2010 FULL YEAR AND FOURTH QUARTER RESULTS
STRONG YEAR AS TRANSFORMATION PROGRESSES

Full year highlights

- Turnover up 11.1% at €44.3 billion, with 7.3% due to currency.
- Underlying volume growth 5.8%. Underlying sales growth 4.1% and underlying price growth (1.6%); in-quarter pricing flat for first nine months, positive in the fourth quarter.
- Underlying operating margin up 20bps with increased investment in advertising and promotions up 30 bps, funded by higher gross margins and lower indirects. Margin underpinned by savings of €1.4 billion.
- Healthy free cash flow of €3.4 billion reflecting continuing improvement in working capital.
- Fully diluted earnings per share €1.46 up 25%.

Fourth Quarter highlights

- Underlying volume growth 5.1%. Underlying sales growth 5.1% with underlying price growth flat; positive in-quarter pricing.
- Underlying operating margin down 20bps. Lower gross margin, primarily due to increased commodity costs. Reduced advertising and promotions spend, indirects higher due to phasing across the quarters.

Chief Executive Officer

"We are pleased with another year of good results in which we delivered against all our key priorities and further progressed the transformation of Unilever. We delivered strong volume growth, particularly in emerging markets which continued to be the engine of growth. We gained volume share in all regions driven by stronger innovations, significant increases in marketing investment and the extension of our brands into new territories. At the same time we delivered margin improvement through a strong savings programme, lower indirects and volume efficiencies. This, coupled with excellent working capital management, enabled us to deliver robust cash flow.

The Unilever of today is more agile and confident, now fully fit to compete. We remain focused on serving our consumers and customers and building the long term health of our brands. Despite the intense competition and the return of commodity cost volatility, our objectives remain: profitable volume growth ahead of our markets, steady and sustainable underlying operating margin improvement and strong cash flow."

2010 results were strong despite intense competition, weak consumer confidence in many markets and the impact of rising commodities costs in the second half. Whilst markets showed little or no growth in the developed economies, emerging market growth remained healthy. We grew our volumes ahead of the market in all regions and finished the year strongly despite a strong prior year comparator. Whilst in-quarter pricing was flat throughout much of the year, it became positive in the fourth quarter as we responded to increasing commodity costs. Savings programmes delivered strongly across both supply chain and indirects. We invested in our product quality and significantly increased the investment behind our brands whilst improving advertising quality. In the fourth quarter, advertising and promotions was lower by 170bps reflecting the phasing of activities and some re-balancing between above and below the line support in developed markets.

The acquisition of Sara Lee's personal care business and the disposal of the Italian frozen foods business were completed during the fourth quarter. The proposed acquisition of Alberto Culver has received shareholder approval and now awaits approval of the relevant regulatory authorities. The previously announced disposal of the Brazilian tomato business is expected to be finalised early in 2011.

Asia Africa CEE

In 2010 we grew ahead of the market and continued to gain volume share. Asia Pacific delivered double digit volume growth in the year with a strong fourth quarter. There were particularly strong performances in Vietnam, the Philippines, Pakistan and China. In India we delivered consistent double digit volume growth and we are encouraged by our progress in this highly competitive market. The business in North Africa, Middle East and Central Africa

performed well throughout the year. Whilst market conditions in Central and Eastern Europe were weaker, volume growth was still comfortably positive. In-quarter pricing for the region was positive in the fourth quarter.

Underlying operating margin was down for the year reflecting stable gross margins and increased investment in advertising and promotions. The rollout of the regional IT platform progressed well, with successful rollout in 2010 to a number of countries including China, Australia, Vietnam and North Africa.

Americas

We gained volume share in 2010 and saw higher underlying sales growth driven by consistent growth in Latin America and good performance in North America. In the fourth quarter, North America accelerated volume growth to around 3% whilst Latin America balanced volume growth of over 4% with increased price.

Whilst the US economy remains difficult and increasingly competitive, our business continued to benefit from our strong innovation programme. The Brazilian market continues to grow strongly but remains highly competitive; in this context our business delivered good results. Mexico had a particularly good year, gaining share in a number of key categories and the Southern Cone had another excellent year with a strong recovery in Chile after the devastating earthquake. Underlying operating margin was down slightly in the year.

