## Notes to Consolidated Financial Statements

(Table amounts are stated in thousands, except for share and per share amounts)

## Note 1 - Significant Accounting Policies

Nature of Operations. Cullen/Frost Bankers, Inc. (Cullen/Frost) is a financial holding company and a bank holding company headquartered in San Antonio, Texas that provides, through its subsidiaries, a broad array of products and services throughout numerous Texas markets. In addition to general commercial and consumer banking, other products and services offered include trust and investment management, investment banking, insurance, brokerage, leasing, asset-based lending, treasury management and item processing.

Basis of Presentation. The consolidated financial statements in this Quarterly Report on Form 10-Q include the accounts of Cullen/Frost and all other entities in which Cullen/Frost has a controlling financial interest (collectively referred to as the Corporation ). All significant intercompany balances and transactions have been eliminated in consolidation. The accounting and financial reporting policies the Corporation follows conform, in all material respects, to accounting principles generally accepted in the United States and to general practices within the financial services industry.

The consolidated financial statements in this Quarterly Report on Form 10-Q have not been audited by an independent registered public accounting firm, but in the opinion of management, reflect all adjustments necessary for a fair presentation of the Corporation s financial position and results of operations. All such adjustments were of a normal and recurring nature. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q adopted by the Securities and Exchange Commission (SEC). Accordingly, the financial statements do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements and should be read in conjunction with the Corporation s consolidated financial statements, and notes thereto, for the year ended December 31, 2010, included in the Corporation s Annual Report on Form 10-K filed with the SEC on February 3, 2011 (the 2010 Form 10-K ). Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates. The allowance for loan losses, the fair value of stock-based compensation awards, the fair values of financial instruments and the status of contingencies are particularly subject to change.

Cash Flow Reporting. Additional cash flow information was as follows:

|  | Nine Months Ended September 30, |  |
| :---: | :---: | :---: |
|  | 2011 | 2010 |
| Cash paid for interest | \$ 39,809 | \$ 47,976 |
| Cash paid for income tax | 35,612 | 47,351 |
| Significant non-cash transactions: |  |  |
| Loans foreclosed and transferred to other real estate owned and foreclosed assets | 16,803 | 12,707 |
| Loans to facilitate the sale of other real estate owned | 75 | 869 |
| Common stock/treasury stock issued to the Corporation s 401(k) stock purchase plan | 1,360 | 7,626 |

Reclassifications. Certain items in prior financial statements have been reclassified to conform to the current presentation.

## Table of Contents

## Note 2 - Securities

A summary of the amortized cost and estimated fair value of securities, excluding trading securities, is presented below.

| Residential mortgage-backed securities |  | 2,244,650 |  | 149,689 |  | 1 |  | 2,394,338 |  | 1,989,299 |  | 103,018 |  | 987 |  | 2,091,330 |
| States and political subdivisions |  | 1,972,996 |  | 134,610 |  | 39 |  | 2,107,567 |  | 2,008,618 |  | 53,358 |  | 21,676 |  | 2,040,300 |
| Other |  | 37,992 |  |  |  |  |  | 37,992 |  | 38,809 |  |  |  |  |  | 38,809 |
| Total |  | 5,029,000 |  | 310,852 | \$ | 40 |  | 5,339,812 |  | 5,009,759 |  | 170,374 |  | 22,663 |  | 5,157,470 |

All mortgage-backed securities included in the above table were issued by U.S. government agencies and corporations. Securities with limited marketability, such as stock in the Federal Reserve Bank and the Federal Home Loan Bank, are carried at cost and are reported as other available for sale securities in the above table. The carrying value of securities pledged to secure public funds, trust deposits, repurchase agreements and for other purposes, as required or permitted by law was $\$ 2.2$ billion and $\$ 2.3$ billion at September 30, 2011 and December 31, 2010.

As of September 30, 2011, securities, with unrealized losses segregated by length of impairment, were as follows:

|  | Less than $\mathbf{1 2}$ Months $\quad \begin{gathered}\text { More than } 12 \\ \text { Months }\end{gathered}$ |  |  |  |  |  | Total |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Estimated <br> Fair Value | Unrealized Losses |  | Estimated Fair Value | Unrealized Losses |  | Estimated Fair Value | Unrealized Losses |  |
| Held to Maturity |  |  |  |  |  |  |  |  |  |
| Residential mortgage-backed securities | \$ 6,752 | \$ | 6 | \$ | \$ |  | \$ 6,752 | \$ | 6 |
| Total | \$ 6,752 | \$ | 6 | \$ | \$ |  | \$ 6,752 | \$ | 6 |
| Available for Sale |  |  |  |  |  |  |  |  |  |
| Residential mortgage-backed securities | \$ 246 | \$ | 1 | \$ | \$ |  | \$ 246 | \$ | 1 |
| States and political subdivisions | 3,296 |  | 31 | 686 |  | 8 | 3,982 |  | 39 |
| Total | \$ 3,542 | \$ | 32 | \$ 686 | \$ | 8 | \$4,228 | \$ | 40 |

Declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of the impairment related to other

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

factors is recognized in other comprehensive income. In estimating other-than-temporary impairment losses, management considers, among other things, (i) the length of time and the extent to which the fair value has been less than cost, (ii) the financial condition and near-term prospects of the issuer, and (iii) the intent and ability of the Corporation to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in cost.

Management has the ability and intent to hold the securities classified as held to maturity in the table above until they mature, at which time the Corporation will receive full value for the securities. Furthermore, as of September 30, 2011, management does not have the intent to sell any of the securities classified as available for sale in the table above and believes that it is more likely than not that the Corporation will not have to sell any such securities before a recovery of cost. Any unrealized losses are largely due to increases in market interest rates over the yields available at the time the underlying securities were purchased. The fair value is expected to recover as the bonds approach their maturity date or repricing date or if market yields for such investments decline. Management does not believe any of the securities are impaired due to reasons of credit quality. Accordingly, as of September 30, 2011, management believes the impairments detailed in the table above are temporary and no impairment loss has been realized in the Corporation s consolidated income statement.

## Table of Contents

The amortized cost and estimated fair value of securities, excluding trading securities, at September 30, 2011 are presented below by contractual maturity. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations. Residential mortgage-backed securities and equity securities are shown separately since they are not due at a single maturity date.

|  | Held to Maturity |  | Available for Sale |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Amortized Cost | Estimated Fair Value | Amortized Cost | Estimated Fair Value |
| Due in one year or less | \$ | \$ | 32,816 | \$ 33,229 |

Loan Origination/Risk Management. The Corporation has certain lending policies and procedures in place that are designed to maximize loan income within an acceptable level of risk. Management reviews and approves these policies and procedures on a regular basis. A reporting system supplements the review process by providing management with frequent reports related to loan production, loan quality, concentrations of credit, loan delinquencies and non-performing and potential problem loans. Diversification in the loan portfolio is a means of managing risk associated with fluctuations in economic conditions.

Commercial and industrial loans are underwritten after evaluating and understanding the borrower s ability to operate profitably and prudently expand its business. Underwriting standards are designed to promote relationship banking rather than transactional banking. Once it is determined that the borrower s management possesses sound ethics and solid business acumen, the Corporation $s$ management examines current and projected cash flows to determine the ability of the borrower to repay their obligations as agreed. Commercial and industrial loans are primarily made based on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. The cash flows of borrowers, however, may not be as expected and the collateral securing these loans may fluctuate in value. Most commercial and industrial loans are secured by the assets being financed or other business assets such as accounts receivable or inventory and may incorporate a personal guarantee; however, some short-term loans may be made on an unsecured basis. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers.

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

Commercial real estate loans are subject to underwriting standards and processes similar to commercial and industrial loans, in addition to those of real estate loans. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Commercial real estate lending typically involves higher loan principal amounts and the repayment of these loans is generally largely dependent on the successful operation of the property securing the loan or the business conducted on the property securing the loan. Commercial real estate loans may be more adversely affected by conditions in the real estate markets or in the general economy. The properties securing the Corporation s commercial real estate portfolio are diverse in terms of type and geographic location. This diversity helps reduce the Corporation s exposure to adverse economic events that affect any single market or industry. Management monitors and evaluates commercial real estate loans based on collateral, geography and risk grade criteria. As a general rule, the Corporation avoids financing single-purpose

## Table of Contents

projects unless other underwriting factors are present to help mitigate risk. The Corporation also utilizes third-party experts to provide insight and guidance about economic conditions and trends affecting market areas it serves. In addition, management tracks the level of owner-occupied commercial real estate loans versus non-owner occupied loans. At September 30, 2011, approximately $60 \%$ of the outstanding principal balance of the Corporation s commercial real estate loans were secured by owner-occupied properties.

With respect to loans to developers and builders that are secured by non-owner occupied properties that the Corporation may originate from time to time, the Corporation generally requires the borrower to have had an existing relationship with the Corporation and have a proven record of success. Construction loans are underwritten utilizing feasibility studies, independent appraisal reviews, sensitivity analysis of absorption and lease rates and financial analysis of the developers and property owners. Construction loans are generally based upon estimates of costs and value associated with the complete project. These estimates may be inaccurate. Construction loans often involve the disbursement of substantial funds with repayment substantially dependent on the success of the ultimate project. Sources of repayment for these types of loans may be pre-committed permanent loans from approved long-term lenders, sales of developed property or an interim loan commitment from the Corporation until permanent financing is obtained. These loans are closely monitored by on-site inspections and are considered to have higher risks than other real estate loans due to their ultimate repayment being sensitive to interest rate changes, governmental regulation of real property, general economic conditions and the availability of long-term financing.

The Corporation originates consumer loans utilizing a computer-based credit scoring analysis to supplement the underwriting process. To monitor and manage consumer loan risk, policies and procedures are developed and modified, as needed, jointly by line and staff personnel. This activity, coupled with relatively small loan amounts that are spread across many individual borrowers, minimizes risk. Additionally, trend and outlook reports are reviewed by management on a regular basis. Underwriting standards for home equity loans are heavily influenced by statutory requirements, which include, but are not limited to, a maximum loan-to-value percentage of $80 \%$, collection remedies, the number of such loans a borrower can have at one time and documentation requirements.

The Corporation maintains an independent loan review department that reviews and validates the credit risk program on a periodic basis. Results of these reviews are presented to management. The loan review process complements and reinforces the risk identification and assessment decisions made by lenders and credit personnel, as well as the Corporation spolicies and procedures.

Concentrations of Credit. Most of the Corporation s lending activity occurs within the State of Texas, including the four largest metropolitan areas of Austin, Dallas/Ft. Worth, Houston and San Antonio, as well as other markets. The majority of the Corporation s loan portfolio consists of commercial and industrial and commercial real estate loans. Other than energy loans, as of September 30, 2011, there were no concentrations of loans related to any single industry in excess of $10 \%$ of total loans.

Student Loans Held for Sale. Prior to the second quarter of 2008, the Corporation originated student loans primarily for sale in the secondary market. These loans were generally sold on a non-recourse basis and were carried at the lower of cost or market on an aggregate basis. During the second quarter of 2008 , the Corporation elected to discontinue the origination of student loans for resale, aside from previously outstanding commitments. All remaining student loans were sold during the second quarter of 2010.

Foreign Loans. The Corporation has U.S. dollar denominated loans and commitments to borrowers in Mexico. The outstanding balance of these loans and the unfunded amounts available under these commitments were not significant at September 30, 2011 or December 31, 2010.

Non-Accrual and Past Due Loans. Loans are considered past due if the required principal and interest payments have not been received as of the date such payments were due. Loans are placed on non-accrual status when, in management s opinion, the borrower may be unable to meet payment obligations as they become due, as well as when required by regulatory provisions. In determining whether or not a borrower may be unable to meet payment obligations for each class of loans, the Corporation considers the borrower s debt service capacity through the analysis of current financial information, if available, and/or current information with regards to the Corporation s collateral position. Regulatory provisions would typically require the placement of a loan on non-accrual status if (i) principal or interest has been in default for a period of 90 days or more unless the loan is both well secured and in the process of collection, or (ii) full payment of principal and interest is not expected. Loans may be placed on non-accrual status regardless of whether or not such loans are considered past due. When interest accrual is discontinued, all unpaid accrued interest is reversed. Interest income on non-accrual loans is recognized only to the extent that cash payments are received in excess of principal due. A loan may be returned to accrual status when all the principal and interest amounts contractually due are brought current and future principal and interest amounts contractually due are reasonably assured, which is typically evidenced by a sustained period (at least six months) of repayment performance by the borrower.

## Table of Contents

Non-accrual loans, segregated by class of loans, were as follows:

|  | September 30, 2011 | $\begin{gathered} \text { December 31, } \\ 2010 \end{gathered}$ | $\begin{gathered} \text { September 30, } \\ 2010 \end{gathered}$ |
| :---: | :---: | :---: | :---: |
| Commercial and industrial: |  |  |  |
| Energy | \$ | \$ | \$ |
| Other commercial | 58,208 | 60,408 | 66,128 |
| Commercial real estate: |  |  |  |
| Buildings, land and other | 45,333 | 64,213 | 64,813 |
| Construction | 1,821 | 9,299 | 10,345 |
| Consumer real estate | 4,060 | 2,758 | 2,541 |
| Consumer and other | 756 | 462 | 1,073 |
| Total | \$ 110,178 | \$ 137,140 | \$ 144,900 |

As of September 30, 2011, non-accrual loans reported in the table above included $\$ 8.7$ million ( $\$ 191$ thousand in other commercial loans, $\$ 7.1$ million in buildings, land and other loans, $\$ 960$ thousand in consumer real estate and $\$ 469$ thousand in consumer loans) related to loans that were restructured as troubled debt restructurings during 2011. See the section captioned Troubled Debt Restructurings elsewhere in this note.

Had non-accrual loans performed in accordance with their original contract terms, the Corporation would have recognized additional interest income, net of tax, of approximately $\$ 823$ thousand and $\$ 2.6$ million for the three and nine months ended September 30, 2011, compared to $\$ 944$ thousand and $\$ 2.9$ million for the three and nine months ended September 30, 2010.

An age analysis of past due loans (including both accruing and non-accruing loans), segregated by class of loans, as of September 30, 2011 was as follows:

|  | $\begin{gathered} \text { Loans } \\ \text { 30-89 } \\ \text { Days } \\ \text { Past Due } \end{gathered}$ |  | Loans 90 or <br> More <br> Days <br> Past Due |  | Total <br> Past Due Loans |  | Current <br> Loans |  | Total <br> Loans |  | Accruing <br> Loans 90 <br> or <br> More Days <br> Past Due |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Consumer and other |  | 2,204 |  | 140 |  | 2,344 |  | 311,999 |  | 314,343 |  | 140 |
| Unearned discounts |  |  |  |  |  |  |  | $(16,511)$ |  | $(16,511)$ |  |  |
| Total | \$ | 72,195 | \$ | 52,199 |  | 24,394 |  | 7,965,183 |  | 8,089,577 |  | 17,682 |

Impaired Loans. Loans are considered impaired when, based on current information and events, it is probable the Corporation will be unable to collect all amounts due in accordance with the original contractual terms of the loan agreement, including scheduled principal and interest payments. Impairment is evaluated in total for smaller-balance loans of a similar nature and on an individual loan basis for other loans. If a loan is impaired, a specific valuation allowance is allocated, if necessary, so that the loan is reported net, at the present value of estimated future cash flows using the loan s existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Interest payments on impaired loans are typically applied to principal unless collectability of the principal amount is reasonably assured, in which case interest is recognized on a cash basis. Impaired loans, or portions thereof, are charged off when deemed uncollectible.

Regulatory guidelines require the Corporation to reevaluate the fair value of collateral supporting impaired collateral dependent loans on at least an annual basis. While the Corporation s policy is to comply with the regulatory guidelines, the Corporation s general practice is to reevaluate the fair value of collateral supporting impaired collateral dependent loans on a quarterly basis. Thus, appraisals are never considered to be outdated, and the Corporation does not need to make any adjustments to the appraised values. The fair value of collateral supporting impaired collateral dependent loans is evaluated by the Corporation s internal appraisal services using a methodology that is consistent with the Uniform Standards of Professional Appraisal Practice. The fair value of collateral supporting impaired collateral dependent construction loans is based on an as is valuation.

## Table of Contents

Impaired loans are set forth in the following table. No interest income was recognized on impaired loans subsequent to their classification as impaired.

|  | Unpaid Contractual Principal Balance | Recorded <br> Investment With No Allowance | Recorded Investment With Allowance | Total Recorded Investment | Related Allowance | Average Recorded Investment |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Troubled Debt Restructurings. The restructuring of a loan is considered a troubled debt restructuring if both (i) the borrower is experiencing financial difficulties and (ii) the creditor has granted a concession. Concessions may include interest rate reductions or below market interest rates, principal forgiveness, restructuring amortization schedules and other actions intended to minimize potential losses. Effective July 1, 2011, the Corporation adopted the provisions of Accounting Standards Update ( ASU ) No. 2011-02, Receivables (Topic 310) - A Creditor s Determination of Whether a Restructuring Is a Troubled Debt Restructuring. As such, the Corporation reassessed all loan modifications occurring since January 1, 2011 for identification as troubled debt restructurings.

Troubled debt restructurings are set forth in the following table. There were no troubled debt restructurings during 2010.

|  | Three <br> Months Ended September 30, 2011 |  | Nine <br> Months Ended September 30, 2011 |  |
| :---: | :---: | :---: | :---: | :---: |

| Consumer real estate |  | 969 |  | 969 |
| Consumer |  | 469 |  | 469 |
|  | \$ | 4,954 | \$ | 9,148 |

## Table of Contents

All of the loans identified as troubled debt restructurings by the Corporation were previously on non-accrual status and reported as impaired loans prior to restructuring. The modifications primarily related to extending the amortization periods of the loans. The Corporation did not grant interest-rate concessions on any restructured loan. All loans restructured during the nine months ended September 30, 2011 are on non-accrual status as of September 30, 2011. See the section captioned Non-accrual Loans elsewhere in this note. Because the loans were classified and on non-accrual status both before and after restructuring, the modifications did not impact the Corporation s determination of the allowance for loan losses. As of September 30, 2011, there have been no defaults on any loans that were modified as troubled debt restructurings during the preceding twelve months.

Credit Quality Indicators. As part of the on-going monitoring of the credit quality of the Corporation s loan portfolio, management tracks certain credit quality indicators including trends related to (i) the weighted-average risk grade of commercial loans, (ii) the level of classified commercial loans, (iii) the delinquency status of consumer loans (see details above) (iv) net charge-offs, (v) non-performing loans (see details above) and (vi) the general economic conditions in the State of Texas.

The Corporation utilizes a risk grading matrix to assign a risk grade to each of its commercial loans. Loans are graded on a scale of 1 to 14 . A description of the general characteristics of the 14 risk grades is as follows:

Grades 1, 2 and 3 - These grades include loans to very high credit quality borrowers of investment or near investment grade. These borrowers are generally publicly traded (grades 1 and 2), have significant capital strength, moderate leverage, stable earnings and growth, and readily available financing alternatives. Smaller entities, regardless of strength, would generally not fit in these grades.

Grades 4 and 5 - These grades include loans to borrowers of solid credit quality with moderate risk. Borrowers in these grades are differentiated from higher grades on the basis of size (capital and/or revenue), leverage, asset quality and the stability of the industry or market area.

Grades 6,7 and 8 - These grades include pass grade loans to borrowers of acceptable credit quality and risk. Such borrowers are differentiated from Grades 4 and 5 in terms of size, secondary sources of repayment or they are of lesser stature in other key credit metrics in that they may be over-leveraged, under capitalized, inconsistent in performance or in an industry or an economic area that is known to have a higher level of risk, volatility, or susceptibility to weaknesses in the economy.

Grade 9 - This grade includes loans on management s watch list and is intended to be utilized on a temporary basis for pass grade borrowers where a significant risk-modifying action is anticipated in the near term.

Grade 10 - This grade is for Other Assets Especially Mentioned in accordance with regulatory guidelines. This grade is intended to be temporary and includes loans to borrowers whose credit quality has clearly deteriorated and are at risk of further decline unless active measures are taken to correct the situation.

Grade 11-This grade includes Substandard loans, in accordance with regulatory guidelines, for which the accrual of interest has not been stopped. By definition under regulatory guidelines, a Substandard loan has defined weaknesses which make payment default or principal exposure likely, but not yet certain. Such loans are apt to be dependent upon collateral liquidation, a secondary source of repayment or an event outside of the normal course of business.

Grade 12 - This grade includes Substandard loans, in accordance with regulatory guidelines, for which the accrual of interest has been stopped. This grade includes loans where interest is more than 120 days past due and not fully secured and loans where a specific valuation allowance may be necessary, but generally does not exceed $30 \%$ of the principal balance.

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

Grade 13 - This grade includes Doubtful loans in accordance with regulatory guidelines. Such loans are placed on non-accrual status and may be dependent upon collateral having a value that is difficult to determine or upon some near-term event which lacks certainty. Additionally, these loans generally have a specific valuation allowance in excess of $30 \%$ of the principal balance.

Grade 14 - This grade includes Loss loans in accordance with regulatory guidelines. Such loans are to be charged-off or charged-down when payment is acknowledged to be uncertain or when the timing or value of payments cannot be determined. Loss is not intended to imply that the loan or some portion of it will never be paid, nor does it in any way imply that there has been a forgiveness of debt.

