I. Operating Results and Financial Conditions

2014 in Review

Looking back at the global economy in 2014, although the United States and other developed countries were initially expected to bring about a return to a path of full-fledged growth, such expectations came up short due to the ongoing occurrence of such unforeseen circumstances as the conflict between Russia and Ukraine. In the U.S., despite the negative impact of the major cold wave that struck at the beginning of the year, the economy showed steady signs of recovery, buoyed by the improvement in employment conditions and healthy growth in consumer spending. In Europe, the economy remained sluggish due to such factors as the negative impact of Russia's deteriorating economy on neighboring euro area countries. The pace of economic expansion in China was modest while other emerging countries in Southeast Asia and South America faced slowdowns in market growth due to economic stagnation. As for Japan, with the economy yet to recover from the decline following the rush in demand leading up to the hike in the country's consumption tax, growth fell short of the rate recorded in the previous year.

Looking at the markets in which Canon operates amid these conditions, demand for office multifunction devices (MFDs) and laser printers maintained steady growth. Demand for interchangeable-lens digital cameras continued to face harsh conditions due to the economic slowdown. As for digital compact cameras, demand continued to shrink in both developed countries and emerging markets. Looking at the market for inkjet printers, demand decreased due to the sluggish economies of Asia and Europe. In the industry and others sector, a rebound in capital investment for both memory devices and image sensors led to a pickup in demand for semiconductor lithography equipment. Additionally, demand for lithography equipment used in the production of FPDs (flat panel displays) increased for large-size panels.

The average value of the yen during the year was ¥106.18 against the U.S. dollar, a year-on-year depreciation of approximately ¥8, and ¥140.62 against the euro, a year-on-year depreciation of approximately ¥11.

MFDs and laser printers enjoyed solid demand during the year and industrial equipment sales increased significantly. Within the shrinking market for interchangeable-lens digital cameras and digital compact cameras, less-than-expected demand during the year-end shopping season led to a decline in net sales. As a result, despite the positive effects of favorable currency exchange rates, net sales for the year decreased by 0.1% year on year to ¥3,727.3 billion. The gross profit ratio, however, rose 1.7 points year on year to 49.9% thanks to the effects of ongoing cost-cutting efforts along with the depreciation of the yen. Despite an increase in foreign-currency-denominated operating expenses due to the depreciation of the yen, Group-wide efforts to thoroughly reduce spending contributed to limiting operating expenses to ¥1,498.0 billion, an increase of just 2.5% year on year. As a result, operating profit increased by 7.8% year on year to ¥363.5 billion. Other income increased by ¥9.4 billion due to foreign currency exchange gains while income before income taxes increased by 10.3% to ¥383.2 billion. Net income attributable to Canon Inc. increased by 10.5% to ¥254.8 billion. Accordingly, despite the slight decline in net sales, Canon achieved profit growth.

Basic net income attributable to Canon Inc. stockholders per share for the year was ¥229.03, a year-on-year increase of ¥28.25.

Results by Segment

Looking at Canon's full-year performance by business unit, within the Office Business Unit, as for office MFDs, sales increased steadily from the year-ago period led by healthy demand for new imageRUNNER ADVANCE C350/C250-series models, Canon's first color A4 (letter and legal-sized)-model imageRUNNER ADVANCE machines, and the imagePRESS C800/C700, Canon's first color models targeting the light production market, along with the A3 (12 x 18 ")-model imageRUNNER ADVANCE C5200 series, which continues to be well accepted in the market. As for high-speed continuous-feed printers, the Océ ColorStream 3000 series continued to enjoy solid sales growth from the previous year. Among laser printers, although color models and multifunction models recorded sales growth, total sales volume decreased slightly from the year-ago period owing to the decrease in demand for monochrome models in European and other markets that have suffered prolonged economic stagnation. As a result, coupled with the positive effects of favorable currency exchange rates, sales for the business unit totaled ¥2,078.7 billion, a year-on-year increase of 3.9%, while operating profit totaled ¥292.1 billion, an increase of 9.4%.

Within the Imaging System Business Unit, although sales volume of interchangeable-lens digital cameras declined owing to the shrinking market in Japan as a result of the reaction following the rush in demand prior to the consumption tax increase, and in Europe and other markets due to worsening economic conditions the advanced-amateur-model EOS 7D Mark II achieved healthy growth, enabling Canon to maintain the market's top share. As for digital compact cameras, despite a decline in total sales volume, sales of high-added-value models featuring high image quality and high-magnification zoom capabilities, such as the PowerShot G7 X and PowerShot SX60 HS/SX700 HS, recorded solid growth, contributing to an improvement in profitability. Looking at inkjet printers, although sales volume of hardware for the fourth quarter increased from the year-ago period thanks to efforts to boost sales through the introduction of new products for the year-end shopping season and marketing tailored to geographical characteristics, sales volume for the year decreased due to economic sluggishness in Asia and Europe. Sales of consumable supplies increased from the previous year owing to the steady accumulation of printer units currently operating in the market. As a result, sales for the business unit decreased by 7.3% to ¥1,343.2 billion year on year, while operating profit declined 4.5% to ¥194.6 billion.

