PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Note 1. Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements as of March 31, 2004 and for the three and six months ended March 31, 2004 and 2003 have been prepared by the Company, without an audit, pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC") and in accordance with the Company's accounting policies as described in its latest Annual Report on Form 10-K filed with the SEC. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been omitted pursuant to such rules and regulations. The consolidated balance sheet as of September 30, 2003 was derived from audited financial statements, but does not include all disclosures required by generally accepted accounting principles. These consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended September 30, 2003.

In the opinion of the management, the unaudited consolidated financial statements reflect all adjustments of a normal recurring nature necessary for a fair presentation of the Company's financial position, results of operations, and cash flows for the interim periods presented, and financial condition of the Company as of March 31, 2004. The results for interim periods are not necessarily indicative of results to be expected for the full fiscal year.

Use of Estimates

The preparation of the consolidated financial statements in conformity with generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses for the reporting period. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances.

On an on-going basis, the Company evaluates its estimates, including but not limited to estimates on, a) allowance for uncollectible accounts receivable and sales returns; b) accruals for royalty revenues; c) accruals for employee benefits and restructuring and related costs; d) income taxes and realizability of deferred tax assets and the associated valuation allowances and; e) useful lives and/or realizability of carrying values for property and equipment, computer software costs, goodwill and intangibles, and prepaid royalties. The operating results for the three and six months ended March 31, 2004 are not necessarily indicative of the results that may be expected for the fiscal year ending September 30, 2004, or for any other future period.

Revenue Recognition

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

During the first quarter of fiscal 2004, the Company began to enter into volume purchase agreements (or VPAs). Revenues for VPAs are recognized up to the amount the customer has been billed and to the extent that the customer is expected to consume the corresponding units by the end of the following accounting quarter. Under these agreements, customers, mostly ODMs and OEMs, commit to a fixed payment schedule for an agreed-upon number of units in the next several quarters. Revenues that have been invoiced and relating to usage beyond the following accounting quarter, which the Company has determined to be not fixed and determinable, are recorded as deferred revenues.

Stock-Based Compensation

The Company accounts for its stock option plans and employee stock purchase plan in accordance with provisions of the Accounting Principles Board's Opinion No. 25, *Accounting for Stock Issued to*

PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Employees (APB 25). The Statement of Financial Accounting Standards No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure an amendment of FAS 123* (SFAS 148) which amends the disclosure requirements of Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation* (SFAS 123), requires the Company to provide more prominent disclosures in both annual and interim financial statements regarding the method of accounting for stock-based employee compensation and the effect of the method used in the reported results. SFAS 148 also requires the Company to disclose pro forma information regarding option grants made to its employees based on specified valuation techniques that produce estimated compensation charges.

The following table illustrates the effect on net loss and loss per share if the Company had applied the fair value recognition method (*in thousands, except per-share amounts*):

	Three Months		Six Months	
	Ended		Ended	
	March 31,		March 31,	
	2004	2003	2004	2003
Net loss as reported	\$ (607)	\$ (921)	\$ (3,045)	\$ (5,851)
Add: Stock-based employee compensation expense included in reported				
net loss, net of related tax effects	11	29	39	79
Deduct: Total stock-based employee compensation expense determined				
under the fair value based method for all awards, net of related tax effects	(970)	(460)	(1,746)	(924)
Pro forma net loss	\$ (1,566)	\$ (1,352)	\$ (4,752)	\$ (6,696)
Basic and Diluted loss per share:				
As reported	\$ (0.02)	\$ (0.04)	\$ (0.12)	\$ (0.24)
Pro forma	\$ (0.06)	\$ (0.06)	\$ (0.19)	\$ (0.27)

The fair value of options granted for the three and six months ended March 31, 2004 and 2003 reported above was estimated as of the date of the grant using a Black-Scholes multiple option pricing model.

Computation of Earnings (Loss) per Share

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

Basic earnings (loss) per share is computed using the weighted-average number of common shares outstanding during the period. Diluted net income per share is computed using the weighted-average number of common and dilutive potential common shares outstanding during the period. Diluted common- equivalent shares primarily consist of employee stock options, computed using the treasury stock method. In computing diluted earnings per share, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options. For the three and six months ended March 31, 2004 and 2003, the Company reported net losses and did not include outstanding options in the calculation of diluted loss per share, as their inclusion would be anti-dilutive.

Guarantees and Product Warranty

In the normal course of business, the basic warranty period for the Company's software products is typically ninety (90) days from the date of initial delivery to its customers and technology partners. The Company generally warrants that its software products will perform in all material respects in accordance with its standard published specifications. Historically, costs related to this warranty have not been significant.

PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

The Company generally provides standard indemnification provisions within its software license agreements with its customers and technology partners. Pursuant to the provisions, the Company typically defends, indemnifies, and holds the other party harmless against losses arising from a breach of representation or covenants, or out of intellectual property infringement or other claims made against third parties. These agreements may limit the time within which an indemnification claim can be made and the amount of the claim. In addition, the Company has entered into indemnification agreements with its officers and directors, and its bylaws contain similar indemnification obligations to its agents.

It is not possible to determine the maximum potential amount under these indemnification agreements due to the limited history of prior indemnification claims and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the Company under these agreements have not had a material impact on its operating results or financial position.

Recent Accounting Pronouncements

In January 2003, the FASB issued Financial Accounting Standards Board Interpretation No.46, *Consolidation of Variable Interest Entities* (FIN 46). FIN 46 requires that if an entity is the primary beneficiary of a variable interest entity, the assets, liabilities, and results of activities of the variable interest entity should be included in the consolidated financial statements of the entity. FIN 46 requires that its provisions are effective immediately for all arrangements entered into after January 31, 2003. For arrangements entered into prior to January 31, 2003, FIN 46 is effective for periods ending after December 15, 2003. In December 2003, FIN 46 was revised (FIN 46R) to require application in financial statements of public entities that have interests in special-purpose entities for periods ending after December 15, 2003. For all other types of variable interest entities, application is required for periods ending after March 15, 2004. The adoption of FIN 46 did not have a material impact on its results of operations or financial condition.

Note 2. Comprehensive Loss

The following are the components of comprehensive loss (*in thousands*):

	<u> </u>	<u> </u>	<u> </u>	<u> </u>

Overview

As of March 31, 2004, the remaining accrual balance amounted to \$2.9 million, consisting of approximately \$0.2 million in employee termination benefits, which are expected to be paid through the third quarter of fiscal 2004 and \$2.7 million in facilities exit costs, which are expected to be paid through the third quarter of fiscal 2009.

The balance of the accruals for severance and benefits as of March 31, 2004 was included in the consolidated balance sheets under the caption Accrued compensation and related liabilities . The unpaid portion of facilities exit costs is included in the consolidated balance sheets under the captions Accrued restructuring charges current and Accrued restructuring charges long term .

PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Fiscal 2003 Programs

In the first quarter of fiscal 2003, Phoenix announced a restructuring program that impacted approximately 100 positions across all business functions and closed its facilities in Irvine, California and Louisville, Colorado. This restructuring resulted in employee termination benefits of \$2.9 million, estimated facilities exit expenses of \$2.5 million, and asset write-offs in the amount of \$0.1 million. All charges were recorded in the three months ended December 31, 2002 in accordance with Emerging Issues Task Force 94-3 *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity* (EITF 94-3). As of September 30, 2003, payments relating to the employee termination benefits were completed. Actual payments for employee termination benefits were lower than the original provision as of September 30, 2003. As a result, \$0.1 million of excess accrual was reversed in the fourth quarter of fiscal 2003. In addition, Phoenix increased the restructuring liability related to the Irvine, California facility by \$1.7 million in the fourth quarter of fiscal 2003 and again by \$0.1 million in the second quarter of fiscal 2004 to reflect changes in the assumptions made previously for both the length of time the space would remain vacant and the sublease rate when the Company finds subtenants. As of March 31, 2004, approximately \$1.7 million of the facilities exit expenses had been paid. The remaining exit costs and net lease expenses are expected to be paid through the third quarter of fiscal 2009.

