Forward-Looking Statements

This report contains certain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements relate to, among other things, the operating performance of our investments and financing needs. We use words such as "anticipates," "expects," "believes," "intends," "should," "will," "may" and similar expressions to identify forward-looking statements, although not all forward-looking statements include these words. Forward-looking statements are based on certain assumptions, discuss future expectations, describe future plans and strategies, contain projections of results of operations or of financial condition or state other forward-looking information. Our ability to predict results or the actual effect of future plans or strategies is inherently uncertain. These forward-looking statements involve risks, uncertainties and other factors that may cause our actual results in future periods to differ materially from forecasted results. Factors that could have a material adverse effect on our operations and future prospects include, but are not limited to, changes in economic conditions generally and the real estate market specifically; adverse changes in the financing markets we access affecting our ability to finance our loan and investment portfolio; adverse changes in our status with government-sponsored enterprises affecting our ability to originate loans through such programs; changes in interest rates; the quality and size of the investment pipeline and the rate at which we can invest our cash; impairments in the value of the collateral underlying our loans and investments; changes in federal and state laws and regulations, including changes in tax laws; the availability and cost of capital for future investments; and competition. Readers are cautioned not to place undue reliance on any of these forward-looking statements, which reflect management's views as of the date of this report. The factors noted above could cause our actual results to differ significantly from those contained in any forward-looking statement. For a discussion of our critical accounting policies, see "Management's Discussion and Analysis of Financial Condition and Results of Operations of Arbor Realty Trust, Inc. and Subsidiaries Significant Accounting Estimates and Critical Accounting Policies" under Item 7 of this report.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. We are under no duty to update any of the forward-looking statements after the date of this report to conform these statements to actual results.

PART I

Item 1. Business

In this Annual Report on Form 10-K we refer to Arbor Realty Trust, Inc. and subsidiaries as "we," "us," "our," or the "Company" unless we specifically state otherwise or the context indicates otherwise.

Overview

Arbor Realty Trust, Inc. is a Maryland corporation formed in 2003 and is externally managed and advised by Arbor Commercial Mortgage, LLC ("ACM" or our "Manager"), pursuant to the terms of a management agreement described below. We invest in a diversified portfolio of structured finance assets in the multifamily and commercial real estate markets, primarily consisting of bridge and mezzanine loans, including junior participating interests in first mortgages, preferred and direct equity. In addition, we may also directly acquire real property and invest in real estate-related notes and certain mortgage-related securities. We refer to this platform as our Structured Loan Origination and Investment Business, or "Structured Business." As a result of the acquisition of the agency platform of our Manager on July 14, 2016 (the "Acquisition"), we also now originate, sell and service a range of multifamily finance products through the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac," and together with Fannie Mae, the government-sponsored enterprises, or the "GSEs"), the Government National Mortgage Association ("Ginnie Mae"), Federal Housing Authority ("FHA") and the U.S. Department of Housing and Urban Development (together with Ginnie Mae and FHA, "HUD") and the conduit/commercial mortgage-backed securities ("CMBS") programs. We retain the servicing rights and asset management responsibilities on substantially all loans we originate and sell under the GSE and HUD programs. We are an approved Fannie Mae Delegated Underwriting and Servicing ("DUS") lender nationally, a Freddie Mac Multifamily Conventional Loan lender, seller/servicer, in New York, New Jersey and Connecticut, a Freddie Mac affordable, manufactured housing, senior housing and small balance loan ("SBL") lender, seller/servicer, nationally and a HUD MAP and LEAN senior housing/healthcare lender nationally. We refer to this platform as our Agency Loan Origination and Servicing Business, or "Agency Business." See Acquisition of Our Manager's Agency Platform below for further details about the Acquisition.

Substantially all of our operations are conducted through our operating partnership, Arbor Realty Limited Partnership ("ARLP"), for which we serve as the general partner, and ARLP's subsidiaries.

We are organized to qualify as a real estate investment trust ("REIT") for U.S. federal income tax purposes. A REIT is generally not subject to federal income tax on that portion of its REIT taxable income that is distributed to its stockholders, provided that at least 90% of taxable income is distributed and provided that certain other requirements are met. Certain of our assets that produce non-qualifying income, primarily within the Agency Business, are operated through taxable REIT subsidiaries ("TRS"), which is part of our TRS consolidated group (the "TRS Consolidated Group") and is subject to U.S. federal, state and local income taxes. In general, our TRS entities may hold assets that the REIT cannot hold directly and may engage in real estate or non-real estate-related business.

Acquisition of Our Manager's Agency Platform

On July 14, 2016 we completed the Acquisition for an aggregate purchase price of \$275.8 million, which was paid with \$138.0 million in stock, \$87.8 million in cash and with the issuance of a \$50.0 million seller financing instrument. The closing price of our common stock on the Acquisition date was \$7.29 per share; therefore, the estimated fair value of the total consideration given to our Manager approximated \$292.5 million. As a result of the Acquisition, we now evaluate our results of operations based on two business segments: Structured Business and Agency Business. See

Table of Contents

Note 3 Acquisition of Our Manager's Agency Platform and Note 22 Segment Information for additional details of the Acquisition and segments.

Business Objectives and Strategy

Our principle business objectives are to maximize the difference between the yield on our investments and the cost of financing these investments, and to grow our agency platform and the stable earnings associated with our servicing portfolio, to generate cash available for distribution and facilitate capital appreciation. We believe we can achieve these objectives and maximize the total return to our stockholders through the investment strategies described below:

Investment Strategy

The financing of multifamily and commercial real estate offers opportunities that demand customized financing solutions. We believe that providing both structured products and agency loans through direct originations and in-house underwriting capabilities throughout our national network of sales offices and lending solutions through various GSE and HUD programs provides us with a competitive advantage, since this allows us to meet the multiple needs of our borrowers through a fully integrated comprehensive product offering. We employ the following investment strategies:

Provide Customized Financing. We provide customized financing to meet the needs of our borrowers. We target borrowers whose options may be limited by conventional bank financing, have demonstrated a history of enhancing the value of the properties they operate and who may benefit from the customized financing solutions we offer.

Execute Transactions Rapidly. We act quickly and decisively on proposals, provide commitments and close transactions within a few weeks and sometimes days, if required. We believe that rapid execution attracts opportunities from both borrowers and other lenders that would not otherwise be available. We believe our ability to structure flexible terms and close loans in a timely manner gives us a competitive advantage.

Manage Credit Quality. A critical component of our strategy is our ability to manage the real estate risk associated with our investment portfolio. We actively manage the credit quality of our portfolio by using the expertise of our asset management group, which has a proven track record of structuring and repositioning finance investments to improve credit quality and yield.

Use Our Relationships with Existing Borrowers. We capitalize on our reputation in the commercial real estate finance industry. We have relationships with a large borrower base nationwide. Since our originators offer a wide range of customized financing solutions, we are able to benefit from the existing customer base and use existing business as means of potential refinancing opportunities.

Long-Established Relationships with GSE's. Our Agency Business benefits from our long-established relationships with Fannie Mae, Freddie Mac, HUD and Ginnie Mae enabling us to offer a broad range of loan products and services which maximizes our ability to meet our borrowers' needs.

Leverage the Experience of Executive Officers, Our Manager and Our Employees. Our executive officers and employees, and those of our Manager, have extensive experience originating and managing structured commercial real estate investments. Our senior management team has, on average, over 20 years of experience in the financial services industry.

Table of Contents

Our Primary Targeted Investments

We pursue short-term and long-term lending and investment opportunities and primarily target transactions where we believe we have competitive advantages, particularly our lower cost structure and in-house underwriting capabilities.

Through our Structured Business, we focus primarily on the following investment types:

Bridge Financing. We offer bridge financing products to borrowers who are typically seeking short-term capital to use in an acquisition of property. The borrower has usually identified an undervalued asset that has been under managed and/or is located in a recovering market. From the borrower's perspective, shorter term bridge financing is advantageous because it allows for time to improve the property value without encumbering it with restrictive, long-term debt that may not reflect optimal leverage for a non-stabilized property.

Our bridge loans typically range in size from \$5 million to \$30 million, have an interest rate range typically between 5% to 6% over 30-day LIBOR, have terms of up to five years and are predominantly secured by first mortgage liens on the property. Additional yield enhancements may include origination fees, deferred interest, yield look-backs, and participating interests, which are equity interests in the borrower that share in a percentage of the underlying cash flows of the property. Borrowers typically use the proceeds of a conventional mortgage to repay a bridge loan.

Mezzanine Financing. We offer mezzanine financing in the form of loans that are subordinate to a conventional first mortgage loan and senior to the borrower's equity in a transaction. Mezzanine financing may take the form of loans secured by pledges of ownership interests in entities that directly or indirectly control the real property or subordinated loans secured by second mortgage liens on the property. We may also require additional security such as personal guarantees, letters of credit and/or additional collateral unrelated to the property.

Our mezzanine loans typically range in size from \$1 million to \$10 million, have an interest rate range typically between 12% to 14% and have terms of up to ten years. Similar to our bridge loans, the yield on these investments may be enhanced by prepaid and deferred interest payments, yield look-backs and participating interests. We hold a majority of our mezzanine loans through subsidiaries of our operating partnership that are pass-through entities for tax purposes.

Junior Participation Financing. We offer junior participation financing in the form of a junior participating interest in the senior debt. Junior participation financings have the same obligations, collateral and borrower as the senior debt. The junior participation interest is subordinated to the senior debt by virtue of a contractual agreement between the senior debt lender and the junior participating interest lender.

Our junior participation loans typically range in size from \$1 million to \$10 million, have an interest rate range typically between 12% to 14% and have terms of up to ten years. Similar to our bridge loans, the yield on these investments may be enhanced by prepaid and deferred interest payments, yield look-backs and participating interests.

Preferred Equity Investments. We provide financing by making preferred equity investments in entities that directly or indirectly own real property. In cases where the terms of a first mortgage prohibit additional liens on the ownership entity, investments structured as preferred equity in the entity owning the property serve as viable financing substitutes. With preferred equity investments, we typically become a member in the ownership entity.

Our preferred equity investments typically range in size from \$1 million to \$10 million, have an interest rate range typically between 12% to 14% and have terms of up to ten years. Similar to our bridge loans, the yield on these investments may be enhanced by prepaid and deferred interest payments, yield look-backs and participating interests.

Table of Contents

Structured Transactions. We also periodically invest in structured transactions, which are primarily comprised of joint ventures formed to acquire, develop and/or sell real estate related assets. These joint ventures are generally not majority owned or controlled by us and are primarily accounted for under the equity method of accounting.

Through our Agency Business, we focus primarily on the following investment types:

GSE and HUD Agency Lending. We are one of 25 approved lenders that participate in Fannie Mae's DUS program and one of 22 lenders approved as a Freddie Mac Multifamily Conventional Loan lender for multifamily, manufactured, student, affordable and certain seniors housing properties, one of 11 participants in the Freddie Mac SBL program and an approved HUD MAP and LEAN lender providing construction permanent loans to developers and owners of multifamily housing, affordable housing, seniors housing and healthcare facilities. Our Agency Business underwrites, originates, sells and services multifamily mortgage loans across the U.S. through these programs and also originates and sells loans through the conduit markets. Our focus is primarily on small balance loans with an average loan size of approximately \$5.0 million. We retain the servicing rights and asset management responsibilities on substantially all loans made under the GSE programs.

Other Investment Opportunities

Real Property. We have, and may in the future, obtain real estate by foreclosure, through partial or full settlement of mortgage debt related to our loans, or as an investment opportunity. We may identify such assets and initiate an asset-specific plan to maximize the value of the investment, which can include appointing a third party property manager, renovation of the property, leasing or increasing the occupancy, or selling the asset. As such, these transactions may require the use of additional capital prior to the completion of the specific plan. In situations where we purchase real property as an investment opportunity, we typically analyze these transactions with the expectation that we will have the ability to sell the property within a one to three year time period for a significant return on invested capital.

(1)

"Weighted Average Pay Rate" is a weighted average, based on the unpaid principal balances of each loan in the portfolio, of our interest rate required to be paid monthly as stated in the individual loan agreements. Certain loans and investments that require an additional rate of interest "Accrual Rate" to be paid at maturity are not included in the weighted average pay rate as shown in the table.

The following tables set forth geographic and asset class information for our loan and investment portfolio as of December 31, 2016:

Geographic Location	Unpaid Principal	Percentage	Asset Class	Unpaid Principal	Percentage
New York	\$ 452,013,408	25.2%	Multifamily	\$ 1,421,731,108	79.4%

Total	\$ 1,790,159,966	100.0%
-------	------------------	--------

(1)

No other individual state represented more than 4% of the total.

The overall yield on our loan and investment portfolio in 2016 was 6.38% on average assets of \$1.70 billion. This yield was computed by dividing the interest income earned during 2016 by the

Table of Contents

average assets during 2016. Our cost of funds in 2016 was 4.37% on average borrowings of \$1.32 billion. This cost of funds was computed by dividing the interest expense incurred during 2016 by the average borrowings during 2016.

We also own unconsolidated investments in equity affiliates totaling \$33.9 million, which consists primarily of a joint venture with our Manager formed to invest in a residential mortgage banking business.

Agency Business Lending and Servicing Overview

One of the Agency Business's primary sources of revenue is the gains and fees we recognize from the origination and sale of mortgage loans under the GSE programs. Loans originated under the GSE programs are generally sold within 60 days from the loan origination date. Our loan activity in 2016 (from the July 14, 2016 Acquisition date) was comprised of originations totaling \$2.15 billion and sales totaling \$1.49 billion, excluding \$418.2 million of sales on loans acquired as part of the Acquisition. Our gains and fees as a percentage of our loan sales volume or "sales margin," was 165 basis points for 2016.

The following tables set forth a summary of our servicing portfolio for the Agency Business by product and by geographic area as of December 31, 2016:

Product	Product Concentrations		Wtd. Avg. Servicing Fee Rate (basis points)	Percent of Total	Geographic Concentrations	
	Loan Count	UPB			State	UPB Percent of Total
Fannie Mae	2,114	\$ 11,181,152,400	53	83%	Texas	24%
					North	
Freddie Mac	635	1,953,244,541	22	14%	Carolina	9%
FHA	78	420,688,577	18	3%	California	8%
Total	2,827	\$ 13,555,085,518	48	100%	New York	8%
					Georgia	5%
					Florida	4%
					Other(1)	42%
					Total	100%

(1) No other individual state represented more than 4% of the total.

Management Agreement

Pursuant to the management agreement, our Manager employs certain of our executive officers and other staff who provide us with a variety of advisory and professional services vital to our operations, including Structured Business underwriting, accounting and treasury, compliance, marketing, information technology and human resources. The management agreement requires our Manager to provide a dedicated management team to perform these services, the members of which will devote as much of their time to our management as our independent directors reasonably deem necessary and appropriate, commensurate with our level of activity from time to time. The management agreement requires our Manager to provide such services in conformity with policies and investment guidelines that are approved and monitored by our Board of Directors. For performing the services under the management agreement, our Manager is eligible to receive a base management fee, incentive compensation and "success-based" compensation as described in Note 20 Agreements and Transactions with Related Parties. The management agreement was amended in connection with the Acquisition and we now have an option, expiring in July 2018, to purchase the existing management

Table of Contents

agreement and fully internalize our management structure for \$25.0 million (increasing to \$27.0 million after July 2017).

Operations

Prior to the Acquisition, our Manager was responsible for sourcing originations, providing underwriting services, processing approvals for all loans and other investments in our portfolio, as well as providing us with certain administrative loan servicing functions. As a result of the Acquisition, these services and employees associated with these services are now in-house. The following describes our lending and investment process for both our Structured Business and Agency Business.

Origination. We have a network of sales offices in California, Massachusetts, New Jersey, New York, Ohio, Oklahoma and Texas that staff approximately 20 loan originators who solicit property owners, developers and mortgage loan brokers. In some instances, the originators accept loan applications meeting our underwriting criteria from a select group of mortgage loan brokers. Once potential borrowers have been identified, we determine which of our financing products best meet the borrower's needs. Loan originators in every branch office are able to offer borrowers the full array of loan offerings and finance products for both the Structured and Agency businesses. After identifying a suitable product, we work with the borrower to prepare a loan application. Upon completion by the borrower, the application is forwarded to our underwriters for due diligence.

Underwriting and Risk Management. Our underwriters perform due diligence on all proposed transactions prior to approval and commitment using several tools to manage and mitigate potential loan losses and risk sharing exposure. The underwriters analyze each loan application in accordance with the guidelines set forth below to determine the loan's conformity with the guidelines. Key factors considered in credit decisions include, but are not limited to, debt service coverage, loan to value ratios and property, financial and operating performance. In general, our underwriting guidelines require it to evaluate the following:

The borrower and each person directing a borrowing entity's activities (a "key principal"), including a review of their experience, credit, operating, bankruptcy and foreclosure history;

The historic and current property revenues and expenses;

The potential for near-term revenue growth and opportunity for expense reduction and increased operating efficiencies;

The property's location, its attributes and competitive position within its market;

The proposed ownership structure, financial strength and real estate experience of the borrower and property management;

Third party appraisal, environmental flood certification, zoning and engineering studies;

Market assessment, including property inspection, review of tenant lease files, surveys of property comparables and an analysis of area economic and demographic trends;

Review of an acceptable mortgagee's title policy and an "as built" survey;

Construction quality of the property to determine future maintenance and capital expenditure requirements;

The requirements for any reserves, including those for immediate repairs or rehabilitation, replacement reserves, tenant improvement and leasing commission costs, real estate taxes and property casualty and liability insurance; and

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

For any application for one of our Agency products, we will underwrite the loan to the relevant agency's guidelines.

Table of Contents

With respect to our Fannie Mae loans, we maintain concentration limits to further mitigate risk. Geographic concentration of such loans is limited based on regional employment concentration and trends, and we limit the aggregate amount of such loans subject to full risk-sharing for any one borrower and elect to use modified risk-sharing for such loans of more than \$23.0 million in accordance with Fannie Mae requirements. We also rely heavily on loan surveillance and credit risk management. We have a dedicated group of employees whose sole function is to monitor and analyze loan performance from closing to payoff, with the primary goal of managing and mitigating risk within the Fannie Mae portfolio.

We continuously refine our underwriting criteria based upon actual loan portfolio experience and as market conditions and investor requirements evolve.

Investment Approval Process. We apply an established investment approval process to all loans and other investments proposed for our Structured Business portfolio before submitting each proposal for final approval. A written report is generated for every loan or other investment that is submitted to our credit committee for approval, which consists of our chief executive officer, chief credit officer and executive vice president of structured finance. The report includes a description of the prospective borrower and any guarantors, the collateral and the proposed use of investment proceeds, as well as borrower and property financial statements and analysis. The report also includes an analysis of borrower liquidity, net worth, cash investment, income, credit history and operating experience. All transactions require the approval of a majority of the members of our credit committee. Following the approval of a transaction, our underwriting and servicing departments, together with our asset management group, assure that all loan approval terms have been satisfied and conform with lending requirements established for that particular transaction.

Our loan approval process for the Agency Business requires the submission of a detailed loan package in accordance with our underwriting checklist to our agency loan committee for approval. Our agency loan committee consists of multiple members of our senior and executive management teams, including our chief underwriter for the Agency Business and its chief operating officer. All transactions require the approval of up to four members, depending on the size of the loan. In addition, we are required to submit a completed loan underwriting package to Freddie Mac and HUD for approval prior to origination.

Servicing. We service all loans and investments through our internal servicing operations. We service an expanding portfolio, consisting of 2,827 loans with outstanding balances of \$13.56 billion at December 31, 2016 through the loan servicing department in Depew, New York. Our loan servicing operations are designed to provide prompt customer service and accurate and timely information for account follow up, financial reporting and management review. Following the funding of an approved loan, all pertinent loan data is entered into our data processing system, which provides monthly billing statements, tracks payment performance and processes contractual interest rate adjustments on variable rate loans. The servicing group works closely with our asset management group to ensure the appropriate level of customer service and monitoring of loans.

For most loans serviced under the Fannie Mae DUS program, we are required to advance, in the event of a borrower failing to pay, the principal and interest payments and tax and insurance escrow amounts associated with a loan for four months. We are reimbursed by Fannie Mae for these advances, which may be used to offset any losses incurred under our risk-sharing obligations once the loan and the related loss share is settled.

Under the HUD program, we are obligated to advance tax and insurance escrow amounts and principal and interest payments on the Ginnie Mae securities until the Ginnie Mae security is fully paid. In the event of a default on a HUD-insured loan, we can elect to assign the loan to HUD and file a mortgage insurance claim. HUD will reimburse approximately 99% of any losses of principal and interest on the loan and Ginnie Mae will reimburse substantially all of the remaining losses.

Table of Contents

Asset Management. Effective asset and portfolio management is essential to maximize the performance and value of a real estate investment. The asset management group customizes an asset management plan with the loan originators and underwriters to track each investment from origination through disposition. This group monitors each investment's operating history, local economic trends and rental and occupancy rates and evaluates the underlying property's competitiveness within its market. This group assesses ongoing and potential operational and financial performance of each investment in order to evaluate and ultimately improve its operations and financial viability. The asset management group performs frequent onsite inspections, conducts meetings with borrowers and evaluates and participates in the budgeting process, financial and operational review and renovation plans of each underlying property. The asset management group also focuses on increasing the productivity of onsite property managers and leasing brokers. This group communicates the status of each transaction against its established asset management plan to senior management, in order to enhance and preserve capital, as well as to avoid litigation and potential exposure.

Timely and accurate identification of an investment's operational and financial issues and each borrower's objectives is essential to implementing an executable loan workout and restructuring process, if required. Since the existing property management may not have the requisite expertise to manage the workout process effectively, our asset management group determines the current operating and financial status of an asset or portfolio and performs a liquidity analysis of the property and ownership entity and then, if appropriate, identifies and evaluates alternatives to maximize the value of an investment.

Operating Policies and Strategies

Investment Guidelines. Our Board of Directors has adopted general guidelines for our investments and borrowings to the effect that: (1) no investment will be made that would cause us to fail to qualify as a REIT; (2) no investment will be made that would cause us to be regulated as an investment company under the Investment Company Act; (3) no more than 25% of our equity (including junior subordinated notes as equity), determined as of the date of such investment, will be invested in any single asset; (4) no single mezzanine loan or preferred equity investment will exceed \$75 million; (5) our Structured Business leverage (including junior subordinated notes as equity) will generally not exceed 80% of the UPB of our assets, in the aggregate; (6) we will not co-invest with our Manager or any of its affiliates unless such co-investment is otherwise in accordance with these guidelines and its terms are at least as favorable to us as to our Manager or the affiliate making such co-investment; and (7) no more than 15% of our gross assets may consist of mortgage-related securities. Any exceptions to the above general guidelines require the approval of our Board of Directors.

Financing Policies. We finance the acquisition of our structured finance investments primarily by borrowing against or "leveraging" our existing portfolio and using the proceeds to acquire additional mortgage assets. We expect to incur debt such that we will maintain an equity-to-assets ratio no less than 20% (including junior subordinated notes as equity), although the actual ratio may be lower from time to time depending on market conditions and other factors deemed relevant by our Manager. Our charter and bylaws do not limit the amount of indebtedness we can incur, and the Board of Directors has discretion to deviate from or change our indebtedness policy at any time, provided that we are in compliance with our bank covenants. However, we intend to maintain an adequate capital base to protect against various business environments in which our financing and hedging costs might exceed the interest income from our investments.

Our structured finance investments are financed primarily by collateralized loan obligations ("CLOs"), junior subordinated notes, senior unsecured notes, convertible debt instruments and through other financing facilities with institutional lenders. Although we expect that these will be the principal means of leveraging these investments, we may issue common stock, preferred stock or secured, unsecured or convertible notes of any maturity if it appears advantageous to do so.

Table of Contents

Our Agency Business finances loan originations with several committed and uncommitted warehouse credit facilities on a short-term basis, as these loans are generally transferred or sold within 60 days from the loan origination date.

Credit Risk Management Policy. We are exposed to various levels of credit risk depending on the nature of our underlying assets and the nature and level of credit enhancements supporting our assets. Our Manager, our chief credit officer, and our asset management group, reviews and monitors credit risk and other risks of loss associated with each investment. In addition, our Manager seeks to diversify our portfolio of assets to avoid undue geographic, issuer, industry and certain other types of concentrations. Our Board of Directors monitors the overall portfolio risk and reviews levels of provision for loss.

Interest Rate Risk Management Policy. To the extent that it is consistent with our election to qualify as a REIT, we generally follow an interest rate risk management policy intended to mitigate the negative effects of major interest rate changes. We minimize our interest rate risk from borrowings by attempting to structure the key terms of our borrowings to generally correspond to the interest rate terms of our assets.

We may enter into hedging transactions to protect our investment portfolio from interest rate fluctuations and other changes in market conditions. These transactions may include interest rate swaps, the purchase or sale of interest rate collars, caps or floors, options, mortgage derivatives and other hedging instruments. These instruments may be used to hedge as much of the interest rate risk as our Manager determines is in the best interest of our stockholders, given the cost of such hedges and the need to maintain our status as a REIT. In general, income from hedging transactions does not constitute qualifying income for purposes of the REIT gross income requirements. To the extent, however, that a hedging contract reduces interest rate risk on indebtedness incurred to acquire or carry real estate assets, any income that is derived from the hedging contract, would not give rise to non-qualifying income for purposes of the 75% or 95% gross income tests. Our Manager may elect to have us bear a level of interest rate risk that could otherwise be hedged when it believes, based on all relevant facts, that bearing such risk is advisable.

Disposition Policies. Our Manager evaluates the asset portfolio in our Structured Business on a regular basis to determine if it continues to satisfy our investment criteria. Subject to certain restrictions applicable to REITs, our Manager may cause us to sell our investments opportunistically and use the proceeds for debt reduction, additional acquisitions, or working capital purposes.

Equity Capital Policies. Subject to applicable law, our Board of Directors has the authority, without further stockholder approval, to issue additional authorized common stock and preferred stock or otherwise raise capital, including through the issuance of senior securities and convertible debt instruments, in any manner and on the terms and for the consideration it deems appropriate, including in exchange for property. We may in the future issue common stock in connection with acquisitions. We also may issue units of partnership interest in our operating partnership in connection with acquisitions of property. We may, under certain circumstances, repurchase our common stock in private transactions with our stockholders, if those purchases are approved by our Board of Directors.

Conflicts of Interest Policies. We, our executive officers, and our Manager face conflicts of interests because of our relationships with each other. Our Manager has approximately 36.6% of the voting interest in our stock as of December 31, 2016. Mr. Kaufman, our chairman and chief executive officer, is the chief executive officer of our Manager and beneficially owns approximately 92% of the outstanding membership interests of our Manager. Mr. Martello, one of our directors, is the chief operating officer of Arbor Management, LLC (the managing member of our Manager) and a trustee of two trusts that own minority membership interests in our Manager. Mr. Bishar, our secretary, is general counsel to our Manager. Mr. Elenio, our chief financial officer and treasurer, is the chief financial

Table of Contents

officer of our Manager. Each of Messrs. Kaufman, Martello, Bishar, and Elenio, as well as Mr. Weber, our executive vice president of structured finance, Mr. Kilgore, our executive vice president of structured securitization and Mr. Guzewicz, our chief credit officer, are members of our Manager's executive committee and, excluding Mr. Kaufman, own minority membership interests in our Manager.