In the Industry and Others Business Unit, ongoing investment following the recovery in the second half of the previous year by memory device manufacturers led to increased unit sales of semiconductor lithography equipment for memory devices and image sensors. As for FPD lithography equipment, amid increasing market demand for higher definition tools, lithography systems for the creation of high-definition mid- and small-size panels, in addition to a model introduced in the second half of the previous year for large panels, recorded healthy growth, contributing to the boosting of both sales volume and market share. With regard to medical equipment, sales volume of new digital radiography systems, including wireless static-image models and models capable of capturing dynamic images, grew steadily, fueling sales growth. Consequently, sales for the business unit totaled ¥398.8 billion, an increase of 6.4% year on year, while operating profit, although showing an improvement from the previous year, recorded a loss of ¥21.8 billion owing to investment, including R&D expenses, into next-generation technologies.

Cash Flow

During 2014, cash flow from operating activities totaled ¥583.9 billion, an increase of ¥76.3 billion compared with the previous year owing to the increase in profit as well as an improvement in working capital. Although capital investment was focused on new products, cash flow from investing activities increased by ¥19.1 billion year on year to ¥269.3 billion as a result of an outlay for the acquisition of Milestone Systems aimed at enhancing Canon's network camera business and several other companies. Accordingly, free cash flow totaled ¥314.6 billion, an increase of ¥57.2 billion compared with the previous year.

Cash flow from financing activities recorded an outlay of ¥300.9 billion, mainly arising from the dividend payout and the repurchasing of treasury stock.

Owing to these factors, as well as the impact of foreign currency translation adjustments, cash and cash equivalents increased by ¥55.7 billion to ¥844.6 billion from the end of the previous year.

Non-consolidated Results

Non-consolidated net sales totaled ¥2,084.2 billion, a year-on-year decrease of 3.2%, ordinary profit increased by 5.3% to ¥249.3 billion, and net income increased by 3.0% to ¥175.5 billion.

Outlook

As for the outlook in 2015, the U.S. economy is expected to grow steadily as employment conditions continue to improve and consumer spending picks up. Projections for the European economy point to continued weak growth due to such ongoing destabilizing factors as the significant slowdown in the Russian economy and the resurgent financial crisis among EU member nations. Looking at China's economy, the country is expected to gradually shift from high economic growth toward a period of stable growth. In Japan, amid an improvement in employment conditions, consumer spending is expected to gradually recover. As for the outlook for the global economy as a whole, while we will likely see differences in each region, indications point to gradual acceleration toward stable growth as the latter half of the year approaches.

In the businesses in which Canon operates, demand for MFDs is projected to continue to expand moderately, mainly for color models, while demand in the laser printer market is expected to remain at the same level as the previous year. As for the digital camera market, although projections indicate continued market contraction mainly for low-priced compact models, demand for interchangeable-lens digital cameras is expected to recover gradually. Looking at inkjet printers, with Asian markets gradually recovering following their extended period of stagnation, demand is expected to remain in line with the previous year. As for the industrial equipment market, with manufacturers expected to continue making capital outlays for semiconductor lithography equipment in response to increasing demand for memory devices and image sensors, demand is expected to remain at the same level as the previous year. And as for FPD lithography equipment, demand is projected to increase as device manufacturers boost capital investment amid growing panel demand projected for 4K televisions and mobile devices.

With regard to currency exchange rates for the year, on which Canon's performance outlook is based, taking into account the current depreciation of the yen, Canon anticipates exchange rates of ¥120 to the U.S. dollar and ¥135 to the euro, representing a depreciation of approximately ¥14 against the U.S. dollar and an appreciation of approximately ¥6 against the euro compared with the annual average rates of the previous year.

Upon taking into consideration these foreign exchange rate assumptions, Canon projects full-year consolidated net sales in 2015 of ¥3,900.0 billion, a year-on-year increase of 4.6%; operating profit of ¥380.0 billion, a year-on-year increase of 4.5%; income before income taxes of ¥390.0 billion, a year-on-year increase of 1.8%; and net income attributable to Canon Inc. of ¥260.0 billion, a year-on-year increase of 2.0%.

Basic Policy Regarding Profit Distribution and Dividends for the Current Fiscal Year

Canon is being more proactive in returning profits to shareholders, mainly in the form of a dividend, taking into consideration mid-term profit forecasts, planned future investments, cash flow and other factors.

