 was \$423.2 million and \$1.0 billion, respectively. Debt agreements for joint ventures vary by lender in terms of structure and level of recourse. For certain of the joint ventures, the Company is also liable on a contingent basis, through other guarantees, letters of credit or other arrangements, with respect to a portion of the construction debt. Additionally, the Company has agreed to indemnify the construction lender for certain environmental liabilities in the case of most joint ventures and most guarantee arrangements provide that the Company is liable for its proportionate share of the outstanding debt if the joint venture files for voluntary bankruptcy. To date, the Company has not been requested to perform under the environmental liabilities or voluntary bankruptcy guarantees for any of its joint ventures.

Four of the Company's joint ventures are in default of their joint venture debt agreements. In addition, the Company expects two other joint ventures to be in default of their joint venture debt agreements subsequent to March 31, 2008. Our joint venture partner in one of these joint ventures filed for bankruptcy during the year ended March 31, 2008. The Company's share of the total debt of these joint ventures is \$64.0 million and is included in the table above. The Company is in discussions with the joint venture partners and lenders with respect to each joint venture and is evaluating alternatives to mitigate the Company's exposure. The Company expects to fulfill its contractual obligations

under the joint venture agreements. Costs associated with fulfilling such contractual obligations may be less than the Company's share of the joint ventures' debt. Recourse under joint venture debt agreements is limited to either the underlying collateral or completion obligations of the joint venture partners. Based upon the terms and debt amounts outstanding for these joint ventures and the terms of the joint venture agreements, the Company does not believe its exposure related to these joint venture defaults will be material to the Company's financial position or results of operations.

A summary of the estimated maturities of the Company's share of joint ventures' debt is provided below (dollars in thousands). The Company has estimated the debt maturities with the assumption that all payments are first applied to pay down the outstanding debt balances as of March 31, 2008. The Company's share of joint ventures' debt for which the joint ventures are in default is included in fiscal year ending 2009 in the table below.

	<i>For the Fiscal Years Ending March 31,</i>	
2009	\$	168,941
2010		2,268
2011		3,918
2012		24,000
	\$	199,127

Letters of Credit and Surety Bonds

In the normal course of business, the Company issues letters of credit and surety bonds: (1) pursuant to certain performance related obligations, (2) as security for certain land option purchase agreements of the Home Building line of business, and (3) under various insurance programs. The Company also previously issued surety bonds, which are reflected as discontinued operations in the table below, pursuant to construction obligations of Construction Services prior to the sale of this segment on March 30, 2007. The Company does not expect these letters of credit or bonds will be drawn upon.

A summary of the Company's outstanding letters of credit and surety bonds as of March 31, 2008 and March 31, 2007 is presented below (dollars in millions):

	<i>As of March 31, 2008</i>		<i>As of March 31, 2007</i>	
	Letters of Credit	Surety Bonds	Letters of Credit	Surety Bonds
Home Building	\$ 168.6	\$ 1,527.9 ⁽¹⁾	\$ 209.1	\$ 1,542.3
Financial Services	35.7	12.3	0.7	10.7
Other	167.0	0.2	85.9	0.2
Discontinued Operations ⁽²⁾	35.3	3,093.9	46.6	4,163.3
	\$ 406.6	\$ 4,634.3	\$ 342.3	\$ 5,716.5

(1) *The Company estimates that \$580.0 million of work remains to be performed on these projects as of March 31, 2008.*

(2) *After the sale of Construction Services, the Company remains responsible to a surety for certain surety bond obligations relating to Construction Services projects commenced prior to March 30, 2007. These surety bonds have a total face amount of \$3.09 billion at March 31, 2008, although the risk of liability*

with respect to these surety bonds declines as the relevant construction projects are performed. At March 31, 2008, the Company estimates that \$584.6 million of work remains to be performed on these projects. In connection with certain of these surety bond obligations, the Company provided a \$100 million letter of credit to such surety which is included in Other above. The purchaser of Construction Services has agreed to indemnify the Company against losses relating to such surety bond obligations, including amounts drawn under any such letter of credit. The Company has purchased for its benefit an additional back-up indemnity provided by a financial institution with an A+ (S&P),

A1 (Moody's) credit rating. The obligation of such financial institution under the back-up indemnity is \$856.8 million as of March 31, 2008, which declines to \$400 million over time and terminates in 2016.

Community Development and Other Special District Obligations

A Community Development District or similar development authority (CDD) is a unit of local government created under various state statutes that utilizes bond financing to finance the construction or acquisition of infrastructure assets of a development. A portion of the liability associated with the bonds including principal and interest is assigned to each parcel of land within the development. This debt is typically paid by subsequent special assessments levied by the CDD on the landowners. In accordance with EITF 91-10, Accounting for Special Assessments and Tax Increment Financing, the Company records a liability for future assessments, which are fixed or determinable for a fixed or determinable period. In addition and in accordance with SFAS 5, the Company evaluates whether it is contingently liable for any of the debt related to the bond issuance. This is typically the case where bonds issued by the CDD have maturity dates of ten years or less that will be paid by the Company as the developer and current landowner and not by future homeowners. At March 31, 2008 and 2007, the Company had recorded \$351.9 million and \$280.2 million, respectively, in accrued liabilities for outstanding CDD obligations.

Warranties and Guarantees

In the normal course of its business, the Company issues certain warranties and guarantees or makes certain representations related to its home sales, land sales and mortgage loan originations. The Company believes that it has established the necessary accruals for these warranties, guarantees and representations. See further discussion of the Company's warranty liability below.

