2

Textainer Group Holdings Limited
Reports Third Quarter 2013 Results and Declares
Quarterly Dividend

Total revenues of \$132.6 million, an increase of 8.4 percent from the prior year quarter;

Lease rental income grew by 21 percent to \$118 million compared to the year ago quarter;

Adjusted EBITDA⁽¹⁾ of \$106.4 million, an increase of 9.3 percent from the prior year quarter;

Declared a quarterly dividend of \$0.47 per share; and

Invested \$827 million over the last 12 months in new and used containers for lease out in 2013.

HAMILTON, Bermuda (BUSINESS WIRE) November 5, 2013 Textainer Group Holdings Limited (NYSE: TGH) (Textainer, the Company, we and our), the world's largest lessor of intermodal containers based on fleet size, reports third quarter 2013 results.

Our underlying business fundamentals were solid, as we achieved more than 8 percent growth in revenue and EBITDA compared to the year ago quarter. Most notably, lease rental income grew by 21 percent to \$118 million compared to the year ago quarter. Our net income was negatively affected, however, by the need to reserve for certain uncollectable accounts receivable and an impairment that we recorded on certain unrecoverable containers, commented Philip K. Brewer, President and Chief Executive Officer of Textainer.

Historically, when a lessee defaults, we recover more than 90 percent of our containers, with about 80 percent coming back within 6 months from the start of recovery efforts and the remaining 10 to 20 percent recovered in the subsequent 6 to 12 months. Currently, for certain smaller lessees in default, we believe recoveries may not follow this pattern as these containers are in areas of China where recovery is often not economical. We recorded a \$4.7 million impairment for these containers in the third quarter. This impairment applies to a limited group of smaller shipping lines that account for less than 0.5 percent of our fleet. Most of these lessees were acquired through earlier fleet acquisitions. We do not expect similar losses with any of our large lessees, continued Mr. Brewer. The third quarter also included bad debt expense above our normal run rate primarily related to recovery costs for a previously identified customer that filed for bankruptcy. Container recoveries from this customer are over 95 percent, consistent with historical recovery experience. Our DSO has improved significantly year over year and we expect our normalized bad debt run-rate to trend around 0.5 to 1 percent of revenue.

We continued to invest throughout the quarter with total containers ordered over the last 12 months for delivery in 2013 of \$827 million. Additionally, we are planning to invest approximately \$10 million in tank containers with Trifleet over the coming months, continued Mr. Brewer. Our fleet size has grown by 12 percent over the past twelve months to almost 3.0 million TEU which will be a major milestone for Textainer. Utilization is stable, averaging 94.1 percent for the quarter and currently it is slightly higher at 94.2 percent.

Business Highlights:

Invested \$629 million in new and used containers year-to-date following \$198 million invested in new containers in the fourth quarter of 2012 for lease out in 2013, continuing our strong pace of expansion;

Increased total fleet size by 11.7 percent over the last year to close to 3 million TEU today, reflecting our strong investment in new and purchase leaseback containers;

Grew lease rental income by 20.7 percent in the quarter to \$118 million compared to the year ago quarter;

Lowered our funding costs and locked in attractive long-term rates as we established a \$300 million asset-backed revolving credit facility at LIBOR plus 2.25 percent and issued \$300.9 million of asset-backed term notes with a coupon of 3.90 percent;

Achieved average utilization of 94.1 percent during the quarter and is 94.2 percent today; and

Day Sales Outstanding improved by 8 percent compared to the year ago quarter.

Key Financial Information (in thousands except for per share and TEU amounts):

	2013	Q3 QTD 2012	% Change	2013	Q3 YTD 2012	% Change

Total fleet size at end of period (TEU)	2,971,589	2,659,150	11.7%			
Owned percentage of total fleet at end of period	75.0%	68.8%	9.0%			

Adjusted net income and adjusted EBITDA are Non-GAAP Measures that are reconciled to GAAP measures in footnote 1. Adjusted net income is defined as net income attributable to Textainer Group Holdings Limited common

shareholders before unrealized gains on interest rate swaps and caps, net and related impact of reconciling item on net income (loss) attributable to the noncontrolling interest (NCI). Adjusted EBITDA is defined as net income attributable to Textainer Group Holdings Limited common shareholders before interest income and interest expense, realized and unrealized losses (gains) on interest rate swaps and caps, net, income tax expense (benefit), net income attributable to the NCI, depreciation expense and impairment of containers, amortization expense and related impact of reconciling items on net income (loss) attributable to the NCI. Footnote 1 provides certain qualifications and limitations on the use of Non-GAAP Measures.

Third Quarter Results:

Textainer's financial results benefited from a 11.7 percent increase in the average size of the owned container fleet in the third quarter of 2013, compared to the year ago quarter, offset by incremental increases in depreciation expense and direct container expense due to the larger owned fleet and lower utilization. Depreciation expense and impairment of containers also included a \$4.7 million charge in the third quarter of 2013 for containers that were considered likely to be economically unrecoverable from lessees in default. The third quarter also included \$4.3 million of bad debt expense primarily related to a previously identified customer that filed for bankruptcy. We have been successfully recovering the containers that were on-lease with this customer.