We have implemented several policies, through board action and through the terms of our charter and our agreements with our Manager, to help address these conflicts of interest, including the following:

Our charter requires that a majority of our Board of Directors be independent directors and that only our independent directors make any determination on our behalf with respect to the relationships or transactions that present a conflict of interest for our directors or officers.

Our Board of Directors adopted a policy that decisions concerning our management agreement with our Manager, including termination, renewal and enforcement thereof or our participation in any transactions with our Manager or its affiliates outside of the management agreement, including our ability to purchase securities and mortgages or other assets from our Manager, or our ability to sell securities and assets to our Manager, must be reviewed and approved by a majority of our independent directors. Pursuant to the agreement giving us the option to purchase the management agreement through July 2018, the Special Committee of our Board, formed to negotiate the Acquisition of our Manager's Agency Business, has the authority to exercise the option.

Our management agreement provides that our determination to terminate the management agreement for cause, because the management fees are unfair to us, or because of a change in control of our Manager, will be made by a majority vote of our independent directors.

Our independent directors will periodically review the general investment standards established by our Manager under the management agreement.

Our management agreement provides that our Manager may not assign duties under the management agreement, except to certain affiliates of our Manager, without the approval of a majority of our independent directors.

Our management agreement provides that decisions to approve or reject investment opportunities rejected by our credit committee that our Manager or Mr. Kaufman wish to pursue will be made by a majority of our independent directors.

Our Board of Directors has approved the operating policies and the strategies set forth above. Our Board of Directors has the power to modify or waive these policies and strategies, or amend our agreements with our Manager, without the consent of our stockholders to the extent that the Board of Directors determines that such modification or waiver is in the best interest of our stockholders. Among other factors, developments in the market that either affects the policies and strategies mentioned herein or that change our assessment of the market may cause our Board of Directors to revise its policies and strategies. However, if such modification or waiver involves the relationship of, or a transaction between us, and our Manager, the approval of a majority of our independent directors is also required. We may not, however, amend our charter to change the requirement that a majority of our board consists of independent directors or the requirement that our independent directors approve related party transactions without the approval of two thirds of the votes entitled to be cast by our stockholders.

Federal and State Regulation of Commercial Real Estate Lending Activities

Our multifamily and commercial real estate lending, servicing and asset management businesses are subject, in certain instances, to supervision and regulation by federal and state governmental

Table of Contents

authorities in the U.S. In addition, these businesses may be subject to various laws and judicial and administrative decisions imposing various requirements and restrictions, which, among other things, regulate lending activities, regulate conduct with borrowers, establish maximum interest rates, finance charges and other charges, require disclosures to borrowers and prohibit illegal discrimination. Although many states do not regulate commercial finance, certain states impose limitations on interest rates, as well as other charges on certain collection practices and creditor remedies. Some states also require licensing of lenders, loan brokers and loan servicers and adequate disclosure of certain contract terms. We are required to comply with certain provisions of, among other statutes and regulations, the USA PATRIOT Act, regulations promulgated by the U.S. Department of the Treasury's Office of Foreign Asset Control and other federal and state securities laws and regulations. These legal and regulatory requirements that apply to us are subject to change from time to time and may become more restrictive, making compliance with applicable requirements more difficult or expensive or otherwise restrict our ability to conduct its business in the manner that it is now conducted.

Compliance with Federal, State and Local Environmental Laws

Properties that we may acquire directly or indirectly through partnerships, and the properties underlying our structured finance investments and mortgage-related securities, are subject to various federal, state and local environmental laws, ordinances and regulations. Under these laws, ordinances and regulations, a current or previous owner of real estate (including, in certain circumstances, a secured lender that acquires ownership or control of a property) may become liable for the costs of removal or remediation of certain hazardous or toxic substances or petroleum product releases at, on, under or in its property. These laws typically impose cleanup responsibility and liability without regard to whether the owner or control party knew of or was responsible for the release or presence of the hazardous or toxic substances. The costs of investigation, remediation or removal of these substances may be substantial and could exceed the value of the property. An owner or control party of a site may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from a site. Certain environmental laws also impose liability in connection with the handling of or exposure to materials containing asbestos. These laws allow third parties to seek recovery from owners of real properties for personal injuries associated with materials containing asbestos. Our operating costs and the values of these assets may be adversely affected by the obligation to pay for the cost of complying with existing environmental laws, ordinances and regulations, as well as the cost of complying with future legislation, and our income and ability to make distributions to our stockholders could be affected adversely by the existence of an environmental liability with respect to properties we may acquire. We will endeavor to ensure that these properties are in compliance in all material respects with all federal, state and local laws, ordinances and regulations regarding hazardous or toxic substances or petroleum products.

Requirements of the GSEs and HUD

To maintain our status as an approved lender for Fannie Mae and Freddie Mac and as a HUD-approved mortgagee and issuer of Ginnie Mae securities, we are required to meet and maintain various eligibility criteria from time to time established by these entities, such as minimum net worth, operational liquidity and collateral requirements and compliance with reporting requirements. We are required to originate loans and perform our loan servicing functions in accordance with the applicable program requirements and guidelines from time to time established by these agencies. If we fail to comply with the requirements of any of these programs, the agencies may terminate or withdraw our licenses and approvals to participate in the GSE programs. In addition, the agencies have the authority under their guidelines to terminate a lender's authority to sell loans to it and service their loans. The loss of one or more of these approvals would have a material adverse impact on our operations and could result in further disqualification with other counterparties.

Table of Contents

Competition

We face significant competition across our business, including, but not limited to, other mortgage REITs, specialty finance companies, savings and loan associations, banks, mortgage bankers, insurance companies, mutual funds, institutional investors, investment banking firms, other lenders, governmental bodies and other entities, some of which may have greater name recognition, financial resources and lower costs of capital available to them. In addition, there are numerous institutions with asset acquisition objectives similar to ours, and others may be organized in the future which may increase competition. Competitive variables include market presence and visibility, size of loans offered and underwriting standards. To the extent that a competitor is willing to risk larger amounts of capital in a particular transaction or to employ more liberal underwriting standards when evaluating potential loans, our origination volume and profit margins for our investment portfolio could be impacted. Our competitors may also be willing to accept lower returns on their investments and may succeed in buying the assets that we have targeted for acquisition.

We compete on the basis of quality of service, relationships, loan structure, terms, pricing and industry experience, including the knowledge of local and national commercial real estate market conditions, loan product expertise and the ability to analyze and manage credit risk. Our competitors also seek to compete aggressively on the basis of these factors and our success depends on the ability to offer attractive loan products, provide superior service, demonstrate its industry knowledge and experience, maintain and capitalize on relationships with investors, borrowers and key loan correspondents and remain competitive in pricing. In addition, future changes in laws, regulations and GSE program requirements, and consolidation in the commercial real estate finance market could lead to the entry of more competitors, or enhance the competitive strength of our existing competitors.

Although management believes that we are well positioned to continue to compete effectively in each facet of our business, there can be no assurance that we will do so or that we will not encounter increased competition in the future that could limit our ability to compete effectively.

Employees

At December 31, 2016, we employed 288 individuals. In addition, there are approximately 100 individuals employed by our Manager who, through the management agreement, allocate a portion of their time to us. None of our employees or our Manager's employees are represented by a union or subject to a collective bargaining agreement, and we never experienced a work stoppage.

Corporate Governance and Internet Address

Our internet address is www.arborrealtytrust.com. All of our filings with the Securities and Exchange Commission ("SEC") are made available free of charge through our website, including this report, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to such reports, if any, as filed with the SEC as soon as reasonably practicable after such filing. Our website also contains our code of business conduct and ethics, code of ethics for chief executive and senior financial officers, corporate governance guidelines, stockholder communications with the Board of Directors, and the charters of the committees of our Board of Directors. No information contained in or linked to our website is incorporated by reference in this report.

Table of Contents

Item 1A. Risk Factors

Our business is subject to various risks, including the risks listed below. If any of these risks actually occur, our business, financial condition and results of operations could be materially adversely affected and the value of our common stock could decline. The below listed risk factors should not be considered an all inclusive list. New risk factors emerge periodically and we cannot guarantee that the factors described below list all risks that may become material to us at any later time. Some of the risk factors discussed below may have different impacts on the Structured Business and the Agency Business.

Risks Related to Our Business

An economic slowdown, a lengthy or severe recession, or declining real estate values could harm our operations.

We believe the risks associated with our business are more severe during periods of economic downturn if these periods are accompanied by declining real estate values. Declining real estate values would likely limit our new mortgage loan originations, since borrowers often use increases in the value of their existing properties to support the purchase or investment in additional properties. Borrowers may also be less able to pay principal and interest on our loans if the real estate economy weakens. Declining real estate values also significantly increase the likelihood that we will incur losses on our loans in the event of default because the value of our collateral may be insufficient to cover our cost on the loan. Any sustained period of increased payment delinquencies, foreclosures or losses could adversely affect both our net interest income from loans in our portfolio as well as our ability to originate, sell and securitize loans, which would significantly harm our results of operations, financial condition, business prospects and our ability to make distributions to the stockholders.

Prolonged disruptions in the financial markets could affect our ability to obtain financing on reasonable terms and have other adverse effects on us and the market price of our common stock.

Commercial real estate is particularly adversely affected by a prolonged economic downturn and liquidity crisis, which occurred in 2007 through 2010. These circumstances materially impact liquidity in the financial markets and result in the scarcity of certain types of financing, and, in certain cases, make certain financing terms less attractive. If economic or market conditions deteriorate, and these adverse conditions return, lending institutions may be forced to exit markets such as repurchase lending, become insolvent, further tighten their lending standards or increase the amount of equity capital required to obtain financing, and in such event, could make it more difficult for us to obtain financing on favorable terms or at all. Our profitability will be adversely affected if we are unable to obtain cost-effective financing for our investments. In addition, these factors may make it more difficult for our borrowers to repay our loans as they may experience difficulties in selling assets, increased costs of financing or obtaining financing at all. These events may also make it more difficult or unlikely for us to raise capital through the issuance of our common stock or preferred stock. These disruptions in the financial markets also may have a material adverse effect on the market value of our common stock and other adverse effects on us.

Increases in loan loss reserves and other impairments are likely if economic conditions deteriorate.

A decline in economic conditions could negatively impact the credit quality of our loan and investment portfolio and could cause us to experience increases in loan loss reserves, potential defaults and other asset impairment charges.

Table of Contents

Loan loss reserves are particularly difficult to estimate in a turbulent economic environment.

We perform an evaluation of our loans on a quarterly basis to determine whether an impairment is necessary and adequate to absorb probable losses. The valuation process for our loan and investment portfolio requires us to make certain estimates and judgments, which are particularly difficult to determine during a period in which the availability of commercial real estate credit is limited and commercial real estate transactions have decreased. Our estimates and judgments are based on a number of factors, including projected cash flows from the collateral securing our commercial real estate loans, loan structure, including the availability of reserves and recourse guarantees, likelihood of repayment in full at loan maturity, potential for a refinancing market coming back to commercial real estate in the future and expected market discount rates for varying property types. If our estimates and judgments are not correct, our results of operations and financial condition could be severely impacted.

Loan repayments are less likely in a volatile market environment.

In a market in which liquidity is essential to our business, particularly our Structured Business, loan repayments have been a significant source of liquidity for us. If borrowers are unable to refinance loans at maturity, the loans could go into default and the liquidity that we would receive from such repayments will not be available. Furthermore, in the event the commercial real estate finance market deteriorates, borrowers that are performing on their loans will most likely extend such loans if they have that right, which will further delay our ability to access liquidity through repayments.

We may not be able to access the debt or equity capital markets on favorable terms, or at all, for additional liquidity, which could adversely affect our business, financial condition and operating results.

Additional liquidity, future equity or debt financing may not be available on terms that are favorable to us, or at all. Our ability to access additional debt and equity capital depends on various conditions in these markets, which are beyond our control. If we are able to complete future equity offerings, they could be dilutive to our existing stockholders or could result in the issuance of securities that have rights, preferences and privileges that are senior to those of our other securities. Our inability to obtain adequate capital could have a material adverse effect on our business, financial condition, liquidity and operating results.

We may be unable to invest excess equity capital on acceptable terms or at all, which would adversely affect our operating results.

We may not be able to identify investments that meet our investment criteria and we may not be successful in closing the investments that we identify. In addition, the investments that we acquire with our equity capital may not produce a return on capital. There can be no assurance that we will be able to identify attractive opportunities to invest our equity capital, which would adversely affect our results of operations.

Changes in market conditions could adversely affect the market price of our stock.

As with other publicly traded equity securities, the value of our stock depends on various market conditions which may change from time to time. Among the market conditions that may affect the value of our stock are the following:

The general reputation of REITs and the attractiveness of our equity securities in comparison to other equity securities, including securities issued by other real estate-based companies;

Our financial performance; and

General stock and bond market conditions.

Table of Contents

The market value of our stock is based primarily upon the market's perception of our growth potential and our current and potential future earnings and dividends. Consequently, our stock may trade at prices that are higher or lower than our book value per share of stock. If our future earnings or dividends are less than expected, it is likely that the market price of our stock will diminish.

A declining portfolio could adversely affect the returns from our investments.

Conditions in the capital markets could lead to a reduction in our loan and investment portfolio. If we do not have the opportunity to originate quality investments to replace the reductions in our portfolio, this reduction will likely result in reduced returns from our investments.

Rising interest rates could have an adverse effect on a borrower's ability to make interest payments.

A significant portion of our loans and borrowings in our Structured Business are variable-rate instruments based on LIBOR. However, a portion of our loan portfolio is fixed-rate or is subject to interest rate floors that limit the impact of a decrease in interest rates. In addition, certain of our borrowings are also fixed rate or are subject to interest rate swaps that hedge our exposure to interest rate risk on fixed rate loans financed with variable rate debt. As a result, the impact of a change in interest rates may be different on our interest income than it is on our interest expense. In the event of a significant rising interest rate environment and/or economic downturn, defaults could increase and result in credit losses to us, which could adversely affect our liquidity and operating results. Further, such delinquencies or defaults could have an adverse effect on the spreads between interest-earning assets and interest-bearing liabilities.

We depend on key personnel with long standing business relationships, the loss of whom could threaten our ability to operate our business successfully.

Our future success depends, to a significant extent, upon the continued services of key personnel. In particular, the mortgage lending experience of Mr. Kaufman and Mr. Weber and the extent and nature of relationships they have developed with developers and owners of multifamily and commercial properties and other financial institutions are critical to our success. We cannot assure their continued employment as our officers. In addition, we remain dependent on the services of our Manager and its employees. The loss of services of one or more members of our or our Manager's management team could harm our business and our prospects.

The real estate investment business is highly competitive. Our success depends on our ability to compete with other providers of capital for real estate investments.

Our business is highly competitive. Competition may cause us to accept economic or structural features in our investments, particularly in our Structured Business, that we would not have otherwise accepted and it may cause us to search for investments in markets outside of our traditional product expertise. We compete for attractive investments with traditional lending sources, such as insurance companies and banks, as well as other REITs, specialty finance companies and private equity vehicles with similar investment objectives, which may make it more difficult for us to consummate our target investments. Many of our competitors have greater financial resources and lower costs of capital than we do, which provides them with greater operating flexibility and a competitive advantage relative to us.

We may not achieve our targeted rate of return on our investments.

We originate or acquire investments based on our estimates or projections of overall rates of return on such investments, which in turn are based upon, among other considerations, assumptions regarding the performance of assets, the amount and terms of available financing to obtain desired

Table of Contents

leverage and the manner and timing of dispositions, including possible asset recovery and remediation strategies, all of which are subject to significant uncertainty. In addition, events or conditions that we have not anticipated may occur and may have a significant effect on the actual rate of return received on an investment.

As we acquire or originate investments, whether as new additions or as replacements for maturing investments, there can be no assurance that we will be able to produce rates of return comparable to returns on our previous or existing investments.

Our due diligence may not reveal all of a borrower's liabilities and may not reveal other weaknesses in its business.

Before making a loan to a borrower, we assess the strength and skills of such entity's management and other factors that we believe are material to the performance of the investment. In performing our due diligence, we rely on the resources available to us and, in some cases, an investigation by third parties. This process is particularly important and subjective with respect to newly organized entities because there may be little or no information publicly available about the entities. There can be no assurance that our due diligence processes will uncover all relevant facts or that any investment will be successful.

We invest in junior participation loans which may be subject to additional risks relating to the privately negotiated structure and terms of the transaction, which may result in losses to us.

In our Structured Business, we invest in junior participation loans which are mortgage loans typically (i) secured by a first mortgage on a single commercial property or group of related properties and (ii) subordinated to a senior note secured by the same first mortgage on the same collateral. As a result, if a borrower defaults, there may not be sufficient funds remaining for the junior participation loan after payment is made to the senior note holder. Since each transaction is privately negotiated, junior participation loans can vary in their structural characteristics and risks. For example, the rights of holders of junior participation loans to control the process following a borrower default may be limited in certain investments. We cannot predict the terms of each junior participation investment. A junior participation may not be liquid and, consequently, we may be unable to dispose of underperforming or non-performing investments. The higher risks associated with a subordinate position in any investment we make could subject us to increased risk of losses.

We invest in mezzanine loans which are subject to a greater risk of loss than loans with a first priority lien on the underlying real estate.

In our Structured Business, we invest in mezzanine loans that take the form of subordinated loans secured by second mortgages on the underlying property or loans secured by a pledge of the ownership interests of either the entity owning the property or a pledge of the ownership interests of the entity that owns the interest in the entity owning the property. These types of investments involve a higher degree of risk than long-term senior mortgage lending secured by income producing real property because the investment may become unsecured as a result of foreclosure by the senior lender. In the event of a bankruptcy of the entity providing the pledge of its ownership interests as security, we may not have full recourse to the assets of such entity, or the assets of the entity may not be sufficient to satisfy our mezzanine loan. If a borrower defaults on our mezzanine loan or debt senior to our loan, or in the event of a borrower bankruptcy, our mezzanine loan will be satisfied only after the senior debt. As a result, we may not recover some or all of our investment. In addition, mezzanine loans may have higher loan to value ratios than conventional mortgage loans, resulting in less equity in the property and increasing the risk of loss of principal.

Table of Contents

Preferred equity investments involve a greater risk of loss than traditional debt financing.

In our Structured Business, we invest in preferred equity investments, which involve a higher degree of risk than traditional debt financing due to a variety of factors, including that such investments are subordinate to other loans and are not secured by property underlying the investment. Furthermore, should the issuer default on our investment, we would only be able to proceed against the partnership in which we have an interest, and not the property underlying our investment. As a result, we may not recover some or all of our investment.

We invest in multifamily and commercial real estate loans, which may involve a greater risk of loss than single family real estate loans.

Our investments include multifamily and commercial real estate loans that involve a higher degree of risk than single family residential lending because of a variety of factors, including generally larger loan balances, dependency for repayment on successful operation of the mortgaged property and tenant businesses operating therein, and loan terms that include amortization schedules longer than the stated maturity and provide for balloon payments at stated maturity rather than periodic principal payments. In addition, the value of commercial real estate can be affected significantly by the supply and demand in the market for that type of property.

Volatility of values of multifamily and commercial properties may adversely affect our loans and investments.

Multifamily and commercial property values and net operating income derived from such properties are subject to volatility and may be affected adversely by a number of factors, including, but not limited to, events such as natural disasters, including hurricanes and earthquakes, acts of war and/or terrorism and others that may cause unanticipated and uninsured performance declines and/or losses to us or the owners and operators of the real estate securing our investment; national, regional and local economic conditions, such as what we have experienced in recent years (which may be adversely affected by industry slowdowns and other factors); local real estate conditions (such as an oversupply of housing, retail, industrial, office or other commercial space); changes or continued weakness in specific industry segments; construction quality, construction cost, age and design; demographic factors; retroactive changes to building or similar codes; and increases in operating expenses (such as energy costs). In the event a property's net operating income decreases, a borrower may have difficulty repaying our loan, which could result in losses to us. In addition, decreases in property values reduce the value of the collateral and the potential proceeds available to a borrower to repay our loans, which could also cause us to suffer losses.

Many of our commercial real estate loans are funded with interest reserves and our borrowers may be unable to replenish those interest reserves once they run out.

Given the transitional nature of many of our commercial real estate loans in our Structured Business portfolio, we often require borrowers to post reserves to cover interest and operating expenses until the property cash flows are projected to increase sufficiently to cover debt service costs. We also generally require the borrower to replenish reserves if they become depleted due to underperformance or if the borrower wants to exercise extension options under the loan. Despite low interest rates, revenues on the properties underlying any commercial real estate loan investments would decrease in an economic downturn, making it more difficult for borrowers to meet their payment obligations to us. In the future, some borrowers may continue to have difficulty servicing our debt and will not have sufficient capital to replenish reserves, which could have a significant impact on our operating results and cash flows.

Table of Contents

We may not have control over certain of our loans and investments.

Our ability to manage our structured portfolio of loans and investments may be limited by the form in which they are made. In certain situations, we may acquire investments subject to rights of senior classes and servicers under inter-creditor or servicing agreements; acquire only a participation in an underlying investment; co-invest with third parties through partnerships, joint ventures or other entities, thereby acquiring non-controlling interests; or rely on independent third party management or strategic partners with respect to the management of an asset. Therefore, we may not be able to exercise control over the loan or investment. Such financial assets may involve risks not present in investments where senior creditors, servicers or third party controlling investors are not involved. Our rights to control the process following a borrower default may be subject to the rights of senior creditors or servicers whose interests may not be aligned with ours. A third party partner may have financial difficulties resulting in a negative impact on such assets and may have economic or business interests or goals which are inconsistent with ours. In addition, we may, in certain circumstances, be liable for the actions of our third party partners.

Real estate property may fail to perform as expected.

We may obtain new real estate properties through foreclosure proceedings or investment. Such newly obtained properties may not perform as expected and may subject us to unknown liabilities relating to such properties for clean-up of undisclosed environmental contamination or claims by tenants, vendors or other persons against the former owners of the properties. Inaccurate assumptions regarding future rental or occupancy rates could result in overly optimistic estimates of future revenues. In addition, future operating expenses or the costs necessary to bring an obtained property up to standards established for its intended market position may be underestimated.

The adverse resolution of a lawsuit could have a material adverse effect on our financial condition and results of operations.

The adverse resolution of litigation for which we have been named as a defendant could have a material adverse effect on our financial condition and results of operations. See Note 16 Commitments and Contingencies for information on our current litigation.

The impact of any future terrorist attacks and the availability of terrorism insurance expose us to certain risks.

Any future terrorist attacks, the anticipation of any such attacks, and the consequences of any military or other response by the United States ("U.S.") and its allies may have an adverse impact on the U.S. financial markets and the economy in general. We cannot predict the severity of the effect that any such future events would have on the U.S. financial markets, including the real estate capital markets, the economy or our business. Any future terrorist attacks could adversely affect the credit quality of some of our loans and investments. Some of our loans and investments will be more susceptible to such adverse effects than others. We may suffer losses as a result of the adverse impact of any future terrorist attacks and these losses may adversely impact our results of operations.

In addition, the enactment of the Terrorism Risk Insurance Act of 2002, or the TRIA, and the subsequent enactment of the Terrorism Risk Insurance Program Reauthorization Act of 2007, requires insurers to make terrorism insurance available under their property and casualty insurance policies in order to receive federal compensation under TRIA for insured losses. However, this legislation does not regulate the pricing of such insurance. The absence of affordable insurance coverage may adversely affect the general real estate lending market, lending volume and the market's overall liquidity and may reduce the number of suitable investment opportunities available to us and the pace at which we are able to make investments. If the properties that we invest in are unable to obtain affordable insurance

Table of Contents

coverage, the value of those investments could decline and in the event of an uninsured loss, we could lose all or a portion of our investment.

Failure to maintain an exemption from regulation as an investment company under the Investment Company Act would adversely affect our results of operations.

We believe that we conduct, and we intend to conduct our business in a manner that allows us to avoid being regulated as an investment company under the Investment Company Act. Pursuant to Section 3(c)(5)(C) of the Investment Company Act, entities that are primarily engaged in the business of purchasing or otherwise acquiring "mortgages and other liens on and interests in real estate" are currently exempted from regulation thereunder. The staff of the SEC has provided guidance on the availability of this exemption. Specifically, the staff's position generally requires a company to maintain at least 55% of its assets directly in "qualifying real estate interests." To constitute as a qualifying real estate interest under this 55% test, an interest in real estate must meet various criteria. Loans that are secured by equity interests in entities that directly or indirectly own the underlying real property, rather than a mortgage on the underlying property itself, and ownership of equity interests in real property owners may not qualify for purposes of the 55% test depending on the type of entity. Mortgage-related securities that do not represent all of the certificates issued with respect to an underlying pool of mortgages may also not qualify for purposes of the 55% test. Therefore, our ownership of these types of loans and equity interests may be limited by the provisions of the Investment Company Act. There can be no assurance that the laws and regulations governing the Investment Company Act status of REITs, including the guidance of the Division of Investment Management of the SEC regarding this exemption, will not change in a manner that adversely affects our operations. To the extent that we do not comply with the 55% test, another exemption or exclusion from registration as an investment company under that Act or other interpretations under the Investment Company Act, or if the SEC no longer permits our exemption, we may be deemed to be an investment company. If we fail to maintain an exemption or other exclusion from registration as an investment company we could, among other things, be required either (a) to substantially change the manner in which we conduct our operations to avoid being required to register as an investment company or (b) to register as an investment company, either of which could have an adverse effect on us and the market price of our common stock. If we were required to register as an investment company under that Act, we would become subject to substantial regulation with respect to our capital structure (including our ability to use leverage), management, operations, transactions with affiliated persons (as defined in the Investment Company Act), portfolio composition, including restrictions with respect to diversification and industry concentration and other matters.

Our Manager and one of our subsidiaries are required to register under the Investment Advisers Act, and are subject to regulation under that Act.

Our Manager and one of our subsidiaries are subject to the extensive regulation prescribed by the Investment Advisers Act. The SEC oversees activities as a registered investment adviser under this regulatory regime. A failure to comply with the obligations imposed by the Investment Advisers Act, including record-keeping, advertising and operating requirements, disclosure obligations and prohibitions on fraudulent activities, could result in fines, censure, suspensions of personnel or investing activities or other sanctions, including revocation of our registration as an investment adviser. The regulations under the Investment Advisers Act are designed primarily to protect investors and other clients, and are not designed to protect holders of our publicly traded stock. Even if a sanction imposed against our Manager or its personnel involves a small monetary amount, the adverse publicity related to such sanction could harm our reputation and our relationship with our investors and impede our ability to raise additional capital. In addition, compliance with the Investment Advisers Act may require us to incur additional costs, and these costs may be material.

Table of Contents

The impact of any future laws, as well as amendments to current laws, may place restrictions on our business.

