Item 1. Reports to Stockholders.

COHEN & STEERS SELECT UTILITY FUND, INC.

August 9, 2006

To Our Shareholders:

We are pleased to submit to you our report for the six months ended June 30, 2006. The net asset value at that date was \$24.63 per common share. The fund's common stock is traded on the New York Stock Exchange and its share price can differ from its net asset value; at period end, the fund's closing price on the NYSE was \$20.67. The total return, including income, for Cohen & Steers Select Utility Fund and the comparative benchmarks were:

	Six Months Ended June 30, 2006
Cohen & Steers Select Utility Fund at Market Value ^a	5.59%
Cohen & Steers Select Utility Fund at Net Asset Value ^a	5.87%
S&P 1500 Utilities Index ^b	5.19%
S&P 500 Index ^b	2.71%
Blend 80% S&P 1500 Utilities Index, 20% Merrill Lynch Fixed Rate Preferred Index ^b	4.08%

Three monthly dividends of \$0.1025 per common share were declared and will be paid to common shareholders on July 31, 2006, August 31, 2006 and September 29, 2006.^c

Investment Review

Utility shares performed well during the first half of 2006, with a total return of 5.2% by the S&P 1500 Utilities Index compared with 2.7% for the S&P 500. The group benefited from a strong earnings growth outlook,

^a As a closed-end investment company, the price of the fund's New York Stock Exchange-traded shares will be set by market forces and at times may deviate from the net asset value per share of the fund.

^b S&P 1500 Utilities Index is an unmanaged market capitalization weighted index of 81 companies whose primary business involves the generation, transmission and/or distribution of electricity and/or natural gas. The S&P 500 Index is an unmanaged index of common stocks that is frequently used as a general measure of stock market performance. The Merrill Lynch Fixed Rate Preferred Index is an unmanaged index of preferred securities.

^c Please note that distributions paid by the fund to shareholders are subject to recharacterization for tax purposes. The final tax treatment of these distributions is reported to shareholders after the close of each fiscal year on form 1099-DIV. To the extent the fund pays distributions in excess of its net investment company taxable income, this excess would be a tax-free return of capital distributed from the fund's assets. To the extent this occurs, the fund's shareholders of record would be notified of the approximate amount of capital returned for each such distribution. Distributions of capital decrease the fund's total assets and, therefore, could have the effect of increasing the fund's expense ratio. In addition, in order to make these distributions, the fund may have to sell portfolio securities at a less than opportune time.

COHEN & STEERS SELECT UTILITY FUND, INC.

corporate restructuring activity and perhaps from its perceived traditional safe haven status amidst continued equity market volatility and a slowing economy. This solid performance came in the face of utility investors' concerns over rising interest rates, political opposition to rising utility bills and volatility in commodity prices.

Several utilities have announced new initiatives this year that we believe will support longer-term earnings growth. We believe this highlights the attractive fundamental environment for U.S. utilities and reflects the need to invest significant capital in our aging power and natural gas infrastructure. For example, shares of TXU Corp. reacted favorably to their April 10 announcement of a \$10 billion investment plan to build 11 new coal-fired power plants in Texas that could add more than \$1 billion of incremental earnings by 2010. TXU shares rose 20.9% during the first half of 2006, which compares with 5.2% for the utility index over the same period.

In our view, utility shareholders stand to benefit from several value-creating restructurings announced during the first half of 2006. Duke Energy, the fund's largest holding, announced plans to separate their sizable electric power utilities from their natural gas pipeline and midstream business to unlock the higher standalone valuation afforded pure-play natural gas infrastructure companies. While we believe there is further upside, the shares delivered an attractive 9.4% return during the first half of the year.

In another move, management of Kinder Morgan Inc. announced a management buyout at a 20% premium to the prevailing stock price. Importantly, both Kinder Morgan and Duke Energy see significant further organic growth opportunities through new natural gas pipeline and power infrastructure investments.