## Table of Contents

In monitoring credit quality trends in the context of assessing the appropriate level of the allowance for loan losses, the Corporation monitors portfolio credit quality by the weighted-average risk grade of each class of commercial loan. Individual relationship managers review updated financial information for all pass grade loans to recalculate the risk grade on at least an annual basis. When a loan has a calculated risk grade of 9 , it is still considered a pass grade loan; however, it is considered to be on management $s$ watch list, where a significant risk-modifying action is anticipated in the near term. When a loan has a calculated risk grade of 10 or higher, a special assets officer monitors the loan on an on-going basis. The following table presents weighted average risk grades for all commercial loans by class.

|  | Septem <br> Weighted Average Risk Grade | er | 30, 2011 Loans | Decem <br> Weighted <br> Average <br> Risk Grade | $\text { er 31, } 2010$ <br> Loans | Septem <br> Weighted Average Risk Grade | er 3 | $\text { 30, } 2010$ <br> Loans |

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

The Corporation has established maximum loan to value standards to be applied during the origination process of commercial and consumer real estate loans. The Corporation does not subsequently monitor loan-to-value ratios (either individually or on a weighted-average basis) for loans that are subsequently considered to be of a pass grade (grades 9 or better) and/or current with respect to principal and interest payments. As stated above, when an individual commercial real estate loan has a calculated risk grade of 10 or higher, a special assets officer analyzes the loan to determine whether the loan is impaired. At that time, the Corporation reassesses the loan to value position in the loan. If the loan is determined to be collateral dependent, specific allocations of the allowance for loan losses are made for the amount of any collateral deficiency. If a collateral deficiency is ultimately deemed to be uncollectible, the amount is charged-off. These loans and related assessments of collateral position are monitored on an individual, case-by-case basis. The Corporation does not monitor loan-to-value ratios on a weighted-average basis for commercial real estate loans having a calculated risk grade of 10 or higher. Nonetheless, there were four commercial real estate loans having a calculated risk grade of 10 or higher in excess of $\$ 5$ million as of September 30, 2011. Three of the loans totaled $\$ 29.7$ million and had a weighted-average loan-to-value ratio of $62.4 \%$. The fourth loan, totaling $\$ 7.3$ million, is structured as a borrowing base facility secured by numerous rotating

## Table of Contents

lots and single family residences that generally have a loan-to-value of $80 \%$ or less. When an individual consumer real estate loan becomes past due by more than 10 days, the assigned relationship manager will begin collection efforts. The Corporation only reassesses the loan to value position in a consumer real estate loan if, during the course of the collections process, it is determined that the loan has become collateral dependent, and any collateral deficiency is recognized as a charge-off to the allowance for loan losses. Accordingly, the Corporation does not monitor loan-to-value ratios on a weighted-average basis for collateral dependent consumer real estate loans.

Generally, a commercial loan, or a portion thereof, is charged-off immediately when it is determined, through the analysis of any available current financial information with regards to the borrower, that the borrower is incapable of servicing unsecured debt, there is little or no prospect for near term improvement and no realistic strengthening action of significance is pending or, in the case of secured debt, when it is determined, through analysis of current information with regards to the Corporation s collateral position, that amounts due from the borrower are in excess of the calculated current fair value of the collateral. Notwithstanding the foregoing, generally, commercial loans that become past due 180 cumulative days are classified as a loss and charged-off. Generally, a consumer loan, or a portion thereof, is charged-off in accordance with regulatory guidelines which provide that such loans be charged-off when the Corporation becomes aware of the loss, such as from a triggering event that may include new information about a borrower s intent/ability to repay the loan, bankruptcy, fraud or death, among other things, but in no case should the charge-off exceed specified delinquency timeframes. Such delinquency timeframes state that closed-end retail loans (loans with pre-defined maturity dates, such as real estate mortgages, home equity loans and consumer installment loans) that become past due 120 cumulative days and open-end retail loans (loans that roll-over at the end of each term, such as home equity lines of credit) that become past due 180 cumulative days should be classified as a loss and charged-off.

Net (charge-offs)/recoveries, segregated by class of loans, were as follows:

In assessing the general economic conditions in the State of Texas, management monitors and tracks the Texas Leading Index ( TLI ), which is produced by the Federal Reserve Bank of Dallas. The TLI is a single summary statistic that is designed to signal the likelihood of the Texas economy s transition from expansion to recession and vice vers. Management believes this index provides a reliable indication of the direction of overall credit quality. The TLI is a composite of the following eight leading indicators: (i) Texas Value of the Dollar, (ii) U.S. Leading Index, (iii) real oil prices (iv) well permits, (v) initial claims for unemployment insurance, (vi) Texas Stock Index, (vii) Help-Wanted Index and (viii) average weekly hours worked in manufacturing. The TLI totaled 119.6 at August 31, 2011 (most recent date available), 118.2 at December 31, 2010 and 115.2 at September 30, 2010. A higher TLI value implies more favorable economic conditions.

Allowance for Loan Losses. The allowance for loan losses is a reserve established through a provision for loan losses charged to expense, which represents management $s$ best estimate of probable losses that have been incurred within the existing portfolio of loans. The allowance, in the judgment of management, is necessary to reserve for estimated loan losses and risks inherent in the loan portfolio. The Corporation s allowance for loan loss methodology follows the accounting guidance set forth in U.S. generally accepted accounting principles and the Interagency Policy Statement on the Allowance for Loan and Lease Losses, which was jointly issued by the Corporation s regulatory agencies. In that regard, the Corporation s allowance for loan losses includes allowance allocations calculated in accordance with ASC Topic 310, Receivables and allowance allocations calculated in accordance with ASC Topic 450, Contingencies. Accordingly, the methodology is based on historical loss experience by type of credit and internal risk grade, specific homogeneous risk pools and specific loss allocations, with adjustments for current events and conditions. The Corporation s process for determining the appropriate level of the allowance for loan losses is designed to account for credit deterioration as it occurs. The provision for loan losses reflects loan quality trends, including the levels of and trends related to non-accrual loans, past due loans, potential problem loans, criticized loans and net charge-offs or recoveries, among other factors. The provision for loan losses also reflects the totality of actions taken on all loans for a particular period. In other words, the amount of the provision reflects not only

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

the necessary increases in the allowance for loan losses related to newly identified criticized loans, but it also reflects actions taken related to other loans including, among other things, any necessary increases or decreases in required allowances for specific loans or loan pools.

## Table of Contents

The level of the allowance reflects management s continuing evaluation of industry concentrations, specific credit risks, loan loss and recovery experience, current loan portfolio quality, present economic, political and regulatory conditions and unidentified losses inherent in the current loan portfolio. Portions of the allowance may be allocated for specific credits; however, the entire allowance is available for any credit that, in management s judgment, should be charged off. While management utilizes its best judgment and information available, the ultimate determination of the appropriate level of the allowance is dependent upon a variety of factors beyond the Corporation s control, including, among other things, the performance of the Corporation s loan portfolio, the economy, changes in interest rates and the view of the regulatory authorities toward loan classifications. The Corporation monitors whether or not the allowance for loan loss allocation model, as a whole, calculates an appropriate level of allowance for loan losses that moves in direct correlation to the general macroeconomic and loan portfolio conditions the Corporation experiences over time.

The Corporation s allowance for loan losses consists of three elements: (i) specific valuation allowances determined in accordance with ASC Topic 310 based on probable losses on specific loans; (ii) historical valuation allowances determined in accordance with ASC Topic 450 based on historical loan loss experience for similar loans with similar characteristics and trends, adjusted, as necessary, to reflect the impact of current conditions; and (iii) general valuation allowances determined in accordance with ASC Topic 450 based on general economic conditions and other risk factors both internal and external to the Corporation.

The allowances established for probable losses on specific loans are based on a regular analysis and evaluation of problem loans. Loans are classified based on an internal credit risk grading process that evaluates, among other things: (i) the obligor sability to repay; (ii) the underlying collateral, if any; and (iii) the economic environment and industry in which the borrower operates. This analysis is performed at the relationship manager level for all commercial loans. When a loan has a calculated grade of 10 or higher, a special assets officer analyzes the loan to determine whether the loan is impaired and, if impaired, the need to specifically allocate a portion of the allowance for loan losses to the loan. Specific valuation allowances are determined by analyzing the borrower $s$ ability to repay amounts owed, collateral deficiencies, the relative risk grade of the loan and economic conditions affecting the borrower $s$ industry, among other things.

Historical valuation allowances are calculated based on the historical gross loss experience of specific types of loans and the internal risk grade of such loans at the time they were charged-off. The Corporation calculates historical gross loss ratios for pools of similar loans with similar characteristics based on the proportion of actual charge-offs experienced to the total population of loans in the pool. The historical gross loss ratios are periodically updated based on actual charge-off experience. A historical valuation allowance is established for each pool of similar loans based upon the product of the historical gross loss ratio and the total dollar amount of the loans in the pool. The Corporation s pools of similar loans include similarly risk-graded groups of commercial and industrial loans, commercial real estate loans, consumer real estate loans and consumer and other loans.

The components of the general valuation allowance include (i) the additional reserves allocated to specific loan portfolio segments as a result of applying an environmental risk adjustment factor to the base historical loss allocation and (ii) the additional reserves that are not allocated to specific loan portfolio segments including allocations for groups of similar loans with risk characteristics that exceed certain concentration limits established by management.

The environmental adjustment factor is based upon a more qualitative analysis of risk and is calculated through a survey of senior officers who are involved in credit making decisions at a corporate-wide and/or regional level. On a quarterly basis, survey participants rate the degree of various risks utilizing a numeric scale that translates to varying grades of high, moderate or low levels of risk. The results are then input into a risk-weighting matrix to determine an appropriate environmental risk adjustment factor. The various risks that may be considered in the determination of the environmental adjustment factor include, among other things, (i) the experience, ability and effectiveness of the bank $s$ lending management and staff; (ii) the effectiveness of the Corporation s loan policies, procedures and internal controls; (iii) changes in asset quality; (iv) the impact of legislative and governmental influences affecting industry sectors; (v) the effectiveness of the internal loan review function; (vi) the impact of competition on loan structuring and pricing; and (vii) the impact of rising interest rates on portfolio risk. In periods where the surveyed risks are perceived to be higher, the risk-weighting matrix will generally result in a higher environmental adjustment factor, which, in turn will result in higher levels of general valuation allowance allocations. The opposite holds true in periods where the surveyed risks are perceived to be lower. The environmental adjustment factor resulted in additional general valuation allowance allocations to the various loan portfolio segments totaling $\$ 13.6$ million at September 30, 2011, $\$ 9.5$ million at December 31, 2010 and $\$ 10.1$ million at September 30, 2010.

Certain general valuation allowances are not allocated to specific loan portfolio segments and are reported as the unallocated portion of the allowance for loan losses. Included in these general valuation allowances are allocations for groups of similar loans with risk characteristics that exceed certain concentration limits established by management. Concentration risk limits have been established, among other things, for certain industry concentrations, large balance and highly leveraged credit relationships that exceed specified risk grades, and loans originated with policy, credit and/or collateral exceptions that exceed specified risk grades. In addition, during the first quarter of 2011, the Corporation further refined its methodology for the determination of general valuation allowances to also (i) provide additional allocations for loans that did not undergo a

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

## Table of Contents

separate, independent concurrence review during the underwriting process (generally those loans under $\$ 1.0$ million at origination), (ii) reduce the minimum balance/commitment threshold for which allocations are made for highly leveraged credit relationships that exceed specified risk grades, (iii) lower the maximum risk grade thresholds for highly leveraged credit relationships, and (iv) include a reduction factor for recoveries of prior charge-offs to compensate for the fact that historical loss allocations are based upon gross charge-offs rather than net. The net effect of these changes to the Corporation s methodology for the determination of general valuation allowances did not significantly impact the provision for loan losses recorded during the nine months ended September 30, 2011.

The following table presents details of the unallocated portion of the allowance for loan losses.

|  | September 30, <br> Excessive industry concentrations | December 31, <br> $\mathbf{2 0 1 0}$ | September 30, <br> $\mathbf{2 0 1 0}$ |  |
| :--- | :---: | :---: | :---: | ---: |
| Large relationship concentrations | $\$ 1,961$ | $\$$ | 1,720 | $\$$ |
| Highly-leveraged credit relationships | 2,185 | 2,127 | 1,878 |  |
| Policy exceptions | 3,763 |  |  |  |
| Credit and collateral exceptions | 1,950 |  | 2,414 | 2,422 |
| Loans not reviewed by concurrence | 1,985 | 557 | 616 |  |
| Adjustment for recoveries | 9,039 |  |  |  |
| General macroeconomic risk | $(11,948)$ |  | 4,099 |  |
|  | 22,548 |  | 17,978 |  |

The Corporation monitors whether or not the allowance for loan loss allocation model, as a whole, calculates an appropriate level of allowance for loan losses that moves in direct correlation to the general macroeconomic and loan portfolio conditions the Corporation experiences over time. In assessing the general macroeconomic trends/conditions, the Corporation analyzes trends in the components of the TLI, as well as any available information related to regional, national and international economic conditions and events and the impact such conditions and events may have on the Corporation and its customers. With regard to assessing loan portfolio conditions, the Corporation analyzes trends in weighted-average portfolio risk-grades, classified and non-performing loans and charge-off activity. In periods where general macroeconomic and loan portfolio conditions are in a deteriorating trend or remain at deteriorated levels, based on historical trends, the Corporation would expect to see the allowance for loan loss allocation model, as a whole, calculate higher levels of required allowances than in periods where general macroeconomic and loan portfolio conditions are in an improving trend or remain at an elevated level, based on historical trends.

The following tables detail activity in the allowance for loan losses by portfolio segment for the three and nine months ended September 30, 2011 and 2010. Allocation of a portion of the allowance to one category of loans does not preclude its availability to absorb losses in other categories.

## Table of Contents

The Corporation s recorded investment in loans as of September 30, 2011, December 31, 2010 and September 30, 2010 related to each balance in the allowance for loan losses by portfolio segment and disaggregated on the basis of the Corporation s impairment methodology was as follows:

|  | Commercial <br> And <br> Industrial | Commercial <br> Real Estate | Consumer <br> Real Estate | Consumer <br> and Other | Unearned <br> Discounts | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Note 4-Goodwill and Other Intangible Assets

Goodwill and other intangible assets are presented in the table below. The increases in goodwill and certain other intangible assets were related to the acquisition of Clark Benefit Group, an independent San Antonio based insurance agency that specialized in providing employee benefits to small and mid-size businesses, on May 1, 2011. The purchase of Clark Benefit Group did not significantly impact the Corporation s financial Statements.

## Note 6 - Commitments and Contingencies

Financial Instruments with Off-Balance-Sheet Risk. In the normal course of business, the Corporation enters into various transactions, which, in accordance with generally accepted accounting principles are not included in its consolidated balance sheets. The Corporation enters into these transactions to meet the financing needs of its customers. These transactions include commitments to extend credit and standby letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in the consolidated balance sheets. The Corporation minimizes its exposure to loss under these commitments by subjecting them to credit approval and monitoring procedures.

The Corporation enters into contractual commitments to extend credit, normally with fixed expiration dates or termination clauses, at specified rates and for specific purposes. Substantially all of the Corporation s commitments to extend credit are contingent upon customers maintaining specific credit standards at the time of loan funding. Standby letters of credit are written conditional commitments issued by the Corporation to

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

guarantee the performance of a customer to a third party. In the event the customer does not perform in accordance with the terms of the agreement with the third party, the Corporation would be required to fund the commitment. The maximum potential amount of future payments the Corporation could be required to make is represented by the contractual amount of the commitment. If the commitment were funded, the Corporation would be entitled to seek recovery from the customer. The Corporation spolicies generally require that standby letter of credit arrangements contain security and debt covenants similar to those contained in loan agreements.

The Corporation considers the fees collected in connection with the issuance of standby letters of credit to be representative of the fair value of its obligation undertaken in issuing the guarantee. In accordance with applicable accounting standards related to guarantees, the Corporation defers fees collected in connection with the issuance of standby letters of credit. The fees are then recognized in income proportionately over the life of the standby letter of credit agreement. The deferred standby letter of credit fees represent the fair value of the Corporation s potential obligations under the standby letter of credit guarantees.

## Table of Contents

Financial instruments with off-balance-sheet risk were as follows:

|  | September 30, <br>  <br> Commitments to extend credit | December 31, <br> $\mathbf{2 0 1 0}$, |
| :--- | ---: | ---: |
| Standby letters of credit | $\$ 4,787,910$ | $\$ 4,528,196$ |
| Deferred standby letter of credit fees | 235,300 | 294,116 |

Lease Commitments. The Corporation leases certain office facilities and office equipment under operating leases. Rent expense for all operating leases totaled $\$ 5.3$ million and $\$ 16.1$ million for the three and nine months ended September 30, 2011 and $\$ 5.4$ million and $\$ 16.1$ million for the three and nine months ended September 30, 2010. There has been no significant change in the future minimum lease payments payable by the Corporation since December 31, 2010. See the 2010 Form 10-K for information regarding these commitments.

Litigation. The Corporation is subject to various claims and legal actions that have arisen in the course of conducting business. Management does not expect the ultimate disposition of these matters to have a material adverse impact on the Corporation sfinancial statements.

## Note 7 - Regulatory Matters

Regulatory Capital Requirements. Banks and bank holding companies are subject to various regulatory capital requirements administered by state and federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weighting and other factors.

Quantitative measures established by regulations to ensure capital adequacy require the maintenance of minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier 1 capital to adjusted quarterly average assets (as defined).

Cullen/Frost s and Frost Bank s Tier 1 capital consists of shareholders equity excluding unrealized gains and losses on securities available for sale, the accumulated gain or loss on effective cash flow hedging derivatives, the net actuarial gain/loss on the Corporation s defined benefit post-retirement benefit plans, goodwill and other intangible assets. Tier 1 capital for Cullen/Frost also includes $\$ 120$ million of trust preferred securities issued by an unconsolidated subsidiary trust. Cullen/Frost s and Frost Bank s total capital is comprised of Tier 1 capital for each entity plus a permissible portion of the allowance for loan losses. The Corporation s aggregate $\$ 100$ million of $5.75 \%$ fixed-to-floating rate subordinated notes are not included in Tier 1 capital but are included in total capital of Cullen/Frost.

The Tier 1 and total capital ratios are calculated by dividing the respective capital amounts by risk-weighted assets. Risk-weighted assets are calculated based on regulatory requirements and include total assets, excluding goodwill and other intangible assets, allocated by risk weight category, and certain off-balance-sheet items (primarily loan commitments). The leverage ratio is calculated by dividing Tier 1 capital by adjusted quarterly average total assets, which exclude goodwill and other intangible assets.

## Table of Contents

Actual and required capital ratios for Cullen/Frost and Frost Bank were as follows:
$\left.\begin{array}{llllllll} & & & \begin{array}{c}\text { Minimum Required } \\ \text { for Capital Adequacy } \\ \text { Purposes }\end{array} & \begin{array}{c}\text { Required to be } \\ \text { Considered Well } \\ \text { Capitalized }\end{array} \\ \text { Capital } \\ \text { Amount }\end{array}\right\}$

Management believes that, as of September 30, 2011, Cullen/Frost and its bank subsidiary, Frost Bank, were well capitalized based on the ratios presented above.

Cullen/Frost is subject to the regulatory capital requirements administered by the Federal Reserve, while Frost Bank is subject to the regulatory capital requirements administered by the Office of the Comptroller of the Currency and the Federal Deposit Insurance Corporation. Regulatory authorities can initiate certain mandatory actions if Cullen/Frost or Frost Bank fail to meet the minimum capital requirements, which could have a direct material effect on the Corporation s financial statements. Management believes, as of September 30, 2011, that Cullen/Frost and Frost Bank meet all capital adequacy requirements to which they are subject.

Dividend Restrictions. In the ordinary course of business, Cullen/Frost is dependent upon dividends from Frost Bank to provide funds for the payment of dividends to shareholders and to provide for other cash requirements. Banking regulations may limit the amount of dividends that may be paid. Approval by regulatory authorities is required if the effect of dividends declared would cause the regulatory capital of Frost Bank to fall below specified minimum levels. Approval is also required if dividends declared exceed the net profits for that year combined with the retained net profits for the preceding two years. Under the foregoing dividend restrictions and while maintaining its well capitalized status, at September 30, 2011, Frost Bank could pay aggregate dividends of up to $\$ 276.4$ million to Cullen/Frost without prior regulatory approval.

Trust Preferred Securities. In accordance with the applicable accounting standard related to variable interest entities, the accounts of the Corporation s wholly owned subsidiary trust, Cullen/Frost Capital Trust II, have not been included in the Corporation s consolidated financial statements. However, the $\$ 120.0$ million in trust preferred securities issued by this subsidiary trust have been included in the Tier 1 capital of Cullen/Frost for regulatory capital purposes pursuant to guidance from the Federal Reserve. On July 21, 2010, financial regulatory reform legislation entitled the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act ) was signed into law. Certain provisions of the Dodd-Frank Act will require the Corporation to deduct, over three years beginning on January 1, 2013, all trust preferred securities from the Corporation s Tier 1 capital. Nonetheless, excluding trust preferred securities from Tier 1 capital at September 30, 2011 would not affect the Corporation s ability to meet all capital adequacy requirements to which it is subject.

## Table of Contents

## Note 8 - Derivative Financial Instruments

The fair value of derivative positions outstanding is included in accrued interest receivable and other assets and accrued interest payable and other liabilities in the accompanying consolidated balance sheets and in the net change in each of these financial statement line items in the accompanying consolidated statements of cash flows.

Interest Rate Derivatives. The Corporation utilizes interest rate swaps, caps and floors to mitigate exposure to interest rate risk and to facilitate the needs of its customers. The Corporation s objectives for utilizing these derivative instruments is described below:

The Corporation has entered into certain interest rate swap contracts that are matched to specific fixed-rate commercial loans or leases that the Corporation has entered into with its customers. These contracts have been designated as hedging instruments to hedge the risk of changes in the fair value of the underlying commercial loan/lease due to changes in interest rates. The related contracts are structured so that the notional amounts reduce over time to generally match the expected amortization of the underlying loan/lease.

During 2007, the Corporation entered into three interest rate swap contracts on variable-rate loans with a total notional amount of $\$ 1.2$ billion. The interest rate swap contracts were designated as hedging instruments in cash flow hedges with the objective of protecting the overall cash flows from the Corporation s monthly interest receipts on a rolling portfolio of $\$ 1.2$ billion of variable-rate loans outstanding throughout the 84-month period beginning in October 2007 and ending in October 2014 from the risk of variability of those cash flows such that the yield on the underlying loans would remain constant. As further discussed below, the Corporation terminated portions of the hedges and settled portions of the interest rate swap contracts during November 2009 and terminated the remaining portions of the hedges and settled the remaining portions of the interest rate swap contracts during November 2010. Under the initial hedge relationship, the desired constant yield was $7.559 \%$ in the case of the first contract (underlying loan pool totaling $\$ 650.0$ million carrying an interest rate equal to Prime), $8.059 \%$ in the case of the second contract (underlying loan pool totaling $\$ 230.0$ million carrying an interest rate equal to Prime plus a margin of 50 basis points) and $8.559 \%$ in the case of the third contract (underlying loan pool totaling $\$ 320.0$ million carrying an interest rate equal to Prime plus a margin of 100 basis points). Under the swaps, the Corporation received a fixed interest rate of $7.559 \%$ and paid a variable interest rate equal to the daily Federal Reserve Statistical Release H-15 Prime Rate (Prime), with monthly settlements.