Future legislation could impose additional financial obligations or restrictions with respect to our business. The past economic environment has placed an increased level of scrutiny on the financial services sector, which led to the signing of the Dodd-Frank Act in 2010. Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on us and, more generally, the financial services and mortgage industries. It is difficult to predict the exact nature of any future legislation and the extent to which such legislation, if any, will impact our business, financial condition, or results of operations.

The effects of government regulation could negatively impact the market value of loans related to development projects.

Loans related to development projects bear additional risk in that government regulation could impact the value of the project by limiting the development of the property. If the proper approvals for the completion of the project are not granted, the value of the collateral may be adversely affected which may negatively impact the value of the loan.

Risks Related to Our Financing and Hedging Activities

We may not be able to access financing sources on favorable terms, or at all, which could adversely affect our ability to execute our business plan.

We generally finance our Structured Business loans and investments through a variety of means, including credit facilities, senior unsecured notes, junior subordinated notes, CLOs and other structured financings. We generally finance our Agency Business loan originations, prior to sale to, or securitization by, an agency, through credit facilities provided by commercial banks. Our ability to execute this strategy depends on various conditions in the markets for financing in this manner that are beyond our control, including lack of liquidity and wider credit spreads, which we have seen over the past several years. If conditions deteriorate, we cannot assure that these sources are feasible as a means of financing as there can be no assurance that any existing agreements will be renewed or extended at expiration. If our strategy is not viable, we will have to find alternative forms of long-term and short-term financing as credit and repurchase facilities may not accommodate our needs. This could subject us to more recourse indebtedness and the risk that debt service on less efficient forms of financing would require a larger portion of our cash flows, thereby reducing cash available for distribution to our stockholders, funds available for operations as well as for future business opportunities.

Credit facilities may contain restrictive covenants relating to our operations.

Credit facilities may contain various financial covenants and restrictions, including minimum net worth, liquidity and debt-to-equity ratios. Other restrictive covenants contained in credit facility agreements may include covenants that prohibit affecting a change in control, disposing of or encumbering assets being financed, maximum debt balance requirements, and restrictions from making material amendments to underwriting guidelines without lender approval. While we actively manage our loan and investment portfolio, a weak economic environment will make maintaining compliance with future credit facilities' covenants more difficult. If we are not in compliance with any of these covenants, there can be no assurance that our lenders would waive or amend such non-compliance in the future and any such non-compliance could have a material adverse effect on us.

We may not be able to obtain the level of leverage necessary to optimize our return on investment.

In our Structured Business, our return on investment depends, in part, upon our ability to grow our portfolio of invested assets through the use of leverage at a cost of debt that is lower than the yield

Table of Contents

earned on our investments. We typically obtain leverage through the issuance of CLOs, credit agreements and other borrowings. Our future ability to obtain the necessary leverage on beneficial terms ultimately depends upon the quality of the portfolio assets that collateralize our indebtedness. Our failure to obtain and/or maintain leverage at desired levels or on attractive terms would have a material adverse effect on the performance of our Structured Business. Moreover, we may be dependent upon a few lenders to provide financing under credit agreements for our origination or acquisition of loans and investments and there can be no assurance that these agreements will be renewed or extended at expiration. Our ability to obtain financing through CLOs is subject to conditions in the debt capital markets which are impacted by factors beyond our control that may at times be adverse and reduce the level of investor demand for such securities.

The credit facilities that we may use to finance our investments may require us to provide additional collateral.

We may use credit facilities to finance investments in the future. If the market value of the loans or investments pledged or sold by us to a funding source decline in value, we may be required by the lending institution to provide additional collateral or pay down a portion of the funds advanced. We may not have the funds available to pay down such future debt, which could result in defaults. Posting additional collateral to support these potential credit facilities would reduce our liquidity and limit our ability to leverage our assets. In the event we do not have sufficient liquidity to meet such requirements, lending institutions can accelerate the indebtedness, increase interest rates and terminate our ability to borrow. Further, lenders may require us to maintain a certain amount of uninvested cash or set aside unlevered assets sufficient to maintain a specified liquidity position which would allow us to satisfy our collateral obligations. As a result, we may not be able to leverage our assets as fully as we would choose, which could reduce our return on assets. In the event that we are unable to meet these collateral obligations, our financial condition could deteriorate rapidly.

Our use of leverage may create a mismatch with the duration and index of the investments that we are financing.

We attempt to structure our leverage, particularly in our Structured Business, such that we minimize the difference between the term of our investments and the term of the leverage we use to finance the investment. In the event our leverage is for a shorter term than the financed investment, we may not be able to extend or find appropriate replacement leverage and that would have an adverse impact on our liquidity and our returns. In the event our leverage is for a longer term than the financed investment, we may not be able to repay such leverage or replace the financed investment with an optimal substitute or at all, which will negatively impact our desired leveraged returns.

We attempt to structure our leverage such that we minimize the difference between the index of our investments and the index of our leverage financing floating rate investments with floating rate leverage and fixed rate investments with fixed rate leverage. If such a product is not available to us from our lenders on reasonable terms, we may use hedging instruments to effectively create such a match. For example, in the case of fixed rate investments, we may finance such an investment with floating rate leverage, but effectively convert all or a portion of the leverage to fixed rate using hedging strategies. Our attempts to mitigate such risk are subject to factors outside of our control, such as the availability to us of favorable financing and hedging options, which is subject to a variety of factors, of which duration and term matching are only two such factors.

We utilize a significant amount of debt to finance our portfolio, which may subject us to an increased risk of loss, adversely affecting the return on our investments and reducing cash available for distribution.

We utilize a significant amount of debt to finance our operations, which may compound losses and reduce the cash available for distributions to our stockholders. We generally leverage our portfolio

Table of Contents

through the use of securitizations, including the issuance of CLOs, bank credit facilities, and other borrowings. The leverage we employ varies depending on the types of assets being financed, availability of funds, ability to obtain credit facilities, the loan-to-value and debt service coverage ratios of our assets, the yield on our assets, the targeted leveraged return we expect from our portfolio and our ability to meet ongoing covenants related to our asset mix and financial performance. Substantially all of our assets are pledged as collateral for our borrowings. In addition, we may acquire real estate property subject to debt obligations. The return on our investments and cash available for distribution to our stockholders may be reduced to the extent that changes in market conditions cause the cost of our financing to increase relative to the income that we can derive from the assets we acquire.

Our debt service payments reduce the net income available for distributions. Moreover, we may not be able to meet our debt service obligations and, to the extent we cannot, we risk the loss of some or all of our assets to foreclosure or sale to satisfy our debt obligations. Currently, neither our charter nor our bylaws impose any limitations on the extent to which we may leverage our assets.

We may guarantee some of our leverage and contingent obligations.

We may guarantee the performance of some of our obligations in the future, including but not limited to any repurchase agreements, derivative agreements, and unsecured indebtedness. Non-performance on such obligations may cause losses to us in excess of the capital we initially may invest/commit to under such obligations and there is no assurance that we will have sufficient capital to cover any such losses.

We may not be able to acquire suitable investments for a CLO issuance, or we may not be able to issue CLOs on attractive terms, or at all, which may require us to utilize more costly financing for our investments.

We have financed, and, if the opportunities exist in the future, we may continue to finance certain of our investments in our Structured Business through the issuance of CLOs. During the period we are acquiring investments for eventual long-term financing through CLOs, we have typically financed these investments through repurchase and credit agreements. We use these agreements to finance our acquisition of investments until we have accumulated a sufficient quantity of investments, at which time we may refinance them through a CLO securitization. As a result, we are subject to the risk that we will not be able to acquire a sufficient amount of eligible investments to maximize the efficiency of a CLO issuance. In addition, conditions in the debt capital markets may make the issuance of CLOs less attractive to us even when we do have a sufficient pool of collateral, or we may not be able to execute a CLO transaction on terms favorable to us or at all. If we are unable to issue a CLO to finance these investments, we may be required to utilize other forms of potentially less attractive financing.

The use of CLO financings with over-collateralization and interest coverage requirements may have a negative impact on our cash flows.

The terms of CLOs will generally provide that the principal amount of investments must exceed the principal balance of the related bonds by a certain amount and that interest income exceeds interest expense by a certain amount. Generally, CLO terms provide that, if certain delinquencies and/or losses or other factors cause a decline in collateral or cash flow levels, the cash flow otherwise payable on subordinated classes may be redirected to repay senior classes of CLOs until the issuer or the collateral is in compliance with the terms of the governing documents. Other tests (based on delinquency levels or other criteria) may restrict our ability to receive interest payments from assets pledged to secure CLOs. We cannot assure that the performance tests will be satisfied. If our investments fail to perform as anticipated, our over-collateralization, interest coverage or other credit enhancement expense associated with our CLO financings will increase. With respect to future CLOs we may issue, we cannot assure, in advance of completing negotiations with the rating agencies or other key transaction parties as to the actual terms of the delinquency tests, over-collateralization and interest

Table of Contents

coverage terms, cash flow release mechanisms or other significant factors upon which net income to us will be calculated. Failure to obtain favorable terms with regard to these matters may adversely affect the availability of net income to us.

We may not be able to find suitable replacement investments for CLO reinvestment periods.

CLOs have periods where principal proceeds received from assets securing the CLO can be reinvested for a defined period of time, commonly referred to as a reinvestment period. Our ability to find suitable investments during the reinvestment period that meet the criteria set forth in the CLO governing documents and by rating agencies may determine the success of our CLO investments. Our potential inability to find suitable investments may cause, among other things, lower returns, interest deficiencies, hyper-amortization of the senior CLO liabilities and may cause us to reduce the life of the CLO and accelerate the amortization of certain fees and expenses.

We may be required to repurchase loans that we have sold or to indemnify holders of our CLOs.

If any of the loans we originate or acquire and sell or securitize through CLOs do not comply with representations and warranties we make about certain characteristics of the loans, the borrowers and the underlying properties, we may be required to repurchase those loans or replace them with substitute loans. In addition, in the case of loans that we have sold instead of retained, we may be required to indemnify persons for losses or expenses incurred as a result of a breach of a representation or warranty. Repurchased loans typically require a significant allocation of working capital to carry on our books, and our ability to borrow against such assets is limited. Any significant repurchases or indemnification payments could adversely affect our financial condition and operating results.

Our loans and investments may be subject to fluctuations in interest rates which may not be adequately protected, or protected at all, by our hedging strategies.

Our current investment program for our Structured Business emphasizes loans with both floating and fixed interest rates. Floating rate investments earn interest at rates that adjust from time to time (typically monthly) based upon an index (typically LIBOR), allowing this portion of our portfolio to be insulated from changes in value due specifically to changes in interest rates. Fixed rate investments, however, do not have adjusting interest rates and, as prevailing interest rates change, the relative value of the fixed cash flows from these investments will cause potentially significant changes in value. The majority of our interest-earning assets and interest-bearing liabilities in our Structured Business have floating rates of interest. However, depending on market conditions, fixed rate assets may become a greater portion of our new loan originations. We may employ various hedging strategies to limit the effects of changes in interest rates (and in some cases credit spreads), including engaging in interest rate swaps, caps, floors and other interest rate derivative products. No strategy can completely insulate us from the risks associated with interest rate changes and there is a risk that they may provide no protection at all and potentially compound the impact of changes in interest rates. Hedging transactions involve certain additional risks such as counterparty risk, the legal enforceability of hedging contracts, the early repayment of hedged transactions and the risk that unanticipated and significant changes in interest rates may cause a significant loss of basis in the contract and a change in current period expense. We cannot make assurances that we will be able to enter into hedging transactions or that such hedging transactions will adequately protect us against the foregoing risks. In addition, cash flow hedges which are not perfectly correlated (and appropriately designated and documented as such) with a variable rate financing will impact our reported income as gains and losses on the ineffective portion of such hedges will be recorded on our statement of income.

Table of Contents

Hedging instruments often are not guaranteed by an exchange or its clearing house and involve risks and costs.

The cost of using hedging instruments increases as the period covered by the instrument lengthens and during periods of rising and volatile interest rates. We may increase our hedging activity and thus increase our hedging costs during periods when interest rates are volatile or rising and hedging costs have increased.

In addition, hedging instruments involve risk since they currently are often not guaranteed by an exchange or its clearing house. The enforceability of agreements underlying derivative transactions may depend on compliance with applicable statutory, commodity and other regulatory requirements and, depending on the identity of the counterparty, applicable international requirements. The business failure of a hedging counterparty with whom we enter into a hedging transaction will most likely result in a default. Default by a party with whom we enter into a hedging transaction may result in the loss of unrealized profits and force us to cover our resale commitments, if any, at the then current market price. Although generally we will seek to reserve the right to terminate our hedging positions, it may not always be possible to dispose of or close out a hedging position without the consent of the hedging counterparty, and we may not be able to enter into an offsetting contract to cover our risk. We cannot assure that a liquid secondary market will exist for hedging instruments purchased or sold, and we may be required to maintain a position until exercise or expiration, which could result in losses.

We may enter into derivative contracts that could expose us to contingent liabilities in the future.

Subject to maintaining our qualification as a REIT, part of our investment strategy involves entering into derivative contracts that could require us to fund cash payments in the future under certain circumstances (e.g., the early termination of the derivative agreement caused by an event of default or other early termination event, or the decision by a counterparty to request margin securities it is contractually owed under the terms of the derivative contract). The amount due would be equal to the unrealized loss of the open swap positions with the respective counterparty and could also include other fees and charges. These economic losses will be reflected in our financial results of operations, and our ability to fund these obligations will depend on the liquidity of our assets and access to capital at the time, and the need to fund these obligations could adversely impact our financial condition.

We are subject to certain counterparty risks related to our derivative contracts.

We periodically hedge a portion of our interest rate risk by entering into derivative financial instrument contracts. In a global credit crisis, there is a risk that counterparties could fail, shut down, file for bankruptcy or be unable to pay out contracts. The failure of a counterparty that holds collateral we post in connection with certain interest rate swap agreements could result in the loss of such collateral.

The loss of or changes in our Agency Business's relationships with the GSEs, United States Department of HUD and institutional investors would adversely affect our ability to originate commercial real estate loans through GSE and HUD programs, which would materially and adversely affect us.

Currently, the Agency Business originates nearly all of its loans for sale through GSE or HUD programs. The Agency Business is approved as a Fannie Mae DUS lender nationwide, a Freddie Mac Program Plus lender in New York, New Jersey and Connecticut, a Freddie Mac Targeted Affordable Housing, Manufactured Housing Community, Seniors Housing and Small Balance Loan Lender nationwide, a HUD MAP and LEAN lender nationwide, and a Ginnie Mae issuer. Our status as an approved lender affords the Agency Business a number of advantages and may be terminated by the applicable GSE or HUD at any time. The loss of such status would, or changes in its relationships could, prevent us from being able to originate commercial real estate loans for sale through the

Table of Contents

particular GSE or HUD, which would materially and adversely affect us. It could also result in a loss of similar approvals from other GSEs or HUD.

We also originate and sell loans to investment banks through the CMBS conduit markets. If these investment banks discontinue their relationship with us and replacement investors cannot be found on a timely basis, we could be adversely affected.

A change to the conservatorship of Fannie Mae and Freddie Mac and related actions, along with any changes in laws and regulations affecting the relationship between Fannie Mae and Freddie Mac and the U.S. federal government, could materially and adversely affect our Agency Business.

Currently, the Agency Business originates a majority of its loans for sale through GSE programs. Additionally, a substantial majority of our servicing rights are derived from loans we sell through GSE programs. Changes in the business charters, structure, or existence of one or both of the GSEs could eliminate or substantially reduce the number of loans we may originate with the GSEs, which in turn would lead to a reduction in fee and interest income we derive with respect to such loans and would also adversely affect our servicing revenue. These effects would likely cause our Agency Business to realize significantly lower revenues from our loan originations and servicing fees and ultimately would have a material adverse impact on our financial results.

Conservatorships of the GSEs

In September 2008, the Federal Housing Finance Agency (the "FHFA"), the GSEs' regulator, placed each GSE into conservatorship. The conservatorship is a statutory process designed to preserve and conserve the GSEs' assets and property and put them in a sound and solvent condition. The conservatorships have no specified termination dates and there continues to be significant uncertainty regarding the future of the GSEs, including how long they will continue to exist in their current forms, the extent of their roles in the housing markets, what forms they will have and whether they will continue to exist following conservatorship.

Housing Finance Reform

Policymakers and others have focused significant attention in recent years on how to reform the nation's housing finance system, including what role, if any, the GSEs should play. In 2011, the Obama Administration released a white paper on the future of housing finance reform. The report provided that the Obama Administration would work with the FHFA to determine the best way to responsibly reduce the GSEs' role in the market and ultimately wind down both institutions. The report identified a number of possible policy steps for winding down the GSEs, reducing the government's role in housing finance and helping bring private capital back to the mortgage market. In August 2013, President Obama publicly discussed the Administration's housing policy priorities, including a core principle that included winding down the GSEs through a responsible transition. In January 2014, the White House issued a fact sheet reaffirming the Administration's view that housing finance reform should include ending the GSEs' business model.

In addition to the Administration's actions described above, the FHFA has taken a number of steps consistent with the goals laid out in the former Administration's 2011 white paper. In 2012, the FHFA proposed a strategic plan for the GSEs' conservatorships. Among other things, that strategic plan recognized that the GSEs' multifamily business, in contrast to their single-family business, had remained cash flow positive during the recent housing crisis. The strategic plan stated that "generating potential value for taxpayers and contracting the GSEs' multifamily market footprint should be approached differently from single-family, and it may be accomplished using a much different and more direct method."

Table of Contents

In 2014, the FHFA released its strategic plan for the GSEs, in which it changed its goal of "contraction" of the GSEs' multifamily businesses to "maintaining" the businesses. In 2015, the FHFA released the GSEs' 2016 Scorecard (the "2016 Scorecard"), which set the multifamily loan origination caps for each GSE at \$31.0 billion ("2016 Caps"), excluding affordable housing loans, loans to small multifamily properties, and manufactured housing rental community loans. The 2016 Scorecard also stated that the FHFA will review the agencies estimates of the multifamily loan origination market size on a quarterly basis and, if it determines that the actual 2016 market size was greater than projected, it would apply an appropriate increase, but would not reduce the cap if the actual market size was less than projected. In fact, during 2016, the FHFA increased the 2016 Caps to \$36.5 billion for each of the GSEs. The FHFA has released the GSE 2017 Scorecard ("2017 Scorecard"), which kept the loan origination caps for each GSE at \$36.5 billion ("2017 Caps"), no change from the 2016 Caps, continues to exclude affordable housing loans, loans to small multifamily properties, and manufactured housing rental community loans and maintains its flexibility for quarterly review for potential adjustments should the market be larger than expected. The 2017 Scorecard also provides exclusions for loans to properties in underserved markets including rural, small multifamily and senior assisted living and for loans to finance energy or water efficiency improvements.

Congress has also continued to consider housing finance reform. In the past few years, members of Congress introduced several bills to reform the housing finance system, including the GSEs. Several of the bills require the wind down or receivership of the GSEs within a specified period of enactment and also place certain restrictions on the GSEs' activities prior to being wound down or placed into receivership. The Trump Administration has made comments indicating that housing finance reform may be on their agenda, however, it is unclear at this time what the Trump Administration's goals are with respect to the future of the GSE's.

We expect Congress will continue to consider housing finance reform, including conducting hearings and considering legislation that would alter the housing finance system, including the activities or operations of the GSEs. We cannot predict the prospects for the enactment, timing or content of legislative proposals regarding the future status of the GSEs. As a result, there continues to be significant uncertainty regarding the future of the GSEs.

Our Agency Business is subject to risk of loss in connection with defaults on loans sold under the Fannie Mae DUS program that could materially and adversely affect our results of operations and liquidity.

Under the Fannie Mae DUS program, our Agency Business originates and services multifamily loans for Fannie Mae without having to obtain Fannie Mae's prior approval for certain loans, as long as the loans meet the underwriting guidelines set forth by Fannie Mae. In return for the delegated authority to make loans and the commitment to purchase loans by Fannie Mae, we must maintain minimum collateral with Fannie Mae and we are required to share risk of loss on loans sold through Fannie Mae. Under the full risk-sharing formula, we absorb the first 5% of any losses on the unpaid principal balance of a loan at the time of loss settlement, and above 5% we share the loss with Fannie Mae, with our maximum loss capped at 20% of the original unpaid principal balance of a loan. Our Agency Business has modified its risk-sharing obligations on some Fannie Mae DUS loans to reduce potential loss exposure on those loans. In addition, Fannie Mae can double or triple our risk-sharing obligations if the loan does not meet specific underwriting criteria or if the loan defaults within 12 months of its sale to Fannie Mae. As of December 31, 2016, the Agency Business had pledged \$38.1 million as collateral against future losses under \$11.18 billion of loans outstanding that are subject to risk-sharing obligations. Fannie Mae collateral requirements may change in the future. As of December 31, 2016, the Agency Business's allowance for loss-sharing balance was \$32.4 million. We cannot ensure that this balance will be sufficient to cover future loss sharing obligations. While our Agency Business originates loans that meet the underwriting guidelines defined by Fannie Mae, in addition to our own internal underwriting guidelines, underwriting criteria may not always protect

Table of Contents

against loan defaults. Other factors may also affect a borrower's decision to default on a loan, such as property, cash flow, occupancy, maintenance needs and other financing obligations. If loan defaults increase, our risk-sharing obligation payments under the Fannie Mae DUS program may increase and such defaults and payments could have a material adverse effect on our results of operations and liquidity. In addition, any failure to pay our share of losses under the Fannie Mae DUS program could result in the revocation of our license from Fannie Mae and in the exercise of various remedies available to Fannie Mae under the Fannie Mae DUS program, including the transfer of our servicing portfolio to another Fannie Mae approved servicer.

If we fail to act proactively with delinquent borrowers in an effort to avoid a default, the number of delinquent loans could increase, which could have a material adverse effect on us.

As a loan servicer for GSEs and HUD, we are the primary contact with the borrower throughout the life of the loan and we are responsible, pursuant to agreements with the GSEs, HUD and institutional investors, for asset management. We are also responsible, together with the applicable GSE, HUD, or institutional investor, for taking actions to mitigate losses. We believe we have developed an effective asset management process for tracking each loan we service. However, we may be unsuccessful in identifying loans that are in danger of underperforming or defaulting or in taking appropriate action once those loans are identified. While we can make recommendations, decisions regarding loss mitigation are within the control of the GSEs, HUD and institutional investors. When loans become delinquent, we may incur additional expenses in servicing and asset managing the loans and we are required to advance principal and interest payments and tax and insurance escrow amounts. Our Agency Business could also be subject to a loss of its contractual servicing fee, and it could suffer losses of up to 20% (or more for loans that do not meet specific underwriting criteria or default within 12 months) of the unpaid principal balance of a Fannie Mae DUS loan with full risk-sharing. These items could have a negative impact on our cash flows and a negative effect on the net carrying value of the mortgage servicing right ("MSR") on our balance sheet and could result in a charge to our earnings. As a result of the foregoing, a rise in delinquencies could have a material adverse effect on our Agency Business.

A reduction in the prices paid for the loans and services of our Agency Business or an increase in loan or security interest rates by investors could materially and adversely affect our results of operations and liquidity.

The Agency Business's results of operations and liquidity could be materially and adversely affected if the GSEs, HUD or institutional investors lower the price they are willing to pay for loans or services or adversely change the material terms of their loan purchases or servicing arrangements with us. A number of factors determine the price we receive for our agency loans. With respect to Fannie Mae related originations, loans are generally sold as Fannie Mae insured securities to third-party investors. With respect to HUD related originations, loans are generally sold as Ginnie Mae securities to third-party investors. In both cases, the price paid to us reflects, in part, the competitive market bidding process for these securities.

Our Agency Business sells loans directly to Freddie Mac. Freddie Mac may choose to hold, sell or later securitize such loans. We believe terms set by Freddie Mac are influenced by similar market factors as those that impact the price of Fannie Mae insured or Ginnie Mae securities, although the pricing process differs. With respect to loans that are placed with institutional investors, the origination fees that we receive from borrowers are determined through negotiations, competition and other market conditions.

Loan servicing fees are based, in part, on the risk-sharing obligations associated with the loan and the market pricing of credit risk. The credit risk premium offered by Fannie Mae for new loans can change periodically but remains fixed once we enter into a commitment to sell the loan. Over the past several years, Fannie Mae loan servicing fees have been higher due to the market pricing of credit risk. There can be no assurance that such fees will continue to remain at such levels or that such levels will be sufficient if delinquencies occur.

Table of Contents

A significant portion of our Agency Business's revenue is derived from loan servicing fees, and declines in, or terminations of, servicing engagements or breaches of servicing agreements, including as a result of non-performance by third parties that we engage for back-office loan servicing functions, could have a material adverse effect on us.

We expect that loan servicing fees will constitute a significant portion of our Agency Business's revenues for the foreseeable future. Nearly all of these fees are derived from loans that have been originated and sold through GSE and HUD programs. A decline in the number or value of loans that the Agency Business originates for these investors or terminations of its servicing engagements will decrease these fees. HUD has the right to terminate our current servicing engagements for cause. In addition to termination for cause, Fannie Mae and Freddie Mac may terminate our servicing engagements without cause by paying a termination fee. The Agency Business is also subject to losses that may arise as a result of servicing errors, such as a failure to maintain insurance, pay taxes or provide required notices. In addition, we have contracted with a third party to perform certain routine back-office aspects of loan servicing. If we, or this third party, fail to perform, or we breach, or the third-party causes a breach, of our servicing obligations to the GSEs or HUD, our servicing engagements may be terminated. Declines or terminations of servicing engagements or breaches of such obligations could materially and adversely affect our financial results.

We satisfy a portion of our restricted liquidity requirements with Fannie Mae with a letter of credit issued by one of our lenders. If the letter of credit became unavailable to us for any reason, we could suffer a significant reduction in our cash flow from operations, or we may breach our obligations to Fannie Mae, which would have a material adverse effect on our Agency Business.

Our Agency Business is required to pledge restricted cash as collateral for possible losses resulting from loans originated under the Fannie Mae DUS program in accordance with the terms of loss sharing agreements with Fannie Mae. As of December 31, 2016, this requirement totaled \$38.1 million, of which \$25.0 million was satisfied with a letter of credit issued to Fannie Mae by one of our lenders and the balance funded by cash. Our letter of credit facility expires in October of 2018. The facility is collateralized by the servicing cash flow generated from the Agency Business's Fannie Mae portfolio and contains certain financial and other covenants. If we fail to satisfy any of these covenants, or we are unable to renew or replace this facility on favorable terms, or at all, it could have a material adverse effect on our cash flow and our financial condition. If we were unable to replace the letter of credit facility with either a similar facility or cash, we would be in breach of our obligations to Fannie Mae, which would have a material adverse effect on our business and operations.

The Agency Business is subject to the risk of failed loan deliveries, and even after a successful closing and delivery, may be required to repurchase the loan or to indemnify the investor if there is a breach of a representation or warranty made by the Agency Business in connection with the sale of the loan through a GSE or HUD program, any of which could have a material adverse effect on us.