The fund slightly outperformed the S&P 1500 Utilities Index during the first half of 2006. The biggest contributor to performance relative to the index during the period was the German utility E.ON AG. E.ON benefited from attractive wholesale power pricing in continental Europe and has produced substantial earnings and dividend growth.

The fund's biggest detractor from performance was the lack of ownership of AES, a global power producer that was up 16.6%, reflecting strong first-quarter earnings and a broadly positive emerging-markets environment.

Utilities demonstrated their safe haven characteristics as overall market conditions deteriorated in the beginning of May. They turned in a solid relative performance amid market concerns that a more hawkish Fed policy could lead to greater interest rate increases that could stifle economic growth and hurt corporate earnings.

The fund's performance through June 30 relative to the index was influenced by its allocation to preferred stocks. The fund's preferred and fixed income positions (20.4% of total fund assets at quarter-end), which are used with the objective of enhancing income, detracted from performance due to the better overall performance of utility stocks. Preferred shares were up only 2.4% compared with utilities, which were up 5.2%. The fund's leveraged capital structure also contributed to its outperformance versus its unleveraged benchmark.

COHEN & STEERS SELECT UTILITY FUND, INC.

Investment Outlook

Utility fundamentals remain positive, in our view, and we forecast attractive earnings growth principally from two main areas.

First, companies with below-market contracts that roll off over the coming years will produce earnings growth as they sell their production in higher-priced commodity markets.

Second, many utilities have investment opportunities throughout the power and natural gas infrastructure, in areas such as power generation, transmission and natural gas storage and transmission. The scale of these investments is significant. The Department of Energy estimates that up to \$100 billion is needed to modernize our aging power transmission grid, to name one example. Overall, constructive regulation allows utilities to earn an attractive return on equity (ROE) typically around 11.0%, but sometimes as high as 13.9%.

We believe attractive earnings growth should result from these wide-ranging investment opportunities and the ability to re-contract forward production in higher-priced energy markets. We expect that annual earnings growth over the next three years will be two- to three-times the long-term average of 3%. Further, we believe the price that investors must pay for this growth is very reasonable. Utility stocks trade at around 14 times 2007 earnings, which is just above the long-term average. In our opinion, a premium to the historical sector P/E multiple is warranted, considering the much-improved growth outlook.

We were also pleased to see the extension through 2010 of the maximum 15% federal tax rate on qualified dividends, and believe the benefit of the lower tax rate has not been fully reflected in utility stocks.

Despite what we believe to be an attractive investment cycle for utilities, there are areas that warrant scrutiny.

Near-term power and natural gas prices have declined substantially since the beginning of the year as a result of high natural gas storage levels and lower demand driven largely by demand destruction from higher prices and by mild winter weather. However, longer-term forward power and natural gas prices have been much more resilient. It is important to note that most utilities have hedged much of their anticipated power sales for 2006, but have the ability to re-price below market hedges in the outer years, which, in our view, provides for meaningful earnings growth potential.

Rising interest rates continue to be seen as a risk, although we believe there is a misperception in terms of the utility sector's longer-term interest rate sensitivity. For the 10-year period ending March 31, 2006, the correlation of total returns for the 10-year U.S. Treasury bond and utilities was a mere 0.06. Nonetheless, we expect that an end to the tightening cycle and a slowdown in GDP growth should ease interest rate concerns.

Another challenge for utilities: the political impact of higher customer bills. After several years of constructive regulation, politicians in some states, such as Illinois and Maryland, have opposed anticipated rate increases. While rates are heading higher in the near term as a result of rising energy costs, we expect that a substantial portion of rate increases through the end of the decade will be the result of incremental capital expenditures for essential infrastructure investment. We expect these issues to be resolved with some form of phase-in of higher rates over time to ease the burden on consumers.

COHEN & STEERS SELECT UTILITY FUND, INC.

Our investment strategy is to focus on what we believe are attractively valued power and natural gas utilities with improving earnings and dividend growth potential. This includes utilities that, in our view, benefit from attractive fundamentals in the wholesale power market and regulated rate-base growth opportunities from increased infrastructure investments.