In the second quarter of fiscal 2003, Phoenix continued its effort in aligning global engineering resources. Approximately 15 positions across multiple business functions, primarily in research and development, were impacted by this effort. This resulted in an employee termination benefit charge of \$0.5 million. This charge is recorded in accordance with Statement of Financial Accounting Standards No. 146, *Accounting for Costs Associated with Exit or Disposal Activities* (SFAS 146). All terminations were completed as of March 31, 2003. No future services will be rendered under the previous employee agreements. Payments were completed as of September 30, 2003.

In the fourth quarter of fiscal 2003, the Company furthered its restructuring program to align global engineering resources and streamline finance operations. Approximately 40 positions across business functions, primarily in research and development and finance, were impacted by this program. This resulted in an employee termination benefit charge of \$1.4 million, which is recorded in accordance with SFAS 146. As of March 31, 2004, approximately \$1.0 million of the employee termination benefits had been paid and actual payments were lower than the original provision. As a result, \$0.2 million of excess accrual was reversed in the second quarter of fiscal 2004. Employee termination benefits are expected to be paid through the third quarter of fiscal 2004.

Note 4. Other Current Assets and Other Accrued Liabilities

Note 5. Segment Reporting and Significant Customers

The Chief Operating Decision Maker assesses the Company's performance by regularly reviewing the operating results as a single segment: Phoenix. The reportable segment is established based on the criteria set forth in the Statement of Financial Accounting Standards No. 131,

Disclosures about Segments of an Enterprise and Related Information (SFAS 131), including evaluating the Company's internal reporting structure by the chief operating decision maker and disclosure of revenues and operating expenses. The chief operating decision maker reviews financial information presented on a consolidated basis, accompanied by disaggregated information about revenues by geographic region for purposes of making operating decisions and assessing financial performance. The Company does not assess the performance of its geographic regions on other measures of income or expense, such as depreciation and amortization, gross margin or net income. In addition, as Phoenix's assets are primarily located in its corporate office in the United States and not allocated to any specific region, it does not produce reports for, or measure the performance of its geographic regions based on any asset-based metrics. Therefore, geographic information is presented only for revenues.

The Company reports revenues by geographic area, which is categorized into five major countries/regions: North America, Japan, Taiwan, other Asian countries, and Europe (*in thousands*):

	Three months ended March 31,		Six months ended March 31,	
	2004	2003	2004	2003
Revenues:				
North America	\$ 3,687	\$ 4,185	\$ 8,246	\$ 9,854

	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Total revenues	\$ 20,672	\$ 21,717	\$ 39,172	\$ 43,611
	<u> </u>	<u> </u>	<u> </u>	<u> </u>

One customer, Fujitsu Limited, accounted for 10%, 11%, 10%, and 11% of total revenues for the three months ended March 31, 2004 and 2003 and the six months ended March 31, 2004 and 2003, respectively. Another customer, International Business Machine Corporation (IBM) accounted for 11% and 12% of total revenues for the three and six months ended March 31, 2004. Furthermore, Advantech Corporation Limited accounted for 10% of total revenues for the three months ended March 31, 2004. No other customers accounted for more than 10% of total revenues during these periods.

PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Note 6. Contingencies

Litigation

On April 21, 2003, the Suwon District Court in Seoul, Korea granted a motion by the Korea Electronic Certification Authority (CrossCert) for a preliminary attachment on Phoenix's expected payments from another Phoenix customer, Samsung Electronics. The amount of the preliminary attachment is KRW 496,608,750, approximately USD\$412,000. On May 7, 2003, Phoenix and its subsidiary, Phoenix Technologies (Hungary) Software Licensing LLC (Phoenix's assignee of the license agreement between Phoenix and CrossCert) filed suit in Santa Clara County Superior Court in the United States of America for breach of contract, interference with contract, interference with prospective economic advantage and unfair competition, against CrossCert. Phoenix also challenged the preliminary attachment in Korea. CrossCert subsequently filed suit against Phoenix on June 14, 2003 in Korea. The basis of the alleged suit is breach of contract and/or fraud in connection with the parties' license agreement. The complaint seeks \$825,000 plus interest under both the license agreement and Korean law.

In November 2003, the Seoul District Court dismissed CrossCert's suit against Phoenix for lack of jurisdiction. A hearing regarding the removal of the preliminary attachment was held on February 18, 2004, and a decision regarding removal of the preliminary attachment is expected on May 19, 2004. Phoenix expects to succeed in removing the preliminary attachment. CrossCert has filed a cross-complaint in the U.S. action. Phoenix also expects to succeed in the U.S. action.

Phoenix is subject to certain routine legal proceedings, as well as demands, claims and threatened litigation, that arise in the normal course of our business. We currently believe that the ultimate amount of liability, if any, for any pending claims of any type (either alone or combined) will not materially affect our financial position, results of operations or liquidity. However, the ultimate outcome of any litigation is uncertain, and either unfavorable or favorable outcomes could have a material negative impact. Regardless of outcome, litigation can have an adverse impact on the Company due to defense costs, diversion of management resources and other factors.

Note 7. Stock Repurchase Program

In October 2002, the Board of Directors authorized a program to repurchase up to \$15.0 million of Phoenix Technologies' common stock over a twelve-month period. In the first two quarters of fiscal 2003, the Company repurchased approximately 2,196,000 shares of its common stock at a cost of \$9.6 million under the fiscal 2003 program. There were no repurchase programs authorized for fiscal 2004.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report on Form 10-Q, including without limitation the Management's Discussion and Analysis of Financial Condition and Results of Operations, contains statements that are not purely historical, which are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements may include, but are not limited to, statements concerning future liquidity and financing requirements, expected price erosion, plans to make acquisitions, dispositions or strategic investments, expectations of sales volume to Customers and future revenue growth, and plans to improve and enhance existing products and develop new products.

Words such as could, expects, may, anticipates, believes, estimates, plans, and other similar expressions are intended to indicate forward-looking statements. All forward looking statements included in this document are based upon information available to the Company as of the date hereof, and the Company assumes no obligation to update any such forward looking statement. Actual results could differ materially from the Company's current expectations. Some of the factors that could cause future results to materially differ from the recent results or those projected in the forward-looking statements include, but are not limited to, significant increases or decreases in demand for our products, increased competition, lower prices and margins, changes in customer buying pattern, failure to successfully develop and market new products and technologies, competitor introductions of superior products, continued industry consolidation, instability and currency fluctuations in international markets, product defects, failure to secure intellectual property rights, results of litigation, failure to retain and recruit key employees, acts of war or global terrorism, power shortage and unexpected natural disasters. For a more detailed discussion of these and other risks associated with our business, see the Risks Factors section below and the Business Risks section in our Annual Report on Form 10-K for the year ended September 30, 2003.

Available Information

Our Web site is www.phoenix.com. Through a link on the Investor Relations section of our Web site, the Company makes available the following filings as soon as reasonably practical after they are electronically filed with or furnished to the SEC: the Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934. All such filings are available free of charge. Information contained on the Company's Web site is not part of this report.