Our Agency Business bears the risk that a borrower will choose not to close on a loan that has been pre-sold to an investor or that the investor will choose not to purchase a loan under certain circumstances, including, for example, a significant casualty event that impacts the condition of a property after we fund the loan and prior to the investor purchase date. We also bear the risk of serious errors in loan documentation that prevent timely delivery of the loan prior to the investor purchase date. A complete failure to deliver a loan could be a default under the warehouse line used to finance the loan. Although the Agency Business has experienced only three failed loan deliveries in its history, none of which had a material impact on its financial condition or results of operations, we can provide no assurance that we will not experience additional failed deliveries in the future or that any losses will not be material or will be mitigated through property insurance or payment protections.

Table of Contents

We must make certain representations and warranties concerning each loan we originate for GSE or HUD programs. The representations and warranties relate to our practices in the origination and servicing of the loans and the accuracy of the information being provided by us. For example, we are generally required to provide the following, among other, representations and warranties: we are authorized to do business and to sell or assign the loan; the loan conforms to the requirements of the GSE or HUD and certain laws and regulations; the underlying mortgage represents a valid first lien on the property and there are no other liens on the property; the loan documents are valid and enforceable; taxes, assessments, insurance premiums, rents and similar other payments have been paid or escrowed; the property is insured, conforms to zoning laws and remains intact; and we do not know of any issues regarding the loan that are reasonably expected to cause the loan to be delinquent or unacceptable for investment or adversely affect its value. We are permitted to satisfy certain of these representations and warranties by furnishing a title insurance policy.

In the event of a breach of any representation or warranty, investors could, among other things, require us to repurchase the full amount of the loan and seek indemnification for losses from it or, in the case of Fannie Mae, increase the level of risk-sharing on the loan. Our obligation to repurchase the loan is independent of our risk-sharing obligations. The GSEs or HUD could require us to repurchase a loan if representations and warranties are breached, even if the loan is not in default. Because the accuracy of many such representations and warranties generally is based on our actions or on third-party reports, such as title reports and environmental reports, we may not receive similar representations and warranties from other parties that would serve as a claim against them. Even if we receive representations and warranties from third parties and have a claim against them in the event of a breach, our ability to recover on any such claim may be limited. Our ability to recover against a borrower that breaches its representations and warranties to us may be similarly limited. Our ability to recover on a claim against any party would also be dependent, in part, upon the financial condition and liquidity of such party. Although we believe that we have capable personnel at all levels, uses qualified third parties and have established controls to ensure that all loans are originated pursuant to requirements established by the GSEs and HUD, in addition to its own internal requirements, there can be no assurance that we, our employees or third parties will not make mistakes. Any significant repurchase or indemnification obligations imposed on us could have a material adverse effect on the Agency Business.

For most loans we service under the Fannie Mae and HUD programs, we are required to advance payments due to investors if the borrower is delinquent in making such payments, which requirement could adversely impact our liquidity and harm our results of operations.

For most loans we service under the Fannie Mae DUS program, we are required to advance the principal and interest payments and tax and insurance escrow amounts if the borrower is delinquent in making loan payments. After four continuous months of making advances on behalf of the borrower, we can submit a reimbursement claim to Fannie Mae, which Fannie Mae may approve at its discretion. We are reimbursed by Fannie Mae for these advances in the event the loan is brought current. In the event of a default, any advances made by the Agency Business are used to reduce the proceeds required to settle any loss. Our advances may also be reimbursed, to the extent that the default settlement proceeds on the collateral exceed the unpaid principal balance.

Under the HUD program, we are obligated to advance tax and insurance escrow amounts and principal and interest payments on the underlying loan until the Ginnie Mae security has been fully paid. In the event of a default on a HUD insured loan, we can elect to assign the loan to HUD and file a mortgage insurance claim. HUD will reimburse approximately 99% of any losses of principal and interest on the loan and Ginnie Mae will reimburse most of the remaining losses of principal and interest.

Table of Contents

Although the Agency Business has historically funded all required advances from operating cash flow, there can be no assurance we will be able to do so in the future. If the Agency Business does not have sufficient operating cash flows to fund such advances, we may need to finance such amounts. Such financing may not be available to us, or, if it is available, may be costly and could prevent the Agency Business from pursuing its business and growth strategies.

Our Agency Business may not be able to hire and retain qualified loan originators or grow and maintain its relationships with key customers, and if we are unable to do so, our ability to implement our business and growth strategies could be limited.

The Agency Business depends on its loan originators to generate borrower clients by, among other things, developing relationships with commercial property owners, real estate agents and brokers, developers and others, which leads to repeat and referral business. Accordingly, we must be able to attract, motivate and retain skilled loan originators. The market for loan originators is highly competitive and may lead to increased costs to hire and retain them. We cannot guarantee that we will be able to attract or retain qualified loan originators. If we cannot attract, motivate or retain a sufficient number of skilled loan originators, or even if we can motivate or retain them but at higher costs, we could be materially and adversely affected.

Risks Relating to Regulatory Matters

If our Agency Business fails to comply with the numerous government regulations and program requirements of the GSEs and HUD, we may lose our approved lender status with these entities and fail to gain additional approvals or licenses for our business. We are also subject to changes in laws, regulations and existing GSE and HUD program requirements, including potential increases in reserve and risk retention requirements that could increase our costs and affect the way we conduct the Agency Business, which could materially and adversely affect our financial results.

The Agency Business's operations are subject to regulation by federal, state and local government authorities, various laws and judicial and administrative decisions, and regulations and policies of the GSEs and HUD. These laws, regulations, rules and policies impose, among other things, minimum net worth, operational liquidity and collateral requirements. Fannie Mae requires the Agency Business to maintain operational liquidity based on a formula that considers the balance of the loan and the level of credit loss exposure (level of risk-sharing). Fannie Mae requires its DUS lenders to maintain collateral, which may include pledged securities, for their risk-sharing obligations. The amount of collateral required under the Fannie Mae DUS program is calculated at the loan level and is based on the balance of the loan, the level of risk-sharing, the seasoning of the loans and the rating of the Fannie Mae DUS lender.

Regulatory authorities also require the Agency Business to submit financial reports and to maintain a quality control plan for the underwriting, origination and servicing of loans. Numerous laws and regulations also impose qualification and licensing obligations on the Agency Business and impose requirements and restrictions affecting, among other things: the Agency Business's loan originations; maximum interest rates, finance charges and other fees that we may charge; disclosures to consumers; the terms of secured transactions; collection, repossession and claims handling procedures; personnel qualifications; and other trade practices. The Agency Business is also subject to inspection by the GSEs, HUD, and regulatory authorities. Any failure to comply with these requirements could lead to, among other things, the loss of a license as an approved GSE or HUD lender, the inability to gain additional approvals or licenses, the termination of contractual rights without compensation, demands for indemnification or loan repurchases, class action lawsuits and administrative enforcement actions.

Regulatory and legal requirements are subject to change. For example, Fannie Mae increased its collateral requirements, on loans classified by Fannie Mae as Tier II, from 60 basis points to 75 basis

Table of Contents

points, effective as of January 1, 2013, which applied to a large portion of the Agency Business's outstanding Fannie Mae at risk portfolio. The incremental requirement for any newly originated Fannie Mae Tier II loans will be funded over the 48 months subsequent to the sale of the loan to Fannie Mae. Fannie Mae has indicated that it may increase collateral requirements in the future, which may adversely impact our Agency Business.

If we fail to comply with laws, regulations and market standards regarding the privacy, use, and security of customer information, or if we are the target of a successful cyber-attack, we may be subject to legal and regulatory actions and our reputation would be harmed.

We receive, maintain, and store the non-public personal information of our loan applicants. The technology and other controls and processes designed to secure our customer information and to prevent, detect, and remedy any unauthorized access to that information were designed to obtain reasonable, not absolute, assurance that such information is secure and that any unauthorized access is identified and addressed appropriately. We are not aware of any data breaches, successful hacker attacks, unauthorized access and misuse, or significant computer viruses affecting our networks that may have occurred in the past; however, our controls may not have detected, and may in the future fail to prevent or detect, unauthorized access to our borrower information. If this information is inappropriately accessed and used by a third party or an employee for illegal purposes, such as identity theft, we may be responsible to the affected applicant or borrower for any losses that may have been incurred as a result of misappropriation. In such an instance, we may be liable to a governmental authority for fines or penalties associated with a lapse in the integrity and security of our customers' information.

Risks Related to the Agency Business Acquisition

We may be unable to integrate the Agency Business successfully.

We have and will continue to devote significant management attention and resources to integrating the Agency Business practices and operations with our own. The areas in which we may face risks include:

challenges of effectively integrating our credit standards, which we believe are material contributors to our success;

failure to implement or improve internal controls, procedures and policies appropriate for a public company;

the potential inability to successfully maintain and develop the Agency Business mortgage loan origination and servicing portfolio;

complexities associated with managing the Acquisition of the Agency Business with our existing business; and

potential unknown liabilities and unforeseen increased expenses or delays associated with the Acquisition.

In addition, it is possible that the integration process could result in diversion of the attention of our management which could adversely affect our ability to achieve the anticipated benefits of the Acquisition.

Table of Contents

We may have failed to uncover all liabilities of the Agency Business through the due diligence process prior to the Acquisition, exposing us to potentially large, unanticipated costs.

We have assumed the liabilities of the Agency Business pursuant to the Acquisition and if we failed to identify all such liabilities, or inadequately valued them, it could materially and adversely affect our business, results of operations and financial condition.

Risks Related to Our Corporate and Ownership Structure

We are substantially controlled by our Manager and Mr. Kaufman.

Mr. Ivan Kaufman, our chairman, chief executive officer and president and the chief executive officer of our Manager, beneficially owns approximately 92% of the outstanding membership interests of our Manager. Our Manager has approximately 36.6% of the voting power of our outstanding stock as of December 31, 2016. As a result of Mr. Kaufman's beneficial ownership of stock held by our Manager as well as his beneficial ownership of additional shares of our common stock, Mr. Kaufman has approximately 37.3% of the voting power of our outstanding stock as of December 31, 2016. Because of his position with us and our Manager and his ability to effectively vote a substantial minority of our outstanding stock, Mr. Kaufman has significant influence over our policies and strategy.

Our charter generally does not permit ownership in excess of 5% of our capital stock, and attempts to acquire our capital stock in excess of this limit are ineffective without prior approval from our Board of Directors.

For the purpose of preserving our REIT qualification, our charter generally prohibits a beneficial or constructive ownership by any person of more than 5% (by value or by number of shares, whichever is more restrictive) of the outstanding shares of our common stock or 5% (by value) of our outstanding shares of stock of all classes or series (excluding OP Units), unless an exemption is granted by the Board of Directors. Our charter's constructive ownership rules are complex and may cause the outstanding stock owned by a group of related individuals or entities to be deemed to be constructively owned by one individual or entity. As a result, the acquisition of less than these percentages of the outstanding stock by an individual or entity could cause that individual or entity to own constructively in excess of these percentages of the outstanding stock and thus be subject to our charter's ownership limit. Any attempt to own or transfer shares of our common or preferred stock in excess of the ownership limit without the consent of the Board of Directors will result in the shares being automatically transferred to a charitable trust or otherwise voided. Our Board of Directors have approved resolutions under our charter allowing Ivan Kaufman and our Manager, in relation to Mr. Kaufman's controlling equity interest, C. Michael Kojaian, a former director, as well as three outside investors to own more than the ownership interest limit of our common stock stated in our charter.

Our staggered board and other provisions of our charter and bylaws may prevent a change in our control.

Our Board of Directors is divided into three classes of directors. The current terms of the Class I, Class II and Class III directors will expire in 2019, 2017 and 2018, respectively. Directors of each class are chosen for three year terms upon the expiration of their current terms, and each year one class of directors is elected by the stockholders. The staggered terms of our directors may reduce the possibility of a tender offer or an attempt at a change in control, even though a tender offer or change in control might be in the best interest of our stockholders. In addition, our charter and bylaws also contain other provisions that may delay or prevent a transaction or a change in control that might involve a premium price for our common stock or otherwise be in the best interest of our stockholders.

Table of Contents

Risks Related to Conflicts of Interest with Our Manager

We are dependent on our Manager with whom we have conflicts of interest.

We have 288 employees, including Messrs. Kaufman, Weber, Kilgore, and Guziewicz, and are dependent upon our Manager to provide certain services to us that are vital to our operations. Our Manager has approximately 36.6% of the voting power of the outstanding shares of our capital stock as of December 31, 2016 and Mr. Kaufman, our chairman and chief executive officer and the chief executive officer of our Manager, beneficially owns these shares. Mr. Martello, one of our directors, is the chief operating officer of Arbor Management, LLC (the managing member of our Manager) and a trustee of two trusts which own minority membership interests in our Manager. Mr. Bishar, our secretary, is general counsel to our Manager. Mr. Elenio, our chief financial officer and treasurer, is the chief financial officer of our Manager. Each of Messrs. Kaufman, Martello, Bishar, Elenio, Weber, Kilgore and Guziewicz are members of our Manager's executive committee and all, but excluding Mr. Kaufman, own minority membership interests in our Manager.

We may enter into transactions with our Manager outside the terms of the management agreement with the approval of a majority vote of the independent members of our Board of Directors. Transactions required to be approved by a majority of our independent directors include, but are not limited to, our ability to purchase securities, mortgages and other assets from our Manager or to sell securities and assets to our Manager. Our Manager may from time to time provide permanent mortgage loan financing to clients of ours, which will be used to refinance bridge financing provided by us. We and our Manager may also make loans to the same borrower or to borrowers that are under common control. Additionally, our policies and those of our Manager may require us to enter into intercreditor agreements in situations where loans are made by us and our Manager to the same borrower.

We have entered into a management agreement with our Manager under which our Manager provides us with certain professional services, including underwriting, accounting and treasury, compliance, marketing, information technology and human resources.

The results of our operations are dependent upon the availability of, and our Manager's ability to identify and capitalize on, investment opportunities. Our Manager's officers and employees are also responsible for providing the same services for our Manager's investment portfolio. As a result, they may not be able to devote sufficient time to the management of our business operations.

Our directors have approved very broad investment guidelines for our Manager and do not approve each investment decision made by our Manager.

Our Manager is authorized to follow very broad investment guidelines. Our directors will periodically review our investment guidelines and our investment portfolio. However, our board does not review each proposed investment. In addition, in conducting periodic reviews, the directors rely primarily on information provided to them by our Manager. Furthermore, transactions entered into by our Manager may be difficult or impossible to unwind by the time they are reviewed by the directors. Our Manager has great latitude within the broad investment guidelines in determining the types of assets it may decide are proper investments for us.

Our Manager has broad discretion to invest funds and may acquire Structured finance assets where the investment returns are substantially below expectations or that result in net operating losses.

Our Manager has broad discretion, within the general investment criteria established by our Board of Directors, to allocate our capital and to determine the timing of investment of such capital. Such discretion could result in allocation of capital to assets, particularly in our Structured Business, where

Table of Contents

the investment returns are substantially below expectations or that result in net operating losses, which would materially and adversely affect our business, operations and results.

The management compensation structure that we have agreed to with our Manager may cause our Manager to invest in high risk investments. Our Manager is entitled to a base management fee, which is based on an agreed upon budget that represents the actual cost of managing the business. Our Manager is also entitled to receive incentive compensation based in part upon our achievement of targeted levels of funds from operations. In evaluating investments and other management strategies, the opportunity to earn incentive compensation based on funds from operations may lead our Manager to place undue emphasis on the maximization of funds from operations at the expense of other criteria, such as preservation of capital, in order to achieve higher incentive compensation. Investments with higher yield potential are generally riskier or more speculative. This could result in increased risk to the value of our invested portfolio.

Risks Related to Our Status as a REIT

If we fail to remain qualified as a REIT, we will be subject to tax as a regular corporation and could face a substantial tax liability.

We conduct our operations to qualify as a REIT under the Internal Revenue Code. However, qualification as a REIT involves the application of highly technical and complex Internal Revenue Code provisions for which only limited judicial and administrative authorities exist. Even a technical or inadvertent mistake could jeopardize our REIT status. Our continued qualification as a REIT will depend on our satisfaction of certain asset, income, organizational, distribution, stockholder ownership and other requirements on a continuing basis. In addition, our ability to satisfy the requirements to qualify as a REIT depends in part on the actions of third parties over which we have no control or only limited influence, including in cases where we own an equity interest in an entity that is classified as a partnership for U.S. federal income tax purposes.

Furthermore, new tax legislation, administrative guidance or court decisions, in each instance potentially with retroactive effect, could make it more difficult or impossible for us to qualify as a REIT. If we fail to qualify as a REIT in any tax year, then:

We would be taxed as a regular domestic corporation, which, among other things, means we would be unable to deduct distributions to stockholders in computing taxable income and would be subject to federal income tax on our taxable income at regular corporate rates;

Any resulting tax liability could be substantial and would reduce the amount of cash available for distribution to stockholders; and

Unless we were entitled to relief under applicable statutory provisions, we would be disqualified from treatment as a REIT for the subsequent four taxable years following the year during which we lost our qualification, and thus, our cash available for distribution to stockholders would be reduced for each of the years during which we did not qualify as a REIT.

Even if we remain qualified as a REIT, we may face other tax liabilities that reduce our cash flow.

Even if we remain qualified for taxation as a REIT, we may be subject to certain federal, state and local taxes on our income and assets, including taxes on any undistributed income, tax on income from some activities conducted as a result of a foreclosure, and state or local income, property and transfer taxes, such as mortgage recording taxes. Any of these taxes would decrease cash available for distribution to our stockholders. In addition, in order to meet the REIT qualification requirements, or to avert the imposition of a 100% tax that applies to certain gains derived by a REIT from dealer property or inventory, we may hold some of our assets through taxable subsidiary corporations, the income of which would be subject to federal and state income tax.

Table of Contents

The Acquisition may have adverse tax consequences.

The Acquisition is intended to constitute, for U.S. federal income tax purposes, a part sale and a part tax-deferred contribution by ACM to ARLP, and the subsequent contribution of the acquired assets and operations to our subsidiary Arbor Realty SR, Inc. is intended to constitute a tax-deferred contribution to Arbor Realty SR, Inc. As a result, neither we nor holders of our common stock, in respect of those common stock holdings, are expected to recognize gain or loss for U.S. federal income tax purposes as a result of the Acquisition.

However, as REITs, we and Arbor Realty SR, Inc. generally are unable to directly hold certain of the acquired assets and operations in connection with the Acquisition. As a result, we are holding those assets and operations through taxable REIT subsidiaries (each, a TRS) of Arbor Realty SR, Inc. A TRS is subject to regular corporate income tax on its net income. As a result, the net income generated by those operations generally are subject to regular corporate income tax.

Moreover, under the REIT asset tests (i) no more than 25% of our total gross assets may consist of nonqualifying assets, including the stock or other securities of one or more TRSs and other nonqualifying assets (such as goodwill and similar assets we acquired as a result of the Acquisition), and (ii) for 2018 and subsequent taxable years, no more than 20% of our total gross assets may consist of the stock or other securities of one or more TRSs. In addition, although dividends payable by TRSs constitute qualifying income for purposes of the 95% REIT gross income test, they are nonqualifying income for purposes of the 75% REIT gross income test. Accordingly, if the value of the business we acquired or the income generated thereby increases relative to the value of our other, REIT-compliant assets and income, we or Arbor Realty SR, Inc. may fail to satisfy one or more of the requirements applicable to REITs. Although the Acquisition is not expected to adversely affect our ability, or that of Arbor Realty SR, Inc., to continue to qualify as a REIT in the future, no assurances can be given in that regard.

The "taxable mortgage pool" rules may increase the taxes that we or our stockholders may incur, and may limit the manner in which we effect future securitizations.

Certain of our securitizations have resulted in the creation of taxable mortgage pools for federal income tax purposes. So long as 100% of the equity interests in a taxable mortgage pool are owned by an entity that qualifies as a REIT, including our subsidiary Arbor Realty SR, Inc., we would generally not be adversely affected by the characterization of the securitization as a taxable mortgage pool. Certain categories of stockholders, however, such as foreign stockholders eligible for treaty or other tax benefits, stockholders with net operating losses, and certain tax-exempt stockholders that are subject to unrelated business income tax, could be subject to increased taxes on a portion of their dividend income from us that is attributable to the taxable mortgage pool. In addition, to the extent that our stock is owned by tax-exempt "disqualified organizations," such as certain government-related entities that are not subject to tax on unrelated business income, we could incur a corporate level tax on a portion of our income from the taxable mortgage pool. In that case, we may reduce the amount of our distributions to any disqualified organization whose stock ownership gave rise to the tax. Moreover, we could be precluded from selling equity interests in these securitizations to outside investors, or selling any debt securities issued in connection with these securitizations that might be considered to be equity interests for tax purposes. These limitations may prevent us from using certain techniques to maximize our returns from securitization transactions.

Complying with REIT requirements may cause us to forego otherwise attractive opportunities.

To qualify as a REIT for federal income tax purposes we must continually satisfy tests concerning, among other things, the sources of our income, the nature and diversification of our assets, the amounts we distribute to our stockholders and the ownership of our stock. We may be required to

Table of Contents

make distributions to stockholders at disadvantageous times or when we do not have funds readily available for distribution. Thus, compliance with the REIT requirements may hinder our ability to operate solely on the basis of maximizing profits.

Complying with REIT requirements may force us to liquidate otherwise attractive investments.

To qualify as a REIT we must ensure that at the end of each calendar quarter at least 75% of the value of our assets consists of cash, cash items, government securities and qualified REIT real estate assets. The remainder of our investment in securities generally cannot comprise more than 10% of the outstanding voting securities, or more than 10% of the total value of the outstanding securities, of any one issuer. In addition, in general, no more than 5% of the value of our assets (other than assets which qualify for purposes of the 75% asset test) may consist of the securities of any one issuer, and no more than 25% of the value of our total assets may be represented by securities of one or more taxable REIT subsidiaries. If we fail to comply with these requirements, we must correct such failure within 30 days after the end of the calendar quarter to avoid losing our REIT status and suffering adverse tax consequences. As a result, we may be required to liquidate otherwise attractive investments.

Liquidation of collateral may jeopardize our REIT status.

To continue to qualify as a REIT, we must comply with requirements regarding our assets and our sources of income. If we are compelled to liquidate investments to satisfy our obligations to future lenders, we may be unable to comply with these requirements, ultimately jeopardizing our status as a REIT.

We may be unable to generate sufficient revenue from operations to pay our operating expenses and to pay dividends to our stockholders.

As a REIT, we are generally required to distribute at least 90% of our taxable income each year to our stockholders. In order to qualify for the tax benefits afforded to REITs, we intend to declare quarterly dividends and to make distributions to our stockholders in amounts such that we distribute all or substantially all of our REIT taxable income each year, subject to certain adjustments. However, our ability to make distributions may be adversely affected by the risk factors described in this report. In the event of a future downturn in our operating results and financial performance or unanticipated declines in the value of our asset portfolio, we may be unable to declare or pay quarterly dividends. The timing and amount of dividends are in the sole discretion of our Board of Directors, which considers, among other factors, our earnings, financial condition, debt service obligations and applicable debt covenants, REIT qualification requirements and other tax considerations and capital expenditure requirements as our board may deem relevant from time to time.

Among the factors that could adversely affect our results of operations and impair our ability to make distributions to our stockholders are:

use of funds and our ability to make profitable structured finance investments;

defaults in our asset portfolio or decreases in the value of our portfolio;

anticipated operating expense levels may not prove accurate, as actual results may vary from estimates; and

increased debt service requirements, including those resulting from higher interest rates on variable rate indebtedness.

A change in any one of these factors could affect our ability to make distributions. If we are not able to comply with the restrictive covenants and financial ratios contained in future credit facilities, our ability to make distributions to our stockholders may also be impaired. We cannot assure that we

Table of Contents

will be able to make distributions to our stockholders in the future or that the level of any distributions we make will increase over time.

We may need to borrow funds to satisfy our REIT distribution requirements, and a portion of our distributions may constitute a return of capital. Debt service on any borrowings for this purpose will reduce our cash available for distribution.

To qualify as a REIT, we must generally, among other requirements, distribute at least 90% of our REIT taxable income, subject to certain adjustments, to our stockholders each year. To the extent that we satisfy the distribution requirement, but distribute less than 100% of our taxable income, we will be subject to federal corporate income tax on our undistributed taxable income. In addition, we will be subject to a 4% nondeductible excise tax if the actual amount that we pay out to our stockholders in a calendar year is less than a minimum amount specified under federal tax laws.

From time to time, we may generate taxable income greater than our net income for financial reporting purposes, or our taxable income may be greater than our cash flow available for distribution to our stockholders. If we do not have other funds available in these situations we could be required to borrow funds, issue stock or sell investments at disadvantageous prices or find another alternative source of funds to make distributions sufficient to enable us to satisfy the REIT distribution requirement and to avoid corporate income tax and the 4% excise tax in a particular year.

We may be subject to adverse legislative or regulatory tax changes that could reduce the market price of our common stock.

Under the current tax legislation, capital gain income (including capital gain dividends that we pay) and ordinary income (including dividends that we pay which are not capital gain dividends) are generally taxable at top marginal rates of 20% and 39.6%, respectively. In addition, certain U.S. stockholders who are individuals, trusts or estates and whose income exceeds certain thresholds are required to pay a 3.8% Medicare tax on our dividends and gain from the sale of our stock. A portion of our dividends may be eligible for preferential rates in the future as "qualified dividend income," which has a top individual tax rate of 20% to U.S. stockholders. At any time, the federal income tax laws governing REITs or the administrative interpretations of those laws may change. Any such changes may have a retroactive effect, and could adversely affect us or our stockholders.

Restrictions on share accumulation in REITs could discourage a change of control of us.

In order for us to qualify as a REIT, not more than 50% of the value of our outstanding shares of capital stock may be owned, directly or indirectly, by five or fewer individuals during the last half of a taxable year.

To prevent five or fewer individuals from acquiring more than 50% of our outstanding shares and a resulting failure to qualify as a REIT, our charter provides that, subject to certain exceptions, no person, including entities, may own, or be deemed to own by virtue of the attribution provisions of the Internal Revenue Code, more than 5% of the aggregate value or number of shares (whichever is more restrictive) of our outstanding common stock, or more than 5%, by value, of our outstanding shares of stock of all classes or series, in the aggregate.

Shares of our stock that would otherwise be directly or indirectly acquired or held by a person in violation of the ownership limitations are, in general, automatically transferred to a trust for the benefit of a charitable beneficiary, and the purported owner's interest in such shares is void. In addition, any person who acquires shares in excess of these limits is obliged to immediately give written notice to us and provide us with any information we may request in order to determine the effect of the acquisition on our status as a REIT.

Table of Contents

While these restrictions are designed to prevent any five individuals from owning more than 50% of our shares, they could also discourage a change in control of our company. These restrictions may also deter tender offers that may be attractive to stockholders or limit the opportunity for stockholders to receive a premium for their shares if an investor makes purchases of shares to acquire a block of shares.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our principle corporate offices are located in leased space at 333 Earle Ovington Boulevard, Uniondale, New York, 11553.

