The criteria mentioned in this note refer to the practices adopted by the Company and its subsidiaries which are reflected in the consolidated balance sheet.

a. Cash and Cash Equivalents: Cash equivalents are short-term, high-liquidity investments, which mature in less than three months. They are recorded at cost, plus income earned to the balance sheet date, not exceeding market value.

b. Trade Accounts Receivable: Receivables from users of telecommunications services are recorded at the amount of the tariff in effect on the date the service is rendered. Unbilled services provided to customers at the balance sheet date are also included in trade accounts receivable. The criterion adopted for making the provision for doubtful accounts takes into account the calculation of the actual percentage losses incurred on each range of accounts receivable. The historic percentages are applied to the current ranges of accounts receivable, also including accounts coming due and the portion yet to be billed, thus composing the amount that could become a future loss, which is recorded as a provision.

c. Inventories: Stated at average acquisition cost, not exceeding replacement cost. Inventories are segregated into inventories for plant expansion and those for maintenance. The inventories to be used in expansion are classified in property, plant and equipment (construction in progress), and inventories to be used in maintenance are classified as current and noncurrent assets. Obsolete items are recorded as Allowance for losses.

d. Investments: Investments in subsidiaries are valued using the equity method. Other investments are recorded at cost less allowance for probable losses, when applicable. The investments resulting from income tax incentives are recognized at the date of investment, and result in shares of companies with tax incentives or investment fund quotas. In the period between the investment date and receipt of shares or quotas, they remain recognized in noncurrent assets. The Company adopts the criterion of using the maximum percentage of tax allocation. These investments are periodically valued at cost or market prices, when the latter is lower, and allowances for losses are recorded if required.

e. Property, Plant and Equipment: Stated at cost of acquisition and/or construction, less accumulated depreciation. Financial charges for financing assets and construction in progress are capitalized.

Maintenance and repair costs, when they represent improvements (increase in installed capacity or useful life) are capitalized, while other costs are charged to, the profit and loss accounts income, on an accrual basis.

Depreciation is calculated under the straight-line method. Depreciation rates used are based on expected useful lives of the assets and in accordance with the standards of the Public Telecommunications Service. The main rates used are set forth in Note 24.

Edgar Filing: BRAZIL TELECOM HOLDING CO - Form 6-K

f. Deferred Charges: Segregated between deferred charges on amortization and formation. Main items are goodwill on the acquisition of CRT - Companhia Riograndense de Telecomunicações (incorporated by Brasil Telecom S.A. in December 2000), net of tax savings, costs incurred on installation, reorganization, data processing and other. Amortization is calculated under the straight-line method in accordance with the legislation in force. When the asset does not generate benefits anymore, it is written off against nonoperating income.

g. Income and Social Contribution Taxes: Income and social contribution taxes are accounted for on an accrual basis. These taxes levied on temporary differences, tax losses and the negative social contribution base are recorded under assets or liabilities, as the case may be, according to the assumption of realization or future demand, within the parameters established in the CVM Instruction 371/02.

h. Loans and Financing: Updated to the balance sheet date for monetary or exchange variations and interest incurred to the balance sheet date. Equal restatement is applied to the guarantee contracts to hedge the debt.

i. Provision for Contingencies: Recognized based on its risk assessment evaluation and quantified on economic grounds and based on legal counselors' opinions on the lawsuits and other contingency factors known as of the balance sheet date. The basis and nature of the provisions are described in Note 7.

j. Recognition of Revenues: Revenues from services rendered are accounted for on the accrual basis. Local calls are charged based on time measurement according to the legislation in force. Revenues from sales of payphone cards are recorded upon sale. In the case of fixed terminals with prepaid subscriptions, the amounts of sales are recorded as advances from customers and revenue is recorded according to the provision of the services.

k. Recognition of Expenses: Expenses are recognized on the accrual basis, considering their relation with revenue realization. Expenses related to other periods are deferred.

l. Financial Income (Expense), Net: Financial income comprises interest earned on accounts receivable settled after maturity and gains on financial investments and hedges, when incurred financial expenses comprises interest incurred and other charges on loans, financing and other financial transactions.

