NOTES TO PORTFOLIO OF INVESTMENTS JANUARY 31, 2012 (UNAUDITED)

The following notes are to be read in conjunction with the Portfolio of Investments for Wells Fargo Advantage Income Opportunities Fund (the Fund).

Securities valuation

Investments in equity securities are valued each business day as of the close of regular trading on the New York Stock Exchange, which is usually 4:00 p.m. (Eastern Time). Securities which are traded on a national or foreign securities exchange are valued at the last reported sales price, except that securities listed on The Nasdaq Stock Market, Inc. (Nasdaq) are valued at the Nasdaq Official Closing Price (NOCP), and if no NOCP is available, then at the last reported sales price. If no sales price is shown on the Nasdaq, the bid price will be used. In the absence of any sale of securities listed on the Nasdaq, and in the case of other securities (including U.S. Government obligations, but excluding debt securities maturing in 60 days or less), the price will be deemed stale and the valuations will be determined in accordance with the Fund's Fair Value Procedures.

Fixed income securities with maturities exceeding 60 days are valued based on evaluated prices received from an independent pricing service approved by the Board of Trustees which may utilize both transaction data and market information such as yield, prices of securities of comparable quality, coupon rate, maturity, type of issue, trading characteristics and other market data. If valuations are not available from the pricing service or values received are deemed not representative of market value, values will be obtained from a third party broker-dealer or determined based on the Fund s Fair Value Procedures.

Debt securities of sufficient credit quality with original maturities of 60 days or less generally are valued at amortized cost which approximates fair value. The amortized cost method involves valuing a security at its cost, plus accretion of discount or minus amortization of premium over the period until maturity.

Investments in open-end mutual funds and non-registered investment companies are generally valued at net asset value.

Investments which are not valued using any of the methods discussed above, are valued at their fair value, as determined by procedures established in good faith and approved by the Board of Trustees.

When-issued transactions

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets to cover its obligation by confirming the availability of qualifying assets having a value sufficient to make payment for the securities purchased. Securities purchased on a when-issued basis are marked-to-market daily and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

Term loans

The Fund may invest in term loans. The loans are marked-to-market daily and the Fund begins earning interest when the loans are funded. The loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. The Fund assumes the credit risk of the borrower and there could be potential loss to the Fund in the event of default by the borrower.

As of January 31, 2012, the Fund had unfunded loan commitments of \$1,867,906.

Fair valuation measurements

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund s investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to significant unobservable inputs (Level 3). The Fund s investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- Level 1 quoted prices in active markets for identical securities
- Level 2 other significant observable inputs (including quoted prices for similar

securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Funds own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

As of January 31, 2012, the inputs used in valuing the Fund s assets, which are carried at fair value, were as follows:

Investments in Securities	Quoted Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Equity securities				
Common stocks	\$ 546,907	\$ 0	\$ 8,596	\$ 555,503

	\$ 50,423,677	\$ 830,825,062	\$ 27,692,648	\$ 908.941.387

Transfers in and transfers out are recognized at the end of the reporting period. For the nine months ended January 31, 2012, the Fund did not have any significant transfers into/out of Level 1 and Level 2.

The following is a reconciliation of assets in which significant unobservable inputs (Level 3) were used in determining fair value:
