Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Unaudited)****(1) Description of Business and Basis of Presentation**

Organization. Federal Trust Corporation (Federal Trust) is the sole shareholder of Federal Trust Bank (the Bank). Federal Trust operates as a unitary savings and loan holding company. Federal Trust's primary business activity is the operation of the Bank. The Bank is federally-chartered as a stock savings bank. The Bank's deposits are insured up to the applicable limits by the Federal Deposit Insurance Corporation. The Bank provides a wide range of banking services to individual and corporate customers through its six offices located in Orange, Seminole and Volusia counties, Florida. Federal Trust Mortgage Company (the Mortgage Company), a wholly-owned subsidiary of Federal Trust was established in May 2005 to provide residential loan products for customers of the Bank, to close mortgage loans on behalf of certain third party purchasers and to sell mortgage loans in the secondary market.

The condensed consolidated financial statements include the accounts of Federal Trust, the Bank and the Mortgage Company (collectively referred to herein as, the Company). All significant intercompany accounts and transactions have been eliminated in consolidation.

In the opinion of management, the accompanying condensed consolidated financial statements contain all adjustments (principally consisting of normal recurring accruals) necessary to present fairly the financial position as of June 30, 2005, the results of operations for the three- and six-month periods ended June 30, 2005 and 2004, and cash flows for the six-month periods ended June 30, 2005 and 2004. The results of operations for the three- and six-month periods ended June 30, 2005, are not necessarily indicative of the results to be expected for the entire year ended December 31, 2005. These statements should be read in conjunction with the consolidated financial statements included in Federal Trust's Annual Report on Form 10-KSB for the year ended December 31, 2004.

A provision for loan losses is charged to earnings based upon management's evaluation of the potential losses in its loan portfolio. During the three- and six-months ended June 30, 2005, management made provisions of \$120,000 and \$300,000, respectively, based on its evaluation of the loan portfolio, as compared to the provisions of \$150,000 and \$700,000, respectively, made in the comparable periods in 2004. The decrease in the provision in 2005 is primarily a result of the reduction in non-accrual loans in 2005. At June 30, 2005, management believes that the allowance is adequate, primarily as a result of the overall quality and the high percentage of residential single family home loans in the portfolio.

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Unaudited), Continued****(3) Regulatory Capital**

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and percentages (set forth in the table below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets and Tier I capital to average adjusted assets (as defined in the regulations). Management believes, as of June 30, 2005, that the Bank exceeds the minimum capital adequacy requirements to which it is subject.

In addition, as of June 30, 2005, the Bank met the requirements to be categorized as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain total risk-based capital, Tier I risk-based and Tier I leverage capital percentages as set forth in the table. There are no conditions or events since June 30, 2005, that management believes would change the institution's categorization as well capitalized. The following table summarizes the capital thresholds for each prompt corrective action capital category. A financial institution's capital category is based on whether it meets the threshold for all three capital ratios within the category. The Bank's actual capital amounts and percentages are also presented in the table (\$ in thousands).

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	%	Amount	%	Amount	%
At June 30, 2005:

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Unaudited), Continued****(4) Earnings Per Share of Common Stock**

The Company follows the provisions of Financial Accounting Standards No. 128, Earnings Per Share (SFAS No. 128). SFAS No. 128 provides accounting and reporting standards for calculating earnings per share. Basic earnings per share of common stock, has been computed by dividing the net earnings for the period by the weighted-average number of shares outstanding. Shares of common stock purchased by the Company's Employee Stock Ownership Plan (ESOP) are considered outstanding when the shares are allocated to participants. Diluted earnings per share is computed by dividing net earnings by the weighted-average number of shares outstanding including the dilutive effect of stock options computed using the treasury stock method. The following table presents the calculation of basic and diluted earnings per share of common stock (in thousands, except per share amounts):

(5) Stock Compensation Plans

The Company has three stock options plans. The Key Employee Stock Compensation Program (the Employee Plan) is authorized to issue up to 10% of the issued shares up to a maximum of 1,000,000 shares (after being amended at the 2004 Annual Meeting of Shareholders) through the exercise of incentive stock options, compensatory stock options, stock appreciation rights or performance shares. To date, all awards granted under the Employee Plan have been incentive stock options. These options have ten year terms and vest ratably over various terms up to five years. At June 30, 2005, the Company had 305,056 options available for future grants under the Employee Plan.

The 1998 Directors Stock Option Plan (the 1998 Director Plan) approved by the shareholders on May 22, 1998, is authorized to issue up to 140,000 shares. All options granted under the 1998 Director Plan have ten year terms, vest immediately and are not exercisable for a period of six months after the grant date. As of December 31, 2003, all of the allocated options in the 1998 Director Plan had been granted.

