ISS recommended to vote against. The mgmt of the company provided more information by e-mail with regards to the proposed features of the plan. Vesting period/ dilution and methodology of price setting (with no discount) looks reasonable. However the freedom to set the final price and details of the plan by the board with no clear parameters / limits still doesn't seem ideal and disable us from accessing the final impact from the decision.

Common practice in Chile, in which any topic can be discussed, so we tend to vote against as we can not assess the impact from proposals that may be raised during the meeting.

Bundled resolution. ISS recommended investors to go against as names were not disclosed ahead of the meeting, however the company did provide the names of the candidates appointed by minorities.

Although disclosure of proposal ahead of the meeting is not required under Chilean regulation we saw other companies providing such information so worth Abstaining and encourage the company to enhance disclosure.
