OF THE SECURITIES EXCHANGE ACT OF 1934

Date of event requiring this shell company report _____

Commission file number: 1-15174

Siemens Aktiengesellschaft

Federal Republic of Germany

(Jurisdiction of incorporation or organization)

Wittelsbacherplatz 2

80333 Munich

Federal Republic of Germany

Telephone: +49 (89) 636-00

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
American Depositary Shares, each representing one Common Share, no par value	New York Stock Exchange
Common Shares, no par value*	New York Stock Exchange

* Listed, not for trading or quotation purposes, but only in connection with the registration of American Depositary Shares pursuant to the requirements of the Securities and Exchange Commission.

Securities registered or to be registered pursuant to Section 12(g) of the Act: None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None

The number of outstanding shares of each of the issuer's classes of capital or common stock as of September 30, 2013: 843,002,405 common shares, no par value.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No Not applicable

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer
Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

FORWARD-LOOKING STATEMENTS

This document contains statements related to our future business and financial performance and future events or developments involving Siemens that may constitute forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. These statements may be identified by words such as expects, looks forward to, anticipates, intends, plans, believes, seeks, estimates, with words of similar meaning. We may also make forward-looking statements in other reports, in presentations, in material delivered to shareholders and in press releases. In addition, our representatives may from time to time make oral forward-looking statements. Such statements are based on the current expectations and certain assumptions of Siemens management, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens control, affect Siemens operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements or anticipated on the basis of historical trends. These factors include in particular, but are not limited to, the matters described in Item 3: Key information Risk factors.

Further information about risks and uncertainties affecting Siemens is included throughout this annual report on Form 20-F and in our other filings with the SEC, which are available on the Siemens website, www.siemens.com, and on the SEC's website, www.sec.gov. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results, performance or achievements of Siemens may vary materially from those described in the relevant forward-looking statement as being expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens neither intends, nor assumes any obligation, to update or revise these forward-looking statements in light of developments which differ from those anticipated.

In this Form 20-F, references to we, us, our, Company, Siemens or Siemens AG are to Siemens Aktiengesellschaft and, unless the context otherwise requires, to its consolidated subsidiaries. Throughout this Form 20-F, whenever a reference is made to our Company's website, such reference does not incorporate information from the website by reference into this annual report.

Due to rounding, numbers presented throughout this Form 20-F may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.

Not applicable.

ITEM 2: OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3: KEY INFORMATION**SELECTED CONSOLIDATED FINANCIAL AND STATISTICAL DATA**

The following table sets forth our selected consolidated financial data as of and for each of the years in the five-year period ended September 30, 2013. The selected consolidated financial data has been derived from, and should be read in conjunction with, our audited Consolidated Financial Statements (including the Notes thereto) presented in Item 18: Financial Statements. The Consolidated Financial Statements have been prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the European Union (EU) and are also in accordance with IFRS as issued by the International Accounting Standards Board (IASB).

Consolidated Statements of Income Data⁽¹⁾⁽²⁾	Year ended September 30,				
	2013	2012	2011	2010	2009
	(in millions of €, unless otherwise stated)				
Revenue	75,882	77,395	72,526	67,862	68,726
Income from continuing operations before income taxes	5,843	6,636	8,763	5,725	3,917
Income from continuing operations	4,212	4,642	6,625	4,065	2,456
Income (loss) from discontinued operations, net of income taxes	197	(360)	(726)	(184)	(8)

- (1) Under IFRS, the historical results of our Water Technologies Business Unit, OSRAM, Siemens IT Solutions and Services and the former operating segments Communications and Siemens VDO Automotive are reported as discontinued operations in our Consolidated Statements of Income for all periods presented and the assets and liabilities were classified on the Consolidated Statements of Financial Position as held for disposal. For further information see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 4.
- (2) Adjusted for effects of adopting IAS 19R (IAS 19, Employee Benefits (revised 2011; IAS 19R)), see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 2. Prior periods are presented on a comparable basis.

Table of Contents

The number of shares outstanding at September 30, 2013, 2012, 2011, 2010 and 2009 was 843,002,405; 856,274,326; 874,251,347; 869,837,005 and 866,425,760, respectively.

DIVIDENDS

The following table sets forth in and in US\$ the dividend paid per share for the years ended September 30, 2009, 2010, 2011, 2012 and the proposed dividend per share for the year ended September 30, 2013. Owners of our shares who are United States residents should be aware that they will be subject to German withholding tax on dividends received. See Item 10: Additional information Taxation.

Year ended September 30,	Dividend paid per share	
		US\$
2009	1.60	2.25
2010	2.70	3.68
2011	3.00	3.90
2012	3.00	3.99
2013	3.00 ⁽¹⁾	

(1) Proposed by the Managing Board in agreement with the Supervisory Board; to be approved by the shareholders at the Annual Shareholders Meeting on January 28, 2014.

EXCHANGE RATE INFORMATION

We publish our Consolidated Financial Statements in euros. As used in this document, euro or means the single unified currency that was introduced in the Federal Republic of Germany on January 1, 1999. U.S. dollar, US\$ or USD means the lawful currency of the United States of America. The currency translations made in the case of dividends we have paid have been made at the noon buying rate at the date of the Annual Shareholders Meeting at which the dividends were approved. As used in this document, the term noon buying rate refers to the rate of exchange for , expressed in US\$ per , as announced by the Federal Reserve Bank of New York for customs purposes as the rate in The City of New York for cable transfers in foreign currencies.

In order that you may ascertain how the trends in our financial results might have appeared had they been expressed in US\$, the table below shows the average noon buying rates in The City of New York for cable transfers in foreign currencies as certified for customs purposes by the Federal Reserve Bank of New York for US\$ per for our fiscal years. The average is computed using the noon buying rate on the last business day of each month during the period indicated.

Fiscal year ended September 30,	Average
2009	1.3556
2010	1.3539
2011	1.3988
2012	1.3011
2013	1.3151

The following table shows the noon buying rates for in US\$ for the last six months and for November 2013 up to and including November 15, 2013.

2013	High	Low
May	1.3192	1.2818
June	1.3407	1.3006
July	1.3282	1.2774
August	1.3426	1.3196
September	1.3537	1.3120
October	1.3810	1.3490
November (through November 15)	1.3530	1.3357

On November 15, 2013, the noon buying rate was US\$1.3480 per 1.00.

Table of Contents

Our shares are traded on the Frankfurt Stock Exchange in . Fluctuations in the exchange rate between the and the US\$ will affect the US\$ equivalent of the price of the shares on the Frankfurt Stock Exchange and, as a result, are likely to affect the market price of the American Depositary Shares (ADS) on the New York Stock Exchange. We will declare any cash dividends in and exchange rate fluctuations will affect the US\$ amounts received by holders of ADSs on conversion of cash dividends on the shares represented by the ADSs.

RISK FACTORS

Our business, financial condition (including effects on assets, liabilities and cash flows), results of operations and reputation could suffer from material adverse effects due to any of the risks described below. While we have described below all the risks that we consider material, those risks are not the only ones we face. Additional risks not known to us or that we currently consider immaterial may also impair our business operations.

STRATEGIC RISKS

Our business, financial condition and results of operations may be affected by the uncertainties of economic and political conditions, particularly in the current macroeconomic environment, which is characterized by a high degree of uncertainty and modest recovery as well as the continuing risk of resurgence of crisis in financial markets and of renewed global economic downturn: Our business environment is influenced by domestic as well as global demand, which in turn is influenced by economic conditions. We still see a high degree of volatility in the global financial markets, primarily as a result of the ongoing crisis in the Eurozone. Future economic developments and, in consequence, the speed of economic growth and the sustainability of our market environment are dependent upon the evolution of a number of global and local factors such as the crisis in the credit markets, economic crises arising from sovereign debt overruns, and government budget consolidation measures related thereto, reduced levels of capital expenditures, declining consumer and business confidence, increasing unemployment in certain countries, fluctuating commodity prices, bankruptcies, natural disasters, political crises, imminent social unrest and other challenges.

In light of the latest economic developments, the high degree of unemployment in certain countries, the level of public debt in the United States, in Japan and in countries affected by the European sovereign debt crisis, uncertainties with respect to the stability of certain emerging markets, e.g. India or Indonesia, the risk of an escalation of the budgetary quarrels in the United States and the potential impact of budget consolidation measures by governments around the world, the bases for our expectations relating to the overall economic situation and specific conditions in markets relevant to us are subject to considerable uncertainties. In general, due to the significant proportion of long-cycle businesses in our Sectors and the importance of long-term contracts for Siemens, there is usually a time lag between the development of macroeconomic conditions and their impact on our financial results. Important exceptions include our short-cycle businesses in the Industry Sector, particularly those in Industry Automation and parts of Drive Technologies as well as parts of the Power Grid Solutions & Products Business within the Infrastructure & Cities Sector, which are highly sensitive to volatility in market demand. If the moderate recovery of macroeconomic conditions stalls again and if we are not successful in adapting our production and cost structure to subsequent changes to conditions in the markets in which we operate, there can be no assurance that we will not experience adverse effects that may be material to our business, financial condition and results of operations. For example, it may become more difficult for our customers to obtain financing and as a result they may modify, delay or cancel plans to purchase our products and services or to execute transactions. Furthermore, prices may decline as a result of adverse market conditions to a greater extent than currently anticipated. In addition, contracted payment terms, especially regarding the level of advance payments by our customers relating to long-term projects, may become less favorable, which could negatively impact our cash flows. Additionally, if customers are not successful in generating sufficient revenue or securing access to the capital markets, they may not be able to pay, or may delay payment of, the amounts

they owe us, which may adversely affect our business, financial condition and results of operations.

Numerous other factors, such as fluctuations in energy and raw material prices, as well as global political conflicts, including those in the Middle East, North Africa and other regions, continue to impact macroeconomic

Table of Contents

parameters and the international capital and credit markets. The uncertainty of economic and political conditions can have a material adverse impact on our business, financial condition and results of operations.

Our business is affected by a variety of market conditions and regulations. For example, our Energy Sector is exposed to the development of global demand for energy and is considerably affected by regulations related to energy and environmental policies. Our Healthcare Sector, in turn, is dependent on developments and regulations in healthcare systems around the world, particularly in the important U.S. healthcare market. Our Industry Sector is vulnerable to unfavorable market conditions in certain segments of the automotive and manufacturing industries. Our Infrastructure & Cities Sector focuses, among other things, on business with public authorities around the world and is thus vulnerable to restrictions in public budgets.

We operate in highly competitive markets, which are subject to price pressures and rapid changes: The worldwide markets for our products and solutions are highly competitive in terms of pricing, product and service quality, development and introduction time, customer service and financing terms. In many of our businesses, we face downward price pressure and we are or could be exposed to market downturns or slower growth, which may increase in times of declining investment activities and consumer demand. We face strong competitors, some of which are larger and may have greater resources in a given business area, as well as competitors from emerging markets, which may have a better cost structure. Some industries in which we operate are undergoing consolidation, which may result in stronger competition and a change in our relative market position. Certain competitors may be more effective and faster in capturing available market opportunities. These factors alone or in combination may negatively impact our business, financial condition, and results of operations.

Our business, financial condition and results of operations may be adversely affected by continued strategic alignments and cost-cutting initiatives: We are in a continuous process of strategic alignments and constantly engage in cost-cutting initiatives, including ongoing capacity adjustment measures and structural initiatives. Capacity adjustments through consolidation of business activities and manufacturing facilities, and the streamlining of product portfolios are also part of these cost reduction efforts. These measures may not be implemented as planned, may turn out to be less effective than anticipated, may only become effective later than estimated or may not become effective at all. Each of these factors alone or in combination may negatively impact our business, financial condition, and results of operations. Any future contribution of these measures to our profitability will be influenced by the actual savings achieved and by our ability to sustain these ongoing efforts.

Our business, financial condition and results of operations may be adversely affected by portfolio measures: Our strategy includes divesting activities in some business areas and strengthening others through portfolio measures, including mergers and acquisitions.

With respect to divestments, we may not be able to divest some of our activities as planned, and the divestitures we do carry out could have a negative impact on our business, financial condition, results of operations and our reputation. For example, we have announced the closure of our solar business and decided to divest the business activities included in our airport logistics and postal automation business, which as of September 30, 2013 was part of the Infrastructure & Cities Sector's Mobility and Logistics Division.

Mergers and acquisitions are inherently risky because of difficulties that may arise when integrating people, operations, technologies and products. There can be no assurance that any of the businesses we acquire can be integrated successfully and as timely as originally planned or that they will perform as anticipated once integrated. In addition, we may incur significant acquisition, administrative and other costs in connection with these transactions, including costs related to integration of acquired businesses. For example, we are currently engaged in integration activities within the Infrastructure & Cities Sector's Mobility and Logistics Division concerning the recently acquired

rail automation business of Invensys plc., U.K., and within the Industry Sector's Industry Automation Division concerning the acquisition of LMS International NV, Belgium, a leading provider of mechatronic simulation solutions. Furthermore, portfolio measures may result in additional financing needs and adversely affect our financial leverage and our debt-to-equity ratio. Acquisitions may also lead to substantial increases in intangible assets, including goodwill. Our Statements of Financial Position reflect a significant amount of intangible assets, including goodwill. Among our businesses, the largest amount of goodwill is

Table of Contents

allocated to the Diagnostics Division and the Imaging & Therapy Systems Division of the Healthcare Sector, and the Industry Automation Division of the Industry Sector. If we were to encounter continuing adverse business developments including negative effects on our revenues, profits or cash, or adverse effects from an increase in the weighted average cost of capital (WACC) or from foreign exchange rate developments, or if we were otherwise to perform worse than expected at acquisition activities, then these intangible assets, including goodwill, might have to be written off, which could materially and adversely affect our business, financial condition and results of operations. The likelihood of such adverse business developments increases in times of difficult or uncertain macroeconomic conditions.

Our business, financial condition and results of operations may be adversely affected by our equity interests, other investments and strategic alliances, particularly in our segment Equity Investments: Our strategy includes strengthening our business interests through joint ventures, associated companies and strategic alliances. Certain of our investments are accounted for using the equity method, including, among others, BSH and EN (renamed to Unify after fiscal year end). Furthermore we hold other investments, for example Atos S.A. and OSRAM Licht AG. Any factors negatively influencing the profitability of our equity and other investments, including negative effects on revenues, profits or cash, could have an adverse effect on our equity pick-up related to these equity interests or may result in a write-off of these investments. In addition, our business, financial condition and results of operations could also be adversely affected in connection with loans, guarantees or non-compliance with financial covenants related to these equity and other investments. Furthermore, such investments are inherently risky as we may not be able to sufficiently influence corporate governance processes or business decisions taken by our equity investments, other investments and strategic alliances that may have a negative effect on our business. In addition, joint ventures bear the risk of difficulties that may arise when integrating people, operations, technologies and products. Strategic alliances may also pose risks for us because we compete in some business areas with companies with which we have strategic alliances.

Our businesses must keep pace with technological changes and develop new products and services to remain competitive: The markets in which our businesses operate experience rapid and significant changes due to the introduction of innovative technologies. To meet our customers' needs in these areas, we must continuously design new, and update existing products and services, and invest in, and develop new technologies. Introducing new products and technologies requires a significant commitment to research and development, which in return requires expenditure of considerable financial resources that may not always result in success. Our sales and profitability may suffer if we invest in technologies that do not operate, or may not be integrated, as expected or that are not accepted in the marketplace as anticipated, or if our products or systems are not introduced to the market in a timely manner, in particular, compared to our competitors, or become obsolete. We constantly apply for new patents and actively manage our intellectual property portfolio to secure our technological position. However, our patents and other intellectual property may not prevent competitors from independently developing or selling products and services similar to or duplicate of ours. There can be no assurance that the resources invested by us to protect our intellectual property will be sufficient or that our intellectual property portfolio will adequately deter misappropriation or improper use of our technology. Furthermore, in some of our markets, the need to develop and introduce new products rapidly in order to capture available opportunities may lead to quality problems. Our operating results depend to a significant extent on our ability to anticipate and adapt to changes in markets and to reduce the costs of producing high-quality, new and existing products. Among recent technology trends, we carefully estimate the potential and relevance of cloud computing. We believe that the potential and usage scenarios of this technology vary among our products, solutions and services depending on the degree of information technology utilized. However, we also believe that this trend needs to be monitored closely, because it might bear the potential to change the competitive landscape. Any inability to adapt to the aforementioned factors could have a material adverse effect on our business, financial condition and results of operations.

We are subject to changes of regulations, laws and policies concerning our products: As a diversified company with global businesses we are exposed to various product related regulations, laws and policies influencing our processes. Recently, some jurisdictions around the world have adapted certain regulations, laws and policies requiring us to extend our recycling efforts, limit the sourcing and usage of certain raw materials and request additional due diligences and disclosures on sourcing and usage of the regulated raw materials. In

Table of Contents

particular, we must comply with U.S. legislation to improve transparency and accountability concerning the sourcing of conflict minerals from mines located in the conflict zones of the Democratic Republic of Congo (DRC) and its adjoining countries. The term conflict minerals currently encompasses tantalum, tin, tungsten (or their ores) and gold. Conflict minerals can be found in a vast array of products. This U.S. legislation requires manufacturers, such as us, to investigate and disclose their use of any conflict minerals originating in the DRC or adjoining countries. It also implements guidelines to assist the manufacturer in preventing, by way of performing due diligence in its supply chain, any such sourcing from potentially financing or benefitting armed groups in this area. We are currently working on an implementation strategy for the above-referenced legislation. Since we operate within highly complex value chains, we are required to undertake a significant due diligence process requiring considerable investments of human resources and finances in order to comply with the conflict minerals due diligence and disclosure requirements. If our (sub-) suppliers are unable or unwilling to provide us with requested information and to take other steps to ensure that no conflict minerals, financing or benefitting armed groups in the DRC, are included in minerals or components supplied to us, we may be forced to disclose information about the use of conflict minerals in our supply chain in filings with the SEC. In addition, since the applicability of the new conflict minerals legislation is limited to companies publicly listed in the U.S., not all of our competitors are required to comply with this legislation or engage in similar efforts to disclose the usage of conflict minerals. If we are unable to achieve sufficient confidence throughout our supply chain, or if any of these risks or similar risks associated with these kinds of regulations, laws and policies were to materialize, our business, financial condition, results of operations and reputation could be materially adversely affected.

OPERATIONAL RISKS

Our business, financial condition and results of operations may be adversely affected by cost overruns or additional payment obligations related to the management of our long-term, fixed price or turnkey projects: We perform a portion of our business, especially large projects, under long-term contracts that are awarded on a competitive bidding basis. Some of these contracts are inherently risky because we may assume substantially all of the risks associated with completing a project and the post-completion warranty obligations. For example, we face the risk that we must satisfy technical requirements of a project even though we may not have gained experience with those requirements before we win the project. The profit margins realized on fixed-priced contracts may vary from original estimates as a result of changes in costs and productivity over their term. We sometimes bear the risk of unanticipated project modifications, shortage of key personnel, quality problems, financial difficulties of our customers, cost overruns or contractual penalties caused by unexpected technological problems, unforeseen developments at the project sites, unforeseen changes or difficulties in the regulatory or political environment, performance problems with our suppliers, subcontractors and consortium partners or other logistical difficulties. Certain of our multi-year contracts also contain demanding installation and maintenance requirements in addition to other performance criteria relating to timing, unit cost and compliance with government regulations requirements, which, if not satisfied, could subject us to substantial contractual penalties, damages, non-payment and contract termination. There can be no assurance that contracts and projects, in particular those with long-term duration and fixed-price calculation, can be completed profitably.

Increased IT security threats and higher levels of professionalism in computer crime could pose a risk to our systems, networks, products, solutions and services as well as to those of our service providers: Our business portfolio includes a broad array of systems, networks, products, solutions and services across our businesses that rely on digital technologies. We observe a global increase in IT security threats and higher levels of professionalism in computer crime, which pose a risk to the security of systems and networks and the confidentiality, availability and integrity of data. We attempt to mitigate these risks by employing a number of measures, including employee training, comprehensive monitoring of our networks and systems, and maintenance of backup and protective systems such as firewalls and virus scanners. To the extent we employ service providers, such as in the area of IT infrastructure, we

have contractual arrangements in place in order to ensure that these risks are reduced in a similar manner. Nonetheless, our systems, networks, products, solutions and services, as well as those of our service providers remain potentially vulnerable to attacks. Depending on their nature and scope, such attacks could potentially lead to the leakage of confidential information, improper use of our systems and networks, manipulation and destruction of data, defective products, production downtimes and supply shortages, which in turn could adversely affect our business, financial condition, results of operations and reputation.

Table of Contents

We may face operational failures and quality problems in our value chain processes: Our value chain comprises all steps, from research and development to supply chain management, production, marketing, sales and services. Operational failures in our value chain processes could result in quality problems or potential product, labor safety, regulatory or environmental risks. Such risks are particularly present in our Sectors in relation to our production and construction facilities, which are located all over the world and have a high degree of organizational and technological complexity. From time to time, some of the products we sell might have quality issues resulting from the design or manufacture of such products or from the software integrated into them. In particular, our Healthcare Sector is subject to requirements of the U.S. Food and Drug Administration, which require certain efforts safeguarding our product quality. If we are not able to comply with these requirements, our business, financial condition, results of operations and reputation may be adversely affected.

Furthermore, failures on the part of service providers we employ, such as in the area of IT, may have an adverse effect on our processes and operations and our ability to meet our commitments to customers or increase our operating costs. Any operational failures or quality issues could have a material adverse effect on our business, financial condition, results of operations and reputation.

We may face interruption of our supply chain, including the inability of third parties to deliver parts, components and services on time, and we may be subject to rising raw material prices: Our financial performance depends in part on reliable and effective supply chain management for components, sub-assemblies and other materials. Capacity constraints and supply shortages resulting from ineffective supply chain management may lead to delays and additional cost. We rely on third parties to supply us with parts, components and services. Using third parties to manufacture, assemble and test our products reduces our control over manufacturing yields, quality assurance, product delivery schedules and costs. The third parties that supply us with parts and components also have other customers and may not have sufficient capacity to meet all of their customers' needs, including ours, during periods of excess demand. Component supply delays can affect the performance of our Sectors. Although we work closely with our suppliers to avoid supply-related problems, there can be no assurance that we will not encounter supply problems in the future or that we will be able to replace a supplier that is not able to meet our demand. This risk is particularly evident in businesses with a very limited number of suppliers. Shortages and delays could materially harm our business. Unanticipated increases in the price of components or raw materials due to market shortages or other reasons could also adversely affect the performance of our Sectors. Furthermore, we may be exposed to the risk of delays and interruptions of the supply chain as a consequence of natural disasters in case we are unable to identify alternative sources of supply or ways of transportation in a timely manner or at all. A general shortage of materials, components or sub-components as a result of natural disasters also bears the risk of unforeseeable fluctuations in prices and demand, which might adversely affect our business, financial condition and results of operations.

Our Sectors purchase raw materials including so-called rare-earth metals, copper, steel, aluminum and oil, which expose them to fluctuations in energy and raw material prices. In recent times, commodities have been subject to volatile markets, and such volatility is expected to continue. If we are not able to compensate for our increased costs or pass them on to customers, price increases could have a material adverse impact on our business, financial condition and results of operations. In contrast, in times of falling commodity prices, we may not fully profit from such price decreases as we attempt to reduce the risk of rising commodity prices by several means, such as long-term contracting or physical and financial hedging. In addition to price pressure that we may face from our customers expecting to benefit from falling commodity prices or adverse market conditions, this could also adversely affect our business, financial condition and results of operations.

We are dependent upon hiring, developing and retaining highly qualified management and technical personnel: Competition for highly qualified personnel remains intense in the industries and regions in which our

businesses operate. In many of our business areas, we intend to expand our business activities, for which we will need highly skilled employees. Our future success depends in part on our continued ability to hire, integrate, develop and retain engineers and other qualified personnel. We address this risk with various measures, for example succession planning, employer branding, retention and career management. However, there can be no assurance that we will continue to be successful in attracting and retaining all the highly qualified employees and key personnel needed in the future, including in appropriate geographic locations, and any inability to do so could have a material adverse effect on our business, financial condition, results of operations and reputation.

Table of Contents**FINANCIAL RISKS**

We are exposed to currency risks and interest rate risks: We are exposed to fluctuations in exchange rates, especially between the U.S. dollar and the euro, because a high percentage of our business volume is conducted in the U.S. and as exports from Europe. In addition, we are exposed to currency effects involving the currencies of emerging markets, in particular the Chinese Yuan. As a result, a strong euro in relation to the U.S. dollar and other currencies could have an adverse impact on our revenues and results of operations. Certain currency risks as well as interest rate risks are hedged on a Company-wide basis using derivative financial instruments. Depending on the development of foreign currency exchange and interest rates, our hedging activities could have significant effects on our business, financial condition and results of operations. Our Sectors and Financial Services (SFS) engage in currency hedging activities which sometimes do not qualify for hedge accounting. In addition, our Corporate Treasury has interest rate hedging activities which also do not qualify for hedge accounting, and are subject to changes in interest rates. Accordingly, exchange rate and interest rate fluctuations may lead to higher volatility and adverse effects on our business, financial condition and results of operations. A strengthening of the euro (particularly against the U.S. dollar) may change our competitive position, as many of our competitors may benefit from having a substantial portion of their costs based in weaker currencies, enabling them to offer their products at lower prices.

We are exposed to volatile credit spreads: Regarding our Corporate Treasury activities, widening credit spreads due to uncertainty and risk aversion in the financial markets might lead to adverse changes of fair market values of our financial assets, in particular concerning our derivative financial instruments. In addition, we see a risk of widening credit spreads leading to increasing refinancing costs if the Eurozone sovereign debt crisis with its ongoing significant impact on global financial markets and the European financial sector in particular, continues or even worsens. Any such development could also further increase the costs for buying protection against credit risks due to a potential increase of counterparty risks.

Our future financing via Corporate Treasury may particularly be affected by the uncertainty of economic conditions and the development of capital and financial markets: Our Corporate Treasury is responsible for the financing of the Company. Negative developments in the foreign exchange, money or capital markets, such as limited availability of funds (particularly U.S. dollar funds), may increase our overall cost of funding. The ongoing Eurozone sovereign debt crisis continues to have an impact on global capital markets. The resulting higher risk awareness of governments lead to more regulations on the use of financial instruments through (1) the Regulation on OTC derivatives, central counterparties and trade repositories (European Market Infrastructure Regulation) and (2) other similar regulations in other jurisdictions, which may have an impact on the future availability or the costs of adequate hedging instruments for the Company. It may even lead to further regulation of the financial sector and the use of financial instruments. Such further regulations could adversely influence our future possibilities of obtaining debt financing, and/or may significantly increase our refinancing costs. Deteriorating credit quality and/or default of business partners may adversely affect our business, financial condition and results of operations.

Downgrades of our ratings could increase our cost of capital and could negatively affect our businesses: Our business, financial condition and results of operations are influenced significantly by the actual and expected performance of the Sectors and SFS, as well as the Company's portfolio measures. An actual or expected negative development of our business, financial condition or results of operations could result in the deterioration of our credit rating. Downgrades by rating agencies could increase our cost of capital, may reduce our potential investor base and may negatively affect our business, financial condition and results of operations.

Our financing activities subject us to various risks, including credit, interest rate and foreign exchange risk: We provide our customers with various forms of direct and indirect financing in connection with large projects. We also finance a large number of customer orders, for example, the leasing of medical equipment, mainly

through SFS. SFS also incurs credit risk by financing third-party equipment or by taking direct or indirect participation in financings, such as syndicated loans. In part, we take a security interest in the assets we finance or we receive additional collateral. Our business, financial condition and results of operations may be adversely affected if the credit quality of our customers deteriorates or if they default on their payment obligation to us, if the value of the assets in which we have taken a security interest or additional collateral

Table of Contents

declines, if interest rates or foreign exchange rates fluctuate, or if the projects in which we invest are unsuccessful. Potential adverse changes in economic conditions could cause a decline in the fair market values of assets, derivative instruments as well as collateral, resulting in losses which could have an adverse effect on our business, financial condition and results of operations.

Our business, financial condition and results of operations may be adversely affected by several parameters influencing the funded status of our pension benefit plans: The funded status of our pension plans may be affected by an increase or decrease in the defined benefit obligation (DBO), as well as by an increase or decrease in the value of plan assets. Pensions are accounted for in accordance with actuarial valuations, which rely on statistical and other factors in order to anticipate future events. These factors include key pension plan valuation assumptions such as the discount rate, rate of future compensation increases and pension progression. Actual developments may differ from assumptions due to changing market and economic conditions, thereby resulting in an increase or decrease in the DBO. Significant movements in financial markets or a change in the portfolio mix of invested assets could result in corresponding increases or decreases in the value of plan assets, particularly equity securities. Also, changes in pension plan assumptions could affect net periodic pension cost. For example, a change in discount rates may result in changes in the net periodic benefit cost in the following fiscal year. In order to comply with local pension regulations in selected foreign countries, we may face a risk of increasing cash outflows to reduce an underfunding of our pension plans in these countries, if any.

For further information on financial risks and financial risk management, see Item 18 Financial Statements Notes to Consolidated Financial Statements Note 32.

COMPLIANCE RISKS

We are subject to regulatory risks associated with our international operations: Protectionist trade policies and changes in the political and regulatory environment in the markets in which we operate, such as import and export controls, tariffs and other trade barriers and price or exchange controls, could affect our business in several national markets, impact our sales and profitability and make the repatriation of profits difficult, and may expose us to penalties, sanctions and reputational damage. In addition, the uncertainty of the legal environment in some regions could limit our ability to enforce our rights and subject us to continually increasing costs related to designing and implementing appropriate compliance programs and protocols.

As a globally operating organization, we conduct business with customers in countries, such as Iran, Syria and Cuba, that are subject to increasingly expansive export control regulations, embargoes, economic sanctions or other forms of trade restrictions imposed by the U.S., the European Union or other countries or organizations. New or expanded export control regulations, economic sanctions, embargoes or other forms of trade restrictions imposed on Iran, Syria or on other sanctioned countries in which we do business may result in a curtailment of our existing business in such countries and in amendments to our policies. We are also aware of initiatives by institutional investors, such as pension funds or other companies, to adopt or consider adopting policies prohibiting investment in and transactions with, or requiring divestment of interests in entities doing business with Iran and other countries identified as state sponsors of terrorism by the U.S. Secretary of State. It is possible that such initiatives may result in us being unable to gain or retain investors, customers or suppliers. In addition, the termination of our activities in sanctioned countries may expose us to customer claims and other actions. Our reputation could also suffer due to our activities with counterparties in or affiliated with these countries. We have included details of our Iran-related activities in Item 4: Information on the Company Overview, and are filing a related notice of disclosure with the SEC. Under Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012, upon receipt of the notice of disclosure by the SEC, the SEC is required to notify the US President and Congress of the filing. The President is then required to initiate an investigation into Iran-related activities disclosed in such notice, and make a determination as to whether

sanctions should be imposed on the filing party. There is no assurance as to the outcome of any such Presidential investigation. If the relevant authorities were to impose penalties or sanctions on Siemens, such measures could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

We expect that sales to emerging markets will continue to account for an increasing portion of our total revenue, as our business naturally evolves and as developing nations and regions around the world increase their demand for our offering. Emerging market operations involve various risks, including civil unrest, health concerns, cultural differences such as employment and business practices, volatility in gross domestic product, economic and governmental instability, the potential for nationalization of private assets and the imposition of exchange controls. The Asian markets, in particular, are important for our long-term growth strategy, and our sizeable operations in China are influenced by a legal system that is still developing and is subject to change. Our growth strategy could be limited by governments supporting local industries. Our Sectors, particularly those that derive their revenue from large projects, could be adversely affected if future demand, prices and gross domestic product in the markets in which those Sectors operate do not develop as favorably as expected due to such regulatory measures. If any of these risks or similar risks associated with our international operations were to materialize, our business, financial condition and results of operations could be materially adversely affected.

Current and future investigations regarding allegations of public corruption, antitrust violations and other illegal acts could have a material adverse effect on our business, financial condition and results of operations and on our reputation: We engage in a substantial amount of business with governments and government-owned enterprises around the world. We also participate in a number of projects funded by government agencies and intergovernmental and supranational organizations such as multilateral development banks. If we are found to have been engaged in public corruption, antitrust violations and other illegal acts, such activities may impair our ability to do business with these or other organizations. Corruption, antitrust and related proceedings may lead to criminal and civil fines as well as penalties, sanctions, injunctions against future conduct, profit disgorgements, disqualifications from directly and indirectly engaging in certain types of business, the loss of business licenses or permits or other restrictions. Accordingly, we may be required to record material provisions to cover potential liabilities arising in connection with such investigations and proceedings, including potential tax penalties. Moreover, any findings related to public corruption that are not covered by the 2008 and 2009 corruption charge settlements, which were concluded with American and German authorities, may endanger our business with government agencies and intergovernmental and supranational organizations, further monitors could be appointed to review future business practices and we may otherwise be required to further modify our business practices and our compliance program.

Our involvement in ongoing and potential future corruption or antitrust proceedings could damage our reputation and have an adverse impact on our ability to compete for business from public and private sector customers around the world. If we or our subsidiaries are found to have engaged in certain illegal acts or not to have taken effective steps to address allegations or findings of corruption or antitrust violations in our business, this may impair our ability to participate in business with governments or intergovernmental organizations and may result in our formal exclusion from such business. Even if we are not formally excluded from participating in government business, government agencies or intergovernmental or supranational organizations may informally exclude us from tendering for or participating in certain contracts. For example, legislation of member states of the European Union could in certain cases result in our mandatory or discretionary exclusion from public contracts in case of a conviction for bribery and certain other offences or for other reasons. As described in more detail in Item 4: Information on the Company Legal proceedings, we and certain of our subsidiaries have in the past been excluded or currently are excluded from some contracting, including with governments, development banks and multilateral financial institutions, as a result of findings of corruption or other misconduct. Ongoing or potential future investigations into allegations of corruption or antitrust violations could also impair existing relationships with, and our ability to acquire new private sector business partners. For instance, such investigations may adversely affect our ability to pursue potentially important strategic projects and transactions, such as strategic alliances, joint ventures or other business combinations, or could result in the cancellation of certain of our existing contracts and third parties, including our competitors, could initiate significant third-party litigation.

In addition, future developments in ongoing and potential future investigations, such as responding to the requests of governmental authorities and cooperating with them, could divert management's attention and resources from other issues facing our business. The materialization of any of these risks could have a material adverse effect on our business, financial condition and results of operations and on our reputation.

Table of Contents

Our business, financial condition and results of operations could suffer as a result of current or future litigation: We are subject to numerous risks relating to legal, governmental and regulatory proceedings to which we are currently a party or to which we may become a party in the future. We routinely become subject to legal, governmental and regulatory investigations and proceedings involving, among other things, requests for arbitration, allegations of improper delivery of goods or services, product liability, product defects, quality problems, intellectual property infringement, non-compliance with tax regulations and/or alleged or suspected violations of applicable laws. In addition, we may face further claims in connection with the circumstances that led to the corruption charges. For additional information with respect to specific proceedings, see Item 4: Information on the Company Legal proceedings. There can be no assurance that the results of these or any other proceedings will not materially harm our business, financial condition and results of operations. Moreover, even if we ultimately prevail on the merits in any such proceedings, we may have to incur substantial legal fees and other costs defending ourselves against the underlying allegations. Under certain circumstances we record a provision for risks arising from legal disputes and proceedings. In addition, we maintain liability insurance for certain legal risks at levels our management believes are appropriate and consistent with industry practice. Our insurance policy, however, does not protect us against reputational damage. Moreover, we may incur losses relating to legal proceedings beyond the limits, or outside the coverage, of such insurance or exceeding any provisions made for legal proceedings related losses. Finally, there can be no assurance that we will be able to maintain adequate insurance coverage on commercially reasonable terms in the future. Each of these risks may have a material adverse effect on our business, financial condition and results of operations.

Examinations by tax authorities and changes in tax regulations could adversely affect our business, financial condition and results of operations: We operate in around 190 countries and therefore are subject to different tax regulations. Changes in tax law in any of these jurisdictions could result in higher tax expense and payments. Furthermore, legislative changes could materially impact our tax receivables and liabilities as well as deferred tax assets and deferred tax liabilities. In addition, the uncertain tax environment in some regions could limit our ability to enforce our rights. As a globally operating organization, we conduct business in countries subject to complex tax rules, which may be interpreted in different ways. Future interpretations or developments of tax regimes may affect our business, financial condition and results of operations. We are regularly examined by tax authorities in various jurisdictions.

We are subject to environmental and other governmental regulations: Some of the industries in which we operate are highly regulated. Current and future environmental and other governmental regulations or changes thereto may require us to change the way we run our operations and could result in significant increases in our operating or production costs. In addition, while we have procedures in place to ensure compliance with applicable governmental regulations in the conduct of our business operations, it cannot be excluded that violations of applicable governmental regulations may be caused either by us or by third parties that we contract with, including suppliers or service providers, whose activities may be attributed to us. Any such violations expose us to the risk of liability, reputational damage or loss of licenses or permits that are important to our business operations. In particular, we could also face liability for damage or remediation for environmental contamination at the facilities we design or operate. For example, we are required to bear environmental clean-up costs mainly related to remediation and environmental protection liabilities, which have been accrued based on the estimated costs of decommissioning facilities for the production of uranium and mixed-oxide fuel elements in Hanau, Germany, as well as a nuclear research and service center in Karlstein, Germany. For further information, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 24. Under certain circumstances, we establish provisions for environmental risks. With regard to certain environmental risks, we maintain liability insurance at levels that our management believes are appropriate and consistent with industry practice. We may incur environmental losses beyond the limits, or outside the coverage, of such insurance, and such losses may have a material adverse effect on our business, financial condition and results of our operations. In addition, our provisions for environmental liabilities may not be sufficient to cover

our ultimate losses or expenditures resulting therefrom.

Table of Contents**ITEM 4: INFORMATION ON THE COMPANY****OVERVIEW**

Siemens traces its origins to 1847. Beginning with advances in telegraph technology, the Company quickly expanded its product line and geographic scope and was already a multi-national business by the end of the 19th century. The Company formed a partnership under the name Siemens & Halske in 1847, reorganized as a limited partnership in 1889 and as a stock corporation in 1897. The Company moved its headquarters from Berlin to Munich in 1949, and assumed its current name as Siemens Aktiengesellschaft, a stock corporation under the Federal laws of Germany, in 1966. The address of our principal executive offices is Wittelsbacherplatz 2, 80333 Munich, Germany; telephone number +49 (89) 636 00.

During fiscal 2013, Siemens employed an average of 362,400 people on a continuing basis and operated in around 190 countries worldwide. In fiscal 2013, we had revenue of 75.882 billion. Our balanced business portfolio is based on leadership in electronics and electrical engineering. Reflecting our strategy to benefit from global megatrends, Siemens operations have been divided into four Sectors since fiscal 2012. These Sectors are Energy, Healthcare, Industry and Infrastructure & Cities. We combine the expertise in our four Sectors with a commitment to original research and development (R&D) to build strong global market positions. The Energy Sector offers a wide spectrum of products, services and solutions for the generation and transmission of power and for the extraction, conversion and transport of oil and gas. The Healthcare Sector develops, manufactures and markets diagnostic and therapeutic systems, devices and consumables, as well as information technology systems for clinical and administrative purposes. The Industry Sector's portfolio ranges from industry automation and drives products and services to system integration and solutions for plant business. The Infrastructure & Cities Sector bundles capabilities in the area of building and mobility solutions, low and medium voltage components, systems and solutions as well as power distribution, including Smart Grid applications. Besides these activities, Financial Services (SFS) supports Sector activities as a business partner while continuing to build up its own business with external customers. The segment Equity Investments comprises equity stakes held by Siemens that are either accounted for by the equity method, at cost or as current available-for-sale financial assets and are not allocated to a Sector, SFS, Centrally managed portfolio activities, Siemens Real Estate (SRE), Corporate items or Corporate Treasury for strategic reasons. Our businesses operate under a range of regional and economic conditions. In internationally-oriented long-cycle industries, for example, customers have multi-year planning and implementation horizons that tend to be independent of short-term economic trends. Our activities in these areas include primarily the Energy Sector and the transportation and logistics solutions business within the Infrastructure & Cities Sector. The Healthcare Sector's business activities are relatively unaffected by short-term economic trends but are dependent on regulatory and policy developments around the world. In fields with more industry-specific cycles, customers tend to have shorter horizons for their spending decisions and greater sensitivity to current economic conditions. Our activities in these areas include automation and parts of drives operations within the Industry Sector as well as low and medium voltage operations within the Infrastructure & Cities Sector. Our businesses, especially the Healthcare Sector, are also substantially influenced by technological changes and the rate of acceptance of new technologies.

As a globally-operating organization, we also conduct limited business with customers in Iran, Syria and Cuba. The U.S. Secretary of State designates these countries as state sponsors of terrorism and subjects them to export controls. Our activities with customers in these states are insignificant relative to our size (substantially less than 1% of our revenue in fiscal 2013) and do not, in our view, represent either individually or in aggregate a material investment risk. We actively employ systems and procedures for compliance with applicable export control programs, including those in the United States, the European Union and Germany.

Following the admission of South Sudan as a member state of the United Nations, the regulations established by the Managing Board of Siemens AG in 2007 in light of the humanitarian situation in Sudan were changed in March 2013:

Whereas all business activities with Sudan, with the sole exception of participation in the humanitarian projects of internationally recognized organizations, are still prohibited as previously disclosed, all direct and indirect business activities with South Sudan are now permitted company-wide.

As previously disclosed, Siemens has decided that, subject to certain limited exceptions, it will not enter into new contracts with customers in Iran and has issued group-wide policies establishing the details of its

Table of Contents

general decision. In the fourth quarter of fiscal 2012, as a result of an analysis of our contracts with Iranian customers in particular with respect to expected payment defaults and force majeure events, we recorded adjustments affecting several line items in our consolidated statements of income, in particular revenue and cost of sales, recognized in prior periods from projects that were still permitted to be provided under these policies. For additional information, see Item 3: Key information Risk factors, Item 4: Information on the Company Description of business and Item 5: Operating and financial review and prospects Fiscal 2012 compared to fiscal 2011 Adjustments for long-term contracts with customers in Iran.

STRATEGY

GLOBAL MEGATRENDS

Global megatrends are long-term developments that are expected to have an impact on all humanity. We at Siemens view demographic change, urbanization, climate change and globalization as megatrends that will drive global demand in coming decades. We have aligned our strategy with these developments and accordingly have organized our business into four Sectors: Energy, Healthcare, Industry, and Infrastructure & Cities.

Demographic change includes two major trends: the world's population continues to grow steadily, and it continues to get older. Together, these two trends will challenge the ability of future healthcare systems to make healthcare available to everyone. **Urbanization** refers to the growing number of densely-populated metropolitan centers around the world. This trend intensifies the already strong demand for sustainable and energy-efficient infrastructures for buildings, transportation systems, energy and water. We view **climate change** as a fact and that reducing greenhouse gas emissions is vital to counteract the increasingly drastic effects on our ecosystem. There is a strong need for innovative technologies to increase efficiency and reduce the emissions related to energy generation and consumption. **Globalization** refers to the increasing integration of the world's economies, politics, culture and other areas of life. Globalization leads to increased competitive pressure and demand for economical, timely-to-market, high-quality products and solutions.

STRATEGY OF THE SIEMENS GROUP

Our **vision** is to be a pioneer in

energy efficiency,

industrial productivity,

next-generation healthcare, and

intelligent infrastructure solutions.

Our company strategy guides us in turning our vision into reality. We are aiming to be a market and technology leader in our businesses, based on our values to be **responsible, excellent** and **innovative**. We believe that this will position us to achieve sustainable, profitable growth and thereby continually increase our company value. We intend to profit from the megatrends described above.

Our strategy comprises what we call our **three strategic directions**:

focusing on innovation-driven growth markets,

getting closer to our customers, and

using the power of Siemens.

One Siemens is our framework for sustainable value creation, with a financial target system for capital-efficient growth and the goal of continuous improvement relative to the market and our competitors.

One Siemens defines financial key performance indicators for revenue growth, for capital efficiency and profitability, and for the optimization of our capital structure. In addition, we set hurdle rates that generally need

Table of Contents

to be considered before we proceed to make acquisitions. Further, we defined an indicator targeted at an attractive dividend policy. We believe that these indicators will play a key role in driving the value of our Company. For further information, see Item 5: Operating and financial review and prospects Business and economic environment Financial performance system.

To achieve our One Siemens goal of sustainably enhancing the value of Siemens and exploiting the full potential of our Company, we have defined three concrete focus areas along each of the three strategic directions set forth above, which we aim to address in the years ahead.

In the strategic direction of **focusing on innovation-driven growth markets**, our first focus area is to be a pioneer in technology-driven markets. Here, we intend to concentrate on markets that are widely expected to have future growth potential, such as software and IT. Our second focus area is to strengthen our portfolio. We are actively and systematically managing our portfolio with the principal aim of having our businesses achieve or maintain a No. 1 or No. 2 position in their respective markets. To provide a leading environmental portfolio is our third focus area: Our Environmental Portfolio increases our Company's revenue and makes a significant contribution to climate protection.

In the strategic direction of **getting closer to our customers**, one of our focus areas is to grow in emerging markets while maintaining our position in our established markets. We plan to offer more products, solutions and services for the rapidly growing entry-level segments, which are more price-sensitive and mostly located in emerging markets. A second focus area is to expand our service business. We believe that the large installed base of our products and solutions at our clients provides promising growth opportunities for our service business. Services play a key role in profitable growth at Siemens and, in addition, long-term service agreements are less likely to be impacted by economic fluctuations. To intensify our customer focus is our third focus area. We believe that customer proximity and local presence are important factors in being able to respond quickly to changing market requirements.

In the strategic direction of **using the power of Siemens**, our first focus area is to encourage lifelong learning and development of our employees. We invest continuously in expanding the expertise of our people through tailored training and education programs. We aim to develop the potential of our employees worldwide by identifying talent and offering challenging tasks. To empower our diverse and engaged people worldwide is our second focus area. We believe that the strong potential of our employees' skills, experience and qualifications can give us a clear competitive advantage in our global markets. The third focus area is to stand for integrity. On the basis of our values, we have formulated clear and binding principles of conduct that cover all aspects of our entrepreneurial activities.

Beginning in fiscal 2013, we have been implementing Siemens 2014, a company-wide program supporting the One Siemens framework for sustainable value creation. The goal of the program is to reduce cost, increase competitiveness, and become faster and less bureaucratic. Our Sectors are continuing to execute a broad range of measures expected to yield sustainable productivity gains.

PORTFOLIO ACTIVITIES

Since fiscal 2011, we have completed the following transactions to optimize our business portfolio for sustainable profitability and growth:

ACQUISITIONS

At the beginning of May 2013, Siemens acquired all the shares of six entities constituting the rail automation business of Invensys plc., U.K. (Invensys). With the acquisition, Siemens expanded and complemented the Infrastructure & Cities Sector's rail automation business;

At the beginning of January 2013, Siemens acquired all of the shares in LMS International NV, Belgium, a leading provider of mechatronic simulation solutions. With the acquisition, Siemens expanded and complemented the Industry Sector's product lifecycle management portfolio with mechatronic simulation and testing software;

Table of Contents

At the beginning of May 2012, Siemens acquired all of the shares of five entities constituting the Connectors and Measurements Division of Expro Holdings UK 3 Ltd. The acquired business engineers and manufactures subsea components such as cable connectors, sensors and measuring devices;

Acquisition of various other entities in fiscal 2012, which were not material individually including RuggedCom Inc., the NEM B.V. business and eMeter Corporation;

At the beginning of July 2011, OSRAM completed the acquisition of 100% of Siteco Lighting GmbH, a developer, designer and manufacturer of professional lighting fixtures;

Siemens increased its stake in its publicly listed Indian subsidiary Siemens Ltd. from about 55% to 75%. The transaction was completed at the end of April 2011.

DISPOSITIONS AND DISCONTINUED OPERATIONS

Dispositions

In August 2013, Siemens completed the sale of its 50% stake in Nokia Siemens Networks Holding B.V., held by the Equity Investments segment, to Nokia;

In the first quarter of fiscal 2012, Siemens completed the sale of its 25% stake in OAO Power Machines, held by the Energy Sector;

In March 2011, Siemens completed the sale of its 34% stake in the joint venture Areva NP S.A.S., held by the Energy Sector, to Areva S.A.;

The sale of the 49% stake in Krauss-Maffei Wegmann GmbH & Co. KG, held by the Equity Investments segment, was completed in January 2011;

At the beginning of January 2011, Siemens closed the disposal of its Electronics Assembly Systems business, which was reported in Centrally managed portfolio activities, to ASM Pacific Technology Ltd.

Discontinued Operations

In the first quarter of fiscal 2013, Siemens decided to sell its Water Technologies Business Unit. The conditions for Water Technologies to be classified as held for disposal and discontinued operations were fulfilled as of the fourth quarter of fiscal 2013;

In the fourth quarter of fiscal 2012, Siemens decided to dispose of its solar business and classified its solar business as held for disposal and as discontinued operations as of September 30, 2012. In the second quarter of fiscal 2013 Siemens reclassified the solar business to continuing operations since it no longer fulfilled the conditions to be classified as held for disposal and discontinued operations;

At the end of March 2011, Siemens announced its plan to publicly list its subsidiary OSRAM. Following the announcement, Siemens classified OSRAM as held for disposal and as discontinued operations. In fiscal 2012, the Company announced its intention to dispose of OSRAM via a spin-off to Siemens shareholders, which was approved by the Annual Shareholders Meeting on January 23, 2013. In July 2013, Siemens completed the spin-off of OSRAM. Siemens retains a minority stake of 17% in OSRAM and additionally contributed a 2.5% stake to Siemens Pension Trust e.V.;

In December 2010, Siemens and Atos S.A. (AtoS) signed an option agreement which granted AtoS the right to acquire Siemens IT Solutions and Services. This option was exercised by AtoS in February 2011 and Siemens classified Siemens IT Solutions and Services as held for disposal and as discontinued operations. On July 1, 2011, the transaction closed following the relevant antitrust approvals and the approval by AtoS shareholders.

For a detailed discussion of our acquisitions, dispositions and discontinued operations, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 4.

Table of Contents

DESCRIPTION OF BUSINESS

Our financial reporting as of September 30, 2013 comprised six reportable segments. These segments consisted of:

four Sectors Energy, Healthcare, Industry and Infrastructure & Cities,

Equity Investments and

SFS.

In addition, we separately break out two Businesses and eight Divisions within our Sectors. These are

in the Energy Sector: the Fossil Power Generation Division, the Wind Power Division, the Oil & Gas Division and the Power Transmission Division,

in the Healthcare Sector: the Diagnostics Division,

in the Industry Sector: the Industry Automation Division and the Drive Technologies Division and

in the Infrastructure & Cities Sector: the Transportation & Logistics Business, which includes the Rail Systems and Mobility and Logistics Divisions, the Power Grid Solutions & Products Business, which includes the Low and Medium Voltage and the Smart Grid Divisions and the Building Technologies Division.

The following figure shows Siemens' segment reporting structure for the periods covered by this annual report:

ENERGY

The **Energy** Sector offers a wide spectrum of products, solutions and services for generating and transmitting power, and for extracting, converting and transporting oil and gas. It primarily addresses the needs of energy providers, but also serves industrial companies, particularly in the oil and gas industry.

The following table provides key financial data for the Energy Sector.

	Year ended September 30, 2013
Total revenue	26.638 billion

External revenue	26.386 billion
External revenue as percentage of Siemens revenue	34.77%
Sector profit	1.955 billion

Table of Contents

The following chart provides a geographic breakdown of the Energy Sector's external revenue in fiscal 2013.

In fiscal 2013, the Energy Sector comprised five Divisions: Fossil Power Generation; Wind Power; Oil & Gas; Power Transmission; and Energy Service. In addition, the Sector includes two sector-led businesses: Solar and Hydro. Results for these businesses are included in results for the Sector. Siemens has decided to exit solar activities after completion of projects under execution. In the Hydro business, we are active in small and large hydro power stations, via our minority stake in Voith Hydro Holding GmbH & Co. KG. Furthermore, our Hydro business also comprises our activities in ocean power tidal turbines. As of fiscal 2014, the Fossil Power Generation Division and the Oil & Gas Division were combined into a single Division under the name Power Generation.

The **Fossil Power Generation** Division offers high-efficiency products and solutions for fossil-based power generation. These solutions include substantial innovation and engineering know-how aimed at converting fossil fuels to power with high efficiency, which increases return on investment for customers and helps them improve their environmental performance. The Division concentrates on products and solutions for gas and steam turbines, turbo generators, heat recovery steam generators including control systems, with an emphasis on combined-cycle power plants. It also develops solutions for instrumentation and control systems for all types of power plants and for use in power generation. These solutions include information technology solutions providing management applications from the plant to the enterprise level. The Division is also working on developing and producing commercial systems based on emerging technologies such as integrated gasification, coal liquefaction, and carbon capture and storage. Due to the broad range of the Division's offerings, the revenue mix may vary from reporting period to reporting period depending on the share of revenue attributable to products, solutions and services and the revenue's regional distribution in the respective periods. As mentioned above, as of fiscal 2014, the Fossil Power Generation Division was combined with the Oil & Gas Division to form the Power Generation Division.

The **Wind Power** Division manufactures wind turbines for onshore and offshore applications, including both geared turbines and direct drive machines. The product portfolio is based on four product platforms, two for each of the onshore and offshore applications. The onshore products have power ratings between 2.3 to 3.0 megawatts and rotor diameters ranging from 93 to 113 meters. The power rating for offshore products ranges from 3.6 to 6.0 megawatts, with rotor diameters ranging from 107 to 154 meters. The revenue mix of the Division may vary from reporting period to reporting period depending on the project mix between onshore and offshore projects in any given period. A significant part of the Division's business activities take place offshore and in countries in the northern hemisphere. Therefore, its production and sales figures are typically higher during the hemisphere's spring and summer months, when weather conditions facilitate the installation of wind turbines.

The **Oil & Gas** Division has a comprehensive portfolio of highly efficient rotating machinery (gas turbines, steam turbines, compressors with associated equipment) and electrical, instrumentation and telecommunication (EIT) solutions. This portfolio is the basis of our offerings to all our markets, predominantly the oil and gas industry, process industry and industrial power generation industry, for applications ranging from cogeneration to offshore production, water treatment and subsea processing. As mentioned above, as of fiscal 2014, the Oil & Gas Division was combined with the Fossil Power Generation Division to form the Power Generation Division.

The **Power Transmission** Division provides customers with turnkey power transmission solutions as well as discrete products, systems and related engineering and services. It covers high-voltage transmission solutions,

Table of Contents

power and distribution transformers, high-voltage switching and non-switching products and systems, and innovative alternating and direct current transmission systems. The Division supplies energy utilities and large industrial power users with equipment, systems and services used to process and transmit electrical power from the source, such as power plants and onshore and offshore wind farms, to various points along the power transmission network. The Division is working with joint ventures in China involving different partners and has a joint venture with Infineon Technologies in Germany for the design, manufacture and sale of high-performance semiconductors.

The **Energy Service** Division offers comprehensive services for products, solutions and technologies, covering performance enhancements, maintenance services, customer trainings and consulting services for the Divisions Fossil Power Generation, Wind Power and Oil & Gas. Financial results relating to the Energy Service Division are included in these Divisions.

The Energy Sector distributes its products and services through its own dedicated sales force, supported by Siemens worldwide network of regional companies. Additional sales channels include joint ventures and licensing partners, especially in markets requiring a high degree of local knowledge.

The Sector's principal customers are large power utilities, independent power producers, and industrial companies, particularly in the oil and gas industry. Because certain significant areas of the Sector's business, such as power plant construction, involve working on medium- to long-term projects for customers who may not require the Sector's services again in the short term, the Sector's most significant customers tend to vary significantly from year to year.

The **Fossil Power Generation** Division competes in all regions of the global fossil energy markets with demand in Europe and in the U.S. driven mainly by the need to replace aged existing inefficient and inflexible power plants, while demand in emerging countries is driven by capacity additions required as a result of economic growth.

The **Wind Power** Division is active in both the onshore and the offshore market segments around the world, and has maintained a leading position in the global offshore market for several years. The Division focuses on markets where it can entertain a profitable business, such as the U.S., the U.K. and Scandinavia, although debates over subsidy schemes in these countries are causing some uncertainty and ultimately are expected to lead to increased price pressure. Selected emerging-market countries are increasing their focus on wind energy as a way to increase resource independence, thus offering a sound business perspective.

Oil and gas, addressed by our **Oil & Gas** Division, continue to play a vital role in the world's energy supply due to the increasing demand for energy. Oil has very little spare global production capacity and, even in a weak global economy, demand still outstrips supply. On a regional level, growth in the oil and gas market is mainly driven by the U.S., the Middle East, Russia, Brazil, and Africa. To keep up with increasing demand and the depletion of existing reservoirs, the oil and gas industry is going deeper offshore and exploring unconventional resources and state-of-the-art enhanced oil and gas recovery techniques such as subsea processing. In addition, stricter environmental regulations to reduce waste and emissions are putting pressure on the oil and gas industry to improve energy efficiency, creating opportunities for a leading solution and technology provider like Siemens.

The main drivers in the markets addressed by the **Power Transmission** Division are expanding infrastructure in emerging countries, equipment replacement and modernization in mature economies, and integration of renewable energies. The most important geographical markets are emerging countries including Brazil, China, and India, and mature markets with a significant potential for modernization and new installation such as the U.S.

The Energy Sector's business activities vary widely in size, from selling components and performing comparatively small projects up to major turnkey contracts, such as for the construction of a new power plant. The large size of some

of the Sector's projects occasionally exposes it to risks related to technical performance, a customer or a country. The Sector has experienced, and may continue to experience, significant losses on individual projects in connection with such risks. For additional information about our long-term contracts, see Item 3: Key information Risk factors. Moreover, the Sector generates an increasing portion of its revenue from oil and gas and industrial customers in emerging markets. While emerging markets represent a growth market for

Table of Contents

power generation, transmission products and systems, the Sector's activities in these markets expose it to risks associated with economic, financial and political disruptions. These factors could result in lower demand or affect customers' abilities to pay.

While the Sector historically competed primarily with large industrial companies from industrialized countries, emerging-market competitors have become more and more important, as they are increasingly expanding their operations beyond the borders of their home markets. The Sector's competitors vary by Division.

The Fossil Power Generation Division's competition consists of a relatively small number of equipment manufacturers, some with very strong positions in their domestic markets, as well as a large number of engineering, procurement and construction contractors. Its principal competitors in gas turbines are Alstom, General Electric and Mitsubishi Heavy Industries, whereas its main competitors in steam turbines are Alstom, Bharat Heavy Electricals Limited, General Electric and Toshiba. In China, manufacturers have historically been mainly focused on their large home market, but they have begun to evolve from local to international suppliers. Korean engineering and procurement companies offer a large range of products and solutions, and position themselves as one-stop-shops that offer customer solutions from a single supplier. In instrumentation and controls, ABB and Emerson Electric are the Division's principal competitors.

The principal competitors in the onshore market served by the Wind Power Division are Enercon, Gamesa, General Electric, Goldwind, REpower and Vestas. In the offshore market the principal competitors are Alstom, Areva and REpower. Furthermore, Vestas and Mitsubishi Heavy Industries have announced that they are going to combine their individual capabilities to also enter this market segment. The competitive situation differs between the market segments. In the market for onshore wind farms, competition is widely dispersed without any one company holding a dominant share of the market. In contrast, there are only a few major players in the market for technologically more complex offshore wind farms. Overall, the wind power industry suffers from overcapacity and is widely regarded as being in an early stage of consolidation.

The principal competitors of the Oil & Gas Division vary by product; in automation and electrical equipment, they are ABB and Honeywell above all, whereas in compressors and steam and gas turbines, they are Dresser Rand, General Electric, MAN Diesel & Turbo and Solar Turbines. Overall, competition in the markets served by the Oil & Gas Division is characterized by a relatively small number of companies, some with a very strong position in the broader market and some with a regional focus, playing key roles.

The primary competitors of the Power Transmission Division are ABB with its Power Products and Power Systems divisions and the Grid division of Alstom. A few notable manufacturers such as Toshiba, China XD Group or Crompton Greaves in certain regions and niche specialists (e.g., TBEA) represent another group of competitors. International competition is increasing from manufacturers in emerging countries such as China, India and Korea.

HEALTHCARE

The **Healthcare** Sector offers customers a comprehensive portfolio of medical solutions across the treatment chain ranging from medical imaging to in-vitro diagnostics to interventional systems and clinical information technology systems all from a single source. In addition, the Sector provides technical maintenance, professional and consulting services, and, together with SFS, financing to assist customers in purchasing the Sector's products.

The following table provides key financial data for the Healthcare Sector.

	Year ended September 30, 2013
Total revenue	13.621 billion
External revenue	13.598 billion
External revenue as percentage of Siemens revenue	17.92%
Sector profit	2.048 billion

Table of Contents

The following chart provides a geographic breakdown of the Healthcare Sector's external revenue in fiscal 2013.

The Healthcare Sector includes four Divisions: Imaging & Therapy Systems, Clinical Products, Diagnostics and Customer Solutions. The Sector also includes one sector-led Business Unit, Audiology Solutions. In addition to its Sector-level financial results, Healthcare also separately breaks out financial results for the Diagnostics Division.

The **Imaging & Therapy Systems** Division provides large-scale medical devices for diagnostic imaging and for image-guided therapies. Imaging equipment includes computed tomographs, magnetic resonance imaging equipment, angiography systems for diagnostics, and positron emission tomography. Siemens is the market leader in these fields. Image-guided therapies mainly comprise angiography systems for minimally invasive procedures and computed tomographs in radiation therapy planning. By increasing the synergy between imaging equipment and therapy solutions, the Division aims to help healthcare providers achieve better results with more efficient processes.

The **Clinical Products** Division mainly comprises the business with ultrasound and X-ray equipment including mammography. In addition to providing innovative high-end solutions, the Clinical Products Division focuses on the development of cost-efficient, less complex equipment that meets essential customer requirements, particularly in emerging economies. The Clinical Products Division also comprises the internal supplier Components and Vacuum Technology which also provides components to the Imaging & Therapy Systems Division.

The **Diagnostics** Division offers products and services in the area of in-vitro diagnostics. In-vitro diagnostics is based on the analysis of bodily fluids such as blood or urine, and supplies vital information for detecting and managing disease and conducting patient risk assessments. The Division's product portfolio represents a comprehensive range of diagnostic testing systems and consumables, including offerings for clinical chemistry and immunodiagnostics, molecular diagnostics (i.e., testing for nucleic acids), hematology, hemostasis, microbiology, point-of-care testing and clinical laboratory automation solutions.

The **Customer Solutions** Division provides healthcare information technology (HIT) systems. It is responsible for the Sector's service business and customer relationship management on a global level. HIT supports users in connection with their tasks in the clinical, administrative and financial workflow to support efficient, safe and quality patient care delivery. The portfolio is comprised of integrated financial and clinical systems, electronic health record and health information exchange as well as an expanding offering of systems optimization services. The service business is intended to leverage the Sector's installed base of imaging and diagnostics systems worldwide. In particular, the Division's experience in remote and proactive services, innovative service and educational offerings, and logistics processes is intended to differentiate it from competition and drive process efficiency. The Division also manages the global sales force of the Sector and defines the regional go-to-market approach to support a diverse customer base with solutions for patient care.

The sector-led Business Unit, **Audiology Solutions**, provides hearing aids.

The customers of the Healthcare Sector include healthcare providers such as hospital groups and individual hospitals, group and individual medical practices, reference and physician office laboratories, and outpatient clinics. The Sector sells the majority of its products and services through its in-house sales staff, which is grouped in its Customer Solutions Division, supported by dedicated product specialists. In some countries, the Sector also uses dealers, particularly for the sale of low-end products (such as low-end ultrasound and X-ray equipment). The Sector's products are serviced primarily by its own dedicated personnel.

Table of Contents

Because a large part of Healthcare's revenue stems from recurring business, the Sector's business activities are to a certain extent resilient to short-term economic trends but are dependent on regulatory and policy developments around the world.

Under regulations passed as part of the U.S. Affordable Care Act, which became effective at the beginning of calendar year 2013, the U.S. medical technology industry is subject to an excise tax on certain medical devices. Currently, this tax impacts our diagnostics and imaging businesses.

In fiscal 2013, the Healthcare Sector continued implementing Agenda 2013, a global initiative launched in fiscal 2012 to increase its innovative capacity and competitiveness. Agenda 2013 is the Sector's proactive response to the challenges emerging from a changing market environment. To meet these challenges, Agenda 2013 provides for measures targeting innovation, regional presence, competitiveness, and human resource development. These measures include focused investments in product development and expanded sales activities in growth markets. Agenda 2013 also encompasses a realignment of the radiation therapy business unit and a related research and development and sales cooperation with Varian Medical Systems. In addition, Agenda 2013 includes a program to improve the cost position in the Diagnostics Division. For further information, see Item 5: Operating and financial review and prospects Fiscal 2013 compared to fiscal 2012 Segment information analysis Healthcare.

The Healthcare Sector has cooperation agreements with various companies, including Bruker, Toshiba, Hitachi, KuKa, Volcano, Thales, Philips, Biosense Webster, Esaote, ViiV Healthcare, Tocagen, Sysmex and Thermo Fisher Scientific.

The Healthcare Sector's principal competitors in medical imaging are General Electric, Philips, Toshiba, Hitachi and Hologic. Other competitors include Roche, Abbott, Danaher, Alere, bioMérieux and Sysmex for in-vitro diagnostics, McKesson, Cerner and Allscript for healthcare information technology systems and Sonova, GN Resound and William Demant for audiology (hearing aids). The trend toward consolidation in the Sector's industry continues. Competition among the leading companies in the field is strong, including with respect to price.

INDUSTRY

The **Industry** Sector offers a broad spectrum of products, services and solutions that help customers use resources and energy more efficiently, improve productivity, and increase flexibility. The Sector's integrated technologies and holistic solutions primarily address industrial customers, particularly those in the process and manufacturing industries. The portfolio spans industry automation, industrial software, drive products and services, system integration, and solutions for industrial plant businesses. The Sector has further strengthened its industrial software business with the acquisition of LMS International NV (LMS), which was completed in fiscal 2013.

The following table provides key financial data for the Industry Sector.

	Year ended September 30, 2013
Total revenue	18.586 billion
External revenue	16.943 billion
External revenue as percentage of Siemens revenue	22.33%
Sector profit	1.478 billion

Table of Contents

The following chart provides a geographic breakdown of the Industry Sector's external revenue in fiscal 2013.

The Industry Sector consists of three Divisions: Industry Automation, Drive Technologies and Customer Services. The Sector also includes a sector-led Business Unit, Metals Technologies. In addition to its Sector-level financial results, Industry also breaks out financial results for the Industry Automation Division and the Drive Technologies Division. Financial results relating to the Customer Services Division are included in results for Industry Automation, Drive Technologies and Metals Technologies. In the first quarter of fiscal 2013, the Sector announced its plan to dispose of its business of mechanical, biological and chemical water treatment and processing. During the fourth quarter of fiscal 2013, this business fulfilled the requirements to be reported as discontinued operations. Results for prior periods are reported on a comparable basis. In November 2013, Siemens announced the sale of this business. The transaction is subject to regulatory approval.

The **Industry Automation** Division offers a range of standard products and system solutions for automation technologies used in the manufacturing and process industries. As one of the leading providers of industry software, the Division can help manufacturing companies optimize their entire value chain: from product design and development, through production, to sales and service. The Division's offerings include automation systems and software, motor controls, machine-to-machine communication products, sensors, product and production lifecycle management products, and software for simulating and testing mechatronic systems. In fiscal 2013, the Division acquired LMS, a provider of mechatronic simulation software that expands and complements the Division's product lifecycle management portfolio. As noted above, the divestment of the mechanical, biological and chemical water treatment and processing business was decided in fiscal 2013 and this business is reported as discontinued operations for all periods covered in this annual report. The sale of this business, which is subject to regulatory approval, was announced in November 2013.

The **Drive Technologies** Division offers products and comprehensive systems across the entire drive train. These offerings are customized to the respective application and include numerical control systems, inverters, converters, motors (geared and gearless), drives and couplings. In addition, Drive Technologies supplies integrated automation systems for machine tools and production machines. The Division also offers integrated lifecycle solutions and services for industries such as shipbuilding, cement, mining, and pulp and paper. With its e-Car business, the Division develops motors and inverters for electric cars.

The **Customer Services** Division offers a comprehensive portfolio of services and supports industrial customers in their efforts to increase their productivity. The portfolio includes product-related services and software solutions like condition monitoring designed to enhance the reliability, profitability, efficiency and environmental performance of industrial plants.

The Sector-led **Metals Technologies** Business Unit offers engineering and plant-building services for the iron and steel industry, and for the rolling sector of the aluminum and non-ferrous industries. The Business Unit provides technologies, solutions, and services for metallurgical plants, integrated steelworks and minimills. Its vertically integrated supply capability includes mechanical equipment, drives, motors, electrics, automation, mechatronics, technological packages and environmental systems.

The Industry Sector's principal customers are industrial customers in a broad range of markets, including transportation and logistics, metals and mining, machinery, utilities and automotive. The Sector is active worldwide, including in emerging markets, especially those in the Asia, Australia region, which Sector

Table of Contents

management believes to have long-term growth potential. Apart from the Siemens brand, the Sector markets some parts of its portfolio under different brand names (such as Flender for gears or Winergy for wind turbine components) depending on geography and technology.

The Sector sells its products primarily through dedicated personnel in Siemens' worldwide network of regional sales units. In addition, it uses original equipment manufacturers, solution providers, installers, general contractors, third-party distributors and independent agents.

The Sector has manufacturing locations worldwide, especially throughout North and South America, Western and Eastern Europe, and Asia, allowing it to stay close to its major customers. In recent years, material costs have been subject to significant price volatility for metals, energy and other raw materials. The Sector continues to work on reducing the use of hazardous materials (e.g., lead) and to replace them in its products and processes. Sustainable products and processes, such as coking coal free iron production processes (COREX), energy efficient motors and energy management play a major role in its innovation strategy.

Product lifetimes in the Sector's product businesses typically range from three to twenty years from introduction. Lifecycles tend to be shorter for products in which software and electronics play an important role. The lifecycles in the solutions businesses tend to be longer, as the Sector supports its customers with significant services through the whole life of their investment. The Industry Sector can be strongly affected by economic cycles, because markets for some of its business activities tend to react very quickly to changes in the overall economic environment. This pattern includes many of the business activities of the Industry Automation Division and those business activities of the Drive Technologies Division that serve customers in the manufacturing industries. The markets for other business activities within the Sector generally show a more delayed response to changes in the overall economic environment. This pattern includes those business activities of the Drive Technologies Division that serve customers in process industries, the energy and the infrastructure sector and activities of the Metals Technologies Business Unit.

Competitors of the Industry Sector can be grouped into two categories: multinational companies that offer a relatively broad portfolio, and companies that are active only in certain of the geographic or product markets served by the Industry Sector. The Sector's principal competitors with broad portfolios are multinational companies such as ABB, Emerson Electric, Schneider Electric and Rockwell. In the industries in which the Sector is active, consolidation is occurring on several levels. In particular, suppliers of automation solutions have supplemented their activities with actuator or sensor technology, while suppliers of components and products have supplemented their portfolio with complementary products for their sales channels.

The main competitors of the **Industry Automation** Division are ABB, Schneider Electric, Rockwell and Emerson Electric. Within its product lifecycle management business, the Division also competes with, among others, Dassault Systèmes and PTC. Competitors of the **Drive Technologies** Division include companies with broad business portfolios such as ABB, Emerson Electric and Mitsubishi Electric but also specialist companies such as Fanuc, Yaskawa, WEG and SEW. The main competitors of the **Metals Technologies** Business Unit are Danieli and SMS.

Asian competitors are generally focused on large-scale production and cost-cutting. European and U.S. competitors are typically focused on high-quality lifecycle service. Nevertheless, most major competitors have established global bases for their businesses. In addition, competition in the field has become increasingly focused on technological improvements and price. Intense competition, customer budget constraints and rapid technical progress within the industry continue to cause significant downward pressure on prices. In addition, competitors continue to shift their production to low-cost countries.

INFRASTRUCTURE & CITIES

The **Infrastructure & Cities** Sector offers a wide range of technologies for increasing the sustainability of metropolitan centers and urban infrastructures worldwide, such as integrated mobility solutions, building and security systems, power distribution equipment, smart grid applications and low and medium-voltage products. While the Sector has decided to divest its airport logistics and postal automation business, it has acquired the rail automation business of Invensys Invensys to expand and complement its rail automation business.

Table of Contents

The following table provides key financial data for the Infrastructure & Cities Sector:

	Year ended September 30, 2013
Total revenue	17.879 billion
External revenue	17.128 billion
External revenue as percentage of Siemens revenue	22.57%
Sector profit	306 million

The following chart provides a geographic breakdown of the Infrastructure & Cities Sector's external revenue in fiscal 2013.

The Sector consists of five Divisions: Rail Systems; Mobility and Logistics; Low and Medium Voltage; Smart Grid; and Building Technologies. Financial results of the Rail Systems and the Mobility and Logistics Divisions are combined and reported together as the results of the Sector's Transportation & Logistics Business. Financial results of the Divisions Low and Medium Voltage and Smart Grid are combined and reported together as the Sector's Power Grid Solutions & Products Business.

The **Rail Systems** Division comprises Siemens' rail vehicle business, encompassing the entire spectrum of rolling stock including high-speed trains, commuter trains, passenger coaches, metros, people movers, light rail vehicles, locomotives, bogies, traction systems and rail-related services. The Division combines its expertise in the fields of mass transit, regional and long-distance transportation, driverless systems, traction systems, bogies and onboard power supplies in order to offer comprehensive know-how for sustainable, efficient and reliable rail vehicles.

The **Mobility and Logistics** Division primarily provides products, solutions (including IT solutions) and services for rail transportation operating systems, such as central control systems, interlockings and automated controls. The Division also provides offerings for road traffic, including traffic detection, information and guidance systems. In fiscal 2013, the Division announced its plans to divest its airport logistics business for cargo tracking and baggage handling and its postal automation business for letter and parcel sorting. In fiscal 2013, the Division acquired the rail automation business of Invensys, which has a leading position as provider of signal services and rail control and communication solutions.

The **Low and Medium Voltage** Division supplies electrical grid operators, large industrial electricity consumers and construction markets with medium and low-voltage electrical power equipment. Furthermore, the Division provides products, systems and services for distributing electrical power from high-voltage transmission grid access to medium or low-voltage grids and for directing electrical power to end consumers and their access points. Medium voltage equipment includes distribution switchgear, control gear, circuit breakers and components for distributing and switching of electrical power coming from the high voltage transmission grid to the medium voltage distribution grid and within the medium voltage grid itself. The low voltage portfolio consists of power distribution boards, busbar trunking systems, distribution boards and terminal blocks, as well as products for protecting, switching, measuring and monitoring devices and socket outlets.

The **Smart Grid** Division provides energy automation solutions, smart grid applications, transmission and distribution services and rail infrastructure electrification solutions for mainline and mass transit applications. In addition, the

Division offers meter data management solutions and services relating to the planning of electric network grids and the operation and maintenance of transmission and distribution products, systems and solutions.

Table of Contents

The **Building Technologies** Division offers products, services and solutions for commercial, industrial, public and residential buildings. Primary applications include building operation and automation, comfort, safety and security. In addition, the Division offers energy solutions and energy management services aimed at improving a building's energy cost, reliability, comfort and performance, while minimizing its impact on the environment. The Division's offerings include heating and ventilation controls, security systems and devices for intruder detection, video surveillance and building access control, total room automation systems, and fire safety solutions for fire detection, protection alarms and non-water-based fire extinguishing.

Until the end of fiscal 2013, the Infrastructure & Cities Sector also held the Atos shares, which Siemens received following the sale of Siemens IT Solutions and Services to AtoS. Due to a change in management responsibility related to Siemens' shares in AtoS, the shares have been included within Equity Investments since the beginning of fiscal 2014.

The Infrastructure & Cities Sector distributes its products and services through its own dedicated sales force, supported by Siemens' worldwide network of regional companies. In addition, the Divisions of the Sector use, to varying degrees, third-party distributors, panel builders, original equipment manufacturers, value added partners, installers and general contractors.

Overall, the Sector's principal customers are industrial, infrastructure and public customers in a broad range of markets, including construction and real estate, transportation and logistics and utilities. The timing and extent to which a Division of the Infrastructure & Cities Sector is affected by economic cycles depends largely on the kind of business activities it conducts. Business activities that tend to react very quickly to changes in the overall economic environment include those in the Low and Medium Voltage Division. Business activities that are generally affected later by changes in the overall economic environment include those in the Smart Grid and Building Technologies Divisions. The development of markets served by our Divisions Rail Systems, Mobility and Logistics and parts of Smart Grid is driven primarily by public spending. Customers of these Divisions usually have multi-year planning and implementation horizons, and their contract tenders therefore tend to be independent of short-term economic trends.

The Sector is active worldwide, including in emerging markets, e.g., those in the Asia, Australia region. While the Sector believes that these markets offer significant growth potential, the Sector's activities in this region expose it to risks associated with economic, financial and political disruptions that could result in lower demand or affect customers' abilities to pay. The large size of some of the Sector's projects occasionally exposes it to risks relating to technical performance or specific customers, regulations or countries. In the past, the Sector has experienced significant losses on individual projects in connection with such risks, primarily at the Divisions Rail Systems and Mobility and Logistics. For additional information on these risks, see Item 3: Key information Risk factors.

The Sector's principal competitors are multinational companies such as ABB, Alstom, Ansaldo, Bombardier, General Electric, Honeywell, Johnson Controls, Schneider Electric and Tyco. The Sector's competitors vary by Division. The main competitors of the Rail Systems Division and the Mobility and Logistics Division are Alstom, Ansaldo STS, Bombardier and General Electric. The primary competitors of the Low and Medium Voltage Division are ABB, Eaton and Schneider Electric. The principal competitors of the Smart Grid Division are ABB, Alstom, General Electric and Schneider Electric. The main competitors of the Building Technologies Division are Honeywell, Johnson Controls, Schneider Electric and Tyco. Infrastructure & Cities also faces competition from niche competitors and from new entrants, such as utility companies and consulting firms, exploiting the fragmented energy efficiency market. The Sector's solution businesses also compete with engineering, procurement and construction providers, and competitors in the service field often include small local players.

EQUITY INVESTMENTS

In general, the segment **Equity Investments** comprises equity stakes held by Siemens that are either accounted for by the equity method, at cost or as current available-for-sale financial assets and for strategic reasons are not allocated to a Sector, SFS, Centrally managed portfolio activities, SRE, Corporate items or Corporate Treasury.

Table of Contents

The main investments within Equity Investments are:

A 50% stake in **BSH Bosch und Siemens Hausgeräte GmbH (BSH)**, Germany: BSH is a leading manufacturer of household appliances, offering an extensive range of innovative products tailored to customer needs and global megatrends alike. BSH was founded in 1967 as a joint venture between Robert Bosch GmbH, Germany and Siemens.

A 17% stake in **OSRAM Licht AG (OSRAM)**, Germany: OSRAM, formerly wholly owned by Siemens, is a leading lighting manufacturer. Its portfolio covers the entire value chain from components to electronic control gears as well as complete luminaires, light management systems and lighting solutions. Effective July 5, 2013, Siemens spun off OSRAM. The spin-off was made on the basis of the Spin-Off and Transfer Agreement dated November 28, 2012, authorized by the Annual Shareholders Meeting of Siemens AG on January 23, 2013. With the spin-off, Siemens shareholders received one OSRAM share per ten Siemens AG shares. A total of 80.5% of the OSRAM shares became widely held shares. Following the spin-off, a further 2.5% of the shares were transferred to the Siemens Pension Trust e.V. For further information, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 4.

A 49% stake in **Enterprise Networks Holdings B.V. (EN)**, Netherlands: EN is a provider of open communications, network and security solutions to enterprise customers, founded in fiscal 2008 as a joint venture between The Gores Group, U.S. and Siemens.

In the fourth quarter of fiscal 2013, Siemens closed the sale of its 50% stake in **Nokia Siemens Networks Holding B.V. (NSN)**, a leading supplier in the telecommunications infrastructure industry, to the other shareholder, Nokia Corporation.

Due to a change in management responsibility related to Siemens shares in AtoS, the shares, which were held by the Infrastructure & Cities Sector until the end of fiscal 2013, are included within Equity Investments effective with the beginning of fiscal 2014.

For additional information on investments held in Equity Investments and the sale of our share in NSN, see Item 5: Operating and financial review and prospects Fiscal 2013 compared to fiscal 2012 Segment information analysis Equity Investments, Item 7: Major shareholders and related party transactions Related party transactions, as well as Item 18: Financial Statements Notes to Consolidated Financial Statements Note 4.

FINANCIAL SERVICES (SFS)

Financial Services provides a variety of financial services and products to other Siemens units and their customers and to third parties. SFS has three strategic pillars: supporting Siemens units with finance solutions for their customers, managing financial risks of Siemens and offering third-party finance services and products. Financial Services intends to grow its business in a profitable, controlled manner.

The following table provides key financial data for SFS:

**Year ended
September 30, 2013**

Total assets	18.661 billion
Total assets as percentage of Siemens assets	18.31%
Income before income taxes	409 million

SFS business can be divided into capital business and fee business. While **capital business** predominantly relates to financial assets on SFS statements of financial position generating income from customers of Siemens Sectors and other third parties, **fee business** mainly comprises internal services provided to Siemens. SFS conducts its business through seven Business Units, one Business Segment (Venture Capital) and two functions: Corporate Pensions and Trade Finance Advisory.

Table of Contents

The **Commercial Finance** Business Unit offers a comprehensive range of solutions for equipment financing, leasing, rental and related financing for equipment supplied by Siemens or third-party providers.

The **Project & Structured Finance Energy; Project, Structured & Leverage Finance Healthcare** and **Project & Structured Finance Infrastructure and Cities & Industry** Business Units offer a broad range of project & structured financing solutions. Their offerings comprise debt financing, equity participations and financial advisory services. In addition, the Project, Structured & Leveraged Finance Healthcare Business Unit offers leveraged solutions across all Siemens businesses.

These four Business Units each have a global mandate. The focus of their activities is directly or indirectly related to Siemens Sectors' businesses, predominantly in the energy, healthcare, industry and infrastructure markets. Their customers comprise Siemens Sector customers as well as third-party vendors. The Business Units serve customers of all sizes including small- and medium-sized enterprises, corporations and public sector organizations.

The **Venture Capital** Business Segment's main task, together with Siemens Sectors, is to identify and finance young companies worldwide during their start-up phase, thereby helping Siemens Sectors to access new technological solutions and tap new markets.

The **Treasury** Business Unit operates the global Corporate Treasury of the Siemens Group, with SFS employees thereby managing liquidity, cash and financial risks (interest, foreign exchange, commodities) on behalf of Corporate Treasury.

The **Financing & Investment Management** Business Unit manages fee-based receivables and offers investment management services. SFS operates the Credit Warehouse, i.e., it is engaged in the process of monitoring and warehousing short-term trade receivables originated by the operating units and partially transferred to Corporate Treasury. The investment management services focus on pension asset management for Siemens as well as selected external clients.

The **Insurance** Business Unit acts primarily as an insurance broker for Siemens and external customers. The Business Unit supports Siemens and non-affiliated companies in all insurance-related matters such as claims management as well as risk transfer to insurance and financial markets, including structured solutions using own re-insurance capacities. It also acts as broker of selected Siemens-financed insurance policies for employees.

SFS' products and services are provided through a network of companies, located throughout Europe (including Russia), Asia Pacific (including China and India) and North America, comprising non-regulated, partially or fully regulated entities, such as Siemens Bank GmbH. Siemens Bank GmbH's banking license, which was granted by the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin), covers engaging in loan and guarantee business as well as in deposit taking and enables access to the deposit and refinancing facilities of the Deutsche Bundesbank. In its transactions with Siemens and third parties, SFS observes international banking industry standards, where applicable.

SFS' main sources of risk are associated with its external credit exposure and its equity portfolio. For further information, see Item 3: Key information Risk factors.

SFS' competition mainly includes commercial finance operations of banks, independent commercial finance companies, captive finance companies and asset management companies. International competitors include BNP Paribas Equipment Finance, De Lage Landen, General Electric Commercial Finance, Macquarie, Société Générale Equipment Finance and Sumitomo Mitsui Financial Group. Particularly in the commercial finance business, SFS

competitors are often local financial institutions and competition therefore varies from country to country.

ITRSHRA DISCLOSURE

The Iran Threat Reduction and Syria Human Rights Act of 2012

The Iran Threat Reduction and Syria Human Rights Act of 2012 (ITRSHRA) added a new Section 13(r) to the Securities Exchange Act of 1934 that requires Siemens to disclose in this report whether it or any of its

Table of Contents

affiliates engaged during fiscal 2013 in certain Iran-related activities. ITRSHRA requires Siemens to disclose these Iran-related activities even if they were permissible under US law or engaged in by a non-US affiliate of Siemens in accordance with applicable local law.

Siemens Export Control Guidelines

Siemens actively employs systems and procedures designed to ensure Siemens' compliance with ITRSHRA and other economic sanctions and export control programs, which are set out in Siemens' Export Control and Customs Guidelines (the "Export Control Guidelines"). The Export Control Guidelines reflect the requirements of U.S., German and European Union economic sanctions and export control regulations, and also include additional internal restrictions. For example, under the Export Control Guidelines, neither Siemens nor any of its affiliates is permitted to conduct any business with any entity listed on the Office of Foreign Assets Control's Specially Designated Nationals (SDN) List and designated with the codes "SDGT" or "NPWMD". Siemens automatically electronically screens all actual and potential business partners, and if any partner fails the initial screening, all transactions with that partner are automatically blocked and can only be released by a Siemens export control officer if it is ultimately determined that the partner should not have failed the screening.

Siemens Iran Activities

As a globally-operating organization, Siemens also has limited business with customers in Iran. Siemens' activities in Iran have been insignificant relative to its size (in the aggregate substantially less than 1% of its gross revenue and net profit in fiscal 2013).

Siemens intends to continue the process of withdrawing from its remaining business in Iran. As part of this process, certain of the remaining Iran-related activities of Siemens described below are coordinated through Siemens SSK, an affiliate of Siemens AG, that has an office in Tehran, Iran. While Siemens SSK was not engaged in Iran-related activities during fiscal 2013 that have to be reported under the ITRSHRA, Siemens SSK paid taxes, utilities, and other fees owed to Iranian government agencies in the ordinary course of business.

The information below is to the best of Siemens' knowledge, and Siemens is not aware of any potentially reportable sales by third-party-owned distributors of Siemens-provided products other than as set forth for transactions in the Healthcare Sector below.

In fiscal 2012 the effects of the sanctions imposed on Iran triggered a change in accounting estimate. Due to this change the fiscal 2013 net profit figures reported under the individual contracts described below are not representative of these contracts' overall profitability. For more information on the accounting for these contracts, see Item 5: Operating and financial review and prospects Fiscal 2012 compared to fiscal 2011 Adjustments for long-term contracts with customers in Iran.

INFRASTRUCTURE AND CITIES

In November 2012, Siemens S.A.S., a French affiliate of Siemens AG, pursuant to a prior framework agreement with a French company (the "Customer"), repaired an Iran Air smoke detector that it had sold to the Customer, which was subsequently resold by the Customer to Iran Air. In fiscal 2013, gross revenue attributable to the repair was approximately 2,200, and net profit was approximately 1,500.

In fiscal 2013, Siemens AG delivered 23 diesel electric locomotives to Iran Power Plant Projects Management Co., a private Iranian company, for resale to the Islamic Republic of Iran Railways, the official railway of the Government of

Iran. In fiscal 2013, gross revenue attributable to this activity was approximately 41,282,000. Revenue for this activity has been recognized only to the extent of contract costs incurred. Therefore a net profit of 0 was realized in fiscal 2013 for this activity.

Table of Contents

ENERGY

In fiscal 2013, Siemens AG delivered two oil units and three control panels to Hampa Engineering Co., a private Iranian company, for onsale to Lordegan Urea Fertilizer Co., also a private Iranian company. In fiscal 2013, gross revenue attributable to this activity was approximately 937,000, and net profit was approximately 722,000.

In fiscal 2013, Siemens AG delivered one synthesis gas train to Kaveh Methanol Co., a private Iranian company. In fiscal 2013, gross revenue attributable to this activity was approximately 15,293,000. During fiscal 2013 we received payments from the customer which, due to the change in accounting estimate referred to above, resulted in a disproportionately high net profit of approximately 13,740,000.

HEALTHCARE

In fiscal 2013, Siemens AG, either directly or through its affiliates, delivered certain medical equipment, including an ultrasound device, CT scanners, an MRI and related accessories and x-ray systems and related accessories, and provided related spare parts and maintenance services, hearing aids and diagnostic reagents, in certain cases through private Iranian or non-Iranian distribution partners, to end customers that included certain Iranian state hospitals, universities and other state-funded health organizations and centers.

In the aggregate for fiscal 2013, gross revenue and net profit attributable to these Iran-related activities in the Healthcare sector were approximately 7,535,800 and 573,490, respectively.

Fiscal 2014 and Beyond

As previously disclosed, Siemens has decided that, subject to certain limited exceptions and in compliance with applicable law, it will not enter into new contracts with customers in Iran and has issued group-wide policies establishing the details of its general decision. In the beginning of calendar year 2012, Siemens resolved to amend its already existing policies to provide that no new business with respect to products and services destined to maintain the installed base in Iran's energy sector (e.g. deliveries of spare parts, maintenance and assembly services) may be entered into under any circumstances. In addition, outside the energy sector, products and services for the installed base in Iran may be provided only in strictly limited circumstances when the proposed sale can be demonstrated to serve humanitarian purposes and the public welfare. Consistent with these policies and with respect to the activities described above, Siemens intends to continue the process of withdrawing from its remaining business in Iran, including by not entering into new business with Iran or providing products or services to maintain the installed base of Siemens-provided products in Iran, except as required by contractual obligations or for humanitarian or public welfare reasons, such as supplying life-saving medical equipment or critical spare parts for public services installations, provided such sales continue to be permissible under applicable export control and economic sanctions laws and regulations.

For additional information, see Item 3: Key Information Risk factors.

Table of Contents**EMPLOYEES AND LABOR RELATIONS**

The following tables show the division of our employees by segments and geographic region as of September 30 for each of the years shown. Part-time employees are included on a proportionate basis.

Employees by segments⁽¹⁾	As of September 30,		
	2013	2012	2011
	(in thousands)		
Energy	84	87	82
Healthcare	52	51	51

(1) Continuing operations.

(2) Includes employees in corporate functions and services and units not allocated to any Sector or Financial Services.

Employees by geographic regions⁽¹⁾	As of September 30,		
	2013	2012	2011
	(in thousands)		
Europe, C.I.S., Africa, Middle East	220	222	217
<i>therein Germany</i>	<i>118</i>	<i>119</i>	<i>116</i>
Americas	78	81	78
<i>therein U.S.</i>	<i>53</i>	<i>54</i>	<i>52</i>
Asia, Australia	64	63	59
<i>therein China</i>	<i>32</i>	<i>30</i>	<i>29</i>
Total	362	366	355

(1) Continuing operations.

During 2013, we had an average of 38,000 temporary employees in our continuing and discontinued operations.

A significant percentage of our manufacturing employees, especially in Germany, are covered by collective bargaining agreements determining working hours and other conditions of employment, and are represented by works councils. Works councils have numerous rights to notification and of codetermination in personnel, social and

economic matters. Under the German Works Constitution Act (*Betriebsverfassungsgesetz*), works councils are required to be notified in advance of any proposed employee termination, they must confirm hiring and relocations and similar matters, and they have a right to codetermine social matters such as work schedules and rules of conduct. Management considers its relations with the works councils to be good.

During the last three years, we have not experienced any labor disputes that significantly affected our operations.