Company Overview

We are a global leader in the development, deployment, and support of Core System Software (CSS). CSS, the evolution of BIOS (Basic Input Output System), is used to enable, activate, secure, connect, and recover personal computers (PCs), industrial computers (IPCs), point of sale computers (POS), and other digital devices used to connect to the Internet. We provide our products primarily to platform and peripheral manufacturers that range from large branded PC and information products original equipment manufacturers (OEMs) and original design manufacturers (ODMs), to small system integrators and value-added resellers (collectively, Customers). In addition to key products, we also provide support services, such as training, maintenance and engineering services, to our customers as required. We market and license our products and services through a global direct sales force as well as through a network of regional distributors and sales representatives, OEMs, ODMs, resellers, value-added resellers, system integrators, system builders, and independent software vendors (ISVs).

We believe that our products and services enable Customers to bring secure, leading-edge products to market faster, while reducing their manufacturing and support costs and providing essential features and capabilities to enable product differentiation. The growth of the Internet has spurred the need to enable additional connectivity to a broad range of digital devices beyond the traditional PC. Those include personal digital assistants (PDAs), cell phones, set top boxes, and other digital devices used by consumers.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

worldwide to access the Internet. These products broaden the range of secure, real-time, interactive experiences available to the end user. The diversity of hardware architectures, operating systems, and microprocessors and peripherals used by these devices has created new demands for network assurance or authentication features and device management capabilities that are built into the device and enabled by Phoenix Core System Software.

Individual users and enterprises requirements for mobility and secure network access have become the major requirement for digital devices. Sustaining and protecting business continuity from malicious attacks, viruses, and worms has also created a critical need for new network security. Our security features and software applications capabilities are built into the device to enable trust, to protect the network, and to recover critical data in the event of a successful attack. To meet the demand of this changing market, we have launched, through a combination of internal development and acquisitions, a series of product families that provides a range of complete solutions that allow the PC to automatically authenticate the device to the network and to make its data recoverable. In each case, Phoenix products at the core of the machine offer an intelligent, secure, and reliable platform for delivering high value-added features and functions to a wide range of PC and connected digital device customers, increasing their competitiveness in the marketplace. We believe this approach leveraging our expertise to expand beyond CSS and PCs will help us enhance and strengthen our market presence as the industry evolves.

In addition to our Phoenix CSS, we have also packaged our offering to include additional platform tools and core-resident applications, which are marketed and sold as Phoenix Core Managed Environment (cME). Phoenix cME is an open software platform, centered on CSS, which enables the management and integration of functionality into the heart of digital devices. Phoenix cME provides intuitive system management, secure services, and system restoration capabilities that are both independent from and in support of the operating system.

Phoenix cME addresses the following market sectors: Phoenix cME PC Edition for personal computers (desktops, notebooks, workstations and tablet PCs); Phoenix cME Server Edition for server environments; Phoenix cME Embedded Edition for information appliances, consumer electronics, and industrial products; Phoenix CME TrustConnector for x86 device authentication to IP networks; and Phoenix cME TrustedCore for notebooks, tablet PCs, and servers. Each of these suites includes a platform-specific portfolio of application software, security features, advanced CSS, developer tools, and application program interfaces (APIs). Developer tools include Phoenix CoreArchitect, which is an advanced development environment for OEMs and ODMs who are implementing next-generation CSS for PCs and connected digital devices. CoreArchitect is built on top of the powerful Microsoft Visual Studio .NET Professional and we have complemented it by adding a complete, fully-integrated tool suite. Customers can select those technologies in each platform that best enable them to differentiate their products and provide additional value to their customers. We license software developer kits (SDKs) to qualified partners for the development of core-resident, integrated, value-add solutions built on the cME platform. These partners, including ISVs, OEMs, ODMs, system integrators, and system builders, can build and deploy applications in categories such as utilities, productivity, security and content delivery.

Fiscal 2004 Second Quarter Overview

Since the fourth quarter of fiscal 2003, Phoenix has analyzed revenue along two dimensions. One dimension is by platform, with PCs and servers representing one category and non-PC devices, including consumer and industrial devices, representing a second category. The second dimension is by products, with Core System Software representing one category, and applications representing the second category. This form of analysis creates a view of four revenue quadrants which will be discussed in more detail under *Results of Operations* and *Revenues*.

The PC/server Core System Software quadrant is currently the largest revenue quadrant, representing 60% of our total revenue of \$20.7 million during the second quarter of fiscal 2004. Although revenue from this quadrant declined from the first quarter by approximately 13%, we believe that PC/server Core System Software revenues are tracking trends in the PC industry reasonably well, and our market share is holding steady.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

During the second quarter of fiscal 2004, we continued to enter into volume purchase agreements (or VPAs) with a number of our larger ODM and OEM customers. Under these agreements, customers commit to a fixed payment schedule for an agreed-upon number of units in the next several quarters. Management believes that VPAs help stabilize current core business, improve positive cash flows, improve visibility for future revenues, further strengthen relationships with key ODM and OEM customers, and enable us to focus on applications and non-PC businesses. As a result of the significant increase in the number of VPAs entered into during the quarter, our deferred revenue balance increased significantly during the second quarter of fiscal 2004, as discussed further in *Critical Accounting Policies and Estimates - Revenue Recognition*. However, despite successes in closing a number of VPAs during the first and second quarters of fiscal 2004, Management does not expect deferred revenue to continue to increase over the next couple of quarters as 1) the majority of our strategic customers have already entered into VPAs and 2) VPAs tend to be a seasonal transaction as customers are more likely to enter into them around their fiscal year-end, which is often March 31 in Japan and December 31 in the remainder of Asia Pacific.

Operating expenses declined from approximately \$16.9 million from the first quarter to \$16.0 million for the second quarter of fiscal 2004. Headcount declined by 3% and compensation-related expenses were flat. The principal declines were in non-compensation-related areas, including outside professional services, marketing programs, computers, and office costs.

The Company continues to develop and implement strategic planning in improving its business outlook and profitability. These efforts include entering long-term VPAs with key customers to ensure a stable foundation in our core business, strengthening our relationships with key ODM customers who continue to dominate the marketplace, expanding partnership with system builders to establish better brand awareness as they have close relationships with their customers, development of trusted computing, re-aligning resources to geographically better serve our customers, expanding our channel partner network worldwide to create higher demand of our products, and maintaining disciplines on discretionary spending. There can be no assurance that our efforts will be successful.

Critical Accounting Policies and Estimates

We believe the following critical accounting policies, among others, are affected by our more significant judgments and estimates used in the preparation of our consolidated financial statements. The Company has discussed the critical accounting policies and estimates with the Audit Committee of the Board of Directors.

Revenue Recognition. We license software under non-cancelable license agreements and provide services including non-recurring engineering efforts, maintenance consisting of product support services and rights to unspecified upgrades on a when-and-if available basis, and training. Generally, our products are incorporated into the products of our OEM/ODM customers.

Royalty revenues from OEMs/ODMs are generally recognized in each period based on estimated consumptions made by the OEMs/ODMs of products containing our software during the period. Since we generally receive quarterly royalty reports from our OEMs/ODMs approximately 45 to 60 days following the end of the quarter, we have put processes in place to reasonably estimate the royalty revenues, including obtaining estimates of production from our OEM/ODM customers, utilizing historical experience, and other relevant current information. We accrued \$6.1 million and \$5.2 million of royalty revenues from our OEM/ODM customers as of March 31, 2004 and September 30, 2003, respectively. Although management believes that it has a reliable basis for making reasonable estimates, the actual results could differ depending on customer or market factors.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Revenues for initial and non-refundable royalties relating to VPAs as well as non-refundable fixed fee agreements are recorded when all revenue recognition criteria have been met. We recorded \$9.1 million of revenues relating to volume royalty license agreements in the second quarter of fiscal 2004 compared to \$6.6 million in the same period in fiscal 2003. These agreements were non refundable.