Long-term macro trends should also favor utility stocks. As baby boomers continue to head toward retirement in record numbers, we believe investors seeking income will be attracted to utilities' potential for relatively high and growing dividends. Furthermore, we expect to see continued consolidation of what is a highly fragmented industry. All of these factors, in our view, should lead to attractive stock price performance in the utility sector.

In closing, we believe that the fundamental outlook for the utility sector is strong and that the sector stands to benefit from a growing demand for more conservative income-producing equity investments.

Sincerely,

MARTIN COHEN

COHEN & STEERS SELECT UTILITY FUND, INC.Our Leverage Strategy
(Unaudited)

While we do not attempt to predict what future interest rates will be, it has been our philosophy to utilize interest rate swap transactions to seek to reduce the interest rate risk inherent in our utilization of leverage. Our leverage strategy involves issuing auction market preferred shares (AMPS) to raise additional capital for the fund, with an objective of increasing the net income available for shareholders. As of June 30, 2006, AMPS represented 35% of the fund's managed assets. Considering that AMPS have variable dividend rates, we seek to lock in the rate on a majority of this additional capital through interest rate swap agreements (where we effectively convert our variable rate obligation to a fixed rate obligation for the term of the swap agreements). Specifically, we have fixed the rate on 51% of our borrowings at an average interest rate of 4.1% for an average remaining period of 2.8 years (when we first entered into the swaps, the average term was 4.6 years). By locking in a large portion of our leveraging costs, we have endeavored to adequately protect the dividend-paying ability of the fund. The use of leverage increases the volatility of the fund's net asset value in both up and down markets. However, we believe that locking in a portion of the fund's leveraging costs for the term of the swap agreements partially protects the fund from any impact that an increase in short-term interest rates may have as a result of the use of leverage.

^a Commencement of operations.

^b Calculation based on average shares outstanding.

^c Less than \$.005 per share.

^d Total market value return is computed based upon the New York Stock Exchange market price of the fund's shares and excludes the effects of brokerage commissions. Dividends and distributions, if any, are assumed for purposes of this calculation, to be reinvested at prices obtained under the fund's dividend reinvestment plan. Total net asset value return measures the changes in value over the period indicated, taking into account dividends as reinvested.

^e Not annualized.

^f Annualized.

^g Ratios do not reflect dividend payments to preferred shareholders.

^h Average daily managed assets represents net assets applicable to common shares plus liquidation preference of preferred shares.

ⁱ Based on weekly prices.

See accompanying notes to financial statements.

COHEN & STEERS SELECT UTILITY FUND, INC.

NOTES TO FINANCIAL STATEMENTS (Unaudited)

Note 1. Significant Accounting Policies

Cohen & Steers Select Utility Fund, Inc. (the fund) was incorporated under the laws of the State of Maryland on January 8, 2004 and is registered under the Investment Company Act of 1940, as amended, as a nondiversified closed-end management investment company. The fund's investment objective is a high level of after-tax total return.

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America (GAAP). The preparation of the financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Portfolio Valuation: Investments in securities that are listed on the New York Stock Exchange are valued, except as indicated below, at the last sale price reflected at the close of the New York Stock Exchange on the business day as of which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices for the day or, if no asked price is available, at the bid price.

Securities not listed on the New York Stock Exchange but listed on other domestic or foreign securities exchanges or admitted to trading on the National Association of Securities Dealers Automated Quotations, Inc. (Nasdaq) national market system are valued in a similar manner. Securities traded on more than one securities exchange are valued at the last sale price on the business day as of which such value is being determined as reflected on the tape at the close of the exchange representing the principal market for such securities.

