### **Report on the review of quarterly information ITR**

To the Shareholders, Directors and Management of

Ultrapar Participações S.A.

São Paulo, SP

### **Introduction**

We have reviewed the accompanying individual and consolidated interim financial information of Ultrapar Participações S.A. ( Company ), comprised in the Quarterly Financial Information ITR Form for the quarter ended June 30, 2018, which comprise the balance sheet as of June 30, 2018 and related statements of income, comprehensive income for the three and six-month period then ended and changes in shareholders' equity and cash flows for the six-month period then ended, including the explanatory notes.

The Company's Management is responsible for the preparation of the interim financial information in accordance with Technical Pronouncement CPC 21 (R1) Interim Financial Information and with International Standard IAS 34 Interim Financial Reporting, issued by the International Accounting Standards Board IASB, such as for the presentation of these information in a manner consistent with the standards issued by the Brazilian Securities Commission, applicable to the preparation of the Quarterly Financial Information ITR. Our responsibility is to express a conclusion on these interim financial information based on our review.

### **Scope of the review**

Our review was carried out in accordance with the Brazilian and international review standards for interim information (NBC TR 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the auditing standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion on the interim financial information**

Based on our review, nothing has come to our attention that causes us to believe that the individual and consolidated interim financial information included in the quarterly information referred to above was not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34, issued by the IASB applicable to the preparation of Quarterly Financial Information ITR and presented in accordance with the standards issued by the Brazilian Securities Commission CVM.

### **Other matters**

### **Interim statements of value added**

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 6-K

The individual and consolidated statements of value added for the six-month period ended June 30, 2018, prepared under the responsibility of the Company's management, and presented as supplementary information for the purposes of IAS 34, were submitted to the same review procedures followed together with the review of the Company's interim financial information. In order to form our conclusion, we evaluated whether these statements are reconciled to the interim financial information and to the accounting records, as applicable, and whether their form and content are in accordance with the criteria set on Technical Pronouncement CPC 09 - Statement of Value Added. Based on our review, nothing has come to our attention that causes us to believe that the accompanying statements of value added are not prepared, in all material respects, in accordance with the individual and consolidated interim financial information taken as a whole.

***b. Cash and Cash Equivalents***

Includes cash, banks deposits, and short-term, highly-liquid investments that are readily convertible into a known amount of cash and are subject to an insignificant risk of change in value. See Note 4 for further details on cash and cash equivalents of the Company and its subsidiaries.

***c. Financial Assets***

The Company and its subsidiaries evaluated the classification and measurement of financial assets based on its business model of financial assets as follows:

Amortized cost: financial assets held in order to collect contractual cash flows, solely principal and interest. The interest earned and the foreign currency exchange variation are recognized in profit or loss, and balances are stated at acquisition cost plus the interest earned, using the effective interest rate method. Financial investments in guarantee of loans are classified as amortized cost.

Measured at fair value through other comprehensive income: financial assets that are acquired or originated for the purpose of collecting contractual cash flows or selling financial assets. The balances are stated at fair value, and the interest earned and the foreign currency exchange variation are recognized in profit or loss. Differences between fair value and initial amount of financial investments plus the interest earned are recognized in other comprehensive income in the Valuation adjustments. Accumulated gains and losses recognized in shareholders equity are reclassified to profit or loss at the time of their settlement. Substantially the financial investments in Bank Certificates of Deposit ( CDB ) and repurchase agreements are classified as measured at fair value through other comprehensive income.

Measured at fair value through profit or loss: financial assets not classified as amortized cost or measured at fair value through other comprehensive income. The balances are stated at fair value and both the interest earned and the exchange variations and changes in fair value are recognized in the income statement. Investment funds and derivatives are classified as measured at fair value through profit or loss.