Revenues for volume purchase agreements (or VPAs) are recognized up to the amount the customer has been billed and to the extent that the customer is expected to consume the corresponding units by the end of the following accounting quarter. The process of estimating VPA revenues include obtaining estimates from our OEM/ODM customers, utilizing historical experience, and other relevant current information. Under these agreements, customers, mostly OEMs and ODMs, commit to a fixed payment schedule for an agreed-upon number of units in the next several quarters. Revenues that have been invoiced and relate to usage beyond the following accounting quarter, which we have determined to be not fixed and determinable, are recorded as deferred revenues. We believe all deferred revenue will be recognized as revenue within the next 12 months. Actual results could differ from the estimates used and have a material adverse effect on our business, operating results and financial condition.

Our total deferred revenue was \$18.8 million and \$3.3 million as of March 31, 2004 and September 30, 2003, respectively. The principal reason for this was a significant increase in the number of VPAs entered into with our larger ODM and OEM customers during the first two quarters of fiscal 2004.

Allowance for Sales and Doubtful Accounts. We record provisions for estimated sales allowances against revenues in the same period as the related revenues are recorded. Provisions for doubtful accounts are recorded in general and administrative expenses. At March 31, 2004 and September 30, 2003, the allowance for sales and doubtful accounts is \$1.5 million for both periods. These estimates are based on our assessment of the probable collection from specific customer accounts, the aging of the accounts receivable, historical sales returns, analysis of credit memo data, bad debt write-offs, and other known factors. If economic or specific industry trends worsen beyond our estimates, or if there is a deterioration of our major customers' credit worthiness, or actual defaults are higher than our estimates based on historical experience, we would increase the allowances for sales and doubtful accounts which would impact revenue and expense, respectively, as appropriate.

Intangible Assets. Intangible assets include prepaid royalties, purchased technologies, goodwill and other intangibles. At March 31, 2004 and September 30, 2003, these assets, net of accumulated amortization, totaled \$28.6 million and \$31.7 million, respectively.

Prepaid royalties represent payments to several third party technology partners for their software that is incorporated into certain of our products. All other intangible assets were derived from our acquisitions. The cost of the acquisitions is allocated to the assets and liabilities acquired, including intangible assets based on their respective estimated fair value at the date of acquisition, with the remaining amount being classified as goodwill. The useful life of the intangible assets was estimated based on the period over which the assets were expected to contribute directly and indirectly to the future cash flows. If assumptions regarding the estimated future cash flows and other factors to determine the fair value of the respective assets change in the future, we may be required to record impairment charges.

Accordingly, the allocation of the acquisition cost to intangible assets and goodwill has a significant impact on our future operating results. The original recorded values of intangible assets and goodwill are based on third-party appraisals. The allocation process requires the extensive use of estimates and assumptions, including estimates of future cash flows expected to be generated by the acquired assets.

Income Taxes - Estimates of Effective Tax Rates, Deferred Taxes Assets and Valuation Allowance: When preparing our financial statements, we estimate our income taxes based on the various jurisdictions where we conduct business. This requires us to (1) estimate our current tax

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

exposure and (2) assess temporary differences due to different treatment of certain items for tax and accounting purposes thereby resulting in deferred tax assets and liabilities. In addition, on a quarterly basis, we perform an assessment of the recoverability of the deferred income tax assets, which is principally dependent upon our ability to achieve taxable income in specific geographies.

Page 16

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

After examining the available evidence at March 31, 2004, we believe a full valuation allowance was necessary for the U.S. Federal and state net deferred tax assets. The valuation allowance was calculated in accordance with the provisions of SFAS 109, which requires an assessment of both negative and positive evidence when measuring the need for a valuation allowance. In accordance with SFAS 109, evidence such as operating results during recent periods is given more weight than our expectations of future profitability, which are inherently uncertain. Our recent financial performance represented sufficient negative evidence to require a full valuation allowance against our U.S. Federal and state deferred tax assets under SFAS 109. We intend to maintain a full valuation allowance against our deferred tax assets until sufficient positive evidence exists to support realization of the U.S. Federal and state deferred tax assets.

Results of Operations***Revenues***

Revenues by geographic region for the three and six months ended March 31, 2004 and 2003 were as follows (*in thousands, except percentages*):

				% of Consolidated	
	Amount			Revenue	
	2004	2003	% Change	2004	2003
Three months ended March 31:					
North America	\$ 3,687	\$ 4,185	-12%	18%	19%
Japan	6,670	6,821	-2%	32%	31%
Taiwan	7,071	8,164	-13%	34%	38%
Other Asian countries	1,020	1,128	-10%	5%	5%
Europe	2,224	1,419	57%	11%	7%
Total revenues	\$ 20,672	\$ 21,717	-5%	100%	100%

				% of Consolidated	
	Amount		% Change	Revenue	
	2004	2003		2004	2003
Six months ended March 31:					
North America	\$ 8,246	\$ 9,854	-16%	21%	23%
Japan	11,819	14,628	-19%	30%	34%
Taiwan	13,947	14,573	-4%	36%	33%
Other Asian countries	2,031	2,266	-10%	5%	5%
Europe	3,129	2,290	37%	8%	5%
Total revenues	\$ 39,172	\$ 43,611	-10%	100%	100%

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

Total revenues for the three and six months ended March 31, 2004 decreased by 5% and 10%, respectively, compared with the same periods in fiscal 2003. The decrease was primary attributable to the migration from OEMs to ODMs who have higher volumes and lower per unit prices in addition to general price pressures. Revenues for the three and six months ended March 31, 2004 from Europe increased by 57% and 37%, respectively, due to two large license buy-out arrangements entered during the second quarter of fiscal 2004, partially offset by a shift to ODMs. Revenue for the three months ended March 31, 2004 from North America, Japan, Taiwan, and other Asian countries decreased by 12%, 2%, 13%, and 10%, respectively.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Revenue for the six months ended March 31, 2004 from North America, Japan, Taiwan, and other Asian countries decreased by 16%, 19%, 4%, and 10%, respectively. The decrease in both periods was primarily due to the shift to ODMs and continued softness in the PC market.

In the second quarter of fiscal 2004, our largest revenue quadrant was PC/server Core System Software. Although revenues in that quadrant were \$12.4 million as compared to \$17.6 million for the second quarter of 2003, the decrease in revenue was related to 1) a slowing in notebook demand and inventory buildup in the first quarter of fiscal 2004, 2) a continuing shift in manufacturing from OEMs to ODMs, who have higher volumes and therefore lower prices, and 3) a clarification in revenue classification of some sales in the non-PC segment which were previously classified in the PC/CSS quadrant in prior quarters. We believe revenues in this quadrant have stabilized.

Applications revenues were \$1.9 million in the second quarter of fiscal 2004 as compared to \$0.8 million for the second quarter of fiscal 2003. Our two principal customer segments in this sector are the larger PC OEMs and the system builders. Unlike the usual OEM and ODM deals, which typically incur a Phoenix license fee obligation when a device is manufactured with Phoenix Core System Software, the system builder deals in the applications segment typically involve a payment obligation when the device is ultimately sold to an end user. Therefore, despite the increase in revenue in the second quarter, which largely reflects increasing shipments by OEMs who signed contracts prior to the second quarter, it will take a longer time period before a significant increase in revenues can be recognized from sales to these new system builder customers than from the usual sales to OEMs and ODMs. We may not be able to see a noticeable increase in revenue in this quadrant until the fourth quarter of fiscal 2004 or the first quarter of fiscal 2005.

