Enclosure: A press release dated April 29, 2003, announcing Pechiney's results for the first quarter of 2003.

April 29, 2003

PRESS RELEASE

**First Quarter Results 2003**

Pechiney announces earnings from operations in the first quarter of 2003 of 72 million, down 31% from the first quarter of 2002, but representing a slight increase over earnings from operations in the last quarter of 2002. The Group's net income in the first quarter of 2003 is close to break-even, at 2 million. Adjusted net income (\*) for the same period stands at 37 million, down 24% from the first quarter of 2002.

**Major events in the period:**

- **Decision by the Corus Group not to proceed with the sale of its aluminum conversion assets to Pechiney.** Pechiney received a break-up fee of 20 million.
- **Pechiney Continuous Improvement System.** At the end of the first quarter of 2003, cumulated Continuous Improvement gains totaled 154 million.
- **Restructuring of industrial asset base.** The procedures initiated for the partial or total closing of several manufacturing facilities in France in the Group's three sectors are moving forward as planned and most of the associated restructuring costs, as announced in January, were covered by provisions in the first quarter.
- **Restructuring at the aluminum conversion plant in Ravenswood (West Virginia).** The facility's drastic restructuring plan launched in the fourth quarter of 2002 is beginning to bear fruit, with reduced losses compared with the fourth quarter of 2002.
- **AP50 project in South Africa.** A consortium was chosen, comprised of Technip-Coflexip and Bateman, assisted by Bechtel.
- **Bauxite-alumina-aluminum project in Russia with Sual.** On April 9, 2003, Aluminium Pechiney and Sual (Russia's second largest producer of primary aluminum) announced the signing of an agreement to pursue further negotiations on the co-development of the bauxite, alumina and aluminum complex in the Republic of Komi (Russian federation).
- **Projected construction of a plastic tube plant in Mexico,** which will enable Cebal to reduce costs significantly in cosmetics packaging.
- **Proposed resolution by two Pechiney shareholders to convert preferred shares "B" into common shares "A".**
- **Hedging the risk of depreciation of the U.S. dollar.** Given current uncertainty about the parity of the U.S. dollar vis-à-vis the euro in an environment characterized by low aluminum prices on the LME, the Group decided to hedge a significant portion of its sensitivity to the U.S. dollar in the event that the parity would exceed U.S.\$ 1.10 per euro. The Group therefore recently purchased options, which at this stage represent approximately 40% of the estimated annual sensitivity of its earnings from operations to the U.S. dollar, that it can exercise for a period of 12 months as of July 1, 2003.

**Commentary & prospects**

Commenting the first quarter results, Jean-Pierre Rodier declared: *"In the first quarter, the Group reported good operating performance in an environment marked by the impact of the depreciation of the U.S. dollar, a rise in the cost of energy and certain raw materials, and an economic situation that remained depressed. These results were made possible by continued initiatives in the Pechiney Continuous Improvement System, which is now being implemented in Primary Aluminum, and by the increase in sales volume in some Packaging divisions and in the European aerospace business. The restructuring programmes announced by certain divisions in January, which involve temporary cost overruns, are moving forward as*

*planned. In the near future, which remains uncertain at the economic level, the Group's priority remains the success of the Pechiney Continuous Improvement System, which must be accelerated even more in order to achieve its objectives completely."*

**Statement of income** (French GAAP)

<b>Adj. net income per share*</b>	<b>0.62</b>	<b>0.65</b>	<b>0.48</b>

(\*) Published net income per share as adjusted to exclude the impact, after taxes, of restructuring expense, other (expense) income and other non-recurring items. Pechiney believes that presenting net income as adjusted to exclude the impact, after taxes, of restructuring expense, other (expense) income and other non-recurring items is an additional measure of performance that investors can use to compare net income between reporting periods.

## **Main trends Q1 2003**

In the first quarter of 2003, the Group reported a net loss of 2 million, for a net loss per share of 0.03, compared with net income of 37 million in the first quarter of 2002. Adjusted net income<sup>1</sup> per share was 0.48 versus 0.62 in the first quarter of 2002.

At 2,820 million **consolidated net sales** in the quarter were generally stable compared with the first quarter of 2002. Net sales from manufacturing activities (excluding International Trade) decreased by 5% from the same period in 2002, and by 6% on a comparable basis. International Trade benefited from the consolidation of Pechiney Far East, as division net sales rose 9% during the period and declined 14% on a comparable basis.

**Earnings from operations** in the period totaled 72 million, down 31% from the first quarter of 2002. This decrease was mainly due to external causes (depreciation of the U.S. dollar, rise in the cost of raw materials and energy), while all three sectors showed marked improvement in operating performance, particularly Aluminum Conversion, a sector in which results climbed rapidly in the first quarter.

