

# Edgar Filing: CONVERIUM HOLDING AG - Form 6-K

Converium Holding Ltd, Zug

Zug, Switzerland - August 8, 2006 - Converium reports a strong financial performance in the second quarter of 2006.

In the second quarter of 2006 Converium produced net income of USD 62.5 million. The quarterly highlights included:

- o Shareholders' equity of USD 1,796.1 million as of June 30, 2006, up USD 142.7 million or 8.6% compared with December 31, 2005;
- o Return on shareholders' equity of 14.6%, up from 11.4% in the second quarter of 2005;
- o A solid underwriting performance, with a non-life combined ratio of 99.8% and segment income of ongoing operations of USD 69.0 million;
- o Favorable prior accident years' developments, for the fifth consecutive quarter, resulting in a net positive impact on the technical result of USD 19.4 million;
- o The successful and faster than expected progression of the North American run-off and commutation strategy, leading to a total reduction of net reserves in the Run-Off segment of USD 185.6 million to USD 1,012.2 million, and a benefit to the technical result from commutations of USD 30.7 million;
- o Net investment income of USD 84.7 million or an average annualized net investment income yield of 4.7%; o Strong July 1 non-life treaty renewals, with renewed business growing by 41.3%.

Inga Beale, Chief Executive Officer, commented: "I am very pleased with another quarter of strong financial performance by Converium. The results reflect the profitable execution of our North American run-off and commutation strategy, favorable prior-year developments and a solid underlying underwriting performance."

Inga Beale added: "Converium continues to regain strength and stability, as recognized by Standard & Poor's in their recent assignment of a positive outlook on our ratings. This is a major step forward for us and augurs well for the future. We will continue to work diligently towards meeting Standard & Poor's requirements for an upgrade at the earliest possible date."

Overview of second quarter and first half of 2006 financial performance

Strong set of significantly improved financial results

For the second quarter of 2006, Converium reported pre-tax operating income of USD 84.0 million and net income of USD 62.5 million, compared with USD 57.1 million and USD 46.9 million, respectively, for the same period of 2005. For the first half of 2006, this translates into pre-tax operating income of USD 156.7 million, compared with the previous period's USD 75.9 million. Net income increased to USD 124.1 million, from USD 41.4 million in the first half of 2005.

The table below shows the reconciliation of pre-tax operating income to income before taxes for the three and six months ended June 30, 2006 and 2005:

	Three months ended June 30		Six
	2006	2005	2
Pre-tax operating income	84.0	57.1	15
Net realized capital (losses) gains	-12.6	-1.0	-1
Amortization of intangible assets	-	-6.8	
Restructuring costs	-	-3.5	
Income before taxes	71.4	45.8	13
Net income	62.5	46.9	12

-----

- (1) Pre-tax operating income is defined as income before taxes excluding pre-tax net realized capital gains (losses), amortization of intangible assets and restructuring costs.
- (2) Ongoing total segment income is defined as net premiums earned plus total investment results minus losses, loss expenses and life benefits, acquisition costs and other operating and administration expenses, excluding Corporate Center.
- (3) Ongoing non-life combined ratio is defined as ongoing non-life loss ratio (to net premiums earned) plus ongoing non-life acquisition costs ratio (to net premiums earned) plus ongoing non-life administration expense ratio (to net premiums written).

Stable business volume despite continuing ratings disadvantage

Gross premiums written in the second quarter of 2006 came in at USD 474.7 million, plus 25.5% compared with the second quarter of 2005. Net premiums written increased by 28.4% to USD 414.0 million. Net premiums earned fell by 21.3% to USD 475.7 million, compared with the same period of 2005, reflecting the completion of premium earnings from prior underwriting years.

For the first half of 2006, gross premiums written, net premiums written and net premiums earned were USD 1,130.0 million, USD 1,066.2 million and USD 911.0 million, respectively, decreasing by 0.6%, 0.2% and 31.8%, respectively, compared with the first half of 2005. Gross and net premiums written for the first half of 2006 remained largely flat, demonstrating the resilience of Converium's franchise despite the continuing disadvantage of the Company's financial strength ratings.