Credited Interest on Capital is included in the financial expenses balance; for financial statement presentation purposes, the amounts are reversed to profit and loss accounts and reclassified as a deduction of retained earnings, in the shareholders' equity.

m. Research and Development: Costs for research and development are recorded as expenses when incurred, except for expenses with projects linked to the generation of future revenue, which are recorded under deferred assets and amortized over a five-year period after the operations commence.

n. Benefits to Employees: Private pension plans and other retirement benefits sponsored by the Company and its subsidiaries for their employees are managed by SISTEL and Fundação CRT. Contributions are determined on an actuarial basis, when applicable, and accounted for on an accrual basis. As of December 31, 2001, to comply with CVM Instruction 371/00, the subsidiary Brasil Telecom S.A. recorded its actuarial deficit on the balance sheet date against shareholders' equity, net of its tax effects. As from 2002, as new actuarial revaluation show the necessity for adjustments to the provision, they are recognized in the profit and loss accounts in accordance with the aforementioned instruction. Supplementary information regarding private pension plans and other benefits to employees is described in Note 6.

o. Employees and Directors Profit Sharing: The Company and its subsidiary Brasil Telecom S.A. recognized provisions for employee and directors profit sharing, and the calculation of the amount, which is paid in the year after the provision recognition, is in accordance with the target program established with the labor union in accordance with Law 10.101/00 and the Company's bylaws.

p. Earnings per thousand shares: Calculated based on the number of shares outstanding at the balance sheet date, which comprises the total number of shares issued net of treasury stock.

5. MARKET VALUE OF FINANCIAL ASSETS AND LIABILITIES (FINANCIAL INSTRUMENTS) AND RISK ANALYSIS.

The Company and its subsidiary Brasil Telecom S.A. assessed the book value of its assets and liabilities as compared to market or realizable values (fair value), based on information available and valuation methodologies applicable to each case. The interpretation of market data regarding the choice of methodologies requires considerable judgment and determination of estimates to achieve an amount considered adequate for each case. Accordingly, the estimates presented may not necessarily indicate the amounts which can be obtained in the current market. The use of different assumptions for calculation of market value or fair value may have material effect on the obtained amounts. The selection of assets and liabilities presented in this Note was made based on their materiality. Those instruments the value of which approximates the fair value and, whose risk assessment is not significant, are not mentioned.

In accordance with their natures, the financial instruments may involve known or unknown risks; the potential of such risks is important for the best judgment. Thus, there may be risks with or without guarantees, depending on circumstantial or legal aspects. Among the principal market risk factors which can affect the Company's and subsidiaries' business are the following:

a. Credit Risk

The majority of the services provided by the subsidiary Brasil Telecom S.A. are related to the Concession Agreement, and a significant portion of these services is subject to the determination of tariffs by the regulatory agency. The credit policy, in case of telecommunications public services, is subject to legal standards established by the concession authority. The risk exists since the subsidiary may incur losses arising from the difficulty in receiving amounts billed to its customers; in the quarter, the Company's default was 2.51% of the gross revenue (2.60% in the

Edgar Filing: BRAZIL TELECOM HOLDING CO - Form 6-K

same period last year). By means of internal controls, the level of accounts receivable is constantly monitored, thus limiting the risk of past due accounts by cutting the access to the service (out phone traffic) if the bill is overdue for over 30 days. Exceptions are made for telephone services, which should be maintained for national security or defense. As of March 31, 2003, the subsidiary's customer portfolio did not include receivables, of which subscribers were, individually, higher than 1% of total service accounts receivable.

b. Exchange Rate Risk

Assets

The Company has loan agreements in foreign currency, and, therefore, subject to exchange rate fluctuation. The amounts of assets exposed to this type of risk are the following:

	PARENT COMPANY		CONSOLIDATED	
	Book Value		Book Value	
	06/30/03	03/31/03	06/30/03	03/31/03
ASSETS

NONCURRENT ASSETS	216,397	250,978	123,034	142,449

The loans receivable in dollars were transferred to the Company at the time of the split off of Telebrás. Due to their original characteristics, no financing is available on the market under similar conditions, which led to the presentation of the book value only.

Liabilities

The Company and the subsidiary Brasil Telecom S.A. has loans and financing contracted in foreign currency. The risk related to these liabilities arises from possible exchange rate fluctuations, which may increase these liabilities balances. Loans subject to this risk represent approximately 4.1% (5.6% on 03/31/03) of the total liabilities. To minimize this type of risk, the subsidiary enters into swap agreements with financial institutions to hedge foreign exchange exposures 44% (37% on 03/31/03) of the debt portion in foreign currency is covered by hedge agreements. Unrealized positive or negative effects of these operations are recorded in income as gain or loss. To the quarter, consolidated net losses totaled R\$74,546 (net gain of R\$24,415 in the same period in 2002).

