Item 2.02. Results of Operations and Financial Condition

Pioneer Natural Resources Company ("Pioneer" or the "Company") presents in this Item 2.02 certain information regarding the quarter ended June 30, 2018 and certain other information.

For the second quarter of 2018, the Company's average realized prices for oil, natural gas liquids (NGLs) and gas sales volumes were \$61.20 per barrel (BBL), \$28.83 per BBL and \$1.97 per thousand cubic feet (MCF), respectively. Including the effects of commodity price derivatives, average prices for oil, NGLs and gas were \$52.92 per BBL, \$28.83 per BBL and \$1.99 per MCF, respectively.

During the second quarter of 2018, the Company transported approximately 165 thousand barrels of oil per day (MBOPD) to the Gulf Coast where it was sold into either the Gulf Coast refinery market or exported to international refinery markets. Associated with these activities, the Company recognized a \$69 million pre-tax cash flow benefit in the second quarter of 2018 compared to a \$16 million benefit in the first quarter of 2018. The cash flow uplift during the second quarter was approximately \$4.60 per BBL on the oil volumes transported to the Gulf Coast (approximately 165 MBOPD).

The Company contracts for its Gulf Coast refinery and export sales in advance of expected deliveries by approximately two months. As a result, sales prices reflect the oil price differential between West Texas Intermediate and Brent prices in effect two months prior to delivery. Based on wider differentials during May, June and July 2018, the Company expects its cash flow uplift during the third quarter of 2018 to be significantly higher than during the second quarter of 2018.