Home Building offers a ten-year limited warranty for most homes constructed and sold. The warranty covers defects in materials or workmanship in the first two years of the customer's ownership of the home and certain designated components or structural elements of the home in the third through tenth years. Home Building estimates the costs that may be incurred under its warranty program for which it will be responsible and records a liability at the time each home is closed. Factors that affect Home Building's warranty liability include the number of homes closed, historical and anticipated rates of warranty claims, and cost per claim. Home Building periodically assesses the adequacy of its recorded warranty liability and adjusts the amounts as necessary.

Changes in Home Building s contractual warranty liability at March 31 are as follows:

	<i>For the Years Ended March 31,</i>		
	2008	2007	2006
Balance at Beginning of Period	\$ 44,293	\$ 47,199	\$ 34,961
Warranties Issued	27,858	42,422	53,036
Settlements Made	(40,915)	(45,228)	(40,173)
Change in Liability of Pre-Existing Warranties, Including Expirations	(2,081)	(100)	(625)
Balance at End of Period	\$ 29,155	\$ 44,293	\$ 47,199

Financial Services has established a liability for anticipated losses associated with mortgage loans originated. Changes in Financial Services liability at March 31 are as follows:

	<i>For the Years Ended March 31,</i>		
	2008	2007	2006
Balance at Beginning of Period	\$ 16,863	\$ 18,500	\$ 18,803
Provisions for Losses	1,676	2,160	2,522
Settlements	(9,251)	(1,178)	(2,921)
Changes in Pre-Existing Reserves	4,615	(2,619)	96
Balance at End of Period	\$ 13,903	\$ 16,863	\$ 18,500

Forward Trade and Interest Rate Lock Commitments

Forward trade commitments represent the fair value of contracts with investors for delayed delivery of mortgage loans for which the Company agrees to make delivery at a specified future date at a specified price. The Company utilizes such delayed delivery contracts to hedge market risk based upon the number of commitments issued to borrowers that are expected to close. Fair value is estimated using quoted market prices for current dealer commitments to purchase loans. At March 31, 2008, the Company had \$377.3 million of commitments to deliver mortgages to investors against interest rate lock commitments. In addition, at March 31, 2008, the Company had commitments to deliver approximately \$380.0 million of mortgage loan inventory to investors.

Interest rate lock commitments (IRLCs) represent the fair value of individual borrower agreements that commit the Company to lend at a specified price for a specified period as long as there is no violation of any condition established in the commitment contract. Fair value is estimated using quoted market prices on fixed loan commitments in the mortgage pipeline. The fair value of these loan commitment derivatives includes future cash flows related to the associated servicing of the loan, but does not include the value of any internally-developed intangible assets. At March 31, 2008, the Company had loan commitments to prospective borrowers of \$465.7 million.

For additional information on forward trade commitments and interest rate lock commitments, please refer to Note (L), Derivatives and Hedging.

Litigation and Related Matters

In the normal course of its business, the Company is named as a defendant in certain suits filed in various state and federal courts. Management believes that none of the litigation matters in which the Company is involved, including those described below, would have a material adverse effect on the consolidated financial condition or operations of the Company.

In January 2003, the Company received a request for information from the United States Environmental Protection Agency (EPA), pursuant to Section 308 of the Clean Water Act seeking information about compliance with permits regulating storm water discharges at projects the Company had completed or was building. Subsequently, the EPA limited its request to Home Building s operations at 30 neighborhoods. Home Building has provided the requested information and the United States Department of Justice (the Justice Department), acting on behalf of the EPA, has asserted that some of these and certain other neighborhoods have violated regulatory requirements applicable to storm water discharges, and that injunctive relief and civil penalties may be warranted. Home Building has been exploring methods of settling this matter. In May 2008, Home Building agreed to sign a

consent decree with the EPA and various states with respect to the Company's prior and future storm water pollution prevention practices at all of Home Building's sites. When the consent decree is signed by all parties, the Justice Department will file suit in Federal Court in accordance with the accepted practice in matters of this nature and simultaneously submit the proposed consent decree for approval by the Court. A notice of lodging of the proposed consent decree will then be published in the Federal Register, which triggers the opening of a public comment period. The public comment period is typically 30 days. The Justice Department will review and respond to any comments it receives and will then ask the Court to sign and enter the proposed consent decree. The Court may require a hearing before it rules. Once the Court is satisfied, it will sign and enter the consent decree. The Company anticipates that the consent decree will become final during the second quarter of the fiscal year ending March 31, 2009. Under the proposed consent decree, Home Building will pay a civil penalty of \$1,485,000, and will agree to certain management practices related to controlling storm water discharges at all of Home Building's sites.

Operating Leases

The Company leases certain office facilities and other equipment under operating leases. Future minimum payments under the noncancelable leases are as follows: 2009 \$56.9 million; 2010 \$46.6 million; 2011 \$36.2 million; 2012 \$26.0 million; 2013 \$17.4 million and thereafter \$15.8 million.

Rental expense for the years ended March 31, 2008, 2007 and 2006 was \$63.5 million, \$75.1 million and \$65.9 million, respectively.

(H) COMPREHENSIVE INCOME

A summary of comprehensive income (loss) is presented below:

	<i>For the Years Ended March 31,</i>		
	2008	2007	2006
Net Earnings (Loss)	\$ (2,657,482)	\$ 268,366	\$ 1,289,313
Other Comprehensive Income (Loss), net of Tax:			
Unrealized Gain on Hedging Instruments		7,036	263
Foreign Currency Translation Adjustments		72	(14,406)
Hedging Gain Reclassified to Net Earnings		(15,738)	
Foreign Currency Gain Reclassified to Net Earnings			(48,354)
Comprehensive Income (Loss)	\$ (2,657,482)	\$ 259,736	\$ 1,226,816

The unrealized gain on hedging instruments represented the deferral in other comprehensive income (loss) of the unrealized gain on interest rate swap agreements designated as cash flow hedges. The foreign currency translation adjustments were reclassified to earnings from discontinued operations in connection with the sale of the Company's international homebuilding operations. The accumulated other comprehensive income associated with Home Equity's hedging gains was reclassified to earnings from discontinued operations and included in the gain on sale of Home Equity recorded in the second quarter of fiscal year 2007.