Net exposure as per book and market values, at the exchange rate prevailing on the balance sheet date, is as follows:

	PARENT COMPANY			
	06/30/03		03/31/03	
	Book Value	Market Value	Book Value	Market Value

LONG-TERM	125,133	119,215	152,514	143,068

The method used for calculation of market value (fair value) of loans and financing in foreign currency and hedge instruments was the discounted cash flow, at the market rates prevailing of the balance sheet date.

c. Interest Rate Risk

Assets

The private debentures issued by subsidiary Brasil Telecom S.A were fully subscribed by the Company. Yield from this asset is linked to CDI. The subsidiary also has asset loans totaling R\$8,409 (R\$13,978 on March 31, 2003) linked to IGP-DI and IPA-OG Column 27 of Getúlio Vargas Foundation - FGV and CDI.

At the balance sheet date, these assets are represented as follows:

	PARENT COMPANY		CONSOLIDATED	
	Book and Market Value		Book and Market Value	
	06/30/03	03/31/03	06/30/03	03/31/03

CURRENT	-	-	1,949	7,471
NONCURRENT ASSETS	1,430,247	1,352,020	6,460	6,507

The book values are equal to market values since the current conditions for contracting this type of financial instrument are similar to the original conditions.

The sum of the Company's debentures, loans and financing concentrated in the subsidiary represents 92.5% (91.1% on March 31, 2003) of this type of assets.

Liabilities

In 2000, the Company issued private debentures convertible into preferred shares. This liability was contracted at the interest rate linked to TJLP (Brazilian long-term interest rate). The risk linked to this liability arises from possible increase in this rate.

The subsidiary Brasil Telecom S.A. has loans and financing contracted in local currency subject to interest rates linked to indexing units (TJLP, UMBNDES - Brazilian Social and Economic Development Bank Monetary Unit, CDI-DI-CETIP, etc.). The risk inherent in these liabilities arises from possible variations in these rates. The Parent Company has contracted derivative contracts to hedge 78% of the liabilities subject to the UMBNDES rate, using exchange rate swap contracts, considering the influence of the dollar on the interest rate (basket of currencies) of these liabilities. However, the other market rates are continually monitored to evaluate the need to contract derivatives to protect against the risk of volatility of these rates.

The aforementioned liabilities at the balance sheet date are as follows:

	PARENT COMPANY		PARENT COMPANY	
	Book and Market Value		Book and Market Value	
	06/30/03	03/31/03	06/30/03	03/31/03

LONG-TERM	609,180	600,760	2,718,414	3,335,655

Book and market values are equivalent because the current contractual conditions for these types of financial instruments are similar to those in which they were originated. In case of a hypothetical variation of 1% in the aforementioned rates, unfavorable to the Company, the annual negative impact on income would be approximately R\$7,651.

d. Risk of Not Linking Monetary Restatement Indexes to Accounts Receivable

Loan and financing rates contracted by subsidiary Brasil Telecom S.A. are not linked to amounts of accounts receivable. Telephony tariff adjustments do not necessarily follow increases in local interest rates which affect the subsidiary's debts. Consequently, a risk arises from this lack of linking.

e. Contingency Risks

Contingency risks are assessed according to loss hypotheses, as probable, possible or remote. Contingencies considered as probable risk are recorded in liabilities. Details on this risk are presented in Note 7.

f. Risks Related to Investments

The Company has investments, which are valued using the equity method and stated at acquisition cost. Brasil Telecom S.A. is a subsidiary, the investment of which is carried under the equity method.

Investments in Nova Tarrafa Participações Ltda. and those stated at cost are immaterial in relation to total assets, and the risk related to them would not significantly impact the Company's results in case of total losses on these investments.

