The Fund follows fair valuation accounting standards (FASB ASC 820-10) which establishes a definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These inputs are summarized in the three broad levels listed below:

- Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Fund
  - has the ability to access at the measurement date;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly,
  - including inputs in markets that are not considered to be active;
- Level 3 Inputs that are unobservable.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes. The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following table summarizes the inputs used to value the Fund's investments in securities as of September 30, 2017:

Investments in Securities:	Level 1	Level 2	Level 3	Total
Assets				
Common Stocks*	\$145,987,096	\$ —	\$ —	\$145,987,096
Short-Term Investments	8,852,560	—	—	8,852,560
Total Investments in Securities	\$154,839,656	\$ —	\$ —	\$154,839,656

\* See Schedule of Investments for further classification.

The Fund follows the updated provisions surrounding fair value measurements and disclosures on transfers in and out of all levels of the fair value hierarchy on a gross basis and the reasons for the transfers as well as disclosures about the valuation techniques and inputs used to measure fair value for investments that fall in either Level 2 or Level 3 of the fair value hierarchy.

For the period ended September 30, 2017, there were no transfers between Level 1, Level 2, and Level 3 assets.

The Fund's policy is to recognize transfers between levels at the beginning of the reporting period.

An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in aggregate, that is significant to fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation techniques used.

For the period ended September 30, 2017, there were no Level 3 investments. The Schedule of Investments includes a breakdown of the Funds' investments by category.