The **Primary Aluminum** sector was mainly affected by the considerable depreciation of the U.S. dollar vis-à-vis the euro, a trend which continued throughout the first quarter. The average realised price of aluminum on the LME improved slightly compared with the first quarter of 2002.

The **Aluminum Conversion** sector was characterized, as in 2002, by the contrasting situation of activities in Europe and in the United States. Despite the absence of an upswing in demand in the most cyclical end-user markets (industrial production linked to investment, construction, aerospace), European activities benefited from a rise in shipments to the aerospace market in Europe in the first quarter (related to the end of destocking and to the initial deliveries for Airbus A380 plane) and from sustained demand for can stock. In the United States, the aerospace market remained flat, and industrial investment markets continued to stall.

in luxury markets where pricing pressure remains strong.

## **Continuous Improvement System Q1 2003**

In addition to the cumulated gains, gross of inflation, of 130 million reported at the end of 2002, 24 million were generated in the first quarter of 2003. Cumulated gains since January 1, 2002, thus total 154 million.

## **Cumulated Continuous Improvement gains at the end of March 2003**

During the first quarter of 2003, Primary Aluminum benefited from its first significant gains in volume as a result of a 0.7% rise in the Group's consolidated production of primary aluminum (+ 3.1% excluding its Dutch plant, PNL), compared with the first quarter of 2002. Conversely, in Packaging, cost reduction measures were masked by current restructuring, with a negative impact on costs that could last until the end of the first half.

Finally, beyond its impact on costs, Pechiney's Continuous Improvement System demonstrated its effectiveness in the area of customer service and has allowed a strong rise in higher added value products volumes in European Conversion.

Lastly, as the Group predicted, the **Packaging** sector was confronted by a squeeze effect in the first quarter as the price of resins rose sharply. The sector was also affected by the negative impact of the translation of its American profits into euros as a result of the depreciation of the U.S. dollar in the last 12 months. Market conditions in beauty and cosmetics packaging remained difficult, particularly

<sup>1</sup> See the definition of adjusted net income in the note on page 1.

**Principal indicators****Recent developments Q1 2003**

	<b>Q1 2002</b>	<b>Q4 2002</b>	<b>Q1 2003</b>
Average euro/U.S. dollar	0.88	1.00	1.07
Realised /\$ (Primary Al.)	0.88	0.98	1.04
LME average price (\$/t)	1,395	1,359	1,392
Average realized price (\$/t)	\$ 1,354	1,334	1,368

Net Sales (Millions of euros)

Earnings from Operations (Millions of euros)

- January 17: **Projected construction of a plastic tube plant in Mexico.** The new entity will manufacture plastic tubes for the North American cosmetics market. This operation enables Cebal Americas, a division in the Group's Packaging Sector, to focus on its priority markets to improve service and competitiveness and to take advantage of growth opportunities in the region.
- February 28: **Proposed resolution** by two Pechiney shareholders (ABN AMRO Contrepartie France SNC and ABC Arbitrage) **to convert preferred shares "B" into common shares "A"**, on the basis of 11 common shares "A" for 10 preferred shares "B". This resolution was adopted by the Annual Shareholders' Meeting of April 3, 2003. Conversion will therefore take place if the special meeting of holders of preferred shares "B" approves this measure by a two-thirds majority. First call for this special meeting is on May 27, 2003, at 3:00 p.m. in Paris.
- March 13: **Decision by the Corus Group plc not to proceed with the sale of its aluminum conversion assets to Pechiney** subsequent to the veto by the Supervisory Board of its Dutch subsidiary, in spite of the preliminary agreement signed in October 2002 by Pechiney and Corus.
- March 19: **Production idled at the Auzat smelter** for reasons of safety.

**Net Sales (new organization<sup>2</sup>)**

<i>Millions of euros</i>	<b>Q1 2002</b>	<b>Q4 2002</b>	<b>Q1 2003</b>
Primary Aluminium	488	469	473
Aluminium Conversion	678	625	659
Packaging	615	554	559
<b>Net sales from industrial operations</b>	<b>1,781</b>	<b>1,648</b>	<b>1,691</b>
International Trade	1,033	1,030	1,129
<b>Total</b>	<b>2,814</b>	<b>2,678</b>	<b>2,820</b>

Compared with the fourth quarter of 2002, earnings from operations were down 7 million, primarily owing to the high level in billing on major technology sales contracts recorded at the end of last year.