ENVIRONMENTAL MATTERS

In each of the jurisdictions in which we operate, Siemens is subject to national and local environmental and health and safety laws and regulations that affect our operations, facilities, products and, in particular, our former nuclear power generation business. These laws and regulations impose limitations on the discharge of pollutants into the air, soil and water and establish standards for the treatment, storage and disposal of solid and hazardous waste. Whenever necessary, remediation and clean up measures are implemented and budgeted accordingly. Because of our commitment to protecting and conserving the environment and because we recognize that

Table of Contents

leadership in environmental protection is an important competitive factor in the marketplace, we have incurred significant costs to comply with these laws and regulations and we expect to continue to incur significant compliance costs in the future.

In 1994, we closed a site in Hanau, Germany, which we had used for the production of uranium and mixed-oxide fuel elements. A smaller related site in Karlstein, where we operated a nuclear research and service center, was closed in 1989. We are in the process of cleaning up both facilities in accordance with the German Atomic Energy Act (*Atomgesetz*). We have developed a plan to decommission the facilities that involves the following steps: clean-out, decontamination and disassembly of equipment and installations, decontamination of the facilities and buildings, sorting of radioactive materials and intermediate and final storage of radioactive waste. This process will be supported by ongoing engineering studies and radioactive sampling under the supervision of German federal and state authorities. We expect that the process of decontamination, disassembly and final waste conditioning of radioactive waste will continue until 2018. We will be responsible for storing the material until the government-developed storage facility becomes available. With respect to the Hanau facility, the process of setting up intermediate storage for radioactive waste has neared completion and the facility has been released from the scope of application of the German Atomic Energy Act so that its further use is unrestricted under that Act. However, the State of Hessen still requires us to monitor the ground water until uranium levels consistently meet targets set by the State. The ultimate costs of this project will depend, in part, on where the government-developed storage facilities will be located and when they become available. We set up a provision with respect to this matter, which as of September 30, 2013 amounted to 1,096 million. This provision is based on a number of significant estimates and assumptions as to the ultimate costs of this project. Several parameters relating to the development of a final storage facility for radioactive waste were specified based on the so called Schacht Konrad final storage. Parameters related to the life-span of the German nuclear reactors reflect a planned phase-out until 2022. For additional information on our asset retirement obligations attributable to environmental clean-up costs, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 24.

Some of our products are subject to the Directive 2002/95/EC of the European Parliament and of the Council on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (the RoHS Directive). The RoHS Directive bans the use of certain hazardous substances in electrical and electronic equipment. We are in compliance with current requirements under the RoHS Directive.

In 2011 the EU Commission published Directive 2011/65/EU (the RoHS II Directive) which replaced the RoHS Directive and, after national transposition, will lead inter alia to changes in the future scope of the ban to encompass use of certain hazardous substances in electrical and electronic equipment (e.g., inclusion of medical equipment by July 2014) and the requirement for manufacturers to declare the conformity of products with the Directive. During the review process, the exemptions from the RoHS Directive were also amended. We are currently adapting our business processes to the relevant changes of the RoHS II Directive, taking into consideration the timeline defined in the RoHS II Directive.

The EU Commission's recent review of Directive 2002/96/EC on Waste Electrical and Electronic Equipment (the WEEE Directive) resulted in publication of new Directive 2012/19/EU (the new WEEE Directive). Within the next five years the scope of this new WEEE Directive will remain comparable to the existing WEEE Directive. After this period, additional requirements could result from the inclusion of photovoltaic panels into the scope of the new WEEE Directive. Due to the phase out of our solar business, we currently do not expect to incur substantial costs as a result of these additional requirements.

Restrictions on the use of certain substances comparable to those of the RoHS Directive and of the WEEE Directive remain under discussion in several other countries, such as the U.S., Australia, Argentina, Brazil, China and South

Korea.

We are also subject to the Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), which is entering into force in various steps over an approximate 15-year period that began in 2007. We have not incurred substantial costs to-date to comply with the REACH regulation. We plan to implement any additional measures which may be necessary for us to comply with possible future enhancements of this regulation.

Table of Contents

The experience of the last three years has shown that neither the Directive 2004/35/EC of the European Parliament and of the Council on Environmental Liability with Regard to the Prevention and Remediation of Environmental Damage nor the applicable remediation measures for damage to protected species and natural habitats, have had any impact on Siemens to-date. Nevertheless we continue to maintain insurance coverage for these risks, which is available in the market.

It is our policy to comply with environmental requirements and to provide workplaces for employees that are safe, environmentally sound, and that do not adversely affect the health or environment of their communities. Compliance with environmental requirements is also a focus of the environmental process reviews we conduct. In remediation of the results of recent environmental process reviews additional cost for the implementation and operation of R&D, production and modified logistic processes may be incurred in future periods. Taking such remediation measures into account, we believe that we are in substantial compliance with all relevant environmental and health and safety laws and regulations. However, there is a risk that we may incur expenditures significantly in excess of our expectations to cover environmental liabilities, to maintain compliance with current or future environmental and health and safety laws and regulations and/or to undertake any necessary remediation.

ENVIRONMENTAL PORTFOLIO

Indicators⁽¹⁾	Year ended	
	September 30, 2013	2012
Revenue generated by the Siemens Environmental Portfolio (in billions of €)	32.3	32.7
Accumulated annual customer reductions of carbon dioxide emissions generated by elements from the Siemens Environmental Portfolio (in millions of metric tons)	377	333

(1) Continuing operations.

Our Environmental Portfolio serves as an example of how we strive to align our business activities with the aforementioned megatrends, in this case climate change. The Environmental Portfolio consists of products, systems, solutions and services (Environmental Portfolio elements) that reduce negative impacts on the environment and emissions of carbon dioxide and other greenhouse gases (defined together in the following as carbon dioxide emissions) responsible for climate change.

In addition to its environmental benefits, our Environmental Portfolio enables us to compete successfully in attractive markets and generate profitable growth. In fiscal 2013, revenue from continuing operations from the Environmental Portfolio amounted to 32.3 billion, which accounted for 43% of our revenue from continuing operations in this fiscal year. This revenue includes revenue from newly developed and additionally qualified elements, and excludes revenue from elements that no longer fulfill our qualifications.

In fiscal 2010, we set ourselves a revenue target for the Environmental Portfolio within the One Siemens framework: to exceed 40 billion in revenue from the Environmental Portfolio by the end of fiscal 2014. Due to recent and ongoing portfolio changes it is no longer likely that we will achieve this target purely with our own operations by the end of fiscal 2014. Siemens' strategic focus on technologies for energy efficiency and climate and environmental protection will nevertheless remain in place. For fiscal year 2013, more than two-thirds of the revenue from our Environmental Portfolio were already generated with products and solutions for energy efficiency.

With our Environmental Portfolio, we intend, among other things, to help our customers reduce their carbon dioxide footprint, cut their energy costs and improve their profitability through an increase in productivity. Taking together all elements of the Environmental Portfolio that were installed at customer locations since the beginning of fiscal 2002 and remain in use today, we have reduced customer carbon dioxide emissions by 377 million metric tons in fiscal 2013, which is the equivalent of the following twelve cities' combined yearly emissions: Berlin, Cape Town, London, Los Angeles, Melbourne, Mexico City, Moscow, New York City, São Paulo, Seoul, Singapore and Tokyo.

Table of Contents

REPORTING PRINCIPLES

We report the revenue from our Environmental Portfolio and annual customer reductions of carbon dioxide emissions generated by it in accordance with internal regulations defined in our Environmental Portfolio Guideline. This Guideline is based on the Reporting Principles of the Greenhouse Gas Protocol Corporate Accounting and Reporting Standard, revised edition, and the Greenhouse Gas Protocol for Project Accounting. Both of these standards are published by the World Resources Institute (WRI) and the World Business Council for Sustainable Development (WBCSD).

The principles underlying these standards are relevance, completeness, consistency, transparency, accuracy and conservativeness. As there are currently no accepted international standards for identification and reporting of so-called green products, we are engaging in standardization activities with external organizations. The revenue generated by the Environmental Portfolio is recognized in accordance with revenue recognition policies as described in Item 18: Financial Statements Notes to Consolidated Financial Statements Note 2.

GOVERNANCE PROCESSES AND DEFINITIONS

The qualification of Environmental Portfolio elements as well as their respective reporting is based on defined processes and criteria. In principle, any product, system, solution or service of Siemens continuing operations may qualify for the Environmental Portfolio. The business portfolio of Siemens continuing operations is reviewed annually regarding the qualification of Environmental Portfolio elements based on the criteria described below. This covers the inclusion of newly developed elements as well as the integration of additionally qualified elements where evidence of fulfillment of the qualification criteria was not available in prior reporting periods. For additionally qualified Environmental Portfolio elements, we report their prior-year revenue and prior-year contribution to reducing customer carbon dioxide emissions on a comparable basis. Elements that no longer fulfill our qualification criteria are excluded from our Environmental Portfolio.

Prior to inclusion in the Environmental Portfolio, potential new Environmental Portfolio elements have to undergo a multilevel internal evaluation process. Our Sustainability Board annually acknowledges changes in the composition of the Environmental Portfolio. A further task of the Sustainability Board is to discuss potential concerns of stakeholders with regard to the inclusion or deletion of certain technologies in the Environmental Portfolio.

CRITERIA FOR INCLUSION OF ENVIRONMENTAL PORTFOLIO ELEMENTS

An Environmental Portfolio element can be a product, a system, a solution or a service as defined above. Furthermore, a core component of a system or solution may qualify as an Environmental Portfolio element if the component provided by Siemens is key to enabling environmental benefits resulting from the system's or solution's overall application. To qualify for inclusion in the Environmental Portfolio, an element must meet one of the selection criteria described below, which are energy efficiency, renewable energy or environmental technologies. Products, systems, solutions and services with planned application in military use or nuclear power are not included in the Environmental Portfolio.

Energy efficiency: The criteria for energy efficiency are an improvement in energy efficiency of 20% or more during the customer use phase compared to the applicable baseline, or a reduction of at least 100,000 metric tons of carbon dioxide equivalents per reporting period in the customer use phase. Examples of elements that meet the energy efficiency criterion are combined cycle power plants and intelligent building

technology systems.

Renewable energy: This criterion covers technologies in the field of renewable energy sources such as wind turbines or smart grid applications and their respective core components.

Environmental technologies: This criterion is related to water and wastewater treatment, air pollution control, waste reduction, recycling, e-car infrastructure and its core components. It also includes the Siemens Consulting Service which analyzes customers' environmental impact. Additionally, a criterion for the Healthcare Sector is an environmental impact reduction in terms of noise, radiation or total weight of at least 25% compared to the baseline.

Table of Contents

BASELINE METHODS

Energy efficiency, annual customer reduction of carbon dioxide and environmental impact are all assessed by a comparison with a reference solution (baseline). There are three different options for the reference solution: before-after comparison, comparison with a reference technology or comparison with the installed base. The baselines are reviewed annually and, if necessary, adjusted, such as when statistical data on the installed base is updated because of technical innovations or regulatory changes. The calculation of the reduction of carbon dioxide emissions is based on a comparison for every relevant Environmental Portfolio element with a baseline. For this calculation, we focus on those elements that have a material impact on the overall carbon dioxide emissions reduction. For some emission reduction calculations, the baseline reference for the installed base is determined using known global emission factors such as those for power production. The baselines used for our calculations are mainly based on data of the International Energy Agency (IEA) for gross power production and for grid losses, on data from the Intergovernmental Panel on Climate Change (IPCC) for fuel-based emission factors, and our own assessments of power production efficiency. For consistency reasons, we generally apply global emission factors for calculating emission reductions.

REPORTING ESTIMATES

The inclusion of elements in the Environmental Portfolio is based on criteria, methodologies and assumptions that other companies and other stakeholders may view differently. Factors that may cause differences, among others, are: choice of applicable baseline methodology, application of global emission factors that may be different from local conditions, use patterns at customers that may be different from standard use patterns used for carbon dioxide abatement calculations and expert estimates if no other data is available.

To date, there is no applicable international standard that applies across companies for qualifying products, systems, solutions and services for environmental and climate protection, or for compiling and calculating the respective revenue and the quantity of reduced carbon dioxide emissions attributable to such products, systems, solutions and services. Accordingly, revenue from our Environmental Portfolio and the reduction of our customers' annual carbon dioxide emissions may not be comparable with similar information reported by other companies. We report the annual carbon dioxide emissions reduction in the period of installation of the Siemens Environmental Portfolio element. The period of installation will be determined by milestones or based on estimated construction periods. This may differ from the timing of revenue recognition. Furthermore, we subject revenue from our Environmental Portfolio and the reduction of our customers' annual carbon dioxide emissions to internal documentation and review requirements that are less sophisticated than those applicable to our financial information. We may change our policies for recognizing revenue from our Environmental Portfolio and the reduction of our customers' annual carbon dioxide emissions in the future without prior notice.

As in previous years, we again commissioned an independent accounting firm with a limited assurance engagement to review the reported results for our Environmental Portfolio for fiscal 2013. This review was conducted in accordance with the International Standard on Assurance Engagements (ISAE) 3000, Assurance Engagements Other than Audits or Reviews of Historical Financial Information. Nothing came to the attention of the independent accounting firm that would cause them to believe that the section Siemens Environmental Portfolio of the Environmental Portfolio Report containing the revenue generated by the Environmental Portfolio and the annual customer reduction of carbon dioxide emissions attributable to it has not been prepared, in all material respects, in accordance with the defined reporting principles.

PROPERTY

Siemens operates more than 290 **major production and manufacturing plants** in more than 35 countries worldwide, including facilities at certain joint ventures and associated companies. A major production and manufacturing plant is defined as a facility at the Business Unit level, in which raw or source materials are transformed into finished goods on a large scale by using equipment and production resources such as machines, tools, energy and labor. Around 140 major production and manufacturing plants are located in the region Europe, C.I.S., Africa, Middle East; around 80 major production and manufacturing plants are located in the region

Table of Contents

Americas and around 70 major production and manufacturing plants are located in the region Asia, Australia. With around 100 major production and manufacturing plants, the Energy Sector accounts for the greatest proportion of these, followed by the Infrastructure & Cities Sector (around 80 major facilities), the Industry Sector (around 70 major facilities) and the Healthcare Sector (around 40 major facilities).

Siemens also owns or leases other properties including office buildings, warehouses, research and development facilities and sales offices.

Siemens principal executive offices are located in Munich, Germany.

We believe that our current facilities are in good condition and adequate to meet the requirements of our present and foreseeable future operations.

None of our properties are subject to mortgages and other security interests granted to secure indebtedness to financial institutions.

INTELLECTUAL PROPERTY

Siemens owns several thousand patents and has licenses covering its products and services worldwide. Research and development is a priority throughout Siemens on a Sector, Cross-Sector Business and Division basis. For a discussion of the main focus of the current research and development efforts of each Sector, see Item 4: Information on the Company Research and development. Siemens also owns thousands of registered trademarks worldwide. None of the Company, the Sectors, SFS or the Divisions is dependent on any single patent, license or trademark or any group of related patents, licenses or trademarks for their respective operations.

RESEARCH AND DEVELOPMENT

RESEARCH AND DEVELOPMENT ORGANIZATION AND STRATEGY

In fiscal 2013, we continued to focus on the following areas in research and development (R&D):

- (1) ensuring long-term future viability,
- (2) enhancing technological competitiveness, and
- (3) optimizing the allocation of R&D resources.

Our R&D activities are geared toward ensuring economically sustainable energy supplies and developing software solutions, which are essential to maintaining the long-term competitiveness of our Sectors. Accordingly, major focus areas include:

increasing the efficiency of renewable and conventional energy sources for power generation,

improving low-loss electricity transmission systems,

developing new solutions for smart grids, carbon dioxide separation systems for power plants, and technologies for storing energy from fluctuating renewable sources,

making medical imaging, in-vitro diagnostics, and healthcare IT an integral part of outcome oriented treatment plans, and

further development of industrial software to accelerate processes at every point along the value chain. Another major focus is promoting more efficient energy use in buildings, industrial facilities, and the transport sector. Examples include the development of electric drives and mass transportation systems such as local and long-distance trains and subways.

Across all focus areas, we recognize the vital importance of sophisticated software solutions. This is true not just for the areas mentioned above but also in nearly all of the other fields in which Siemens is active. Siemens software was used, for example, to virtually develop, build, test, and continually optimize the Mars rover Curiosity, before it was built. Curiosity landed on Mars in August 2012.

Table of Contents

R&D activities are carried out by both our Sectors and our Corporate Technology (CT) department. The Sectors focus their R&D efforts on the next generations of their products and solutions. In contrast, the aim of CT is to work with our operating units to develop the Group's technology and innovation strategies, especially for the next generation of their products and solutions. In addition, CT helps secure our technological and innovational future.

CT is a worldwide network with primary locations in Germany, the U.S., China, Russia, India, and Austria. The more than 6,900 CT employees contribute their in-depth understanding of fundamental technologies, models, and trends, as well as their wealth of software and process expertise. CT strives to secure the technological and innovative future through commonly developed core technology initiatives such as future of automation, data to business or system integration. With its global network of experts, our corporate research unit serves as a strategic partner for Siemens operating units. CT makes important contributions along the entire value chain, from research and development to production technology, manufacturing processes, and the testing of products and solutions. CT is also networked with leading universities and research institutes worldwide. The principal objectives of these close collaborations with strong external partners are:

leveraging the potential of joint R&D projects,

establishing and further developing a network of universities and research institutes that Siemens closely cooperates with, as well as systematically enhancing communication with these institutions, and

strengthening Siemens' attractiveness as an employer of choice for highly qualified young talents in scientific and technical disciplines.

Such new collaborative approaches are also a substantial part of our Open Innovation (OI) concept, in which we receive input from internal as well as external experts that significantly contributes to the innovative power of the Company. With OI we aim to overcome the barriers of silo thinking, to prove and truly leverage the potential of an open network enterprise. Since 2008, when the first OI project was launched, 35,000 employees from more than 80 countries have participated in nine internal OI pilot projects and our external efforts have mobilized more than 1,750 external solvers on 17 projects.

The technology fields addressed by OI cover all technological areas of Siemens. They include:

research on materials that help make our products more efficient;

the creation of IT platforms, IT security solutions, software architecture, technical systems, energy technologies, sensors, and electronic components; and

research into new solutions for system engineering, data analysis, automation and communication technologies, medical information systems, and imaging processes.

In addition, Siemens takes part in publicly funded research programs. The most important research areas include the development of sustainable technologies including recycling, the communication of machines, the creation of new

materials and bio-technology.

CT offers extensive process and production consulting services for development and manufacturing units at Siemens. CT employs more than 4,400 software developers at locations in Asia, Europe, and the Americas. These specialists help our Business Units develop concepts from the initial idea to the finished product.

CT strategically handles the intellectual property of Siemens. Around 430 experts help the Company register patents and trademarks, establish them, and put them to profitable use.

Table of Contents**RESEARCH AND DEVELOPMENT FIGURES**

In fiscal 2013, we reported research and development expenses of 4.291 billion, compared to 4.245 billion in fiscal 2012 and 3.903 billion in fiscal 2011. The resulting R&D intensity, defined as the ratio of R&D expenses and revenue, was 5.7%, above the R&D intensity in fiscal 2012 and fiscal 2011.

R&D expenses and intensity for the Sectors in fiscal 2013, 2012 and 2011 were as follows:

	R&D expenses (in millions of)			R&D intensity		
	Year ended September 30,			Year ended September 30,		
	2013	2012	2011	2013	2012	2011
Energy	872	868	782	3.3%	3.1%	3.1%
Healthcare	1,230	1,314	1,173	9.0%	9.6%	9.4%
Industry	1,265	1,192	1,103	6.8%	6.1%	5.9%
Infrastructure & Cities	731	699	696	4.1%	4.0%	4.1%

CT incurred additional R&D expenses.

R&D indicators ⁽¹⁾	Year ended September 30,	
	2013	2012
	(in thousands)	
Employees ⁽²⁾	29.8	29.5
Inventions ⁽³⁾	8.4	8.8
Patent first filings ⁽⁴⁾	4.0	4.6

(1) Continuing operations.

(2) Average number of employees in fiscal year.

(3) Number of inventions reported by the Business Units in an internal report.

(4) First filings as part of inventions submitted to patent offices.

In our continuing operations, we had an average of approximately 13,300 R&D employees in Germany and approximately 16,500 employees in approximately 30 other countries during fiscal 2013, including, among others, the U.S., China, Austria, and India.

As of September 30, 2013, Siemens held approximately 60,000 granted patents worldwide in its continuing operations. As of September 30, 2012, it held approximately 57,000 granted patents. In terms of the number of

published patent applications in calendar year 2012, Siemens ranked third in Germany and second in Europe. Siemens was also ranked eleventh in the statistics for patents issued in the U.S. in calendar year 2012.

Rank in patent office statistics	2012	2011	2010
Germany German Patent and Trade Mark Office (DPMA)	3	3	3
Europe European Patent Office (EPO)	2	1	1
U.S. United States Patent and Trademark Office (US PTO)	11	10	9

Table of Contents

RESEARCH AND DEVELOPMENT IN THE SECTORS

Our R&D activities in the **Energy** Sector are focused on developing methods for the efficient generation and transmission of electrical energy, including

technologies for low-loss electricity transmission,

advanced gas turbines that increase the efficiency and reduce emissions of power plants,

combined cycle power plants, to increase the availability of electricity through higher flexibility,

wind turbine innovations,

technologies that extract the greenhouse gas carbon dioxide from the flue gas that occurs during fossil fuel-fired power generation (carbon capture and storage), and

a subsea power grid to make deep-sea oil and gas extraction more profitable.

Examples of research and development in Energy include Type B75 rotor blades for wind turbines, which are 75 meters in length; this makes them, to our knowledge, the longest rotor blades in operation in the world as of the date of this report. At 25 tons, the B75 is also a lightweight, as it is 10% to 20% lighter than comparable rotor blades. Heavy rotor blades are subjected to higher stress loads and also require more massive nacelles, towers, and foundations. The combination of intelligent design and low weight therefore has a positive effect on the cost of wind power production.

In 2011, a combined-cycle power-generation island built by Siemens in Irsching, Germany, demonstrated an unprecedented net efficiency rating of 60.75% at an output of 578 megawatts. In April 2013, three additional power plant blocks featuring H-Class gas turbines commenced commercial operation in Cape Canaveral, Florida. Another combined-cycle power plant with this turbine as the main driver has been commissioned in August 2013 in Dangjin, South Korea. It also reaches an efficiency level of approximately 61%.

In fiscal 2013, Siemens installed the HelWin1 offshore platforms in the North Sea. With a capacity of 576 megawatts (MW), these platforms will supply clean wind-generated electricity to more than 500,000 German households on the mainland. HelWin1 will link the two offshore wind farms, known as Nordsee Ost and Meerwind, to the mainland. The alternating current power generated by the wind turbines is transformed into low-loss high-voltage direct current (HVDC) for transmission onto land. The total transmission losses for this connection are less than 4%. Siemens HVDC Plus technology not only reduces the space requirements for HVDC systems, which is a decisive factor for installation at sea, but also features self-stabilization. This enhances grid reliability in the event of power fluctuations, which can occur with wind-based power generation.

The R&D activities in the **Healthcare** Sector are focused on meeting customer requirements, which are the result of two major trends: the world's population continues to grow steadily and to get older. These trends increase the pressure

on healthcare providers to treat more and more people at increasingly lower costs in order to stabilize rising healthcare expenditures. To overcome the challenges of making healthcare more efficient and more effective, the healthcare measures have to focus on the individual patient and the success of the treatment.

One of the Sector's R&D fields involves the development of systems that help physicians make precise diagnoses of large numbers of patients and are also robust, easy to use, and inexpensive to purchase and maintain. One example is the world's first wireless ultrasound device, Acuson Freestyle. The system makes it easier to use advanced ultrasound technology in areas that need to be aseptic, or sterile. Examples include interventional radiology, anesthesiology, intensive care, catheter labs, and emergency care. Ultrasound with wireless transducers is also ideally suited for minimally-invasive procedures such as nerve blockades, access to blood vessels, and positioning for therapeutic interventions and biopsies.

Along with its full-size computed tomography scanner SOMATOM Perspective 128, Healthcare offers a version designed especially for outpatient clinic and small and medium-sized hospitals named SOMATOM Perspective 64. It reduces radiation doses for patients by up to 60 percent, with improved image quality. The system needs only 18 square meters, it can be installed in less than two days, and it comes with low energy consumption and air-conditioning requirements. Both versions are among the most economical scanners in their respective classes.

Table of Contents

Another focus area is automating clinical work processes and optimizing laboratory diagnostics, with a goal of enabling physicians to identify diseases more precisely and at an earlier stage. Physicians are then able to monitor the effect of medications more accurately and benefit from the evaluation and analytical capabilities of modern computer technology. As a result, therapies can be tailored more closely to a patient's needs. The Sector also develops products that meet the specific, targeted requirements of the healthcare systems of emerging countries.

One of the R&D priorities in the **Industry** Sector is the software-based integration of product planning and production processes within the framework of product lifecycle management. The objective is to accelerate processes at every point along the value chain. A good example is the technology for industrial production of implants. With the help of intelligent software solutions, prosthetics can be produced more efficiently and cost-effectively. Innovative technologies like these can cut the time from design to market in the manufacturing industry by up to 50%. The further development of automation and drive technology, and industrial software in particular, plays a major role here. This applies to the product development and production process as well as to the integration of the drive system. It also applies to metal manufacturing, where the software-assisted planning and operation of entire steel mills are increasingly influencing production. Moreover, the Industry Sector is striving to achieve greater energy efficiency, reduce raw material consumption, and lower emissions. These objectives also guide the development of technology-based service concepts such as energy management and remote maintenance systems, as well as the creation of efficient, resource-conserving solutions for steel production.

R&D activities in our **Infrastructure & Cities** Sector focus on urban growth issues. Main research fields therefore cover sustainable technologies for major metropolitan areas and their infrastructures. The main aims are to increase energy efficiency, reduce burdens on the environment, increase cost-effectiveness, and improve the quality of life in cities. To this end, the Sector develops building technologies that conserve energy, solutions for ensuring an efficient and secure supply of electricity in cities, and intelligent traffic and transport systems. Examples include the extremely lightweight and almost fully recyclable Inspiro modular subway train and the innovative and especially lightweight SF7000 bogie. In the field of building automation, the Desigo facility automation system integrates many of its system components into buildings themselves and thus achieves significant energy savings. In addition, researchers are looking for ways to integrate buildings into smart grids. Through such integration, the buildings can feed the electricity they produce into the grids and provide additional power during times of peak demand.

In fiscal 2013, Siemens launched a large smart city project in Vienna, Austria in conjunction with partners. A living laboratory will be created in the next five years in the waterside district of Aspern, which is expected to constitute one of the largest urban development projects in Europe. In this laboratory, power supply, building systems, intelligent power grids, and information and communication technologies will interact in an optimized way.

SUPPLY CHAIN MANAGEMENT

The principal goal of supply chain management at Siemens is to ensure the availability and quality of the materials we require to serve our customers also considering innovation strength and sustainability of our suppliers. We aim to strengthen our competitiveness by achieving substantial savings in our purchasing volume. In fiscal 2013, Siemens purchasing volume amounted to approximately 38 billion, which equaled roughly half of our total revenue. Our primary strategies for achieving savings in purchasing are the following:

Siemens-wide managed volume: We bundle more than half of our purchasing volume which includes direct and indirect material. Through this worldwide pooling of volume, we achieve substantial economies of scale.

Sourcing from emerging markets: We try to move towards a globally balanced supply chain network. One essential element is to constantly increase the share of sourcing from Global Value Sourcing (GVS) countries, which are generally emerging economies. To accomplish this goal, we identify, select and fully qualify suppliers from GVS countries, and engage them in a continuous development process that extends to sustainability thereafter. Additionally, we encourage and support our suppliers to expand their

Table of Contents

operations in order to follow our manufacturing footprint in these countries. In fiscal 2013, we further increased the proportion of our sourcing coming from GVS countries on a comparable basis.

E-sourcing: We significantly increased the proportion of external purchases that we award via electronic bidding over the last few years to more than 10%.

We expect to realize further savings potential within the framework of Siemens 2014 by further integrating supply chain management activities into other business activities, such as design and production. The relevant lever in this context is material cost productivity and in particular Design-to-Cost, which optimizes the design of products in order to reduce material cost.

We are strengthening Siemens' innovation power by benefiting from the innovative strength in our supplier network. With our Siemens Supplier Forum, we established a platform for regular dialogue with our top strategic suppliers at the CEO level. With this dialogue, we aim to ensure long-term cost leadership, realize shared growth potential and increase innovation capabilities. To promote outstanding suppliers for their excellence, we introduced Siemens Supplier Awards for a number of categories.

Sustainability is a guiding principle for our supply chain management. Sustainability requirements are therefore an integral part of all relevant supplier management processes such as supplier selection, supplier qualification and evaluation, and supplier development. We require all of our suppliers to comply with the principles of our Code of Conduct for Siemens Suppliers, which include respect for the basic rights of employees and environmental protection. We also require them to support its implementation in their own supply chains. We have established a risk-based system of appropriate processes to enable us to systematically identify potential risks in our supply chain. It consists of sustainability self-assessments by suppliers, risk evaluation conducted by our purchasing department, sustainability questions within supplier quality audits and sustainability audits by external auditors. To further encourage sustainable business conduct throughout our entire global supply chain, we are committed to building our suppliers' competence and intensifying knowledge transfers related to sustainability.

In 2012, the SEC adopted a regulatory rule, known as the Conflict minerals rule. This rule aims to increase transparency and responsibility in the procurement of conflict minerals from the conflict zones of the Democratic Republic of Congo and the surrounding region. A project organization was established to address the requirements within our supply chain in fiscal 2013. For further information, see Item 3: Key information Risk factors.

LEGAL PROCEEDINGS

PUBLIC CORRUPTION PROCEEDINGS

Governmental and related proceedings

As previously reported, in May 2011 Siemens AG voluntarily reported a case of attempted public corruption in connection with a project in Kuwait in calendar 2010 to the U.S. Department of Justice, the SEC, and the Munich public prosecutor. The Munich public prosecutor discontinued the investigations, which related to certain former employees, but imposed conditions on them. Siemens is cooperating with the U.S. authorities in their ongoing investigations.

As previously reported, in July 2011 the Nuremberg-Fuerth public prosecutor notified Siemens AG of an investigation against several employees in connection with payments related to the healthcare business in the Caribbean. In November 2012, the Nuremberg-Fuerth public prosecutor discontinued its investigation.

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

As previously reported, in July 2011 the Munich public prosecutor notified Siemens AG of an investigation against a former employee in connection with payments to a supplier related to the oil and gas business in Central Asia from calendar 2000 to 2009. Siemens is cooperating with the public prosecutor.

As previously reported, in October 2011, the Turkish Prime Ministry Inspection Board notified Siemens Sanayi ve Ticaret A.S., Turkey, of an investigation in connection with alleged bribery in Turkey and Iraq from calendar 1999 to 2007. Siemens is cooperating with the authority.

Table of Contents

In February 2013, Siemens AG and the European Investment Bank (EIB) signed a settlement agreement addressing alleged past violations of the EIB's anti-fraud policy. The settlement includes a commitment by Siemens that the concerned business unit will voluntarily refrain from bidding on projects financed by the EIB for a period of 18 months. Further, Siemens commits to provide funds, totaling 13.5 million over five years, to organizations or institutions that promote good governance and the fight against corruption.

Since July 2013, following the voluntary self-reporting of certain facts by Siemens Ltda. Brazil to the Brazilian antitrust authorities in May 2013 mentioned below, several Brazilian prosecutorial offices have initiated or resumed investigations into alleged criminal conduct, including alleged bribe payments, anticompetitive conduct and undue influencing of public tenders, in connection with several metro transport projects. Among the resumed investigations are in particular two cases that had been reported before, namely the investigations by the Brasilia and Sao Paulo public prosecutors related to alleged misconduct in calendar 2007 and around 2000, respectively. Siemens is cooperating with the authorities.

In August 2013, a Brazilian Appellate Court upheld a decision to suspend Siemens Ltda. Brazil from participating in public bids and signing contracts with public administrations in Brazil for a five year term, based on alleged irregularities in calendar 1999 and 2004 public tenders. Siemens is seeking remedial action against the decision of the Appellate Court.

As previously reported, Siemens AG had filed a request for arbitration against the Republic of Argentina (Argentina) with the International Center for Settlement of Investment Disputes (ICSID) of the World Bank. Siemens AG claimed that Argentina had unlawfully terminated its contract with Siemens for the development and operation of a system for the production of identity cards, border control, collection of data and voters' registers (DNI project) and thereby violated the Bilateral Investment Protection Treaty between Argentina and Germany (BIT). A unanimous decision on the merits was rendered by the ICSID arbitration tribunal in February 2007, awarding Siemens AG, inter alia, compensation in the amount of US\$217.8 million, plus compound interest thereon at a rate of 2.66% since May 18, 2001. Argentina subsequently filed applications with the ICSID aiming at the annulment and reversal of the decision and a stay of enforcement of the arbitral award. In August 2009, Argentina and Siemens AG reached an agreement to mutually settle the case and discontinue any and all civil proceedings in connection with the case without acknowledging any legal obligations or claims. No payment was made by either party. As previously reported, the Argentinean Anti-Corruption Authority is conducting an investigation against individuals into corruption of government officials in connection with the award of the contract for the DNI project to Siemens in calendar 1998. Searches were undertaken at the premises of Siemens Argentina and Siemens IT Services S.A. in Buenos Aires in August 2008 and in February 2009. The Company is cooperating with the Argentinean Authorities. The Argentinean investigative judge also repeatedly requested judicial assistance from the Munich public prosecutor and the federal court in New York. In December 2011, the U.S. Securities and Exchange Commission (SEC) and U.S. Department of Justice filed an indictment against nine individuals based on the same facts as the investigation of the Argentinean Anti-Corruption Authority. Most of these individuals are former Siemens employees. The former member of the Managing Board of Siemens AG, Dr. Uriel Sharef, is also involved. Siemens AG is not party to the proceedings.

As previously reported, in February 2010 a Greek Parliamentary Investigation Committee (GPIC) was established to investigate whether any politicians or other state officials in Greece were involved in alleged wrong-doing of Siemens in Greece. The GPIC's investigation was focused on possible criminal liability of politicians and other state officials. Greek public prosecutors are separately investigating certain fraud and bribery allegations involving among others former board members and former executives of Siemens A.E., Elektrotechnische Projekte und Erzeugnisse, Greece (Siemens A.E.), and Siemens AG. In January 2011, the GPIC alleged in a letter to Siemens A.E. that the damage suffered by the Greek state amounted to at least 2 billion. Furthermore, the GPIC issued a report repeating these allegations. In addition, the Hellenic Republic Minister of State indicated in a letter to Siemens that the Greek

state will seek compensation from Siemens for the alleged damage. In April 2012, the Greek Parliament approved a settlement agreement between Siemens and the Greek State, the material provisions of which include the following: Siemens waives public sector receivables in the amount of 80 million. Furthermore Siemens agrees to spend a maximum of 90 million on various anti-corruption and transparency initiatives, as well as university and research programs and to provide 100 million of financial support to Siemens A.E. to ensure its continued presence in Greece. In exchange, the

Table of Contents

Greek State agrees to waive all civil claims and all administrative fines related to the corruption allegations and to utilize best efforts to resolve all pending disputes between Siemens and the Greek state-companies or its public authorities.

In February 2012, the Munich public prosecutor notified Siemens AG of a request for mutual assistance in criminal matters by the Swiss Federal Prosecution authority. The investigation of the Swiss Federal Prosecution involved the Swedish subsidiary Siemens Industrial Turbomachinery (SIT) in connection with alleged payments to employees of a Russian natural gas production company between calendar 2004 and 2006. In July 2013, the Swiss Federal Prosecution launched a criminal investigation against SIT for organizational neglect. In September 2013, the investigation was discontinued due to a settlement with the Swiss Federal Prosecution that included a restitution payment to a nonprofit organization and a compensation claim relating to forfeiture of profits in the lower double digit US\$ million range.

As previously reported, the Vienna public prosecutor, Austria, is conducting an investigation into payments between calendar 1999 and 2006 relating to Siemens Aktiengesellschaft Österreich, Austria, and its subsidiary Siemens VAI Metal Technologies GmbH & Co., Austria, for which valid consideration could not be identified. In September 2011, the Vienna public prosecutor extended the investigations to include a potential corporate liability of Siemens AG Austria for tax evasion. Siemens is cooperating with the authorities.

As previously reported, in December 2009, the Anti-Corruption Commission of Bangladesh (ACC) sent a request for information to Siemens Bangladesh related to telecommunications projects of Siemens former Communications (Com) Group undertaken prior to calendar 2007. In January 2010, Siemens Bangladesh was informed that in a related move the Anti Money Laundering Department of the Central Bank of Bangladesh is conducting a special investigation into certain accounts of Siemens Bangladesh and of former employees of Siemens Bangladesh in connection with transactions for Com projects undertaken in the period from calendar 2002 to 2006. In February 2010 and June 2012, the ACC sent requests for additional information. Siemens is cooperating with the authorities.

As previously reported, in November 2009 and in February 2010, a subsidiary of Siemens AG voluntarily self-reported possible violations of South African anti-corruption regulations in the period before calendar 2007 to the responsible South African authorities. The authorities have requested further documentation. Siemens is cooperating with the authorities.

As previously reported, in June 2010, the Frankfurt public prosecutor searched premises of Siemens in Germany in response to allegations of questionable payments relating to an Infrastructure & Cities project in Thailand. Siemens is cooperating with the authority.

As previously reported, in August 2010, the Inter-American Development Bank (IADB) issued a notice of administrative proceedings against, among others, Siemens IT Solutions and Services Argentina alleging fraudulent misstatements and antitrust violations in connection with a public invitation to tender for a project in the province of Cordoba, Argentina, in calendar 2003. Siemens is cooperating with the IADB.

As previously reported, in August 2010, the IADB issued a notice of administrative proceedings against, among others, Siemens Venezuela alleging fraudulent misstatements and public corruption in connection with a public invitation to tender for healthcare projects in the Venezuelan provinces of Anzoategui and Merida in calendar 2003. Siemens is cooperating with the IADB.

The Company remains subject to corruption-related investigations in several jurisdictions around the world. As a result, additional criminal or civil sanctions could be brought against the Company itself or against certain of its

employees in connection with possible violations of law. In addition, the scope of pending investigations may be expanded and new investigations commenced in connection with allegations of bribery or other illegal acts. The Company's operating activities, financial results and reputation may also be negatively affected, particularly as a result of penalties, fines, disgorgements, compensatory damages, third-party litigation, including with competitors, the formal or informal exclusion from public invitations to tender, or the loss of business licenses or permits. Additional expenses and provisions, which could be material, may need to be recorded in the future for penalties, fines, damages or other charges in connection with the investigations.

Table of Contents**Civil litigation**

As previously reported, Siemens AG reached a settlement with nine out of eleven former members of the Managing and Supervisory Board in December 2009. The settlement relates to claims of breaches of organizational and supervisory duties in view of the accusations of illegal business practices that occurred in the course of international business transactions in calendar 2003 to 2006 and the resulting financial burdens for the Company. The Annual Shareholders Meeting approved all nine settlements between the Company and the former members of the Managing and Supervisory Board in January 2010. The shareholders also approved a settlement agreement between the Company and its directors and officers insurers regarding claims in connection with the D&O insurance of up to 100 million. Siemens recorded 96 million gains, net of costs, from the D&O insurance and the nine settlements. In January 2010, Siemens AG filed a lawsuit with the Munich District Court I against the two former board members who were not willing to settle, Dr. Thomas Ganswindt and Heinz-Joachim Neubürger. The criminal proceedings pending with the Munich District Court I against Dr. Ganswindt were terminated in July 2011. Against this backdrop, Siemens AG reached a settlement with Dr. Thomas Ganswindt in November 2012, which was subject to the approval of the Annual Shareholders Meeting. The Annual Shareholders Meeting of Siemens AG approved the settlement agreement with Dr. Ganswindt in January 2013. Therefore Siemens withdrew from the proceedings pending before the Munich District Court I in March 2013, as provided for in the settlement. The lawsuit against Heinz-Joachim Neubürger is still pending. In January 2013, Mr. Neubürger filed a counter claim against Siemens AG, requesting the transfer of Stock Awards in fiscal 2004 and 2005 plus dividends and interest. Siemens AG is contesting this counterclaim.

As previously reported, in June 2008, the Republic of Iraq filed an action requesting unspecified damages against 93 named defendants with the United States District Court for the Southern District of New York on the basis of findings made in the Report of the Independent Inquiry Committee into the United Nations Oil-for-Food Programme. Siemens S.A.S. France, Siemens Sanayi ve Ticaret A.S., Turkey, and the former Siemens subsidiary OSRAM Middle East FZE, Dubai, are among the 93 named defendants. In February 2013, the court dismissed the Republic of Iraq's action with prejudice. The Republic of Iraq has appealed this decision.

ANTITRUST PROCEEDINGS

As previously reported, in February 2007, the European Commission launched an investigation into possible antitrust violations involving European producers of power transformers, including Siemens AG and VA Technologie AG, Austria (VA Tech), which Siemens acquired in July 2005. The German Antitrust Authority (Bundeskartellamt) has become involved in the proceeding and is responsible for investigating those allegations that relate to the German market. Power transformers are electrical equipment used as major components in electric transmission systems in order to adapt voltages. In October 2009, the European Commission imposed fines totaling 68 million on seven companies with regard to a territorial market sharing agreement related to Japan and Europe. Siemens was not fined because it had voluntarily disclosed this aspect of the case to the authorities. The German Antitrust Authority continued its investigation with regard to the German market. In September 2012, the German Antitrust Authority and the Company ended the legal proceeding by entering into a settlement agreement. Siemens agreed to pay a fine in the single-digit million range.

As previously reported, in April 2007, Siemens AG and former VA Tech companies filed actions before the European Court of First Instance in Luxemburg against the decisions of the European Commission dated January 24, 2007, to fine Siemens and former VA Tech companies for alleged antitrust violations in the European Market of high-voltage gas-insulated switchgear between calendar 1988 and 2004. Gas-insulated switchgear is electrical equipment used as a major component for power substations. The fine imposed on Siemens AG amounted to 396.6 million and was paid by the Company in calendar 2007. The fine imposed on former VA Tech companies, which Siemens AG acquired in July 2005, amounted to 22.1 million. In addition, former VA Tech companies were declared jointly liable with

Schneider Electric for a separate fine of 4.5 million. In March 2011, the European Court of First Instance dismissed the case regarding the fine imposed on Siemens AG and re-calculated the fines for the former VA Tech companies. Former VA Tech companies were declared jointly liable with Schneider Electric for a fine of 8.1 million. Siemens AG and former VA Tech companies appealed the decision in May 2011.

Table of Contents

In addition to these proceedings, authorities in Brazil, the Czech Republic and Slovakia are conducting investigations into comparable possible antitrust violations. In October 2010, the High Court of New Zealand dismissed corresponding charges against Siemens.

As previously reported, in September 2011, the Israeli Antitrust Authority requested Siemens to present its legal position regarding an alleged anti-competitive arrangement between April 1988 and April 2004 in the field of gas-insulated switchgear. In September 2013, the Israeli Antitrust Authority concluded that Siemens AG was a party to an illegal restrictive arrangement regarding the Israeli gas-insulated switchgear market between 1988 and 2004, with an interruption from October 1999 to February 2002. The Company is considering to appeal this decision.

Based on the above mentioned conclusion of the Israel Antitrust Authority, electricity consumer groups filed two class-actions for cartel damages against a number of companies including Siemens AG with an Israeli District Court in September 2013. The plaintiffs seek compensation for alleged damages, which are claimed to amount to 582 million. In addition, according to an ad hoc-notice of the Israel Electric Corporation (IEC), the IEC is concurrently preparing to file a separate claim for damages against Siemens AG and other companies that allegedly formed a cartel in the Israeli gas-insulated switchgear market. Siemens AG is defending itself.

As previously reported, in November 2010, the Greek Competition Authority searched the premises of Siemens S.A. in Athens in response to allegations of anti-competitive practices in the field of telecommunication and security. In August 2012, the proceedings were discontinued without sanctions based on the settlement agreement between Siemens and the Greek State mentioned above.

In connection with the January 24, 2007 decision of the European Commission regarding alleged antitrust violations in the high-voltage gas-insulated switchgear market, claims are being made against Siemens. Among others, a claim was filed by National Grid Electricity Transmission Plc. (National Grid) with the High Court of England and Wales in November 2008. 21 companies have been named as defendants, including Siemens AG and various of its subsidiaries. National Grid originally asserted claims in the aggregate amount of approximately £249 million for damages and compound interest. In November 2012, National Grid increased the aggregate amount to £364 million due to accrued compound interest. Siemens believes National Grid's claim to be without merit. As discussed, the European Commission's decision has been appealed to the European Court of First Instance. In June 2009, the High Court granted a stay of the proceedings pending before it. In June 2009, the Siemens defendants filed their answers to the complaint and requested National Grid's claim to be rejected. A case management conference was held in November 2012. The High Court of England and Wales lifted the stay of the proceedings granted in June 2009 and decided on the scope of further discovery and set a time schedule leading up to a court session expected to be held in 2014.

As previously reported, in December 2010 and in March 2011, the Turkish Antitrust Authority searched the premises of several diagnostic companies including, among others, Siemens Healthcare Diagnostik Ticaret Limited Sirketi in Turkey, in response to allegations of anti-competitive agreements. Siemens cooperated with the authority. In May 2012, the Turkish Antitrust Authority decided that the law had not been violated, and discontinued the proceedings.

As previously reported, the Italian Antitrust Authority searched the premises of several healthcare companies, among others those of Siemens Healthcare Diagnostics S.r.l. and Siemens S.p.A. in February 2010. The investigation addresses allegations of anti-competitive agreements in relation to a tender of the procurement entity for the public healthcare sector in the region of Campania for the supply of medical equipment in calendar 2009. In May 2011, the Italian Antitrust Authority sent a Statement of Objections to the companies under investigation which confirmed that the proceedings against Siemens Healthcare Diagnostics S.r.l. were closed, but accused Siemens S.p.A. of having participated in an anti-competitive arrangement. In August 2011, the Italian Antitrust Authority fined several companies, including Siemens S.p.A. for alleged anti-competitive behavior. The fine imposed on Siemens S.p.A.

amounts to 1.1 million. The company appealed the decision. In April 2012, the Regional Administrative Court overturned the decision of the Italian Antitrust Authority. In November 2012, the Italian Antitrust Authority appealed the decision of the Regional Administrative Court.

As previously reported, in September 2011, the Competition Commission of Pakistan requested Siemens Pakistan Engineering Co. Ltd., Pakistan (Siemens Pakistan), to present its legal position regarding an alleged

Table of Contents

anti-competitive arrangement since calendar 2007 in the field of transformers and air-insulated switchgears. Siemens cooperated with the authority. In December 2011, Siemens Pakistan filed a leniency application. In April 2012, the Competition Commission of Pakistan accepted the leniency application and granted Siemens Pakistan a 100% penalty reduction for the alleged behavior.

As previously reported, in June 2007, the Turkish Antitrust Agency confirmed its earlier decision to impose a fine in an amount equivalent to 6 million on Siemens Sanayi ve Ticaret A.S., Turkey, based on alleged antitrust violations in the traffic lights market. Siemens Sanayi ve Ticaret A.S. has appealed this decision and this appeal is still pending.

In May 2012, the Brazilian Anti-Trust Authority notified Siemens Ltda., Brazil of an investigation into anti-trust behavior in the field of air-insulated switchgear and other products from calendar 1997 to 2006. Siemens is cooperating with the authorities.

As mentioned above, in May 2013, Siemens Ltda. Brazil entered into a leniency agreement with the Administrative Council for Economic Defense and other relevant authorities relating to several Brazilian metro transport projects. The Company is cooperating with the authorities. It cannot be excluded that significant cartel damages claims will be brought by customers against Siemens Ltda. Brazil based on the outcome of the investigations.

OTHER PROCEEDINGS

As previously reported, Siemens AG is a member of a supplier consortium that has been contracted to construct the nuclear power plant Olkiluoto 3 in Finland for Teollisuuden Voima Oyj (TVO) on a turnkey basis. Siemens AG's share of the consideration to be paid to the supplier consortium under the contract is approximately 27%. The other member of the supplier consortium is a further consortium consisting of Areva NP S.A.S. and its wholly-owned subsidiary, Areva NP GmbH. The agreed completion date for the nuclear power plant was April 30, 2009. Completion of the power plant has been delayed for reasons which are in dispute. In December 2011, the supplier consortium informed TVO that the completion of the plant is expected in August 2014. In February 2013 TVO announced that it is preparing for the possibility that the start of the regular electricity production of the plant may be postponed until calendar year 2016. The supplier consortium and TVO continue to assess the schedule and the risk of further slippage in detail. The final phases of the plant completion require the full cooperation of all parties involved. In December 2008, the supplier consortium filed a request for arbitration against TVO demanding an extension of the construction time, additional compensation, milestone payments, damages and interest. In June 2011, the supplier consortium increased its monetary claim to 1.94 billion. TVO rejected the claims and made counterclaims against the supplier consortium consisting primarily of damages due to the delay. In June 2012, the arbitral tribunal rendered a partial award ordering the release of withheld milestone payments to the supplier consortium of approximately 101 million plus interest. As of September 2012, TVO's alleged counterclaims amounted to 1.59 billion based on a delay of up to 56 months. Based on a completion in August 2014, TVO estimates that its counterclaims amount to 1.77 billion. The further delay beyond 56 months (beyond December 2013) as well as the further slippage in the schedule currently under assessment by the supplier consortium and TVO could lead TVO to further increase its counterclaims. In October 2013 the supplier consortium increased its claim for an extension of construction time and its monetary claims to 2.65 billion. The arbitration proceedings may continue for several years.

As previously reported, Siemens AG terminated its joint venture with Areva S.A. (Areva) in January 2009. Thereafter Siemens AG entered into negotiations with the State Atomic Energy Corporation Rosatom (Rosatom) with a view to forming a new partnership active in the construction of nuclear power plants, in which it would be a minority shareholder. In April 2009, Areva filed a request for arbitration with the ICC against Siemens AG. Areva sought an order enjoining Siemens AG from pursuing such negotiations with Rosatom, a declaration that Siemens AG is in material breach of its contractual obligations and a reduction of the price payable to Siemens AG for its stake in the

Areva NP S.A.S. joint venture. The final award of the arbitral tribunal was notified in May 2011. According to this award, Siemens had to pay Areva liquidated damages of 648 million plus interest. Pursuant to the arbitral award, the disputed non-compete obligation was reduced to four years (ending in September 2013).

Table of Contents

As previously reported, Siemens is involved in the construction of a power plant in the United States. Siemens Energy, Inc., USA, and Kvaerner North American Construction, Inc., USA (Kvaerner) are consortium partners in this project, commissioned by Longview Power LLC, USA (Longview). Foster Wheeler North America Corp, USA (Foster Wheeler) supplied the boiler for the project. Kvaerner filed an arbitration request before the American Arbitration Association in June 2011, and in October and November 2012, the parties filed claims for monetary damages against one another. The amounts claimed by Longview and Foster Wheeler from the consortium partners total approximately US\$243 million. Siemens filed claims for monetary damages of approximately US\$110 million against Longview and Foster Wheeler. Kvaerner is claiming approximately US\$252.8 million from Longview and Foster Wheeler. Longview filed for bankruptcy under Chapter 11 of the US Bankruptcy Code, which may result in delay to the arbitration proceeding dealing with the claim and counterclaim.

In July 2008, Hellenic Telecommunications Organization S.A. (OTE) filed a lawsuit against Siemens AG with the district court of Munich, Germany, seeking to compel Siemens AG to disclose the outcome of its internal investigations with respect to OTE. OTE seeks to obtain information with respect to allegations of undue influence and/or acts of bribery in connection with contracts concluded between Siemens AG and OTE from calendar 1992 to 2006. In May 2009, OTE was granted access to the public prosecutor's files in Greece. At the end of July 2010, OTE expanded its claim and requested payment of damages by Siemens AG of at least 57.07 million to OTE for alleged bribery payments to OTE-employees. While Siemens AG continues to defend itself against the expanded claim, Siemens AG and OTE remain in discussions to resolve the matter.

As previously reported, Siemens A.E. entered into a subcontract agreement with Science Applications International Corporation, Delaware, USA, (SAIC) in May of 2003 to deliver and install a significant portion of a security surveillance system (the C4I project) in advance of the Olympic Games in Athens, Greece. Siemens A.E. fulfilled its obligations pursuant to the subcontract agreement. Nonetheless, the Greek government claimed errors related to the C4I-System and withheld amounts for abatement in a double-digit million range. Furthermore, the Greek government is withholding the final payment in a double-digit million range, claiming that the system has not yet been finally accepted. Although Siemens A.E. is not a contractual party of the Greek government, under Siemens A.E.'s subcontract agreement with SAIC non-payment by the Greek government also has an economic effect on Siemens A.E. SAIC has filed for arbitration contesting all the Greek government's claims and the withholding of payments. In July 2013, the arbitration court issued the arbitral award ordering the Greek State to pay 40 million to SAIC. The Greek State is contesting the enforcement of the arbitral award. The final resolution of this dispute has been complicated by public bribery and fraud allegations against Siemens A.E. in Greece, which have resulted in extensive negative media coverage concerning the C4I system.

As previously reported, Russian authorities are conducting widespread investigations regarding possible fraudulent activities of resellers and governmental officials relating to procurement of medical equipment in the public sector. As is the case with other providers of medical equipment, OOO Siemens, Russia, has received numerous information requests and inquiries were made on-site by the authorities regarding tenders in the public healthcare sector. OOO Siemens is cooperating in the ongoing investigations which also relate to certain individual employees.

As previously reported, in April 2009, the Defense Criminal Investigative Service of the U.S. Department of Defense conducted a search at the premises of Siemens Medical Solutions USA, Inc., United States, in Malvern, Pennsylvania, in connection with an investigation relating to a Siemens contract with the U.S. Department of Defense for the provision of medical equipment. Siemens is cooperating with the authorities.

As previously reported, in June 2009, Siemens AG and two of its subsidiaries voluntarily self-reported, among others, possible violations of U.S. Export Administration Regulations to the responsible U.S. authorities. In October, 2011, the U.S. Department of Commerce notified Siemens that it closed its case without taking further action. In January

2013, the U.S. Department of the Treasury notified Siemens that it closed its case without taking further action.

As previously reported, in December 2011, the United States Attorney's Office for the Northern District of New York served a Grand Jury subpoena on Siemens that seeks records of consulting payments for business

Table of Contents

conducted by the Building Technologies Business Unit in New York State over the period from January 1, 2000 through September 30, 2011. In June 2013, the authority notified Siemens that it closed its case.

In February 2012, the United States Attorney's Office for the Eastern District of New York served a subpoena on Siemens Healthcare Diagnostics Inc., United States, for information relating to a diagnostics process. Siemens is cooperating with the authority.

In January 2013, Siemens Electrical, LLC, USA (Siemens Electrical), an entity wholly-owned by Siemens Industry, Inc., USA, entered into a Deferred Prosecution Agreement (DPA) with the New York County District Attorney's Office. The DPA relates to misconduct concerning Master Electrician and Minority Business Enterprise requirements in connection with contracts with the New York City Department of Environmental Protection. The individuals responsible for the admitted misconduct were Siemens' former business partners to the predecessor to Siemens Electrical. Under the terms of the DPA, Siemens Electrical agreed to, among other things, forfeit US\$10 million. The case will be dismissed after two years if the company meets certain specified conditions under the DPA.

In March 2013, Nokia Siemens Networks Holding B.V. (NSN), Nokia Corporation and Nokia Finance International B. V. (Nokia Finance) filed a request for arbitration against Siemens AG. NSN, Nokia Corporation and Nokia Finance sought damages in the amount of €238 million for alleged breaches of the framework agreement entered into among the parties in 2007. The claims related to a contract which had been transferred to a subsidiary of NSN. In connection with the sale of Siemens AG's shares in NSN to Nokia on July 1, 2013, the parties settled the dispute.

End of October 2013 Essent Wind Nordsee Ost Planungs- und Betriebsgesellschaft mbH filed a request for arbitration against Siemens AG alleging violations of a contract for the delivery of a High Voltage Substation entered into by the parties in 2010. The claimant claims damages in an amount of €256 million plus interest and a determination that Siemens AG shall be liable for any further damages, which are claimed to amount to €152 million. Siemens AG will defend itself against this action.

In addition to the investigations and legal proceedings described above, Siemens AG and its subsidiaries have been named as defendants in various other legal actions and proceedings arising in connection with their activities as a global diversified group. Some of these pending proceedings have been previously disclosed. Some of the legal actions include claims or potential claims for punitive damages or claims for indeterminate amounts of damages. Siemens is from time to time also involved in regulatory investigations beyond those described above. Siemens is cooperating with the relevant authorities in several jurisdictions and, where appropriate, conducts internal investigations regarding potential wrongdoing with the assistance of in-house and external counsel. Given the number of legal actions and other proceedings to which Siemens is subject, some may result in adverse decisions. Siemens contests actions and proceedings when it considers it appropriate. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases in which claimants seek indeterminate damages, Siemens may not be able to predict what the eventual loss or range of loss related to such matters will be. The final resolution of the matters discussed in this paragraph could have a material effect on Siemens' business, results of operations and financial condition for any reporting period in which an adverse decision is rendered. However, Siemens currently does not expect its business, results of operations and financial condition to be materially affected by the additional legal matters not separately discussed in this paragraph.

ITEM 4A: UNRESOLVED STAFF COMMENTS

Not applicable

ITEM 5: OPERATING AND FINANCIAL REVIEW AND PROSPECTS

INTRODUCTION

This document contains statements related to our future business and financial performance and future events or developments involving Siemens that may constitute forward-looking statements within the meaning of

Table of Contents

Section 21E of the Securities Exchange Act of 1934. These statements may be identified by words such as expects, looks forward to, anticipates, intends, plans, believes, seeks, estimates, will, project or words of similar meaning. We may also make forward-looking statements in other reports, in presentations, in material delivered to shareholders and in press releases. In addition, our representatives may from time to time make oral forward-looking statements. Such statements are based on the current expectations and certain assumptions of Siemens management, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens control, affect Siemens operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements or anticipated on the basis of historical trends. These factors include in particular, but are not limited to, the matters described in Item 3: Key information Risk factors.

Further information about risks and uncertainties affecting Siemens is included throughout this annual report on Form 20-F and in our other filings with the SEC, which are available on the Siemens website, www.siemens.com, and on the SEC's website, www.sec.gov. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results, performance or achievements of Siemens may vary materially from those described in the relevant forward-looking statement as being expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens neither intends, nor assumes any obligation, to update or revise these forward-looking statements in light of developments which differ from those anticipated.

The following discussion of our financial condition and results of operations should be read in conjunction with our Consolidated Financial Statements and the related Notes prepared in accordance with IFRS, as issued by the IASB and as adopted by the EU, as described in Item 18: Financial Statements Notes to Consolidated Financial Statements Note 1. Due to rounding, numbers presented throughout this Form 20-F may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.

In this report, we present a number of supplemental financial measures that are or may be non-GAAP financial measures as defined in the rules of the SEC. For definitions of these financial measures and a discussion of the most directly comparable IFRS financial measures, the usefulness of Siemens supplemental financial measures, the limitations associated with these measures and reconciliations to the most comparable IFRS financial measures, see Item 5: Operating and financial review and prospects Supplemental financial measures.

BUSINESS AND ECONOMIC ENVIRONMENT

THE SIEMENS GROUP ORGANIZATION AND BASIS OF PRESENTATION

We are a globally operating technology company with core activities in the fields of energy, healthcare, industry, and infrastructure, and we occupy leading market positions worldwide in the majority of our businesses. We can look back on a successful history spanning 166 years, with groundbreaking and revolutionary innovations such as the invention of the dynamo, the first commercial light bulb, the first electric streetcar, the construction of the first public power plant, and the first images of the inside of the human body. On a continuing basis, we have around 362,000 employees as of September 30, 2013 and business activities in nearly all countries of the world and reported consolidated revenue of 75.882 billion in fiscal 2013. We operate in excess of 290 major production and manufacturing plants worldwide. In addition, we have office buildings, warehouses, research and development facilities or sales offices in almost every country in the world.

Siemens comprises Siemens AG, a stock corporation under the Federal laws of Germany, as the parent company and a total of about 900 legal entities, including minority investments. Our Company is incorporated in Germany, with our corporate headquarters situated in Munich. Siemens operates under the leadership of its Managing Board, which

comprises the President and Chief Executive Officer (CEO) and the Chief Financial Officer (CFO) as well as the heads of selected corporate functions and the CEOs of the Sectors.

Table of Contents

Our fundamental organizational principles are:

the CEO principle,

the end-to-end business responsibility of the Sectors, Divisions and Business Units, and

the unrestricted right of selected corporate functions to issue instructions in relation to a function to the extent legally permissible.

The Siemens Managing Board is the sole management body and has overall business responsibility in accordance with the German Stock Corporation Act (Aktengesetz, AktG). At all other organizational levels within our Company, management responsibility is assigned to individuals who make decisions and assume personal responsibility (CEO principle). This principle establishes clear and direct responsibilities and fosters efficient decision-making.

Our Sectors, Divisions, Business Units and Financial Services (SFS) are global entrepreneurs and have end-to-end business responsibility worldwide, including with regard to their operating results. They therefore have right of way over the regional units in business matters. During fiscal 2013 our regional units were organized in Clusters and Countries, which were responsible for the local customer relationship management and for implementing the business strategies of the Sectors and SFS as well as the requirements set by the corporate functions.

In addition to their particular authority to issue binding company-wide guidelines and to their monitoring and coordinating responsibilities, the heads of selected corporate functions (Finance and Controlling, Legal and Compliance and Human Resources, for example) have an unrestricted right to issue instructions in relation to a function across all parts of the Company to the extent legally permissible.

Below the Managing Board, Siemens is structured organizationally into Sectors, SFS which acts as business partner for the Sectors and also conducts its own business with external customers, Cross-Sector Services that support other Siemens units, Corporate Units with specific corporate functions, and regional Clusters. The Sectors are principally broken down into Divisions and these in turn into Business Units.

Our business activities focus on our four Sectors, Energy, Healthcare, Industry and Infrastructure & Cities. These Sectors form four of our reportable segments. In addition to our four Sectors, we have two additional reportable segments: Equity Investments and SFS.

Within this Item, we provide financial measures for our four Sectors and for two Businesses, each combining two Divisions within a Sector as well as for eight Divisions of our Sectors. These financial measures include: orders, revenue, profit and profit margin. Divisions within a Sector may do business with each other, leading to corresponding orders and revenue. Such orders and revenues are only eliminated on a Sector level.

Table of Contents

Furthermore, our reportable segments may do business with each other, leading to corresponding orders and revenue. Such orders and revenue are eliminated on the Siemens level within Eliminations, Corporate Treasury and other reconciling items and are not included in orders and revenue with external customers (external orders and external revenue, respectively) reported in this document. Free cash flow and further information is reported for each reportable segment in the Notes to Consolidated Financial Statements. For information related to the definition of these financial measures and to the reconciliation of segment financial measures to the Consolidated Financial Statements, see Item 5: Operating and financial review and prospects Supplemental financial measures as well as Item 18: Financial Statements Notes to Consolidated Financial Statements Note 36.

On a geographic basis, Siemens was subdivided into 14 Regional Clusters as of September 30, 2013, which were in turn assigned to one of our three reporting regions. We report financial measures for these three regions:

As of November 2013, following the close of fiscal 2013, we disbanded our Regional Cluster organization. Following this organizational change, we have designated 30 Lead Countries which are individually responsible for managing a number of other countries regarding market penetration. Each Lead Country reports directly to the Managing Board.

In addition, we report financial information at Group level for certain major countries within each region, including Germany (within the region Europe, C.I.S., Africa, Middle East), the U.S. (within the region Americas), and China (within the region Asia, Australia).

FINANCIAL PERFORMANCE SYSTEM

Overview

As part of One Siemens, we have developed a financial target system for capital-efficient growth that we believe will increase the value of our Company. For further information on One Siemens see Item 4: Information on the Company Strategy Strategy of the Siemens Group. Our goal is to achieve continuous improvement relative to the market and our competitors. The financial target system defines indicators for **revenue growth, profitability and capital efficiency**, the optimization of our **capital structure**, and our dividend policy. In addition, we set hurdle rates that generally must be considered before we make acquisitions.

In the following subchapters we describe **financial performance measures** which have been defined in accordance with One Siemens and are used to manage and control activities at the Group level. These measures are or may be non-GAAP financial measures. Other companies that report or describe similarly titled financial measures may calculate them differently. For further information about these measures, please see Item 5: Operating and financial review and prospects Supplemental financial measures.

Revenue growth

We believe that profitable **revenue growth** is an important driver for increasing our Company's value over the long term. Within the framework of One Siemens we have set ourselves the goal to grow our revenue faster than the average revenue growth of our most relevant competitors. For comparison with our competitors, our revenue growth is calculated as the growth rate of reported revenue as presented in the Consolidated Financial

Table of Contents

Statements. For purposes of measuring, managing and controlling the organic revenue growth this growth rate is adjusted for currency translation and portfolio effects. A detailed analysis regarding revenue growth is provided in Item 5: Operating and financial review and prospects Fiscal 2013 compared to fiscal 2012 Results of Siemens Orders and revenue.

Profitability and capital efficiency

Within the framework of One Siemens it is our goal to achieve margins throughout the entire business cycle that are comparable to those of the best competitors within our markets. We seek to maintain or improve the profitability of our businesses as appropriate. Therefore we have defined adjusted EBITDA margin ranges for our four Sectors. These are defined as the ratio of adjusted EBITDA (as presented in Item 5: Operating and financial review and prospects Reconciliation to adjusted EBITDA (continuing operations)) to revenue. Adjusted EBITDA target margin ranges for the Sectors, and their performance are shown in the chart below.

Table of Contents

In fiscal 2013, we used income from continuing operations at the Group level to measure, manage and control profitability. For a detailed analysis of this measure refer to Item 5: Operating and financial review and prospects Fiscal 2013 compared to fiscal 2012 Results of Siemens Consolidated statements of income. Effective with the beginning of fiscal 2014, we use net income. This measure is the primary driver of basic earnings per share (EPS) from net income, which we use for communicating with the capital markets.

Within the framework of One Siemens we seek to work profitably and as efficiently as possible with the capital of our shareholders and lenders. We manage and control our capital efficiency using adjusted return on capital employed, or **ROCE (adjusted)**, for continuing operations. This financial measure assesses our generated income from the point of view of our shareholders and lenders. ROCE (adjusted) for continuing operations is defined as income from continuing operations before interest after tax divided by average capital employed. We intend to achieve a target for ROCE (adjusted) for continuing operations of 15% to 20%. ROCE (adjusted) for continuing operations amounted to 13.8% in fiscal 2013, compared to 15.5% a year earlier. The decrease was due to a combination of lower income from continuing operations and higher average capital employed. ROCE (adjusted) for continuing and discontinued operations amounted to 13.5% in fiscal 2013, compared to 13.1% a year earlier. For information on the calculation of ROCE (adjusted) and its components see Item 5: Operating and financial review and prospects Supplemental financial measures. Siemens weighted average cost of capital (WACC) at the end of fiscal 2013 was approximately 7.5%.

Our financial indicator for measuring capital efficiency at SFS is return on equity after tax, or **ROE (after tax)**, in line with common practice in the financial services industry. We define ROE (after tax) as SFS profit after tax, divided by SFS average allocated equity. For purposes of calculating ROE (after tax), the relevant income tax is calculated on a simplified basis, by applying an assumed 30% flat tax rate to SFS profit, excluding income (loss) from investments accounted for using the equity method, net, which is basically net of income tax already, and tax-free income components and others such as components which have already been taxed or are generally tax-free. For information on the calculation of ROE (after tax) and its components, see Item 5: Operating and financial review and prospects Supplemental financial measures. We intend to achieve a target for ROE (after tax) of 15% to 20% at SFS.

Table of Contents

Capital structure

A key consideration within the framework of One Siemens is to maintain ready access to the capital markets through various debt products and preserve our ability to repay and service our debt obligations over time. Therefore, we use the ratio of **adjusted industrial net debt to adjusted EBITDA** for managing and controlling our capital structure and as an indicator for the required period in years to repay the adjusted industrial net debt. Interest, taxes, depreciation and amortization are not taken into consideration for purposes of this financial measure. Our goal is to achieve a ratio in the range of 0.5 – 1.0. The capital structure ratio as of September 30, 2013 increased to 0.34, compared to 0.24 a year earlier. This difference was due to an increase of adjusted industrial net debt and a decrease of adjusted EBITDA (continuing operations). For more information, see Item 5: Operating and financial review and prospects Reconciliation to adjusted EBITDA (continuing operations) and Item 5: Operating and financial review and prospects Liquidity and capital resources Capital structure.

Dividend and share buybacks

We intend to continue providing an attractive return to shareholders. Therefore in the years ahead we intend to propose a dividend payout which, combined with outlays during the fiscal year for publicly announced share buybacks, results in a sum representing 40% to 60% of net income, which for this purpose we may adjust to exclude selected exceptional non-cash effects. Furthermore, for fiscal 2014, we are taking proceeds from the sale of the NSN stake in fiscal 2013 into consideration. As in the past, we intend to fund the dividend payout from Free cash flow.

At the Annual Shareholders Meeting, the Managing Board, in agreement with the Supervisory Board, will submit the following proposal to allocate the unappropriated net income of Siemens AG for the fiscal year ended September 30, 2013: to distribute a dividend of 3.00 on each no-par value share entitled to the dividend for fiscal year 2013 existing at the date of the Annual Shareholders Meeting, with the remaining amount to be carried forward. Payment of the proposed dividend is contingent upon approval by Siemens shareholders at the Annual Shareholders Meeting on January 28, 2014. The prior year dividend was 3.00 per share.

Table of Contents

The proposed dividend of 3.00 per share for fiscal 2013 represents a total payout of 2.529 billion based on shares outstanding as of September 30, 2013. Based on net income of 4.409 billion for fiscal 2013, the dividend payout percentage would be 57%. The percentage for fiscal 2012 was 59%, based on a total dividend payout of 2.528 billion and a net income of 4.282 billion. Net income in fiscal 2012 was adjusted retrospectively for effects of adopting IAS 19R.

Outlays for Siemens publicly announced share buybacks (excluding incidental transaction charges) during fiscal 2013 totaled 1.152 billion and represent 26% of net income. The percentage for fiscal 2012 was 41% with outlays for share buybacks in the amount of 1.766 billion.

With the spin-off of OSRAM in fiscal 2013, Siemens shareholders received one OSRAM share per ten Siemens AG shares. For additional information regarding the spin-off of OSRAM, see Item 4: Information on the Company Description of business Equity Investments.

Additional measures

In addition to the financial performance measures discussed above, we use several other financial measures to assess the economic success of our business activities. To determine whether a particular investment is likely to generate value for Siemens, we use net present value or economic value added (EVA). EVA considers the cost of capital in calculating value creation by comparing the expected earnings of an investment against the cost of capital employed. EVA is also an indicator for measuring capital efficiency in our Sectors and at SFS.

To measure liquidity management of our operating activities, we analyze net operating working capital turns. In addition, we set hurdle rates that generally must be considered before we make acquisitions. In particular, acquisitions should have the potential to be accretive to EVA within three years after the integration and generate a 15% cash return within five years. Cash return is defined as Free cash flow divided by average capital employed.

ECONOMIC ENVIRONMENT

Worldwide economic environment

The beginning of fiscal 2013 was accompanied by a further slowdown of the global economy. Although European financial markets calmed in reaction to a statement by the European Central Bank (ECB) president committing the ECB to preserve the Euro, worldwide economic activity decreased thereafter. Global gross domestic product (GDP) growth hit a trough of less than 2% in the fourth quarter of calendar 2012, and this continued through the first quarter of calendar 2013. Since then, the world economy has been reaccelerating, due to a slightly stronger U.S. economy, a recovery in Europe, the stabilization of Chinese growth (which slowed at the beginning of 2013), and substantial improvements in Japan. World GDP growth has picked up to more than 3% for the rest of 2013. However, because of the weak start to the year the recent reacceleration of the global economy does not yet bring annual growth figures back to prior-year level. Global GDP growth is expected to slow to 2.4% in calendar 2013 from 2.7% in calendar 2012. Growth of global fixed investment spending and value added manufacturing both important indicators for Siemens as a producer of capital goods is projected to decline to an even greater degree: fixed investments from 4.1% in 2012 to 3.1% in 2013, and value-added manufacturing from 2.9% in 2012 to 2.1% in 2013. These global aggregate figures reflect fairly divergent

Table of Contents

developments. On the one hand, most advanced countries' economies were gaining momentum in the course of calendar 2013. On the other hand many emerging countries were losing momentum compared to higher growth rates in the past.

In most of the larger **European** economies the recession has ended. For the first time after six quarters of shrinking GDP, Euro zone production increased again in the spring quarter of 2013. In addition, government bond yields receded clearly in the countries most affected by the sovereign debt crisis, which reduced their borrowing costs and put government budgets on a more sustainable path. The crisis in Cyprus – the fifth country in the European Union to receive an international bail-out – had only a temporary effect on yields and volatility in financial markets. As governments kept tightening their budgets, fiscal austerity remained a drag on the European economy. In addition, unresolved problems in the banking sector restricted credit supply to the private sector. This lack of sufficient funds to finance investments still has the potential to stifle the region's recovery. Exchange rate developments involving the Euro did not support Euro zone exports. In the **Middle East** economic recovery continued to be very weak. In Egypt, the political crisis intensified again and the conflict in Syria continued to escalate. Oil-exporting countries were affected by the slowdown of the world economy. GDP growth in these countries was decreasing below historical trends. Despite some moderation in commodity prices, GDP growth in **Africa** picked up slightly. However, uncertainty on the economic and political fronts poses a continuing threat to African economic development. Economic activity in the **C.I.S.** countries, which is mainly determined by its largest member, Russia, was weak again in 2013. Similar to some other emerging countries, Russia suffered from a reversal of capital flows out of the country. In sum, the region Europe, C.I.S., Africa and Middle East in 2013 is projected to grow at nearly the same modest rate of 1% as in 2012. Investment spending performed even worse: it contracted 1% in 2013, after it had already shrunk 0.4% in 2012. Value added manufacturing also stagnated in 2013 after a decline in 2012.

The **Americas** region saw significantly slower growth in 2013: GDP increased 1.8%, after growth of 2.7% in 2012. The U.S. was the main factor, due to budget tightening measures (the sequester) which started at the beginning of calendar 2013. According to an International Monetary Fund estimate, the sequester reduced the country's 2013 growth rate by as much as 1.75 percentage points. Accordingly, GDP figures for the U.S. are masking a gradual improvement in the private sector. For example, the construction sector was recovering further, consumer spending was growing moderately, and fixed investments – which were affected most by the political uncertainties and even went to negative growth at the beginning of 2013 – were picking up. Monetary policy continued to be very expansionary, although fears of a gradual reduction (tapering) of quantitative easing measures caused long-term interest rates to rise. Latin American growth was low and roughly unchanged compared to 2012. After a very low GDP increase of 0.9% in 2012, the Brazilian economy accelerated modestly to 2.4% in 2013. Because the Brazilian economy is estimated to operate near its potential, supply-side constraints have held back growth and exacerbated inflationary pressures. For the Americas region overall, growth of investment spending and value-added manufacturing both slowed in 2013: fixed investment growth from 4.6% in 2012 to 3.0% in 2013, value-added manufacturing from 4.3% to 1.8%.

Table of Contents

In **Asia, Australia** GDP growth in 2013 is expected to remain at 4.8%, virtually the same level as in the two previous years. In the first half of 2013, the Chinese economy continued to slow down to 7.5% GDP growth year-over-year because global demand for Chinese products was weaker and concerns emerged about the health of the country's financial system and the sustainability of its public debt. India had to deal with even more severe problems. The slowing economy, a current account deficit, high inflation and unresolved structural problems caused foreign capital to exit the country and the Rupee to lose one fifth of its value against the U.S. dollar within one year. These adverse developments for the Asia, Australia region were counterbalanced by the recovery of the Japanese economy. The government's unusual measures to kick-start the Japanese economy out of its deflationary spiral seem to be successful: GDP expanded by a 4% annual rate in the first half of 2013. Although GDP growth for the Asia, Australia region remained stable in 2013, growth of fixed investment and value-added manufacturing slowed by roughly one percentage point, to 5.4% and 3.6%, respectively compared to 2012.

The partly estimated figures presented here for GDP, fixed investments and manufacturing value added are calculated by Siemens AG based on an IHS Global Insight report dated October 15, 2013.

Our businesses are dependent on the development of raw material prices. Key materials to which we have significant cost exposure include copper, various grades and formats of steel and aluminum. In addition, within stainless steel we have exposure related to nickel and ferro-alloy materials.

The average monthly price of copper (denominated in per metric ton) for September 2013 was 15% lower than the average monthly price in September 2012, reflecting a more moderate economic sentiment during fiscal 2013 and increasing production from new or extended mine projects. Prices on a fiscal-year average were 5% lower in fiscal 2013 than the average for fiscal 2012. Because copper is produced in multiple locations and traded in multiple locations, such as the London Metal Exchange, the risk to Siemens is primarily a price risk rather than a supply risk.

Average monthly prices of aluminum traded at the London Metal Exchange were 17% lower in September 2013 as compared to September 2012. Prices on a fiscal-year average were 8% lower in fiscal 2013 than the average for fiscal 2012. Higher premiums for physically delivered aluminum offset the erosion of exchange prices to some extent. Besides that, the aluminum industry is suffering from oversupply due to a combination of weaker investment sentiment among customers and rapid expansion of production capacities by manufacturers. As with copper, we see developments in the aluminum market as posing a price risk, rather than a supply risk.

The average monthly steel prices for September 2013 declined by 10% compared to the average monthly prices in September 2012. Prices on a fiscal-year average were 8% lower in fiscal 2013 than the average for fiscal 2012 (source: CRU, an independent business analysis and consultancy group focused on, among other things, the mining and metals sectors).

Table of Contents

Our main exposure to the prices of copper and related products, and to carbon steel and stainless steel, is in the Sectors Energy, Industry and Infrastructure & Cities. Our main price exposure related to aluminum is in the Energy Sector. In addition, Siemens is generally exposed to energy and fuel prices, both directly (electricity, gas, oil) and indirectly (energy used in the manufacturing processes of suppliers, fuels included in logistics costs).

Siemens employs various strategies to reduce the price risk in its project and product businesses, such as long-term contracting with suppliers, physical and financial hedging and price escalation clauses with customers.

Market development

Overall, markets served by our **Energy** Sector grew moderately in fiscal 2013 compared to fiscal 2012, with all of the Sector's businesses except for solar power benefiting from improved market conditions year-over-year. In particular, the markets for fossil power, wind power and power transmission recovered from market declines in fiscal 2012 and returned to the levels reached in fiscal 2011.

Growth for the markets served by our **Fossil Power Generation** Division benefited from a shift towards larger, more efficient units with higher power output. Globally, customers in emerging markets mainly added new capacities while customers in advanced economies mainly replaced existing power plants that are now considered relatively inefficient and inflexible. Despite the overall growth of fossil markets, the market for advanced gas power plants remained approximately at the same level as in fiscal 2012. Demand in Europe was held back by an ongoing slow economic development and uncertainties in regulatory frameworks. Political instability impacted market development in the Middle East despite social and economic pressure to add capacity. Within the Americas region, the U.S. added gas turbines to replace aging infrastructure and take advantage of the country's ongoing natural gas boom. Fossil markets in the Asia, Australia region remained strong, with a number of nations adding capacity. These included China and India for coal-fired power generation and South Korea for gas-fired power plants.

In the markets served by our **Wind Power** Division, growth came from new offshore wind projects. Also onshore wind markets returned to a moderate growth path compared to fiscal 2012, except in the U.S. where concerns about potential expiration of tax incentives had led to a market boom due to project pre-drawings in 2012.

The markets served by our **Oil & Gas** Division rose on increased investment demand for exploration and production of oil and gas. On a geographic basis, market growth for the Division's compression and oil and gas solutions business came mainly from the U.S., the Middle East, Africa, Russia, and Brazil. Growth in the Division's industrial power markets was led by Asia, the Middle East, and parts of Europe. While market for small steam turbines remained on previous year's level, demand was stronger for small-scale combined-cycle power plants.

The markets served by our **Power Transmission** Division recovered from weakness a year earlier. While markets grew slightly in most regions, year-over-year, growth was strongest in North-East Asia, the Middle East,

Table of Contents

Africa and the Americas. In emerging countries, growth was driven mainly by expansion of infrastructure. In industrialized economies, customers mainly replaced and modernized equipment and also integrated renewable sources into their transmission grids. Despite the larger pattern of global growth, power transmission markets also suffered from overcapacities in certain segments, especially power transformers.

In fiscal 2013, markets addressed by our **Healthcare** Sector grew moderately year-over-year. Growth was clearly driven by emerging markets, as these countries continue to expand access to healthcare for a broader population and build up their healthcare infrastructure. In contrast, markets in industrialized countries grew only modestly compared to the prior fiscal year as demand was held back by healthcare reforms and budgetary constraints, particularly in Europe. Healthcare IT markets grew faster than the healthcare market as a whole, on particular strength in the U.S. On a geographic basis, markets in Asia, Australia grew in the high single digits, including double-digit growth rates in China. Markets in the Americas including the U.S. grew moderately. Growth in the U.S. was supported by strong demand for healthcare IT solutions driven by the HITECH Act and the relevant portions of the Affordable Care Act. In contrast, markets in Europe, C.I.S., Africa, Middle East declined slightly. In Europe, markets experienced a further decline in spending for healthcare in southern and western European countries, which continued to suffer from the sovereign debt crisis.

The overall market for our **Industry** Sector as well as for the Divisions Industry Automation and the Drive Technologies declined in fiscal 2013. While the pharmaceutical, chemical, automotive and food and beverage markets grew slightly compared to the prior fiscal year, this growth was more than offset by declines in other markets including particularly machine building and Industry's markets for solutions and products for wind power. On a regional basis, markets in Asia, Australia and the Americas did not offer growth opportunities year-over-year, while markets in Europe declined, particularly in Southwest Europe. Within the Asia, Australia region, growth accelerated somewhat in China in the second half of fiscal 2013 following a weak development in the first half of the fiscal year. Within the Americas, market development in the U.S. was supported by lower energy prices due largely to a greater supply of energy produced in the U.S., primarily natural gas. But momentum declined somewhat during the fiscal year.

Within the markets served by our **Industry Automation** Division, short-cycle manufacturing industries saw de-stocking by customers which held back market development. Industrial IT markets grew moderately, but slightly below their expected long-term average growth rate.

Markets served by our **Drive Technologies** Division also saw de-stocking effects within short-cycle industries. Markets for industrial infrastructure industries, including the Division's markets for solutions and products for wind power and rail markets, declined or showed no growth momentum. Markets for long-cycle industries such as mining and oil and gas grew only slightly year-over-year, or even declined. In some industries customers delayed or postponed large infrastructure projects.

Overall, the market for the **Infrastructure & Cities** Sector grew moderately in fiscal 2013. While markets served by the Transportation & Logistics Business showed a steady recovery including tenders for a number of large projects, markets for the Power Grid Solutions & Products Business and the Building Technologies Division showed little or no growth. Customers cut spending in both these markets, and also delayed project awards in the power grid solutions market.

In fiscal 2013, markets served by our **Transportation & Logistics** Business showed a steady recovery from the weak environment a year earlier. Moderate growth was driven by large contract awards, particularly in the U.K. and the Middle East. Furthermore, market growth was positively influenced by demand from major cities, which continued to invest in public transport systems. On a regional basis, the highest growth rates came from Asia, Australia, driven by

strong demand from China. Demand in the Americas was also clearly up year-over-year. Within Europe, market development was divided between northwestern countries, which kept their public transport investments stable and southern countries, which held back investments as part of wider austerity programs. As a result, markets in the Europe, C.I.S., Africa, Middle East region showed the lowest growth of all regions.

Demand in the markets served by our **Power Grid Solutions & Products** Business remained weak across all regions in fiscal 2013. Higher demand from industrial customers was more than offset by delayed project awards and reduced grid investments by utility companies. Reduced investments were particularly evident in

Table of Contents

southern Europe. Investment sentiment was also affected by uncertainty in the regulatory environment, such as in Germany which is undertaking a massive shift to renewable energy (*Energiewende*). Demand in the U.S. showed signs of recovery in the industry and construction categories, but investment in power grid solutions by utilities remained weak.

Markets served by our **Building Technologies** Division held steady year-over-year as customers were hesitant to increase investments. Markets in the solution business suffered from ongoing price pressure due mainly to aggressive pricing by system houses and large providers of building technologies solutions. On a regional basis, slight market growth in Asia, Australia and the Americas was largely offset by a slight decline in Europe, C.I.S., Africa, Middle East.

FISCAL 2013 COMPARED TO FISCAL 2012**FISCAL 2013 FINANCIAL SUMMARY**

In fiscal 2013 our revenue came in 2% below the prior fiscal year. A slight increase at Infrastructure & Cities was more than offset by lower revenue at Industry and Energy. Revenue at Healthcare was stable year-over-year. On an organic basis, excluding currency translation and portfolio effects, revenue was 1% down year-over-year, within our forecast given in our Annual Report for fiscal 2012. We increased orders by 8% year-over-year. This increase was driven by our Infrastructure & Cities Sector and the Energy Sector. Both Sectors won a sharply higher volume from major contracts Infrastructure & Cities within its Transportation & Logistics Business and Energy within its Wind Power Division.

In fiscal 2013, we achieved income from continuing operations of 4.212 billion. This was lower than income from continuing operations of 4.642 billion a year earlier and also below our expectation of 4.5 to 5.0 billion as presented in our Annual Report for 2012. A condition of that forecast was an expected recovery in the markets for our short-cycle businesses in the second half of fiscal 2013. This did not materialize. Additionally, that forecast assumed Siemens 2014 charges for fiscal 2013 of 1.0 billion (pretax). In fact the amount came in 0.3 billion higher. Other factors largely offset each other. While profit in the Energy Sector was burdened by portfolio topics related to the solar business, this impact was more than offset by positive effects related to the sale of our stake in NSN. Due mainly to these factors, we adjusted our forecast for Income from continuing operations to 4.0 billion in the Interim Report for the third quarter of fiscal 2013.

Lower Income from continuing operations year-over-year was due mainly to sharply lower profit in Infrastructure & Cities and Industry. These Sectors took the two largest shares in the above-mentioned Siemens 2014 charges. Profit at Infrastructure & Cities was also burdened by sharply higher project charges while profit development at Industry was also held back by challenging market conditions, particularly in the Sector's short-cycle businesses as mentioned above. In contrast, Healthcare significantly improved profit year-over-year due mainly to successful execution of its Agenda 2013 and lower charges associated with the initiative compared to the prior year. Profit at Energy rose moderately year-over-year. In both fiscal years the Sector's profit development was heavily burdened by charges. While profit in the current period was particularly impacted by Siemens 2014 charges, charges related to projects and Iran were substantially higher in the prior-year period. While Total Sectors profit fell year-over-year, this was partly offset by a strong improvement outside the Sectors. In particular, Equity Investments posted a profit in fiscal 2013 following a loss a year earlier, as it benefited from a positive effect stemming from a partial reversal of an impairment of our stake in NSN and a gain related to the sale of this stake during the fourth quarter of fiscal 2013. In the prior fiscal year, results at Equity Investments were burdened by substantial restructuring charges at NSN.

Net income in fiscal 2013 increased to 4.409 billion, up from 4.282 billion a year earlier, as results related to discontinued operations swung to a positive 197 million in fiscal 2013 from a negative 360 million a year earlier. The improvement in discontinued operations year-over-year was due mainly to OSRAM, which we successfully spun off in the fourth quarter of fiscal 2013. Due to higher Net income and a lower number of shares outstanding year-over-year following the share buyback program which we initiated in the fourth quarter of fiscal 2012, basic EPS rose to 5.08 in the current period, up from 4.74 a year earlier.

Table of Contents

In fiscal 2013, Healthcare reached the upper end of its adjusted EBITDA margin target range. Adjusted EBITDA margin at Industry fell year-over-year, but the Sector remained in its target range. Despite burdens from the solar business, Energy nearly reached the lower end of its adjusted EBITDA target range, while Infrastructure & Cities clearly missed its range.

As a result of a combination of lower than expected Income from continuing operations and a higher average capital employed, ROCE (adjusted) for continuing operations declined to 13.8% in fiscal 2013. This was below the lower end of our target range of 15% to 20%, which we expected to reach. ROCE (adjusted) for continuing operations a year earlier was 15.5%.

Our Free cash flow from continuing operations rose 11% to 5.257 billion year-over-year, as we increased our cash flows from operating activities and reduced investments in intangible assets and property, plant and equipment year-over-year.

We made further progress in fiscal 2013 with regard to reaching our capital structure target. This target is defined as the ratio of adjusted industrial net debt to adjusted EBITDA, and set at 0.5 to 1.0 for the medium term. As forecast in our Annual Report for 2012, we increased the ratio year-over-year, to 0.34 from 0.24 a year earlier.

Overall, we believe that we achieved the goals for revenue and our capital structure announced in our Annual Report for 2012. Also we exceeded our revised target for Income from continuing operations announced in our Interim Report for the third quarter of fiscal 2013. ROCE (adjusted) for continuing operations was below our expectations due primarily to lower Income from continuing operations than we forecast a year ago.

During the course of fiscal 2013 it became less likely that our previous expectations for our markets would materialize. We therefore no longer expect to achieve a Total Sectors profit margin of at least 12% in fiscal 2014. But we will continue to rigorously execute our Siemens 2014 program that was designed to achieve the margin target. At the end of fiscal 2013, we were ahead of identifying and implementing the measures within the program aimed at sustainably improving our productivity. We expect that Siemens 2014 will help us to narrow or close the gap to our competitors in coming years.

During fiscal 2013, we also made strong progress in focusing our portfolio. Our successful spin-off of OSRAM was the first such partial spin-off by a German company. With the spin-off, Siemens shareholders received one OSRAM share per ten Siemens AG shares. Independence gives OSRAM the entrepreneurial flexibility to focus exclusively on its own market, with additional sources for financing. A stake in OSRAM gives shareholders of Siemens AG an additional opportunity to participate in OSRAM's potential growth and value creation. The shares of Siemens AG rose on the first day of trading for OSRAM, July 8, 2013, and the shares of both companies clearly outperformed the German DAX stock index through the remainder of the fiscal year. We also sold our 50% stake in NSN. After the end of fiscal 2013, we signed an agreement to sell our business of mechanical, biological and chemical water treatment and processing. Furthermore, we intend to sell our airport logistics and postal automation business and exit our solar business after completion of projects under execution. At the same time, we strengthened our core activities by acquiring LMS International NV (LMS) to expand and complement the Industry Sector's industrial IT and software business, and by acquiring Invensys Rail to expand Infrastructure & Cities' presence in the growing global rail automation market.

We intend to continue providing an attractive return to shareholders. As in the past, we intend to fund the dividend payout from Free cash flow. The Siemens Managing Board, in agreement with the Supervisory Board, proposes a dividend of 3.00 per share, unchanged from a year earlier.

Table of Contents**RESULTS OF SIEMENS**

The following discussion presents selected information for Siemens for the fiscal year ended September 30, 2013:

Orders and revenue

Orders for fiscal 2013 totaled 82.351 billion, an 8% increase year-over-year, due primarily to higher volume from large orders. In contrast, revenue came in at 75.882 billion, down 2% from the prior year. This resulted in a book-to-bill ratio of 1.09 for Siemens in fiscal 2013. On an organic basis, excluding currency translation and portfolio effects, orders increased 10% and revenue came in 1% below the prior year.