Item 3. Legal Proceedings

We are not involved in any material litigation nor, to our knowledge, is any material litigation threatened against us other than the litigation described in Note 16 Commitments and Contingencies Litigation of this report. We have not made a loss accrual for this litigation because we believe that it is not probable that a loss has been incurred and an amount cannot be reasonably estimated.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock is listed on the New York Stock Exchange ("NYSE") under the symbol "ABR." On February 24, 2017, the closing sale price for our common stock, as reported on the NYSE, was \$7.36 and there were 9,492 record holders of our common stock, including persons holding shares in broker accounts under street names. The following table shows the intra-day high and low sales prices per share as reported on the NYSE and dividends declared and paid for the past two years.

	High	Low	Dividends Declared		High	Low	Dividends Declared
2016				2015			
Fourth Quarter(1)	\$ 7.88	\$ 6.92	\$ 0.16	Fourth Quarter	\$ 7.31	\$ 6.25	\$ 0.15
Third Quarter	\$ 7.99	\$ 7.00	\$ 0.16	Third Quarter	\$ 6.94	\$ 6.03	\$ 0.15
Second Quarter	\$ 7.20	\$ 6.59	\$ 0.15	Second Quarter	\$ 7.21	\$ 6.55	\$ 0.15
First Quarter	\$ 7.35	\$ 6.01	\$ 0.15	First Quarter	\$ 7.42	\$ 6.75	\$ 0.13

(1) On March 1, 2017, our Board of Directors declared a dividend of \$0.17 per common share for the fourth quarter of 2016.

We are organized and conduct our operations to qualify as a REIT, which requires that we distribute at least 90% of taxable income. No assurance, however, can be given as to the amounts or timing of future distributions as such distributions are subject to our taxable earnings, financial condition, capital requirements and such other factors as our Board of Directors deems relevant.

Table of Contents**Equity Compensation Plan Information**

The following table presents information as of December 31, 2016 regarding the 2014 Omnibus Stock Incentive Plan (the "2014 Plan") and the incentive compensation provisions of our management agreement with our Manager, which are our only equity compensation plans:

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance
Equity compensation plans approved by security holders:			
2014 Omnibus Stock Incentive Plan(1)	0	N/A	735,013
Incentive compensation pursuant to management agreement(2)	0	N/A	See Note 3
Equity compensation plans not approved by security holders	N/A	N/A	N/A
Total	0	N/A	735,013

(1) On May 20, 2014, the stockholders approved the 2014 Plan.

(2) Pursuant to the terms of our management agreement with our Manager, at least 25% of the incentive compensation earned by our Manager is payable in shares of our common stock having a value equal to the average closing price per share for the last twenty days of the fiscal quarter for which the incentive compensation is being paid. Our Manager has the right to elect to receive 100% of the incentive compensation in shares of our common stock. See Note 20 - Agreements and Transactions with Related Parties for information on our management agreement and incentive compensation payable to our Manager thereunder.

(3) The number of securities remaining available for future issuance to our Manager as incentive compensation pursuant to the management agreement depends on the amount of incentive compensation earned by our Manager in the future and therefore is not yet determinable. We incurred no incentive compensation pursuant to the management agreement in 2016, 2015 or 2014.

Table of Contents**Performance Graph**

The graph below compares the cumulative total stockholder return for our common stock with the Russell 2000 Index, the NAREIT All REIT Index and the FTSE NAREIT Mortgage REITs Index for the five year period from December 31, 2011 to December 31, 2016. The graph assumes a \$100 investment on January 1, 2012 and the reinvestment of any dividends. This graph is not necessarily indicative of future stock price performance. The information included in the graph and table below was obtained from SNL Financial LC, Charlottesville, VA ©2016.

Total Return Performance

Index	Period Ended					
	12/31/11	12/31/12	12/31/13	12/31/14	12/31/15	12/31/16

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion in conjunction with the sections of this report entitled "Risk Factors," "Forward-Looking Statements," and "Selected Financial Data," along with the historical consolidated financial statements of Arbor Realty Trust, Inc. and Subsidiaries, including related notes, included in this report.

Overview

We invest in a diversified portfolio of structured finance assets in the multifamily and commercial real estate markets, primarily consisting of bridge and mezzanine loans, including junior participating interests in first mortgages, preferred and direct equity, which we refer to as our Structured Business. As a result of the Acquisition, we also now originate, sell and service a range of multifamily finance products through GSE, HUD and CMBS programs. We retain the servicing rights and asset management responsibilities on substantially all loans we originate and sell under the GSE and HUD programs. We refer to our activities we engage in as a result of the Acquisition as our Agency Business. See Note 1 Description of Business for additional details about our business segments and Note 3 Acquisition of Our Manager's Agency Platform for further details about the Acquisition. We organize and conduct our operations to qualify as a REIT. A REIT is generally not subject to federal income tax on its REIT taxable income that is distributed to its stockholders, provided that at least 90% of its REIT taxable income is distributed and provided that certain other requirements are met.

Our operating performance is primarily driven by the following factors:

Net interest income earned on our investments. Net interest income represents the amount by which the interest income earned on our assets exceeds the interest expense incurred on our borrowings. If the yield on our assets increases or the cost of borrowings decreases, this will have a positive impact on earnings. However, if the yield earned on our assets decreases or the cost of borrowings increases, this will have a negative impact on earnings. Net interest income is also directly impacted by the size and performance of our asset portfolio. We recognize the bulk of our net interest income from our Structured Business. Additionally, we recognize net interest income from loans originated through our Agency Business, which are generally sold within 60 days of origination.

Fees and other revenue recognized from originating, selling and servicing mortgage loans through the GSE and HUD programs. Revenue recognized from the origination and sale of mortgage loans consists of commitment fees, broker fees, loan assumption fees, loan origination fees and gains on sale of loans, net of any direct loan origination costs incurred. These fees and gains are collectively referred to as gain on sales, including fee-based services, net. We record income from MSRs at the time of commitment to the borrower, which represents the fair value of the expected net future cash flows associated with the rights to service mortgage loans that we originate, with the recognition of a corresponding asset upon sale. We also record servicing revenue which consists of fees received for servicing mortgage loans, net of amortization on the MSR assets recorded. These origination, selling and servicing fees and other revenue began in the third quarter as a result of the Acquisition and are included in our Agency Business results. Although we (through our Manager) have long-established relationships with the GSE and HUD agencies, our operating performance would be negatively impacted if our business relationships with these agencies deteriorate.

Income earned from our structured transactions. Our structured transactions are primarily comprised of investments in equity affiliates, which represent unconsolidated joint venture investments formed to acquire, develop and/or sell real estate-related assets. Income from these investments comprised a significant portion of our operating results during 2015 and 2016. Our joint venture investment in a residential mortgage banking business currently comprises the majority of income recognized from equity affiliates. If interest rates rise significantly in the future, it is likely that income

Table of Contents

from this investment will significantly decrease. In addition, we periodically receive distributions from our equity investments. It is difficult to forecast the timing of such payments, which can be substantial in any given quarter. We account for our structured transactions within our Structured Business.

Credit quality of our loans and investments, including our servicing portfolio. Effective portfolio management is essential to maximize the performance and value of our loan and investment and servicing portfolios. Maintaining the credit quality of the loans in our portfolios is of critical importance. Loans that do not perform in accordance with their terms may have a negative impact on earnings and liquidity.

Significant Developments During 2016

Acquisition of our Manager's Agency Business. On July 14, 2016, we completed the Acquisition of our Manager's Agency Business for an aggregate purchase price of \$275.8 million. The closing price of our common stock on the Acquisition date was \$7.29 per share; therefore, the estimated fair value of the total consideration given to our Manager approximated \$292.5 million. In connection with the Acquisition, we entered into a \$50.0 million preferred equity interest financing agreement with our Manager to finance a portion of the aggregate purchase price. Total revenues and pre-tax income of the Agency Business from the date of Acquisition, which is included in the consolidated statements of income for 2016, were \$85.6 million and \$41.8 million, respectively. We incurred legal and advisory fees totaling \$10.3 million during 2016 in connection with the Acquisition. As a result of the Acquisition, we now evaluate our results of operations from two business segments: our Structured Business and our Agency Business. See Note 3 Acquisition of Our Manager's Agency Platform and Note 22 Segment Information for additional details of the Acquisition and segments.

Capital Markets Activity. The following significant activity occurred during 2016:

In October 2016, we issued \$86.3 million aggregate principal amount of 6.50% convertible senior unsecured notes which mature on October 1, 2019 for net proceeds of \$82.4 million;

In August 2016, we amended the equity distribution agreement with JMP Securities LLC under which we may offer and sell up to 7,500,000 common shares in "At-The-Market" equity offerings with JMP Securities. We have not sold any shares under this agreement during 2016; and

In July 2016, we filed, and the SEC declared effective, a new shelf registration statement for \$500.0 million of debt securities, common stock, preferred stock, depositary shares and warrants.

Dividend. We raised our quarterly common dividend to \$0.17 per share in the first quarter of 2017, a 13% increase over the quarterly common dividend paid in the prior year comparable quarter of \$0.15 per share.

Agency Business Activity. The following significant activity occurred during 2016:

Loan originations from the Acquisition date (July 14, 2016) totaled \$2.15 billion;

Loan sales from the Acquisition date totaled \$1.49 billion, excluding \$418.2 million of sales on loans that were acquired as part of the Acquisition; and

Our servicing portfolio grew from \$11.94 billion at the Acquisition date to \$13.56 billion at December 31, 2016, a 14% increase since we acquired the servicing portfolio in July 2016.

Structured Business Activity. The following significant activity occurred during 2016:

Loan and Investment Activity

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

Our loan and investment portfolio grew 17% through loan originations that totaled \$847.7 million with a weighted average interest rate of 6.74%;

Table of Contents

Loan runoff was \$553.4 million comprised of payoffs totaling \$515.6 million with a weighted average interest rate of 7.03% and partial paydowns totaling \$37.8 million with a weighted average interest rate of 6.18%;

We recognized income from equity investments totaling \$13.0 million, primarily comprised of \$9.5 million from our interest in a residential mortgage banking business and \$2.8 million of cash distributions received from one of our equity investments. Through our investment in a joint venture that invests in non-qualified residential mortgages, we funded \$5.9 million of mortgage purchases and received cash distributions totaling \$13.0 million from the sale of mortgage assets, which was classified as a return of capital;

During 2016, we sold most of the remaining real estate owned assets, including three multifamily properties and a hotel property for a total of \$50.7 million, recognizing gains totaling \$11.6 million. We used the proceeds from the multifamily sale to payoff the \$27.1 million outstanding debt on these properties. In addition, we recorded an impairment loss of \$11.2 million on the remaining hotel property we own as a result of an impairment analysis performed in the second quarter; and

In April 2016, additional funds held in escrow from a defaulted first mortgage that paid off were released following an arbitration proceeding and we recognized income totaling \$1.9 million, net of fees and expenses. The \$1.9 million of income consisted of other interest income totaling \$2.5 million, partially offset by \$0.6 million of expenses, which were recorded in employee compensation and benefits. See Note 4 Loans and Investments for additional details.

Financing Activity

In December 2016, we completed the unwinding of a collateralized securitization vehicle ("CLO III"), redeeming \$281.3 million of outstanding notes which were repaid primarily from refinancing of the remaining assets within our financing facilities and other CLOs, as well as with cash held by CLO III, and expensed \$1.0 million of deferred fees into interest expense;

In September 2016, we entered into a three-year \$50.0 million credit facility to finance first mortgage loans on healthcare facilities that bears interest at rates ranging from 250 basis points to 325 basis points over LIBOR, depending on the type of healthcare facility financed, and matures in September 2019 with two one-year extension options; and

In August 2016, we closed our sixth collateralized securitization vehicle ("CLO VI") totaling \$325.0 million of real estate related assets and cash, of which \$250.3 million of investment-grade notes were issued and a \$74.8 million equity interest in the portfolio was retained by us.

Subsequent Events. The following significant activity occurred subsequent to December 31, 2016:

In January 2017, we issued an additional \$13.8 million of the 6.50% convertible senior unsecured notes under the same terms as the original issuance in October 2016, which increased the aggregate outstanding principal amount to \$100.0 million. We received net proceeds of \$13.4 million from this additional offering; and

In February 2017, we purchased, at a discount, \$20.9 million of our junior subordinated notes with a carrying value of \$19.9 million and expect to record a gain on extinguishment of debt of approximately \$7.2 million in the first quarter of 2017.

Current Market Conditions, Risks and Recent Trends

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

Our ability to execute our business strategy, particularly the growth of our Structured Business portfolio of loans and investments, is dependent on many factors, including our ability to access capital and financing on favorable terms. The previous economic downturn that occurred in 2007 through 2010

Table of Contents

had a significant negative impact on both us and our borrowers. If similar economic conditions recur in the future, it may limit our options for raising capital and obtaining financing on favorable terms and may also adversely impact the creditworthiness of our borrowers which could result in their inability to repay their loans.

We rely on the capital markets to generate capital for financing the growth of our Structured Business. During 2016, we closed a new collateralized securitization offering, whereby we issued \$250.3 million of investment-grade notes and entered into a new \$50.0 million financing facility. We also issued \$86.3 million aggregate principal amount of 6.50% convertible senior unsecured notes. In January 2017, we issued an additional \$13.8 million of the convertible senior notes. While there can be no assurance that we will continue to have access to the equity and debt markets, we will continue to pursue these and other available market opportunities as a means to increase our liquidity and capital base. If we were to experience another prolonged downturn in the stock or credit markets, it could cause us to seek alternative sources of potentially less attractive financing, and may require us to adjust our business plan accordingly.

As a result of the Acquisition, we are now a national originator with Fannie Mae and Freddie Mac, and the GSEs remain the most significant providers of capital to the multifamily market. The FHFA 2017 Scorecard established Fannie Mae's and Freddie Mac's 2017 Caps at \$36.5 billion each for the multifamily finance market, no change from the 2016 loan origination caps. Affordable housing loans, loans to small multifamily properties, and manufactured housing rental community loans continue to be excluded from the 2017 Caps. Additionally, the definition of the affordable loan exclusion continues to encompass affordable housing in high-and very-high cost markets and allows for an exclusion from the 2017 Caps for the pro-rata portion of any loan on a multifamily property that includes affordable units. The 2017 Scorecard provides FHFA the flexibility to review the estimated size of the multifamily loan origination market on a quarterly basis and proactively adjust the 2017 Caps upward should the market be larger than expected. In fact, in 2016, the caps were increased by \$5.5 billion to \$36.5 billion by year end. The 2017 Scorecard also provides exclusions for loans to properties in underserved markets including rural, small multifamily and senior assisted living and for loans to finance energy or water efficiency improvements. Our originations with the GSEs are highly profitable executions as they provide significant gains from the sale of our loans and non-cash gains related to MSR's. A decline in our GSE originations would negatively impact our financial results as non-cash revenues would decrease disproportionately with loan origination volume and future servicing fee revenue would be constrained or decline. We do not know whether the FHFA will impose stricter limitations on GSE multifamily production volume in the future.

The Federal Reserve raised its targeted Fed Funds Rate by 25 basis points during the fourth quarter of 2016. To date we have not been significantly impacted by this increase and do not anticipate a significant decline in origination volume or profitability as a result of the increase as interest rates remain at historically low levels. However, we cannot be certain that such a trend will continue as the number, timing, and magnitude of additional increases by the Federal Reserve, combined with other macroeconomic factors, may have a different effect on the commercial real estate market.

The commercial real estate markets continue to improve, but uncertainty remains as a result of global market instability, the current political climate and other matters and their potential impact on the U.S. economy and commercial real estate markets. In addition, the growth in multifamily rental rates seen over the past few years are showing signs of stabilizing. If real estate values decline again and/or rent growth subsides, it may limit our new mortgage loan originations since borrowers often use increases in the value of, and revenues produced from, their existing properties to support the purchase or investment in additional properties. Declining real estate values may also significantly increase the likelihood that we will incur losses on our loans in the event of default because the value of our collateral may be insufficient to cover our cost on the loan. Any sustained period of increased payment delinquencies, foreclosures or losses could adversely affect both our net interest income from loans as

Table of Contents

well as our ability to originate, sell and securitize loans, which would significantly impact our results of operations, financial condition, business prospects and our ability to make distributions to our stockholders.

The economic environment over the past few years has seen continued improvement in commercial real estate values, which has generally increased payoffs and reduced the credit exposure in our loan and investment portfolio. We have made, and continue to make, modifications and extensions to loans when it is economically feasible to do so. In some cases, a modification is a more viable alternative to foreclosure proceedings when a borrower cannot comply with loan terms. In doing so, lower borrower interest rates, combined with non-performing loans, would lower our net interest margins when comparing interest income to our costs of financing. However, since 2013, the levels of modifications and delinquencies have generally declined as property values increase and borrowers' access to financing has improved. If the markets were to deteriorate and another prolonged economic downturn was to occur, we believe there could be additional loan modifications and delinquencies, which may result in reduced net interest margins and additional losses throughout our sector.

Changes in Financial Condition

Assets Comparison of balances at December 31, 2016 to December 31, 2015:

Cash and cash equivalents decreased \$50.1 million, primarily due to net cash consideration paid in connection with the Acquisition, funding new loan originations and investments, distributions from unwinding CLO III, along with payment of distributions to our stockholders, partially offset by loan payoffs, proceeds from convertible notes, transferring loans into our CLO vehicles, property sales and interest from our investments.

Restricted cash decreased \$32.1 million, excluding the restricted cash of \$13.1 million from the Agency Business acquired, primarily due to the transfer of loans into our CLO vehicles and distributions from unwinding CLO III, partially offset by payoffs and paydowns on our CLO loans and issuance proceeds available from CLO VI. Restricted cash is kept on deposit with the trustees for our CLOs and primarily represents proceeds received from loan payoffs and paydowns that have not yet been disbursed to bondholders or redeployed into new assets, as well as unfunded loan commitments and interest payments received from loans. The restricted cash from the Agency Business acquired represents the cash collateral for possible losses resulting from the loans originated under the Fannie Mae DUS program in accordance with the terms of the loss-sharing agreements.

Our loan and investment portfolio balance from our Structured Business was \$1.80 billion and \$1.56 billion at December 31, 2016 and 2015, respectively. This increase was primarily due to loan originations exceeding loan payoffs and other reductions by \$294.3 million, see below for details.

Our portfolio had a weighted average current interest pay rate of 5.71% and 5.63% at December 31, 2016 and 2015, respectively. Including certain fees and costs associated with the loan and investment portfolio, the weighted average current interest rate was 6.39% and 6.32% at December 31, 2016 and 2015, respectively. Advances on our financing facilities totaled \$1.35 billion and \$1.18 billion at December 31, 2016 and 2015, respectively, with a weighted average funding cost of 3.91% and 3.70%, respectively, which excludes changes in the market value of certain interest rate swaps and financing costs. Including the financing costs, the weighted average funding rate was 4.45% and 4.12%

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

Table of Contents

at December 31, 2016 and 2015, respectively. Activity from our Structured Business portfolio was comprised of the following:

	Year Ended December 31,	
	2016	2015
Loans originated	\$ 847,682,500	\$ 828,217,500
Number of loans	70	70
Weighted average interest rate	6.74%	6.87%
Loans paid-off	\$ 515,612,734	\$ 716,154,152
Number of loans	45	66
Weighted average interest rate	7.03%	6.90%
Loans partially paid-off	\$ 37,796,000	\$ 112,515,404
Number of loans	9	16
Weighted average interest rate	6.18%	5.08%
Loans extended	\$ 569,134,421	\$ 274,350,887
Number of loans	51	41

Our loans held-for-sale, net from the Agency Business was \$673.4 million at December 31, 2016, which represents commercial mortgages originated through the Fannie Mae, Freddie Mac and HUD programs. These loans are generally sold within 60 days from the loan origination date. Loan and investment activity from our Agency Business for 2016 was comprised of the following:

	Loan Originations	Loan Sales(1)
Fannie Mae	\$ 1,668,581,271	\$ 1,130,391,796
Freddie Mac	456,421,660	332,319,660
FHA	24,629,823	29,672,932
Total	\$ 2,149,632,754	\$ 1,492,384,388

(1) Excludes \$418.2 million of sales on loans that were acquired on July 14, 2016 as part of the Acquisition.

Since December 31, 2016, our Structured Business originated 9 new loans totaling \$86.3 million and received a total of \$63.7 million for the repayment of 6 loans. The Agency Business originated 91 new loans totaling \$641.7 million and sold 133 loans totaling \$1.00 billion.

Our capitalized mortgage servicing rights, net from the Agency Business acquired was \$227.7 million at December 31, 2016, which represents the estimated value of our rights to service mortgage loans for others. The weighted average estimated life remaining of our MSRs was approximately 6.9 years at December 31, 2016.

Investments in equity affiliates increased \$3.1 million, primarily due to income of \$9.5 million recognized from our investment in a residential mortgage banking business and an additional \$5.9 million contribution made in our investment in non-qualified residential mortgages. These increases were substantially offset by cash distributions totaling \$13.0 million received from our non-qualified residential mortgage investment as a result of the joint venture selling most of its mortgage assets, which were classified as a return of capital.

Our real estate owned assets (owned and held-for-sale) decreased \$50.0 million, primarily from selling three multifamily properties and a hotel property with an aggregate carrying value of \$37.3 million and recording an \$11.2 million impairment on a hotel property.

Table of Contents

We recorded intangible assets totaling \$73.3 million and goodwill of \$26.7 million in connection with the Acquisition. Of the intangible asset total, \$44.3 million represents finite-lived assets that will be amortized over the estimated useful lives of such assets, which was estimated to be 8.4 years at the Acquisition date.

Other assets increased \$18.6 million, primarily from assets acquired in the Acquisition.

Liabilities Comparison of balances at December 31, 2016 to December 31, 2015:

Credit facilities and repurchase agreements increased \$110.2 million, excluding credit facilities totaling \$660.1 million related to the Agency Business. The increase was primarily due to funding of new loan activity. The Agency Business credit facilities are used to fund loans that are originated through the GSE and HUD programs and are primarily secured by our loans held-for-sale, which are generally sold within 60 days from loan origination.

Collateralized loan obligations decreased \$30.5 million due to the unwind of CLO III totaling \$281.3 million, substantially offset by the issuance of CLO VI, where we issued \$250.3 million of CLO notes.

In the fourth quarter of 2016, we issued \$86.3 million aggregate principal amount of 6.50% convertible senior unsecured notes for net proceeds of \$82.4 million. The principal amount, net of deferred financing fees, recorded as a liability was \$80.2 million and the remaining \$2.2 million was allocated to the conversion feature and recorded as a component of additional paid-in capital. See Note 12 Debt Obligations for additional details.

Mortgage note payable real estate owned decreased \$27.2 million, due to the pay-off of these notes with the proceeds from the sale of the remaining multifamily properties.

In connection with the Acquisition, we entered into a \$50.0 million preferred equity interest financing agreement with our Manager to finance a portion of the purchase price. See Note 12 Debt Obligations.

Due to borrowers increased \$46.4 million, due to an increase in funds held on loan originations.

We assumed an allowance for loss-sharing in connection with the Acquisition. We maintain this allowance to satisfy our obligation to partially guarantee the performance of the agency loans sold under the Fannie Mae DUS program. Generally, we are responsible for losses equal to the first 5% of the UPB and a portion of any additional losses to an overall maximum of 20% of the original principal balance. At December 31, 2016, this allowance was \$32.4 million.

Other liabilities increased \$35.1 million, primarily from the liabilities assumed with the Acquisition, which is comprised mostly of accrued compensation costs and a deferred tax liability.

Equity

In connection with the Acquisition, we issued 21,230,769 OP Units to our Manager to satisfy a portion of the purchase price. The value of these OP units at the date of Acquisition was \$154.8 million. Each of these OP Units are paired with one share of our Special Voting Preferred Shares having a par value of \$0.01 per share and is entitled to one vote each on any matter submitted for stockholder approval. The value of the OP Units are reflected as noncontrolling interest in the consolidated balance sheets.

Table of Contents*Distributions*

The following table presents dividends declared (on a per share basis) for 2016:

Common Stock		Preferred Stock			
Declaration Date	Dividend	Declaration Date	Series A	Dividend(1)	
				Series B	Series C
February 24, 2016	\$ 0.15	February 1, 2016	\$ 0.515625	\$ 0.484375	\$ 0.53125
May 4, 2016	\$ 0.15	May 2, 2016	\$ 0.515625	\$ 0.484375	\$ 0.53125
August 3, 2016	\$ 0.16	August 1, 2016	\$ 0.515625	\$ 0.484375	\$ 0.53125
November 2, 2016	\$ 0.16	November 2, 2016	\$ 0.515625	\$ 0.484375	\$ 0.53125

(1)

The dividend declared on February 1, 2016 was for December 1, 2015 through February 29, 2016. The dividend declared on May 2, 2016 was for March 1, 2016 through May 31, 2016. The dividend declared on August 1, 2016 was for June 1, 2016 through August 31, 2016. The dividend declared on November 2, 2016 was for September 1, 2016 through November 30, 2016.

Common Stock On March 1, 2017, the Board of Directors declared a cash dividend of \$0.17 per share of common stock. The dividend is payable on March 21, 2017 to common stockholders of record as of the close of business on March 15, 2017.

Preferred Stock On February 3, 2017, the Board of Directors declared a cash dividend of \$0.515625 per share of 8.25% Series A preferred stock; a cash dividend of \$0.484375 per share of 7.75% Series B preferred stock; and a cash dividend of \$0.53125 per share of 8.50% Series C preferred stock. These amounts reflect dividends from December 1, 2016 through February 28, 2017 and are payable on February 28, 2017 to preferred stockholders of record on February 15, 2017.

Deferred Compensation

We issued 352,630 shares of restricted stock to employees of ours and our Manager, including our chief executive officer, 67,260 shares to the independent members of the Board of Directors and up to 421,348 performance-based restricted common stock units to our chief executive officer in the first quarter of 2016. See Note 18 Equity for additional details.

Other non-recourse				1,749	128	7.32%
Interest rate swaps		5,201			6,255	
Total interest-bearing liabilities	\$ 1,321,334	57,943	4.37%	\$ 1,171,140	49,720	4.25%
Net interest income		\$ 51,679			\$ 57,049	

(1) Based on UPB for loans, amortized cost for securities and principal amount for debt.

(2) Weighted average yield calculated based on annualized interest income or expense divided by average carrying value.

Net Interest Income

Interest income increased \$2.9 million, or 3%, for 2016 as compared to 2015, excluding \$6.6 million of interest income associated with the Agency Business acquired. The impact of our average core interest-earning assets increasing 7% from \$1.59 billion for 2015 to \$1.70 billion for 2016 was partially offset by a 4% decrease in the average yield on core interest-earning assets from 6.67% for 2015 to 6.38% for 2016. The increase in our core interest-earning assets was primarily due to loan originations exceeding loan payoffs in 2016. The decrease in the average

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

yield on core interest-earning assets was primarily due to \$4.3 million in interest income and fee income from accelerated runoff in 2015, partially offset by \$2.0 million of yield maintenance received on a loan payoff in the second quarter of 2016 and an increase in the average LIBOR rate.