(I) BUSINESS SEGMENTS

As of March 31, 2008, the Company operated in two principal lines of business: Home Building and Financial Services. These lines of business operate in the United States, and their markets are nationwide. Revenues from any one customer are not significant to the Company.

The Company's Home Building line of business consists of the following reporting segments that have operations located in the following states:

East: Georgia (Savannah only), Maryland, New Jersey, North Carolina, South Carolina and Virginia

Southeast: Florida, Georgia (Atlanta only) and Tennessee

Central: Indiana, Illinois, Michigan, Minnesota and Missouri

Texas: Texas

Northwest: Colorado, Hawaii, Nevada (except Las Vegas), Northern California, Oregon, Washington

Southwest: Arizona, Southern California, Nevada (Las Vegas only), New Mexico

Other homebuilding ⁽¹⁾

(1) Other homebuilding includes certain resort/second home projects in Florida that the Company plans to build-out and liquidate, and holding companies. In addition, Other homebuilding includes amounts consolidated under the caption land held under option agreements not owned and capitalized interest for all regions.

The Company's mortgage lending, title agency services and insurance products represent one reporting segment, Financial Services.

In March 2008, the Company signed a definitive agreement to sell its home services operations. The sale was completed in April 2008. In fiscal year 2007, the Company completed the sale of Construction Services and Home Equity. In fiscal year 2006, the Company completed the sale of its international homebuilding operations. For additional information regarding the sale of these entities, refer to Note (O), Discontinued Operations. All prior year segment information has been revised to conform to the current year presentation.

Home Building

Home Building's operations currently involve the construction and sale of detached and attached single-family homes. The land used for the construction of the Company's homes is acquired through the purchase of finished or partially finished lots, and through the purchase of raw land that must be developed. During the year ended March 31, 2008 approximately 80% of the homes closed were single-family, detached homes. Included in Home Building's loss from unconsolidated entities for the years ended March 31, 2008 and 2007 is the Company's share of joint ventures impairments totaling \$100.5 million and \$124.5 million, respectively. There were no significant joint venture impairments recorded in the year ended March 31, 2006.

Financial Services

As a result of the significant disruptions in the mortgage markets and the related reductions in the mortgage market liquidity, during the fiscal year 2006, the Company began to focus its mortgage operations on Builder loans to support Home Building. Financial Services' operations consist primarily of mortgage lending, title agency services and the sale of title insurance and other insurance products. These activities include mortgage origination and other related services for homes sold by the Company's subsidiaries and others. Retail mortgage originations represented approximately 54.8%, 53.0%, and 61.3% of total mortgage originations during the fiscal years ended March 31, 2008, 2007, and 2006, respectively. The Company anticipates the reduction in total Retail mortgage originations may have a negative impact on Financial Services' operating results.

Financial Services' revenues include interest income of \$70.4 million, \$121.8 million and \$104.1 million in fiscal years 2008, 2007 and 2006, respectively. The majority of the Company's interest income in each year is earned by the Financial Services segment. Financial Services' cost of sales is comprised of interest expense related to debt issued to fund its home financing activities.

Other

The Company's Other segment consists of corporate general and administrative expense, including Home Building corporate-related general and administrative expense and interest income and interest expense.

The following are components of the Other segment's loss from continuing operations before income tax:

	<i>For the Years Ended March 31,</i>		
	2008	2007	2006

Deferred Income Taxes, net	\$ 191,246	\$ 500,703

The Company recognized an income tax benefit of \$214.2 million for the year ended March 31, 2008 as compared to the previous fiscal year's tax provision of \$116.3 million. The significant change in the Company's tax provision for the year ended March 31, 2008 reflects the recognition of a deferred tax asset valuation allowance, the recognition of a liability for unrecognized tax benefits and related accrued interest and penalties.

At March 31, 2008, the Company had a \$648.5 million federal income tax receivable primarily relating to the net operating loss carryback refund claim. The Company's net deferred tax assets before the valuation allowance were \$1.02 billion and \$500.7 million as of March 31, 2008 and 2007, respectively. The increase in the deferred tax assets before the valuation allowance recorded during fiscal year 2008 was due primarily to land-related impairments. The Company had a \$109.1 million deferred tax asset resulting from tax credit and state net operating loss carryforwards. If unused, the various state tax net operating loss and carryforwards will expire (beginning at various times depending on the tax jurisdiction) in the years 2013 through 2028. As a result of the goodwill impairments recorded in fiscal year 2008 and the reclassification of the Company's home services operations to discontinued operations, the deferred tax balance related to depreciation and amortization is now classified as a deferred tax asset. In the previous fiscal year, the balance resulted in a deferred tax liability.

In accordance with the provisions of SFAS 109, the Company assesses, on a quarterly basis, the realizability of its deferred tax assets. A valuation allowance must be established when, based upon the evaluation of all available evidence, it is more likely than not that all or a portion of the deferred tax assets will not be realized. Realization of deferred tax assets is dependent upon taxable income in prior carryback years, estimates of future taxable income, tax planning strategies and reversals of existing taxable temporary differences. SFAS 109 provides that forming a conclusion that a valuation allowance is not needed is difficult when there is negative evidence such as cumulative losses in recent years or losses expected in early future years.

Based on the Company's assessment, including the implementation of certain tax planning strategies, the realization of approximately \$830 million of the Company's deferred tax assets is dependent upon future taxable income. Based on the Company's consideration of the current homebuilding industry conditions and the related uncertainty in projections of future taxable income, the Company established a valuation allowance, which increased losses from continuing operations by \$830 million, or \$6.77 per share, during the year ended March 31, 2008.

