UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2011

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 001-14818

Federated Investors, Inc.

(Exact name of registrant as specified in its charter)

Pennsylvania (State or other jurisdiction of incorporation or organization)	25-1111467 (I.R.S. Employer Identification No.)
Federated Investors Tower Pittsburgh, Pennsylvania (Address of principal executive offices)	15222-3779 (Zip Code)
(Registrant's telephone number, including area code) 412-288-1900	

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer <input checked="" type="checkbox"/>	Accelerated filer <input type="checkbox"/>
Non-accelerated filer <input type="checkbox"/>	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No .

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the last practicable date: As of April 26, 2011, the Registrant had outstanding 9,000 shares of Class A Common Stock and 104,600,335 shares of Class B Common Stock.

Special Note Regarding Forward-Looking Information		

Certain statements in this report on Form 10-Q including those related to asset flows and business mix; obligations to make additional contingent payments pursuant to acquisition agreements; obligations to make additional payments pursuant to employment arrangements; legal proceedings; future cash needs and future principal uses of cash; management's expectations regarding borrowing and the need for new borrowing arrangements; performance indicators; impact of accounting policies and new accounting pronouncements; concentration risk; indemnification obligations; the impact of increased regulation; the prospect of increased distribution-related expenses; management's expectations regarding fee waivers and the impact of such waivers on revenues and net income; the ability to raise additional capital; the rising costs of risk management; possible impairment charges; tax liability and the realization of deferred tax assets; capital losses; the impact of the interest rate swap and the various items set forth under the section entitled Risk Factors constitute forward-looking statements, which involve known and unknown risks, uncertainties, and other factors that may cause the actual results, levels of activity, performance or achievements of Federated or industry results, to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. Among other risks and uncertainties, market conditions may change significantly resulting in changes to Federated's asset flows and business mix, which may cause a decline in revenues and net income, result in impairments and increase the amount of fee waivers incurred by Federated. The obligation to make contingent payments is based on certain growth and fund performance targets and will be affected by the achievement of such targets, and the obligation to make additional payments pursuant to employment agreements is based on satisfaction of certain conditions set forth in those agreements. Future cash needs and future uses of cash will be impacted by a variety of factors, including the number and size of any acquisitions, Federated's success in distributing its products, the resolution of pending litigation, potential increases in costs relating to risk management, as well as potential changes in assets under management and/or changes in the terms of distribution and shareholder services contracts with intermediaries who offer Federated's products to customers. Federated's risks and uncertainties also include liquidity and credit risks in Federated's money market funds and revenue risk, which will be affected by yield levels in money market fund products, changes in market values of assets under management and the ability of Federated to collect fees in connection with the management of such products. Many of these factors may be more likely to occur as a result of the ongoing threat of terrorism and the increased scrutiny of the mutual fund industry by federal and state regulators, and the recent and ongoing disruption in global financial markets. As a result, no assurance can be given as to future results, levels of activity, performance or achievements, and neither Federated nor any other person assumes responsibility for the accuracy and completeness of such statements in the future. For more information on these items, see the section entitled Risk Factors herein under Item 2 of Part I, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Table of Contents

Notes to the Consolidated Financial Statements

(Unaudited)

(1) Basis of Presentation

The interim consolidated financial statements of Federated Investors, Inc. and its subsidiaries (collectively, Federated) included herein have been prepared in accordance with U.S. generally accepted accounting principles (GAAP). In the opinion of management, the financial statements reflect all adjustments that are of a normal recurring nature and necessary for a fair presentation of the results for the interim periods presented.

In preparing the financial statements, management is required to make estimates and assumptions that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Actual results may differ from such estimates, and such differences may be material to the Consolidated Financial Statements.

These financial statements should be read in conjunction with Federated's Annual Report on Form 10-K for the year ended December 31, 2010. Certain items previously reported have been reclassified to conform to the current period's presentation.

(2) Significant Accounting Policies

For a listing of Federated's significant accounting policies, please refer to Federated's Annual Report on Form 10-K for the year ended December 31, 2010.

(3) Business Combinations and Acquisitions

On September 20, 2010, Federated acquired the money market management business of SunTrust Banks, Inc. (SunTrust Acquisition). Pursuant to the definitive agreement signed on July 16, 2010, \$14.1 billion of money market assets transitioned to Federated during the third and fourth quarters of 2010. Money market mutual fund assets in nine money market mutual funds managed by SunTrust's RidgeWorth Capital Management were transitioned into eight existing Federated money market mutual funds with similar investment objectives in connection with a series of closings during the third and fourth quarters of 2010, the first, and most significant of which, occurred on September 20, 2010.

The SunTrust Acquisition included upfront cash payments that totaled \$6.6 million. The transaction also includes contingent purchase price payments payable over five years. The contingent purchase price payments are calculated as a percentage of revenue less operating expenses directly attributed to certain eligible assets. At March 31, 2011, management estimated contingent payments could total \$26 million over five years, however, the actual amount of the contingent payments will vary based on asset levels and related net revenues and is not limited by any maximum amount. A wide range of outcomes for actual payments is possible due to the extent of reasonably possible flow-rate volatility for the assets under management. The SunTrust Acquisition was accounted for under the acquisition method of accounting. The valuation, which was finalized in the first quarter 2011, resulted in total consideration with a fair value of \$24.1 million assignable to a single identifiable intangible asset with an indefinite life and recorded in Renewable investment advisory rights. This asset is deductible for tax purposes. The valuation results are reflected in the Consolidated Balance Sheet and the related footnotes as of and for the period ended March 31, 2011 and include an adjustment to reflect the final estimate of fair value. As of March 31, 2011, a liability of \$18.4 million representing the fair value of future consideration payments was recorded in Other current liabilities (\$5.3 million) and Other long-term liabilities (\$13.1 million) (see Note (6)(a) for a discussion regarding the valuation methodology). This liability is remeasured at each reporting date with changes in the fair value recognized in Intangible asset related expense on the Consolidated Statements of Income.

Table of Contents**Notes to the Consolidated Financial Statements (continued)**

(Unaudited)

The results of operations for the SunTrust Acquisition were included in Federated's Consolidated Financial Statements beginning in September 2010 based on the date of the acquisition. The following table summarizes unaudited pro forma financial information assuming the SunTrust Acquisition occurred at the beginning of the period presented. This pro forma financial information is for informational purposes only and is not indicative of future results. In addition, the following pro forma financial information has not been adjusted to reflect lower current levels of assets under management:

<i>(in millions, except per share data)</i>	(pro forma) Three Months Ended March 31, 2010
Revenue	\$ 244.4
Net income attributable to Federated Investors, Inc.	\$ 45.1
Earnings per share Basic and Diluted attributable to Federated Investors, Inc.	\$ 0.41

The pro forma results include adjustments for the effect of acquisition-related expenses including accretion of interest on the contingent consideration liability and income tax expense.

(4) Concentration Risk

Revenue concentration by asset class Approximately 49% of Federated's total revenue for the three months ended March 31, 2011 was attributable to money market assets. A significant change in Federated's money market business or a significant reduction in money market assets due to regulatory changes, changes in the financial markets including significant increases in interest rates over a short period of time, significant deterioration in investor confidence, further persistent declines in or additional prolonged periods of historically low short-term interest rates and resulting fee waivers or other circumstances, could have a material adverse effect on Federated's results of operations.

In certain money market funds, the gross yield is not sufficient to cover all of the fund's normal operating expenses due to historically low short-term interest rates. Since the fourth quarter 2008, Federated has voluntarily waived fees in order for certain funds to maintain positive or zero net yields.

During the first quarter 2011, fee waivers to maintain positive or zero net yields totaled \$63.4 million and were partially offset by a related reduction in distribution expenses of \$49.5 million and net income attributable to noncontrolling interests of \$0.8 million such that the net impact to Federated was \$13.1 million in reduced pre-tax income. The impact of these fee waivers for the three months ended March 31, 2011 was less than the impact for the three months ended March 31, 2010 with \$69.5 million in waived fees, \$51.2 million in reduced distribution expenses, \$0.5 million reduction in net income attributable to noncontrolling interests and a net impact of \$17.8 million in reduced pre-tax income. Beginning on April 1, 2011, primarily as a result of certain changes in bank assessments impacting products insured by the Federal Deposit Insurance Corporation, overnight interest rates for repurchase agreements declined. This reduction in short-term interest rates caused an increase in fee waivers to maintain positive or zero net yields in April. Management expects the elevated fee waivers and the related reduction in distribution expense and net income attributable to noncontrolling interests will continue at least through the end of the quarter ended June 30, 2011. Assuming current market conditions and asset levels remain constant, fee waivers for the second quarter 2011 may result in a net impact on pre-tax income of approximately \$17.5 million. Increases in short-term interest rates that result in higher yields on securities purchased in money market fund portfolios would reduce the pre-tax income impact of these waivers. The actual amount of future fee waivers could vary significantly from management's estimates as they are contingent on a number of variables including, but not limited to, available yields on instruments held by the money market funds, changes in assets within money market funds, actions by the Federal Reserve, the U.S. Department of the Treasury and other governmental entities, changes in expenses of the money market funds, changes in the mix of money market customer assets and Federated's willingness to continue the fee waivers.

Edgar Filing: FEDERATED INVESTORS INC /PA/ - Form 10-Q

Revenue concentration by product Approximately 12% and 11% of Federated's total revenue for the three months ended March 31, 2011 was derived from services provided to two sponsored funds, the Federated Kaufmann Fund and the Federated Prime Obligations Fund, respectively. A significant and prolonged decline in the assets under management in these funds could have a material adverse effect on Federated's future revenues and, to a lesser extent, net income, due to related reductions to distribution expenses associated with these funds.

Table of Contents

Notes to the Consolidated Financial Statements (continued)

(Unaudited)

Revenue concentration by customer Approximately 11% of Federated's total revenue for the three months ended March 31, 2011 was derived from services provided to one intermediary customer, the Bank of New York Mellon Corporation (including its Pershing subsidiary). Significant changes in Federated's relationship with this customer could have a material adverse effect on Federated's future revenues and, to a lesser extent, net income, due to related material reductions to distribution expenses associated with this intermediary.

A listing of Federated's risk factors is included herein under the section entitled Risk Factors under Item 2 of Part I, Management's Discussion and Analysis of Financial Condition and Results of Operations.

(5) Variable Interest Entities

Federated is involved with various entities in the normal course of business that may be deemed to be voting rights entities or variable interest entities (VIEs). In accordance with Federated's consolidation accounting policy, Federated first determines whether the entity being evaluated is a voting rights entity or a VIE. Once this determination is made, Federated proceeds with its evaluation of whether or not to consolidate the entity. The disclosures below represent the results of such consolidation evaluation of VIEs pertaining to March 31, 2011 and December 31, 2010.

(a) Consolidated Variable Interest Entities

Most of Federated's sponsored mutual funds meet the definition of a VIE primarily due to the fact that given Federated's typical series fund structure, the shareholders of each participating portfolio underlying the series fund generally lack the ability as an individual group to make decisions through voting rights regarding the board of directors/trustees of the fund. From time to time, Federated invests in certain of these products for general corporate investment purposes or, in the case of newly launched products, in order to provide investable cash thereby allowing the product to establish a performance history. Federated's investment in these products represents its maximum exposure to loss. As of March 31, 2011 and December 31, 2010, Federated was the sole or majority investor in certain of these products and was deemed to be the primary beneficiary since Federated's majority interest would absorb the majority of the variability of the net assets of the VIE. At March 31, 2011, the aggregate assets and liabilities of such entities that Federated consolidated were \$25.9 million and \$0.4 million, respectively, and Federated recorded \$4.2 million to Redeemable noncontrolling interest in subsidiaries on Federated's Consolidated Balance Sheets. At December 31, 2010, the aggregate assets and liabilities of such entities that Federated consolidated were \$27.1 million and \$0.2 million, respectively, and Federated recorded \$1.5 million to Redeemable noncontrolling interest in subsidiaries on Federated's Consolidated Balance Sheets. The assets of the products are primarily classified as Investments on Federated's Consolidated Balance Sheets and are restricted for use by the products only. The liabilities of the products are primarily classified as Accounts payable and accrued expenses on Federated's Consolidated Balance Sheets and primarily represent operating liabilities of the entities.