During the third quarter, Textainer established a \$300 million asset-backed revolving credit facility (the Revolving Credit Facility) to provide Textainer a source of financing for a diversified pool of older containers to assist in managing the container age limits in the Company's other term and warehouse facilities. The interest rate on the Revolving Credit Facility, payable monthly, is LIBOR plus 2.25 percent. The Company also issued \$300.9 million in aggregate principal amount of asset-backed term notes (the Notes). The Notes are fully amortizing notes payable on a straight-line basis over a scheduled payment term of ten years, with a maximum payment term of fifteen years. The Notes have a fixed interest rate, payable monthly, of 3.90 percent per annum and were sold at approximately 99.5 percent of par resulting in a bond equivalent yield on the Notes of 4.05 percent per annum. The company's current average interest rate stands at 3.55 percent versus 4.76 percent in the year ago quarter and 3.84 percent in the second quarter of this year.

Outlook

We continue to experience a very competitive environment marked by compressed returns, continued access to low cost funds by us and our peers and a short lead time for ordering new containers. We expect these market conditions to continue for the near term, commented Mr. Brewer.

Even though container demand has been softer than expected this year due to lower than projected trade growth and the inability of shipping lines to successfully implement and maintain general freight rate increases, we have continued to invest in new and used containers. Our fleet now approaches 3 million TEU, a major milestone. We have started to see signs of a slight pick-up in demand, and are pleased with our market position, stated Mr. Brewer.

Operationally, we expect performance to be flat to slightly down in the fourth quarter supported by stable utilization, which remains high by historic standards, coupled with the stability provided by having more than 80 percent of our fleet on long-term and finance leases.

Dividend

On October 31, 2013, Textainer's board of directors approved and declared a quarterly cash dividend of \$0.47 per share on Textainer's issued and outstanding common shares, payable on November 26, 2013 to shareholders of record as of November 19, 2013. This dividend represents a payout of 66 percent of this quarter's adjusted net income^(d).

Our dividend reflects our continued confidence in the long-term outlook for our business and in our strong cash flow. We continue to target a dividend level of around 50 percent of adjusted net income and our payout would have been within our targeted range, if we excluded the unusual items, stated Mr. Brewer. We remain committed to our current dividend level, as we believe it enables us to balance investing for growth in the business and providing attractive ongoing returns to our shareholders.

Investors Webcast

Textainer will hold a conference call and a Webcast at 11:00 am EST on Tuesday, November 5, 2013 to discuss Textainer's third quarter 2013 results. An archive of the Webcast will be available one hour after the live call through November 6, 2014. For callers in the U.S. the dial-in number for the conference call is 1-888-895-5271; for callers outside the U.S. the dial-in number for the conference call is 1-847-619-6547. The participant passcode for both dial-in numbers is 35845216. To access the live Webcast or archive, please visit Textainer's investor website at <http://investor.textainer.com>.

About Textainer Group Holdings Limited

Textainer Group Holdings Limited and its subsidiaries (Textainer) is the world's largest lessor of intermodal containers based on fleet size. The Company began operations in 1979 and as of the most recent quarter end had approximately 2.0 million containers, representing approximately 3.0 million TEU, in its owned and managed fleet. Textainer leases dry freight, refrigerated, and specialized containers. The Company is one of the largest purchasers of new containers as well as one of the largest sellers of used containers in the world. Textainer leases containers to approximately 400 shipping lines and other lessees and sells containers to more than 1,200 customers worldwide. Textainer operates via an international network of 14 regional and area offices, as well as approximately 400 independent depots.

Important Cautionary Information Regarding Forward-Looking Statements

This press release contains forward-looking statements within the meaning of U.S. securities laws. Forward-looking statements include statements that are not statements of historical facts and include, without limitation, statements regarding: (i) Textainer's belief that container recoveries for certain of its smaller lessees in default may not follow historical recovery rates and that it will not have similar losses with any of its larger lessees; (ii) Textainer's expectation that current market conditions will continue for the near term; and (iii) Textainer's expectation that its operational performance will be flat to slightly down in the fourth quarter supported by stable utilization, which remains high by historic standards, coupled with the stability provided by having more than 80% of its fleet on long-term and finance leases. Readers are cautioned that these forward-looking statements involve risks and uncertainties, are only predictions and may differ materially from actual future events or results. These risks and uncertainties include, without limitation, the following items that could materially and negatively impact our business, results of operations, cash flows, financial condition and future prospects: any deceleration or reversal of the current domestic and global economic recoveries; lease rates may decrease and lessees may default, which could decrease revenue and increasing storage, repositioning, collection and recovery expenses; we own a large and growing number of containers in our fleet and are subject to significant ownership risk; further consolidation of container manufacturers or the disruption of manufacturing for the major manufacturers could result in higher new container prices and/or decreased supply of new containers and any increase in the cost or reduction in the supply of new containers; the demand for leased containers depends on many political and economic factors beyond Textainer's control; the demand for leased containers is partially tied to international trade and if this demand were to decrease due to increased barriers to trade, or for any other reason, it could reduce demand for intermodal container leasing; as we increase the number of containers in our owned fleet, we will have significant capital at risk and may need to incur more debt, which could result in financial instability; Textainer faces extensive competition in the container leasing industry; the international nature of the container shipping industry exposes Textainer to numerous risks; gains and losses associated with the disposition of used equipment may fluctuate; our indebtedness reduces our financial flexibility and could impede our ability to operate; and other risks and uncertainties, including those set forth in Textainer's filings with the Securities and Exchange Commission. For a discussion of some of these risks and uncertainties, see Item 3 Key Information Risk Factors in Textainer's Annual Report on Form 20-F filed with the Securities and Exchange Commission on March 15, 2013.