Realization of the remaining net deferred tax assets of \$191.2 million as of March 31, 2008 is not assured. The valuation allowance may be increased or decreased as conditions change or if the Company is unable to implement certain tax planning strategies. The Company's future realization of its deferred tax assets ultimately depends on the existence of sufficient taxable income in the carryforward periods (both federal and state). Changes in existing laws could affect the valuation of deferred tax assets for future periods.

On April 1, 2007, the Company adopted FIN 48. The cumulative effect of the adoption of FIN 48 was recorded as a \$208.3 million reduction to beginning retained earnings in the first quarter of fiscal year 2008. The total amount of gross unrecognized tax benefits as of April 1, 2007 was \$341.4 million and \$353.1 million as of March 31, 2008 (which excludes interest, penalties, and the tax benefit relating to the deductibility of interest and state income tax). The following table summarizes the changes in gross unrecognized tax benefits from April 1, 2007 (date of adoption) to March 31, 2008:

Gross Unrecognized Tax Benefits as of April 1, 2007	\$ 341,388
Tax positions taken relating to a prior year	(2,134)
Tax positions taken relating to the current year	14,352
Settlements of tax positions with taxing authorities	(459)
Balance as of March 31, 2008	\$ 353,147

It is reasonably possible that, within the next 12 months, total unrecognized tax benefits may decrease as a result of the potential resolution with the IRS relating to issues stemming from fiscal years 2001 through 2004 federal income tax returns, in addition to the resolution of various state income tax audits and/or appeals. However, the change that could occur within the next 12 months cannot be estimated at this time.

The Company files numerous income tax returns in both U.S. federal and state jurisdictions. The federal statute of limitations has expired for the Company's federal tax returns filed for tax years through March 31, 2000. In July 2007, the Company received a Revenue Agent's Report from the IRS relating to the ongoing audit of the Company's federal income tax returns for fiscal years 2001 through 2004. The Company believes that its tax return positions are supported and will vigorously dispute the proposed adjustments. The IRS has commenced an examination of the Company's federal tax returns for fiscal years 2005 and 2006. Certain of the Company's state income tax returns are under audit and are at various stages of the audit process.

The total amount of unrecognized tax benefits that, if recognized, would affect the Company's effective tax rate was \$248.8 million as of April 1, 2007 and \$272.3 million as of March 31, 2008. The Company recognizes accrued interest and penalties related to unrecognized tax benefits in the financial statements as a component of the income tax provision that is consistent with the Company's historical accounting policy. After the adoption of FIN 48, the total amount of gross accrued interest and penalties was \$112.3 million. As of March 31, 2008, gross accrued interest and penalties was \$153.6 million. For the year ended March 31, 2008, the Company accrued \$41.3 million of gross accrued interest and penalties. The Company's liability for unrecognized tax benefits combined with accrued interest

and penalties is reflected as a component of accrued liabilities.

(K) CAPITAL STOCK AND EMPLOYEE BENEFIT PLANS**Stock Options**

The Company has issued stock options under the following plans: the Amended and Restated Centex Corporation 2003 Equity Incentive Plan (the 2003 Plan), the Amended and Restated Centex Corporation 2001 Stock Plan (the 2001 Plan) and the Amended and Restated 1998 Centex Corporation Employee Non-Qualified Stock Option Plan (the 1998 Plan). Stock options granted under these plans may not be granted at less than fair market value. The Company also issued stock options until the year ended March 31, 2002 under the Amended and Restated 1987 Stock Option Plan (the 1987 Plan). The 1987 Plan provides that stock options may not be granted at less than fair market value except in limited circumstances. These stock option plans, which are administered by the Compensation and Management Development Committee of the Board of Directors, provide for the grant of nonqualified stock options to officers, employees and directors of the Company and its affiliates, other than the 1998 Plan, which excludes officers and directors of the Company. The exercise price of any option granted under these plans must be paid in cash upon exercise (including pursuant to a cashless exercise), or by means of tendering previously owned shares of common stock or shares issued or issuable pursuant to a grant (including pursuant to a net exercise). Under the provisions of the 1998 Plan and 1987 Plan, stock options can no longer be granted under these plans.

The Company records proceeds from the exercise of stock options as additions to Common Stock and capital in excess of par value. The federal tax benefit, if any, is considered additional capital in excess of par value. On April 1, 2003, the Company adopted the fair value measurement provisions of SFAS No. 123 under which the Company recognizes compensation expense of a stock-based award to an employee on a straight-line basis over the vesting period based on the fair value of the award on the grant date. Effective January 1, 2006, the Company adopted the provisions of SFAS No. 123(R) entitled Share-Based Payment (SFAS 123R) using the modified-prospective transition method. Accordingly, prior periods have not been restated. The adoption of SFAS 123R was not significant.

A summary of the activity of the stock option plans as of March 31, 2008, and changes during the year then ended is presented below (dollars in thousands, except per share data):

For the Year Ended March 31, 2008

	Number of Shares	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value (1)
Options Outstanding, Beginning of Year	10,773,784	\$ 31.45		
Options Granted at Fair Market Value	646,618	\$ 44.79		
Options Exercised	(3,412,574)	\$ 18.61		
Options Cancelled	(1,222,747)	\$ 48.74		
Options Outstanding, End of Year	6,785,081	\$ 36.13	2.98	\$ 17,459,776
Options Exercisable, End of Year	5,974,909	\$ 34.37	2.61	\$ 17,459,776
Shares Available for Future Stock Option Grants, End of Year	3,135,476			
Weighted-Average Fair Value of Options Granted During the Year		\$ 15.76		

(1) Aggregate intrinsic value excludes options where the exercise price exceeds fair value at March 31, 2008.