Readily marketable securities traded in the over-the-counter market, including listed securities whose primary market is believed by Cohen & Steers Capital Management, Inc. to be over-the-counter, but excluding securities admitted to trading on the Nasdaq National List, are valued at the official closing prices as reported by Nasdaq, the National Quotation Bureau, or such other comparable sources as the Board of Directors deem appropriate to reflect their fair market value. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices for the day, or if no asked price is available, at the bid price. However, certain fixed-income securities may be valued on the basis of prices provided by a pricing service when such prices are believed by the Board of Directors to reflect the fair market value of such securities. Where securities are traded on more than one exchange and also over-the-counter, the securities will generally be valued using the quotations the Board of Directors believes most closely reflect the value of such securities.

Securities for which market prices are unavailable, or securities for which the investment manager determines that bid and/or asked price does not reflect market value, will be valued at fair value pursuant to procedures approved by the fund's Board of Directors. Circumstances in which market prices may be unavailable include, but are not limited to, when trading in a security is suspended, the exchange on which the security is traded is subject to an unscheduled close or disruption or material events occur after the close of the exchange on which the security

COHEN & STEERS SELECT UTILITY FUND, INC.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

is principally traded. In these circumstances, the fund determines fair value in a manner that fairly reflects the market value of the security on the valuation date based on consideration of any information or factors it deems appropriate. These may include recent transactions in comparable securities, information relating to the specific security and developments in the markets.

The fund's use of fair value pricing may cause the net asset value of fund shares to differ from the net asset value that would be calculated using market quotations. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security.

Short-term debt securities, which have a maturity date of 60 days or less, are valued at amortized cost, which approximates value.

Security Transactions and Investment Income: Security transactions are recorded on trade date. Realized gains and losses on investments sold are recorded on the basis of identified cost. Interest income is recorded on the accrual basis. Discounts are accreted and premiums are amortized over the life of the respective securities. Dividend income is recorded on the ex-dividend date. The fund records distributions received in excess of income from underlying investments as a reduction of cost of investments and/or realized gain. Such amounts are based on estimates if actual amounts are not available, and actual amounts of income, realized gain and return of capital may differ from the estimated amounts. The fund adjusts the estimated amounts of the components of distributions (and consequently its net investment income) as an increase to unrealized appreciation/(depreciation) and realized gain/(loss) on investments as necessary once the issuers provide information about the actual composition of the distributions.

Foreign Currency Translation and Forward Foreign Currency Contracts: The books and records of the fund are maintained in U.S. dollars as follows: (1) the foreign currency market value of investment securities, other assets and liabilities and forward foreign currency contracts (forward contracts) are translated at the exchange rates prevailing at the end of the period; and (2) purchases, sales, income and expenses are translated at the exchange rates prevailing on the respective dates of such transactions. The resultant exchange gains and losses are recorded as realized and unrealized gain/loss on foreign exchange transactions. Pursuant to U.S. federal income tax regulations, certain foreign exchange gains/losses included in realized and unrealized gain/loss are included in or are a reduction of ordinary income for federal income tax purposes. The fund does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the changes in the market prices of the securities. Forward contracts are valued daily at the appropriate exchange rates. The resultant unrealized exchange gains and losses are recorded as unrealized foreign currency gain or loss. The fund records realized gains or losses on delivery of the currency or at the time the forward contract is extinguished (compensated) by entering into a closing transaction prior to delivery.

COHEN & STEERS SELECT UTILITY FUND, INC.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

Foreign Securities: The fund may directly purchase securities of foreign issuers. Investing in securities of foreign issuers involves special risks not typically associated with investing in securities of U.S. issuers. The risks include possible revaluation of currencies, the ability to repatriate funds, less complete financial information about companies and possible future adverse political and economic developments. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of securities of comparable U.S. issuers.