As stated above, during November 2009, the Corporation settled portions of two of the interest rate swap contracts having a total notional amount of $\$ 400.0$ million and concurrently terminated the hedges related to the interest cash flows on a rolling portfolio of $\$ 400.0$ million of variable rate loans. The terminated hedges had underlying loan pools totaling $\$ 300.0$ million carrying an interest rate equal to Prime and $\$ 100.0$ million carrying an interest rate equal to Prime plus a margin of 50 basis points. In November 2010, the Corporation settled the remaining interest rate swap contracts having a total notional amount of $\$ 800.0$ million and concurrently terminated the hedges related to the interest cash flows on a rolling portfolio of $\$ 800.0$ million of variable rate loans. The terminated hedges had underlying loan pools totaling $\$ 350.0$ million carrying an interest rate equal to Prime, $\$ 130.0$ million carrying an interest rate equal to Prime plus a margin of 50 basis points and $\$ 320.0$ million carrying an interest rate equal to Prime plus a margin of 100 basis points. The deferred accumulated after-tax gain applicable to the settled interest rate contracts included in accumulated other comprehensive income totaled $\$ 74.6$ million at September 30, 2011. The deferred gain will be reclassified into earnings through October 2014 when the formerly hedged transactions impact future earnings.

In October 2008, the Corporation entered into an interest rate swap contract on junior subordinated deferrable interest debentures with a total notional amount of $\$ 120.0$ million. The interest rate swap contract was designated as a hedging instrument in a cash flow hedge with the objective of protecting the quarterly interest payments on the Corporation s $\$ 120.0$ million of junior subordinated deferrable interest debentures issued to Cullen/Frost Capital Trust II throughout the five-year period beginning in December 2008 and ending in December 2013 from the risk of variability of those payments resulting from changes in the three-month LIBOR interest rate. Under the swap, the Corporation will pay a fixed interest rate of $5.47 \%$ and receive a variable interest rate of three-month LIBOR plus a margin of $1.55 \%$ on a total notional amount of $\$ 120.0$ million, with quarterly settlements.

The Corporation has entered into certain interest rate swap, cap and floor contracts that are not designated as hedging instruments. These derivative contracts relate to transactions in which the Corporation enters into an interest rate swap, cap and/or floor with a customer while at the same time entering into an offsetting interest rate swap, cap and/or floor with another financial institution. In connection with each swap transaction, the Corporation agrees to pay interest to the customer on a notional amount at a variable interest rate and receive interest from the customer on a similar notional amount at a fixed interest rate. At the same time, the Corporation agrees to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows the Corporation $s$ customer to effectively convert a variable rate loan to a fixed rate. Because the Corporation acts as an intermediary for its customer, changes in the fair value of the underlying derivative contracts for the most part offset each other and do not significantly impact the Corporation s results of operations.

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

## Table of Contents

The notional amounts and estimated fair values of interest rate derivative contracts outstanding at September 30, 2011 and December 31, 2010 are presented in the following table. The Corporation obtains dealer quotations to value its interest rate derivative contracts designated as hedges of cash flows, while the fair values of other interest rate derivative contracts are estimated utilizing internal valuation models with observable market data inputs.

|  | September 30, 2011 |  | December 31, 2010 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Notional <br> Amount | Estimated <br> Fair Value | Notional Amount | Estimated <br> Fair Value |
| Interest rate derivatives designated as hedges of fair value: |  |  |  |  |
| Commercial loan/lease interest rate swaps | \$ 81,989 | \$ $(8,805)$ | \$ 104,088 | \$ $(8,350)$ |
| Interest rate derivatives designated as hedges of cash flows: |  |  |  |  |
| Interest rate swap on junior subordinated deferrable interest debentures | 120,000 | $(9,137)$ | 120,000 | $(9,895)$ |
| Non-hedging interest rate derivatives: |  |  |  |  |
| Commercial loan/lease interest rate swaps | 579,750 | 61,127 | 593,792 | 44,335 |
| Commercial loan/lease interest rate swaps | 579,750 | $(61,410)$ | 593,792 | $(44,666)$ |
| Commercial loan/lease interest rate caps | 20,000 | 66 | 20,000 | 388 |
| Commercial loan/lease interest rate caps | 20,000 | (66) | 20,000 | (388) |

The weighted-average rates paid and received for interest rate swaps outstanding at September 30, 2011 were as follows:

|  | Weighted-Average <br> Interest <br> Rate <br> Paid |  |
| :--- | :---: | :---: |
| Rate <br> Received |  |  |
| Interest rate swaps: | $4.46 \%$ | $0.23 \%$ |
| Fair value hedge commercial loan/lease interest rate swaps <br> Cash flow hedge interest rate swaps on junior subordinated <br> deferrable interest debentures | 5.47 | 1.88 |
| Non-hedging interest rate swaps 1.85 <br> Non-hedging interest rate swaps 5.08$\quad 1.08$ |  |  |

The weighted-average strike rate for outstanding interest rate caps was 3.10\% at September 30, 2011.

Commodity Derivatives. The Corporation enters into commodity swaps and option contracts that are not designated as hedging instruments primarily to accommodate the business needs of its customers. Upon the origination of a commodity swap or option contract with a customer, the Corporation simultaneously enters into an offsetting contract with a third party to mitigate the exposure to fluctuations in commodity prices.

The notional amounts and estimated fair values of commodity derivative positions outstanding are presented in the following table. The Corporation obtains dealer quotations to value its commodity derivative positions.

|  | NotionalUnits | September 30, 2011 |  |  | December 31, 2010 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Table of Contents

Foreign Currency Derivatives. The Corporation enters into foreign currency forward contracts that are not designated as hedging instruments primarily to accommodate the business needs of its customers. Upon the origination of a foreign currency denominated transaction with a customer, the Corporation simultaneously enters into an offsetting contract with a third party to negate the exposure to fluctuations in foreign currency exchange rates. The Corporation also utilizes foreign currency forward contracts that are not designated as hedging instruments to mitigate the economic effect of fluctuations in foreign currency exchange rates on certain short-term, non-U.S. dollar denominated loans. The notional amounts and fair values of open foreign currency forward contracts were not significant at September 30, 2011 and December 31, 2010.

Gains, Losses and Derivative Cash Flows. For fair value hedges, the changes in the fair value of both the derivative hedging instrument and the hedged item are included in other non-interest income or other non-interest expense. The extent that such changes in fair value do not offset represents hedge ineffectiveness. Net cash flows from interest rate swaps on commercial loans/leases designated as hedging instruments in effective hedges of fair value are included in interest income on loans. For cash flow hedges, the effective portion of the gain or loss due to changes in the fair value of the derivative hedging instrument is included in other comprehensive income, while the ineffective portion (indicated by the excess of the cumulative change in the fair value of the derivative over that which is necessary to offset the cumulative change in expected future cash flows on the hedge transaction) is included in other non-interest income or other non-interest expense. Net cash flows from interest rate swaps on variable-rate loans designated as hedging instruments in effective hedges of cash flows and the reclassification from other comprehensive income of deferred gains associated with the termination of those hedges are included in interest income on loans. Net cash flows from the interest rate swap on junior subordinated deferrable interest debentures designated as a hedging instrument in an effective hedge of cash flows are included in interest expense on junior subordinated deferrable interest debentures. For non-hedging derivative instruments, gains and losses due to changes in fair value and all cash flows are included in other non-interest income and other non-interest expense.

Amounts included in the consolidated statements of income related to interest rate derivatives designated as hedges of fair value were as follows:

|  | Three Months Ended <br> September 30, <br> 2011 |  | Nine Months Ended <br> September 30, <br> 2011 |  |
| :--- | ---: | ---: | ---: | ---: |
| Commercial loan/lease interest rate swaps: |  |  |  | $\mathbf{2 0 1 0}$ |
| Amount of gain (loss) included in interest income on loans | $\$(874)$ | $\$(1,241)$ | $\$(2,848)$ | $\$(3,975)$ |
| Amount of (gain) loss included in other non-interest expense | $(7)$ | $(21)$ | $(10)$ | $(112)$ |

Amounts included in the consolidated statements of income and in other comprehensive income for the period related to interest rate derivatives designated as hedges of cash flows were as follows:

|  | Three Months Ended September 30, 2011 2010 |  | Nine Months Ended September 30, <br> 2011 <br> 2010 |  |
| :---: | :---: | :---: | :---: | :---: |
| Interest rate swaps/caps/floors on variable-rate loans: |  |  |  |  |
| Amount reclassified from accumulated other comprehensive income to interest income on loans | \$ 9,345 | \$ 11,129 | \$ 28,035 | \$ 33,099 |
| Amount of gain (loss) recognized in other comprehensive income |  | 20,944 |  | 71,675 |
| Interest rate swaps on junior subordinated deferrable interest debentures: |  |  |  |  |
| Amount reclassified from accumulated other comprehensive income to interest expense on junior subordinated deferrable interest debentures | 1,117 | 1,061 | 3,304 | 3,256 |
| Amount of gain (loss) recognized in other comprehensive income | (908) | $(2,612)$ | $(2,560)$ | $(8,178)$ |

No ineffectiveness related to interest rate derivatives designated as hedges of cash flows was recognized in the consolidated statements of income during the reported periods. The accumulated net after-tax gain related to effective cash flow hedges included in accumulated other comprehensive income totaled $\$ 68.9$ million at September 30, 2011 and $\$ 86.6$ million at December 31, 2010. The Corporation currently expects approximately $\$ 5.4$ million of the net after-tax gain related to effective cash flow hedges included in accumulated other comprehensive income at September 30, 2011 will be reclassified into earnings during the remainder of 2011. This amount represents management s best estimate given current expectations about market interest rates and volumes related to loan pools underlying the terminated cash flow hedges. Because actual market interest rates and volumes related to loan pools underlying the terminated cash flow hedges may differ from management sexpectations, there can be no assurance as to the ultimate amount that will be reclassified into earnings during 2011.

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

## Table of Contents

As stated above, the Corporation enters into non-hedge related derivative positions primarily to accommodate the business needs of its customers. Upon the origination of a derivative contract with a customer, the Corporation simultaneously enters into an offsetting derivative contract with a third party. The Corporation recognizes immediate income based upon the difference in the bid/ask spread of the underlying transactions with its customers and the third party. Because the Corporation acts only as an intermediary for its customer, subsequent changes in the fair value of the underlying derivative contracts for the most part offset each other and do not significantly impact the Corporation s results of operations.

Amounts included in the consolidated statements of income related to non-hedging interest rate and commodity derivative instruments are presented in the table below.

|  | $\begin{gathered} \text { Three Months Ended } \\ \text { September 30, } \\ 2011 \quad 2010 \end{gathered}$ |  |  |  | Nine Months Ended September 30, 20112010 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Non-hedging interest rate derivatives: |  |  |  |  |  |  |
| Other non-interest income | \$ | 90 | \$ | 410 | \$ 826 | \$ 2,004 |
| Other non-interest expense |  | 79 |  | 34 | (49) | 112 |
| Non-hedging commodity derivatives: |  |  |  |  |  |  |
| Other non-interest income |  | 82 |  | 80 | 544 | 126 |
| Non-hedging foreign exchange derivatives: |  |  |  |  |  |  |
| Other non-interest income |  | 113 |  | 1 | 232 | 2 |

Counterparty Credit Risk. Derivative contracts involve the risk of dealing with both bank customers and institutional derivative counterparties and their ability to meet contractual terms. Institutional counterparties must have an investment grade credit rating and be approved by the Corporation s Asset/Liability Management Committee. The Corporation s credit exposure on interest rate swaps is limited to the net favorable value and interest payments of all swaps by each counterparty, while the Corporation s credit exposure on commodity swaps/options is limited to the net favorable value of all swaps/options by each counterparty. Credit exposure may be reduced by the amount of collateral pledged by the counterparty. There are no credit-risk-related contingent features associated with any of the Corporation s derivative contracts. Certain derivative contracts with upstream financial institution counterparties may be terminated with respect to a party in the transaction, if such party does not have at least a minimum level rating assigned to either its senior unsecured long-term debt or its deposit obligations by certain third-party rating agencies.

The Corporation s credit exposure relating to interest rate swaps and commodity swaps/options with bank customers was approximately $\$ 36.5$ million at September 30, 2011. This credit exposure is partly mitigated as transactions with customers are generally secured by the collateral, if any, securing the underlying transaction being hedged. The Corporation s credit exposure, net of collateral pledged, relating to interest rate swaps and commodity swaps/options with upstream financial institution counterparties was $\$ 8.6$ million at September 30, 2011. Collateral levels for upstream financial institution counterparties are monitored and adjusted as necessary.

The aggregate fair value of securities posted as collateral by the Corporation related to derivative contracts totaled $\$ 63.8$ million at September 30, 2011. At such date, the Corporation also had $\$ 8.3$ million in cash collateral on deposit with other financial institution counterparties.

## Note 9 - Earnings Per Common Share

Earnings per common share is computed using the two-class method. Basic earnings per common share is computed by dividing net earnings allocated to common stock by the weighted-average number of common shares outstanding during the applicable period, excluding outstanding participating securities. Participating securities include non-vested stock awards/stock units and deferred stock units, though no actual shares of common stock related to non-vested stock units and deferred stock units have been issued. Non-vested stock awards/stock units and deferred stock units are considered participating securities because holders of these securities receive non-forfeitable dividends at the same rate as holders of the Corporation s common stock. Diluted earnings per common share is computed using the weighted-average number of shares determined for the basic earnings per common share computation plus the dilutive effect of stock compensation using the treasury stock method.

## Table of Contents

The following table presents a reconciliation of the number of shares used in the calculation of basic and diluted earnings per common share.

|  | Three Months Ended September 30, |  |  |  | Nine Months Ended September 30, |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 2011 |  | 2010 |  | 2011 |  | 2010 |
| Distributed earnings allocated to common stock | \$ | 28,123 | \$ | 27,251 | \$ | 83,695 | \$ | 80,248 |
| Undistributed earnings allocated to common stock |  | 26,238 |  | 27,529 |  | 77,868 |  | 74,849 |
| Net earnings allocated to common stock | \$ | 54,361 | \$ | 54,780 | \$ | 161,563 | \$ | 155,097 |
| Weighted-average shares outstanding for basic earnings per common share |  | 61,137,054 |  | 60,523,658 |  | 61,083,390 |  | 60,289,006 |
| Dilutive effect of stock compensation |  | 102,092 |  | 141,045 |  | 199,013 |  | 178,699 |
| Weighted-average shares outstanding for diluted earnings per common share |  | 61,239,146 |  | 60,664,703 |  | 61,282,403 |  | 60,467,705 |

## Note 10 - Stock-Based Compensation

A combined summary of activity in the Corporation $s$ active stock plans is presented in the following table.

|  |  | Non-Vested Stock <br> Awards/Stock Units <br> Outstanding | Stock Options <br> Outstanding |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Weighted- |  |  |  |

During the nine months ended September 30, 2011 and 2010, proceeds from stock option exercises totaled $\$ 7.2$ million and $\$ 28.5$ million. During the nine months ended September 30, 2011, 140,739 shares issued in connection with stock option exercises were new shares issued from available authorized shares, while 3,464 shares were issued from available treasury stock.

Stock-based compensation expense is recognized ratably over the requisite service period for all awards. Stock-based compensation expense was as follows:

|  | Three Months Ended September 30, |  | Nine Months Ended September 30, |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2011 | 2010 |  | 2011 |  | 2010 |
| Stock options | \$ 2,073 | \$ 2,403 |  | 6,686 |  | 7,040 |
| Non-vested stock awards/stock units | 360 | 1,019 |  | 3,000 |  | 3,140 |
| Deferred stock units |  |  |  | 330 |  | 300 |

Unrecognized stock-based compensation expense at September 30, 2011 was as follows:

| Stock options | $\$ 15,524$ |
| :--- | ---: |
| Non-vested stock awards/stock units | 2,192 |
| Total | $\$ 17,716$ |

## Table of Contents

## Note 11 - Defined Benefit Plans

The components of the combined net periodic cost (benefit) for the Corporation s qualified and non-qualified defined benefit pension plans were as follows:

|  | Three Months Ended September 30, 20112010 |  | Nine Months Ended September 30, 2011 $\qquad$ 2010 |  |
| :---: | :---: | :---: | :---: | :---: |
| Expected return on plan assets, net of expenses | \$ $(2,859)$ | \$ $(2,752)$ | \$ $(8,576)$ | \$ $(8,256)$ |
| Interest cost on projected benefit obligation | 1,973 | 1,931 | 5,919 | 5,793 |
| Net amortization and deferral | 783 | 729 | 2,348 | 2,186 |
| Net periodic benefit | \$ (103) | \$ (92) | \$ (309) | \$ (277) |

The Corporation s non-qualified defined benefit pension plan is not funded. No contributions to the qualified defined benefit pension plan were made during the nine months ended September 30, 2011. The Corporation does not expect to make any contributions during the remainder of 2011.

## Note 12 - Income Taxes

Income tax expense was as follows:

|  | Three Months Ended |  | Nine Months Ended <br> September 30, |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | September 30, |  | $\mathbf{2 0 1 1}$ | $\mathbf{2 0 1 0}$ | $\mathbf{2 0 1 1}$ |
| Current income tax expense | $\$ 24,036$ | $\$ 14,671$ | $\$ 50,101$ | $\$ 44,695$ |  |
| Deferred income tax expense (benefit) | $(382)$ | 528 | $(137)$ | $(878)$ |  |
|  |  |  |  |  |  |
| Income tax expense as reported | $\$ 23,654$ | $\$ 15,199$ | $\$ 49,964$ | $\$ 43,817$ |  |
|  |  |  |  |  |  |
| Effective tax rate | $30.3 \%$ | $21.7 \%$ | $23.6 \%$ | $22.0 \%$ |  |

Net deferred tax liabilities totaled $\$ 113.4$ million at September 30, 2011 and $\$ 65.2$ million at December 31, 2010. No valuation allowance was recorded against deferred tax assets at September 30, 2011 as management believes that it is more likely than not that all of the deferred tax assets will be realized because they were supported by recoverable taxes paid in prior years. Income tax expense for the third quarter of 2011 included the correction of an under-accrual of taxes that resulted from incorrectly deducting premium amortization on municipal securities for federal income tax purposes since 2008. As a result, the Corporation recognized additional income tax expense totaling $\$ 4.3$ million, which included interest and penalties, related to the 2010, 2009 and 2008 tax years. Additionally, income tax expense for the third quarter of 2011 also included an accrual of $\$ 1.7$ million related to premium amortization on municipal securities for the first and second quarters of 2011. There were no unrecognized tax benefits during any of the reported periods. Interest and/or penalties related to income taxes are reported as a component of income tax expense. Such amounts were not significant during the reported periods.

The Corporation files income tax returns in the U.S. federal jurisdiction. The Company is no longer subject to U.S. federal income tax examinations by tax authorities for years before 2008 .

## Table of Contents

## Note 13-Comprehensive Income

Comprehensive income was as follows:

|  | Three Months Ended September 30, |  | Nine Months Ended September 30, |  |
| :---: | :---: | :---: | :---: | :---: |
| Net income | \$ 54,507 | \$ 54,995 | \$ 162,121 | \$ 155,713 |
| Other comprehensive income: |  |  |  |  |
| Securities available for sale: |  |  |  |  |
| Change in net unrealized gain/loss during the period | 78,552 | 45,587 | 169,516 | 113,452 |
| Reclassification adjustment for gains in net income | $(6,409)$ |  | $(6,414)$ | (6) |
| Change in the net actuarial gain/loss on defined benefit post-retirement benefit plans | 783 | 729 | 2,348 | 2,186 |
| Change in the accumulated gain/loss on effective cash flow hedging derivatives | $(9,136)$ | 8,263 | $(27,291)$ | 33,653 |
|  | 63,790 | 54,579 | 138,159 | 149,285 |
| Deferred tax expense: |  |  |  |  |
| Securities available for sale: |  |  |  |  |
| Change in net unrealized gain/loss during the period | 27,493 | 15,955 | 59,331 | 39,708 |
| Reclassification adjustment for gains in net income | $(2,243)$ |  | $(2,245)$ | (2) |
| Change in the net actuarial gain/loss on defined benefit post- retirement benefit plans | 274 | 255 | 822 | 765 |
| Change in the accumulated gain/loss on effective cash flow hedging derivatives | $(3,198)$ | 2,893 | $(9,552)$ | 11,779 |
|  | 22,326 | 19,103 | 48,356 | 52,250 |
| Other comprehensive income, net of tax | 41,464 | 35,476 | 89,803 | 97,035 |
| Comprehensive income | \$ 95,971 | \$ 90,471 | \$ 251,924 | \$ 252,748 |

## Note 14 - Operating Segments

The Corporation is managed under a matrix organizational structure whereby significant lines of business, including Banking and Frost Wealth Advisors (formerly Financial Management Group or FMG ), overlap a regional reporting structure. The regions are primarily based upon geographic location and include Austin, Corpus Christi, Dallas, Fort Worth, Houston, Rio Grande Valley, San Antonio and Statewide. The Corporation is primarily managed based on the line of business structure. In that regard, all regions have the same lines of business, which have the same product and service offerings, have similar types and classes of customers and utilize similar service delivery methods. Pricing guidelines for products and services are the same across all regions. The regional reporting structure is primarily a means to scale the lines of business to provide a local, community focus for customer relations and business development.