Solid underwriting performance of ongoing business segments

The second quarter's ongoing non-life combined ratio was 99.8%, including an administration expense ratio of 6.8%, compared with 102.8% and 8.9%, respectively, for the same period of 2005. The second quarter of 2006 was favorably impacted by a positive net impact of prior accident years on the technical result of USD 19.4 million, partially offset by some minor catastrophic losses totaling USD 10.5 million as well as higher than expected loss activity in the Property line of business of USD 8.0 million. Converium's underlying underwriting performance remained solid.

For the first half of 2006, Converium recorded an ongoing non-life combined ratio of 97.0%, including an administration expense ratio of 4.6%, compared with 103.8% and 6.9%, respectively, for the same period of 2005. The improved underwriting performance in 2006 reflects the absence of any major catastrophic events as well as a positive net impact of prior accident years on the technical result of USD 31.7 million.

Favorable prior accident years' developments

In the second quarter of 2006, Converium recorded a net positive impact of prior accident years on the technical result of USD 19.4 million, with the Company's ongoing operations accounting for USD 28.9 million, partially offset by a negative development in the Run-Off segment. In the same period of 2005, the overall net positive impact of prior accident years on the technical result was USD 3.9 million.

For the first half of 2006, an overall net positive impact of USD 31.7 million was recorded, with the ongoing operations accounting for USD 42.5 million, partially offset by a net negative impact in the Run-Off segment. In the same period of 2005, there was a net negative impact of prior accident years on the technical result of USD 5.8 million.

Successful progression of North American run-off and commutations

Converium's North American run-off and commutation efforts continue to progress very satisfactorily. The reduction of North American liabilities continues to be

## Edgar Filing: CONVERIUM HOLDING AG - Form 6-K

ahead of plan. In the second quarter of 2006, the Run-Off segment's net reserves were reduced by USD 185.6 million to USD 1,012.2 million. The commutations of the Run-Off segment's net reserves of USD 144.1 million resulted in a benefit to Converium's technical result of USD 30.7 million. For the first half of 2006, this translates into an overall reduction of the Run-Off segment's net reserves by USD 297.5 million. Total commutations were USD 189.8 million, resulting in a benefit to the technical result of USD 43.1 million.

### Operating and administration expenses under control

In the second quarter of 2006, total administration expenses were USD 47.9 million, a reduction of 5.0% compared with the same period of 2005. The progress in reducing expenses was slowed by increasing audit fees in the context of Converium's preparation for Sarbanes-Oxley compliance as well as late payments relating to the restatement of prior year accounts. For the first half of 2006, total administration expenses declined by 22.1% to USD 83.6 million, compared with the same period of 2005. The reduction reflects the effects of the cost management measures taken in 2005 as well as the non-recurrence of the expenses associated with staff retention plans in 2005.

3

### Satisfactory investment result

In the second quarter of 2006, Converium reported net investment income of USD 84.7 million and an average annualized net investment income yield of 4.7%, which compares with USD 87.8 million and 4.4%, respectively, for the same period of 2005. The decline in net investment income is a result of Converium's average invested asset base declining by USD 896.5 million compared with the second quarter of 2005. The increase in the annualized net investment income yield is attributable to higher yields on bonds and short-term investments.

Taking into account the net realized capital losses, primarily from fixed-income securities, the total investment result came in at USD 72.1 million which compares with USD 86.8 million for the same period of 2005. Net realized capital losses resulted primarily from the sale of fixed-income securities to fund commutation payments. The average annualized total investment income yield came in at 4.0%, compared with 4.3% in the same period of 2005.

In the second quarter of 2006, Converium recorded a reduction in net unrealized capital gains and losses (pre-tax) of USD 31.7 million. This development is largely due to increasing yields on fixed-income securities.

### Strong July 1 renewals

Converium recorded a very successful July 1 renewal of non-life treaties, achieving an increase of 41.3% to USD 109.6 million, based on the business which was up for renewal. The July renewals represent approximately 5% of Converium's total estimated non-life premium, and primarily included business written in Latin America and the Caribbean, growing by 28.0%, the Middle-East, increasing by 26.5%, and North America, expanding by 92.0%. The book of US Property business up for renewal grew to USD 38.9 million on the back of very attractive market conditions. Converium's exposure to a one-in-250-years event remains unchanged, reflecting an improved geographical diversification in the US. The Company's US property business is selectively written out of Zurich, and represents around 4% of Converium's total estimated non-life premium income in 2006. Consistent with its underwriting strategy, the Company did not renew any US Casualty business.