Textainer's views, estimates, plans and outlook as described within this document may change subsequent to the release of this press release. Textainer is under no obligation to modify or update any or all of the statements it has made herein despite any subsequent changes Textainer may make in its views, estimates, plans or outlook for the future.

TEXTAINER GROUP HOLDINGS LIMITED AND SUBSIDIARIES

Reconciliation of GAAP financial measures to non-GAAP financial measures

Three and Nine Months Ended September 30, 2013 and 2012

(Unaudited)

(All currency expressed in United States dollars in thousands, except per share amounts)

- (1) The following is a reconciliation of certain GAAP measures to non-GAAP financial measures (such items listed in (a) to (d) below and defined as Non-GAAP Measures) for the three and nine months ended September 30, 2013 and 2012, including:
- (a) net income attributable to Textainer Group Holdings Limited common shareholders to adjusted EBITDA (Adjusted EBITDA defined as net income attributable to Textainer Group Holdings Limited common shareholders before interest income and interest expense, realized and unrealized losses (gains) on interest rate swaps and caps, net, income tax expense (benefit), net income (loss) attributable to the noncontrolling interest (NCI), depreciation expense and impairment of containers, amortization expense and the related impact of reconciling items on net income (loss) attributable to the NCI);
 - (b) net cash provided by operating activities to Adjusted EBITDA;
 - (c) net income attributable to Textainer Group Holdings Limited common shareholders to adjusted net income (defined as net income attributable to Textainer Group Holdings Limited common shareholders before unrealized gains on interest rate swaps and caps, net and the related impact of reconciling item on net income (loss) attributable to the NCI); and
 - (d) net income attributable to Textainer Group Holdings Limited common shareholders per diluted common share to adjusted net income per diluted common share (defined as net income attributable to Textainer Group Holdings Limited common shareholders per diluted common share before unrealized gains on interest rate swaps and caps, net and the related impact of reconciling item on net income (loss) attributable to the NCI).

Non-GAAP Measures are not financial measures calculated in accordance with U.S. generally accepted accounting principles (GAAP) and should not be considered as an alternative to net income, income from operations or any other performance measures derived in accordance with GAAP or as an alternative to cash flows from operating activities as a measure of our liquidity. Non-GAAP Measures are presented solely as supplemental disclosures. Management believes that adjusted EBITDA may be a useful performance measure that is widely used within our industry and adjusted net income may be a useful performance measure because Textainer intends to hold its interest rate swaps until maturity and over the life of an interest rate swap or cap held to maturity the unrealized (gains) losses will net to zero. Adjusted EBITDA is not calculated in the same manner by all companies and, accordingly, may not be an appropriate measure for comparison.

Management also believes that adjusted net income and adjusted net income per diluted common share are useful in evaluating our operating performance because unrealized (gains) losses on interest rate swaps and caps, net is a noncash, non-operating item. We believe Non-GAAP Measures provide useful information on our earnings from ongoing operations. We believe that adjusted EBITDA provides useful information on our ability to service our long-term debt and other fixed obligations and on our ability to fund our expected growth with internally generated funds. Non-GAAP Measures have limitations as

analytical tools, and you should not consider either of them in isolation, or as a substitute for analysis of our operating results or cash flows as reported under GAAP. Some of these limitations are:

They do not reflect our cash expenditures, or future requirements, for capital expenditures or contractual commitments;

They do not reflect changes in, or cash requirements for, our working capital needs;

Adjusted EBITDA does not reflect interest expense or cash requirements necessary to service interest or principal payments on our debt;

Although depreciation expense and impairment of containers is a noncash charge, the assets being depreciated may be replaced in the future, and neither Adjusted EBITDA, adjusted net income or adjusted net income per diluted common share reflects any cash requirements for such replacements;

They are not adjusted for all noncash income or expense items that are reflected in our statements of cash flows; and

Other companies in our industry may calculate these measures differently than we do, limiting their usefulness as comparative measures.