In the balance sheet date the investments were represented as follows:

	06/30/03		03/31/03	
	Book Value	Market Value	Book Value	Market Value
INVESTMENTS	4,614,783	4,488,260	4,582,184	3,891,144

Other investments	13,178	13,178	15,463	15,463

The investment quoted on the stock exchange refers to the interest in Brasil Telecom S.A., and its market value valued based on the market quotations in trading between minority shareholders.

g. Temporary Cash Investment Risks

The Company and its subsidiary Brasil Telecom S.A. have several temporary cash investments in exclusive financial investment funds (FIFs), the assets of which are represented solely by post-fixed federal securities and investment funds in foreign currency, from the subsidiary Brasil Telecom S.A., and there is no credit risk in this type of operation. As of June 30, 2003, the Company had temporary cash investments in the amount of R\$361,402 (R\$254,155 as of March 31, 2003). Income earned to the balance sheet date is recorded in financial income and amounts to R\$29,670 (R\$14,947 in 2002). Amounts in the consolidated financial statements are cash investments of R\$1,302,530 (R\$1,507,272 as of March 31, 2003) and R\$103,988 (R\$39,240 in 2002) of income earned.

6. BENEFITS TO EMPLOYEES

The benefits described in this note are offered to the employees of the Company, its subsidiary Brasil Telecom S.A. and its wholly-owned subsidiary, BrT Serviços de Internet S.A. and BrT Celular (undergoing structuring on the balance sheet date). These companies are better described together, and can be referred to as Brasil Telecom (group) and, for the purpose of the pension scheme cited in this note, are also called Sponsor.

Benefits to specific companies are presented as such.

(A) PRIVATE PENSION PLAN

Brasil Telecom (group) sponsors private pension schemes related with retirement for its employees and assisted members, and in the case of the latter, medical assistance in some cases. These plans are managed by two foundations, which are Fundação de Seguridade Social (SISTEL), which originated from certain companies of the former Telebrás System and Fundação dos Empregados da Companhia Riograndense de Telecomunicações (FCRT), which managed the benefit plans of CRT, a company managed by the subsidiary Brasil Telecom S.A. on December 28, 2000.

The bylaws stipulate approval of the supplementary pension policy and the joint liability attributed to the defined benefit plans is linked to the acts signed with the foundations, with the agreement of the Supplementary Pensions Department - SPC, where applicable to the specific plans.

The sponsored plans are valued by independent actuaries on the balance sheet date and, in the case of the defined benefit plans described in this explanatory note, immediate recognition of the actuarial gains and losses is adopted. The full liabilities are provided for plans showing deficits. This measure has been applied since the 2001 financial year, when the regulations of CVM Ruling 371/00 were adopted. In cases that show positive actuarial situations, no assets are recorded due to the legal impossibility of reimbursing the surpluses.

Below the characteristics of the supplementary pension plans sponsored are described.

FUNDAÇÃO SISTEL DE SEGURIDADE SOCIAL (SISTEL)

Plans

TCSPREV (Defined Contribution, Settled Benefit, Defined Benefit)

This defined contribution and settled benefit plan was introduced on February 28, 2000, with the adherence of around 80% of the employees at that time. On December 31, 2001, all the pension plans sponsored by SISTEL were merged, being exceptionally and provisionally approved by the Supplementary Pensions Department - SPC, due to the need for adjustments to the regulations. They were subsequently transformed into defined contribution groups with settled and defined benefits. The plans that were merged into the TCSPREV were the PBS-TCS, PBT-BrT, Convênio de Administração BrT, and the Termo de Relação Contratual Atípica, the conditions established in the original plans being maintained. On March 2003, this plan was suspended to the employees who want to be included in the supplementary pension plans sponsored by the Company. TCSPREV currently attends to around 74% of the staff.

PBS-A (Defined Benefit)

Maintained jointly with other sponsors linked to the provision of telecommunications services and destined for participants that had the status of beneficiaries on January 31, 2000.

PAMA - Health Care Plan for Retired Employees (Defined Contribution)

Maintained jointly with other sponsors linked to the provision of telecommunications services and destined for participants that had the status of beneficiaries on January 31, 2000, and also for the beneficiaries of the PBS-TCS Group, incorporated into the TCSPREV on December 31, 2001. According to a legal/actuarial appraisal, the sponsor's liability is exclusively limited to future contributions.

PAMEC-BrT (Health-care Plan for Supplementary Pension Beneficiaries)

Medical assistance for retirees and pensioners linked with the PBT-BrT, which was incorporated into the TCSPREV on December 31, 2001.