Western Europe

Despite difficult markets we delivered volume growth and improved volume share in the year, with positive volume growth in the fourth quarter. Underlying price continued to improve but was still negative year-on-year reflecting the high levels of promotional intensity in many of our markets. Conditions in Southern Europe remain particularly challenging. Northern Europe is more robust and we saw strong performances in the UK and France.

Underlying operating margin was up in the year and quarter, reflecting the benefits of the cost saving programmes and lower advertising and promotions.

OPERATIONAL REVIEW: CATEGORIES

| Home Care | 1,954 | 4.6 | 5.2 | (0.5) | 7,726 | 3.0 | 8.2 | (4.8) |

All categories grew volume and generated positive underlying sales growth in 2010, ending the year on a strong note. Almost all of our major brands grew volume on the back of bigger, better innovations rolled out more quickly across more markets. Magnum Gold?! was launched in 29 countries, Dove Men+Care is now in more than 30 markets and Dove Damage Therapy hair care products have reached 22 markets. In addition we have accelerated the rates at which we are extending our brands into new markets, with more than 100 new launches in the year.

Savoury, Dressings and Spreads

Savoury growth accelerated in the quarter, with strong volumes, positive price and impactful innovations. Knorr jelly bouillon helped to drive growth across many markets in Europe and Latin America whilst a new gourmet soups range

drove strong share growth in France. Knorr soupy noodles continue to grow in India and soups have been launched in Bangladesh. The Knorr Season and Shake baking bags have now been launched in more than 20 markets with good initial results. PF Chang's restaurant quality frozen meals have been a great success, exceeding €50m turnover in the launch year.

Dressings grew both volume and price in the quarter driven by a successful campaign to increase the consumption occasions of mayonnaise in Latin America and the launch of a range of flavoured mayonnaises in Europe. Spreads grew both volume and price in the quarter by investing in improved product quality and communicating the new taste benefits; a strong performance given the weak markets. Pro.Active spreads again delivered strong growth by emphasising its core heart health benefits and Pro.Active Buttery was launched successfully in Europe.

Ice Cream and Beverages

Ice cream delivered another good quarter of growth with a strong contribution from Western Europe, Asia and Russia. Magnum was launched in Indonesia and Klondike continued to grow in the US driven by improved product quality and a strong TV and digital marketing campaign which increased consumer interaction with the brand.

Tea continued the momentum in the quarter delivering strong volume and solid price growth to achieve high single digit sales growth. Tea grew particularly well in India, UK, Turkey, Saudi Arabia and China driven by the strength of the Lipton brand equity, up-trading to new formats such as green tea in pyramid bags, the development of milk teas in China and the conversion from loose tea to tea-bags across emerging markets. Ades soy-based drinks continued to make progress in Latin America with impactful new packaging and advertising.

Personal Care

Deodorants capped another excellent year with a strong quarter driven by Dove Men+Care, the continued strengthening of the Rexona brand and by the launch towards the end of the year of the latest Axe variant, Excite. Hair continued to make good progress with strong growth in North America, China, South East Asia and India as a result of the rollout of Dove Damage Therapy, the continued rollout of Clear in Latin America and the relaunch of Clear in Asia. TiGi continued to perform well ahead of the professional market growth.

Skin delivered a solid quarter driven by continued momentum on Dove Nutrium moisture, Dove Men+Care, the latest Axe shower variant Rise, which contributed to record Axe shower market shares in the United States, and the rollout of Lifebuoy and Vaseline into new countries. Our Oral business delivered a solid year despite a heightened level of competitive activity. Signal Sensitive Expert was launched in France and White Now continues to do well across many markets including Vietnam and the Philippines.

Home Care

In highly competitive markets Laundry delivered strong underlying volume growth and underlying sales growth improved progressively through the year. Volume growth was particularly strong in India on the back of the re-launches of Rin and Wheel laundry detergents. In China we continued to close the share gap versus the market leader and the launch of Omo liquids is driving strong double digit growth. Comfort, recently launched in India, continues to make good progress in developing the market for fabric conditioners.