For the second quarter of 2003, while the realised price of aluminum is likely to remain at a level close to that of the first quarter, the sector will be confronted by the full effect of the accelerated depreciation of the U.S. dollar since January 2003, the impact of which was only partially felt in the first quarter since it typically takes two months to manifest itself.

**Aluminum Conversion**

Earnings from operations in the **Aluminum Conversion** sector went from 4 million in the first quarter of 2002 to 15 million in the first quarter of 2003, representing a solid increase from one period to the other.

**Earnings from operations (new organization)**

<i>Millions of euros</i>	<b>Q1 2002</b>	<b>Q4 2002</b>	<b>Q1 2003</b>
Primary Aluminium	69	50	43
Aluminium Conversion	4	0	15
Packaging	33	24	26
International Trade	19	20	14
Holdings	(21)	(23)	(26)
<b>Total</b>	<b>104</b>	<b>71</b>	<b>72</b>

Earnings from operations in **European activities** went from 15 million in the first quarter of 2002 to 26 million, reaching the highest level since the first quarter of 2001. In the fourth quarter of 2002, earnings from operations totaled 15 million.

This good performance compared with the first quarter of 2002 was mainly due to the following factors.

- The good industrial performance of the **Neuf-Brisach** facility (**Cans, Automotive, Standard Rolled Products division**), which succeeded in debottlenecking operations and thereby benefited from strong demand for can stock throughout the first quarter. The plant continued to improve its product mix thanks to a 50% increase in sales volume in car body sheets. The volume of standard rolled products also rose significantly (+ 26%).
- Good management at the **Issoire** facility (**Aerospace, Transport, Industry division**), led to a considerable reduction in production costs since the beginning of 2002, to a better balance in the product mix to the advantage of engineering plates, and to a significant rise in sales volume in the first quarter of 2003

**Segment Information First quarter 2003**

**Primary Aluminum (Aluminum Metal, Bauxite Alumina and Ferroalloys)** At 43 million, earnings from operations in the first quarter of 2003 were down 26 million from the same period in 2002.

This decrease was entirely linked to the impact of the depreciation of the U.S. dollar vis-à-vis the

euro on the translation of both LME prices and geographic premiums. The \$/ parity realised by primary aluminum activities moved from 0.88 to 1.04, representing a decrease of 15.3% in the value of the dollar vis-à-vis the euro. The realised price of aluminum on the LME rose slightly during the period (+ 1%), while the sector was confronted by an increase in energy costs. Altogether, the negative impact of external factors was 31 million.

The good operating performance reported in the sector made it possible to offset this impact to some degree. Sales volume of primary aluminum increased by 0.7% in the period, in spite of persistent production problems at PNL in the Netherlands. Excluding PNL, production at Group smelters rose 3.1% over the first quarter of 2002. It will most likely be necessary to wait until the end of 2003 before the PNL smelter reestablishes an optimal production rate and stabilizes its production costs after the weather related breakdown that occurred in the fourth quarter of 2002.

---

<sup>2</sup> 2002 numbers have been restated according to the new organization launched on February 1<sup>st</sup> 2003.

linked to a 15% increase in shipments to the aerospace market in Europe, marking the end of the destocking seen at Airbus in 2002.

**Foil and Strip (Foil and Strip / Specialties division)** continued to capitalize on the much improved operating performance and strong increase in volume at the Rugles plant, thanks to the integration of the Eurofoil teams in 2002.

On the other hand, operating results in **Extrusions (Extrusions, Casting Alloys, Automotive division)** were affected by the depressed economic environment in France and Germany in industry and construction.

**In the United States (Ravenswood, Vernon and Aluminum Lithium)**, the operating loss totaled 11 million in the first quarter, stable compared with the first quarter of 2002, and 4 million better than in the fourth quarter of 2002.

The recovery plan at the Ravenswood plant launched in September 2002 led to a significant improvement in the plant's operating results. In the first quarter of 2003, the result of American activities included a loss of more than 3 million linked to the resetting of the aluminum lithium activity (Chicago), which partially masked the improvement in results at Ravenswood, where losses stood at 8 million for the quarter.

Order books, with the exception of extrusions, remain satisfactory in Europe and should allow a good performance in the second quarter. However, it should be noted that there is limited visibility in the aerospace sector from the summer. In the United States, there are still no signs of a pick-up in final demand.

### **Packaging**

Earnings from operations from **Packaging** activities totaled 26 million, down 7 million from the first quarter of 2002 and up 2 million from the previous quarter.