A summary of the activity of the stock option plans for the years ended March 31, 2007 and 2006 is presented below (dollars in thousands, except per share date):

	<i>For the Years Ended March 31,</i>			
	2007		2006	
	Number of Shares	Weighted- Average Exercise Price	Number of Shares	Weighted- Average Exercise Price
Options Outstanding, Beginning of Year	12,361,056	\$ 28.49	14,042,776	\$ 23.22
Options Granted at Fair Market Value	1,470,049	\$ 40.77	1,716,209	\$ 57.36
Options Exercised	(2,507,870)	\$ 25.03	(3,290,472)	\$ 20.59
Options Cancelled	(549,451)	\$ 54.65	(107,457)	\$ 42.04
Options Outstanding, End of Year	10,773,784	\$ 31.45	12,361,056	\$ 28.49
Options Exercisable, End of Year	9,475,817	\$ 28.25	10,620,005	\$ 24.57
Shares Available for Future Stock Option Grants, End of Year	2,912,055		4,035,310	
Weighted-Average Fair Value of Options Granted During the Year	\$ 20.14		\$ 22.90	

The total intrinsic value of options exercised during the years ended March 31, 2008, 2007 and 2006 was \$47.4 million, \$70.5 million and \$163.0 million, respectively.

The fair value of each option grant was estimated on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions:

	<i>For the Years Ended March 31,</i>				
	2008		2007		2006
	All Others	Directors	All Others	Directors	
Expected Volatility	33.9%	35.1%	36.7%	38.8%	41.8%

Dividend Yield	0.4%	0.4%	0.3%	0.3%	0.3%
Expected Life (Years)	4.5	5.1	4.5	5.4	4.7

Restricted Stock and Restricted Stock Units

The Company has issued restricted stock awards under the 2003 Plan and the 2001 Plan to executive officers and directors. These shares vest and become unrestricted on the vesting dates specified at the time of the award (typically three or four years, or upon a change in control, as defined in such plans). These shares have voting rights and are entitled to receive dividends at the same time and in the same amounts as other shares of Centex common stock outstanding. At March 31, 2008, there were 241,444 shares of restricted stock awards outstanding. The fair value of each restricted stock award was calculated using the closing stock price on the date of grant.

The Company also grants restricted stock units, which are converted into shares of Centex common stock at payout, to certain officers and employees under the 2003 Plan and the Long Term Incentive Plan (the LTIP Plan).

Restricted stock units represent the right to receive an equal number of shares of Centex common stock at the time the award is paid. Awards vest over a three-year or four-year period or upon a change in control, as defined in such plans, and are generally paid out upon vesting or a later date specified by the holder. At March 31, 2008, there were 864,424 restricted stock units outstanding. The fair value of each restricted stock unit was calculated using the closing stock price on the date of grant.

A summary of the status of the Company's unvested shares of restricted stock awards and restricted stock units as of March 31, 2008, and changes during the year ended March 31, 2008 is presented below:

Unvested Shares	Shares	Weighted-Average Grant-Date Fair Value
Unvested at March 31, 2007	516,140	\$ 55.47
Granted	443,417	\$ 38.19
Vested	(362,061)	\$ 54.92
Forfeited	(62,255)	\$ 50.88
Unvested at March 31, 2008	535,241	\$ 42.06

In addition, at March 31, 2008, there were 570,627 restricted stock units outstanding that had vested but had not yet been paid out because the payout date had been deferred by the holder.

As of March 31, 2008, there was \$32.1 million of total unrecognized compensation cost related to unvested share-based compensation arrangements granted under these Plans. That cost is expected to be recognized over a weighted average period of 1.7 years. The total fair value of shares vested during the years ended March 31, 2008, 2007 and 2006 was \$37.8 million, \$64.9 million and \$68.7 million, respectively.

Equity Plan Summary

The following table summarizes information about the Company's equity compensation plans, other than tax qualified plans, as of March 31, 2008:

Plan Category	Plan	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans [excluding securities reflected in column (a)]
Equity Compensation Plans	1987	1,055,222	\$ 13.13	
Approved by Stockholders	2001	2,101,728	\$ 42.60	157,055

(1) *Weighted-average exercise price excludes any items with an exercise price of \$0.*

(2) *Of the amount indicated, a total of 657,771 awards may be granted as stock awards (typically issued as restricted stock awards or restricted stock units).*

Non-Equity Long-Term Performance Units

In addition to the stock-based awards, the Company issued under the 2003 Plan to officers and employees during the first quarter of fiscal year 2008 long-term performance awards that vest after three years with an initial aggregate value of \$18.9 million. These awards will be settled in cash (and are not considered shares awarded under the 2003 Plan) and adjusted based on the Company's performance relative to its peers in earnings per share growth and return on equity, as well as changes in the Company's stock price between the date of grant and the end of the performance period. At March 31, 2008, these awards were adjusted to an aggregate value of \$8.9 million. In accordance with the provisions of SFAS 123(R), these awards are accounted for as liability awards for which compensation expense will be recognized based upon the estimated fair value of the awards over the vesting period.

The Company recognized \$3.4 million in compensation expense related to these awards during the year ended March 31, 2008.

Employee Benefit Plans

Benefits are provided to eligible employees of the Company and certain subsidiaries under the Company's benefit plans. The plans operate on a calendar year and permit both 401(k) matching contributions and profit sharing contributions. The aggregate cost of these plans to the Company was \$9.9 million in fiscal year 2008, \$11.4 million in fiscal year 2007 and \$33.9 million in fiscal year 2006. There were no profit sharing contributions made with respect to the 2007 plan year under any of these plans.