Household care continued to deliver volume-driven sales growth behind the market rollouts of Cif into Vietnam, Indonesia, Malaysia and the Philippines. Sun Turbo All-in-1 concentrated gel is doing well in France and the Netherlands.

ADDITIONAL COMMENTARY ON THE FINANCIAL STATEMENTS - FULL YEAR

Finance costs and tax

The cost of financing net borrowings in the year was €414 million, as the adverse impact of currency was more than offset by lower average net debt. The interest rate on borrowings was 4.4% and on cash deposits was 1.7%. The charge for pensions financing was a credit of €20 million compared with a net charge of €164 million in the prior year.

The effective tax rate was 25.5% compared with 26.2% in 2009 reflecting the geographical mix of profits and the impact of the Frozen Foods disposal. The underlying tax rate excluding the effect of restructuring, disposals and impairments was 27.1%. Our longer-term expectation for the tax rate remains around 26%.

Joint ventures, associates and other income from non-current investments

Net profit from joint ventures and associates, together with other income from non-current investments contributed €187 million compared to €489 million in the prior year which benefited from the €327 million gain on disposal of the majority of the equity interest in JohnsonDiversey.

Earnings per share

Fully diluted earnings per share for the full year were €1.46, up 25%. This was driven by improved underlying operating profit, lower restructuring charges, lower pension costs, the favourable impact of foreign exchange and higher profit on business disposals partially offset by the provision in respect of the European Commission investigation into consumer detergents (see page 5). Business disposals include the disposal of the Italian Frozen Foods business in 2010.

Restructuring

Restructuring in the year was €589 million. This reflects action being taken to make the business fit to compete in the current environment.

Cash Flow and Net Debt

Free cash flow was €3.4 billion. Cash flow from operating activities was €6.8 billion reflecting higher operating profit and lower pensions payments. Further progress was made on reducing working capital, building on the strong performance in the prior year. Working capital reduced as a percentage of turnover and has now been negative for five consecutive quarters. Tax payments increased to €1.3 billion. Net capital expenditure increased €443 million to €1.7 billion, representing 3.8% of turnover. This primarily reflects investment in new capacity required to support the strong volume growth of the business in emerging markets.

Closing net debt at €6.7 billion was up from €6.4 billion as at 31st December 2009. The outflow from dividends, acquisitions and the negative impact of foreign exchange rates on net debt exceeded the inflow from free cash flow and business disposals.

Pensions

The net pensions deficit was €2.1 billion at the end of December 2010 down from €2.6 billion at the end of 2009. This is due to cash contributions made and good asset returns over the year offset by the impact of lower corporate bond rates on the calculation of the pension liabilities.

COMPETITION INVESTIGATIONS

As previously reported, in June 2008 the European Commission initiated an investigation into potential competition law infringements in the European Union in relation to consumer detergents. While the investigation is ongoing, Unilever has concluded that it is now appropriate to take a provision of €110 million.

In addition and as previously reported, Unilever is involved in a number of other ongoing investigations by national competition authorities in a number of European countries including Greece, France, the Netherlands, Belgium and Germany. These investigations are at various stages and concern a variety of product markets. Provisions have been made to the extent appropriate.

It is Unilever's policy to co-operate fully with the competition authorities in the context of all ongoing investigations. In addition, Unilever reinforces and enhances its internal competition law compliance procedures on an ongoing basis.

The financial statements attached do not constitute the full financial statements within the meaning of Section 434 of the UK Companies Act 2006. Full accounts for Unilever for the year ended 31 December 2009 have been delivered to the Registrar of Companies. The auditors' report on these accounts was unqualified and did not contain a statement under Section 498 (2) or Section 498 (3) of the UK Companies Act 2006.

2 NON-GAAP MEASURES

In our financial reporting we use certain measures that are not recognised under IFRS or other generally accepted accounting principles (GAAP). We do this because we believe that these measures are useful to investors and other users of our financial statements in helping them to understand underlying business performance. Wherever we use such measures, we make clear that these are not intended as a substitute for recognised GAAP measures. Wherever appropriate and practical, we provide reconciliations to relevant GAAP measures. Unilever uses 'constant rate' and 'underlying' measures primarily for internal performance analysis and targeting purposes.