Federated's conclusion to consolidate a sponsored fund may vary from period to period based on changes in Federated's percentage interest in the product resulting from changes in the number of fund shares held by either Federated or third parties. Given that the products follow investment company accounting, which prescribes fair-value accounting, a deconsolidation generally does not result in gains or losses for Federated. During the three months ended March 31, 2011, Federated deconsolidated a sponsored mutual fund based on a determination that it no longer was the primary beneficiary of the fund as a result of new subscriptions in fund shares by unrelated third parties. Accordingly, Federated deconsolidated \$8.4 million in Investments and \$3.3 million in Redeemable noncontrolling interest in subsidiaries on the Consolidated Balance Sheet as of the date of deconsolidation. During 2010, Federated deconsolidated a sponsored mutual fund based on a determination that it no longer was the primary beneficiary of the fund as a result of new subscriptions in fund shares by unrelated third parties. Accordingly, Federated deconsolidated \$22.0 million in Investments and \$21.3 million in Redeemable noncontrolling interest in subsidiaries on the Consolidated Balance Sheet as of the date of deconsolidation. There was no impact to the Consolidated Statements of Income for the three months ended March 31, 2011 or 2010, respectively, from entities that were deconsolidated.

Neither creditors nor equity investors in the products have any recourse to Federated's general credit. In the ordinary course of business, from time to time, Federated may choose to waive certain fees or assume operating expenses of these products for competitive, regulatory or contractual reasons (see Note (1)(p) of Federated's Annual Report on Form 10-K for the year ended December 31, 2010). Federated has not

provided financial support to any of these products outside the ordinary course of business.

Table of Contents**Notes to the Consolidated Financial Statements (continued)**

(Unaudited)

(b) Non-Consolidated Variable Interest Entities

At March 31, 2011 and December 31, 2010, Federated was involved with certain VIEs in which it held a significant variable interest or was the sponsor that held a variable interest, but for which it was not the primary beneficiary. The assets and liabilities of these unconsolidated VIEs and Federated's maximum risk of loss related thereto were as follows:

	As of March 31, 2011			As of December 31, 2010		Total remaining carrying value of investment and maximum risk of loss
	Unconsolidated VIE assets	Unconsolidated VIE Liabilities	Total remaining carrying value of investment and maximum risk of loss	Unconsolidated VIE assets	Unconsolidated VIE Liabilities	
<i>in millions</i>						
Sponsored investment funds ¹	\$ 271,073.7	\$	\$ 283.2	\$ 275,365.1	\$	\$ 297.0
Collateralized debt obligations ²	\$ 9.7	\$ 12.0	\$ 0	\$ 12.8	\$ 121.6	\$ 0
Equity investment	\$ 6.3	\$ 1.7	\$ 7.4	\$ 6.4	\$ 2.4	\$ 7.4

¹ The unconsolidated VIE assets for the sponsored investment products represent total net assets under management for the related products. Of Federated's \$283.2 million invested in these products at March 31, 2011, \$170.6 million represents investments in money market products included in Cash and cash equivalents, with the remaining \$112.6 million included in Investments on the Consolidated Balance Sheets. Of Federated's \$297.0 million invested in these products at December 31, 2010, \$191.2 million represents investments in money market products included in Cash and cash equivalents, with the remaining \$105.8 million included in Investments on the Consolidated Balance Sheets.

² The risk of loss does not include the potential loss associated with related deferred tax assets expiring unutilized.

Sponsored Investment Funds Federated acts as the investment manager for certain investment funds that are deemed to be VIEs, as disclosed above. In addition to Federated's involvement as the investment manager, Federated may also hold investments in these products. Federated is not the primary beneficiary of these VIEs since Federated's involvement is limited to that of service provider or represents a minority interest in the fund's assets under management, or both. As a result, Federated's variable interest is not deemed to absorb the majority of the variability of the entity's net assets and therefore Federated has not consolidated these entities.

In the ordinary course of business, from time to time, Federated may choose to waive certain fees or assume operating expenses of these products for competitive, regulatory or contractual reasons (see Note (1)(p) of Federated's Annual Report on Form 10-K for the year ended December 31, 2010). Federated has not provided financial support to any of these products outside the ordinary course of business.

Collateralized Debt Obligations (CDOs) At December 31, 2010, Federated acted as the investment manager for two CDOs with assets under management of \$12.8 million. Because one of these CDOs unwound in the first quarter 2011, Federated acted as the investment manager for only one CDO with assets under management of \$9.7 million as of March 31, 2011. The CDOs met the definition of a VIE due primarily to the lack of unilateral decision making authority of the equity holders. These CDOs were not consolidated at March 31, 2011 or December 31, 2010. CDOs are alternative investment vehicles created for the sole purpose of issuing collateralized debt instruments that offer investors the opportunity for returns that vary with the risk level of their investment. The notes issued by the remaining CDO are partially collateralized by high yield bonds and had an original expected maturity of twelve years. Federated's variable interests in the remaining CDO is limited to a 25% equity interest and a fixed, asset-based management fee earned prospectively as services are provided. As an equity holder, Federated participates in all rights and obligations to income and expected losses of the CDO on a proportionate basis with all other equity holders. In its role as investment manager, Federated is not entitled to any additional residual return nor is it obligated to absorb any expected losses of the entity. Federated has not provided financial support to the CDO.

Edgar Filing: FEDERATED INVESTORS INC /PA/ - Form 10-Q

Federated was not the primary beneficiary of either of these VIEs at March 31, 2011 or at December 31, 2010. Upon consideration of the qualitative model prescribed by the Financial Accounting Standards Board (FASB), Federated determined that as of December 31, 2010 and March 31, 2011, neither its equity interest nor its management fee potential could result in Federated receiving benefits or absorbing losses that could potentially be significant to either of these entities. Therefore Federated has not consolidated these entities. Due to its impairment in a prior year, Federated did not recognize an investment gain or loss as a result of the unwinding of the CDO in the first quarter 2011.

Table of Contents

Notes to the Consolidated Financial Statements (continued)

(Unaudited)

Equity Investment Federated holds a 12% non-voting, noncontrolling interest in both Dix Hills Partners, LLC, a registered investment adviser and commodity trading adviser, and its affiliate, Dix Hills Associates, LLC (collectively, Dix Hills). Dix Hills is based in Jericho, New York and manages \$1 billion in both absolute return and enhanced fixed-income mandates, including a hedge fund strategy and an enhanced cash strategy. Due primarily to the nature of the voting rights of the equity holders, Dix Hills meets the definition of a VIE, however, with its non-voting 12% interest, Federated is not deemed to have power to direct the activities of Dix Hills and therefore is not the primary beneficiary. Federated has not provided financial support to Dix Hills. Federated's investment in Dix Hills is included in Other long-term assets on the Consolidated Balance Sheets.

(6) Fair Value Measurements

The FASB defines fair value as the price that would be received to sell an asset or the price paid to transfer a liability on the measurement date. As defined, fair value focuses on the exit price in the principal or most advantageous market for the asset or liability in an orderly transaction between willing market participants. The FASB established a fair value reporting hierarchy to maximize the use of observable inputs and defines the three levels of inputs as follows:

Level 1 Quoted prices for identical instruments in active markets. Level 1 assets and liabilities may include debt securities and equity securities that are traded in an active exchange market.

Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets. Level 2 inputs may include observable market data such as closing market prices provided by independent pricing services after considering factors such as the yields or prices of investments of comparable quality, coupon, maturity, call rights and other potential prepayments, terms and type, reported transactions, indications as to values from dealers and general market conditions. In addition, pricing services may determine the fair value of equity securities traded principally in foreign markets when it has been determined that there has been a significant trend in the U.S. equity markets or in index futures trading. Level 2 assets and liabilities may include debt and equity securities, purchased loans and over-the-counter derivative contracts whose fair value is determined using a pricing model without significant unobservable market data inputs.

Level 3 Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable in active exchange markets.

Table of Contents**Notes to the Consolidated Financial Statements (continued)**

(Unaudited)

(a) Fair Value Measurements on a Recurring Basis

The following table presents fair value measurements for classes of Federated's financial assets and liabilities measured at fair value on a recurring basis:

(in thousands)	March 31, 2011				December 31, 2010			
	Fair Value Measurements Using				Fair Value Measurements Using			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Financial Assets								
Cash and cash equivalents	\$ 176,825	\$ 0	\$ 0	\$ 176,825	\$ 198,756	\$ 0	\$ 0	\$ 198,756
Available-for-sale equity securities ¹	112,648	0	0	112,648	105,724	0	0	105,724
Trading securities - equity	12,332	14	0	12,346	6,937	4,431	0	11,368
Trading securities - debt	9,199	6,437	0	15,636	10,016	7,777	0	17,793
Foreign currency forward contract ²	0	96	0	96	0	68	0	68
Total financial assets	\$ 311,004	\$ 6,547	\$ 0	\$ 317,551	\$ 321,433	\$ 12,276	\$ 0	\$ 333,709
Financial Liabilities								
Interest rate swap ³	\$ 0	\$ 9,164	\$ 0	\$ 9,164	\$ 0	\$ 11,734	\$ 0	\$ 11,734
SunTrust Acquisition future consideration payments liability	0	0	18,358	18,358	0	0	20,058	20,058
Foreign currency forward contract ⁴	0	3	0	3	0	0	0	0
Total financial liabilities	\$ 0	\$ 9,167	\$ 18,358	\$ 27,525	\$ 0	\$ 11,734	\$ 20,058	\$ 31,792

¹ Amount included in Investments on the Consolidated Balance Sheets.

² Amount included in Receivables - other on the Consolidated Balance Sheets. Pricing is determined by interpolating a value by utilizing the spot foreign exchange rate and forward points (based on the spot rate and currency interest rate differentials), which are all observable inputs.

³ Amount included in Other current liabilities on the Consolidated Balance Sheets. Pricing is determined based on a third-party, model-derived valuation in which all significant inputs are observable in active markets including the Eurodollar future rate and yields for three- and thirty-year Treasury securities. See Note (9) for more information regarding the swap.

⁴ Amount included in Accounts payable and accrued expenses on the Consolidated Balance Sheets. Pricing is determined by interpolating a value by utilizing the spot foreign exchange rate and forward points (based on the spot rate and currency interest rate differentials), which are all observable inputs.

The liability for future consideration payments related to the SunTrust Acquisition is recorded at fair value in Other current liabilities (\$5.3 million) and Other long-term liabilities (\$13.1 million) on the Consolidated Balance Sheet as of March 31, 2011. Management estimated the fair value of future consideration payments related to the SunTrust Acquisition based primarily upon expected future cash flows using an income approach valuation methodology with unobservable market data inputs (Level 3). Such inputs included (1) an estimated rate of change for underlying assets under management based on estimated net redemptions or sales; (2) expected net revenue per managed asset based generally on contract terms; and (3) a discount rate estimated at the current market rate of return.

Table of Contents**Notes to the Consolidated Financial Statements (continued)**

(Unaudited)

The following table presents a reconciliation of the beginning and ending fair value measurements of Federated's liability for future consideration payments related to the SunTrust Acquisition (a Level 3 financial liability measured at fair value on a recurring basis):

<i>(in thousands)</i>	
Balance at December 31, 2010	\$ 20,058
Adjustment to reflect final valuation ¹	(2,600)
Changes in fair value ²	900
Contingent consideration payments	0
Balance at March 31, 2011	\$ 18,358

¹ As a result of finalizing the valuation relating to the SunTrust Acquisition this adjustment was required to revise the preliminary estimate of fair value.

² Amounts included in Intangible asset related expense on the Consolidated Statements of Income.

Federated transferred \$4.4 million of investments from Level 2 to Level 1 between December 31, 2010 and March 31, 2011. The transfers primarily reflected the use of pricing services at December 31, 2010 to determine the fair value of equity securities traded principally in foreign markets based upon a determination by management that there had been a significant trend in the U.S. equity markets or in index futures trading after the foreign markets closed as compared to using quoted market prices to determine fair values of these equity securities at March 31, 2011. Transfers into and out of Levels 1 and 2 of the fair value hierarchy are reported at fair values as of the beginning of the period in which the transfers occur.

Federated did not hold any nonfinancial assets or liabilities measured at fair value on a recurring basis at March 31, 2011 or December 31, 2010.