The Corporation has two primary operating segments, Banking and Frost Wealth Advisors, that are delineated by the products and services that each segment offers. The Banking operating segment includes both commercial and consumer banking services, Frost Insurance Agency and Frost Securities, Inc. Commercial banking services are provided to corporations and other business clients and include a wide array of lending and cash management products. Consumer banking services include direct lending and depository services. Frost Insurance Agency provides insurance brokerage services to individuals and businesses covering corporate and personal property and casualty products, as well as group health and life insurance products. Frost Securities, Inc. provides advisory and private equity services to middle market companies. The Frost Wealth Advisors operating segment includes fee-based services within private trust, retirement services, and financial management services, including personal wealth management and brokerage services. The third operating segment, Non-Banks, is for the most part the parent holding company, as well as certain other insignificant non-bank subsidiaries of the parent that, for the most part, have little or no activity. The parent company s principal activities include the direct and indirect ownership of the Corporation s banking and non-banking subsidiaries and the issuance of debt and equity. Its principal source of revenue is dividends from its subsidiaries.

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

The accounting policies of each reportable segment are the same as those of the Corporation except for the following items, which impact the Banking and Frost Wealth Advisors segments: (i) expenses for consolidated back-office operations and general overhead-type expenses such as executive administration, accounting and internal audit are allocated to operating segments based on estimated uses of those services, (ii) income tax expense for the individual segments is calculated essentially at the statutory rate, and (iii) the parent company records the tax expense or benefit necessary to reconcile to the consolidated total.

## Table of Contents

The Corporation uses a match-funded transfer pricing process to assess operating segment performance. The process helps the Corporation to (i) identify the cost or opportunity value of funds within each business segment, (ii) measure the profitability of a particular business segment by relating appropriate costs to revenues, (iii) evaluate each business segment in a manner consistent with its economic impact on consolidated earnings, and (iv) enhance asset and liability pricing decisions.

Summarized operating results by segment were as follows:

|  | Banking | Frost Wealth Advisors |  | Non-Banks |  | Consolidated |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Revenues from (expenses to) external customers: |  |  |  |  |  |  |  |
| Three months ended: |  |  |  |  |  |  |  |
| September 30, 2011 | \$ 202,520 | \$ | 24,548 | \$ | $(2,490)$ | \$ | 224,578 |
| September 30, 2010 | 192,483 |  | 23,096 |  | $(2,733)$ |  | 212,846 |
| Nine months ended: |  |  |  |  |  |  |  |
| September 30, 2011 | \$ 587,382 | \$ | 74,256 | \$ | $(7,843)$ | \$ | 653,795 |
| September 30, 2010 | 573,233 |  | 68,716 |  | $(8,298)$ |  | 633,651 |
| Net income (loss): |  |  |  |  |  |  |  |
| Three months ended: |  |  |  |  |  |  |  |
| September 30, 2011 | \$ 53,497 | \$ | 2,696 | \$ | $(1,686)$ | \$ | 54,507 |
| September 30, 2010 | 54,772 |  | 2,031 |  | $(1,808)$ |  | 54,995 |
| Nine months ended: |  |  |  |  |  |  |  |
| September 30, 2011 | \$ 160,788 | \$ | 7,299 | \$ | $(5,966)$ | \$ | 162,121 |
| September 30, 2010 | 156,624 |  | 5,588 |  | $(6,499)$ |  | 155,713 |

## Note 15 - Fair Value Measurements

The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for such asset or liability. In estimating fair value, the Corporation utilizes valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. Such valuation techniques are consistently applied. Inputs to valuation techniques include the assumptions that market participants would use in pricing an asset or liability. ASC Topic 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity s own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.
In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and the Corporation s creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Corporation s valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Corporation s valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

a different estimate of fair value at the reporting date. Furthermore, the reported fair value amounts have not been comprehensively revalued since the presentation dates, and therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein. A more detailed description of the valuation

## Table of Contents

methodologies used for assets and liabilities measured at fair value is set forth in the 2010 Form 10-K. Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer, which generally coincides with the Corporation s monthly and/or quarterly valuation process.

Financial Assets and Financial Liabilities: The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of September 30, 2011 and December 31, 2010, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

|  | Level 1 <br> Inputs | Level 2 <br> Inputs | Level 3 <br> Inputs | Total Fair Value |
| :---: | :---: | :---: | :---: | :---: |
| September 30, 2011 |  |  |  |  |
| Securities available for sale: |  |  |  |  |
| U.S. Treasury | \$ 799,915 | \$ | \$ | \$ 799,915 |
| Residential mortgage-backed securities |  | 2,394,338 |  | 2,394,338 |
| States and political subdivisions |  | 2,107,567 |  | 2,107,567 |
| Other |  | 37,992 |  | 37,992 |
| Trading account securities: |  |  |  |  |
| U.S. Treasury | 14,035 |  |  | 14,035 |
| States and political subdivisions |  | 1,788 |  | 1,788 |
| Derivative assets: |  |  |  |  |
| Interest rate swaps, caps and floors |  | 60,475 | 718 | 61,193 |
| Commodity and foreign exchange derivatives | 13 | 32,917 |  | 32,930 |
| Derivative liabilities: |  |  |  |  |
| Interest rate swaps, caps and floors |  | 79,418 |  | 79,418 |
| Commodity and foreign exchange derivatives |  | 32,707 |  | 32,707 |
| December 31, 2010 |  |  |  |  |
| Securities available for sale: |  |  |  |  |
| U.S. Treasury | \$ 987,031 | \$ | \$ | \$ 987,031 |
| Residential mortgage-backed securities |  | 2,091,330 |  | 2,091,330 |
| States and political subdivisions |  | 2,040,300 |  | 2,040,300 |
| Other |  | 38,809 |  | 38,809 |
| Trading account securities: |  |  |  |  |
| U.S. Treasury | 14,986 |  |  | 14,986 |
| States and political subdivisions |  | 115 |  | 115 |
| Derivative assets: |  |  |  |  |
| Interest rate swaps, caps and floors |  | 43,633 | 1,090 | 44,723 |
| Commodity and foreign exchange derivatives |  | 14,177 |  | 14,177 |
| Derivative liabilities: |  |  |  |  |
| Interest rate swaps, caps and floors |  | 63,299 |  | 63,299 |
| Commodity and foreign exchange derivatives | 19 | 14,082 |  | 14,101 |

The following table reconciles the beginning and ending balances of derivative assets measured at fair value on a recurring basis using significant unobservable (Level 3) inputs during the nine months ended September 30, 2011 and 2010:

|  | Nine Months Ended September 30, |  |
| :---: | :---: | :---: |
|  | 2011 | 2010 |
| Balance, beginning of period | \$ 1,090 | \$ 945 |
| Transfers to Level 3 | 457 |  |
| Cash settlements | $(1,393)$ | (348) |
| Realized gains (losses) included in other non-interest income | 515 | 1,097 |
| Realized gains (losses) included in other non-interest expense | 49 | (112) |
| Balance, end of period | \$ 718 | \$ 1,582 |

## Table of Contents

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). Financial assets measured at fair value on a non-recurring basis during the nine months ended September 30, 2011 and 2010 include certain impaired loans reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 2 inputs based on observable market data or Level 3 inputs based on customized discounting criteria. The following table presents impaired loans that were remeasured and reported at fair value through a specific valuation allowance allocation of the allowance for loan losses based upon the fair value of the underlying collateral during the nine months ended September 30, 2011 and 2010.

|  | Nine Months Ended September 30, 2011 |  | Nine Months Ended September 30, 2010 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Level 2 | Level 3 | Level 2 | Level 3 |
| Carrying value of impaired loans | \$ 9,638 | \$ 3,899 | \$ 23,812 | \$ 15,700 |
| Specific valuation allowance allocations | $(3,649)$ | $(2,431)$ | $(6,911)$ | $(6,085)$ |
| Fair value | \$ 5,989 | \$ 1,468 | \$ 16,901 | \$ 9,615 |

Non-Financial Assets and Non-Financial Liabilities: The Corporation has no non-financial assets or non-financial liabilities measured at fair value on a recurring basis. Certain non-financial assets measured at fair value on a non-recurring basis include foreclosed assets (upon initial recognition or subsequent impairment), non-financial assets and non-financial liabilities measured at fair value in the second step of a goodwill impairment test, and intangible assets and other non-financial long-lived assets measured at fair value for impairment assessment. Non-financial assets measured at fair value on a non-recurring basis during the nine months ended September 30, 2011 and 2010 include certain foreclosed assets which, upon initial recognition, were remeasured and reported at fair value through a charge-off to the allowance for loan losses and certain foreclosed assets which, subsequent to their initial recognition, were remeasured at fair value through a write-down included in other non-interest expense. The fair value of a foreclosed asset is estimated using Level 2 inputs based on observable market data or Level 3 inputs based on customized discounting criteria. During the reported periods, all fair value measurements for foreclosed assets utilized Level 2 inputs.

The following table presents foreclosed assets that were remeasured and reported at fair value:

|  | Nine Months Ended September 30, |  |
| :---: | :---: | :---: |
| Foreclosed assets remeasured at initial recognition: |  |  |
| Carrying value of foreclosed assets prior to remeasurement | \$ 20,396 | \$ 15,714 |
| Charge-offs recognized in the allowance for loan losses | $(3,593)$ | $(3,007)$ |
| Fair value | \$ 16,803 | \$ 12,707 |
| Foreclosed assets remeasured subsequent to initial recognition: |  |  |
| Carrying value of foreclosed assets prior to remeasurement | \$ 6,023 | \$ 5,314 |
| Write-downs included in other non-interest expense | $(2,173)$ | $(1,473)$ |
| Fair value | \$ 3,850 | \$ 3,841 |

Charge-offs recognized upon loan foreclosures are generally offset by general or specific allocations of the allowance for loan losses and generally do not, and did not during the reported periods, significantly impact the Corporation s provision for loan losses. Regulatory guidelines require the Corporation to reevaluate the fair value of other real estate owned on at least an annual basis. While the Corporation spolicy is to comply with the regulatory guidelines, the Corporation s general practice is to reevaluate the fair value of other real estate owned on a quarterly basis. Thus, appraisals are never considered to be outdated, and the Corporation does not make any adjustments to the appraised values. The fair value of other real estate owned is monitored/evaluated by a third-party service and reviewed with management on a quarterly basis.

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

## Table of Contents

FASB ASC Topic 825 requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. A detailed description of the valuation methodologies used in estimating the fair value of financial instruments is set forth in the 2010 Form 10-K.

The estimated fair values of financial instruments were as follows:

|  | September 30, 2011 |  | December 31, 2010 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Carrying Amount | Estimated <br> Fair Value | Carrying <br> Amount | Estimated <br> Fair Value |
| Financial assets: |  |  |  |  |
| Cash and cash equivalents | \$ 4,487,361 | \$ 4,487,361 | \$ 2,820,977 | \$ 2,820,977 |
| Securities | 5,721,902 | 5,758,840 | 5,456,200 | 5,468,799 |
| Loans, net | 7,974,259 | 8,005,005 | 7,990,704 | 8,038,760 |
| Cash surrender value of life insurance policies | 132,899 | 132,899 | 129,922 | 129,922 |
| Non-hedging commercial loan/lease interest rate swaps, caps and floors | 61,193 | 61,193 | 44,723 | 44,723 |
| Commodity and foreign exchange derivatives | 32,930 | 32,930 | 14,177 | 14,177 |

| Non-hedging commercial loan/lease interest rate swaps, caps and floors | 61,476 | 61,476 | 45,054 | 45,054 |
| Commodity and foreign exchange derivatives | 32,707 | 32,707 | 14,101 | 14,101 |
| Accrued interest payable | 3,234 | 3,234 | 9,991 | 9,991 |

Under ASC Topic 825, entities may choose to measure eligible financial instruments at fair value at specified election dates. The fair value measurement option (i) may be applied instrument by instrument, with certain exceptions, (ii) is generally irrevocable and (iii) is applied only to entire instruments and not to portions of instruments. Unrealized gains and losses on items for which the fair value measurement option has been elected must be reported in earnings at each subsequent reporting date. During the reported periods, the Corporation had no financial instruments measured at fair value under the fair value measurement option.

## Note 16 - Accounting Standards Updates

ASU No. 2010-20, Receivables (Topic 310) - Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses. ASU 2010-20 requires entities to provide disclosures designed to facilitate financial statement users evaluation of (i) the nature of credit risk inherent in the entity s portfolio of financing receivables, (ii) how that risk is analyzed and assessed in arriving at the allowance for credit losses and (iii) the changes and reasons for those changes in the allowance for credit losses. Disclosures must be disaggregated by portfolio segment, the level at which an entity develops and documents a systematic method for determining its allowance for credit losses, and class of financing receivable, which is generally a disaggregation of portfolio segment. The required disclosures include, among other things, a rollforward of the allowance for credit losses as well as information about modified, impaired, non-accrual and past due loans and credit quality indicators. ASU 2010-20 became effective for the Corporation s financial statements as of December 31, 2010, as it relates to disclosures required as of the end of a reporting period. Disclosures that relate to activity during a reporting period became effective for the Corporation $s$ financial statements beginning on January 1, 2011. ASU 2011-01, Receivables (Topic 310) - Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20, temporarily deferred the effective date for disclosures related to troubled debt restructurings to coincide with the effective date of the then proposed ASU 2011-02, Receivables (Topic 310) - A Creditor s Determination of Whether a Restructuring Is a Troubled Debt Restructuring, which is further discussed below.

ASU No. 2010-28, Intangibles - Goodwill and Other (Topic 350) - When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts. ASU 2010-28 modifies Step 1 of the goodwill impairment test for reporting units with zero or
negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining

## Table of Contents

whether it is more likely than not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist such as if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. ASU 2010-28 became effective for the Corporation on January 1, 2011 and did not have a significant impact on the Corporation s financial statements.

ASU No. 2011-02, Receivables (Topic 310) - A Creditor s Determination of Whether a Restructuring Is a Troubled Debt Restructuring. ASU 2011-02 clarifies which loan modifications constitute troubled debt restructurings and is intended to assist creditors in determining whether a modification of the terms of a receivable meets the criteria to be considered a troubled debt restructuring, both for purposes of recording an impairment loss and for disclosure of troubled debt restructurings. In evaluating whether a restructuring constitutes a troubled debt restructuring, a creditor must separately conclude, under the guidance clarified by ASU 2011-02, that both of the following exist: (a) the restructuring constitutes a concession; and (b) the debtor is experiencing financial difficulties. ASU 2011-02 became effective for the Corporation on July 1, 2011, and applies retrospectively to restructurings occurring on or after January 1, 2011 (See Note 3 - Loans).

ASU No. 2011-03, Transfers and Servicing (Topic 860) - Reconsideration of Effective Control for Repurchase Agreements. ASU 2011-03 is intended to improve financial reporting of repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. ASU 2011-03 removes from the assessment of effective control (i) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (ii) the collateral maintenance guidance related to that criterion. ASU 2011-03 will be effective for the Corporation on January 1, 2012 and is not expected to have a significant impact on the Corporation s financial statements.

ASU 2011-04, Fair Value Measurement (Topic 820) - Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRSs. ASU 2011-04 amends Topic 820, Fair Value Measurements and Disclosures, to converge the fair value measurement guidance in U.S. generally accepted accounting principles and International Financial Reporting Standards. ASU 2011-04 clarifies the application of existing fair value measurement requirements, changes certain principles in Topic 820 and requires additional fair value disclosures. ASU 2011-04 is effective for annual periods beginning after December 15, 2011, and is not expected to have a significant impact on the Corporation s financial statements.

ASU 2011-05, Comprehensive Income (Topic 220) - Presentation of Comprehensive Income. ASU 2011-05 amends Topic 220,
Comprehensive Income, to require that all nonowner changes in stockholders equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive statements. Additionally, ASU 2011-05 requires entities to present, on the face of the financial statements, reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement or statements where the components of net income and the components of other comprehensive income are presented. The option to present components of other comprehensive income as part of the statement of changes in stockholders equity was eliminated. ASU 2011-05 is effective for annual periods beginning after December 15, 2011, and is not expected to have a significant impact on the Corporation s financial statements.

ASU 2011-08, Intangibles - Goodwill and Other (Topic 350) - Testing Goodwill for Impairment. ASU 2011-08 amends Topic 350,
Intangibles Goodwill and Other, to give entities the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. However, if an entity concludes otherwise, then it is required to perform the first step of the two-step impairment test by calculating the fair value of the reporting unit and comparing the fair value with the carrying amount of the reporting unit. ASU 2011-08 is effective for annual and interim impairment tests beginning after December 15, 2011, and is not expected to have a significant impact on the Corporation s financial statements.

## Table of Contents

## Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

## Financial Review

## Cullen/Frost Bankers, Inc.

The following discussion should be read in conjunction with the Corporation s consolidated financial statements, and notes thereto, for the year ended December 31, 2010, included in the 2010 Form 10-K. Operating results for the three and nine months ended September 30, 2011 are not necessarily indicative of the results for the year ending December 31, 2011 or any future period.

Dollar amounts in tables are stated in thousands, except for per share amounts.

## Forward-Looking Statements and Factors that Could Affect Future Results

Certain statements contained in this Quarterly Report on Form 10-Q that are not statements of historical fact constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the Act ), notwithstanding that such statements are not specifically identified as such. In addition, certain statements may be contained in the Corporation s future filings with the SEC, in press releases, and in oral and written statements made by or with the approval of the Corporation that are not statements of historical fact and constitute forward-looking statements within the meaning of the Act. Examples of forward-looking statements include, but are not limited to: (i) projections of revenues, expenses, income or loss, earnings or loss per share, the payment or nonpayment of dividends, capital structure and other financial items; (ii) statements of plans, objectives and expectations of Cullen/Frost or its management or Board of Directors, including those relating to products or services; (iii) statements of future economic performance; and (iv) statements of assumptions underlying such statements. Words such as believes, anticipates , expects , intends , targeted, continue , remain , will, should, may and other simi intended to identify forward-looking statements but are not the exclusive means of identifying such statements.

Forward-looking statements involve risks and uncertainties that may cause actual results to differ materially from those in such statements. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to:

Local, regional, national and international economic conditions and the impact they may have on the Corporation and its customers and the Corporation $s$ assessment of that impact.

Volatility and disruption in national and international financial markets.

Government intervention in the U.S. financial system.

Changes in the mix of loan geographies, sectors and types or the level of non-performing assets and charge-offs.

Changes in estimates of future reserve requirements based upon the periodic review thereof under relevant regulatory and accounting requirements.

The effects of and changes in trade and monetary and fiscal policies and laws, including the interest rate policies of the Federal Reserve.

Inflation, interest rate, securities market and monetary fluctuations.

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

The effect of changes in laws and regulations (including laws and regulations concerning taxes, banking, securities and insurance) with which the Corporation and its subsidiaries must comply.

The soundness of other financial institutions.

Political instability.

Impairment of the Corporation s goodwill or other intangible assets.

Acts of God or of war or terrorism.

The timely development and acceptance of new products and services and perceived overall value of these products and services by users.

Changes in consumer spending, borrowings and savings habits.

Changes in the financial performance and/or condition of the Corporation s borrowers.

Technological changes.

Acquisitions and integration of acquired businesses.

The ability to increase market share and control expenses.

The Corporation s ability to attract and retain qualified employees.

Changes in the competitive environment in the Corporation s markets and among banking organizations and other financial service providers.

The effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters.

Changes in the reliability of the Corporation s vendors, internal control systems or information systems.

## Table of Contents

Changes in the Corporation s liquidity position.

Changes in the Corporation s organization, compensation and benefit plans.

The costs and effects of legal and regulatory developments including the resolution of legal proceedings or regulatory or other governmental inquiries and the results of regulatory examinations or reviews.

Greater than expected costs or difficulties related to the integration of new products and lines of business.

The Corporation s success at managing the risks involved in the foregoing items
Forward-looking statements speak only as of the date on which such statements are made. The Corporation undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made, or to reflect the occurrence of unanticipated events.

## Application of Critical Accounting Policies and Accounting Estimates

The accounting and reporting policies followed by the Corporation conform, in all material respects, to accounting principles generally accepted in the United States and to general practices within the financial services industry. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. While the Corporation bases estimates on historical experience, current information and other factors deemed to be relevant, actual results could differ from those estimates.

The Corporation considers accounting estimates to be critical to reported financial results if (i) the accounting estimate requires management to make assumptions about matters that are highly uncertain and (ii) different estimates that management reasonably could have used for the accounting estimate in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, could have a material impact on the Corporation sfinancial statements. Accounting policies related to the allowance for loan losses are considered to be critical, as these policies involve considerable subjective judgment and estimation by management.

For additional information regarding critical accounting policies, refer to Note 1 - Summary of Significant Accounting Policies in the notes to consolidated financial statements and the sections captioned Application of Critical Accounting Policies and Allowance for Loan Losses in Management s Discussion and Analysis of Financial Condition and Results of Operations included in the 2010 Form 10-K. During the first quarter of 2011, the Corporation further refined its methodology for the determination of the general valuation allowance component of the allowance for loan losses. See Note 3 Loans in the accompanying notes to consolidated financial statements for a discussion of the changes.

## Overview

A discussion of the Corporation s results of operations is presented below. Certain reclassifications have been made to make prior periods comparable. Taxable-equivalent adjustments are the result of increasing income from tax-free loans and securities by an amount equal to the taxes that would be paid if the income were fully taxable based on a $35 \%$ federal income tax rate, thus making tax-exempt asset yields comparable to taxable asset yields.

## Table of Contents

## Results of Operations

Net income totaled $\$ 54.5$ million, or $\$ 0.89$ diluted per share, for the three months ended September 30, 2011 compared to $\$ 55.0$ million, or $\$ 0.90$ diluted per share, for the three months ended September 30, 2010 and $\$ 55.7$ million, or $\$ 0.91$ diluted per share, for the three months ended June 30, 2011. Net income totaled $\$ 162.1$ million, or $\$ 2.64$ diluted per share, for the nine months ended September 30, 2011 compared to $\$ 155.7$ million, or $\$ 2.57$ diluted per share, for the nine months ended September 30, 2010.