The order backlog (defined as the sum of order backlogs of our Sectors) was 100 billion as of September 30, 2013, up from 97 billion a year earlier, despite negative currency translation effects of 4 billion.

	Orders (location of customer)					
	Year ended September 30,		% Change		therein	
	2013	2012	Actual	Adjusted ⁽¹⁾	Currency	Portfolio
	(in millions of €)					
Europe, C.I.S. ⁽²⁾ , Africa, Middle East	44,534	38,536	16%	16%	(1)%	1%
therein Germany	11,743	9,871	19%	19%	0%	0%
Americas	22,219	21,539	3%	5%	(3)%	1%
therein U.S.	14,635	14,727	(1)%	(1)%	(1)%	1%
Asia, Australia	15,598	15,863	(2)%	0%	(3)%	1%

Siemens	82,351	75,939	8%	10%	(2)%	1%

(1) Excluding currency translation and portfolio effects.

(2) Commonwealth of Independent States.

Orders related to external customers in fiscal 2013 increased 8% overall, with results varying among the Sectors. Infrastructure & Cities reported double-digit growth on large orders at Transportation & Logistics, including a 3.0 billion contract win for trains and maintenance in the U.K. Orders for Energy were up 7%, driven by major contracts for wind power, and were level in Healthcare. Order intake declined 3% in Industry due mainly to the challenging market environment for the Sector's short-cycle businesses during most of fiscal 2013. On a global basis, orders from emerging markets, as these markets are defined by the International Monetary Fund, increased 10%, faster than orders overall, and accounted for 28.702 billion, or 35%, of total orders for fiscal 2013.

In the region **Europe, C.I.S., Africa, Middle East**, orders increased 16%, including double-digit increases in Infrastructure & Cities and Energy driven by the major contract wins mentioned above. The higher volume of large orders in both Sectors was also the primary factor in order growth in Germany. Orders for Healthcare and Industry in the region came in slightly below the level of fiscal 2012. Within moderate order growth in the **Americas**, a 10% increase in Energy more than offset an 8% decline in Industry. Order intake in the **Asia, Australia** region showed a

slight decrease in fiscal 2013.

Table of Contents

As previously disclosed, Siemens has decided that, subject to certain limited exceptions, it will not enter into new contracts with customers in Iran and has issued group-wide policies establishing the details of its general decision. In the fourth quarter of fiscal 2012, as a result of an analysis of our contracts with Iranian customers in particular with respect to expected payment defaults and force majeure events, we recorded adjustments affecting several line items in our consolidated statements of income, in particular revenue and cost of sales, recognized in prior periods from projects that were still permitted to be provided under these policies. For additional information, see Item 3: Key information Risk factors.

	Revenue (location of customer)					
	Year ended September 30,		% Change		therein

(1) Excluding currency translation and portfolio effects.

(2) Commonwealth of Independent States.

Revenue related to external customers declined 2% compared to fiscal 2012. A slight increase in Infrastructure & Cities was more than offset by moderate declines in Energy and Industry due to weak investment sentiment through most of fiscal 2013 and continuing softness in Industry's short-cycle markets. Healthcare revenue came in near the prior-year level. On a global basis, emerging markets grew 1% and accounted for 25.827 billion, or 34%, of total revenue in fiscal 2013.

While revenue was stable year-over-year in the **Europe, C.I.S., Africa, Middle East** region, results within the region were mixed for the Sectors. Increases in Infrastructure & Cities and Energy were offset by declines in Industry and Healthcare. Lower revenue in the **Americas** was due primarily to Energy, which experienced an order gap for wind-farms in the U.S. in the latter half of calendar 2012 due to uncertainties regarding production tax incentives. The sharp drop in orders subsequently affected fiscal 2013 revenue development. In the **Asia, Australia** region, revenue declined 2% on decreases in Industry and Energy that could not be offset by increases in the other two Sectors.

Table of Contents**Consolidated Statements of Income**

	Year ended September 30,		% Change

Interest income	948	939	1%
Interest expenses	(789)	(760)	(4)%
Other financial income (expenses), net	(154)	(5)	<(200)%
Income from continuing operations before income taxes	5,843	6,636	(12)%
Income tax expenses	(1,630)	(1,994)	18%
<i>as percentage of income from continuing operations before income taxes</i>	<i>28%</i>	<i>30%</i>	
Income from continuing operations	4,212	4,642	(9)%
Income (loss) from discontinued operations, net of income taxes	197	(360)	n/a
Net income	4,409	4,282	3%
Net income attributable to non-controlling interests	126	132	
Net income attributable to shareholders of Siemens AG	4,284	4,151	3%

Income from continuing operations before income taxes for fiscal 2013 declined to 5.843 billion from 6.636 billion a year earlier.

The largest factor in the decline was 1.276 billion in charges in the Sectors for the Siemens 2014 program. These charges resulted from measures taken in fiscal 2013 to reduce costs by improving regional footprints, adjusting capacity, and increasing process efficiency. The charges are included in the following functional costs:

	Year ended September 30, 2013
	(in millions of €)
Cost of sales (and accordingly, gross profit)	762
Research and development expenses	37
Selling and general administrative expenses	374

In addition, charges of 104 million were included in other line items, predominantly in Other operating expenses. For comparison, in fiscal 2012, Healthcare reported charges of 184 million under its Agenda 2013 initiative, which began

a year before the Siemens 2014 program. In fiscal 2013, the Sector's charges under this initiative are included within Siemens 2014 charges.

A number of factors in addition to the Siemens 2014 charges reduced gross profit year-over-year. These included continuing market challenges, such as lower capacity utilization in Industry, pricing pressure and a less favorable revenue mix in a number of our businesses. In addition, both years included various charges and gains, including project charges in the Sectors Energy and Infrastructure & Cities. The most relevant of these charges are disclosed in Segment information analysis. While the net amounts of these items were significant at Group level in fiscal 2013 and fiscal 2012, there was only a small change in the net amount year-over-year.

Income from continuing operations before income taxes benefited from a sharply lower loss related to our stake in Nokia Siemens Networks Holding B.V. (NSN), which narrowed to 76 million from 741 million a year earlier. In addition, results related to NSN in fiscal 2013 benefited from a positive effect of 301 million

Table of Contents

stemming from a partial reversal of a fiscal 2009 impairment of our stake in NSN, and a gain of 76 million from the sale of the NSN stake in the fourth quarter of fiscal 2013. These changes year-over-year are included in Income (loss) from investments accounted for using the equity method.

Including the developments described above, Income from continuing operations before income taxes declined 12% year-over-year. Due to a lower tax base and a lower effective tax rate compared to fiscal 2012, the decline in **Income from continuing operations** year-over-year came in at 9%.

Income from discontinued operations, net of income taxes in fiscal 2013 was 197 million, compared to a loss of 360 million in fiscal 2012, and was comprised of the following:

	Year ended September 30,		% Change
	2013	2012	
	(in millions of)		
OSRAM	277	(135)	n/a
Siemens IT Solutions and Services	71	40	78%
Other	(151)	(265)	43%

This substantial positive swing was due mainly to OSRAM, for which the prior-year amount included a negative catch-up effect of 443 million (pretax), arising when we deemed it no longer highly probable to complete our original plan to dispose of OSRAM via an initial public offering. We subsequently completed the spin-off and listing of OSRAM in the fourth quarter of fiscal 2013.

In addition, the item Other in fiscal 2012 included a burden of 143 million (pretax) from a settlement related to Greece. For additional information on discontinued operations, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 2.

As a result of the positive swing in income from discontinued operations, **Net income** for Siemens was 3% higher than in the same period a year earlier. Net income attributable to shareholders of Siemens AG increased to 4.284 billion, from 4.151 billion in fiscal 2012.

Basic earnings per share were 5.08 in fiscal 2013, up from 4.74 in fiscal 2012, reflecting higher Net income attributable to shareholders of Siemens AG, and a lower number of weighted average shares outstanding due to share buybacks in fiscal 2013. For additional information, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 35.

Table of Contents

Energy reported a profit of 1.955 billion in fiscal 2013, up 3% year-over-year. The Sector took 301 million in charges under the Siemens 2014 program, primarily for reducing its cost structure, adjusting capacity and improving its regional footprint. Fossil Power Generation contributed lower earnings than a year earlier, but still accounted for most of the Sector's profit and was the highest profit performer among all Siemens Divisions. Profit at Oil & Gas increased year-over-year on substantially lower charges related to Iran. Wind Power's profit remained on the same level as in fiscal 2012, despite 94 million in charges related to turbine blades. Power Transmission cut its loss nearly in half compared to the prior year, due mainly to substantially lower charges mainly related to grid-connections to offshore wind-farms. These charges totaled 171 million in fiscal 2013 compared to 570 million in fiscal 2012. The solar business was reclassified from discontinued operations to continuing operations in fiscal 2013 and is reported within Energy on a retrospective basis. The loss from the solar business was nearly unchanged year-over-year, at 255 million, compared to 258 million a year earlier. In the current fiscal year, the loss included impairments and costs associated with the ramp-down of the business of 181 million. In fiscal 2012, the loss included impairments of 150 million.

Revenue declined 4% compared to the prior-year period as declines at Fossil Power Generation and Power Transmission were only partially offset by increases at Wind Power and Oil & Gas. On a regional basis, revenue rose in Europe, C.I.S., Africa, Middle East and declined in other regions. Orders came in 7% higher due mainly to large orders at Wind Power in Europe, C.I.S., Africa, Middle East. Order intake was clearly higher in the Americas, while orders declined significantly in the Asia, Australia region. The book-to-bill ratio for Energy was 1.08, and its order backlog was 54 billion at the end of the fiscal year.

Table of Contents

Fossil Power Generation generated profit of 1.693 billion in fiscal 2013, significantly below 1.933 billion in fiscal 2012. The main drivers of the change were a decline in revenue in the solutions business and a less favorable revenue mix particularly in the products business. Both years included burdens on profit. In the current year, the Division recorded 129 million in Siemens 2014 charges. A year earlier, charges of 152 million related to the Olkiluoto project in Finland were partly offset by an 87 million gain on the Division's divestment of its joint venture stake in OAO Power Machines. Revenue was 8% lower year-over-year, resulting mainly from declining order intake for turnkey projects. On a geographic basis, revenue declined significantly in the Europe, C.I.S., Africa, Middle East region. Order intake was down 4%, as a substantial decrease in Asia, Australia and a moderate decline in the region Europe, C.I.S., Africa, Middle East were partially offset by a significant increase in the Americas.

Profit at **Wind Power** was 306 million in fiscal 2013, nearly unchanged from fiscal 2012. Both fiscal years included burdens on profit. In the current fiscal year, the Division took the 94 million in charges mentioned above, for inspecting and retrofitting installed onshore turbine blades, primarily in the U.S. A year earlier, profit was held back by a 32 million provision related to a wind turbine component from an external supplier and a charge of 20 million related to capacity adjustment. Revenue was slightly higher than in the prior year as increases in Europe, C.I.S., Africa, Middle East and Asia, Australia more than compensated for a sharp decline in the Americas. The sharp decline in the Americas was due to the onshore wind farm business, where the U.S is the largest national market for Wind Power. New projects in the U.S. were halted or postponed in the latter half of 2012 due to uncertainty regarding continuation of production tax incentives. The resulting order gap led to a steep drop in fiscal 2013 revenue in the Americas compared to a year earlier. Order intake was up 34% year-over-year, due mainly to a much higher volume from large orders, which included several large offshore wind-farms in Europe, C.I.S., Africa, Middle East.

Profit at **Oil & Gas** almost doubled year-over-year, to 433 million, due primarily to substantially lower charges related to adjustments for long-term construction and service contracts with customers in Iran. In fiscal 2013, the Division recorded 46 million in these charges on Division profit in the first quarter as part of compliance with sanctions on Iran, primarily on its oil and gas industries, enacted in October 2012. In fiscal 2012, the Division recorded charges totaling 275 million related to Iran, mainly as a result of a revenue reduction of 282 million. For additional information regarding these adjustments, see Item 5: Operating and financial review and prospects Fiscal 2012 compared to fiscal 2011 Adjustments for long-term contracts with customers in Iran. The Division also took 34 million in charges for the Siemens 2014 program. Revenue was slightly higher compared to the prior year on increases in Europe, C.I.S., Africa, Middle East and the Americas, partially offset by a decrease in Asia, Australia. Order intake was up 9% as growth in Asia, Australia and Europe, C.I.S., Africa, Middle East more than offset a decline in the Americas.

Power Transmission sharply reduced its loss compared to fiscal 2012, to 156 million, despite 129 million in charges for the Siemens 2014 program. The major factor in the change was lower project charges related mainly to grid connections to offshore wind-farms, which fell to 171 million from 570 million a year earlier. These charges were due to project delays resulting from regulatory complexity and the projects' challenging marine environment, which required revised estimates of resources and personnel. Profit development was held back by margin compression related to these projects and orders booked in prior periods with significant pricing pressure. Operational challenges strongly cut back profit in the high-voltage products business. Revenue for the Division was down 6% year-over-year due to declines in Europe, C.I.S., Africa, Middle East and Asia, Australia. Orders came in 2% lower compared to the prior year, due in part to more selective order intake. On a regional basis, a decline in Europe, C.I.S., Africa, Middle East was partially offset by increases in other regions. The Division expects continuing challenges in coming quarters.

(2) Commonwealth of Independent States.

The Healthcare Sector delivered 2.048 billion in profit in fiscal 2013, up significantly from the prior-year level with all businesses contributing to profit growth. Results for the year were positively influenced by lower charges associated with the Sector's Agenda 2013 initiative, which declined to 84 million from 184 million in fiscal 2012. Healthcare intends to maintain the achievements of the initiative going forward, including improvements in cost position and competitiveness. In particular, expenses for research and development and selling and general administrative expenses both declined compared to fiscal 2012. Effective January 1, 2013, results for Healthcare included negative effects on profit from an excise tax on medical devices which was introduced in the U.S., affecting most businesses in the Sector.

Profit at Diagnostics came in at 350 million compared to 314 million a year earlier. Profit development followed the pattern of the Sector with regard to Agenda 2013, including lower charges and improvements in cost position. In particular the charges fell to 35 million from 80 million in fiscal 2012. Purchase price allocation (PPA) effects related to past acquisitions at Diagnostics were 169 million in fiscal 2013. A year earlier, Diagnostics recorded 173 million in PPA effects.

Revenue for Healthcare in fiscal 2013 was nearly unchanged compared to fiscal 2012, while orders increased slightly year-over-year. On an organic basis, both revenue and orders were up. On a geographic basis, revenue growth in Asia, Australia was offset by declines in the other regions. Asia, Australia and the Americas drove order growth due to increases in China and the U.S. The book-to-bill ratio was 1.02, and Healthcare's order backlog was 7 billion at the end of fiscal 2013.

Revenue at Diagnostics declined 1% in fiscal 2013, from 3.969 billion to 3.942 billion, and showed the same development as the Sector with regard to the regions. On comparable basis revenue was up 2%.

(2) Commonwealth of Independent States.

In fiscal 2013, profit at **Industry** fell sharply to 1.478 billion, impacted by 424 million in charges for the Siemens 2014 program primarily for improving the Sector's global footprint and reducing costs associated with administrative processes. Profit development was held back also by lower revenue and a less favorable business mix, due mainly to continuing softness in the Sector's short-cycle businesses. In addition, the Sector took 100 million in charges for two large projects at its metals technologies business.

The market environment for Industry through most of fiscal 2013 was clearly more challenging than a year earlier. Despite signs of stabilizing towards the end of the period, revenue declined moderately year-over-year on broad-based decreases at both Divisions and the metals technologies business. Orders for the Sector declined 3% year-over-year, as reported growth on larger orders at the end of the year was more than offset by a low order intake through most of fiscal 2013.

On a geographic basis, Industry's orders and revenue both showed a broad-based decline in all three reporting regions. The book-to-bill ratio was 0.99, and Industry's order backlog declined to 10 billion at the end of fiscal 2013.

Businesses					
Industry Automation	1,038	1,316	(21)%	12.7%	15.6%
Drive Technologies	527	970	(46)%	5.7%	10.1%

Profit at **Industry Automation** declined substantially year-over year, due in part to 114 million in charges for Siemens 2014. Continuing softness in the Division's short-cycle markets led to lower revenue year-over-year and reduced capacity utilization. The Division took measures to improve its business mix via a ramp-down of certain low-margin activities, including the solar inverter business. In contrast, the Division's industrial IT and software business contributed revenue and order growth year-over-year, due in part to recent acquisitions including LMS. Revenue for the Division overall came in 3% below the prior year, on declines in the Americas and Europe, C.I.S., Africa, Middle East. The Division's moderate decline in orders year-over-year was evident in all three reporting regions, led by a clear decrease in the Americas.

In addition, the Division took PPA effects related to long-lived assets of LMS, which totaled 33 million for the year. Effects from deferred revenue adjustments and inventory step-ups related to LMS totaled an additional 43 million. Both fiscal years under review included PPA effects from the acquisition of UGS Corp., acquired in fiscal 2007. These effects were 147 million in fiscal 2013 and 149 million a year earlier.

Profit at **Drive Technologies** in fiscal 2013 came in at 527 million, a sharp decline from the prior-year level. The main impact was 243 million in charges for Siemens 2014. Profit development also included a revenue-driven decline due to challenging market conditions for the Division's higher-margin short-cycle businesses and its offerings for renewable energy. On a geographic basis, both orders and revenue declined moderately on lower volume in all three reporting regions, particularly including Asia, Australia which showed a clear decline year-over-year.

(2) Commonwealth of Independent States.

Profit at **Infrastructure & Cities** came in at 306 million in fiscal 2013, down from 1.102 billion a year earlier. The biggest factor in this decline year-over-year was 468 million in Siemens 2014 charges, taken primarily to improve the Sector's cost efficiency and regional footprint. These charges led to declines in profit at Power Grid Solutions & Products and Building Technologies, which otherwise showed strong profit performances. Transportation & Logistics took the largest part of the Sector's Siemens 2014 charges.

Table of Contents

Furthermore, its profit was impacted by project charges of 270 million related to high-speed trains. In the prior fiscal year, charges related to these matters were sharply lower at 86 million. Transaction and integration costs related to its Invensys Rail acquisition, which closed in the third quarter of fiscal 2013, further impacted the Business profit year-over-year. As a result of the above mentioned factors, Transportation & Logistics posted a loss in the current fiscal year, compared to a profit in the prior fiscal year.

Revenue was up 2% compared to the prior fiscal year, as increases at Transportation & Logistics and Power Grid Solutions & Products more than offset a slight decline at Building Technologies. Orders for the Sector rose substantially year-over-year. This growth was driven by Transportation & Logistics, which recorded a sharply higher volume from major orders compared to the prior fiscal year including 3.0 billion for trains and maintenance in the U.K. Orders for Power Grid Solutions & Products were also higher year-over-year, while orders for Building Technologies came in near the prior-year level. On a regional basis, revenue rose in Europe, C.I.S., Africa, Middle East and in Asia, Australia. Regional order development was similar but even more pronounced. The large contract awards mentioned above drove growth in Europe, C.I.S., Africa, Middle East. Orders in Asia, Australia were also up substantially. On a book-to-bill ratio of 1.22, Infrastructure & Cities order backlog rose to 29 billion at the end of fiscal 2013.

Profit**Profit margin**

	Year ended			Year ended	
	September 30, 2013	2012	% Change	September 30, 2013	2012
Businesses					
Transportation & Logistics	(448)	236	n/a	(7.1)%	4.0%
Power Grid Solutions & Products	403	457	(12)%	6.6%	7.5%
Building Technologies	351	379	(7)%	6.1%	6.5%

Transportation & Logistics posted a loss of 448 million in the current fiscal year, compared to profit of 236 million a year earlier. The two main factors for the change were sharply higher project charges year-over-year, which included the above mentioned 270 million from delays for receiving certification for new high-speed trains in fiscal 2013, up from 86 million for these matters in the prior fiscal year, and 267 million in charges related to Siemens 2014. The latter charges include a goodwill impairment of 46 million on the airport logistics and postal automation business which Transportation & Logistics intends to sell. Profit development for the fiscal year was also held back by low margins associated with large long-term contracts. The

Table of Contents

acquisition of Invensys Rail during the third quarter of fiscal 2013 resulted in 76 million in transaction and integration costs for the fiscal year and PPA effects of 23 million. Revenue for the Business rose 6% while orders were up 87%, due primarily to a sharply higher volume from major orders year-over-year, including the above-mentioned 3.0 billion order in the U.K. Both revenue and order growth benefited from the acquisition of Invensys Rail.

Profit at **Power Grid Solutions & Products** came in at 403 million, down from 457 million a year earlier. The decline was due to 97 million in Siemens 2014 charges. Revenue and orders increased slightly year-over-year. On a regional basis, revenue was higher in Asia, Australia and the Americas and declined slightly in Europe, C.I.S., Africa, Middle East. Orders rose in Asia, Australia and Europe, C.I.S., Africa, Middle East, only partly offset by a decline in the Americas.

Profit at **Building Technology** declined to 351 million in fiscal 2013, from 379 million a year earlier as the Division absorbed 100 million in Siemens 2014 charges in the current period. Selective order intake led to a more favorable business mix compared to the prior fiscal year, particularly including Building Technologies higher-margin product and service business. It also led to a slight decline in revenue and orders year-over-year. On a regional basis, lower volume was due mainly to the Americas.

Equity Investments

In fiscal 2013, **Equity Investments** recorded a profit of 396 million, compared to a loss of 549 million a year earlier. This improvement year-over-year was due mainly to a sharply lower loss related to our share in NSN, which declined to 76 million from 741 million a year earlier. In addition, results related to NSN in fiscal 2013 benefited from a positive effect of 301 million stemming from a partial reversal of a fiscal 2009 impairment of our stake in NSN, and a gain of 76 million from the sale of the NSN stake in the fourth quarter of fiscal 2013. The equity investment loss related to our share in EN widened to 96 million in fiscal 2013 from a loss of 23 million a year earlier. The loss in the current period was due largely to additions to Siemens net investment in EN, which resulted in the recognition of previously unrecognized losses. Profit at Equity Investments in both fiscal years included equity investment income related to our stake in BSH.

Financial Services (SFS)

	Year ended		
	September 30,		
	2013	2012	% Change
	(in millions of)		
Income before income taxes	409	479	(14)%
Total assets	18,661	17,405	7%

Profit (defined as income before income taxes) at SFS came in at 409 million, compared to 479 million in the prior-year period, which benefited from a 78 million gain on the sale of a portion of SFS's stake in Bangalore International Airport Limited. SFS continued to successfully execute its growth strategy and higher total assets year-over-year helped generate a higher interest result compared to the prior-year. The current period was affected by burdens including a 52 million impairment of SFS's equity stake in a power plant project in the U.S.

Reconciliation to Consolidated Financial Statements

Reconciliation to Consolidated Financial Statements includes Centrally managed portfolio activities, Siemens Real Estate (SRE) and various categories of items which are not allocated to the Sectors and to SFS because the Company's management has determined that such items are not indicative of the Sectors' and SFS' respective performance.

Table of Contents

Centrally managed portfolio activities

Centrally managed portfolio activities reported a loss of 12 million in fiscal 2013, compared to a loss of 29 million in fiscal 2012.

Siemens Real Estate (SRE)

Income before income taxes at SRE was 171 million in fiscal 2013, compared to 115 million in fiscal 2012. This increase was due in part to higher income related to the disposal of real estate.

Corporate items and pensions

Corporate items and pensions reported a loss of 839 million in fiscal 2013 compared to a loss of 668 million in fiscal 2012. The loss at Corporate items was 419 million, compared to a loss of 261 million in fiscal 2012 which included positive effects related to legal and regulatory matters. Centrally carried pension expense totaled 420 million in fiscal 2013, compared to 407 million in fiscal 2012.

Eliminations, Corporate Treasury and other reconciling items

Income before income taxes from Eliminations, Corporate Treasury and other reconciling items was a negative 70 million in fiscal 2013, compared to a positive 23 million in the same period a year earlier. The change year-over-year included lower results from Corporate Treasury activities, due mainly to lower interest income from liquidity compared to the prior-year period.

FISCAL 2012 COMPARED TO FISCAL 2011

ADJUSTMENTS FOR LONG-TERM CONTRACTS WITH CUSTOMERS IN IRAN

As described in more detail in Item 5: Operating and financial review and prospects Fiscal 2013 compared to fiscal 2012 Results of Siemens, we have decided that, subject to certain limited exceptions, we will not enter into new contracts with customers in Iran and have issued group-wide policies establishing the details of our general decision. However, we are still party to a number of long-term construction and service contracts that were entered into prior to this general decision and were permitted under our policies at the time these contracts were entered into.

Our Iran policies, which are designed to ensure compliance with applicable sanctions, require the termination of contracts with Iranian customers when it is contractually permissible. The contracts with our Iranian customers include termination clauses for the event of a payment default and/or force majeure. The force majeure clause is applicable if, for example, business transactions with the customer and/or the products and services agreed upon in the contract are subject to sanctions.

Based on economic and political developments in the fourth quarter of fiscal 2012, we concluded at the end of fiscal 2012 that payment defaults under most of our existing contracts with Iranian customers were highly probable. Specifically, over the course of fiscal 2012, the U.S., the EU and other countries had imposed new sanctions or tightened existing sanctions against Iran. As a direct effect of these sanctions, Iranian oil exports decreased and restrictions on monetary transactions were implemented. Throughout fiscal 2012, decreasing cash flows from oil exports triggered an economic crisis in Iran that deepened in the fourth quarter of fiscal 2012. This economic crisis led to a material devaluation of the Iranian Rial, an increase in inflation and domestic political conflicts. In addition, conflicts with neighboring countries and discussions about the Iranian nuclear program intensified during fiscal 2012.

Against this background, we observed delays in receipt of advance payments due from our Iranian customers towards the end of fiscal 2012 and, as of the end of fiscal 2012, expected that there was a high probability of such payment delays becoming more significant in fiscal 2013, inevitably leading to payment defaults.

Table of Contents

We also believed that it was highly probable that we would be required to terminate certain contracts with our Iranian customers due to force majeure. Blacklistings of customers, and customers or their shareholders are generally considered to be force majeure events. In fact, one of our customers had previously been blacklisted by the EU in fiscal 2012 and appealed the blacklisting. Given that the final EU court decision was not available and that we expected further EU sanctions later in the 2012 calendar year, we subsequently concluded as of September 30, 2012 that it was highly probable that we would be required to terminate the contracts with that customer due to force majeure.

Based on these considerations, we analyzed each contract with our Iranian customers individually against the background of our Iran policies in the fourth quarter of fiscal 2012 and assessed if either the payment default scenario or the force majeure scenario triggered a change in accounting estimate. Based on this analysis we grouped our Iran contracts into contracts to be continued because management's best estimate was that these contracts would not be terminated and contracts to be terminated based on management's best estimate that these contracts would be terminated due to expected payment defaults or due to force majeure. During fiscal 2013, we terminated one of our largest contracts with Iranian customers as well as several small contracts. For the remaining contracts, we continuously reviewed whether changes in facts and circumstances, such as changes in applicable sanctions, would require a change in management's best estimate regarding the continuation or termination of the contracts. As of September 30, 2013, we considered the termination of the remaining contracts that we expected to terminate at the end of fiscal 2012 still highly probable, except for two minor contracts the termination of which was no longer considered to be contractually permissible.

For contracts to be continued, the worsened creditworthiness led to uncertainty about the collectability of amounts already included in revenue and in income from continuing operations. Uncollectable amounts or amounts for which recovery had ceased to be probable were recognized as an expense.

For contracts to be terminated, certain goods or services that were originally agreed under the relevant contract would not be delivered or rendered to the customer. The scope of the contract and thereby its volume decreased as a result of the expected termination. This decrease in total contract volume is reflected in decreased total contract revenue and decreased total contract costs. The absolute and relative decrease in total contract revenue and total contract costs, however, is not identical for each contract for a number of reasons. As our contracts often require that we give prior notice of termination, we have to continue to perform during the notice period and generally incur contract costs during this period. In addition, some expected future contract-specific components were sub-contracted and could not be cancelled by us without incurring additional costs, for example due to damage payments. These and other expected future contract costs until completion under the revised scope had to be considered in the accounting for construction contracts even though the related contract revenue would no longer be generated due to the termination of the contract.

As a result of the analysis, we determined that adjustments in accordance with the requirements of IAS 11 had to be made to a number of the contracts reviewed. The adjustments in the fourth quarter of fiscal 2012 resulted in a reduction of income from continuing operations before income taxes of 347 million. The reduction was due mainly to a reversal of revenue of 389 million, predominantly in the Energy Sector, which was partly compensated by adjustments in cost of sales. In our segment reporting, profits of the Energy and Infrastructure and Cities Sectors were reduced by 327 million and 20 million, respectively.

RESULTS OF SIEMENS

The following discussion presents selected information for Siemens for the fiscal year ended September 30, 2012:

Orders and revenue

Revenue increased steadily quarter by quarter throughout fiscal 2012 and came in at 77.395 billion, up 7% from the prior-year period. Revenue growth included increases in all Sectors and all three reporting regions, supported by Siemens' strong order backlog. Slowing growth in the world economy was evident in the development of orders, which decreased 10% year-over-year primarily due to substantially lower volume from

Table of Contents

large orders compared to the prior-year period. This resulted in a book-to-bill ratio of 0.98 for Siemens in fiscal 2012. On an organic basis, excluding currency translation and portfolio effects, orders decreased 13% and revenue came in 3% above the prior year. The order backlog (defined as the sum of order backlogs of our Sectors) was 97 billion as of September 30, 2012, unchanged from the prior year level, including positive currency translation effects of 3 billion.

(2) Commonwealth of Independent States.

Orders related to external customers in fiscal 2012 declined 10% overall, with results varying among the Sectors. Orders for Healthcare were up 5%, with most of its businesses contributing increases, and were level in Industry. Order intake declined in Energy and Infrastructure & Cities due to substantially lower volumes from large orders compared to the prior-year period, which included a number of orders for large wind-farms in Energy and a 3.7 billion order for trains in Germany won by Infrastructure & Cities. Orders from emerging markets on a global basis declined 6%, less than orders overall, and accounted for 26.175 billion, or 34%, of total orders for fiscal 2012.

In the region **Europe, C.I.S., Africa, Middle East**, orders declined 18% including double-digit decreases in Infrastructure & Cities and Energy, which were due to the high basis of comparison from large orders mentioned above. This high basis of comparison was also the primary factor in the order decline in Germany. Orders for Industry in the region were level compared to the prior-year period and Healthcare's orders came in slightly below the level of fiscal 2011. In the **Americas**, order intake rose slightly on increases in three of the four Sectors. The Energy Sector showed a moderate decrease due in part to a lower volume from large orders compared to the prior-year period. Order intake in the **Asia, Australia** region showed a slight decrease in fiscal 2012. Double-digit order growth in Healthcare was more than offset by decreases in the other Sectors.

Table of Contents

Revenue related to external customers rose 7% compared to fiscal 2011, including increases in all Sectors. Strong conversion from the Sectors' order backlogs played a major role in broad-based revenue growth. Energy revenue increased significantly in fiscal 2012 and Healthcare revenue increased 9%. Revenue in Industry and Infrastructure & Cities showed a moderate growth compared to the prior-year period. On a global basis, emerging markets grew 7%, and accounted for 25.525 billion, or 33%, of total revenue in fiscal 2012.

On a geographic basis, revenue increased in all three reporting regions, led by double-digit growth in the Americas. In the **Europe, C.I.S., Africa, Middle East** region, revenue increased 4% year-over-year, including increases in all Sectors. In the **Americas**, higher revenue included double-digit increases in Energy, Industry and Infrastructure & Cities, due to revenue growth of 16% in the U.S. In the **Asia, Australia** region, revenue rose 8% on substantial increases in Energy and Healthcare, which were partly offset by decreases in Infrastructure & Cities and Industry.

Net income attributable to non-controlling interests	132	176	
Net income attributable to shareholders of Siemens AG	4,151	5,723	(27)%

Income from continuing operations before income taxes was 6.636 billion in fiscal 2012. While this was one of our highest results ever, it was substantially lower than in fiscal 2011. The primary factors in the decline were cost of sales; research and development expenses; selling and general administrative expenses; and income (loss) from investments accounted for using the equity method, net. In addition, fiscal 2011 included substantially higher financial income associated with a major divestment. Each of these factors is described in more detail below. Other line items in the Consolidated Statements of Income are discussed in Item 18: Financial Statements' Notes to Consolidated

Financial Statements Notes 5, 6 and 8.

While revenue for fiscal 2012 rose 7% year-over-year as discussed earlier, gross profit was nearly unchanged from the prior-year level and declined as a percent of revenue. Industry, Energy and Infrastructure & Cities all dealt with a less favorable revenue mix year-over-year, which reduced their gross profit margins. Gross profit in Energy included 570 million in project charges related to offshore grid-connection projects. The majority of Healthcare's charges for its Agenda 2013 initiative also impacted gross profit. In fiscal 2011, Healthcare's 381 million in charges in the third quarter related to particle therapy were included in gross profit.

Table of Contents

Furthermore, all Sectors increased their spending for selling and administrative expenses and research and development expenses in anticipation of an improving global economic environment in the second half of the fiscal year. In fact, global economic growth slowed instead of picking up in the second half, leaving the Sectors with cost positions that adversely affected income. For more details on our research and development activities, including a split of research and development expenses for the Sectors, see Item 4: Information on the Company Research and development.

Income (loss) from investments accounted for using the equity method, net swung from a positive 146 million in fiscal 2011 to a negative 333 million in fiscal 2012. The primary factor was Nokia Siemens Networks Holding B.V. (NSN), which took substantial restructuring charges in connection with repositioning its business. This in turn led to an equity investment loss of 741 million associated with NSN, compared to a loss of 280 million in the prior year. For additional information, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 7.

Income from continuing operations before income taxes in fiscal 2011 benefited from a gain of 1.520 billion on the sale of Energy's interest in Areva NP S.A.S. (Areva NP), partly offset by the negative impact of 682 million related to an adverse arbitration decision associated with our decision to exit our nuclear power joint venture with Areva S.A. (Areva). The net effect of these factors is included in Other financial income (expenses), net. For additional information, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 8.

In fiscal 2012, Income from continuing operations before income taxes included 148 million in gains related to changes in other post-employment benefits (OPEB) in the U.S., more than offset by profit impacts of 347 million, primarily in the Energy Sector, related to adjustments for long-term contracts with customers in Iran. These gains and impacts were distributed among various line items.

As a result of these developments, Income from continuing operations before income taxes declined 24%. Income taxes declined 7% year-over-year. The effective tax rate was 30%. For comparison, the effective tax rate of 24% in fiscal 2011 benefited from the mainly tax-free Areva disposal gain. **Income from continuing operations** was 4.642 billion in fiscal 2012, compared to 6.625 billion in fiscal 2011.

Loss from discontinued operations, net of income taxes in fiscal 2012 was 360 million, compared to 726 million in fiscal 2011. Loss from discontinued operations, net of income taxes was comprised of the following:

	Year ended		% Change
	2012	2011	
	September 30,		
	(in millions of)		
Siemens IT Solutions and Services	40	(835)	n/a
OSRAM	(135)	293	n/a
Other	(265)	(184)	34%

Results related to Siemens IT Solutions and Services, which was sold to Atos S.A. (AtoS) in the fourth quarter of fiscal 2011, differed substantially year-over-year. In fiscal 2012, income was a positive 40 million, compared to a loss of 835 million in fiscal 2011, which included significant expenses related to the disposal.

Results for OSRAM in fiscal 2012 included a non-cash effect of a negative 443 million (pretax). This effect arose from the fact that Siemens no longer considered it highly probable to complete its original plan to dispose of OSRAM via an initial public offering (IPO) in the third quarter of fiscal 2012, and therefore had to recognize accumulated

depreciation, amortization, impairments and equity pick-ups related to OSRAM which under IFRS were not recognized beginning with the announcement of the IPO plan in March 2011. While revenue rose 7% year-over-year, benefiting from currency translation and portfolio effects, ongoing market challenges held back profit development.

Discontinued operations also include our Water Technologies Business Unit and certain remaining items related to former activities that were disposed of in prior years. Fiscal 2012 included pretax expenses of

Table of Contents

143 million related to a settlement with the Greek State, and negative tax effects of 115 million, both related to former Com activities. For additional information, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 4.

Net income for Siemens in fiscal 2012 declined to 4.282 billion from 5.899 billion in fiscal 2011. Net income attributable to shareholders of Siemens AG was 4.151 billion, down from 5.723 billion in fiscal 2011.

Energy reported a profit of 1.901 billion in fiscal 2012, a sharp decrease compared to fiscal 2011. Sector profit was held back by project charges related to offshore grid connection projects totaling 570 million. In the fourth quarter of fiscal 2012, Siemens recorded adjustments for long-term contracts with customers in Iran, which reduced Sector profit by 327 million, mainly at Oil & Gas. Energy also recorded burdens of 152 million associated with the Olkiluoto project in Finland. In addition, Energy's business expansion strategy resulted in higher selling and general administrative expenses as well as higher research and development expenses, and profit development was also held back by a less favorable revenue mix. The solar business posted a loss of 258 million in fiscal 2012, compared to a loss of 366 million in fiscal 2011; both years included impairment charges, 150 million in fiscal 2012 and 231 million in fiscal 2011. For comparison, profit of 3.864 billion in fiscal 2011 benefited from the Areva NP gain of 1.520 billion mentioned earlier, only partly offset by the 682 million profit impact related to the arbitration decision discussed earlier and the Sector's 60 million share of special employee remuneration costs.

Table of Contents

Revenue rose on conversion from the Sector's strong order backlog in all three reporting regions, including a substantial increase in Asia, Australia. Orders came in 15% lower compared to fiscal 2011, when the Sector recorded a substantially larger volume from major orders. This comparison effect was particularly notable in Europe, C.I.S., Africa, Middle East. Energy's book-to-bill ratio for fiscal 2012 was 0.97 and its order backlog was \$55 billion at the end of the period.

Businesses	Profit			Profit Margin	
	Year ended		% Change	Year ended	
	September 30, 2012	2011		September 30, 2012	2011
	(in millions of \$)				
Fossil Power Generation	1,933	2,837	(32)%	17.3%	27.8%
Wind Power	304	357	(15)%	6.0%	9.7%
Oil & Gas	218	467	(53)%	4.3%	9.9%
Power Transmission	(302)	566	n/a	(4.6)%	8.9%

Fossil Power Generation generated profit of 1.933 billion on strong profit contributions from the service and products businesses, while results from the solutions business were significantly lower due to a less favorable project mix compared to fiscal 2011. Profit benefited from a 87 million gain from the sale of the 25% interest in OAO Power Machines. In addition, the Division recorded higher selling expenses compared to fiscal 2011. For comparison, profit in fiscal 2011 included the 1.520 billion Areva NP gain and a more favorable project mix in the component business, partly offset by the 682 million Areva arbitration impact. Profit in both years was burdened by charges related to the Olkiluoto project in Finland, amounting to 152 million in the fiscal 2012 and 87 million in fiscal 2011. Revenue rose 9% year-over-year, with substantial growth in Asia, Australia and significant growth in the Americas more than offsetting a moderate decline in Europe, C.I.S., Africa, Middle East. Due to a lower volume from major orders, fiscal 2012 orders came in 11% lower than in fiscal 2011, including a substantial decline in Europe, C.I.S., Africa, Middle East.

Profit at **Wind Power** was lower year-over-year. Positive contributions from substantially higher revenue were offset by higher expenses for research and development, higher selling expenses associated with expansion, a less favorable revenue mix, and increased pricing pressure. In addition, earnings came in lower due to a

Table of Contents

32 million provision related to a wind turbine component from an external supplier and a charge of 20 million related to capacity adjustment. Revenue rose 37% year-over-year, due to conversion of large orders into current business mainly in Europe, C.I.S., Africa, Middle East, and, to a lesser degree, in the Americas and Asia, Australia. Revenue growth was supported clearly by positive currency translation effects. Orders were down 24% due primarily to a lower volume from large offshore orders in Germany. Order intake in the U.S. was down compared to fiscal 2011. With the expected near-term expiration of tax incentives in the U.S., orders in that country nearly ceased towards the end of fiscal 2012.

Profit at **Oil & Gas** declined sharply year-over-year from fiscal 2011. The adjustments for long-term contracts with customers in Iran mentioned above reduced profit of the Division by 275 million. In other respects, Oil & Gas performed well, including a higher earnings contribution from its services business as well as from its turbines business. Revenue increased clearly due primarily to growth in Asia, Australia. Orders decreased substantially in Asia, Australia, taking orders lower for the Division overall.

Power Transmission reported a loss of 302 million for fiscal 2012, compared to profit of 566 million for fiscal 2011. The major factor was 570 million in project charges related primarily to technically complex grid connections to offshore wind-farms in Germany. These charges were due to project delays resulting from a complex regulatory environment and the projects' complex marine environment, which required revised estimates of resources and personnel. In addition, profit was impacted by charges totaling 66 million to address structural issues in the transformers business. Earnings were also held back by a less favorable revenue mix, due in part to low-margin orders booked during prior periods with significant pricing pressure. These factors were only partly offset by the release of a provision of 64 million related to a successful project completion. For comparison, profit in fiscal 2011 included charges of 57 million, including for staff reduction measures, associated with optimizing the Division's global manufacturing footprint. Order intake decreased 20% compared to fiscal 2011, which included a higher volume from large orders and a sharp drop in orders in the solutions business due in part to more selective order intake. All three reporting regions saw lower orders.

Healthcare

(2) Commonwealth of Independent States.

The healthcare market environment reflected continuing pressure on public health budgets in developed countries while healthcare spending increased in emerging market countries, particularly including China. In fiscal 2012, the **Healthcare** Sector launched *Agenda 2013*, which is a global initiative targeting innovation, regional presence, competitiveness, and human resource development. The initiative encompasses a realignment of the radiation therapy business that includes rightsizing measures and a program to improve the cost position at Diagnostics.

Table of Contents

The Healthcare Sector delivered 1.815 billion in profit in fiscal 2012, led by continued strong earnings performance from its imaging and therapy systems businesses. Results for the year were influenced by Agenda 2013, including 184 million in charges. Profit development also included higher expenses for research and development as well as higher selling and general administrative expenses, due in part for investments in product development and expanded sales activities in emerging markets. These effects were partly offset by the Sector's 49 million portion of the OPEB-gain in the U.S. mentioned earlier and a net gain of 34 million from the successful pursuit of a patent infringement claim. For comparison, Healthcare profit in fiscal 2011 was held back by negative impacts related to particle therapy projects, primarily including 381 million in the third quarter when the Sector shifted the focus of certain projects primarily to research. Within this impact was a negative effect of approximately 100 million related to reducing revenue from prior periods. In addition, the Sector took 32 million in charges stemming from increased cost estimates for completing particle therapy contracts in the first quarter. Fiscal 2011 profit was held back also by the Sector's 43 million share of the special employee remuneration allocation mentioned earlier and a loss of 32 million on the sale of a healthcare IT business in France.

Profit at **Diagnostics** came in at 314 million compared to 300 million a year earlier, driven primarily by higher revenue. In connection with the Agenda 2013 initiative, Diagnostics took 80 million in charges in fiscal 2012 related to improving its cost position. For comparison, profit at Diagnostics in fiscal 2011 was impacted by an increase in valuation allowances for receivables triggered by a debt rating downgrade related to Greece. PPA effects related to past acquisitions at Diagnostics were 173 million in fiscal 2012. A year earlier, Diagnostics recorded 169 million in PPA effects.

Revenue for Healthcare in fiscal 2012 increased 9% compared to the prior-year period, including growth on a broad basis among its businesses. Revenue a year earlier included the negative revenue effect of approximately 100 million related to particle therapy projects mentioned above. Orders came in 5% higher, with most businesses contributing increases. On a geographic basis, Asia, Australia and the Americas drove revenue and order growth, due to increases in China and the U.S. The book-to-bill ratio was 1.01, and Healthcare's order backlog was 7 billion at the end of fiscal 2012.

The Sector's Diagnostics business contributed to overall growth. Revenue and orders were up 8% in fiscal 2012, both reaching 3.969 billion from 3.667 billion and 3.678 billion, respectively, in fiscal 2011. Diagnostics showed the same development as the Sector with regard to the regions. On an organic basis, both revenue and orders rose 4%.

(2) Commonwealth of Independent States.

Table of Contents

In fiscal 2012, profit at **Industry** declined 11% year-over-year as market conditions for the Sector became less favorable in the second half of the period. This was particularly evident in China and to a lesser extent in Germany, two of the Sector's most important national markets. Profit development in fiscal 2012 was also held back by a less favorable business mix as well as higher selling and general administrative expenses associated with innovation and growth opportunities. Furthermore, profit at Industry was impacted by market challenges for its renewable energy offerings. The Sector took 28 million in charges related to severance programs for adjusting capacity and adapting its portfolio primarily related to those offerings. These factors were only partially offset by Industry's 30 million portion of the OPEB gain mentioned earlier. For comparison, profit in fiscal 2011 was burdened by Industry's 75 million share of a special remuneration allocation.

Revenue in fiscal 2012 for Industry rose moderately year-over-year on broad-based increases across its businesses. Industry's fiscal 2012 orders declined slightly compared to the prior fiscal year as higher orders at Industry Automation were more than offset by a decrease at Drive Technologies and the metal technologies business. On a regional basis, revenue was up in the Americas and Europe, C.I.S., Africa, Middle East, more than offsetting a decline in Asia, Australia. The decline in orders was due primarily to lower demand from Asia, Australia. Revenue and order development in fiscal 2012 benefited from positive currency translation effects. On a book-to-bill ratio of 0.98, Industry's order backlog was 11 billion at the end of fiscal 2012, unchanged from a year earlier.

	2012	2011		2012	2011
Businesses					
Industry Automation	1,316	1,417	(7)%	15.6%	17.7%
Drive Technologies	970	1,158	(16)%	10.1%	12.6%

Profit at **Industry Automation** declined 7% year-over year. The decline compared to the prior fiscal year was due mainly to a less favorable business mix, higher selling and general administrative expenses and lower earnings from the Division's offerings for renewable energy. On growth in all three reporting regions, revenue for the Division was up 6% and orders increased 7% year-over-year. Both fiscal years under review included PPA effects from the acquisition of UGS Corp., acquired in fiscal 2007. PPA effects were 149 million in fiscal 2012 and 137 million in fiscal 2011.

Profit at **Drive Technologies** in fiscal 2012 came in at 970 million, down significantly from a year earlier also due mainly to a less favorable business mix, lower earnings from its offerings for renewable energy, and

Table of Contents

higher research and development as well as selling and general administrative expenses compared to fiscal 2011. The Division's portion of the severance charges mentioned for the Sector was 20 million. While revenue for Drive Technologies grew moderately compared to fiscal 2011, orders declined clearly year-over-year. On a regional basis, revenue growth was driven by the Americas and supported by moderate growth in Europe, C.I.S, Africa, Middle East. The decline in orders was due to weak demand from Asia, Australia.

(2) Commonwealth of Independent States.

In fiscal 2012, profit at **Infrastructure & Cities** came in at 1.102 billion, down slightly year-over-year. While the Power Grid Solutions & Products Business and the Building Technologies Division both improved profit in fiscal 2012 compared to fiscal 2011, profit at Transportation & Logistics declined substantially due mainly to 86 million in charges at a rolling stock project in Germany taken in fiscal 2012. Profit development for the Sector in fiscal 2012 was also held back by 42 million in charges related to severance programs. These negative effects were partly offset by a positive 50 million contribution from the Sector's interest in AtoS and the Sector's 30 million portion of the OPEB gain mentioned earlier. For comparison, profit in fiscal 2011 was burdened by the Sector's 63 million share of a special employee remuneration allocation.

In fiscal 2012, revenue grew moderately year-over-year, as higher revenue in the regions America and Europe, C.I.S., Africa, Middle East more than offset a decline in Asia, Australia. Revenue growth in fiscal 2012 was driven by Power Grid Solutions & Products and Building Technologies. Revenue at Transportation & Logistics declined slightly year-over-year. Orders for the Sector decreased 20% in fiscal 2012 compared to fiscal 2011, which included a sharply higher volume from major orders at Transportation & Logistics. This included Siemens' largest-ever train order in Germany, worth 3.7 billion, and a major order for high-speed trains in the U.K. As a result, fiscal 2012 orders came in substantially lower in Europe, C.I.S., Africa, Middle East. Order intake in fiscal 2012 was also clearly lower year-over-year in Asia, Australia, only partly offset by a slight increase in the Americas. On a book-to-bill ratio of

0.98, Infrastructure & Cities order backlog was 24 billion at the end of fiscal 2012, unchanged from a year earlier.

	Year ended		Orders

	Profit		% Change	Profit margin		
	Year ended			Year ended		
	September 30,	September 30,		2012	2011	
	(in millions of)					
Businesses						
Transportation & Logistics	236	365	(35)%	4.0%	6.0%	
Power Grid Solutions & Products	457	413	11%	7.5%	7.3%	
Building Technologies	379	364	4%	6.5%	6.7%	

In fiscal 2012, profit at the **Transportation & Logistics** Business declined 35% year-over-year. This decline was due mainly to the above-mentioned 86 million in charges related to delays in fulfilling a rolling stock order in Germany. In addition, the revenue mix in fiscal 2012 was less favorable due to lower margins associated with large, long-term contracts from prior periods which Transportation & Logistics began to convert into current business in fiscal 2012. Revenue in fiscal 2012 came in slightly lower year-over-year, as higher revenue in the Europe, C.I.S., Africa, Middle East region was more than offset by lower revenue in Asia, Australia and the Americas. Order intake in fiscal 2012 decreased 46% year-over-year, due to the sharply higher volume from large orders a year earlier. This comparison effect was particularly evident in the Europe, C.I.S., Africa, Middle East region, where Transportation & Logistics won the above-mentioned large orders in fiscal 2011 for trains in Germany and the U.K.

The profit improvement at **Power Grid Solutions & Products** in fiscal 2012 was driven by the Business low and medium voltage activities. Profit from smart grid activities was held back by higher research and development and selling and general administrative expenses for growth initiatives. In fiscal 2012, revenue and orders increased clearly year-over-year, particularly including double-digit growth in the Americas.

Profit at **Building Technologies** in fiscal 2012 increased moderately year-over-year. Profit development in fiscal 2012 was held back by higher research and development and selling and general administrative expenses associated with growth initiatives. Growth in revenue and orders in fiscal 2012 compared to fiscal 2011 was driven by demand for the Division's energy efficiency solutions. On a regional basis, revenue and orders were up in all three reporting regions.

Equity Investments

In fiscal 2012, **Equity Investments** recorded a loss of 549 million compared to a loss of 26 million in fiscal 2011. The difference year-over-year was due mainly to a sharply higher equity investment loss related to our share in NSN, which increased to 741 million in fiscal 2012 compared to a loss of 280 million a year earlier. NSN reported to

Siemens that it took restructuring charges and associated items totaling 1.059 billion in fiscal 2012 up from 151 million in fiscal 2011. In fiscal 2012, NSN started implementing its previously announced global restructuring program aimed at maintaining its long-term competitiveness and improving profitability. Equity investment loss related to our share in EN declined to 23 million in fiscal 2012 compared to 46 million a year earlier. Losses in both fiscal years were partly offset by income from equity investments related to our share in BSH. Furthermore, results from Equity Investments in fiscal 2011 benefited from a 90 million gain on the sale of our share in KMW.

Table of Contents**Financial Services (SFS)**

	Year ended September 30,		% Change
	2012	2011	
	(in millions of €)		
Income before income taxes	479	428	12%
Total assets	17,405	14,602	19%

In fiscal 2012, SFS recorded a higher profit (defined as income before income taxes) year-over-year. While both interest result and operating expenses associated with SFS' growth strategy increased year-over-year, the current period was primarily affected by a 78 million gain on the sale of a stake in Bangalore International Airport Limited, a public-private partnership, reducing SFS' equity participation from 40% to 26%. This gain was partly offset by higher credit hits. The growth strategy at SFS has led to a significant build-up in total assets, from 14.602 billion at the end of fiscal 2011 to 17.405 billion at the end of fiscal 2012, including positive currency translation effects.

Reconciliation to Consolidated Financial Statements

Reconciliation to Consolidated Financial Statements includes Centrally managed portfolio activities, Siemens Real Estate (SRE) and various categories of items which are not allocated to the Sectors and to SFS because the Company's management has determined that such items are not indicative of the Sectors' and SFS' respective performance.

Centrally managed portfolio activities

Centrally managed portfolio activities reported a loss of 29 million in fiscal 2012, compared to a loss of 40 million in fiscal 2011.

Siemens Real Estate (SRE)

Income before income taxes at SRE was 115 million in fiscal 2012, compared to 150 million in fiscal 2011. This decrease is due in part to lower income related to the disposal of real estate. SRE expects to continue with real estate disposals depending on market conditions.

Corporate items and pensions

Corporate items and pensions totaled a negative 668 million in fiscal 2012 compared to a negative 742 million in fiscal 2011.

Corporate items were a negative 261 million in fiscal 2012 compared to a negative 356 million in fiscal 2011. The amount for fiscal 2012 benefited from positive effects related to legal and regulatory matters, compared to net expenses, including a provision of regional risks of 99 million, related to such matters in fiscal 2011. In addition, fiscal 2012 include an amount of 103 million related to reimbursements to AtoS, compared to 53 million in fiscal 2011. It also includes a net gain of 19 million related to a major asset retirement obligation, compared to a net loss of 28 million in fiscal 2011. Fiscal 2011 benefited from management's allocation of 267 million of personnel-related costs related to special employee remuneration, which had been accrued in Corporate items in fiscal 2010. Within this amount, 240 million was allocated to the Sectors.

Centrally carried pension expense totaled 407 million in fiscal 2012, compared to 385 million in fiscal 2011.

Table of Contents

Eliminations, Corporate Treasury and other reconciling items

In fiscal 2012, income before income taxes from Eliminations, Corporate Treasury and other reconciling items was a positive 23 million, compared to a negative 90 million in fiscal 2011. The main factor of the improvement was Corporate Treasury activities, due mainly to positive changes in the fair market value of interest rate derivatives not qualifying for hedge accounting used for interest rate management, partly offset by negative currency effects relating to corporate financing activities.

Table of Contents**RECONCILIATION TO ADJUSTED EBITDA (CONTINUING OPERATIONS)**

The following table gives additional information on topics included in Profit and Income before income taxes and provides a reconciliation to adjusted EBITDA based on continuing operations.

We report adjusted EBIT and adjusted EBITDA as a performance measure. The closest comparable GAAP figure under IFRS is Net income as reported in our Consolidated Statements of Income.

For further information regarding adjusted EBIT and adjusted EBITDA, see Item 5: Operating and financial review and prospects Supplemental financial measures.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

PRINCIPLES AND OBJECTIVES OF FINANCIAL MANAGEMENT

Siemens is committed to a strong financial profile, which provides the financial flexibility to achieve growth and portfolio optimization goals largely independent of capital market conditions.

Financial management at Siemens is executed according to applicable laws and internal guidelines and regulations. It includes the following activities:

Liquidity management

Our principal source of financing is cash inflows from operating activities. Corporate Treasury generally manages cash and cash equivalents for Siemens and has primary responsibility for raising funds in the capital markets for Siemens through various debt products, with the exception of countries with conflicting capital market controls. The relevant consolidated subsidiaries in these countries obtain financing primarily from local banks. Siemens follows a prudent borrowing policy that is aimed towards a balanced financing portfolio, a diversified maturity profile and a comfortable liquidity cushion. As of September 30, 2013, Siemens held 9.190 billion in cash and cash equivalents, mainly in euro, which were predominantly managed by Corporate Treasury. Especially since the beginning of the global financial markets crisis, Siemens monitors funding options available in the capital markets, trends in the availability of funds and the cost of such funding very closely in order to evaluate possible strategies regarding its financial and risk profile.

Corporate Treasury enters into reverse repurchase agreements with financial institutions with investment grade credit ratings. Siemens holds securities as collateral under these agreements via a third party (Euroclear) and is permitted to sell or re-pledge the securities. The extent to which Siemens engages in transactions involving reverse repurchase agreements depends on its liquidity management needs and the availability of cash and cash equivalents which varies from time to time. For further information on reverse purchase agreements, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 30.

Cash management

Cash management comprises the management of bank partner relationships and bank accounts as well as the execution of payments, including the administration of cash pools, on a global level. Siemens strives to raise efficiency and transparency through a high level of standardization and continuous advancement of payment processes. Where permissible, the execution of intercompany and third party payments is effected centrally through group-wide tools with central controls to ensure compliance with internal and external guidelines and requirements. To ensure efficient management of Siemens funds, Corporate Treasury has established a central cash management approach: to the extent legally and economically feasible, funds are pooled and managed centrally by Corporate Treasury. Conversely, funding needs within Siemens are covered centrally by Corporate Treasury via intercompany current accounts and/or loans where legally and economically feasible.

Financial risk management

Investments of cash and cash equivalents are subject to credit requirements and counterparty limits. Corporate Treasury pools and centrally manages Siemens interest rate, certain commodity and currency risk exposures and uses financial derivative instruments in transactions with external financial institutions to offset such concentrated exposures. Especially since the beginning of the global financial market crisis, Siemens monitors counterparty risk in

its financial assets and financial derivative instruments very closely. For more detailed information about financial risk management at Siemens, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 32.

Table of Contents**Management of post-employment benefits**

Our funding policy for post-employment-benefits is part of our overall commitment to sound financial management, which includes a continuous analysis of the structure of our pension liabilities. For more detailed information about our pension plan funding, see Item 5: Operating and financial review and prospects Liquidity and capital resources Capital resources and requirements Post-employment benefits.

Capital structure management

To effectively manage its capital structure, we seek to maintain ready access to the capital markets through various debt products and to preserve its ability to repay and service its debt obligations over time. For further information on capital structure management, see Item 5: Operating and financial review and prospects Liquidity and capital resources Capital structure.

CAPITAL STRUCTURE

As of September 30, 2013 and 2012 our capital structure was as follows:

	2013	September 30, 2012	% Change
	(in millions of)		
Total equity attributable to shareholders of Siemens AG	28,111	30,855	(9)%
As percentage of total capital	58%	60%	
Short-term debt and current maturities of long-term debt	1,944	3,826	
Long-term debt	18,509	16,880	
Total debt	20,453	20,707	(1)%
As percentage of total capital	42%	40%	
Total capital (total equity and total debt)	48,564	51,561	(6)%

For information on changes in equity and debt, see Item 5: Operating and financial review and prospects Net assets position.

We believe that sustainable revenue and profit development can be achieved only on the basis of a healthy capital structure. A key consideration of our capital structure management is to maintain ready access to the capital markets through various debt products and to preserve our ability to repay and service our debt obligations over time. Siemens set a capital structure target range of 0.5 1.0. The ratio is defined as the item Adjusted industrial net debt divided by the item Adjusted EBITDA (continuing operations). This financial performance measure indicates the approximate amount of time in years that would be needed to pay off Adjusted industrial net debt through continuing income, without taking into account interest, taxes, depreciation and amortization.

Table of Contents

We calculate the item Adjusted industrial net debt as set forth in the table below. For further information on the calculation of Adjusted EBITDA (continuing operations), see Item 5: Operating and financial review and prospects Reconciliation to adjusted EBITDA (continuing operations).

Adjusted EBITDA (continuing operations)	8,215	9,613
Adjusted industrial net debt / adjusted EBITDA (continuing operations)	0.34	0.24

- (1) The item Short-term debt and current maturities of long-term debt as well as the item Long-term debt included in total fair value hedge accounting adjustments of 1,247 million and 1,670 million for the fiscal year ended September 30, 2013 and 2012, respectively.
- (2) The adjustment considers that both Moody's and S&P view SFS as a captive finance company. These rating agencies generally recognize and accept higher levels of debt attributable to captive finance subsidiaries in determining credit ratings. Following this concept, we exclude SFS Debt in order to derive an adjusted industrial net debt which is not affected by SFS's financing activities.
- (3) To reflect Siemens' total pension liability, adjusted industrial net debt includes line item Post-employment benefits as presented in Item 18: Financial Statements Consolidated Statements of Financial Position.
- (4) The adjustment for our hybrid bond considers the calculation of this financial ratio applied by rating agencies to classify 50% of our hybrid bond as equity and 50% as debt. This assignment reflects the characteristics of our hybrid bond such as a long maturity date and subordination to all senior and debt obligations.

- (5) Debt is generally reported with a value representing approximately the amount to be repaid. However, for debt designated in a hedging relationship (fair value hedges), this amount is adjusted by changes in market value mainly due to changes in interest rates. Accordingly, we deduct these changes in market value in order to end up with an amount of debt that approximately will be repaid. We believe this is a more meaningful figure for the calculation presented above. For further information on fair value hedges, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 31.

SFS capital structure differs from the capital structure for our industrial business, because SFS business is capital-intensive and requires larger amounts of debt to finance its operations, in particular to finance its asset growth strategy. The following table provides information on the capital structure of SFS as of September 30, 2013 and 2012:

	September 30,	
	2013	2012
	(in millions of)	
Allocated equity	1,938	1,790
SFS Debt	15,600	14,558
Debt to equity ratio	8.05	8.13

For purposes of measuring capital efficiency at SFS, equity capital is allocated to SFS. Allocated equity capital differs from book capital as it is mainly determined and influenced by the size and quality of its portfolio of commercial finance assets, project and structured finance assets (primarily loans and leases) and equity investments. This allocation is designed to cover the risks of the underlying business. The actual risk of the SFS portfolio is evaluated and controlled on a regular basis. The allocated equity is calculated quarterly.

Table of Contents

In August 2012 we announced, that we would adjust our capital structure through share buybacks amounting to up to 3 billion by December 30, 2012. In fiscal 2012, we repurchased 23,202,500 treasury shares at a weighted average share price of 76.14. At the beginning of fiscal 2013 we repurchased a further 14,746,786 treasury shares at a weighted average price of 78.14, and completed this share buyback program in November 2012. In addition, in fiscal 2013, we repurchased as many treasury shares as necessary to keep the number of treasury shares at a set level until the effective date of the spin-off of OSRAM and fulfilled commitments for share-based compensation through treasury shares.

In November 2013, we announced a new share buyback program. We intend to repurchase shares of up to 4 billion in volume within the next up to 24 months. The program will support our continued approach toward our capital structure target. The shares repurchased may be used for the purposes of cancellation and reduction of capital stock, issuances to employees, board members of affiliated companies and members of the Managing Board as well as to meet obligations arising under and in connection with convertible bonds and warrant bonds.

In fiscal 2014, we may again fulfill commitments for share-based compensation through treasury shares. For additional information with respect to treasury shares, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 33.

CREDIT RATING

A key factor in maintaining a strong financial profile is our credit rating, which is affected by, among other factors, our capital structure, profitability, ability to generate cash flow, geographic and product diversification and our competitive market position. Our current corporate credit ratings from Moody's Investors Service (Moody's) and Standard & Poor's Ratings Services (S&P) are noted as follows:

	Moody's	S&P
Long-term debt	Aa3	A+
Short-term debt	P-1	A-1+

On May 14, 2013, Moody's changed its outlook for Siemens' credit rating from stable to negative, stating that despite the group's substantial cost reduction initiatives, we expect its profitability, cash flow generation and capital structure to be weaker than anticipated in 2013 and 2014. A rating outlook is an opinion regarding the likely direction of an issuer's long-term credit rating over the medium-term. Rating outlooks of Moody's fall into the following six categories: positive, negative, stable, developing, ratings under review or no outlook.

At the same time, Moody's affirmed our Aa3 long-term and our P-1 short-term credit ratings. The classification Aa is the second highest category within Moody's long-term credit rating scale. The numerical modifier 3 indicates a ranking in the lower end of that category. The classification P-1 is the highest available rating in the prime rating system of Moody's, which assesses issuers' ability to honor senior financial obligations and contracts. It applies to senior unsecured obligations with an original maturity of less than one year.

S&P made no rating changes in fiscal 2013. S&P's long-term credit rating for Siemens is A+ and the rating outlook is stable. Within S&P's long-term credit rating scale, A+ is the third-highest long-term rating category. The modifier + indicates that our long-term debt ranks in the upper end of the A+ category. Rating outlooks of S&P fall into the following four categories: positive, negative, stable or developing. S&P's short-term rating is A-1+, which is the highest rating within S&P's short-term rating scale.

The U.S. Securities and Exchange Commission granted Moody's and S&P the status of nationally recognized statistical rating organizations (NRSROs). Siemens does not have any agreements with other nationally recognized statistical rating organizations to provide long-term and short-term credit ratings.

We believe that our high credit rating for our long-term debt applied by Moody's and S&P allows us to raise funds in the capital markets with attractive conditions or to obtain flexible financing from banks. A high credit rating generally leads to lower credit spreads and therefore our rating also positively affects our funding costs. We expect no significant impact on our funding costs as a consequence of the changed rating outlook by Moody's.

Table of Contents

Security ratings are not a recommendation to buy, sell or hold securities. Credit ratings may be subject to revision or withdrawal by the rating agencies at any time and each rating should be evaluated independently of any other rating.

INVESTING ACTIVITIES

Due to tight control of capital expenditures, additions to intangible assets and property, plant and equipment from continuing operations decreased from 2.195 billion in the prior year to 1.869 billion in fiscal 2013. Within the Sectors, in fiscal 2013 we directed significant portions of 1.350 billion of our additions to intangible assets and property, plant and equipment to investments for technological innovations, extending our capacities for designing, manufacturing and marketing new solutions and for the necessary replacements of these fixed assets. The majority of the additions in fiscal 2013 took place in the focus areas of investing activities described below, which will basically continue to be the focus areas regarding the investing activities of the Sectors in fiscal 2014. The remaining portion in fiscal 2013, 519 million, related mainly to SRE and its responsibility for uniform and comprehensive management of Company real estate worldwide.

Energy's additions include investments mainly in improving the Sector's global footprint to secure organic growth and competitiveness by improving its cost position and strengthening technological innovations. These investments include further spending in the extension of capacities and facilities especially for the technology-driven wind power market, particularly in northern Europe.

Healthcare's investments are mainly driven by the medical imaging and therapy systems and laboratory diagnostics businesses. Large parts of the additions are related to intangible assets, such as licenses as well as developing and implementing software and IT solutions.

Industry spends a large portion of its additions to intangible assets, particularly software, and property, plant and equipment for additional capacities for innovative products, for optimization of its global footprint; and for the replacement of these fixed assets.

Infrastructure & Cities spends large amounts of its additions to intangible assets and property, plant and equipment for investments in innovations at the Power Grid Solutions & Products Business, particularly including the Low and Medium Voltage Division, and at the Building Technologies Division. The Sector also invests significant amounts in the replacement and expansion of technical equipment in order to improve productivity and its position in growing market segments, particularly at the Transportation & Logistics Business.

Table of Contents

The changes of additions to intangible assets and property, plant and equipment from fiscal 2012 to 2013 were as follows:

For information with respect to acquisitions of businesses, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 4.

CASH FLOWS FISCAL 2013 COMPAREITO FISCAL 2012

The following discussion presents an analysis of our cash flows from operating, investing and financing activities for fiscal 2013 and 2012 for both continuing and discontinued operations. Discontinued operations include primarily OSRAM and Siemens IT Solutions and Services, which were classified as discontinued operations during the second quarter of fiscal 2011, and the Water Technologies Business Unit, which was classified as discontinued operations during the fourth quarter of fiscal 2013. Siemens IT Solutions and Services was sold to AtoS in the fourth quarter of fiscal 2011. In July 2013, Siemens successfully completed its spin-off and listing of OSRAM.

The cash flows from operating activities are presented using the indirect method, i.e. cash flows are determined by adjusting net income by using a reconciliation, considering the effects of non-cash items, changes during the period in assets and liabilities, particularly in operating net working capital, and all other items for which cash effects are investing or financing activities. Cash flows from investing and financing activities are determined on the basis of the direct method, whereby major classes of cash flows are disclosed.

Table of Contents

We report Free cash flow as a supplemental liquidity measure, which is defined as cash flows from operating activities less cash used for additions to intangible assets and property, plant and equipment. We believe that a positive Free cash flow enables us to maintain a healthy capital structure, and that the presentation of Free cash flow also provides useful information to investors because it gives an indication of the long-term cash-generating ability of our business and of our ability to pay for discretionary and non-discretionary expenditures not included in the measure, such as dividends, debt repayment or acquisitions. We also use Free cash flow to compare cash generation among the segments of our business. Free cash flow should not be considered in isolation or as an alternative to measures of cash flow calculated in accordance with IFRS. For further information about the usefulness and limitations of this measure, see Item 5: Operating and financial review and prospects Supplemental financial measures.

Cash flows	Continuing operations		Discontinued operations		Continuing and discontinued operations	
	2013	2012	2013	2012	2013	2012
	Year ended September 30, (in millions of)					
Cash flows from:						
Operating activities	7,126	6,923	214	188	7,340	7,110
Investing activities	(4,836)	(5,029)	(240)	(656)	(5,076)	(5,685)
<i>therein: Additions to intangible assets and property, plant and equipment</i>	<i>(1,869)</i>	<i>(2,195)</i>	<i>(142)</i>	<i>(215)</i>	<i>(2,012)</i>	<i>(2,410)</i>
Free cash flow⁽¹⁾	5,257	4,727	71	(27)	5,328	4,700
Financing activities	(3,422)	(3,523)	26	468	(3,396)	(3,055)

(1) The closest comparable financial measure of Free cash flow under IFRS is the line item Cash flows from operating activities. Cash flows from operating activities from continuing operations as well as from continuing and discontinued operations is reported in Item 18: Financial Statements Consolidated Statements of Cash Flows. Other companies that report Free cash flow may define and calculate this measure differently.

Cash flows from operating activities Continuing operations provided cash for operating activities of 7.126 billion in fiscal 2013, compared to cash provided of 6.923 billion in the prior-year period. In both periods, the major component of cash inflows was income from continuing operations, which was 4.212 billion in fiscal 2013 compared to 4.642 billion in fiscal 2012. Included therein were amortization, depreciation and impairments of 2.888 billion and 2.818 billion, in fiscal 2013 and fiscal 2012, respectively. A build-up of operating net working capital led to cash outflows of 1.8 billion in fiscal 2013, compared to cash outflows of 0.8 billion in the prior-year. In both periods the increase in operating net working capital was due mainly to a decrease in billings in excess of costs and estimated earnings on uncompleted contracts and related advances primarily in the Energy Sector. Fiscal 2013 benefited from positive cash flow effects relating to the change of other assets and liabilities including the increase of personnel-related liabilities compared to a decrease in the prior year. Fiscal 2013 included cash outflows of approximately 0.4 billion corresponding to charges to income taken for the Siemens 2014 program. For comparison fiscal 2012 included cash outflows of approximately 0.3 billion related to the revaluation of Healthcare's particle therapy business for general patient treatment as well as Healthcare's Agenda 2013 initiative. Both fiscal years included interest received of 0.8 billion.

Discontinued operations provided cash of 214 million in fiscal 2013, compared to cash inflows of 188 million in the prior year. In both periods cash inflows related primarily to OSRAM.

Cash flows from investing activities Cash used in investing activities for continuing operations amounted to 4.836 billion in fiscal 2013, compared to cash used of 5.029 billion in the prior-year period. Acquisitions of businesses, net of cash acquired, totaled 2.801 billion in the current period, including a preliminary purchase price payment (excluding cash acquired) of 1.987 billion for Infrastructure & Cities acquisition of Invensys Rail and 670 million for Industry's acquisition of LMS International NV. SFS continued to successfully execute its asset growth strategy, and cash outflows for the change in receivables from financing activities amounted to 2.175 billion and 2.087 billion, in fiscal 2013 and 2012, respectively. The prior year included acquisitions of businesses, net of cash acquired, totaling 1.295 billion, including among others the acquisition of the Connectors and Measurements Division of Expro Holdings UK 3 Ltd. In fiscal 2013 cash

Table of Contents

inflows of 2.463 billion for the disposal of investments, intangibles and property, plant and equipment included proceeds of 1.7 billion relating to the sale of our 50% stake in NSN and 0.3 billion relating to the sale of our AtoS convertible bonds. For comparison, cash inflows of 753 million in the prior year included proceeds from the sale of our interest in OAO Power Machines. Due to tight control of capital expenditures particularly within the Sectors, additions to intangible assets and property, plant and equipment from continuing operations decreased from 2.195 billion in the prior year to 1.869 billion in fiscal 2013.

Discontinued operations used cash of 240 million in fiscal 2013, compared to cash used of 656 million in the prior year, when cash outflows related to Siemens IT Solutions and Services included payments of a mid triple-digit million euro amount.

Free cash flow from continuing operations increased to 5.257 billion in fiscal 2013 from 4.727 billion a year earlier, reflecting a higher conversion of income into cash year-over-year. The increase of Free cash flow year-over-year was due to higher cash inflows from operating activities and lower additions to intangible assets and property, plant and equipment as discussed above.

Cash flows from financing activities Continuing operations used cash for financing activities of 3.422 billion in fiscal 2013, compared to cash used of 3.523 billion in the same period a year earlier. As described in Item 5: Operating and financial review and prospects Liquidity and capital resources Capital resources and requirements Debt and credit facilities, the current period included proceeds from the issuance of long-term debt of 3.772 billion related to the bonds issued and term loans taken. These cash inflows were more than offset by the repayment of long-term debt of 2.927 billion related mainly to the redemption of 2.0 billion fixed-rate-instruments and a US\$1.0 billion floating-rate term loan and by the cash outflows for the purchase of treasury shares totaling 1.394 billion. The purchase of treasury shares was made primarily under Siemens' share buyback program, which was completed in November 2012. For comparison, prior-year proceeds from the issuance of long-term debt were 5.113 billion, including the issuance of US\$3.0 billion bonds with warrant units as well as the issuance of 1.4 billion and £1.0 billion in fixed-rate instruments in four tranches. These cash inflows were largely offset by the repayment of long-term debt of 3.218 billion in the prior year for the redemption of 1.55 billion in 5.25% fixed rate instruments, 0.7 billion in floating rate assignable loans, US\$0.5 billion in floating rate notes and US\$0.75 billion in 5.5% notes and by the cash outflows for the purchase of treasury shares totaling 1.721 billion. Both periods included cash outflows for dividends paid to shareholders of Siemens AG, which were 2.528 billion (for fiscal 2012) in fiscal 2013 compared to 2.629 billion in fiscal 2012 (for fiscal 2011). In fiscal 2013 we recorded cash inflows of 298 million for financing of discontinued operations, compared to cash outflows of 506 million a year earlier. Discontinued operations are financed generally from Corporate Treasury. However, fiscal 2013 included an external term loan in the amount of 300 million, which was drawn by OSRAM near the effective date of its spin-off.

Table of Contents**CASH FLOWS FISCAL 2012 COMPAREITO FISCAL 2011**

The following discussion presents an analysis of our cash flows from operating, investing and financing activities for fiscal 2012 and 2011 for both continuing and discontinued operations. Discontinued operations include primarily OSRAM and Siemens IT Solutions and Services, which were classified as discontinued operations during the second quarter of fiscal 2011, and the Water Technologies Business Unit, which was classified as discontinued operations during the fourth quarter of fiscal 2013. Siemens IT Solutions and Services was sold to AtoS in the fourth quarter of fiscal 2011. In July 2013, Siemens successfully completed its planned spin-off and listing of OSRAM.

Cash flows	Continuing operations		Discontinued operations		Continuing and discontinued operations	
	2012	2011	2012	2011	2012	2011
	Year ended September 30, (in millions of)					
Cash flows from:						
Operating activities	6,923	8,140	188	(241)	7,110	7,899
Investing activities	(5,029)	(2,890)	(656)	(1,154)	(5,685)	(4,044)
<i>therein: Additions to intangible assets and property, plant and equipment</i>	<i>(2,195)</i>	<i>(2,151)</i>	<i>(215)</i>	<i>(466)</i>	<i>(2,410)</i>	<i>(2,617)</i>
Free cash flow	4,727	5,989	(27)	(707)	4,700	5,282
Financing activities	(3,523)	(6,970)	468	1,395	(3,055)	(5,575)

Cash flows from operating activities Continuing operations provided cash of 6.923 billion in fiscal 2012, compared to cash provided of 8.140 billion in the same period a year earlier. In fiscal 2012 income from continuing operations was 4.642 billion. Therein included were amortization, depreciation and impairments of 2.818 billion. A build-up of operating net working capital reduced the cash inflows by 0.8 billion. The increase in operating net working capital was due mainly to a decrease in billings in excess of costs and estimated earnings on uncompleted contracts and related advances primarily in the Energy Sector due in part to lower orders year-over-year. Fiscal 2012 also included cash outflows of approximately 0.3 billion related to the revaluation of the commercial feasibility of Healthcare's particle therapy business for general patient treatment as well as Healthcare's Agenda 2013 initiative. In fiscal 2011 income from continuing operations was 6.625 billion. Therein included were amortization, depreciation and impairments of 2.599 billion. Income from continuing operations also included the Areva NP disposal gain of 1.520 billion, partly offset by the negative impact of 682 million related to an adverse arbitration decision associated with Siemens' decision to exit its nuclear power joint venture with Areva, which was deducted in the Consolidated Statements of Cash Flows within the line item (Gains) losses on disposals of assets related to investing activities, net. A build-up of operating net working capital in fiscal 2011 reduced cash inflows near the level of fiscal 2012. Both periods included interest received of 0.8 billion.

Discontinued operations provided cash of 188 million in fiscal 2012, compared to cash used of 241 million in fiscal 2011. The largest factor of the change in cash flows year-over-year was lower cash outflows related to Siemens IT Solutions and Services, which a year earlier included higher payments in connection with the establishment of Siemens IT Solutions and Services as a separate legal group, including for carve-out activities and personnel-related matters.

Cash flows from investing activities Cash used in investing activities for continuing operations amounted to 5.029 billion in fiscal 2012 compared to cash used of 2.890 billion in fiscal 2011. The increase in cash outflows from

investing activities was due mainly to lower proceeds from disposal of investments, intangibles and property, plant and equipment of 1.354 billion; to higher acquisitions of businesses, net of cash acquired, of 996 million; and to the higher build-up in receivables from financing activities of 317 million relating to SFS's asset growth strategy. Proceeds of 753 million in fiscal 2012 from the disposal of investments, intangibles and property, plant and equipment included the sale of our 25% interest in OAO Power Machines, held by the Energy Sector. In fiscal 2011, proceeds from disposal of investments, intangibles and property, plant and equipment provided cash of 2.107 billion. This total included proceeds from the disposal of investments of

Table of Contents

1.587 billion, mainly related to the sale of our Areva NP stake for 1.7 billion in the second quarter of fiscal 2011, subsequently reduced by 0.7 billion in the third quarter of fiscal 2011 due to the arbitration decision mentioned earlier, and the sale of our 49% minority stake in KMW. Cash inflows for fiscal 2011 also included higher proceeds from real estate disposals at SRE. Acquisitions of businesses, net of cash acquired, increased to 1.295 billion from 299 million in fiscal 2011, comprising several acquisitions of entities within the Sectors to optimize our business portfolio, including in fiscal 2012 the acquisition of the Connectors and Measurements Division of Expro Holdings UK 3 Ltd. in the Energy Sector as mentioned earlier. The aggregate consideration of this acquisition, net of cash acquired, amounted to 461 million. In fiscal 2012, cash outflows for the purchase of investments of 252 million included the second installment payment in connection with our equity investment in A2SEA A/S, a supplier of installation services for the construction of offshore wind-farms. The equity investment is held by the Energy Sector. For comparison, purchase of investments of 889 million in fiscal 2011 included cash outflows relating mainly to 500 million in new equity, which we provided to NSN in exchange for preferred shares in order to further strengthen NSN's financial position, an investment in the solar power business and the first installment payment for our equity investment in A2SEA A/S.

Discontinued operations used cash of 656 million in fiscal 2012, compared to cash used of 1.154 billion in fiscal 2011. These lower cash outflows related primarily to OSRAM, which a year earlier included payments related to the acquisition of Siteco. While both periods included cash outflows of a mid triple-digit million euro amount relating to Siemens IT Solutions and Services, these cash outflows were higher in fiscal 2011.

Free cash flow from continuing operations decreased year-over-year due primarily to cash flows from operating activities as discussed above.

Cash flows from financing activities Continuing operations used cash of 3.523 billion in fiscal 2012, compared to cash used of 6.970 billion in fiscal 2011. The decrease in cash outflows in fiscal 2012 was due primarily to the proceeds from the issuance of long-term debt of 5.113 billion, including the issuance of US\$3.0 billion bonds with warrant units in February 2012 as well as the issuance of 1.4 billion and £1.0 billion in fixed-rate instruments in four tranches in September 2012. These cash inflows were partly offset by the repayment of long-term debt of 3.218 billion relating to the redemption of 1.55 billion in 5.25%-fixed-rate-instruments, 0.7 billion in floating rate assignable loans, US\$0.5 billion in floating rate notes and US\$0.75 billion in 5.5% notes. In fiscal 2012 we recorded also cash outflows of 1.721 billion relating to the purchase of 23,202,500 treasury shares at a weighted average share price of 76.14. For comparison, fiscal 2011 included the redemption of 2.0 billion in 5.75% bonds, a payment of 1.0 billion related to the binding offer to purchase additional shares in order to increase our stake in our publicly listed Indian subsidiary Siemens Ltd. and higher cash outflows for financing discontinued operations. Both periods included cash outflows for dividends paid to shareholders of Siemens AG, which were 2.629 billion (for fiscal 2011) in fiscal 2012 compared to 2.356 billion (for fiscal 2010) in fiscal 2011.

CAPITAL RESOURCES AND REQUIREMENTS

Our **capital resources** consist of a variety of short- and long-term financial instruments including, but not limited to, loans from financial institutions, commercial paper, notes and bonds, and credit facilities. In addition to cash and cash equivalents and available-for-sale financial assets, liquid resources consist of future cash flows from operating activities.

Our **capital requirements** include, among others, scheduled debt service, regular capital spending, ongoing cash requirements from operating and SFS financing activities, including cash outflows related to the growth strategy of SFS, dividend payments, pension plan funding, portfolio activities, and cash outflows in connection with Siemens 2014, a company-wide program aimed at improving profitability in the Sectors.

Debt and credit facilities

Total debt comprises our Notes and bonds, Loans from banks, Obligations under finance leases and Other financial indebtedness such as commercial paper. Total debt comprises Short-term debt and current maturities of

Table of Contents

long-term debt as well as Long-term debt, as stated on the Consolidated Statements of Financial Position. **Total liquidity** refers to the liquid financial assets we had available at the respective ends of the reporting periods to fund our business operations and pay for near-term obligations. Total liquidity comprises Cash and cash equivalents as well as current Available-for-sale financial assets, as stated on the Consolidated Statements of Financial Position. **Net debt** results from total debt less total liquidity. Management uses the Net debt measure for internal finance management, as well as for external communication with investors, analysts and rating agencies, and accordingly we believe that presentation of Net debt is useful for those concerned. Net debt should not, however, be considered in isolation or as an alternative to short-term debt and long-term debt as presented in accordance with IFRS. For further information about the usefulness and limitations of Net debt, see Item 5: Operating and financial review and prospects Supplemental financial measures.

	September 30,	
	2013	2012
	(in millions of)	
Short-term debt and current maturities of long-term debt	1,944	3,826
Long-term debt	18,509	16,880
Total debt	20,453	20,707
Cash and cash equivalents	(9,190)	(10,891)
Available-for-sale financial assets (current)	(601)	(524)
Total liquidity	(9,790)	(11,415)
Net debt⁽¹⁾	10,663	9,292

(1) We typically need a considerable portion of our cash and cash equivalents as well as current available-for-sale financial assets at any given time for purposes other than debt reduction. The deduction of these items from total debt in the calculation of Net debt therefore should not be understood to mean that these items are available exclusively for debt reduction at any given time. Net debt comprises items as stated on Item 18: Financial Statements Consolidated Statements of Financial Position.

The changes in Net debt from fiscal 2012 to 2013 may also be presented as follows:

Commercial paper program We have a US\$9.0 billion (6.7 billion) global multi-currency commercial paper program in place, which includes the ability to issue US\$-denominated extendible notes. In fiscal 2013 we issued commercial paper in varying amounts to fund our ongoing short-term capital requirements. Our issuances of commercial paper typically have a maturity of less than 90 days. As of September 30, 2013, we had no commercial paper outstanding. All commercial paper issued in fiscal 2013 was completely repaid within the year.

Notes and bonds We have a program for the issuance of debt instruments (debt issuance program) of 15.0 billion in place which we update on a regular basis. The last update was made in May 2013. Under this program, we issued the following instruments:

In June 2013, we issued US\$400 million in floating-rate instruments due in June 2020 (private placement).

Table of Contents

In March 2013, we issued 2.25 billion and US\$500 million in fixed-rate instruments in three tranches, comprising: 1.25 billion in 1.75% p.a. instruments due in March 2021, 1.0 billion in 2.875% p.a. instruments due in March 2028 and US\$500 million in 1.5% p.a. instruments due in March 2018.

Also in March 2013, we issued US\$100 million in 3.5% p.a. fixed-rate instruments due in March 2028 (private placement).

In September 2012, we issued 1.4 billion and £1.0 billion in fixed-rate instruments in four tranches, comprising: 400 million in 0.375% p.a. instruments due in September 2014, 1.0 billion in 1.5% p.a. instruments due in March 2020, £350 million in 2.75% p.a. instruments due in September 2025 and £650 million in 3.75% p.a. instruments due in September 2042.

In February 2012, we issued US\$400 million in floating-rate instruments (three months London Interbank Offered Rate (LIBOR) + 1.4% p.a.) due in February 2019 (private placement).

In February 2009, we issued 4.0 billion in fixed-rate instruments in two tranches, comprising: 2.0 billion in 4.125% p.a. instruments matured and redeemed at face value in February 2013, 2.0 billion in 5.125% p.a. instruments due in February 2017.

In June 2008, we issued 3.4 billion in fixed-rate instruments in three tranches, comprising: 1.2 billion in 5.25% p.a. instruments matured and redeemed at face value in December 2011, 1.0 billion in 5.375% p.a. instruments due in June 2014 and 1.2 billion in 5.625% p.a. instruments due in June 2018. In August 2008, we increased two of the three tranches of the 3.4 billion fixed-rate instruments by 750 million, comprising: 350 million in 5.25% p.a. instruments matured and redeemed at face value in December 2011 and 400 million in 5.625% p.a. instruments due in June 2018.

In March 2006, we issued US\$1.0 billion in instruments in two tranches, comprising: US\$500 million in floating-rate instruments (three months LIBOR + 0.15% p.a.) matured and redeemed at face value in March 2012 and US\$500 million in 5.625% p.a. fixed-rate instruments due in March 2016.

The nominal amount outstanding under the debt issuance program was 10.9 billion as of September 30, 2013.

In February 2012, Siemens issued US\$ fixed-rate bonds with warrant units in an aggregate principal amount of US\$3.0 billion in two tranches, comprising: (1) US\$1.5 billion in 1.05% p.a. instruments due in August 2017 and (2) US\$1.5 billion in 1.65% p.a. instruments due in August 2019. Each of the US\$1.5 billion bonds were issued with 6,000 detachable warrants. The warrants exercise price was fixed in Euro. The warrants were classified as equity instruments with a fair value of 126 million at issuance presented in capital reserves in line item Other changes in equity. The warrants entitle the holders, at their option, to receive 1,806.1496 Siemens AG shares per warrant at an exercise price per share of 104.0018 during the exercise period for bond (1) and bond (2), which mature in August 2017 and August 2019, respectively. After the spin-off of OSRAM in fiscal 2013, the warrants entitle the holders to obtain OSRAM shares in addition to Siemens shares. Accordingly, the warrants no longer qualify as equity instruments since the approval of the spin-off in January 2013 and the warrants fair value of 163 million was reclassified from line item Capital reserves to non-current other financial liabilities. The warrants result in option

rights relating to a total of 21.7 million Siemens AG shares. The equivalent amount of these bonds excluding warrant units outstanding was 2.2 billion as of September 30, 2013.

In September 2006, we issued a subordinated fixed-rate hybrid bond in two tranches, comprising: 900 million in 5.25% p.a. instruments and £750 million in 6.125% p.a. instruments, both tranches with a final legal maturity in September 2066. The Company has a call option after ten years or thereafter. If the instruments are not called, both tranches will become floating-rate instruments according to the conditions of the bond. The total nominal amount of our hybrid bond was 1.8 billion as of September 30, 2013.

In August 2006, we issued US\$5.0 billion medium-term notes in four tranches, comprising: US\$750 million in floating-rate instruments (three months LIBOR + 0.05% p.a.) matured and redeemed at face value in August 2009, US\$750 million in 5.5% p.a. fixed-rate instruments matured and redeemed at face value in February 2012, US\$1.750 billion in 5.75% p.a. fixed-rate instruments due in October 2016 and US\$1.750 billion in 6.125% p.a. fixed-rate instruments due in August 2026. We may redeem, at any time, all or some of the fixed-rate instruments

Table of Contents

at the early redemption amount (call) according to the conditions of the instruments. The nominal amount of these US medium term notes outstanding was 2.6 billion as of September 30, 2013.

Assignable and term loans

In March 2013, we signed and fully drew two bilateral US\$500 million floating-rate term loans (three months LIBOR +0.79% p.a.). Both loans are due in March 2018 and include options for two one-year extensions. The nominal amount outstanding was 0.7 billion as of September 30, 2013.

In June 2008, we issued four tranches of assignable loans with an aggregate amount of 1.1 billion: 370 million in floating-rate instruments (six months European Interbank Offered Rate (EURIBOR) + 0.55% p.a.) and 113.5 million in 5.283% p.a. fixed-rate instruments, both matured in June 2013 and 283.5 million in floating-rate instruments (six months EURIBOR + 0.7% p.a.) and 333 million in 5.435% p.a. fixed-rate instruments, both maturing in June 2015. Both floating-rate instruments were called in August 2011 and redeemed at face value in December 2011. In June 2013, we redeemed at face value the 113.5 million in 5.283% p.a. fixed-rate instruments.

Credit facilities We have three credit facilities at our disposal for general corporate purposes. Our credit facilities as of September 30, 2013, consisted of 6.7 billion in committed, unused lines of credit. These facilities included:

US\$3.0 billion undrawn syndicated multi-currency revolving credit facility provided by a syndicate of international banks with a five year tenor and two one-year extension options, which was signed in September 2013. It replaced a US\$4.0 billion syndicated multi-currency credit facility which expired in August 2013. The US\$4.0 billion facility comprised a US\$1.0 billion floating-rate term loan (three months LIBOR + 0.15% p.a.) which was drawn in January 2007 and redeemed at face value in August 2013 as well as an undrawn US\$3.0 billion revolving tranche.

4.0 billion undrawn syndicated multi-currency revolving credit facility provided by a syndicate of international banks with a five year tenor and two one-year extension options, which was signed in April 2012. In February 2013, we extended this facility by one year, until April 2018. One one-year extension option is still remaining.

450 million bilateral undrawn revolving credit facility provided by a domestic bank expired in September 2013. This credit facility has been extended to September 2014.

The maturity profile of the loans, notes and bonds described above is presented below:

As mentioned above, we maintain two lines of credit, in the amounts of 4.0 billion and US\$3.0 billion, respectively. These two lines of credit provide their lenders with a right of termination in the event that

Table of Contents

(1) Siemens AG becomes a subsidiary of another company or (2) a person or a group of persons acting in concert acquires control over Siemens AG by being able to exercise decisive influence over its activities (Art. 3 (2) of Council Regulation (EC) 139/2004). In addition, Siemens AG has a bilateral credit line at its disposal in the amount of 450 million as mentioned above which may be terminated by the lender if major changes in Siemens AG's corporate legal situation occur that jeopardize the orderly repayment of the credit.

None of our credit facilities contains a material adverse change provision of the type often found in facilities of such nature, and none of our global commercial paper and debt issuance programs nor our credit facilities contain specific financial covenants such as rating triggers or interest coverage, leverage or capitalization ratios that could trigger remedies, such as acceleration of repayment or additional collateral.