(L) DERIVATIVES AND HEDGING

The Company is exposed to the risk of interest rate fluctuations on its debt and other obligations. Financial Services enters into mandatory forward trade commitments (forward trade commitments) designated as fair value hedges to hedge the interest rate risk related to its portfolio of mortgage loans held for sale. In addition, Financial Services enters into other derivatives not designated as hedges. The following discussion summarizes the Company's derivatives used to manage the risk of interest rate fluctuations.

Fair Value Hedges

Financial Services enters into certain forward trade commitments designated as fair value hedges to hedge the interest rate risk related to its portfolio of mortgage loans held for sale. Accordingly, changes in the fair value of the forward trade commitments and the mortgage loans, for which the hedge relationship is deemed effective, are recorded as an adjustment to earnings. To the extent the hedge is effective, gains or losses in the value of the hedged loans due to interest rate movement will be offset by an equal and opposite gain or loss in the value of the forward trade commitment. This will result in no impact to earnings. To the extent the hedge contains some ineffectiveness, the ineffectiveness is recognized immediately in earnings. The amount of hedge ineffectiveness included in earnings was a loss of \$16.5 million for the year ended March 31, 2008. For the years ended March 31, 2007 and 2006, the amount of hedge ineffectiveness included in earnings was a gain of \$2.6 million and \$20.9 million, respectively.

Other Derivatives

Financial Services enters into IRLCs with its customers under which Financial Services agrees to make mortgage loans at agreed upon rates within a period of time, generally from one to 30 days, if certain conditions are met. Initially, the IRLCs are treated as derivative instruments and their fair value is recorded on the balance sheet in other assets or accrued liabilities. The fair value of these loan commitment derivatives includes future cash flows related to the associated servicing of the loan, but does not include the value of any internally-developed intangible assets. Subsequent changes in the fair value of the IRLCs are recorded as an adjustment to earnings.

To offset the interest rate risk related to its IRLCs, Financial Services executes forward trade commitments. Certain forward trade commitments are not designated as hedges and are derivative instruments. Their initial fair value is recorded on the balance sheet in other assets or accrued liabilities. Subsequent changes in the fair value of these forward trade commitments are recorded as an adjustment to earnings.

The net change in the estimated fair value of other derivatives resulted in a gain of \$4.7 million, a loss of \$1.9 million and a gain of \$1.0 million for the years ended March 31, 2008, 2007 and 2006, respectively.

From time to time, the Company may enter into other forms of derivatives to hedge changes in market values of certain assets and liabilities. The notional value of such derivatives was \$79.0 million at March 31, 2008.

(M) FAIR VALUE OF FINANCIAL INSTRUMENTS

Statement of Financial Accounting Standards No. 107, Disclosures about Fair Value of Financial Instruments, requires companies to disclose the estimated fair value of their financial instrument assets and liabilities. The estimated fair values shown below have been determined using current quoted market prices where available and, where necessary, estimates based on present value methodology suitable for each category of financial instruments. Considerable judgment is required in interpreting market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that the Company could realize in a current

market exchange. All assets and liabilities that are not considered financial instruments have been valued using historical cost accounting.

The consolidated carrying values of cash and cash equivalents, restricted cash, other receivables, accounts payable and accrued liabilities, forward trade commitments, IRLCs and short-term debt approximate their fair values. The carrying values and estimated fair values of other financial assets and liabilities were as follows:

	<i>March 31,</i>			
	2008			2007
	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial Assets				
Mortgage Loans, net	\$ 515,880	\$ 516,003 ⁽¹⁾	\$ 1,710,348	\$ 1,711,401 ⁽¹⁾
Financial Liabilities				
Centex Long-term Debt	\$ 3,321,117	\$ 2,871,378 ⁽²⁾	\$ 3,900,310	\$ 3,846,499 ⁽²⁾
Financial Services Long-term Debt	\$	\$	\$ 60,000	\$ 58,688 ⁽²⁾

(1) *Fair values are based on quoted market prices for similar instruments.*

(2) *Fair values are based on a present value discounted cash flow with the discount rate approximating current market for similar instruments.*

(N) OFF-BALANCE SHEET OBLIGATIONS

The Company enters into various off-balance sheet transactions in the normal course of business in order to facilitate certain homebuilding activities. Further discussion regarding these transactions can be found above in Note (G), Commitments and Contingencies.

(O) DISCONTINUED OPERATIONS

Over the last several fiscal years, the Company has completed the sale of its international homebuilding operations, Home Equity and Construction Services to unrelated third parties. In March 2008, the Company signed a definitive agreement to sell its home services operations, and the sale was completed in April 2008. Prior to their sale, the Company's international homebuilding operations were included in the Home Building segment, Home Equity was included in the Financial Services segment, Construction Services was a separate reporting segment and the Company's home services operations were included in the Other segment. International Home Building, Home Equity, Construction Services and the Company's home services operations were reclassified to discontinued operations in September 2005, March 2006, March 2007 and March 2008, respectively. All prior period information has been reclassified to be consistent with the March 31, 2008 presentation. A brief summary of each transaction is provided below. For a discussion of the sale of the Company's home services operations, please refer to Note (P), Subsequent Events.

International Home Building

In September 2005, the Company sold its international homebuilding operations. The sales price was based on international homebuilding operations' net assets as defined in the sale and purchase agreement. In December 2005, the sales price was adjusted based upon international homebuilding operations' net asset value, as defined as of the closing date. Total cash proceeds received in the sale were \$318.7 million. Net proceeds received on the disposition of the international homebuilding operations may be adjusted based upon the filing and review of its statutory tax return. Additionally, the Company has indemnified the purchaser for certain contingencies. The Company does not believe such contingencies would be material to the Company's results of operations or financial position. The net loss on sale of these operations is summarized below:

	<i>For the Year ended March 31, 2006</i>
Sales Proceeds	\$ 318,717
Assets Sold	(632,956)
Liabilities Assumed by Buyer	118,951
Long-term Debt Assumed by Buyer	153,434
Cumulative Foreign Currency Gain	48,354
Pre-tax Gain on Sale	6,500
Income Tax Expense	(15,660)
Net Loss on Sale	\$ (9,160)

Home Equity

On July 11, 2006, the Company sold Home Equity and received \$518.5 million in cash, net of related expenses and as adjusted for the settlement of post-closing adjustments. In connection with the sale, all intercompany accounts with Home Equity were repaid and settled. As a result of the sale, Home Equity is no longer a subsidiary of Centex Corporation and has changed its name to Nationstar Mortgage, LLC. The purchase price was based on the book value of Home Equity, plus a premium calculated in accordance with agreed upon formulas and procedures.

