### Results of Operations

Three and Six Months Ended December 31, 2004 versus Three and Six Months Ended December 31, 2003

We incurred a net loss of \$612,652 for the three months ended December 31, 2004, as compared to a net loss of \$501,952 for the three months ended December 31, 2003 due to the following:

For the three months ended December 31, 2004, the Company incurred total research and development costs of \$222,855 compared to \$216,814 for the three months ended December 31, 2003. Research and development expenses consist of engineering and project management salaries; consulting expenses, prototype equipment costs and travel related expenses. All expenses incurred during the research and development stage are expensed as incurred.

General and administrative increased approximately 63 percent, from \$234,925 for the three months ended December 31, 2003, to \$383,778 for the three months ended December 31, 2004. General and administrative costs incurred in the Sarasota, Florida and Seattle, Washington operations consist mainly of salaries, travel and professional fees related to the development of our new business opportunities.

Stock based compensation for the three months ended December 31, 2004 decreased from \$71,250 for the three months ended December 31, 2003 to \$49,000 for the three months ended December 31, 2004.

For the three months ended December 31 2004, our Costa Rican operations generated revenues of \$10,009 and operating expenses of \$12,431, resulting in an operating loss of \$2,422.

The net loss of \$1,176,665 for the six months ended December 31, 2004 is comparable to the net loss of \$1,152,445 for the six months ended December 31, 2003. Overall general and administrative expenses increased while stock based legal and consulting fees decreased.

For the six months ended December 31, 2004, the Company incurred total research and development costs of \$418,992 compared to \$321,470 for the six months ended December 31, 2003. Research and development expenses consist of engineering and project management salaries; consulting expenses, prototype equipment costs and travel related expenses. All expenses incurred during the research and development stage are expensed as incurred.

General and administrative increased approximately 58 percent, from \$433,106 for the six months ended December 31, 2003, to \$686,472 for the six months ended December 31, 2004. General and administrative costs incurred in the Sarasota, Florida and Seattle, Washington operations consist mainly of salaries, travel and professional fees related to the development of our new business opportunities.

Stock based compensation for the six months ended December 31, 2004 decreased 63.85% from \$408,750 for the three months ended December 31, 2003 to \$147,900 for the three months ended December 31, 2004.

For the six months ended December 31 2004, our Costa Rican operations generated revenues of \$17,625 and operating expenses of \$29,598, resulting in an operating loss of \$11,973.

### Liquidity and Capital Resources

We have current assets of \$68,415 (including \$21,119 in cash) compared with current liabilities of \$1,528,651, resulting in a working capital deficit of \$1,460,236 as of December 31, 2004. Our auditors have questioned our ability

to continue as a going concern in our June 30, 2004 annual audited financial statements due to our significant operating losses incurred since inception and our working capital deficit. We rely on loans and private sales of equity to maintain liquidity. Our capital resources include private stock sales and cash advances from principal shareholders.

Our cash balance decreased \$1,593 from \$22,712 at June 30, 2004 to \$21,119 as of December 31, 2004. The decrease was the result of a combination of cash proceeds from note payable, shareholder loans and common stock sales totaling \$567,965, offset by cash used for the purchase of equipment of \$27,237 and negative cash flows from operations of \$542,321. Negative cash flows from operations consisted primarily of our \$1,176,665 net loss, offset by stock-based compensation of \$147,900, and an increase in accounts payable and accruals of \$451,490.

Until we establish profitable operations, our sources of liquidity will continue to be shareholder loans and common stock sales. Our internet service provider operations incurred a net loss of approximately \$44,000 during the six months ended December 31, 2004 and are not expected to provide operating cash in the foreseeable future.

The Company's future success will be dependent upon its ability to create and provide effective and competitive automatic vehicle location services and the Company's ability to develop and provide new services that meet customers changing requirements; including the effective use of leading technologies to continue to enhance its current services and to influence and respond to emerging industry standards and other technological changes on a timely and cost-effective basis. There can be no assurance that we will achieve these goals.

On October 15, 2004, the Board of Directors approved the issuance of convertible debentures to an officer, three directors and the Company's outside counsel to convert amounts owed to them into common stock at the market price of \$0.10 and \$0.08 when the debenture was approved. The debentures are convertible at the option of the officer, director or outside counsel. The total debt that may be converted is \$709,798. If all the debt is converted, an additional 8,066,582 shares would be issued.

### ITEM 3. CONTROLS AND PROCEDURES

Gary Brown, Chief Executive Officer and Daniel J. Sullivan, Chief Financial Officer of the Company have established and are currently maintaining disclosure controls and procedures for the Company. The disclosure controls and procedures have been designed to ensure that material information relating to the Company is made known to them as soon as it is known by others within the Company.

Our Chief Executive Officer and Chief Financial Officer conduct an update and a review and evaluation of the effectiveness of the Company's disclosure controls and procedures and have concluded, based on their evaluation conducted within the past 30 days, that there is need to improve our disclosure controls and procedures and their effectiveness for gathering, analyzing and disclosing the information we are required to disclose in our reports filed under the Securities Exchange Act of 1934. Recent experience has evidenced a lack of timeliness in gathering and communicating information which has resulted in the Company's failure to file its Reports in a timely fashion. It is also believed that this lack of timeliness has increased the risk that material information and appropriate disclosures may be overlooked. The Company plans to implement reforms to its controls and procedures to remedy these shortcomings, which we believe have primarily been the result of a lack of working capital to support additional human resources dedicated to implementing and maintaining adequate controls and procedures to ensure timely and accurate financial reporting.