We mitigate the risk resulting from changes in the fair value of future changes relating to our loans, notes and bonds by using derivative financial instruments which allow us to hedge fair value changes by swapping fixed rates of interest rates to variable rates. As of September 30, 2013, 41% of our underlying loans, notes and bonds were changed from fixed interest rates into variable interest rates. In addition, in order to optimize our position with regard to interest income and interest expense and to manage the overall financial interest rate risk with respect to valuation risk affecting profit and loss and economic risk of changing interest rates, our Corporate Treasury performs a comprehensive corporate interest rate management, under which the interest rate risk relating to the SFS business and to the remaining group are managed separately. Further information about our bonds and the other components of our debt as well as about the use of financial instruments for hedging purposes is provided in Item 18: Financial Statements Notes to Consolidated Financial Statements Notes 22, 31 and 32.

Contractual obligations

In the ordinary course of business, Siemens' primary contractual obligations regarding cash relate to debt, purchase obligations and operating leases.

The following table summarizes our contractual obligations as of September 30, 2013 that will result in future cash outflows:

	Total	Payments due by period			After 5 years
		Less than 1 year	1-3 years	4-5 years	
		(in millions of)			
Debt	20,453	1,944	2,928	7,580	8,001
Purchase obligations	19,977	14,441	3,037	1,148	1,350
Operating leases	3,120	807	1,020	536	757
Total contractual obligations	43,550	17,192	6,985	9,264	10,108

Debt As of September 30, 2013, Siemens had 20.453 billion of short- and long-term debt, of which 1.944 billion will become due within the next twelve months. Short-term debt includes current maturities of long-term debt, as well as loans from banks coming due within the next twelve months. Further information about the components of debt is given in Item 18: Financial Statements Notes to Consolidated Financial Statements Note 22.

Debt for Siemens as of September 30, 2013 consisted of the following:

	Short-term	Long-term	Total
	(in millions of)		
Notes and bonds	1,431	17,060	18,491
Loans from banks	412	1,233	1,645
Other financial indebtedness	82	106	188
Obligations under finance leases	20	110	130
Total debt	1,944	18,509	20,453

Table of Contents

Purchase obligations Purchase obligations include agreements to purchase goods or services, which are enforceable and legally binding and which specify all of the following items: (1) fixed or minimum quantities, (2) fixed, minimum or variable price provisions and (3) approximate timing of the transaction. As of September 30, 2013, Siemens had 19.977 billion in purchase obligations. These purchase obligations primarily related to agreements of our Sectors on the purchase of goods such as property, plant and equipment, intangible assets, raw materials and supplies or to the purchase of services such as advertising or maintenance. These purchase obligations have not been recognized as liabilities or expenses as of September 30, 2013.

In December 2010, Siemens and AtoS signed an option agreement (written call option) which granted AtoS the right to acquire Siemens IT Solutions and Services. The closing of the transaction was on July 1, 2011. Related to the transaction is a seven-year outsourcing contract worth around 5.5 billion, under which AtoS provides managed services and system integration to Siemens. The expected remaining cash outflows from the outsourcing contract are included in these purchase obligations. For further information on that transaction, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 4.

Operating leases As of September 30, 2013, Siemens had a total of 3.120 billion in total future payment obligations under non-cancelable operating leases, mainly relating to SRE activities.

Other Siemens is subject to asset retirement obligations related to certain items of property, plant and equipment. Such asset retirement obligations are primarily attributable to environmental clean-up costs related to remediation and environmental protection, which amounted to 1.096 billion as of September 30, 2013. The environmental clean-up costs related to remediation and environmental protection liabilities have been accrued based on the estimated costs of decommissioning facilities for the production of uranium and mixed-oxide fuel elements in Hanau, Germany (Hanau facilities), as well as a nuclear research and service center in Karlstein, Germany (Karlstein facilities). For additional information with respect to asset retirement obligations, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 24.

Our liquidity may be adversely affected in future periods by regular or special contributions to fund our post-employment benefits. As of September 30, 2013, our liability for post-employment benefits as recognized in the Consolidated Statements of Financial Positions amounted to 9.265 billion. However, the recognized liability may fluctuate significantly in future periods due to changes in assumptions used in calculating the defined benefit obligations (DBO), in particular the discount rates, compensation increase rates, pension progression rates and mortality rates. Actual developments may differ from assumptions due to changing economic and other conditions of the country in which the retirement plans are situated, thereby resulting in an increase or decrease of the liability. Employer contributions expected to be paid to the funded pension plans during fiscal 2014 amount to 631 million, including contributions due to contractual and legal obligations of approximately 0.2 billion. Additional contributions to our pension benefit plans may be made or contractually agreed at the discretion of our management after the end of the reporting period. The latest funding valuation in the U.K. in calendar year 2011 resulted in a technical underfunding of £939 (1,123) million, based on the assumptions at that date. As a result Siemens entered in fiscal 2013 into an agreement with the trustees to provide an annual payment of £31 (37) million for the next 20 years, beginning in fiscal 2014. In addition to these payments the Company is obliged to pay £15 (18) million until the next funding valuation, when the funding requirements will be updated based on new assumptions. This valuation will take place approximately at the end of calendar year 2015. For additional information regarding contributions to the fund our post-employment benefits, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 23.

For further information with respect to contractual obligations, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 32.

Off-balance sheet arrangements

Guarantees Siemens guarantees are principally credit guarantees and guarantees of third-party performance. As of September 30, 2013, the undiscounted maximum amount of potential future payments for guarantees was 5.973 billion, including guarantees relating to discontinued operations. Credit guarantees cover the financial obligations of third-parties in cases where Siemens is the vendor and/or contractual partner. In addition, Siemens provides credit guarantees generally as credit-line guarantees with variable utilization to joint

Table of Contents

ventures and associated and other companies accounted for using the equity method. Total credit guarantees were 622 million as of September 30, 2013. Furthermore, Siemens issues guarantees of third-party performance, which include performance bonds and guarantees of advanced payments in cases where Siemens is the general or subsidiary partner in a consortium. In the event of non-fulfillment of contractual obligations by the consortium partner(s), Siemens will be required to pay up to an agreed-upon maximum amount. Guarantees of third-party performance amounted to 1.593 billion as of September 30, 2013.

In fiscal 2007, The Federal Republic of Germany commissioned a consortium consisting of Siemens and IBM Deutschland GmbH (IBM) to modernize and operate the non-military information and communications technology of the German Federal Armed Forces (Bundeswehr). This project is called HERKULES. A project company, BWI Informationstechnik GmbH (BWI), provides the services required by the terms of the contract. Siemens is a shareholder in the project company. The total contract value amounts to a maximum of approximately 6 billion. In connection with this project, Siemens issued several guarantees connected to each other legally and economically in favor of the Federal Republic of Germany and of the consortium member IBM in December 2006. The guarantees ensure that BWI has sufficient resources to provide the required services and to fulfill its contractual obligations. Total future payments that we could potentially be required to make amounted to 1.89 billion as of September 30, 2013, and will be reduced by approximately 400 million per year over the remaining four-years of the contract period as of September 30, 2013. Yearly payments under these guarantees are limited to 400 million plus, if applicable, a maximum of 90 million in unused guarantees carried forward from the prior year.

Other guarantees amounted to 1.867 billion as of September 30, 2013 and included indemnifications issued in connection with dispositions of business entities. Such indemnifications, if customary to the relevant transactions, may protect the buyer from potential tax, legal and other risks in conjunction with the purchased business entity. Indemnifications include those for EN, disposed of in fiscal 2008, and Siemens IT Solutions and Services disposed of in fiscal 2011. In the event that it becomes probable that Siemens will be required to satisfy these guarantees, provisions are established. Such provisions are established in addition to the liabilities recognized for the non-contingent component of the guarantees.

Capital commitments As of September 30, 2013, the Company had commitments to make capital contributions to various companies of 223 million.

For additional information with respect to guarantees and our other commitments, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 28.

Post-employment benefits

As of September 30, 2013, the combined funded status of Siemens pension plans showed an underfunding of 8.5 billion, compared to an underfunding of 8.9 billion as of September 30, 2012. While the fair value of plan assets remained unchanged, the DBO decreased by 0.4 billion.

The DBO of Siemens pension plans, which takes into account future compensation and pension increases, amounted to 32.6 billion on September 30, 2013, compared to a DBO of 33.0 billion at the end of the prior fiscal year. The decrease resulted from benefits paid and positive currency translation effects, only partly offset by accrued service and interest cost. Effects from assumption changes and deviations between actual and assumed development of the DBO offset each other in fiscal 2013.

Table of Contents

The fair value of Siemens' plan assets was 24.1 billion, as of both September 30, 2013 and September 30, 2012. The actual return on plan assets for fiscal 2013 amounted to 1.3 billion, resulting mainly from equity investments. Employer contributions amounted to 0.5 billion. These positive factors were offset by benefits paid and negative currency translation effects.

The combined funded status of Siemens' predominantly unfunded other post-employment benefit plans amounted to an underfunding of 0.6 billion as of September 30, 2013, compared to an underfunding of 0.7 billion at the end of the prior fiscal year. The underfunding decreased mainly due to benefits paid and the annual remeasurement of DBO.

For more information on Siemens' pension plans, see Item 18: Financial Statements' Notes to Consolidated Financial Statements' Note 23.

Other capital resources and requirements

At the Annual Shareholders' Meeting scheduled for January 28, 2014, the Managing Board, in agreement with the Supervisory Board, will submit the following proposal to allocate the unappropriated net income of Siemens AG for the fiscal year ended September 30, 2013: distribution of a dividend of 3.00 on each no-par value share entitled to the dividend for fiscal year 2013 existing at the date of the Annual Shareholders' Meeting, which is presently expected to result in total distribution of approximately 2.5 billion.

In November 2013, we announced that we will adjust our capital structure through share buybacks. We expect cash outflows up to 4 billion within the next up to 24 months.

Other capital requirements also include expected cash outflows of 0.7 billion in fiscal 2014 relating to charges for the Siemens 2014 productivity improvement program.

After the end of fiscal 2013, we signed an agreement to sell our business for treating and processing municipal and industrial water and wastewater that are bundled in our Water Technologies Business Unit, as well as the related service activities, to funds managed by American European Associates Investors LP (AEA), U.S. We expect to receive payments relating to this transaction of 0.6 billion in the first half of fiscal 2014.

With our ability to generate positive operating cash flows, our total liquidity of 9.790 billion and our 6.7 billion in unused lines of credit and given our credit ratings at year-end, we believe that we have sufficient flexibility to fund our capital requirements including scheduled debt service, regular capital spending, ongoing cash requirements from operating and SFS financing activities, dividend payments, pension plan funding and portfolio activities. Also in our opinion, our working capital is sufficient for the Company's present requirements.

Table of Contents**NET ASSETS POSITION**

Our total assets in fiscal 2013 were influenced by negative currency translation effects of 3.434 billion, led by the US\$. Within total assets of 101.936 billion, total assets related to SFS increased to 18.661 billion as of September 30, 2013 from 17.405 billion a year earlier. Within total liabilities, SFS debt increased to 15.600 billion from 14.558 billion a year earlier. Both changes were driven by the growth strategy at SFS. SFS assets represented 18% of Siemens total assets as of September 2013, compared to 16% a year earlier. SFS debt represented 15% of Siemens total liabilities and equity, compared to 13% at the end of fiscal 2012.

The following discussion presents an analysis of changes of our Consolidated Statements of Financial Position.

	September 30,	
	2013	2012
	(in millions of)	
Cash and cash equivalents	9,190	10,891
Available-for-sale financial assets	601	524
Trade and other receivables	14,853	15,220
Other current financial assets	3,250	2,901
Inventories	15,560	15,679
Current income tax assets	794	836
Other current assets	1,297	1,277
Assets classified as held for disposal	1,393	4,799
Total current assets	46,937	52,128

Cash and cash equivalents decreased by 1.701 billion from the prior-year level. For detailed information regarding the change, see Item 5: Operating and financial review and prospects Liquidity and capital resources Cash flows Fiscal 2013 compared to fiscal 2012.

The main factor in the decrease in the line item Trade and other receivables of 367 million was negative currency translation effects.

The increase in loans receivable of SFS, associated with its growth strategy, was the primary factor in the increase of 349 million year-over-year in the line item Other current financial assets.

Table of Contents

In July 2013, we successfully completed our spin-off and listing of OSRAM. As a result, we derecognized the net carrying amount of the disposal group OSRAM and the associated spin-off liability. Mainly due to this spin-off, the line item Assets classified as held for disposal decreased to 1.393 billion as of September 30, 2013 compared to 4.799 billion a year earlier.

	September 30,	
	2013	2012
	(in millions of)	
Goodwill	17,883	17,069
Other intangible assets	5,057	4,595
Property, plant and equipment	9,815	10,763
Investments accounted for using the equity method	3,022	4,436
Other financial assets	15,117	14,666
Deferred tax assets	3,234	3,748
Other assets	872	846
Total non-current assets	54,999	56,123

Goodwill increased to 17.883 billion as of September 30, 2013 compared to 17.069 billion a year earlier. The increase in goodwill was due mainly to acquisitions and purchase accounting adjustments, partly offset by negative currency translation effects. Acquisitions and purchase accounting adjustments included the acquisition of Invensys Rail, which is being integrated into the Infrastructure & Cities Sector's Mobility and Logistics Division, and LMS International NV, which is being integrated into the Industry Sector's Industry Automation Division.

Other intangible assets increased to 5.057 billion as of September 2013 compared to 4.595 billion a year earlier. The increase is due mainly to the acquisitions mentioned above, partly offset by amortization and impairments.

Property, plant and equipment decreased by 948 million year-over-year. Additions in fiscal 2013 were more than offset by retirements, depreciation and impairments and negative currency translation effects.

Investments accounted for using the equity method decreased year-over-year by 1.415 billion. The main factor was the sale of our 50% share in NSN to its other shareholder, Nokia Corporation.

The line item Other financial assets increased to 15.117 billion as of September 30, 2013 compared to 14.666 billion a year earlier. The change was due primarily to higher loans receivable driven by the growth strategy at SFS and to the recognition of our 17.0% stake in OSRAM after the spin-off, partly offset by a decrease in the non-current portion of the fair market values of financial derivatives used for our hedging activities.

	September 30,	
	2013	2012
	(in millions of)	
Short-term debt and current maturities of long-term debt	1,944	3,826
Trade payables	7,599	8,036
Other current financial liabilities	1,515	1,460

Current provisions	4,485	4,750
Current income tax liabilities	2,151	2,204
Other current liabilities	19,701	20,302
Liabilities associated with assets classified as held for disposal	473	2,049
Total current liabilities	37,868	42,627

Short-term debt and current maturities of long-term debt decreased by 1.882 billion as of September 30, 2013 compared to the end of the prior fiscal year. The main factors in the decrease were the redemption of 2.0 billion in fixed-rate-instruments and a US\$1.0 billion floating-rate term loan, partly offset by reclassifications of long-term 1.0 billion in 5.375% p.a. instruments due in June 2014 and 400 million in 0.375% p.a. instruments due in September 2014.

Table of Contents

The decrease of 436 million in the line item Trade payables was due primarily to negative currency translation effects.

The main factor of the decrease in the line item Other current liabilities to 19.701 billion as of September 30, 2013 from 20.302 billion a year earlier was a decrease in billings in excess of costs and estimated earnings on uncompleted contracts and related advances.

Liabilities associated with assets classified as held for disposal decreased to 473 million as of September 30, 2013 from 2.049 billion a year earlier. The main factor was lower liabilities due to OSRAM's spin-off.

	September 30,	
	2013	2012
	(in millions of)	
Long-term debt	18,509	16,880
Post-employment benefits	9,265	9,801
Deferred tax liabilities	504	494
Provisions	3,907	3,908
Other financial liabilities	1,184	1,083
Other liabilities	2,074	2,034
Total non-current liabilities	35,443	34,200

Long-term debt increased by 1.629 billion as of September 30, 2013, due mainly to the issuance of 1.25 billion in 1.75% p.a. instruments, 1.0 billion in 2.875% p.a. instruments, US\$500 million in 1.5% p.a. instruments, two bilateral US\$500 million floating-rate term loans, US\$400 million in floating-rate instruments and US\$100 million in 3.5% p.a. fixed-rate instruments. These issuances were partly offset by the above-mentioned reclassification in the line item Short-term debt and current maturities of long-term debt.

The line item Post-employment benefits decreased by 536 million as of September 30, 2013, mainly due to the decrease of the defined benefit obligation.

	September 30,	
	2013	2012
	(in millions of)	
Total equity attributable to shareholders of Siemens AG	28,111	30,855
<i>Equity ratio</i>	<i>28%</i>	<i>29%</i>
Non-controlling interests	514	569
Total liabilities and equity	101,936	108,251

Total equity attributable to shareholders of Siemens AG decreased from 30.855 billion at the end of fiscal 2012 to 28.111 billion at the end of fiscal 2013. In fiscal 2013, the main factors relating to the decrease in total equity attributable to shareholders of Siemens AG were: (1) Dividend payments of 2.528 billion (paid for fiscal 2012); (2) measuring OSRAM's spin-off liability at fair value with any changes recognized in retained earnings of 2.270 billion and (3) repurchase of 17,150,820 treasury shares at weighted average costs per share of 78.66. This decrease was partly offset by net income attributable to shareholders of Siemens AG of 4.284 billion.

For additional information on our net assets position, see Item 18: Financial Statements Notes to Consolidated Financial Statements.

European sovereign credit exposures Due to uncertainties regarding European sovereign debt exposures, we regularly monitor our credit exposures in particular to public and private sector debtors in Italy, Spain, Greece, Portugal and Ireland. These credit exposures include trade receivables from the sale of goods and services, receivables from finance leases and other financial assets, totaling a low single-digit billion euro amount as of September 30, 2013. To evaluate these exposures we perform a credit rating for public and private sector debtors using different methods subject to centrally defined limits. For exposures to public sector debtors, which represented approximately one third of these exposures, we applied a specific policy. This policy requires that the rating applied to individual public sector customers cannot be better than the weakest of the sovereign

Table of Contents

ratings provided by Moody's, S&P's and Fitch for the respective country. Based on our ratings and our credit exposures to end customers or main contractors located in Italy, Spain, Greece, Portugal and Ireland, we believe that Siemens is well-positioned to bear these risks.

SUBSEQUENT EVENTS

After the end of fiscal 2013, Siemens signed an agreement to sell its business for treating and processing municipal and industrial water and wastewater that are bundled in the Siemens Water Technologies Business Unit, as well as the related service activities, to funds managed by AEA Investors LP, U.S., for a purchase price of 0.6 billion. Closing of the transaction is subject to approval by regulatory authorities and is expected in the first half of fiscal 2014.

In November 2013, Siemens announced a share buyback of up to 4 billion ending latest on October 31, 2015. The buybacks will be made under the current authorization granted at the Annual Shareholders Meeting on January 25, 2011, which allows for further share repurchases of a maximum of 47.8 million shares under this program. Shares repurchased may be used for cancelling and reducing capital stock, for issuing shares to current and former employees, to members of the Managing Board and board members of affiliated companies and for meeting obligations from or in connection with convertible bonds or warrant bonds.

REPORT ON EXPECTED DEVELOPMENTS**WORLDWIDE ECONOMY**

In 2014 we expect global GDP growth to accelerate moderately to 3.2% (using our own calculations based on IHS Global Insight forecasts). Unlike in recent years, we expect growth in industrialized countries to pick up more strongly than in emerging markets. GDP in industrialized countries is expected to increase 2.0%, which is 0.9 percentage points more than in 2013. Main drivers of the anticipated acceleration are the strengthening of the U.S. economy; stabilization in European countries that are strongly affected by the sovereign debt crisis; less drag from fiscal consolidation policies; and the continuation of accommodative monetary policies. GDP in the emerging countries is forecast to expand 5.3%, which is 0.7 percentage points more than in 2013. Downside risks include a renewed escalation of the federal budget stalemate in the U.S. at the beginning of calendar 2014; a resurgence of the Euro crisis; and an intensification of balance-of-payments problems and exchange rate devaluations in some emerging countries (e.g. India, Indonesia) which could spread more widely. In addition, poor execution of U.S. central bank tapering of its expansive monetary policy could exacerbate capital flight from emerging markets and add additional stress for these countries. Although downside risks are not negligible, they can be contained through responsible political action. Hence we believe that the upside potential for 2014 GDP growth dominates the outlook. Increasing economic activity is expected to support investment spending, production and value added in the manufacturing sector, all of which were dampened by political and economic uncertainty and lack of demand in the last few years. Therefore, for the global economy we expect fixed investment to grow 5.2% in 2014, and value-added manufacturing 4.0%.

For **Europe** the most severe problem is the unsustainable high unemployment in the countries most affected by the sovereign debt crisis. Besides causing political uncertainties it weighs heavily on private consumption and investment activity. However, structural reforms to regain lost competitiveness seem to bear fruit, particularly since the spring quarter of 2013. Labor costs are falling and export performance is improving. For example, surveys of consumer and business sentiment for the Euro zone recently hit two-year highs. But even as financial institutions and private households reduce their debt levels and governments keep on balancing their budgets, growth is expected to remain subdued for a longer period of time. A notable exception is Germany. The country's unemployment rate is on a very low level historically, incomes are rising, the housing market is gaining momentum after years of stagnation, and

monetary policy is very expansionary given the good shape of the German economy. Hence we expect the country's GDP to grow 1.8% in 2014, a full percentage point more than in the whole Euro zone. GDP for the region Europe, C.I.S., Africa and Middle East is expected to expand 2.1% in 2014. We expect value-added manufacturing to show nearly the same growth rate, while fixed investment shows stronger growth of 3.3%.

Table of Contents

As with the fiscal cliff situation last year, GDP development in the **Americas** will depend on the handling of the U.S. federal budget and debt ceiling. In the months leading up to October 1, 2013 the political parties for a long time failed to reach agreements on these issues. Accordingly, the government had to shut down many of its services for 16 days. Even more worrisome was the potential that the U.S. would have to default on certain government bonds if the debt ceiling were not raised. Although these consequences were averted due to an agreement at the last moment, the solution of the underlying problems were only postponed. The agreement allows the government to stay open until mid-January and the debt ceiling to be raised only until February 2014. Before these deadlines, the parties have agreed to develop a budget plan for the next ten years. For U.S. and global GDP growth to continue their positive development in 2014, it is essential that permanent agreements can be reached without further uncertainties. Assuming such an outcome, the outlook for the U.S. economy is positive. Indeed economic activity was already regaining speed in 2013, which was supported by a recovering real estate sector, higher household wealth and improving bank lending conditions. With monetary conditions remaining favorable, real estate and business investment should pick up in 2014 and contribute to accelerating GDP growth. In Brazil, we expect the current reacceleration of growth to reach a moderate pace in 2014, contributing positively to economic dynamics for Latin America. In the Americas region overall, fixed investment spending is expected to grow 5.1% in 2014, faster than GDP and value-added manufacturing which are expected to expand 2.7% and 2.9%, respectively, in 2014.

As in recent years, **Asia, Australia** leads the other world regions in the rate of GDP growth. In China, recent data on economic activity suggest a continuation of the modest reacceleration which started in mid-2013, supplemented in 2014 by a small government stimulus program. We expect GDP in China to grow roughly 8% in 2014. The government's actions in the past demonstrated its commitment to provide mild stimulus if annual growth appears to be falling below 7.5%. Several downside risks remain for the next year. First, the government's efforts to rebalance growth away from investment toward consumption might fail and curb economic activity too strongly. Second, risks in the financial sector remain, in particular in shadow banks, due to high indebtedness of households and municipalities. However, both risks should be manageable which leaves room for the modest recovery to continue. In contrast, difficulties in the Indian economy are more severe. International capital flows have reversed, heading out of the country, and caused a continuing depreciation of the Rupee. Together with the inflation rate already on a high level the central bank was forced to tighten monetary policy although economic activity slowed considerably in 2013. Hence, restrictive financial conditions and unresolved supply-side restrictions (e.g. heavily regulated product and factor markets and an insufficient infrastructure) weigh on growth in the near term. Nevertheless, due mainly to increasing momentum in China and Japan, we expect GDP growth for the Asia, Australia region to increase to roughly 5% in 2014. We expect fixed investments and value-added manufacturing to expand even more at roughly 6% each.

All in all, we anticipate that global economic activity should improve in 2014. While the risk balance looks better than last year, which included the threat of a partial break-up of the Euro zone with possible ramifications for world financial markets, significant risks remain for the world economy. Assuming U.S. political parties achieve lasting solutions for the federal debt and budget, we do not see comparable high-impact risks at the moment that could endanger global growth prospects. Favorable monetary conditions and a significant backlog in investment spending provide a solid basis for the global economy in 2014.

MARKET DEVELOPMENT

In fiscal year 2014, we expect **Energy** Sector markets to continue on a moderate growth path, including slightly stronger markets for all Sector businesses compared to fiscal 2013. Gas-fired power plants and wind-farms (both onshore and offshore) are expected to show the most growth.

Effective with the beginning of fiscal 2014, the Fossil Power Generation Division and the Oil & Gas Division were combined into a single Division, **Power Generation**. Within the markets served by the Power Generation Division, we overall expect gas-fired power generation to grow more strongly than coal-fired power generation due to various factors. One is the increased need for highly flexible peaking and intermediate duty, such as to compensate for the fluctuating power generation associated with renewable energy sources such as sun and wind. Stricter carbon emission regulations will also favor natural gas over coal. The general drivers for market growth are expected to remain in place: economic growth and the increasing need to replace older, mainly

Table of Contents

coal-fired units in industrialized countries. Growing environmental awareness increases the demand for environmentally friendly technologies, such as highly efficient power plants and CO₂ reduction techniques. We expect growth in fossil power generation markets to be fueled by moderately growing demand for large gas power plants, following a low level of demand in fiscal 2013. We believe that the observed trend towards larger and more efficient generation units is going to continue. On a regional basis, growth is expected to come primarily from the U.S. and the Middle East, while demand in Europe and Asia remains relatively stable compared to fiscal 2013. Political developments in the Middle East and economic instability in Europe continue to pose a downside risk. Growth in the Division's industrial power generation markets is expected to come from small-scale combined-cycle power plants. We believe that oil and gas markets will be fueled by the growing compression and solutions businesses. Compression markets are expected to grow moderately year-over-year, especially in Russia and the Middle East. We expect growth in the solutions market in North America, the Middle East and in parts of Western Europe.

Markets served by our **Wind Power** Division are expected to be stronger in fiscal 2014 compared to fiscal 2013. We believe growth will come from the continued pick-up of the offshore market and continued moderate growth in the onshore market. Potential changes in regulatory frameworks in key markets such as Germany and the U.K. could limit growth in the offshore market. We expect the onshore market in fiscal 2014 to be especially strong in the U.S., where investors are expected to initiate new projects in order to capture the benefits of tax incentives before they expire. This is expected to more than offset slightly declining onshore markets in Western Europe, North-East Asia, the Middle East and Africa. We expect overall stability in the Asia, Australia region. We also expect intense local competition particularly in China, which is the largest national wind market in the world. Further growth in China is supported by ambitious government targets for renewable energy. But because most of this market has low technical requirements, only a fraction of it can be addressed by the Wind Power Division.

The markets of our **Power Transmission** Division are also expected to grow slightly compared to fiscal 2013. While transformer markets are expected to remain stable, we believe the markets for high-voltage products and transmission solutions markets will be moderately stronger. Growth in transmission solutions is expected to come mainly from the Middle East and the U.S. (for high-voltage, direct current electric power transmission systems and flexible alternating current power transmission system) and from North-West Europe (for grid access).

In fiscal 2014, we expect continued moderate growth in the markets served by our **Healthcare** Sector. We expect emerging markets to outgrow markets in industrialized economies, as healthcare systems in the latter countries address cost pressures and governments continue to address high sovereign debt levels, particularly in large parts of Europe. Industrialized countries—especially those more reliant on government healthcare expenditures—are expected to continue to focus on improving the efficiency of healthcare and on slowing the growth of healthcare spending, thus driving demand for cost-efficient and high-throughput products and solutions. As a result of U.S. healthcare reform, we expect a small but increasing share of healthcare spending being linked to medical outcomes, in an attempt to drive efficiency and curtail costs. In emerging markets, we expect continued strong demand, in particular for entry-level products and solutions, as these countries build up their healthcare infrastructure to provide their populations with affordable access to modern medical technology, including in rural areas. Rising disposable income of private households also contributes to growing demand for healthcare solutions in these markets. Growth in the Asia, Australia region is expected to be driven by double-digit growth rates in China, in an increasingly competitive environment with international and local vendors. We expect that growth in the Americas will be supported by moderate growth in the U.S., in a market characterized by continuing implementation of healthcare reform, consolidation among providers and increasing alignment between hospitals and ambulatory care providers. We expect the overall market for the Europe, C.I.S., Africa, Middle East region to recover only slightly, particularly due to ongoing austerity programs in southern Europe. For the healthcare market overall, we anticipate that the trends towards entry-level solutions, higher efficiency and focus on patient outcomes will continue.

Following a stabilization at the end of fiscal 2013, we expect some of **Industry** Sector's markets to show signs of recovery in the second half of fiscal 2014. We assume that the recovery will be stronger for process automation solutions than for discrete automation. Overall, we expect markets served by our Industry Sector to

Table of Contents

grow slightly in fiscal 2014 year-over-year. For the Sector's industry-specific markets, we anticipate slight growth in consumer-related industries such as pharmaceuticals, chemicals and food and beverages, and also in the machine building and infrastructure industries. The automotive markets are anticipated to continue to grow in fiscal 2014, but at a slower pace than in fiscal 2013. Within the pharmaceutical industry, we expect demand to be driven by customer investments in increasing production. Within the chemicals industry, we expect growth in petrochemicals and basic chemicals in emerging markets. Within the food and beverage industry, we anticipate the highest growth rates coming from emerging markets. We believe that demand within the machine building industry will benefit from the continuing trend toward integration of product design and product lifecycle management. Within the automotive industry, we expect growth to come predominately from major manufacturers and suppliers in the larger emerging countries and the U.S., as these companies invest to increase efficiency and productivity along their entire value chain. Metals technologies markets are expected to decline year-over-year.

On a geographic basis, the strongest growth for Industry is expected to come from Asia and the Americas. The Asian markets are dominated by the economic development of China which is undergoing a transformation from an investment-driven market towards a more consumption-driven market. While this transition presents longer-term opportunities, overcapacities and structural barriers to reform in the near-term limit the pace of expansion and modernization in China's manufacturing sector. Growth in the Americas is heavily influenced by developments in the U.S., which are uncertain due to political, regulatory and economic factors. The downturn in industrial markets in Europe appears to be coming to an end, and customer capital expenditures are expected to stabilize accordingly. Central and Eastern Europe should show some growth as the current level of industrial investment still offers potential for expansion. Within Europe, we expect only modest industrial investment in Germany, which is strongly dependent on the development of its main export markets, such as China, the U.S. and other European countries.

In fiscal 2014, the short-cycle manufacturing markets served by our **Industry Automation** Division are expected to benefit from stabilizing demand, following de-stocking by customers in fiscal 2013. Overall we do not expect recovery in the markets for our short-cycle businesses until late in fiscal 2014. We anticipate that the market for industrial IT will grow faster than the Division's markets overall.

The long-cycle industry markets served by the **Drive Technologies** Division are expected to grow more slowly or decline, such as in the mining and oil and gas industries where customers are expected to postpone or cancel new projects due to lower raw material prices. Markets in the pulp and paper industry are expected to decline.

We expect worldwide markets for solutions provided by the **Infrastructure & Cities** Sector to grow moderately in fiscal 2014. We expect this growth to stem largely from rail markets, driven by large contract awards. We further expect market growth for the Sector overall to begin to benefit from a recovery in the nonresidential construction markets towards the end of fiscal 2014. In contrast, we anticipate that markets for power grid solutions and products will show little or no growth compared to fiscal 2013.

Markets served by the **Transportation & Logistics** Business are expected to grow moderately in fiscal 2014, fueled by large contract awards as mentioned above, particularly in the U.K., Saudi Arabia and South Africa. Even so, we expect that market growth will be driven by the Asia, Australia region. Overall, the markets for products, solutions and services for transportation and logistics are driven largely by public spending and hence are independent of short-term economic trends. In some countries, especially within emerging markets, we see a tendency to prefer local suppliers. In some European countries we are observing a trend of customers trying to increase competition by using multi-supplier strategies. We expect continued strong demand for metro and light rail as well as for technologies to reduce energy consumption and operating costs. The locomotive market is still held back by austerity programs in a number of countries. We expect that innovative value-added services offerings, such as IT and remote services, will support market growth in coming years.

Markets served by our **Power Grid Solutions & Products** Business are expected to show little or no growth in fiscal 2014. While we anticipate a general recovery of the non-residential construction market, particularly in the U.S., there is usually a lag time of three to four quarters before orders for electrical installations materialize and our Business begins to participate in such growth. As for industrial markets, we

Table of Contents

expect that the development will be burdened by declining investments in the mining industry. Similarly, investments by power supply companies are anticipated to be held back by regulatory restrictions in some countries, and by austerity programs in others, particularly in Europe. As at Transportation & Logistics we see a tendency in some countries, especially within emerging countries, to prefer local suppliers.

The markets for our **Building Technologies** Division are expected to grow moderately in fiscal 2014. While we expect solid growth in non-residential construction, there is similar to Power Grid Solutions & Products usually a lag time of three to four quarters before the Division begins to participate in such growth. On a regional basis, growth is expected to be driven by the Asia, Australia and the Americas regions. Within Europe, C.I.S., Africa, Middle East we anticipate growth in the Middle East, while the development in Europe is expected to be challenging due to the economic situation in some southern and western European countries and weak public investment due to austerity programs.

SFS business is geared to the Siemens Sectors and their markets and therefore provides support to the operating business of Siemens. As such SFS is, among other factors, influenced by the overall business development of the markets served by the four Sectors.

SIEMENS GROUP

We are basing our outlook for the Siemens Group and its segments on the above-mentioned expectations regarding the overall economic situation and specific market conditions for the next fiscal year.

We are exposed to currency translation effects, involving the US\$, British £ and currencies of emerging markets such as China, India and Brazil. We expect volatility in global currency markets to continue in fiscal 2014. Given that Siemens is a net exporter from the Eurozone to the rest of the world, a weak Euro is principally favorable for our business and a strong Euro is principally unfavorable. During fiscal 2013, the average exchange rate conversion for our large volume of US\$-denominated revenue was US\$1.31 per Euro. In the latter part of the fiscal year, the Euro increased in strength. As of the end of the fiscal year, the US\$ exchange rate was US\$1.35 per Euro. Through adaptation of our production facilities during the past, we have improved our natural hedge on a global basis. In addition, we have already systematically addressed the remaining currency risk in our export business activities for fiscal 2014, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 31. We expect these steps to help to limit effects on income related to currency in fiscal 2014.

We expect Siemens 2014, our company-wide program for improving profitability in our Sectors through cost reduction, strengthening core activities, improving our go-to-market setup, optimizing our corporate infrastructure, and simplifying our governance will contribute positively to growth in Net income and corresponding basic earnings per share (EPS).

This outlook excludes impacts related to legal and regulatory matters.

Revenue growth

We expect that in fiscal 2014 **revenue** on an organic basis, excluding currency translation and portfolio effects, will remain near the prior-year level, as markets for Siemens overall are expected to remain challenging in the next fiscal year. These challenges are expected to be particularly evident in short-cycle businesses, where we do not anticipate a recovery until late in fiscal 2014. On the other hand, we expect a stabilizing effect on revenue from conversion of our order backlog (defined as the sum of order backlogs of our Sectors) which totaled 100 billion as of September 30, 2013. From this backlog we expect to convert approximately 40 billion of past orders into current revenue in the next

fiscal year. Within this amount for fiscal 2014, we expect approximately 21 billion in revenue conversion from the 54 billion backlog of the Energy Sector, approximately 10 billion in revenue conversion from the 29 billion backlog of Infrastructure & Cities, approximately 6 billion in revenue conversion from the 10 billion backlog of Industry and approximately 3 billion in revenue conversion from the 7 billion backlog of Healthcare. For fiscal 2014, we expect that orders will continue to exceed revenue, leading to a book-to-bill ratio above 1.

Overall, we assume growth in revenue from emerging markets, which accounted for 34% of total revenue in fiscal 2013, to be largely offset by lower revenue from industrialized countries.

Table of Contents

In fiscal 2010, we set ourselves the goal to increase revenue from our Environmental Portfolio to more than 40 billion in fiscal 2014. In fiscal 2013, revenue from our Environmental Portfolio was 32 billion. Due to recent and ongoing portfolio changes, particularly including the spin-off of OSRAM and the disposal of our Water Technologies Business Unit, it is no longer likely that we will achieve this target purely with our own operations by the end of fiscal 2014. Siemens' strategic focus on technologies for energy efficiency and climate and environmental protection will nevertheless remain in place.

Profitability

For fiscal 2014, we anticipate that basic **EPS** from Net income will increase by at least 15% compared to 5.08 in fiscal 2013. This increase is calculated on a base of 843 million shares, which was the actual number of shares outstanding as of September 30, 2013. We expect that this increase will come predominantly from growth in **Net income**. In addition, we expect EPS growth to benefit modestly from our previously announced plan to repurchase Siemens shares in a volume of up to 4 billion within the next up to 24 months.

Our forecast for basic EPS growth in fiscal 2014 is based on a number of additional expectations and assumptions. As mentioned above, we forecast organic revenue near the level of fiscal 2013, which means we do not expect positive influences on profit development from economies of scale. We assume pricing pressure across our businesses of around 2.5% to 3.0% in fiscal 2014, which will also hold back profit development, and upward pressure on costs from wage inflation of around 4% on a global basis. Finally, we anticipate that our tax rate in fiscal 2014 will be slightly higher, on the assumption that we will generate a greater share of profit in higher-tax jurisdictions. We expect that these factors will be offset by significant positive developments, particularly including a steep decline in charges compared to fiscal 2013, which included 1.3 billion in impacts for the Siemens 2014 program. Furthermore, we expect substantial productivity benefits from the program, continued progress with reducing costs in our supply chain, and a more favorable revenue mix in some businesses due to portfolio measures and selective ramp-down of lower-margin activities.

We expect **Total Sectors profit** in fiscal 2014 to benefit from implementation of Siemens 2014. At the end of fiscal 2013, we were ahead of schedule with regard to identifying and implementing the measures within the program aimed at sustainably improving our productivity. As a result, we took the great majority of the charges we expected under the program within fiscal 2013, totaling 1.3 billion. With only some supplemental charges for the program in fiscal 2014, and with most of the program's productivity gains expected to materialize during the year, we expect a substantial increase in Total Sectors profit year-over-year, and that Total Sectors profit margin will rise to 9.5% to 10.5%. We assume that all Sectors will contribute to the Total Sectors profit margin improvement, except for Healthcare which already achieved a very high margin level in fiscal 2013 due to execution of its Agenda 2013 initiative. We assume that pricing pressure will be modestly higher for Healthcare and Energy than for Infrastructure & Cities and Industry.

As part of One Siemens, our framework for sustainable value creation, we have defined adjusted **EBITDA margin corridors** for the respective industries of our four Sectors, which the Sectors seek to achieve and maintain throughout the entire business cycle. For Energy the margin corridor is 10% to 15%; for Healthcare the margin corridor is 15% to 20%; for Industry the margin corridor is 11% to 17%; and for Infrastructure & Cities the margin corridor is 8% to 12%. With anticipated improvements in Total Sectors profit, we expect that all Sectors will be in their respective margin corridors in fiscal 2014, with Infrastructure & Cities reaching the low end of its target range.

Anticipated improvements within Total Sectors profit are expected to be partly offset by results outside the Sectors and within discontinued operations. Within **Equity Investments** we expect profit of approximately 100 million in fiscal 2014. In fiscal 2013, profit of 396 million benefited strongly from the sale of our stake in NSN.

We expect **SFS** to continue successfully executing its growth strategy, which drove a higher interest result in fiscal 2013 compared to the prior year. With continued growth in fiscal 2014, we anticipate profit of SFS to be above the prior-year level of 409 million. Within One Siemens, we set a target range for return on equity or **ROE (after tax)** for SFS of 15% to 20%. We expect that SFS will continue to reach this range in fiscal 2014.

Table of Contents

We anticipate that SRE will continue with real estate disposals depending on market conditions. We expect results from Corporate items and pensions in fiscal 2014 to be approximately a negative 1.0 billion and profit related to Eliminations, Corporate Treasury and other reconciling items to come in at about a negative 200 million.

In the next fiscal year, we expect no material impact on Net income from discontinued operations. For comparison, discontinued operations in fiscal 2013 resulted in income of 197 million, due mainly to OSRAM, which we spun off at the end of fiscal 2013.

Capital efficiency

Our most important financial goal is capital efficiency, which we measure in terms of adjusted return on capital employed (**ROCE (adjusted)**). Due mainly to our expectations regarding the development of income from continuing operations, we expect ROCE (adjusted) for continuing operations to return to our target range of 15% to 20% in fiscal 2014. For comparison, ROCE (adjusted) for continuing operations was 13.8% in fiscal 2013. For SFS, we set a target range for return on equity or ROE (after tax) for SFS of 15% to 20%. As mentioned above, we expect that SFS will continue to reach this range in fiscal 2014.

Capital structure

For the medium-term we set a target for our **capital structure**, defined as the ratio of adjusted industrial net debt to adjusted EBITDA. We seek to achieve a ratio in the range of 0.5 to 1.0. In fiscal 2013, we made progress toward this target, and we anticipate that we will approach the lower end of the range at the end of fiscal 2014. We expect this to be strongly supported by a planned buyback of Siemens AG shares worth up to 4.0 billion over the next up to 24 months as mentioned above.

In the area of investment planning, we expect to continue our investing activities, such as to safeguard market share and competitive advantages based on technological innovation. We will also continue investing in extending our capacities for designing, manufacturing and marketing new solutions and for the necessary replacements of these fixed assets. With regard to capital expenditures for continuing operations, we expect a substantial increase in fiscal 2014 spending year-over-year.

Dividend and share buybacks

We intend to continue providing an attractive return to shareholders. Therefore in the years ahead we intend to propose a dividend payout which, combined with outlays during the fiscal year for publicly announced share buybacks, results in a sum representing 40% to 60% of Net income, which for this purpose we may adjust to exclude selected exceptional non-cash effects. Furthermore, for fiscal 2014, we are taking proceeds from the sale of the NSN stake in fiscal 2013 into consideration. As in the past, we intend to fund the dividend payout from Free cash flow.

OVERALL ASSESSMENT

We expect our markets to remain challenging in fiscal 2014. Our short-cycle businesses are not anticipating a recovery until late in the fiscal year. We expect orders to exceed revenue, for a book-to-bill ratio above 1. Assuming that revenue on an organic basis remains level year-over-year, we expect basic EPS (Net Income) for fiscal 2014 to grow by at least 15% from 5.08 in fiscal 2013.

This outlook is based on shares outstanding of 843 million as of September 30, 2013. Furthermore, it excludes impacts related to legal and regulatory matters. Overall, the actual development for Siemens and its Segments may vary,

positively or negatively, from our expectations due to the risks and opportunities described elsewhere in this document. See Item 3: Key information Risk factors as well as Item 5: Operating and financial review and prospects Report on expected developments Opportunities. This report on expected developments should be read in conjunction with Forward-looking statements at the beginning of this document.

Table of Contents**OPPORTUNITIES**

Within our comprehensive, interactive and management-oriented Enterprise Risk Management (ERM) approach that is integrated into the organization and that addresses both risks and opportunities, we regularly identify, evaluate and respond to opportunities that present themselves in our various fields of activity. Below we describe our most significant opportunities. The described opportunities are necessarily not the only ones we encounter. In addition, our assessment of opportunities is subject to change as our Company, our markets and technologies are constantly developing. As a consequence, new opportunities may arise, existing opportunities may cease to be relevant, or the significance of an opportunity may change. Generally, opportunities are assessed to the best of our knowledge, considering certain assumptions, including market development, market potential of technologies or solutions, and anticipated developments in customer demand or prices, among other things. When opportunities materialize, they may have a lower effect than previously estimated on the basis of the underlying assumptions. It is also possible that opportunities we see today will never materialize. In our view, the overall opportunity situation did not change significantly as compared to the prior year. Two opportunity factors included in our prior year reporting (further growth in the area of environment and climate protection and utilizing cross collaboration among our broad portfolio and global presence to offer more innovative and holistic solutions) have been incorporated into our business plans and are therefore not reported as an ERM relevant opportunity any more.

Through selective acquisitions, equity investments and partnerships we constantly strive to strengthen our leading technology position, open up additional potential markets or further develop our product

portfolio: We constantly monitor our current and future markets for opportunities for strategic acquisitions, equity investments or partnerships to complement organic growth. Such activities could help us to strengthen our market position in our existing markets, provide access to new markets or complement our technological portfolio in selected areas.

We particularly see further opportunities in the growth potential of established markets and especially of the emerging markets: It is expected that in coming years emerging markets will continue to grow significantly faster than industrialized nations, led by strong growth in the BRIC countries Brazil, Russia, India and China as well as by growth opportunities in the second wave emerging markets like Chile, Indonesia, Mexico, Poland or Turkey. Within One Siemens, we want to take measures aimed at continuously increasing our share of revenue from emerging markets. We believe that developing the capability to design, manufacture and sell so-called SMART (simple, maintenance-friendly, affordable, reliable, and timely-to-market) products will provide us with opportunities to gain market share and enhance our local presence in these strategic growth markets. Adding further SMART products to our portfolio and developing stronger sales channels would enable us to increase our revenues by serving large and fast-growing regional markets, where customers may consider price more strongly than product features when making a purchase decision.

We constantly strive to develop new technologies, new products and solutions as well as to improve existing ones: We invest in new technologies that we expect to meet future demands in accordance with the four strategic megatrends demographic change, urbanization, climate change and globalization (for further information, see Item 4: Information on the Company Strategy Global megatrends).

Localizing value chain activities in low cost countries could further improve our cost position: Localizing certain value chain activities, such as procurement, manufacturing, maintenance and service in markets such as the BRIC countries and other emerging markets, as well as the Middle East could enable us to reduce costs and to strengthen our global competitive position, in particular compared to competitors based in countries with a more favorable cost structure.

We are in the process of continuously developing and implementing initiatives to reduce costs, adjust capacities, improve our processes and streamline our portfolio: In an intensified competitive market environment, a competitive cost structure complements the competitive advantage of being innovative. We believe that further improvements in our cost position strengthen our global competitive position and secure our market presence against emerging and incumbent competitors. For example, we expect to create sustainable value from productivity measures in the Sectors in connection with Siemens 2014, as mentioned earlier a company-wide program supporting our One Siemens framework.

Table of Contents

We are realigning our regional organization: As of November, 2013, following the close of fiscal 2013, we disbanded our Regional Cluster organization. Following this organizational change, we have designated 30 Lead Countries which are individually responsible for managing a number of other countries regarding market penetration. Each Lead Country reports directly to the Managing Board. By implementing this move, Siemens intends to intensify its customer access and expand its regional business. We expect that this new setup will further enhance our local market penetration going forward.

CRITICAL ACCOUNTING ESTIMATES

Siemens Consolidated Financial Statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the IASB and as adopted by the European Union (EU). Siemens significant accounting policies, as described in Item 18: Financial Statements Notes to Consolidated Financial Statements Note 2 are essential to understanding the Company's results of operations, financial positions and cash flows. Certain of these accounting policies require critical accounting estimates that involve complex and subjective judgments and the use of assumptions, some of which may be for matters that are inherently uncertain and susceptible to change. Such critical accounting estimates could change from period to period and have a material impact on the Company's results of operations, financial positions and cash flows. Critical accounting estimates could also involve estimates where management reasonably could have used a different estimate in the current accounting period. Management cautions that future events often vary from forecasts and that estimates routinely require adjustment.

Revenue recognition on construction contracts The Company's Sectors, particularly Energy, Industry and Infrastructure & Cities, conduct a significant portion of their business under construction contracts with customers. The Company accounts for construction projects using the percentage-of-completion method, recognizing revenue as performance on contract progresses. Certain long-term service contracts are accounted for under the percentage-of-completion method as well. This method places considerable importance on accurate estimates of the extent of progress towards completion and may involve estimates on the scope of deliveries and services required for fulfilling the contractually defined obligations. These significant estimates include total contract costs, total contract revenues, contract risks, including technical, political and regulatory risks, and other judgments. Under the percentage-of-completion method, changes in estimates may lead to an increase or decrease of revenue. The creditworthiness of our customers is taken into account in estimating the probability that economic benefits associated with a contract will flow to the Company. In addition, we need to assess whether the contract is expected to continue or to be terminated. In determining whether the continuation or termination of a contract is expected to be the most likely scenario, all relevant facts and circumstances relating to the contract are considered on an individual basis. For contracts expected to be continued, amounts already included in revenue for which collectability ceases to be probable are recognized as an expense. For contracts expected to be terminated, including terminations due to expected payment defaults of our customers or terminations due to force majeure events, the estimates on the scope of deliveries and services provided under the contracts are revised accordingly, typically resulting in a decrease of revenue in the respective reporting period. Management of the operating Divisions continually reviews all estimates involved in such construction contracts and adjusts them as necessary.

Trade and other receivables The allowance for doubtful accounts involves significant management judgment and review of individual receivables based on individual customer creditworthiness, current economic trends including the developments of the European sovereign debt crisis and analysis of historical bad debts on a portfolio basis. For the determination of the country-specific component of the individual allowance, Siemens also consider country credit ratings, which are centrally determined based on information from external rating agencies. Regarding the determination of the valuation allowance derived from a portfolio-based analysis of historical bad debts, a decline of receivables in volume results in a corresponding reduction of such provisions and vice versa. As of September 30, 2013 and 2012, Siemens recorded a total valuation allowance for trade and other receivables of 1,147 million and

1,190 million, respectively.

Impairment Siemens tests at least annually whether goodwill has incurred any impairment, in accordance with its accounting policy. The determination of the recoverable amount of a cash-generating unit or a group of cash-generating units to which goodwill is allocated involves the use of estimates by management. The outcome

Table of Contents

predicted by these estimates is influenced e.g. by the successful integration of acquired entities, volatility of capital markets, interest rate developments, foreign exchange rate fluctuations and the outlook on economic trends. The recoverable amount is the higher of the cash-generating unit's or the group of cash-generating units' fair value less costs to sell and its value in use. The Company generally uses discounted cash flow based methods to determine these values. These discounted cash flow calculations use five-year projections that are based on financial forecasts. Cash flow projections take into account past experience and represent management's best estimate about future developments. Cash flows after the planning period are extrapolated using individual growth rates. Key assumptions on which management has based its determination of fair value less costs to sell and value in use include estimated growth rates, weighted average cost of capital and tax rates. These estimates, including the methodology used, can have a material impact on the respective values and ultimately the amount of any goodwill impairment. Likewise, whenever property, plant and equipment, other intangible assets and investments accounted for using the equity method are tested for impairment, the determination of the assets' recoverable amount involves the use of estimates by management that can have a material impact on the respective values and ultimately the amount of any impairment.

Non-current assets and disposal groups classified as held for disposal Assets held for disposal and disposal groups are measured at the lower of their carrying amount and their fair value less costs to sell. The determination of the fair value less costs to sell includes the use of management estimates and assumptions that tend to be uncertain.

Employee benefit accounting Post-employment benefits Obligations for pension and other post-employment benefits and related net periodic benefit costs are determined in accordance with actuarial valuations. These valuations rely on key assumptions including discount rates, expected compensation increases, rate of pension progression and mortality rates. The discount rate assumptions are determined by reference to yields on high-quality corporate bonds of appropriate duration and currency at the end of the reporting period. In case such yields are not available discount rates are based on government bonds yields. Due to changing market, economic and social conditions the underlying key assumptions may differ from actual developments and may lead to significant changes in pension and other post-employment benefit obligations. Such differences are recognized in full through line item Other comprehensive income, net of income taxes in the period in which they occur without affecting profit or loss. For a sensitivity analysis, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 23.

Provisions Significant estimates are involved in the determination of provisions related to onerous contracts, warranty costs, asset retirement obligations and legal proceedings. A significant portion of the business of certain operating divisions is performed pursuant to long-term contracts, often for large projects, in Germany and abroad, awarded on a competitive bidding basis. Siemens records a provision for onerous sales contracts when current estimates of total contract costs exceed expected contract revenue. Such estimates are subject to change based on new information as projects progress towards completion. Onerous sales contracts are identified by monitoring the progress of the project and updating the estimate of total contract costs which also requires significant judgment relating to achieving certain performance standards, for example in the Fossil Power Generation Division, in the Power Transmission Division, in the Mobility & Logistics Division, in the Rail Systems Division and in the Healthcare Sector as well as estimates involving warranty costs and estimates regarding project delays including the assessment of responsibility splits between the contract partners for these delays. Significant estimates and assumptions are also involved in the determination of provisions related to major asset retirement obligations. Uncertainties surrounding the amount to be recognized include, for example, the estimated costs of decommissioning because of the long time frame over which future cash outflows are expected to occur including the respective interest accretion. Amongst others, the estimated cash outflows could alter significantly if, and when, political developments affect the government's plans to develop the final storage.

Siemens is subject to legal and regulatory proceedings in various jurisdictions. Such proceedings may result in criminal or civil sanctions, penalties, damage claims and other claims, or disgorgements against the Company. If it is

more likely than not that an obligation of the Company exists and will result in an outflow of resources, a provision is recorded if the amount of the obligation can be reliably estimated. Regulatory and legal proceedings as well as government investigations often involve complex legal issues and are subject to substantial uncertainties. Accordingly, management exercises considerable judgment in determining whether there is a

Table of Contents

present obligation as a result of a past event at the end of the reporting period, whether it is more likely than not that such a proceeding will result in an outflow of resources and whether the amount of the obligation can be reliably estimated. The Company periodically reviews the status of these proceedings with both inside and outside counsel. These judgments are subject to change as new information becomes available. The required amount of a provision may change in the future due to new developments in the particular matter. Revisions to estimates may significantly impact future net income. Upon resolution, Siemens may incur charges in excess of the recorded provisions for such matters. It cannot be excluded that the financial position or results of operations of Siemens will be materially affected by an unfavorable outcome of legal or regulatory proceedings or government investigations.

Income taxes Siemens operates in various tax jurisdictions and therefore has to determine tax positions under respective local tax laws and tax authorities views which can be complex and subject to different interpretations of taxpayers and local tax authorities. Deferred tax assets are recognized if sufficient future taxable profit is available, including income from forecasted operating earnings, the reversal of existing taxable temporary differences and established tax planning opportunities. As of each period-end, management evaluates the recoverability of deferred tax assets, based on projected future taxable profits. As future developments are uncertain and partly beyond management's control, assumptions are necessary to estimate future taxable profits as well as the period in which deferred tax assets will recover. Estimates are revised in the period in which there is sufficient evidence to revise the assumption. If management considers it probable that all or a portion of a deferred tax asset cannot be realized, that portion would not be recognized.

RECENT ACCOUNTING PRONOUNCEMENTS

For information on recent accounting pronouncements and their impact on the Consolidated Financial Statements see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 2.

SUPPLEMENTAL FINANCIAL MEASURES

Siemens (the Company) presents the following financial measures to supplement its Consolidated Financial Statements which are prepared in accordance with International Financial Reporting Standards, or IFRS. These measures are designed to measure growth, capital efficiency, cash and profit generation, and optimization of Siemens capital structure:

Orders and order backlog;

Adjusted or organic growth rates of revenue and orders;

Book-to-bill ratio;

Total Sectors profit;

Return on equity (after tax), or ROE (after tax);

Return on capital employed (adjusted), or ROCE (adjusted);

Free cash flow, or FCF;

Adjusted EBITDA, adjusted EBIT and adjusted EBITDA margins;

Earnings-effects from purchase price allocation, or PPA effects;

Net debt; and

Adjusted industrial net debt.

These supplemental financial measures are or may be non-GAAP financial measures as defined in the rules of the U.S. Securities and Exchange Commission, or SEC. They may exclude or include amounts that are included or excluded, as applicable, in the calculation of the most directly comparable financial measures calculated in accordance with IFRS, and their usefulness is therefore subject to limitations, which are described

Table of Contents

below for each measure. Accordingly, they should not be viewed in isolation or as alternatives to the most directly comparable financial measures calculated in accordance with IFRS, as identified in the following discussion, and they should be considered in conjunction with Siemens Consolidated Financial Statements prepared in accordance with IFRS and the Notes thereto.

In considering our supplemental financial measures, investors should bear in mind that other companies that report or describe similarly titled financial measures may calculate them differently. Accordingly, investors should exercise appropriate caution in comparing our supplemental financial measures to similarly titled financial measures reported by other companies.

The following discussion provides:

the definitions of these supplemental financial measures;

the most directly comparable IFRS financial measures;

information regarding the usefulness of these supplemental financial measures;

limitations on the usefulness of these supplemental financial measures; and

quantitative reconciliations of these supplemental financial measures to the most directly comparable IFRS financial measures.

Amounts presented in reconciliations are generally taken from the Consolidated Financial Statements. We encourage our investors to review the following information carefully.

ORDERS AND ORDER BACKLOG

Definition, most directly comparable IFRS financial measures and usefulness

Under our policy for the recognition of orders, we generally recognize the total contract amount for an order when we enter into a contract that we consider legally effective and compulsory based on a number of different criteria. The contract amount is the agreed price or fee for that portion of the contract for which the delivery of goods and/or the provision of services has been irrevocably agreed. Future revenue from service, maintenance and outsourcing contracts is recognized as orders in the amount of the total contract value only if there is adequate assurance that the contract will remain in effect for its entire duration (e.g., due to high exit barriers for the customer). Orders are generally recognized immediately when the relevant contract is considered legally effective and compulsory. The only exceptions are orders with short overall contract terms. In this case, a separate reporting of orders would provide no significant additional information regarding our performance. For orders of this type, the recognition of orders thus occurs when the corresponding revenue is recognized. There is no comparable IFRS financial measure for orders. We believe that orders are a useful indicator regarding the future revenue of our Company.

Order backlog is calculated by adding the orders of the current fiscal year to the balance of the order backlog as of the end of the prior fiscal year and then subtracting the revenue recognized in the current fiscal year. If the amount of an order already recognized in the current or the previous fiscal years is modified or if an order from the current fiscal year is cancelled, we adjust orders for the current quarter and also our order backlog accordingly, but do not retroactively adjust previously published orders. However, if an order from a previous fiscal year is cancelled, orders of the current quarter and, accordingly, the current fiscal year are generally not adjusted; instead, the existing order backlog is revised directly. Aside from cancellations, the order backlog is also subject to currency translation and portfolio effects. There is no comparable IFRS financial measure for order backlog. We believe that order backlog is a useful indicator regarding the future revenue of our Company resulting from already recognized orders.

Limitations on the usefulness

There is no standard system for compiling and calculating orders and order backlog information that applies across companies. Accordingly, our orders and order backlog may not be comparable with orders and order

Table of Contents

backlog measures reported by other companies. We subject our orders and our order backlog to internal documentation and review requirements. We may change our policies for recognizing orders and order backlog in the future without previous notice.

Order reporting for the current period may include adjustments to orders added in previous quarters of the current fiscal year and prior fiscal years (except for cancellations). Order backlog is based on firm commitments which may be cancelled in future periods.

Quantitative reconciliation

There is no comparable IFRS financial measure. Therefore, a quantitative reconciliation of orders and order backlog is not provided.

ADJUSTED OR ORGANIC GROWTH RATES OF REVENUE AND ORDERS

Definition, most directly comparable IFRS financial measures and usefulness

We present, on a worldwide basis and for Sectors and Divisions, the percentage change from period to period in revenue and orders as adjusted for currency translation and portfolio effects. The adjusted percentage changes are called adjusted or organic growth rates.

We prepare our Consolidated Financial Statements in euros; however, a significant portion of our operations of our Sectors is conducted in a functional currency other than the euro and is therefore subject to currency translation effects. Translating amounts from these currencies into euro affects the comparability of our results when the exchange rates for these currencies fluctuate. Some businesses are significantly affected because they conduct a large portion of operations outside the Eurozone, particularly in the U.S. In addition, the impact of acquisitions and dispositions on our consolidated revenue affects the comparability of the Consolidated Financial Statements between different periods.

The adjusted or organic growth rates of revenue and orders are calculated by subtracting currency translation effects and portfolio effects from the actual growth rates. The currency translation effects are calculated as (1) (a) revenue or orders for the current period, based on the exchange rate of the current period minus (b) revenue or orders for the current period, based on the exchange rate of the comparative period, divided by (2) revenue or orders for the previous period, based on the exchange rate of the comparative period. The portfolio effects are calculated, in the case of acquisitions, as the percentage change in revenue or orders attributable to the acquired business and, in the case of dispositions, as the percentage change in revenue or orders on the assumption that the disposed business had not been part of Siemens in the previous period. Portfolio effects are always considered in the calculation of adjusted or organic growth rates for a period of twelve months. We make portfolio adjustments for certain carve-in and carve-out transactions, as well as for other minor transactions and reclassifications in the segments. The IFRS financial measure most directly comparable to the adjusted or organic growth rate of revenue is the unadjusted growth rate calculated based on the actual revenue figures presented in the Consolidated Financial Statements. There is no comparable IFRS financial measure for the adjusted or organic growth rate of orders.

We believe that the presentation of an adjusted or organic growth rate of revenue and orders provides useful information to investors because a meaningful analysis of trends in revenue and orders from one period to the next requires comparable data and therefore an understanding of the developments in the operational business net of the impact of currency translation and portfolio effects. Our management considers adjusted or organic rates of growth in its management of our business. For this reason, we believe that the ability of investors to assess our overall

performance may be improved by disclosure of this information.

Limitations on the usefulness

Adjusted or organic growth rates of revenue and orders are not adjusted for other effects, such as increases or decreases in prices or quantity/volume.

Table of Contents

Quantitative reconciliation

For a quantitative reconciliation of adjusted or organic growth rates of revenue and orders to unadjusted growth rates of revenue and orders, refer to the relevant tables within Item 5: Operating and financial review and prospects.

BOOK-TO-BILL RATIO

Definition, most directly comparable IFRS financial measures and usefulness

The book-to-bill ratio measures the relationship between orders and revenue. The book-to-bill ratio is neither required nor defined by IFRS therefore there is no comparable IFRS financial measure. A book-to-bill ratio of above 1 indicates that more orders were received than revenue was recognized, indicating stronger demand, whereas a book-to-bill ratio of below 1 points to weaker demand.

Limitations on the usefulness

The usefulness of the book-to-bill ratio is inherently limited by the fact that it is a ratio and thus does not provide information as to the absolute number of orders received by us, or the amount of revenue recognized.

Quantitative reconciliation

When we present the book-to-bill ratio, we generally provide figures for the orders and revenue which we used for the calculation. The calculation is orders divided by revenue. For book-to-bill ratio, refer to the relevant tables within Item 5: Operating and financial review and prospects.

TOTAL SECTORS PROFIT

Definition, most directly comparable IFRS financial measures and usefulness

We use Total Sectors profit to measure the sum of the profit or loss of four of our reportable segments, which are the four Sectors Energy, Healthcare, Industry and Infrastructure & Cities. As required by IFRS 8, Operating segments, we present profit or loss for each reportable segment. This is the measure reported to the chief operating decision maker. We define profit or loss of a Sector as earnings before financing interest, certain pension costs and income taxes. We may further exclude certain other items not considered indicative of performance by management. The IFRS financial measure most directly comparable to Total Sectors profit is Income from continuing operations before income taxes.

We believe that the ability of investors to assess our overall performance may be improved by disclosure of Total Sectors profit as a measure of the operational performance of the four Sectors because they conduct substantially all of the core industrial activities of our Company.

Limitations on the usefulness

Profit of Equity Investments, SFS, Centrally managed portfolio activities, Siemens Real Estate, Corporate items and pensions as well as of Eliminations, Corporate Treasury and other reconciling items can have a material impact on our Income from continuing operations in any given period. In addition, Total Sectors profit does not eliminate profit earned by one Sector on intragroup transactions with another Sector.

Quantitative reconciliation

Total Sectors profit is reconciled to Income from continuing operations before income taxes in Item 18: Financial Statements Notes to Consolidated Financial Statements Segment information. For a reconciliation of Income from continuing operations before income taxes to Income from continuing operations, see the Consolidated Statements of Income.

Table of Contents**RETURN ON EQUITY (AFTER TAX)****Definition, most directly comparable IFRS financial measures and usefulness**

In line with common practice in the financial services industry, Financial Services (SFS) uses ROE (after tax) as one of its key profitability measures. We define ROE (after tax) as SFS profit after tax (annualized for purposes of interim reporting), divided by SFS average allocated equity. SFS profit as reported in the Segment information is defined as Income before income taxes (IBIT). For purposes of calculating ROE (after tax), however, the relevant income taxes are calculated on a simplified basis, by applying an assumed flat tax rate of 30% to SFS profit, excluding Income (loss) from investments accounted for using the equity method, net which is generally net of tax already, and tax-free income components and other components which have already been taxed, or are generally tax free, or which serve as an adjustment for material taxable Income (loss) from investments accounted for using the equity method, net. The allocated equity for SFS is mainly determined and influenced by the size and quality of its portfolio of commercial finance assets (primarily leases and loans) and equity investments. This allocation is designed to cover the risks of the underlying business and is in line with common credit risk management standards. The actual risk of the SFS portfolio is evaluated and controlled on a regular basis. The allocated equity is calculated quarterly. The most directly comparable IFRS financial measure for ROE (after tax) is SFS profit as reported in the Segment information.

ROE (after tax) is reported only for the SFS segment. It is used by management as a supplement in evaluating the business performance of SFS. Therefore we believe that the presentation of ROE (after tax) provides useful information to investors.

Limitations on the usefulness

IBIT as reported in the Notes to Consolidated Financial Statements may exclude certain items not considered indicative of performance by management. The relevant income taxes used to determine SFS profit after tax (used in the numerator) is calculated by applying an assumed flat tax rate to IBIT. As a portion of the IBIT is tax free, certain IBIT components are deducted before applying the flat tax rate. For feasibility purposes, the tax free portion of IBIT is determined based on a simplified methodology, i.e., not all of the tax free IBIT components are treated as such. Accordingly, the effective amount of income taxes payable differs from the amount calculated by means of this simplified procedure. In addition, the use of ROE (after tax) is inherently limited by the fact that it is a ratio and thus does not provide information as to the absolute amount of SFS income.

Table of Contents**Quantitative reconciliation**

	Year ended September 30, 2013 2012 (in millions of €)	
Calculation of income taxes of SFS		
Profit of SFS (IBIT)	409	479
Less/Plus: Income/loss from investments accounted for using the equity method, net of SFS ⁽¹⁾	(85)	(168)
Less/Plus: Tax-free income components and others ⁽²⁾	(26)	57
Tax basis	298	368
Tax rate (flat)	30%	30%
Calculated income taxes of SFS	89	110
Profit after tax of SFS		
Profit of SFS (IBIT).	409	479
Less: Calculated income taxes of SFS	(89)	(110)
Profit after tax of SFS.	320	368
ROE (after tax) of SFS		
(I) Profit after tax of SFS	320	368
(II) Average allocated equity of SFS ⁽³⁾	1,874	1,681
(I)/(II) ROE (after tax) of SFS	17.1%	21.9%

- (1) For information on Income (loss) from investments accounted for using the equity method, net of SFS, see Item 5: Operating and financial review and prospects Reconciliation to adjusted EBITDA (continuing operations).
- (2) Tax-free income components include forms of financing which are generally exempted from income taxes. Others comprise result components related to the (partial) sale/divestment of equity investments, which are reclassified from at equity to available-for-sale financial assets and are therefore not included in the (Income) loss from investments accounted for using the equity method, net of SFS. Such results are already taxed or generally tax free. Others may also comprise an adjustment for material taxable Income (loss) from investments accounted for using the equity method, net of SFS.
- (3) Average allocated equity of SFS for a fiscal year is determined as a five-point average in allocated equity of SFS of the respective quarters starting with the allocated equity of SFS as of September 30 of the previous fiscal year. We are unable to prepare a reconciliation to our announced ROE (after tax) range for 2014 without unreasonable effort and, in addition, we believe that any information that could be disclosed in connection with such reconciliation

would not be meaningful and could in fact confuse or mislead investors. This is due to the fact that management aims to achieve a value for ROE (after tax) that lies within the target range, rather than a specific combination of numerator and denominator for any given ROE (after tax) value, including the high and low ends of the ROE (after tax) range. As such, we believe that information on the level of ROE (after tax) targeted by management is useful supplemental information for investors. However, we use the targeted ROE (after tax) range as an integral performance measure that takes into account the history of SFS operations and management's experience in projecting rather than deriving it from individual quantitative forecasts of the components of ROE (after tax), i.e., Profit after tax of SFS, Average allocated equity of SFS. Accordingly, the numbers presented in any reconciliation would be arbitrary or even potentially misleading, because they would be generated solely for purposes of the reconciliation and would not reflect the basis for management's view of the potential future development of the business.

RETURN ON CAPITAL EMPLOYED (ADJUSTED)

Definition, most directly comparable IFRS financial measures and usefulness

We present ROCE (adjusted) for continuing operations at the Siemens group level. ROCE (adjusted) for continuing operations is our measure of capital efficiency and sustainable value creation. It is defined as Income from continuing operations before interest after tax (annualized for purposes of interim reporting) divided by

Table of Contents

average capital employed (continuing operations). Income from continuing operations before interest after tax is defined as Income from continuing operations, excluding Other interest income (expenses), net (but not Other interest income (expenses) of SFS) (both as reported in the Consolidated Financial Statements or in the Notes to Consolidated Financial Statements). It also excludes Interest expenses from post-employment benefits and taxes on these interest adjustments. SFS Other income (expenses) is included in Other interest income (expenses), net. Adding back SFS Other income (expenses) in the numerator corresponds to the adjustment for SFS Debt in the denominator Average capital employed.

Average capital employed (continuing operations), the denominator in the ROCE (adjusted) (continuing operations) calculation, is defined as the average of Total equity plus Long-term debt, plus Short-term debt and current maturities of long-term debt, less Cash and cash equivalents, less Current available-for-sale financial assets, plus Post-employment benefits, less SFS Debt, less Fair value hedge accounting adjustment and less Assets classified as held for disposal (presented as discontinued operations), net of Liabilities associated with assets classified as held for disposal (presented as discontinued operations). Each of the components of Capital employed is presented either on the face of the Consolidated Statements of Financial Position, in the Notes to Consolidated Financial Statements, or in the relevant tables of Item 5: Operating and financial review and prospects.

We also present ROCE (adjusted) for continuing and discontinued operations. For this purpose, the numerator is Income before interest after tax (annualized for purposes of interim reporting) and the denominator is Average capital employed (continuing operations) plus Assets classified as held for disposal (presented as discontinued operations), net of Liabilities associated with assets, classified as held for disposal (presented as discontinued operations).

The most directly comparable IFRS financial measure for the numerator in the ROCE (adjusted) calculation is Net income. For the denominator it is Total equity.

We use the ROCE (adjusted) financial performance ratio in order to assess our income generation from the point of view of our shareholders and creditors, who provide us with capital in the forms of equity and debt. We believe that the presentation of ROCE (adjusted) and the various supplemental financial measures involved in its calculation provides useful information to investors because ROCE (adjusted) can be used to determine whether capital invested in the Company yields competitive returns. In addition, achievement of predetermined targets relating to ROCE (adjusted) is one of the factors we take into account in determining the amount of performance-based compensation received by our management.

Limitations on the usefulness

Due to practical considerations, taxes on interest adjustments are determined based on a simplified methodology: the effective tax rate for the determination of taxes on interest adjustments is calculated by dividing Income tax expenses by Income from continuing operations before income taxes, both as reported in the Consolidated Statements of Income. Accordingly, the effective amount of Income tax expenses related to these adjustments may differ from the amount calculated by means of this simplified procedure. In addition, the usefulness of ROCE (adjusted) is inherently limited by the fact that it is a ratio and thus does not provide information as to the absolute amount of our Income from continuing operations and Net income.

Table of Contents**Quantitative reconciliation**

operations

Capital employed (continuing operations)	31,606	34,283	32,201	30,394	27,993
---	---------------	---------------	---------------	---------------	---------------

- (1) Debt is generally reported with a value representing approximately the amount to be repaid. However for debt designated in a hedging relationship (fair value hedges), this amount is adjusted by changes in market value mainly due to changes in interest rates. Accordingly, we deduct these changes in market value in order to end up with an amount of debt that approximately will be repaid, which we believe is a more meaningful figure for the calculation presented above. For further information on fair value hedges see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 31.

	2013	2012
	(in millions of)	
Income from continuing operations before interest after tax		
Net income	4,409	4,282
Plus/Less: Other interest expenses/income, net	(455)	(471)
Less/Plus: SFS Other interest expenses/income ⁽¹⁾	556	462
Plus: Interest expenses from post-employment benefits	297	310
Less: Taxes on interest adjustments ⁽²⁾	(111)	(91)
Income before interest after tax	4,695	4,493
Less/Plus: Income/loss from discontinued operations, net of income taxes	(197)	360
Income from continuing operations before interest after tax	4,499	4,853
Return on capital employed (ROCE) (adjusted) (continuing and discontinued operations)		
(I) Income before interest after tax	4,695	4,493
(II) Average capital employed (continuing and discontinued operations) ⁽³⁾	34,831	34,274
(I) / (II) ROCE (adjusted) (continuing and discontinued operations)	13.5%	13.1%
Return on capital employed (ROCE) (adjusted) (continuing operations)		
(I) Income from continuing operations before interest after tax	4,499	4,853
(II) Average capital employed (continuing operations) ⁽³⁾	32,583	31,295
(I) / (II) ROCE (adjusted) (continuing operations)	13.8%	15.5%

(1) SFS Other interest income/expenses is included in Other interest income/expenses, net. Adding back SFS Other interest income/expenses in the numerator corresponds to the adjustment for Financial Services (SFS) Debt in the denominator.

(2) Effective tax rate for the determination of taxes on interest adjustments is calculated by dividing Income tax expenses through Income from continuing operations before income taxes, both as reported in Item 18: Financial Statements Consolidated Statements of Income.

(3) Average capital employed for a fiscal year is determined as a five-point average in capital employed of the respective quarters starting with the capital employed as of September 30 of the previous fiscal year.

We are unable to prepare a reconciliation to our announced ROCE (adjusted) range for 2014 on a continuing operations basis without unreasonable effort and, in addition, we believe that any information that could be disclosed in connection with such reconciliation would not be meaningful and could in fact confuse or mislead investors. This is due to the fact that management aims to achieve a value for ROCE (adjusted) for continuing operations that lies within the target range, rather than a specific combination of numerator and denominator for any given ROCE (adjusted) (continuing operations) value, including the high and low ends of the ROCE (adjusted) (continuing operations) range. As such, we believe that information on the level of ROCE (adjusted) for continuing operations targeted by

management is useful supplemental information for investors. However, we use the targeted ROCE (adjusted) (continuing operations) range as an integral performance measure that takes into account our history of operations and management's experience in projecting rather than deriving it from individual quantitative forecasts of the components of ROCE (adjusted) for continuing operations, i.e., Income from continuing operations before interest after tax, Average Capital Employed and their respective sub-components. Accordingly, the numbers presented in any reconciliation would be arbitrary or even potentially misleading, because they would be generated solely for purposes of the reconciliation and would not reflect the basis for management's view of the potential future development of the business.

FREE CASH FLOW

Definition, most directly comparable IFRS financial measures and usefulness

We define FCF as Cash flows from operating activities less Additions to intangible assets and property, plant and equipment. The IFRS financial measure most directly comparable to FCF is Cash flows from operating activities.

Table of Contents

We believe that the presentation of FCF provides useful information to investors because it is a measure of cash generated by our operations after deducting cash outflows for Additions to intangible assets and property, plant and equipment. Therefore, the measure provides an indication of the long-term cash generating ability of our business. In addition, because FCF is not impacted by portfolio activities, it is less volatile than the total of Cash flows from operating activities and Cash flows from investing activities. For this reason, FCF is reported on a regular basis to our management, who uses it to assess and manage cash generation among the various reportable segments of the Company and for the group. Achievement of predetermined targets relating to FCF generation is one of the factors we take into account in determining the amount of performance-based compensation received by our management, both at the level of the worldwide group and at the level of individual reportable segments.

Limitations on the usefulness

FCF is not a measure of cash generated by operations that is available exclusively for discretionary expenditures. This is, because in addition to capital expenditures needed to maintain or grow our business, we require cash for a wide variety of non-discretionary expenditures, such as interest and principal payments on outstanding debt, dividend payments or other operating expenses.

ADJUSTED EBITDA, ADJUSTED EBIT AND ADJUSTED EBITDA MARGINS			

Definition, most directly comparable IFRS financial measures and usefulness**Adjusted EBITDA and adjusted EBIT at the Siemens group level**

We report adjusted EBITDA and adjusted EBIT on a continuing operations basis. We define adjusted EBITDA as adjusted EBIT before amortization (which in turn is defined as Amortization and impairments of intangible assets other than goodwill) and Depreciation and impairments of property, plant and equipment and goodwill. We define adjusted EBIT as Income from continuing operations before income taxes excluding Other financial income (expenses), net, Interest expenses, Interest income, as well as Income (loss) from investments accounted for using the equity method, net. Each of the components of adjusted EBIT appears on the face of the Consolidated Financial Statements, and each of the additional components of adjusted EBITDA appears in the

Table of Contents

Consolidated Financial Statements, or is presented in the table Reconciliation to adjusted EBITDA (continuing operations) within Item 5: Operating and financial review and prospects Reconciliation to adjusted EBITDA (continuing operations).

We disclose adjusted EBITDA and adjusted EBIT as supplemental non-GAAP financial performance measures because we believe they are useful metrics to compare the performance of our business from period to period. We understand that measures similar to adjusted EBITDA and adjusted EBIT are broadly used by analysts, rating agencies and investors in assessing our performance. Accordingly, we believe that the presentation of adjusted EBITDA and adjusted EBIT provides useful information to investors. The IFRS financial measure most directly comparable to adjusted EBITDA and adjusted EBIT is Net income.

Adjusted EBITDA is included in the ratio of adjusted industrial net debt to adjusted EBITDA, a measure of our capital structure. For further information regarding the ratio of adjusted industrial net debt to adjusted EBITDA, see Item 5: Operating and financial review and prospects Liquidity and capital resources Capital structure.

Adjusted EBITDA and adjusted EBIT at the Sector level

We also present adjusted EBITDA and adjusted EBIT at the Sector level. We define adjusted EBITDA at the Sector level as adjusted EBIT before amortization (which in turn is defined as Amortization and impairments of intangible assets other than goodwill) and Depreciation and impairments of property, plant and equipment and goodwill at the Sector level. We define adjusted EBIT at the Sector level as profit (as presented in the Segment information) excluding Financial income (expenses), net as well as Income (loss) from investments accounted for using the equity method, net. Each of the components of adjusted EBITDA and adjusted EBIT at the level of each Sector, respectively, is presented within Item 5: Operating and financial review and prospects Reconciliation to adjusted EBITDA (continuing operations). The IFRS financial measure most directly comparable to adjusted EBITDA and adjusted EBIT at the Sector level is profit of the relevant Sector as presented in Item 18: Financial Statements Notes to Consolidated Financial Statements Segment information.

Accordingly, we believe that reporting adjusted EBITDA and adjusted EBIT on a segment level enhances the ability of investors to compare performance across segments.

Adjusted EBITDA margins at the Sector level

We define adjusted EBITDA margins at the Sector level as the ratio of adjusted EBITDA to revenue (as presented in Item 18: Financial Statements Notes to Consolidated Financial Statements Segment information). We intend to maintain and further improve the profitability of our businesses and to achieve margins on the level of the best competitors in our industries throughout the complete business cycle. Accordingly, within One Siemens we defined adjusted EBITDA margin ranges for the respective industries of our four Sectors.

We believe that the presentation of adjusted EBITDA margins as a part of One Siemens provides useful information on how successfully we operate in our markets and enhances the ability of investors to compare profitability across segments.

Limitations on the usefulness

As adjusted EBITDA excludes non-cash items such as depreciation, amortization and impairments, it does not reflect the expenses associated with the full economic effect on our assets over time. Similarly, neither adjusted EBITDA, adjusted EBIT nor adjusted EBITDA margins reflects the impact of Financial income (expenses), net, Income (loss)

from investments accounted for using the equity method, net and Income tax expenses.

Table of Contents**Quantitative reconciliation**

	Year ended September 30,		
	2013	2012	2011
	(in millions of)		
Net income	4,409	4,282	5,899
Less/Plus: Income/ loss from discontinued operations, net of income taxes	(197)	360	726
Income from continuing operations	4,212	4,642	6,625
Plus: Income tax expenses	1,630	1,994	2,137
Income from continuing operations before income taxes	5,843	6,636	8,763
Less/Plus: Other financial income/expenses, net ⁽¹⁾	154	5	(646)
Plus: Interest expenses ⁽¹⁾	789	760	786
Less: Interest income ⁽¹⁾	(948)	(939)	(845)
Less/Plus: Income/loss from investments accounted for using the equity method, net	(510)	333	(146)
Adjusted EBIT (continuing operations)	5,328	6,796	7,912
Plus: Amortization, depreciation and impairments ⁽²⁾	2,888	2,818	2,599
Adjusted EBITDA (continuing operations)	8,215	9,613	10,511

(1) The total of Other financial income/expenses, net, Interest expenses and Interest income as reported in Item 18: Financial Statements Consolidated Statements of Income equals Financial income/expenses, net in the Reconciliation to adjusted EBITDA presented in Item 5: Operating and financial review and prospects Reconciliation to adjusted EBITDA (continuing operations).

(2) Amortization, depreciation and impairments as reported within Item 18: Financial Statements Notes to Consolidated Financial Statements Segment information does not include impairments of goodwill. Impairments of goodwill are presented in Item 5: Operating and financial review and prospects Reconciliation to adjusted EBITDA (continuing operations).

For a quantitative reconciliation to adjusted EBITDA and adjusted EBIT at the Sector level and adjusted EBITDA margins, see Item 5: Operating and financial review and prospects Reconciliation to adjusted EBITDA (continuing operations).

We are unable to prepare a reconciliation to our announced adjusted EBITDA margin range for 2014 without unreasonable effort and, in addition, we believe that any information that could be disclosed in connection with such reconciliation would not be meaningful and could in fact confuse or mislead investors. This is due to the fact that management aims to achieve a value for the adjusted EBITDA margin that lies within the target range, rather than a specific combination of numerator and denominator for any given adjusted EBITDA margin, including the high and low ends of the adjusted EBITDA margin range. As such, we believe that information on the adjusted EBITDA margin targeted by management is useful supplemental information for investors. However, we use the targeted adjusted EBITDA margin as an integral performance measure that takes into account our history of operations and

management's experience in projecting rather than deriving it from individual quantitative forecasts of the components of the adjusted EBITDA margin, i.e., adjusted EBITDA and Revenue. Accordingly, the numbers presented in any reconciliation would be arbitrary or even potentially misleading, because they would be generated solely for purposes of the reconciliation and would not reflect the basis for management's view of the potential future development of the business.

EARNINGS EFFECT FROM PURCHASE PRICE ALLOCATION

Definition, most directly comparable IFRS financial measures and usefulness

The purchase price paid for an acquired business is allocated to the assets, liabilities and contingent liabilities acquired based on their fair values. The fair value step-ups result in earnings effects over time, e.g. additional amortization of fair value step-ups of intangible assets, which are defined as PPA effects.

We believe that the presentation of PPA effects provides useful information to investors as it allows investors to consider earnings impacts related to business combination accounting in the performance analysis.

Table of Contents

Limitations on the usefulness

The fact that PPA effects are stated separately does not mean that they do not impact profit of the relevant segment in the Consolidated Financial Statements.

Quantitative reconciliation

When we report PPA effects, we provide the absolute values of the PPA effects. The absolute values enable investors to consider earnings impacts related to business combination accounting in the performance analysis.

NET DEBT

Definition, most directly comparable IFRS financial measures and usefulness

We define net debt as total debt less total liquidity. Total debt is defined as Short-term debt and current maturities of long-term debt plus Long-term debt. Total liquidity is defined as Cash and cash equivalents plus Current available-for-sale financial assets. Each of the components of net debt appears in the Consolidated Statements of Financial Position. The IFRS financial measure most directly comparable to net debt is the total of Short-term debt and current maturities of long-term debt and Long-term debt as reported in the Notes to Consolidated Financial Statements.

We believe that the presentation of net debt provides useful information to investors because our management reviews net debt as part of its management of our overall liquidity, financial flexibility, capital structure and leverage. In particular, net debt is an important component of adjusted industrial net debt. Furthermore, certain debt rating agencies, creditors and credit analysts monitor our Net debt as part of their assessments of our business.

Limitations on the usefulness

We typically need a considerable portion of our Cash and cash equivalents as well as Current available-for-sale financial assets at any given time for purposes other than debt reduction. The deduction of these items from total debt in the calculation of Net debt therefore should not be understood to mean that these items are available exclusively for debt reduction at any given time.

Quantitative reconciliation

For a quantitative reconciliation of net debt to total debt, refer to Item 5: Operating and financial review and prospects Liquidity and capital resources Capital structure.

ADJUSTED INDUSTRIAL NET DEBT

Definition, most directly comparable IFRS financial measures and usefulness

Within One Siemens, we manage adjusted industrial net debt as one component of our capital. We define adjusted industrial net debt as net debt less SFS Debt; less 50% of the nominal amount of our hybrid bond, plus Post-employment benefits (as presented in the Consolidated Financial Statements), plus credit guarantees; and less fair value hedge accounting adjustments. The adjustment for our hybrid bond considers the calculation of this financial ratio applied by rating agencies to classify 50% of our hybrid bond as equity and 50% as debt. This assignment follows the characteristics of our hybrid bond such as a long maturity date and subordination to all senior and debt

obligations. Debt is generally reported with a value representing approximately the amount to be repaid. However, for debt designated in a hedging relationship (fair value hedges), we adjust this amount by changes in market value mainly due to changes in interest rates. Accordingly, we deduct these changes in market value in order to end up with an amount of debt that approximately will be repaid, which we believe is a more meaningful figure for the calculation. Further information concerning adjusted industrial net debt can be found in

Table of Contents

Item 5: Operating and financial review and prospects Liquidity and capital resources Capital structure in the Annual Report. The IFRS financial measure most directly comparable to adjusted industrial net debt is the total of Short-term debt and current maturities of long-term debt and Long-term debt as reported in the Notes to Consolidated Financial Statements.

A key consideration in managing our capital structure is the maintenance of ready access to the capital markets through various debt products and the preservation of our ability to repay and service our debt obligations over time. We have therefore set a capital structure target that is measured by adjusted industrial net debt divided by adjusted EBITDA from continuing operations (annualized for purposes of interim reporting). We believe that adopting a metric that compares our earnings-based performance relative to our indebtedness (leverage) assists us in managing our business to achieve these goals. We have selected adjusted EBITDA from continuing operations as the performance element of the metric because we believe our earnings-based performance is a key determinant of the willingness of lenders to provide us with debt on favorable conditions and our ability to meet our debt obligations in future periods.

We believe that using the ratio of adjusted industrial net debt to adjusted EBITDA from continuing operations as a measure of our capital structure provides useful information to investors because management uses it to manage our debt-equity ratio in order to promote access to debt financing instruments in the capital markets and our ability to meet scheduled debt service obligations.

Limitations on the usefulness

We typically use a considerable portion of our cash, cash equivalents and available-for-sale financial assets at any given time for purposes other than debt reduction. Therefore, the fact that these items are excluded from adjusted industrial net debt does not mean that they are used exclusively for debt repayment. The use of the ratio adjusted industrial net debt to adjusted EBITDA is inherently limited by the fact that it is a ratio.

Quantitative reconciliation

For a quantitative reconciliation of Adjusted industrial net debt debt and the ratio of adjusted industrial net debt to adjusted EBITDA from continuing operations, refer to Item 5: Operating and financial review and prospects Liquidity and capital resources Capital structure.

Table of Contents

ITEM 6: DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES MANAGEMENT

In accordance with the German Stock Corporation Act (*Aktiengesetz*), we have a Supervisory Board and a Managing Board. The two boards are separate and no individual may simultaneously be a member of both boards. The Managing Board is responsible for managing our business in accordance with applicable laws, our Articles of Association and the Bylaws of the Managing Board. It represents us in our dealings with third parties. The Supervisory Board appoints and removes the members of the Managing Board. The Supervisory Board oversees our management but is not authorized to make management decisions.

In carrying out its duties, each member of the Managing Board and Supervisory Board must exercise the standard of care of a prudent and diligent businessman, and is liable to Siemens for damages if he or she fails to do so. Each board is required to take into account a broad range of considerations in its decisions, including the interests of Siemens and those of its shareholders, employees and creditors. The Managing Board is required to respect the rights of shareholders to be treated on an equal basis and to receive equal information. The Managing Board is also required to ensure appropriate risk management within Siemens and to establish an internal control system.

The Supervisory Board has comprehensive monitoring functions. To ensure that these functions are carried out properly, the Managing Board must, among other things, regularly report to the Supervisory Board with regard to current business operations and future business planning. The Supervisory Board is also entitled to request special reports at any time.

As a general rule under German law, a shareholder has no direct recourse against either the members of the Managing Board or the Supervisory Board in the event that they are believed to have breached a duty to Siemens. Apart from insolvency and other special circumstances, only Siemens may assert a claim for damages against members of either board. We may waive these damages or settle these claims if at least three years have passed since the alleged breach and if the shareholders approve the waiver or settlement at a Shareholders Meeting with a simple majority of the votes cast, provided that opposing shareholders do not hold, in the aggregate, one-tenth or more of our share capital and do not have their opposition formally noted in the minutes maintained by a German notary.

SUPERVISORY BOARD

As required by our Articles of Association and German law, our Supervisory Board currently consists of 20 members. Ten were elected by our shareholders and ten were elected by our employees. The shareholders may, by a simple majority of the votes cast, remove any member of the Supervisory Board they have elected in a Shareholders Meeting. The employee representatives may, by a majority of three-quarters of the votes cast, be removed by the employee assembly that elected them.

The Supervisory Board elects a chairman and two deputy chairmen from among its members. The election of the chairman and the first deputy chairman requires a two-thirds majority vote. If either the chairman or the first deputy chairman is not elected by a vote of two-thirds of the members of the Supervisory Board, the shareholder representatives elect the chairman and the employee representatives elect the first deputy chairman by a simple majority of the votes cast. The Supervisory Board elects a second deputy chairman by simple majority vote. Unless otherwise required by law, the Supervisory Board normally acts by simple majority vote, with the chairman having a deciding vote in the event of a second deadlock.

The Supervisory Board meets at least twice during each half-year period, normally six times each year. Its main functions are:

to monitor the management of the Company;

to appoint and dismiss members of our Managing Board;

Table of Contents

to represent the Company in its dealings with the Managing Board or when its interests are adverse to those of the Managing Board. For example, when the Company enters into an employment contract with a Managing Board member, the Supervisory Board determines the salary and other compensation components, including pension benefits; and

to approve matters in any areas that the Supervisory Board has made subject to its approval, either generally or in a specific case.

Each member of the Supervisory Board is elected for a maximum term of approximately five years, which expires at the end of the Annual Shareholders Meeting in which the shareholders ratify the acts of the Supervisory Board member for the fourth fiscal year following the fiscal year in which the member was elected. There is no mandatory retirement age for members of the Supervisory Board under our Articles of Association. However, the Bylaws of the Supervisory Board set forth that, as a rule, only persons who are not older than 70 years shall be nominated for election as members of the Supervisory Board. Our Articles of Association establish the compensation of the Supervisory Board members. For further details, see Item 6: Directors, senior management and employees Compensation report.

The following table sets forth the names of the members of our Supervisory Board, their dates of birth, the expiration of their respective terms, their board positions and principal occupations, and their principal outside directorships as of September 30, 2013:

Name	Date of birth	Term expires	Board position and principal occupation	Companies at which Supervisory Board and similar positions were held

MANAGING BOARD

As of November 27, 2013, our Managing Board consists of eight members.