Other interest income, net was \$2.5 million and \$7.9 million for 2016 and 2015, respectively. During the first quarter of 2015, we acquired a \$116.0 million defaulted first mortgage note, at par,

Table of Contents

that paid off in the subsequent quarter. We initially recognized net other interest income of \$7.9 million at the time the note paid off during 2015. In April 2016, additional funds held in escrow from the note payoff were released following an arbitration proceeding and we recognized net other interest income totaling \$2.5 million.

Interest expense increased \$8.2 million, or 17%, for 2016 as compared to 2015, excluding \$5.7 million of interest expense associated with the Agency Business acquired. The increase was primarily due to a 13% increase in the average balance of our interest-bearing liabilities from \$1.17 billion for 2015 to \$1.32 billion for 2016 and a 3% increase in the average cost of our interest-bearing liabilities from 4.25% for 2015 to 4.37% for 2016. The increase in the average debt balance was due to increased leverage on our portfolio, as well as an increase in the average loan balance from portfolio growth and the issuance of \$86.3 million in convertible senior unsecured notes in the fourth quarter of 2016. The increase in the average cost of our interest-bearing liabilities was due to a period-over-period increase in the average LIBOR rate and a higher rate on the convertible senior unsecured notes issued as compared to our overall portfolio, partially offset by a \$1.1 million decrease in accelerated fees resulting from the unwind of several of our securitization vehicles and the termination of certain swaps in 2015.

Agency Business Revenue

Gain on sales, including fee-based services, net was \$24.6 million for 2016. The agency loan sales for this period were \$1.49 billion and the sales margin (gain on sales, including fee-based services, net as a percentage of loan sales volume) was 165 basis points.

Income from MSR was \$44.9 million for 2016. The loan commitments volume was \$2.13 billion and the MSR rate (income from MSR as a percentage of loan commitments volume) was 211 basis points.

Servicing revenue, net was \$9.1 million for 2016, which was comprised of servicing revenue of \$30.8 million, partially offset by amortization of MSR of \$21.7 million. The Agency Business servicing portfolio was \$13.56 billion with a weighted average servicing fee of 48 basis points at December 31, 2016.

Other Revenue

Property operating results (income less expenses) decreased \$3.0 million, or 69%, for 2016 as compared to 2015, primarily due to the sale of several properties during 2015 and 2016, partially offset by the addition of an office building in August 2015.

Other Expenses

Employee compensation and benefits expense decreased \$2.6 million, or 15%, for 2016 as compared to 2015, excluding \$23.8 million of employee compensation and benefits expense associated with the Agency Business acquired. The decrease was primarily due to expenses totaling \$2.2 million related to both the \$116.0 million defaulted first mortgage that was repaid in 2015 and distributions received from one of our equity investments in 2015.

Selling and administrative expenses remained relatively flat for 2016 as compared to 2015, excluding \$7.9 million of selling and administrative expenses associated with the Agency Business acquired.

Acquisition costs of \$10.3 million and \$3.1 million for 2016 and 2015, respectively, represent costs incurred related to the Acquisition, which was completed in July 2016. See Note 3 Acquisition of Our Manager's Agency Platform for further details.

Table of Contents

Depreciation and amortization decreased \$3.0 million, or 55%, for 2016 as compared to 2015, excluding \$2.6 million of depreciation and amortization associated with the acquired assets of the Agency Business. The decrease was primarily due to the sale of several real estate owned properties during 2015 and 2016.

Impairment loss on real estate owned was \$11.2 million for 2016. During the second quarter of 2016, we determined that our hotel property exhibited indicators of impairment and, as a result, we recorded an impairment loss of \$11.2 million.

Provision for loss sharing was \$2.2 million for 2016, representing our estimated total loss-sharing obligations needed to satisfy our partial guarantee for the performance of Agency Business loans sold under the Fannie Mae DUS program.

Provision for loan losses (net of recoveries) totaled \$(0.1) million and \$4.5 million for 2016 and 2015, respectively. During 2015, we recognized a \$6.5 million provision for loan losses related to five loans and recorded net recoveries of previously recorded loan losses of \$2.0 million.

Management fee related party increased \$1.7 million, or 16%, for 2016 as compared to 2015, primarily due to compensation related costs incurred by employees of our Manager in connection with services they performed related to the Agency Business acquired.

Gain on Acceleration of Deferred Income / Loss on Termination of Swaps

In connection with the unwind of CDO I, II and III in 2015, we recorded a \$19.2 million gain that was previously deferred due to the reissuance of CDO I, CDO II and CDO III bonds in 2010 as a result of a deferral of the gain from the extinguishment of trust preferred debt. See Note 12 Debt Obligations for more details about this gain. We also terminated the basis and interest rate swaps associated with these CDOs and recognized a loss of \$4.6 million. See Note 14 Derivative Financial Instruments for more details about the swap termination.

Gain on Sale of Real Estate

During 2016, we sold the three multifamily properties and a hotel property for \$50.7 million and recognized a gain of \$11.6 million. During 2015, we sold three hotel properties and a multifamily property for \$41.1 million and recognized a gain of \$7.8 million.

Income from Equity Affiliates

Income from equity affiliates increased \$0.7 million, or 6%, for 2016 as compared to 2015. In 2016, we recognized income of \$9.5 million from our investment in a residential mortgage banking business and \$2.8 million from a distribution received from one of our equity investments. In 2015, we recognized income of \$6.6 million from our investment in a residential mortgage banking business and received \$5.5 million in distributions from one of our equity investments.

Provision for Income Taxes

The provision for income taxes was \$0.8 million for 2016, which consisted of a current provision of \$2.4 million and a deferred benefit of \$1.5 million. The provision is net of net operating losses of \$11.4 million and the release of a valuation allowance of \$5.4 million at the TRS Consolidated Group. The provision primarily represents federal and state taxes related to the Agency Business which was acquired by the TRS Consolidated Group on July 14, 2016.

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

Table of Contents

Net Income Attributable to Noncontrolling Interest

The noncontrolling interest relates to the 21,230,769 OP Units issued to our Manager to satisfy a portion of the aggregate purchase price of the Acquisition, which represents approximately 29.2% of our outstanding stock at December 31, 2016. The OP Units are redeemable for cash, or at our option, for shares of our common stock on a one-for-one basis.

Total interest-bearing liabilities	\$ 1,171,140	49,720	4.25%	\$ 1,200,850	47,903	3.99%
Net interest income		\$ 57,049			\$ 58,813	

(1) Based on UPB for loans, amortized cost for securities and principal amount for debt.

(2) Weighted average yield calculated based on annualized interest income or expense divided by average carrying value.

Net Interest Income

Interest income increased \$0.1 million in 2015 as compared to 2014. This increase was primarily due to a 3% increase in the average yield on core interest-earning assets from 6.47% for 2014 to 6.67% for 2015, due to higher interest rates on our originations as compared to runoff during 2014 and 2015. The increase was partially offset by a 3% decrease in our average core interest-earning assets from \$1.64 billion for 2014 to \$1.59 billion for 2015, primarily due to the full impact in 2015 of loan payoffs exceeding loan originations in 2014.

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

Other interest income, net was \$7.9 million for 2015. During the first quarter of 2015, we acquired a \$116.0 million defaulted first mortgage note, at par. In the second quarter of 2015, the first mortgage note paid off and as a result, we recognized net other interest income of \$7.9 million. There was no such income in 2014.

Interest expense increased \$1.8 million, or 4%, for 2015 as compared to 2014. The average cost of our interest-bearing liabilities increased 7% from 3.99% for 2014 to 4.25% for 2015, primarily due to a

Table of Contents

\$1.1 million increase in the acceleration of fees resulting from the unwind of several of our securitization vehicles as compared to 2014, as well as from the issuance of \$97.9 million of senior unsecured notes in 2014, which carry a higher cost of debt. The increase was partially offset by a 2% decrease in the average balance of our interest-bearing liabilities from \$1.20 billion for 2014 to \$1.17 billion for 2015. The decrease in the average balance was primarily due to the corresponding decrease in our average core interest-earning assets, partially offset by the full impact of our senior unsecured notes issued in May and August of 2014.

Other Revenue

Property operating results (income less expenses) are comprised of our multifamily and hotel properties as well as an office building acquired in 2015. Property operating results decreased \$0.4 million, or 7%, for 2015 as compared to 2014, primarily due to the sales of several properties during 2014 and 2015.

Other income, net decreased \$1.4 million, or 84%, for 2015, as compared to 2014. During 2014, we recognized \$0.9 million of net interest income and gain on the sale of Residential Mortgage Backed Securities ("RMBS") investments, as well as received \$0.6 million more in miscellaneous asset management and loan modification fees as compared to 2015.

Other Expenses

Employee compensation and benefits expense increased \$3.5 million, or 25%, for 2015 as compared to 2014, primarily due to expenses totaling \$2.2 million related to the \$116.0 million defaulted first mortgage that was repaid in 2015 and the distributions received from an equity investment during 2015 as well as a \$1.0 million increase in stock-based compensation due to grants issued in 2014 and 2015.

Acquisition costs of \$3.1 million for 2015 represent costs incurred related to the Acquisition, which was completed in July 2016. See Note 3 Acquisition of Our Manager's Agency Platform for further details.

Depreciation and amortization decreased \$1.9 million, or 26%, for 2015 as compared to 2014, primarily due to the sale of several of our multifamily and hotel properties during 2014 and 2015.

Provision for loan losses (net of recoveries) totaled \$4.5 million and \$(0.3) million for 2015 and 2014, respectively. During 2015, we recognized a \$6.5 million provision for loan losses related to five loans and recorded net recoveries of previously recorded loan losses of \$2.0 million. During 2014, we recognized a \$9.0 million provision for loan losses related to four loans and recorded net recoveries of previously recorded loan losses of \$9.3 million.

Management fees increased \$1.0 million, or 10%, for 2015, as compared to 2014. These amounts represent compensation in the form of base management fees, on a cost reimbursement basis. The increase in management fees was due to an increase in allocable costs incurred by our Manager in managing our business from 2014 to 2015.

Gain on Acceleration of Deferred Income / Loss on Termination of Swaps

In connection with the unwind of CDO I and II in the first quarter of 2015 and CDO III in the third quarter of 2015, we recorded a \$19.2 million gain that was previously deferred due to the reissuance of CDO I, CDO II and CDO III bonds in 2010 as a result of a deferral of the gain from the extinguishment of trust preferred debt. See Note 12 Debt Obligations for more details about this gain. We also terminated the basis and interest rate swaps associated with these CDOs and recognized a loss of \$4.6 million. See Note 14 Derivative Financial Instruments for more details about the swap termination.

Table of Contents

Gain on Sale of Real Estate

During 2015, we sold three hotel properties for \$28.7 million and recognized a gain of \$4.8 million and sold a multifamily property for \$12.4 million recognizing a gain of \$3.0 million. During 2014, we sold three multifamily properties for \$21.3 million and recognized a gain of \$1.6 million.

Gain on Sale of Equity Interest / Incentive Management Fee

In the third quarter of 2014, we recognized a gain of \$77.1 million as a result of our debt guarantee on the 450 West 33rd Street property being terminated in connection with a refinancing of the existing debt on this property, net of a \$19.0 million incentive management fee that was prepaid in relation to the transaction. We also recognized a gain on sale of equity interest of \$7.9 million in the second quarter of 2014 due to the sale of an interest in properties held by one of our equity affiliates. See Note 9 Investments in Equity Affiliates for further details. There were no such gains in 2015.

Income from Equity Affiliates

Income from equity affiliates increased \$12.1 million for 2015 as compared to 2014, primarily due to \$6.6 million of income earned on our investment in a residential mortgage banking business, which we made in the first quarter of 2015, as well as from \$5.5 million of income from distributions from one of our equity investments. See Note 9 Investments in Equity Affiliates for more details.

Liquidity and Capital Resources

Sources of Liquidity. Liquidity is a measurement of the ability to meet potential cash requirements. Our short-term and long-term liquidity needs include ongoing commitments to repay borrowings, satisfaction of collateral requirements under the Fannie Mae DUS risk-sharing agreement and as an approved designated seller/servicer of Freddie Mac's SBL Program, operational liquidity requirements of the GSE agencies, funding future loans and investments, funding operating costs and distributions to our stockholders as well as other general business needs. Our primary sources of funds for liquidity consist of proceeds from equity and debt offerings, debt facilities and cash flows from our operations. Our equity sources, depending on market conditions, consist of proceeds from capital market transactions including the issuance of common and/or preferred equity securities. Our debt sources include the issuance of floating rate notes resulting from our CLOs, the issuance of various forms of senior unsecured notes, convertible senior unsecured notes, junior subordinated notes and borrowings under warehousing facilities. Net cash flows from operations include interest income from our loan and investment portfolio reduced by interest expense on our debt obligations, revenues from our Agency Business, cash generated from our real estate operations and other investments reduced by expenses and repayments of outstanding loans and investments.

We believe our existing sources of funds will be adequate for meeting our short-term and long-term liquidity needs. A majority of our loans and investments are financed under existing debt obligations and their credit status is continuously monitored; therefore, these loans and investments are expected to generate a generally stable return. Our ability to meet our long-term liquidity and capital resource requirements is subject to obtaining additional debt and equity financing. Any decision by our lenders and investors to enter into such transactions with us will depend upon a number of factors, such as our financial performance, compliance with the terms of our existing credit arrangements, industry or market trends, the general availability of and rates applicable to financing transactions, such lenders' and investors' resources and policies concerning the terms under which they make such capital commitments and the relative attractiveness of alternative investment or lending opportunities.

While we have been successful in obtaining proceeds from debt and equity offerings, CLOs and certain financing facilities, current conditions in the capital and credit markets have and may continue to make certain forms of financing less attractive and, in certain cases, less available. Therefore we will

Table of Contents

continue to rely, in part, on cash flows provided by operating and investing activities for working capital.

To maintain our status as a REIT under the Internal Revenue Code, we must distribute annually at least 90% of our REIT taxable income. These distribution requirements limit our ability to retain earnings and thereby replenish or increase capital for operations. However, we believe that our capital resources and access to financing will provide us with financial flexibility and market responsiveness at levels sufficient to meet current and anticipated capital requirements.

Cash Flows. Cash flows used in operating activities totaled \$197.6 million during 2016. Our cash flows from operating activities consisted primarily of net cash outflows from held-for-sale loans of \$238.3 million pertaining to our Agency Business, partially offset by net income, adjusted for noncash items, of \$44.5 million. We had net cash outflows from loans-held-for-sale during 2016 due to the timing of agency loan sales as agency loans are generally sold within 60 days of origination. At December 31, 2016, we had loans held-for-sale, net totaling \$673.4 million that are expected to be sold in the first quarter of 2017.

Cash flows used in investing activities totaled \$201.9 million during 2016. Loan and investment activity (originations and payoffs/paydowns) comprise the bulk of our investing activities. Loan originations from our Structured Business totaling \$870.2 million, net of payoffs and paydowns of \$667.9 million, resulted in a net cash outflow of \$202.3 million. Cash paid for the Acquisition was \$68.4 million, net of cash acquired. These cash outflows were partially offset by net proceeds received from the sale of properties of \$49.0 million and cash distributions received from our investments in equity affiliates of \$12.5 million.

Cash flows provided by financing activities totaled \$349.5 million during 2016 and consisted primarily of \$3.92 billion of proceeds from the utilization of our debt facilities to fund new loan originations, \$250.3 million of proceeds received from the issuance of CLO VI and \$86.3 million of proceeds received from the issuance of convertible senior unsecured notes, which was primarily offset by \$3.57 billion in paydowns of our debt facilities, outflows of \$281.3 million for the redemption of CLO III and \$46.2 million in distributions to our OP Units, common and preferred stock.

Agency Business Requirements. The Agency Business is subject to supervision by certain regulatory agencies. Among other things, these agencies require us to meet certain minimum net worth, operational liquidity and restricted liquidity collateral requirements, and compliance with reporting requirements. Our adjusted net worth and liquidity exceeded the agencies' requirements as of December 31, 2016. See Note 16 Commitments and Contingencies for additional details about our performance regarding these requirements.

We also enter into contractual commitments with borrowers providing rate lock commitments while simultaneously entering into forward sale commitments with investors. These commitments are outstanding for short periods of time (generally less than 60 days) and are described in further detail in Note 14 Derivative Financial Instruments and Note 15 Fair Value.

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

Table of Contents

Debt Facilities. We maintain various forms of short-term and long-term financing arrangements. Borrowings underlying these arrangements are primarily secured by a significant amount of our loans and investments. The following is a summary of our debt facilities:

Debt Facilities	Commitment	December 31, 2016		Maturity Dates
		Principal Balance(1)	Available	
Structured Business				
Credit facilities and repurchase agreements	\$ 502,532,966	\$ 248,365,039	\$ 254,167,927	2017 - 2020
Collateralized loan obligations(2)	737,000,000	737,000,000		2017 - 2020
Senior unsecured notes	97,860,025	97,860,025		2021
Convertible unsecured senior notes	86,250,000	86,250,000		2019
Junior subordinated notes	175,858,000	175,858,000		2034 - 2037
Structured transaction business total	1,599,500,991	1,345,333,064	254,167,927	
Agency Business				
Credit facilities(3)	1,275,000,000	660,315,159	614,684,841	2017
Other				
Related party financing	50,000,000	50,000,000		2021
Consolidated total	\$ 2,924,500,991	\$ 2,055,648,223	\$ 868,852,768	

- (1) Principal balance excludes the impact of deferred financing costs.
- (2) Maturity dates represent the weighted average remaining maturity based on the underlying collateral as of December 31, 2016.
- (3) The ASAP agreement we have with Fannie Mae has no expiration date. The ASAP limit was temporarily increased \$100.0 million through March 31, 2017. In addition, two of our credit facilities were temporarily increased a total of \$375.0 million through January 31, 2017.

These debt facilities, including their restrictive covenants, are described in detail in Note 12 Debt Obligations.

Contractual Obligations. As of December 31, 2016, we had the following material contractual obligations:

Contractual Obligations	Payments Due by Period(1)						Totals
	Year Ended December 31,						
	2017	2018	2019	2020	2021	Thereafter	
Credit facilities and repurchase agreements	\$ 790,888,017	\$ 107,303,215	\$ 7,956,000	\$ 2,532,966	\$	\$	\$ 908,680,198
Collateralized loan obligations(2)	45,509,987	283,018,604	180,402,500	228,068,909			737,000,000
Senior unsecured notes					97,860,025		97,860,025
Convertible unsecured senior notes			86,250,000				86,250,000
Junior subordinated notes(3)						175,858,000	175,858,000
Related party financing(4)					62,500,000		62,500,000
Outstanding unfunded commitments(5)	19,878,731	15,864,455	12,323,646				48,066,832
Operating leases(6)	3,082,615	3,594,219	3,325,682	2,875,983	1,464,918	7,664,328	22,007,745

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

Totals	\$ 859,359,350	\$ 409,780,493	\$ 290,257,828	\$ 233,477,858	\$ 161,824,943	\$ 183,522,328	\$ 2,138,222,800
--------	----------------	----------------	----------------	----------------	----------------	----------------	------------------

-
- (1) Represents principal amounts due based on contractual maturities. Excludes the total projected interest payments on our debt obligations of \$50.3 million in 2017, \$48.4 million in 2018, \$36.6 million in 2019, \$27.0 million in 2020, \$16.0 million in 2021 and \$78.1 million thereafter based on current LIBOR rates.

Table of Contents

- (2) Comprised of \$219.0 million of CLO IV debt, \$267.8 million of CLO V debt and \$250.3 million of CLO VI debt with a weighted average contractual maturity of 1.72, 2.01 and 3.19 years, respectively, as of December 31, 2016.
- (3) Represents the face amount due upon maturity. The carrying value is \$157.9 million, which is net of a deferred amount of \$14.9 million and deferred financing fees of \$3.1 million at December 31, 2016.
- (4) Represents the total amount due at the end of the five-year term, including the scheduled increases to the principal balance if the debt remained outstanding until the end of the five-year term.
- (5) In accordance with certain loans and investments, we have outstanding unfunded commitments that we are obligated to fund as the borrowers meet certain requirements. Specific requirements include, but are not limited to, property renovations, building construction and building conversions based on criteria met by the borrower in accordance with the loan agreements. The payment due by period is based on the maturity date of underlying loans and is included in loans and investments, net in the consolidated balance sheet.
- (6) Represents the operating lease payments due in connection with our lease of office space for our corporate headquarters and loan origination, support and servicing offices located throughout the U.S. Certain of the office leases have escalation clauses. The total rent expense, since the Acquisition date, was \$1.9 million in 2016.

Off-Balance-Sheet Arrangements. At December 31, 2016, we had no off-balance-sheet arrangements.

Inflation. Changes in the general level of interest rates prevailing in the economy in response to changes in the rate of inflation generally have little effect on our income because the majority of our interest-earning assets and interest-bearing liabilities have floating rates of interest. See "Quantitative and Qualitative Disclosures about Market Risk" below.

Agreements and Transactions with Related Parties. We have a management agreement with our Manager, pursuant to which our Manager provides certain services and we pay our Manager a base management fee and under certain circumstances, an annual incentive fee. We incurred \$12.6 million, \$10.9 million and \$9.9 million of base management fees for services rendered in 2016, 2015 and 2014, respectively.

The base management fee is an arrangement whereby we reimburse our Manager for its actual costs incurred in managing our business based on the parties' agreement in advance on an annual budget with subsequent quarterly true-ups to actual costs.

In addition, we have conducted several transactions with our Manager and other parties that are deemed related party transactions. The details of the management agreement and related party transactions are described in Note 20 Agreements and Transactions with Related Parties of this report.

In February 2016, we entered into a purchase agreement with our Manager to acquire its Agency Business, and on July 14, 2016 we completed the Acquisition for \$275.8 million. See Note 3 Acquisition of Our Manager's Agency Platform for further details.

Derivative Financial Instruments

We enter into derivative financial instruments in the normal course of business through the origination and sale of mortgage loans and the management of potential loss exposure caused by fluctuations of interest rates. See Note 14 Derivative Financial Instruments for further details surrounding our derivative financial instruments.

Significant Accounting Estimates

Management's discussion and analysis of financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with the Financial Accounting Standards Board Accounting Standards Codification, the authoritative reference for accounting principles generally accepted in the U.S. ("GAAP"). The preparation of financial statements

Table of Contents

in conformity with GAAP requires the use of estimates and assumptions that could affect the reported amounts in our consolidated financial statements. Actual results could differ from these estimates.

A summary of our significant accounting policies is presented in Note 2 Basis of Presentation and Significant Accounting Policies. Many of these accounting policies require judgment and the use of estimates and assumptions when applying these policies in the preparation of our consolidated financial statements. Each quarter, we assess these estimates and assumptions based on several factors, including historical experience, which we believe to be reasonable under the circumstances. These estimates are subject to change in the future if any of the underlying assumptions or factors change.

Non-GAAP Financial Measures

Funds from Operations and Adjusted Funds from Operations

We present funds from operations ("FFO") and adjusted funds from operations ("AFFO") because we believe they are important supplemental measures of our operating performance in that they are frequently used by analysts, investors and other parties in the evaluation of REITs. The National Association of Real Estate Investment Trusts, or NAREIT, defines FFO as net income (loss) attributable to common stockholders (computed in accordance with GAAP), excluding gains (losses) from sales of depreciated real properties, plus impairments of depreciated properties and real estate related depreciation and amortization, and after adjustments for unconsolidated ventures.

We define AFFO as funds from operations adjusted for accounting items such as non-cash stock-based compensation expense, income from MSRs, changes in fair value of certain derivatives that temporarily flow through earnings, as well as the amortization of MSRs and the convertible senior notes conversion option. We also add back one-time charges such as acquisition costs and impairment losses on real estate and gains/losses on sales of real estate. We are generally not in the business of operating real estate owned property and had obtained real estate by foreclosure or through partial or full settlement of mortgage debt related to our loans to maximize the value of the collateral and minimize our exposure. Therefore, we deem such impairment and gains/losses on real estate as an extension of the asset management of our loans, thus a recovery of principal or additional loss on our initial investment.

FFO and AFFO are not intended to be an indication of our cash flow from operating activities (determined in accordance with GAAP) or a measure of our liquidity, nor is it entirely indicative of funding our cash needs, including our ability to make cash distributions. Our calculation of FFO and AFFO may be different from the calculations used by other companies and, therefore, comparability may be limited.

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

Table of Contents

FFO and AFFO are as follows:

	Year Ended December 31,		
	2016	2015	2014(1)
Net income attributable to common stockholders	\$ 42,796,132	\$ 45,875,094	\$ 85,792,235
Subtract:			
Gain on sale of real estate	(11,630,687)	(7,784,021)	(1,603,763)
Add:			
Net income attributable to noncontrolling interest	12,131,041		
Impairment loss on real estate owned	11,200,000		250,000
Depreciation real estate owned	2,011,903	5,436,330	7,371,737
Depreciation investments in equity affiliates	374,352	374,351	268,224
Funds from operations(2)	\$ 56,882,741	\$ 43,901,754	\$ 92,078,433
Subtract:			
Income from mortgage servicing rights	(44,940,760)		
Impairment loss on real estate owned	(11,200,000)		(250,000)
Net gain on changes in fair value of derivatives	(499,279)		
Deferred tax benefit	(1,532,084)		
Add:			
Amortization of MSR's	21,704,560		
Depreciation and amortization	3,170,560		
Gain on sale of real estate	11,630,687	7,784,021	1,603,763
Stock-based compensation	3,513,540	3,442,683	1,989,439
Acquisition costs	10,261,902	3,133,681	
Adjusted funds from operations(2)	\$ 48,991,867	\$ 58,262,139	\$ 95,421,635
Diluted FFO per share(2)	\$ 0.92	\$ 0.86	\$ 1.83
Diluted AFFO per share(2)	\$ 0.79	\$ 1.14	\$ 1.89
Diluted weighted average shares outstanding(2)	61,649,847	51,007,328	50,368,344

(1) Excluding the impact of a \$58.1 million non-cash net gain related to the 450 West 33rd Street transaction (see Note 20 Agreements and Transactions with Related Parties), FFO for 2014 was \$34.0 million, or \$0.68 per diluted common share and AFFO for 2014 was \$37.3 million, or \$0.74 per diluted common share.

(2) Amounts are attributable to common stockholders and OP Units holder. The OP Units are redeemable for cash, or at our option for shares of our common stock on a one-for-one basis.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

Market risk is the exposure to loss due to factors that affect the overall performance of the financial markets such as changes in interest rates, availability of capital, equity prices, real estate values and credit ratings. The primary market risks that we are exposed to are capital markets risk, real estate values, credit risk and interest rate risk.

Capital Markets Risk. We are exposed to the risks related to the equity and debt capital markets and our ability to raise capital or finance our business operations through these markets. As a REIT, we are required to distribute at least 90% of our taxable income annually, which significantly limits our ability to accumulate operating cash flow and, therefore, requires us to utilize the equity and debt capital markets to finance our business. To mitigate this risk, we monitor both the equity and debt

Table of Contents

capital markets to make informed decisions on the amount, timing, type and terms of the capital we raise.