Additionally, the Company has agreed to indemnify the purchaser of Home Equity for certain contingencies. The Company does not believe such contingencies, if paid, will be material to the Company's results of operations or financial position. The net gain on sale recorded in connection with the sale of Home Equity, including post-closing adjustments recognized subsequent to December 31, 2006, is summarized below:

	<i>For the Year ended March 31, 2007</i>
Sales and Related Proceeds, net of Related Expenses	\$ 518,500
Assets Sold	(400,706)
Intercompany Liability Paid by Buyer	(11,795)
Deferred Income	(6,100)
Hedging Gain	25,466
Pre-tax Gain on Sale	125,365
Income Tax Expense	(50,390)

Net Gain on Sale \$ 74,975

Construction Services

On March 30, 2007, the Company sold Construction Services and received \$344.8 million in cash, net of related expenses and as adjusted for the estimated settlement of post-closing adjustments. In connection with the sale, all intercompany accounts with Construction Services were repaid and settled. As a result of the sale, Construction Services is no longer a subsidiary of Centex Corporation and has changed its name to Balfour Beatty Construction Group, Inc.

The Company will also receive an aggregate of \$60.0 million in cash to be paid in annual installments of \$4.0 million over a 15-year period (the *Additional Payments*). The *Additional Payments* will be made in connection with an election with respect to the tax treatment of the transaction pursuant to Section 338(h)(10) of the Internal Revenue Code of 1986, as amended (the *Internal Revenue Code*). If the *Internal Revenue Code* is amended so that the purchaser is no longer entitled to the benefits of the Section 338(h)(10) election, the amount of the *Additional Payments* will be subject to change to ensure that any subsequent payments to be made by the purchaser do not exceed 50% of the tax benefits to be realized by it thereafter as a result of such election. The *Additional Payments* are an unsecured receivable from the purchaser that was not recorded in connection with the sale of *Construction Services*. As the *Additional Payments* are received in future periods, the amounts will be reflected in the *Statements of Consolidated Earnings*. In March 2008, the Company received a \$4.0 million installment of the *Additional Payment* which is reflected in earnings from discontinued operations.

The stock purchase agreement provided for a post-closing adjustment, which was intended to reflect a final calculation of, among other things, the final stockholder's equity balance of *Construction Services* immediately prior to its sale. In connection with the sale, *Construction Services* was required to pay a dividend to Centex Corporation equal to its stockholder's equity. The effect of the post-closing adjustment was estimated in the Company's calculation of the gain on sale of *Construction Services* for the year ended March 31, 2007, but was subject to change. During fiscal year 2008, the amount of the post-closing adjustment was determined, which resulted in an additional \$4.3 million pre-tax gain on sale. A summary of the Company's calculation of the gain on sale of *Construction Services* is below:

	<i>For the Years Ended March</i>	
	31,	
	2008	2007
Sales and Related Proceeds, net of Related Expenses	\$ 8,341	\$ 344,752
Assets Sold		
Pre-tax Gain on Sale	8,341	344,752
Income Tax Expense	(3,224)	(131,695)
Net Gain on Sale	\$ 5,117	\$ 213,057

Summarized Financial Information

Earnings from discontinued operations include: the financial information for entities included in discontinued operations, the gains (losses) on the sale of such entities, intercompany eliminations between entities in discontinued operations and entities in continuing operations, and certain general and administrative expenses incurred in the sale of such entities. The following table provides summarized balance sheets for entities included in discontinued operations:

	<i>As of March 31,</i>	
	2008	2007

(3) *Includes Construction Services, Home Equity, International Home Building and home services operations.*

Significant Accounting Policies Related to Discontinued Operations

Revenue Recognition Construction Services

Long-term construction contract revenues were recognized on the percentage-of-completion method based on the costs incurred relative to total estimated costs. Full provision was made for any anticipated losses. Billings for long-term construction contracts were rendered monthly, including the amount of retainage withheld by the customer until contract completion. As a general contractor, the Company withholds similar retainages from each subcontractor.

Claims related to long-term construction contracts were recognized as revenue only after management had determined that the collection was probable and the amount could be reliably estimated. There were no claims included in revenues for the fiscal years ended March 31, 2007 and 2006.

(P) Subsequent Events (Unaudited)

In March 2008, the Company signed a definitive agreement to sell its home services operations to a third party, and the sale was completed in April 2008. The Company received \$134.6 million in cash, which is subject to post-closing

adjustments. The Company estimates the pre-tax gain on the sale of its home services operations will be approximately \$40 million.

On May 7, 2008, S&P lowered the Company's debt rating from BB+ to BB. This downgrade triggered a provision in CTX Mortgage Company, LLC's \$450 million committed bank warehouse credit facility which allows the bank to convert the facility to an amortizing loan based on the ultimate sale of the underlying collateral and not to purchase any additional mortgage loans. On May 9, 2008, CTX Mortgage Company, LLC executed an amendment to the bank warehouse credit facility which lowered the commitment to \$375 million, reset the debt ratings trigger that provides the bank the option to convert the facility to an amortizing loan if the Company's credit rating falls below BB by S&P and Fitch or below Ba2 by Moody's. A further downgrade in the Company's credit rating by a rating agency could result in the wind-down of the \$375 million warehouse credit facility. The rating change by S&P is not currently anticipated to have a material adverse impact on the Company's ability to access the capital it needs to fund its operations.

