**HIGHWAY HOLDINGS REPORTS FISCAL 2008 THIRD QUARTER RESULTS**

**-- Net Sales Climb 7.9 Percent for Nine Months; Strikes Disrupt Operations; Backlog Up for Quarter --**

**HONG KONG — February 15, 2008** — Highway Holdings Limited (**Nasdaq:HIHO**) today reported results for its third fiscal quarter ended December 31, 2007, reflecting the impact of labor unrest in China associated with new government regulations concerning labor benefits and entitlements, overtime work and worker compensation claims. Net sales for the third fiscal quarter were \$7.7 million compared with \$8.8 million in the same quarter in fiscal 2007. For the third quarter of fiscal 2008, the company reported a net loss of \$905,000, or \$0.24 per share, compared with net income of \$278,000, or \$0.08 per diluted share, last year.

Net sales for the first nine months of fiscal 2008 increased 7.9 percent to \$25.4 million from \$23.5 million a year earlier. For the same time period, the company reported a net loss of \$574,000, or \$0.15 per share, compared with net income of \$1,036,000, or \$0.29 per diluted share, a year earlier.

Metal, mechanical and electronic OEM sales for the nine months represented approximately \$24.3 million, or 95.6 percent of the company's total net sales.

Gross margin was 11.1 percent for the third quarter compared with 20.6 percent in the 2007 three-month period. For the nine-months, gross margin was 17.0 percent compared with 20.4 percent in the same period a year ago.

Selling, general and administrative expenses increased by \$268,000 for the fiscal third quarter and \$972,000 for the current nine-month period as a result of its Golden Bright division that the company added last year, as well as extraordinary costs associated with the labor problems.

Kohl noted the company's balance sheet remains strong. The company's current ratio was 2.0:1 at December 31, 2007.

“Results for the fiscal third quarter were impacted by labor strikes at our facilities, which severely limited our production during this past quarter. Labor strikes have affected a majority of companies in the region, since the Chinese Government commenced strictly enforcing labor laws regarding overtime limits last summer. In addition, a new Chinese national labor law concerning working hours, overtime work and other general employee benefits and compensation took effect January 1, 2008, which created further confusion and misunderstanding among corporations and employees,” said Roland Kohl, president and chief executive officer of Highway Holdings.

He noted that the four strikes disrupted the company’s operations and impacted its profitability, including approximately \$539,000 in extraordinary charges -- while creating a backlog of unfilled orders of approximately \$3.0 million

Kohl indicated that the company, as a protective measure, negotiated with its employees and provided certain extraordinary payment and salary adjustments. “This eventually defused the situation in January,” Kohl said.

He indicated that a sharp reduction in overtime work coupled with an overall labor shortage in China, along with strikes and work slowdowns, resulted in significantly reduced working hours, less production output and higher expenses.

“While we anticipated some future adverse impact to our operations when we reported the company’s fiscal second quarter results due to the labor situation at the time, we clearly did not foresee a situation of such large proportions. In fact, it was our expectation that the company’s financial results would have reflected an increase in revenues and profitability. Historically our relationship with the company’s workforce has been excellent and we look forward to avoiding such situations in the future,” Kohl said.

Nevertheless, Kohl noted that it is clear that, because of the changing operating environment for manufacturing companies in China and in order for Highway Holdings to continue its growth as an OEM company, Highway Holdings will need to decrease its dependence on low-cost labor and increase the amount of automation in its factories and, possibly, also shift some of its production to other low-cost countries in Asia. He indicated that the shift to increased automation was already underway and that the company has been investigating other possible alternatives. “We are optimistic that most of the labor unrest is behind us. As a result of the strong backlog that the company has accumulated, we are well positioned to achieve better financial performance in the near future - which is obviously dependent on the company’s ability to maintain an adequate workforce and avoid the labor disruptions of the past,” Kohl said.