In 2014, the business environment remained challenging, characterized by, among other factors, prolonged global economic weakness. Thanks, however, to efforts to strengthen product competitiveness and the Company's financial position through a management focus on profitability and cash flow, Canon was able to generate ample cash reserves. Taking this into consideration while seeking to actively provide a stable return to shareholders, Canon has decided to distribute a full-year dividend of ¥150 per share, (interim dividend of ¥65 per share [already distributed], and year-end dividend of ¥85), which represents a ¥20 increase from the previous year's dividend.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

II. Management Policy

(1) Basic Policy

Under the corporate philosophy of *kyosei* living and working together for the common good Canon's basic management policy is to contribute to the prosperity and well-being of the world while endeavoring to become a truly excellent global corporation targeting continued growth and development.

(2) Management Goals

Based on this basic management policy, Canon launched the Excellent Global Corporation Plan in 1996. Through three phases, a period spanning 15 years, Canon worked to strengthen its management base. In Phase IV, which started in 2011, Canon established a goal of sound business growth, which entails the maintenance of high profitability and further expansion of corporate scale.

Over the past four years, such unforeseen events as the Great East Japan Earthquake, the extreme appreciation of the yen, the financial crisis in Europe and the Russia-Ukraine conflict have led to frequent and dramatic changes that have created a very difficult business environment. Canon sees significant opportunity in this kind of dramatic change and has been working to realize sound business growth, overcome these adversities and ensure a return to a growth trajectory by swiftly transforming itself ahead of the changing times.

In 2015, the final year of Phase IV, the Canon Group will work in a concerted effort to improve performance and build a solid foundation that will support further expansion in the future.

(3) Business Challenges and Countermeasures

As for the future of the global economy, although challenging conditions are expected to remain for some time in certain countries and regions, Canon anticipates sustained economic growth in countries such as the U.S. among developed countries, and India and ASEAN countries among emerging markets. Overall, the global economy is expected to gradually move toward stable growth.

Amid these conditions, 2015 is the final year of Phase IV of the Excellent Global Corporation Plan and the year in which the Canon EXPO will be held as the culmination of the efforts carried out during Phase IV. In addition to returning to a path of growth, Canon aims to bring Phase IV to a successful close, further reinforcing its business foundation to enable great strides beginning from next year. Toward this objective, Canon will undertake the following various measures.

1. Reinforcing Existing Businesses Through the Introduction of Innovative Products and Services

For MFDs and other office products, in addition to improving hardware performance, efforts will be made to build a framework that will enable the Company to service as a one-stop shop that provides a broad range of high-quality services. For cameras, efforts will be made to comprehensively raise aspects such as image-quality, visual expression, and operability. At the same time, Canon will work to further strengthen the network capabilities of these products. Additionally, to facilitate the Company's aim of becoming the all around leader in printing, it will leverage its strength, derived from having prepared a broad lineup, spanning consumer printers to industrial printing. In the Industrial equipment area, Canon will devise and execute concrete plans to concentrate technologies and strengthen the competitiveness of Canon Group companies.

2. Expanding New and Future Businesses and Further Cultivating Technologies that will Pave the Way to the Future
Canon aims to produce next-generation lithography equipment in volume by strengthening nanoimprint technology that realizes further reduction in process geometries. In the area of network camera systems, Canon will work to enhance its product lineup and develop solutions that address customer needs. With regard to the MR (Mixed Reality) System, Canon will identify industries that can leverage the strength of this system, and will strive to make the system the de facto standard design tool in those industries. In the medical field, the Company will accelerating develop, focusing on promising themes such as photoacoustic tomography, which facilitates the viewing of vascular conditions in 3D. The Company will work to expand and steadily cultivate new businesses mainly targeting the B2B field, such as Super Machine Vision, a system capable of high-accuracy three-dimensional recognition of objects for potential use in production sites, and 4K reference displays.

3. Strengthening Global Marketing Capabilities Through Unified Effort Between Product Operations and Sales Companies

In developed countries, Canon aims to gain share in both consumer and office segments. In the consumer segment, Canon will address the popularity of online shopping and other trends that are contributing to the diversification of sales channels. In the office segment, Canon will strengthen its response towards centralized procurement of office equipment by global corporations. In emerging markets, Canon will promote enhancement of its various sales networks and product lineup, in line with situations in each country and region.

4. Accelerating a New Dimension of Cost-reduction Activities

In the area of procurement, Canon aims to reduce total costs, further deploying measures focused on reducing costs from the stage of product development. In the prototyping process, Canon will create next-generation development methodologies, through such means as expanding the application of simulation technologies as well as employing 3D printing. In production, Canon will realize further cost reduction by expanding the application of automation equipment and through measures aimed at the in-house production of molded parts and production equipment.

5. Building a Globally Optimized Production System

To maintain an optimized production system, Canon will take steps to revive domestic production, promoting measures such as automation and in-house production, while building new structural dimensions of cost reduction. At the same time, Canon will promote localized production of through the use of automation equipment in the U.S. and Europe.

In addition to these measures, Canon will promote other initiatives such as product quality reforms to win top customer approval, information security improvement, and human resource development.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.