Under our Articles of Association, our Supervisory Board determines the Managing Board's size, with the requirement that it must have more than one member. Under German law, the Managing Board is responsible for all management matters, including the following which are specifically reserved for the Managing Board:

the preparation of the annual financial statements;

the calling of the Annual Shareholders Meeting (unless applicable law requires otherwise) and preparation and execution of the resolutions; and

the preparation of reports to the Supervisory Board and the Annual Shareholders Meeting concerning certain matters.

Our Managing Board has one committee, the Equity and Employee Stock Committee, which is authorized to make certain decisions without seeking the approval of the full Managing Board. The Equity and Employee Stock Committee is responsible for certain capital measures as well as for the issuance of employee stock, including the determination of the terms of such issuances. The members of this committee are President and CEO Joe Kaeser, Executive Vice-President and CFO Dr. Ralf P. Thomas and Executive Vice-President Klaus Helmrich.

The Supervisory Board appoints the members of the Managing Board for a maximum term of five years. They may be re-appointed or have their term extended for one or more terms of up to a maximum of five years each. The Supervisory Board may remove a member of the Managing Board prior to the expiration of its term for good cause, generally by a two-thirds majority of the votes cast. There is no mandatory retirement age for members of the Managing Board under our Articles of Association. According to the Managing Board's Bylaws, however, the age of a member of the Managing Board shall not, as a rule, exceed 65 years.

According to the Managing Board's Bylaws, decisions of the Managing Board shall be taken unanimously whenever possible. If unanimity cannot be achieved, a decision shall require a simple majority of votes cast unless applicable law requires a larger majority. The President of the Managing Board shall have the deciding vote in the event of a deadlock.

Table of Contents

The following table sets forth the names of the members of our Managing Board, their dates of birth, the expiration of their respective terms, their current positions and their principal outside directorships as of September 30, 2013:

Name	Date of birth	Term expires	Current position	Companies at which Supervisory Board and similar positions were held
Joe Kaeser	6/23/1957	7/31/2018	President and CEO ⁽¹⁾	Allianz Deutschland AG; NXP Semiconductors B.V.
Dr. Ralf P. Thomas ⁽²⁾	3/7/1961	9/17/2018	Executive Vice-President and CFO ⁽²⁾

COMPENSATION REPORT

The Compensation report outlines the principles underlying the determination of the total compensation of the members of the Managing Board of Siemens AG, and sets out the structure and level of the remuneration of the Managing Board members. It also describes the policies governing, and levels of, compensation paid to Supervisory Board members.

Table of Contents**REMUNERATION OF MEMBERS OF THE MANAGING BOARD****Remuneration System**

The remuneration system for the Managing Board at Siemens is intended to provide an incentive for successful corporate management with an emphasis on sustainability. Members of the Managing Board are expected to make a long-term commitment to and on behalf of the Company, and may benefit from any sustained increase in the Company's value. In the interest of that aim, a substantial portion of their total remuneration is linked to the performance of Siemens stock. A further aim is for their remuneration to be commensurate with Company's size and economic position. Exceptional achievements are to be rewarded adequately, while falling short of goals is intended to result in an appreciable reduction in remuneration. The Managing Board's compensation is also structured so as to be attractive in comparison to that of competitors, with a view to attracting outstanding managers to our Company and keeping them with us for the long term.

The system and levels for the remuneration of the Managing Board are determined and reviewed regularly by the full Supervisory Board, based on proposals from the Chairman's Committee, or, beginning with July 2013 from the Compensation Committee. The Supervisory Board reviews remuneration levels annually to ensure that they are appropriate. In that process, the Company's economic situation, performance and outlook, as well as the tasks and performance of the individual Managing Board members, are taken into account. In addition, the Supervisory Board considers the common level of remuneration in comparison with the peer companies and with the compensation structure in place in other areas of the Company, taking due account of the relationship between the Managing Board's remuneration and that of senior management and staff, both overall and with regard to its development over time. The remuneration system that has been used for the Managing Board members since fiscal 2011 was approved by a large majority at the Annual Shareholders' Meeting on January 25, 2011.

In fiscal 2013, the remuneration system for the Managing Board had the following components:

Non-performance-based components

Base compensation Base compensation is paid as a monthly salary. It is reviewed annually, and revised if appropriate. The base compensation of President and CEO Joe Kaeser has been 1,845,000 per year since his appointment on August 1, 2013. The base compensation of the CFO and those members of the Managing Board who have responsibilities for Sector portfolios has been 967,500 per year since October 1, 2012. The base compensation of the other members of the Managing Board has been 900,000 per year since October 1, 2010.

Table of Contents**Fringe benefits**

Fringe benefits include costs, or the cash equivalent, of non-monetary benefits and other perquisites, such as provision of a Company car, contributions toward the cost of insurance, reimbursement of fees for legal advice, tax advice and accommodation and moving expenses, including a gross-up for any taxes that have to be borne in this regard, as well as costs relating to preventive medical examinations.

Performance-based components

Variable compensation (bonus) The variable compensation (bonus) is based on the Company's business performance in the past fiscal year. The targets for the variable compensation are derived from One Siemens, our target system for sustainably enhancing corporate value. On the basis of this target system, the Supervisory Board at the beginning of each fiscal year defines specific targets. Corresponding target parameters in addition to other factors also apply to senior managers, with a view to establishing a consistent target system throughout the Company.

For a 100% target attainment (target amount) the amount of the bonus equals the amount of base compensation. The bonus is subject to a ceiling (cap) of 200%. If targets are substantially missed, the variable compensation may not be paid at all.

The Supervisory Board is entitled to revise the amount resulting from attaining targets, by as much as 20% upward or downward, at its duty-bound discretion (pflichtgemäßes Ermessen); the adjusted amount of the bonus paid can be as much as 240% of the target amount. In choosing the factors to be considered in deciding on possible revisions of the bonus payouts ($\pm 20\%$), the Supervisory Board takes account of incentives for sustainable corporate management. The revision option may also be exercised in recognition of Managing Board members' individual achievements.

The bonus is paid half in cash, and half in the form of non-forfeitable stock commitments (Bonus Awards). After a four-year waiting period, the beneficiary will receive one share of Siemens stock for each Bonus Award. Instead of the transfer of Siemens stock, an equivalent cash settlement may be effected.

Long-term stock-based compensation Long-term stock-based compensation consists of a grant of forfeitable stock commitments (Stock Awards). The beneficiaries will receive one free share of Siemens stock for each Stock Award after a restriction period. Beginning with the award for fiscal 2011, the restriction period for Stock Awards ends at the close of the second day after publication of the preliminary operating results for the fourth calendar year after the date of the award.

In the event of extraordinary unforeseen developments that have an impact on the stock price, the Supervisory Board may decide to reduce the number of promised Stock Awards retroactively, or it may decide that in lieu of a transfer of Siemens stock only a cash settlement in a defined and limited amount will be paid, or it may decide to postpone transfers of Siemens stock for payable Stock Awards until the developments have ceased to have an impact on the stock price.

In the event of a 100% target attainment, the annual target amount for the monetary value of the Stock Awards commitment will be 1.9 million for the President and CEO effective August 1, 2013, and 1 million for each of the other members of the Managing Board. Beginning with fiscal 2011, the Supervisory Board has the option of increasing, on an individual basis, the target amount for a member of the Managing Board who has been reappointed by as much as 75% above the amount of 1 million, for one fiscal year at a time. This option enables the Supervisory Board to take account of the Managing Board member's individual accomplishments and experience as well as the scope and demands of his or her function. This rule does not apply to the President and CEO.

The performance-based component of long-term stock-based compensation is likewise founded on the One Siemens target system. The allocation rules for long-term stock-based compensation take this focus into account as follows:

On the one hand, half of the annual target amount for the annual Stock Awards is linked to the average basic earnings per share for the last three completed fiscal years from continuing and discontinued

Table of Contents

operations (EPS). In principle, the target value is the average basic EPS from the past three fiscal years completed prior to the year of compensation. At the end of each fiscal year, the Supervisory Board decides on a figure that represents that year's target attainment, which may lie between 0% and 200% (cap). This target attainment will then determine the actual monetary value of the award and the resulting number of Stock Awards.

On the other hand, the development of the performance of Siemens' stock relative to its competitors is to have a direct effect on compensation. For this purpose, with respect to the other half of the annual target amount for the Stock Awards, the Supervisory Board will first grant a number of Stock Awards equivalent to the monetary value of half the target amount on the date of the award. The Supervisory Board will also decide on a target system (target value for 100% and target curve) for the performance of Siemens stock relative to the stock of competitors (at present ABB, General Electric, Philips, Rockwell and Schneider). The reference period for measuring the target will be the same as the four-year restriction period for the Stock Awards. After this restriction period expires, the Supervisory Board will determine how much better or worse Siemens stock has performed relative to the stock of its competitors. This determination will yield a target attainment of between 0% and 200% (cap). If the target attainment is above 100%, an additional cash payment corresponding to the outperformance is effected. If the target attainment is less than 100%, a number of Stock Awards equivalent to the shortfall from the target will expire without replacement.

With regard to the further terms of the Stock Awards, generally the same principles apply for the Managing Board and for senior managers; these principles are discussed in more detail in Item 18: Financial Statements' Notes to Consolidated Financial Statements' Note 33. The Notes also include further information about the stock-based employee investment plans.

Share Ownership Guidelines The Siemens Share Ownership Guidelines are an integral part of the remuneration system for the Managing Board and senior executives. These guidelines require the members of the Managing Board' after a certain buildup phase' to hold Siemens stock worth a multiple of their base compensation (300% for the President and CEO, 200% for the other members of the Managing Board) during their term of office on the Managing Board. The determining figure in this context is the average base compensation that the relevant member of the Managing Board has drawn over the four years of the buildup phase. Accordingly, changes that have been made to base compensation in the meantime are included. Non-forfeitable stock awards (Bonus Awards) are taken into account in determining compliance with the Share Ownership Guidelines.

Evidence that this obligation has been met must first be provided after the buildup phase, and updated annually thereafter. If the value of the accrued holdings declines below the minimum to be evidenced from time to time because the market price of Siemens stock has fluctuated, the member of the Managing Board must acquire additional shares.

Pension benefit commitments The members of the Managing Board, like all Siemens AG employees, are included in the Siemens Defined Contribution Benefit Plan (BSAV). Under the BSAV, members of the Managing Board receive contributions that are credited to their personal pension account. The amount of the annual contributions is based on a predetermined percentage which refers to the base compensation and the target amount for the bonus. This percentage is decided upon annually by the Supervisory Board; most recently it was set at 28%. In making its decision, the Supervisory Board takes account of the intended level of provision for each individual, also considering the length of time for which the individual has been a Managing Board member, as well as the annual and long-term expense to the Company as a result of that provision. The non-forfeitability of pension benefit commitments is in compliance with the provisions of the German Company Pensions Act (Betriebsrentengesetz). Special contributions may be granted to Managing Board members on the basis of individual decisions of the Supervisory Board. In the case of new

appointments of members of the Managing Board from outside the Company, these contributions may be defined as non-forfeitable from their inception. If a member of the Managing Board had earned a pension benefit entitlement from the Company before the BSAV was introduced, a portion of his or her contributions went toward financing this prior commitment.

Table of Contents

Members of the Managing Board are entitled to benefits under the BSAV on reaching the age of 60, at the earliest. As a rule, the accrued pension benefit balance is paid out to the Managing Board member in twelve annual installments. At the request of the Managing Board member or of his or her surviving dependents, the pension benefit balance may also be paid out in fewer installments or as a lump sum, subject to the Company's consent. The accrued pension benefit balance may also be paid out as a pension. As a further alternative, the Managing Board member may choose a combination of payment in one to twelve installments and payment of a pension. If the pension option is chosen, a decision must be made as to whether it should include pensions for surviving dependents. If a member of the Managing Board dies while receiving a pension, benefits will be paid to the member's surviving dependents if the member has chosen such benefits. The Company will then provide a limited-term pension to surviving children until they reach age 27, or age 25 in the case of commitments made on or after January 1, 2007.

Benefits from the retirement benefit system that was in place before the BSAV are normally granted as pension benefits with a surviving dependents' pension. In this case as well, a payout in installments or a lump sum may be chosen instead of pension payments.

Members of the Managing Board who were employed by the Company on or before September 30, 1983, are entitled to transition payments for the first six months after retirement, equal to the difference between their final base compensation and the retirement benefits payable under the corporate pension plan.

Commitments in connection with termination of Managing Board membership Managing Board contracts provide for a compensatory payment if membership on the Managing Board is terminated prematurely without serious cause. The amount of this payment must not exceed the value of two years' compensation and compensate no more than the remaining term of the contract (cap). The amount of the compensatory payment is calculated on the basis of the base compensation, the variable compensation (bonus), and the long-term stock-based compensation (Stock Awards) actually received for the last fiscal year before termination. The compensatory payment is payable in the month when the member leaves the Managing Board. In addition, a one-time exceptional contribution is made to the BSAV. The amount of this contribution is based on the BSAV contribution that the Board member received in the previous year, and on the remaining term of the appointment, but is limited to not more than two years' contributions (cap). The above benefits are not paid if an amicable termination of the member's activity on the Managing Board is agreed upon at the member's request, or if there is serious cause for the Company to terminate the employment relationship.

In the event of a change of control that results in a substantial change in the position of the Managing Board member (e.g., due to a change in corporate strategy or a change in the Managing Board member's duties and responsibilities), the member of the Managing Board has the right to terminate his or her contract with the Company for good cause. A change of control exists if one or more shareholders acting jointly or in concert acquire a majority of the voting rights in Siemens AG and exercise a controlling influence, or if Siemens AG becomes a dependent enterprise as a result of entering into an intercompany agreement within the meaning of Section 291 of the German Stock Corporation Act, or if Siemens AG is to be merged into an existing corporation or other entity. If this right of termination is exercised, the Managing Board member is entitled to a severance payment in the amount of not more than two years' compensation. The calculation of the annual compensation includes not only the base compensation and the target amount for the bonus, but also the target amount for the Stock Awards, in each case based on the most recent completed fiscal year prior to termination of the contract. The stock-based components for which a firm commitment already exists will remain unaffected. There is no entitlement to a severance payment if the Managing Board member receives benefits from third parties in connection with a change of control. Moreover, there is no right to terminate if the change of control occurs within a period of twelve months prior to a Managing Board member's retirement.

Additionally, compensatory or severance payments cover non-monetary benefits by including an amount of 5% of the total compensation or severance amount. Compensatory or severance payments will be reduced by 15% as a

lump-sum allowance for discounted values and for income earned elsewhere. However, this reduction will apply only to the portion of compensatory or severance payment that was calculated without taking account of the first six months of the remaining term of the Managing Board member's contract.

Table of Contents

If a member leaves the Managing Board, the variable component (bonus) is determined pro rata temporis after the end of the fiscal year in which the appointment was terminated and is settled in cash at the usual payout or transfer date, as the case may be. If the employment contract is terminated in the course of an appointment period, the non-forfeitable stock awards (Bonus Awards) for which the waiting period is still in progress will remain in effect without restriction. If the employment agreement is terminated because of retirement, disability or death, a Managing Board member's Bonus Awards will be settled in cash as of the date of departure from the Board.

Stock commitments that were made as long-term stock-based compensation (Stock Awards) and for which the restriction period is still in progress will normally forfeit without replacement if the employment agreement is terminated in the course of an appointment period. The same applies if the employment agreement is not extended after the end of an appointment period, either at the Board member's request or because there is serious cause that would have entitled the Company to revoke the appointment or terminate the contract. However, once granted, Stock Awards do not forfeit if the employment agreement is terminated because of retirement, disability, or death, or in connection with a spin-off, the transfer of an operation, or a change of activity within the corporate group. In this case, the Stock Awards will remain in effect upon termination of the employment agreement and will be honored on expiration of the restriction period.

The remuneration system for the Managing Board members applicable as of fiscal 2014 will be submitted for approval to the Annual Shareholders' Meeting on January 28, 2014. For a description of the revisions compared to the remuneration system currently in place, see below.

REMUNERATION OF MEMBERS OF THE MANAGING BOARD FOR FISCAL 2013

On the basis of our One Siemens target system, at the beginning of the fiscal year the Supervisory Board set the targets and weighting for the unchanged parameters compared to the previous year: organic revenue growth, return on capital employed (ROCE) adjusted, and Free cash flow, in each case on the basis of continuing operations, together with EPS. The definition of these parameters and their weighting acknowledges a sustainable enhancement of corporate value. An internal review of the appropriateness of the Managing Board's compensation for fiscal 2013 has confirmed that the remuneration of the Managing Board resulting from the target attainment for fiscal 2013 is to be considered appropriate. Following the decision on determining the achievement of the targets set at the beginning of the fiscal year, the Supervisory Board decided at its meeting on November 6, 2013, to set the variable compensation component (bonus), the Stock Awards to be granted and the pension benefit contributions as follows:

Variable compensation (bonus) In setting the targets for the variable compensation (bonus) at the beginning of fiscal 2013, the Supervisory Board took into account that the Company continues to focus on a sustainable appreciation of value. This focus is intended to enable the Company to maintain its financial flexibility and hold its own against competitors in periods of high market volatility:

The emphasis in terms of the sustainable enhancement of value is on capital efficiency and capital structure. This was taken into account in weighting the two target parameters ROCE adjusted, and Free cash flow.

The target for organic revenue growth allowed for the great uncertainty of the competitive environment and the goal of capital-efficient growth.

The target for ROCE adjusted allowed for the first-time application of the revised IAS 19R reporting standard. The expectations for business in fiscal 2013 as well as the Siemens 2014 program were also considered.

The target for Free cash flow was maintained at the prior year's level, which represented a noticeable increase at that time. The trend towards lower advance payments by customers was also taken into account.

Table of Contents

As a consequence, the following targets were set and attained with respect to the variable compensation (bonus):

Target parameter	Weight	100% of target	Actual 2013 figure	Target attainment
Revenue growth (organic)*	20%	(0.5)%	(1.1)%	87.80%
ROCE adjusted*	40%	15.1%	13.8%	67.75%
Free Cash flow*	40%	3,600 million	5,257 million	155.24%
Target attainment (calculative)				106.76%

* Continuing operations

The values measured for target attainment were not adjusted. In an overall assessment of all relevant aspects, the Supervisory Board decided, exercising its duty-bound discretion (pflichtgemäßes Ermessen), to adjust the bonus payout amounts resulting from target attainment downward for all Managing Board members resulting in target attainment of 95% for the determination of the payout amounts of the variable compensation (bonus). In its decision, the Supervisory Board, among other factors took into account that the Company did not meet its expectations compared to competitors, especially with regard to profitability.

In addition, the Supervisory Board reflected the performance of individual Managing Board members and decided upon further individual adjustments for certain Managing Board members.

Long-term stock-based compensation For half of the annual target amount for the Stock Awards, an average basic EPS of 5.46 was determined for fiscal years 2011 through 2013, yielding a target attainment of 118%.

For the other half of the annual target amount for the Stock Awards, the Supervisory Board approved a number of Stock Awards equivalent to the monetary value of half the target amount on the award date. The amount by which these stock commitments must be adjusted or an additional cash payment must be made after the end of the restriction period will depend on the performance of Siemens stock compared to the stock of five competitors (ABB, General Electric, Philips, Rockwell and Schneider) over the coming four years, and will therefore not be determined until after the end of fiscal 2017.

The number of stock commitments (Bonus Awards and Stock Awards) granted was based on the closing price of Siemens stock in Xetra trading on the date of award less the present value of dividends expected during the holding period, because beneficiaries are not entitled to receive dividends. This figure for determining the number of commitments amounted to 80.88 (2012: 64.93).

Benefits associated with termination of Managing Board membership In connection with the mutually agreed premature termination of the Managing Board membership of former President and CEO Peter Löscher as of July 31, 2013, it was agreed that his contract with the Company would terminate as of September 30, 2013. His entitlements agreed under the contract remained in effect until that date. A compensatory payment in a gross amount of 14,803,005 was agreed upon with Mr. Löscher in connection with the mutually agreed premature termination of his activity as President and CEO, together with a one-time special contribution of 2,240,000 to the BSAV, to be credited in January 2014. It was also agreed with Mr. Löscher that his long-term stock-based compensation (Stock Awards) for fiscal 2013 will be calculated after the actual target attainment is available and awarded at the usual date. These 28,077 Stock Awards will be settled in cash according to the provisions of the contract as no employment relationship will be in place at the date of award. The Company has furthermore agreed with Mr. Löscher to reimburse out-of-pocket

expenses up to a maximum of 100,000 plus value-added tax. For his part, Mr. Löscher has agreed not to work for any significant competitor of Siemens AG for a period of two years after the end of his employment contract, i.e., until September 30, 2015; Siemens will not provide additional compensation for this post-contractual non-compete commitment. However, the Stock Awards that were granted in the past for fiscal 2010, 2011 and 2012 and for which the restriction period is still in effect, will be absolutely maintained, see below.

In connection with the mutually agreed premature termination of the Managing Board membership of former Managing Board member Brigitte Ederer as of September 30, 2013, it was agreed upon that her contract with the Company would end at the same time. A compensatory payment in a gross amount of 5,600,019 was

Table of Contents

agreed upon with Ms. Ederer in connection with the mutually agreed premature termination of her activity as Managing Board member, together with a one-time special contribution of 882,000 to the BSAV, to be credited in January 2014. It was also agreed with Ms. Ederer that her long-term stock-based compensation (Stock Awards) for fiscal 2013 will be calculated after the actual target attainment is available and awarded at the usual date. These 13,477 Stock Awards will be settled in cash according to the provisions of the contract as no employment relationship will be in place at the date of award. The Company has furthermore agreed with Ms. Ederer to reimburse out-of-pocket expenses up to a maximum of 30,000 plus value-added tax. The Stock Awards that were granted in the past for fiscal 2010, 2011 and 2012 and for which the restriction period is still in effect, will be absolutely maintained, see below.

In determining the amount of the compensatory payments for Mr. Löscher and Ms. Ederer, in accordance with the terms of their contracts with the Company, the base compensation for fiscal 2013 and the variable compensation and long-term stock-based compensation actually received for fiscal 2012 were applied and limited, as applicable, to either two annual payments in total or the compensation for the remaining terms of their appointments. The portion of compensatory payments that was calculated excluding the first six months of the remaining contract term was reduced by 15% as a lump-sum allowance for discounted values and for income earned elsewhere. In addition, non-monetary benefits were covered by a payment in the amount of 5% of the compensatory payment.

Total compensation On the basis of the decisions by the Supervisory Board described above, Managing Board compensation for fiscal 2013 totaled 34.58 million, a decrease of 12.7% (2012: 39.61 million). Of this total amount, 16.98 million (2012: 17.45 million) was attributable to cash compensation and 17.60 million (2012: 22.16 million) to stock-based compensation. Thus, more than half of the compensation was paid in the form of stock-based instruments with waiting or restriction periods of four years, and therefore on a deferred basis.

The compensation for fiscal 2013 presented in the following table not only takes account of the applicable reporting standards, but also of the new recommendations of the German Corporate Governance Code (GCGC or the Code), with regard to the disclosure of remuneration of the Managing Board. Consequently, the information is set forth in a model table recommended by the Code and shows the value of benefits granted for the year under review. The figures presented also include the attainable minimums or maximums, as applicable. The fair values shown for granted stock-based compensation were calculated on the basis of the applicable reporting standards. The transfer of one share per award will not take place until the expiration of the four-year waiting or restriction period, i.e., not until November 2017. The number of Stock Awards linked to the performance of the price of Siemens stock will be adjusted after the end of the restriction period, on the basis of the actual target attainment.

Table of Contents

The compensation presented in the following tables was granted to the members of the Managing Board for fiscal 2013 (individualized disclosure):

Board members for fiscal 2013, according to the applicable reporting standards, came to 34.58 million (2012: 39.61 million). The grant expense according to the GCGC for the one-year variable compensation (bonus), and service costs for pension benefits are not included.

One-year variable compensation (bonus) Cash component ⁽²⁾	16,598			1,359,900	1,583,607
Total	111,135			7,871,173	5,604,567

- (1) Fringe benefits include costs, or the cash equivalent, of non-monetary benefits and perquisites, such as provision of Company cars in the amount of 239,301 (2012: 257,855), contributions toward the cost of insurance in the amount of 88,827 (2012: 87,429), reimbursement of fees for legal advice, tax advice and accommodation and moving expenses, including any taxes that have been assumed in this regard, as well as costs connected with preventive medical examinations, in the amount of 176,221 (2012: 135,625).
- (2) The Supervisory Board adjusted the bonus payout amounts resulting from target attainment for all Managing Board members downward by 11%. In addition, the Supervisory Board made further adjustments on an individual basis as follows: Joe Kaeser upward by 5%; Dr. Roland Busch downward by 5% and Prof. Dr. Hermann Requardt upward by 15%.
- (3) The figures for individual maximums for multi-year variable compensation reflect the possible maximum as of the date of award; depending on stock price performance, this value may be higher at the disbursement date after the expiration of the four-year waiting or restriction period. Beginning in fiscal 2014, in keeping with the recommendations of the GCGC, maximum amount limits apply for multi-year variable compensation and for compensation overall; these are explained below.
- (4) The expenses recognized for stock-based compensation (Bonus Awards and Stock Awards) and for the Share Matching Plan for members of the Managing Board in accordance with IFRS in fiscal 2013 and 2012 amounted to 23,160,536 and 15,995,543, respectively. The following amounts pertained to the members of the Managing Board in fiscal 2013: Joe Kaeser 2,099,925 (2012: 1,781,626), Dr. Roland Busch 1,091,572 (2012: 735,167), Brigitte Ederer 3,062,678 (2012: 950,250), Klaus Helmrich 1,058,299 (2012: 735,167), Barbara Kux 1,566,960 (2012: 1,493,576), Prof. Dr. Hermann Requardt 1,686,929 (2012: 1,605,244), Prof. Dr. Siegfried Russwurm 1,653,844 (2012: 1,571,872), Peter Y. Solmssen 1,566,874 (2012: 1,566,372), Dr. Michael Süß 1,091,934 (2012: 735,167) and Dr. Ralf P. Thomas 19,572 (2012: 0). The corresponding expense for former President and CEO Peter Löscher came to 8,261,949 (2012: 3,757,710).
- (5) For Stock Awards for which the target attainment depends on EPS for the past three fiscal years, and for Bonus Awards, the fair value at the date of award is equivalent to the respective monetary value.

- (6) The monetary values referred to a 100% target attainment amounted to 6,197,430 (2012: 6,125,302). The following amounts pertained to the members of the Managing Board: Joe Kaeser 887,577 (2012: 875,062), Dr. Roland Busch 500,000 (2012: 500,026), Brigitte Ederer 500,000 (2012: 500,026), Klaus Helmrich 500,000 (2012: 500,026), Barbara Kux 500,000 (2012: 500,026), Prof. Dr. Hermann Requardt 625,041 (2012: 500,026), Prof. Dr. Siegfried Russwurm 625,041 (2012: 500,026), Peter Y. Solmssen 500,000 (2012: 500,026), Dr. Michael Süß 500,000 (2012: 500,026) and Dr. Ralf P. Thomas 18,117 (2012: 0). The corresponding monetary value for former President and CEO Peter Löscher amounted to 1,041,654 (2012: 1,250,013).

---------------------	------------------	------------------	----------	----------------	------------------	------------------

- (1) Fringe benefits include costs, or the cash equivalent, of non-monetary benefits and other perquisites, such as provision of Company cars in the amount of 239,301 (2012: 257,855) contributions toward the cost of insurance in the amount of 88,827 (2012: 87,429), reimbursement of fees for legal advice, tax advice and accommodation and moving expenses, including any taxes that have been assumed in this regard as well as costs connected with preventive medical examinations, in the amount of 176,221 (2012: 135,625).
- (2) The Supervisory Board adjusted the bonus payout amounts resulting from target attainment for all Managing Board members downward by 11%. In addition, the Supervisory Board made further adjustments on an individual basis as follows: Joe Kaeser upward by 5%; Dr. Roland Busch downward by 5% and Prof. Dr. Hermann Requardt upward by 15%. The one-year variable compensation (bonus) cash component presented above therefore includes the amount awarded for fiscal 2013, which will be paid out in January 2014.
- (3) Brigitte Ederer resigned from the Managing Board effective at the end of the day on September 30, 2013. According to the provisions of the contract, the variable compensation (bonus) for fiscal 2013 will be granted fully in cash.
- (4) Peter Löscher resigned from the Managing Board effective July 31, 2013; his employment agreement ended effective September 30, 2013. According to the provisions of the contract, the variable compensation (bonus) for fiscal 2013 will be granted fully in cash. In addition to the compensation paid to him for fiscal 2013 as a member of the Managing Board and President and CEO, presented above, Peter Löscher received the following compensation for the remaining term of his employment agreement, for the months of August and September 2013: fixed compensation of 333,333, fringe benefits of 5,138, and a proportionate variable compensation (bonus) of 316,721.

Pension benefit commitments For fiscal 2013, the members of the Managing Board were granted contributions under the BSAV totaling 6.4 million (2012: 5.7 million), based on a resolution of the Supervisory Board dated November 6, 2013. Of this amount, 6.3 million (2012: 5.6 million) related to contributions to their personal pension accounts and the remaining 0.1 million (2012: 0.1 million) to funding of pension commitments earned prior to transfer to the BSAV.

The contributions under the BSAV are added to the personal pension accounts each January following the close of the fiscal year, with value date on January 1. Until the beneficiary's time of retirement, the pension account is credited with an annual interest payment (guaranteed interest), currently 1.75%, on January 1 of each year.

Table of Contents

The following table shows individualized details of the contributions (additions) under the BSAV for fiscal 2013 as well as the defined benefit obligations for the pension commitments:

Total	6,355,965	5,656,000	61,992,938	51,936,101

- (1) The expenses (service costs) recognized in accordance with IFRS in fiscal 2013 for Managing Board members entitlements under the BSAV in fiscal 2013 amounted to 6,053,355 (2012: 6,152,011).
- (2) The defined benefit obligations reflect one-time special contributions of 22,480,000 (2012: 19,358,000) for new appointments from outside the company, as well as contributions in connection with departure from the Managing Board, in the amount of 10,740,000 (2012: 8,500,000) for Peter Löscher, 882,000 (2012: 0) for Brigitte Ederer, 340,000 (2012: 340,000) for Barbara Kux and 10,518,000 (2012: 10,518,000) for Peter Y. Solmssen.
- (3) Deferred compensation totals 8,595,135 (2012: 7,543,061), including 2,914,462 for Joe Kaeser (2012: 2,755,189), 276,893 for Klaus Helmrich (2012: 269,147), 4,082,366 for Barbara Kux (2012: 3,280,486), 1,275,259 for Prof. Dr. Hermann Requardt (2012: 1,238,239) and 46,155 for Dr. Ralf P. Thomas (2012: 0).
- (4) Brigitte Ederer resigned from the Managing Board effective at the end of the day on September 30, 2013.

(5) Dr. Ralf P. Thomas was elected a full member of the Managing Board effective September 18, 2013.

(6) Peter Löscher resigned from the Managing Board effective July 31, 2013; his employment agreement ended effective September 30, 2013.

Former members of the Managing Board and their surviving dependents received emoluments within the meaning of Section 314 para. 1 No. 6 b of the German Commercial Code (HGB) totaling 33.1 million (2012: 15.8 million) in fiscal 2013. This figure includes cash compensation for the stock commitments for former Managing Board member Wolfgang Dehen as a result of the spin-off of OSRAM from the corporate group. Furthermore it includes the compensatory payment connected with the mutually agreed premature termination of the Managing Board membership of former President and CEO Peter Löscher as of July 31, 2013, the compensation for the remaining term of his employment contract, i.e. for the months of August and September 2013, as well as a one-time special contribution to the BSAV. Former President and CEO of the Managing Board Peter Löscher received 5,615 Stock Awards pro-rata for the months of August and September 2013, which will be settled in cash according to the provisions of the contract. Other than this, former Managing Board members and their surviving dependents received no Stock Awards (2012: no Stock Awards).

Table of Contents

The defined benefit obligation (DBO) of all pension commitments to former members of the Managing Board and their surviving dependents as of September 30, 2013, amounted to 192.5 million (2012: 181.6 million). This figure is included in Item 18: Financial Statements Notes to Consolidated Financial Statements Note 23.

Other No loans or advances from the Company are provided to members of the Managing Board.

ADDITIONAL INFORMATION ON STOCK-BASED COMPENSATION INSTRUMENTS IN FISCAL 2013

This section provides information concerning the stock commitments held by members of the Managing Board that were components of stock-based compensation in fiscal 2013 and prior years, and also concerning the Managing Board members' entitlements to matching shares under the Siemens Share Matching Plan.

Stock commitments The following table shows the changes in the stock commitments (Bonus Awards and Stock Awards) held by Managing Board members in fiscal 2013:

	Balance at beginning of fiscal 2013	Granted during fiscal year ⁽¹⁾	Forfeitable commitments of Stock Awards (Target attainment)		Vested and transferred during fiscal year		Forfeited during fiscal year		Balance at end of fiscal 2013 ⁽²⁾

(1) See the information above for the corresponding fair values.

(2) Brigitte Ederer resigned from the Managing Board effective at the end of the day on September 30, 2013. The Stock Awards for fiscal 2013 will be settled in cash. The cash settlement is calculated on the basis of the monetary value of the Stock Awards on the award date; this monetary value reflects target attainment of 100% for Stock Awards for which target attainment depends on future stock performance, see information above.

- (3) Dr. Ralf P. Thomas was elected a full member of the Managing Board effective September 18, 2013.

- (4) Peter Löscher resigned from the Managing Board effective July 31, 2013; his employment agreement ended effective September 30, 2013. The Stock Awards for fiscal 2013 will be settled in cash. The cash settlement is calculated on the basis of the monetary value of the Stock Awards on the award date; this monetary value reflects target attainment of 100% for Stock Awards for which target attainment depends on future stock performance, see information above. Regarding the Stock Awards awarded for his remaining contract term, for the months of August and September 2013, see information above.

Table of Contents

Shares from the Share Matching Plan In fiscal 2011, the members of the Managing Board were entitled for the last time to participate in the Siemens Share Matching Plan, and under the plan were entitled to invest up to 50% of the annual gross amount of their variable cash compensation component (bonus) determined for fiscal 2010 in Siemens shares. After expiration of a vesting period of approximately three years, the plan participants will receive one free matching share of Siemens stock for every three Siemens shares acquired and continuously held under the plan, provided the participants were employed without interruption at Siemens AG or a Siemens company until the end of the vesting period. The following table shows the development of the matching share entitlements of the individual members of the Managing Board in fiscal 2013.

	Balance at beginning of fiscal 2013⁽¹⁾ Entitlement to matching shares	Due during fiscal year Entitlement to matching shares (Amounts in number of units)	Forfeited during fiscal year Entitlement to matching shares	Balance at end of fiscal 2013⁽¹⁾⁽²⁾ Entitlement to matching shares
Managing Board members serving as of September 30, 2013

Dr. Michael Süß				
Dr. Ralf P. Thomas ⁽⁴⁾	2,969	123		2,846
Former members of the Managing Board				
Peter Löscher ⁽⁵⁾				
Total	10,488	4,037		6,451

(1) Amounts may include entitlements acquired before the member joined the Managing Board.

(2) The entitlements of the Managing Board members serving as of September 30, 2013 had the following fair values: Joe Kaeser 146,901 (2012: 222,277), Dr. Roland Busch 0 (2012: 3,464), Brigitte Ederer 0 (2012: 0), Klaus Helmrich 527 (2012: 527), Barbara Kux 0 (2012: 33,282), Prof. Dr. Hermann Requardt 92,011 (2012: 140,823), Prof. Dr. Siegfried Russwurm 0 (2012: 25,487), Peter Y. Solmssen 0 (2012: 0), and Dr. Michael Süß 0 (2012: 0) and Dr. Ralf P. Thomas 152,696 (2012: 0). The entitlement of former Managing Board member Peter Löscher has the following fair value: 0 (2012: 0). The above fair values also take into account that the shares

acquired under the Base Share Program as part of the Share Matching Plan were provided with a Company subsidy (for additional information on the Base Share Program see Item 18: Financial Statements Notes to Consolidated Financial Statements).

- (3) Brigitte Ederer resigned from the Managing Board effective at the end of the day on September 30, 2013.
- (4) Dr. Ralf P. Thomas was elected a full member of the Managing Board effective September 18, 2013. The stated balance at the end of fiscal 2013 also includes the granted entitlements of matching shares (780 shares) for fiscal 2013 prior to election as a full member of the Managing Board.
- (5) Peter Löscher resigned from the Managing Board effective July 31, 2013; his employment agreement ended effective September 30, 2013.

Table of Contents

Share Ownership Guidelines Different deadlines apply for the individual members of the Managing Board to provide their first-time proof of compliance with the Siemens Share Ownership Guidelines, depending on when the member was appointed to the Managing Board. The following table shows the number of Siemens shares held by Managing Board members in office at September 30, 2013, as of the deadline in March 2013 for showing compliance with the Share Ownership Guidelines, and the number of Siemens shares to be held permanently with a view to future deadlines.

	Obligation under Share Ownership Guidelines		
	Required value⁽¹⁾	Required number of shares⁽²⁾	Proven number of shares⁽³⁾
(Amounts in number of units or)			
Managing Board members serving as of September 30, 2013 and required to show proof as of March 8, 2013			
Joe Kaeser	1,719,062	21,730	77,685
Barbara Kux	1,705,000	21,552	34,957
Prof. Dr. Hermann Requardt	1,719,062	21,730	67,789
Prof. Dr. Siegfried Russwurm	1,719,062	21,730	66,916
Peter Y. Solmssen	1,705,000	21,552	68,530
Total	8,567,186	108,294	315,877

(1) The amount of the obligation is based on a member's average base compensation for the four years prior to each review of his or her achievement of the targets defined by the Share Ownership Guidelines.

(2) Based on the average Xetra opening price of 79.11 for the fourth quarter of 2012 (October - December)

(3) As per March 8, 2013 (date of proof), including 2011 and 2012 Bonus Awards.

The following table shows the proof-of-compliance obligations of the other Managing Board members in view of the Share Ownership Guidelines:

	Obligation under Share Ownership Guidelines		
	Required value⁽¹⁾	Required number of shares⁽²⁾	Due date for initial measurement of adherence
(Amounts in number of units or)			
Managing Board members required to show proof in subsequent years			
Dr. Roland Busch	1,829,348	23,124	March 2016
Klaus Helmrich	1,800,000	22,753	March 2016

Dr. Michael Süß	1,829,348	23,124	March 2016
Dr. Ralf P. Thomas	1,935,000	24,460	March 2018
Total	7,393,696	93,461	

(1) The amount of the obligation is based on a member's average base compensation for the four years prior to each review of his or her achievement of the targets defined by the Share Ownership Guidelines. The amount shown here is based on average base compensation since the member's initial appointment.

(2) Based on the average Xetra opening price of 79.11 for the fourth quarter of 2012 (October - December)

REVISIONS OF THE REMUNERATION SYSTEM FOR THE MANAGING BOARD FOR FISCAL 2014

At its meeting on November 6, 2013, the Supervisory Board decided to revise the remuneration system for the Managing Board as of October 1, 2013, so as to comply with the new recommendations of the German Corporate Governance Code in the version of May 13, 2013. The remuneration system remains focused on providing an incentive for successful corporate management with an emphasis on sustainability. At the same time, it offers members of the Managing Board a chance to benefit from any sustained increase in the Company's value. For performance-based components, the target attainment range continues to remain between 0% and 200%, and the Supervisory Board, as was previously the case, may revise bonus payments ($\pm 20\%$). The new

Table of Contents

revisions define maximum amounts for stock-based components (Bonus Awards and Stock Awards), effective from fiscal 2014 onwards. Moreover the compensation overall is limited to a maximum amount of compensation.

Specifically, the following changes to the remuneration system for the Managing Board were adopted by the Supervisory Board as of fiscal 2014:

For stock commitments (Bonus Awards and Stock Awards), the maximum amount of compensation at the time of transfer of Siemens stock after the end of the waiting or restriction period is now limited to not more than 300% of the respective target amounts. If this maximum amount of compensation is exceeded, the entitlement to any number of shares associated with the excess will forfeit without replacement. For the variable compensation (bonus) paid in cash, the maximum amount of compensation remains unchanged at 200% of the respective target amounts plus the discretionary possibility of upward revision by 20% by the Supervisory Board.

In addition to the forfeiture rules to maintain the maximum amounts of compensation for variable compensation (bonus) and long-term stock-based compensation, a maximum amount for the compensation overall must also be observed. Beginning with fiscal 2014, it cannot exceed 1.7 times the target compensation. The target compensation comprises base compensation, the target amount for the variable compensation (bonus), and the target amount for long-term stock-based compensation, excluding fringe benefits and pension benefit commitments. Including fringe benefits and pension benefit commitments of the respective fiscal year, the maximum amount of compensation for the compensation overall increases by corresponding amounts.

The bonus is paid 75% in cash and 25% in the form of Siemens stock commitments (Bonus Awards). The waiting period remains four years. Consistent with legal requirements and with common practice in the market, the payout of more than 60% of the performance-based components is extended over several years.

Furthermore, to take greater account of Managing Board members' individual performance, individual targets will be agreed for fiscal 2014 at target setting for the variable compensation (bonus).

Table of Contents

REMUNERATION OF MEMBERS OF THE SUPERVISORY BOARD

The current remuneration policies for the Supervisory Board were authorized at the Annual Shareholders Meeting held on January 25, 2011. Details are set out in Section 17 of the Articles of Association of Siemens AG. The remuneration of the Supervisory Board consists entirely of fixed compensation. The remuneration of the members of the Supervisory Board reflects the responsibilities and scope of work of the Supervisory Board members. The Chairman and Deputy Chairmen of the Supervisory Board, as well as the Chairmen and members of the Audit Committee and the Chairman's Committee, and to a lesser degree the Compliance Committee and the Finance and Investment Committee, receive additional compensation.

According to current rules, members of the Supervisory Board receive an annual base compensation of 140,000; the Chairman of the Supervisory Board receives a base compensation of 280,000, and each of the Deputy Chairmen receives 220,000.

The members of the Supervisory Board committees receive the following additional fixed compensation for their work on those committees: the Chairman of the Audit Committee receives 160,000, and each of the other members receives 80,000; the Chairman of the Chairman's Committee receives 120,000, and each of the other members receives 80,000; the Chairman of the Finance and Investment Committee receives 80,000, and each of the other members receives 40,000; the Chairman of the Compliance Committee receives 80,000, and each of the other members receives 40,000. However, no additional compensation is paid for work on the Compliance Committee if a member of that committee is already entitled to compensation for work on the Audit Committee. Plans call for a proposal to be made at the Annual Shareholders Meeting in January 2014 that as of October 1, 2013, the Chairman and members of the newly established Compensation Committee will also receive additional compensation. Based on this proposal, the Chairman of the Compensation Committee will receive 100,000, and each of the other members of the Committee will receive 60,000. If applicable, compensation received for work on the Chairman's Committee will be taken into account in determining compensation for work on the Compensation Committee.

If a Supervisory Board member does not attend a meeting of the Supervisory Board, one third of the aggregate compensation due to that member is reduced by the percentage of Supervisory Board meetings not attended by the member in relation to the total number of Supervisory Board meetings held during the fiscal year. In the event of changes in the composition of the Supervisory Board and/or its committees, compensation is paid pro rata temporis, rounding up to the next full month.

In addition, the members of the Supervisory Board are entitled to receive a meeting attendance fee of 1,500 for each meeting of the Supervisory Board and its committees that they attend.

The members of the Supervisory Board are reimbursed for out-of-pocket expenses incurred in connection with their duties and for any value-added tax to be paid on their remuneration. For the performance of his duties, the Chairman of the Supervisory Board is furthermore entitled to an office with secretarial support and use of the Siemens carpool service.

No loans or advances from the Company are provided to members of the Supervisory Board.

Table of Contents

The compensation shown below was determined for each of the members of the Supervisory Board for fiscal 2013 (individualized disclosure):

	Base compensation	2013 Additional compensation for committee work ⁽¹⁾	Total	Base compensation	2012 Additional compensation for committee work ⁽¹⁾	Total

- (1) Dr. Gerhard Cromme as Chairman of the Supervisory Board and of the Chairman's Committee, the Compliance Committee, and the Finance and Investment Committee, as well as a member of the Audit Committee; Berthold Huber as Deputy Chairman of the Supervisory Board and member of the Chairman's Committee; Dr. Josef Ackermann as Deputy Chairman of the Supervisory Board and member of the Chairman's Committee, the Compliance Committee and the Audit Committee; Lothar Adler as member of the Chairman's Committee, the Compliance Committee and the Finance and Investment Committee; Jean-Louis Beffa as member of the Finance and Investment Committee; Gerd von Brandenstein as member of the Finance and Investment Committee; Dr. Hans Michael Gaul as Chairman of the Audit Committee and member of the Compliance Committee; Bettina Haller as member of the Audit Committee and the Compliance Committee; Harald Kern as member of the Finance and Investment Committee; Jürgen Kerner as member of the Audit Committee and the Finance and Investment Committee; Gérard Mestrallet as member of the Finance and Investment Committee; Werner Mönius as member of the Finance and Investment Committee; Håkan Samuelsson as member of the Finance and Investment Committee; Dieter Scheitor as member of the Audit Committee and the Finance and Investment Committee; Birgit Steinborn as member of the Audit Committee and the Finance and Investment Committee; Lord Iain Vallance of Tummel as member of the Compliance Committee and the Audit Committee; Sibylle Wankel as member of the Compliance Committee; and Werner Wenning as member of the Finance and Investment Committee, each received an additional fixed compensation for their committee work.
- (2) Both the employee representatives on the Supervisory Board who represent the employees pursuant to Section 3 para. 1 No. 1 of the German Codetermination Act (Mitbestimmungsgesetz) and the representatives of the trade unions on the Supervisory Board declared their readiness to transfer their compensation to the Hans Boeckler Foundation, in accordance with the guidelines of the Confederation of German Trade Unions (DGB).
- (3) Robert Kensbock, Gérard Mestrallet, Güler Sabanci and Werner Wenning were newly elected as members of the Supervisory Board as of the end of the Annual Shareholders Meeting on January 23, 2013.
- (4) Jean-Louis Beffa, Werner Mönius, Håkan Samuelsson and Lord Iain Vallance of Tummel resigned from the Supervisory Board as of the end of the Annual Shareholders Meeting on January 23, 2013. Dieter Scheitor resigned from the Supervisory Board as of the end of the Annual Shareholders Meeting on January 24, 2012.
- (5) In addition, the members of the Supervisory Board are entitled to receive a meeting attendance fee of 1,500 (2011: 1,500) for each meeting of the Supervisory Board and its committees that they attend. In fiscal 2013, Dr. Gerhard Cromme received meeting fees of 57,000 (2012: 48,000), Lothar Adler received meeting fees of 40,500 (2012: 30,000), Dr. Hans Michael Gaul received meeting fees

Table of Contents

of 39,000 (2012: 34,500), Dr. Josef Ackermann received meeting fees of 34,500 (2012: 22,500), Birgit Steinborn received meeting fees of 28,500 (2012: 22,500), Berthold Huber received meeting fees of 27,000 (2012: 18,000), Jürgen Kerner received meeting fees of 27,000 (2012: 12,000), Bettina Haller received meeting fees of 25,500 (2012: 25,500), Sibylle Wankel received meeting fees of 22,500 (2012: 16,500), Gerd von Brandenstein received meeting fees of 18,000 (2012: 13,500), Harald Kern received meeting fees of 16,500 (2012: 9,000), Prof. Dr. Peter Gruss received meeting fees of 15,000 (2012: 9,000), Dr. Nicola Leibinger-Kammüller received meeting fees of 15,000 (2012: 7,500), Prof. Dr. Rainer Sieg received meeting fees of 15,000 (2012: 9,000), Lord Iain Vallance of Tummel received meeting fees of 15,000 (2012: 25,500), Michael Diekmann received meeting fees of 13,500 (2012: 9,000), Hans-Jürgen Hartung received meeting fees of 10,500 (2012: 9,000), Werner Mönius received meeting fees of 9,000 (2012: 13,500), Jean-Louis Beffa received meeting fees of 7,500 (2012: 9,000), Robert Kensbock received meeting fees of 7,500 (2012: 0), Gérard Mestrallet received meeting fees of 7,500 (2012: 0), Werner Wenning received meeting fees of 7,500 (2012: 0), Güler Sabanci received meeting fees of 6,000 (2012: 0) and Håkan Samuelsson received meeting fees of 6,000 (2012: 13,500).

OTHER

The Company provides a group insurance policy for board and committee members and certain employees of the Siemens organization that is taken out for one year and renewed annually. The insurance covers the personal liability of the insured in the case of a financial loss associated with employment functions. The insurance policy for fiscal 2013 includes a deductible for the members of the Managing Board and the Supervisory Board in compliance with the requirements of the German Stock Corporation Act and the German Corporate Governance Code.

STOCK-BASED COMPENSATION**STOCK AWARDS**

In November 2004, we introduced Stock Awards as a means of providing stock-based compensation to our Managing Board, members of senior management of Siemens AG and of our domestic and foreign subsidiaries, and other eligible employees. Stock awards are commitments to issue or transfer shares of Siemens AG to the grantee. Generally, each Stock Award is subject to a restriction period of about four years; Stock Awards granted between October 1, 2007 and September 30, 2011, however, are subject to a shorter restriction period of three years. Upon expiration of the restriction period, the grantee receives a corresponding number of shares of Siemens AG without additional payment.

Stock Awards may not be transferred, sold, pledged or otherwise encumbered. They can be inherited only by spouses or in the absence of a spouse by children of the grantee. Stock Awards are not entitled to dividends paid during the restriction period.

Starting with fiscal 2011, the Supervisory Board established mandatory rules for the grant of Stock Awards, rendering this remuneration component fully performance-related. Further, under the remuneration system, half of the variable compensation component (bonus) for members of the Managing Board is settled in the form of non-forfeitable stock awards (Bonus Awards). Contingent on target attainment measured after the end of each fiscal year, the Supervisory Board decides on the number of Bonus and Stock Awards to be granted to each member of the Managing Board. For further details, including the applicable target system, the number of Bonus and Stock Awards granted to the individual members of our Managing Board and the Bonus and Stock Awards' respective fair values, see Item 6: Directors, senior management and employees' Compensation report.

The Managing Board decides annually how many Stock Awards to grant to members of senior management of Siemens AG and our domestic and foreign subsidiaries, and other eligible employees. As a rule, Stock Awards may be

granted only once a year within 30 days after publication of Siemens annual results, and, starting with fiscal 2012, the grant of these Stock Awards is fully performance-related. One portion of the Stock Awards granted depends on the degree to which an earnings-per-share target is attained, determined on the basis of the average basic earnings per share for the past three years preceding the grant. After the end of each fiscal year, the Managing Board determines the degree of target attainment with binding effect. The other portion of the Stock Awards granted depends on the performance of the share price of Siemens during the restriction period in comparison to the performance of the share prices of certain Siemens competitors.

Table of Contents

In November 2013, the Company decided to award a total of 1,634,605 Stock Awards with a commitment date of November 8, 2013 of which 213,394 Stock Awards were awarded to members of our Managing Board and 1,421,211 Stock Awards were awarded to members of senior management of Siemens AG and of domestic and foreign subsidiaries, and other eligible employees of the Company.

The monetary value of the Bonus Awards and Stock Awards is recorded at the market price of the Siemens share on the commitment date less the present value of dividends expected during the waiting respectively restriction period, considering market conditions (if applicable). The following table sets forth information relating to the Stock Awards awarded during fiscal 2014, 2013 and 2012:

	2014	2013	2012
Number of Stock Awards	1,634,605	2,503,461	2,407,834
Monetary value per Stock Award	82.88	63.86	59.41
Total monetary value of Stock Awards	135.5 million	159.9 million	143.1 million

Stock Awards may be settled in newly issued shares of common stock of Siemens AG from authorized capital which may be reserved for this purpose, in treasury stock or in cash. The settlement method will be determined subsequently by the Managing Board and the Supervisory Board.

SHARE MATCHING PLAN

Since fiscal year 2009, the members of the Managing Board as well as certain members of senior management of Siemens AG and of our domestic and foreign subsidiaries, and other eligible employees of the Siemens Group (the Plan Participants) may also participate in a Share Matching Plan (the Plan). In fiscal 2011, members of the Managing Board were for the last time permitted to invest a specified amount of their bonus payout relating to fiscal 2010 in Siemens shares under the Plan.

After expiration of a three-year vesting period, each Plan Participant is entitled to receive, without further payment, one matching share of Siemens stock for every three Siemens shares acquired and continuously held under the Plan. With the decision on their investment amount in December 2012, all Plan Participants acquired a total amount of 2,139,735 investment shares of Siemens stock under the Plan and, accordingly, are entitled to receive a total amount of 713,245 matching shares upon expiration of the three-year vesting period, provided that the shares were continuously held for the duration of the vesting period. For further details, including the number of matching share entitlements of the individual members of our Managing Board under the Plan, see Item 6: Directors, senior management and employees Compensation report.

SHARE OWNERSHIP

As of October 13, 2013, the current Managing Board members held a total of 307,537 (2012: 430,008) Siemens shares as well as stock awards on Siemens shares (exercisable within sixty days), representing less than 0.04% (2012: 0.05%) of the capital stock of Siemens AG which totaled 881,000,000 (2012: 881,000,000). As of the same day, the current members of the Supervisory Board held Siemens shares as well as stock awards on Siemens shares (exercisable within sixty days) representing less than 0.01% (2012: 0.01%) of the capital stock of Siemens AG. These figures do not include 9,313,438 (2012: 11,454,464) shares, or 1.06% (2012: 1.30%) of the capital stock which totaled 881,000,000 (2012: 888,000,000), over which the von Siemens-Vermögensverwaltung GmbH (vSV), a German limited liability company, has voting control under powers of attorney based on an agreement between among others members of the Siemens family, including Mr. Gerd von Brandenstein, and vSV. These shares are voted together by vSV based on

proposals by the family partnership established by the Siemens family or by one of its committees representing members of the Siemens family. Mr. Gerd von Brandenstein is the current chairman of the executive committee and has a deciding vote in case of a deadlock. The vSV is described in more detail under Item 7: Major shareholders and related party transactions Major shareholders.

Table of Contents

Pursuant to Section 15a of the German Securities Trading Act (Wertpapierhandelsgesetz), members of the Managing and Supervisory Boards are required to disclose purchases or sales of shares of Siemens AG or financial instruments based on such shares if the total amount of transactions of a board member and any closely associated person is at least 5,000 during any calendar year. Any transactions reported to Siemens AG in accordance with this requirement were duly published and can be found on the Company's internet website at www.siemens.com/directors-dealings. For more information on this disclosure requirement, see Item 10: Additional information Articles of Association and relevant provisions of German law Disclosure requirement.

Table of Contents

ITEM 7: MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

MAJOR SHAREHOLDERS

The von Siemens Vermögensverwaltung GmbH (vSV) is a German limited liability company and party to an agreement with, among others, members of the Siemens family (family agreement). In order to bundle and represent their interests, the family established a family partnership. As of October 13, 2013, the vSV held, on a sustained basis, powers of attorney allowing it to vote for approximately 1.06% of our capital stock on behalf of members of the Siemens family. The family partnership or one of its committees makes proposals to the vSV with respect to the exercise of voting rights at shareholders' meetings of the Company, which are taken into account by the vSV when acting within the bounds of its professional discretion. One of these committees is the executive committee, which is currently chaired by Mr. Gerd von Brandenstein, who is also a member of our Supervisory Board; he has a casting vote in the committee in case of a deadlock.

The German Securities Trading Act (Wertpapierhandelsgesetz) requires holders of voting rights to notify the issuer and the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) of their holdings whenever these reach, exceed or fall below certain thresholds. The thresholds are set at 3%, 5%, 10%, 15%, 20%, 25%, 30%, 50% and 75% of the total voting rights issued. No notifications are required for fluctuations between two thresholds. Under some circumstances, the German Securities Trading Act requires share ownership to be attributed also to certain third parties, in which case both the direct holder and the third party may be required to provide notification. Examples are the attribution of a subsidiary's holdings to one or more parent companies within a corporate group, or the attribution of shareholdings held for the account of a third party.

To our knowledge and based on public filings, other than described in the list below there is no other single person or entity that may be considered a beneficial owner of 5% or more of our voting shares. In each case listed below, we have received no further notification from the relevant party since the specified notification date.

Each of BlackRock Holdco 2, Inc., Wilmington, USA, and BlackRock Financial Management, Inc., New York, USA, notified us on October 29, 2012 (correcting notices originally dated March 28, 2012), that as of September 1, 2011 it held, directly or indirectly, 45,863,109 shares, or 5.02% of our total voting rights issued.

The State of Qatar, Doha, Qatar, acting by and through DIC Company Limited, George Town, Grand Cayman, notified us on May 10, 2012, that as of May 7, 2012 it held, directly or indirectly, 27,758,338 shares, or 3.04% of our total voting rights issued.

BlackRock Group Limited, London, U.K., notified us on May 10, 2012, that as of May 4, 2012 it held, directly or indirectly, 29,221,858 shares, or 3.20% of our total voting rights issued.

Each of BlackRock International Holdings Inc., New York, USA, and BR Jersey International Holdings L.P., St. Helier, U.K., notified us on March 27, 2012, that as of March 20, 2012 it held, directly or indirectly, 32,138,731 shares, or 3.52% of our total voting rights issued.

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

BlackRock, Inc., New York, USA, notified us on August 23, 2011 (correcting a notice originally dated August 22, 2011) that as of August 17, 2011 it held, directly or indirectly, 45,775,458 shares, or 5.01% of our total voting rights issued.

BlackRock Advisors Holdings, Inc., New York, USA, notified us on August 22, 2011, that as of August 17, 2011, it held, directly or indirectly, 27,642,550 shares, or 3.02% of our total voting rights issued.

The Werner Siemens Stiftung, Zug, Switzerland, a family-sponsored foundation, notified us on January 21, 2008, that as of January 2, 2008, it held 27,739,285 shares, or 3.03% of our total voting rights issued.

In addition, there are entities, mostly investment management companies, banks or other financial institutions, which according to information they provided to us at various points over the last three fiscal years reached, exceeded or fell below the notification thresholds set forth in the German Securities Trading Act. Such information has been made publicly available.

Table of Contents

As of September 30, 2013, we held 37,997,595 shares, or 4.31% of our total voting rights issued, which we had repurchased and held as treasury shares. For further information on share repurchases, see Item 10: Additional information Articles of Association and relevant provisions of German law Repurchase of our own shares and Item 16E: Purchases of equity securities by the issuer and affiliated purchasers. For further information on shares held in treasury, see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 26.

Based on our share register, we had 687,620 shareholders of record as of September 30, 2013, and U.S. record holders held approximately 12.8% of our capital stock at that date. In addition, the records of the depositary under our ADR Program (Deutsche Bank) show that there were 480 registered holders of our American Depositary Shares (ADSs) at that date. In August 2013, we commissioned an analysis of our shareholder structure, which showed that shareholders in the USA held roughly 16% of our capital stock as of August 31, 2013.

RELATED PARTY TRANSACTIONS

As reflected in the information in the tables above under Item 6: Directors, senior management and employees Management Supervisory Board and Managing Board, some of our board members hold, or in the last year have held, positions of significant responsibility with other entities. We have relationships with almost all of these entities in the ordinary course of our business whereby we buy and sell a wide variety of products and services on arm's length terms. Michael Diekmann is the Chairman of the Board of Management of Allianz SE. Our transactions with Allianz Group are conducted on arm's length basis and include insurance business and asset management.

During the last fiscal year, there were no loans outstanding to members of our management.

We have relationships with many joint ventures and associates in the ordinary course of business whereby we buy and sell a wide variety of products and services generally on arm's length terms. We may also enter into loan agreements with such joint ventures and associates from time to time. For information regarding our subsidiaries, joint ventures and associated companies in fiscal 2013 see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 18 and Item 19: Exhibits List of subsidiaries and associated companies. For a description of our related party transactions see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 38.

ITEM 8: FINANCIAL INFORMATION

Information required by this Item is incorporated by reference to Item 4: Information on the Company Legal proceedings, Item 5: Operating and financial review and prospects and Item 18: Financial Statements.

ITEM 9: THE OFFER AND LISTING

TRADING MARKETS

The principal trading market for our shares is the Frankfurt Stock Exchange. Our shares are also traded on the other German stock exchanges in Berlin, Düsseldorf, Hamburg, Hanover, Munich and Stuttgart and on the London Stock Exchange and the Swiss Stock Exchange in Zurich. In addition, we were notified by the Italian stock exchange that our shares have been admitted to trading on the MTA International in Milan. The ADRs of Siemens AG, each evidencing one ADS, which represents one share, trade on the New York Stock Exchange under the symbol SI.

Table of Contents**MARKET PRICE INFORMATION**

The table below sets forth, for the calendar periods indicated, the high and low closing sales prices on the Frankfurt Stock Exchange for the common shares of Siemens as reported by the Electronic cash market trading system (Xetra). The table also shows, for the periods indicated, the closing highs and lows of the DAX, a German stock index which measures the performance of the 30 largest German companies in terms of order book volume and market capitalization, and the average daily trading volume of our common shares on Xetra. See the discussion under Item 3: Key Information Exchange rate information, for information with respect to rates of exchange between the US\$ and the applicable during the periods set forth below.

On November 20, 2013, the closing sales price per Siemens AG ADS on the New York Stock Exchange as reported on the NYSE Composite Tape was US\$129.78.

Table of Contents

ITEM 10: ADDITIONAL INFORMATION

ARTICLES OF ASSOCIATION AND RELEVANT PROVISIONS OF GERMAN LAW

This section summarizes the material provisions of our Articles of Association (Satzung) and German law to the extent that they affect the rights of our shareholders.

ORGANIZATION

Siemens AG is a stock corporation incorporated in the Federal Republic of Germany under the German Stock Corporation Act (Aktiengesetz). Siemens AG is registered in the Commercial Register (Handelsregister) maintained by the local courts in Berlin Charlottenburg, Germany, under the entry number HRB 12300, and in Munich, Germany, under the entry number HRB 6684. Copies of our Articles of Association are publicly available from the Commercial Register in Berlin and Munich, and an English translation is on file with the Securities and Exchange Commission in the United States. You can also find them at www.siemens.com/investor/en/corporate_governance.htm.

CORPORATE GOVERNANCE

Siemens AG complies with the currently applicable recommendations of the German Corporate Governance Code (Code) in the version of May 13, 2013.

The Managing Board and the Supervisory Board of Siemens AG have discussed compliance with the Code's recommendations in detail. Based on their deliberations, the boards have approved the annual Declaration of Conformity as of October 1, 2013 with two supplementary explanations regarding compliance with certain recommendations. This document is posted on our website and set forth below.

Siemens voluntarily complies with the Code's non-binding suggestions, with the following exceptions:

According to the revised Section 3.7 para. 3, in the case of a takeover offer, the Management Board should convene an extraordinary General Meeting at which shareholders discuss the takeover offer and may decide on corporate actions (previously: only in appropriate cases). The convening of a shareholders' meeting even taking into account the shortened time limits stipulated in the German Securities Acquisition and Takeover Act (WpÜG) is an organizational challenge for large publicly listed companies. It appears doubtful whether the associated effort is justified in cases where no relevant decisions by the shareholders' meeting are intended. Therefore, extraordinary shareholders' meetings shall, as in the past, be convened only in appropriate cases.

Since the Managing Board appointments made in 2011, the suggestion in Section 5.1.2 para. 2 sentence 1 of the Code that the maximum possible appointment period of five years should not be the rule for first-time appointments to the Management Board has not been followed.

Our listing on the New York Stock Exchange (NYSE) subjects us to a number of provisions under U.S. securities laws (including the Sarbanes-Oxley Act, SOA) as well as to the rules and regulations of the U.S. Securities and Exchange Commission (SEC) and the NYSE. To, inter alia, facilitate our compliance with the SOA, we have, among other things, established a Disclosure Committee, comprising the heads of a number of our Corporate Units. This committee is responsible for reviewing certain financial and non-financial information and advising our Managing Board in its decisions regarding disclosure. We also have procedures in place that require the members of the management of our Sectors, Divisions, Financial Services, Cross-Sector Services, Regional Clusters and certain Corporate Units supported

by certifications provided by the management of entities under their direction to confirm the correctness of the financial data that they have reported to Siemens corporate headquarters and the effectiveness of the related control systems. Their confirmation provides a basis for our CEO and CFO to certify our financial statements to the SEC. Consistent with the requirements of the SOA, we have procedures for handling accounting complaints in place as well as a Code of Ethics for Financial Matters. This Code of Ethics for Financial Matters was last updated in 2010.

Management and control structure

Supervisory Board

Siemens AG is subject to German corporate law. It has a two-tier board structure, consisting of a Managing Board and a Supervisory Board. As required by the German Codetermination Act (Mitbestimmungsgesetz), the Company's shareholders and its employees each select one half of the Supervisory Board's members. The term of office of the members of the Supervisory Board will expire at the close of the Annual Shareholders Meeting 2018. As successor to Dr. Josef Ackermann, who resigned from the Supervisory Board effective September 30, 2013, Jim Hagemann Snabe has been appointed to the Supervisory Board by court order in accordance with Section 5.4.3 sentence 2 of the Code until the end of the Annual Shareholders Meeting 2014.

The Supervisory Board most recently amended the objectives for its composition in line with Section 5.4.1 of the Code in fiscal 2012. Due to the new election of shareholder and employee representatives, which took effect at the end of the Annual Shareholders Meeting on January 23, 2013, the Supervisory Board modified these objectives at its meeting on September 18, 2013, and reapproved them as follows:

The composition of the Supervisory Board of Siemens AG shall be such that qualified control and advising for the Managing Board is ensured. The candidates proposed for election to the Supervisory Board shall have the expertise, skills and professional experience necessary to carry out the functions of a Supervisory Board member in a multinational company and safeguard the reputation of Siemens in public. In particular, care shall be taken in regard to the personality, integrity, commitment, professionalism and independence of the individuals proposed for election. The goal is to ensure that, in the Supervisory Board, as a group, all know-how and experience is available that is considered essential in view of Siemens activities.

Taking the company's international orientation into account, care shall also be taken to ensure that the Supervisory Board has an adequate number of members with extensive international experience. Our goal is to make sure that the present considerable share of Supervisory Board members with extensive international experience is maintained.

In its election proposals, the Supervisory Board shall also pay particular attention to the appropriate participation of women. Qualified women shall already be included in the initial process of selecting potential candidates for new elections or for the filling of Supervisory Board positions that have become vacant and shall be considered, as appropriate, in nominations. We have meanwhile been able to increase the number of women on our Supervisory Board to five. Our goal is to maintain and, if possible, to increase this number. It is also intended that – as is currently the case – at the minimum one woman should be a member of the Nominating Committee.

An adequate number of independent members shall belong to the Supervisory Board. Material and not only temporary conflicts of interest, such as organizational functions or advisory capacities with major competitors of the company, shall be avoided. Under the presumption that the mere exercise of Supervisory Board duties as an employee representative gives no cause to doubt the compliance with the independence criteria pursuant to Section 5.4.2 of the Code, the Supervisory Board shall have a minimum of sixteen members who are independent in the meaning of the Code. In any case, the Supervisory Board shall be composed in such a way that a number of at least six independent shareholder representatives in the meaning of Section 5.4.2 of the Code is achieved. In addition, the Supervisory Board members shall have sufficient time to be able to devote the necessary regularity and diligence to their mandate.

The age limitation established in the Bylaws for the Supervisory Board will be taken into consideration. In addition, no more than two former members of the Managing Board of Siemens AG shall belong to the Supervisory Board.

Table of Contents

The objectives for the Supervisory Board's composition that were approved in the last fiscal year have been taken into account in the proposals for the election of the Supervisory Board members and have been fully achieved. The considerable share of Supervisory Board members who are currently engaged in international activities and/or have many years of international experience has been maintained. The number of female Supervisory Board members has increased from four to five. Furthermore, Dr. Nicola Leibinger-Kammüller has been elected to the Nominating Committee. The Supervisory Board has an adequate number of independent members. In the opinion of the Supervisory Board, a minimum of sixteen Supervisory Board members are independent in the meaning of Section 5.4.2 of the Code. Some Supervisory Board members hold or have held in the past year high-ranking positions at other companies with which Siemens does business. Nevertheless, transactions between Siemens and such companies are carried out on an arm's length basis. We believe that these transactions do not compromise the independence of the Supervisory Board members in question.

The Supervisory Board oversees and advises the Managing Board in its management of the Company's business. At regular intervals, the Supervisory Board discusses business development, planning, strategy and implementation. It reviews the Stand-Alone Financial Statements of Siemens AG, the Consolidated Financial Statements of Siemens Group, the Combined Management Reports of these financial statements and the proposal for the appropriation of net income. It also discusses Siemens' quarterly and half-yearly reports and approves the Stand-Alone Financial Statements of Siemens AG as well as the Consolidated Financial Statements of Siemens Group, taking into account both the reports issued by the independent auditors thereon and the results of the review conducted by the Audit Committee. In addition, the Supervisory Board and the Compliance Committee, which is described in more detail below, concern themselves with the Company's adherence to statutory provisions, official regulations and internal Company policies (compliance). The Supervisory Board also appoints the members of the Managing Board and determines each member's duties. Important Managing Board decisions such as those regarding major acquisitions, divestments and financial measures require Supervisory Board approval, unless the Bylaws for the Supervisory Board specify that such authority be delegated to the Finance and Investment Committee of the Supervisory Board. In the Bylaws for the Managing Board, the Supervisory Board has established the rules that govern the work of the Managing Board. In particular, the rules regarding the allocation of duties among individual Managing Board members, the matters reserved for the Managing Board as a whole and the quorum required for Managing Board decisions.

The Supervisory Board currently has seven committees whose duties, responsibilities and procedures fulfill the requirements of the German Stock Corporation Act and the Code, reflect applicable SOA requirements and incorporate applicable NYSE rules as well as certain NYSE rules, with which Siemens AG complies voluntarily. The Chairmen of the committees provide the Supervisory Board with regular reports on the activities of the committees.

The Chairman's Committee, which comprises the Chairman and Deputy Chairmen of the Supervisory Board as well as one further employee representative elected by the Supervisory Board, performs the collective tasks of a nominating and corporate governance committee to the extent that such tasks are not performed by the Nominating Committee and German law does not require that such tasks be performed by the full Supervisory Board. In particular, the Chairman's Committee makes proposals regarding the appointment and dismissal of Managing Board members and handles contracts with members of the Managing Board. In preparing recommendations on the appointment of Managing Board members, the Chairman's Committee takes into account a candidate's professional qualifications, international experience and leadership qualities, the age limit specified for Managing Board members, the board's long-range plans for succession as well as the board's diversity and, in particular, the appropriate consideration of women. The Chairman's Committee concerns itself with questions regarding the Company's corporate governance and prepares the resolutions to be approved by the Supervisory Board regarding the Declaration of Conformity with the Code, including the explanation of deviations from the Code, and regarding the approval of the Corporate Governance Report, and the Report of the Supervisory Board to the Annual Shareholders' Meeting. Furthermore, the Chairman's Committee submits recommendations to the Supervisory Board regarding the composition of Supervisory Board

committees and decides whether to approve business transactions with Managing Board members and parties related to them.

The Compensation Committee, which was newly formed by the Supervisory Board on July 31, 2013, and comprises the members of the Chairman's Committee of the Supervisory Board as well as one of the Supervisory Board's shareholder representatives and one of the Supervisory Board's employee representatives, prepares the

Table of Contents

proposals for decisions by the Supervisory Board's plenary meetings regarding the system of Managing Board compensation, including the implementation of this system in the Managing Board contracts, the definition of the targets for variable Managing Board compensation, the determination and review of the appropriateness of the total compensation of individual Managing Board members and the approval of the annual Compensation Report. In addition, the Compensation Committee prepares the regular review by the Supervisory Board's plenary meetings of the system of Managing Board compensation.

The Audit Committee comprises the Chairman of the Supervisory Board, two of the Supervisory Board's shareholder representatives and three of the Supervisory Board's employee representatives. In November 2013, it was decided to increase the number of Committee members by one additional shareholder representative and one additional employee representative. Under German law, the Audit Committee must include at least one independent Supervisory Board member with knowledge and experience in the application of accounting principles or the auditing of financial statements. The Chairman of the Audit Committee, Dr. Hans Michael Gaul, fulfills these statutory requirements. The Supervisory Board has designated Dr. Hans Michael Gaul in addition to Dr. Gerhard Cromme as an audit committee financial expert, as defined by the regulations of the SEC adopted pursuant to Section 407 of the SOA. The Supervisory Board monitors the independence of the members of the Audit Committee. With regard to the independence requirements under the Securities Exchange Act, Siemens relies on the exemption provided by Rule 10A-3(b)(1)(iv)(C). We believe that such reliance does not materially adversely affect the ability of the Audit Committee to act independently or to satisfy the other requirements of Rule 10A-3.

The Audit Committee oversees the accounting process. It also prepares the Supervisory Board's recommendation to the Annual Shareholders' Meeting concerning the election of the independent auditors and submits the corresponding proposal to the full Supervisory Board. In addition to the work performed by the independent auditors, the Audit Committee also discusses the Company's financial statements, which are prepared by the Managing Board quarterly, half-yearly and annually. On the basis of the independent auditors' report on the annual financial statements, the Audit Committee makes, after its own review, recommendations to the Supervisory Board regarding the approval of the Stand-Alone Financial Statements of Siemens AG and the Consolidated Financial Statements of Siemens Group. It concerns itself with the Company's risk monitoring system and oversees the effectiveness of the internal control system as this relates, in particular, to financial reporting, the risk management system and the internal audit system. The Internal Audit Department reports regularly to the Audit Committee. The Audit Committee awards the audit contract to the independent auditors elected by the Annual Shareholders' Meeting and monitors the independent audit of the financial statements including, in particular, the auditors' independence, professional expertise and services and performs other functions assigned to it under the SOA.

The Compliance Committee comprises the Chairman of the Supervisory Board, two of the Supervisory Board's shareholder representatives and three of the Supervisory Board's employee representatives. In November 2013, it was decided to increase the number of Committee members by one additional shareholder representative and one additional employee representative. The Compliance Committee concerns itself, in particular, with the Company's adherence to statutory provisions, official regulations and internal Company policies.

The Nominating Committee, which comprises the Chairman and the Second Deputy Chairman of the Supervisory Board as well as two further members to be elected by the shareholder representatives of the Supervisory Board from among their number, is responsible for making recommendations to the Supervisory Board on suitable candidates for election as shareholder representatives of the Supervisory Board by the Annual Shareholders' Meeting. In preparing these recommendations, the objectives specified by the Supervisory Board regarding its composition are to be taken into account as well as the required knowledge, abilities and experience of the proposed candidates; attention shall also be paid to independence, diversity and, in particular, the appropriate participation of women.

The Mediation Committee, which comprises the Chairman of the Supervisory Board, the First Deputy Chairman (who is elected in accordance with the German Codetermination Act), one of the Supervisory Board's shareholder representatives and one of the Supervisory Board's employee representatives, submits proposals to the Supervisory Board in the event that the Supervisory Board cannot reach the two-thirds majority required for the appointment or dismissal of a Managing Board member.

Table of Contents

The Finance and Investment Committee¹ comprises the Chairman of the Supervisory Board, three of the Supervisory Board's shareholder representatives and four of the Supervisory Board's employee representatives. Based on the Company's overall strategy, which is the focus of an annual strategy meeting of the Supervisory Board, the Committee prepares the discussions and resolutions of the Supervisory Board regarding questions relating to the Company's financial situation and structure as well as its fixed asset and financial investments. In addition, the Finance and Investment Committee has been authorized by the Supervisory Board to decide on the approval of transactions and measures that require Supervisory Board approval and have a value of less than 600 million.

Managing Board

As the Company's top management body, the Managing Board is committed to serving the interests of the Company and achieving sustainable growth in Company value. The members of the Managing Board are jointly responsible for the entire management of the Company and decide on the basic issues of business policy and corporate strategy as well as on the Company's annual and multi-year plans.

The Managing Board prepares the Company's quarterly and half-yearly reports, the Stand-Alone Financial Statements of Siemens AG and the Consolidated Financial Statements of Siemens Group. In addition, the Managing Board must ensure that the Company adheres to statutory provisions, official regulations and internal Company policies (compliance) and works to achieve compliance with these provisions and policies within the Siemens Group. The Managing Board and the Supervisory Board cooperate closely for the benefit of the Company. The Managing Board informs the Supervisory Board regularly, comprehensively and without delay, on all issues of importance to the Company with regard to strategy, planning, business development, financial position, earnings, compliance and risks. When filling managerial positions at the Company, the Managing Board takes diversity into consideration and, in particular, aims for an appropriate consideration of women.

Currently, there is one Managing Board committee, the Equity and Employee Stock Committee. This committee comprises three members of the Managing Board and oversees the utilization of authorized capital in connection with the issuance of employee stock and the implementation of certain capital measures. It also determines the scope and conditions of the share-based compensation components and/or programs for employees and managers (with the exception of the Managing Board).

Annual Shareholders Meeting and investor relations

Shareholders exercise their rights in the Annual Shareholders Meeting. An ordinary Annual Shareholders Meeting normally takes place within the first four months of each fiscal year. The Annual Shareholders Meeting decides, among other things, on the appropriation of the unappropriated net income, the ratification of the acts of the Managing and Supervisory Boards, and the appointment of the independent auditors. Amendments to the Articles of Association and measures that change the Company's capital stock are approved at the Annual Shareholders Meeting and are implemented by the Managing Board. The Managing Board facilitates shareholder participation in this meeting through electronic communications in particular via the Internet and enables shareholders who are unable to attend the meeting to vote by proxy. Furthermore, shareholders may exercise their right to vote in writing or by means of electronic communications (voting by mail). The Managing Board may enable shareholders to participate in the Annual Shareholders Meeting without the need to be present at the venue and without a proxy and to exercise some or all of their rights fully or partially by means of electronic communications. Shareholders may submit proposals regarding the proposals of the Managing and Supervisory Boards and may contest decisions of the Annual Shareholders Meeting. Shareholders owning Siemens stock with an aggregate notional value of 100,000 or more may also demand the judicial appointment of special auditors to examine specific issues. The reports, documents and information required by law, including the Annual Report, may be downloaded from our website. The same applies to

the agenda for the Annual Shareholders Meeting and to possible counterproposals or shareholders nominations, if any, that require disclosure.

¹ In November 2013 renamed Innovation and Finance Committee .

Table of Contents

As part of our investor relations activities, we inform our investors comprehensively about developments within the Company. For communication purposes, Siemens makes extensive use of the Internet. We publish quarterly, half-yearly and annual reports, earnings releases, ad hoc announcements, analyst presentations, shareholder letters and press releases as well as the financial calendar for the current year, which contains the publication dates of significant financial communications and the date of the Annual Shareholders Meeting at www.siemens.com/investors.

Business Conduct Guidelines and Code of Ethics

Our Business Conduct Guidelines and our Code of Ethics for Financial Matters form the basis of our compliance program.

The Business Conduct Guidelines, introduced by the Managing Board in 2001 and amended and restated in 2009, contain binding standards for law-abiding behavior and precise rules regarding, among others, compliance with applicable fair competition and anticorruption laws, handling of donations and gifts, avoidance of conflicts of interest, prohibition of insider trading, and protection of Company assets. They also specify procedures for dealing with complaints. They provide the ethical and legal framework within which we want to maintain successful activities.

Furthermore, the Managing Board and the Supervisory Board have implemented a Code of Ethics for Financial Matters, as required by the SOA rules. For further information about our Code of Ethics for Financial Matters, please refer to Item 16B: Code of ethics.

Both the Business Conduct Guidelines and the Code of Ethics for Financial Matters are available on our website.

The Business Conduct Guidelines and the Code of Ethics for Financial Matters are complemented by numerous other rules that are applicable company-wide.

As required by the SOA rules, procedures for the receipt, retention and treatment of potential complaints regarding accounting practices as well as procedures for handling relevant reports from specific attorneys (internal and external) have been implemented. Such complaints and comments, including those submitted anonymously, are processed by the Chief Counsel Compliance in the case of complaints related to accounting practices, and by the General Counsel in the case of reports from specific attorneys.

In addition to the existing internal procedures for reporting and handling complaints, an external attorney has been engaged to act as an independent ombudsman to provide a confidential communication channel for Siemens employees and third parties. Additionally, our customers, suppliers, business partners and all other third parties as well as our employees worldwide are offered the opportunity to submit reports on violations to the Tell Us Compliance Helpdesk, either by telephone or online 24 hours a day on seven days per week. The external provider specializes in the secure and confidential handling of sensitive information.

Our Articles of Association, the Bylaws for the Supervisory Board and for its most important committees, the Bylaws for the Managing Board, all our Declarations of Conformity with the Code and a variety of other corporate governance related documents are posted on our website at www.siemens.com/corporate_governance.

Declaration of Conformity with the German Corporate Governance Code

The Managing Board and the Supervisory Board of Siemens AG approved the following Declaration of Conformity pursuant to Section 161 of the German Stock Corporation Act:

Declaration of Conformity by the Managing Board and the Supervisory Board of Siemens Aktiengesellschaft with the German Corporate Governance Code

Siemens AG complies and will continue to comply with the currently applicable recommendations of the German Corporate Governance Code (Code) in the version of May 13, 2013, published by the Federal Ministry of Justice in the official section of the Federal Gazette (Bundesanzeiger). Further details are as follows:

In Section 4.2.3 para. 2 sentence 6, the Code recommends capping the amount of Management Board compensation, both overall and for individual compensation components.

Table of Contents

Plans call for implementing this recommendation effective October 1, 2013. The current Managing Board contracts specify caps for bonuses and long-term, stock-based compensation. However, these caps are defined as a percentage of each target amount; they are not specific figures. In line with the principle that agreements must be honored, retroactive intervention in these contracts would be inappropriate. It could not be implemented by the company unilaterally and, in our opinion, is not required by Section 4.2.3 para. 2 sentence 6.

In Section 4.2.3 para. 4 sentence 1, the Code recommends that, in concluding Management Board contracts, care be taken to ensure that payments made to a Management Board member on premature termination of his/her contract, including fringe benefits, do not exceed the value of two years' compensation (severance payment cap) and compensate no more than the remaining term of the employment contract.

The current Managing Board contracts contain a corresponding severance payment cap, and it is intended to include such a cap in all future Managing Board contracts. Therefore, the agreements concluded with Mr. Löscher and Ms. Ederer on the premature termination of their Managing Board activities specify severance payments that do not exceed the value of two years' compensation. Further benefits that do not constitute compensation payments in the sense of Section 4.2.3 para. 4 sentence 1 of the Code were also agreed upon with both Mr. Löscher and Ms. Ederer, Mr. Löscher in particular having signed a two-year post-contractual non-compete clause. Details of the agreements with Mr. Löscher and Ms. Ederer will be provided in the Compensation Report included in the Annual Report for 2013.

Since making the last Declaration of Conformity dated October 1, 2012, Siemens AG has complied with the recommendations of the Code in the prior version of May 15, 2012.

Berlin and Munich, October 1, 2013

Siemens Aktiengesellschaft

The Managing Board

The Supervisory Board

Table of Contents

OBJECTS AND PURPOSES

According to Section 2 of our Articles of Association, the objects and purposes of our Company are:

to manufacture, distribute and supply industrial products in the fields of electrical engineering and electronics, mechanical engineering, precision mechanics as well as related sectors of engineering, including research and development in these fields;

to develop, plan, distribute, supply, assemble and commission trade-specific and customer-specific systems, solutions and facilities in the fields of electrical engineering and electronics, mechanical engineering, precision mechanics as well as related sectors of engineering; and

to render industrial and other business-related services.

Our Articles of Association authorize us to engage in business of any kind and to take any and all measures related to, or which seem to be directly or indirectly useful in, promoting our objects. We may also operate both domestic and foreign factories, establish branch offices, found, acquire, consolidate with, or participate in other companies, conclude or participate in other management contracts and enter into joint ventures.

DIRECTORS

Under German law, our Supervisory Board members and Managing Board members owe duties of loyalty and care to our Company. They must exercise the standard of care of a prudent and diligent businessman and bear the burden of proving they did so if their actions are contested. Both boards have a duty to take into account the interests of our shareholders and our employees and, to some extent, are also required to observe the public interest. Those who violate their duties are jointly and severally liable to the Company for any damage that their violations have caused unless their actions were validly approved by a resolution at a prior shareholders' meeting with a simple majority of the votes cast.

No board member may vote on a matter that concerns formal approval of his or her own acts or in which he or she has a material interest, and no member of either our Supervisory Board or our Managing Board may receive loans from us.

There is no mandatory retirement age for members of either Board under our Articles of Association. According to the Managing Board's Bylaws, however, the age of a member of the Managing Board shall not, as a rule, exceed 65 years. Similarly, the Bylaws of the Supervisory Board set forth that, as a rule, only persons who are not older than 70 years shall be nominated to be elected as members of the Supervisory Board.

According to our Share Ownership Guidelines, being effective since October 1, 2008, there is a mutually determined share ownership commitment by the members of our Managing Board and other top executive managers.

See also Item 6: Directors, senior management and employees' Management Supervisory Board, and Item 6: Directors, senior management and employees' Management Managing Board for further information about the Supervisory Board and the Managing Board.

RIGHTS, PREFERENCES AND RESTRICTIONS ATTACHING TO OUR SHARES

Voting rights

Our shareholders vote at shareholders meetings. A shareholders meeting may be called by either our Managing Board or our Supervisory Board. The Annual Shareholders Meeting must take place within the first eight months of each fiscal year. In addition, shareholders whose combined shares amount to at least one twentieth of the capital stock may request in writing the convening of a shareholders meeting, stating the purpose and reasons for it. Shareholders whose combined shares represent at least one twentieth of the capital stock or a proportionate ownership of at least 500,000 in capital stock may also require that particular items be placed on the agenda and published.

Table of Contents

Under German law and our Articles of Association, we must publish notices that are required by law or by our Articles of Association in the Federal Gazette. Notices of shareholders' meetings must be published at least 30 days prior to the deadline stated in the notice by which we ask our shareholders to notify us that they intend to attend the meeting. Under German law and our Articles of Association, we are also entitled to submit information to registered shareholders by way of remote data transmission with their approval.

In order to be entitled to participate in and vote at a meeting, a shareholder must be registered in the share register on the meeting date and must have notified us in text form or electronically that he or she wished to attend the meeting. The period between the date of notification receipt and the meeting date must be at least six full days or such lesser period as our Managing Board may have specified in the notice of the Shareholders' Meeting.

The Managing Board facilitates shareholder participation in the meeting through electronic communications in particular the Internet and enables shareholders who are unable to attend the meeting to vote by proxy. Furthermore, shareholders may exercise their right to vote in writing or by means of electronic communication (voting by mail). The Managing Board may provide for the shareholders to participate in the Shareholders' Meeting without the need to be present at the venue and without a proxy, and to exercise some or all of their rights fully or partially by means of electronic communication. At our Shareholders' Meetings, each share carries one vote. In certain cases, a shareholder can be prevented from exercising his or her voting rights. This rule applies, for example, if we discharge one of our shareholders from liability or assert a claim against one of our shareholders. Resolutions are generally passed with a simple majority of the votes cast at the meeting. Resolutions that require a capital majority are passed with a simple majority of the issued capital present at the meeting, unless statutory law or our Articles of Association require otherwise. Under the German Stock Corporation Act, a number of significant resolutions must be passed by a vote of at least 75% of the share capital present at the meeting. This 75% majority requirement applies to the following matters, among others:

amendments of a company's articles of association (except amendments that would impose an additional duty upon shareholders or change certain rights and obligations attaching to a company's shares, which in addition require the approval of all shareholders concerned);

capital increases and decreases;

exclusion of preemptive rights in connection with a capital increase;

creation of authorized capital or conditional capital or the issue of convertible bonds and bonds with warrants attached;

dissolution of a company;

merger or consolidation of a company with another stock corporation or certain other corporate transformations;

transfer of all or virtually all of the assets of a company; and

approval of any direct control, profit and loss pooling or similar intercompany agreements.

Although we must notify shareholders of an ordinary or extraordinary shareholders meeting as described above, neither the German Stock Corporation Act nor our Articles of Association provide for a minimum quorum requirement. Accordingly, holders of a minority of our shares could control the outcome of actions not requiring a specified majority of our outstanding share capital.

Neither German law nor our Articles of Association restrict the right of non-resident or foreign owners of our shares to hold or vote the shares.

Dividend rights

Under applicable German law, we may declare and pay dividends only from our unappropriated net income as reported in the German statutory, Stand-Alone Financial Statements of Siemens AG. For each fiscal year, our Managing Board approves the Stand-Alone Financial Statements of Siemens AG and submits them to our

Table of Contents

Supervisory Board with its proposal for the appropriation of our unappropriated net income. The proposal sets forth what portion of the unappropriated net income should be paid out as dividends, transferred to profit reserves or carried forward to the next fiscal year. Upon approval by our Supervisory Board, our Managing Board and our Supervisory Board submit their combined proposal to the shareholders at the Annual Shareholders Meeting. The general assembly of shareholders ultimately determines the appropriation of unappropriated net income including the amount of any annual dividend. Our Managing and Supervisory Boards may not appropriate more than one half of our unappropriated net income to other retained earnings. In determining the distribution of profit however, our shareholders may allocate additional amounts to profit reserves and may carry forward profits in part or in full. Our shareholders receive dividend distributions in proportion to the number of shares they hold.

Cash dividends approved at a Shareholders Meeting are payable on the first stock exchange trading day after that meeting, unless otherwise decided at the Shareholders Meeting. If an investor holds shares that are entitled to dividends through a clearing system, the dividends will be paid according to that clearing system's rules. If an investor holds physical certificates, he or she may no longer exercise dividend or other rights attaching to the shares without surrendering the physical certificates to a financial institution that maintains securities accounts. We will publish notice of dividends paid as well as of the paying agent or agents whom we have appointed in the Federal Gazette.

According to our Articles of Association, the Annual Shareholders Meeting can declare a non-cash dividend instead of or in addition to a cash dividend.

Liquidation rights

In accordance with the German Stock Corporation Act, if Siemens AG is liquidated, any liquidation proceeds remaining after all of its liabilities have been discharged are distributed to its shareholders in proportion to the capital stock held by them.

Preemptive rights

Under the German Stock Corporation Act, our shareholders generally have preemptive rights. Preemptive rights are preferential rights to subscribe for issues of new shares in proportion to the number of shares that a shareholder already holds in the corporation's existing share capital. These rights do not apply to shares issued out of conditional capital or if a capital increase has occurred and our shareholders have waived their preemptive rights in connection with that increase. Preemptive rights also apply to securities other than shares if they may be converted into shares, such as options, securities with warrants, profit-sharing certificates and securities with dividend rights. Under German law, preemptive rights may be transferred separately from the underlying shares and may be traded on any of the German stock exchanges on which our shares are traded until a certain number of days prior to the last date on which the preemptive rights may be exercised.

The German Stock Corporation Act allows companies to exclude or restrict preemptive rights in connection with capital increases only in limited circumstances and only in the same shareholders' resolution that authorizes the capital increase. At least 75% of the share capital represented at the shareholders' meeting that approves a capital increase has to vote for exclusion or restriction of preemptive rights in connection with that increase. In addition to being approved by the shareholders, any exclusion or restriction of preemptive rights requires a justification which our Managing Board has to set forth in a report to our shareholders. The justification requires the Managing Board to show that our interest in excluding or restricting preemptive rights outweighs the shareholders' interest in exercising these rights.