At the 2005 Annual Meeting held on May 27, 2005, the shareholders approved the 2005 Directors Stock Plan (2005 Directors Plan), which is authorized to issue up to 90,000 shares. Awards made under the 2005 Directors Plan may be in the form of restricted shares, stock units, or stock options. A stock unit is the right to receive a share of common stock on a date elected by the director. While any stock unit is outstanding the director holding the stock unit will be entitled to receive a dividend in the form of additional stock units, if cash dividends are declared on outstanding shares of common stock. Each stock unit, including fractional stock units, will be converted to one share of common stock on the date which has been selected by the director. Awards of shares or stock units may be awarded to a director as an annual stock retainer, which is dependent upon the amount of the director's annual cash retainer. The 2005 Directors Plan also provides for discretionary awards of restricted shares, stock units or stock options, which may be granted by the Board to recognize additional services provided to the Company. Any stock options granted may not be exercisable for less than fair market value per share on the date of grant, and must be exercised at least 6 months from the date of grant and before the earlier of 10 years after the date of the award, or one year from the date the director's service is terminated by reason of retirement or death. No awards have been made under the 2005 Directors Plan.

Statement of Financial Accounting Standards No. 123, *Accounting for Stock Based Compensation*, as amended by SFAS No. 148 *Accounting for Stock Based Compensation Transition and Disclosure*, (SFAS No. 123) requires pro forma fair value disclosures if the intrinsic value method is being utilized to calculate the fair value of options. For purposes of pro forma disclosures, the estimated fair value is included in expense in the period vesting occurs. The proforma information has been determined using the Black-Scholes Model as if the Company had accounted for its stock options under the fair value method of SFAS No. 123. The Company accounts for its stock option plans under the recognition and measurement principles of Accounting Principles Board Opinion No. 25. No stock-based employee compensation cost is reflected in net earnings, as all stock options granted under the plans had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates assumptions used in calculating the grant-date fair value and the effect on net earnings and basic and diluted earnings per share as if the Company had applied the fair value recognition provisions of SFAS No. 123 to stock-based employee compensation (\$ in thousands, except per share amounts):

Report of Independent Registered Public Accounting Firm

Federal Trust Corporation

Sanford, Florida:

We have reviewed the accompanying condensed consolidated balance sheet of Federal Trust Corporation and Subsidiaries (the Company) as of June 30, 2005, the related condensed consolidated statements of earnings for the three- and six-month periods ended June 30, 2005 and 2004 and the related condensed consolidated statements of stockholders' equity and cash flows for the six-month periods ended June 30, 2005 and 2004. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the accompanying interim financial statements for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board, (United States) the consolidated balance sheet as of December 31, 2004, and the related consolidated statements of earnings, stockholders' equity and cash flows for the year then ended (not presented herein); and in our report dated March 15, 2005 we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2004, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

**Item 2. Management's Discussion and Analysis of
Financial Condition and Results of Operations**

Comparison of June 30, 2005 and December 31, 2004

General

Federal Trust Corporation (Federal Trust) is the sole shareholder of Federal Trust Bank (the Bank). Federal Trust operates as a unitary savings and loan holding company. Federal Trust's business activities primarily include the operation of the Bank. The Bank is federally-chartered as a stock savings bank and the Bank's deposits are insured up to the applicable limits by the Federal Deposit Insurance Corporation. The Bank provides a wide range of banking services to individual and corporate customers through its six offices located in Orange, Seminole and Volusia counties, Florida. Federal Trust Mortgage Company (the Mortgage Company), a wholly-owned subsidiary of Federal Trust, was established in May 2005 to generate residential loans for the Bank, to close mortgage loans on behalf of certain third party purchasers and to sell mortgage loans in the secondary market. Federal Trust, the Bank and the Mortgage Company are collectively referred to herein as the Company.

Forward Looking Statements

Readers should note, in particular, that this document contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), that involve substantial risks and uncertainties. When used in this document, or in the documents incorporated by reference herein, the words anticipate, believe, estimate, may, intend and expect and similar expressions identify certain of such forward-looking statements. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein. Actual results may differ materially, depending upon a variety of important factors, including competition, inflation, general economic conditions, changes in interest rates and changes in the value of collateral securing loans we have made, among other things.

Capital Resources

During the six months ended June 30, 2005, the Company's primary source of funds consisted of net increases in deposits of \$24.2 million and Federal Home Loan Bank advances of \$31.0 million and net principal repayments and sales of loans of \$27.6 million and securities available for sale of \$9.0 million. The Company used its capital resources principally to purchase loans of \$69.8 million and securities available for sale of \$11.6 million.