## Edgar Filing: CONVERIUM HOLDING AG - Form 6-K

Short- to medium-term outlook

Financial guidance essentially unchanged

Converium reiterates its full-year financial guidance given in March 2006, except for expected Corporate Center costs and run-off liabilities:

- o Gross premiums written for 2006 are projected to come in at USD 1.8 - 1.9 billion.
- o The priced combined ratio for the ongoing non-life operations is anticipated at around 102.5%, including an administration expense ratio of 5.5%, expected losses from natural catastrophes of about USD 80 million, but excluding expected Corporate Center costs of approximately USD 45 - 50 million, up from the Company's previous guidance of USD 40 million.
- o For the full year 2006, the reduction of net liabilities in the Run-Off segment is likely to exceed the Company's previous guidance of USD 375 million.
- o The corporate tax rate is expected to range between 7 - 12%.
- o Average invested assets including cash and cash equivalents should be in the magnitude of approximately USD 7 billion.

Seeking finality on Converium Reinsurance (North America) Inc.

Converium continues to explore a sale of CRNA with high priority. The Company reaffirms that any sale of CRNA must achieve medium- to long-term shareholder value.

4

Execution of clearly defined medium-term business strategy

Converium's new Board of Directors has affirmed the Company's medium-term business strategy, based on its current, proven business model. Converium aspires to develop into a leading mid-sized multi-line reinsurer with a distinct geographic emphasis on Europe, Asia Pacific and the Middle East, and with a focus on global specialty lines. In order to achieve this medium-term objective, the Company:

- o pursues a strategy of profitable organic growth, with investments in specialty lines;
- o maintains and develops multiple distribution channels, including joint ventures;
- o broadens its client base;

## Edgar Filing: CONVERIUM HOLDING AG - Form 6-K

- o expands its knowledge base;
- o enhances its risk management and control culture;
- o advances cost and capital efficiency; and
- o aims at achieving a more balanced portfolio split between proportional and non-proportional business.

Converium believes that, based on this strategy, it can profitably grow its business by regaining shares with existing clients and establishing new client relationships.

### Business development per segment

Standard Property & Casualty Reinsurance reported segment income of USD 44.7 million for the second quarter and USD 88.8 million for the first half of 2006, compared with USD 35.4 million and USD 49.7 million, respectively, for the same periods of 2005. The segment's combined ratio improved in both the second quarter and first half of 2006 to 92.2% and 87.5%, respectively, compared with 103.8% and 101.4% in the same periods of 2005.

The segment results in the second quarter and first half of 2006 reflect a solid underwriting performance, a net positive impact of prior accident years on the technical result, the absence of any major catastrophic events and a reduced administration expense ratio resulting from the impact of cost management measures taken in 2005. The second quarter results were partially offset by some minor catastrophic losses totaling USD 10.5 million as well as higher than expected loss activity in the Property line of business of USD 8.0 million.

For the second quarter of 2006, the segment recorded a net positive impact of prior accident years on the technical result of USD 26.4 million, resulting from a net positive development of prior accident years' loss reserves of USD 44.9 million, offset by the net effect of reductions of premiums and other expenses of USD 18.5 million. The net positive development was partially attributable to an update to case reserves across all lines of business. Overall, the net positive impact on the technical result was most pronounced in the Property and General Third Party Liability lines of business, with benefitted of USD 13.4 million and USD 7.8 million, respectively.

For the first half of 2006, the Standard Property & Casualty Reinsurance segment experienced a net positive impact of prior accident years on the technical result in the amount of USD 36.6 million. The General Third Party Liability and Property lines of business accounted for the biggest positive effects, with USD 24.7 million and USD 18.1 million, respectively.

In the second quarter of 2006, gross and net premiums written increased by 117.9% and 89.3% to USD 218.1 million and USD 167.5 million, respectively. Net premiums earned decreased by 6.4% to USD 209.8 million, compared with the same period of 2005. The sharp increases in gross and net premiums written are primarily a result of the low premiums in the second quarter of 2005 due to the adjustment of premium estimates and related corrections of accrued premiums in the Liability line of business. The decrease of net premiums earned reflects the impact of the ratings downgrade in 2004 with significantly lower earned premiums from prior underwriting years.

In the first half of 2006, gross premiums written increased by 4.0% to USD 558.9 million, net premiums written decreased by 1.6% to USD 513.2 million and net premiums earned declined by 27.3% to USD 361.9 million, compared with the same period of 2005.