Contributions Established for the Plans

TCSPREV

Contributions to this plan were maintained on the same basis as the original plans incorporated in 2001 for each group of participants, and were established based on actuarial studies prepared by independent actuaries according to regulations in force in Brazil, using the capitalization system to determine the costs. Currently contributions are made by the participants and the sponsor only for the internal groups PBS-TCS (defined benefit) and TCSPREV. In the TCSPREV group, the contributions are credited in individual accounts of each participant, equally by the employee and the sponsor, and the basic contribution percentages vary between 3% and 8% of the participant's salary, according to age. Participants have the option to contribute voluntarily or sporadically to the plan above the basic contribution, but without equal payments from the sponsor. In the case of the PBS-TCS group, the sponsor's contribution in the quarter was 12% of the payroll of the participants, whilst the employees' contribution varies according to the age, service time and salary. An entry fee may also be payable depending on the age of entering the plan. The sponsors are responsible for the cost of all administrative expenses and risk benefits. In the quarter contributions by the sponsor to the TCSPREV group represented on average 6.74% of the payroll of the plan participants. TCSPREV currently attends to around 6.08% of the staff.

Edgar Filing: BRAZIL TELECOM HOLDING CO - Form 6-K

The Company's contributions were R\$7,268 in the quarter (R\$7,611 in 2002).

PBS-A

Contributions may occur in case of accumulated deficit. As of December 31, 2002, the plan recorded a surplus.

PAMA

This plan is sponsored with contributions of 1.5% on payroll of active participants linked to PBS plans, segregated and sponsored by several SISTEL sponsors. In the case of Brasil Telecom (group), the PBS-TCS was incorporated into the TCSPREV plan on December 31, 2001, and became an internal group of the plan.

The company's contributions for this plan, that are exclusively the responsibility of the sponsors, were R\$61 in the quarter (R\$79 in 2002).

PAMEC-BrT

Contributions for this plan were fully paid in July 1998 through a single payment.

CIA. RIOGRANDENSE DE TELECOMUNICAÇÕES EMPLOYEES FOUNDATION - FCRT

The main purpose of sponsoring FCRT is to maintain the supplementary retirement, pension and other provisions in addition to those provided by the official social security system to participants. The actuarial system for determining the plan's cost and contributions is collective capitalization, valued annually by an independent actuary. On October 21, 2002, the BrTPREV defined contribution and settled benefits plan was introduced, aimed at active participants linked with the sponsor, self-sponsored and beneficiaries of FCRT.

Plans

BrTPREV

Defined contribution and settled benefits plan to provide supplementary social security benefits in addition to those of the official social security. On March 2003, this plan was provided to the employees from all branches of the Company and to the employees of the subsidiaries, who wanted to be benefited by the supplementary pension plans sponsored. On June 30, 2003, this plan attended to around 16,5% of the staff.

Fundador - Brasil Telecom and Alternative - Brasil Telecom

Defined contribution and settled benefits plan to provide supplementary social security benefits in addition to those of the official social security, now closed to the entry of new participants. On June 30, 2003, there were 16 participants in these plans.

Contributions Established for the Plans

BrTPREV

The contributions to this plan are established based on actuarial studies prepared by independent actuaries according to the regulations in force in Brazil, using the capitalization system to determine the costs. Contributions are credited in individual accounts of each participant, the employee's and sponsor's contributions being equal, the basic percentage contribution varying between 3% and 8% of the participation salary, according to age. Participants have the option to contribute voluntarily or sporadically to the plan above the basic contribution, but without equal payments from the sponsor. The sponsor is responsible for the cost of administrative expenses on the basic contributions from employees and normal contributions of the Company and risk benefits. In the quarter, contributions by the sponsor represented on average 6.91% of the payroll of the plan participants, whilst the average employee contribution was 6.26%.

In the quarter the Company's contributions were R\$1,190.

FUNDADOR - BRASIL TELECOM AND ALTERNATIVE - Brasil Telecom

The regular contribution by the sponsor in the quarter was an average of 6.17% of the payroll of plan participants, who contributed at variable rates according to age, service time and salary; the average rate was 5.85%. With the Alternative-Brasil Telecom, the participants also pay an entry fee depending on the age of entering the plan.

The usual contributions of the Company in the quarter were R\$131 (R\$1,588 in 2002).

The technical reserve corresponding to the current value of the Company's supplementary contribution must be amortized, due to the actuarial deficit of the plans, within the maximum established period of 20 years as from January 2000, according to Circular 66/SPC/GAB/COA from the Supplementary Pensions Department dated January 25, 2002. Of the maximum period established, 18 years and nine months still remain for complete settlement. The amortizing contributions in the quarter were R\$28,054 (R\$7,933 in 2002) and provided in the statement income the amount of R\$40,681.