(b) Fair Value Measurements on a Nonrecurring Basis

Federated did not hold any assets or liabilities measured at fair value on a nonrecurring basis at March 31, 2011.

(c) Fair Value Measurements of Other Financial Instruments

The fair value of Federated's recourse debt is estimated based on the current market rate for debt with similar remaining maturities. Based on this fair value estimate, the carrying value of recourse debt appearing on the Consolidated Balance Sheets approximates fair value.

(7) Investments

Investments on the Consolidated Balance Sheets as of March 31, 2011 and December 31, 2010 included available-for-sale and trading securities. At March 31, 2011 and December 31, 2010, Federated held investments totaling \$112.6 million and \$105.7 million, respectively, in fluctuating-value mutual funds that were classified as available-for-sale securities. Federated's trading securities totaled \$28.0 million and \$29.2 million at March 31, 2011 and December 31, 2010, respectively. Federated consolidates certain sponsored funds into its Consolidated Financial Statements as a result of Federated's controlling financial interest in the products (see Note (5)). As a result, all investments held by these sponsored funds were included in Federated's Consolidated Balance Sheets as of March 31, 2011 and December 31, 2010 as trading securities. Federated's trading securities primarily represented stocks of large-cap U.S. and international companies and domestic and foreign debt securities.

Table of Contents**Notes to the Consolidated Financial Statements (continued)**

(Unaudited)

Available-for-sale securities were as follows:

(in thousands)	At March 31, 2011				Cost	At December 31, 2010		
	Cost	Gains	(Losses)	Estimated Market Value		Gross Unrealized	(Losses)	Estimated Market Value
Equity mutual funds	\$ 43,074	\$ 4,971	\$ 0	\$ 48,045	\$ 41,879	\$ 5,200	\$ (24)	\$ 47,055
Fixed-income mutual funds	63,957	750	(104)	64,603	58,143	662	(136)	58,669
Total fluctuating-value mutual funds	\$ 107,031	\$ 5,721	\$ (104)	\$ 112,648	\$ 100,022	\$ 5,862	\$ (160)	\$ 105,724

The following table presents gains and losses recognized in Gain (loss) on securities, net on the Consolidated Statements of Income in connection with investments and economic derivatives held by certain consolidated sponsored products:

(in thousands)	Three Months Ended	
	March 31, 2011	2010
Unrealized gain on trading securities	\$ 327	\$ 9
Realized gains ^{1, 2}	2,715	253
Realized losses ^{2, 3}	(266)	(520)
Gain (loss) on securities, net	\$ 2,776	\$ (258)

¹ Realized gains of \$2,086 and \$4 related to the disposal of available-for-sale securities for the three months ended March 31, 2011 and 2010, respectively. Realized gains of \$397 and \$249 related to the disposal of trading securities for the three months ended March 31, 2011 and 2010, respectively. Realized gains of \$232 related to the settlement of economic derivatives held by certain consolidated sponsored products for the three months ended March 31, 2011.

² Realized gains and losses are computed on a specific-identification basis.

³ Realized losses of \$196 and \$195 related to the disposal of trading securities for the three months ended March 31, 2011 and 2010, respectively. Realized losses of \$70 and \$325 related to the settlement of economic derivatives held by certain consolidated sponsored products for the three months ended March 31, 2011 and 2010, respectively.

(8) Other Current Liabilities

Federated's Other current liabilities at March 31, 2011 included an accrual of \$9.2 million related to the interest rate swap (see Note (9) for additional information) and \$5.3 million for the short-term portion of the SunTrust Acquisition future consideration payments liability (see Note (3) for additional information). Also included in Other current liabilities at March 31, 2011 was \$10.0 million related to insurance proceeds for claims submitted to cover costs associated with certain legal proceedings (see Note (13)(c) for additional information). The retention of these advance insurance payments is contingent upon final approval of the claim by the insurance carrier. In the event that all or a portion of the claim is denied, Federated will be required to repay all or a portion of these advance payments. Because the outcome of this claim is uncertain at this time, Federated recorded the advance payments as a liability and will continue to evaluate the contingency until it is resolved.

Edgar Filing: FEDERATED INVESTORS INC /PA/ - Form 10-Q

Federated's Other current liabilities at December 31, 2010 included an accrual of \$11.7 million related to the interest rate swap and \$5.3 million for the short-term portion of the SunTrust Acquisition future consideration payments liability.

Table of Contents**Notes to the Consolidated Financial Statements (continued)**

(Unaudited)

(9) Recourse Debt and Interest Rate Swap

Recourse debt consisted of the following:

<i>(dollars in thousands)</i>	Weighted-Average Interest Rates		Maturity Date	March	December 31,
	2011 ¹	2010 ¹		31, 2011	2010
Term Loan	4.396%	4.396%	April 1, 2015	\$ 393,125	\$ 403,750
Less: Short-term debt recourse				42,500	42,500
Long-term debt recourse				\$ 350,625	\$ 361,250

¹ *As of March 31, 2011 and December 31, 2010, respectively; See additional information below regarding the interest rate fixed at 4.396% in connection with the interest rate swap.*

In the second quarter 2010, Federated entered into a five-year \$425 million amended and restated term loan credit agreement by and among Federated, certain of its subsidiaries and a syndicate of 22 banks led by PNC Capital Markets LLC as sole bookrunner and joint lead arranger and Citigroup Global Markets, Inc. as joint lead arranger (Term Loan). The Term Loan requires principal payments of \$10.6 million per quarter for the first four years and \$63.8 million per quarter for the fifth year with the final payment due on April 1, 2015.

The borrowings under the Term Loan bear interest at a spread over the London Interbank Offering Rate (LIBOR). During the first quarter 2010, Federated entered into an interest rate swap transaction (the Swap) which became effective in the second quarter 2010, to hedge its interest rate risk associated with the Term Loan. The Swap requires monthly cash settlements of interest paid or received. The fair value of the Swap agreement at March 31, 2011 was a liability of \$9.2 million which was recorded in Other current liabilities on the Consolidated Balance Sheet. The entire amount of this loss in fair value was recorded in Accumulated other comprehensive loss, net of tax on the Consolidated Balance Sheet at March 31, 2011. During the next twelve months management expects to charge \$7.5 million of this loss to Debt expense recourse on the Consolidated Statements of Income as a component of Federated's fixed interest rate of 4.396%. This amount could differ from amounts actually recognized due to changes in interest rates subsequent to March 31, 2011 and will not affect the amount of interest expense recognized in total on the Term Loan for any period presented. During the three-month period ended March 31, 2011, \$2.1 million was charged to Debt expense recourse on the Consolidated Statement of Income as a component of Federated's fixed interest rate of 4.396% and was included in Net cash provided by operating activities on the Consolidated Statement of Cash Flows for the three months ended March 31, 2011.

In addition, as of March 31, 2011 and December 31, 2010, all of Federated's \$200 million Revolving Credit Facility was available for borrowings. The Revolving Credit Facility expires on October 31, 2011. Federated is currently considering new borrowing arrangements to replace the expiring Revolving Credit Facility.

(10) Share-Based Compensation Plans

(a) Restricted Stock

During the first three months of 2011, Federated awarded 456,876 shares of restricted Federated Class B common stock in connection with a bonus program in which certain key employees received a portion of their bonus in the form of restricted stock under Federated's Stock Incentive Plan. This restricted stock, which was granted on the bonus payment date and issued out of treasury, will generally vest over a three-year period.

Edgar Filing: FEDERATED INVESTORS INC /PA/ - Form 10-Q

Federated awarded 897,379 shares of restricted Federated Class B common stock under its Stock Incentive Plan to employees during 2010.

(b) Stock Options

During the first three months of 2011, 574,668 employee stock options were exercised and the resulting shares were issued out of treasury. Options exercised during 2010 totaled 486,150.

Table of Contents**Notes to the Consolidated Financial Statements (continued)**

(Unaudited)

(11) Equity

During 2008, the board of directors authorized a share repurchase program with no stated expiration date that allows Federated to buy back as many as 5 million shares of Class B common stock. The program authorizes executive management to determine the timing and the amount of shares for each purchase. The repurchased stock will be held in treasury for employee share-based compensation plans, potential acquisitions and other corporate activities.

During the first three months of 2011, Federated repurchased 0.1 million shares of common stock for \$2.9 million, which were repurchased in the open market. At March 31, 2011, 3.5 million shares remain available to be purchased under the current buyback program.

(12) Earnings Per Share Attributable to Federated Investors, Inc. Shareholders

The following table sets forth the computation of basic and diluted earnings per share using the two-class method for amounts attributable to Federated Investors, Inc.:

<i>(in thousands, except per share data)</i>	Three Months Ended	
	March 31,	
	2011	2010
Numerator Basic and Diluted		
Net income attributable to Federated Investors, Inc.	\$ 33,231	\$ 42,007
Less: Total income available to participating unvested restricted shareholders ¹	(1,122)	(4,300)
Total net income attributable to Federated Common Stock ²	\$ 32,109	\$ 37,707
Denominator		
Basic weighted-average common shares outstanding	100,586	99,862
Dilutive potential shares from stock options	81	160
Diluted weighted-average common shares outstanding	100,667	100,022
Earnings per Share		
Net income attributable to Federated Common Stock Basic and Diluted	\$ 0.32	\$ 0.38

¹ Income available to participating restricted shareholders includes dividends paid to unvested restricted shareholders, net of forfeited dividends, and their proportionate share of undistributed earnings, if any.

² Federated Common Stock excludes unvested restricted stock which are deemed participating securities in accordance with the two-class method of computing earnings per share.

For the quarters ended March 31, 2011 and 2010, 1.9 million stock option awards were outstanding but not included in the computation of diluted earnings per share for each period because the exercise price was greater than the average market price of Federated Class B common stock for each respective period. In the event the awards become dilutive, these shares would be included in the calculation of diluted earnings

per share and would result in additional dilution.

(13) Commitments and Contingencies

(a) Contractual

As part of the SunTrust Acquisition, Federated is required to make contingent purchase price payments over the five-year period following the acquisition date. The contingent purchase price payments are calculated as a percentage of revenue less operating expenses directly attributed to certain eligible assets. At March 31, 2011, management estimated contingent payments could total \$26 million over five years, however, the actual amount of the contingent payments will vary based on asset levels and related net revenues and is not limited by any maximum amount. A wide range of outcomes for actual payments is possible due to the extent of reasonably possible flow-rate volatility for the assets under management. As of March 31, 2011, a liability of \$18.4 million representing the fair value of future consideration payments was recorded in Other current liabilities (\$5.3 million) and Other long-term liabilities (\$13.1 million) (see Note (6)(a) for a discussion regarding the valuation methodology). This liability is remeasured at each reporting date with changes in the fair value recognized in Intangible asset related expense in the Consolidated Statements of Income.

Table of Contents**Notes to the Consolidated Financial Statements (continued)**

(Unaudited)

In the fourth quarter 2008, Federated acquired certain assets of David W. Tice & Associates LLC that relate to the management of the Prudent Bear Fund and the Prudent Global Income Fund (Prudent Bear Acquisition). As part of the Prudent Bear Acquisition, Federated is required to make contingent purchase price payments based upon certain revenue growth targets over the four-year period following the acquisition date. The contingent purchase price payments are recorded as additional goodwill at the time the contingency is resolved. The first two contingent purchase price payments of \$5.1 million and \$44.7 million were paid in the first quarters of 2010 and 2011, respectively. The remaining contingent purchase price payments could total as much as \$49 million. As of March 31, 2011, no amounts were accrued for the third anniversary year ending in December 2011.

In the fourth quarter 2008, Federated acquired certain assets of Clover Capital Management, Inc. (Clover Capital Acquisition). As part of the Clover Capital Acquisition, Federated is required to make contingent purchase price payments based upon growth in revenues over the five-year period following the acquisition date. The contingent purchase price payments, which could total as much as \$56 million, will be recorded as additional goodwill at the time the contingency is resolved. The applicable growth targets were not met for the first two anniversary years and as such, no amounts were accrued or paid related to 2009 or 2010. As of March 31, 2011, no amounts were accrued for the third anniversary year ending in December 2011.