Interest Rate Swaps: The fund uses interest rate swaps in connection with the sale of preferred shares. The interest rate swaps are intended to reduce the risk that an increase in short-term interest rates could have on the performance of the fund's common shares as a result of the floating rate structure of the preferred shares. In these interest rate swaps, the fund agrees to pay the other party to the interest rate swap (which is known as the counterparty) a fixed rate payment in exchange for the counterparty agreeing to pay the fund a variable rate payment that is intended to approximate the fund's variable rate payment obligation on the preferred shares. The payment obligation is based on the notional amount of the swap. Depending on the state of interest rates in general, the use of interest rate swaps could enhance or harm the overall performance of the common shares. The market value of interest rate swaps is based on pricing models that consider the time value of money, volatility, the current market and contractual prices of the underlying financial instrument. Unrealized gains are reported as an asset and unrealized losses are reported as a liability on the Statement of Assets and Liabilities. The change in value of swaps, including the accrual of periodic amounts of interest to be paid or received on swaps, is reported as unrealized gains or losses in the Statement of Operations. A realized gain or loss is recorded upon payment or receipt of a periodic payment or termination of swap agreements. Swap agreements involve, to varying degrees, elements of market and counterparty risk, and exposure to loss in excess of the related amounts reflected in the Statement of Assets and Liabilities.

Dividends and Distributions to Shareholders: Dividends from net investment income and capital gain distributions are determined in accordance with U.S. federal income tax regulations, which may differ from GAAP. Dividends from net investment income are declared and paid monthly. Net realized capital gains, unless offset by any available capital loss carryforward, are distributed to shareholders annually. Dividends and distributions to shareholders are recorded on the ex-dividend date and are automatically reinvested in full and fractional shares of the fund unless the shareholder has elected to have them paid in cash.

Distributions paid by the fund are subject to recharacterization for tax purposes. Based upon the results of operations for the six months ended June 30, 2006, the investment manager considers it likely that a portion of the dividends will be reclassified to return of capital and distributions of net realized capital gains upon the final determination of the fund's taxable income for the year. Net realized capital gains, unless offset by any available capital loss carryforward, are distributed to shareholders annually.

COHEN & STEERS SELECT UTILITY FUND, INC.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

Series M7, Series T7, Series W7, Series TH7 and Series F7 preferred shares pay dividends based on a variable interest rate set at auctions, normally held every seven days. The dividends are declared and recorded for the subsequent seven day period on the auction date. In most instances, dividends are payable every seven days, on the first business day following the end of the dividend period.

Series T28 and Series TH28 preferred shares pay dividends based on a variable interest rate set at auctions, normally held every 28 days. The dividends are declared and recorded for the subsequent 28 day period on the auction date. In most instances, dividends are payable every 28 days, on the first business day following the end of the dividend period.

Federal Income Taxes: It is the policy of the fund to continue to qualify as a regulated investment company, if such qualification is in the best interest of the shareholders, by complying with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies, and by distributing substantially all of its taxable earnings to its shareholders. Accordingly, no provision for federal income or excise tax is necessary.

Note 2. Investment Management Fees, Administration Fees and Other Transactions with Affiliates

Investment Management Fees: Cohen & Steers Capital Management, Inc. (the investment manager) serves as the fund's investment manager pursuant to an investment management agreement (the management agreement). Under the terms of the management agreement, the investment manager provides the fund with day-to-day investment decisions and generally manages the fund's investments in accordance with the stated policies of the fund, subject to the supervision of the Board of Directors

For the services under the management agreement, the fund pays the investment manager a management fee, accrued daily and paid monthly, at an annual rate of 0.85% of the fund's average daily managed asset value. Managed asset value is the net asset value of the common shares plus the liquidation preference of the preferred shares.

The investment manager has contractually agreed to waive its investment management fee in the amount of 0.20% of average daily managed asset value for the first five years of the fund's operations, 0.15% of average daily managed asset value in year six, 0.10% of average daily managed asset value in year seven and 0.05% of average daily managed asset value in year eight. During the six months ended June 30, 2006, the investment manager waived its fee at the annual rate of 0.20%.