If our Managing Board, with the approval of the Supervisory Board, increases our share capital for cash in accordance with our Articles of Association, it may, for example, with the approval of the Supervisory Board, exclude preemptive

rights:

to grant holders of conversion or option rights that we or any of our subsidiaries have issued, as protection against the effects of dilution, preemptive rights to subscribe for new Siemens shares to the extent they would be entitled to upon exercising such rights;

175

Table of Contents

if the issue price of the new shares is not significantly lower than their stock market price and the total of newly issued shares as defined under German law represent 10% or less of our capital stock existing at the time we issue the new shares; or

to make use of any fractional amounts after excluding shareholders' preemptive rights thereon.

In addition, our shareholders have waived their preemptive rights with respect to shares issued to employees, with respect to shares issued in exchange for an in-kind contribution out of authorized capital and with respect to treasury stock.

Additionally, our shareholders have waived their preemptive rights in certain cases with respect to the issuance of bonds with conversion rights or warrants attached:

if the issue price of the bonds is not significantly lower than their theoretical market price computed in accordance with generally accepted actuarial methods, and if the total number of shares to be issued on the basis of bond issues under the authorization as defined under German law in combination with other shares issued or sold during the effective period of the authorization does not exceed 10% of the capital stock existing at the time of the exercise of the authorization;

to the extent that the exclusion is necessary with regard to fractional amounts resulting from the subscription ratio;

to grant holders of conversion or option rights or conversion or option obligations on Siemens shares subscription rights as compensation against the effects of dilution to the extent to which they would be entitled upon exercising such rights; or

to the extent that the bonds were issued against non-cash contributions, in particular within the context of business combinations or when acquiring companies or interests therein.

Restrictions on voting rights or transfer of shares

Shares issued to employees worldwide under the stock scheme implemented since the beginning of fiscal 2009, in particular the Share Matching Plan, are freely transferable. However, participants are required to own and hold the shares issued to them under the rules of the Plan for a vesting period of about three years, during which the participants have to have been continuously employed by Siemens AG or another Siemens company, in order to receive one matching share free of charge for each three shares. The right to receive matching shares is forfeited, if the underlying shares are sold, transferred, hedged on, pledged or hypothecated in any way during the vesting period.

The von Siemens-Vermögensverwaltung GmbH (vSV) has, on a sustained basis, powers of attorney allowing it to exercise the voting rights for 9,313,438 shares on behalf of members of the Siemens family as of October 13, 2013, whereby aforementioned shares constitute a part of the overall number of shares held by members of the Siemens family. The vSV is a German limited liability company and party to an agreement with, among others, members of the Siemens family (family agreement). In order to bundle and represent their interests, the members of the Siemens family established a family partnership. This family partnership makes proposals to the vSV with respect to the

exercise of the voting rights at Shareholders Meetings of the Company, which are taken into account by the vSV when acting within the bounds of its professional discretion. Pursuant to the family agreement, the shares under powers of attorney are voted by the vSV collectively.

DISCLOSURE REQUIREMENT

Our Articles of Association do not require our shareholders to advise us when their holdings exceed specified thresholds. Under the German Securities Trading Act (Wertpapierhandelsgesetz), however, holders of the voting rights of an issuer whose home country is the Federal Republic of Germany and whose securities are admitted to trading on an organized market are required to notify the issuer in which they hold the securities and the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) of the level of their holdings whenever such holdings reach, exceed or fall below certain thresholds. These

Table of Contents

thresholds are set at 3%, 5%, 10%, 15%, 20%, 25%, 30%, 50% and 75% of the total voting rights issued. These thresholds may also be reached by mutually adding third party voting rights, if the holders of such voting rights agreed to permanently act in concert while exercising their voting rights.

In addition, anyone who holds, directly or indirectly, financial instruments entitling their holder by a legally binding agreement to unilaterally acquire voting shares issued by a company whose home country is the Federal Republic of Germany must, without undue delay, notify the issuer and simultaneously the BaFin if the thresholds mentioned above, with the exception of the 3% threshold, have been reached, exceeded or fallen below. Under Section 25a of the German Securities Trading Act any person who, directly or indirectly, holds financial instruments or other instruments not covered by the general provision set out above but merely enabling the holder or a third party, based on their terms, to acquire voting shares of an issuer whose home country is the Federal Republic of Germany, must, without undue delay, notify the issuer and simultaneously the BaFin, when reaching, exceeding or falling below 5%, 10%, 15%, 20%, 25%, 30%, 50% or 75%. Accordingly, such financial or other instruments do not need to entitle the holder to claim delivery of the shares. A notification requirement can be triggered if an acquisition of voting rights is only possible under the economics of the instrument, e.g., if the counterparty to such financial or other instrument can reduce or mitigate its risk by acquiring the relevant shares. Therefore, cash settled equity swaps and contracts for the payment of price differences are subject to the notification requirement.

In making the threshold calculations, rules on the aggregation of various positions in voting rights, financial instruments and other instruments have to be observed.

The issuer must publish the notifications received without undue delay, but no later than three trading days following receipt of the notification. A domestic issuer must also publish the total number of voting rights at the end of each calendar month during which the number of voting rights has increased or decreased. The calculation of the percentage of voting rights must be based on the latest publication of the total number of voting rights in the issuer. Voting rights attached to shares held by or attributed to a notifying party are not valid during the period for which the notification requirements have not been met. To the extent the percentage of voting rights is concerned, this period shall be extended by six months if the notification requirements have been breached intentionally or as a result of gross negligence. This extension shall not apply if the actual percentage of voting rights is less than 10% higher or lower than the percentage of voting rights indicated in the previously submitted incorrect notification and if no notification is being omitted that relates to any threshold mentioned above being reached, exceeded or fallen below.

Holders of voting rights are required to notify the issuer within 20 trading days after reaching or exceeding the 10% threshold about their intentions with respect to the voting rights and the origin of the funds used for the acquisition of voting rights.

In addition, the German Takeover Act (Wertpapiererwerbs- und Übernahmegesetz) requires the publication, without undue delay, but within seven days at latest, of the acquisition of control, which is defined in the German Takeover Act as holding of at least 30% of the voting rights in a target company.

The German Securities Trading Act requires directors to report their dealings in an issuer's shares. Specifically, persons with managerial responsibilities in a publicly-traded issuer must notify both the issuer and the BaFin about their transactions in the issuer's shares and derivatives or other financial instruments linked to those shares. The same obligation applies to persons closely associated with these managers, such as spouses, dependent children, or other relatives sharing the same household. Similarly, the reporting obligation also applies to legal entities, trusts and partnerships that are managed or controlled by any such manager or associated person, or that are set up for the benefit of such a person, or whose economic interests are substantially equivalent to those of such person. Nevertheless, there is no notification obligation until the total amount of transactions of a covered manager and all of his or her associated

persons reaches at least 5,000 during any calendar year. Such information can be found on our website at www.siemens.com/directors-dealings. For further information about such transactions see also Item 6: Directors, senior management and employees Share ownership.

Table of Contents

REPURCHASE OF OUR OWN SHARES

We may not acquire our own shares unless so authorized by a resolution duly adopted by our shareholders at a general meeting or in other very limited circumstances set forth in the German Stock Corporation Act.

The German Stock Corporation Act generally limits share repurchases to 10% of our share capital. In addition, any shareholders' resolution that authorizes us to repurchase shares may be in effect for a period no longer than 5 years. The resolution currently in effect is valid until January 24, 2016. Besides selling them over the stock exchange or through a public sales offer to all shareholders, the Managing Board is authorized to also use Siemens shares repurchased on the basis of this or any previously given authorization as follows: such Siemens shares may be (1) retired; (2) offered for purchase to individuals currently or formerly employed by the Company or any of its consolidated subsidiaries as well as to board members of any of the Company's consolidated subsidiaries, or awarded and/or transferred to such individuals with a vesting period of at least two years, provided that the employment relationship or board membership exists at the time of the offer or award commitment; (3) offered and transferred, with the approval of the Supervisory Board, to third parties against non-cash contributions, particularly in connection with business combinations or the acquisition of companies, businesses, parts of businesses or interests therein; (4) sold, with the approval of the Supervisory Board, to third parties against payment in cash if the price at which such Siemens shares are sold is not significantly lower than the market price of Siemens stock at the time of selling, or (5) used to meet obligations or rights to acquire Siemens shares arising from, or in connection with, convertible bonds or warrant bonds issued by the Company or any of its consolidated subsidiaries. Furthermore, the Supervisory Board is authorized to use shares acquired on the basis of this or any previously given authorization to meet obligations or rights to acquire Siemens shares that were or will be agreed with members of the Managing Board within the framework of rules governing Managing Board compensation. In particular, repurchased shares may be offered for acquisition, or awarded and/or transferred, subject to a restriction period, by the Supervisory Board to the members of the Managing Board, provided that Managing Board membership existed at the time of the offer or award commitment.

The Managing Board is additionally authorized, with the approval of the Supervisory Board, to complete the repurchase of the Company's own shares in accordance with the authorization described above, by using certain equity derivatives, such as put and call options, forward purchases and any combination of these derivatives. The term of the equity derivative must be chosen in a way that the repurchase of the Company's own shares upon exercise of the equity derivative will take place no later than January 24, 2016.

JURISDICTION

Our Articles of Association provide that by subscription to or by otherwise acquiring shares or interim certificates for shares, a shareholder submits to the jurisdiction of the courts of our legal domicile in all disputes with us or our governing bodies.

MATERIAL CONTRACTS

OSRAM SPIN-OFF AND TRANSFER AGREEMENT

On November 28, 2012, Siemens AG as the transferring entity and OSRAM Licht AG as the receiving entity entered into a Spin-off and Transfer Agreement, pursuant to which Siemens AG transferred all company shares in OSRAM Beteiligungen GmbH, whose sole asset was an 80.5% stake in OSRAM GmbH (the remaining 19.5% of the shares in OSRAM GmbH were held by OSRAM Licht AG) by way of a spin-off (Abspaltung) pursuant to Section 123 (2) No. 1 of the German Transformation Act (Umwandlungsgesetz) to OSRAM Licht AG. The shareholders' meetings

of Siemens AG and OSRAM Licht AG approved the Spin-off and Transfer Agreement on January 23, 2013 and January 21, 2013, respectively. The spin-off, which took retroactive economic effect as of October 1, 2012, became legally effective upon its registration with the competent commercial register (Handelsregister) on July 5, 2013. In order to carry out the spin-off, OSRAM Licht AG increased its capital stock by 84,274,967, from 20,414,433 to 104,689,400, by issuing 84,274,967 new registered shares with no par value, each representing a notional value of the capital stock of 1.00. The new shares in OSRAM Licht AG were granted, free of charge, to the shareholders of Siemens AG at the ratio of one

Table of Contents

share in OSRAM Licht AG for every ten shares in Siemens AG. The Spin-off and Transfer Agreement provided for the listing of the shares in OSRAM Licht AG on the Frankfurt and Munich Stock Exchanges after the spin-off took legal effect. In addition, the agreement contained other provisions customary for spin-off agreements relating to, for example, the continuation of the book values, maintenance of proper management of the spun-off assets, assumption of liability, the exclusion of warranties, termination rights and the bearing of costs as well as provisions relating to, among other matters, the adoption of certain corporate resolutions, management benefits and compensation and the treatment of employees.

EXCHANGE CONTROLS

At present, Germany does not restrict the movement of capital between Germany and other countries or individuals except certain persons and entities associated with Osama bin Laden, the Al-Qaida network and the Taliban as well as certain other individuals, products and countries subject to embargoes in accordance with German law and applicable resolutions adopted by the United Nations and the EU.

For statistical purposes, with certain exceptions, every German resident (e.g., corporations, partnerships, individuals) must report to the German Central Bank any payment received from or made to a non-resident, or any payment made to or received from a resident on behalf of a non-resident, if the payment exceeds 12,500 (or the equivalent in a foreign currency). Additionally, German residents, except for individuals and certain others, must report to the German Central Bank any claims against, or liabilities payable to, a non-resident if the claims exceed an aggregate of 5 million (or the equivalent in a foreign currency) at the end of any calendar month. In this case all items (i.e., also items with values below 5 million) have to be reported. Residents having to report such claims or liabilities also have to report their claims against, or liabilities to, non-residents resulting from derivatives as of end of the relevant quarter if their claims against, or liabilities to, a non-resident exceed more than 500 million as of that date. In addition, residents are required to report annually to the German Central Bank any stakes of 10% or more they hold, or which are being attributed to them, in the equity or voting power of non-resident companies with a balance sheet total of more than 3 million, or assets of non-resident branch offices or permanent establishments if their value exceeds 3 million, and certain information relating to the assets and liabilities of such non-resident companies or branch offices. Companies residing in Germany with a balance sheet total in excess of 3 million must report annually to the German Central Bank any stake of 10% or more in them held, or being attributed to, a non-resident, and specific information relating to their assets and liabilities. Resident branch offices or permanent establishments of non-residents must report annually to the German Central Bank if the value of their assets exceeds 3 million.

TAXATION

GERMAN TAXATION

The following discussion is a summary of the material German tax consequences for beneficial owners of Siemens shares or ADSs (i) who are non-German residents for German income tax purposes (i.e., generally persons whose residence, habitual abode (gewöhnlicher Aufenthalt), statutory seat or place of effective management and control is not located in Germany) and (ii) whose shares or ADSs do not form part of the business property of a permanent establishment or a fixed base in Germany, and are not held with a German paying agent (including a German branch of a non-German financial services institution). Throughout this section we refer to these owners as Non-German holders.

This summary is based on recently amended and currently applicable German tax laws and typical tax treaties to which Germany is a party as they are in effect on the date hereof and is subject to changes in German tax laws or such treaties. On September 22, 2013, a new German Parliament was elected. Possible changes to the taxation are in

discussion, but have not yet been enacted nor described in this chapter. The following discussion does not purport to be a comprehensive discussion of all German tax consequences that may be relevant for Non-German holders. Investors should consult their tax advisor regarding the German tax consequences of the purchase, ownership and disposition of Siemens shares or ADSs and the procedures to follow to obtain a refund of German taxes withheld from dividends.

Table of Contents

Taxation of the Company in Germany

German corporations are currently subject to a corporate income tax rate of 15%. Moreover, a solidarity surcharge of 5.5% on the net assessed corporate income tax is levied, so that the corporate income tax and the solidarity surcharge, in the aggregate, amount to a tax rate of 15.825%.

In addition, German corporations are subject to profit-related trade tax on income, the exact amount of which depends on the municipality in which the corporation maintains its business establishment(s). Trade tax is not a deductible item in calculating the corporation's tax base for corporate income tax and trade tax purposes.

Imposition of withholding tax

Dividend distributions are subject to a current withholding tax of 25%. Moreover, a solidarity surcharge of 5.5% on the withholding tax is levied, resulting in a total withholding tax rate on dividends of 26.375%. Corporate Non-German holders will generally be entitled to a refund in the amount of two-fifths of the withholding tax (including solidarity surcharge). This does not preclude a further reduction of withholding tax, if any, available under a relevant tax treaty.

For many Non-German holders (e.g. U.S. holders), the withholding tax rate is currently reduced under applicable income tax treaties. Under most income tax treaties to which Germany is a party, the rate of dividend withholding tax is reduced to 15%. To reduce the withholding to the applicable treaty rate of 15%, a Non-German holder must apply for a refund of withholding taxes paid. The application for refund must be filed within four years following the end of the calendar year in which the dividend distribution was effected with the German Federal Tax Office (Bundeszentralamt für Steuern, D-53221 Bonn, Germany; <http://www.bzst.bund.de>). The relevant forms can be obtained from the German Federal Tax Office or from German embassies and consulates. Special rules apply to U.S. holders (as defined below).

Refund procedure for U.S. holders

Under the current income tax convention between the United States and Germany (the Treaty), a partial refund of the 25% withholding tax equal to 10% of the gross amount of the dividend and a full refund of the solidarity surcharge can be obtained by a U.S. holder.

To claim the refund of amounts withheld in excess of the Treaty rate, a U.S. holder must submit (either individually or, as described below, through the Data Medium Procedure participant) a claim for refund to the German tax authorities. Individual claims for refunds may be made on a special German form which must be filed with the German Federal Tax Office (Bundeszentralamt für Steuern, D-53221 Bonn, Germany). Copies of this form may be obtained from the German Federal Tax Office at the same address or from the Embassy of the Federal Republic of Germany, 2300 M Street, N.W., Washington, D.C. 20037, or can be downloaded from the homepage of the German Federal Tax Office (<http://www.bzst.bund.de>). Claims must be filed within a four-year period from the end of the calendar year in which the dividend was received.

As part of the individual refund claim, an eligible U.S. holder must submit to the German tax authorities the original bank voucher (or a certified copy thereof) issued by the paying agent documenting the tax withheld, and an official certification on Internal Revenue Service (IRS) Form 6166. This certification can be obtained from the Internal Revenue Service by filing a request for certification (generally on an IRS Form 8802, which will not be processed unless a user fee is paid) with the Internal Revenue Service, P.O. Box 71052, Philadelphia, PA 19176-6052. U.S. holders should consult their own tax advisors regarding how to obtain an IRS Form 6166.

If the U.S. holder's bank or broker elects to participate in the Data Medium Procedure, an IT-supported quick-refund procedure (the DMP), such bank or broker (the DMP Participant) will perform administrative functions necessary to claim the Treaty refund for the beneficiaries. The refund beneficiaries must confirm to the DMP Participant that they meet the conditions of the Treaty provisions and that they authorize the DMP Participant to file applications and receive notices and payments on their behalf. Further each refund beneficiary must confirm that (i) it is the beneficial owner of the dividends received; (ii) it is resident in the U.S. in the

Table of Contents

meaning of the Treaty; (iii) it does not have its domicile, residence or place of management in Germany; (iv) the dividends received do not form part of a permanent establishment or fixed base in Germany; and (v) it commits, as it participates in the DMP, not to claim separately for refund.

The beneficiaries also must provide an IRS Form 6166 certification with the DMP Participant (see above, regarding how to obtain a Form 6166). The DMP Participant is required to keep these documents in its files and prepare and file a combined claim for refund with the German tax authorities by electronic media. The combined claim provides evidence of a U.S. holder's personal data including its U.S. Tax Identification Number.

The German tax authorities reserve the right to audit the entitlement to tax refunds for several years following their payment pursuant to the Treaty in individual cases. The DMP Participant must assist with the audit by providing the necessary details or by forwarding the queries to the respective refund beneficiaries.

The German tax authorities will issue refunds denominated in euros. In the case of shares held through banks or brokers participating in the Depository, the refunds will be issued to the Depository, which will convert the refunds to dollars. The resulting amounts will be paid to banks or brokers for the account of the U.S. holders.

Capital gains

Under German domestic tax law as currently in effect, capital gains earned by a Non-German holder from the sale or other disposition of shares or ADSs are subject to tax in Germany if such Non-German holder has held, directly or indirectly, shares or ADSs representing 1% or more of the registered share capital of the company at any time during the five-year period immediately preceding the disposition. Based on the current provisions, capital gains generally are not taxable if the above mentioned threshold is not exceeded and certain further conditions are met.

U.S. holders that qualify for benefits as U.S. residents under the Treaty are exempt from taxation in Germany on capital gains derived from the sale or disposition of shares or ADSs.

Shareholders whose shares are held in an account with a German bank or financial services institution (including a German branch of a non-German bank or financial services institution) are urged to consult their own advisors. This summary does not discuss their particular tax situation.

Inheritance and gift tax

Under German law, in principle, German gift or inheritance tax will be imposed only on transfers by a holder of shares or ADSs at death or by way of gift (as defined by the German Inheritance Tax Law), if

- (1) the decedent or donor, or the heir, donee or other transferee has his residence or habitual abode (gewöhnlicher Aufenthalt) in Germany at the time of the transfer;
- (2) the shares or ADSs are part of the business property of a permanent establishment in Germany;
- (3) the decedent or donor, or the heir, donee or other transferee is a citizen of Germany, is not a resident in Germany, but has not been continuously outside of Germany for a period of more than five years; or

- (4) the shares or ADSs subject to such transfer form part of a portfolio that represents 10% or more of the registered share capital of the company and has been held, directly or indirectly, by the decedent or donor, respectively, actually or constructively together with related parties.

The right of the German government to impose inheritance or gift tax on a Non-German holder may be limited by an applicable estate tax treaty (such as the U.S.-German Inheritances and Gifts Tax Treaty of December 3, 1980).

Other taxes

No German transfer, stamp or similar taxes apply to the purchase, sale or other disposition of shares or ADSs by a Non-German holder. Currently, net worth tax is not levied in Germany.

Table of Contents

U.S. FEDERAL INCOME TAXATION

This section describes the material U.S. federal income tax consequences of owning Siemens shares or ADSs. It applies to U.S. holders (as defined below) who hold shares or ADSs as capital assets for U.S. federal income tax purposes and are eligible for benefits as a U.S. resident under the Treaty with respect to an investment in the shares or ADSs. This section does not address all material U.S. federal income tax consequences of owning shares or ADSs. It does not address special classes of holders, some of which may be subject to other rules, including:

tax-exempt entities;

life insurance companies;

dealers in securities;

traders in securities that elect a mark-to-market method of accounting for securities holdings;

investors liable for alternative minimum tax;

partnerships, or other entities classified as partnerships, for U.S. federal income tax purposes;

investors that actually or constructively own 10% or more of Siemens voting stock;

investors that hold shares or ADSs as part of a straddle or a hedging or conversion transaction;

investors that purchase or sell shares or ADSs as part of a wash sale for U.S. federal income tax purposes; or

investors whose functional currency is not the U.S. dollar.

This section is based on the tax laws of the United States, including the Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed Treasury regulations, and published rulings and court decisions, as well as on the Treaty, all as currently in effect. These laws are subject to change, possibly on a retroactive basis. In addition, this section is based in part upon the representations of JPMorgan, as depositary, and the assumption that each obligation in the deposit agreement and any related agreement will be performed in accordance with its terms.

A U.S. holder is a beneficial owner of shares or ADSs and, for U.S. federal income tax purposes, a citizen or resident of the United States, a domestic corporation or otherwise subject to U.S. federal income taxation on a net income basis in respect of shares or ADSs.

This discussion addresses only U.S. federal income taxation. U.S. holders should consult their own tax advisor regarding the United States federal, state, local and other tax consequences of owning and disposing of shares and ADSs in their particular circumstances. In particular, U.S. holders should confirm that they are eligible as a U.S. resident for benefits under the Treaty in respect of their investment in the shares or ADSs.

A U.S. holder of the ADSs generally will be treated for U.S. federal income tax purposes as the beneficial owner of the shares represented by those ADSs, in which case no gain or loss will be recognized upon an exchange of the shares for ADSs or an exchange of the ADSs for shares.

Taxation of dividends

U.S. holders must include the gross amount of dividends paid on the shares or ADSs, without reduction for German withholding tax, in ordinary income as foreign source dividend income on the date that they receive them (or, in the case of ADSs, on the date that JPMorgan receives them), translating dividends paid in euro into U.S. dollars using the exchange rate in effect on such date, regardless of whether the payment in fact is converted into U.S. dollars. Based on the health care reform law (the Medicare tax), for tax years beginning after December 31, 2012, certain U.S. holders who are individuals, estates or trusts must pay a 3.8% tax on the lesser of (i) the U.S. holder's net investment income for the relevant taxable year and (ii) the excess of the U.S. holder's modified adjusted gross income for taxable year over a certain threshold. U.S. holders who are individuals, estates or trusts are urged to consult their tax advisor regarding the applicability of the Medicare tax to their income and gains in respect of their investment in shares or ADSs.

Table of Contents

In the case of non-corporate U.S. holders, the U.S. dollar amount of dividends paid to them in taxable years beginning on or after January 1, 2013 with respect to the shares or ADSs will be subject to taxation at a maximum rate of 20% if the dividends are qualified dividends, provided that the shares or ADSs are held for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date and meet other holding period requirements. Dividends paid on the shares or ADSs generally will be treated as qualified dividends.

German tax withheld from dividends will be treated, up to the 15% rate provided under the Treaty, as a foreign income tax that, subject to generally applicable limitations under U.S. tax law, is eligible for credit against the U.S. federal income tax liability of U.S. holders or, if they have elected to deduct such taxes, may be deducted in computing taxable income. Dividends will be income from sources outside the United States. Dividends will, depending on the respective circumstances, be either passive or general income for purposes of computing the foreign tax credit allowable to a U.S. holder. The rules governing the foreign tax credit are complex. Each U.S. holder is urged to consult its own tax advisor concerning whether, and to what extent, a foreign tax credit will be available under the Treaty with respect to dividends received from us. To the extent a refund of the tax withheld is available to a U.S. holder under the Treaty, the amount of tax withheld that is refundable will not be eligible for credit against the U.S. federal income tax liability. Fluctuations in the dollar-euro exchange rate between the date that a U.S. holder includes a dividend in taxable income and the date when the related refund of German withholding tax is received may give rise to foreign currency gain or loss, which generally is treated as ordinary income or loss for U.S. federal income tax purposes. Item 10: Additional information Taxation German taxation Refund procedure for U.S. holders above for the procedures for obtaining a tax refund.

Taxation of sales or other taxable dispositions

Sales or other taxable dispositions of shares or ADSs by U.S. holders generally will give rise to U.S. source capital gain or loss equal to the difference between the U.S. dollar value of the amount realized on the disposition and the U.S. holder's U.S. dollar basis in the shares or ADSs. Any such capital gain or loss generally will be long-term capital gain or loss, subject to taxation at reduced rates for non-corporate taxpayers, if the shares or ADSs were held for more than one year. The deductibility of capital losses is subject to limitations.

PFIC Rules

Based on the audited financial statements and relevant market and shareholder data, we believe that Siemens is not treated as a PFIC for U.S. federal income tax purposes with respect to the 2012 taxable year. In addition, based on our audited financial statements and our current expectations regarding the value and nature of our assets, the sources and nature of the income, and relevant market and shareholder data, we do not anticipate becoming a PFIC for our 2013 taxable year. However, as PFIC status is a factual matter that must be determined annually at the close of each taxable year, there can be no certainty as to our actual PFIC status in any particular year until the close of the taxable year in question.

Information reporting and backup withholding

Dividend payments made to holders and proceeds paid from the sale, exchange, redemption or disposal of shares or ADSs may be subject to information reporting to the Internal Revenue Service. Such payments may be subject to backup withholding taxes unless the holder (i) is a corporation or other exempt recipient or (ii) provides a taxpayer identification number on a properly completed IRS Form W-9 and certifies that no loss of exemption from backup withholding has occurred. Holders that are not U.S. persons generally are not subject to information reporting or backup withholding. However, such a holder may be required to provide a certification of its non-U.S. status in connection with payments received within the United States or through a U.S.-related financial intermediary.

Backup withholding is not an additional tax. Amounts withheld as backup withholding may be credited against a holder's U.S. federal income tax liability. A holder may obtain a refund of any excess amounts withheld under the backup withholding rules by filing the appropriate claim for refund with the Internal Revenue Service and furnishing any required information.

DOCUMENTS ON DISPLAY

We are subject to the informational requirements of the Securities Exchange Act of 1934, as amended. In accordance with these requirements, we file reports and other information with the Securities and Exchange Commission. These materials, including this annual report and the exhibits thereto, may be inspected and copied at the Commission's Conventional Reading Room at 100 F Street, N.E., Room 1580, Washington, D.C. 20549. Copies of the materials may be obtained from the Conventional Reading Room of the Commission at 100 F Street, N.E., Washington, D.C. 20549 at prescribed rates. The public may obtain information on the operation of the Commission's Conventional Reading Room by calling the Commission in the United States at 1-800-SEC-0330. Our filings, including this annual report, are also available on the Commission's website at www.sec.gov. In addition, material filed by us can be inspected at the offices of the New York Stock Exchange at 20 Broad Street, New York, New York 10005 and is also available on the New York Stock Exchange's website at www.nyse.com.

ITEM 11: QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

For quantitative and qualitative disclosures about market risks see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 32.

ITEM 12: DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

AMERICAN DEPOSITARY SHARES

The ADSs of Siemens Aktiengesellschaft, each representing one of our common shares, trade on the New York Stock Exchange under the symbol "SI". The ADSs are evidenced by American Depositary Receipts, or ADRs, issued by Deutsche Bank Trust Company Americas ("DBTCA") as depositary under the deposit agreement, as amended in February 2012, among Siemens Aktiengesellschaft, DBTCA and the holders and beneficial owners from time to time of ADRs issued under the deposit agreement ("Deposit Agreement").

The following is a summary of the fee provisions of the Deposit Agreement. For more complete information regarding ADRs, you should read the entire Deposit Agreement, as amended, and the form of ADR.

Persons depositing or withdrawing shares in exchange for ADSs or holding ADSs, as the case may be, must pay:

US\$5.00 for each 100 ADSs (or portion thereof) issued, delivered, reduced, cancelled or surrendered (as the case may be)

For:

Issuances of ADSs, including, without limitation, issuances against deposits of shares, in respect of distributions of shares, in respect of rights distributions, in respect of other distributions, pursuant to a stock dividend or stock split, or

pursuant to a merger, exchange of securities or any other transaction or event affecting the ADSs or deposited securities

Withdrawal of deposited securities upon surrender of ADSs; cancellation or reduction of ADSs for any other reason

Transfers on the register

US\$1.50 per ADR

Table of Contents

Persons depositing or withdrawing shares in exchange for ADSs or holding ADSs, as the case may be, must pay:

A fee equal to the fee which would have been charged by the depository if the relevant securities distributed had been shares and the shares had been deposited for issuance of ADSs

An aggregate fee of US\$0.04 per ADS (or portion thereof) per calendar year

Fees and expenses incurred by the depository

For:

Distributions or sales of securities

Services performed by the depository in administering the ADRs

Expenses incurred by the depository in delivering deposited securities or otherwise in connection with the depository's or its custodian's compliance with applicable law, rules or regulations

Cable and facsimile transmission and delivery charges incurred at the request of persons depositing, or holders of ADSs delivering shares, ADRs or deposited securities

Transfer or registration fees for the registration or transfer of deposited securities on any applicable register

Converting foreign currency to U.S. dollars

Stock transfer or other taxes and other governmental charges

As necessary

Any other charge payable by the depository, any of its agents (including the custodian), or the agents of the depository's agents in connection with the servicing of the shares or other deposited securities

As necessary

The fees and charges described above may at any time and from time to time be changed by agreement between the depository and Siemens with notice thereof provided to holders of ADSs in the manner required by the form of ADR.

The depository may sell (by public or private sale) sufficient securities and property received in respect of share distributions, rights and other distributions prior to their deposit to pay the applicable charges. The depository may deduct its expenses for converting foreign currency to U.S. dollars from such foreign currency. The depository has sole discretion to decide whether the charges mentioned above for transfers on the register (US\$1.50 per ADR), distributions or sales of securities (calculated as if the securities were shares), administration fees (US\$0.04 per ADS per year), and any other charge payable by the depository, any of its agents (including the custodian), or the agents of the depository's agents in connection with the servicing of the shares or other deposited securities shall be billed to the relevant holder or deducted from one or more cash distributions.

DIRECT PAYMENTS BY THE DEPOSITORY TO SIEMENS

DBTCA has agreed to make certain annual reimbursements to us, which we will use toward investor relations expenses and other expenses (including accounting and audit costs) related to the maintenance of the ADR program. In fiscal 2013, DBTCA reimbursed us an amount of US\$ 2.2 million (1.7 million).

Table of Contents

INDIRECT PAYMENTS AND WAIVED FEES

As part of its service as depository, DBTCA has agreed to arrange for the local custody of the underlying shares and absorb the costs of servicing the same; to waive the costs associated with servicing and maintenance of registered ADR holder accounts, including distributions of ADR holder communications; to waive the cost associated with administrative and reporting services under the ADR program, such costs being valued at US\$100,000 per year; and to waive the access charges to www.adr.db.com, such costs being valued at US\$15,000 per year.

ITEM 15: CONTROLS AND PROCEDURES

DISCLOSURE CONTROLS AND PROCEDURES

As of September 30, 2013, Siemens performed an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures. The evaluation was performed with the participation of key corporate senior management and senior management of each business sector under the supervision of the CEO, Joe Kaeser, and CFO, Dr. Ralf P. Thomas. The Company's disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported in a timely manner and accumulated and communicated to management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure. The Company's management, including the CEO and CFO, concluded that, as of September 30, 2013, Siemens' disclosure controls and procedures were effective.

MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Siemens is responsible for establishing and maintaining adequate internal control over financial reporting. The internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with applicable accounting principles and includes those policies and procedures that:

pertain to the maintenance of records that in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

No system of internal control over financial reporting, including one determined to be effective, may prevent or detect all misstatements. It can provide only reasonable assurance regarding financial statement preparation and presentation. Also, projections of the results of any evaluation of the effectiveness of internal control over financial reporting into future periods are subject to the inherent risk that the relevant controls may become inadequate due to changes in circumstances or that the degree of compliance with the underlying policies or procedures may deteriorate.

Siemens' management assessed the effectiveness of the Company's internal control over financial reporting as of September 30, 2013. In making this assessment, it used the criteria set forth in the Committee of Sponsoring Organizations of the Treadway Commission (COSO)'s publication Internal Control Integrated Framework (1992 framework). As a result of this evaluation, management has concluded that the Company's internal control over financial reporting was effective as of September 30, 2013.

Table of Contents

The effectiveness of the Company's internal control over financial reporting as of September 30, 2013 has been audited by Ernst & Young GmbH Wirtschaftsprüfungsgesellschaft (EY), an independent registered public accounting firm, as stated in their report, which is included below.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Supervisory Board of Siemens Aktiengesellschaft:

We have audited Siemens Aktiengesellschaft and subsidiaries' internal control over financial reporting as of September 30, 2013, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) (the COSO criteria). Siemens Aktiengesellschaft's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Siemens Aktiengesellschaft and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of September 30, 2013, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial position of Siemens Aktiengesellschaft and subsidiaries as of September 30, 2013 and 2012, and the related consolidated statements of income, comprehensive income, cash flow and changes in equity for each of the three years in the period ended September 30, 2013, and our report dated November 20, 2013 expressed an unqualified opinion thereon.

/s/ Ernst & Young GmbH

Wirtschaftsprüfungsgesellschaft

Munich, Germany

November 20, 2013

Table of Contents**CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING**

There were no changes in the Company's internal control over financial reporting during fiscal 2013 that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

ITEM 16A: AUDIT COMMITTEE FINANCIAL EXPERT

Our Supervisory Board has determined that two members of the Company's Audit Committee, Dr. Gerhard Cromme and Dr. Hans Michael Gaul, are financial experts. Dr. Cromme and Dr. Gaul are independent, as that term is defined in Rule 10A-3 under the Exchange Act for purposes of the listing standards of the New York Stock Exchange applicable to Siemens.

ITEM 16B: CODE OF ETHICS

The Company's Code of Ethics for Financial Matters (Code of Ethics) applies to the principal officers of Siemens AG and its subsidiaries, including the members of the Managing Board of Siemens AG, the Corporate Vice President and Controller of Siemens AG, the CEOs, CFOs and Heads of Accounting & Controlling at various levels within the Siemens organizational structure and certain mandatory internal certifiers, as defined in the Code of Ethics, who are part of the Siemens Sarbanes-Oxley Act section 302 certification process. A copy of the Code of Ethics is available on the Company's website at www.siemens.com/investor/en/corporate_governance/bylaws.htm.

ITEM 16C: PRINCIPAL ACCOUNTANT FEES AND SERVICES

Fees related to professional services rendered by the Company's principal accountant, EY, for fiscal 2013 and 2012 were as follows:

Type of fees	Year ended	
	2013	2012
	(in millions of €)	
Audit fees	45.6	44.2
Audit-related fees	10.2	10.6
Tax fees	0.1	0.4
All other services	0.4	
Total	56.3	55.2

Audit fees and audit-related fees consist of fees associated with the services pre-approved by the Audit Committee described below. Tax fees and all other services require specific pre-approval by the Audit Committee. The tax fees primarily include fees for support services provided in connection with assistance for competent authority procedures according to Article 25 of the OECD Model Tax Convention regarding transfer pricing issues as well as for tax compliance advice on transition services from acquisitions. All other services consist of advisory services provided by EY for a transitional period until the end of fiscal 2013 after they acquired one of Siemens' IT-suppliers in the area of

supply chain management in June 2013 and an attestation service not related to the financial statements.

In fiscal 2013, 50% of the total fees related to Ernst & Young GmbH Wirtschaftsprüfungsgesellschaft, Germany.

AUDIT COMMITTEE PRE-APPROVAL POLICIES

In accordance with German law, Siemens' independent auditor is appointed by the Annual Shareholders Meeting based on a recommendation of the Supervisory Board. The Audit Committee of the Supervisory Board prepares the board's recommendation on the election of the Company's independent auditor. Subsequent to the auditor's appointment, the Audit Committee engages the auditor and in its sole authority approves the terms and scope of the audit and all audit engagement fees. In addition, it monitors the auditor's independence.

Table of Contents

In order to ensure the integrity of independent audits, Siemens' Audit Committee has established a policy to approve all audit and permissible audit-related services provided by our independent auditor prior to the auditor's engagement. As part of this approval process, the Audit Committee adopted pre-approval policies and procedures pursuant to which the Audit Committee annually pre-approves certain types of services to be performed by Siemens' independent auditor. Under the policies, the Company's independent auditor is not allowed to perform any non-audit services which either (1) may impair the auditor's independence under applicable German regulations or the rules and regulations of the International Ethics Standards Board for Accountants (IESBA), the International Federation of Accountants (IFAC), the U.S. Securities and Exchange Commission (SEC) or the Public Company Accounting Oversight Board (PCAOB) or (2) which can be more effectively or economically provided by another provider, even if permissible under the relevant independence rules. Furthermore, the Audit Committee has limited the sum total of all fees that may be incurred during a fiscal year for non-audit services, including audit-related services, tax services and other services, to 30% of the audit fees agreed upon for the respective fiscal year.

The Audit Committee has generally pre-approved the performance by EY of audit and audit-related services, including among others the following:

AUDIT SERVICES

Annual audit of Siemens' Consolidated Financial Statements and its internal control over financial reporting;

Quarterly review of Siemens' interim consolidated financial statements;

Audit and review services that are required by statute or regulation, including statutory audits of financial statements of Siemens AG and of its subsidiaries under the rules of their respective countries.

Opening balance sheet audits in connection with acquisitions, including audits with regard to the allocation of purchase prices

AUDIT-RELATED SERVICES

Voluntary local GAAP audits;

Due diligence relating to actual or contemplated acquisitions and carve-outs, including consultation in accounting matters;

Post-closing audits;

Carve-out audits and attestation services in the context of carve-outs;

Certification services required by regulation, law or contractual agreement;

Consultation concerning financial accounting and reporting standards based on the auditor's knowledge of Siemens-specific circumstances, including:

Accounting advice relating to actual or contemplated transactions or events;

Advice on the introduction and review of new or revised accounting guidelines and requirements;

Training regarding accounting-related topics;

Comfort letters;

Employee benefit plan audits;

ISAE 3402 / SSAE 16 reports;

Attestation services subject to regulatory requirements, including regulatory advice;

Attestation and audits in connection with the European Community Directive on Waste Electrical and Electronic Equipment;

Attestation of compliance with provisions or calculations required by agreements;

Attest services in accordance with applicable standards, other than audit services required by statute or other regulation.

Table of Contents

Services that are not generally pre-approved as audit or audit-related services require specific pre-approval by the Audit Committee. An approval may not be granted if the service falls into a category of services not permitted by current law or if it is inconsistent with ensuring the auditor's independence, as expressed in the four principles promulgated by the U.S. Securities and Exchange Commission: (1) an auditor may not act as management or an employee of the audit client; (2) an auditor may not audit his or her own work; (3) an auditor may not serve in an advocacy role for his or her client; and (4) an auditor may not provide services creating a mutual or conflicting interest between itself and the audit client.

While non-audit-related services are not prohibited by law, except for certain types of non-audit services enumerated in the SEC's rules, the Audit Committee has decided as a matter of policy not to engage the principal accountant to provide non-audit-related services unless there is a compelling advantage to the Company in using the principal accountant and it can clearly be demonstrated that there is no impairment of independence.

(1) Average price paid per share includes transaction costs incurred with the purchase of shares.

Table of Contents

- (2) On August 2, 2012, Siemens announced a share buyback program adopted by the Managing Board and approved by the Supervisory Board. The share buyback program provided for a repurchase of up to 3 billion of shares to be executed by December 30, 2012 at the latest. Share repurchases under the buyback program serve the purposes of cancelling and reducing capital stock, issuing shares to employees, board members of affiliated companies and members of the Managing Board as well as servicing convertible bonds and warrant bonds. As of September 30, 2012, shares amounting to 1,767 million were repurchased. In fiscal 2013 another tranche of shares amounting to 1,152 million were repurchased. As a result of the completion of the share buyback program, the total number of own shares repurchased between August 3, 2012 and November 7, 2012 amounted to 37,949,286. This corresponds to 4.31% of the current share capital. The purchase price was in average 76.92 per share; the total consideration paid for the shares amounts to 2.9 billion.
- (3) Under the currently effective resolution of the Annual Shareholders Meeting on January 25, 2011, which took effect on March 1, 2011 and remains in force until January 24, 2016, Siemens may repurchase up to a limit of 10% of its capital stock. Due to repurchases in current and previous years, the remaining maximum number of shares that may yet be purchased under the resolution amounts to 47,746,680 shares as of September 30, 2013. The table above omits Siemens shares purchased by pension and other postretirement benefit plans sponsored by Siemens which purchased those shares independently of Siemens. In fiscal 2013, the principal Siemens-sponsored pension and other postretirement benefit plans purchased 830,219 shares of Siemens AG common stock at an average price of 79.63 per share.

For further information on shares held in treasury see Item 18: Financial Statements Notes to Consolidated Financial Statements Note 26.

ITEM 16F: CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT

Not applicable.

ITEM 16G: CORPORATE GOVERNANCE

SIGNIFICANT DIFFERENCES BETWEEN SIEMENS' CORPORATE GOVERNANCE AND NYSE CORPORATE GOVERNANCE STANDARDS

Companies listed on the NYSE are subject to the Corporate Governance Standards of Section 303A (NYSE Standards) of the NYSE Listed Company Manual. Under the NYSE Standards, Siemens AG, as a foreign private issuer, is permitted to follow its home-country corporate governance practices in lieu of the NYSE Standards, except that it must comply with the NYSE Standards in having an audit committee whose members are independent within the meaning of the SOA as well as with certain NYSE notification obligations. In addition, the NYSE Standards require that foreign private issuers disclose any significant differences between their own corporate governance practices and those that the NYSE Standards require of U.S. domestic companies.

As a company incorporated in Germany, Siemens AG must comply in the first instance with the German Stock Corporation Act and the German Codetermination Act and voluntarily follows the recommendations of the German Corporate Governance Code as set out in Item 10: Additional information Articles of Association and relevant provisions of German law Corporate Governance Declaration of Conformity with the German Corporate Governance Code. Furthermore, Siemens complies with all binding rules and regulations of the markets on which its securities are

listed, such as the NYSE, and also voluntarily complies with many of the NYSE requirements that by their terms apply only to U.S. domestic issuers. For additional information on our corporate governance, please refer to Item 6: Directors, senior management and employees, and to Item 10: Additional information.

The significant differences between our governance practices and those of U.S. domestic NYSE issuers are as follows:

Two-Tier Board The German Stock Corporation Act requires Siemens AG to have a two-tier board structure consisting of a Managing Board and a Supervisory Board. This two-tier structure is characterized by a strict separation of management and supervision. The roles and responsibilities of each of the two boards are clearly defined by law. The composition of the Supervisory Board is determined in accordance with the German Codetermination Act, which stipulates that one-half of the required 20 Supervisory Board members are to be elected by our employees in Germany. The Chairman of the Supervisory Board is entitled to cast a deciding vote when the Supervisory Board is unable to reach a decision in two separate rounds of voting.

Table of Contents

Independence In contrast to the NYSE Standards, which require a board of directors to affirmatively determine the independence of the individual directors with reference to specific tests of independence, German law does not require the Supervisory Board to make such affirmative findings on an individual basis. German law requires an audit committee to include at least one independent supervisory board member with knowledge and experience in the application of accounting principles or the auditing of financial statements. In addition, the Bylaws for Siemens Supervisory Board contain several provisions to help ensure the independence of our Supervisory Board's advice and supervision. Furthermore, the members of our Supervisory and Managing Boards are strictly independent of one another: a member of one board is legally prohibited from being concurrently active on the other. Our Supervisory Board members have independent decision-making authority and are legally prohibited from following any direction or instruction. Moreover, they may not enter into consulting, service or certain other contracts with Siemens, unless approved by the Supervisory Board. We also use the independence criteria of the German Corporate Governance Code as guiding principles.

Committees In contrast to the NYSE Standards, which require the creation of several specific board committees, composed of independent directors and operating pursuant to written charters that define their tasks and responsibilities, the Supervisory Board of Siemens AG has assigned many of the functions of a nominating and corporate governance committee to its Chairman's Committee and has delegated part of the remaining functions to its Nominating Committee. The Supervisory Board has also established a Compensation Committee. Nevertheless, certain responsibilities—for example, the determination of the compensation of the members of the Managing Board—have not been delegated to a committee because German law requires that these functions be performed by the full Supervisory Board. The Audit Committee, the Chairman's Committee and the Compliance Committee have written bylaws adopted by the Supervisory Board that define their respective tasks and responsibilities. The NYSE Standards were taken into consideration in drawing up these bylaws.

The Audit Committee of Siemens AG is subject to the requirements of the SOA and the Exchange Act, as these apply to a foreign private issuer, and performs—in cooperation with the Compliance Committee—functions similar to those assigned to an audit committee under the NYSE Standards. Nevertheless, German law prohibits delegating certain responsibilities—such as the selection of independent auditors (who under German law must be elected at the shareholders' meeting)—to a committee.

The Supervisory Board of Siemens AG also has a Finance and Investment Committee and a Mediation Committee, the latter of which is required under German law. Neither of these committees is required by the NYSE Standards.

Shareholder Approval of Equity Compensation Plans; Stock Repurchases The NYSE Standards generally require that the U.S. domestic companies, i.e. U.S. companies listed on the NYSE, obtain shareholder approval of all equity compensation plans (including stock option plans) and of any material revisions to such plans. Under German law, the creation of authorized or contingent capital in order to issue shares requires shareholder approval. Shareholders must also approve the key points of a stock option plan as part of a decision regarding the creation of contingent capital or the authorization for a company to repurchase and use its own shares for servicing a stock option plan.

Under German law, share buybacks generally require prior shareholder authorization. Such authorization was last given at our Annual Shareholders' Meeting on January 25, 2011, and this matter will, as a general rule, be voted upon at the expiration of each authorization.

ITEM 16H: MINE SAFETY DISCLOSURE

Pursuant to Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), issuers that are operators, or that have a subsidiary that is an operator, of a coal or other mine in the United States are required to disclose in their periodic reports filed with the SEC information regarding specified health and safety violations, orders and citations, issued under the Federal Mine Safety and Health Act of 1977 by the Mine Safety and Health Administration, as well as related assessments and legal actions, and mining-related fatalities. During fiscal 2013, Siemens had no such specified health and safety violations, orders or citations, related assessments or legal actions, mining-related fatalities, or similar events in relation to Siemens United States operations requiring disclosure pursuant to Section 1503(a) of the Dodd-Frank Act.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Supervisory Board of Siemens Aktiengesellschaft:

We have audited the accompanying consolidated statements of financial position of Siemens Aktiengesellschaft and subsidiaries (the Company) as of September 30, 2013 and 2012, and the related consolidated statements of income, comprehensive income, cash flow and changes in equity for each of the three years in the period ended September 30, 2013. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company and subsidiaries at September 30, 2013 and 2012, and the consolidated results of their operations and their cash flows for each of the three years in the period ended September 30, 2013, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board and as adopted by the European Union.

As discussed in Note 2 to the consolidated financial statements, the Company changed its method of accounting for employee benefits as a result of the early adoption of IAS 19, Employee Benefits (revised 2011; IAS 19R), effective October 1, 2012.

Our audits were conducted for the purpose of forming an opinion on the financial statements taken as a whole. The Compensation Report in Item 6, Directors, Senior Management and Employees as of and for the years ended September 30, 2013 and 2012, is presented for purposes of additional analysis and is not a required part of the financial statements. Such information has been subjected to the auditing procedures applied in our audits of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as whole.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Siemens Aktiengesellschaft and subsidiaries' internal control over financial reporting as of September 30, 2013, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) and our report dated November 20, 2013 expressed an unqualified opinion thereon.

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of presentation

The accompanying Consolidated Financial Statements present the operations of Siemens AG with registered offices in Berlin and Munich, Germany, and its subsidiaries (the Company or Siemens). They have been prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the European Union. The financial statements are also in accordance with IFRS as issued by the International Accounting Standards Board (IASB).

Siemens prepares and reports its Consolidated Financial Statements in euros (€). Due to rounding, numbers presented may not add up precisely to totals provided.

Siemens is a German based multinational corporation with a business portfolio of activities predominantly in the field of electronics and electrical engineering.

The Consolidated Financial Statements were authorised for issue by the Managing Board on November 20, 2013. The Consolidated Financial Statements are generally prepared on the historical cost basis, except as stated in Note 2 Summary of significant accounting policies.

2. Summary of significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these Consolidated Financial Statements.

Basis of consolidation The Consolidated Financial Statements include the accounts of Siemens AG and its subsidiaries which are directly or indirectly controlled. Control is generally conveyed by ownership of the majority of voting rights. Additionally, the Company consolidates special purpose entities (SPEs) when, based on the evaluation of the substance of the relationship with Siemens, the Company concludes that it controls the SPE. To determine when the Company should consolidate based on substance, Siemens considers the circumstances listed in SIC-12.10 as additional indicators regarding a relationship in which Siemens controls an SPE. Siemens looks at these SIC-12.10 circumstances as indicators and always privileges an analysis of individual facts and circumstances on a case-by-case basis. Associated companies are recorded in the Consolidated Financial Statements using the equity method of accounting. Companies in which Siemens has joint control are also recorded using the equity method.

Business combinations Business combinations are accounted for under the acquisition method. Siemens as the acquirer and the acquiree may have a relationship that existed before they contemplated the business combination, referred to as a pre-existing relationship. If the business combination in effect settles a pre-existing relationship, Siemens as the acquirer recognizes a gain or loss for the pre-existing relationship. The cost of an acquisition is measured at the fair value of the assets given and liabilities incurred or assumed at the date of exchange. Any contingent consideration to be transferred by Siemens as the acquirer will be recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability will be recognized either in profit or loss or as a change to other comprehensive income. If the contingent consideration is classified as equity, it will not be remeasured; subsequent settlement is accounted for within equity. Acquisition-related costs are expensed in the period incurred. Identifiable assets acquired and liabilities assumed in a business combination (including contingent liabilities) are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. Uniform accounting policies are applied. Non-controlling interests may be measured at their fair value (full goodwill method) or at the proportional fair value of assets acquired and liabilities assumed (partial goodwill method). After initial recognition non-controlling interests may show a deficit balance since both profits and losses are allocated to the shareholders based on their equity interests. In business combinations achieved in stages, any previously held equity interest in the acquiree is remeasured to its acquisition date fair value. If there is no loss of

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

control, transactions with non-controlling interests are accounted for as equity transactions not affecting profit and loss. At the date control is lost, any retained equity interests are remeasured to fair value. In case of a written put on non-controlling interests the Company distinguishes whether the prerequisites for the transfer of present ownership interest are fulfilled at the balance sheet date. Provided that the Company is not the beneficial owner of the shares underlying the put option, the exercise of the put option will be assumed at each balance sheet date and treated as equity transaction between shareholders with the recognition of a purchase liability at the respective exercise price. The non-controlling interests participate in profits and losses during the reporting period.

Associated companies and jointly controlled entities Companies in which Siemens has the ability to exercise significant influence over operating and financial policies (generally through direct or indirect ownership of 20% to 50% of the voting rights) and jointly controlled entities are recorded in the Consolidated Financial Statements using the equity method of accounting and are initially recognized at cost. The following policies equally apply to associated companies and jointly controlled entities. Where necessary, adjustments are made to bring the accounting policies in line with those of Siemens. The excess of Siemens' initial investment in associated companies over Siemens' ownership percentage in the underlying net assets of those companies is attributed to certain fair value adjustments with the remaining portion recognized as goodwill. Goodwill relating to the acquisition of associated companies is included in the carrying amount of the investment and is not amortized but is tested for impairment as part of the overall investment in the associated company. Siemens' share of its associated companies' post-acquisition profits or losses is recognized in the Consolidated Statements of Income, and its share of post-acquisition movements in equity that have not been recognized in the associates' profit or loss is recognized directly in equity. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment in the associated company. When Siemens' share of losses in an associated company equals or exceeds its interest in the associate, Siemens does not recognize further losses, unless it incurs obligations or makes payments on behalf of the associate. The interest in an associate is the carrying amount of the investment in the associate together with any long-term interests that, in substance, form part of Siemens' net investment in the associate. Intercompany results arising from transactions between Siemens and its associated companies are eliminated to the extent of Siemens' interest in the associated company. Siemens determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, Siemens calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value. Upon loss of significant influence over the associate, Siemens measures and recognizes any retaining investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retaining investment and proceeds from disposal is recognized in profit or loss.

Foreign currency translation The assets, including goodwill, and liabilities of foreign subsidiaries, where the functional currency is other than the euro, are translated using the spot exchange rate at the end of the reporting period, while the Consolidated Statements of Income are translated using average exchange rates during the period. Differences arising from such translations are recognized within equity and reclassified to net income when the gain or loss on disposal of the foreign subsidiary is recognized. The Consolidated Statements of Cash Flow are translated at average exchange rates during the period, whereas cash and cash equivalents are translated at the spot exchange rate at the end of the reporting period.

The exchange rate of the U.S. dollar, Siemens' significant currency outside the euro zone used in the preparation of the Consolidated Financial Statements is as follows:

Currency	ISO Code	Year-end exchange rate		Annual average rate		
		2013	2012	2013	2012	2011
U.S. dollar	USD	1.351	1.293	1.313	1.303	1.399

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Foreign currency transaction Transactions that are denominated in a currency other than the functional currency of an entity, are recorded at that functional currency applying the spot exchange rate at the date when the underlying transactions are initially recognized. At the end of the reporting period, foreign currency-denominated monetary assets and liabilities are revalued to functional currency applying the spot exchange rate prevailing at that date. Gains and losses arising from these foreign currency revaluations are recognized in net income. Those foreign currency-denominated transactions which are classified as non-monetary are remeasured using the historical spot exchange rate.

Revenue recognition Under the condition that persuasive evidence of an arrangement exists revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. In cases where the inflow of economic benefits is not probable due to customer related credit risks the revenue recognized is subject to the amount of payments irrevocably received. Revenue is measured at the fair value of the consideration received or receivable net of discounts and rebates and excluding taxes or duty. The Company assesses its revenue arrangements against specific criteria in order to determine if it is acting as principal or agent. The following specific recognition criteria must also be met before revenue is recognized:

Sale of goods: Revenue from the sale of goods is recognized when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods.

Sales from construction contracts: A construction contract is a contract specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use. When the outcome of a construction contract can be estimated reliably, revenues from construction-type projects are recognized under the percentage-of-completion method, based on the percentage of costs to date compared to the total estimated contract costs. An expected loss on the construction contract is recognized as an expense immediately. When the outcome of a construction contract cannot be estimated reliably (1) revenue is recognized only to the extent contract costs incurred are probable of being recoverable, and (2) contract costs are recognized as an expense in the period in which they are incurred.

During project execution, variation orders by the customer for a change in the scope of the work to be performed under the contract may be received leading to an increase or a decrease in contract revenue. Examples of such variations are changes in the specifications or design of the asset and changes in the duration of the contract. As the scope of work to be performed changes also in case of contract terminations, such terminations are considered to be a subset of variations. Therefore the requirements of IAS 11 relating to variations are applied to contract terminations, irrespective of whether the contract is terminated by the customer, Siemens or both. In accordance with the requirements of IAS 11 relating to changes in estimates, the estimates of the total contract revenue and the total contract costs are adjusted reflecting the reduced scope of work to be performed, typically leading to a reversal of revenue recognized. This methodology is also applied to contracts for which it is management's best estimate that a termination is the most likely scenario, but which have not yet been terminated.

Rendering of services: Revenues from service transactions are recognized as services are performed. For long-term service contracts, revenues are recognized on a straight-line basis over the term of the contract or, if the performance pattern is other than straight-line, as the services are provided, i.e. under the percentage-of-completion method as described above.

Sales from multiple element arrangements: Sales of goods and services as well as software arrangements sometimes involve the provision of multiple elements. In these cases, the Company determines whether the contract or arrangement contains more than one unit of accounting. If certain criteria are met, foremost if the delivered element(s) has (have) value to the customer on a stand-alone basis, the arrangement is separated and the appropriate revenue recognition convention is then applied to each separate unit of accounting. Generally, the

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

total arrangement consideration is allocated to the separate units of accounting based on their relative fair values. However, if in rare cases fair value evidence is available for the undelivered but not for one or more of the delivered elements, the amount allocated to the delivered element(s) equals the total arrangement consideration less the aggregate fair value of the undelivered element(s) (residual method). If the criteria for the separation of units of accounting are not met, revenue is deferred until such criteria are met or until the period in which the last undelivered element is delivered.

Interest income: Interest is recognized using the effective interest method.

Royalties: Royalties are recognized on an accrual basis in accordance with the substance of the relevant agreement.

Income from lease arrangements: Operating lease income for equipment rentals is recognized on a straight-line basis over the lease term. An arrangement that is not in the legal form of a lease is accounted for as a lease if it is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset. Receivables from finance leases, in which Siemens as lessor transfers substantially all the risks and rewards incidental to ownership to the customer are recognized at an amount equal to the net investment in the lease. Finance income is subsequently recognized based on a pattern reflecting a constant periodic rate of return on the net investment using the effective interest method. A selling profit component on manufacturing leases is recognized based on the policies for outright sales. Profit from sale and leaseback transactions is recognized immediately if significant risks and rewards of ownership have passed to the buyer, the leaseback results in an operating lease and the transaction is established at fair value.

Dividends: Dividends are recognized when the right to receive payment is established.

Functional costs In general, operating expenses by types are assigned to the functions following the functional area of the corresponding profit and cost centers. Expenses relating to cross-functional initiatives or projects are assigned to the respective functional costs based on an appropriate allocation principle. Regarding amortization see Note 16 Other intangible assets, regarding depreciation see Note 17 Property, plant and equipment and regarding employee benefit expenses see Note 34 Personnel costs.

Government grants Government grants are recognized when there is reasonable assurance that the conditions attached to the grants are complied with and the grants will be received. Grants awarded for the purchase or the production of fixed assets (grants related to assets) are generally offset against the acquisition or production costs of the respective assets and reduce future depreciations accordingly. Grants awarded for other than non-current assets (grants related to income) are reported in the Consolidated Statements of Income under the same functional area as the corresponding expenses. They are recognized as income over the periods necessary to match them on a systematic basis to the costs that are intended to be compensated. Government grants for future expenses are recorded as deferred income.

Product-related expenses and losses from onerous contracts Provisions for estimated costs related to product warranties are recorded in line item Cost of sales at the time the related sale is recognized, and are established on an individual basis, except for the standard product business. The estimates reflect historic experience of warranty costs, as well as information regarding product failure experienced during construction, installation or testing of products. In the case of new products, expert opinions and industry data are also taken into consideration in estimating product warranty provisions. Expected losses from onerous contracts are recognized in the period when the current estimate of total contract costs exceeds contract revenue.

Research and development costs Costs of research activities undertaken with the prospect of gaining new scientific or technical knowledge and understanding are expensed as incurred.

Costs for development activities, whereby research findings are applied to a plan or design for the production of new or substantially improved products and processes, are capitalized if (1) development costs can be measured reliably, the product or process is (2) technically and (3) commercially feasible, (4) future economic

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

benefits are probable and (5) Siemens intends, and (6) has sufficient resources, to complete development and to use or sell the asset. The costs capitalized include the cost of materials, direct labour and other directly attributable expenditure that serves to prepare the asset for use. Such capitalized costs are included in line item Other intangible assets as other internally generated intangible assets. Other development costs are expensed as incurred. Capitalized development costs are stated at cost less accumulated amortization and impairment losses with an amortization period of generally three to five years.

Government grants for research and development activities are offset against research and development costs. They are recognized as income over the periods in which the research and development costs incur that are to be compensated. Government grants for future research and development costs are recorded as deferred income.

Earnings per share Basic earnings per share are computed by dividing income from continuing operations, income from discontinued operations and net income, all attributable to ordinary shareholders of Siemens AG by the weighted average number of shares outstanding during the year. Diluted earnings per share are calculated by assuming conversion or exercise of all potentially dilutive securities and share-based payment plans.

Goodwill Goodwill is not amortized, but instead tested for impairment annually, as well as whenever there are events or changes in circumstances (triggering events) which suggest that the carrying amount may not be recoverable. Goodwill is carried at cost less accumulated impairment losses.

The goodwill impairment test is performed at the level of a cash-generating unit or a group of cash-generating units represented by a Division or equivalent, which is the lowest level at which goodwill is monitored for internal management purposes.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to the cash-generating unit or the group of cash-generating units that is expected to benefit from the synergies of the business combination. If the carrying amount of the cash-generating unit or the group of cash-generating units, to which the goodwill is allocated, exceeds its recoverable amount, an impairment loss on goodwill allocated to this cash-generating unit or this group of cash-generating units is recognized. The recoverable amount is the higher of the cash-generating unit's or the group of cash-generating units' fair value less costs to sell and its value in use. If either of these amounts exceeds the carrying amount, it is not always necessary to determine both amounts. These values are generally determined based on discounted cash flow calculations. Impairment losses on goodwill are not reversed in future periods if the recoverable amount exceeds the carrying amount of the cash-generating unit or the group of cash-generating units to which the goodwill is allocated.

Other intangible assets The Company amortizes intangible assets with finite useful lives on a straight-line basis over their respective estimated useful lives to their estimated residual values. Estimated useful lives for software, patents, licenses and other similar rights generally range from three to five years, except for intangible assets with finite useful lives acquired in business combinations. Intangible assets acquired in business combinations primarily consist of customer relationships and technology. Useful lives in specific acquisitions ranged from seven to twenty-five years for customer relationships and from three to 18 years for technology. Intangible assets which are determined to have indefinite useful lives as well as intangible assets not yet available for use are not amortized, but instead tested for impairment at least annually.

Property, plant and equipment Property, plant and equipment is valued at cost less accumulated depreciation and impairment losses. This also applies to property classified as investment property. Investment property consists of property held either to earn rentals or for capital appreciation or both and not used in production or for administrative purposes. The fair value disclosed for investment property is primarily based on a discounted cash flow approach except for certain cases which are based on appraisal values.

If the costs of certain components of an item of property, plant and equipment are significant in relation to the total cost of the item, they are accounted for and depreciated separately. Depreciation expense is recognized

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

using the straight-line method. Residual values and useful lives are reviewed annually and, if expectations differ from previous estimates, adjusted accordingly. Costs of construction of qualifying assets, i.e. assets that require a substantial period of time to be ready for its intended use, include capitalized interest, which is amortized over the estimated useful life of the related asset. The following useful lives are assumed:

Factory and office buildings	20 to 50 years
Other buildings	5 to 10 years
Technical machinery & equipment	5 to 10 years
Furniture & office equipment	generally 5 years
Equipment leased to others	generally 3 to 5 years

Impairment of property, plant and equipment and other intangible assets The Company reviews property, plant and equipment and other intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In addition, intangible assets with indefinite useful lives as well as intangible assets not yet available for use are subject to an annual impairment test. Recoverability of assets is measured by the comparison of the carrying amount of the asset to the recoverable amount, which is the higher of the asset's value in use and its fair value less costs to sell. If assets do not generate cash inflows that are largely independent of those from other assets or groups of assets, the impairment test is not performed at an individual asset level, instead, it is performed at the level of the cash-generating unit the asset belongs to. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets or cash-generating unit exceeds their recoverable amount. If the fair value cannot be determined, the asset's value in use is applied as their recoverable amount. The asset's value in use is measured by discounting their estimated future cash flows. If there is an indication that the reasons which caused the impairment no longer exist, Siemens assesses the need to reverse all or a portion of the impairment.

The Company's property, plant and equipment and other intangible assets to be disposed of are recorded at the lower of carrying amount or fair value less costs to sell and depreciation is ceased.

Discontinued operations and non-current assets held for disposal Discontinued operations are reported when a component of an entity comprising operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity is classified as held for disposal or has been disposed of, if the component either (1) represents a separate major line of business or geographical area of operations and (2) is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations or (3) is a subsidiary acquired exclusively with a view to resale. In the Consolidated Statements of Income, income (loss) from discontinued operations is reported separately from income and expenses from continuing operations; prior periods are presented on a comparable basis. In the Consolidated Statements of Cash Flow, the cash flows from discontinued operations are presented separately from cash flows of continuing operations; prior periods are presented on a comparable basis. The disclosures in the Notes to the Consolidated Financial Statements outside Note 4 Acquisitions, dispositions and discontinued operations that refer to the Consolidated Statements of Income and the Consolidated Statements of Cash Flow relate to continuing operations. Siemens reports discontinued operations separately in Note 4 Acquisitions, dispositions and discontinued operations. In order to present the financial effects of a discontinued operation revenues and expenses arising from intragroup transactions are eliminated except for those revenues and expenses that are considered to continue after the disposal of the discontinued operation. In any case no profit or loss is recognized for intragroup transactions.

Siemens classifies a non-current asset or a disposal group as held for disposal if its carrying amount will be recovered principally through a sale transaction or through distribution to shareholders rather than through continuing use. For this to be the case, the asset or disposal group must be available for immediate sale or distribution in its present condition subject only to terms that are usual and customary for sales or distributions of such assets or disposal groups and its sale or distribution must be highly probable. The disclosures in the Notes to Consolidated Financial Statements outside Note 4 Acquisitions, dispositions and discontinued operations that

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

refer to the Consolidated Statements of Financial Position generally relate to assets that are not held for disposal. Siemens reports non-current assets or disposal groups held for disposal separately in Note 4 Acquisitions, dispositions and discontinued operations. Non-current assets classified as held for disposal and disposal groups are measured at the lower of their carrying amount and fair value less costs to sell, unless these items presented in the disposal group are not part of the measurement scope as defined in IFRS 5, Non-current Assets held for Sale and Discontinued Operations.

Income taxes The Company applies IAS 12, Income taxes. Current taxes are calculated based on the profit (loss) of the fiscal year and in accordance with local tax rules of the tax jurisdiction respectively. Expected and executed additional tax payments respectively tax refunds for prior years are also taken into account. Under the liability method, deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the income statement, unless related to items directly recognized in equity, in the period the new laws are enacted or substantively enacted. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilized.

Inventories Inventories are valued at the lower of acquisition or production costs and net realizable value, costs being generally determined on the basis of an average or first-in, first-out method. Production costs comprise direct material and labor and applicable manufacturing overheads, including depreciation charges. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

Defined benefit plans Siemens measures the entitlements of the defined benefit plans by applying the projected unit credit method. The approach reflects an actuarially calculated net present value of the future benefit entitlement for services already rendered. In determining the net present value of the future benefit entitlement for service already rendered (Defined Benefit Obligation (DBO)), Siemens considers future compensation and benefit increases, because the employee's final benefit entitlement at regular retirement age depends on future compensation or benefit increases. The assumptions used for the calculation of the DBO as of the period-end of the preceding fiscal year are used to determine the calculation of service cost and interest income and expense of the following year. The net interest income or expense for the fiscal year will be based on the discount rate for the respective year multiplied by the net liability at the preceding fiscal year's period-end date. The fair value of plan assets and DBO and thus the interest income on plan assets and the interest expenses on DBO are adjusted for significant events after the fiscal year end, such as a supplemental funding, plan changes or business combinations and disposals. The DBO includes the present value from the effects of taxes payable by the plan on contributions or benefits relating to services already rendered.

Service cost and past service cost for post-employment benefits as well as other administration costs which are unrelated to the management of plan assets are allocated among functional costs (line items Cost of sales, Research and development expenses, Selling and general administrative expenses) following the functional area of the corresponding profit and cost centers. Past service cost and settlement gains (losses) are recognized immediately in profit or loss when the plan amendment, curtailment or settlement occurs. Administration Costs which are related to the management of plan assets and taxes directly linked to the return on plan assets and payable by the plan itself are included in the return on plan assets and are recognized in Other comprehensive income, net of income taxes. For unfunded plans, Siemens recognizes a post-employment benefit liability equal to the DBO. For funded plans, Siemens offsets the fair value of the plan assets with the benefit obligations. Siemens recognizes the net amount, after adjustments for effects relating to any asset ceiling, in line item Post-employment benefits or in line item Other current assets.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Remeasurements comprise actuarial gains and losses, resulting for example from an adjustment of the discount rate, as well as the difference between the return on plan assets and the amounts included in net interest on the net defined benefits liability (asset) and are recognized in Other comprehensive income, net of income taxes.

Provisions A provision is recognized in the Statement of Financial Position when the Company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect is material, provisions are recognized at present value by discounting the expected future cash flows at a pretax rate that reflects current market assessments of the time value of money. When a contract becomes onerous, the present obligation under the contract is recognized as a provision and measured at the lower of the expected cost of fulfilling the contract and the expected cost of terminating the contract as far as they exceed the expected economic benefits of the contract. Additions to provisions and reversals are generally recognized in the Consolidated Statements of Income. The present value of the recognized obligations associated with the retirement of property, plant and equipment (asset retirement obligations) that result from the acquisition, construction, development or normal use of an asset is added to the carrying amount of the related asset. The additional carrying amount is depreciated over the useful life of the related asset. Additions to and reductions from the present value of asset retirement obligations that result from changes in estimates are generally recognized by adjusting the carrying amount of the related asset and provision. If the asset retirement obligation is settled for other than the carrying amount of the liability, the Company recognizes a gain or loss on settlement.

Termination benefits Termination benefits are recognized in the period incurred and when the amount is reasonably estimable. Termination benefits are provided as a result of an entity's offer made in order to encourage voluntary redundancy before the normal retirement date or from an entity's decision to terminate the employment. Termination benefits in accordance with IAS 19R, Employee Benefits, are recognized as a liability and an expense when the entity can no longer withdraw the offer of those benefits.

Financial instruments A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets of the Company mainly include cash and cash equivalents, available-for-sale financial assets, trade receivables, loans receivable receivables from finance leases and derivative financial instruments with a positive fair value. Cash and cash equivalents are not included within the category available-for-sale financial assets as these financial instruments are not subject to fluctuations in value. Siemens does not make use of the category held to maturity. Financial liabilities of the Company mainly comprise notes and bonds, loans from banks, trade payables, obligations under finance leases and derivative financial instruments with a negative fair value. Siemens does not make use of the option to designate financial assets or financial liabilities at fair value through profit or loss at inception (Fair Value Option). Based on their nature, financial instruments are classified as financial assets and financial liabilities measured at cost or amortized cost and financial assets and financial liabilities measured at fair value and as receivables from finance leases.

Financial instruments are recognized on the Consolidated Statements of Financial Position when Siemens becomes a party to the contractual obligations of the instrument. Regular way purchases or sales of financial assets, i.e. purchases or sales under a contract whose terms require delivery of the asset within the time frame established generally by regulation or convention in the marketplace concerned, are accounted for at the trade date.

Initially, financial instruments are recognized at their fair value. Transaction costs directly attributable to the acquisition or issue of financial instruments are only included in determining the carrying amount, if the financial instruments are not measured at fair value through profit or loss. Receivables from finance leases are recognized at an amount equal to the net investment in the lease. Subsequently, financial assets and liabilities are measured according to the category cash and cash equivalents, available-for-sale financial assets, loans and receivables, financial liabilities measured at amortized cost or financial assets and liabilities classified as held for trading to which they are assigned.

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Cash and cash equivalents The Company considers all highly liquid investments with less than three months maturity from the date of acquisition to be cash equivalents. Cash and cash equivalents are measured at cost.

Available-for-sale financial assets Investments in equity instruments, debt instruments and fund shares are all classified as available-for-sale financial assets and are measured at fair value, if reliably measurable. Unrealized gains and losses, net of applicable deferred income tax expenses, are recognized in line item Other comprehensive income, net of income taxes. Provided that fair value cannot be reliably determined, Siemens measures available-for-sale financial instruments at cost. This applies to equity instruments that do not have a quoted market price in an active market, and decisive parameters cannot be reliably estimated to be used in valuation models for the determination of fair value.

When available-for-sale financial assets incur a decline in fair value below acquisition cost and there is objective evidence that the asset is impaired, the cumulative loss that has been recognized in equity is removed from equity and recognized in the Consolidated Statements of Income. The Company considers all available evidence such as market conditions and prices, investee-specific factors and the duration as well as the extent to which fair value is less than acquisition cost in evaluating potential impairment of its available-for-sale financial assets. The Company considers a decline in fair value as objective evidence of impairment, if the decline exceeds 20% of costs or continues for more than six months. An impairment loss for debt instruments is reversed in subsequent periods, if the reasons for the impairment no longer exist.

Loans and receivables Financial assets classified as loans and receivables are measured at amortized cost using the effective interest method less any impairment losses. Impairment losses on trade and other receivables are recognized using separate allowance accounts. Loans and receivables bearing no or lower interest rates compared to market rates with a maturity of more than one year are discounted.

Financial liabilities Siemens measures financial liabilities, except for derivative financial instruments, at amortized cost using the effective interest method.

Derivative financial instruments Derivative financial instruments, such as foreign currency exchange contracts and interest rate swap contracts, are measured at fair value. Derivative financial instruments are classified as held for trading unless they are designated as hedging instruments, for which hedge accounting is applied. Changes in the fair value of derivative financial instruments are recognized periodically either in net income or, in the case of a cash flow hedge, in line item Other comprehensive income, net of income taxes (applicable deferred income tax). Certain derivative instruments embedded in host contracts are also accounted for separately as derivatives.

Fair value hedges The carrying amount of the hedged item is adjusted by the gain or loss attributable to the hedged risk. Where an unrecognized firm commitment is designated as hedged item, the subsequent cumulative change in its fair value is recognized as a separate financial asset or liability with corresponding gain or loss recognized in net income.

For hedged items carried at amortized cost, the adjustment is amortized until maturity of the hedged item. For hedged firm commitments the initial carrying amount of the assets or liabilities that result from meeting the firm commitments are adjusted to include the cumulative changes in the fair value that were previously recognized as separate financial assets or liabilities.

Cash flow hedges The effective portion of changes in the fair value of derivative instruments designated as cash flow hedges are recognized in line item Other comprehensive income, net of income taxes (applicable deferred income tax), and any ineffective portion is recognized immediately in net income. Amounts accumulated in equity are reclassified into net income in the same periods in which the hedged item affects net income.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Share-based payment IFRS 2, Share-based payment, distinguishes between cash-settled and equity-settled share-based payment transactions. For both types, the fair value is measured at grant date and compensation expense is recognized over the vesting period during which the employees become unconditionally entitled to the awards granted. Cash-settled awards are re-measured at fair value at the end of each reporting period and upon settlement. The fair value of share-based awards, such as stock awards, matching shares, and shares granted under the Jubilee Share Program, is determined as the market price of Siemens shares, considering dividends during the vesting period the grantees are not entitled to and market conditions and non-vesting conditions, if applicable.

Prior-year information The presentation of certain prior-year information has been reclassified to conform to the current year presentation, including the fiscal 2011 presentation of certain line items within operating activities of the Consolidated Statements of Cash Flow. In addition, in fiscal 2013, in the Consolidated Statements of Cash Flow, the Company changed retrospectively the presentation of salary withholdings of share-based payment granted to employees to better reflect the nature of the transaction. In fiscal 2012 and 2011, 134 million and 121 million were retrospectively reclassified from cash flows from financing activities to cash flows from operating activities (continuing operations).

RECENTLY ADOPTED ACCOUNTING PRONOUNCEMENTS

As of October 1, 2012, the Company early adopted IAS 19, Employee Benefits (revised 2011; IAS 19R), which was issued by the IASB in June 2011. The standard is effective for annual periods beginning on or after January 1, 2013; early application is permitted. The standard is applied retrospectively. The amendment was endorsed by the EU in June 2012.

The following amendments to IAS 19 have a significant impact on the Company's Consolidated Financial Statements: IAS 19R replaces interest cost and expected return on assets with a net interest amount that is calculated by applying the discount rate used to measure the defined benefit obligation to the net defined benefit liability (asset). Net interest on the net defined benefit liability (asset) comprises interest income on plan assets and interest cost on the defined benefit obligation. The difference between the interest income on plan assets and the return on plan assets is included in line item Remeasurements of defined benefit plans and recognized in the Consolidated Statement of Comprehensive Income. A lesser effect results from the recognition of unvested past service costs in income immediately when incurred instead of amortization over the vesting period as well as from recognizing other administration costs which are unrelated to the management of plan assets when the administration services are provided. The elimination of the corridor approach does not affect the Company. The adoption of IAS 19R did not result in significant effects on line items Total comprehensive income as well as Total equity.

The following tables present the impacts of the changes in accounting policy. Impacts to the opening balance as of October 1, 2011 as well as impacts to the prior period presented are:

	September 30, 2012				October 1, 2011

If the Company had not applied IAS 19R as of October 1, 2012, line items Interest income and Interest expenses recognized in the Consolidated Statement of Income for fiscal 2013 would have increased by 1,463 million and 798 million, respectively, based on the expected return on plan assets as applied for the fiscal year ended September 30, 2012. Correspondingly, line item Remeasurements of defined benefit plans recognized in the Consolidated Statement of Comprehensive Income would have decreased by 538 million net of tax in fiscal 2013.

RECENT ACCOUNTING PRONOUNCEMENTS, NOT YET ADOPTED

The following pronouncements, issued by the IASB, are not yet effective and have not yet been adopted by the Company:

In December 2011, the IASB issued amendments to IAS 32, Financial Instruments: Presentation and IFRS 7, Financial Instruments: Disclosures regarding offsetting of financial assets and financial liabilities. The amendment to IAS 32 clarifies the existing offsetting rules and is effective for reporting periods beginning on or after January 1, 2014, early application is permitted, however it requires the application of the amendments to IFRS 7. These amendments to IFRS 7 expand the disclosure requirements for financial assets and financial

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

liabilities offset in the statements of financial position including netting agreements where netting is subject to certain future events. This amendment is effective for reporting periods beginning on or after January 1, 2013. Both amendments were endorsed by the European Union in December 2012.

IFRS 10 provides a comprehensive concept of control as the determining factor in whether an entity should be included within the Consolidated Financial Statements. The standard provides additional guidance to assist in the determination of control where this is difficult to assess.

IFRS 11 provides guidance for the accounting of joint arrangements by focusing on the rights and obligations of the arrangement, rather than its legal form.

IFRS 12 is a new and comprehensive standard on disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, structured entities and off balance sheet vehicles.

IFRS 10, 11, 12 and the consequential amendments to IAS 27 and IAS 28 are effective for annual periods beginning on or after January 1, 2013. These new or amended standards may be adopted early. The standards are to be applied on a retrospective basis. In December 2012, IFRS 10, 11, 12, and the consequential amendments to IAS 27 and IAS 28 were endorsed by the European Union. Siemens will adopt IFRS 10, 11, 12, and the consequential amendments to IAS 27 and IAS 28 in fiscal 2014. The Company does not expect a material impact on its Consolidated Financial Statements from these standards.

In May 2011, the IASB issued IFRS 13, Fair Value Measurement. The new standard defines fair value and standardizes disclosures on fair value measurements of both financial and non-financial instrument items. The new standard is applicable for annual periods beginning on or after January 1, 2013; early adoption is permitted. In December 2012, IFRS 13 was endorsed by the European Union. Siemens will adopt IFRS 13 in fiscal 2014. Regarding financial instruments, the majority of changes required by IFRS 13 have already been introduced, mainly by amendments to IFRS 7, Financial Instruments: Disclosures. The Company does not expect a material impact on the Consolidated Financial Statements upon adopting IFRS 13.

In November 2009, the IASB issued IFRS 9, Financial Instruments. This standard is the first phase of the IASB's three-phase project to replace IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 amends the classification and measurement requirements for financial assets, including some hybrid contracts. It uses a single approach to determine whether a financial asset is measured at amortized cost or at fair value, depending on how an entity manages its financial instruments (its business model) and the contractual cash flow characteristics of the financial assets. In October 2010, most of the requirements for financial liabilities were carried forward unchanged from IAS 39 to IFRS 9. In December 2011, IFRS 9 was amended to not require the restatement of comparative-period financial statements upon initial application, to require additional disclosures and to defer the mandatory effective date to annual reporting periods beginning on or after January 1, 2015. As part of its current project Classification and Measurement: Limited Amendments to IFRS 9, however, the IASB tentatively decided in July 2013 that the mandatory effective date should be deferred again and left open depending on the finalization of the limited amendments and the second phase of IFRS 9, Impairment Methodology. Early application would still be permitted. The European Financial Reporting Advisory Group has postponed its endorsement advice on IFRS 9 as currently issued. Due to the ongoing changes to IFRS 9 by the IASB the Company's assessment of the impacts of adopting IFRS 9 on the Company's Consolidated Financial Statements is still ongoing.

3. Critical accounting estimates

Siemens' Consolidated Financial Statements are prepared in accordance with IFRS as issued by the IASB and as adopted by the EU. Siemens' significant accounting policies, as described in Note 2 Summary of significant accounting policies are essential to understanding the Company's results of operations, financial positions and cash flows. Certain of these accounting policies require critical accounting estimates that involve

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

complex and subjective judgments and the use of assumptions, some of which may be for matters that are inherently uncertain and susceptible to change. Such critical accounting estimates could change from period to period and have a material impact on the Company's results of operations, financial positions and cash flows. Critical accounting estimates could also involve estimates where management reasonably could have used a different estimate in the current accounting period. Management cautions that future events often vary from forecasts and that estimates routinely require adjustment.

Revenue recognition on construction contracts The Company's Sectors, particularly Energy, Industry and Infrastructure & Cities, conduct a significant portion of their business under construction contracts with customers. The Company accounts for construction projects using the percentage-of-completion method, recognizing revenue as performance on contract progresses. Certain long-term service contracts are accounted for under the percentage-of-completion method as well. This method places considerable importance on accurate estimates of the extent of progress towards completion and may involve estimates on the scope of deliveries and services required for fulfilling the contractually defined obligations. These significant estimates include total contract costs, total contract revenues, contract risks, including technical, political and regulatory risks, and other judgments. Under the percentage-of-completion method, changes in estimates may lead to an increase or decrease of revenue. The creditworthiness of our customers is taken into account in estimating the probability that economic benefits associated with a contract will flow to the Company. In addition, we need to assess whether the contract is expected to continue or to be terminated. In determining whether the continuation or termination of a contract is expected to be the most likely scenario, all relevant facts and circumstances relating to the contract are considered on an individual basis. For contracts expected to be continued, amounts already included in revenue for which collectability ceases to be probable are recognized as an expense. For contracts expected to be terminated, including terminations due to expected payment defaults of our customers or terminations due to force majeure events, the estimates on the scope of deliveries and services provided under the contracts are revised accordingly, typically resulting in a decrease of revenue in the respective reporting period. Management of the operating Divisions continually reviews all estimates involved in such construction contracts and adjusts them as necessary.

Trade and other receivables The allowance for doubtful accounts involves significant management judgment and review of individual receivables based on individual customer creditworthiness, current economic trends including the developments of the European sovereign debt crisis and analysis of historical bad debts on a portfolio basis. For the determination of the country-specific component of the individual allowance, Siemens also considers country credit ratings, which are centrally determined based on information from external rating agencies. Regarding the determination of the valuation allowance derived from a portfolio-based analysis of historical bad debts, a decline of receivables in volume results in a corresponding reduction of such provisions and vice versa. As of September 30, 2013 and 2012, Siemens recorded a total valuation allowance for trade and other receivables of 1,147 million and 1,190 million, respectively.

Impairment Siemens tests at least annually whether goodwill has incurred any impairment, in accordance with its accounting policy. The determination of the recoverable amount of a cash-generating unit or a group of cash-generating units to which goodwill is allocated involves the use of estimates by management. The outcome predicted by these estimates is influenced e.g. by the successful integration of acquired entities, volatility of capital markets, interest rate developments, foreign exchange rate fluctuations and the outlook on economic trends. The recoverable amount is the higher of the cash-generating unit's or the group of cash-generating units' fair value less costs to sell and its value in use. The Company generally uses discounted cash flow based methods to determine these values. These discounted cash flow calculations use five-year projections that are based on financial forecasts. Cash flow projections take into account past experience and represent management's best estimate about future developments. Cash flows after the planning period are extrapolated using individual growth rates. Key assumptions on which management has based its determination of fair value less costs to sell and value in use include estimated growth rates, weighted average cost of capital and tax rates. These estimates, including the methodology used, can have a material impact on the respective values and ultimately the amount

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

of any goodwill impairment. Likewise, whenever property, plant and equipment, other intangible assets and investments accounted for using the equity method are tested for impairment, the determination of the assets' recoverable amount involves the use of estimates by management that can have a material impact on the respective values and ultimately the amount of any impairment.

Non-current assets and disposal groups classified as held for disposal Assets held for disposal and disposal groups are measured at the lower of their carrying amount and their fair value less costs to sell. The determination of the fair value less costs to sell includes the use of management estimates and assumptions that tend to be uncertain.

Employee benefit accounting Post-employment benefits Obligations for pension and other post-employment benefits and related net periodic benefit costs are determined in accordance with actuarial valuations. These valuations rely on key assumptions including discount rates, expected compensation increases, rate of pension progression and mortality rates. The discount rate assumptions are determined by reference to yields on high-quality corporate bonds of appropriate duration and currency at the end of the reporting period. In case such yields are not available discount rates are based on government bonds yields. Due to changing market, economic and social conditions the underlying key assumptions may differ from actual developments and may lead to significant changes in pension and other post-employment benefit obligations. Such differences are recognized in full through line item Other comprehensive income, net of income taxes in the period in which they occur without affecting profit or loss.

Provisions Significant estimates are involved in the determination of provisions related to onerous contracts, warranty costs, asset retirement obligations and legal proceedings. A significant portion of the business of certain operating divisions is performed pursuant to long-term contracts, often for large projects, in Germany and abroad, awarded on a competitive bidding basis. Siemens records a provision for onerous sales contracts when current estimates of total contract costs exceed expected contract revenue. Such estimates are subject to change based on new information as projects progress towards completion. Onerous sales contracts are identified by monitoring the progress of the project and updating the estimate of total contract costs which also requires significant judgment relating to achieving certain performance standards, for example in the Fossil Power Generation Division, in the Power Transmission Division, in the Mobility & Logistics Division, in the Rail Systems Division and in the Healthcare Sector as well as estimates involving warranty costs and estimates regarding project delays including the assessment of responsibility splits between the contract partners for these delays. Significant estimates and assumptions are also involved in the determination of provisions related to major asset retirement obligations. Uncertainties surrounding the amount to be recognized include, for example, the estimated costs of decommissioning because of the long time frame over which future cash outflows are expected to occur including the respective interest accretion. Amongst others, the estimated cash outflows could alter significantly if, and when, political developments affect the government's plans to develop the final storage.

Siemens is subject to legal and regulatory proceedings in various jurisdictions. Such proceedings may result in criminal or civil sanctions, penalties, damage claims and other claims, or disgorgements against the Company. If it is more likely than not that an obligation of the Company exists and will result in an outflow of resources, a provision is recorded if the amount of the obligation can be reliably estimated. Regulatory and legal proceedings as well as government investigations often involve complex legal issues and are subject to substantial uncertainties. Accordingly, management exercises considerable judgment in determining whether there is a present obligation as a result of a past event at the end of the reporting period, whether it is more likely than not that such a proceeding will result in an outflow of resources and whether the amount of the obligation can be reliably estimated. The Company periodically reviews the status of these proceedings with both inside and outside counsel. These judgments are subject to change as new information becomes available. The required amount of a provision may change in the future due to new developments in the particular matter. Revisions to estimates may significantly impact future net income. Upon resolution, Siemens may incur charges in excess of

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

the recorded provisions for such matters. It cannot be excluded that the financial position or results of operations of Siemens will be materially affected by an unfavorable outcome of legal or regulatory proceedings or government investigations.

Income taxes Siemens operates in various tax jurisdictions and therefore has to determine tax positions under respective local tax laws and tax authorities' views which can be complex and subject to different interpretations of taxpayers and local tax authorities. Deferred tax assets are recognized if sufficient future taxable profit is available, including income from forecasted operating earnings, the reversal of existing taxable temporary differences and established tax planning opportunities. As of each period-end, management evaluates the recoverability of deferred tax assets, based on projected future taxable profits. As future developments are uncertain and partly beyond management's control, assumptions are necessary to estimate future taxable profits as well as the period in which deferred tax assets will recover. Estimates are revised in the period in which there is sufficient evidence to revise the assumption. If management considers it probable that all or a portion of a deferred tax asset cannot be realized, that portion would not be recognized.

4. Acquisitions, dispositions and discontinued operations**a) Acquisitions**

In fiscal 2013, 2012 and 2011, the Company completed a number of acquisitions, which are included in the Company's Consolidated Financial Statements since the date of acquisition.

aa) Acquisitions in fiscal 2013

At the beginning of May 2013, Siemens acquired all of the shares of six entities constituting the rail automation business of Invensys plc., U.K. (Invensys), which are being integrated in the Infrastructure & Cities Sector's Mobility and Logistics Division. With the acquisition, Siemens expanded and complemented the Infrastructure & Cities Sector's rail automation business. The preliminary purchase price amounts to 2,036 million (including 53 million cash acquired) of which 472 million were paid to the Invensys Pension Trust. The purchase price is preliminary mainly because it is subject to final agreement on the closing accounts. The following figures resulting from the preliminary purchase price allocation reflect the amounts recognized as of the acquisition date for each major class of assets acquired and liabilities assumed: Intangible assets 902 million, Inventories 158 million, Receivables 127 million, Deferred income tax assets 68 million, Liabilities 485 million and Deferred income tax liabilities 139 million. Intangible assets mainly relate to customer relationships of 619 million with a useful life of 18 years and technology of 258 million with a useful life of 18 years. Provisional goodwill of 1,278 million comprises intangible assets that are not separable such as employee know-how and expected synergy effects. Including effects from purchase accounting and integration costs, the acquired business contributed revenues of 335 million and a net loss of 44 million to Siemens for the period from acquisition to September 30, 2013. If the acquired business had been included as of October 1, 2012, the impact on consolidated revenues and consolidated net income for the twelve months ended September 30, 2013 would have been 915 million and (9) million, respectively.

At the beginning of January 2013, Siemens acquired all of the shares in LMS International NV, Belgium, a leading provider of mechatronic simulation solutions, which is being integrated in the Industry Sector's Industry Automation Division. With the acquisition, Siemens expanded and complemented the Industry Sector's product lifecycle management portfolio with mechatronic simulation and testing software. The preliminary purchase price amounts to 702 million (including 32 million cash acquired). The following figures represent the preliminary purchase price allocation and show the amounts recognized as of the acquisition date for each major class of assets acquired and liabilities assumed: Intangible assets 398 million, Property, plant and equipment 22 million, Inventories 41 million, Receivables 58 million, Liabilities 128 million and Deferred income tax liabilities 87 million. Intangible assets mainly relate to technology of 290 million with a useful life of seven to eight years and customer relationships of 105 million with a useful life of 16 to 20 years. Provisional goodwill of 352 million comprises intangible assets that are not separable such as employee know-how and expected

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

synergy effects. Including effects from purchase accounting and integration costs, the acquired business contributed revenues of 94 million and a net loss of 68 million to Siemens for the period from acquisition to September 30, 2013. If the acquired business had been included as of October 1, 2012, the impact on consolidated revenues and consolidated net income for the twelve months ended September 30, 2013 would have been 125 million and (90) million, respectively.

ab) Acquisitions in fiscal 2012

At the beginning of May 2012, Siemens acquired all of the shares of five entities constituting the Connectors and Measurements division of Expro Holdings UK 3 Ltd. The acquired business engineers and manufactures subsea components such as cable connectors, sensors and measuring devices. With this acquisition, Siemens expanded its portfolio in the attractive future market for subsea power grids. The aggregate consideration amounts to 469 million (including 8 million cash acquired). The acquired business is integrated into Energy Sector's Oil&Gas Division. The following figures represent the final purchase price allocation and show the amounts recognized as of the acquisition date for each major class of assets acquired and liabilities assumed: Intangible assets 162 million, Property, plant and equipment 21 million, Inventories 18 million, Receivables 25 million, Liabilities 41 million and Deferred income tax liabilities 35 million. Intangible assets mainly relate to customer relationships of 46 million with a useful life of nine to 13 years, technology of 98 million with a useful life of eight to twelve years and order backlog of 12 million with a useful life of two years. Goodwill of 307 million comprises intangible assets that are not separable such as employee know-how and expected synergy effects. Including effects from purchase accounting and integration costs, the acquired business contributed revenues of 57 million and a net income of 12 million to Siemens for the period from acquisition to September 30, 2012. If the acquired business had been included as of October 1, 2011, the impact on consolidated revenues and consolidated net income for the twelve months ended September 30, 2012 would have been 121 million and 41 million, respectively.