In the third quarter 2007, Federated completed a transaction with Rochdale Investment Management LLC to acquire certain assets relating to its business of providing investment advisory and investment management services to the Rochdale Atlas Portfolio (Rochdale Acquisition). The Rochdale Acquisition agreement provides for two forms of contingent purchase price payments that are dependent upon asset growth and fund performance through 2012. The first form of contingent payment is payable in 2010 and 2012 and could aggregate to as much as \$20 million. The second form of contingent payment is payable on a semi-annual basis over the five-year period following the acquisition closing date based on certain revenue earned by Federated from the Federated InterContinental Fund. As of March 31, 2011, \$3.0 million was paid in semi-annual contingent purchase price payments and \$0.7 million was accrued related to future semi-annual contingent purchase price payments (of which \$0.5 million will be paid in the second quarter 2011) and \$1.1 million was paid in the fourth quarter 2010 with regard to the first form of contingent payment. The future semi-annual contingent purchase price payment was accrued in Other current liabilities and recorded as goodwill. Contingent payments are recorded as additional goodwill at the time the related contingency is resolved.

Pursuant to various significant employment arrangements, Federated may be required to make certain incentive compensation-related payments. The employment contracts expire on various dates through the year 2014 with payments possible through 2018. As of March 31, 2011, the maximum bonus payable over the remaining terms of the contracts approximates \$73 million, of which approximately \$5 million would be payable in 2011 if the necessary performance targets are met and the employees continue to be employed as of the relevant payment dates. In addition, certain employees have incentive compensation opportunities related to the Federated Kaufmann Large Cap Fund (the Fund Bonus). Based on asset levels at March 31, 2011, \$0.4 million would be paid in 2012. Management is unable to reasonably estimate a range of possible bonus payments for the Fund Bonus for subsequent years due to the wide range of possible growth-rate scenarios.

(b) Guarantees and Indemnifications

On an intercompany basis, various wholly owned subsidiaries of Federated guarantee certain financial obligations of Federated Investors, Inc., and Federated Investors, Inc. guarantees certain financial and performance-related obligations of various wholly owned subsidiaries. In addition, in the normal course of business, Federated has entered into contracts that provide a variety of indemnifications. Typically, obligations to indemnify third parties arise in the context of contracts entered into by Federated, under which Federated agrees to hold the other party harmless against losses arising out of the contract, provided the other party's actions are not deemed to have breached an agreed upon standard of care. In each of these circumstances, payment by Federated is contingent on the other party making a claim for indemnity, subject to Federated's right to challenge the other party's claim. Further, Federated's obligations under these agreements may be limited in terms of time and/or amount. It is not possible to predict the maximum potential amount of future payments under these or similar agreements due to the conditional nature of Federated's obligations and the unique facts and circumstances involved in each particular agreement. Management believes that if Federated were to incur a loss in any of these matters, such loss should not have a material effect on its business, financial position or results of operations.

Notes to the Consolidated Financial Statements (continued)

(Unaudited)

(c) Legal Proceedings

Since February 2004, Federated has been named as a defendant in seven cases involving the fees charged to the Federated Kaufmann Fund. These cases were originally filed in five different federal courts and one state court. The state court case was voluntarily dismissed by the plaintiff without prejudice. The six federal cases were consolidated in the U.S. District Court for the Western District of Pennsylvania.

The plaintiffs in these cases sought compensatory damages reflecting a return of all advisory fees earned by Federated in connection with the management of the Federated Kaufmann Fund since June 28, 2003, as well as attorney's fees and expenses. On April 28, 2011, Federated reached a final settlement to resolve these cases. Prior to the settlement, Federated had been preparing for trial which was scheduled to begin on April 12, 2011. Operating income for the quarter ended March 31, 2011 included charges of \$18.2 million in legal and related costs associated with these cases. This amount, which represents management's best estimate, is accrued in Accounts payable and accrued expenses and was charged primarily to Professional service fees. Federated is pursuing insurance reimbursements for these costs. Actual costs to resolve these cases may differ from these estimates but such differences are not expected to be material to Federated's consolidated results of operations, financial position or cash flow.

Federated has other claims asserted and threatened against it in the ordinary course of business. As of March 31, 2011, Federated does not believe that a material loss related to these claims is reasonably estimable. These claims are subject to inherent uncertainties. It is possible that an unfavorable determination will cause a material adverse impact on Federated's reputation, financial position, results of operations and/or liquidity in the period in which the effect becomes reasonably estimable.

(14) Subsequent Events

On April 28, 2011, the board of directors declared a \$0.24 per share dividend to shareholders of record as of May 6, 2011 to be paid on May 13, 2011.

On April 28, 2011, Federated reached a final settlement to resolve the company's previously disclosed consolidated cases involving the fees charged to the Federal Kaufmann Fund. See Note (13)(c) for additional information.

Table of Contents

Part I, Item 2. Management's Discussion and Analysis

of Financial Condition and Results of Operations (Unaudited)

The discussion and analysis below should be read in conjunction with the consolidated financial statements appearing elsewhere in this report. Management has presumed that the readers of this interim financial information have read or have access to Management's Discussion and Analysis of Financial Condition and Results of Operations appearing in Federated's Annual Report on Form 10-K for the year ended December 31, 2010.

General

Federated Investors, Inc. (together with its subsidiaries, Federated) is one of the largest investment managers in the United States with \$355 billion in managed assets as of March 31, 2011. The majority of Federated's revenue is derived from advising and administering Federated mutual funds and Separate Accounts (which include separately managed accounts, institutional accounts, sub-advised funds and other managed products) in both domestic and international markets. Federated also derives revenue from providing various other mutual fund-related services, including distribution, shareholder servicing and retirement plan recordkeeping services (collectively, Other Services).

Federated's investment products are primarily distributed in three markets. These markets and the relative percentage of managed assets at March 31, 2011 attributable to such markets are as follows: wealth management and trust (50%), broker/dealer (29%) and global institutional (18%).

Investment advisory fees, administrative service fees and certain fees for Other Services, such as distribution and shareholder service fees, are contract-based fees that are generally calculated as a percentage of the net assets of the investment portfolios that are managed by Federated. As such, Federated's revenue is primarily dependent upon factors that affect the value of managed assets including market conditions and the ability to attract and retain assets. Nearly all assets under management in Federated's investment products can be redeemed at any time with no advance notice requirement. Fee rates for Federated's services generally vary by asset type and investment objective and, in certain instances, decline as the average net assets of the individual portfolios exceed certain thresholds. Generally, management-fee rates charged for advisory services provided to equity products are higher than management-fee rates charged to money market and fixed-income products. Likewise, mutual funds typically have a higher management-fee rate than Separate Accounts. Similarly, traditional separate accounts typically have a higher management-fee rate than liquidation portfolios. Accordingly, revenue is also dependent upon the relative composition of average assets under management across both asset and product types. Federated may waive certain fees for competitive reasons such as to maintain positive or zero net yields, to meet regulatory requirements or to meet contractual requirements. Since Federated's products are largely distributed and serviced through financial intermediaries, Federated pays a significant portion of the distribution fees earned from sponsored products to the financial intermediaries that sell these products. These payments are generally calculated as a percentage of net assets attributable to the financial intermediary selling the product and are recorded on the Consolidated Statements of Income as a distribution expense. Certain components of distribution expense can vary depending upon the asset type, distribution channel and/or the size of the customer relationship. Federated generally pays out a larger portion of the revenue earned from managed assets in money market funds than managed assets in equity or fixed-income funds.

Federated's remaining Other Services fees are primarily based on fixed rates per retirement plan participant. Revenue relating to these services generally depends upon the number of plan participants which may vary as a result of sales and marketing efforts, competitive fund performance, introduction and market reception of new product features and acquisitions.

Federated's most significant operating expenses include distribution expenses and compensation and related costs, which include fixed and variable compensation and related employee benefits. Certain of these expenses are dependent upon sales, product performance, levels of assets and asset mix and the willingness to continue fee waivers to maintain positive or zero net yields.

The discussion and analysis of Federated's financial condition and results of operations are based on Federated's Consolidated Financial Statements. Management evaluates Federated's performance at the consolidated level based on the view that Federated operates in a single operating segment, the investment management business. Management analyzes all expected revenue and expenses and considers market demands in determining an overall fee structure for services provided and in evaluating the addition of new business. Federated's growth and profitability are dependent upon its ability to attract and retain assets under management and, in light of the recent and continuing adverse market conditions, are also dependent upon the profitability of those assets, which is impacted, in part, by management's decisions regarding fee waivers to maintain positive or zero net yields on certain money market products. Fees for fund-related services are ultimately subject to the

approval of the independent directors or trustees of the mutual funds. Management believes the most meaningful indicators of Federated's performance are assets under management, total revenue and net income, both in total and per diluted share.

Management's Discussion and Analysis (continued)

of Financial Condition and Results of Operations (Unaudited)

Business Developments

Historically Low Short-Term Interest Rates

During the latter half of 2008 and early 2009, disruptions in the financial markets caused severe dislocations on the functioning of the credit markets and unprecedented strain on the availability of liquidity in the short-term debt markets, including the commercial paper markets, which are important for the operation of prime money market funds which invest primarily in a portfolio of short-term, high-quality, fixed-income securities.

In certain money market funds, the gross yield is not sufficient to cover all of the fund's normal operating expenses due to historically low short-term interest rates. Since the fourth quarter 2008, Federated has voluntarily waived fees in order for certain funds to maintain positive or zero net yields.

During the first quarter 2011, fee waivers to maintain positive or zero net yields totaled \$63.4 million and were partially offset by a related reduction in distribution expenses of \$49.5 million and net income attributable to noncontrolling interests of \$0.8 million such that the net impact to Federated was \$13.1 million in reduced pre-tax income. The impact of these fee waivers for the three months ended March 31, 2011 was less than the impact for the three months ended March 31, 2010 with \$69.5 million in waived fees, \$51.2 million in reduced distribution expenses, \$0.5 million reduction in net income attributable to noncontrolling interests and a net impact of \$17.8 million in reduced pre-tax income. Beginning on April 1, 2011, primarily as a result of certain changes in bank assessments impacting products insured by the Federal Deposit Insurance Corporation, overnight interest rates for repurchase agreements declined. This reduction in short-term interest rates caused an increase in fee waivers to maintain positive or zero net yields in April. Management expects the elevated fee waivers and the related reduction in distribution expense and net income attributable to noncontrolling interests will continue at least through the end of the quarter ended June 30, 2011. Assuming current market conditions and asset levels remain constant, fee waivers for the second quarter 2011 may result in a net impact on pre-tax income of approximately \$17.5 million. Increases in short-term interest rates that result in higher yields on securities purchased in money market fund portfolios would reduce the pre-tax income impact of these waivers. The actual amount of future fee waivers could vary significantly from management's estimates as they are contingent on a number of variables including, but not limited to, available yields on instruments held by the money market funds, changes in assets within money market funds, actions by the Federal Reserve, the U.S. Department of the Treasury and other governmental entities, changes in expenses of the money market funds, changes in the mix of money market customer assets and Federated's willingness to continue the fee waivers.

For the three months ended March 31, 2011, approximately 49% of Federated's total revenue was attributable to money market assets as compared to 50% for the same period of 2010. A significant change in Federated's money market business or a significant reduction in money market assets due to regulatory changes, changes in the financial markets including significant increases in interest rates over a short period of time, significant deterioration in investor confidence, further persistent declines in or additional prolonged periods of historically low short-term interest rates and resulting fee waivers or other circumstances, could have a material adverse effect on Federated's results of operations.

Current Legal Proceedings

On April 28, 2011, Federated reached a final settlement to resolve the consolidated cases involving the fees being charged to the Federated Kaufmann Fund. Prior to the settlement, Federated had been preparing for trial which was scheduled to begin on April 12, 2011. Operating income for the quarter ended March 31, 2011 included charges of \$18.2 million in legal and related costs associated with these cases. This amount, which represents management's best estimate, is accrued in Accounts payable and accrued expenses on the Consolidated Balance Sheet and was charged primarily to Professional service fees on the Consolidated Statement of Income. Federated is pursuing insurance reimbursements for these costs. Actual costs to resolve these cases may differ from these estimates but such differences are not expected to be material to Federated's consolidated results of operations, financial position or cash flow.