In May 2008, the Company issued to officers and employees 1,628,220 stock options under the 2003 Plan and the 2001 Plan (having an aggregate fair value of \$12,879,220), 363,600 restricted stock units under the 2003 Plan and the LTIP Plan (having an aggregate fair value of \$8,028,288), and long-term performance units having an aggregate fair value of \$28,383,515.

**Report of Independent Registered Public Accounting Firm
TO THE BOARD OF DIRECTORS AND SHAREHOLDERS OF CENTEX CORPORATION AND
SUBSIDIARIES:**

We have audited the accompanying consolidated balance sheets of Centex Corporation and subsidiaries (Centex Corporation) as of March 31, 2008 and 2007, and the related consolidated statements of earnings, stockholders' equity and cash flows for each of the three years in the period ended March 31, 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Centex Corporation and subsidiaries at March 31, 2008 and 2007, and the consolidated results of their operations and their cash flows for each of the three years in the period ended March 31, 2008, in conformity with U.S. generally accepted accounting principles.

As discussed in Note A to the consolidated financial statements, the Company adopted the provisions of Statement of Financial Accounting Standard No. 123(R), Statement of Financial Accounting Standard No. 48, and Staff Accounting Bulletin 109 effective January 1, 2006; April 1, 2007; and January 1, 2008 respectively.

Our audits were conducted for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The consolidating details appearing in conjunction with the consolidated balance sheet and cash flow statement of Centex Corporation are presented for purposes of additional analysis and are not a required part of the basic consolidated financial statements. Such information has been subjected to the auditing procedures applied in our audits of the basic consolidated financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic consolidated financial statements taken as a whole.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Centex Corporation's internal control over financial reporting as of March 31, 2008, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated May 21, 2008 expressed an unqualified opinion thereon.

Dallas, Texas

May 21, 2008

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of March 31, 2008 based on the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in Internal Control – Integrated Framework, our management concluded that our internal control over financial reporting was effective as of March 31, 2008.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The independent registered public accounting firm that audited the Company's consolidated financial statements, Ernst & Young LLP, has issued an audit report on the Company's internal control over financial reporting. This report appears on page 104 of this Report.

**Report of Independent Registered Public Accounting Firm
TO THE BOARD OF DIRECTORS AND SHAREHOLDERS OF CENTEX CORPORATION AND
SUBSIDIARIES**

We have audited Centex Corporation and subsidiaries (Centex Corporation's) internal control over financial reporting as of March 31, 2008, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Centex Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Centex Corporation maintained, in all material respects, effective internal control over financial reporting as of March 31, 2008, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the 2008 consolidated financial statements of Centex Corporation and subsidiaries and our report dated May 21, 2008 expressed an unqualified opinion thereon.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

An evaluation has been performed under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2008. Based on that evaluation, our management, including our Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective as of March 31, 2008. There has been no change in our internal controls over financial reporting during the quarter ended March 31, 2008 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

For management's and the independent registered public accounting firm's reports on internal controls over financial reporting, see the financial statements and supplementary data to this Report.

ITEM 9B. OTHER INFORMATION

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The sections of our Proxy Statement for our Annual Meeting to be held on July 10, 2008, which we refer to as the 2008 Proxy Statement, captioned "Part Two Corporate Governance Information, Board of Directors and Board Committees and Director Nomination Process" and "Part Three Proposals to be Voted on at the 2008 Annual Meeting, Proposal No. 1 Election of Directors," identify the members of the Board of Directors of the Company and nominees, and identify members of the Audit Committee of the Board of Directors and audit committee financial experts, and are incorporated in this Item 10 by reference. Information about the executive officers of the Company is contained in Item 4A of Part I of this Report and is incorporated herein by reference.

The section of the 2008 Proxy Statement captioned "Part Four Other Important Information, Other Matters Section 16(a) Beneficial Ownership Reporting Compliance and Stockholder Proposals" is incorporated in this Item 10 by reference.

The policies comprising our code of conduct are set forth in the Company's code of ethics manual, "The Centex Way: A Guide to Decision-Making on Business Conduct Issues." These policies satisfy the SEC's requirements for a code of ethics, and apply to all directors, officers and employees. The code of ethics manual is published on the corporate governance section of the Company's web site at <http://www.centex.com>. The Board will not permit any waiver of any ethics policy for any director or executive officer.

ITEM 11. EXECUTIVE COMPENSATION

The information in the sections of the 2008 Proxy Statement captioned "Part Two Corporate Governance Information, Board of Directors and Board Committees and Other Governance Matters" and "Part Four Other Important Information, Executive Compensation and Board Compensation" is incorporated in this Item 11 by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information in the section of the 2008 Proxy Statement captioned Part Four Other Important Information, Stock Ownership is incorporated in this Item 12 by reference. PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

The following documents are filed as part of this Report:

1. Financial Statements

The consolidated balance sheets of Centex Corporation and subsidiaries as of March 31, 2008 and 2007, and the related consolidated statements of earnings, stockholders equity and cash flows for each of the three years in the period ended March 31, 2008, together with the accompanying Notes to Consolidated Financial Statements and the Reports of Independent Registered Public Accounting Firm of this Report.

2. Schedules

Schedules are omitted because they are not applicable or not required or the information required to be set forth therein is included in the consolidated financial statements referenced above in section (1) of this Item 15.

3. Exhibits

The information on exhibits required by this Item 15 is set forth in the Index to Exhibits of this Report.