Selected income statement data and other selected data for the comparable periods was as follows:

|  | Three Months Ended |  |  |  | Nine Months Ended |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { September 30, } \\ 2011 \end{gathered}$ | June 30, <br> 2011 | $\begin{gathered} \text { September 30, } \\ 2010 \end{gathered}$ |  | $\begin{gathered} \text { September 30, } \\ 2011 \end{gathered}$ |  | ember 30, 2010 |
| Taxable-equivalent net interest income | \$ 160,579 | \$ 159,509 | \$ | 155,702 | \$ 476,725 | \$ | 461,098 |
| Taxable-equivalent adjustment | 15,218 | 15,176 |  | 13,286 | 45,272 |  | 39,202 |

| Provision for loan losses | 9,010 | 8,985 |  | 10,100 | 27,445 |  | 32,321 |
| Net interest income after provision for loan losses | 136,351 | 135,348 |  | 132,316 | 404,008 |  | 389,575 |
| Non-interest income | 79,217 | 70,792 |  | 70,430 | 222,342 |  | 211,755 |
| Non-interest expense | 137,407 | 136,797 |  | 132,552 | 414,265 |  | 401,800 |
| Income before income taxes | 78,161 | 69,343 |  | 70,194 | 212,085 |  | 199,530 |
| Income taxes | 23,654 | 13,657 |  | 15,199 | 49,964 |  | 43,817 |
| Net income | \$ 54,507 | \$ 55,686 | \$ | 54,995 | \$ 162,121 | \$ | 155,713 |
| Earnings per common share - basic | \$ 0.89 | \$ 0.91 | \$ | 0.90 | \$ 2.64 | \$ | 2.57 |
| Earnings per common share - diluted | 0.89 | 0.91 |  | 0.90 | 2.64 |  | 2.57 |
| Dividends per common share | 0.46 | 0.46 |  | 0.45 | 1.37 |  | 1.33 |
| Return on average assets | 1.15\% | 1.23\% |  | 1.25\% | 1.19\% |  | 1.23\% |
| Return on average equity | 9.79 | 10.45 |  | 10.49 | 10.11 |  | 10.42 |
| Average shareholders equity to average total assets | 11.73 | 11.76 |  | 11.90 | 11.76 |  | 11.78 |

Net income decreased $\$ 488$ thousand, or $0.9 \%$, for the three months ended September 30, 2011 and increased $\$ 6.4$ million, or $4.1 \%$, for the nine months ended September 30, 2011 compared to the same periods in 2010. The decrease during the three months ended September 30, 2011 was primarily the result of an $\$ 8.5$ million increase in income tax expense and a $\$ 4.9$ million increase in non-interest expense partly offset by an $\$ 8.8$ million increase in non-interest income, a $\$ 2.9$ million increase in net interest income and a $\$ 1.1$ million decrease in the provision for loan losses. The increase during the nine months ended September 30, 2011 was primarily the result of a $\$ 10.6$ million increase in non-interest income, a $\$ 9.6$ million increase in net interest income and a $\$ 4.9$ million decrease in the provision for loan losses partly offset by a $\$ 12.5$ million increase in non-interest expense and a $\$ 6.1$ million increase in income tax expense.

Net income for the third quarter of 2011 decreased $\$ 1.2$ million, or $2.1 \%$, from the second quarter of 2011 . The decrease was primarily the result of a $\$ 10.0$ million increase in income tax expense and a $\$ 610$ thousand increase in non-interest expense partly offset by an $\$ 8.4$ million increase in non-interest income and a $\$ 1.0$ million increase in net interest income.

Details of the changes in the various components of net income are further discussed below.

## Net Interest Income

Net interest income is the difference between interest income on earning assets, such as loans and securities, and interest expense on liabilities, such as deposits and borrowings, which are used to fund those assets. Net interest income is the Corporation s largest source of revenue, representing $66.0 \%$ of total revenue during the first nine months of 2011 . Net interest margin is the ratio of taxable-equivalent net interest income to average earning assets for the period. The level of interest rates and the volume and mix of earning assets and interest-bearing

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

liabilities impact net interest income and net interest margin.

The Federal Reserve influences the general market rates of interest, including the deposit and loan rates offered by many financial institutions. The Corporation s loan portfolio is significantly affected by changes in the prime interest rate. The prime interest rate, which is the rate offered on loans to borrowers with strong credit, remained at $3.25 \%$ for the entire year in 2010 and through the third quarter of 2011. The Corporation s loan portfolio is also impacted, to a lesser extent, by changes in

## Table of Contents

the London Interbank Offered Rate (LIBOR). At September 30, 2011, the one-month and three-month U.S. dollar LIBOR rates were $0.24 \%$ and $0.37 \%$, respectively, while at September 30, 2010, the one-month and three-month U.S. dollar LIBOR rates were $0.26 \%$ and $0.29 \%$, respectively. The intended federal funds rate, which is the cost of immediately available overnight funds, remained at zero to $0.25 \%$ for the entire year in 2010 and through the third quarter of 2011.

The Corporation s balance sheet has historically been asset sensitive, meaning that earning assets generally reprice more quickly than interest-bearing liabilities. Therefore, the Corporation s net interest margin was likely to increase in sustained periods of rising interest rates and decrease in sustained periods of declining interest rates. During the fourth quarter of 2007, in an effort to make the Corporation s balance sheet less sensitive to changes in interest rates, the Corporation entered into various interest rate swaps which effectively converted certain variable-rate loans into fixed-rate instruments for a period of time. During the fourth quarter of 2008, the Corporation also entered into an interest rate swap which effectively converted variable-rate debt into fixed-rate debt for a period of time. As a result of these actions, the Corporation $s$ balance sheet was more interest-rate neutral and changes in interest rates had a less significant impact on the Corporation s net interest margin than would have otherwise been the case. During the fourth quarter of 2009, a portion of the interest rate swaps on variable-rate loans were terminated, while the remaining interest rate swaps on variable-rate loans were terminated during the fourth quarter of 2010. These actions increased the asset sensitivity of the Corporation s balance sheet. See Note 8 - Derivative Financial Instruments in the accompanying notes to consolidated financial statements included elsewhere in this report for additional information related to these interest rate swaps.

The Corporation is primarily funded by core deposits, with non-interest-bearing demand deposits historically being a significant source of funds. This lower-cost funding base is expected to have a positive impact on the Corporation $s$ net interest income and net interest margin in a rising interest rate environment. As discussed in the section captioned Supervision and Regulation included in Item 1. Business, of the 2010 Form 10-K, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act ) repealed the federal prohibitions on the payment of interest on demand deposits, thereby permitting depository institutions to pay interest on business transaction and other accounts beginning July 21, 2011. Although the ultimate impact of this legislation on the Corporation has not yet been determined, the Corporation expects that it may incur interest costs associated with demand deposits in the future as market conditions warrant. See Item 3. Quantitative and Qualitative Disclosures About Market Risk elsewhere in this report for information about the expected impact of this legislation on the Corporation s sensitivity to interest rates. Further analysis of the components of the Corporation s net interest margin is presented below.

The following table presents the changes in taxable-equivalent net interest income and identifies the changes due to differences in the average volume of earning assets and interest-bearing liabilities and the changes due to changes in the average interest rate on those assets and liabilities. The changes in net interest income due to changes in both average volume and average interest rate have been allocated to the average volume change or the average interest rate change in proportion to the absolute amounts of the change in each. The comparisons between the quarters include an additional change factor that shows the effect of the difference in the number of days in each period, as further discussed below.

|  | Third Quarter 2011 vs. Third Quarter 2010 |  | Third Quarter 2011 vs. <br> Second Quarter 2011 |  | First Nine Months 2011 vs. First Nine Months 2010 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Due to changes in average volumes | \$ | 14,072 | \$ | 5,557 | \$ | 19,622 |
| Due to changes in average interest rates |  | $(9,195)$ |  | $(6,232)$ |  | $(3,995)$ |
| Due to difference in the number days in each of the comparable periods |  |  |  | 1,745 |  |  |
| Total change | \$ | 4,877 | \$ | 1,070 | \$ | 15,627 |

Taxable-equivalent net interest income for the three months ended September 30, 2011 increased $\$ 4.9$ million, or $3.1 \%$, while taxable-equivalent net interest income for the nine months ended September 30, 2011 increased $\$ 15.6$ million, or $3.4 \%$, compared to the same periods in 2010. The increases primarily resulted from increases in the average volume of interest-earning assets partly offset by decreases in the net interest margin. The average volume of interest-earning assets for the three and nine months ended September 30, 2011 increased $\$ 1.5$ billion and $\$ 1.3$ billion compared to the same periods in 2010. The net interest margin decreased 23 basis points from $4.04 \%$ during the three months ended September 30, 2010 to $3.81 \%$ during the three months ended September 30, 2011 and decreased 20 basis points from $4.13 \%$ during the nine months ended September 30, 2010 to $3.93 \%$ during the nine months ended September 30, 2011. The decrease in the net interest margin was partly due to an increase in the relative proportion of interest-earning assets invested in lower-yielding interest-bearing deposits during 2011 compared to 2010 while the relative proportion of average interest-earning assets invested in higher-yielding loans decreased. The net interest margin was also negatively impacted by a decrease in the average yield on securities, as further discussed below.

## Table of Contents

Taxable-equivalent net interest income for the third quarter of 2011 increased $\$ 1.1$ million, or $0.7 \%$, from the second quarter of 2011. Taxable-equivalent net interest income for the third quarter of 2011 was primarily impacted by an increase in the number of days compared to the second quarter of 2011. Taxable-equivalent net interest income for the second quarter of 2011 included 91 days compared to 92 days for the third quarter of 2011. The additional day added approximately $\$ 1.7$ million to taxable-equivalent net interest income during the third quarter of 2011. Excluding the impact of the additional day during the third quarter of 2011 results in an effective decrease in taxable-equivalent net interest income of approximately $\$ 675$ thousand during the third quarter of 2011 which was primarily related to a decrease in the net interest margin partly offset by an increase in average interest-earning assets. The average volume of interest-earning assets for the third quarter of 2011 increased $\$ 697.3$ million compared to the second quarter of 2011 . The net interest margin decreased 14 basis points from $3.95 \%$ in the second quarter of 2011 to $3.81 \%$ in the third quarter of 2011. The decrease in the net interest margin was partly due to an increase in the relative proportion of funds invested in lower yielding interest-bearing deposits during the third quarter.

The average yield on interest-earning assets decreased 30 basis points from $4.50 \%$ during the first nine months of 2010 to $4.20 \%$ during the first nine months of 2011 while the average cost of funds decreased 13 basis points from $0.56 \%$ during the first nine months of 2010 to $0.43 \%$ during the first nine months of 2011. The average yield on interest-earning assets is primarily impacted by changes in market interest rates as well as changes in the volume and relative mix of interest-earning assets. The average cost of funds is primarily impacted by changes in market interest rates as well as changes in the volume and relative mix of interest-bearing liabilities. As stated above, market interest rates have remained at historically low levels during the reported periods. The effect of lower average market interest rates on the average yield on average interest-earning assets was partly limited by the aforementioned interest rate swaps on variable-rate loans.

The average volume of loans during the nine months ended September 30, 2011 decreased $\$ 90.3$ million compared to the same period in 2010. Loans made up approximately $49.1 \%$ of average interest-earning assets during the first nine months of 2011 compared to $53.9 \%$ during the first nine months of 2010. The average yield on loans was $5.01 \%$ during the nine months ended September 30,2011 compared to $5.11 \%$ during the nine months ended September 30, 2010. Loans generally have significantly higher yields compared to securities, interest-bearing deposits and federal funds sold and resell agreements and, as such, have a more positive effect on the net interest margin.

The average volume of securities increased $\$ 721.0$ million during the nine months ended September 30, 2011 compared to the same period in 2010. Securities made up approximately $35.6 \%$ of average interest-earning assets during the nine months ended September 30, 2011 compared to $33.9 \%$ during the nine months ended September 30, 2010. The average yield on securities was $4.80 \%$ during the nine months ended September 30, 2011 compared to $5.08 \%$ during the nine months ended September 30, 2010. The decrease in the average yield on securities was partly due to a decrease in the yield on taxable securities as proceeds from principal repayments were reinvested at lower market rates. The relative proportion of higher-yielding, tax-exempt municipal securities remained flat totaling $37.2 \%$ of average securities during the first nine months of both 2011 and 2010. The average yield on taxable securities was $3.50 \%$ during the first nine months of 2011 compared to $3.94 \%$ during the first nine months of 2010, while the average taxable-equivalent yield on tax-exempt securities was $6.98 \%$ during the first nine months of 2011 compared to $7.05 \%$ during the first nine months of 2010 .

Average federal funds sold, resell agreements and interest-bearing deposits during the nine months ended September 30, 2011 increased $\$ 659.6$ million compared to the same period in 2010 . Federal funds sold, resell agreements and interest-bearing deposits made up approximately $15.3 \%$ of average interest-earning assets during the nine months ended September 30, 2011 compared to $12.2 \%$ during the same period in 2010. The combined weighted-average yield on federal funds sold, resell agreements and interest-bearing deposits was $0.24 \%$ during both the nine months ended September 30, 2011 and 2010. The increase in average federal funds sold, resell agreements and interest-bearing deposits compared to the comparable periods in 2010 was primarily due to growth in average deposits.

Average deposits increased $\$ 1.0$ billion during the first nine months of 2011 compared to the same period in 2010. Average interest-bearing deposits for the first nine months of 2011 increased $\$ 413.7$ million compared to the same period in 2010 . The ratio of average interest-bearing deposits to total average deposits was $62.9 \%$ during the first nine months of 2011 compared to $64.6 \%$ during the same period in 2010 . The average cost of deposits is primarily impacted by changes in market interest rates as well as changes in the volume and relative mix of interest-bearing deposits. The average cost of interest-bearing deposits and total deposits was $0.25 \%$ and $0.15 \%$ during the first nine months of 2011 compared to $0.35 \%$ and $0.22 \%$ during the first nine months of 2010. The decrease in the average cost of interest-bearing deposits during the comparable periods was primarily the result of decreases in interest rates offered on certain deposit products due to decreases in average market interest rates and decreases in renewal interest rates on maturing certificates of deposit given the current low interest rate environment. Additionally, during the first nine month of 2011 compared to the same period in 2010, the relative proportion of higher-cost certificates of deposit to total average interest-bearing deposits decreased from $14.2 \%$ during the first nine months of 2010 to $12.2 \%$ during the first nine months of 2011.

## Table of Contents

The Corporation $s$ net interest spread, which represents the difference between the average rate earned on earning assets and the average rate paid on interest-bearing liabilities, was $3.77 \%$ during the first nine months of 2011 and $3.94 \%$ during the first nine months of 2010 . The net interest spread, as well as the net interest margin, will be impacted by future changes in short-term and long-term interest rate levels, as well as the impact from the competitive environment. A discussion of the effects of changing interest rates on net interest income is set forth in Item 3. Quantitative and Qualitative Disclosures About Market Risk included elsewhere in this report.

The Corporation s hedging policies permit the use of various derivative financial instruments, including interest rate swaps, swaptions, caps and floors, to manage exposure to changes in interest rates. Details of the Corporation s derivatives and hedging activities are set forth in Note 8 - Derivative Financial Instruments in the accompanying notes to consolidated financial statements included elsewhere in this report. Information regarding the impact of fluctuations in interest rates on the Corporation s derivative financial instruments is set forth in Item 3. Quantitative and Qualitative Disclosures About Market Risk included elsewhere in this report.

## Provision for Loan Losses

The provision for loan losses is determined by management as the amount to be added to the allowance for loan losses after net charge-offs have been deducted to bring the allowance to a level which, in management $s$ best estimate, is necessary to absorb probable losses within the existing loan portfolio. The provision for loan losses totaled $\$ 9.0$ million and $\$ 27.4$ million for the three and nine months ended September 30, 2011 compared to $\$ 10.1$ million and $\$ 32.3$ million for the three and nine months ended September 30, 2010. See the section captioned Allowance for Loan Losses elsewhere in this discussion for further analysis of the provision for loan losses.

## Non-Interest Income

The components of non-interest income were as follows:

|  | Three Months Ended |  |  |  | Nine Months Ended |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | September 30, <br> 2011 | June 30, 2011 | $\begin{gathered} \text { September 30, } \\ 2010 \end{gathered}$ |  | September 30, 2011 |  | ember 30, <br> 2010 |
| Trust fees | \$ 18,405 | \$ 18,976 | \$ | 17,029 | \$ 55,601 | \$ | 51,029 |
| Service charges on deposit accounts | 24,306 | 23,619 |  | 24,980 | 71,293 |  | 74,714 |
| Insurance commissions and fees | 9,569 | 7,908 |  | 8,588 | 27,971 |  | 27,238 |
| Other charges, commissions and fees | 8,134 | 8,478 |  | 7,708 | 25,371 |  | 22,656 |
| Net gain (loss) on securities transactions | 6,409 |  |  |  | 6,414 |  | 6 |
| Other | 12,394 | 11,811 |  | 12,125 | 35,692 |  | 36,112 |
| Total | \$ 79,217 | \$ 70,792 | \$ | 70,430 | \$ 222,342 | \$ | 211,755 |

Total non-interest income for the three and nine months ended September 30, 2011 increased $\$ 8.8$ million, or $12.5 \%$, and $\$ 10.6$ million, or $5.0 \%$, compared to the same periods in 2010. Total non-interest income for the third quarter of 2011 increased $\$ 8.4$ million, or $11.9 \%$, compared to the second quarter of 2011. Changes in the components of non-interest income are discussed below.

Trust Fees. Trust fee income for the three and nine months ended September 30, 2011 increased $\$ 1.4$ million, or $8.1 \%$, and $\$ 4.6$ million, or $9.0 \%$, compared to the same periods in 2010. Investment fees are the most significant component of trust fees, making up approximately $74 \%$ of total trust fees for both the first nine months of 2011 and 2010. Investment and other custodial account fees are generally based on the market value of assets within a trust account. Volatility in the equity and bond markets impacts the market value of trust assets and the related investment fees.

The $\$ 1.4$ million increase in trust fee income during the three months ended September 30, 2011 compared to the same period in 2010 was primarily the result of increases in investment fees (up $\$ 937$ thousand), estate fees (up $\$ 245$ thousand) and oil and gas trust management fees (up $\$ 157$ thousand). The $\$ 4.6$ million increase in trust fee income during the nine months ended September 30, 2011 compared to the same period in 2010 was primarily the result of an increase in investment fees (up $\$ 3.4$ million), securities lending income (up $\$ 469$ thousand), custody fees (up $\$ 312$ thousand) and estate fees (up $\$ 278$ thousand). The increase in investment fees was primarily due to the general appreciation in the market values of assets in trust accounts on which these fees are generally based. Equity valuations during the respective periods of 2011 were higher on average compared to the same periods in 2010.

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

Trust fee income for the third quarter of 2011 decreased $\$ 571$ thousand, or $3.0 \%$, from the second quarter of 2011. A decrease in tax fees (down $\$ 763$ thousand), which are seasonally higher during the second quarter, was partly offset by increases in estate fees (up $\$ 179$ thousand), oil and gas trust management fees (up $\$ 144$ thousand) and in investment fees (up $\$ 110$ thousand).

## Table of Contents

At September 30, 2011, trust assets, including both managed assets and custody assets, were primarily composed of fixed income securities ( $45.8 \%$ of trust assets), equity securities ( $38.3 \%$ of trust assets) and cash equivalents ( $10.0 \%$ of trust assets). The estimated fair value of trust assets was $\$ 24.1$ billion (including managed assets of $\$ 9.8$ billion and custody assets of $\$ 14.3$ billion) at September 30, 2011, compared to $\$ 24.9$ billion (including managed assets of $\$ 9.9$ billion and custody assets of $\$ 15.0$ billion) at December 31, 2010 and $\$ 23.9$ billion (including managed assets of $\$ 9.8$ billion and custody assets of $\$ 14.1$ billion) at September 30, 2010.

Service Charges on Deposit Accounts. Service charges on deposit accounts for the three and nine months ended September 30, 2011 decreased $\$ 674$ thousand, or $2.7 \%$, and $\$ 3.4$ million, or $4.6 \%$, compared to the same periods in 2010 . The decrease during the three months ended September 30, 2011 was primarily due to decreases in overdraft/insufficient funds charges on both consumer and commercial accounts (down $\$ 998$ thousand) partly offset by increases in service charges on commercial accounts (up $\$ 234$ thousand) and point of sale income (up $\$ 173$ thousand). The decrease during the nine months ended September 30, 2011 was primarily due to decreases in overdraft/insufficient funds charges on both consumer and commercial accounts (down $\$ 3.6$ million), decreases in service charges on commercial accounts (down $\$ 649$ thousand) and decreases in service charges on consumer accounts (down $\$ 286$ thousand) partly offset by an increase in point of sale income (up $\$ 1.2$ million). The decrease in overdraft/insufficient funds charges on consumer accounts during 2011 was partly related to a new rule issued by the Federal Reserve that became effective in the third quarter of 2010, as further discussed below. The decrease in service charges on commercial accounts during the nine months ended September 30, 2011 was partly related to decreases in service volumes for billable services. The increase in point of sale income from PIN-based debit card transactions during 2011 was related to an increase in the volume of transactions as well as a higher interchange pricing structure.

Service charges on deposit accounts for the third quarter of 2011 increased $\$ 687$ thousand, or $2.9 \%$, compared to the second quarter of 2011. The increase was due to increases in overdraft/insufficient funds charges on both consumer and commercial accounts (up $\$ 482$ thousand) and service charges on commercial accounts (up \$237 thousand).

Overdraft/insufficient funds charges totaled $\$ 9.0$ million ( $\$ 7.2$ million consumer and $\$ 1.8$ million commercial) during the third quarter of 2011 compared to $\$ 10.0$ million ( $\$ 7.8$ million consumer and $\$ 2.2$ million commercial) during the third quarter of 2010 and $\$ 8.5$ million ( $\$ 6.8$ million consumer and $\$ 1.7$ million commercial) during the second quarter of 2011. Overdraft/insufficient funds charges totaled $\$ 26.0$ million ( $\$ 20.6$ million consumer and $\$ 5.4$ million commercial) during the nine months ended September 30, 2011 compared to $\$ 29.6$ million ( $\$ 23.1$ million consumer and $\$ 6.5$ million commercial) during the nine months ended September 30, 2010. Overdraft/insufficient funds charges were partly impacted by changes in posting policies and a new rule issued by the Federal Reserve that became effective in the third quarter of 2010. The new rule prohibits financial institutions from charging consumers fees for paying overdrafts on automated teller machine and one-time debit card transactions, unless a consumer consents, or opts in, to the overdraft service for those types of transactions. Consumers must be provided a notice that explains the financial institution s overdraft services, including the fees associated with the service, and the consumer $s$ choices.