The principal non-GAAP measure which we apply in our quarterly reporting is underlying sales growth, which we reconcile to changes in the GAAP measure turnover in notes 4 and 5. Underlying sales growth (abbreviated to 'USG' or 'growth') reports turnover growth at constant exchange rates, excluding the effects of acquisitions and disposals. Turnover includes the impact of exchange rates, acquisitions and disposals.

We also comment on underlying trends in operating margin before the impact of restructuring, disposals and other one-off items, which we collectively term RDIs, on the grounds that the incidence of these items is uneven between reporting periods. Further detail on RDIs can be found in note 3. We also discuss free cash flow, which we reconcile in note 8 to the amounts in the cash flow statement, and net debt, which we reconcile in note 9 to the amounts reported in our balance sheet and cash flow statement.

3 SIGNIFICANT ITEMS WITHIN THE INCOME STATEMENT

In our income statement reporting we recognise restructuring costs, profits and losses on business disposals and certain other one-off items, which we collectively term RDIs. We disclose on the face of our income statement the total value of such items that arise within operating profit.

10 COMBINED EARNINGS PER SHARE

The combined earnings per share calculations are based on the average number of share units representing the combined ordinary shares of NV and PLC in issue during the period, less the average number of shares held as treasury stock.

Edgar Filing: UNILEVER PLC - Form 6-K

In calculating diluted earnings per share, a number of adjustments are made to the number of shares, principally the following:

(i) conversion into PLC ordinary shares in the year 2038 of shares in a group company under the arrangements for the variation of the Leverhulme Trust and (ii) the exercise of share options by employees.

Earnings per share for total operations for the twelve months were calculated as follows:

| | 2010 | 2009 |
|---|---------|---------|
| Combined EPS - Basic | | |
| Average number of combined share units (Millions of units) | 2,812.3 | 2,796.3 |
| Net profit attributable to shareholders' equity | 4,244 | 3,370 |
| Combined EPS - basic | 1.51 | 1.21 |
| Combined EPS - Diluted | | |
| Adjusted average number of combined share units (Millions of units) | 2,905.1 | 2,890.0 |
| Combined EPS - diluted | 1.46 | 1.17 |

The numbers of shares included in the calculation of earnings per share is an average for the period. During the period the following movements in shares have taken place:

| | Millions |
|--|----------|
| Number of shares at 31 December 2009 (net of treasury stock) | 2,804.2 |
| Net movements in shares under incentive schemes | 5.6 |
| Number of shares at 31 December 2010 | 2,809.8 |

11 DIVIDENDS

As agreed at the 2009 Annual General Meetings, Unilever moved to the payment of quarterly dividends with effect from 1 January 2010.

The Boards have declared a quarterly interim dividend for payment in March 2011 at the following rates which are equivalent in value at the rate of exchange applied under the terms of the Equalisation Agreement between the two companies:

Per Unilever N.V. ordinary share: € 0.2080
 Per Unilever PLC ordinary share: £ 0.1775
 Per Unilever N.V. New York share: US\$ 0.2861
 Per Unilever PLC American US\$ 0.2861
 Depositary Receipt:

The quarterly dividends have been determined in euros and converted into equivalent sterling and US dollar amounts using exchange rates issued by the European Central Bank on 1 February 2011.

Edgar Filing: UNILEVER PLC - Form 6-K

The quarterly dividends will be payable as from 16 March 2011, to shareholders registered at close of business on 11 February 2011. The shares will go ex-dividend on 9 February 2011.

US dollar checks for the quarterly dividend will be mailed on 15 March 2011, to holders of record at the close of business on 11 February 2011. In the case of the NV New York shares, Netherlands withholding tax will be deducted.

The quarterly dividend calendar will be as follows:

| | Announcement date | Ex-dividend date | Record date | Payment date |
|---|-------------------|------------------|------------------|-------------------|
| Quarterly dividend announced with the Q4 2010 results | 3 February 2011 | 9 February 2011 | 11 February 2011 | 16 March 2011 |