In the first half of 2006, the reduction in net premiums written by line of business included:

- o Motor, which decreased by 38.7% to USD 101.9 million, reflecting this year's closing of the 2003 Lloyd's underwriting year;
- o Property, which declined by 4.0% to USD 258.7 million.

These decreases were largely offset by an increase in the General Third Party Liability line of business, which increased 101.1% to USD 145.3 million, reflecting additional Lloyd's business.

Specialty Lines reported segment income of USD 15.4 million for the second quarter 2006 and USD 35.3 million for the first half of 2006, compared with USD 37.0 million and USD 48.4 million for the same periods of 2005, respectively. The segment's combined ratio in the second quarter was 108.6%, compared with 102.3% in the same period of 2005. For the first half of 2006, the segment's combined ratio improved slightly from 106.9% to 106.3%.

For the second quarter of 2006, the Specialty Lines segment recorded a net positive impact of prior accident years on the technical result of USD 2.5 million, resulting from a net positive development of prior accident years' loss reserves of USD 15.8 million, offset by the net effect of reductions of premiums and other expenses of USD 13.3 million. The net positive development was partially attributable to an update to case reserves across all lines of business. Overall, the net positive impact of prior accident years on the technical result was most pronounced in the Aviation & Space line of business, recording a positive net impact of USD 10.2 million and the Professional Liability and other Special Liability line of business with a negative net impact of USD 17.5 million.

For the first half of 2006, the Specialty Lines segment experienced a net positive impact of prior accident years on the technical result in the amount of USD 5.9 million. The Aviation & Space and Professional Liability & other Special Liability lines of business accounted for the biggest effects, with a positive USD 16.2 million and a negative USD 21.5 million, respectively.

In the second quarter of 2006, gross and net premiums written decreased by 14.0% and 0.3% to USD 183.3 million and USD 176.2 million, respectively. Net premiums earned fell by 34.1% to USD 180.9 million, compared with the same period of 2005. The decrease of net premiums earned reflects the impact of the ratings downgrade in 2004 with significantly lower earned premiums from prior underwriting years.

In the first half of 2006, gross premiums written remained almost flat at USD 383.0 million, net premiums written increased by 7.6% to USD 370.1 million and net premiums earned declined by 35.7% to USD 372.5 million, compared with the same period of 2005. In the first half of 2006, the increase in net premiums written was driven by the Aviation & Space and Professional Liability & other Special Liability lines of business, which grew by 6.3% to USD 138.0 million and 76.1% to USD 133.7 million, respectively. These increases were offset by the following lines of business:

- o Agribusiness, which decreased by 26.4% to USD 15.6 million;

## Edgar Filing: CONVERIUM HOLDING AG - Form 6-K

- o Credit & Surety, which declined by 61.6% to USD 11.9 million;
- o Engineering, which fell by 29.6% to USD 31.8 million; and
- o Marine & Energy, which decreased by 21.9% to UDS 31.2 million.

6

Life & Health Reinsurance reported segment income of USD 8.9 million for the second quarter and USD 16.0 million for the first half of 2006, compared with USD 0.1 million and USD 6.1 million for the same periods of 2005, respectively. The technical result(4) was USD 7.6 million for the second quarter of 2006 and USD 13.8 million for the first half of 2006, compared with USD 1.4 million and USD 8.1 million for the same periods in 2005, respectively. The segment's strong performance was primarily attributable to new, and the expansion of existing reinsurance transactions, especially within Continental Europe, as well as updated actuarial models based on new cedent information within Converium's German and Dutch books of business.

In the second quarter of 2006, compared with the same period of the previous year, gross premiums written, net premiums written and net premiums earned increased by 11.5%, 13.3% and 5.0% to USD 66.1 million, USD 63.1 million and USD 77.8 million, respectively. These increases were primarily attributable to Converium's German book of business.

For the first half of 2006, gross premiums written and net premiums written in the Life & Health Reinsurance segment fell slightly by 2.2% and 1.2% to USD 172.6 million and USD 167.4 million, respectively. Net premiums earned, however, grew by 1.9% to USD 158.2 million. The stagnant premium development mainly reflects Converium's continuing ratings disadvantage.

Run-Off reported segment income of USD 19.9 million for the second quarter and USD 37.6 million for the first half of 2006, compared with a segment loss of USD 5.5 million and segment income of USD 10.5 million for the same periods of 2005. The significantly improved performance of the segment primarily reflects the favorable impact of commutations on the technical result.