The last revenue quadrant is non-PC devices, which includes both Core System Software and applications products. The non-PC quadrant recorded a significant increase in revenue, from \$3.3 million in the second quarter of 2003 to \$6.4 million for the second fiscal quarter of 2004. We believe there is less quarter-to-quarter revenue stability here because this quadrant includes a high proportion of non-standard contracts for which revenue is recognized upon contract execution. Therefore, the results for this period are not necessarily indicative of results to be expected in future periods.

Cost of Revenues and Gross Margin

Cost of revenues consists of third party license fees, engineering service costs and amortization of purchased technology. Gross margin as a percentage of revenues for both the three months and six months ended March 31, 2004 remained constant at 80% for all periods. The consistency in gross profit percentage for these periods was a result of our continuous effort to keep cost of revenue in line with the respective revenue generated during the period. Gross margin was \$16.6 million for the three months ended March 31, 2004 as compared to \$17.4 million for the same period in fiscal 2003. For the six months ended March 31, 2004, gross margin was \$31.4 million, as compared to \$34.9 million for the same period in fiscal 2003. The decrease in both periods was mainly related to lower revenues. Amortization of purchased technologies from business combinations for the three months ended March 31, 2004 and 2003 were \$0.8 million for both periods and for the six months ended March 31, 2004 and 2003 were \$1.6 million for both periods.

Research and Development Expenses

Research and development expenses were \$5.6 million and \$6.6 million for the three months ended March 31, 2004 and 2003, respectively. As a percentage of revenues, these expenses represented 27% and 30%, respectively. For the six months ended March 31, 2004 and 2003, research and development expenses were \$11.3 million and \$14.2 million, respectively. As a percentage of revenues, these expenses represented 29% and 33%, respectively. The decrease in both periods was primarily due to lower payroll and related compensation expenses as a result of the

restructuring programs implemented during fiscal 2003.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS***Sales and Marketing Expenses***

Sales and marketing expenses were \$7.3 million and \$8.3 million for the three months ended March 31, 2004 and 2003, respectively. As a percentage of revenues, these expenses represented 35% and 38%, respectively. For the six months ended March 31, 2004 and 2003, sales and marketing expenses were \$15.5 million and \$17.0 million, respectively. As a percentage of revenues, these expenses represented 40% and 39%, respectively. The decrease in dollar amount in both periods was due primarily to lower payroll and related compensation expenses as a result of the restructuring programs put into place during fiscal 2003 and tighter spending controls on marketing activities.

General and Administrative Expenses

General and administrative expenses were \$3.1 million and \$3.4 million for the three months ended March 31, 2004 and 2003, respectively. As a percentage of revenues, these expenses represented 15% and 16%, respectively. For the six months ended March 31, 2003 and 2002, general and administrative expenses were \$6.1 million and \$6.8 million, respectively. As a percentage of revenues, these expenses represented 15% and 16%, respectively. The decrease in general and administrative expenses was due primarily to savings from the restructuring programs in fiscal 2003 as well as discipline in discretionary spending, partially offset by increased costs relating to compliance with the Sarbanes-Oxley Act.

Restructuring Charges

Restructuring charges for the three and six months ended March 31, 2004 and 2003 were as follow (*in thousands*):

	Three months		Six months	
	ended		ended	
	March 31,		March 31,	
	2004	2003	2004	2003
Severance and benefits	\$ (200)	\$ 549	\$ (200)	\$ 3,417
Facility and exit costs	140		140	2,479
Asset write-offs				118
	\$ (60)	\$ 549	\$ (60)	\$ 6,014

During fiscal 2003, we implemented three restructuring programs:

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

In the first quarter of fiscal 2003, we initiated a restructuring program with the objective to 1) continue strengthening our capabilities in Asia, 2) increase customer support in the fastest growing markets, and 3) adjust cost structure related to the trends in the marketplace. The program impacted approximately 100 positions across all business functions and closed our facilities in Irvine, California and Louisville, Colorado. This restructuring resulted in a charge of \$5.5 million including \$2.9 million in employee termination benefits, \$2.5 million in estimated facilities exit expenses, and \$0.1 million in asset write-offs. As of September 30, 2003, all payments were completed and \$0.1 million of excess accrual for employee termination benefits was reversed. In addition, the restructuring liability related to the Irvine, California facility was increased by \$1.7 million in the fourth quarter of fiscal 2003 and again by \$0.1 million in the second quarter of fiscal 2004 to reflect changes in the assumptions made previously for both the length of time the space would remain vacant and the sublease rate when the Company finds subtenants. The remaining exit costs and net lease expenses are expected to be paid through the third quarter of fiscal 2009.

In the second quarter of fiscal 2003, we continued our effort in aligning global engineering resources and identified additional positions across multiple business functions. Approximately 15 positions, primarily in research and development, were impacted by this effort and an additional \$0.5 million restructuring charge was recorded.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In the fourth quarter of fiscal 2003, we furthered our restructuring program to align global engineering resources and streamline finance operations. Approximately 40 positions across business functions, primarily in research and development and finance, were impacted by this program. This resulted in an employee termination benefit charge of \$1.4 million. As of March 31, 2004, approximately \$1.0 million of the employee termination benefits had been paid and actual payments were lower than the original provision. As a result, \$0.2 million of excess accrual was reversed in the second quarter of fiscal 2004. Employee termination benefits are expected to be paid through the third quarter of fiscal 2004.

As a result of the fiscal 2003 restructuring programs, we estimate pretax savings in operating expenses to be \$10.2 million on an annualized basis.

See Note 3 to the consolidated financial statements for more details on our restructuring plans implemented in fiscal 2003.

Interest and Other Income, Net

Interest and other income, net, was \$(0.5) million and \$0.1 million for the three months ended March 31, 2004 and 2003, respectively. For the six months ended March 31, 2004 and 2003, interest and other income, net, was \$(0.4) million and \$0.2 million, respectively. The decrease in interest and other income was due primarily to foreign exchange adjustments from the weakening of the dollar during the second quarter of fiscal 2004.

Provision for Income Taxes

The Company recorded income tax provisions of \$0.7 million and \$1.1 million for the three and six months ended March 31, 2004, respectively, as compared to income tax benefits of \$0.5 million and \$3.2 million in the comparable periods in fiscal 2003. At the close of the Company's most recent fiscal year end, management determined that based upon its assessment of both positive and negative evidence available it was appropriate to provide a full valuation allowance against any U.S. Federal and state net deferred tax assets. As of March 31, 2004, it continues to be the assessment of management that a full valuation against the U.S. Federal and state net deferred tax assets is appropriate. Accordingly, the provision for income taxes does not include any net benefit associated with the net operating losses incurred during the six months ended March 31, 2004. The provision of \$1.1 million for the six months ended March 31, 2004 is comprised entirely of tax on foreign operations, which includes our obligation to pay foreign royalty withholding taxes in certain jurisdictions based on revenues rather than net income.

Liquidity and Capital Resources

At March 31, 2004, our principal source of liquidity consisted of cash and cash equivalents, and short-term investments totaling \$55.8 million. The primary source of cash during the six months ended March 31, 2004 was \$8.4 million from operating activities, net proceeds from sale of investments of \$3.0 million, and proceeds from stock purchases under stock option and stock purchase plans of \$0.6 million. At March 31, 2003, our principal source of liquidity consisted of cash and cash equivalents, and short-term investments totaling \$54.6 million. The primary source of cash during the six months ended March 31, 2003 was net proceeds from sale of investments of \$22.8 million. The primary use of cash during

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

the same period was \$10.9 million for operating activities, \$1.9 million for capital additions and \$9.6 million for repurchase of common stock. There were no outstanding borrowings with banks or other potential creditors in both periods.