As the Group had announced in January, the increase in the price of plastic resins in the first quarter had a strong negative impact on results in the Packaging sector, since the selling price / raw materials price squeeze effect alone explains more than the drop in earnings from operations compared with the first quarter of 2002. This impact was primarily concentrated on flexible packaging activities in Europe and in the United States, where resins account for almost 50% of production costs. Raw materials price increases are progressively passed through to selling prices, often in application of pass-through clauses in the United States. These price increases can nevertheless take several months to go through. Overall, the squeeze impact from higher raw material prices should therefore be significantly reduced in the second half of this year.

In addition to this impact, there was the negative effect of translating the results of the sector's

markets remained sluggish. Techpack International, which serves beauty and luxury markets, was also confronted by cost overruns linked to strikes at the Lir France plants likely to be closed (Avallon, Provins) and to the shutdown of its Watertown facility in the United States. These incidents could continue to disrupt Techpack's cost structure through to the end of June. Finally, while selling prices in the beauty sector declined from the first quarter of 2002, they have remained stable since the fourth quarter of 2002.

In the second quarter of 2003, the negative impact of the increase in the price of resins will undoubtedly continue to make itself felt. Resins prices in the second half will depend on the level of the price of oil. In addition, as in the first quarter, the current period will be marked by numerous cases of industrial restructuring, the Continuous Improvement benefits of which are mostly expected in the second half. Finally, the luxury market (approximately 20% of sales in the Packaging sector), which has continued to decline since the end of 2001, shows no signs of recovery.

### **International Trade**

Earnings from operations in **International Trade** declined 5 million from the first quarter of 2002, from 19 million to 14 million, and was down 6 million from the previous quarter. The positive impact of the integration of the copper trading activities of Pechiney Far East did not offset the lesser performance of the other trading activities and the decrease in the result of distribution activities linked to the lackluster economic environment. In addition, the division was affected by the negative effect of the depreciation of the U.S. dollar for more than 3 million compared with the first quarter of 2002. This impact should continue to weigh on the division's results in 2003, which are expected to be closer to their historical average after a record year in 2002.

American activities linked to the depreciation of the U.S. dollar vis-à-vis the euro.

Excluding the parity impact and the raw materials squeeze, the Packaging sector earnings from operations would have been significantly higher versus 2002.

From the point of view of business, the markets for flexible packaging and plastic tubes in beauty and cosmetics benefited from the anticipated rise in volumes, whereas demand in the aerosol and luxury

**Other statement of income items**

**Cash flow**

**Income from**

**operations** totaled 11 million in the first quarter of 2003, versus 88 million in the first quarter of 2002. This figure included 48 million in restructuring expense and other (expense) income linked to the restructuring of the Group's manufacturing base (total or partial closings: Auzat, Aubagne, Sabart, Lir France). Additional expense related to these closings should be charged by the end of the year in the amount of approximately 15 million and bring the total to a level in line with what was announced in January ( 50 million to 70 million).

The cash flow generated by operations was down 33% from the first quarter of 2002 to 179 million, but rose sharply compared with the previous quarter when it totaled 24 million. Net of investments and divestitures, the Group's cash flow stood at 54 million in the first quarter of 2003.

**Financial structure**

As of March 31, 2003, net indebtedness totaled 1,366 million, down 71 million from December 31, 2002. Compared with shareholders' equity and minority interests of 3,120 million, the debt-to-equity ratio was 0.44, compared with 0.45 as of December 31, 2002.

As of March 31, 2003, the total number of outstanding shares was 82,513,683, of which 4,716,938 were owned by the Company.

**Net financial expense totaled** 11 million in the first quarter of 2003, stable compared with the first and fourth quarters of 2002.

**Current and deferred income taxes** represented income of 6 million in the first quarter of 2003 versus a charge of 28 million

in the same period in 2002.

**Amortisation of goodwill**

**Calendar**

The Group continues the regular amortisation of its goodwill on the basis of French accounting standards. A charge of 7 million was recorded in the first quarter of 2003.	Payment of dividend:	May 7. 2003

**Adjusted Net Income per share Calculation**

- Adjusted net Income (*)	49	74	38	50	37
- Adjusted net Income per share ( )	0.62	0.94	0.48	0.65	0.48

(\*) Published net income per share as adjusted to exclude the impact, after taxes, of restructuring expense, other (expense) income and other non-recurring items. Pechiney believes that presenting net income as adjusted to exclude the impact, after taxes, of restructuring expense, other (expense) income and other non-recurring items is an additional measure of performance that investors can use to compare net income

between reporting periods. Net income as adjusted to exclude the impact, after taxes, of those items can provide a more relevant view of a company's financial performance.

### Earnings from operations (new organization)

	2002				2003			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