In the second quarter of 2006, net reserves in the Run-Off segment decreased by USD 185.6 million to USD 1,012.2 million. For the first half of 2006, this translates into a reduction of net reserves of USD 297.5 million. In the second quarter and the first half of 2006, commutations contributed USD 144.1 million and USD 189.8 million, respectively, to the reduction of net reserves in the segment and generated a benefit on the technical result of USD 30.7 million and USD 43.1 million, respectively. From a statutory view, net reserves declined by USD 165.0 million to USD 858.5 million in the second quarter of 2006, which resulted in a reduction of USD 258.5 million in the first half of 2006.

In the second quarter of 2006, the Run-Off segment recorded a net adverse impact of prior accident years on the technical result of USD 9.6 million, resulting from net adverse development of prior accident years' loss reserves of USD 4.2 million and the net negative effect of reductions of related premiums and underwriting acquisition costs of USD 5.4 million. The net adverse development of prior years' loss reserves in the amount of USD 4.2 million primarily related to the Professional Liability and other Special Liability line of business in the amount of USD 22.2 million. Partially offsetting the adverse development was

## Edgar Filing: CONVERIUM HOLDING AG - Form 6-K

a net favorable development of prior years' loss reserves of USD 10.0 million related to the Motor line of business.

For the first half of 2006, the Run-Off segment experienced a net adverse impact of prior accident years on the technical result in the amount of USD 10.8 million, due to net adverse development of prior years' loss reserves of USD 6.3 million and the net effect of reductions in premiums and other expenses of USD 4.5 million. The net adverse development of prior years' loss reserves amounted to USD 6.3 million, primarily due to the adverse development of USD 22.9 million in the Professional Liability and other Special Liability line of business. Partially offsetting this development was a net favorable development of USD 10.8 million related to the Motor line of business.

The Corporate Center carries certain administration expenses such as costs of the Board of Directors, the Global Executive Committee and other corporate functions as well as other expenses not allocated to the operating segments. The Corporate Center reported costs of USD 14.1 million for the second quarter and USD 24.7 million for the first half of 2006, compared with USD 12.0 million and USD 19.2 million for the same periods of 2005, respectively. The increase in the first half of 2006 as compared with the same period of 2005 reflects higher audit fees in the context of Converium's preparation for Sarbanes-Oxley compliance as well as late fees related to the restatement of prior year financial accounts.

-----

- (4) Life & Health technical result is defined as net premiums earned minus losses, loss expenses and life benefits minus acquisition costs plus other technical income, mainly interest on deposits.

7

Converium has made it a policy not to provide any quarterly or annual earnings guidance and it will not update any past outlooks for full-year earnings. It will, however, continue to provide investors with perspectives on its value drivers, certain financial guidance for the full year, its strategic initiatives and those factors critical to understanding its business and operating environment.

(5) Ongoing non-life loss ratio is defined as losses and loss expenses divided by net premiums earned.

## Edgar Filing: CONVERIUM HOLDING AG - Form 6-K

- (6) Ongoing non-life acquisition costs ratio is defined as acquisition costs divided by net premiums earned.
- (7) Ongoing non-life administration expense ratio is defined as other operating and administration expenses divided by net premiums written.
- (8) Ongoing non-life combined ratio is defined as ongoing non-life loss ratio (to net premiums earned) plus ongoing non-life acquisition costs ratio (to net premiums earned) plus ongoing non-life administration expense ratio (to net premiums written).
- (9) Life & Health technical result is defined as net premiums earned minus losses, loss expenses and life benefits minus acquisition costs plus other technical income, mainly interest on deposits.
- (10) Total investment results are defined as net investment income plus net realized capital gains (losses).
- (11) Total investment income yield is defined as net investment income plus net realized capital gains (losses) divided by average total invested assets (including cash and cash equivalents), pre-tax and annualized.
- (12) Total investment return is defined as net investment income plus net realized capital gains (losses) plus change in net unrealized capital gains (losses).
- (13) Pre-tax operating income is defined as income before taxes excluding pre-tax net realized capital gains (losses), amortization of intangible assets and restructuring costs.
- (14) Return on shareholders' equity is defined as net income or loss (after-tax) divided by shareholders' equity at the beginning of the period, annualized.
