SEC 873 (6-04)

Potential persons who are to respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB control number.

ITEM 1.01 ENTRY INTO MATERIAL DEFINITIVE AGREEMENT

On December 22, 2004 Idaho General Mines (IGMI) acquired the Turner Gold project consisting of 265 acres of private land and 3 unpatented claims in Josephine County, Oregon. The volcanogenic sulfide deposit was explored by a number of major companies in the 1980s. More than 80 drill holes delineated three mineralized zones at shallow depth containing 2.8 million tons at 0.11 opt gold, 0.58 opt silver, 1.36% copper, 3.36% zinc, and 0.04% cobalt (Perry et. al., 1990). IGMI plans to conduct further exploration and feasibility studies in 2005. Attention will be given to extending mineralized zones by drilling with emphasis upon diamond drill holes where higher gold values are indicated. IGMI is in possession of the drill core from all previous efforts. Feasibility studies by several previous owners were directed toward a 800 to 1200 ton per day mine.

As consideration for the Turner Gold project, IGMI made cash payments of \$24, 272.00 and will issue 500,000 shares of IGMI common stock and common stock purchase warrants to acquire an additional 500,000 shares of common stock. The warrants are exercisable at a price of \$0.80 per share for a period of two years. A finders fee is payable to an unaffiliated third party in connection with this transaction. The finder is to receive 25,000 shares of IGMI common stock and common stock purchase warrants to acquire an additional 25,000 shares of common stock. The warrants are exercisable at a price of \$0.80 per share for a period of two years.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