Off-Balance Sheet Arrangements

The Company is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, unused lines of credit, standby letters of credit and loans in process. These instruments involve, to varying degrees, elements of credit and interest-rate risk in excess of the amounts recognized in the condensed consolidated balance sheet. The contract amounts of those instruments reflect the extent of the Company's involvement in particular classes of financial instruments.

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARIES****Item 2. Management's Discussion and Analysis****of Financial Condition and Results of Operations, Continued**

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit, unused lines of credit and loans in process is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments as it does for on-balance sheet instruments.

Commitments to extend credit are agreements to lend to a customer, as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total committed amounts do not necessarily represent future cash requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if it is deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the counter party.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers.

The following is a summary of the amounts of the Company's financial instruments, with off-balance sheet risk at June 30, 2005 (in thousands):

	Contract Amount
Commitments to extend credit	\$ 10,785
Unused lines of credit	\$ 7,576
Standby letters of credit	\$ 2,753
Loans in process	\$ 55,154

Management believes the Company has adequate resources to fund all its commitments. At June 30, 2005, the Company had approximately \$231 million in time deposits maturing in one year or less. Management also believes that, if so desired, it can adjust the rates on time deposits to retain or obtain new deposits in a changing interest rate environment.

Management believes the Bank was in compliance with all minimum capital requirements, which it was subject to at June 30, 2005. See note 3 to the condensed consolidated financial statements.

Management is not aware of any trends, demands, commitments or uncertainties which are expected to have a material impact on future operating results, liquidity or capital resources.

FEDERAL TRUST CORPORATION AND SUBSIDIARIES

Comparison of the Three-Month Periods Ended June 30, 2005 and 2004

General. The Company had net earnings for the three-month period ended June 30, 2005, of \$1,171,000 or \$.15 per basic share and \$.14 per diluted share, compared to \$838,000 or \$.13 per basic and diluted share for the same period in 2004. The increase in net earnings was primarily due to increases in net interest income and other income, partially offset by an increase in other expenses.

Interest Income. Interest income increased by \$2.4 million or 44% to \$8.0 million for the three-month period ended June 30, 2005, from \$5.6 million for the same period in 2004. Interest income on loans increased \$2.2 million to \$7.4 million in 2005, primarily as a result of an increase in the average amount of loans outstanding from \$419.3 million in 2004 to \$563.3 million in 2005, together with an increase in the average yield earned on loans from 4.99% for the three-month period ended June 30, 2004, to 5.25% for the comparable period in 2005. Interest income on securities increased by \$205,000 for the three-months ended June 30, 2005, over the same period in 2004 due to a \$10.5 million increase in the average balance and a 1.04% increase in the average yield of the portfolio. Management expects the rates earned on the portfolio to fluctuate with general market conditions.

Interest Expense. Interest expense increased by \$2.0 million or 78% during the three-month period ended June 30, 2005, compared to the same period in 2004. Interest on deposits increased \$1.1 million or 62% to \$2.8 million in 2005 from \$1.8 million in 2004. The increase in interest on deposits was a result of an increase in the average cost of deposits from 2.04% for the three-month period ended June 30, 2004, to 2.74% for the comparable period in 2005, coupled with an increase in average deposits outstanding from \$344.2 million in 2004 to \$414.5 million in 2005. Interest on other borrowings increased to \$1.6 million in 2005 from \$760,000 in 2004, primarily as a result of an increase in the average amount of other borrowings outstanding from \$121.3 million to \$190.4 million. Management expects to continue to use FHLB advances and other borrowings as a liability management tool.

Provision for Loan Losses. A provision for loan losses is charged to earnings based upon management's evaluation of the losses in its loan portfolio. During the quarter ended June 30, 2005, a \$120,000 provision for loan losses was recorded based on management's evaluation of the loan portfolio, which was a decrease of \$30,000 from the same period in 2004. The allowance for loan losses at June 30, 2005, was \$4.1 million or .66% of total loans outstanding, versus \$3.8 million at December 31, 2004, or .72 % of total loans outstanding. Management believes the allowance for loan losses at June 30, 2005 is adequate.

Other Income. Other income increased \$196,000 or 32% from \$607,000 for the three-month period ended June 30, 2004, to \$803,000 for the same period in 2005. The increase was primarily due to an increase of \$173,000 in gain on sales of loans held for sale.

Other Expense. Other expense increased \$141,000 or 6% to \$2.4 million for the three-month period ended June 30, 2005, from \$2.3 million for the same period in 2004. Salaries and employee benefits increased \$98,000 and occupancy expense increased \$20,000 due to the staffing and opening of the branch in Deltona, Florida in the second half of 2004, and the overall growth of the Company.

Income Taxes. Income taxes for the three months ended June 30, 2005, was \$641,000 (an effective rate of 35.4%), compared to \$419,000 (an effective rate of 33.3%) for the same period in 2004.