The Company's deferred revenue balance increased to \$18.8 million at March 31, 2004, compared to \$3.3 million at September 30, 2003. The principal reason for this was a significant increase in the number of VPAs we entered into with our larger ODM and OEM customers during the first and second quarters of fiscal 2004. Under these agreements, customers commit to a fixed payment schedule for an agreed-upon number of units in the next four quarters, stabilizing our cash inflow. Management does not expect deferred revenue to continue to increase over the next couple of quarters as 1) the majority of our strategic customers have already entered into VPAs and 2) VPAs tend to be a seasonal transaction as customers are more likely to enter into them around their fiscal year-end, which is often March 31 in Japan and December 31 in the rest of Asia Pacific.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Also, at March 31, 2004, accounts receivable only increased by \$4.8 million compared to September 30, 2003, despite the \$15.5 million increase in deferred revenue from September 30, 2003 and the \$39.2M of revenue generated during the first two quarters in fiscal 2004. This is attributed to a higher proportion of deferred revenues at March 31, 2004 reflected as cash in hand rather than outstanding invoices, compared to September 30, 2004. This indicates the general financial stability of our customer base and the value of the VPA strategy we have pursued. The net result was an increase of \$8.6 million in cash and short-term investments at March 31, 2004 compared to September 30, 2003.

Net undistributed earnings of certain foreign subsidiaries amounted to approximately \$16.9 million as of March 31, 2004. These earnings are considered to be indefinitely reinvested, and accordingly, no provision for U.S. Federal and state income taxes has been provided thereon. Upon distribution of these earnings in the form of dividends or otherwise, the Company would be subject to U.S. income taxes (after an adjustment for foreign tax credits) of approximately \$2.0 million. These additional income taxes may not result in a cash payment to the Internal Revenue Service, but may result in the utilization of deferred tax assets that are currently subject to a valuation allowance.

Commitments

We have commitments under non-cancelable operating leases ranging from one to ten years for \$18.6 million. The operating lease obligations include a net lease commitment for the Irvine location of \$2.6 million, after sublease income of \$1.1 million. The Irvine net lease commitment was included in the Company's fiscal 2003 first quarter restructuring plan. See Note 3 to the consolidated financial statements for further information on the Company's restructuring plans. We also have agreements to license third party software that would be incorporated into certain of our products and are committed to \$0.5 million in the remaining six months of fiscal 2004.

We did not enter any additional material commitments for capital expenditures or non-cancelable purchase commitments during the quarter ended March 31, 2004.

Stock Repurchase Program

In October 2002, the Board of Directors authorized a program to repurchase of up to \$15.0 million of Phoenix Technologies' common stock over a twelve-month period. In the first two quarters of fiscal 2003, the Company repurchased approximately 2,196,000 shares of its common stock at a cost of \$9.6 million under the fiscal 2003 program. There were no repurchase programs authorized for fiscal 2004.

Overview

Based on past performance and current expectations, we believe that current cash and cash equivalent, short-term investments, and cash generated from operations will satisfy our working capital needs, capital expenditures, commitments and other liquidity requirements associated with our existing operations through at least the next twelve months. There are no transactions and arrangements that are reasonably likely to materially affect liquidity or the availability of our requirements for capital.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Risks Factors

The additional following factors should be considered carefully when evaluating our business.

Fluctuations in Operating Results

Our future operating results may vary substantially from period to period. The timing and amount of our license fees are subject to a number of factors that make estimating revenues and operating results prior to the end of a quarter uncertain. While we receive recurring revenues on royalty-based license agreements and some agreements contain minimum quarterly royalty commitments, a significant amount of license fees in any quarter is dependent on signing agreements and delivering the licensed software in that quarter. Generally, we experience a pattern of recording 50% or more of our quarterly revenues in the third month of the quarter. We have historically monitored our revenue bookings through regular, periodic worldwide forecast reviews within the quarter. There can be no assurances that this process will result in our meeting revenue expectations. Operating expenses for any year are normally based on the attainment of planned revenue levels for that year and are generally incurred ratably throughout the year. As a result, if revenues were less than planned in any period while expense levels remain relatively fixed; our operating results would be adversely affected for that period. In addition, unplanned expenses could adversely affect operating results for the period in which such expenses were incurred.

Product Development

Our long-term success will depend on our ability to enhance existing products and to introduce new products timely and cost-effectively that meet the needs of customers in existing and emerging markets. There can be no assurance that we will be successful in developing new products or in enhancing existing products or that those new and/or enhanced products will be introduced before our competitors make their introductions, or that those products will meet market requirements. Delays in introducing new products can adversely impact acceptance and revenues generated from the sale of such products. We have, from time to time, experienced such delays. Our software products and their enhancements contain complex code that may contain undetected errors and/or bugs when first introduced. There can be no assurance that new products or enhancements will not contain errors or bugs that will adversely affect commercial acceptance of such new products or enhancements. The introduction of new products in the short term will also depend on adoption of our Phoenix cME and applications as well as the overall market demand for PCs and other digital devices.

Uncertain Geopolitical Environment and Unfavorable Economic and Market Conditions

Adverse economic conditions have contributed to recent slowdowns in the PC and information appliance industries and may continue to impact our business, resulting in:

Reduced demand for our products as a result of a decrease in capital spending by our customers;

Changes in customer production strategies;

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

Increased price competition for our products, partially as a consequence of price pressure in the PC markets; and

Higher operating expenses as a percentage of revenues.

Recent political turmoil in many parts of the world, including terrorist and military actions, may continue to put pressure on global economic conditions. If the global economic and market conditions do not improve, or if they deteriorate further, we may continue to experience material adverse impacts on our business, operating results and financial condition as a consequence of the above factors or otherwise.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Changes in Industry and Market Conditions

In response to changes in industry and market conditions, we may be required to strategically realign our resources and consider restructuring, disposing of, or otherwise exiting businesses. Any decision to limit investment in or dispose of or otherwise exit businesses may result in the recording of special charges, such as technology related write-offs, workforce reduction costs, or changes relating to consolidation of excess facilities. Our estimates with respect to the useful life or ultimate recoverability of our carrying basis of assets, including purchased intangible assets, could change as a result of such assessments and decisions. Further, our estimates relating to the liabilities for excess facilities are affected by changes in real estate market conditions. Additionally, we are required to perform goodwill impairment tests on an annual basis and between annual tests in certain circumstances. There can be no assurance that future goodwill impairment tests will not result in a charge to earnings.

Dependence on New Product Releases by Our Customers

Successful introduction of new products is key to our success in both our CSS and new applications businesses. Frequently our new products are used in our customers' new products, making each of us dependent on the other for product introduction schedules. It can happen that a customer may not be able to introduce one of his new products for reasons unrelated to our new product. In these cases, we would not be able to ship our new product until the customer had resolved his other problems.

Due to continued economic downturn and market uncertainties, many customers had delayed their product introductions, specifically in the notebook and non-PC segments. If our customers continue to delay their product introductions, our ability to generate revenue from our new application products may be adversely affected.