Administration Fees: The fund has entered into an administration agreement with the investment manager under which the investment manager performs certain administrative functions for the fund and receives a fee, accrued daily and paid monthly, at the annual rate of 0.06% of the fund's average daily managed assets up to \$1 billion, 0.04% of the fund's average daily managed assets in excess of \$1 billion up to \$1.5 billion and 0.02% of the fund's average daily managed assets in excess of \$1.5 billion. For the six months ended June 30, 2006, the fund paid the investment manager \$408,281 in fees under this administration agreement. Additionally, the

COHEN & STEERS SELECT UTILITY FUND, INC.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

fund has retained State Street Bank and Trust Company as sub-administrator under a fund accounting and administration agreement.

Directors' and Officers' Fees: Certain directors and officers of the fund are also directors, officers, and/or employees of the investment manager. The fund does not pay compensation to any affiliated directors and officers except for the Chief Compliance Officer, who received \$5,094 from the fund for the six months ended June 30, 2006.

Investments in Affiliates: An affiliate company is a company in which the fund has ownership of at least 5% of the voting securities. Period end holdings with such companies during the six months ended June 30, 2006 were as follows:

Issuer	Shares Held	Value	Income
Duke Energy Income Fund	783,850	\$ 8,250,683	\$ 234,915
Duke Energy Income Fund, 144A	202,000	2,126,221	60,736
		\$ 10,376,904	\$ 295,651

Note 3. Purchases and Sales of Securities

Purchases and sales of securities, excluding short-term investments, for the six months ended June 30, 2006, totaled \$100,643,050 and \$70,272,776, respectively.

Note 4. Income Tax Information

As of June 30, 2006, the federal tax cost and net unrealized appreciation of investments were as follows:

Cost for federal income tax purposes	\$ 1,378,056,158
Gross unrealized appreciation	\$ 251,112,614
Gross unrealized depreciation	(9,995,732)
Net unrealized appreciation	\$ 241,116,882

Note 5. Capital Stock

The fund is authorized to issue 100 million shares of common stock at a par value of \$0.001 per share.

During the six months ended June 30, 2006 and the year ended December 31, 2005, the fund issued no shares of common stock for the reinvestment of dividends.

The fund's articles of incorporation authorize the issuance of fund preferred shares, par value \$0.001 per share, in one or more classes or series, with rights as determined by the Board of Directors, by action of the Board of Directors without the approval of the common shareholders.

COHEN & STEERS SELECT UTILITY FUND, INC.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

During the six months ended June 30, 2006 and year ended December 31, 2005, adjustments of \$76,626 and \$310,222, respectively, were credited to common stock for differences between estimated and actual preferred offering costs.

On December 16, 2005, the fund issued 3,000 auction market preferred shares, Series TH7 (par value \$0.001). Proceeds paid to the fund amounted to \$73,890,975 after deduction of underwriting commissions and offering expenses of \$1,109,025. This issue has received a "AAA/Aaa" rating from Standard & Poor's and Moody's.

Preferred shares are senior to the fund's common shares and will rank on a parity with shares of any other series of preferred shares, and with shares of any other series of preferred stock of the fund, as to the payment of dividends and the distribution of assets upon liquidation. If the fund does not timely cure a failure to (1) maintain a discounted value of its portfolio equal to the preferred shares basic maintenance amount, (2) maintain the 1940 Act preferred shares asset coverage, or (3) file a required certificate related to asset coverage on time, the preferred shares will be subject to a mandatory redemption at the redemption price of \$25,000 per share plus an amount equal to accumulated but unpaid dividends thereon to the date fixed for redemption. To the extent permitted under the 1940 Act and Maryland Law, the fund at its option may without consent of the holders of preferred shares, redeem preferred shares having a dividend period of one year or less, in whole, or in part, on the business day after the last day of such dividend period upon not less than 15 calendar days and not more than 40 calendar days prior to notice. The optional redemption price is \$25,000 per share plus an amount equal to accumulated but unpaid dividends thereon to the date fixed for redemption.

The fund's common shares and preferred shares have equal voting rights of one vote per share and vote together as a single class, except in certain circumstances regarding the election of directors. In addition, the affirmative vote of the holders of a majority, as defined in the 1940 Act, of the outstanding preferred shares shall be required to (1) approve any plan of reorganization that would adversely affect the preferred shares and (2) approve any matter that materially and adversely affects the rights, preferences, or powers of that series.