FEDERAL TRUST CORPORATION AND SUBSIDIARIES

Comparison of the Six-Month Periods Ended June 30, 2005 and 2004

General. The Company had net earnings for the six-month period ended June 30, 2005, of \$2.4 million or \$.30 per basic share and \$.29 per diluted share, compared to \$1.6 million or \$.25 per basic and diluted share for the same period in 2004. The increase in net earnings was primarily due to increases in net interest income and other income, partially offset by an increase in other expenses.

Interest Income. Interest income increased by \$4.1 million or 36% to \$15.5 million for the six-month period ended June 30, 2005, from \$11.4 million for the same period in 2004. Interest income on loans increased \$3.6 million or 34% to \$14.3 million in 2005 from \$10.7 million in 2004, primarily as a result of an increase in the average amount of loans outstanding from \$415.7 million in 2004 to \$546.7 million in 2005 and an increase in the average yield earned on loans from 5.14% for the six-month period ended June 30, 2004, to 5.23% for the comparable period in 2005. Interest income on securities increased by \$360,000 for the six-month period ended June 30, 2005, over the same period in 2004, primarily as a result of an increase in the average balance of securities owned and an increase in the average yield. Management expects the rates earned on the portfolio to fluctuate with general market conditions.

Interest Expense. Interest expense increased by \$3.2 million or 66% during the six-month period ended June 30, 2005, compared to the same period in 2004. Interest on deposits increased \$1.9 million or 54% to \$5.3 million in 2005 from \$3.4 million in 2004, as a result of an increase in the average cost of deposits from 2.04% for the six-month period ended June 30, 2004, to 2.58% for the comparable period in 2005 and an increase in average deposits outstanding from \$334.3 million in 2004 to \$408.9 million in 2005. Interest on other borrowings increased to \$2.9 million in 2005 from \$1.5 million in 2004, primarily as a result of the increase in the average balance of other borrowings from \$122.3 million for the six-month period ended June 30, 2004 to \$178.3 million for the comparable 2005 period and an increase in the average rate paid on other borrowings from 2.44% in 2004 to 3.22% in 2005. Management expects to continue to use FHLB advances and other borrowings as a liability management tool.

Provision for Loan Losses. A provision for loan losses is charged to earnings based upon management's evaluation of the losses in its loan portfolio. During the six months ended June 30, 2005, a \$300,000 provision for loan losses was recorded based on management's evaluation of the loan portfolio, which was a decrease of \$400,000 from the same period in 2004, primarily as a result of the decrease in nonaccrual loans. The allowance for loan losses at June 30, 2005, was \$4.1 million or .66% of total loans outstanding, versus \$3.8 million at December 31, 2004, or .72% of total loans outstanding. Management believes the allowance for loan losses at June 30, 2005, is adequate.

Other Income. Other income increased \$147,000 or 11% from the six-month period ended June 30, 2004, to the same period in 2005. The increase in other income was primarily due to an increase of \$91,000 in gain on sale of loans and an increase of \$84,000 in gain on sale of securities available for sale.

Other Expense. Other expense increased \$149,000 or 3% to \$4.8 million for the six-month period ended June 30, 2005, from \$4.6 million for the same period in 2004. Salary and employee benefits increased \$99,000 and occupancy expense increased \$47,000 due to the staffing and opening of the branch in Deltona, Florida in the second half of 2004 and the overall growth of the Company.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the risk of loss from adverse changes in market prices and rates. The Company's market risk arises primarily from interest-rate risk inherent in its lending, investment and deposit taking activities. The Company has little or no risk related to trading accounts, commodities or foreign exchange.

Management actively monitors and manages its interest-rate risk exposure. The primary objective in managing interest rate risk is to limit, within established guidelines, the adverse impact of changes in interest rates on the Company's net interest income and capital, while adjusting the Company's asset-liability structure to obtain the maximum yield-cost spread on that structure. Management relies primarily on its asset-liability structure to control interest rate risk. However, a sudden and substantial increase in interest rates could adversely impact the Company's earnings, to the extent that the interest rates borne by assets and liabilities do not change at the same speed, to the same extent, or on the same basis. There has been no significant change in the Company's market risk exposure since December 31, 2004.

Item 4. Controls and Procedures

- a. *Evaluation of Disclosure Controls and Procedures.* The Company maintains controls and procedures designed to ensure that information required to be disclosed in the reports that the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Based upon their evaluation of those controls and procedures performed within 90 days of the filing date of this report, the Chief Executive and Chief Financial officers of the Company concluded that the Company's disclosure controls and procedures were adequate.
- b. *Changes in Internal Controls.* The Company made no significant changes in its internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation of those controls by the Chief Executive and Chief Financial Officers.