Table of Contents

Management's Discussion and Analysis (continued)

of Financial Condition and Results of Operations (Unaudited)

Business Combinations and Acquisitions

In the third quarter 2010, Federated acquired the money market management business of SunTrust Banks, Inc. (SunTrust Acquisition). Pursuant to the definitive agreement signed on July 16, 2010, \$14.1 billion of money market assets transitioned to Federated during the third and fourth quarters of 2010. The SunTrust Acquisition included upfront cash payments that totaled \$6.6 million and contingent purchase price payments payable over five years. The contingent purchase price payments are calculated as a percentage of revenue less operating expenses directly attributed to certain eligible assets. At March 31, 2011, management estimated contingent payments could total \$26 million over five years, however, the actual amount of the contingent payments will vary based on asset levels and related net revenues and is not limited by any maximum amount. A wide range of outcomes for actual payments is possible due to the extent of reasonably possible flow-rate volatility for the assets under management. The SunTrust Acquisition was accounted for under the acquisition method of accounting. The valuation, which was finalized in the first quarter 2011, results indicate the fair value of the total consideration is \$24.1 million assignable to a single identifiable intangible asset with an indefinite life and recorded in Renewable investment advisory rights on the Consolidated Balance Sheets. This asset is deductible for tax purposes. The valuation results are reflected in the Consolidated Balance Sheet and the related footnotes as of and for the period ended March 31, 2011 and include an adjustment to reflect the final estimate of fair value. As of March 31, 2011, a liability of \$18.4 million representing the fair value of future consideration payments was recorded in Other current liabilities (\$5.3 million) and Other long-term liabilities (\$13.1 million). This liability is remeasured at each reporting date with changes in the fair value recognized on the Consolidated Statements of Income.

Special Cash Dividend

In the first quarter 2010, Federated paid \$1.26 per share, or \$129.8 million, as a special cash dividend to shareholders. This payment was in addition to the regular quarterly cash dividend of \$0.24 per share or \$24.7 million also paid in the first quarter 2010. The first quarter 2010 dividend of \$1.50 per share negatively impacted first quarter 2010 diluted earnings per share by approximately \$0.04 per share due to the application of the two-class method of calculating earnings per share.

All dividends are considered ordinary dividends for tax purposes.

Amended and Restated Term Loan and Interest Rate Swap

In the second quarter 2010, Federated entered into a five-year \$425 million amended and restated term loan credit agreement (Term Loan). The Term Loan amended and restated Federated's \$140 million term loan dated August 19, 2008. The Term Loan requires principal payments of \$10.6 million per quarter for the first four years and \$63.8 million per quarter for the fifth year with the final payment due on April 1, 2015. The borrowings under the Term Loan bear interest at a spread over the London Interbank Offering Rate (LIBOR). During the first quarter 2010, Federated entered into an interest rate swap transaction (the Swap) which became effective in the second quarter 2010, to hedge its interest rate risk associated with the Term Loan. The Swap had an initial notional amount of \$425 million that declines in accordance with the scheduled principal payments associated with the Term Loan. Under the Swap, which expires on April 1, 2015, Federated receives payments based on LIBOR plus a spread and makes payments based on an annual fixed rate of 4.396%. See Note (9) to the Consolidated Financial Statements for additional information regarding the Term Loan and Swap.

¹ *Liquidation portfolios include portfolios of distressed fixed-income securities and liquidating collateralized debt obligation (CDO) products. In the distressed security category, Federated has been retained by a third party to manage these assets through an orderly liquidation process that will generally occur over a multi-year period. In the case of liquidating CDOs, one CDO unwound earlier than expected due to events of default related to certain distressed securities in the portfolio.*

Table of Contents**Management's Discussion and Analysis (continued)**

of Financial Condition and Results of Operations (Unaudited)

Changes in Federated's average asset mix period-over-period across both asset and product types have a direct impact on Federated's operating income. Asset mix impacts Federated's total revenue due to the difference in the fee rates per invested dollar earned on each asset and product type. Equity products generally have a higher management-fee rate than fixed-income products, money market products and liquidation portfolios. Likewise, mutual fund products typically have a higher management-fee rate than Separate Accounts. Similarly, traditional separate accounts typically have a higher management-fee rate than liquidation portfolios. Additionally, certain components of distribution expense can vary depending upon the asset type, distribution channel and/or the size of the customer relationship. Federated generally pays out a larger portion of the revenue earned from managed assets in money market funds than managed assets in equity or fixed-income funds. The following table presents the relative composition of average managed assets and the percent of total revenue derived from each asset type for the three months ended March 31:

	Percent of Total Average Managed Assets		Percent of Total Revenue	
	2011	2010	2011	2010
By Asset Class				
Money market assets	77%	79%	49%	50%
Fixed-income assets	11%	10%	18%	17%
Equity assets	9%	8%	32%	32%
Liquidation portfolios	3%	3%		
Other activities	N/A	N/A	1%	1%
By Product Type				
Funds:				
Money market assets	68%	70%	48%	49%
Fixed-income assets	9%	8%	17%	16%
Equity assets	7%	6%	28%	27%
Separate Accounts:				
Money market assets	9%	9%	1%	1%
Fixed-income assets	2%	2%	1%	1%
Equity assets	2%	2%	4%	5%
Liquidation Portfolios	3%	3%		
Other activities	N/A	N/A	1%	1%

Total managed assets represent the balance of assets under management at a point in time. By contrast, average managed assets represent the average balance of assets under management during a period of time. Because substantially all revenue and certain components of distribution expense are generally calculated daily based on assets under management, changes in average managed assets are typically a key indicator of changes in revenue earned and asset-based expenses incurred during the same period.

March 31, 2011 period-end managed assets increased 1% over period-end managed assets at March 31, 2010. Average managed assets for the three-month period ended March 31, 2011 decreased 3% over average managed assets for the same period in 2010 primarily as a result of decreases in average money market assets, partially offset by increases in average fixed-income assets. Period-end money market assets at March 31, 2011 remained flat compared to March 31, 2010. Average money market assets decreased 6% for the three-month period ended March 31, 2011 as compared to the same period in 2010. Period-end fixed-income assets at March 31, 2011 increased 18% as compared to March 31, 2010 and average fixed-income assets for the three-month period ended March 31, 2011 increased 18% as compared to the same period in 2010 primarily due to positive net sales and, to a lesser extent, market appreciation. Period-end equity assets at March 31, 2011 increased 5% as compared to March 31, 2010 and average equity assets for the three-month period ended March 31, 2011 increased 5% as compared to the same period in 2010 primarily due to market appreciation. As expected, liquidation portfolios at March 31, 2011 decreased 13% as compared to March 31, 2010 and average assets in liquidation portfolios decreased 14% for the three-month period ended March 31, 2011 as

compared to the same period in 2010 due to the gradual liquidation of the portfolio.

Table of Contents**Management's Discussion and Analysis (continued)**

of Financial Condition and Results of Operations (Unaudited)

Results of Operations

Revenue. The following table sets forth components of total revenue for the three-month periods ended March 31:

<i>(in millions)</i>	Three Months Ended March 31,			Percent Change
	2011	2010	Change	
Revenue from managed assets	\$ 236.9	\$ 230.9	\$ 6.0	3%
Revenue from sources other than managed assets	2.0	2.1	(0.1)	(5%)
Total revenue	\$ 238.9	\$ 233.01	\$ 5.9	3%

Revenue from managed assets increased \$6.0 million for the three-month period ended March 31, 2011 as compared to the same period in 2010 primarily due to a decrease of \$6.1 million in voluntary fee waivers by certain money market funds in order to maintain positive or zero net yields. See Business Developments – Historically Low Short-Term Interest Rates for additional information on the related offsetting increase in expense and the net impact on pre-tax income. In addition, revenue increased \$3.7 million resulting from higher average fixed-income assets and \$2.9 million due to higher average equity assets, partially offset by a decrease of \$6.4 million due to lower average money market assets (inclusive of an offsetting increase in revenue of approximately \$9 million from average assets attributable to the SunTrust Acquisition).

See Business Developments – Historically Low Short-Term Interest Rates for a discussion of management's expectation regarding fee waivers and the related reduction in distribution expense for the second quarter of 2011.

For the three-month period ended March 31, 2011, Federated's ratio of revenue from managed assets to average managed assets was 0.27% as compared to 0.26% for the same period of 2010. The increase in the rate was primarily due to the decrease in voluntary fee waivers to maintain positive or zero net yields.

Operating Expenses. The following table sets forth operating expenses for the three-month periods ended March 31:

<i>(in millions)</i>	Three Months Ended March 31,			Percent Change
	2011	2010	Change	
Distribution	\$ 64.7	\$ 58.5	\$ 6.2	11%
Professional service fees	26.2	10.1	16.1	159%
All other	91.5	92.6	(1.1)	(1%)
Total operating expenses	\$ 182.4	\$ 161.2	\$ 21.2	13%

Total operating expenses for the three-month period ended March 31, 2011 increased \$21.2 million compared to the same period in 2010. Distribution expense increased \$6.2 million primarily due to a \$3.0 million increase related to the client mix of average money market assets in the first quarter 2011 as compared to the same period in 2010 and a \$1.7 million increase as a result of lower fee waivers to maintain positive or zero net yields in the first quarter 2011 as compared to the same period of the prior year. Professional service fees increased \$16.1 million

primarily due to expenses related to the aforementioned legal proceedings. See Business Developments – Current Legal Proceedings for information regarding these charges.

Nonoperating Income (Expenses). Nonoperating expenses, net increased \$0.1 million for the three months ended March 31, 2011 as compared to the same period in 2010 due primarily to a \$4.0 million increase in Debt expense – recourse related to increased borrowings in 2010 (see Business Developments - Amended and Restated Term Loan and Interest Rate Swap for additional information) partially offset by a (1) \$3.0 million increase in Gain on securities, net in the first quarter 2011 compared to the first quarter of 2010, related primarily to gains realized from the sale of mutual fund holdings; and (2) a \$0.8 million increase in Investment income, net in the first quarter 2011 compared to the first quarter 2010 due primarily to increases in average investment balances.

Income Taxes. The income tax provision decreased \$6.2 million for the three months ended March 31, 2011 as compared to the same period in 2010 primarily due to lower income before income taxes. The effective tax rate was 37.0% for the three-month period ended March 31, 2011 as compared to 37.8% for the same period in 2010.

Table of Contents

Management's Discussion and Analysis (continued)

of Financial Condition and Results of Operations (Unaudited)

Net Income attributable to Federated Investors, Inc. Net income decreased \$8.8 million for the three months ended March 31, 2011 as compared to the same period in 2010, primarily as a result of the changes in revenues and expenses noted above. Basic and diluted earnings per share for the three months ended March 31, 2011 decreased \$0.06 as compared to the same period of 2010 primarily due to decreased net income attributable to Federated, partially offset by a decrease in income available to participating unvested restricted shareholders (\$0.03) primarily as a result of the special cash dividend paid in the first quarter 2010. See Note (12) to the Consolidated Financial Statements for additional information.

Liquidity and Capital Resources

Liquid Assets. At March 31, 2011, liquid assets, consisting of cash and cash equivalents, investments and receivables, totaled \$337.6 million as compared to \$354.9 million at December 31, 2010. The decrease of \$17.3 million primarily reflects a decrease of \$21.9 million in Cash and cash equivalents offset by an increase of \$5.7 million in Investments which is described further below.

Cash Provided by Operating Activities. Net cash provided by operating activities totaled \$46.5 million for the three months ended March 31, 2011 as compared to \$33.4 million for the same period in 2010. The increase of \$13.1 million was primarily due to the receipt of \$10.0 million of insurance proceeds for claims submitted to cover costs associated with certain legal proceedings (see Note (13)(c) to the Consolidated Financial Statements for additional information) and an increase in cash received from customers due to the \$6.0 million increase in revenue from managed assets previously discussed, partially offset by a \$4.3 million increase in cash paid for interest due to the increased average outstanding loan balances and a higher average interest rate as a result of the Term Loan.

Cash Used by Investing Activities. During the three-month period ended March 31, 2011, Federated used \$46.4 million for investing activities primarily related to cash paid in connection with a contingent purchase price payment for a prior year acquisition.

Cash Used by Financing Activities. During the three-month period ended March 31, 2011, cash used by financing activities was \$22.1 million. During the first three months of 2011, Federated paid \$25.0 million or \$0.24 per share in dividends to holders of its common shares and repaid \$10.6 million in connection with its Term Loan. These items were partially offset by \$13.9 million received related to the exercise of 0.6 million options in the first quarter 2011.

Borrowings. In the first quarter 2010, Federated made a \$5.3 million principal payment on its \$140 million term loan. In the second quarter 2010, Federated amended and restated this loan. See Business Developments – Amended and Restated Term Loan and Interest Rate Swap for additional information. During the first quarter 2011, Federated made a \$10.6 million principal payment on the Term Loan.

Federated also has a \$200 million Revolving Credit Facility that expires October 31, 2011 (Revolving Credit Facility). As of March 31, 2011, Federated had \$200 million available for borrowings on the Revolving Credit Facility. Federated is currently considering new borrowing arrangements to replace the expiring Revolving Credit Facility. See Note (9) to the Consolidated Financial Statements for more information on Recourse debt.

Proceeds from the debt facilities have been used for general corporate purposes including cash payments related to acquisitions, quarterly dividends and share repurchases.

Both the Revolving Credit Facility and the Term Loan have interest coverage ratio covenants (consolidated earnings before interest, taxes, depreciation and amortization (EBITDA) to consolidated interest expense) and leverage ratio covenants (consolidated debt to consolidated EBITDA) as well as other customary terms and conditions. Both the Revolving Credit Facility and the Term Loan have an interest coverage ratio covenant of at least 4 to 1, and as of March 31, 2011, the interest coverage ratio was 19.61 to 1. The Revolving Credit Facility and the Term Loan have leverage ratio covenants of no more than 2 to 1 and no more than 2.5 to 1, respectively. As of March 31, 2011, the leverage ratios for the Revolving Credit Facility and the Term Loan were 1.13 to 1 and 1.10 to 1, respectively. Federated was in compliance with its interest coverage and leverage ratios at and during the three months ended March 31, 2011. Each of the Revolving Credit Facility, Term Loan

and the Swap also have certain stated events of default and cross default provisions which would permit the lenders/counterparties to accelerate the repayment of the debt or the Swap if not cured within the applicable grace periods. The events of default generally include breaches of contract, failure to make required loan payments, insolvency, cessation of business, notice of lien or assessment and other proceedings, whether voluntary or involuntary, that would require the repayment of amounts borrowed.

Table of Contents

Management's Discussion and Analysis (continued)

of Financial Condition and Results of Operations (Unaudited)

Future Cash Needs. In addition to the contractual obligations and contingent liabilities described below, management expects that principal uses of cash will include funding distribution expenditures, paying incentive and base compensation, repaying recourse debt obligations, paying shareholder dividends, funding business acquisitions, paying taxes, repurchasing company stock, advancing sales commissions, seeding new products and funding property and equipment acquisitions, including computer-related software and hardware. As a result of the highly regulated nature of the investment management business, management anticipates that expenditures for compliance and investment management personnel, compliance systems and related professional and consulting fees may continue to increase.

On April 28, 2011, the board of directors declared a \$0.24 per share dividend to shareholders of record as of May 6, 2011 to be paid on May 13, 2011.

After evaluating Federated's existing liquid assets, expected continuing cash flow from operations, its remaining borrowing capacity under the Revolving Credit Facility and its ability to obtain additional financing arrangements and issue debt or stock, management believes it will have sufficient liquidity to meet its present and reasonably foreseeable cash needs. Although management currently is not projecting to draw on the availability under the Revolving Credit Facility for the remainder of 2011, management may choose to borrow additional amounts up to the maximum available under the Revolving Credit Facility which could cause total outstanding borrowings to total as much as \$583 million.

Financial Position

The following discussion summarizes significant changes in assets and liabilities that are not discussed elsewhere in Management's Discussion and Analysis of Financial Condition and Results of Operations and the status of Federated's goodwill as of March 31, 2011.

Accounts payable and accrued expenses at March 31, 2011 decreased \$25.1 million from December 31, 2010 primarily due to the payment of contingent consideration related to a prior year acquisition (\$44.7 million), partially offset by an increase in the accrual for the legal and related costs associated with the aforementioned legal proceedings (\$16.9 million). See Business Developments - Current Legal Proceedings for information regarding the current quarter charges.

Accrued compensation and benefits at March 31, 2011 decreased \$36.1 million from December 31, 2010 primarily due to the annual 2010 accrued incentive compensation being paid in the first quarter 2011 (\$50.8 million), partially offset by the accrual of 2011 incentive compensation earned in the first quarter of 2011 (\$18.2 million).

Other current liabilities at March 31, 2011 increased \$13.3 million from December 31, 2010 primarily as a result of the \$10.0 million in insurance proceeds received related to claims submitted to cover costs associated with certain legal proceedings. See Note (8) and Note (13)(c) to the Consolidated Financial Statements for additional information.

Goodwill at March 31, 2011 increased \$0.3 million from December 31, 2010. During the first three months of 2011, Federated recorded goodwill primarily in connection with contingent purchase price payments and accruals related to the 2007 acquisition of certain assets of Rochdale Investment Management LLC relating to the business of providing investment advisory and investment management services to the Rochdale Atlas Portfolio (Rochdale Acquisition) (\$0.3 million). See Note (13)(a) to the Consolidated Financial Statements for additional information. As of March 31, 2011, Federated's market capitalization exceeded the recorded goodwill balance by more than 300%.

Contractual Obligations and Contingent Liabilities

Contingent Liabilities and Payments. As part of the SunTrust Acquisition, Federated is required to make contingent purchase price payments over the five-year period following the acquisition date. The contingent purchase price payments are calculated as a percentage of revenue less operating expenses directly attributed to certain eligible assets. At March 31, 2011, management estimated contingent payments could total \$26 million over five years, however, the actual amount of the contingent payments will vary based on asset levels and related net revenues and is not limited by any maximum amount. A wide range of outcomes for actual payments is possible due to the extent of reasonably possible

Edgar Filing: FEDERATED INVESTORS INC /PA/ - Form 10-Q

flow-rate volatility for the assets under management. As of March 31, 2011, a liability of \$18.4 million representing the fair value of future consideration payments was recorded in Other current liabilities (\$5.3 million) and Other long-term liabilities (\$13.1 million) (see Note (6)(a) to the Consolidated Financial Statements for a discussion regarding the valuation methodology). This liability is remeasured at each reporting date with changes in the fair value recognized on the Consolidated Statements of Income.

Table of Contents**Management's Discussion and Analysis (continued)**

of Financial Condition and Results of Operations (Unaudited)

In the fourth quarter 2008, Federated acquired certain assets of David W. Tice & Associates LLC that relate to the management of the Prudent Bear Fund and the Prudent DollarBear Fund (Prudent Bear Acquisition). As part of the Prudent Bear Acquisition, Federated is required to make contingent purchase price payments based upon certain revenue growth targets over the four-year period following the acquisition date. The contingent purchase price payments are recorded as additional goodwill at the time the contingency is resolved. The first two contingent purchase price payments of \$5.1 million and \$44.7 million were paid in the first quarters of 2010 and 2011, respectively. The remaining contingent purchase price payments could total as much as \$49 million. As of March 31, 2011, no amounts were accrued for the third anniversary year ending in December 2011.

In the fourth quarter 2008, Federated acquired certain assets of Clover Capital Management, Inc. (Clover Capital Acquisition). As part of the Clover Capital Acquisition, Federated is required to make contingent purchase price payments based upon growth in revenues over the five-year period following the acquisition date. The contingent purchase price payments, which could total as much as \$56 million, will be recorded as additional goodwill at the time the contingency is resolved. The applicable growth targets were not met for the first two anniversary years and as such, no amounts were accrued or paid related to 2009 or 2010. As of March 31, 2011, no amounts were accrued for the third anniversary year ending in December 2011.

The Rochdale Acquisition agreement provides for two forms of contingent purchase price payments that are dependent upon asset growth and fund performance through 2012. The first form of contingent payment is payable in 2010 and 2012 and could aggregate to as much as \$20 million. The second form of contingent payment is payable on a semi-annual basis over the five-year period following the acquisition closing date based on certain revenue earned by Federated from the Federated InterContinental Fund. As of March 31, 2011, \$3.0 million was paid in semi-annual contingent purchase price payments and \$0.7 million was accrued related to future semi-annual contingent purchase price payments (of which \$0.5 million will be paid in the second quarter 2011) and \$1.1 million was paid in the fourth quarter 2010 with regard to the first form of contingent payment. The future semi-annual contingent purchase price payment was accrued in Other current liabilities and recorded as goodwill. Contingent payments are recorded as additional goodwill at the time the related contingency is resolved.

Pursuant to various significant employment arrangements, Federated may be required to make certain incentive compensation-related payments. The employment contracts expire on various dates through the year 2014 with payments possible through 2018. As of March 31, 2011, the maximum bonus payable over the remaining terms of the contracts approximates \$73 million, of which approximately \$5 million would be payable in 2011 if the necessary performance targets are met and the employees continue to be employed as of the relevant payment dates. In addition, certain employees have incentive compensation opportunities related to the Federated Kaufmann Large Cap Fund (the Fund Bonus). Based on levels at March 31, 2011, \$0.4 million would be paid in 2012. Management is unable to reasonably estimate a range of possible bonus payments for the Fund Bonus for subsequent years due to the wide range of possible growth-rate scenarios.

Legal Proceedings. Since February 2004, Federated has been named as a defendant in seven cases involving the fees charged to the Federated Kaufmann Fund. These cases were originally filed in five different federal courts and one state court. The state court case was voluntarily dismissed by the plaintiff without prejudice. The six federal cases were consolidated in the U.S. District Court for the Western District of Pennsylvania.

The plaintiffs in these cases sought compensatory damages reflecting a return of all advisory fees earned by Federated in connection with the management of the Federated Kaufmann Fund since June 28, 2003, as well as attorneys' fees and expenses. On April 28, 2011, Federated reached a final settlement to resolve these cases. Prior to the settlement, Federated had been preparing for trial which was scheduled to begin on April 12, 2011. Operating income for the quarter ended March 31, 2011 included charges of \$18.2 million in legal and related costs associated with these cases. This amount, which represents management's best estimate, is accrued in Accounts payable and accrued expenses on the Consolidated Balance Sheet and was charged primarily to Professional service fees on the Consolidated Statement of Income. Federated is pursuing insurance reimbursements for these costs. Actual costs to resolve these cases may differ from these estimates but such differences are not expected to be material to Federated's consolidated results of operations, financial position or cash flow.

Table of Contents

Management's Discussion and Analysis (continued)

of Financial Condition and Results of Operations (Unaudited)

Federated has other claims asserted and threatened against it in the ordinary course of business. As of March 31, 2011, Federated does not believe that a material loss related to these claims is reasonably estimable. These claims are subject to inherent uncertainties. It is possible that an unfavorable determination will cause a material adverse impact on Federated's reputation, financial position, results of operations and/or liquidity in the period in which the effect becomes reasonably estimable.

Critical Accounting Policies

Federated's Consolidated Financial Statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP). In preparing the financial statements, management is required to make estimates and assumptions that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Management continually evaluates the accounting policies and estimates it uses to prepare the Consolidated Financial Statements. In general, management's estimates are based on historical experience, information from third-party professionals and various other assumptions that are believed to be reasonable under the facts and circumstances. Actual results may differ from those estimates made by management and those differences may be significant.

Of the significant accounting policies described in Federated's Annual Report on Form 10-K for the year ended December 31, 2010, management believes that its policies regarding accounting for variable interest entity consolidation, intangible assets, the acquisition-related future consideration liability, income taxes and loss contingencies involve a higher degree of judgment and complexity. See Note (1) of the Consolidated Financial Statements and the section entitled Critical Accounting Policies in Management's Discussion and Analysis of Financial Condition and Results of Operations included in Federated's Annual Report on Form 10-K for the year ended December 31, 2010 for a complete discussion of these policies.

Risk Factors

Potential Adverse Effects of a Material Concentration in Revenue. For the three months ended March 31, 2011, approximately 49% of Federated's total revenue was attributable to money market assets as compared to 50% for the same period of 2010. A significant change in Federated's money market business or a significant decline in money market assets due to regulatory changes, changes in the financial markets including significant increases in interest rates over a short period of time, significant deterioration in investor confidence, further persistent declines in or additional prolonged periods of historically low short-term interest rates and resulting fee waivers or other circumstances, could have a material adverse effect on Federated's results of operations.