Point of sale income from PIN-based debit card transactions totaled $\$ 5.6$ million and $\$ 4.4$ million during the nine months ended September 30, 2011 and 2010, respectively. As discussed in the section captioned Supervision and Regulation included in Item 1. Business, of the 2010 Form 10-K, the Dodd-Frank Act amended the Electronic Fund Transfer Act ( EFTA ) to, among other things, give the Federal Reserve the authority to establish rules regarding interchange fees charged for electronic debit transactions by payment card issuers, such as Frost Bank. In June 2011, the Federal Reserve issued a final rule that, among other things, establishes standards for determining whether an interchange fee received or charged by an issuer with respect to an electronic debit transaction is reasonable and proportional to the cost incurred by the issuer with respect to the transaction. These new standards took effect on October 1, 2011 and apply to issuers, such as the Corporation, that, together with their affiliates, have assets of $\$ 10$ billion or more. Under the rule, the maximum permissible interchange fee for an electronic debit transaction will be the sum of 21 cents per transaction and 5 basis points multiplied by the value of the transaction. The Federal Reserve also issued an interim final rule that allows for an upward adjustment of no more than 1 cent to an issuer $s$ debit card interchange fee if the issuer develops and implements policies and procedures reasonably designed to achieve the fraud-prevention standards set out in the interim final rule. The fraud-prevention adjustment was effective on October 1, 2011, concurrent with the debit card interchange fee limits. The Corporation currently expects that revenues from debit card interchange transactions will likely be approximately one third of levels prior to October 1, 2011, in part due to the fact that certain merchant negotiated rates are less than the maximum prescribed rate under the new rule. Also see the discussion regarding income from Visa check card usage below under Other Non-Interest Income.

Insurance Commissions and Fees. Insurance commissions and fees for the three months ended September 30, 2011 increased $\$ 981$ thousand, or $11.4 \%$, compared to the same period in 2010 . The increase is related to an increase in commission income (up $\$ 898$ thousand). Insurance commissions and fees for the nine months ended September 30, 2011

## Table of Contents

increased $\$ 733$ thousand, or $2.7 \%$, compared to the same period in 2010. The increase is related to an increase in commission income (up $\$ 781$ thousand). The increase in commission income was partly related to the acquisition of Clark Benefit Group in the second quarter of 2011 as well as normal variation in the timing of renewals and market demand for insurance products.

Insurance commissions and fees include contingent commissions totaling $\$ 426$ thousand and $\$ 3.5$ million during the three and nine months ended September 30, 2011 and $\$ 344$ thousand and $\$ 3.6$ million during the three and nine months ended September 30, 2010. Contingent commissions primarily consist of amounts received from various property and casualty insurance carriers related to the loss performance of insurance policies previously placed. Such commissions are seasonal in nature and are primarily received during the first quarter of each year. These property and casualty related commissions totaled $\$ 2.2$ million and $\$ 2.5$ million during the nine months ended September 30, 2011 and 2010. Contingent commissions also include amounts received from various benefit plan insurance companies related to the volume of business generated and/or the subsequent retention of such business. These benefit plan related commissions totaled $\$ 417$ thousand and $\$ 1.3$ million during the three and nine months ended September 30, 2011 and $\$ 267$ thousand and $\$ 1.1$ million during the three and nine months ended September 30, 2010.

Insurance commissions and fees for the third quarter of 2011 increased $\$ 1.7$ million, or $21.0 \%$, compared to the second quarter of 2011 . The increase was related to an increase in commission income (up $\$ 1.8$ million) primarily due to normal variation in the timing of renewals and the market demand for insurance products.

Other Charges, Commissions and Fees. Other charges, commissions and fees for the three and nine months ended September 30, 2011 increased $\$ 426$ thousand, or $5.5 \%$, and $\$ 2.7$ million, or $12.0 \%$, compared to the same periods in 2010 . The increase during the three months ended September 30, 2011 was primarily related to increases in loan processing fees (up $\$ 358$ thousand), mutual fund management fees (up $\$ 298$ thousand) and unused balance fees on loan commitments (up $\$ 186$ thousand) partly offset by a decrease in investment banking fees related to corporate advisory services (down $\$ 182$ thousand) and income related to the sale of annuities (down $\$ 116$ thousand). The increase in other charges, commissions and fees during the nine months ended September 30, 2011 was primarily related to increases in mutual fund management fees (up $\$ 1.0$ million), loan processing fees (up $\$ 863$ thousand), unused balance fees on loan commitments (up $\$ 530$ thousand) and income related to sale of annuities and mutual funds (up $\$ 317$ thousand and $\$ 302$ thousand, respectively).

Other charges, commissions and fees for the third quarter of 2011 decreased $\$ 344$ thousand, or $4.1 \%$, compared to the second quarter of 2011. The decrease was primarily due to a decrease in income from the sale of mutual funds and annuities (down $\$ 225$ thousand and $\$ 125$ thousand, respectively) and mutual fund management fees (down $\$ 90$ thousand) partly offset by an increase in other service charges (up $\$ 142$ thousand) and unused balance fees on loan commitments (up $\$ 120$ thousand).

Net Gain/Loss on Securities Transactions. During the nine months ended September 30, 2011, the Corporation sold available-for-sale securities with an amortized cost totaling $\$ 5.6$ billion and realized a net gain of $\$ 6.4$ million on those sales. During the nine months ended September 30, 2010, the Corporation sold available-for-sale securities with an amortized cost totaling $\$ 10.0$ billion and realized a net gain of $\$ 6$ thousand on those sales. With the exception of the sales during the third quarter of 2011 discussed below, these securities were primarily purchased during each respective year and subsequently sold primarily in connection with the Corporation s tax planning strategies related to the Texas franchise tax. The gross proceeds from the sales of these securities outside of Texas are included in total revenues/receipts from all sources reported for Texas franchise tax purposes, which results in a reduction in the overall percentage of revenues/receipts apportioned to Texas and subjected to taxation under the Texas franchise tax.

During the third quarter of 2011, the Corporation sold available-for-sale securities with an amortized cost totaling $\$ 32.6$ million and realized a net gain of $\$ 6.4$ million on those sales. The Corporation sold certain longer-duration municipal securities.

Other Non-Interest Income. Other non-interest income for the three months ended September 30, 2011 increased $\$ 269$ thousand, or $2.2 \%$, compared to the same period in 2010. Components of other non-interest income with significant increases included income from check card activity (up $\$ 679$ thousand), sundry income from various miscellaneous items (up $\$ 402$ thousand), mineral interest income (up $\$ 313$ thousand) and gains on the sale of assets/foreclosed assets (up $\$ 194$ thousand). Components of other non-interest income with significant decreases included income from securities trading and customer derivative activities (down $\$ 428$ thousand), lease rental income (down $\$ 416$ thousand) and income from municipal bond underwriting discounts/fees (down $\$ 293$ thousand). The decrease in income from securities trading and customer derivative activities was primarily related to decreases in customer interest rate swap transaction fees and securities trading gains.

## Table of Contents

Other non-interest income for the nine months ended September 30, 2011 decreased $\$ 420$ thousand, or $1.2 \%$, compared to the same periods in 2010. Components of other non-interest income with significant decreases included income from securities trading and customer derivative activities (down $\$ 1.3$ million), lease rental income (down $\$ 805$ thousand), sundry income from various miscellaneous items (down $\$ 600$ thousand), earnings on the cash surrender value of life insurance policies (down $\$ 376$ thousand) and income from municipal bond underwriting discounts/fees (down $\$ 264$ thousand). The decrease in income from securities trading and customer derivative activities was primarily related to decreases in customer interest rate swap transaction fees and securities trading gains partly offset by an increase in customer commodity swap and foreign exchange transaction fees. Components of other non-interest income with significant increases included income from check card activity (up $\$ 2.0$ million), gains on the sale of assets/foreclosed assets (up $\$ 928$ thousand) and mineral interest income (up $\$ 453$ thousand).

Other non-interest income for the third quarter of 2011 increased $\$ 583$ thousand, or $4.9 \%$, compared to the second quarter of 2011. Contributing to the increase were increases in sundry income from various miscellaneous items (up $\$ 676$ thousand) and mineral interest income (up $\$ 281$ thousand) partly offset by a decrease in gains on the sale of assets/foreclosed assets (down $\$ 269$ thousand) and income from securities trading and customer derivative activities (down $\$ 184$ thousand). Sundry income from various miscellaneous items during the third quarter included $\$ 582$ thousand related to a legal judgment.

The Corporation had income from Visa check card usage totaling $\$ 17.6$ million and $\$ 15.6$ million during the nine months ended September 30, 2011 and 2010. The Dodd-Frank Act amended the EFTA to, among other things, give the Federal Reserve the authority to establish rules regarding interchange fees charged for electronic debit transactions by payment card issuers, such as Frost Bank. As more fully discussed above relative to point of sale income from PIN-based debit card transactions under Service Charges on Deposit Accounts, in June 2011, the Federal Reserve issued new rules that will significantly impact the level of interchange fees that may be charged beginning October 1, 2011. The Corporation currently expects that revenues from Visa check card usage will likely be approximately one third of levels prior to October 1, 2011, in part due to the fact that certain merchant negotiated rates are less than the maximum prescribed rate under the new rule.

## Non-Interest Expense

The components of non-interest expense were as follows:

|  | Three Months Ended |  |  |  | Nine Months Ended |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { September 30, } \\ 2011 \end{gathered}$ | June 30, 2011 | September 30,2010 |  | $\begin{gathered} \text { September 30, } \\ 2011 \end{gathered}$ |  | ember 30, <br> 2010 |
| Salaries and wages | \$ 61,697 | \$ 61,775 | \$ | 59,743 | \$ 185,902 | \$ | 178,845 |
| Employee benefits | 12,004 | 13,050 |  | 12,698 | 40,365 |  | 39,894 |
| Net occupancy | 12,080 | 11,823 |  | 12,197 | 35,555 |  | 34,969 |
| Furniture and equipment | 13,106 | 12,628 |  | 12,165 | 38,015 |  | 35,316 |
| Deposit insurance | 2,583 | 2,598 |  | 4,661 | 9,941 |  | 15,533 |
| Intangible amortization | 1,108 | 1,107 |  | 1,276 | 3,335 |  | 3,908 |
| Other | 34,829 | 33,816 |  | 29,812 | 101,152 |  | 93,335 |
| Total | \$ 137,407 | \$ 136,797 | \$ | 132,552 | \$ 414,265 | \$ | 401,800 |

Total non-interest expense for the three and nine months ended September 30, 2011 increased $\$ 4.9$ million, or $3.7 \%$, and increased $\$ 12.5$ million, or $3.1 \%$, compared to the same periods in 2010 . Total non-interest expense for the third quarter of 2011 increased $\$ 610$ thousand, or $0.4 \%$, compared to the second quarter of 2011 . Changes in the components of non-interest expense are discussed below.

Salaries and Wages. Salaries and wages for the three and nine months ended September 30, 2011 increased $\$ 2.0$ million, or $3.3 \%$, and $\$ 7.1$ million, or $3.9 \%$, compared to the same periods in 2010. The increases were primarily related to normal annual merit and market increases and incentive compensation expense partly offset by decreases in stock-based compensation expense. Salaries and wages expense for the third quarter of 2011 did not significantly fluctuate compared to the second quarter of 2011 as increases in salaries and wages resulting from normal annual merit and market increases were offset by a decrease in stock-based compensation expense.

Employee Benefits. Employee benefits expense for the three and nine months ended September 30, 2011 decreased $\$ 694$ thousand, or 5.5\%, and increased $\$ 471$ thousand, or $1.2 \%$, respectively, compared to the same periods in 2010. The decrease during the three months ended
September 30, 2011 was primarily related to decreases in expenses related to the Corporation $\mathrm{s} 401(\mathrm{k})$ and profit sharing plans (down

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

$\$ 678$ thousand). The increase during the nine months ended September 30, 2011 was primarily related to increases in expenses related to payroll taxes (up $\$ 533$ thousand) and the Corporation $\mathrm{s} 401(\mathrm{k})$ and profit sharing plans (up $\$ 233$ thousand) and medical insurance expense (up $\$ 254$ thousand).

## Table of Contents

Employee benefits expense for the third quarter of 2011 decreased $\$ 1.0$ million, or $8.0 \%$, compared to the second quarter of 2011 primarily due to decreases in expenses related to the Corporation $\mathrm{s} 401(\mathrm{k})$ and profit sharing plans (down $\$ 595$ thousand) and payroll taxes (down $\$ 380$ thousand).

Combined expense related to the defined benefit retirement and restoration plans was not significant during the reported periods. The Corporation s defined benefit retirement and restoration plans were frozen effective as of December 31, 2001 and were replaced by a profit sharing plan. Management believes these actions helped to reduce the volatility in retirement plan expense. However, the Corporation still has funding obligations related to the defined benefit and restoration plans and could recognize retirement expense related to these plans in future years, which would be dependent on the return earned on plan assets, the level of interest rates and employee turnover.

Net Occupancy. Net occupancy expense for the three and nine months ended September 30, 2011 decreased $\$ 117$ thousand, or $1.0 \%$, and increased $\$ 586$ thousand, or $1.7 \%$, compared to the same periods in 2010. The decrease during the three months ended September 30, 2011 was primarily related to decreases in lease expense (down $\$ 122$ thousand) as well as various other categories of net occupancy partly offset by increases in service contracts expense (up $\$ 99$ thousand) and building maintenance expense (up $\$ 68$ thousand). The increase during the nine months ended September 30, 2011 was primarily related to increases in repairs expense (up $\$ 304$ thousand), service contracts expense (up $\$ 261$ thousand), building maintenance expense (up $\$ 246$ thousand) and a decrease in parking garage income (down $\$ 162$ thousand). Offsetting these items were decreases in utilities expense (down $\$ 129$ thousand), building insurance expense (down $\$ 109$ thousand) and lease expense (down $\$ 106$ thousand). Net occupancy expense for the third quarter of 2011 increased $\$ 257$ thousand, or $2.2 \%$, compared to the second quarter of 2011. The increase was primarily related to increases in service contracts expense (up $\$ 250$ thousand) and utilities expense (up $\$ 167$ thousand) partly offset by an increase in parking garage income (up $\$ 153$ thousand).

Furniture and Equipment. Furniture and equipment expense for the three and nine months ended September 30, 2011 increased $\$ 941$ thousand, or $7.7 \%$, and $\$ 2.7$ million, or $7.6 \%$, compared to the same periods in 2010 . The increase during the three months ended September 30, 2011 was primarily related to increases in software maintenance (up $\$ 567$ thousand), software amortization (up $\$ 254$ thousand) and service contracts expense (up $\$ 196$ thousand) partly offset by a decrease in depreciation on furniture and fixtures (down $\$ 140$ thousand). The increase during the nine months ended September 30, 2011 was primarily related to increases in software maintenance (up $\$ 1.6$ million) and software amortization (up $\$ 986$ thousand) partly offset by a decrease in depreciation on furniture and fixtures (down $\$ 281$ thousand). The increase in software amortization and maintenance was primarily related to new applications placed into service in 2010. Furniture and equipment expense for the third quarter of 2011 increased $\$ 478$ thousand, or $3.8 \%$, compared to the second quarter of 2011 primarily due to increases in software maintenance (up $\$ 212$ thousand), software amortization (up $\$ 126$ thousand) and depreciation on furniture and fixtures (up $\$ 109$ thousand).

Deposit Insurance. Deposit insurance expense totaled $\$ 2.6$ million and $\$ 9.9$ million for the three and nine months ended September 30, 2011 compared to $\$ 4.7$ million and $\$ 15.5$ million for the three and nine months ended September 30, 2010. The decreases in deposit insurance expense in 2011 were primarily related to a change in the deposit insurance assessment base and a change in the method by which the assessment rate is determined for large financial institutions. Details of these changes are further discussed below. The decreases were also partly related to the Corporation opting out of the Transaction Account Guarantee component of the Temporary Liquidity Guarantee Program ( TLGP ) effective July 1, 2010. Deposit insurance expense for the third quarter of 2011 did not significantly fluctuate compared to the second quarter of 2011.

In November 2009, the FDIC issued a rule that required all insured depository institutions, with limited exceptions, to prepay their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011 and 2012. As of September 30, 2011, $\$ 34.7$ million in pre-paid deposit insurance is included in accrued interest receivable and other assets in the accompanying consolidated balance sheet.

In November 2010, the FDIC issued a final rule to implement provisions of the Dodd-Frank Act that provide for temporary unlimited coverage for non-interest-bearing transaction accounts. The separate coverage for non-interest-bearing transaction accounts became effective on December 31, 2010 and terminates on December 31, 2012.

On April 1, 2011, the deposit insurance assessment base changed from total domestic deposits to average total assets minus average tangible equity, pursuant to a rule issued by the FDIC as required by the Dodd-Frank Act. Additionally, the deposit insurance assessment system was revised to create a two scorecard system, one for most large institutions, including Frost Bank, that have more than $\$ 10$ billion in assets and another for highly complex institutions that have over $\$ 50$ billion in assets and are fully owned by a parent with over $\$ 500$ billion in assets. Each scorecard has a performance score and a loss-severity score that is combined to produce a total score, which is then translated into an initial assessment rate. In calculating these scores, the FDIC utilizes CAMELS ratings, certain financial measures to assess an institution s ability to withstand asset-related stress and funding-related stress. The use of risk categories and long-term debt issuer ratings was eliminated. The FDIC has the ability to make discretionary adjustments to the total score, up or down, by a maximum of 15 points, based upon significant risk factors that are not adequately captured in the scorecard. The total score is constrained to be between 30 and 90 and translates to an initial base assessment rate on a non-linear, sharply-increasing scale.

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

## Table of Contents

For large institutions, including Frost Bank, the initial base assessment rate ranges from 5 to 35 basis points on an annualized basis (basis points representing cents per $\$ 100$ ). After the effect of potential base-rate adjustments, the total base assessment rate could range from 2.5 to 45 basis points on an annualized basis. The potential adjustments to an institution sinitial base assessment rate include (i) a potential decrease of up to 5 basis points for certain long-term unsecured debt ( unsecured debt adjustment ) and (ii) (except for well-capitalized institutions with a CAMELS rating of 1 or 2) a potential increase of up to 10 basis points for brokered deposits in excess of $10 \%$ of domestic deposits ( brokered deposit adjustment ). As the deposit insurance fund ( DIF ) reserve ratio grows, the rate schedule will be adjusted downward. Additionally, the rule includes a new adjustment for depository institution debt whereby an institution will pay an additional premium equal to 50 basis points on every dollar (above $3 \%$ of an institution s Tier 1 capital) of long-term, unsecured debt held that was issued by another insured depository institution (excluding debt guaranteed under the TLGP).

Intangible Amortization. Intangible amortization is primarily related to core deposit intangibles and, to a lesser extent, intangibles related to customer relationships and non-compete agreements. Intangible amortization for the three and nine months ended September 30, 2011 decreased $\$ 168$ thousand, or $13.2 \%$ and $\$ 573$ thousand, or $14.7 \%$ compared to the same periods in 2010 . The decreases in amortization expense are primarily the result of the completion of amortization of certain intangible assets and a reduction in the annual amortization rate of certain intangible assets as the Corporation uses an accelerated amortization approach which results in higher amortization rates during the earlier years of the useful lives of intangible assets. Intangible amortization expense during the third quarter of 2011 did not significantly fluctuate compared to the second quarter of 2011. The decrease in intangible amortization during 2011 was limited by the amortization of additional intangible assets acquired in the acquisition of Clark Benefit Group, an independent San Antonio based insurance agency during the second quarter of 2011. See Note 4 -Goodwill and Other Intangible Assets in the accompanying notes to consolidated financial statements included elsewhere in this report.

Other Non-Interest Expense. Other non-interest expense for the three and nine months ended September 30, 2011 increased $\$ 5.0$ million, or $16.8 \%$, and $\$ 7.8$ million, or $8.4 \%$, compared to the same periods in 2010 . Components of other non-interest expense with significant increases during the three months ended September 30, 2011 included advertising/promotions expense (up $\$ 2.2$ million), sundry losses from various miscellaneous items (up $\$ 1.7$ million), losses on the sale/write-down of foreclosed assets (up $\$ 1.3$ million) and web-site maintenance expense (up $\$ 483$ thousand). The increase in advertising/promotions expense is primarily related to a new, expanded marketing campaign that began during the first quarter of 2011. The Corporation expects advertising/promotions expense throughout 2011 to be significantly higher than in 2010 as a result of this campaign. Sundry expense from miscellaneous items during the third quarter of 2011 included a $\$ 1.4$ million write-down related to an interest in a limited partnership as well as several other one-time charges for various write-offs and losses which contributed to a higher level of expense in 2011. The increases in the aforementioned items were partly offset by decreases in losses on the sale of assets (down $\$ 775$ thousand), property taxes on foreclosed assets (down $\$ 353$ thousand) and professional services expense (down $\$ 261$ thousand), among other things.

Components of other non-interest expense with significant increases during the nine months ended September 30, 2011 included advertising/promotions expense (up $\$ 5.1$ million), web-site maintenance expense (up $\$ 1.5$ million), sub-advisor investment management fees related to Frost Investment Advisors, LLC, (up $\$ 765$ thousand), Visa check card expense (up $\$ 754$ thousand) and travel expense (up $\$ 681$ thousand). As mentioned above, the increase in advertising/promotions expense is primarily related to a new, expanded marketing campaign that began during the first quarter of 2011. The increases in the aforementioned items were partly offset by decreases in property taxes on foreclosed assets (down $\$ 976$ thousand), amortization of net deferred costs related to loan commitments (down $\$ 901$ thousand), losses on the sale/write-down of foreclosed assets (down $\$ 531$ thousand), Federal Reserve service charges (down $\$ 514$ thousand) and depreciation expense on leased properties (down $\$ 438$ thousand).

Total other non-interest expense for the third quarter of 2011 increased $\$ 1.0$ million, or $3.0 \%$, compared to the second quarter of 2011. Significant components of the increase included increases in sundry losses from various miscellaneous items (up $\$ 2.0$ million), losses on the sale/write-down of foreclosed assets (up $\$ 1.1$ million), amortization of net deferred costs related to loan commitments (up $\$ 532$ thousand) and advertising/promotions expense (up $\$ 253$ thousand). These increases were partly offset by decreases in professional services expense (down $\$ 447$ thousand), meals and entertainment expense (down $\$ 406$ thousand) and stock-based compensation expense for outside directors (down $\$ 330$ thousand).