Risks in Acquisitions

Our growth is dependent upon market growth, our ability to enhance our existing products and introduction of new products on a timely basis. We have and will continue to address the need to develop new products through acquisitions of other companies and technologies. Acquisitions involve numerous risks, including the following:

Difficulties in integrating the operations, technologies, products and personnel of the acquired companies;

Diversion of management's attention from normal daily operations of the business;

Potential difficulties in completing projects associated with in-process research and development;

Difficulties in entering markets in which we have no or limited direct prior experience and where competitors in such markets have stronger market positions;

Insufficient revenues to offset increased expenses associated with acquisitions; and

Potential loss of key employees of the acquired companies.

Acquisitions may also cause us to:

Issue common stock that would dilute our current shareholders' percentage ownership;

Assume liabilities;

Record goodwill and non-amortizable intangible assets that will be subject to impairment testing and potential periodic impairment charges;

Incur amortization expenses related to certain intangible assets;

Incur large and immediate write-offs of in-process research and development costs; or

Become subject to litigation.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Mergers and acquisitions of high-technology companies are inherently risky, and no assurance can be given that our previous or future acquisitions will be successful or will not adversely affect our business, operating results, or financial condition. Failure to manage and successfully integrate acquisitions we make could harm our business and operating results in a material way. Even when an acquired company has already developed and marketed products, there can be no assurance that product enhancements will be made in a timely fashion or that all pre-acquisition due diligence will have identified all possible issues that might arise with respect to such products.

We have not made acquisitions that result in in-process research and development expenses being charged in an individual quarter. These charges may occur in future acquisitions in any particular quarter resulting in variability in our quarterly earnings.

Litigation Risks

From time to time, we become involved in litigation claims and disputes in the ordinary course of business. Litigation can be expensive, lengthy and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict. An unfavorable resolution of a particular lawsuit could have a material adverse effect on our business, operating results, or financial condition.

Protection of Intellectual Property

We rely on a combination of patent, trade secret, copyright, trademark, and contractual provisions to protect our proprietary rights in our software products. There can be no assurance that these protections will be adequate or that competitors will not independently develop technologies that are substantially equivalent or superior to our technology. In addition, copyright and trade secret protection for our products may be unavailable or unreliable in certain foreign countries. As of March 31, 2004, we had been issued 62 patents in the U.S. and had 56 patent applications in process in the United States Patent and Trademark Office. On a worldwide basis, we have been issued 117 patents with respect to our product offerings and have 168 patent applications pending with respect to certain of the products we market. We maintain an active internal program designed to identify employee inventions worthy of being patented. There can be no assurance that any of the pending applications will be approved and patents issued or that our engineers will be able to develop technologies capable of being patented. Also, as the number of software patents increases, we believe that companies that develop software products may become increasingly subject to infringement claims.

There can be no assurance that a third party will not assert that their patents or other proprietary rights are violated by products offered by us. Any such claims, whether or not meritorious, may be time consuming and expensive to defend, can trigger indemnity obligations owed by us to third parties and may have an adverse effect on our business, results of operations and financial condition. Infringement of valid patents or copyrights or misappropriation of valid trade secrets, whether alleged against us, or our customers, and regardless of whether such claims have merit, could also have an adverse effect on our business, results of operations and financial condition.

Effective Tax Rates

Our future effective tax rates could be adversely affected by earnings being lower than anticipated in jurisdictions where we have varying statutory rates or by changes in tax laws or interpretations thereof.

Entrance into New or Developing Markets

As we focus on new market opportunities, we will increasingly compete with large, established suppliers as well as start-up companies. Some of our current and potential competitors may have greater resources, including technical and engineering resources, than we do. Additionally, as customers in these

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

markets mature and expand, they may require greater levels of service and support than we have provided in the past. We expect that demand for these types of service and support may increase in the future. There can be no assurance that we can provide products, service, and support to effectively compete for these market opportunities. Further, provision of greater levels of services may result in a delay in the timing of revenue recognition.

Changes in Financial Accounting Standards

We prepare our financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP). GAAP are subject to interpretation by the Financial Accounting Standard Board, the American Institute of Certified Public Accountants (AICPA), the SEC and various bodies appointed by these organizations to interpret existing rules and create new accounting policies. Accounting policies affecting software revenue recognition, in particular, have been the subject of frequent interpretations, which have had a profound effect on the way we license our products. As a result of the recent enactment of the Sarbanes-Oxley Act and the related scrutiny of accounting policies by the SEC and the various national and international accounting industry bodies, we expect the frequency of accounting policy changes to accelerate. Future changes in financial accounting standards, including pronouncements relating to revenue recognition, may have a significant effect on our reported results and may even affect our reporting of transactions completed before the change is effective.

Importance of Microsoft and Intel

For a number of years, we have worked closely with leading software and semiconductor companies in developing standards for the PC industry. Although we remain optimistic regarding relationships with these industry leaders, there can be no assurance that leading software and semiconductor companies will not develop alternative product strategies that could conflict with our product plans and marketing strategies. Action by such companies may adversely impact our business and results of operations. Presently, there is little overlap or conflict in our product offerings, although these companies may incorporate some functionality that has traditionally resided in CSS. We must continuously create new features and functions to sustain, as well as increase, our software's added value to our Customers. There can be no assurances that we will be successful in these efforts.

Attraction and Retention of Key Personnel

Our ability to achieve our revenue and operating performance objectives will depend in part on our ability to attract and retain top-tier engineering, sales, marketing, and administrative personnel. Our newer products are based in part on technologies and industry standards that are different from CSS technologies. As such, we need to attract and retain key personnel with expertise in new areas. Accordingly, failure to attract and retain employees with the necessary skills could adversely affect our business and operating results. All of our employees, including executive officers and key personnel, are employees-at-will.

Dependence on Key Customers; Concentration of Credit Risk

The loss of any key customer and our inability to replace revenues provided by a key customer may have a material adverse effect on our business and financial condition. Our customer base includes large OEMs in the PC, semiconductor and Internet markets, system integrator value-added resellers, and motherboard manufacturers. As a result, we maintain individually significant receivable balances due from some of

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

them. If these customers fail to meet guaranteed minimum royalty payments and other payment obligations, our operating results and financial condition could be adversely affected. As of March 31, 2004, one customer, Fujitsu Limited accounted for 34% of our total accounts receivable. There are no other customers with more than 10% of our total accounts receivable.

Page 25

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Competition

The Company competes for CSS sales primarily with in-house research and development (R&D) departments of PC manufacturers that may have significantly greater financial and technical resources, as well as closer engineering ties and experience with specific hardware platforms, than those of the Company. Major OEM companies which may use their own internal BIOS R&D personnel include Dell Computer Corporation, Hewlett Packard Company, IBM Corporation (workstation and server only), Toshiba Corporation and Intel Corporation. In addition, as some of these competitors are also our customers, any inability to effectively manage these complicated relationships with customers could have a material adverse effect on our business, operating results, and financial condition and accordingly affect our chances of success.

The Company also competes for system software business with other independent suppliers, including American Megatrends Inc., a privately held company, and other small BIOS companies such as General Software, Inc. and Insyde Software, Inc.

In the applications software area, as with CSS, the Company competes with in-house and third-party solutions to access the protected area of hard drives. Large enterprise solution competitors such as Altiris Incorporated and Symantec Corporation, as well as smaller third party companies such as Xpoint Technologies Incorporated and SoftThinks Incorporated are the primary players. The Company's applications that reside in the protected area compete with individual component software and diagnostic and repair software from other companies, as well as with PC manufacturer-developed solutions.

The principal competitive factors in the markets in which we presently compete and may compete in the future include:

The ability to provide a broad range of products and services;

Product performance;

Price;

The ability to introduce new products timely; and

Market share.

We also face competition from customers to whom we license to. Any inability to effectively manage these complicated relationships with customers and suppliers could have a material adverse effect on our business, operating results, and financial condition and accordingly affect our chances of success.