Potential Adverse Effects of Historically Low Interest Rates. In December 2008, the Federal Reserve cut the federal funds target rate, a benchmark used by banks to set rates paid on many types of consumer and business loans, to a range between 0% and 0.25%. This action by the Federal Reserve negatively impacts the yields of money market funds, in particular treasury and government agency money market funds. Money market fund yields reflect the return on short-term investments (e.g. Treasury bills), less fund expenses. With short-term interest rates at or near zero, money market funds may not be able to maintain positive yields for shareholders. Federated voluntarily waives certain fees or assumes expenses of the funds for competitive reasons such as to maintain positive or zero net yields, which has and could continue to cause material adverse effects on Federated's results of operations. Federated, however, is not obligated to make such fee waivers or to assume such fund expenses.

Since the fourth quarter 2008, Federated has voluntarily waived fees in order for certain funds to maintain positive or zero net yields. During the first quarter 2011, fee waivers to maintain positive or zero net yields totaled \$63.4 million and were partially offset by a related reduction in distribution expenses of \$49.5 million and net income attributable to noncontrolling interests of \$0.8 million such that the net impact to Federated was \$13.1 million in reduced pre-tax income. The impact of these fee waivers for the three months ended March 31, 2011 was less than the impact for the three months ended March 31, 2010 with

Table of Contents**Management's Discussion and Analysis (continued)**

of Financial Condition and Results of Operations (Unaudited)

\$69.5 million in waived fees, \$51.2 million in reduced distribution expenses, \$0.5 million reduction in net income attributable to noncontrolling interests, and a net impact of \$17.8 million in reduced pre-tax income. Beginning on April 1, 2011, primarily as a result of certain changes in bank assessments impacting products insured by the Federal Deposit Insurance Corporation, overnight interest rates for repurchase agreements declined. This reduction in short-term interest rates caused an increase in fee waivers to maintain positive or zero net yields in April. Management expects the elevated fee waivers and the related reduction in distribution expense and net income attributable to noncontrolling interests will continue at least through the end of the quarter ended June 30, 2011. Assuming current market conditions and asset levels remain constant, fee waivers for the second quarter 2011 may result in a net impact on pre-tax income of approximately \$17.5 million. Increases in short-term interest rates that result in higher yields on securities purchased in money market fund portfolios would reduce the pre-tax income impact of these waivers. The actual amount of future fee waivers could vary significantly from management's estimates as they are contingent on a number of variables including, but not limited to, available yields on instruments held by the money market funds, changes in assets within money market funds, actions by the Federal Reserve, the U.S. Department of the Treasury and other governmental entities, changes in expenses of the money market funds, changes in the mix of money market customer assets and Federated's willingness to continue the fee waivers.

Potential Adverse Effects of Rising Interest Rates. In a rising short-term interest rate environment, certain investors using money market products and other short-term duration fixed-income products for cash management purposes may shift these investments to direct investments in comparable instruments in order to realize higher yields than those available in money market and other fund products holding lower-yielding instruments. In addition, rising interest rates will tend to reduce the market value of securities held in various investment portfolios and other products. Thus, increases in interest rates could have an adverse effect on Federated's revenue from money market products and from other fixed-income products.

Potential Adverse Effects of a Decline or Disruption in the Economy or Financial Markets. Economic or financial market downturns, including disruptions in securities and credit markets, may adversely affect the profitability and performance of, demand for and investor confidence in Federated's investment products and services. The ability of Federated to compete and sustain asset and revenue growth is dependent, in part, on the relative attractiveness of the types of investment products Federated offers and its investment performance and strategies under prevailing market conditions. In the event of extreme circumstances, including economic, political, or business crises, Federated's products may suffer significant net redemptions in assets under management causing severe liquidity issues in its short-term sponsored investment products and declines in the value of and returns on assets under management, all of which could cause material adverse effects on Federated's reputation, financial position, results of operations or liquidity.

Likewise, a service provider or vendor of Federated, including the major banks that provide custody and portfolio accounting services for Federated's investment products, could also be adversely affected by the adverse market conditions described above. It is not possible to predict with certainty the extent to which the services or products Federated receives from such service provider or vendor would be interrupted or affected by such situations. Accordingly, there can be no assurance that potential service interruption or Federated's ability to find a suitable replacement would not have a material adverse effect on Federated's reputation, financial position, results of operations or liquidity.

Potential Adverse Effects of Changes in Laws and Regulations on Federated's Investment Management Business. Federated and its investment management business are subject to extensive regulation in the United States and abroad. Federated and the Federated Funds are subject to Federal securities laws, principally the Securities Act of 1933, the Investment Company Act of 1940 (Investment Company Act) and the Investment Advisers Act of 1940, state laws regarding securities fraud and regulations promulgated by various regulatory authorities, including the SEC, the Financial Industry Regulatory Authority (FINRA) and the New York Stock Exchange (the NYSE). Federated is also affected by the regulations governing banks and other financial institutions and, to the extent operations take place outside the United States, by foreign laws and regulatory authorities. Changes in laws, regulations or governmental policies, and the costs associated with compliance, could materially and adversely affect the business and operations of Federated.

From time to time, the Federal securities laws have been augmented substantially. For example, among other measures, Federated has been impacted by the Sarbanes-Oxley Act of 2002, the Patriot Act of 2001 and the Gramm-Leach-Bliley Act of 1999. The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) was enacted into law on July 21, 2010. Under the Dodd-Frank Act, Federated, as well as mutual funds, continue to be primarily regulated by the SEC. The Dodd-Frank Act provides, however, for a new systemic risk regulation

Edgar Filing: FEDERATED INVESTORS INC /PA/ - Form 10-Q

regime under which it is possible that Federated and/or any one or more of its mutual funds could be designated by a newly created Financial Stability Oversight Council (FSOC) for enhanced prudential regulation by the Federal Reserve Board, in addition to primary regulation by the SEC. Examples of regulatory changes that could occur are the creation of capital requirements for designated investment advisers or money

Table of Contents**Management's Discussion and Analysis (continued)**

of Financial Condition and Results of Operations (Unaudited)

market funds, and/or a change in the rules governing money market mutual fund net asset value (NAV) calculations including the elimination of amortized cost accounting, which would result in fluctuating NAVs for money market mutual funds. Certain of these regulatory changes, if implemented, such as a change to fluctuating NAVs for money market mutual funds, could have a material adverse effect on the business and operations of Federated. Other provisions of the Dodd-Frank Act may affect intermediaries in their sale or use of Federated's products. Prior to complete implementation, it will be difficult to assess the full impact of the Dodd-Frank Act on Federated.

In addition, during the past few years the SEC, FINRA and the NYSE have adopted regulations that have increased Federated's operating expenses and affected the conduct of its business, and may continue to do so. Other significant regulations or amendments to regulations have been proposed and, if adopted, will affect Federated and the Federated Funds, and Federated anticipates that other reforms and regulatory actions affecting Federated and/or the mutual fund industry are likely to occur, including possible further amendments to Rule 2a-7 of the Investment Company Act.

On October 21, 2010, the President's Working Group issued its report on Money Market Fund Reform Options (the Report). The President's Working Group was tasked with studying possible reforms relating to money market funds that could mitigate systemic risk in the financial markets (including the potential for disruption in the financial markets caused by rapid shareholder redemptions in money market funds). The Report discusses the conditions that could cause money market funds to experience rapid shareholder redemptions and describes the advantages and disadvantages of a variety of policy options that could reduce the risk of such rapid redemptions. The Report suggests that the FSOC examine these options as part of its implementation of the Dodd-Frank Act. At this time, it is difficult to assess what impact, if any, the Report's recommendations will have on Federated.

Over the past few years, various service industries, including mutual fund service providers, have been the subject of changes in tax policy that impact their state and local tax liability. Changes that have been adopted or proposed include (1) an expansion of the nature of a service company's activities that subject it to tax in a jurisdiction, (2) a change in the methodology by which multi-state companies apportion their income between jurisdictions, and (3) a requirement that affiliated companies calculate their state tax as one combined entity. As adopted changes become effective and additional jurisdictions effect similar changes, there could be a material adverse effect on Federated's tax liability and effective tax rate and, as a result, net income.

Potential Adverse Effect of Providing Financial Support to Investment Products. Federated may, at its sole discretion, from time to time elect to provide financial support to its sponsored investment products. Providing such support utilizes capital that would otherwise be available for other corporate purposes. Losses on such support, or failure to have or devote sufficient capital to support products, could have a material adverse effect on Federated's reputation, financial position, results of operations or liquidity.

Risk of Federated's Money Market Products Ability to Maintain a Stable \$1.00 Net Asset Value. Approximately 49% of Federated's total revenue for the first three months of 2011 was attributable to money market assets. An investment in money market funds is neither insured nor guaranteed by the Federal Deposit Insurance Corporation. Although money market funds seek to preserve an NAV of \$1.00 per share, it is possible for an investor to lose money by investing in these funds. Federated devotes substantial resources including significant credit analysis to the management of its products. Federated money market funds have always maintained a \$1.00 NAV; however, there is no guarantee that such results will be achieved in the future. Market conditions could lead to severe liquidity issues and/or prolonged periods of historically low yields in money market products which could impact their NAVs. If the NAV of a Federated money market fund were to decline to less than \$1.00 per share, Federated money market funds would likely experience significant redemptions in assets under management, loss of shareholder confidence and reputational harm, all of which could cause material adverse effects on Federated's financial position, results of operations or liquidity.

No Assurance of Access to Sufficient Liquidity. From time to time, Federated's operations may require more cash than is then available from operations. In these circumstances, it may be necessary to borrow from lending facilities or to raise capital by securing new debt or by selling shares of Federated equity or debt securities. Federated's ability to raise additional capital in the future will be affected by several factors including Federated's creditworthiness, the market value of Federated's common stock, as well as general market conditions. There can be no assurance that Federated will be able to obtain these funds and financing on acceptable terms, if at all.

Retaining and Recruiting Key Personnel. Federated's ability to locate and retain quality personnel has contributed significantly to its growth and success and is important to attracting and retaining customers. The market for qualified executives, investment managers, analysts, traders, sales representatives and other key personnel is extremely competitive. There can be no assurance that Federated will be successful in its efforts to recruit and retain the required personnel. Federated

Table of Contents

Management's Discussion and Analysis (continued)

of Financial Condition and Results of Operations (Unaudited)

has encouraged the continued retention of its executives and other key personnel through measures such as providing competitive compensation arrangements and in certain cases employment agreements. The loss of any such personnel could have an adverse effect on Federated. In certain circumstances, the departure of key employees could cause higher redemption rates for certain assets under management or the loss of client accounts. Moreover, since certain of Federated's products contribute significantly to its revenues and earnings, the loss of even a small number of key personnel associated with these products could have a disproportionate impact on Federated's business.

Various executives, investment, sales and other key personnel own restricted stock and hold stock options subject to vesting periods of up to ten years from the date acquired or awarded and to provisions that require resale or forfeiture to Federated in certain circumstances upon termination of employment. In addition, certain of these employees are employed under contracts which require periodic review of compensation and contain restrictive covenants with regard to divulging confidential information and engaging in competitive activities.

Potential Adverse Effects of Increased Competition in the Investment Management Business. The investment management business is highly competitive. Federated competes in the management and distribution of mutual funds and Separate Accounts with other fund management companies, national and regional broker/dealers, commercial banks, insurance companies and other institutions. Many of these competitors have substantially greater resources and brand recognition than Federated. Competition is based on various factors, including business reputation, investment performance, quality of service, the strength and continuity of management and selling relationships, distribution services offered, the range of products offered and fees charged.

Many of Federated's products are designed for use by institutions such as banks, insurance companies and other corporations. A large portion of Federated's managed assets, particularly money market and fixed-income assets are held by institutional investors. Because most institutional investment vehicles are sold without sales commissions at either the time of purchase or the time of redemption, institutional investors may be more inclined to transfer their assets among various institutional funds than investors in retail mutual funds.