COHEN & STEERS SELECT UTILITY FUND, INC.

UBS AG	\$ 20,000,000	5.224%	5.267%	Feb 20, 2010	211,708
					\$ 10,232,673

^a Based on LIBOR (London Interbank Offered Rate). Represents rates in effect at June 30, 2006.

Note 7. Other

In the normal course of business, the fund enters into contracts that provide general indemnifications. The fund's maximum exposure under these arrangements is dependent on claims that may be made against the fund in the future and, therefore, cannot be estimated; however, based on experience, the risk of material loss from such claims is considered remote.

In July 2006, the Financial Accounting Standards Board (FASB) issued Interpretation 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement 109 (FIN 48). FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position must meet before being recognized in the financial statements. FIN 48 is effective for fiscal years beginning after December 15, 2006. The fund will adopt FIN 48 during 2007 and the impact to the fund's financial statements, if any, is currently being assessed.

COHEN & STEERS SELECT UTILITY FUND, INC.

PROXY RESULTS (Unaudited)

During the six months ended June 30, 2006, Cohen & Steers Select Utility Fund, Inc. shareholders voted on the following proposals at the annual meeting held on April 27, 2006. The description of each proposal and number of shares voted are as follows:

Common Shares

	Shares Voted For	Authority Withheld
To Elect Directors		
George Grossman	40,526,345	812,390
Robert H. Steers	40,542,146	796,589
C. Edward Ward, Jr.	40,535,877	802,858

Preferred Shares

	Shares Voted For	Authority Withheld
George Grossman	18,566	172
Robert H. Steers	18,566	172
C. Edward Ward, Jr.	18,566	172

COHEN & STEERS SELECT UTILITY FUND, INC.

AVERAGE ANNUAL TOTAL RETURNS

(periods ended June 30, 2006) (Unaudited)

Based on Net Asset Value		Based on Market Value	
One Year	Since Inception (03/30/04)	One Year	Since Inception (03/30/04)
5.78%	18.16%	2.20%	7.12%

The performance data quoted represent past performance. Past performance is no guarantee of future results. The investment return will vary and the principal value of an investment will fluctuate and shares, if sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance results reflect the effect of leverage resulting from the issuance of preferred shares.

REINVESTMENT PLAN

We urge shareholders who want to take advantage of this plan and whose shares are held in 'Street Name' to consult your broker as soon as possible to determine if you must change registration into your own name to participate.

OTHER INFORMATION

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940 that the fund may purchase, from time to time, shares of its common stock in the open market.

A description of the policies and procedures that the fund uses to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling 800-330-7348, (ii) on our Web site at cohenandsteers.com or (iii) on the Securities and Exchange Commission's Web site at <http://www.sec.gov>. In addition, the fund's proxy voting record for the most recent 12-month period ended June 30 is available (i) without charge, upon request, by calling 800-330-7348 or (ii) on the SEC's Web site at <http://www.sec.gov>.

The fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The fund's Forms N-Q are available (i) without charge, upon request by calling 800-330-7348, or (ii) on the SEC's Web site at <http://www.sec.gov>. In addition, the Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 800-SEC-0330.

Please note that the distributions paid by the fund to shareholders are subject to recharacterization for tax purposes. The fund may also pay distributions in excess of the fund's net investment company taxable income and this excess would be a tax-free return of capital distributed from the fund's assets. To the extent this occurs, the

COHEN & STEERS SELECT UTILITY FUND, INC.

fund's shareholders of record will be notified of the estimated amount of capital returned to shareholders for each such distribution and this information will also be available at cohenandsteers.com. The final tax treatment of all distributions is reported to shareholders on their 1099-DIV forms, which are mailed after the close of each calendar year. Distributions of capital decrease the fund's total assets and, therefore, could have the effect of increasing the fund's expense ratio. In addition, in order to make these distributions, the fund may have to sell portfolio securities at a less than opportune time.