## Table of Contents

## Results of Segment Operations

The Corporation s operations are managed along two operating segments: Banking and Frost Wealth Advisors (formerly Financial Management Group or FMG ). A description of each business and the methodologies used to measure financial performance is described in Note 14 Operating Segments in the accompanying notes to consolidated financial statements included elsewhere in this report. Net income (loss) by operating segment is presented below:

|  | Three Months Ended |  |  |  | Nine Months Ended |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { September 30, } \\ 2011 \end{gathered}$ | $\begin{gathered} \text { June 30, } \\ 2011 \end{gathered}$ | $\begin{gathered} \text { September 30, } \\ \mathbf{2 0 1 0} \end{gathered}$ |  | September 30, 2011 |  | ember 30, 2010 |

## Banking

Net income for the three and nine months ended September 30, 2011 decreased $\$ 1.3$ million, or $2.3 \%$, and increased $\$ 4.2$ million, or $2.7 \%$, compared to the same periods in 2010. The decrease during the three months ended September 30, 2011 was primarily the result of a $\$ 7.9$ million increase in income tax expense and a $\$ 4.5$ million increase in non-interest expense partly offset by a $\$ 7.0$ million increase in non-interest income, a $\$ 3.1$ million increase in net interest income and a $\$ 1.1$ million decrease in the provision for loan losses. The increase during the nine months ended September 30, 2011 was primarily the result of a $\$ 9.7$ million increase in net interest income, a $\$ 4.9$ million decrease in the provision for loan losses and a $\$ 4.5$ million increase in non-interest income partly offset by a $\$ 9.9$ million increase in non-interest expense and a $\$ 4.9$ million increase in income tax expense.

Net interest income for the three and nine months ended September 30, 2011 increased $\$ 3.1$ million, or $2.1 \%$, and $\$ 9.7$ million, or $2.3 \%$, compared to the same periods in 2010. The increases primarily resulted from increases in the average volume of interest-earning assets partly offset by decreases in the net interest margin. See the analysis of net interest income included in the section captioned Net Interest Income included elsewhere in this discussion.

The provision for loan losses for the three and nine months ended September 30, 2011 totaled $\$ 9.0$ million and $\$ 27.4$ million compared to $\$ 10.1$ million and $\$ 32.3$ million for the same periods in 2010. See the analysis of the provision for loan losses included in the section captioned
Allowance for Loan Losses included elsewhere in this discussion.

Non-interest income for the three and nine months ended September 30, 2011 increased $\$ 7.0$ million, or $14.3 \%$, and $\$ 4.5$ million, or $3.1 \%$, compared to the same periods in 2010. The increase during the three months ended September 30, 2011 was primarily due to increases in the net gain on sale of securities and insurance commissions and fees partly offset by a decrease in service charges on deposit accounts. The increase during the nine months ended September 30, 2011 was primarily due to increases in the net gain on sale of securities, other charges, commissions and fees and insurance commissions and fees partly offset by a decrease in service charges on deposit accounts. See the analysis of these categories of non-interest income included in the section captioned Non-Interest Income included elsewhere in this discussion.

Non-interest expense for the three months and nine ended September 30, 2011 increased $\$ 4.5$ million, or $4.1 \%$, and increased $\$ 9.9$ million, or $2.9 \%$, compared to the same periods in 2010 . The increase during the three months ended September 30,2011 was primarily due to an increase in other non-interest expense, salaries and wages and furniture and equipment expense partly offset by decreases in deposit insurance expense and employee benefits. The increase during the nine months ended September 30, 2011 was primarily due to an increase in other non-interest expense, salaries and wages and furniture and equipment expense partly offset by decreases in deposit insurance expense and intangible amortization. The increases in other non-interest expense were partly related to increases in advertising/promotions expense, among other things. The increases in salaries and wages were primarily related to normal annual merit and market increases and an increase in incentive compensation. The increase in furniture and equipment expense was due to increases in software maintenance and software amortization. The decrease in deposit insurance was primarily related to a change in the deposit insurance assessment base and a change in the method by which the assessment rate is determined for large financial institutions. The decrease was also partly related to the Corporation opting out of the Transaction Account Guarantee component of the Temporary Liquidity Guarantee Program effective July 1, 2010. See the analysis of these items included in the section captioned Non-Interest Expense included elsewhere in this discussion.

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

Income tax expense for the three and nine months ended September 30,2011 increased $\$ 7.9$ million, or $48.8 \%$, and $\$ 4.9$ million, or $10.5 \%$, compared to the same periods in 2010. The increases were primarily due to the correction, during the third quarter of 2011, of an under-accrual of taxes that resulted from incorrectly deducting premium amortization on municipal securities for federal income tax purposes since 2008. See the analysis of these items included in the section captioned Income Taxes included elsewhere in this discussion.

## Table of Contents

Frost Insurance Agency, which is included in the Banking operating segment, had gross commission revenues of $\$ 9.6$ million and $\$ 28.1$ million during the three and nine months ended September 30, 2011 and $\$ 8.6$ million and $\$ 27.4$ million during the three and nine months ended September 30, 2010. Insurance commission revenues increased $\$ 981$ thousand, or $11.4 \%$, during the three months ended September 30, 2011 and increased $\$ 733$ thousand, or $2.7 \%$, during the nine months ended September 30, 2011, compared to the same periods in 2010. See the analysis of insurance commissions and fees included in the section captioned Non-Interest Income included elsewhere in this discussion.

## Frost Wealth Advisors

Net income for the three and nine months ended September 30, 2011 increased $\$ 665$ thousand, or $32.7 \%$, and $\$ 1.7$ million, or $30.6 \%$, compared to the same periods in 2010. The increase during the three months ended September 30, 2011 was primarily due to a $\$ 1.6$ million increase non-interest income partly offset by a $\$ 428$ thousand increase in non-interest expense, a $\$ 359$ thousand increase in income tax expense and a $\$ 163$ thousand decrease in net interest income. The increase during the nine months ended September 30, 2011 was primarily due to a $\$ 5.9$ million increase non-interest income partly offset by a $\$ 2.9$ million increase in non-interest expense, a $\$ 925$ thousand increase in income tax expense and a $\$ 343$ thousand decrease in net interest income.

Net interest income for the three and nine months ended September 30, 2011 decreased $\$ 163$ thousand, or $9.3 \%$, and $\$ 343$ thousand, or $7.2 \%$, compared to the same periods in 2010. The decrease in net interest income was due to a decrease in the funds transfer price received for funds provided to the Corporation.

Non-interest income for the three and nine months ended September 30, 2011 increased $\$ 1.6$ million, or $7.6 \%$, and $\$ 5.9$ million, or $9.2 \%$, compared to the same periods in 2010. The increase during the three months ended September 30, 2011 was primarily due to increases in trust fees (up $\$ 1.4$ million) and other charges, commissions and fees (up $\$ 324$ thousand) partly offset by a decrease in other non-interest income (down $\$ 157$ thousand). The increase during the nine months ended September 30, 2011 was primarily due to increases in trust fees (up $\$ 4.7$ million) and other charges, commissions and fees (up $\$ 1.5$ million) partly offset by a decrease in other non-interest income (down $\$ 368$ thousand).

Trust fee income is the most significant income component for Frost Wealth Advisors. Investment fees are the most significant component of trust fees, making up approximately $74 \%$ of total trust fees for both the first nine months of 2011 and 2010. Investment and other custodial account fees are generally based on the market value of assets within a trust account. Volatility in the equity and bond markets impacts the market value of trust assets and the related investment fees. The increase in trust fee income during the three months ended September 30, 2011 compared to the same period in 2010 was primarily the result of an increase in investment fees. The increase in trust fee income during the nine months ended September 30, 2011 compared to the same period in 2010 was primarily the result of an increase in investment fees and securities lending income. See the analysis of trust fees included in the section captioned Non-Interest Income included elsewhere in this discussion.

The increases in other charges, commissions and fees during the three and nine months ended September 30, 2011 compared to the same periods in 2010 were primarily due to increases in mutual fund management fees and income related to the sale of annuities and mutual funds.

Non-interest expense for the three and nine months ended September 30, 2011 increased $\$ 428$ thousand, or $2.1 \%$, and $\$ 2.9$ million, or $4.8 \%$, compared to the same periods in 2010. The increase during the three months ended September 30, 2011 was primarily due to an increase in salaries and wages (up $\$ 463$ thousand). The increase during the nine months ended September 30, 2011 was primarily due to increases in salaries and wages (up $\$ 1.2$ million) and other non-interest expense (up $\$ 1.8$ million). The increases in salaries and wages during the three and nine months ended September 30, 2011 was primarily related to normal annual merit and market increases. The increase in other non-interest expense during the nine months ended September 30, 2011 was partly related to increases in sub-advisor investment management fees related to Frost Investment Advisors, LLC, and increases in various overhead cost allocations, among other things, partly offset by decreases in sundry losses from various miscellaneous items.

## Non-Banks

The net loss for the Non-Banks operating segment decreased $\$ 122$ thousand and $\$ 533$ thousand for the three and nine months ended September 30, 2011, respectively, compared to the same periods in 2010. The decrease during the three months ended September 30, 2011 was primarily due to a $\$ 214$ thousand increase in non-interest income and $\$ 119$ thousand decrease in non-interest expense partly offset by a $\$ 240$ thousand decrease in income tax benefit. The decrease during the nine months ended September 30, 2011 was primarily due to a $\$ 371$ thousand decrease in non-interest expense, a $\$ 233$ thousand increase in non-interest income and a $\$ 222$ thousand decrease in net interest expense partly offset by a $\$ 293$ thousand decrease in income tax benefit.

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

## Table of Contents

## Income Taxes

The Corporation recognized income tax expense of $\$ 23.7$ million and $\$ 50.0$ million, for an effective tax rate of $30.3 \%$ and $23.6 \%$ for the three and nine months ended September 30, 2011 compared to $\$ 15.2$ million and $\$ 43.8$ million, for an effective tax rate of $21.7 \%$ and $22.0 \%$ for the three and nine months ended September 30, 2010. The effective income tax rates differed from the U.S. statutory rate of $35 \%$ during the comparable periods primarily due to the effect of tax-exempt income from loans, securities and life insurance policies. The increase in the effective tax rate for the three and nine months ended September 30, 2011 compared to the same periods in 2010 was primarily due to the correction, during the third quarter of 2011 , of an under-accrual of taxes that resulted from incorrectly deducting premium amortization on municipal securities for federal income tax purposes since 2008. As a result, the Corporation recognized additional income tax expense totaling $\$ 4.3$ million, which included interest and penalties, related to the 2010, 2009 and 2008 tax years. Additionally, income tax expense for the third quarter of 2011 also included an accrual of $\$ 1.7$ million related to premium amortization on municipal securities for the first and second quarters of 2011. Excluding the effect of the correction related to prior year amounts, the Corporation s effective tax rate would have been $21.5 \%$ for the nine months ended September 30, 2011.

## Average Balance Sheet

Average assets totaled $\$ 18.2$ billion for the nine months ended September 30, 2011 representing an increase of $\$ 1.3$ billion, or $7.5 \%$, compared to average assets for the same period in 2010. The increase was primarily reflected in earning assets, which increased $\$ 1.3$ billion, or $8.5 \%$, during the first nine months of 2011 compared to the same period in 2010 . The increase in earning assets was primarily due to a $\$ 721.0$ million increase in average securities and a $\$ 659.6$ million increase in average interest-bearing deposits and federal funds sold and resale agreements partly offset by a $\$ 90.3$ million decrease in average loans. The growth in average interest-earning assets was primarily funded by an increase in deposits. Total deposits averaged $\$ 14.9$ billion for the first nine months of 2011, increasing $\$ 1.0$ billion, or $7.6 \%$, compared to the same period in 2010. Average interest-bearing accounts totaled $62.9 \%$ and $64.6 \%$ of average total deposits during the first nine months of 2011 and 2010, respectively.

## Loans

Loans were as follows as of the dates indicated:

|  | September 30, 2011 | Percent of Total | June 30, 2011 | $\begin{gathered} \text { December 31, } \\ 2010 \end{gathered}$ | $\begin{gathered} \text { September 30, } \\ 2010 \end{gathered}$ |

## Table of Contents

Loans decreased $\$ 27.4$ million, or $0.3 \%$, compared to December 31, 2010. The majority of the Corporation s loan portfolio is comprised of commercial and industrial loans and real estate loans. Commercial and industrial loans made up $48.6 \%$ and $46.7 \%$ of total loans at September 30, 2011 and December 31, 2010, respectively while real estate loans made up $47.7 \%$ and $49.3 \%$ of total loans, respectively, at those dates. Real estate loans include both commercial and consumer balances.

Commercial and industrial loans increased $\$ 142.9$ million, or $3.8 \%$, during the first nine months of 2011. The Corporation s commercial and industrial loans are a diverse group of loans to small, medium and large businesses. The purpose of these loans varies from supporting seasonal working capital needs to term financing of equipment. While some short-term loans may be made on an unsecured basis, most are secured by the assets being financed with collateral margins that are consistent with the Corporation s loan policy guidelines. The commercial and industrial loan portfolio also includes the commercial lease and asset-based lending portfolios as well as purchased shared national credits ( SNC s) which are discussed in more detail below.

Purchased shared national credits are participations purchased from upstream financial organizations and tend to be larger in size than the Corporation s originated portfolio. The Corporation s purchased SNC portfolio totaled $\$ 519.3$ million at September 30, 2011, increasing $\$ 59.3$ million, or $12.9 \%$, from $\$ 460.0$ million at December 31, 2010. At September 30, 2011, 71.3\% of outstanding purchased SNCs was related to the energy industry. The remaining purchased SNCs were diversified throughout various other industries, with no other single industry exceeding $10 \%$ of the total purchased SNC portfolio. Additionally, almost all of the outstanding balance of purchased SNCs was included in the commercial and industrial portfolio, with the remainder included in the real estate categories. SNC participations are originated in the normal course of business to meet the needs of the Corporation s customers. As a matter of policy, the Corporation generally only participates in SNCs for companies headquartered in or which have significant operations within the Corporation s market areas. In addition, the Corporation must have direct access to the company s management, an existing banking relationship or the expectation of broadening the relationship with other banking products and services within the following 12 to 24 months. SNCs are reviewed at least quarterly for credit quality and business development successes.

Real estate loans decreased $\$ 140.8$ million, or $3.5 \%$, during the first nine months of 2011. Real estate loans include both commercial and consumer balances. Commercial real estate loans totaled $\$ 3.1$ billion at September 30, 2011 and represented $80.1 \%$ of total real estate loans. The majority of this portfolio consists of commercial real estate mortgages, which includes both permanent and intermediate term loans. The Corporation s primary focus for its commercial real estate portfolio has been growth in loans secured by owner-occupied properties. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Consequently, these loans must undergo the analysis and underwriting process of a commercial and industrial loan, as well as that of a real estate loan.

The consumer loan portfolio, including all consumer real estate, decreased $\$ 51.5$ million, or $4.6 \%$, from December 31, 2010. As the following table illustrates, the consumer loan portfolio has two distinct segments, including consumer real estate and consumer installment.

|  | September 30, 2011 |  | June 30, 2011 |  | $\begin{gathered} \text { December 31, } \\ 2010 \end{gathered}$ |  | $\begin{gathered} \text { September 30, } \\ 2010 \end{gathered}$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Consumer real estate: |  |  |  |  |  |  |  |  |
| Home equity loans | \$ | 277,284 | \$ | 276,869 | \$ | 275,806 | \$ | 279,106 |
| Home equity lines of credit |  | 190,958 |  | 189,356 |  | 186,465 |  | 180,538 |
| 1-4 family residential mortgages |  | 47,455 |  | 49,849 |  | 57,877 |  | 60,177 |
| Construction |  | 17,965 |  | 17,952 |  | 23,565 |  | 24,446 |
| Other |  | 233,053 |  | 239,043 |  | 254,551 |  | 266,558 |
| Total consumer real estate |  | 766,715 |  | 773,069 |  | 798,264 |  | 810,825 |
| Consumer installment |  | 299,417 |  | 298,327 |  | 319,384 |  | 322,239 |
| Total consumer loans | \$ | 1,066,132 |  | 1,071,396 | \$ | 1,117,648 | \$ | 1,133,064 |

Consumer real estate loans, decreased $\$ 31.5$ million, or $4.0 \%$, from December 31, 2010. Combined, home equity loans and lines of credit made up $61.1 \%$ and $57.9 \%$ of the consumer real estate loan total at September 30, 2011 and December 31, 2010, respectively. The Corporation offers home equity loans up to $80 \%$ of the estimated value of the personal residence of the borrower, less the value of existing mortgages and home improvement loans. In general, the Corporation no longer originates 1-4 family mortgage loans, however, from time to time, the Corporation may invest in such loans to meet the needs of its customers.

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

The consumer installment loan portfolio primarily consists of automobile loans, unsecured revolving credit products, personal loans secured by cash and cash equivalents, and other similar types of credit facilities.

## Table of Contents

## Non-Performing Assets

Non-performing assets and accruing past due loans are presented in the table below. All troubled debt restructurings are reported as non-accrual loans.

|  | $\begin{gathered} \text { September 30, } \\ 2011 \end{gathered}$ |  | June 30, 2011 |  | $\begin{gathered} \text { December 31, } \\ 2010 \end{gathered}$ |  | September 30, 2010 |  |

| Total accruing past due loans |  | 0.90\% |  | 0.72\% |  | 1.01\% |  | 1.11\% |

Non-performing assets include non-accrual loans and foreclosed assets. Non-performing assets at September 30, 2011 decreased $\$ 25.7$ million from December 31, 2010. In general, the level of non-performing assets during the comparable periods is reflective of weaker economic conditions which began in the latter part of 2008, although the Corporation has experienced decreases in the levels of classified assets in recent quarters. The decrease in non-accrual commercial loans at September 30, 2011 compared to June 30, 2011 was primarily related to $\$ 12.0$ million in charge-offs related to three credit relationships. Non-accrual commercial loans included two credit relationships in excess of $\$ 5$ million totaling $\$ 24.2$ million at September 30, 2011 and three credit relationships in excess of $\$ 5$ million totaling $\$ 25.8$ million at December 31, 2010. Non-accrual real estate loans primarily consist of land development, 1-4 family residential construction credit relationships and loans secured by office buildings and religious facilities. Non-accrual commercial real estate loans included one credit relationship in excess of $\$ 5$ million totaling $\$ 5.8$ million at September 30, 2011 and one credit relationship in excess of $\$ 5$ million totaling $\$ 6.4$ million at December 31, 2010. Generally, loans are placed on non-accrual status if principal or interest payments become 90 days past due and/or management deems the collectability of the principal and/or interest to be in question, as well as when required by regulatory requirements. Once interest accruals are discontinued, accrued but uncollected interest is charged to current year operations. Subsequent receipts on non-accrual loans are recorded as a reduction of principal, and interest income is recorded only after principal recovery is reasonably assured.

Foreclosed assets represent property acquired as the result of borrower defaults on loans. Foreclosed assets are recorded at estimated fair value, less estimated selling costs, at the time of foreclosure. Write-downs occurring at foreclosure are charged against the allowance for loan losses.

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

Subsequent to foreclosure, the fair value of property held is monitored/evaluated by a third-party service and reviewed with management on a quarterly basis. Write-downs are provided for subsequent declines in value and are included in other non-interest expense along with other expenses related to maintaining the properties. During 2011 and 2010, foreclosed assets, particularly among certain classes of property (primarily land), experienced significant deterioration in fair values as a result of the prevailing weaker economic conditions. Write-downs of foreclosed assets totaled $\$ 2.2$ million and $\$ 1.5$ million, during the nine months ended September 30, 2011 and 2010, respectively. During the nine months ended September 30, 2011, the Corporation recognized write-downs on 23 different properties/relationships with the average write-down totaling $\$ 94$ thousand and the largest individual write-down totaling $\$ 689$ thousand. The weighted-average percentage write-down was $36.0 \%$. The weighted-average number of days these properties were held as foreclosed assets prior to write-down was 280 days. During the nine months ended September 30, 2010, the Corporation recognized

## Table of Contents

write-downs on 38 different properties/relationships with the average write-down totaling $\$ 39$ thousand and the largest individual write-down totaling $\$ 220$ thousand. The weighted-average percentage write-down was $27.7 \%$. The weighted-average number of days these properties were held as foreclosed assets prior to write-down was 395 days. There were no significant concentrations of any properties, to which the aforementioned write-downs relate, in any single geographic region.

Potential problem loans consist of loans that are performing in accordance with contractual terms but for which management has concerns about the ability of an obligor to continue to comply with repayment terms because of the obligor s potential operating or financial difficulties. Management monitors these loans closely and reviews their performance on a regular basis. At September 30, 2011 and December 31, 2010, the Corporation had $\$ 42.3$ million and $\$ 33.8$ million in loans of this type which are not included in either of the non-accrual or 90 days past due loan categories. At September 30, 2011, potential problem loans consisted of six credit relationships. Of the total outstanding balance at September 30, 2011, $70.1 \%$ related to two customers in the construction industry, $14.6 \%$ related to two customers in manufacturing and $12.2 \%$ related to a customer that operates a hotel. Weakness in these companies operating performance has caused the Corporation to heighten the attention given to these credits.

## Allowance for Loan Losses

The allowance for loan losses is a reserve established through a provision for loan losses charged to expense, which represents management s best estimate of probable losses that have been incurred within the existing portfolio of loans. The allowance, in the judgment of management, is necessary to reserve for estimated loan losses and risks inherent in the loan portfolio. The Corporation $s$ allowance for loan loss methodology includes allowance allocations calculated in accordance with ASC Topic 310, Receivables and allowance allocations calculated in accordance with ASC Topic 450, Contingencies. Accordingly, the methodology is based on historical loss experience by type of credit and internal risk grade, specific homogeneous risk pools and specific loss allocations, with adjustments for current events and conditions. The Corporation s process for determining the appropriate level of the allowance for loan losses is designed to account for credit deterioration as it occurs. The provision for loan losses reflects loan quality trends, including the levels of and trends related to non-accrual loans, past due loans, potential problem loans, classified and criticized loans and net charge-offs or recoveries, among other factors. The provision for loan losses also reflects the totality of actions taken on all loans for a particular period. In other words, the amount of the provision reflects not only the necessary increases in the allowance for loan losses related to newly identified criticized loans, but it also reflects actions taken related to other loans including, among other things, any necessary increases or decreases in required allowances for specific loans or loan pools. See Note 3 - Loans in the accompanying notes to consolidated financial statements included elsewhere in this report for further details regarding the Corporation $s$ methodology for estimating the appropriate level of the allowance for loan losses.