Resolution CVM 371/2000

A valuation of the supplementary pension schemes sponsored by the Company was made on December 31, 2001, and the actuarial deficit of Fundador and Alternative plans administered by FCRT was recognized directly under shareholders' equity, net of the corresponding taxes, according to the mentioned resolution.

Since the fiscal year 2002, after a new actuarial valuation, the variations of actuarial liabilities have been recognized directly in the income, according to the accrual basis. On June 30, 2003, the provided actuarial liabilities were R\$514,467 (R\$514,730 on March 31, 2003). The variations are due to expenses forecasted to the current year, informed as expenses to the future year by the time of the last actuarial revaluation on December 31, 2002. The amount provided in the statement of income of the quarter was R\$40,681, and payments of R\$28,054 were made due to the balance to be amortized.

(B) STOCK OPTION PLAN FOR OFFICERS AND EMPLOYEES

The Extraordinary Shareholders Meeting held on April 28, 2000, approved the general plan to grant stock purchase options to officers and employees of the Company and its subsidiaries. The plan authorizes a maximum limit of 10% of the shares of each kind of Company stock. Shares derived from exercising options guarantee the beneficiaries the same rights granted to other Company shareholders. The administration of this plan was entrusted to a management committee appointed by the Board of Directors, which decided only to grant preferred stock options. The plan is divided into two separate programs:

Program A:

This program is granted as an extension of the performance objectives of the Company established by the Board of Directors for a five-year period. Up to June 30, 2003, no stock had been granted.

Program B:

The price of exercising the option is established based on the arithmetic average of the market price of 1000 shares for the last 20 trading sessions prior to granting the option, and will be monetarily restated by the IGP-M between the date of signing the contracts and the payment date.

The right to exercise the option is given in the following way and within the following periods:

- ◆ 33% as from January 1, 2004
- ◆ 33% as from January 1, 2005
- ◆ 34% as from January 1, 2006

The acquisition periods can be anticipated as a result of the occurrence of events or special conditions established in the option contract. Options not exercised up to December 31, 2008 will expire without compensation.

The information related with the general plan to grant stock options is summarized below:

	Preferred stock options(thousand)	Average exercise price - R\$

The assessment of these risks aims to classifying them according to the chances of unfavorable outcome among the alternatives of probable, possible or remote, taking into account, as applicable, the opinion of the legal counselors.

Labor Claims

The provision for labor claims includes an estimate by the Company's management, supported by the opinion of its legal counselors, of the probable losses related to lawsuits filed by former employees of the Company, and of service providers.

Tax Suits

Self-financing funds

Refers to financial participation credits for acquisition of right to use the switched fixed telephone service, still under the now extinguished self-financing plan, paid by prospective subscribers in 1996 who have not accepted the Public Offer made by the subsidiary Brasil Telecom S.A., Rio Grande do Sul branch, of paying cash for the return of such credits. Since the shareholders of the subsidiary fully subscribed the capital increase made to reimburse in shares the financial participation credits paid in 1996, there are no surplus shares available for subscribers. In this situation, as established by article 171, paragraph 2, of Law 6,404/76, self-financing funds should be returned in cash, which was done through the Public Offer, as provided in article 1,080 of the Civil Code, and accepted by 76% of the customers. The remaining 24% of non-opting customers should await the decision of the lawsuit in progress, filed by the Office of the Solicitor General (Ministério Público) and others who want the reimbursement to be made through shares, and which may result in the reimbursement to be made either in shares or in cash, as proposed by the subsidiary.

Self-financing Installment Reimbursement - PCT

Refers to the payment, either in cash or as offset installments in invoices for services, to prospective subscribers of the Community Telephony Plan - PCT, to compensate the original obligation of repayment in shares. In these cases settlements were agreed or there are judicial rulings.

35. FUNDS FOR CAPITALIZATION

Self-financing funds

The expansion plans (self-financing) were the means by which the telecommunications companies financed network investments. With the issue of Administrative Rule 261/97 by the Ministry of Communications, this mechanism for raising funds was eliminated, and the existing consolidated amount of R\$8,159 is derived from plans sold prior to the issue of the administrative rule, the corresponding assets to which are already incorporated in fixed assets through the Community Telephone Plant - PCT. For reimbursement in shares, it is necessary to await the judicial ruling on the suits brought by the interested parties.