A significant portion of Federated's revenue is derived from providing mutual funds to the wealth management and trust market, comprising approximately 1,500 banks and other financial institutions. Future profitability of Federated will be affected by its ability to retain its share of this market, and could also be adversely affected by consolidations occurring in the banking industry, as well as regulatory changes.

Potential Adverse Effects of Changes in Federated's Distribution Channels. Federated acts as a wholesaler of investment products to financial intermediaries including banks, broker/dealers, registered investment advisers and other financial planners. Federated also sells investment products directly to corporations and institutions. Approximately 11% of Federated's total revenue for the three months ended March 31, 2011 was derived from services provided to one intermediary customer, the Bank of New York Mellon Corporation (including its Pershing subsidiary). If this financial intermediary were to cease operations or limit or otherwise end the distribution of Federated's investment products, it could have a material adverse effect on Federated's future revenues and, to a lesser extent, net income. There can be no assurance that Federated will continue to have access to the financial intermediaries that currently distribute Federated products or that Federated's relationship with such intermediaries will continue over time. In addition, Federated has experienced increases in the cost of distribution as a percentage of total revenue over the years and expects such costs to continue to increase due to asset growth and the competitive nature of the mutual fund business, exclusive of decreases related to maintaining positive or zero net yields. Higher distribution costs reduce Federated's operating and net income.

Adverse Effects of Declines in the Amount of or Changes in the Mix of Assets Under Management. A significant portion of Federated's revenue is derived from investment advisory fees, which are based on the value of managed assets and vary with the type of asset being managed, with higher fees generally earned on equity products than on fixed-income and money market products and liquidation portfolios. Likewise, mutual fund products generally have a higher management fee than Separate Accounts. Similarly, traditional separate accounts typically have a higher fee rate than liquidation portfolios. Additionally, certain components of distribution expense can vary depending upon the asset type, distribution channel and/or the size of the customer relationship. Consequently, significant fluctuations in the market value of securities held by, or the level of redemptions from, the funds or other products advised by Federated may materially affect the amount of managed assets and thus Federated's revenue, profitability and ability to grow. Similarly, changes in Federated's average asset mix across both asset and product types have a direct impact on Federated's revenue and profitability. Federated generally pays out a larger portion of the revenue

Edgar Filing: FEDERATED INVESTORS INC /PA/ - Form 10-Q

earned from assets in money market funds than assets in equity or fixed-income funds. Substantially all of Federated's managed assets are in investment products that permit investors to redeem their investment at any time. Additionally, changing market conditions may continue to cause a shift in Federated's asset mix towards money market and fixed-income products which may cause a decline in Federated's revenue and net income.

Adverse Effects of Poor Investment Performance. Success in the investment management business is largely dependent on investment performance relative to market conditions and the performance of competing products. Good performance generally assists retention and growth of assets, resulting in additional revenues. Conversely, poor performance tends to result in decreased sales and increased redemptions with corresponding decreases in revenues to Federated. Poor performance could, therefore, have a material adverse effect on Federated's business, results of operations or business prospects. In terms of revenue concentration by product, approximately 12% and 11% of Federated's total revenue for the three months ended March 31, 2011 was derived from services provided to two sponsored funds, the Federated Kaufmann Fund and the Federated Prime Obligations Fund, respectively. A significant and prolonged decline in the assets under management in these funds could have a material adverse effect on Federated's future revenues and, to a lesser extent, net income, due to related reductions to distribution expenses associated with these funds.

Operational Risks. Operational risks include, but are not limited to, improper or unauthorized execution and processing of transactions, deficiencies in operating systems, business disruptions, inadequacies or breaches in Federated's internal control processes and noncompliance with regulatory requirements. Management relies on its employees and systems to comply with established procedures, controls and regulatory requirements. Breakdown or improper use of systems, human error or improper action by employees, or noncompliance with regulatory rules could cause material adverse effects on Federated's reputation, financial position, results of operations and/or liquidity.

No Assurance of Successful Future Acquisitions. Federated's business strategy contemplates the acquisition of other investment management companies as well as investment assets. There can be no assurance that Federated will find suitable acquisition candidates at acceptable prices, have sufficient capital resources to realize its acquisition strategy, be successful in entering into definitive agreements for desired acquisitions, or successfully integrate acquired companies into Federated, or that any such acquisitions, if consummated, will prove to be advantageous to Federated.

Impairment Risk. At March 31, 2011, Federated had intangible assets including goodwill totaling \$715.7 million on its Consolidated Balance Sheet, the vast majority of which represent assets capitalized in connection with Federated's acquisitions and business combinations. Accounting for intangible assets requires significant management estimates and judgment. Federated may not realize the value of these intangible assets. Management performs an annual review of the carrying values of goodwill and indefinite-lived intangible assets and periodic reviews of the carrying values of all other intangible assets to determine whether events and circumstances indicate that an impairment in value may have occurred. A variety of factors could cause the carrying value of an intangible asset to become impaired. Should a review indicate impairment, a write-down of the carrying value of the intangible asset would occur, resulting in a non-cash charge which would adversely affect Federated's results of operations for the period.

Systems and Technology Risks. Federated utilizes software and related technologies throughout its businesses including both proprietary systems and those provided by outside vendors. Unanticipated issues could occur and it is not possible to predict with certainty all of the adverse effects that could result from a failure of a third party to address computer system problems. Accordingly, there can be no assurance that potential system interruptions or the cost necessary to rectify the problems would not have a material adverse effect on Federated's business, financial condition, results of operations or business prospects. In addition, Federated cannot predict the impact to its business and/or the costs to rectify situations involving unauthorized system access, computer theft and computer viruses.

Adverse Effects of Rising Costs of Risk Management. Since 2001, expenses related to risk management have increased and management expects these costs to be significant going forward. As a result of a heightened regulatory environment, management anticipates that expenditures for risk management personnel, risk management systems and related professional and consulting fees may continue to increase. Insurance coverage for significant risks may not be available or may only be available at prohibitive costs. Renewals of insurance policies may expose Federated to additional cost through the assumption of higher deductibles, and co-insurance liability and/or lower coverage levels. Higher insurance costs, incurred deductibles and lower coverage levels may reduce Federated's operating and net income.

Management's Discussion and Analysis (continued)

of Financial Condition and Results of Operations (Unaudited)

Potential Adverse Effects of Reputational Harm. Any material losses in client or shareholder confidence in Federated or in the mutual fund industry as a result of pending litigation, previously settled governmental inquiries, economic or financial market downturns or disruptions, material errors in public news reports, misconduct, rumors on the internet or other matters could increase redemptions from and reduce sales of Federated Funds and other investment management services, resulting in a decrease in future revenues.

Adverse Effects of Termination or Failure to Renew Fund Agreements. A substantial majority of Federated's revenues are derived from investment management agreements with sponsored funds that, as required by law, are terminable upon 60 days notice. In addition, each such investment management agreement must be approved and renewed annually by each fund's board of directors or trustees, including disinterested members of the board, or its shareholders, as required by law. Failure to renew, changes resulting in lower fees, or termination of a significant number of these agreements could have a material adverse impact on Federated. As required by the Investment Company Act, each investment advisory agreement with a mutual fund automatically terminates upon its assignment, although new investment advisory agreements may be approved by the mutual fund's directors or trustees and shareholders. A sale of a sufficient number of shares of Federated's voting securities to transfer control of Federated could be deemed an assignment in certain circumstances. An assignment, actual or constructive, will trigger these termination provisions and may adversely affect Federated's ability to realize the value of these agreements.

Under the terms of the settlement agreement with the SEC and NYAG, a Federated investment advisory subsidiary may not serve as investment adviser to any registered investment company unless: (1) at least 75% of the fund's directors are independent of Federated; (2) the chairman of each such fund is independent of Federated; (3) no action may be taken by the fund's board of directors or trustees or any committee thereof unless approved by a majority of the independent board members of the fund or committee, respectively; and (4) the fund appoints a senior officer who reports to the independent directors or trustees and is responsible for monitoring compliance by the fund with applicable laws and fiduciary duties and for managing the process by which management fees charged to a fund are approved.

Potential Adverse Effects of Unpredictable Events. Unpredictable events, including natural disaster, technology failure, pandemic, war and terrorist attack, could adversely impact Federated's ability to conduct business. Such events could cause disruptions in economic conditions, system interruption, loss of life, unavailability of personnel or additional costs. As such, there can be no assurance that unpredictable events, or the costs to address such events, would not have a material adverse effect on Federated's business, financial condition, results of operations or business prospects.

Capital Losses on Investments. Federated has and may continue to realize capital losses upon disposition of some of its investments. To the extent that these losses are not offset by capital gains in the year realized, there are specific rules in each tax jurisdiction (federal and state) that dictate the other tax years, if any, in which these losses may be used to offset net capital gains. The inability to utilize the capital loss deferred tax assets net of a valuation allowance within the prescribed timeframe may increase Federated's federal and/or state income tax expense and, as a result, reduce net income.

Part I, Item 3. Quantitative and Qualitative Disclosures About Market Risk

(Unaudited)

There have not been any material changes to Federated's exposures to market risk during the quarter ended March 31, 2011 that would require an update to the disclosures provided in Federated's Annual Report on Form 10-K for the year ended December 31, 2010.

Table of Contents

Part I, Item 4. Controls and Procedures

(Unaudited)

- (a) Federated carried out an evaluation, under the supervision and with the participation of management, including Federated's President and Chief Executive Officer and Chief Financial Officer, of the effectiveness of Federated's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of March 31, 2011. Based upon that evaluation, the President and Chief Executive Officer and the Chief Financial Officer concluded that Federated's disclosure controls and procedures were effective at March 31, 2011.

- (b) There has been no change in Federated's internal control over financial reporting that occurred during the quarter ended March 31, 2011 that has materially affected, or is reasonably likely to materially affect, Federated's internal control over financial reporting.

AMENDMENT OF THE FEDERATED INVESTORS, INC. STOCK INCENTIVE PLAN.

At the Annual Meeting of Shareholders of Federated Investors, Inc. (Federated) held on Thursday, April 28, 2011 in Pittsburgh, Pennsylvania, the holder of Federated's Class A Common Stock approved an amendment to Federated's Stock Incentive Plan. The Amendment is designed to reserve an additional 3,500,000 shares of Federated Class B Common Stock for the Stock Incentive Plan, thereby increasing the total number of shares reserved for issuance under the Stock Incentive Plan from 23,550,000 to 27,050,000 shares. The foregoing description of the Amendment does not purport to be complete and is qualified in its entirety by reference to the description contained in Federated's Information Statement to shareholders dated March 17, 2011 (Information Statement). The Stock Incentive Plan, as amended, is attached hereto as Exhibit 10.1 and incorporated by reference herein.

SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

At Federated's 2011 Annual Meeting of Shareholders held on Thursday, April 28, 2011 in Pittsburgh, Pennsylvania, the holder of Federated's Class A Common Stock which constituted all of the shares entitled to vote at the meeting, approved two proposals, both of which are described in more detail in Federated's Information Statement.

Proposal I

The holder of Federated's Class A Common Stock elected six individuals to the Board of Directors as set forth below:

Director	Shares Voted For	Shares Withheld
John F. Donahue	9,000	0
J. Christopher Donahue	9,000	0
John W. McGonigle	9,000	0
Michael J. Farrell	9,000	0
David M. Kelly	9,000	0
Edward G. O'Connor	9,000	0

Proposal II

The holder of Federated's Class A Common Stock approved an amendment to Federated's Stock Incentive Plan as set forth below:

Shares Voted For	Shares Voted Against	Shares Abstained
9,000	0	0

OTHER EVENTS.

On April 28, 2011, Federated reached a final settlement to resolve the consolidated cases involving the fees being charged to the Federated Kaufmann Fund. Prior to the settlement, Federated had been preparing for trial which was scheduled to begin on April 12, 2011. Operating income for the quarter ended March 31, 2011 included charges of \$18.2 million in legal and related costs associated with these cases. This amount, which represents management's best estimate, is accrued in Accounts payable and accrued expenses on the Consolidated Balance Sheet and was charged primarily to Professional service fees on the Consolidated Statement of Income. Federated is pursuing insurance reimbursements for these costs. Actual costs to resolve these cases may differ from these estimates but such differences are not expected to be material to Federated's consolidated results of operations, financial position or cash flow.