The table below provides, as of the dates indicated, an allocation of the allowance for loan losses by loan type; however, allocation of a portion of the allowance to one category of loans does not preclude its availability to absorb losses in other categories:

|  | September 30,2011 |  | $\begin{gathered} \text { December 31, } \\ 2010 \end{gathered}$ |  | September 30, 2010 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Commercial and industrial | \$ | 46,885 | \$ | 57,789 | \$ | 64,198 |
| Commercial real estate |  | 20,812 |  | 28,534 |  | 30,995 |
| Consumer real estate |  | 3,446 |  | 3,223 |  | 2,380 |
| Consumer and other |  | 12,807 |  | 11,974 |  | 17,545 |
| Unallocated |  | 31,483 |  | 24,796 |  | 11,039 |
| Total | \$ | 115,433 | \$ | 126,316 | \$ | 126,157 |

As of September 30, 2011, the reserve allocated to commercial and industrial loans decreased $\$ 10.9$ million compared to December 31, 2010 and $\$ 17.3$ million compared to September 30, 2010. The decreases were primarily related to decreases in the level of classified loans and allocations for specific loans. Classified commercial and industrial loans (loans having a risk grade of 11,12 or 13) totaled $\$ 182.4$ million at September 30, 2011 compared to $\$ 198.3$ million at December 31, 2010 and $\$ 229.1$ million at September 30, 2010. The decreases were also due, in part, to a decrease in the historical loss allocation factor applied to non-classified commercial and industrial loans. The base historical loss allocation for each category of loans is the product of the volume of loans within each level of risk classification and the historical loss allocation factor for that particular level of risk classification, adjusted, as necessary to reflect the impact of current conditions. The base historical loss allocation is then adjusted upwards utilizing an environmental adjustment factor that is based upon a more qualitative analysis of risk. See Note 3 Loans in the accompanying notes to consolidated financial statements for information regarding the various risks that may be considered in the determination of the environmental adjustment factor. Prior to the first quarter of 2011, the base historical loss allocation factors for non-classified loans determined based upon actual historical loss experience were adjusted upwards given the continued higher levels of

Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q
charge-offs relative to historical average and the

## Table of Contents

prevailing uncertain economic conditions. During the first quarter of 2011, the amounts of these upward adjustments were partly reduced in light of the decreasing trend in classified loans and an improvement in the outlook related to credit quality. The impact of these reductions was partly offset by the effect of an increase in the environmental adjustment factor. The environmental adjustment factor resulted in additional general valuation allowances for commercial and industrial loans totaling $\$ 6.0$ million at September 30, 2011, $\$ 4.4$ million at December 31, 2010 and $\$ 4.0$ million at September 30, 2010. Specific allocations of the allowance for loan losses related to commercial and industrial loans totaled $\$ 6.9$ million at September 30, 2011 compared to $\$ 9.1$ million at December 31, 2010 and $\$ 16.6$ million at September 30, 2010.

As of September 30, 2011, the reserve allocated to commercial real estate loans decreased $\$ 7.7$ million compared to December 31, 2010 and $\$ 10.2$ million compared to September 30, 2010. The decreases were primarily related to decreases in the level of classified loans and allocations for specific loans. Classified commercial real estate loans totaled $\$ 172.1$ million at September 30, 2011 compared to $\$ 213.6$ million at December 31, 2010 and $\$ 223.0$ million at September 30, 2010. The decrease was also due, in part, to a decrease in the historical loss allocation factor applied to non-classified commercial real estate loans, as discussed above with regards to commercial and industrial loans, offset by the effect of an increase in the environmental adjustment factor. The environmental adjustment factor resulted in additional general valuation allowances for commercial real estate loans totaling \$4.0million at September 30, 2011, $\$ 3.0$ million at December 31, 2010 and $\$ 3.2$ million at September 30, 2010. Specific allocations of the allowance for loan losses related to commercial real estate loans totaled $\$ 1.3$ million at September 30, 2011 compared to $\$ 4.1$ million at December 31, 2010 and $\$ 4.0$ million at September 30, 2010.

The reserve allocated to consumer real estate loans did not significantly fluctuate at September 30, 2011 compared to December 31, 2010 and increased $\$ 1.1$ million compared to September 30, 2010. The increase in the reserve allocated to consumer real estate loans at September 30, 2011 compared to September 30, 2010 was partly related to an increase in the volume of loans as well as an increase in the historical loss allocation factor a applied to non-classified consumer real estate loans. The reserve allocated to consumer and other loans at September 30, 2011 increased $\$ 833$ thousand compared to December 31, 2010 and decreased $\$ 4.7$ million compared to September 30, 2010. The increase in the reserve allocated to consumer and other loans at September 30, 2011 compared to December 31, 2010 was primarily related to an increase in the historical loss allocation factor and an increase in the environmental adjustment factor, partly offset by the effect of a decrease in the volume of loans. The decrease in the reserve allocated to consumer and other loans at September 30, 2011 compared to September 30, 2010 was primarily related to a decrease in the volume of loans, partly offset by the effect of an increase in the historical loss allocation factor and an increase in the environmental adjustment factor.

The unallocated portion of the allowance for loan losses represents general valuation allowances that are not allocated to specific loan portfolio segments. See Note 3 Loans in the accompanying notes to consolidated financial statements for information regarding the components of the unallocated portion of the allowance. The unallocated portion of the allowance for loan losses at September 30, 2011 increased $\$ 6.7$ million compared to December 31, 2010 and increased $\$ 20.4$ million compared to September 30, 2010. These fluctuations were primarily due to increases in the allocation for general macroeconomic risk which totaled $\$ 22.5$ million at September 30, 2011 compared to $\$ 18.0$ million at December 31, 2010 and $\$ 4.1$ million at September 30, 2010. As of September 30, 2010, the allocation for general macroeconomic risk was at a reduced level in light of several factors including (i) a stabilization of the weighted-average portfolio risk grade trend, in part due to higher resolutions and more downgrades migrating from risk grade 10 rather than risk grade 9 or better, (ii) management sbelief that the level of classified loans had reached its peak during the second quarter of 2010 and that there was less uncertainty about the Corporation s loan portfolio, (iii) a decrease in the rate of quarterly charge-offs, (iv) decreased volatility in risk-grade movements coupled with the expectation of less volatility for the later part of 2010 and (v) favorable trends in certain components of the Texas Leading index, an economic indicator which management believes portends credit quality direction. By December 31, 2010, the allocation for general macroeconomic risk had increased $\$ 13.9$ million from September 30, 2010 as management believed that the improving trends seen in certain components of the Texas Leading Index, as well as in the national economy as a whole, were primarily driven by government stimulus programs, the extension of tax cuts and the monetary policy of the Federal Reserve with regards to quantitative easing. Such measures were expected to act as a catalyst for long-term growth; however, while short-term improvements were seen, management believes that these measures did not lead to private-sector employment growth and increased consumer spending levels as they were expected. Accordingly, the $\$ 13.9$ million increase in the allocation for general macroeconomic risk during the last quarter of 2010 and the further $\$ 4.6$ million during the nine months ended September 30, 2011 compared to December 31, 2010 were reflective of continued economic uncertainty resulting from weakness in certain business sectors (including contractors, builders, commercial real estate, manufacturing and healthcare), high unemployment and relatively low consumer spending activity. The Corporation primarily monitors communications and statistical data from the Federal Reserve and other agencies of the U.S. government in assessing the status of these factors.

## Table of Contents

Activity in the allowance for loan losses is presented in the following table.

|  | Three Months Ended |  |  |  | Nine Months Ended |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { September 30, } \\ 2011 \end{gathered}$ | June 30, 2011 | $\begin{gathered} \text { September 30, } \\ 2010 \end{gathered}$ |  | $\begin{gathered} \text { September 30, } \\ 2011 \end{gathered}$ |  | ember 30, 2010 |
| Balance at beginning of period | \$ 122,741 | \$ 124,321 | \$ | 125,442 | \$ 126,316 | \$ | 125,309 |
| Provision for loan losses | 9,010 | 8,985 |  | 10,100 | 27,445 |  | 32,321 |
| Charge-offs: |  |  |  |  |  |  |  |
| Commercial and industrial | $(15,085)$ | $(5,576)$ |  | $(6,739)$ | $(28,258)$ |  | $(22,241)$ |
| Commercial real estate | $(1,689)$ | $(4,694)$ |  | $(1,911)$ | $(10,261)$ |  | $(6,982)$ |
| Consumer real estate | (834) | (459) |  | (673) | $(2,113)$ |  | $(1,734)$ |
| Consumer and other | $(2,359)$ | $(2,397)$ |  | $(3,155)$ | $(7,058)$ |  | $(8,748)$ |
| Total charge-offs | $(19,967)$ | $(13,126)$ |  | $(12,478)$ | $(47,690)$ |  | $(39,705)$ |
| Recoveries: |  |  |  |  |  |  |  |
| Commercial and industrial | 1,484 | 858 |  | 951 | 3,109 |  | 2,214 |
| Commercial real estate | 406 | 136 |  | 298 | 1,099 |  | 935 |
| Consumer real estate | 84 | 97 |  | 244 | 471 |  | 359 |
| Consumer and other | 1,675 | 1,470 |  | 1,600 | 4,683 |  | 4,724 |
| Total recoveries | 3,649 | 2,561 |  | 3,093 | 9,362 |  | 8,232 |
| Net charge-offs | $(16,318)$ | $(10,565)$ |  | $(9,385)$ | $(38,328)$ |  | $(31,473)$ |
| Balance at end of period | \$ 115,433 | \$ 122,741 | \$ | 126,157 | \$ 115,433 | \$ | 126,157 |

| Ratio of allowance for loan losses to: |  |  |  |  | $1.43 \%$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Total loass | $1.52 \%$ | $1.57 \%$ | $1.43 \%$ | $1.57 \%$ |  |
| Non-accrual loans | 104.77 | 94.03 | 87.06 | 104.77 | 87.06 |
| Ratio of annualized net charge-offs to average total <br> loans |  |  |  |  |  |

The provision for loan losses decreased $\$ 1.1$ million, or $10.8 \%$, and $\$ 4.9$ million, or $15.1 \%$, during the three and nine months ended September 30, 2011 compared to the same periods in 2010 . The provision for loan losses increased $\$ 25$ thousand, or $0.3 \%$, during the third quarter of 2011 compared to the second quarter of 2011. The level of the provision for loan losses during 2011 is reflective of the decreasing trend in classified loans. Net charge-offs during the three months ended September 30, 2011 increased $\$ 6.9$ million while net charge-offs during the nine months ended September 30, 2011 increased $\$ 6.9$ million, compared in each case, to the same periods in 2010. Net charge-offs for the third quarter of 2011 increased $\$ 5.8$ million compared to the second quarter of 2011. Net charge-offs in the third quarter of 2011 included three larger credit relationships with charge-offs totaling $\$ 12.0$ million. The ratio of the allowance for loan losses to total loans decreased 13 basis points from $1.56 \%$ at December 31, 2010 to $1.43 \%$ at September 30, 2011. Management believes the recorded amount of the allowance for loan losses is appropriate based upon management s best estimate of probable losses that have been incurred within the existing portfolio of loans. Should any of the factors considered by management in evaluating the appropriate level of the allowance for loan losses change, the Corporation s estimate of probable loan losses could also change, which could affect the level of future provisions for loan losses.

## Capital and Liquidity

Capital. Shareholders equity totaled $\$ 2.2$ billion at September 30, 2011 and $\$ 2.1$ billion at both December 31, 2010 and September 30, 2010. In addition to net income of $\$ 162.1$ million, other changes in shareholders equity during the first nine months of 2011 included other comprehensive income, net of tax, of $\$ 89.8$ million, $\$ 84.0$ million of dividends paid, $\$ 7.2$ million in proceeds from stock option exercises and the related tax benefits of $\$ 304$ thousand and $\$ 10.0$ million related to stock-based compensation. Additionally, the Corporation issued $\$ 1.4$ million in newly issued common stock directly to the Corporation $\mathrm{s} 401(\mathrm{k})$ plan in connection with matching contributions.

## Edgar Filing: CULLEN FROST BANKERS INC - Form 10-Q

The accumulated other comprehensive income/loss component of shareholders equity totaled a net, after-tax, unrealized gain of $\$ 244.1$ million at September 30, 2011 compared to a net, after-tax, unrealized gain of $\$ 154.3$ million at December 31, 2010. The increase was primarily due to a $\$ 106.0$ million net after-tax increase in the net unrealized gain on securities available for sale partly offset by a $\$ 17.7$ million net after-tax decrease in the accumulated net gain on effective cash flow hedges. Under regulatory requirements, amounts reported as accumulated other comprehensive income/loss related

## Table of Contents

to securities available for sale, effective cash flow hedges and defined benefit post-retirement benefit plans do not increase or reduce regulatory capital and are not included in the calculation of risk-based capital and leverage ratios. Regulatory agencies for banks and bank holding companies utilize capital guidelines designed to measure Tier 1 and total capital and take into consideration the risk inherent in both on-balance sheet and off-balance sheet items. See Note 7 - Regulatory Matters in the accompanying notes to consolidated financial statements included elsewhere in this report.

The Corporation paid quarterly dividends of $\$ 0.45, \$ 0.46$ and $\$ 0.46$ per common share during the first, second and third quarters of 2011, respectively, and quarterly dividends of $\$ 0.43, \$ 0.45$ and $\$ 0.45$ per common share during the first, second and third quarters of 2010. This equates to a dividend payout ratio of $51.7 \%$ and $51.8 \%$ during the three and nine months ended September 30, 2011 and $49.7 \%$ and $51.7 \%$ during the three and nine months ended September 30, 2010.

From time to time, the Corporation s board of directors has authorized stock repurchase plans. Stock repurchase plans allow the Corporation to proactively manage its capital position and return excess capital to shareholders. Shares purchased under such plans also provide the Corporation with shares of common stock necessary to satisfy obligations related to stock compensation awards. No shares were repurchased under stock repurchase plans during any of the reported periods. See Part II, Item 2 - Unregistered Sales of Equity Securities and Use of Proceeds, included elsewhere in this report, for details of stock repurchases during the quarter.

Liquidity. Liquidity measures the ability to meet current and future cash flow needs as they become due. The liquidity of a financial institution reflects its ability to meet loan requests, to accommodate possible outflows in deposits and to take advantage of interest rate market opportunities. The ability of a financial institution to meet its current financial obligations is a function of its balance sheet structure, its ability to liquidate assets, and its access to alternative sources of funds. The Corporation seeks to ensure its funding needs are met by maintaining a level of liquid funds through asset/liability management.

Asset liquidity is provided by liquid assets which are readily marketable or pledgeable or which will mature in the near future. Liquid assets include cash, interest-bearing deposits in banks, securities available for sale, maturities and cash flow from securities held to maturity, and federal funds sold and resell agreements.

Liability liquidity is provided by access to funding sources which include core deposits and correspondent banks in the Corporation s natural trade area that maintain accounts with and sell federal funds to Frost Bank, as well as federal funds purchased and repurchase agreements from upstream banks and deposits obtained through financial intermediaries.

Since Cullen/Frost is a holding company and does not conduct operations, its primary sources of liquidity are dividends upstreamed from Frost Bank and borrowings from outside sources. Banking regulations may limit the amount of dividends that may be paid by Frost Bank. See Note 7 - Regulatory Matters in the accompanying notes to consolidated financial statements included elsewhere in this report regarding such dividends. At September 30, 2011, Cullen/Frost had liquid assets, including cash and resell agreements, totaling $\$ 178.6$ million, which included $\$ 8.3$ million in cash collateral on deposit with other financial institution counterparties to interest rate swap transactions.

The liquidity position of the Corporation is continuously monitored and adjustments are made to the balance between sources and uses of funds as deemed appropriate. Management is not aware of any events that are reasonably likely to have a material adverse effect on the Corporation s liquidity, capital resources or operations. In addition, management is not aware of any regulatory recommendations regarding liquidity, which if implemented, would have a material adverse effect on the Corporation.

The Corporation s operating and strategic objectives include expansion, diversification within its markets, growth of its fee-based income, and growth internally and through acquisitions of financial institutions, branches and financial services businesses. The Corporation generally seeks merger or acquisition partners that are culturally similar and have experienced management and possess either significant market presence or have potential for improved profitability through financial management, economies of scale and expanded services. The Corporation regularly evaluates merger and acquisition opportunities and conducts due diligence activities related to possible transactions with other financial institutions and financial services companies. As a result, merger or acquisition discussions and, in some cases, negotiations may take place and future mergers or acquisitions involving cash, debt or equity securities may occur. Acquisitions typically involve the payment of a premium over book and market values, and, therefore, some dilution of the Corporation s tangible book value and net income per common share may occur in connection with any future transaction.

## Table of Contents

## Accounting Standards Updates

See Note 16 - Accounting Standards Updates in the accompanying notes to consolidated financial statements included elsewhere in this report for details of recently issued accounting pronouncements and their expected impact on the Corporation s financial statements.

## Item 3. Quantitative and Qualitative Disclosures About Market Risk

The disclosures set forth in this item are qualified by the section captioned Forward-Looking Statements and Factors that Could Affect Future Results included in Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations of this report and other cautionary statements set forth elsewhere in this report.

Refer to the discussion of market risks included in Item 7A. Quantitative and Qualitative Disclosures About Market Risk in the 2010 Form 10-K. There has been no significant change in the types of market risks faced by the Corporation since December 31, 2010.

The Corporation utilizes an earnings simulation model as the primary quantitative tool in measuring the amount of interest rate risk associated with changing market rates. The model quantifies the effects of various interest rate scenarios on projected net interest income and net income over the next 12 months. The model measures the impact on net interest income relative to a base case scenario of hypothetical fluctuations in interest rates over the next 12 months. These simulations incorporate assumptions regarding balance sheet growth and mix, pricing and the repricing and maturity characteristics of the existing and projected balance sheet. The impact of interest rate derivatives, such as interest rate swaps, caps and floors, is also included in the model. Other interest rate-related risks such as prepayment, basis and option risk are also considered.

As of September 30, 2011, the model simulations projected that a 100 basis point increase in interest rates would result in a positive variance in net interest income of $0.4 \%$ and a 200 basis point increase in interest rates would result in negative variance in net interest income of $0.6 \%$, relative to the base case over the next 12 months, while a decrease in interest rates of 25 basis points would result in a negative variance in net interest income of $1.5 \%$ relative to the base case over the next 12 months. The September 30, 2011 model simulations were impacted by the assumption that the Corporation will begin to pay interest on demand deposits in the fourth quarter of 2011, as further discussed below. As of September 30, 2010, the model simulations projected that 100 and 200 basis point increases in interest rates would result in positive variances in net interest income of $1.7 \%$ and $3.8 \%$, respectively, relative to the base case over the next 12 months, while a decrease in interest rates of 25 basis points would result in a negative variance in net interest income of $0.5 \%$ relative to the base case over the next 12 months. The likelihood of a decrease in interest rates beyond 25 basis points as of September 30, 2011 and 2010 was considered remote given prevailing interest rate levels.

The Corporation has experienced significant growth in deposits in 2011 compared to 2010. The deposit growth funded a significant increase in fixed-rate securities and short-term interest-bearing deposits. Although short-term interest-bearing deposits are generally immediately impacted by changes in interest rates, the increase in fixed-rate securities coupled with the assumption that the Corporation will, begin paying interest on demand deposits that were previously non-interest-bearing as a result of recent legislation, as further discussed below, the model simulations indicate that the Corporation $s$ balance sheet will become slightly liability sensitive relative to the base case over the next 12 months.

As mentioned above, financial regulatory reform legislation entitled the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act ) repealed the federal prohibitions on the payment of interest on demand deposits, thereby permitting depository institutions to pay interest on business transaction and other accounts beginning July 21, 2011. Although the ultimate impact of this legislation on the Corporation has not yet been determined, the Corporation may begin to incur interest costs associated with demand deposits in the future as market conditions warrant. If this were to occur, the Corporation s balance sheet would likely become slightly liability sensitive. Because the interest rate that will ultimately be paid on these demand deposits depends upon a variety of factors, some of which are beyond the Corporation $s$ control, the Corporation assumed an aggressive pricing structure for the purposes of the model simulations discussed above with interest payments beginning in the fourth quarter of 2011. Should the actual interest rate paid on demand deposits be less than the rate assumed in the model simulations, or should the interest rate paid for such deposits become an administered rate with less direct correlation to movements in general market interest rates, the Corporation s balance sheet could be less liability sensitive, or more asset sensitive, than the model simulations currently indicate.

As of September 30, 2011, the effect of a 200 basis point increase and a 25 basis point decrease in interest rates on the Corporation s derivative holdings would not result in a significant variance in the Corporation $s$ net interest income.

The effects of hypothetical fluctuations in interest rates on the Corporation s securities classified as trading under ASC Topic 320, Investments Debt and Equity Securities, are not significant, and, as such, separate quantitative disclosure is not presented.

## Table of Contents

## Item 4. Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, an evaluation was carried out by the Corporation s management, with the participation of its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Corporation s disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report. No change in the Corporation s internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the last fiscal quarter that materially affected, or is reasonably likely to materially affect, the Corporation s internal control over financial reporting.

## Table of Contents

## Part II. Other Information

## Item 1. Legal Proceedings

The Corporation and its subsidiaries are subject to various claims and legal actions that have arisen in the normal course of conducting business. Management does not expect the ultimate disposition of these matters to have a material adverse impact on the Corporation sfinancial statements.

## Item 1A. Risk Factors

There has been no material change in the risk factors previously disclosed under Item 1A. of the Corporation s 2010 Form 10-K.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

## Item 3. Defaults Upon Senior Securities

None.

## Item 5. Other Information

None.

## Item 6. Exhibits