International Sales and Activities

Revenues derived from the international sales of our CSS product families comprise a majority of total revenues. There can be no assurances that we will not experience significant fluctuations in international revenues. While the major portion of our license fee or royalty contracts are U.S. dollar denominated, we are entering into a number of contracts denominated in local currencies. We have international sales and engineering offices in Germany, the Netherlands, Japan, Korea, Taiwan, Hong Kong, and China. Our operations and financial results may be adversely affected by factors associated with international operations, such as changes in foreign currency exchange rates, uncertainties related to regional economic circumstances, political instability in emerging markets, difficulties in attracting qualified employees, and language, cultural and other difficulties managing foreign operations.

Volatile Market for Phoenix Stock

The market for our stock is highly volatile. The trading price of our common stock has been, and will continue to be, subject to fluctuations in response to operating and financial results, changes in demand for our products and services, announcements of technological innovations, the introduction and market acceptance of new technologies by us or our competitors, changes in our product mix or product direction of the product mix or direction of our competitors, pricing pressure from our customers and competitors, changes in our revenue mix and revenue growth rates, changes in expectations of growth for the PC industry, overall trend toward industry consolidation both among our competitors and customary timing and size of orders from customers, our ability to achieve targeted cost reductions, as well as other events or factors which we may not be able to influence or control. Statements or changes in opinions, ratings or

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

earnings estimates made by brokerage firms and industry analysts relating to the market in which we do business, companies with which we compete or relating to us specifically could have an immediate and adverse effect on the market price of our stock. In addition, the stock market has from time to time experienced extreme price and volume fluctuations that have particularly affected the market price for many small capitalizations, high-technology companies and have often included factors other than the operating performance of these companies. If our market value decreases below our net book value, we may have to record a charge for impairment of goodwill.

Certain Anti-Takeover Effects

Our Certificate of Incorporation, Bylaws and Stockholder Rights Plan and the Delaware General Corporation Law include provisions that may be deemed to have anti-takeover effects and may delay, defer or prevent a takeover attempt that stockholders might consider in their best interests. These include provisions under which members of the Board of Directors are divided into three classes and are elected to serve staggered three-year terms.

Business Disruptions

While we have not been the target of software viruses specifically designed to impede the performance of our products, such viruses could be created and deployed against our products in the future. Similarly, experienced computer programmers or hackers may attempt to penetrate our network security or the security of our Web sites from time to time. A hacker who penetrates our network or Web sites could misappropriate proprietary information or cause interruptions of our services. We might be required to expend significant capital and resources to protect against, or to alleviate, problems caused by virus creators and/or hackers. In addition, war, power shortage, natural disasters, acts of terror, and regional and global health risks could impact our ability to conduct business in certain regions. Any of these events could have an adverse effect on our business, results of operations, and financial condition.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes to the Company's financial market risks related to changes in interest rates and foreign currency exchange rates from September 30, 2003. Refer to the Company's Annual Report on Form 10-K for the year ended September 30, 2003 for more details.

Page 28

ITEM 4. CONTROLS AND PROCEDURES

Our Chief Executive Officer and Chief Financial Officer have reviewed, as of the end of the period covered by this report, the effectiveness of the company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), which are designed to ensure that information relating to the company that is required to be disclosed by us in the reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the Exchange Act and related regulations. Based on this review, our chief executive officer and our chief financial officer have concluded that our disclosure controls and procedures are effective and include adequate controls and procedures to ensure that information relating to the company that is required to be disclosed by us in the reports that we file or submit under the Exchange Act is communicated to the company's management, including our chief executive officer and our chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

On April 21, 2003, the Suwon District Court in Seoul, Korea granted a motion by the Korea Electronic Certification Authority (CrossCert) for a preliminary attachment on Phoenix s expected payments from another Phoenix customer, Samsung Electronics. The amount of the preliminary attachment is KRW 496,608,750, approximately USD\$412,000. On May 7, 2003, Phoenix and its subsidiary, Phoenix Technologies (Hungary) Software Licensing LLC (Phoenix s assignee of the license agreement between Phoenix and CrossCert) filed suit in Santa Clara County Superior Court in United States of America for breach of contract, interference with contract, interference with prospective economic advantage and unfair competition, against CrossCert. Phoenix also challenged the preliminary attachment in the Korea. CrossCert subsequently filed suit against Phoenix on June 14, 2003 in Korea. The basis of the alleged suit is breach of contract and/or fraud in connection with the parties license agreement. The complaint seeks \$825,000 plus interest under both the license agreement and Korean law.

In November 2003, the Seoul District Court dismissed CrossCert s suit against Phoenix for lack of jurisdiction. A hearing regarding the removal of the preliminary attachment was held on February 18, 2004, and a decision regarding removal of the preliminary attachment is expected on May 19, 2004. Phoenix expects to succeed in removing the preliminary attachment. CrossCert has filed a cross-complaint in the U.S. action. Phoenix also expects to succeed in the U.S. action.

Phoenix is subject to certain routine legal proceedings, as well as demands, claims and threatened litigation, that arise in the normal course of our business. We currently believe that the ultimate amount of liability, if any, for any pending claims of any type (either alone or combined) will not materially affect our financial position, results of operations or liquidity. However, the ultimate outcome of any litigation is uncertain, and either unfavorable or favorable outcomes could have a material negative impact. Regardless of outcome, litigation can have an adverse impact on the Company due to defense costs, diversion of management resources and other factors.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Company held an Annual Meeting of its Stockholders on March 8, 2004, at which the following occurred:

ELECTION OF CLASS 2 DIRECTORS TO THE BOARD OF DIRECTORS OF THE COMPANY: The stockholders elected David S. Dury, Taher Elgamal, and Anthony Sun as Class 2 Directors. The vote on the matter was as follows:

David S. Dury FOR	20,788,593
WITHHELD	920,460
Taher Elgamal FOR	20,825,911
WITHHELD	883,142
Anthony Sun FOR	20,830,221
WITHHELD	878,832

The following individuals continue their term as directors:

George C. Huang

Anthony P. Morris

Edmund P. Jensen

Albert E. Sisto

APPROVAL OF THE AMENDMENT TO THE COMPANY'S 2001 EMPLOYEE STOCK PURCHASE PLAN: The stockholders approved the amendment to the Company's 2001 Employee Stock Purchase Plan to increase the number of shares of Common Stock reserved for issuance thereunder by 250,000 shares. The vote on the matter was as follows:

FOR	14,516,576
AGAINST	256,848
ABSTAIN	6,069
NO VOTE	6,929,560

RATIFICATION OF THE SELECTION BY THE BOARD OF DIRECTORS OF ERNST & YOUNG LLP AS THE COMPANY'S INDEPENDENT AUDITORS: The stockholders ratified the selection by the Board of Directors of Ernst & Young LLP as the Company's independent auditors for the 2004 fiscal year. The vote on the matter was as follows:

FOR	21,647,267
AGAINST	32,321
ABSTAIN	29,465

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

(a) Exhibits

- 31.1 Certification of Principal Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Principal Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Principal Executive Officer Pursuant to 18 U.S.C. Section 1350.
- 32.2 Certification of Principal Financial Officer Pursuant to 18 U.S.C. Section 1350.

(b) Reports on Form 8-K

The Company furnished one report on Form 8-K during the quarter ended March 31, 2004. Information regarding the items reported on is as follows:

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

<u>Date Furnished</u>	<u>Item Reported On</u>
January 29, 2004	The Company issued a press release announcing financial results for the quarter ended December 31, 2003.
