Item 2.02. Results of Operations and Financial Condition.

On April 30, 2007, Wright Medical Group, Inc. issued a press release announcing its consolidated financial results for the quarter ended March 31, 2007. A copy of the press release is furnished as Exhibit 99 to this report.

The attached press release includes the following non-GAAP measures: operating income, as adjusted; net income, as adjusted; net income, as adjusted, per diluted share; and effective tax rate, as adjusted.

These non-GAAP measures are not in accordance with, or an alternative for, generally accepted accounting principles and may be different from non-GAAP measures used by other companies. In addition, these non-GAAP measures are not based on any comprehensive set of accounting rules or principles. We believe that non-GAAP measures have limitations in that they do not reflect all of the amounts associated with our results of operations as determined in accordance with GAAP and that these measures should only be used to evaluate our results of operations in conjunction with the corresponding GAAP measures.

For our internal budgeting and resource allocation process, our management uses financial information that does not include non-cash stock-based compensation expenses and the income tax effects of non-cash stock-based compensation expenses. We use these non-GAAP financial measures in making operating decisions because we believe the measures provide meaningful supplemental information regarding our core operational performance and give us a better understanding of how we should invest in research and development activities and how we should allocate resources to both ongoing and prospective business initiatives. We use these measures to help make budgeting and spending decisions, for example, as between product development expenses and research and development, sales and marketing and general and administrative expenses. Additionally, management is evaluated on the basis of these non-GAAP financial measures when determining achievement of their incentive performance compensation targets. Further, these non-GAAP financial measures facilitate management's internal comparisons to both our historical operating results and to our competitors' operating results.

As described above, we exclude the following items from one or more of our non-GAAP measures:

Non-cash stock-based compensation expense. We exclude stock-based compensation expenses from our non-GAAP measures primarily because they are non-cash expenses. We believe that it is useful to investors to understand the application of SFAS 123R and its impact on our operational performance, liquidity, and our ability to invest in R&D and fund acquisitions and capital expenditures. While stock-based compensation expense calculated in accordance with SFAS 123R constitutes an ongoing and recurring expense, such expense is excluded from our non-GAAP results because it is not an expense that requires cash settlement and is not used by management to assess the core profitability of our business operations. We further believe these measures are useful to investors in that they allow for greater transparency to certain line items in our financial statements. In addition, excluding this item from our non-GAAP results facilitates comparisons to our competitors' operating results.

Income tax effects of the foregoing. This amount is used to present non-cash stock-based compensation expense on an after-tax basis consistent with the presentation of net income, as adjusted.

We believe that non-GAAP measures have limitations in that they do not reflect all of the amounts associated with our financial results as determined in accordance with GAAP and that these measures should only be used to evaluate our financial results in conjunction with the corresponding GAAP measures, and that is why we qualify the use of non-GAAP financial information in a statement when non-GAAP information is presented.

We further believe that where the adjustments used in calculating net income, as adjusted, and net income, as adjusted, per diluted share are based on specific, identified amounts that impact different line items in the Condensed Consolidated Statements of Operations (including operating income and net income), that it is useful to investors to understand how these specific line items in the Condensed Consolidated Statements of Operations are affected by these adjustments for the following reasons:

Operating income. Excluding non-cash stock-based compensation expense from the calculation of operating income assists investors in evaluating period-over-period changes without giving effect to these charges which are non-cash in nature, in order to evaluate the results of the underlying operating activities for the periods presented.

Net Income. Excluding non-cash stock-based compensation expense from the calculation of net income assists investors in evaluating period-over-period changes without giving effect to these charges which are non-cash in nature, in order to evaluate the results of the underlying operating activities for the periods presented.

Effective Tax Rate. Excluding the income tax effect of the non-GAAP, pre-tax adjustments from the provision for income taxes assists investors in understanding the tax provision associated with those adjustments and our effective tax rate related to our ongoing operations.

Item 9.01. Financial Statements and Exhibits.