Real Estate Values and Credit Risk. Commercial mortgage assets may be viewed as exposing an investor to greater risk of loss than residential mortgage assets since such assets are typically secured by larger loans to fewer obligors than residential mortgage assets. Multifamily and commercial property values, net operating income derived from such properties, and borrowers' credit ratings are subject to volatility and may be negatively affected adversely by a number of factors, including, but not limited to, events such as natural disasters, acts of war, terrorism, local economic and/or real estate conditions (such as industry slowdowns, oversupply of real estate space, occupancy rates, construction delays and costs) and other macroeconomic factors beyond our control. The performance and value of our loan and investment and servicing portfolios depend on the borrowers' ability to operate the properties that serve as collateral so that they produce adequate cash flow to pay their loans. We attempt to mitigate these risks through our underwriting and asset management processes. Our asset management team reviews our portfolios consistently and is in regular contact with borrowers to monitor the performance of the collateral and enforce our rights as necessary.

Interest Rate Risk. Interest rate risk is highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control.

The operating results of our Structured Business depend in large part on differences between the income from our loans and our borrowing costs. Most of our Structured Business loans and borrowings are variable-rate instruments, based on LIBOR. The objective of this strategy is to minimize the impact of interest rate changes on our net interest income. In addition, we have various fixed rate loans in our portfolio that are financed with variable rate LIBOR borrowings. We have entered into interest swaps to hedge our exposure to interest rate risk on our variable rate LIBOR borrowings as it relates to our fixed rate loans. Certain of these swaps are scheduled to mature on the original maturity dates of their corresponding loans. However, loans are sometimes extended and, consequently, do not pay off on their original maturity dates. If a loan is extended, our exposure to interest rate risk may be increased. In these instances, we could have a fixed rate loan financed with variable debt and, since the corresponding interest swap already matured, a portion of our debt is no longer protected against interest rate risk. Some of our loans and borrowings are subject to interest rate floors. As a result, the impact of a change in interest rates may be different on our interest income than on our interest expense. We have utilized interest rate swaps to limit interest rate risk. Derivatives are used for hedging purposes rather than speculation. We do not enter into financial instruments for trading purposes.

The following table projects the potential impact on interest income and interest expense for a 12-month period, and the potential change in fair value of our derivative financial instruments as of

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

Table of Contents

December 31, 2016, assuming an instantaneous increase or decrease of both 25 and 50 basis points in LIBOR and forward interest rate curves, adjusted for the effects of our interest rate hedging activities.

	Assets (Liabilities) Subject to Interest Rate Sensitivity(1)	25 Basis Point Increase	25 Basis Point Decrease(2)	50 Basis Point Increase	50 Basis Point Decrease(2)
Interest income from loans and investments	\$ 1,790,159,966	\$ 3,756,982	\$ (3,636,451)	\$ 7,513,963	\$ (5,713,422)
Interest expense from debt obligations	\$ (1,395,333,064)	2,793,100	(2,793,100)	5,586,200	(5,586,200)
Total net interest income		\$ 963,882	\$ (843,351)	\$ 1,927,763	\$ (127,222)
Fair value of derivative financial instruments, net	\$ (151,843)	\$ 4,784	\$ (4,787)	\$ 9,565	\$ (9,577)

(1) Represents the unpaid principal balance of our loan portfolio and the net fair value of our derivative financial instruments, which includes interest rate swaps, basis swaps and LIBOR caps.

(2) The quoted one-month LIBOR rate was 0.77% as of December 31, 2016.

In the event of a significant rising interest rate environment and/or economic downturn, defaults could increase and result in credit losses to us, which could adversely affect our liquidity and operating results. Further, such delinquencies or defaults could have an adverse effect on the spreads between interest-earning assets and interest-bearing liabilities.

In connection with the Acquisition, we now originate, sell and service a range of multifamily finance products with Fannie Mae, Freddie Mac and HUD through our Agency Business. Our loans held-for-sale to Fannie Mae, Freddie Mac and HUD are not currently exposed to interest rate risk during the loan commitment, closing and delivery process. The sale or placement of each loan to an investor is negotiated prior to closing on the loan with the borrower, and the sale or placement is generally effectuated within 60 days of closing. The coupon rate for the loan is set after we established the interest rate with the investor.

In addition, the fair value of our MSR is subject to market risk since a significant driver of the fair value of these assets is the discount rates. A 100 basis point increase in the weighted average discount rate would decrease the fair value of our MSR by approximately \$7.9 million as of December 31, 2016, while a 100 basis point decrease would increase the fair value by approximately \$8.4 million.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of
Arbor Realty Trust, Inc. and Subsidiaries

We have audited the accompanying consolidated balance sheets of Arbor Realty Trust, Inc. and Subsidiaries (the "Company") as of December 31, 2016 and 2015, and the related consolidated statements of income, comprehensive income, changes in equity, and cash flows for each of the three years in the period ended December 31, 2016. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits. We did not audit the 2016 financial statements of Cardinal Financial Company, Limited Partnership, in which the Company has a 16.3% interest as of December 31, 2016. In the consolidated financial statements, the Company's investment in Cardinal Financial Company, Limited Partnership is stated at \$25,765,775 as of December 31, 2016 and the Company's equity in the net income of Cardinal Financial Company, Limited Partnership is stated at \$9,487,795 for the year ended December 31, 2016. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for Cardinal Financial Company, Limited Partnership, is based solely on the report of the other auditors.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the report of other auditors, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company at December 31, 2016 and 2015, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated March 3, 2017 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

To the Partners

Cardinal Financial Company, Limited Partnership
Charlotte, North Carolina

We have audited the balance sheet of Cardinal Financial Company, Limited Partnership (the "Company") as of December 31, 2016, and the related statements of operations, changes in partners' equity, and cash flows for the year then ended (not presented separately herein). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States) and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Cardinal Financial Company, Limited Partnership as of December 31, 2016, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

ARBOR REALTY TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2016

Note 1 Description of Business

Arbor Realty Trust, Inc. was formed in 2003 and is externally managed and advised by our Manager, ACM, pursuant to the terms of a management agreement described below. We invest in a diversified portfolio of structured finance assets in the multifamily and commercial real estate markets, primarily consisting of bridge and mezzanine loans, including junior participating interests in first mortgages, preferred and direct equity. In addition, we may also directly acquire real property and invest in real estate-related notes and certain mortgage-related securities. We refer to this platform as our Structured Business. As a result of the Acquisition, we also now originate, sell and service a range of multifamily finance products through Fannie Mae, Freddie Mac, Ginnie Mae, FHA, HUD and the CMBS programs. We retain the servicing rights and asset management responsibilities on substantially all loans we originate and sell under the GSE and HUD programs. We are an approved Fannie Mae DUS lender nationally, a Freddie Mac Multifamily Conventional Loan lender, seller/servicer, in New York, New Jersey and Connecticut, a Freddie Mac affordable, manufactured housing, senior housing and SBL lender, seller/servicer, nationally and a HUD MAP and LEAN senior housing/healthcare lender nationally. We refer to this platform as our Agency Business. See Acquisition of Our Manager's Agency Platform below for further details about the Acquisition.

Substantially all of our operations are conducted through our operating partnership, ARLP, for which we serve as the general partner, and ARLP's subsidiaries. We are organized to qualify as a REIT for federal income tax purposes.

Note 2 Basis of Presentation and Significant Accounting Policies

Basis of Presentation

The consolidated financial statements and accompanying notes have been prepared in accordance with GAAP. In the opinion of management, all adjustments considered necessary for a fair presentation of our financial position, results of operations and cash flows have been included and are of a normal and recurring nature.

In the fourth quarter of 2016, we revised the assumption used in determining amortization periods on the MSR portfolio we acquired in connection with the Acquisition in the third quarter of 2016. This change in estimate resulted in an increase in our quarterly MSR amortization, which is included in servicing revenue, net in our consolidated statements of income. The effect of this non-cash change was a reduction in our net income of approximately \$3.4 million, or \$0.07 per diluted share, for 2016. Excluding the addition of new MSRs in future periods, we expect this change in estimate to reduce net income by approximately \$1.4 million for the first quarter of 2017, with the impact of this change decreasing in future reporting periods as loans mature and repay over the weighted average estimated life remaining.

Certain prior year amounts have been reclassified to conform to current period presentation. We reclassified acquisition costs of \$3.1 million associated with the Acquisition from selling and administrative expenses to acquisition costs for the year ended December 31, 2015.

Principles of Consolidation

The accompanying consolidated financial statements include our financial statements and the financial statements of our wholly owned subsidiaries, partnerships and other joint ventures in which we

own a controlling interest, including variable interest entities ("VIEs") of which we are the primary beneficiary. Entities in which we have a significant influence are accounted for under the equity method. See Note 17 Variable Interest Entities for information about our VIEs. All significant inter-company transactions and balances have been eliminated in consolidation.

Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that could materially affect the amounts reported in the consolidated financial statements and accompanying notes. As future events cannot be determined with precision, actual results could differ from those estimates.

Significant Accounting Policies

Cash and Cash Equivalents. All highly liquid investments with original maturities of three months or less are considered to be cash equivalents. We place our cash and cash equivalents in high quality financial institutions. The consolidated account balances at each institution periodically exceed Federal Deposit Insurance Corporation (FDIC) insurance coverage and we believe that this risk is not significant.

Loans, Investments and Securities. Loans held for investment are intended to be held to maturity and, accordingly, are carried at cost, net of unamortized loan origination costs and fees, loan purchase discounts, and net of the allowance for loan losses when such loan or investment is deemed to be impaired. We invest in preferred equity interests that, in some cases, allow us to participate in a percentage of the underlying property's cash flows from operations and proceeds from a sale or refinancing. At the inception of each such investment, we determine whether such investment should be accounted for as a loan, equity interest or as real estate. To date, we have determined that all such investments are properly accounted for and reported as loans.

At the time of purchase, we designate a security as available-for-sale, held-to-maturity, or trading depending on our ability and intent for the security. Securities available-for-sale are reported at fair value with the net unrealized gains or losses reported as a component of accumulated other comprehensive income (loss). Unrealized losses that are determined to be other-than-temporary are recognized in earnings up to their credit component. The determination of other-than-temporary impairment is a subjective process requiring judgments and assumptions and is not necessarily intended to indicate a permanent decline in value. The process includes, but is not limited to, assessment of recent market events and prospects for near-term recovery, assessment of cash flows, internal review of the underlying assets securing the investments, credit of the issuer and the rating of the security, as well as our ability and intent to hold the investment to maturity. We closely monitor market conditions on which we base such decisions.

Impaired Loans, Allowance for Loan Losses and Charge-offs. We consider a loan impaired when, based upon current information, it is probable that we will be unable to collect all amounts due for both principal and interest according to the contractual terms of the loan agreement. We evaluate each loan in our portfolio on a quarterly basis. Our loans are individually specific and unique as it relates to product type, geographic location, and collateral type, as well as to the rights and remedies and the

Table of Contents

ARBOR REALTY TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2016

Note 2 Basis of Presentation and Significant Accounting Policies (Continued)

position in the capital structure our loans have in relation to the underlying collateral. We evaluate this information at both a loan level and general market trends level when determining the appropriate assumptions such as capitalization and market discount rates, as well as the borrower's operating income and cash flows, in estimating the value of the underlying collateral when determining if a loan is impaired. We utilize internally developed valuation models and techniques primarily consisting of discounted cash flow and direct capitalization models in determining the fair value of the underlying collateral on an individual loan. We may also obtain a third party appraisal, which may value the collateral through an "as-is" or "stabilized value" methodology. Such appraisals may be used as an additional source of valuation information only and no adjustments are made to appraisals.

If upon completion of the valuation, the fair value of the underlying collateral securing the impaired loan is less than the net carrying value of the loan, an allowance is created with a corresponding charge to the provision for loan losses. The allowance for each loan is maintained at a level that we believe to be adequate to absorb probable losses.

Loan terms may be modified if we determine that based on the individual circumstances of a loan and the underlying collateral, a modification would more likely increase the total recovery of the combined principal and interest from the loan. Any loan modification is predicated upon a goal of maximizing the collection of the loan. Typical triggers for a modification would include situations where the projected cash flow is insufficient to cover required debt service, when asset performance is lagging the initial projections, where there is a requirement for rebalancing, where there is an impending maturity of the loan, and where there is an actual loan default. Loan terms that have been modified have included, but are not limited to, interest rate, maturity date and in certain cases, principal amount. Length and amounts of each modification have varied based on individual circumstances and are determined on a case by case basis. If the loan modification constitutes a concession whereas we do not receive ample consideration in return for the modification, and the borrower is experiencing financial difficulties and cannot repay the loan under the current terms, then the modification is considered by us to be a troubled debt restructuring. If we receive a benefit, either monetary or strategic, and the above criteria are not met, the modification is not considered to be a troubled debt restructuring. We record interest on modified loans on an accrual basis to the extent the modified loan is contractually current.

Charge-offs to the allowance for loan losses occur when losses are confirmed through the receipt of cash or other consideration from the completion of a sale; when a modification or restructuring takes place in which we grant a concession to a borrower or agree to a discount in full or partial satisfaction of the loan; when we take ownership and control of the underlying collateral in full satisfaction of the loan; when loans are reclassified as other investments; or when significant collection efforts have ceased and it is highly likely that a loss has been realized.

Loss on restructured loans is recorded when we have granted a concession to the borrower in the form of principal forgiveness related to the payoff or the substitution or addition of a new debtor for the original borrower or when we incur costs on behalf of the borrower related to the modification, payoff or the substitution or addition of a new debtor for the original borrower. When a loan is restructured, we record our investment at net realizable value, taking into account the cost of all concessions at the date of restructuring. In addition, a gain or loss may be recorded upon the sale of a loan to a third party in the consolidated statements of income in the period in which the loan was sold.

Table of Contents

ARBOR REALTY TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2016

Note 2 Basis of Presentation and Significant Accounting Policies (Continued)

Loans Held-for-Sale, Net. Loans held-for-sale, net represents commercial real estate loans originated in our Agency Business, which are generally transferred or sold within 60 days from the date the loan is funded. Such loans are reported at the lower of cost or market on an aggregate basis and include the value allocated to the associated future MSRs. During the period prior to its sale, interest income on a loan held-for-sale is calculated in accordance with the terms of the individual loan and the loan origination fees and direct loan origination costs are deferred until the loan is sold. Substantially all of our held-for-sale loans are financed with matched borrowings from credit facilities contracted to finance such loans. Interest income and expense are earned or incurred after a loan is closed and before a loan is sold.

Transfers of financial assets are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated, put presumptively beyond the reach of the entity, even in bankruptcy, (2) the transferee (or if the transferee is an entity whose sole purpose is to engage in securitization and the entity is constrained from pledging or exchanging the assets it receives, each third-party holder of its beneficial interests) has the right to pledge or exchange the transferred financial assets, and (3) we or our agents does not maintain effective control over the transferred financial assets or third-party beneficial interest related to those transferred assets through an agreement to repurchase them before their maturity. We have determined that all loans sold have met these specific conditions and account for all transfers of mortgage loans as completed sales.

Allowance for Loss-Sharing Obligations. When a loan is sold under the Fannie Mae DUS program, we undertake an obligation to partially guarantee the performance of the loan. Generally, we are responsible for losses equal to the first 5% of the UPB and a portion of any additional losses to an overall maximum of 20% of the original principal balance. Fannie Mae bears any remaining loss. In addition, under the terms of the master loss-sharing agreement with Fannie Mae, we are responsible for funding 100% of mortgage delinquencies (principal and interest) and servicing advances (taxes, insurance and foreclosure costs) until the amounts advanced exceeds 5% of the UPB at the date of default. Thereafter, we may request interim loss-sharing adjustments which allow us to fund 25% of such advances until final settlement.

At inception, a liability for the fair value of the obligation undertaken in issuing the guaranty is recognized. In determining the fair value of the guaranty obligation, we consider the risk profile of the collateral and the historical loss experience in our portfolio. The guaranty obligation is removed only upon either the expiration or settlement of the guaranty.

We evaluate the allowance for loss-sharing obligations by monitoring the performance of each loss-sharing loan for events or conditions that may signal a potential default. Historically, initial loss recognition occurs at or before a loan becomes 60 days delinquent. In instances where payment under the guaranty on a loan is determined to be probable and estimable (as the loan is probable of, or is, in foreclosure), we record a liability for the estimated allowance for loss-sharing (a "specific reserve") by transferring the guarantee obligation recorded on the loan to the specific reserve with any adjustments to this reserve amount recorded in provision for loss sharing in the statements of income, along with a write-off of the associated loan-specific MSR. The amount of the allowance considers our assessment of the likelihood of repayment by the borrower or key principal(s), the risk characteristics of the loan, the loan's risk rating, historical loss experience, adverse situations affecting individual loans, the estimated

Note 2 Basis of Presentation and Significant Accounting Policies (Continued)

disposition value of the underlying collateral, and the level of risk sharing. We regularly monitor the specific reserves and update loss estimates as current information is received.

Capitalized Mortgage Servicing Rights. We recognize, as separate assets, rights to service mortgage loans for others, including such rights that are created by the origination of mortgage loans that are sold with the servicing rights retained by the originator. Income from MSR is recognized when we record a derivative asset upon the commitment to originate a loan with a borrower and sell the loan to an investor. This commitment asset is recognized at fair value based on our internal model, which reflects the estimated fair value of the discounted expected net cash flows associated with the servicing of the loan. When a mortgage loan is sold, we retain the right to service the loan and recognize the MSR at the initial capitalized valuation. We amortize MSR using the amortization method, which requires the MSR to be amortized over the period of estimated net servicing income or loss and that the servicing assets or liabilities be assessed for impairment, or increased obligation, based on the fair value at each reporting date. Amortization of MSR is recorded as a reduction of servicing revenues, net in the consolidated statements of income. The following assumptions were used in calculating each loan's MSR for the periods presented:

Key rates: We used discount rates ranging from 8% to 15%, representing a weighted average discount rate of 13%, based on our best estimate of market discount rates to determine the present value of MSR. The inflation rate used for adequate compensation was 3%.

Servicing Cost: The estimated future cost to service the loan for the estimated life of the MSR is subtracted from the estimated future cash flows.

Estimated Life: We estimate the life of our MSR based upon the stated yield maintenance and/or prepayment protection term of the underlying loan and may be reduced by 6 to 12 months based upon the expiration of various types of prepayment penalty and/or lockout provisions prior to that stated maturity date.

MSR are initially recorded at fair value and are carried at amortized cost. Fair values are estimated considering market prices for similar MSR, when available, and by estimating the present value of the future net cash flows of the capitalized MSR, net of adequate compensation for servicing. Adequate compensation is based on the market rate of similar servicing contracts. We estimate the terms of commercial servicing for each loan by assuming that servicing would not end prior to the yield maintenance date, if applicable, at which point the prepayment penalty expires. MSR are amortized in proportion to and over the period of estimated net servicing income. We engage an independent third party to assist in determining an estimated fair value of our MSR portfolio on a quarterly basis.

We evaluate the MSR portfolio for impairment on a quarterly basis based on the difference between the aggregate carrying amount of the MSR and their aggregate fair value. We engage an independent third-party valuation expert to assist in determining an estimated fair value of our MSR portfolio. For purposes of impairment evaluation, the MSR are stratified based on predominant risk characteristics of the underlying loans, which we have identified as loan type, note rate and yield maintenance provisions. To the extent that the carrying value of the MSR exceeds fair value, a valuation allowance is established.

Table of Contents

ARBOR REALTY TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2016

Note 2 Basis of Presentation and Significant Accounting Policies (Continued)

We record write-offs of MSR related to loans that were repaid prior to their expected maturity and loans that have defaulted and determined to be unrecoverable. When this occurs, the write-off is recorded as a direct write-down to the carrying value of MSR and is included as a component of servicing revenue, net in the consolidated statements of income. This direct write-down permanently reduces the carrying value of the MSR, precluding recognition of subsequent recoveries.

Real Estate Owned and Held-For-Sale. Real estate acquired is recorded at its estimated fair value at the time of acquisition and is shown net of accumulated depreciation and impairment charges. Costs incurred in connection with the acquisition of a property are expensed as incurred.

We allocate the purchase price of our real estate acquisitions to land, building, tenant improvements, origination asset of the in-place leases, intangibles for the value of any above or below market leases at fair value and to any other identified intangible assets or liabilities. We finalize our purchase price allocation on these assets within one year of the acquisition date. We amortize the value allocated to in-place leases over the remaining lease term, which is reported in depreciation and amortization expense on our consolidated statements of income. The value allocated to above or below market leases are amortized over the remaining lease term as an adjustment to rental income.

Real estate assets are depreciated using the straight-line method over their estimated useful lives. Ordinary repairs and maintenance which are not reimbursed by the tenants are expensed as incurred. Major replacements and betterments which improve or extend the life of the asset are capitalized and depreciated over their estimated useful life.

Our properties are reviewed for impairment each quarter, if events or circumstances change indicating that the carrying amount of an asset may not be recoverable. We recognize impairment if the undiscounted estimated cash flows to be generated by an asset is less than the carrying amount of such asset. Measurement of impairment is based on the asset's estimated fair value. In the evaluation of a property for impairment, many factors are considered, including estimated current and expected operating cash flows from the property during the projected holding period, costs necessary to extend the life or improve the asset, expected capitalization rates, projected stabilized net operating income, selling costs, and the ability to hold and dispose of the asset in the ordinary course of business. Impairment charges may be necessary in the event discount rates, capitalization rates, lease-up periods, future economic conditions, and other relevant factors vary significantly from those assumed in valuing the property.

Real estate is classified as held-for-sale when we commit to a plan of sale, the asset is available for immediate sale, there is an active program to locate a buyer, and it is probable the sale will be completed within one year. Real estate assets that are expected to be disposed of are valued at the lower of the asset's carrying amount or its fair value less costs to sell.

We recognize sales of real estate properties upon closing. Payments received from purchasers prior to closing are recorded as deposits. Gain on real estate sold is recognized using the full accrual method when the collectability of the sale price is reasonably assured and we are not obligated to perform significant activities after the sale. A gain may be deferred in whole or in part until collectability of the sales price is reasonably assured and the earnings process is complete.

Table of Contents

ARBOR REALTY TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2016

Note 2 Basis of Presentation and Significant Accounting Policies (Continued)

Investments in Equity Affiliates. We invest in joint ventures that are formed to invest in real estate related assets or businesses. These joint ventures are not majority owned or controlled by us, or are VIEs for which we are the primary beneficiary, and are not consolidated in our financial statements. These investments are recorded under either the equity or cost method of accounting as deemed appropriate. We evaluate these investments for impairment whenever events or changes in circumstances indicate that the carrying amounts of such investments may not be recoverable. We recognize an impairment loss if the estimated fair value of the investment is less than its carrying amount and we determine that the impairment is other-than-temporary. We record our share of the net income and losses from the underlying properties of our equity method investments and any other-than-temporary impairment on these investments on a single line item in the consolidated statements of income as income or losses from equity affiliates.

Goodwill and Other Intangible Assets. Significant judgement is required to estimate the fair value of intangible assets and in assigning their estimated useful lives. Accordingly, we typically seek the assistance of independent third party valuation specialists for significant intangible assets. The fair value estimates are based on available historical information and on future expectations and assumptions we deem reasonable.

We generally use an income based valuation method to estimate the fair value of intangible assets, which discounts expected future cash flows to present value using estimates and assumptions we deem reasonable. For intangible assets related to acquired technology, we use the replacement cost method to determine fair value.

Determining the estimated useful lives of intangible assets also requires judgment. Certain intangible assets, such as GSE licenses, have been deemed to have indefinite lives while other intangible assets, such as broker and borrower relationships, above/below market rent and acquired technology have been deemed to have finite lives. Our assessment as to which intangible assets are deemed to have finite or indefinite lives is based on several factors including economic barriers of entry for the acquired product lines, scarcity of available GSE licenses, technology life cycles, retention trends and our operating plans, among other factors.

Goodwill and indefinite-lived intangible assets are not amortized, while finite-lived intangible assets are amortized over the estimated useful lives of the assets on a straight-line basis. Indefinite-lived intangible assets, including goodwill, are tested for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. In addition, with respect to goodwill, an impairment analysis is performed at least annually. We have elected to make the first day of our fiscal fourth quarter the annual impairment assessment date for goodwill. We first assess qualitative factors to determine whether it is more likely than not that the fair value is less than the carrying value. If, based on that assessment, we believe it is more likely than not that the fair value is less than the carrying value, then a two-step goodwill impairment test is performed. Based on the impairment test performed as of October 1, 2016, there was no indication that the indefinite-lived intangible assets, including goodwill, was impaired and there were no events or changes in circumstances indicating impairment at December 31, 2016.

Business Combinations. Business combinations are accounted for under the acquisition method of accounting, under which the purchase price is allocated to the fair value of the assets acquired and

ARBOR REALTY TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2016

Note 2 Basis of Presentation and Significant Accounting Policies (Continued)

liabilities assumed at the acquisition date. The excess of the purchase price over the amount allocated to the assets acquired and liabilities assumed is recorded as goodwill. Adjustments to the assets acquired and liabilities assumed made during the measurement period are recorded in the period in which the adjustment is identified, with a corresponding adjustment to goodwill. If any adjustments are made subsequent to the measurement period, which could be up to one year after the acquisition date, these adjustments are recorded to the consolidated statements of income. Acquisition related costs are expensed as incurred.

Hedging Activities and Derivatives. We measure derivative instruments at fair value and record them as assets or liabilities. Fair value adjustments will affect either accumulated other comprehensive income (loss) until the hedged item is recognized in earnings, or net income depending on whether the derivative instrument qualifies as a hedge for accounting purposes and, if so, the nature of the hedging activity. We use derivatives for hedging purposes rather than trading or speculation. Fair values are estimated based on current market data from financial sources that trade such instruments and are based on prevailing market data and derived from third party proprietary models based on well recognized financial principles and reasonable estimates about relevant future market conditions.

The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether we have elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. Derivatives designated and qualifying as a hedge of the exposure to changes in the fair value of an asset, liability, or firm commitment attributable to a particular risk, such as interest rate risk, are considered fair value hedges. Derivatives designated and qualifying as a hedge of the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. Hedge accounting generally provides for the matching of the timing of gain or loss recognition on the hedging instrument with the recognition of the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk in a fair value hedge or the earnings effect of the hedged forecasted transactions in a cash flow hedge. These derivative instruments must be effective in reducing risk exposure in order to qualify for hedge accounting. When the terms of an underlying transaction are modified, or when the underlying hedged item ceases to exist, all changes in the fair value of the instrument are marked-to-market with changes in value included in net income for each period until the derivative instrument matures or is settled. Any derivative instrument used for risk management that does not meet the hedging criteria is marked-to-market with the changes in value included in earnings. In cases where a derivative instrument is terminated early, any gain or loss is generally amortized over the remaining life of the hedged item. We may also enter into derivative contracts that are intended to economically hedge certain risks, even though hedge accounting does not apply or we elect not to apply hedge accounting. The ineffective portion of a derivative's change in fair value is recognized immediately in earnings.