Furthermore, in fiscal 2012, Siemens completed the acquisition of a number of entities, presented in continuing operations, which are not significant individually including RuggedCom Inc., a provider of robust, industrial-quality Ethernet communication products and network solutions at the Industry Sector's Industry Automation Division, the NEM B.V. business, a specialist in heat recovery steam generators for combined-cycle (gas and steam) power plants at Energy Sector's Fossil Power Generation Division and eMeter Corporation, a meter data management specialist at Infrastructure & Cities Sector's Smart Grid Division. The aggregate consideration (including cash acquired) of all of these acquisitions amounts to 946 million.

The following figures represent the final purchase price allocations and show the amounts recognized for each major class of assets acquired and liabilities assumed:

	(in millions of)
Goodwill	579
Technology	124
Customer relationships	113
Other intangible assets	50
Other long-lived assets	56
Trade and other receivables	82
Inventories	39
Other current assets	70
Cash and cash equivalents	138
Total assets acquired	1,251
Other liabilities and provisions	153
Deferred tax liabilities	51
Current liabilities	78

Total liabilities assumed

282

F-25

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The respective acquisitions led to non-controlling interests of 23 million. Goodwill comprises intangible assets that are not separable such as employee know-how and expected synergy effects. Including purchase price accounting effects and integration costs, the acquired entities contributed revenues of 271 million and a net loss of 6 million to Siemens for the period from the respective acquisition date to September 30, 2012. If these acquired businesses had been included as of October 1, 2011, the impact on consolidated revenues and consolidated net income for the twelve months ended September 30, 2012 would have been 389 million and (14) million, respectively.

ac) Acquisitions in fiscal 2011

In fiscal 2011, Siemens acquired additional interests in its subsidiary Siemens Ltd., India increasing its stake from 55% to 75%. As a result, line items Retained earnings and Non-controlling interests decreased by 857 million and 121 million, respectively, in fiscal 2011.

b) Dispositions and Discontinued Operations

ba) Dispositions not qualifying for discontinued operations: closed transactions

Dispositions in fiscal 2013

On July 1, 2013, Siemens and Nokia have signed an agreement under which Nokia acquires the shares held in Nokia Siemens Networks Holding B.V. (NSN) by Siemens for an agreed purchase price of 1,700 million. The cash consideration amounts to 1,200 million with the remaining 500 million to be granted as an interest bearing loan to Nokia, maturing one year after closing.

The impairment recognized on the investment in fiscal 2009 was partly reversed since its recoverable amount, represented by its fair value less cost to sell, derived from the agreed purchase price, exceeds the carrying amount of NSN after applying the equity method. Thus, item Reversals of impairment presented in line item Income (loss) from investments accounted for using the equity method, net included 301 million relating to NSN held by segment Equity Investments. The investment in NSN was classified as held for disposal as of June 30, 2013 and equity method accounting ceased. The share of losses recognized for the investment in NSN in fiscal 2013, 2012 and 2011 amounted to 76 million, 741 million and 280 million, respectively.

The transaction closed in August 2013 and resulted in a further gain on disposal for the investment previously presented as held for disposal of 76 million due to the reversal of amounts recognized in line item Other comprehensive income, net of income taxes. Nokia early redeemed the loan in September 2013.

Dispositions in fiscal 2011

The sale of the 34% interest in Areva NP S.A.S resulted in a gain of 838 million in fiscal 2011 recognized in Income (expense) from available-for-sale financial assets, net which is composed of a 1,520 million disposal gain related to the termination of the Areva NP S.A.S. joint venture and a loss of 682 million on the arbitral ruling related to Siemens' exit from the joint venture Areva NP S.A.S.

In fiscal 2011, the sale of Siemens' 49% interest in Krauss-Maffei Wegmann GmbH & Co. KG (KMW) resulted in a 90 million gain reported in line item Income (loss) from investments accounted for using the equity method, net.

bb) Dispositions not qualifying for discontinued operations: held for disposal

The Consolidated Statements of Financial Position as of September 30, 2013 and 2012 include assets held for disposal of 625 million and 106 million and liabilities held for disposal of 215 million and 39 million, respectively, that do not qualify as discontinued operations. As of September 30, 2013, the assets and liabilities mainly include the Business Unit TurboCare of the Energy Sector.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

bc) Discontinued operations

General

Net income (loss) from discontinued operations presented in the Consolidated Statements of Income in fiscal 2013, 2012 and 2011 amount to 197 million (thereof (158) million income tax), (360) million (thereof (77) million income tax), and (726) million (thereof 41 million income tax), respectively.

Net income (loss) from discontinued operations attributable to shareholders of Siemens AG for fiscal 2013, 2012 and 2011 amount to 191 million, (360) million and (715) million.

Water Technologies discontinued operations, assets and liabilities held for disposal

In the first quarter of fiscal 2013, Siemens decided to sell its Business Unit Water Technologies. The conditions for Water Technologies to be classified as held for disposal and discontinued operations were fulfilled as of the fourth quarter of fiscal 2013.

Accordingly, the results of Water Technologies are disclosed as discontinued operations in the Company's Consolidated Statements of Income for all periods presented:

	Year ended September 30,		
	2013	2012	2011
	(in millions of €)		
Revenue	950	1,099	989
Expenses	(959)	(1,081)	(995)
Loss on the measurement to fair value less costs to sell or on the disposal of the disposal group constituting the discontinued operations	(24)		
Pretax income (loss) from discontinued operations	(32)	18	(6)
Income taxes on ordinary activities	1	(9)	(6)
Income taxes on the loss on the measurement to fair value less costs to sell or on the disposal of the disposal group constituting the discontinued operations	6		
Income (loss) from discontinued operations, net of income taxes	(26)	9	(12)

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The assets and liabilities of Water Technologies are presented as held for disposal in the Consolidated Statements of Financial Position as of September 30, 2013. The carrying amounts of the major classes of assets and liabilities of Water Technologies were as follows:

	September 30, 2013 (in millions of)
Trade and other receivables	155
Inventories	144
Financial assets	35
Goodwill	155
Other intangible assets	103
Property, plant and equipment	157
Other assets	19
Assets classified as held for disposal	768
Trade payables	79
Current provisions	36
Other current liabilities	92
Post-employment benefits	13
Other liabilities	37
Liabilities associated with assets classified as held for disposal	258

Upon classification as held for disposal and discontinued operations in the fourth quarter of fiscal 2013, Water Technologies was measured at the lower of its previous carrying amount and fair value less costs to sell. The associated loss recognized represents impairment of goodwill amounting to 13 million.

Solar business reclassification to continuing operations

In the fourth quarter of fiscal 2012, Siemens decided to sell its solar business consisting of the former Business Units Solar Thermal Energy and Photovoltaics and classified it as held for disposal and discontinued operations since the end of fiscal 2012. In the second quarter of fiscal 2013, the solar business no longer fulfilled the conditions to be classified as held for disposal and discontinued operations as a disposal within one year was no longer considered highly probable. Regarding Photovoltaics, the disposal process was terminated in March 2013 and instead the phase out of existing orders with a subsequent closure of the activities is being pursued. Regarding Solar Thermal Energy the disposal within one year was no longer highly probable due to the worsened environment in the overall market for solar thermal energy as well as a decrease of output of a solar thermal power plant within the solar thermal energy activities of Siemens. Therefore, the solar business is reported within continuing operations of the Energy Sector. In the third quarter of fiscal 2013, Siemens decided to terminate the sales process for Solar Thermal Energy as well and instead is pursuing the phase out of existing orders with a subsequent closure of the activities except for the solar thermal power plant, which will be continued.

Loss from continuing operations before income taxes regarding the solar business presented in the Consolidated Statements of Income for fiscal 2013, 2012 and 2011 amounted to (255) million, (258) million and (366) million, respectively.

As of September 30, 2012, the assets and liabilities of the solar business amounting to 224 million and 126 million were classified as assets and liabilities held for disposal.

OSRAM discontinued operations, assets and liabilities held for disposal

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

In March 2011, Siemens announced that it planned to publicly list its subsidiary OSRAM. Siemens intended to retain a minority stake in OSRAM. The conditions for OSRAM to be classified as held for disposal and

F-28

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

discontinued operations were fulfilled as of the end of the second quarter of fiscal 2011. Facing the market conditions Siemens decided in June 2012 to prepare, parallel and alternatively to the aforementioned plan of an initial public offering, an offering of OSRAM in the form of a spin-off by issuing OSRAM shares to the shareholders of Siemens AG and a subsequent listing of these shares.

The decision in June 2012 represented a significant change of the previous disposal plan. Siemens no longer considered it highly probable to complete the disposal of OSRAM via an initial public offering by the end of calendar year 2012, resulting in a reversal of the previous classification of the disposal group OSRAM as held for disposal and discontinued operations. By reversing the previous classification, Siemens recognized a negative effect on earnings of 443 million before taxes in the third quarter of fiscal 2012 that result from depreciation/amortization and impairments of property, plant and equipment and intangible assets and equity pick ups that were not recognized while OSRAM was previously classified as discontinued operations (123 million referring to fiscal 2011). This effect on earnings is presented under expenses in the table below. Siemens considered a listing via spin-off as highly probable including the high probability of the shareholders approval based on past experience with other capital matters suggested for approval at the Annual Shareholders Meeting, feedback from the financial market and the economic rationale of the decision from a shareholder perspective. Accordingly, Siemens classified OSRAM as held for disposal and discontinued operations again. Among other impacts on other income taxes (on costs to sell/spin-off costs), Siemens adjusted deferred tax assets according to the plan of issuing OSRAM shares in the form of a spin-off.

In November 2012, Siemens called off the initial public offering plan and made available a spin-off report to its shareholders in December 2012 in order to request their approval for the spin-off of 80.5% of OSRAM at the Annual Shareholders Meeting in January 2013. At the Annual Shareholders Meeting the shareholders of Siemens AG approved the spin-off of OSRAM by a majority of more than 98%. In July 2013, Siemens successfully completed its planned spin-off and listing of OSRAM. As a result, Siemens derecognized the net carrying amount of the disposal group OSRAM and the associated spin-off liability. The spin-off liability which was initially recognized in the second quarter of fiscal 2013 based on the shareholders approval was presented in other current liabilities and reflected 80.5% of the fair value of OSRAM. At the end of each reporting period and at the date of the actual spin-off, Siemens measured the spin-off liability at fair value with any changes recognized in retained earnings.

Effective July 5, 2013 Siemens transferred 80.5% of its ownership interest in OSRAM in the spin-off transaction to its shareholders. Immediately after the effectiveness of the spin-off, Siemens contributed 2.5% to the Siemens Pension Trust e.V. and thereafter owns 17.0% in OSRAM. The effectiveness of the spin-off triggered a remeasurement of the spin-off liability at fair value. The loss of control resulted in the derecognition of OSRAM's net assets, including non-controlling interests, the reclassification of components of other comprehensive income and the recognition of the remaining stake in OSRAM at fair value. Siemens applied a multiple valuation technique in order to determine the fair value of the spin-off liability as of July 5, 2013 using the input of a discounted cash flow valuation and market multiples, derived from a report from an independent expert. The fair value of the spin-off liability representing 80.5% of the ownership interest in OSRAM amounted to 2,270 million; the derecognized net assets spun-off amounted to 2,182 million, resulting in a difference at the amount of 88 million. Siemens recognized a gain of 21 million due to the measurement of the remaining stake in OSRAM at fair value. The derecognition of the non-controlling interests and the reclassification of relevant components of other comprehensive income resulted in a gain of 23 million and of 19 million, respectively. In fiscal 2013 costs to sell/spin-off costs amounted to 98 million. As a result, Siemens recognized a total gain on the spin-off in the amount of 54 million in fiscal 2013. Due to the nature of the spin-off, the derecognition of the disposal group is presented as a non-cash transaction.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The results of OSRAM are disclosed as discontinued operations in the Company's Consolidated Statements of Income for all periods presented:

	Year ended September 30,		
	2013	2012	2011
	(in millions of €)		
Revenue	4,064	5,400	5,032
Expenses	(3,745)	(5,476)	(4,545)
Gain on the spin-off of the disposal group constituting the discontinued operations (prior years: costs to sell/spin-off costs)	54	(33)	(25)
Pretax income (loss) from discontinued operations	372	(109)	462
Income taxes on ordinary activities	(110)		(177)
Other income taxes (on costs to sell/spin-off costs)	15	(26)	8
Income (loss) from discontinued operations, net of income taxes	277	(135)	293

The assets and liabilities of OSRAM were presented as held for disposal in the Consolidated Statements of Financial Position until the effective date of the spin-off on July 5, 2013. The carrying amounts of the major classes of assets and liabilities of OSRAM were as follows:

	July 5, 2013	September 30, 2012
	(in millions of €)	
Cash and cash equivalents	476	28
Trade and other receivables	850	827
Inventories	1,009	1,044
Financial assets	271	111
Goodwill	274	277
Other intangible assets	193	161
Property, plant and equipment	1,459	1,416
Deferred tax assets	311	376
Other assets	204	212
Assets classified as held for disposal	5,046	4,450
Trade payables	610	609
Current provisions	98	92
Other current liabilities	434	379
Post-employment benefits	398	488
Other liabilities	796	304
Liabilities associated with assets classified as held for disposal	2,336	1,872

Revenue resulting from transactions between OSRAM and joint ventures and associates of Siemens in fiscal 2013, 2012 and 2011 amounted to 19 million, 156 million and 159 million, respectively. Expenses resulting from transactions between OSRAM and joint ventures and associates of Siemens in fiscal 2013, 2012 and 2011 amounted to 11 million, 13 million and 7 million, respectively. As of September 30, 2012, receivables

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

from and liabilities to joint ventures and associates are 39 million and 2 million, respectively.

Acquisition in fiscal 2011

In July 2011, OSRAM acquired 100% of Siteco Lighting GmbH, for 132 million (including 5 million cash acquired) settled mainly in cash. In the course of the acquisition, Siemens AG assumed an external bank liability of Siteco of 126 million. Based on the final purchase price allocation, 37 million were allocated to

F-30

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

customer relationships and 26 million to technology with useful lives of two to ten years and three to 17 years, respectively. Property, plant and equipment were allocated 70 million, Inventories 38 million, Receivables 38 million, Deferred income taxes (41) million and Post-employment benefit liability (31) million. Resulting Goodwill was 107 million.

Siemens IT Solutions and Services discontinued operations

Effective July 1, 2011, Atos S.A. (AtoS) acquired Siemens IT Solutions and Services for a cash payment of 177 million; Siemens received 12.5 million newly issued shares in AtoS with a five-year lock-up commitment, a five-year 250 million convertible bond (nominal value) and entered into a seven-year outsourcing contract worth around 5.5 billion, under which AtoS will provide managed services and system integration to Siemens. Siemens retains the equity method accounted project HERKULES, disclosed in Centrally managed portfolio activities. Siemens recognized a liability for purchase price adjustments and recorded contractual obligations, loss provisions and risk contingencies in connection with the sales agreements. The total loss recognized on the disposal was 903 million in fiscal 2011, including impairments of Goodwill and other non-current assets of 659 million and a 250 million obligation to provide support to AtoS in connection with integration and training programs. Carve-out costs were 90 million in fiscal 2011. In fiscal 2013 and 2012, a gain of 99 million and 53 million resulted from purchase price adjustments. A final settlement with AtoS was not yet reached in fiscal 2013. In fiscal 2011, revenue from related party transactions amounted to 100 million; expenses from related party transactions amounted to 24 million.

	Year ended September 30,		
	2013	2012	2011
	(in millions of)		
Revenue			2,705
Expenses	(40)	(35)	(3,098)
Gain (loss) on the measurement to fair value less costs to sell or on the disposal of the disposal group constituting the discontinued operations	99	45	(743)
Pretax income (loss) from discontinued operations	59	10	(1,136)
Income taxes on ordinary activities	12	15	99
Income taxes on the gain (loss) on the measurement to fair value less costs to sell or on the disposal of the disposal group constituting the discontinued operations	(1)	15	202
Income (loss) from discontinued operations, net of income taxes	71	40	(835)

Former segments SV and Com discontinued operations

Net results from discontinued operations of SV activities and the former operating segment Com presented in the Consolidated Statements of Income in fiscal 2013, 2012 and 2011 amounted to (117) million (thereof (81) million income tax), (260) million (thereof (73) million income tax) and (173) million (thereof (85) million income tax), respectively. The net results in fiscal 2013 included an income tax expense of 84 million related to NSN. The net results in fiscal 2012 mainly relate to Com and include settlements of a matter with the Greek State with a pretax impact of (143) million ((104) million after tax) as well as negative tax effects of 115 million. The Company recorded a reserve in the second quarter of fiscal 2011 with regard to the restructuring measures before the sale of the SV activities in December 2007. Siemens sold its SV activities in December 2007.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****5. Other operating income**

In fiscal 2013, 2012 and 2011, Other operating income includes gains on sales of property, plant and equipment partially leased back under operating leases mainly in fiscal 2013 and of intangible assets of 228 million, 207 million and 250 million, respectively, as well as income in connection with legal and regulatory matters.

6. Other operating expenses

Other operating expenses in fiscal 2013, 2012 and 2011 include impairment losses on goodwill, charges related to legal and regulatory matters, losses on sales of property, plant and equipment and intangible assets and losses from the sale of businesses.

7. Income (loss) from investments accounted for using the equity method, net

	Year ended September 30,		
	2013	2012	2011
	(in millions of €)		
Share of profit (loss), net	247	(371)	77
Gains (losses) on sales, net	78	103	139
Impairment	(116)	(68)	(72)
Reversals of impairment	301	4	2
Income (loss) from investments accounted for using the equity method, net	510	(333)	146

Items Share of profit (loss), net, Gains (losses) on sales, net and Reversals of impairment include the effects of disposing of Siemens' share in NSN in the fourth quarter of fiscal 2013, see Note 4 Acquisitions, dispositions and discontinued operations. Item Share of profit (loss), net also includes Siemens' share in Enterprise Networks' earnings (EN) of (96) million, (23) million and (46) million, in fiscal 2013, 2012 and 2011, respectively. Due to Siemens' commitment made to EN which forms part of Siemens' net investment in EN, Siemens recognized the previously unrecognized share of losses as well as the current share of losses in fiscal 2013.

Item Gains (losses) on sales, net, in fiscal 2012, include 79 million gain on the partial sale of interests in Bangalore International Airport Limited.

In fiscal 2013 and 2012, item Impairment includes (97) million and (46) million related to an investment of Siemens' solar business, see Note 4 Acquisitions, dispositions and discontinued operations. In the fourth quarter of fiscal 2011, the investment in Archimede Solar Energy S.r.l., Italy was impaired by 43 million. The main triggering events for the impairment were the reassessment of the long-term market developments and the continuing lack of a reference project. As a consequence the underlying business planning of the investment has been adjusted to reflect the expected lower growth prospects. The Archimede impairment was based on fair value less costs to sell applying a discounted cash flow method, which assumed a discount rate of 9.1% and a terminal value growth rate of 0%.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

8. Interest income, interest expenses and other financial income (expenses), net

	2013	Year ended September 30, 2012 (in millions of)	2011
Interest income from post-employment benefits	3	8	2
Interest income, other than from post-employment benefits	945	930	843
Interest income	948	939	845
Interest expenses from post-employment benefits	(297)	(310)	(294)
Interest expenses, other than from post-employment benefits	(493)	(450)	(492)
Interest expenses	(789)	(760)	(786)
Income (expenses) from available-for-sale financial assets, net	(80)	103	853
Miscellaneous financial income (expenses), net	(74)	(108)	(208)
Other financial income (expenses), net	(154)	(5)	646

Total amounts of item Interest income and (expense), other than from post-employment benefits, were as follows:

	2013	Year ended September 30, 2012 (in millions of)	2011
Interest income, other than from post-employment benefits	945	930	843
Interest expenses, other than from post-employment benefits	(493)	(450)	(492)
Interest income (expenses), net, other than from post-employment benefits	452	480	351
<i>Thereof: Interest income (expenses) of operations, net</i>	(3)	9	(25)
<i>Thereof: Other interest income (expenses), net</i>	455	471	376

Item Interest income (expense) of Operations, net includes interest income and expense primarily related to receivables from customers and payables to suppliers, interest on advances from customers and advanced financing of customer contracts. Item Other interest income (expense), net includes all other interest amounts primarily consisting of interest relating to corporate debt, and related hedging activities, as well as interest income on corporate assets.

Item Interest income (expense) other than from post-employment benefits includes the following with respect to financial assets (financial liabilities) not at fair value through profit or loss:

	2013	Year ended September 30, 2012 (in millions of)	2011
--	------	---	------

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

Total interest income on financial assets	931	918	833
Total interest expenses on financial liabilities ⁽¹⁾	(767)	(796)	(960)

- (1) Relating to hedged positions, herein only interest expenses on hedged items not at fair value through profit and loss is included, whereas item Interest expenses, other than from post-employment benefits also contains the offsetting effect on interest of the hedging instrument. The difference is due to the disparities of interest rate swap contracts.

F-33

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The components of item Income (expense) from available-for-sale financial assets, net were as follows:

	Year ended September 30,		
	2013	2012	2011
	(in millions of €)		
Dividends received	18	18	12
Gains on sales, net	17	101	881
Impairment	(116)	(17)	(41)
Other	1	1	1
Income (expenses) from available-for-sale financial assets, net	(80)	103	853

In fiscal 2012, item Gains on sales, net includes 87 million gains from the sale of the 25% interest in OAO Power Machines held by the Energy Sector; 66 million of the gain relate to gains recycled from Other comprehensive income as of September 30, 2011. The investment was classified as held for disposal. The transaction closed in December 2011. Regarding impacts in connection with the disposal of Areva NP S.A.S. in fiscal 2011, see Note 4 Acquisitions, Dispositions and discontinued operations.

Item Miscellaneous financial income (expense), net, in fiscal 2013, 2012 and 2011, includes gains (losses) of 95 million, (238) million and (114) million, respectively, from the accretion of provisions and the increase (decrease) in the discount rate, as well as expenses as a result of allowances and write offs of finance receivables, net of reversals of 80 million, 89 million and 42 million, respectively. Furthermore, gains (losses) related to derivative financial instruments are included.

9. Income taxes

Income from continuing operations before income tax is attributable to the following geographic regions:

	Year ended September 30,		
	2013	2012	2011
	(in millions of €)		
Germany	1,227	2,266	3,631
Foreign	4,615	4,370	5,131
	5,843	6,636	8,763

Income tax expense (benefit) consists of the following:

	Year ended September 30,		
	2013	2012	2011
	(in millions of €)		
Current tax:			
German corporation and trade taxes	543	148	301
Foreign income taxes	1,236	1,510	1,255

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

	1,779	1,658	1,556
Deferred tax:			
Germany	233	419	338
Foreign	(382)	(83)	244
	(149)	336	581
Income tax expenses	1,630	1,994	2,137

The current income tax expenses in fiscal 2013, 2012 and 2011 includes adjustments recognized for current tax of prior years in the amount of 92 million, (117) million and 90 million, respectively. The current tax

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

expense is positively impacted by the closing of a mutual agreement procedure regarding transfer prices between Germany and the U.S. in the fourth quarter of fiscal 2013 leading to an increase of German current taxes and an overcompensating decrease of foreign income taxes. In fiscal 2012 the German current tax expense is positively affected by receivables due to several mutual agreement procedures.

The deferred tax expense (benefit) in fiscal 2013, 2012 and 2011 includes tax effects of the origination and reversal of temporary differences of (297) million, (150) million and 256 million, respectively. The German deferred tax expense in fiscal 2013 is mainly related to the utilization of tax loss carryforwards.

In Germany, the calculation of current tax is based on a corporate tax rate of 15% and a solidarity surcharge thereon of 5.5%, for all distributed and retained earnings. In addition to corporate taxation, trade tax is levied on profits earned in Germany. As the German trade tax is a non deductible expense, the average trade tax rate amounts to 15% and the combined total tax rate results in 31%. Deferred tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realized or the liability is settled.

For foreign subsidiaries, current taxes are calculated based on the local tax laws and applicable tax rates in the individual foreign countries. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled.

Income tax expense (current and deferred) differs from the amounts computed by applying a combined statutory German income tax rate of 31% as follows:

	Year ended September 30,		
	2013	2012	2011
	(in millions of)		
Expected income tax expenses	1,811	2,058	2,716
Increase (decrease) in income taxes resulting from:			
Non-deductible losses and expenses	380	388	370
Tax-free income	(346)	(398)	(871)
Taxes for prior years	50	(59)	(9)
Change in realizability of deferred tax assets and tax credits	23	(17)	24
Change in tax rates	(31)	(39)	(9)
Foreign tax rate differential	(182)	(52)	(61)
Tax effect of investments accounted for using the equity method	(74)	115	(24)
Other, net	(1)	(2)	1
Actual income tax expenses	1,630	1,994	2,137

The tax free income in fiscal 2013 is amongst others attributable to the NSN disposal and in fiscal 2011 Areva NP S.A.S. disposal.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Deferred income tax assets and liabilities on a gross basis are summarized as follows:

	September 30,	
	2013	2012
	(in millions of)	
Assets:		
Financial assets	54	52
Other intangible assets	190	169
Property, plant and equipment	303	288
Inventories	558	551
Receivables	682	541
Post-employment benefits	2,954	3,238
Provisions	1,685	1,677
Liabilities	2,014	2,513
Tax loss and credit carryforward	918	1,296
Other	282	231
Deferred tax assets	9,640	10,556
Liabilities:		
Financial assets	239	236
Other intangible assets	1,582	1,407
Property, plant and equipment	631	782
Inventories	1,700	1,857
Receivables	1,776	2,061
Provisions	601	450
Liabilities	69	156
Other	312	353
Deferred tax liabilities	6,910	7,302
Total deferred tax assets, net	2,730	3,254

In assessing the realizability of deferred tax assets, management considers the extent to which it is probable that the deferred tax asset will be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable profits during the periods in which those temporary differences and tax loss carryforwards become deductible. Management considers the expected reversal of deferred tax liabilities and projected future taxable income in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is probable the Company will realize the benefits of these deductible differences. As of September 30, 2013, the Company has certain tax losses subject to significant limitations. For those losses deferred tax assets are not recognized, as it is not probable that gains will be generated to offset those losses.

As of September 30, 2013 and 2012, the Company had in total 3,341 million and 4,721 million, respectively of gross tax loss carryforwards. The Company assumes that future operations will generate sufficient taxable income to realize the deferred tax assets.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Deferred tax assets have not been recognized with respect of the following items (gross amounts):

	September 30,	
	2013	2012
	(in millions of)	
Deductible temporary differences	150	165
Tax loss carryforward	941	662
	1,091	827

As of September 30, 2013 and 2012, 221 million and 214 million, respectively the major part of the unrecognized tax loss carryforwards expire over the periods to 2018.

The Company has ongoing regular tax audits concerning open income tax years in a number of jurisdictions. Adequate provisions for all open tax years have been foreseen. Among others, the German Tax Audit rejected the deductible treatment of expenses in connection with the buy-back of the convertible bond issued 2003. Accordingly, line item Capital reserve was reduced by 553 million and a tax expense of 53 million was recognized in fiscal 2013. The Company filed an appeal and will rigorously defend the position taken in tax returns. In addition, the Company has applied for several mutual agreement procedures to avoid double taxation.

The Company recorded deferred tax liabilities for income taxes and foreign withholding taxes on future dividend distributions from subsidiaries which are actually intended to be repatriated. Apart from this liability, the Company has not recognized deferred tax liabilities for income taxes or foreign withholding taxes on the cumulative earnings of subsidiaries of 19,214 million and 21,270 million, respectively in fiscal 2013 and 2012 because the earnings are intended to be permanently reinvested in the subsidiaries.

Including the items charged or credited directly to equity and the expense (benefit) from continuing and discontinued operations, the income tax expense (benefit) consists of the following:

	Year ended September 30,		
	2013	2012	2011
	(in millions of)		
Continuing operations	1,630	1,994	2,137
Discontinued operations	158	77	(41)
Income and expenses recognized directly in equity	738	(1,194)	184
	2,526	877	2,280

10. Available-for-sale financial assets

The following tables summarize the current portion of the Company's investment in available-for-sale financial assets:

	September 30, 2013		
Cost	Fair value	Unrealized Gain	Unrealized Loss

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

	(in millions of)			
Equity instruments	6	8	2	
Debt instruments	378	382	3	
Fund shares	195	211	16	
	580	601	21	(1)

F-37

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	September 30, 2012			
	Cost	Fair value (in millions of)	Unrealized Gain	Unrealized Loss
Equity instruments	6	8	2	
Debt instruments	304	308	5	
Fund shares	196	208	13	(1)
	506	524	19	(1)

Non-current available-for-sale financial assets, which are included in line item Other financial assets are measured at fair value, if reliably measurable. They primarily consist of equity instruments, mainly comprising shares in AtoS and, since July 2013, in OSRAM. As of September 30, 2013 and 2012 non-current available-for-sale financial assets measured at cost amount to 167 million and 293 million, respectively; available-for-sale financial assets measured at fair value amount to 1,394 million and 728 million, respectively. Unrealized gains (losses) in fiscal 2013 and 2012 resulting from non-current available-for-sale financial assets at fair value were 401 million and 215 million, respectively.

11. Trade and other Receivables

	September 30,	
	2013	2012
	(in millions of)	
Trade receivables from the sale of goods and services	12,932	13,310
Receivables from finance leases	1,921	1,910
	14,853	15,220

Changes to the valuation allowance of current and long-term receivables presented in Note 11, 12 and 19, which belong to the class of financial assets measured at (amortized) cost are as follows (excluding receivables from finance leases):

	Year ended September 30,		
	2013	2012	2011
	(in millions of)		
Valuation allowance as of beginning of fiscal year	1,056	1,005	993
Increase in valuation allowances recorded in the Consolidated Statements of Income in the current period	205	191	210
Write-offs charged against the allowance	(208)	(108)	(145)
Recoveries of amounts previously written-off	9	7	13
Foreign exchange translation differences	(38)	14	(10)
Reclassifications to line item Assets held for disposal and dispositions of those entities		(54)	(56)
Valuation allowance as of fiscal year-end	1,023	1,056	1,005

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In fiscal 2013 and 2012, receivables from finance leases, current amount to 1,921 million and 1,910 million, respectively; the long-term portion amounts to 3,340 million and 3,148 million, respectively. The valuation allowance on current and long-term receivables from finance leases changed as follows:

	Year ended September 30,		
	2013	2012	2011
	(in millions of)		
Valuation allowance as of beginning of fiscal year	134	142	168
Increase in valuation allowances recorded in the Consolidated Statements of Income in the current period	35	23	34
Write-offs charged against the allowance	(47)	(40)	(65)
Recoveries of amounts previously written-off	5	6	7
Foreign exchange translation differences	(4)	5	(2)
Reclassifications to and from line item Assets held for disposal and dispositions of those entities		(2)

Minimum future lease payments to be received are as follows:

	September 30,	
	2013	2012
	(in millions of)	
Within one year	2,318	2,273
After one year but not more than five years	3,406	3,240
More than five years	214	206
	5,938	5,719

The following table shows a reconciliation of minimum future lease payments to the gross and net investment in leases and to the present value of the minimum future lease payments receivable:

	September 30,	
	2013	2012
	(in millions of)	
Minimum future lease payments	5,938	5,719
Plus: Unguaranteed residual values	97	131
Gross investment in leases	6,034	5,850
Less: Unearned finance income	(649)	(657)
Net investment in leases	5,385	5,193

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

Less: Allowance for doubtful accounts	(124)	(134)
Less: Present value of unguaranteed residual value	(85)	(117)
Present value of minimum future lease payments receivable	5,176	4,942

F-39

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The gross investment in leases and the present value of minimum future lease payments receivable are due as follows:

	September 30,	
	2013	2012
	(in millions of)	
Gross investment in leases	6,034	5,850
Within one year	2,345	2,388
One to five years	3,472	3,248
Thereafter	218	214
Present value of minimum future lease payments receivable	5,176	4,942
Within one year	1,946	2,012
One to five years	3,035	2,743
Thereafter	195	187

Investments in finance leases primarily relate to industrial machinery, medical equipment, transportation systems, equipment for information technology and office machines. Actual cash flows will vary from contractual maturities due to future sales of finance receivables, prepayments and write-offs.

12. Other current financial assets

	September 30,	
	2013	2012
	(in millions of)

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

Cost of sales rendered include inventories recognized as expense amounting to 53,778 million, 53,947 million and 49,151 million, respectively, in fiscal 2013, 2012 and 2011. Raw materials and supplies, work in process as well as finished goods and products held for resale are valued at the lower of acquisition/production cost and net realizable value. The respective write-downs, as compared to prior year, increased (decreased) by 39 million, 57 million and (107) million as of September 30, 2013, 2012 and 2011.

Item Costs and earnings in excess of billings on uncompleted contracts relates to construction contracts, with net asset balances where contract costs plus recognized profits less recognized losses exceed progress

F-40

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

billings. Construction contracts, here and as follows, include service contracts accounted for under the percentage of completion method. Liabilities from contracts for which progress billings exceed costs and recognized profits less recognized losses are recognized in line item Other current liabilities.

The aggregate amount of costs incurred and recognized profits less recognized losses for construction contracts in progress, as of September 30, 2013, 2012 and 2011 amounted to 83,187 million, 83,533 million and 74,947 million, respectively. Revenue from construction contracts amounted to 31,178 million, 32,530 million and 29,941 million, respectively, for fiscal 2013, 2012 and 2011.

Advance payments received on construction contracts in progress were 8,630 million, 9,295 million and 10,198 million as of September 30, 2013, 2012 and 2011. Retentions in connection with construction contracts were 452 million, 343 million and 297 million in fiscal 2013, 2012 and 2011.

In the fourth quarter of fiscal 2012, Siemens revised project calculations for long-term contracts with customers in Iran in accordance with accounting guidance for construction and service contracts. The resulting adjustments reduced income from continuing operations before income tax expenses by 347 million.

Siemens performs the mandatory annual impairment test in the three months ended September 30. Except as disclosed above, the recoverable amounts for the annual impairment test 2013 for Divisions or equivalents were estimated to be higher than the carrying amounts. Key assumptions on which management has based its determinations of the fair value less costs to sell for the Divisions or equivalents carrying amount include terminal value growth rates up to 2.3% in fiscal 2013 and 2.7% in fiscal 2012, respectively and after-tax discount rates of 6.0% to 10.8% in fiscal 2013 and 7.0% to 9.5% in fiscal 2012. Where possible, reference to market prices is made.

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

For the purpose of estimating the fair value less costs to sell of the Divisions or equivalents, cash flows were projected for the next five years based on past experience, actual operating results and management's best estimate about future developments as well as market assumptions.

The fair value less costs to sell is mainly driven by the terminal value which is particularly sensitive to changes in the assumptions on the terminal value growth rate and discount rate. Both assumptions are determined individually for each Division or equivalent. Discount rates reflect the current market assessment of the risks specific to each Division or equivalent and are based on the weighted average cost of capital for the Divisions or

F-42

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

equivalents (for SFS the discount rate represents cost of equity). Terminal value growth rates take into consideration external macroeconomic sources of data and industry specific trends.

The following table presents the key assumptions used to determine fair value less costs to sell for impairment test purposes for the Divisions to which a significant amount of goodwill is allocated:

	Year ended September 30, 2013		
	Goodwill (in millions of)	Terminal value growth rate	After-tax discount rate
Diagnostics of the Healthcare Sector	4,758	2.3%	6.0%
Industry Automation of the Industry Sector	2,986	1.7%	8.5%
Imaging&Therapy Systems of the Healthcare Sector	2,483	2.2%	7.5%

	Year ended September 30, 2012		
	Goodwill (in millions of)	Terminal value growth rate	After-tax discount rate
Diagnostics of the Healthcare Sector	4,981	2.3%	7.0%
Industry Automation of the Industry Sector	2,897	1.8%	8.5%
Imaging&Therapy Systems of the Healthcare Sector	2,596	2.7%	7.0%

In the context of the ongoing disposal process, an impairment test was performed for the logistics and airport solutions business within the Mobility & Logistics Division of the Infrastructure & Cities Sector as of September 30, 2013. As a result, an impairment loss of 46 million was recognized.

In fiscal 2012 the entire remaining goodwill of the solar business amounting to 85 million was impaired upon classification as held for disposal and discontinued operations based on the measurement at its fair value less costs to sell. Due to the reclassification of the solar business to continuing operations in fiscal 2013, the amount of 85 million is now disclosed as impairment in continuing operations for fiscal 2012.

The annual test for impairment of goodwill of fiscal 2011 of the solar and hydro business within the Energy Sector was performed as of September 30, 2011. As a result, in the solar and hydro business of the Energy Sector, an impairment loss of 128 million was recognized. The goodwill impaired is mainly attributable to the acquisition of Siemens Concentrated Solar Power Ltd. (former Solel Solar Systems Ltd.).

As a result of a market assessment, which was completed in the three months ended September 30, 2011, the growth prospects and the long-term market development for the concentrated solar power business have been reassessed and the underlying business planning has been adjusted accordingly to reflect expected lower growth prospects. The adjusted business plan resulting from the market assessment was the basis for the annual goodwill impairment test in the three months ended September 30, 2011.

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

- (1) Includes Property, plant and equipment reclassified to Assets classified as held for disposal and dispositions of those entities.
- (2) Includes impairment expense of 140 million in fiscal 2012, of which 56 million relate to SRE, 38 million relate to Energy and 32 million relate to SFS.
- (3) Includes 741 million expenditures for property, plant and equipment under construction. Depreciation and impairment is included in line items Cost of sales, Research and development expenses or Selling and general administrative expenses, depending on the use of the asset. As of September 30, 2013 and 2012, contractual commitments for purchases of property, plant and equipment amount to 503 million and 395 million, respectively.

In fiscal 2013, 2012 and 2011, government grants awarded for the purchase or the production of property, plant and equipment amounted to 9 million, 13 million and 14 million, respectively. The award of further government grants of 62 million, 77 million and 50 million in fiscal 2013, 2012 and 2011, respectively, related to costs incurred and future costs.

F-45

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As of September 30, 2013 and 2012, minimum future lease payments receivable from lessees under operating leases are as follows:

	September 30, 2013 2012 (in millions of)	
Within one year	321	384
After one year but not more than five years	578	754
More than five years	137	196
	1,035	1,334

Payments from lessees under operating leases primarily relate to buildings, medical equipment and transportation systems. Total contingent rent recognized in income in fiscal 2013, 2012 and 2011 amounts to 214 million, 205 million and 182 million.

Investment property

The carrying amount of investment property amounts to 116 million and 121 million compared to a fair value of 258 million and 232 million as of September 30, 2013 and 2012, respectively.

18. Investments accounted for using the equity method

As of September 30, 2013, Siemens' principal investments accounted for under the equity method, which are all unlisted, are (in alphabetical order):

	Percentage of Ownership September September 30, 30, 2013 2012	
BSH Bosch und Siemens Hausgeräte GmbH (BSH)	50%	50%
BWI Informationstechnik GmbH ⁽¹⁾	50%	50%
Enterprise Networks Holdings B.V.	49%	49%
Maschinenfabrik Reinhausen GmbH	26%	26%
Nokia Siemens Networks Holding B.V. ⁽²⁾	50%	50%
P.T. Jawa Power ⁽³⁾	50%	50%
Shanghai Electric Power Generation Equipment Co. Ltd.	40%	40%
Voith Hydro Holding GmbH & Co. KG	35%	35%

(1) The exact percentage equals 50.05%; it is not controlled by Siemens due to significant participating rights of the two other shareholders.

(2) The investment was disposed of in the fourth quarter of fiscal 2013. Until the disposal, the exact percentage of voting rights was equal to 50% less 2,500 voting rights. Due to its classification as held for disposal as of June 30, 2013, the summarized revenue and net income (loss) include NSN for nine months in fiscal 2013.

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

(3) The investment is no jointly controlled entity.

Siemens' interest in BSH, which is the principal jointly controlled entity of Siemens, is recognized using the equity method, applying BSH's twelve month periods ended June 30. The following information reflect BSH's most recent published financial statements, not adjusted for the percentage of ownership held by Siemens.

	Year ended December 31,		
	2012	2011	2010
		(in millions of)	
Revenue	9,800	9,654	9,073
Net income	465	374	467

Obligations under finance leases	110	128
Long-term debt	18,509	16,880
	20,453	20,707

Interest rates in this Note are per annum. In fiscal 2013 and 2012, weighted-average interest rates for loans from banks, other financial indebtedness and obligations under finance leases were 2.7% (2012: 2.3%), 3.1% (2012: 2.1%) and 4.1% (2012: 4.6%), respectively.

1. Commercial paper program

Siemens has a US\$ 9.0 billion (6.7 billion as of September 30, 2013) multi-currency commercial paper program in place including US\$ extendible notes capabilities. As of September 30, 2013 and 2012 no commercial papers were outstanding. Siemens' commercial papers have a maturity of generally less than 90 days. Interest rates ranged from 0.01% to 0.37% in fiscal 2013 and from (0.03)% to 0.70% in fiscal 2012.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Debt Issuance Program**

The Company has a program for the issuance of debt instruments under which it may issue instruments up to 15.0 billion as of September 30, 2013 and 2012, respectively. As of September 30, 2013 and 2012 10.9 billion and 9.9 billion in notional amounts were issued and are outstanding.

Siemens redeemed at face value 2.0 billion in 4.125% fixed-rate instruments in February 2013. In fiscal 2013, Siemens issued 2.25 billion and US\$500 million in fixed-rate instruments in three tranches, comprising: 1.25 billion, 1.75% instruments due March 12, 2021, 1.0 billion, 2.875% instruments due March 10, 2028 and US\$500 million (370 million as of September 30, 2013), 1.5% instruments due March 12, 2018. Furthermore, Siemens issued two privately placed instruments of US\$100 million (74 million as of September 30, 2013) in 3.5% fixed-rate instruments due March 20, 2028 and US\$400 million (296 million as of September 30, 2013) in floating-rate instruments due June 5, 2020.

In fiscal 2012, Siemens issued 1.4 billion and £1.0 billion (1.2 billion as of September 30, 2013) in fixed-rate instruments in four tranches as well as US\$400 million (296 million as of September 30, 2013) privately placed in floating-rate instruments.

Hybrid Bond

In September 2006, the Company issued a subordinated hybrid bond in a EUR tranche of 900 million and a GBP tranche of £750 million (897 million as of September 30, 2013), both with a legal final maturity on September 14, 2066 and with a call option for Siemens in 2016 or thereafter. The instruments bear fixed-rate interests until September 14, 2016; thereafter, floating-rate interest is applied according to the conditions of the bond.

Bond with Warrant Units

In fiscal 2012, Siemens issued US\$ fixed-rate bonds with warrant units in an aggregate principal amount of US\$3 billion in two tranches, comprising: (1) US\$1.5 billion (1.1 billion as of September 30, 2013) in 1.05% instruments maturing on August 16, 2017 and (2) US\$1.5 billion (1.1 billion as of September 30, 2013) in 1.65% instruments maturing on August 16, 2019. Each of the US\$1.5 billion instruments were issued with 6,000 detachable warrants. The warrants' exercise price was fixed in Euro. The warrants were classified as equity instruments with a fair value of 126 million at issuance presented in the capital reserve in line item Other changes in equity. The warrants entitle the holders, at their option, to receive 1,806.1496 Siemens AG shares per warrant at an exercise price per share of 104.0018 during the exercise period which matures on August 1, 2017 and August 1, 2019 for instruments (1) and instruments (2), respectively. After the spin-off of OSRAM in fiscal 2013, the warrants entitle the holders to obtain OSRAM shares in addition to Siemens shares. Accordingly, the warrants no longer qualify as equity instruments since the approval of the spin-off in January 2013 and the warrants' fair value of 163 million was reclassified from line item Capital reserve to non-current other financial liability. The warrants result in option rights relating to a total of 21.7 million Siemens AG shares.

3. Assignable and term loans

The Company has assignable loans. The loans were issued in four tranches, totaled 333 million and 447 million in notional amount as of September 30, 2013 and 2012 (carrying amount 356 million and 486 million as of September 30, 2013 and 2012) and are for general corporate purposes. They consist of two fixed-rate tranches: 113.5 million 5.283% notes due and redeemed at face value in June 2013 and 333 million 5.435% notes due on June 12, 2015. The floating-rate tranches of 370 million bearing interest of 0.55% above six months EURIBOR due June 12, 2013 and 283.5 million bearing interest of 0.70% above six months EURIBOR due June 12, 2015 were called in August 2011 and were redeemed in December 2011 at their face value.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Additionally, in fiscal 2013, the Company signed two bilateral US\$500 million term loan facilities (in aggregate 740 million as of September 30, 2013). The facilities have a term of five years expiring March 28, 2018 with two one-year extension options, were fully drawn in fiscal 2013 and bear interest of 0.79% above three months LIBOR.

4. Credit facilities

The credit facilities at September 30, 2013 and 2012 consisted of 6.7 billion and 7.5 billion, respectively, in committed lines of credit. As of September 30, 2013, those include: (1) a 4.0 billion undrawn syndicated multi-currency revolving credit facility, entered into in fiscal 2012; in fiscal 2013, its maturity has been extended by one year to April 4, 2018 with a remaining one-year extension option; (2) a US\$ 3.0 billion (2.2 billion as of September 30, 2013) undrawn syndicated multi-currency revolving credit facility provided by a syndicate of international banks with a five year tenor and two one-year extension options, which was signed in September 2013. It replaces the previous US\$4.0 billion syndicated multi-currency credit facility which expired August 21, 2013. The US\$4.0 billion facility comprised a US\$1.0 billion floating-rate term loan bearing interest of 0.15% above three months LIBOR which was drawn in January 2007 and redeemed at face value at maturity as well as a US\$3.0 billion revolving tranche undrawn; (3) a 450 million revolving credit facility provided by a domestic bank expiring September 30, 2014.

As of September 30, 2013 and 2012, 6.7 billion and 6.8 billion of these lines of credit remained unused. Commitment fees for the years ended September 30, 2013 and 2012 amount to 6 million and 4 million, respectively. The facilities are for general business purposes.

As of September 30, 2013 and 2012, the aggregate amounts of indebtedness maturing during the next five years and thereafter are as follows (excluding finance leases which are disclosed separately):

	September 30,	
	2013	2012
	(in millions of)	
Within one year	1,924	3,793
After one year but not more than five years	10,423	9,214
More than five years	7,976	7,539
	20,323	20,546

Other financial indebtedness

Item Other financial indebtedness includes 111 million and 153 million as of September 30, 2013 and 2012, respectively, for the Company's real estate assets that were sold or transferred and in which Siemens has retained significant risks and rewards of ownership, including circumstances in which Siemens participates directly or indirectly in the change in market value of the property. Therefore, these transactions have been accounted for as financing obligations. These real estate properties are carried on the Company's Consolidated Statements of Financial Position and no sale and profit has been recognized.

23. Post-employment benefits

Post-employment benefits provided by Siemens are organized through defined benefit plans as well as defined contribution plans which cover almost all of the Company's domestic employees and the majority of the Company's foreign employees. Post-employment defined benefit plans include pension benefits and other post-employment benefits, which primarily consist of transition payments to German employees after retirement as well as post-employment health care and life insurance benefits to employees in the U.S. and Canada.

Defined benefit plans

Siemens regularly reviews the design of its post-employment defined benefit plans. In order to reduce the Company's exposure to certain risks associated with defined benefit plans, such as longevity, inflation, effects of compensation increases, the Company implemented new defined benefit plans in some of Siemens' major countries including Germany, the U.S. and the U.K. during the last several years. The benefits of these new defined benefit plans are based predominantly on contributions made by the Company and are still affected by longevity, inflation adjustments and compensation increases, but only to a minor extent. The Company's major defined benefit plans are funded with assets in segregated entities. The defined benefit plans cover 501,000 participants, including 215,000 active employees, 87,000 former employees with vested benefits and 199,000 retirees and surviving dependents. Individual benefits are generally based on eligible compensation levels and/or ranking within the Company hierarchy and years of service. The characteristics of the defined benefit plans and the risks associated with them vary depending on legal, fiscal and economic requirements in each country. For the major defined benefit plans of Siemens the characteristics and risks are as follows:

Germany:

In Germany, Siemens AG provides pension benefits through the cash-balance plan BSAV (Beitragsorientierte Siemens Altersversorgung), frozen legacy plans and deferred compensation plans. The majority of Siemens' active employees in Germany participate in the BSAV introduced in fiscal 2004, which is a funded defined benefit pension plan whose benefits are predominantly based on contributions made by the Company and returns earned on such contributions, subject to a minimum return guaranteed by the Company. The BSAV is funded via a contractual trust arrangement (CTA), the BSAV Trust. Individual benefits under the frozen legacy plans are based on eligible compensation levels or ranking within the Company hierarchy and

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

years of service. In connection with the implementation of the BSAV, benefits provided under the frozen legacy plans funded via a CTA, the Siemens Pension Trust were modified to substantially eliminate the effects of compensation increases by freezing the accretion of benefits under the majority of these plans. However, these frozen plans still expose the Company to actuarial risks such as investment risk, interest rate risk and longevity risk. Furthermore, deferred compensation plans are offered which are also funded via a CTA. In Germany no legal or regulatory minimum funding requirements apply. The Trusts, which are legally separate from the Company, manage their plan assets as trustees, in accordance with the respective trust agreements with the Company.

U.S.:

Siemens Corporation in the U.S. sponsors one major defined benefit plan, the Siemens Pension Plan, which is frozen to new entrants and accretion of new benefits (with the exception of one small group of union employees). Employees of Siemens U.S. companies hired prior to April 1st, 2006 participate in the Siemens Pension Plan. Most of the defined benefit plan participants' benefits are calculated using a cash balance formula; although a small group of participants are eligible for a benefit based on a final average pay formula. This frozen defined benefit plan exposes the Company to actuarial risks such as investment risk, interest rate risk, longevity risk and salary increase risk.

The defined benefit plan assets are held in a Master Trust. Siemens Corporation, as the sponsoring employer, has delegated investment oversight of the plans' assets to the Investment Committee. The Investment Committee members have a fiduciary duty to act solely in the best interests of the beneficiaries according to the trust agreement and U.S. law. The Committee has established an Investment Policy Statement which articulates the goals and objectives of the plans' investment management, including diversifying the assets of the Master Trust with the intention of appropriately addressing concentration risks. The trustee of the Master Trust acts only by direction of the Investment Committee. It is responsible for the safekeeping of the trust, but generally has no decision making authority over the plan assets. The legal and regulatory framework for the plans is based on the applicable U.S. legislation Employee Retirement Income Security Act (ERISA). Based on this legislation a funding valuation is prepared annually. There is a regulatory requirement to maintain a minimum funding level of 80% in the defined benefit plans in order to avoid benefit restrictions.

U.K.:

Siemens plc in the U.K. sponsors a frozen defined benefit plan and a defined contribution plan for all new employees and for the active service of those members who have participated in the frozen defined benefit plan. There are several smaller defined benefit plans which result from previous acquisitions, those plans are in the process of being merged or de-risked. The goal is to have only one legacy plan for closed or frozen defined benefits. For most of the defined benefit plan members an inflation increase of the accrued benefits until the start of retirement is mandatory. Furthermore, the plans expose the Company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary increase risk. The funding environment is determined by the Pension Regulator and the applicable social and labor laws. The defined benefit plans are governed by a benefit trust whose decision making body is a Board of Trustees who have a fiduciary duty to act in the best interests of the beneficiaries according to the trust agreement and law. The required funding is determined by a funding valuation carried out every third year based on legal requirements, which measures the liabilities on a government bond basis rather than under a high quality corporate bond basis as under IAS 19R, thus the technical funding deficit is usually larger. The funding valuation assumptions are being negotiated between the Company and the Trustees. The latest funding valuation in the U.K. in calendar year 2011 resulted in a technical underfunding of GBP 939 (1,123) million, based on the assumptions at that date. As a result, in fiscal 2013, Siemens entered into an agreement with the trustees to provide an annual payment of GBP 31 (37) million for

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

the next 20 years, beginning in fiscal 2014. In addition to these payments the Company is obliged to pay GBP 15 (18) million until the next funding valuation, when the funding requirements will be updated based on new assumptions. This valuation will take place approximately at the end of calendar year 2015.

Switzerland:

According to the Swiss law Berufliches Vorsorgegesetz (BVG) each employer has to grant post-employment benefits for qualifying employees. Siemens Switzerland sponsors funded defined benefit plans for its qualifying employees. These plans are administered by foundations that are legally separated from the entity and are subject to the BVG. For the main pension fund, which represents 95% of the defined benefit obligation in Switzerland, the board of the pension fund is composed of an equal number of representatives from both employer and employees. For the other pension funds the employer has the majority of the seats in the foundation board. The board of the pension funds is required by law and by the regulations of the funds to act in the interest of the fund and of all stakeholders in the schemes, i.e. active employees and retirees. The board of the pension fund is responsible for the investment policy with regard to the assets of the fund, changes of the plan rules and it determines the necessary contributions to finance the benefits. The plan is a cash balance plan and the Company is required to make contributions at least as high as the pre-determined employee contributions set out in the plan rules. The plans expose the Company to actuarial risks such as investment risk, interest rate risk, longevity risk and salary increase risk. Employer and plan participants' contributions are determined by the respective foundation boards. About 40% of the necessary contributions are financed by the employees. In the case of a shortfall, the employer and plan participants' contribution might be increased according to decisions of the relevant foundation board. Strategies of the foundation boards to make up for potential shortfalls are subject to approval by the regulator.

The amounts included in the Company's Consolidated Financial Statements arising from its post-employment defined benefit plans are as follows:

	Defined benefit obligation (DBO)		Fair value of plan assets		Effects in connection with asset ceiling		Net defined benefit balance	
	September 30, 2013	2012	September 30, 2013	2012	September 30, 2013	2012	September 30, 2013	2012
	(in millions of)							
Germany	20,367	20,339	14,017	13,956			(6,350)	(6,383)
U.S.	3,769	4,324	2,575	2,819			(1,194)	(1,505)
U.K.	4,455	4,006	4,022	3,758	(65)	(104)	(498)	(352)
CH	2,828	2,985	2,489	2,437	(49)	(47)	(388)	(594)
Other	1,753	1,996	975	1,086	(32)	(19)	(810)	(930)
Total	33,173	33,650	24,078	24,057	(146)	(170)	(9,241)	(9,764)

The net defined benefit balance of 9,241 million and 9,764 million as of September 30, 2013 and 2012 comprises 9,265 million and 9,801 million net defined benefit liability and 24 million and 38 million net defined benefit asset, respectively.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Defined benefit costs are as follows:

	Year ended September 30,		
	2013	2012	2011
	(in millions of)		
Current service cost	510	437	459
Past service (benefit) cost	(9)	(124)	25
Settlement (gains) losses	(7)	(38)	(18)
Net interest expenses	297	310	295
Net interest income	(3)	(8)	(2)
Liability administration expenses	16	26	27
Components of defined benefit costs recognized in the Consolidated Statements of Income	803	604	786
Return on plan assets (excluding amounts included in net interest expenses and net interest income)	(504)	(2,308)	1,066
Actuarial (gains) and losses	(50)	5,048	(1,587)
Effect from asset ceiling	(23)	(5)	12
Remeasurements of defined benefit plans recognized in the Consolidated Statements of Comprehensive Income	(577)	2,734	(510)
Defined benefit costs	226	3,338	276

A reconciliation of the funded status to the amounts recognized in the Consolidated Statements of Financial Position is as follows:

	September 30,	
	2013	2012
	(in millions of)	
Defined benefit obligation of pension benefit plans	32,594	32,965
Defined benefit obligation of other post-employment benefit plans	579	685
Total defined benefit obligation	33,173	33,650
Fair value of plan assets of pension benefit plans	24,073	24,052
Fair value of plan assets of other post-employment benefit plans	5	5
Total fair value of plan assets	24,078	24,057
Funded status of pension benefit plans	(8,520)	(8,914)
Funded status of other post-employment benefit plans	(575)	(680)
Total funded status (excluding effects in connection with asset ceiling)	(9,095)	(9,593)

The Company's defined benefit plans are explicitly explained in the subsequent sections with regard to:

Reconciliation of defined benefit obligations and plan assets,

Actuarial assumptions,

Sensitivity analysis,

Asset-liability matching strategies,

Disaggregation of plan assets, and

Future cash flows.

F-55

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Reconciliation for defined benefit obligations and plan assets**

A detailed reconciliation for the changes in the DBO for fiscal 2013 and 2012 is provided in the following table:

	Year ended September 30,	
	2013	2012
	(in millions of)	
Change in defined benefit obligations:		
Defined benefit obligation at beginning of year	33,650	27,849
Current service cost	510	437
Past service (benefit) cost	(9)	(124)
Settlement (gains) losses	(7)	(38)
Interest expenses	1,036	1,247
Remeasurements:		
Actuarial (gains) losses from changes in demographic assumptions	43	208
Actuarial (gains) losses from changes in financial assumptions	(249)	4,680
Experience (gains) losses	156	159
Plan participants contributions	105	118
Benefits paid	(1,622)	(1,585)
Settlement payments	(67)	(17)
Business combinations, disposals and other	135	207
Foreign currency translation effects	(508)	508
Defined benefit obligation at end of year	33,173	33,650

The total defined benefit obligation at the end of fiscal 2013 includes 10,767 million for active employees, 4,645 million for former employees with vested benefits and 17,761 million for retirees and surviving dependents.

A detailed reconciliation of the changes in the fair value of plan assets for fiscal 2013 and 2012 is provided in the following table:

	Year ended September 30,	
	2013	2012
	(in millions of)	
Change in plan assets:		
Fair value of plan assets at beginning of year	24,057	20,969
Interest income	750	952
Remeasurements:		
Return on plan assets excluding amounts included in net interest income and net interest expenses	504	2,308
Employer contributions	536	586
Plan participants contributions	105	118
Benefits paid	(1,480)	(1,470)
Settlement payments	(67)	(19)
Business combinations, disposals and other	87	189
Liability administration costs	(16)	(26)
Foreign currency translation effects	(398)	448

Fair value of plan assets at end of year	24,078	24,057
---	---------------	---------------

F-56

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Actuarial assumptions**

Assumed discount rates, compensation increase rates, pension progression rates and mortality rates used in calculating the DBO vary according to the economic and other conditions of the country in which the retirement plans are situated.

The weighted-average discount rate as well as the mortality tables used for the actuarial valuation of the DBO at period-end were as follows:

	Year ended September 30,		
	2013	2012	2011
Discount rate	3.4%	3.2%	4.5%
Germany	3.1%	3.1%	4.7%
U.S.	3.7%	2.9%	4.1%
U.K.	4.5%	4.4%	5.7%
CH	2.1%	1.7%	2.5%

Mortality tables (most significant countries):

Germany	<i>Heubeck Richttafeln 2005G</i>
U.S.	<i>RP2000 Combined Healthy Fully Generational Mortality Table</i>
U.K.	<i>SIPxA (Standard mortality tables for Self Administered Pension Schemes (SAPS) with allowance for future mortality improvements)</i>
CH	<i>BVG 2010 G</i>

The rates of compensation increase for countries with significant effects with regard to this assumption were as follows in fiscal 2013, 2012 and 2011: U.S.: 3.13%, 3.69% and 3.50%, U.K.: 4.80%, 4.10% and 5.00%, Switzerland: 1.50%, 1.50% and 1.50%. The rates of pension progression for countries with significant effects with regard to this assumption were as follows in fiscal 2013, 2012 and 2011: Germany: 1.69%, 1.67% and 1.75%, U.K.: 3.2%, 2.6% and 3.1%.

The DBO is also affected by assumed future inflation rates. The effect of inflation is recognized within the assumptions above where applicable.

Sensitivity analysis

A one-half-percentage-point change of the established assumptions mentioned before, used for the calculation of the DBO as of September 30, 2013, would result in the following increase (decrease) of the DBO:

	Effect on DBO as of September 2013 due to a	
	one-half percentage-point increase	one-half percentage-point decrease
	(in millions of)	
Discount rate	(1,919)	2,159
Rate of compensation increase	136	(105)

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

Rate of pension progression	1,492	(1,339)
-----------------------------	-------	---------

The reduction of the mortality rates by 10% results in an increase of life expectancy depending on the individual age of each beneficiary. That means for example, that the life expectancy of a male Siemens employee

F-57

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

age 55 years as of September 30, 2013 increases by approximately one year. In order to determine the longevity sensitivity the mortality rates were reduced by 10% for all beneficiaries. The effect on DBO as of September 30, 2013 due to a 10% reduction in mortality rates would result in an increase of 985 million.

When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method) has been applied as when calculating the post-employment benefit obligation recognized in the Consolidated Statement of Financial Position. Increases and decreases in the discount rate, rate of compensation increase, rate of pension progression and mortality rates which are used in determining the DBO do not have a symmetrical effect on the DBO primarily due to the compound interest effect created when determining the net present value of the future benefit. If more than one of the assumptions are changed simultaneously, the combined impact due to the changes would not necessarily be the same as the sum of the individual effects due to the changes. Furthermore, the sensitivities reflect a change in the DBO only for a change in the assumptions in this specific magnitude, i.e. 0.5%. If the assumptions change at a different level, the effect on the DBO is not necessarily in a linear relation.

Asset Liability Matching Strategies

Siemens' funding policy for its funded defined benefit plans is part of the overall commitment to sound financial management, which also includes an ongoing analysis of the structure of Siemens' defined benefit liabilities. To balance return and risk, Siemens has developed a benefit risk management concept. The Company has identified as a major risk a decline in the plans' funded status as a result of the adverse development of plan assets and/or defined benefit obligations. Siemens monitors its investments and its defined benefit obligations in order to measure such risk. The risk quantifies the expected maximum decline in the principle plans' funded status for a given confidence level over a given time horizon. A risk limit on the Group level forms the basis for the determination of the Company's investment strategy, i.e. the strategic asset class allocation of principle plan assets and the degree of interest rate risk hedging. Both the risk limit and investment strategy are regularly reviewed with the participation of senior external experts of the international asset management and insurance industry to allow for an integral view on plan assets and benefit liabilities. The Company selects asset managers based on quantitative and qualitative analysis and subsequently constantly monitors their performance and risk, both on a stand-alone basis, and in the broader portfolio context. Siemens reviews the asset allocation of each plan in light of the duration of the related benefit liabilities and analyzes trends and events that may affect asset values in order to inform about appropriate measures at a very early stage.

Derivatives are used for risk reducing purposes to either reduce the fluctuations in the value of plan assets or reduce funded status volatility as part of an integrated risk management approach for assets and liabilities. Main risks mitigated are interest rate, credit, equity, currency and inflation risk. All over-the-counter derivatives are collateralized on a daily basis to eliminate counterparty risk. In addition, derivatives are permitted for investment managers to use as substitutes for traditional securities where appropriate to manage exposure to foreign exchange and interest rate risks.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Disaggregation of plan assets**

The asset allocation of the plan assets of the benefit plans is as follows:

Asset class	Fair value as of September 30,	
	2013	2012
	(in millions of)	
Equity securities	6,604	5,876
<i>U.S. equities</i>	1,416	1,660
<i>European equities</i>	2,214	1,636
<i>Emerging markets</i>	1,457	1,394
<i>Global equities</i>	1,517	1,187
Fixed income securities	12,768	13,759
<i>Government bonds</i>	3,003	3,336
<i>Corporate bonds</i>	9,765	10,423
Alternative investments	2,961	2,309
<i>Hedge Funds</i>	978	295
<i>Private Equity</i>	497	466
<i>Real estate</i>	1,487	1,548
Derivatives	175	1,255
<i>Interest risk</i>	263	1,562
<i>Foreign currency risk</i>	53	29
<i>Credit/Inflation/Price risks</i>	(141)	(335)
Cash and cash equivalents	1,148	434
Other assets	422	423
Total	24,078	24,057

Virtually all equity and fixed income securities have quoted prices in active markets and almost all fixed income securities are investment grade. In addition, the asset class Other assets includes assets with quoted prices in active markets in the amount of 78 million and 169 million as of September 30, 2013 and 2012.

As of September 30, 2013, the major part of cash and cash equivalents is marked as cash in transition into corporate bond mandates.

The plan assets include own transferable financial instruments of the Company with a fair value of 89 million and 74 million as of September 30, 2013 and 2012.

Future cash flows

Employer contributions expected to be paid to the post-employment defined benefit plans in fiscal 2014 are 631 million.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Expected benefit payments**

	September 30, 2013 (in millions of)
2014	1,647
2015	1,613
2016	1,624
2017	1,668
2018	1,713
2019-2023	8,958

The weighted average duration of the DBO for Siemens defined benefit plans was 13 years as of September 30, 2013.

Multi-employer defined benefit plans

Multi-employer plans mainly exist in the Netherlands and in the U.S. These plans are industry specific plans based on local laws, which are accounted for as defined contribution plans as Siemens has no right to obtain the necessary data for defined benefit plan accounting. These plans may expose the Company to investment and actuarial risk in case of a deficit.

In the Netherlands the Company is not liable for other entities' obligations under the terms and conditions of the multi-employer plan.

In the U.S. the Company may be liable for other entities' obligations in case of failure of other participating employers to make required contributions. In case of withdrawal from a plan the Company may be subject to a liability for the potential future statutory underfunding for its share in the plan. The Company has only a minor share in these plans compared to other participating entities and has no intention to withdraw from one of these plans.

Siemens is not aware of any probable significant risk due to multi-employer defined benefit plans accounted for as defined contribution plans.

Siemens expects contributions to multi-employer defined benefit plans accounted for as defined contribution plans for the next fiscal year of 31 million.

Defined contribution plans and state plans

The amount recognized as expense for defined contribution plans amounts to 594 million, 545 million and 437 million in fiscal 2013, 2012 and 2011, respectively. Contributions to state plans amount to 1,354 million, 1,584 million and 1,528 million in fiscal 2013, 2012 and 2011, respectively.

In fiscal 2013 and 2012, item Other changes contains reclassifications (to) from line item Liabilities associated with assets classified as held for disposal including the disposal of those entities of (47) million and (25) million, respectively.

Except for asset retirement obligations, the majority of the Company's provisions are generally expected to result in cash outflows during the next one to 15 years.

Warranties mainly relate to products sold.

In fiscal 2013, Wind Power Division of the Energy Sector took 94 million in charges related to inspecting and retrofitting installed onshore turbine blades mainly in the U.S.

Order related losses and risks are provided for anticipated losses and risks on uncompleted construction, sales and leasing contracts.

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

Transportation & Logistics of the Infrastructure & Cities Sector incurred project charges of 270 million and 86 million in fiscal 2013 and 2012, respectively, for delays for receiving certification for new high-speed trains.

In fiscal 2013 and 2012, the Power Transmission Division of the Energy Sector incurred project charges primarily related to grid connections to offshore wind-farms. These charges were due to project delays resulting from a complex regulatory environment and the projects' complex marine environment, which required revised estimates of resources and personnel. This led to (171) million and (570) million pretax effects on the income statement in fiscal 2013 and 2012, which were mainly recorded as provisions for order related losses and risks.

F-61

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Asset retirement obligations The Company is subject to asset retirement obligations related to certain items of property, plant and equipment. Such asset retirement obligations are primarily attributable to environmental clean-up costs which amounted to 1,096 million and 1,224 million, respectively, as of September 30, 2013 and 2012 (the non-current portion thereof being 1,086 million and 1,215 million, respectively) and to costs primarily associated with the removal of leasehold improvements at the end of the lease term.

Environmental clean-up costs relate to remediation and environmental protection liabilities which have been accrued based on the estimated costs of decommissioning facilities for the production of uranium and mixed-oxide fuel elements in Hanau, Germany (Hanau facilities), as well as a nuclear research and service center in Karlstein, Germany (Karlstein facilities). According to the German Atomic Energy Act, when such a facility is closed, the resulting radioactive waste must be collected and delivered to a government-developed final storage facility. In this regard, the Company has developed a plan to decommission the Hanau and Karlstein facilities in the following steps: clean-out, decontamination and disassembly of equipment and installations, decontamination of the facilities and buildings, sorting of radioactive materials, and intermediate and final storage of the radioactive waste. This process will be supported by continuing engineering studies and radioactive sampling under the supervision of German federal and state authorities. The decontamination, disassembly and final waste conditioning are planned to continue until 2018; thereafter, the Company is responsible for intermediate storage of the radioactive materials until a final storage facility is available. With respect to the Hanau facility, the process of setting up intermediate storage for radioactive waste has nearly reached completion; on September 21, 2006, the Company received official notification from the authorities that the Hanau facility has been released from the scope of application of the German Atomic Energy Act and that its further use is unrestricted. The ultimate costs of the remediation are contingent on the decision of the federal government on the location of the final storage facilities and the date of their availability. Consequently, the provision is based on a number of significant estimates and assumptions. Several parameters relating to the development of a final storage facility for radioactive waste are based on the assumptions for the so called Schacht Konrad final storage. Parameters related to the life-span of the German nuclear reactors reflect a planned phase-out until 2022. The valuation uses assumptions to reflect the current and detailed cost estimates, price inflation and discount rates as well as a continuous outflow until the 2070 s related to the costs for dismantling as well as intermediate and final storage.

Using the input of an independent advisor, management updated its valuation of the liability due to changes in estimates which resulted in minor adjustments in fiscal 2013 and 2012. Facts and circumstances of the changes were as follows:

In fiscal 2013, the parameters related to operating costs and the timeframe of the storage process of the radioactive waste in the Konrad final storage were updated by The Federal Office for Radiation Protection (Bundesamt für Strahlenschutz).

In fiscal 2012, the parameters related to the set up cost of the Konrad final storage were updated by The Federal Office for Radiation Protection.

The determination of the provisions related to major asset retirement obligations will continue to involve significant estimates and assumptions. Uncertainties surrounding the amount to be recognized include, for example, the estimated costs of decommissioning and final storage because of the long time frame over which future cash outflows are expected to occur. Amongst others, the estimated cash outflows related to the asset retirement obligation could alter significantly if, and when, political developments affect the government's plans to develop the so called Schacht Konrad. As of September 30, 2013 and 2012, the provision totals 1,096 million and 1,224 million, respectively, and is recorded net of a present value discount of 1,259 million and 1,418 million, respectively reflecting the assumed continuous outflow of the total expected payments until the 2070 s.

The Company recognizes the accretion of the provision for environmental clean-up costs using the effective interest method applying current interest rates prevailing at the period-end date. In fiscal 2013 and 2012, the

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Company recognized 22 million and 23 million, respectively, in accretion expense for environmental clean-up costs in line item Other Financial income (expenses), net. Changes in discount rates decreased the carrying amount of provisions by 128 million as of September 30, 2013 and increased it by 149 million as of September 30, 2012.

Other Other includes transaction-related and post-closing provisions in connection with portfolio activities as well as provisions for legal and regulatory matters.

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Authorized capital (not issued)

The Company's shareholders authorized the Managing Board, with the approval of the Supervisory Board, to increase capital stock through the issuance of no par value shares registered in the names of the holders and to determine the further content of the rights embodied in the shares and the terms and conditions of the share issue as follows:

Authorized Capital 2011 by up to 90 million through the issuance of up to 30 million shares for contributions in cash. The authorization was granted on January 25, 2011 and expires on January 24, 2016. In accordance with Authorized Capital 2011, new shares can be issued solely to employees of Siemens AG and its subsidiaries. Pre-emptive rights of existing shareholders are excluded.

Authorized Capital 2009 by up to 520.8 million through the issuance of up to 173.6 million shares for contributions in cash and/or in kind (Authorized Capital 2009). The authorization was granted on January 27, 2009 and expires on January 26, 2014. With the approval of the Supervisory Board, the Managing Board can exclude shareholders' pre-emptive rights for capital increases in the form of contributions in kind and in certain pre-stipulated circumstances for contributions in cash.

Conditional capital (not issued)

Conditional Capital is provided for the purpose of a) serving the issuance of bonds with conversion rights and (or) with warrants, b) accommodating the exercise of stock option plans and c) settling claims of former Siemens Nixdorf Informationssysteme AG (SNI AG) shareholders.

Conditional Capital 2011 to service the issuance of bonds with conversion rights and/or with warrants or a combination thereof in an aggregate principal amount of up to 15 billion, entitling the holders to subscribe to up to 90 million shares of Siemens AG with no par value, representing up to 270 million of capital stock. The authorization to issue such bonds was granted in January 2011 and will expire on January 24, 2016.

Conditional Capital 2010 to service the issuance of bonds with conversion rights and/or with warrants in an aggregate principal amount of up to 15 billion, entitling the holders to subscribe to up to 200 million shares of Siemens AG with no par value, representing up to 600 million of capital stock. The authorization to issue such bonds was granted on January 26, 2010 and will expire on January 25, 2015.

Conditional Capital to service the 2001 and 1999 Siemens Stock Option Plans amounts to 157 million, representing 52.32 million shares of Siemens AG as of September 30, 2013 and 2012. The last tranche of stock options expired in November 2010 and from that date on, no further shares are to be issued.

Conditional Capital provided to issue shares to settle claims offered to former SNI AG shareholders who had not tendered their SNI AG share certificates amounts to 0.6 million, representing 189 thousand shares as of September 30, 2013 and 2012. Such rights to claim Siemens shares expired in 2007 and no further shares are to be issued.

Transactions with non-controlling interests

In connection with an acquisition in fiscal 2012, a minority shareholder was granted a put option on the non-controlling interests. This transaction with non-controlling interests impacted line item Retained earnings by (301) million as of September 30, 2012.

Treasury shares

The Company is authorized by its shareholders to acquire treasury shares of up to 10% of its capital stock existing at the date of the shareholders resolution or if this value is lower as of the date on which the authorization is exercised. The authorization became effective on March 1, 2011 and remains in force through January 24, 2016. According to the resolution, repurchased shares may be (1) sold via a stock exchange or

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

through a public sales offer made to all shareholders; (2) retired; (3) offered for purchase to individuals currently or formerly employed by the Company or any of its subsidiaries as well as to Board members of any of the Company's subsidiaries or awarded and (or) transferred to such individuals with a vesting period of at least two years, provided employment or Board membership exists at the time of the award; (4) offered and transferred with the approval of the Supervisory Board to third parties against contributions in kind, particularly in connection with business combinations or the acquisition of companies, businesses, parts of businesses or interests therein; (5) with the approval of the Supervisory Board sold to third parties against payment in cash if the price at which such Siemens shares are to be sold is not significantly lower than the market price of the Siemens stock at the time of selling; or (6) used to service convertible bonds or warrant bonds issued by the Company or any of its subsidiaries. In addition, the Supervisory Board may use repurchased shares to meet obligations or rights to acquire Siemens shares that were or will be agreed with members of the Managing Board within the framework of rules governing Managing Board compensation.

The current authorization to acquire Siemens shares is supplemented by an authorization to repurchase up to 5% of its capital stock existing at the date of the shareholders' resolution by using equity derivatives or forward purchases with a maximum maturity term of 18 months; the repurchase of treasury shares upon the exercise of such instruments shall be no later than January 24, 2016.

In August 2012, Siemens announced a share buyback amounting to up to 3 billion which ended in November 2012. The shares repurchased may be used for the purposes of cancellation and reduction of capital stock, issuance to employees, board members of affiliated companies and members of the Managing Board as well as to meet obligations arising under and in connection with convertible bonds and warrant bonds. In addition, in fiscal 2013, under the current authorization to acquire treasury shares given by resolution at the Annual Shareholders' Meeting, the Company repurchased as many treasury shares as were necessary to keep the number of treasury shares at a set level until the effective date of the spin-off of OSRAM in July 2013.

In fiscal 2012, the Company repurchased 23,202,500 treasury shares at a weighted average share price of 76.14. Additionally, in fiscal 2012, the Managing Board decided to cancel 33,203,421 treasury shares, which reduced issued capital from 914 million shares to 881 million shares. In fiscal 2013, Siemens repurchased 17,150,820 treasury shares at weighted average costs per share of 78.66.

In fiscal 2013, 2012 and 2011, 3,878,899 shares, 5,225,479 shares and 4,414,342 shares, respectively, were transferred in connection with equity settled share-based payment plans.

Other changes in equity

Line item Other changes in equity of the Consolidated Statement of Changes in Equity includes 126 million in fiscal 2012 which relate to the equity instruments of the US\$ bonds with warrants issued in fiscal 2012. After completion of the spin-off of OSRAM in fiscal 2013, those warrants entitle the holders to obtain OSRAM shares in addition to Siemens shares. As a consequence, the warrants no longer qualify as equity instruments. The warrants' fair value of 163 million was reclassified from line item Capital reserve to non-current other financial liabilities as of the date of the approval at the Annual Shareholders' Meeting.

Miscellaneous

Under the German Stock Corporation Act (Aktengesetz), the amount of dividends available for distribution to shareholders is based upon the earnings of Siemens AG as reported in its statutory financial statements determined in accordance with the German Commercial Code

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

(Handelsgesetzbuch). In fiscal 2013, Siemens AG management distributed an ordinary dividend of 2,528 million (3.00 per share) of the fiscal 2012 earnings to

F-66

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

its shareholders. In fiscal 2012 and 2011, Siemens AG management distributed to its shareholders an ordinary dividend of 2,629 million (3.00 per share) of the fiscal 2011 earnings and 2,356 million (2.70 per share) of the fiscal 2010 earnings, respectively.

The Managing Board and the Supervisory Board proposed a dividend of 3.00 per share of the fiscal 2013 Siemens AG earnings, in total representing approximately 2.5 billion in expected payments. Payment of the proposed dividend is contingent upon approval by the shareholders at the Annual Shareholders Meeting on January 28, 2014.

27. Additional capital disclosures

Siemens believes that sustainable revenue and profit development can be achieved only on the basis of a healthy capital structure. A key consideration of our capital structure management is maintaining ready access to the capital markets through various debt products and preservation of our ability to repay and service our debt obligations over time. Siemens set a capital structure target range of 0.5 – 1.0. The ratio is defined as the item Adjusted industrial net debt divided by the item Adjusted EBITDA (continuing operations). This financial performance measure indicates the approximate amount of time in years that would be needed to pay off Adjusted industrial net debt through continuing income, without taking into account interest, taxes, depreciation and amortization.

Siemens calculates the item Adjusted industrial net debt as set forth in the table below:

	September 30,	
	2013	2012
	(in millions of)	
Short-term debt and current maturities of long-term debt ⁽¹⁾	1,944	3,826
Plus: Long-term debt ⁽¹⁾	18,509	16,880
Less: Cash and cash equivalents	(9,190)	(10,891)
Less: Current available-for-sale financial assets	(601)	(524)
Net debt	10,663	9,292
Less: SFS Debt ⁽²⁾	(15,600)	(14,558)
Plus: Post-employment benefits ⁽³⁾	9,265	9,801
Plus: Credit guarantees	622	326
Less: 50% nominal amount hybrid bond ⁽⁴⁾	(899)	(920)
Less: Fair value hedge accounting adjustment ⁽⁵⁾	(1,247)	(1,670)
Adjusted industrial net debt	2,805	2,271
Adjusted EBITDA (continuing operations)	8,215	9,613
Adjusted industrial net debt / adjusted EBITDA (continuing operations)	0.34	0.24

(1) The item Short-term debt and current maturities of long-term debt as well as the item Long-term debt included in total fair value hedge accounting adjustments of 1,247 million and 1,670 million for the fiscal year ended September 30, 2013 and 2012, respectively.

(2) The adjustment considers that both Moody's and S&P view SFS as a captive finance company. These rating agencies generally recognize and accept higher levels of debt attributable to captive finance subsidiaries in determining credit ratings. Following this concept, Siemens excludes SFS Debt in order to derive an adjusted industrial net debt which is not affected by SFS's financing activities.

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

- (3) To reflect Siemens' total post-employment benefit liability, adjusted industrial net debt includes line item Post-employment benefits as presented in the Consolidated Statements of Financial Position.
- (4) The adjustment for our hybrid bond considers the calculation of this financial ratio applied by rating agencies to classify 50% of our hybrid bond as equity and 50% as debt. This assignment reflects the characteristics of our hybrid bond such as a long maturity date and subordination to all senior and debt obligations.

F-67

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(5) Debt is generally reported with a value representing approximately the amount to be repaid. However for debt designated in a hedging relationship (fair value hedges), this amount is adjusted by changes in market value mainly due to changes in interest rates. Accordingly Siemens deducts these changes in market value in order to derive an amount of debt that approximately will be repaid. Siemens believes this is a more meaningful figure for the calculation presented above.

SFS capital structure differs from the capital structure of Siemens industrial business, as SFS business is capital intensive and requires a larger amount of debt to finance its operations, in particular to finance SFS's asset growth strategy. The following table provides information on the capital structure of SFS as of September 30, 2013 and 2012:

	September 30,	
	2013	2012
	(in millions of €)	
Allocated equity	1,938	1,790
SFS debt	15,600	14,558
Debt to equity ratio	8.05	8.13

For purposes of measuring capital efficiency at SFS, equity capital is allocated to SFS. Allocated equity capital differs from book capital as it is mainly determined and influenced by the size and quality of its portfolio of commercial finance as well as project and structured finance assets (primarily loans and leases) and equity investments. This allocation is designed to cover the risks of the underlying business. The actual risk of the SFS portfolio is evaluated and controlled on a regular basis.

Given the favorable capital market conditions at the end of fiscal 2012, Siemens announced in August 2012 that it would adjust its capital structure through share buybacks amounting to up to 3 billion by December 30, 2012. In fiscal 2012, the Company repurchased 23,202,500 treasury shares at a weighted average share price of €76.14. At the beginning of fiscal 2013 Siemens repurchased further 14,746,786 treasury shares at a weighted average price of €78.14 and completed this share buyback program in November 2012. In addition, in fiscal 2013, Siemens repurchased as many treasury shares as necessary to keep the number of treasury shares at a set level until the effective date of the spin-off of OSRAM and fulfilled commitments for share-based compensation through treasury shares.

In fiscal 2014, Siemens may again fulfill commitments for share-based compensation through treasury shares.

A key factor in maintaining a strong financial profile is our credit rating which is affected by, among other factors, Siemens' capital structure, profitability, ability to generate cash flow, geographic and product diversification as well as Siemens' competitive market position. Siemens' current corporate credit ratings from Moody's Investors Service (Moody's) and Standard & Poor's Ratings Services (S&P) are noted as follows:

	September 30,		September 30,	
	2013		2012	
	Moody's		Moody's	
	Investors		Investors	
	Service	S&P	Service	S&P
Long-term debt	Aa3	A+	Aa3	A+
Short-term debt	P-1	A-1+	P-1	A-1+

On May 14, 2013, Moody's changed its outlook for Siemens' credit rating from stable to negative, stating that despite the group's substantial cost reduction initiatives, we expect its profitability, cash flow generation and capital structure to be weaker than anticipated in 2013 and 2014. A rating outlook is an opinion regarding the likely direction of an issuer's long-term credit rating over the medium-term. Rating outlooks of Moody's fall into the following six categories: positive, negative, stable, developing, ratings under review and no outlook.

At the same time, Moody's affirmed our Aa3 long-term and our P-1 short-term credit rating. The classification Aa is the second highest category within Moody's long-term credit rating scale. The numerical

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

modifier 3 indicates a ranking in the lower end of that category. The classification P-1 is the highest available rating in the prime rating system of Moody's, which assesses issuers' ability to honor senior financial obligations and contracts. It applies to senior unsecured obligations with an original maturity of less than one year.

S&P made no rating changes in fiscal 2013. S&P's long-term credit rating for Siemens is A+ and the rating outlook is stable. Within S&P's long-term credit rating scale, A is the third highest long-term rating category. The modifier + indicates that our long-term debt ranks in the upper end of the A category. Rating outlooks of S&P fall into the following four categories: positive, negative, stable and developing. S&P's short-term rating is A-1+, which is the highest rating within S&P's short-term rating scale.

28. Commitments and contingencies**Guarantees and other commitments**

The following table presents the undiscounted amount of maximum potential future payments for each major group of guarantee:

	September 30,	
	2013	2012
	(in millions of €)	
Guarantees		
Credit guarantees	622	326
Guarantees of third-party performance	1,593	1,562
HERKULES obligations	1,890	2,290
Other	1,864	3,632
	5,970	7,810

Item Credit guarantees cover the financial obligations of third parties in cases where Siemens is the vendor and (or) contractual partner. These guarantees generally provide that in the event of default or non-payment by the primary debtor, Siemens will be required to settle such financial obligations. In addition, Siemens provides credit guarantees generally as guarantees for credit-lines with variable utilization to joint ventures and associated and other companies accounted for using the equity method. The maximum amount of these guarantees is subject to the outstanding balance of the credit or, in case where a credit line is subject to variable utilization, the nominal amount of the credit line. These guarantees have terms up to twelve years and five years, respectively, in fiscal 2013 and 2012. Except for statutory recourse provisions against the primary debtor, credit guarantees are generally not subject to additional contractual recourse provisions. As of September 30, 2013, item credit guarantees include 299 million relating to a reclassification of a disposal group from discontinued to continuing operations. The Company accrued 38 million and 28 million, relating to credit guarantees as of September 30, 2013 and 2012, respectively.

Furthermore, Siemens issues guarantees of third-party performance, which include performance bonds and guarantees of advanced payments in cases where Siemens is the general or subsidiary partner in a consortium. In the event of non-fulfillment of contractual obligations by the consortium partner(s), Siemens will be required to pay up to an agreed-upon maximum amount. These agreements span the term of the contract, typically ranging from three months to ten years in fiscal 2013 and seven years in fiscal 2012. Generally, consortium agreements provide for fallback guarantees as a recourse provision among the consortium partners. As of September 30, 2013 and 2012, the Company accrued 66 million and 83 million, respectively, relating to performance guarantees.

In fiscal 2007, The Federal Republic of Germany commissioned a consortium consisting of Siemens and IBM Deutschland GmbH (IBM) to modernize and operate the non-military information and communications

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

technology of the German Federal Armed Forces (Bundeswehr). This project is called HERKULES. A project company, BWI Informationstechnik GmbH (BWI), provides the services required by the terms of the contract. Siemens is a shareholder in the project company. The total contract value amounts to a maximum of approximately 6 billion. In connection with this project, Siemens issued several guarantees connected to each other legally and economically in favor of the Federal Republic of Germany and of the consortium member IBM in December 2006. The guarantees ensure that BWI has sufficient resources to provide the required services and to fulfill its contractual obligations. These guarantees are listed as a separate item HERKULES obligations in the table above due to their compound and multilayer nature. Total future payments potentially required by Siemens amount to 1.89 billion and 2.29 billion as of September 30, 2013 and 2012, respectively and will be reduced by approximately 400 million per year over the remaining four-year contract period as of September 30, 2013. Yearly payments under these guarantees are limited to 400 million plus, if applicable, a maximum of 90 million in unused guarantees carried forward from the prior year.

Item Other includes indemnifications issued in connection with dispositions of business entities. Such indemnifications, if customary to the relevant transactions, may protect the buyer from potential tax, legal and other risks in conjunction with the purchased business entity. Indemnifications include those for EN, disposed of in fiscal 2008, and Siemens IT Solutions and Services disposed of in fiscal 2011. As of September 30, 2013 and 2012, the total amount accrued for guarantees in item Other is 242 million and 528 million, respectively. Item Other guarantees decreased in fiscal 2013, mainly due to the expiration of indemnifications issued in connection with dispositions of business entities.

As of September 30, 2012, in addition to guarantees disclosed above, Siemens had credit guarantees of 309 million, guarantees of third-party performance of 4 million and other guarantees of 82 million (as of September 30, 2013, 3 million) relating to discontinued operations. Contingencies relating to businesses held for disposal not classified as discontinued operations are included in the above tabular.

As of September 30, 2013 and 2012, future payment obligations under non-cancellable operating leases are as follows:

	September 30,	
	2013	2012
	(in millions of)	
Within one year	807	812
After one year but not more than five years	1,556	1,586
More than five years	757	770
	3,120	3,168

Total operating rental expense for the years ended September 30, 2013, 2012 and 2011 were 1,073 million, 1,072 million and 1,034 million, respectively. Total sublease income amounts to 62 million, 74 million and 79 million, respectively in fiscal 2013, 2012 and 2011. Total future minimum sublease payments expected to be received under non-cancellable subleases as of September 30, 2013, 2012 and 2011 amount to 139 million, 162 million and 257 million, respectively.

As of September 30, 2013 and 2012, the Company has commitments to make capital contributions to the equity of various companies of 223 million and 211 million, respectively.

The Company is jointly and severally liable and has capital contribution obligations as a partner in commercial partnerships and as a participant in various consortiums.

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

29. Legal proceedings

Public corruption proceedings

Governmental and related proceedings

As previously reported, in May 2011 Siemens AG voluntarily reported a case of attempted public corruption in connection with a project in Kuwait in calendar 2010 to the U.S. Department of Justice, the SEC, and the Munich public prosecutor. The Munich public prosecutor discontinued the investigations, which related to certain former employees, but imposed conditions on them. Siemens is cooperating with the U.S. authorities in their ongoing investigations.

As previously reported, in July 2011 the Nuremberg-Fuerth public prosecutor notified Siemens AG of an investigation against several employees in connection with payments related to the healthcare business in the Caribbean. In November 2012, the Nuremberg-Fuerth public prosecutor discontinued its investigation.

As previously reported, in July 2011 the Munich public prosecutor notified Siemens AG of an investigation against a former employee in connection with payments to a supplier related to the oil and gas business in Central Asia from calendar 2000 to 2009. Siemens is cooperating with the public prosecutor.

As previously reported, in October 2011, the Turkish Prime Ministry Inspection Board notified Siemens Sanayi ve Ticaret A.S., Turkey, of an investigation in connection with alleged bribery in Turkey and Iraq from calendar 1999 to 2007. Siemens is cooperating with the authority.

In February 2013, Siemens AG and the European Investment Bank (EIB) signed a settlement agreement addressing alleged past violations of the EIB's anti-fraud policy. The settlement includes a commitment by Siemens that the concerned business unit will voluntarily refrain from bidding on projects financed by the EIB for a period of 18 months. Further, Siemens commits to provide funds, totaling 13.5 million over five years, to organizations or institutions that promote good governance and the fight against corruption.

Since July 2013, following the voluntary self-reporting of certain facts by Siemens Ltda. Brazil to the Brazilian antitrust authorities in May 2013 mentioned below, several Brazilian prosecutorial offices have initiated or resumed investigations into alleged criminal conduct, including alleged bribe payments, anticompetitive conduct and undue influencing of public tenders, in connection with several metro transport projects. Among the resumed investigations are in particular two cases that had been reported before, namely the investigations by the Brasilia and Sao Paulo public prosecutors related to alleged misconduct in calendar 2007 and around 2000, respectively. Siemens is cooperating with the authorities.

In August 2013, a Brazilian Appellate Court upheld a decision to suspend Siemens Ltda. Brazil from participating in public bids and signing contracts with public administrations in Brazil for a five year term, based on alleged irregularities in calendar 1999 and 2004 public tenders. Siemens is seeking remedial action against the decision of the Appellate Court.

