2. Reason for the Revision

Pursuant to the enactment of the new law concerning defined benefit corporate pension plans in Japan, Canon Inc. (Canon), on March 1, 2003, obtained from the Minister of Health, Labor and Welfare, an exemption from the obligation to pay benefits for future employee services related to the substitutional portion of the Employees Pension Fund By applying the interim measure set forth in the Practice Guideline Concerning Retirement Benefit Accounting (Interim Report) (Report of the Accounting Standards Committee of The Japanese Institute of Certified Public Accountants No. 13) Item 47-2, Canon is revising its non-consolidated forecasts to include an approximate increase of 45 billion yen in non-ordinary income and 26 billion yen in net income. This is reflected in the non-consolidated first-half and full-year forecasts, which were released on January 30, 2003.

Consolidated financial statements are prepared in conformity with U.S. generally accepted accounting principles. Under U.S. GAAP, the relevant impact is recognized only on the settlement of the substitutional portion when the company returns the past benefit obligation to the Government (expected to be sometime in or after October 2003). Given the difficulty in estimating the future financial impact, consolidated forecasts are not being revised.

This release contains forward-looking statements, which reflect management's current views with respect to certain future events and financial performance. Actual results may differ materially from those projected or implied in any forward-looking statements. Further, certain forward-looking statements are based upon assumptions of future events which may not prove to be accurate.