In connection with our interest rate risk management, we may hedge a portion of our interest rate risk by entering into derivative instrument contracts. Specifically, our derivative instruments are used to manage differences in the amount, timing, and duration of our expected cash receipts and our expected cash payments principally related to our investments and borrowings. Our objectives in using interest rate derivatives are to add stability to interest income and to manage our exposure to interest rate movements. To accomplish this objective, we have used interest rate swaps as part of our interest rate

Table of Contents

ARBOR REALTY TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2016

Note 2 Basis of Presentation and Significant Accounting Policies (Continued)

risk management strategy. Interest rate swaps designated as cash flow hedges involve the receipt of variable-rate amounts from a counterparty in exchange for us making fixed-rate payments over the life of the agreements without exchange of the underlying notional amount.

We have also financed the purchase of RMBS investments through repurchase agreements with the same counterparties, which qualified as linked transactions and were accounted for as forward contract derivatives. Linked transactions are not designated as hedging instruments and, as a result, the change in the fair value and net interest income from linked transactions are reported in other income, net in the consolidated statements of income. We sold our RMBS investments during 2014.

Our rate lock and forward sales commitments associated with the Agency Business meet the definition of a derivative and are recorded at fair value. The estimated fair value of rate lock commitments includes the effects of interest rate movements as well as the fair value of the expected net cash flows associated with the servicing of the loan which is recorded as income from MSRs in the consolidated statements of income. The estimated fair value of forward sale commitments includes the effects of interest rate movements between the trade date and balance sheet date. Adjustments to the fair value are reflected as a component of other income, net in the consolidated statements of income.

Revenue Recognition. Interest income is recognized on the accrual basis as it is earned. In certain instances, the borrower pays an additional amount of interest at the time the loan is closed, an origination fee, a prepayment fee and/or deferred interest upon maturity. In some cases, interest income may also include the amortization or accretion of premiums and discounts arising from the purchase or origination of the loan or security. This additional income, net of any direct loan origination costs incurred, is deferred and accreted into interest income on an effective yield or "interest" method adjusted for actual prepayment activity over the life of the related loan or security as a yield adjustment. Income recognition is suspended for loans when, in our opinion, a full recovery of all contractual principal is not probable. Income recognition is resumed when the loan becomes contractually current and performance is resumed. We record interest income on certain impaired loans to the extent cash is received, as the borrower continues to make interest payments. We record loan loss reserves related to these loans when it is deemed that full recovery of principal and accrued interest is not probable.

Several of our loans provide for accrual of interest at specified rates, which differ from current payment terms. Interest is recognized on such loans at the accrual rate subject to our determination that accrued interest and outstanding principal are ultimately collectible, based on the underlying collateral and operations of the asset. If we cannot make this determination, interest income above the current pay rate is recognized only upon actual receipt.

Given the transitional nature of some of our real estate loans, we may require funds to be placed into an interest reserve, based on contractual requirements, to cover debt service costs. We will analyze these interest reserves on a periodic basis and determine if any additional interest reserves are needed. Recognition of income on loans with funded interest reserves are accounted for in the same manner as loans without funded interest reserves. We do not recognize interest income on loans in which the borrower has failed to make the contractual interest payment due or has not replenished the interest reserve account. Income from non-performing loans is generally recognized on a cash basis only to the

Table of Contents

ARBOR REALTY TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2016

Note 2 Basis of Presentation and Significant Accounting Policies (Continued)

extent it is received. Full income recognition will resume when the loan becomes contractually current and performance has recommenced.

Additionally, interest income is recorded when earned from equity participation interests, referred to as equity kickers. These equity kickers have the potential to generate additional revenues to us as a result of excess cash flow distributions and/or as appreciated properties are sold or refinanced.

Gain on sales, including fee-based services, net Gain on sales, including fee-based services, net includes commitment fees, broker fees, loan assumption fees, loan origination fees and gains on sale of loans of our Agency Business. In some instances, the borrower pays an additional amount of interest at the time the loan is closed, an origination fee, net of any direct loan origination costs incurred, which is recognized upon the sale of the loan. Revenue recognition occurs when the related services are performed, unless significant contingencies exist, and for the sale of loans, when all the incidence of ownership passes to the buyer. Interest income is recognized on the accrual basis as it is earned from loans held-for-sale.

Property operating income Property operating income represents income associated with the operations of commercial real estate properties classified as real estate owned. We recognize revenue for these activities when the fees are fixed or determinable, or are evidenced by an arrangement, collection is reasonably assured and the services under the arrangement have been provided.

Other income, net Other income, net represents loan structuring, modification, defeasance, and miscellaneous asset management fees associated with our loan and investment portfolio, as well as changes in the fair value of certain derivatives and net interest income and gains and losses recorded on linked transactions that were sold during 2014. We recognize these forms of income when the fees are fixed or determinable, are evidenced by an arrangement, collection is reasonably assured and the services under the arrangement have been provided.

Stock-Based Compensation. We have granted certain of our employees, directors, and employees of our Manager, stock awards consisting of shares of our common stock that vest immediately or annually over a multi-year period, subject to the recipient's continued service to us. We record stock-based compensation expense at the grant date fair value of the related stock-based award with subsequent remeasurement for any unvested shares granted to non-employees with such amounts expensed against earnings, at the grant date (for the portion that vests immediately) or ratably over the respective vesting periods. Dividends are paid on restricted stock as dividends are paid on shares of our common stock whether or not they are vested. Stock-based compensation is disclosed in our consolidated statements of income under "employee compensation and benefits" for employees and under "selling and administrative" expense for non-employees.

Income Taxes. We organize and conduct our operations to qualify as a REIT and to comply with the provisions of the Internal Revenue Code with respect thereto. A REIT is generally not subject to federal income tax on its REIT-taxable income that it distributes to its stockholders, provided that it distributes at least 90% of its REIT-taxable income and meets certain other requirements. Certain REIT income may be subject to state and local income taxes.

Table of Contents**ARBOR REALTY TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****December 31, 2016****Note 2 Basis of Presentation and Significant Accounting Policies (Continued)**

The Agency Business mainly operates through a TRS, which is a part of our TRS Consolidated Group and may be subject to U.S. federal, state and local income taxes. In general, our TRS entities may hold assets that the REIT cannot hold directly and may engage in real estate or non-real estate-related business. Current and deferred taxes are recorded on the portion of earnings (losses) recognized by us with respect to our interest in TRSs. Deferred income tax assets and liabilities are calculated based on temporary differences between our GAAP consolidated financial statements and the federal, state, local tax basis of assets and liabilities as of the consolidated balance sheets. We evaluate the realizability of our deferred tax assets (e.g., net operating loss and capital loss carryforwards) and recognize a valuation allowance if, based on the available evidence, it is more likely than not that some portion or all of our deferred tax assets will not be realized. When evaluating the realizability of our deferred tax assets, we consider estimates of expected future taxable income, existing and projected book/tax differences, tax planning strategies available and the general and industry specific economic outlook.

We periodically evaluate tax positions to determine whether it is more likely than not that such positions would be sustained upon examination by a tax authority for all open tax years, as defined by the statute of limitations, based on their technical merits. We report interest and penalties related to tax uncertainties as a component of the income tax provision.

Earnings Per Share. We present both basic and diluted earnings per share ("EPS"). Basic EPS excludes dilution and is computed by dividing net income available to common stockholders by the weighted average number of shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock, where such exercise or conversion would result in a lower EPS amount.

Comprehensive Income. We divide comprehensive income or loss into net income and comprehensive income. Comprehensive income includes unrealized gains and losses on available-for-sale securities and derivative instruments that qualify as hedges.

Recently Adopted Accounting Pronouncements

Description	Effective Date	Effect on Financial Statements
In September 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standard Update ("ASU") 2015-06, Business Combinations: Simplifying the Accounting for Measurement-Period Adjustments. This ASU amended the guidance on measurement-period adjustments arising from business combinations.	First quarter of 2016.	The adoption of this guidance did not have an impact on our consolidated financial statements.
In February 2015, the FASB issued ASU 2015-02, Consolidation: Amendments to the Consolidation Analysis. This ASU amended the guidance on the consolidation analysis related to VIEs.	First quarter of 2016.	The adoption of this guidance did not have a material impact on our consolidated financial statements. See Note 17 Variable Interest Entities for further details.

Table of Contents**ARBOR REALTY TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****December 31, 2016****Note 2 Basis of Presentation and Significant Accounting Policies (Continued)*****Recently Issued Accounting Pronouncements***

Description	Effective Date	Effect on Financial Statements
In January 2017, the FASB issued ASU 2017-04, Intangibles Goodwill and Other: Simplifying the Test for Goodwill Impairment. This ASU eliminates step two from the goodwill impairment test, which measures a goodwill impairment loss by comparing the implied fair value with the carrying amount of goodwill.	First quarter of 2020 with early adoption permitted beginning in the first quarter of 2017.	We are evaluating the timing of our adoption and the impact this guidance may have on our consolidated financial statements.
In January 2017, the FASB issued ASU 2017-01, Business Combinations: Clarifying the Definition of a Business. This ASU provides a more robust framework to use in determining when a set of assets and activities constitutes a business. It also provides more consistency in applying the guidance, reduces the costs of application and makes the definition of a business more operable.	First quarter of 2018.	The potential impact of this new guidance will be assessed for future acquisitions or dispositions, but it is not expected to have a material impact on our consolidated financial statements.
In November 2016, the FASB issued ASU 2016-18, Statement of Cash Flows: Restricted Cash. This ASU requires restricted cash and restricted cash equivalents to be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows.	First quarter of 2018 with early adoption permitted.	We are evaluating the timing of our adoption and the impact this guidance may have on our consolidated statement of cash flows.
In October 2016, the FASB issued ASU 2016-17, Consolidation: Interests Held through Related Parties That Are under Common Control. This ASU alters how a decision maker needs to consider indirect interests in a VIE held through an entity under common control and simplifies that analysis to require consideration of only an entity's proportionate indirect interest in a VIE held through a common control party. The guidance amends ASU 2015-02, which we adopted in the first quarter of 2016.	First quarter of 2018 with early adoption permitted.	We are evaluating the timing of our adoption and the impact this guidance may have on our consolidated financial statements.
In October 2016, the FASB issued ASU 2016-16, Income Taxes: Intra-Entity Transfers of Assets Other Than Inventory. This ASU was issued to	First quarter of 2018 with early adoption permitted and should be applied on a modified retrospective basis.	We are evaluating the timing of our adoption and the impact this guidance may have on our consolidated financial statements.

improve the accounting for the income tax
consequences of intra-entity transfers of assets other
than inventory.

Description	Effective Date	Effect on Financial Statements
In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows: Classification of Certain Cash Receipts and Cash Payments. This ASU provides eight targeted changes to how cash receipts and cash payments are presented and classified in the statement of cash flows.	First quarter of 2018 and requires adoption on a retrospective basis.	We are evaluating the impact this guidance may have on our consolidated statement of cash flows.
In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments. This ASU requires the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. Entities will be required to use forward-looking information to better form their credit loss estimates. This ASU also requires enhanced disclosures to help financial statement users better understand significant estimates and judgments used in estimating credit losses.	First quarter of 2020 with early adoption permitted beginning in the first quarter of 2019.	We are evaluating the timing of our adoption and the impact this guidance may have on our consolidated financial statements.
In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation: Improvements to Employee Share-Based Payment Accounting. This ASU is intended to simplify several aspects of the accounting for share-based payment award transactions, including income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows.	First quarter of 2017.	The adoption of this guidance will not have a material impact on our consolidated financial statements.
In March 2016, the FASB issued ASU 2016-07, Investments - Equity Method and Joint Ventures: Simplifying the Transition to the Equity Method of Accounting. This ASU, among other things, eliminates the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods the investment was held.	First quarter of 2017.	The adoption of this guidance will not have a material impact on our consolidated financial statements.

Table of Contents**ARBOR REALTY TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****December 31, 2016****Note 2 Basis of Presentation and Significant Accounting Policies (Continued)**

Description	Effective Date	Effect on Financial Statements
In February 2016, the FASB issued ASU 2016-02, Leases: Presentation of Comprehensive Income. This ASU requires recognition of balance sheet assets and liabilities for leases with terms of more than 12 months and disclosure of key information about an entity's leasing arrangements.	First quarter of 2019 with early adoption permitted and a modified retrospective approach is required.	We are evaluating the timing of our adoption and the impact this guidance may have on our consolidated financial statements.
In January 2016, the FASB issued ASU 2016-01, Financial Instruments - Overall: Recognition and Measurement of Financial Assets and Financial Liabilities. This ASU requires equity investments (except those accounted for under the equity method or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income. This ASU also eliminates the requirement to disclose the methods and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost.	First quarter of 2018.	We are evaluating the impact this guidance may have on our consolidated financial statements.
Beginning in May 2014, the FASB has issued several amendments to its guidance surrounding revenue recognition. Together, among other things, the amended guidance introduces a new framework for a single comprehensive model that can be used when accounting for revenue and supersedes most current revenue recognition guidance, including that which pertains to specific industries. The core principle states that an entity should recognize revenue to depict the transfer of promised goods or services in an amount that reflects the consideration to which the entity expects to be entitled in exchange for such goods and services. It also requires expanded quantitative and qualitative disclosures that will enable financial statement users to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. Most revenue associated with financial instruments, including interest and loan origination fees, along with gains and losses on investment securities, derivatives and sales of financial instruments are excluded from the scope of the guidance.	First quarter of 2018 and permits the use of either the full retrospective or modified retrospective method.	We are evaluating the impact this guidance may have on our consolidated financial statements and our method of adoption.

ARBOR REALTY TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 31, 2016

Note 3 Acquisition of Our Manager's Agency Platform

On July 14, 2016, we completed the previously announced Acquisition pursuant to an asset purchase agreement ("Purchase Agreement") dated February 25, 2016. The aggregate purchase price was \$275.8 million, which was paid with \$138.0 million in stock, \$87.8 million in cash and with the issuance of a \$50.0 million seller financing instrument. The equity component of the purchase price was paid with 21,230,769 OP Units, which was based on a stock price of \$6.50 per share. The closing price of our common stock on the Acquisition date was \$7.29 per share; therefore, the estimated fair value of the total consideration given to our Manager was \$292.5 million. Each of these OP Units are paired with one share of our Special Voting Preferred Shares, which provides ACM with one vote per share on any matter submitted to a vote of our stockholders. The OP Units are entitled to receive distributions if and when our Board of Directors authorizes and declares future common stock distributions. The OP Units are also redeemable for cash, or at our option, for shares of our common stock on a one-for-one basis. See Note 12 Debt Obligations for further details about the seller financing and Note 18 Equity for further details about the OP Units.

All ACM employees directly related to the Agency Business (approximately 235) have become our employees as of the Acquisition date. In addition, pursuant to the Purchase Agreement, we have an option, expiring in July 2018, to purchase the existing management agreement and fully internalize our management structure for \$25.0 million (increasing to \$27.0 million after July 2017). The exercise of this option is at the discretion of the special committee of our Board of Directors, which has no obligation to exercise its option.

We performed a preliminary allocation of the purchase price to the underlying assets acquired and liabilities assumed based on their estimated fair values as of the Acquisition date, with the excess of the purchase price allocated to goodwill. We have not finalized the analysis of certain acquired assets and liabilities assumed. However, we are continuing our review of these items during the measurement period and any further changes to the preliminary purchase price allocation will be recognized as the valuations are finalized, which could change the amount of the purchase price allocated to goodwill. During the fourth quarter of 2016, we determined that the estimated fair value associated with certain

Table of Contents**ARBOR REALTY TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****December 31, 2016****Note 3 Acquisition of Our Manager's Agency Platform (Continued)**

accrued liabilities assumed were overstated, which resulted in a reduction to goodwill of \$1.0 million. The preliminary purchase price allocations at December 31, 2016 are summarized as follows:

Purchase Price:

Issuance of 21,230,769 OP Units at \$7.29 per share (based on the closing stock price at the Acquisition date)	\$ 154,772,306
Cash on hand	87,755,517
Borrowings from seller financing related party	50,000,000
Total consideration	\$ 292,527,823

Allocated to:

Cash and cash equivalents	\$ 7,982,584
Restricted cash	5,000,000
Loans held-for-sale	424,796,318
Available-for-sale securities	4,908,283
Capitalized mortgage servicing rights	221,647,421
Fixed assets	5,216,972
Other assets	10,752,173
Finite-lived intangible assets	44,310,000
Infinite-lived intangible assets	29,000,000
Credit facilities and repurchase agreements	(420,889,886)
Allowance for loss-sharing obligations	(32,616,821)
Other liabilities	(34,326,602)
Goodwill	26,747,381
Net assets acquired	\$ 292,527,823

In connection with the Acquisition, we recorded goodwill as a result of the total consideration exceeding the fair value of the assets acquired and liabilities assumed. The Goodwill was attributed to our Agency Business as it relates to the assets we acquired in the Acquisition. See Note 11 Goodwill and Other Intangible Assets for further details.

The total revenues and pre-tax income associated with the Agency Business from the date of Acquisition, which is included in the consolidated statements of income for 2016, were \$85.6 million and \$41.8 million, respectively.

The following unaudited pro forma financial information presents the revenues and earnings of the combined entity, as if the Acquisition occurred as of January 1, 2015. The unaudited pro forma financial information is not intended to represent or be indicative of the consolidated financial results

- (1) "Weighted Average Pay Rate" is a weighted average, based on the UPB of each loan in our portfolio, of the interest rate required to be paid monthly as stated in the individual loan agreements. Certain loans and investments that require an additional rate of interest "Accrual Rate" to be paid at maturity are not included in the weighted average pay rate as shown in the table.
- (2) The "First Dollar LTV Ratio" is calculated by comparing the total of our senior most dollar and all senior lien positions within the capital stack to the fair value of the underlying collateral to determine the point at which we will absorb a total loss of our position.
- (3) The "Last Dollar LTV Ratio" is calculated by comparing the total of the carrying value of our loan and all senior lien positions within the capital stack to the fair value of the underlying collateral to determine the point at which we will initially absorb a loss.

During the first quarter of 2015, we acquired a \$116.0 million defaulted first mortgage note, at par, that paid off in the subsequent quarter resulting in the recognition of income totaling \$6.7 million, net of fees and expenses. The \$6.7 million of income consisted of other interest income totaling \$7.9 million, partially offset by \$1.2 million of expenses that were recorded in employee compensation and benefits. In the second quarter of 2016, additional funds held in escrow from the note payoff were released following an arbitration proceeding and we recognized income totaling \$1.9 million, net of fees and expenses. The \$1.9 million of income consisted of other interest income totaling

\$2.5 million, partially offset by \$0.6 million of expenses that were recorded in employee compensation and benefits.

Concentration of Credit Risk

We are subject to concentration of credit risk in that, at December 31, 2016, the UPB related to 35 loans with five different borrowers represented 16% of total assets. At December 31, 2015, the UPB related to 22 loans with five different borrowers represented 22% of total assets. During both 2016 and 2015, no single loan or investment represented 10% of our total assets and no single investor group generated 10% of our revenue.

Table of Contents**ARBOR REALTY TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****December 31, 2016****Note 4 Loans and Investments (Continued)**

We assign a credit risk rating to each loan and investment that range from one to five, with one being the lowest risk and five being the highest. Each credit risk rating has benchmark guidelines that pertain to debt-service coverage ratios, LTV ratios, borrower strength, asset quality, and funded cash reserves. Other factors such as guarantees, market strength, remaining loan term and borrower equity are also reviewed and factored into determining the credit risk rating assigned to each loan. This metric provides a helpful snapshot of portfolio quality and credit risk. Given our asset management approach, however, the risk rating process does not result in differing levels of diligence contingent upon credit rating. That is because all portfolio assets are subject to the level of scrutiny and ongoing analysis consistent with that of a "high-risk" loan. Assets are subject to, at minimum, a thorough quarterly financial evaluation in which historical operating performance and forward-looking projections are reviewed. Generally speaking, given our typical loan profile, a risk rating of three suggests that we expect the loan to make both principal and interest payments according to the contractual terms of the loan agreement, and is not considered impaired. A risk rating of four indicates we anticipate the loan will require a modification of some kind. A risk rating of five indicates we expect the loan to underperform over its term, and there could be loss of interest and/or principal. Ratings of 3.5 and 4.5 generally indicate loans that have characteristics of both the immediately higher and lower classifications. Further, while the above are the primary guidelines used in determining a certain risk rating, subjective items such as borrower strength, condition of the market of the underlying collateral, additional collateral or other credit enhancements, or loan terms, may result in a rating that is higher or lower than might be indicated by any risk rating matrix.

As a result of the loan review process at December 31, 2016 and 2015, we identified loans and investments that we consider higher-risk loans that had a carrying value, before loan loss reserves, of \$152.9 million and \$154.7 million, respectively, and a weighted average last dollar LTV ratio of 94% at both December 31, 2016 and 2015.

A summary of the loan portfolio's weighted average internal risk ratings and LTV ratios by asset class is as follows:

Asset Class	Unpaid Principal Balance	Percentage of Portfolio	December 31, 2016		
			Wtd. Avg. Internal Risk Rating	Wtd. Avg. First Dollar LTV Ratio	Wtd. Avg. Last Dollar LTV Ratio
Multifamily	\$ 1,421,731,108	79%	2.9	1%	73%

Geographic Concentration Risk

As of December 31, 2016, 25%, 15%, 14% and 13% of the outstanding balance of our loan and investment portfolio had underlying properties in New York, California, Florida and Texas, respectively. As of December 31, 2015, 34%, 14%, 14% and 12% of the outstanding balance of our loan and investment portfolio had underlying properties in New York, Florida, California and Texas, respectively.

Impaired Loans and Allowance for Loan Losses

We evaluate each loan in our portfolio quarterly to assess the performance of our loans and whether a reserve for impairment should be recorded. We measure our relative loss position for our mezzanine loans, junior participation loans and preferred equity investments by determining the point where we will be exposed to losses based on our position in the capital stack as compared to the fair value of the underlying collateral. We determine our loss position on both a first dollar loan-to-value ("LTV") and a last dollar LTV basis, as defined above. A summary of the changes in the allowance for loan losses is as follows:

	Year Ended December 31,		
	2016	2015	2014
Allowance at beginning of period	\$ 86,761,575	\$ 115,487,320	\$ 122,277,411
Provision for loan losses	59,005	6,509,149	9,026,712
Charge-offs	(2,959,005)	(32,000,000)	(6,501,079)
Charge-off on loan reclassification to real estate owned, net		(2,500,000)	
Recoveries of reserves	(150,000)	(734,894)	(9,315,724)
Allowance at end of period	\$ 83,711,575	\$ 86,761,575	\$ 115,487,320

During 2015, we determined that the fair value of the underlying collateral securing five impaired loans with an aggregate carrying value of \$125.3 million was less than the net carrying value of the loans, resulting in a \$6.5 million provision for loan losses. In addition, during 2015, we recorded \$2.0 million of net recoveries of previously recorded loan loss reserves resulting in a \$4.5 million net provision. These recoveries were recorded in provision for loan losses in the consolidated statements of income. Of the \$6.5 million of loan loss reserves recorded during 2015,

\$4.0 million was attributable to

Table of Contents**ARBOR REALTY TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****December 31, 2016****Note 4 Loans and Investments (Continued)**

loans on which we had previously recorded reserves, while \$2.5 million of reserves related to other loans in our portfolio.

During 2014, we determined that the fair value of the underlying collateral securing four impaired loans with an aggregate carrying value of \$151.9 million was less than the net carrying value of the loans, resulting in a \$9.0 million provision for loan losses. In addition, during 2014, we recorded \$9.3 million of net recoveries of previously recorded loan loss reserves resulting in a \$(0.3) million net recovery provision. These recoveries were recorded in provision for loan losses in the consolidated statements of income. Of the \$9.0 million of loan loss reserves recorded during 2014, \$3.8 million was attributable to loans on which we had previously recorded reserves, while \$5.2 million of reserves related to other loans in our portfolio.

At December 31, 2016, 2015 and 2014, we had a total of eight, nine and ten loans, respectively, with an aggregate carrying value, before loan loss reserves, of \$187.4 million, \$189.2 million and \$221.6 million, respectively, for which impairment reserves have been recorded.

A summary of charge-offs and recoveries by asset class is as follows:

	Year Ended December 31,		
	2016	2015	2014
<i>Charge-offs:</i>			
Multifamily	\$ (2,959,005)	\$	\$ (6,501,079)
Office		(2,500,000)	
Hotel		(32,000,000)	
Total	\$ (2,959,005)	\$ (34,500,000)	\$ (6,501,079)
<i>Recoveries:</i>			
Multifamily	\$ 193,106	\$ 754,394	\$ 7,815,724
Office			1,500,000
Land		1,287,869	
Total	\$ 193,106	\$ 2,042,263	\$ 9,315,724
Net Recoveries (Charge-offs)	\$ (2,765,899)	\$ (32,457,737)	\$ 2,814,645

Ratio of net recoveries (charge-offs) during the period to average loans and investments outstanding during the period	(0.2)%	(2.1)%	0.2%
--	--------	--------	------

There were no loans for which the collateral securing the loan was less than the carrying value of the loan for which we had not recorded a provision for loan loss as of December 31, 2016, 2015 and 2014.

Edgar Filing: ARBOR REALTY TRUST INC - Form 10-K

During 2016, we received a \$1.8 million discounted payoff on an impaired bridge loan with a carrying value before reserves of \$4.8 million, resulting in the recognition of an additional provision for loan losses of \$0.1 million and a charge-off of \$3.0 million.

Table of Contents**ARBOR REALTY TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****December 31, 2016****Note 4 Loans and Investments (Continued)**

During 2015, we incurred a \$32.0 million charge-off of previously recorded reserves due to the write-off of a fully reserved junior participation loan. We also charged-off \$2.5 million in connection with the transfer of an office building by deed in lieu of foreclosure to real estate owned, net.

During 2014, we incurred a \$6.5 million charge-off to previously recorded reserves from the write-off of a mezzanine loan and a bridge loan that had an aggregate carrying value of \$11.9 million.

We have six loans with a carrying value totaling \$121.1 million at December 31, 2016, which mature in September 2017, that are collateralized by a land development project. The loans do not carry a current pay rate of interest, but five of the loans with a carrying value totaling \$111.8 million entitle us to a weighted average accrual rate of interest of 8.29%. We suspended the recording of the accrual rate of interest on these loans, as they were impaired and we deemed the collection of this interest to be doubtful. We have recorded cumulative allowances for loan losses of \$49.1 million related to these loans as of December 31, 2016 and 2015. The loans are subject to certain risks associated with a development project including, but not limited to, availability of construction financing, increases in projected construction costs, demand for the development's outputs upon completion of the project, and litigation risk. Additionally, these loans were not classified as non-performing as the borrower is in compliance with all of the terms and conditions of the loans.

A summary of our impaired loans by asset class is as follows:

Asset Class	December 31, 2016			Year Ended December 31, 2016	
	Unpaid Principal Balance	Carrying Value(1)	Allowance for Loan Losses	Average Recorded Investment(2)	Interest Income Recognized
Multifamily	\$ 2,542,115	\$ 2,450,618	\$ 2,455,653	\$ 4,952,115	\$ 156,887
Office	27,562,582	22,778,444	21,972,444	27,571,582	93,732
Land	131,085,948	125,925,677	53,883,478	129,277,308	
Hotel	34,750,000	34,496,296	3,700,000	34,750,000	1,155,314