As previously reported, Siemens AG had filed a request for arbitration against the Republic of Argentina (Argentina) with the International Center for Settlement of Investment Disputes (ICSID) of the World Bank. Siemens AG claimed that Argentina had unlawfully terminated its contract with Siemens for the development and operation of a system for the production of identity cards, border control, collection of data and voters registers (DNI project) and thereby violated the Bilateral Investment Protection Treaty between Argentina and Germany (BIT). A unanimous decision on the merits was rendered by the ICSID arbitration tribunal in February 2007, awarding Siemens AG, inter alia, compensation in the amount of US\$217.8 million, plus compound interest thereon at a rate of 2.66% since May 18, 2001. Argentina subsequently filed applications with the ICSID aiming at the annulment and reversal of the decision and a stay of enforcement of the arbitral award. In August 2009, Argentina and Siemens AG reached an agreement to mutually settle the case and discontinue any and all civil proceedings in connection with the case without acknowledging any legal obligations or claims. No

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

payment was made by either party. As previously reported, the Argentinean Anti-Corruption Authority is conducting an investigation against individuals into corruption of government officials in connection with the award of the contract for the DNI project to Siemens in calendar 1998. Searches were undertaken at the premises of Siemens Argentina and Siemens IT Services S.A. in Buenos Aires in August 2008 and in February 2009. The Company is cooperating with the Argentinean Authorities. The Argentinean investigative judge also repeatedly requested judicial assistance from the Munich public prosecutor and the federal court in New York. In December 2011, the U.S. Securities and Exchange Commission (SEC) and U.S. Department of Justice filed an indictment against nine individuals based on the same facts as the investigation of the Argentinean Anti-Corruption Authority. Most of these individuals are former Siemens employees. The former member of the Managing Board of Siemens AG, Dr. Uriel Sharef, is also involved. Siemens AG is not party to the proceedings.

As previously reported, in February 2010 a Greek Parliamentary Investigation Committee (GPIC) was established to investigate whether any politicians or other state officials in Greece were involved in alleged wrong-doing of Siemens in Greece. The GPIC's investigation was focused on possible criminal liability of politicians and other state officials. Greek public prosecutors are separately investigating certain fraud and bribery allegations involving among others former board members and former executives of Siemens A.E., Elektrotechnische Projekte und Erzeugnisse, Greece (Siemens A.E.), and Siemens AG. In January 2011, the GPIC alleged in a letter to Siemens A.E. that the damage suffered by the Greek state amounted to at least 2 billion. Furthermore, the GPIC issued a report repeating these allegations. In addition, the Hellenic Republic Minister of State indicated in a letter to Siemens that the Greek state will seek compensation from Siemens for the alleged damage. In April 2012, the Greek Parliament approved a settlement agreement between Siemens and the Greek State, the material provisions of which include the following: Siemens waives public sector receivables in the amount of 80 million. Furthermore Siemens agrees to spend a maximum of 90 million on various anti-corruption and transparency initiatives, as well as university and research programs and to provide 100 million of financial support to Siemens A.E. to ensure its continued presence in Greece. In exchange, the Greek State agrees to waive all civil claims and all administrative fines related to the corruption allegations and to utilize best efforts to resolve all pending disputes between Siemens and the Greek state-companies or its public authorities.

In February 2012, the Munich public prosecutor notified Siemens AG of a request for mutual assistance in criminal matters by the Swiss Federal Prosecution authority. The investigation of the Swiss Federal Prosecution involved the Swedish subsidiary Siemens Industrial Turbomachinery (SIT) in connection with alleged payments to employees of a Russian natural gas production company between calendar 2004 and 2006. In July 2013, the Swiss Federal Prosecution launched a criminal investigation against SIT for organizational neglect. In September 2013, the investigation was discontinued due to a settlement with the Swiss Federal Prosecution that included a restitution payment to a nonprofit organization and a compensation claim relating to forfeiture of profits in the lower double digit US\$ million range.

As previously reported, the Vienna public prosecutor, Austria, is conducting an investigation into payments between calendar 1999 and 2006 relating to Siemens Aktiengesellschaft Österreich, Austria, and its subsidiary Siemens VAI Metal Technologies GmbH & Co., Austria, for which valid consideration could not be identified. In September 2011, the Vienna public prosecutor extended the investigations to include a potential corporate liability of Siemens AG Austria for tax evasion. Siemens is cooperating with the authorities.

As previously reported, in December 2009, the Anti-Corruption Commission of Bangladesh (ACC) sent a request for information to Siemens Bangladesh related to telecommunications projects of Siemens former Communications (Com) Group undertaken prior to calendar 2007. In January 2010, Siemens Bangladesh was informed that in a related move the Anti Money Laundering Department of the Central Bank of Bangladesh is conducting a special investigation into certain accounts of Siemens Bangladesh and of former employees of Siemens Bangladesh in connection with transactions for Com projects undertaken in the period from calendar 2002 to 2006. In February 2010 and June 2012, the ACC sent requests for additional information. Siemens is cooperating with the authorities.

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As previously reported, in November 2009 and in February 2010, a subsidiary of Siemens AG voluntarily self-reported possible violations of South African anti-corruption regulations in the period before calendar 2007 to the responsible South African authorities. The authorities have requested further documentation. Siemens is cooperating with the authorities.

As previously reported, in June 2010, the Frankfurt public prosecutor searched premises of Siemens in Germany in response to allegations of questionable payments relating to an Infrastructure & Cities project in Thailand. Siemens is cooperating with the authority.

As previously reported, in August 2010, the Inter-American Development Bank (IADB) issued a notice of administrative proceedings against, among others, Siemens IT Solutions and Services Argentina alleging fraudulent misstatements and antitrust violations in connection with a public invitation to tender for a project in the province of Cordoba, Argentina, in calendar 2003. Siemens is cooperating with the IADB.

As previously reported, in August 2010, the IADB issued a notice of administrative proceedings against, among others, Siemens Venezuela alleging fraudulent misstatements and public corruption in connection with a public invitation to tender for healthcare projects in the Venezuelan provinces of Anzoategui and Merida in calendar 2003. Siemens is cooperating with the IADB.

The Company remains subject to corruption-related investigations in several jurisdictions around the world. As a result, additional criminal or civil sanctions could be brought against the Company itself or against certain of its employees in connection with possible violations of law. In addition, the scope of pending investigations may be expanded and new investigations commenced in connection with allegations of bribery or other illegal acts. The Company's operating activities, financial results and reputation may also be negatively affected, particularly as a result of penalties, fines, disgorgements, compensatory damages, third-party litigation, including with competitors, the formal or informal exclusion from public invitations to tender, or the loss of business licenses or permits. Additional expenses and provisions, which could be material, may need to be recorded in the future for penalties, fines, damages or other charges in connection with the investigations.

Civil litigation

As previously reported, Siemens AG reached a settlement with nine out of eleven former members of the Managing and Supervisory Board in December 2009. The settlement relates to claims of breaches of organizational and supervisory duties in view of the accusations of illegal business practices that occurred in the course of international business transactions in calendar 2003 to 2006 and the resulting financial burdens for the Company. The Annual Shareholders' Meeting approved all nine settlements between the Company and the former members of the Managing and Supervisory Board in January 2010. The shareholders also approved a settlement agreement between the Company and its directors and officers insurers regarding claims in connection with the D&O insurance of up to 100 million. Siemens recorded 96 million gains, net of costs, from the D&O insurance and the nine settlements. In January 2010, Siemens AG filed a lawsuit with the Munich District Court I against the two former board members who were not willing to settle, Dr. Thomas Ganswindt and Heinz-Joachim Neubürger. The criminal proceedings pending with the Munich District Court I against Dr. Ganswindt were terminated in July 2011. Against this backdrop, Siemens AG reached a settlement with Dr. Thomas Ganswindt in November 2012, which was subject to the approval of the Annual Shareholders' Meeting. The Annual Shareholders' Meeting of Siemens AG approved the settlement agreement with Dr. Ganswindt in January 2013. Therefore Siemens withdrew from the proceedings pending before the Munich District Court I in March 2013, as provided for in the settlement. The lawsuit against Heinz-Joachim Neubürger is still pending. In January 2013, Mr. Neubürger filed a counter claim against Siemens AG, requesting the transfer of Stock Awards in fiscal 2004 and 2005 plus dividends and interest. Siemens AG is contesting this counterclaim.

As previously reported, in June 2008, the Republic of Iraq filed an action requesting unspecified damages against 93 named defendants with the United States District Court for the Southern District of New York on the

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

basis of findings made in the Report of the Independent Inquiry Committee into the United Nations Oil-for-Food Programme. Siemens S.A.S. France, Siemens Sanayi ve Ticaret A.S., Turkey, and the former Siemens subsidiary OSRAM Middle East FZE, Dubai, are among the 93 named defendants. In February 2013, the court dismissed the Republic of Iraq's action with prejudice. The Republic of Iraq has appealed this decision.

Antitrust proceedings

As previously reported, in February 2007, the European Commission launched an investigation into possible antitrust violations involving European producers of power transformers, including Siemens AG and VA Technologie AG, Austria (VA Tech), which Siemens acquired in July 2005. The German Antitrust Authority (Bundeskartellamt) has become involved in the proceeding and is responsible for investigating those allegations that relate to the German market. Power transformers are electrical equipment used as major components in electric transmission systems in order to adapt voltages. In October 2009, the European Commission imposed fines totaling 68 million on seven companies with regard to a territorial market sharing agreement related to Japan and Europe. Siemens was not fined because it had voluntarily disclosed this aspect of the case to the authorities. The German Antitrust Authority continued its investigation with regard to the German market. In September 2012, the German Antitrust Authority and the Company ended the legal proceeding by entering into a settlement agreement. Siemens agreed to pay a fine in the single-digit million range.

As previously reported, in April 2007, Siemens AG and former VA Tech companies filed actions before the European Court of First Instance in Luxemburg against the decisions of the European Commission dated January 24, 2007, to fine Siemens and former VA Tech companies for alleged antitrust violations in the European Market of high-voltage gas-insulated switchgear between calendar 1988 and 2004. Gas-insulated switchgear is electrical equipment used as a major component for power substations. The fine imposed on Siemens AG amounted to 396.6 million and was paid by the Company in calendar 2007. The fine imposed on former VA Tech companies, which Siemens AG acquired in July 2005, amounted to 22.1 million. In addition, former VA Tech companies were declared jointly liable with Schneider Electric for a separate fine of 4.5 million. In March 2011, the European Court of First Instance dismissed the case regarding the fine imposed on Siemens AG and re-calculated the fines for the former VA Tech companies. Former VA Tech companies were declared jointly liable with Schneider Electric for a fine of 8.1 million. Siemens AG and former VA Tech companies appealed the decision in May 2011.

In addition to these proceedings, authorities in Brazil, the Czech Republic and Slovakia are conducting investigations into comparable possible antitrust violations. In October 2010, the High Court of New Zealand dismissed corresponding charges against Siemens.

As previously reported, in September 2011, the Israeli Antitrust Authority requested Siemens to present its legal position regarding an alleged anti-competitive arrangement between April 1988 and April 2004 in the field of gas-insulated switchgear. In September 2013, the Israeli Antitrust Authority concluded that Siemens AG was a party to an illegal restrictive arrangement regarding the Israeli gas-insulated switchgear market between 1988 and 2004, with an interruption from October 1999 to February 2002. The Company is considering to appeal this decision.

Based on the above mentioned conclusion of the Israel Antitrust Authority, electricity consumer groups filed two class-actions for cartel damages against a number of companies including Siemens AG with an Israeli District Court in September 2013. The plaintiffs seek compensation for alleged damages, which are claimed to amount to 582 million. In addition, according to an ad hoc-notice of the Israel Electric Corporation (IEC), the IEC is concurrently preparing to file a separate claim for damages against Siemens AG and other companies that allegedly formed a cartel in the Israeli gas-insulated switchgear market. Siemens AG is defending itself.

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As previously reported, in November 2010, the Greek Competition Authority searched the premises of Siemens S.A. in Athens in response to allegations of anti-competitive practices in the field of telecommunication and security. In August 2012, the proceedings were discontinued without sanctions based on the settlement agreement between Siemens and the Greek State mentioned above.

In connection with the January 24, 2007 decision of the European Commission regarding alleged antitrust violations in the high-voltage gas-insulated switchgear market, claims are being made against Siemens. Among others, a claim was filed by National Grid Electricity Transmission Plc. (National Grid) with the High Court of England and Wales in November 2008. 21 companies have been named as defendants, including Siemens AG and various of its subsidiaries. National Grid originally asserted claims in the aggregate amount of approximately £249 million for damages and compound interest. In November 2012, National Grid increased the aggregate amount to £364 million due to accrued compound interest. Siemens believes National Grid's claim to be without merit. As discussed, the European Commission's decision has been appealed to the European Court of First Instance. In June 2009, the High Court granted a stay of the proceedings pending before it. In June 2009, the Siemens defendants filed their answers to the complaint and requested National Grid's claim to be rejected. A case management conference was held in November 2012. The High Court of England and Wales lifted the stay of the proceedings granted in June 2009 and decided on the scope of further discovery and set a time schedule leading up to a court session expected to be held in 2014.

As previously reported, in December 2010 and in March 2011, the Turkish Antitrust Authority searched the premises of several diagnostic companies including, among others, Siemens Healthcare Diagnostik Ticaret Limited Sirketi in Turkey, in response to allegations of anti-competitive agreements. Siemens cooperated with the authority. In May 2012, the Turkish Antitrust Authority decided that the law had not been violated, and discontinued the proceedings.

As previously reported, the Italian Antitrust Authority searched the premises of several healthcare companies, among others those of Siemens Healthcare Diagnostics S.r.l. and Siemens S.p.A. in February 2010. The investigation addresses allegations of anti-competitive agreements in relation to a tender of the procurement entity for the public healthcare sector in the region of Campania for the supply of medical equipment in calendar 2009. In May 2011, the Italian Antitrust Authority sent a Statement of Objections to the companies under investigation which confirmed that the proceedings against Siemens Healthcare Diagnostics S.r.l. were closed, but accused Siemens S.p.A. of having participated in an anti-competitive arrangement. In August 2011, the Italian Antitrust Authority fined several companies, including Siemens S.p.A. for alleged anti-competitive behavior. The fine imposed on Siemens S.p.A. amounts to 1.1 million. The company appealed the decision. In April 2012, the Regional Administrative Court overturned the decision of the Italian Antitrust Authority. In November 2012, the Italian Antitrust Authority appealed the decision of the Regional Administrative Court.

As previously reported, in September 2011, the Competition Commission of Pakistan requested Siemens Pakistan Engineering Co. Ltd., Pakistan (Siemens Pakistan), to present its legal position regarding an alleged anti-competitive arrangement since calendar 2007 in the field of transformers and air-insulated switchgears. Siemens cooperated with the authority. In December 2011, Siemens Pakistan filed a leniency application. In April 2012, the Competition Commission of Pakistan accepted the leniency application and granted Siemens Pakistan a 100% penalty reduction for the alleged behavior.

As previously reported, in June 2007, the Turkish Antitrust Agency confirmed its earlier decision to impose a fine in an amount equivalent to 6 million on Siemens Sanayi ve Ticaret A.S., Turkey, based on alleged antitrust violations in the traffic lights market. Siemens Sanayi ve Ticaret A.S. has appealed this decision and this appeal is still pending.

In May 2012, the Brazilian Anti-Trust Authority notified Siemens Ltda., Brazil of an investigation into anti-trust behavior in the field of air-insulated switchgear and other products from calendar 1997 to 2006. Siemens is cooperating with the authorities.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As mentioned above, in May 2013, Siemens Ltda. Brazil entered into a leniency agreement with the Administrative Council for Economic Defense and other relevant authorities relating to several Brazilian metro transport projects. The Company is cooperating with the authorities. It cannot be excluded that significant cartel damages claims will be brought by customers against Siemens Ltda. Brazil based on the outcome of the investigations.

Other proceedings

As previously reported, Siemens AG is a member of a supplier consortium that has been contracted to construct the nuclear power plant Olkiluoto 3 in Finland for Teollisuuden Voima Oyj (TVO) on a turnkey basis. Siemens AG's share of the consideration to be paid to the supplier consortium under the contract is approximately 27%. The other member of the supplier consortium is a further consortium consisting of Areva NP S.A.S. and its wholly-owned subsidiary, Areva NP GmbH. The agreed completion date for the nuclear power plant was April 30, 2009. Completion of the power plant has been delayed for reasons which are in dispute. In December 2011, the supplier consortium informed TVO that the completion of the plant is expected in August 2014. In February 2013 TVO announced that it is preparing for the possibility that the start of the regular electricity production of the plant may be postponed until calendar year 2016. The supplier consortium and TVO continue to assess the schedule and the risk of further slippage in detail. The final phases of the plant completion require the full cooperation of all parties involved. In December 2008, the supplier consortium filed a request for arbitration against TVO demanding an extension of the construction time, additional compensation, milestone payments, damages and interest. In June 2011, the supplier consortium increased its monetary claim to 1.94 billion. TVO rejected the claims and made counterclaims against the supplier consortium consisting primarily of damages due to the delay. In June 2012, the arbitral tribunal rendered a partial award ordering the release of withheld milestone payments to the supplier consortium of approximately 101 million plus interest. As of September 2012, TVO's alleged counterclaims amounted to 1.59 billion based on a delay of up to 56 months. Based on a completion in August 2014, TVO estimates that its counterclaims amount to 1.77 billion. The further delay beyond 56 months (beyond December 2013) as well as the further slippage in the schedule currently under assessment by the supplier consortium and TVO could lead TVO to further increase its counterclaims. In October 2013 the supplier consortium increased its claim for an extension of construction time and its monetary claims to 2.65 billion. The arbitration proceedings may continue for several years.

As previously reported, Siemens AG terminated its joint venture with Areva S.A. (Areva) in January 2009. Thereafter Siemens AG entered into negotiations with the State Atomic Energy Corporation Rosatom (Rosatom) with a view to forming a new partnership active in the construction of nuclear power plants, in which it would be a minority shareholder. In April 2009, Areva filed a request for arbitration with the ICC against Siemens AG. Areva sought an order enjoining Siemens AG from pursuing such negotiations with Rosatom, a declaration that Siemens AG is in material breach of its contractual obligations and a reduction of the price payable to Siemens AG for its stake in the Areva NP S.A.S. joint venture. The final award of the arbitral tribunal was notified in May 2011. According to this award, Siemens had to pay Areva liquidated damages of 648 million plus interest. Pursuant to the arbitral award, the disputed non-compete obligation was reduced to four years (ending in September 2013).

As previously reported, Siemens is involved in the construction of a power plant in the United States. Siemens Energy, Inc., USA, and Kvaerner North American Construction, Inc., USA (Kvaerner) are consortium partners in this project, commissioned by Longview Power LLC, USA (Longview). Foster Wheeler North America Corp, USA (Foster Wheeler) supplied the boiler for the project. Kvaerner filed an arbitration request before the American Arbitration Association in June 2011, and in October and November 2012, the parties filed claims for monetary damages against one another. The amounts claimed by Longview and Foster Wheeler from the consortium partners total approximately US\$243 million. Siemens filed claims for monetary damages of approximately US\$110 million against Longview and Foster Wheeler. Kvaerner is claiming approximately

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

US\$252.8 million from Longview and Foster Wheeler. Longview filed for bankruptcy under Chapter 11 of the US Bankruptcy Code, which may result in delay to the arbitration proceeding dealing with the claim and counterclaim.

In July 2008, Hellenic Telecommunications Organization S.A. (OTE) filed a lawsuit against Siemens AG with the district court of Munich, Germany, seeking to compel Siemens AG to disclose the outcome of its internal investigations with respect to OTE. OTE seeks to obtain information with respect to allegations of undue influence and/or acts of bribery in connection with contracts concluded between Siemens AG and OTE from calendar 1992 to 2006. In May 2009, OTE was granted access to the public prosecutor's files in Greece. At the end of July 2010, OTE expanded its claim and requested payment of damages by Siemens AG of at least 57.07 million to OTE for alleged bribery payments to OTE-employees. While Siemens AG continues to defend itself against the expanded claim, Siemens AG and OTE remain in discussions to resolve the matter.

As previously reported, Siemens A.E. entered into a subcontract agreement with Science Applications International Corporation, Delaware, USA, (SAIC) in May of 2003 to deliver and install a significant portion of a security surveillance system (the C4I project) in advance of the Olympic Games in Athens, Greece. Siemens A.E. fulfilled its obligations pursuant to the subcontract agreement. Nonetheless, the Greek government claimed errors related to the C4I-System and withheld amounts for abatement in a double-digit million range. Furthermore, the Greek government is withholding the final payment in a double-digit million range, claiming that the system has not yet been finally accepted. Although Siemens A.E. is not a contractual party of the Greek government, under Siemens A.E.'s subcontract agreement with SAIC non-payment by the Greek government also has an economic effect on Siemens A.E. SAIC has filed for arbitration contesting all the Greek government's claims and the withholding of payments. In July 2013, the arbitration court issued the arbitral award ordering the Greek State to pay 40 million to SAIC. The Greek State is contesting the enforcement of the arbitral award. The final resolution of this dispute has been complicated by public bribery and fraud allegations against Siemens A.E. in Greece, which have resulted in extensive negative media coverage concerning the C4I system.

As previously reported, Russian authorities are conducting widespread investigations regarding possible fraudulent activities of resellers and governmental officials relating to procurement of medical equipment in the public sector. As is the case with other providers of medical equipment, OOO Siemens, Russia, has received numerous information requests and inquiries were made on-site by the authorities regarding tenders in the public healthcare sector. OOO Siemens is cooperating in the ongoing investigations which also relate to certain individual employees.

As previously reported, in April 2009, the Defense Criminal Investigative Service of the U.S. Department of Defense conducted a search at the premises of Siemens Medical Solutions USA, Inc., United States, in Malvern, Pennsylvania, in connection with an investigation relating to a Siemens contract with the U.S. Department of Defense for the provision of medical equipment. Siemens is cooperating with the authorities.

As previously reported, in June 2009, Siemens AG and two of its subsidiaries voluntarily self-reported, among others, possible violations of U.S. Export Administration Regulations to the responsible U.S. authorities. In October, 2011, the U.S. Department of Commerce notified Siemens that it closed its case without taking further action. In January 2013, the U.S. Department of the Treasury notified Siemens that it closed its case without taking further action.

As previously reported, in December 2011, the United States Attorney's Office for the Northern District of New York served a Grand Jury subpoena on Siemens that seeks records of consulting payments for business conducted by the Building Technologies Business Unit in New York State over the period from January 1, 2000 through September 30, 2011. In June 2013, the authority notified Siemens that it closed its case.

In February 2012, the United States Attorney's Office for the Eastern District of New York served a subpoena on Siemens Healthcare Diagnostics Inc., United States, for information relating to a diagnostics process. Siemens is cooperating with the authority.

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In January 2013, Siemens Electrical, LLC, USA (Siemens Electrical), an entity wholly-owned by Siemens Industry, Inc., USA, entered into a Deferred Prosecution Agreement (DPA) with the New York County District Attorney's Office. The DPA relates to misconduct concerning Master Electrician and Minority Business Enterprise requirements in connection with contracts with the New York City Department of Environmental Protection. The individuals responsible for the admitted misconduct were Siemens' former business partners to the predecessor to Siemens Electrical. Under the terms of the DPA, Siemens Electrical agreed to, among other things, forfeit US\$10 million. The case will be dismissed after two years if the company meets certain specified conditions under the DPA.

In March 2013, Nokia Siemens Networks Holding B.V. (NSN), Nokia Corporation and Nokia Finance International B. V. (Nokia Finance) filed a request for arbitration against Siemens AG. NSN, Nokia Corporation and Nokia Finance sought damages in the amount of 238 million for alleged breaches of the framework agreement entered into among the parties in 2007. The claims related to a contract which had been transferred to a subsidiary of NSN. In connection with the sale of Siemens AG's shares in NSN to Nokia on July 1, 2013, the parties settled the dispute.

End of October 2013 Essent Wind Nordsee Ost Planungs- und Betriebsgesellschaft mbH filed a request for arbitration against Siemens AG alleging violations of a contract for the delivery of a High Voltage Substation entered into by the parties in 2010. The claimant claims damages in an amount of 256 million plus interest and a determination that Siemens AG shall be liable for any further damages, which are claimed to amount to 152 million. Siemens AG will defend itself against this action.

For legal proceedings information required under IAS 37, Provisions, Contingent Liabilities and Contingent Assets, is not disclosed, if the Company concludes that the disclosure can be expected to seriously prejudice the outcome of the litigation.

In addition to the investigations and legal proceedings described above, Siemens AG and its subsidiaries have been named as defendants in various other legal actions and proceedings arising in connection with their activities as a global diversified group. Some of these pending proceedings have been previously disclosed. Some of the legal actions include claims or potential claims for punitive damages or claims for indeterminate amounts of damages. Siemens is from time to time also involved in regulatory investigations beyond those described above. Siemens is cooperating with the relevant authorities in several jurisdictions and, where appropriate, conducts internal investigations regarding potential wrongdoing with the assistance of in-house and external counsel. Given the number of legal actions and other proceedings to which Siemens is subject, some may result in adverse decisions. Siemens contests actions and proceedings when it considers it appropriate. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases in which claimants seek indeterminate damages, Siemens may not be able to predict what the eventual loss or range of loss related to such matters will be. The final resolution of the matters discussed in this paragraph could have a material effect on Siemens' business, results of operations and financial condition for any reporting period in which an adverse decision is rendered. However, Siemens currently does not expect its business, results of operations and financial condition to be materially affected by the additional legal matters not separately discussed in this paragraph.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****30. Additional disclosures on financial instruments**

The following table presents the carrying amounts of each category of financial assets and financial liabilities:

	September 30, 2013 2012 (in millions of)	
Financial assets:		
Loans and receivables	29,331	28,439
Cash and cash equivalents	9,190	10,891
Derivatives designated in a hedge accounting relationship	625	1,918
Financial assets held for trading	1,705	1,410
Available-for-sale financial assets	2,161	1,546
	43,010	44,203
Financial liabilities:		
Financial liabilities measured at amortized cost	29,704	30,160
Financial liabilities held for trading	887	920
Derivatives designated in a hedge accounting relationship	160	204
	30,751	31,284

The following table presents the fair values and carrying amounts of financial assets and financial liabilities measured at cost or amortized cost:

	September 30, 2013		September 30, 2012	
	Fair value	Carrying amount	Fair value	Carrying amount
	(in millions of)			
Financial assets measured at cost or amortized cost				
Trade and other receivables ⁽¹⁾	12,944	12,944	13,344	13,344
Receivables from finance leases	5,261	5,261	5,059	5,059
Cash and cash equivalents	9,190	9,190	10,891	10,891
Other non-derivative financial assets	11,126	11,126	10,036	10,036
Available-for-sale financial assets ⁽²⁾		167		293
Financial liabilities measured at cost or amortized cost				
Notes and bonds	18,742	18,491	18,460	18,212
Trade payables ⁽³⁾	7,599	7,599	8,036	8,036
Loans from banks and other financial indebtedness	1,821	1,832	2,340	2,334
Obligations under finance leases	167	130	202	161
Other non-derivative financial liabilities	1,651	1,651	1,418	1,418

- (1) Consists of (1) 12,932 million and 13,310 million trade receivables from the sale of goods and services in fiscal 2013 and 2012, respectively, as well as (2) 11 million and 34 million receivables included in line item Other financial assets in fiscal 2013 and 2012, respectively. As of September 30, 2013 and 2012, trade receivables from the sale of goods and services of 612 million and 685 million have a remaining term of more than twelve months.

(2) Consists of equity instruments classified as available-for-sale, for which a fair value could not be reliably measured and which are therefore recognized at cost.

(3) As of September 30, 2013 and 2012, trade payables of 32 million and 128 million have a remaining term of more than twelve months. Cash and cash equivalents includes 320 million and 199 million as of September 30, 2013 and 2012, respectively, which are not available for use by Siemens mainly due to minimum reserve requirements with banks.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As of September 30, 2013 and 2012, the carrying amount of financial assets Siemens has pledged as collateral amounted to 344 million and 500 million, respectively.

The fair values of cash and cash equivalents, trade and other receivables and trade payables with a remaining term of up to twelve months, other current financial liabilities and borrowings under revolving credit facilities approximate their carrying amount, mainly due to the short-term maturities of these instruments.

Fixed-rate and variable-rate receivables with a remaining term of more than twelve months, including receivables from finance leases, are evaluated by the Company based on parameters such as interest rates, specific country risk factors, individual creditworthiness of the customer, and the risk characteristics of the financed project. Based on this evaluation, allowances for these receivables are recognized. As of September 30, 2013 and 2012, the carrying amounts of such receivables, net of allowances, approximate their fair values.

The fair value of quoted notes and bonds is based on price quotations at the period-end date. The fair value of unquoted notes and bonds, loans from banks and other financial indebtedness, obligations under finance leases as well as other non-current financial liabilities is estimated by discounting future cash flows using rates currently available for debt of similar terms and remaining maturities.

Financial instruments categorized as financial assets and financial liabilities measured at fair value are presented in the following table:

	September 30, 2013	2012
	(in millions of €)	
Financial assets measured at fair value		
Available-for-sale financial assets	1,994	1,252
Derivative financial instruments	2,330	3,328

	1,047	1,125

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

The fair value of available-for-sale financial assets quoted in an active market is based on price quotations at the period-end date. The fair value of unquoted debt instruments is estimated by discounting future cash flows using current market interest rates.

The Company limits default risks resulting from derivative financial instruments by a careful counterparty selection. Derivative financial instruments are generally transacted with financial institutions with investment

F-80

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

grade credit ratings. The fair valuation of derivative financial instruments at Siemens incorporates all factors that market participants would consider, including the counterparties' credit risks. The exact calculation of fair values of derivative financial instruments depends on the specific type of instrument:

Derivative interest rate contracts The fair values of derivative interest rate contracts (e.g. interest rate swap agreements) are estimated by discounting expected future cash flows using current market interest rates and yield curves over the remaining term of the instrument. Interest rate futures and interest rate options are valued on the basis of quoted market prices when available. If quoted market prices are not available, interest rate options are valued based on option pricing models.

Derivative currency contracts The fair value of foreign currency exchange contracts is based on forward exchange rates. Currency options are valued on the basis of quoted market prices or on estimates based on option pricing models.

Derivative commodity contracts The fair value of commodity swaps is based on forward commodity prices. Commodity options are valued on the basis of quoted market prices or on estimates based on option pricing models.

In determining the fair values of the derivative financial instruments, no compensating effects from underlying transactions (e.g. firm commitments and forecast transactions) are taken into consideration.

The following table allocates financial assets and financial liabilities measured at fair value to the three levels of the fair value hierarchy.

	Level 1	September 30, 2013 (in millions of)		Total
		Level 2	Level 3	
Financial assets measured at fair value				
Available-for-sale financial assets	1,884	110		1,994
Derivative financial instruments		2,330		2,330
Total	1,884	2,440		4,324
Financial liabilities measured at fair value				
Derivative financial instruments		1,047		1,047
	Level 1	September 30, 2012 (in millions of)		Total
		Level 2	Level 3	
Financial assets measured at fair value				
Available-for-sale financial assets	1,252			1,252
Derivative financial instruments		3,328		3,328
Total	1,252	3,328		4,580
Financial liabilities measured at fair value				
Derivative financial instruments		1,125		1,125

The levels of the fair value hierarchy and its application to our financial assets and financial liabilities are described below:

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

Level 1: quoted prices in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: inputs for assets or liabilities, not based on observable market data.

F-81

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Net gains (losses) of financial instruments are as follows:

	Year ended September 30,		
	2013	2012	2011
	(in millions of)		
Cash and cash equivalents	(1)	11	
Available-for-sale financial assets	(99)	83	1,522
Loans and receivables	(178)	(238)	(124)
Financial liabilities measured at amortized cost	408	(258)	(28)
Financial assets and financial liabilities held for trading	363	(189)	(90)

Net gains (losses) in fiscal 2013, 2012 and 2011 on available-for-sale financial assets include net gains on derecognition as well as impairment losses. In fiscal 2011, net gains on derecognition mainly comprise 1,520 million disposal gain related to the termination of the Areva NP S.A.S. joint venture.

Net losses on loans and receivables contain changes in valuation allowances, gains or losses on derecognition as well as recoveries of amounts previously written-off. Net gains (losses) in fiscal 2013, 2012 and 2011 on financial liabilities measured at amortized cost are comprised of gains (losses) from derecognition and the ineffective portion of fair value hedges. Net gains (losses) in fiscal 2013, 2012 and 2011 on financial assets and financial liabilities held for trading consist of changes in the fair value of derivative financial instruments, including interest income and expense, for which hedge accounting is not applied.

The amounts presented include foreign currency gains and losses from the realization and valuation of the financial assets and liabilities mentioned above.

31. Derivative financial instruments and hedging activities

As part of the Company's risk management program, a variety of derivative financial instruments is used to reduce risks resulting primarily from fluctuations in foreign currency exchange rates, interest rates and commodity prices.

The fair values of each type of derivative financial instruments recorded as financial assets or financial liabilities are as follows:

	September 30, 2013		September 30, 2012	
	Asset	Liability	Asset	Liability
	(in millions of)			
Foreign currency exchange contracts	416	331	343	325
Interest rate swaps and combined interest/currency swaps	1,637	261	2,577	534
Commodity swaps	35	49	36	27
Embedded derivatives	118	122	208	98
Options	123	281	164	141
Credit Default Swaps		4		
	2,330	1,047	3,328	1,125

Foreign currency exchange rate risk management

Derivative financial instruments not designated in a hedging relationship

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

The Company manages its risks associated with fluctuations in foreign currency denominated receivables, payables, debt, firm commitments and forecast transactions primarily through a Company-wide portfolio

F-82

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

approach. Under this approach the Company-wide risks are aggregated centrally, and various derivative financial instruments, primarily foreign currency exchange contracts, foreign currency swaps and options, are utilized to minimize such risks. Such a strategy does not qualify for hedge accounting treatment. Accordingly, all such derivative financial instruments are recorded at fair value on the Consolidated Statements of Financial Position, either in line items Other current financial assets (liabilities) or line items Other financial assets (liabilities); changes in fair values are charged to net income (loss).

The Company also has foreign currency derivatives, which are embedded in sale and purchase contracts denominated in a currency that is neither the functional currency of the substantial parties to the contract nor a currency which is commonly used in the economic environment in which the contract takes place. Gains (losses) relating to such embedded foreign currency derivatives are reported in line item Cost of sales in the Consolidated Statements of Income.

Hedging activities

The Company's operating units apply hedge accounting for certain significant forecast transactions and firm commitments denominated in foreign currencies. Particularly, the Company has entered into foreign currency exchange contracts to reduce the risk of variability of future cash flows resulting from forecast sales and purchases as well as firm commitments. This risk results mainly from contracts denominated in US\$ both from Siemens' operating units entering into long-term contracts, e.g. project business, and from the standard product business.

Cash flow hedges As of September 30, 2013, 2012 and 2011, the ineffective portion of cash flow hedges is not significant individually or in aggregate.

Periods in which the hedged forecast transactions or the firm commitments denominated in foreign currency are expected to impact profit or loss:

	Year ended September 30,			2019 and thereafter
	2014	2015	2016 to 2018 (in millions of)	
Expected gain (loss) to be reclassified from line item Other comprehensive income, net of income taxes into revenue or cost of sales	54	(14)	(36)	3

Interest rate risk management

Interest rate risk arises from the sensitivity of financial assets and liabilities to changes in market interest rates. The Company seeks to mitigate that risk by entering into interest rate derivatives such as interest rate swaps, options, interest rate futures and forward rate agreements.

Derivative financial instruments not designated in a hedging relationship

For the interest rate risk management relating to the Group excluding SFS' business, derivative financial instruments are used under a portfolio-based approach to manage interest risk actively relative to a benchmark. The interest rate management relating to the SFS business remains to be managed separately, considering the term structure of SFS' financial assets and liabilities on a portfolio basis. Neither approach qualifies for hedge accounting treatment. Accordingly, all interest rate derivatives held in this relation are recorded at fair value, either in line items Other current financial assets (liabilities) or in line items Other financial assets (liabilities), and changes in the fair values are charged to line item Other financial income (expenses), net. Net cash receipts and payments relating to interest rate swaps used in offsetting relationships are also recorded in line item Other financial income (expenses), net.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Fair value hedges of fixed-rate debt obligations

Under the interest rate swap agreements outstanding during the years ended September 30, 2013 and 2012, the Company has agreed to pay a variable rate of interest multiplied by a notional principle amount, and receives in return an amount equal to a specified fixed rate of interest multiplied by the same notional principal amount. These interest rate swap agreements offset an impact of future changes in interest rates designated as the hedged risk on the fair value of the underlying fixed-rate debt obligations. The interest rate swap contracts are recorded at fair value in the Company's Consolidated Statements of Financial Position and the related portion of fixed-rate debt being hedged is recorded at an amount equal to the sum of its carrying amount plus an adjustment representing the change in fair value of the debt obligations attributable to the respective interest rate risk being hedged. Changes in the fair value of interest rate swap contracts and the offsetting changes in the adjusted carrying amount of the related portion of fixed-rate debt being hedged are recognized in line item Other financial income (expenses), net in the Consolidated Statements of Income. Adjustments in the carrying amount of the debt obligations resulted in a gain (loss) of 293 million, (227) million and 184 million in fiscal 2013, 2012 and 2011, respectively. During the same period, the related swap agreements resulted in a gain (loss) of (305) million, 233 million and (189) million, respectively. Accordingly, the net effect recognized in line item Other financial income (expenses), net, representing the ineffective portion of the hedging relationship, amounts to (12) million, 7 million and (5) million in fiscal 2013, 2012 and 2011, respectively. Net cash receipts and payments relating to such interest rate swap agreements are recorded as interest expenses.

The Company had interest rate swap contracts to pay variable rates of interest of an average of 0.3%, 0.5% and 1.3% as of September 30, 2013, 2012 and 2011, respectively and received fixed rates of interest (average rate of 3.5%, 5.1% and 5.3% as of September 30, 2013, 2012 and 2011, respectively). The notional amount of indebtedness hedged as of September 30, 2013, 2012 and 2011 was 7,100 million, 11,253 million and 12,584 million, respectively. This changed 41%, 66% and 91% of the Company's underlying notes and bonds from fixed interest rates into variable interest rates as of September 30, 2013, 2012 and 2011, respectively. The notional amounts of these contracts mature at varying dates based on the maturity of the underlying hedged items. The net fair value of interest rate swap contracts (excluding accrued interest) used to hedge indebtedness as of September 30, 2013, 2012 and 2011 was 385 million, 1,586 million and 1,360 million, respectively. To reduce counterparty risk, Siemens agreed in fiscal 2013 to adjust the fixed rate of several interest rate swaps to market levels in exchange for receiving a fair value compensation.

Cash flow hedges of a variable-rate term loan

As of September 30, 2012, the Company applied cash flow hedge accounting for 50% of a variable-rate US\$1 billion term loan. To benefit from the low interest rates in the U.S., the Company entered into interest rate swap agreements to pay a fixed rate of interest and to receive in return a variable rate of interest. These interest rate swap agreements offset the effect of future changes in interest payments to be made for the underlying variable-rate term loan. The variable-rate term loan and the corresponding interest rate swap agreements matured in August 2013. In fiscal 2013, 2012 and 2011, the cash flow hedges of the variable-rate term loan did not result in any ineffective portion. Net cash receipts and payments relating to such interest rate swap agreements are recorded as interest expenses.

Commodity price risk management

Derivative financial instruments not designated in a hedging relationship

The Company applies a portfolio approach to manage the Company-wide risks associated with fluctuations in commodity prices from firm commitments and forecast transactions by entering into commodity swaps and commodity options. Such a strategy does not qualify for hedge accounting treatment.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Cash flow hedging activities

The Company's corporate procurement applies cash flow hedge accounting for certain firm commitments to purchase copper. The ineffective portion as well as resulting gains and (losses) were not significant individually or in aggregate.

It is expected that 104 million of net deferred losses in line item Other comprehensive income, net of income taxes will be reclassified into line item Cost of sales in fiscal 2014, when the consumption of the hedged commodity purchases is recognized in line item Cost of sales. As of September 30, 2013 and 2012, the maximum length of time over which the Company is hedging its future commodity purchases is 87 months and 99 months, respectively.

32. Financial risk management

Siemens' financial risk management is an integral part of how to plan and execute its business strategies. Siemens' financial risk management policy is set by the Managing Board. Siemens' organizational and accountability structure requires each of the respective managements of Siemens Sectors, Financial Services, Cross-Sector Services, regions and Corporate Units to implement financial risk management programs that are tailored to their specific industries and responsibilities, while being consistent with the overall policy established by the Managing Board.

Increasing market fluctuations may result in significant cash flow and earnings volatility risk for Siemens. The Company's operating business as well as its investment and financing activities are affected by changes in foreign exchange rates, interest rates, commodity prices and equity prices. In order to optimize the allocation of the financial resources across the Siemens segments and entities, as well as to secure an optimal return for its shareholders, Siemens identifies, analyzes and proactively manages the associated financial market risks. The Company seeks to manage and control these risks primarily through its regular operating and financing activities, and uses derivative financial instruments when deemed appropriate.

Within the various methodologies to analyze and manage risk, Siemens has implemented a system based on parametric variance-covariance Value at Risk (VaR). The VaR methodology provides a quantification of market risks based on historical volatilities and correlations of the different risk factors under the assumptions of the parametric variance-covariance Value at Risk model. The VaR figures are calculated based on

historical volatilities and correlations,

a ten day holding period, and

a 99.5% confidence level

for foreign currency exchange rate risk, interest rate risk, commodity price risk and equity price risk as discussed below.

Actual results that are included in the Consolidated Statements of Income or Consolidated Statements of Comprehensive Income may differ substantially from VaR figures due to fundamental conceptual differences. The Consolidated Statements of Income and Consolidated Statements of Comprehensive Income are prepared in accordance with IFRS. The VaR figures are the output of a model with a purely financial perspective and represent the potential financial loss which will not be exceeded within ten days with a probability of 99.5%. The concept of VaR is used for internal management of the Corporate Treasury activities.

Although VaR is an important tool for measuring market risk, the assumptions on which the model is based give rise to some limitations including the following. A ten day holding period assumes that it is possible to dispose of the underlying positions within this period. While this is considered to be a realistic assumption in almost all cases, it may not be valid during prolonged periods of severe market illiquidity. A 99.5% confidence level does not reflect losses that may occur beyond this level. There is a 0.5% statistical probability that losses

F-85

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

could exceed the calculated VaR. The use of historical data as a basis for estimating the statistic behavior of the relevant markets and finally determining the possible range of the future outcomes on the basis of this statistic behavior may not always cover all possible scenarios, especially those of an exceptional nature. Any market sensitive instruments, including equity and interest bearing investments, that our Company's pension plans hold are not included in the following quantitative and qualitative disclosures.

Foreign currency exchange rate risk

Transaction risk and foreign currency exchange rate risk management

Siemens' international operations expose the Company to foreign currency exchange rate risks, particularly regarding fluctuations between the U.S. dollar and the euro, in the ordinary course of business. The Company employs various strategies discussed below involving the use of derivative financial instruments to mitigate or eliminate certain of those exposures.

Foreign currency exchange rate fluctuations may create unwanted and unpredictable earnings and cash flow volatility. Each Siemens unit conducting business with international counterparties that leads to future cash flows denominated in a currency other than its functional currency is exposed to risks from changes in foreign currency exchange rates. Foreign currency exchange rate exposure is partly balanced by purchasing of goods, commodities and services in the respective currencies as well as production activities and other contributions along the value chain in the local markets.

Operating units (including SFS) are prohibited from borrowing or investing in foreign currencies on a speculative basis. Intercompany financing or investments of operating units are preferably carried out in their functional currency or on a hedged basis.

Siemens has established a foreign currency exchange rate risk management system that has an established track record for years. Each Siemens unit is responsible for recording, assessing, monitoring, reporting and hedging its foreign currency transaction exposure. The binding guideline for Siemens' operating units provides the concept for the identification and determination of a single net foreign currency position for each unit and commits the units to hedge this aggregated position within a narrow band of at least 75% but no more than 100% of their net foreign currency position. In addition, the guideline provides a framework of the organizational structure necessary for foreign currency exchange rate risk management, proposes hedging strategies and defines the hedging instruments available to the entities: foreign currency exchange contracts, foreign currency put and call options and stop-loss orders. If there are no conflicting country specific regulations, hedging activities of the operating units are transacted internally with Corporate Treasury. Hedging transactions with external counterparties in the global financial markets are carried out under these limitations by Corporate Treasury. This includes hedging instruments which qualify for hedge accounting.

Siemens has a Company-wide portfolio approach which generates a benefit from any potential off-set of divergent cash flows in the same currency, as well as optimized transaction costs.

The VaR relating to foreign currency exchange rates is calculated by aggregating the net foreign currency positions after hedging by the operating units. As of September 30, 2013 the foreign currency exchange rate risk based on historical volatilities and correlations, a ten day holding period and a confidence level of 99.5% resulted in a VaR of 6 million compared to a VaR of 9 million in the year before. Changes in euro values of future cash flows denominated in foreign currency due to volatile foreign currency exchange rates might influence the unhedged portion of revenues, but would also affect the unhedged portion of cost of materials. Future changes in the foreign currency exchange rates can impact sales prices and may lead to margin changes, the extent of which is determined by the matching of foreign currency revenues and expenses.

Siemens defines foreign currency exchange rate exposure generally as items of the Consolidated Statement of Financial Position in addition to firm commitments which are denominated in foreign currencies, as well as

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

foreign currency denominated cash inflows and cash outflows from forecast transactions for the following three months. This foreign currency exchange rate exposure is determined based on the respective functional currencies of the exposed Siemens entities.

Effects of foreign currency translation

Many Siemens units are located outside the euro zone. Since the financial reporting currency of Siemens is the euro, the financial statements of these subsidiaries are translated into euro for the preparation of the Consolidated Financial Statements. To consider the effects of foreign currency translation in the risk management, the general assumption is that investments in foreign-based operations are permanent and that reinvestment is continuous. Effects from foreign currency exchange rate fluctuations on the translation of net asset amounts into euro are reflected in the Company's consolidated equity position.

Interest rate risk

Siemens' key consideration with respect to the interest rate risk management is to mitigate the risk resulting from changes in the fair value of future cash flows. Risk arises whenever interest terms of financial assets and liabilities are different. Siemens manages this risk using derivative financial instruments which allow the Company to hedge fair value changes by swapping fixed rates of interest into variable rates of interest. In order to optimize the Company's position with regard to interest income and interest expenses and to manage the overall financial interest rate risk with respect to valuation risk affecting profit and loss and economic risk of changing interest rates, Corporate Treasury performs a comprehensive corporate interest rate risk management, under which the interest rate risk relating to the SFS business and to the remaining group are managed separately.

If there are no conflicting country-specific regulations, all Siemens operating units generally obtain any required financing through Corporate Treasury in the form of loans or intercompany clearing accounts. The same concept is adopted for deposits of cash generated by the units.

Assuming historical volatilities and correlations, a ten day holding period and a confidence level of 99.5% the interest rate VaR was 236 million as of September 30, 2013, increasing from the comparable value of 89 million as of September 30, 2012. This interest rate risk results primarily from euro and U.S. dollar denominated long-term fixed rate debt obligations. The increase in VaR related mainly to a decrease in the portion of the Company's underlying notes and bonds being changed from fixed interest rates into variable interest rates by using interest rate swap contracts, and to an increased volatility of relevant medium-term interest rates.

Commodity price risk

Siemens' production operations expose the Company to various commodity price risks in the ordinary course of business. Especially in the Sectors Industry and Energy a continuous supply of copper was necessary for the operating activities. Commodity price risk fluctuations may create unwanted and unpredictable earnings and cash flow volatility. The Company employs various strategies discussed below involving the use of derivative financial instruments to mitigate or eliminate certain of those exposures.

Siemens has established a commodity price risk management system to reduce earnings and cash flow volatility. Each Siemens unit is responsible for recording, assessing, monitoring, reporting and hedging its risks from forecast and pending commodity purchase transactions (commodity price risk exposure). The binding guideline for Siemens operating units provides the concept for the identification and determination of the commodity price risk exposure and commits the units to hedge it within a narrow band of 75% to 100% of the commodity price risk exposure in the product business for the next three months and 95% to 100% of the commodity price risk exposure in the project business after receipt of order. Siemens operating units are prohibited from speculative transactions.

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The aggregated commodity price risk exposure is hedged with external counterparties through derivative financial hedging instruments by Corporate Treasury. Derivative financial hedging instruments designated for hedge accounting are directly entered into with external counterparties. Additionally, Siemens applies a Company-wide portfolio approach which generates a benefit from optimizing the Company's position of the overall financial commodity price risk.

Using historical volatilities and correlations, a ten day holding period and a confidence level of 99.5%, the VaR, which comprises the net position of commodity derivatives and the commodity purchase transactions with price risk, was 4 million as of September 30, 2013 compared to 10 million as of September 30, 2012.

Equity price risk

Siemens' investment portfolio consists of direct and indirect investments in publicly traded companies held for purposes other than trading. The direct participations result mainly from strategic partnerships, strengthening Siemens' focus on its core business activities or compensation from M&A transactions; indirect investments in fund shares are mainly transacted for financial reasons.

These investments are monitored based on their current market value, affected primarily by fluctuations in the volatile technology-related markets worldwide. The market value of Siemens' portfolio in publicly traded companies increased from 796 million as of September 30, 2012 to 1.444 billion as of September 30, 2013, which was due primarily to the recognition of our 17.0% stake in OSRAM after the spin-off.

Based on historical volatilities and correlations, a ten day holding period and a confidence level of 99.5%, the VaR as of September 30, 2013 of Siemens' equity investments was 81 million compared to 85 million the year before.

Liquidity risk

Liquidity risk results from the Company's potential inability to meet its financial liabilities, e.g. for the settlement of its financial debt or for ongoing cash requirements from operating activities. In addition to having implemented effective working capital and cash management, Siemens mitigates liquidity risk by arranged credit facilities with highly rated financial institutions, via a debt issuance program and via a global multi-currency commercial paper program. Liquidity risk may also be mitigated by the Siemens Bank GmbH, which increases the flexibility of depositing cash or refinancing by using European Central Bank accounts.

In addition to the above-mentioned sources of liquidity, Siemens constantly monitors funding options available in the capital markets, as well as trends in the availability and costs of such funding, with a view to maintaining financial flexibility and limiting repayment risks.

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table reflects all contractually fixed pay-offs for settlement, repayments and interest resulting from recognized financial liabilities as well as from irrevocable loan commitments. It includes expected net cash outflows from derivative financial liabilities that are in place as per September 30, 2013. Such expected net cash outflows are determined based on each particular settlement date of an instrument. The amounts disclosed are undiscounted net cash outflows for the respective upcoming fiscal years, based on the earliest date on which Siemens could be required to pay. Cash outflows for financial liabilities (including interest) without fixed amount or timing are based on the conditions existing at September 30, 2013.

	Year ended September 30, 2016			2019 and thereafter
	2014	2015	to 2018 (in millions of)	
Non-derivative financial liabilities				
Notes and bonds	2,077	622	9,937	9,368
Loans from banks	478	393	859	11
Other financial indebtedness	87	10	38	
Obligations under finance leases	30	17	62	89
Trade payables	7,710	19	10	1
Other financial liabilities	1,188	42	422	4
Derivative financial liabilities	377	147	224	39
Irrevocable loan commitments	2,354	224	303	69

The risk implied from the values shown in the table above reflects the one-sided scenario of cash outflows only. Obligations under finance leases, trade payables and other financial liabilities mainly originate from the financing of assets used in Siemens' ongoing operations such as property, plant, equipment and investments in working capital e.g. inventories and trade receivables. These assets are considered in the Company's overall liquidity risk management. A considerable portion of the irrevocable loan commitments result from asset-based lending transactions meaning that the respective loans can only be drawn after sufficient collateral has been provided by the borrower. To monitor existing financial assets and liabilities as well as to enable an effective controlling of future risks, Siemens has established a comprehensive risk reporting covering its worldwide business units.

The balanced view of liquidity and financial indebtedness is stated in the calculation of the Net debt. Net debt results from total debt less total liquidity. **Total debt** comprises line item Short-term debt and current maturities of long-term debt as well as line item Long-term debt, as stated on the Consolidated Statements of Financial Position. Total debt comprises items Notes and bonds, Loans from banks, Obligations under finance leases and Other financial indebtedness such as commercial paper. Total liquidity refers to the liquid financial assets, which Siemens had available at the respective period-end dates to fund its business operations and to pay for near-term obligations. **Total liquidity** comprises line items Cash and cash equivalents as well as line item Available-for-sale financial assets, as stated on the Consolidated Statements of Financial Position. Management uses the Net debt measure for internal finance management, as well as for external communication with investors, analysts and rating agencies.

	September 30,	
	2013	2012
	(in millions of)	
Short-term debt and current maturities of long-term debt	1,944	3,826
Long-term debt	18,509	16,880
Total debt	20,453	20,707
Cash and cash equivalents	(9,190)	(10,891)

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

Available-for-sale financial assets (current)	(601)	(524)
Total liquidity	(9,790)	(11,415)
Net debt (Total debt less Total liquidity)	10,663	9,292

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Siemens **capital resources** consist of a variety of short- and long-term financial instruments including, but not limited to, loans from financial institutions, commercial paper, notes and bonds as well as credit facilities. In addition to cash and cash equivalents and to available-for-sale financial assets, liquid resources consist of future cash flows from operating activities.

Siemens **capital requirements** include, among others, scheduled debt service, regular capital spending, ongoing cash requirements from operating and SFS financing activities, including cash outflows related to the announced growth strategy of SFS, dividend payments, pension plan funding, portfolio activities, and cash outflows in connection with Siemens 2014, a Company-wide program aimed at improving profitability in the Sectors.

Credit risk

Credit risk is defined as an unexpected loss in cash and earnings if the customer is unable to pay its obligations in due time or if the value of collateral declines.

Siemens provides its customers with various forms of direct and indirect financing particularly in connection with large projects. Siemens finances a large number of smaller customer orders, for example the leasing of medical equipment, in part through SFS. SFS is also exposed to credit risk by financing third-party equipment or by taking direct or indirect participations in financings, such as syndicated loans. In part, Siemens takes a security interest in the assets Siemens finances or Siemens receives additional collateral. Siemens may incur losses if the credit quality of its customers deteriorates or if they default on their payment obligations to Siemens, such as a consequence of a financial or political crisis and a global downturn.

The effective monitoring and controlling of credit risk is a core competency of our risk management system. Siemens has implemented a binding credit policy for all entities. Hence, credit evaluations and ratings are performed for all customers with an exposure or requiring credit beyond centrally defined limits.

Customer ratings, analyzed and defined by SFS, and individual customer limits are based on generally accepted rating methodologies, with the input consisting of information obtained from the customer, external rating agencies, data service providers and Siemens' customer default experiences. Ratings and credit limits are carefully considered in determining the conditions under which direct or indirect financing will be offered to customers. As part of the process, internal risk assessment specialists determine and continuously update ratings and credit limits for Siemens' public and private customers, both in the euro zone and around the world. For public customers our policy provides that the rating applied to individual customers cannot be better than the weakest of the sovereign ratings provided by Moody's, S&P's and Fitch for the respective country.

Credit risk is recorded and monitored on an ongoing basis applying different systems and processes dependent on the underlying product. Central systems are used for ongoing monitoring of counterparty risk. In addition, SFS uses own systems for its financing activities. There are also a number of decentralized tools used for management of individual credit risks within the operating units. A central IT application processes data from the operating units together with rating and default information and calculates an estimate which may be used as a basis for individual bad debt provisions. In addition to this automated process, qualitative information is considered, in particular to incorporate the latest developments.

To increase transparency with regard to credit risk Corporate Treasury has established the Siemens Credit Warehouse to which numerous operating units from the Siemens Group regularly transfer business partner data as a basis for a centralized rating process. In addition, numerous operating units transfer their trade receivables with a remaining term up to one year along with the inherent credit risk to the Siemens Credit Warehouse, but remain responsible for servicing activities such as collections and receivables management. The Siemens Credit Warehouse actively identifies, quantifies and manages the credit risk in its portfolio, such as by selling or hedging exposure to specific customers, countries and industries. In addition to an increased transparency with regard to credit risk, the Siemens Credit Warehouse may provide Siemens with an additional source of liquidity and strengthens Siemens' funding flexibility.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The maximum exposure to credit risk of financial assets, without taking account of any collateral, is represented by their carrying amount. As of September 30, 2013 and 2012 the collateral for financial instruments classified as financial assets measured at fair value in the form of netting agreements for derivatives in the event of insolvency of the respective counterparty amounted to 570 million and 716 million, respectively. As of September 30, 2013 and 2012 the collateral held for financial instruments classified as receivables from finance leases amounted to 1,902 million and 1,685 million, respectively, mainly in the form of the leased equipment. As of September 30, 2013 and 2012 the collateral held for financial instruments classified as financial assets measured at cost or amortized cost amounted to 2,141 million and 1,902 million, respectively. The collateral mainly consisted of property, plant and equipment and letters of credit. In addition, for this class Siemens holds collateral in the form of securities related to reverse repurchase agreements that can be sold or re-pledged in absence of default by the owner of the collateral. As of September 30, 2013 and 2012 the fair value of the collateral held amounted to 103 million and 500 million, respectively. In fiscal 2013 and 2012 Siemens has not exercised the right to sell or re-pledge the collateral. Credit risks arising from irrevocable loan commitments are equal to the expected future pay-offs resulting from these commitments. As of September 30, 2013 and 2012 the collateral held for these commitments amounted to 1,320 million and 1,178 million, respectively, mainly in the form of inventories and receivables. Credit risks arising from credit guarantees are described in Note 28 Commitments and contingencies. There were no significant concentrations of credit risk as of September 30, 2013 and 2012.

Concerning trade receivables and other receivables, as well as loans or receivables included in line item Other financial assets that are neither impaired nor past due, there were no indications as of September 30, 2013, that defaults in payment obligations will occur, which lead to a decrease in the net assets of Siemens. Overdue financial instruments are generally impaired on a portfolio basis in order to reflect losses incurred within the respective portfolios. When substantial expected payment delays become evident, overdue financial instruments are assessed individually for additional impairment and are further allowed for as appropriate.

33. Share-based payment

Share-based payment awards at Siemens, including Bonus Awards, Stock Awards, the Share Matching Program and its underlying plans as well as the Jubilee Share Program are predominately designed as equity-settled plans and to a limited extent as cash-settled plans. If participating Siemens companies cease to be part of the Siemens Group, they are no longer eligible to participate in future share-based payment awards at Siemens. In such cases the participating Siemens companies have the right to settle the share-based payment awards prematurely. Total pretax expense for share-based payment recognized in line item Income from continuing operations amounted to 185 million, 155 million and 148 million for the years ended September 30, 2013, 2012 and 2011, respectively, and refers primarily to equity-settled awards, including the Company's Base Share Program.

Stock awards

The Company grants stock awards as a means for providing share-based compensation to members of the Managing Board, members of the senior management of Siemens AG and its domestic and foreign subsidiaries and other eligible employees. Stock awards are subject to a restriction period of about four years and entitle the beneficiary to Siemens shares without payment of consideration following the restriction period. Stock awards granted in fiscal 2008 to 2011 were generally subject to a restriction period of three years. In principle, stock awards forfeit if the beneficiary's employment with the Company terminates prior to the expiration of the restriction period. During the restriction period, beneficiaries are not entitled to dividends. Stock awards may not be transferred, sold, pledged or otherwise encumbered. Settlement of stock awards may occur in newly issued shares of capital stock of Siemens AG, treasury shares or in cash. The settlement method will be determined by

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the Managing Board and the Supervisory Board. Each fiscal year, the Company decides whether or not to grant stock awards. The Supervisory Board decides about the number of stock awards to the Managing Board and the Managing Board decides about the number of stock awards to members of the senior management and other eligible employees.

Since fiscal 2012, the allocation of stock awards as a share-based payment has been increasingly tied to corporate performance criteria. The target attainment for the performance criteria ranges between 0% and 200%.

Half of the annual target amount for stock awards is based on the average of earnings per share (EPS, basic) of the past three fiscal years. The target attainment determines the number of stock awards upon allocation. Settlement of these stock awards is in shares following the four-year restriction period.

The other half of the annual target amount for stock awards is based on the share price performance of Siemens shares relative to the share price performance of five important Siemens competitors (ABB, General Electric, Philips, Rockwell, Schneider) during the four-year restriction period. The target attainment is determined during the four-year restriction period for the stock awards and accordingly, determines the number of Siemens shares ultimately transferred following the restriction period. If the target attainment is up to 100%, settlement is in shares. If the target attainment exceeds 100% (up to 200%) an additional cash payment corresponding to the outperformance results.

Additionally one portion of the variable compensation component (bonus) for members of the Managing Board is granted in the form of non-forfeitable awards of Siemens stock (Bonus Awards).

Commitments to members of the Managing Board:

In fiscal 2013, 2012 and 2011, agreements were entered into which entitle members of the Managing Board to stock awards contingent upon attaining an EPS-based target. The fair value of these entitlements amounting to 6 million, 6 million and 5 million, respectively, in fiscal 2013, 2012 and 2011, was determined by calculating the present value of the target amount.

In fiscal 2013, 2012 and 2011, agreements were entered into which entitle members of the Managing Board to stock awards contingent upon attaining a prospective performance-based target of Siemens stock relative to five competitors. The fair value of these entitlements amounting to 7 million, 7 million and 6 million, respectively, in fiscal 2013, 2012 and 2011, was calculated by applying a valuation model. Inputs to that model include an expected weighted volatility of Siemens shares of 24% in fiscal 2013, 27% in fiscal 2012 and 30% and 29%, respectively, in fiscal 2011 and a market price of 78.94 in fiscal 2013, 73.94 in fiscal 2012 and 88.09 and 92.98, respectively, in fiscal 2011 per Siemens share. Expected volatility was determined by reference to historic volatilities in fiscal 2013 and by reference to implied volatilities in fiscal 2012 and 2011. The model applies a risk-free interest rate of up to 0.8% in fiscal 2013, up to 1.7% in fiscal 2012 and up to 2.4% and up to 3.0%, respectively, in fiscal 2011 and an expected dividend yield of 3.8% in fiscal 2013, 4.1% in fiscal 2012 and 3% and 2.4%, respectively, in fiscal 2011. Assumptions concerning share price correlations were determined by reference to historic correlations.

Compensation expense related to stock awards is generally recognized over five years until they vest, including a restriction period of four years.

In fiscal 2013, 2012 and 2011, agreements were entered into which entitle members of the Managing Board to Bonus Awards contingent upon the target attainment. The fair value of these entitlements amounting to 5 million in each fiscal year reported, was determined by calculating the present value of the target amount. Compensation expense related to Bonus Awards is generally recognized over the vesting period of one year. Beneficiaries will receive one Siemens share without payment of consideration for each Bonus Award, following an additional waiting period of four years.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In fiscal 2011, the Company granted additional 128,284 stock awards to members of the Managing Board. The fair value of these stock awards amounting to 77.76 per stock award was determined as the market price of Siemens shares less the present value of expected dividends.

Commitments to members of the senior management and other eligible employees:

In fiscal 2013 and 2012, 1,308,171 and 1,080,609 stock awards were granted to members of the senior management and other eligible employees contingent upon attaining an EPS-based target. The fair value of these stock awards amounts to 85 million and 62 million, respectively, in fiscal 2013 and 2012 and corresponds to the target amount representing the EPS target attainment.

In fiscal 2013 and 2012, 849,908 and 947,945 stock awards were granted to members of the senior management and other eligible employees contingent upon attaining a prospective performance-based target of the Siemens stock relative to five competitors. The fair value of these stock awards amounting to 53 million and 58 million, respectively, in fiscal 2013 and 2012, of which 41 million and 46 million relate to equity instruments, was calculated by applying a valuation model. In fiscal 2013 and 2012, inputs to that model include an expected weighted volatility of Siemens shares of 24.32% and 25.33%, respectively, and a market price of 79.70 and 74.14 per Siemens share. Expected volatility was determined by reference to historic volatilities in fiscal 2013 and by reference to implied volatilities in fiscal 2012. The model applies a risk-free interest rate of up to 0.6% in fiscal 2013 and up to 1.8% in fiscal 2012 and an expected dividend yield of 3.76% in fiscal 2013 and 3.91% in fiscal 2012. Assumptions concerning share price correlations were determined by reference to historic correlations. Compensation expense related to these stock awards is recognized over four years until they vest.

In fiscal 2011, fair value was determined as the market price of Siemens shares less the present value of dividends expected during the three year vesting period as stock awards do not carry dividend rights during the vesting period. The weighted average grant date fair value for board members, senior management and other eligible employees amounts to 77.79 per stock award granted in fiscal 2011, resulting in a total fair value of stock awards granted in fiscal 2011 of 107 million.

The following table shows the changes in the stock awards held by members of the senior management and other eligible employees:

	Year ended September 30, 2013 Awards	Year ended September 30, 2012 Awards	Year ended September 30, 2011 Awards
Non-vested, beginning of period	4,217,588	3,857,315	4,322,824
Granted	2,158,079	2,028,554	1,249,901
Vested and transferred	(1,073,355)	(1,531,944)	(1,482,096)
Forfeited/settled	(425,857) ⁽¹⁾	(136,337) ⁽¹⁾	(233,314)
Non-vested, end of period	4,876,455	4,217,588	3,857,315

(1) Consists of 101,192 and 111,776 forfeited and 324,665 and 24,561 settled awards, respectively, in fiscal 2013 and 2012.

Share Matching Program and its underlying plans:**1. Share Matching Plan**

In fiscal 2013, 2012 and 2011, the Company issued a new tranche under the Share Matching Plan. Senior managers of Siemens AG and participating Siemens companies may invest a specified percentage of their compensation in Siemens shares. Within a predetermined period in the first quarter of each fiscal year, plan participants decide on their investment amount for which investment shares are purchased. The shares are purchased at the market price at a predetermined date in the second quarter. Plan participants receive the right to

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

one Siemens share without payment of consideration (matching share) for every three investment shares continuously held over a period of three years (vesting period) provided the plan participant has been continuously employed by Siemens AG or another Siemens company until the end of the vesting period. During the vesting period, matching shares are not entitled to dividends. The right to receive matching shares forfeits if the underlying investment shares are transferred, sold, pledged or otherwise encumbered. Matching shares may be settled in newly issued shares of capital stock of Siemens AG, treasury shares or in cash. The settlement method will be determined by the Managing Board. Each fiscal year, the Managing Board decides whether or not to issue a new tranche under the Share Matching Plan.

2. Monthly Investment Plan

In fiscal 2013, 2012 and 2011, the Company issued a new tranche under the Monthly Investment Plan that is a further component of the Share Matching Plan and which is available for employees other than senior managers of Siemens AG and participating Siemens companies. Plan participants may invest a specified percentage of their compensation in Siemens shares on a monthly basis over a period of twelve months. The shares are purchased at market price at a predetermined date once a month. The Managing Board of the Company will decide annually, whether shares acquired under the Monthly Investment Plan (investment shares) may be transferred to the Share Matching Plan the following year. If the Managing Board decides that shares acquired under the Monthly Investment Plan are transferred to the Share Matching Plan, plan participants will receive the right to matching shares under the same conditions applying to the Share Matching Plan described above. Each fiscal year the Managing Board decides, whether or not to issue a new tranche under the Monthly Investment Plan.

The Managing Board decided that shares acquired under the tranches issued in fiscal 2012 and 2011 are transferred to the Share Matching Plan as of February 2013 and February 2012, respectively.

3. Base Share Program

In fiscal 2013, 2012 and 2011, the Company issued a new tranche under the Base Share Program. Employees of Siemens AG and participating domestic Siemens companies can invest a fixed amount of their compensation into Siemens shares, sponsored by Siemens with a tax beneficial allowance. The shares are bought at market price at a predetermined date in the second quarter and grant the right to receive matching shares under the same conditions applying to the Share Matching Plan described above. Each fiscal year, the Managing Board decides whether or not to issue a new tranche under the Base Share Program. The fair value of the base share program equals the amount of the tax beneficial allowance sponsored by Siemens. In fiscal 2013, 2012 and 2011, the Company incurred pretax expense from continuing operations of 31 million, 29 million and 28 million, respectively.

4. Resulting Matching Shares

(1) Thereof , and 3,602 to the Managing Board in fiscal 2013, 2012 and 2011, respectively.

F-94

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Fair value was determined as the market price of Siemens shares less the present value of expected dividends during the vesting period as matching shares do not carry dividend rights during the vesting period. Non-vesting conditions, i.e. the condition neither to transfer, sell, pledge nor otherwise encumber the underlying shares, were considered in determining the fair value. In fiscal 2013, 2012 and 2011, the weighted average grant-date fair value of the resulting matching shares is 57.77, 50.35 and 66.13 per share respectively, based on the number of instruments granted.

Jubilee Share Program

Under the Jubilee Share Program, eligible employees of Siemens AG and participating domestic Siemens companies receive jubilee shares after having been continuously employed by the Company for 25 and 40 years (vesting period), respectively. Generally, settlement of jubilee grants is in shares. Jubilee shares are measured at fair value considering biometrical factors. The fair value is determined as the market price of Siemens shares at grant date less the present value of dividends expected to be paid during the vesting period for which the employees are not entitled to. The weighted average fair value of each jubilee share granted in fiscal 2013 for the 25th and the 40th anniversary is 36.92 and 24.55, respectively, based on the number of shares granted. The weighted average fair value of each jubilee share granted adjusted by biometrical factors (considering fluctuation) is 18.24 and 9.99, respectively, in fiscal 2013. The weighted average fair value of each jubilee share granted in fiscal 2012 for the 25th and the 40th anniversary is 39.45 and 29.88 respectively, based on the number of shares granted. The weighted average fair value of each jubilee share granted adjusted by biometrical factors (considering fluctuation) is 19.01 and 13.12 respectively, in fiscal 2012. The weighted average fair value of each jubilee share granted in fiscal 2011 for the 25th and the 40th anniversary is 51.39 and 44.18, respectively, based on the number of shares granted. The weighted average fair value of each jubilee share granted adjusted by biometrical factors (considering fluctuation) is 29.24 and 22.24, respectively, in fiscal 2011.

In fiscal 2013, 2012 and 2011, 0.29 million, 0.43 million and 0.49 million jubilee shares were granted; 0.18 million, 0.16 million and 0.18 million were transferred, 0.12 million, 0.48 million and 0.41 million forfeited, resulting in an outstanding balance of 4.68 million, 4.69 million and 4.90 million jubilee shares as of September 30, 2013, 2012 and 2011. Considering biometrical factors, 3.28 million, 3.29 million and 3.55 million jubilee shares are expected to vest as of September 30, 2013, 2012 and 2011.

2001 Siemens Stock Option Plan:

Stock options were last exercisable in fiscal 2011; unexercised stock options expired in fiscal 2011.

34. Personnel costs

	Year ended September 30,		
	2013	2012	2011
	(in millions of)		
Wages and salaries	21,874	20,633	18,907
Statutory social welfare contributions and expenses for optional support payments	3,389	3,354	3,042
Expenses relating to post-employment benefits	1,148	886	972
	26,411	24,873	22,921

Item Expenses relating to post-employment benefits includes service costs for the period. Interest from post-employment benefits is included in line items interest income (expenses).

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Wages and salaries, statutory social welfare contributions and expenses for optional support payments and expenses relating to post-employment benefits for continuing and discontinued operations amounts to 28,163 million, 27,009 million and 26,239 million in fiscal 2013, 2012 and 2011.

The average number of employees in fiscal years 2013, 2012 and 2011 was 362.4 thousand, 362.9 thousand and 345.2 thousand, respectively (based on continuing operations). Part-time employees are included on a proportionate basis. The employees were engaged in the following activities:

	Year ended September 30,	
	2013	2012
	(in thousands)	
Manufacturing and services	224.2	221.3
Sales and marketing	73.6	76.9
Research and development	29.8	29.5
Administration and general services	34.9	35.2
	362.4	362.9

The average number of employees in fiscal years 2013, 2012 and 2011 was 394.9 thousand, 408.5 thousand and 412.0 thousand, respectively (based on continuing and discontinued operations). Thereof, in fiscal 2013, 2012 and 2011, 248.3 thousand, 255.6 thousand and 264.1 thousand employees were engaged in manufacturing and services, 78.2 thousand, 83.2 thousand and 80.4 thousand employees were engaged in sales and marketing, 31.8 thousand, 32.4 thousand and 30.4 thousand employees were in research and development and 36.6 thousand, 37.3 thousand and 37.1 thousand employees were in administration and general services in fiscal 2013, 2012 and 2011, respectively.

35. Earnings per share

	Year ended September 30,		
	2013	2012	2011
	(shares in thousands, earnings per share in)		
Income from continuing operations	4,212	4,642	6,625
Less: Portion attributable to non-controlling interest	120	132	187
Income from continuing operations attributable to shareholders of Siemens AG	4,093	4,510	6,438
Weighted average shares outstanding basic	843,819	876,053	873,098
Effect of share-based payment	8,433	8,259	9,558
Weighted average shares outstanding diluted	852,252	884,311	882,656
Basic earnings per share (from continuing operations)	4.85	5.15	7.37
Diluted earnings per share (from continuing operations)	4.80	5.10	7.29

Share-based payment plans are dilutive at the Income from continuing operations level and so, in accordance with IAS 33, Earnings per Share, have been treated as dilutive for the purpose of diluted earnings per share. The diluted loss per share from discontinued operations is lower than basic loss per share from discontinued operations because of the effect of losses on discontinued operations.

The dilutive earnings per share computation in fiscal 2013 and 2012 does not contain 21,674 thousand shares relating to warrants issued with bonds. The inclusion of those shares would have been antidilutive in the years presented. In the future, the warrants could potentially dilute basic earnings per share.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****36. Segment information**

Segment information is presented for continuing operations.

Effective as of October 1, 2011, Siemens changed its organizational structure of the Sectors. Prior-year information has been recast to correspond to the fiscal 2012 reporting format. A fourth Sector, Infrastructure & Cities was formed in order to benefit from the growth of urban centers. The Infrastructure & Cities Sector comprises the Industry Sector activities of Building Technologies, Mobility as well as the Energy Sector's Power Distribution business and Smart Grid applications. The Industry Sector is focusing even more sharply on industry solutions. Accordingly, since fiscal 2012, the Company has six reportable segments: the four Sectors Energy, Healthcare, Industry and Infrastructure & Cities as well as Equity Investments and Financial Services (SFS). Healthcare, Equity Investments and SFS retained its previous structure. The Managing Board is monitoring each reportable segment. Each reportable segment has its own segment management reporting to the Managing Board.

Description of reportable segments

The four Sectors comprise manufacturing, industrial and commercial goods, solutions and services in areas more or less related to Siemens origins in the electrical business field.

Energy offers a wide spectrum of products, solutions and services for generating and transmitting power, and for extracting, converting and transporting oil and gas. It primarily addresses the needs of energy providers, but also serves industrial companies, particularly in the oil and gas industry.

Healthcare offers customers a comprehensive portfolio of medical solutions across the treatment chain ranging from medical imaging to in-vitro diagnostics to interventional systems and clinical information technology systems all from a single source. In addition, the Sector provides technical maintenance, professional and consulting services, and, together with Financial Services (SFS), financing to assist customers in purchasing the Sector's products.

Industry offers a broad spectrum of products, services and solutions that help customers use resources and energy more efficiently, improve productivity, and increase flexibility. The Sector's integrated technologies and holistic solutions primarily address industrial customers, particularly those in the process and manufacturing industries. The portfolio spans industry automation, industrial software, drive products and services, system integration, and solutions for industrial plant businesses.

Infrastructure & Cities offers a wide range of technologies for increasing the sustainability of metropolitan centers and urban infrastructures worldwide, such as integrated mobility solutions, building and security systems, power distribution equipment, smart grid applications and low and medium-voltage products.

Equity Investments comprises equity stakes held by Siemens that are either accounted for by the equity method, at cost or as current available-for-sale financial assets and are not allocated to a Sector, SFS, Centrally managed portfolio activities, SRE, Corporate items or Corporate Treasury for strategic reasons.

Financial Services (SFS) provides a variety of financial services and products to other Siemens units and their customers and to third parties. SFS has three strategic pillars: supporting Siemens units with finance solutions for their customers, managing financial risks of Siemens and offering third-party finance services and products.

Reconciliation to Consolidated Financial Statements

Reconciliation to Consolidated Financial Statements contains businesses and items not directly related to Siemens' reportable segments:

Centrally managed portfolio activities generally includes activities intended for divestment or closure as well as activities remaining from divestments and discontinued operations such as from Siemens IT Solutions and Services and from the former Com business.

F-97

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Siemens Real Estate (SRE) owns and manages the Siemens real estate portfolio and offers a range of services encompassing real estate development, real estate disposal and asset management, as well as lease and services management.

Corporate items and pensions includes corporate charges such as personnel costs for corporate headquarters, corporate projects and non-operating investments or results of corporate-related derivative activities and costs for carve out activities managed by corporate, which are charged to the respective segment when the disposal gain or loss is realized or when the activities are classified as discontinued operations. Pensions includes the Company's pension related income (expense) not allocated to the segments, SRE or Centrally managed portfolio activities.

Eliminations, Corporate Treasury and other reconciling items comprise consolidation of transactions within the segments, certain reconciliation and reclassification items and the activities of the Company's Corporate Treasury. It also includes interest income and expense, such as, for example, interest not allocated to segments or Centrally managed portfolio activities (referred to as financing interest), interest related to Corporate Treasury activities or resulting consolidation and reconciliation effects on interest.

Measurement Segments

Accounting policies for Segment information are generally the same as those used for Siemens, described in Note 2 Summary of significant accounting policies. Lease transactions, however, are classified as operating leases for internal and segment reporting purposes. Intersegment transactions are based on market prices.

Profit of the Sectors and of Equity Investments:

Siemens' Managing Board is responsible for assessing the performance of the segments. The Company's profitability measure of the Sectors and Equity Investments is earnings before financing interest, certain pension costs, and income taxes as determined by the chief operating decision maker (Profit). Profit excludes various categories of items, not allocated to the Sectors and Equity Investments, which management does not regard as indicative of their performance. Profit represents a performance measure focused on operational success excluding the effects of capital market financing issues; for financing issues regarding Equity Investments see paragraph below. The major categories of items excluded from Profit are presented below.

Financing interest, excluded from Profit, is any interest income or expense other than interest income related to receivables from customers, from cash allocated to the Sectors and Equity Investments and interest expenses on payables to suppliers. Borrowing costs capitalized as part of qualifying long-term projects are not part of financing interest. Financing interest is excluded from Profit because decision-making regarding financing is typically made at the corporate level. Equity Investments include interest and impairments as well as reversals of impairments on long-term loans granted to investments reported in Equity Investments.

Similarly, decision-making regarding essential pension items is done centrally. Accordingly, Profit primarily includes amounts related to service cost of pension plans only, while all other regularly recurring pension related costs including charges for the German pension insurance association and plan administration costs are included in line item Corporate items and pensions. Curtailments are a partial payback with regard to past service cost that affect Segment Profit.

Furthermore, income taxes are excluded from Profit since income tax is subject to legal structures, which typically do not correspond to the structure of the segments.

The effect of certain litigation and compliance issues is excluded from Profit, if such items are not indicative of the Sectors' and Equity Investments' performance, since their related results of operations may be distorted by the amount and the irregular nature of such events. This may also be the case for items that refer to more than one reportable segment, SRE and (or) Centrally managed portfolio activities or have a corporate or central character.

Table of Contents

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Central infrastructure costs are primarily allocated to the Sectors. The total amount to be allocated is determined at the beginning of the fiscal year and is charged in installments in all four quarters.

Profit of Equity Investments mainly comprises income (loss) from investments presented in Equity Investments, such as the share in the earnings of associates or dividends from investments not accounted for under the equity method, income (loss) from the sale of interests in investments, impairment of investments and reversals of impairments. It also includes interest and impairments as well as reversals of impairments on long-term loans granted to investments reported in Equity Investments.

Profit of the segment SFS:

Profit of the segment SFS is Income before income taxes. In contrast to performance measurement principles applied to the Sectors and Equity Investments interest income and expenses is an important source of revenue and expense of SFS.

Asset measurement principles:

Management determined Assets as a measure to assess capital intensity of the Sectors and Equity Investments (Net capital employed). Its definition corresponds to the Profit measure. It is based on Total assets of the Consolidated Statements of Financial Position, primarily excluding intragroup financing receivables, intragroup investments and tax related assets, since the corresponding positions are excluded from Profit. A Division of Infrastructure & Cities includes the project-specific intercompany financing of a long-term project. The remaining assets are reduced by non-interest-bearing liabilities other than tax related liabilities, e.g. trade payables, to derive Assets. Equity Investments may include certain shareholder loans granted to investments reported in Equity Investments. In contrast, Assets of SFS is Total assets.

Orders:

Orders are determined principally as estimated revenue of accepted purchase orders and order value changes and adjustments, excluding letters of intent. New orders are supplementary information, provided on a voluntary basis. It is not part of the audited Consolidated Financial Statements.

Free cash flow definition:

Segment information discloses Free cash flow and Additions to property, plant and equipment and intangible assets. Free cash flow of the Sectors and Equity Investments constitutes cash flows from operating activities less additions to intangible assets and property, plant and equipment. It excludes Financing interest, except for cases where interest on qualifying assets is capitalized or classified as contract costs and it also excludes non-cash income tax as well as certain other payments and proceeds. Free cash flow of Equity Investments includes interest from shareholder loans granted to investments reported in Equity Investments. Pension curtailments are a partial payback with regard to past service cost that affect segment Free cash flow. Free cash flow of SFS, a financial services business, includes related financing interest payments and proceeds; income tax payments and proceeds of SFS are excluded.

Amortization, depreciation and impairments:

Amortization, depreciation and impairments presented in Segment information includes depreciation and impairments of property, plant and equipment, net of reversals of impairments as well as amortization and impairments of intangible assets, net of reversals of impairment. Goodwill impairment is excluded.

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Measurement Centrally managed portfolio activities and SRE:**

Centrally managed portfolio activities follow the measurement principles of the Sectors. SRE applies the measurement principles of SFS; Total assets of SRE nets certain intercompany finance receivables with certain intercompany finance liabilities.

Reconciliation to Siemens Consolidated Financial Statements

The following table reconciles total Assets of the Sectors, Equity Investments and SFS to Total assets of Siemens Consolidated Statements of Financial Position:

	September 30,	
	2013	2012
	(in millions of)	
Assets of Sectors	24,886	23,364
Assets of Equity Investments	1,767	2,715
Assets of SFS	18,661	17,405
Total Segment Assets	45,314	43,484
Reconciliation:		
Assets Centrally managed portfolio activities	(267)	(448)
Assets SRE	4,747	5,018
Assets of Corporate items and pensions ⁽¹⁾	(11,252)	(11,693)
Eliminations, Corporate Treasury and other reconciling items of Segment information:		
Asset-based adjustments:		
Intragroup financing receivables and investments	40,850	22,046
Tax-related assets	3,924	4,453
Liability-based adjustments:		
Post-employment benefits	9,265	9,801
Liabilities	39,336	42,072
Eliminations, Corporate Treasury, other items ⁽²⁾	(29,981)	(6,482)
Total Eliminations, Corporate Treasury and other reconciling items of Segment information⁽¹⁾	63,393	71,889
Total assets in Siemens Consolidated Statements of Financial Position	101,936	108,251

(1) In accordance with Siemens segment measurement principles, effects from adopting IAS 19R retrospectively increased Assets of line item Corporate items and pension by 147 million and decreased line item Total Eliminations, Corporate Treasury and other reconciling items by 176 million compared to previously reported amounts as of September 30, 2012.

(2) Includes assets and liabilities reclassified in connection with discontinued operations.

In fiscal years 2013, 2012 and 2011, Corporate items and pensions in the column Profit includes (419) million, (261) million and (356) million related to Corporate items, as well as (420) million, (407) million and (385) million related to Pensions, respectively. Remaining costs in connection with Siemens IT Solutions and Services charged to Corporate items in fiscal 2013, 2012 and 2011 amount to 58 million, 118 million

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

and 54 million. Effects from asset retirement obligations for environmental clean-up costs impacted Corporate items with 50 million, 19 million and (28) million in fiscal 2013, 2012 and 2011, respectively. Legal and regulatory matters contributed positive effects to Corporate items in fiscal 2012 and negative effects in fiscal 2011. In fiscal 2011, a special remuneration, which was granted and charged to Corporate items in fiscal 2010 was primarily allocated to the Sectors resulting in a positive impact of 267 million at Corporate items; fiscal 2011 charges were made to Energy of 60 million, to Healthcare of 43 million, to Industry of 75 million and to Infrastructure & Cities of 63 million.

F-100

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Additional Segment information**

For the years ended September 30, 2013, 2012 and 2011, Profit of SFS includes interest income of 873 million, 778 million and 654 million, respectively and interest expenses of 317 million, 316 million and 283 million, respectively.

38. Related party transactions**Joint ventures and associates**

Edgar Filing: SIEMENS AKTIENGESELLSCHAFT - Form 20-F

Siemens has relationships with many joint ventures and associates in the ordinary course of business whereby Siemens buys and sells a wide variety of products and services generally on arm's length terms. For information regarding our subsidiaries, joint ventures and associated companies in fiscal 2013 see Note 18 Investments accounted for using the equity method and Item 19: List of subsidiaries and associated companies. For information regarding our subsidiaries, joint ventures and associated companies in fiscal 2012 see Item 19 of Form 20-F for fiscal 2012 filed with the SEC.

F-101

Table of Contents**SIEMENS****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Sales of goods and services and other income from transactions with joint ventures and associates as well as purchase of goods and services and other expenses from transactions with joint ventures and associates are as follows:

	Sales of goods and services and other income			Purchase of goods and services and other expenses		
	Year ended			Year ended		
	September 30,			September 30,		
	2013	2012	2011	2013	2012	2011
	(in millions of)					
Joint ventures	336	432	227	12	16	39
Associates	1,008	528	602	214	228	259
	1,345	959	829	226	244	297

Receivables from joint ventures and associates and liabilities to joint ventures and associates are as follows:

	Receivables		Liabilities	
	September 30,		September 30,	
	2013	2012	2013	2012
	(in millions of)			
Joint ventures	54	49	12	23
Associates	222	145	121	241
	276	194	133	264

As of September 30, 2013 and 2012, loans given to joint ventures and associates amounted to 17 million and 60 million, respectively. In the normal course of business the Company regularly reviews loans and receivables associated with joint ventures and associates. In fiscal 2013 and 2012, the review resulted in net losses related to valuation allowances totaling 27 million and net gains related to valuation allowances totaling 7 million, respectively. As of September 30, 2013 and 2012, valuation allowances amounted to 42 million and 37 million, respectively. In fiscal 2013, Siemens increased its net investment in EN by 102 million. The carrying amount remains 0 by applying the equity method. For further information see Note 7 Income (loss) from investments accounted for using the equity method, net.

As of September 30, 2013 and 2012, guarantees to joint ventures and associates amounted to 2,789 million and 4,769 million, respectively, including the HERKULES obligations of 1,890 million and 2,290 million, respectively. As of September 30, 2012 the NSN obligations were included. For additional information regarding the HERKULES obligations as well as for information regarding guarantees in connection with the contribution of the SEN operations into EN see Note 28 Commitments and contingencies. As of September 30, 2013 and 2012, guarantees to joint ventures amounted to 431 million and 474 million, respectively. As of September 30, 2013 and 2012, the Company had commitments to make capital contributions of 187 million and 176 million to its joint ventures and associates, therein 107 million and 113 million related to joint ventures, respectively. For a loan raised by a joint venture, which is secured by a Siemens guarantee, Siemens granted an additional collateral. As of September 30, 2013 and 2012 the outstanding amount totaled to 134 million and 139 million, respectively. As of September 30, 2013 and 2012 there were loan commitments to joint ventures and associates amounting to 90 million and 144 million, respectively, therein 90 million and 94 million, respectively related to joint ventures.

SIEMENS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Related individuals

Related individuals include the members of the Managing Board and Supervisory Board.

In fiscal 2013, 2012 and 2011 members of the Managing Board received cash compensation of 17.0 million, 17.4 million and 18.9 million. The fair value of stock-based compensation amounted to 17.6 million, 22.2 million and 20.7 million for 213,394, 345,382 and 352,083 Stock Awards, respectively, in fiscal 2013, 2012 and 2011. In fiscal 2013, 2012 and 2011 the Company granted contributions under the BSAV to members of the Managing Board totaling 6.4 million, 5.7 and million 5.2 million.

Therefore in fiscal 2013, 2012 and 2011, compensation and benefits, attributable to members of the Managing Board amounted to 41.0 million, 45.3 million and 44.8 million in total, respectively.

In addition, in connection with termination of Managing Board membership, compensatory payments amounting to 20.4 million (gross) and one-time special contributions amounting to 3.1 million to the BSAV were agreed. It was also agreed that these members of the Managing Board receive their long-term stock-based compensation for fiscal 2013 (41,554 Stock Awards), which will be settled in cash, and is included in the above mentioned stock-based compensation amount. The Company has furthermore agreed to reimburse out-of-pocket expenses up to a maximum of 130,000 plus value-added tax. The 175,382 Stock Awards that were granted in the past and for which the restriction period is still in effect, will be absolutely maintained. The respective fair value of these stock awards at grant date amounted to 11.5 million.

In fiscal 2013, 2012 and 2011, expense related to share-based payment and to the Share Matching Program amounted to 23.2 million (including the above mentioned Stock Awards in connection with the departure from members of the Managing Board), 16.0 million and 15.2 million, respectively. For additional information regarding the Share Matching Program see Note 33 Share-based payment.

Former members of the Managing Board and their surviving dependents received emoluments within the meaning of Section 314 para. 1 No. 6 b of the German Commercial Code totaling 33.1 million (including 18.2 million in connection with the above mentioned departure from a member of the Managing Board), 15.8 million and 15.0 million in fiscal 2013, 2012 and 2011.

The defined benefit obligation (DBO) of all pension commitments to former members of the Managing Board and their survivors as of September 30, 2013, 2012 and 2011 amounted to 192.5 million, 181.6 million and 161.9 million. For additional information see Note 23 Post-employment benefits.

Compensation attributable to members of the Supervisory Board comprises in fiscal 2013, 2012 and 2011 of a base compensation and additional compensation for committee work and amounted to 4.9 million, 4.8 million and 4.8 million (including meeting fees), respectively.

No loans and advances from the Company are provided to members of the Managing Board and Supervisory Board.

In fiscal 2013, 2012 and 2011, no other major transactions took place between the Company and the other members of the Managing Board and the Supervisory Board.

Some of our board members hold, or in the last year have held, positions of significant responsibility with other entities. We have relationships with almost all of these entities in the ordinary course of our business whereby we buy and sell a wide variety of products and services on arm's length terms. Michael Diekmann is the Chairman of the Board of Management of Allianz SE. Our transactions with Allianz Group are conducted on arm's length basis and include insurance business and asset management.

39. Subsequent events

After the end of fiscal 2013, Siemens signed an agreement to sell its business for treating and processing municipal and industrial water and wastewater that are bundled in the Siemens Water Technologies Business

Unit, as well as the related service activities, to funds managed by American European Associates Investors LP (AEA), U.S., for a purchase price of 640 million. Closing of the transaction is subject to approval by regulatory authorities and is expected in the first half of fiscal 2014.

In November 2013, Siemens announced a share buyback of up to 4 billion ending latest on October 31, 2015. The buybacks will be made under the current authorization granted at the Annual Shareholders Meeting on January 25, 2011, which allows for further share repurchases of a maximum of 47.8 million shares under this program. Shares repurchased may be used for cancelling and reducing capital stock, for issuing shares to current and former employees, to members of the Managing Board and board members of affiliated companies and for meeting obligations from or in connection with convertible bonds or warrant bonds.