The Company and its subsidiaries use financial instruments for hedging purposes, applying the concepts described below:

Hedge accounting fair value hedge: financial instruments used to hedge exposure to changes in the fair value of an item, attributable to a particular risk, which can affect the entity's profit or loss. In the initial designation of the fair value hedge, the relationship between the hedging instrument and the hedged item is documented, including the objectives of risk management, the strategy in conducting the transaction, and the methods to be used to evaluate its effectiveness. Once the fair value hedge has been qualified as effective, the hedge item is also measured at fair value. Gains and losses from hedge instruments and hedge items are recognized in profit or loss. The hedge accounting must be discontinued when the hedge becomes ineffective.

Hedge accounting cash flow hedge: financial instruments used to hedge the exposure to variability in cash flows that is attributable to a risk associated with an asset or liability or highly probable transaction or firm commitment that may affect the income statements. The portion of the gain or loss on the hedging instrument that is determined to be effective relating to the effects of exchange rate effect, is recognized directly in equity in accumulated other comprehensive income as Valuation adjustments while the ineffective portion is recognized in profit or loss. Gains or losses on the hedging instrument relating to the effective portion of this hedge that had been recognized directly in accumulated other comprehensive income shall be recognized in profit or loss in the period in which the hedged item is recognized in profit or loss or as initial cost of non-financial assets, in the same line of the statement that the hedged item is recognized. The hedge accounting shall be discontinued when (i) the Company cancels the hedging relationship; (ii) the hedging instrument expires; and (iii) the hedging instrument no longer qualifies for hedge accounting. When hedge accounting is discontinued, gains and losses recognized in other comprehensive income in equity are reclassified to profit or loss in the period which the hedged item is recognized in profit or loss. If the transaction hedged is canceled or is not expected to occur, the cumulative gains and losses in other comprehensive income in equity shall be recognized immediately in profit or loss.

*(In thousands of Brazilian Reais, unless otherwise stated)*

Hedge accounting hedge of net investments in foreign operation: financial instruments used to hedge exposure on net investments in foreign subsidiaries due to the fact that the local functional currency is different from the functional currency of the Company. The portion of the gain or loss on the hedging instrument that is determined to be effective, referring to the exchange rate effect, is recognized directly in equity in accumulated other comprehensive income as cumulative translation adjustments, while the ineffective portion and the operating costs are recognized in profit or loss. The gain or loss on the hedging instrument that has been recognized directly in accumulated other comprehensive income shall be recognized in income upon disposal of the foreign operation.

For further detail on financial instruments of the Company and its subsidiaries, see Note 33.

***d. Trade Receivables***

Trade receivables are recognized at the amount invoiced of the counterparty that the Company subsidiaries are entitled. The estimated losses take into account, at the initial recognition of the contract, the expected losses for the next 12 months and for the useful life of the contract when the deterioration or improvement of the customers' credit quality (see Notes 5 and 33 Customer Credit Risk), considering the customers' characteristics in each business segment. The amount of the allowance for estimated losses on doubtful accounts is deemed by management to be sufficient to cover any probable loss on realization of trade receivables.

***e. Inventories***

Inventories are stated at the lower of acquisition cost or net realizable value (see Note 6). The cost value of inventory is measured using the weighted average cost and includes the costs of acquisition and processing directly and indirectly related to the units produced based on the normal capacity of production. Estimates of net realizable value are based on the average selling prices at the end of the reporting period, net of applicable direct selling expenses. Subsequent events related to the fluctuation of prices and costs are also considered, if relevant. If net realizable values are below inventory costs, a provision corresponding to this difference is recognized. Provisions are also made for obsolescence of products, materials, or supplies that (i) do not meet its subsidiaries' specifications, (ii) have exceeded their expiration date, or (iii) are considered slow-moving inventory. This classification is made by management with the support of its industrial and operations teams.

***f. Contractual assets with customers' exclusive rights***

Exclusive rights disbursements as provided in Ipiranga's agreements with reseller service stations and major consumers are recognized as contractual assets when paid and amortized according to the conditions established in the agreements (see Note 2.a and 11).

***g. Investments***

Investments in subsidiaries are accounted for under the equity method of accounting in the individual interim financial information of the parent company (see Notes 3.b and 12). A subsidiary is an investee in which the investor is entitled to variable returns on investment and has the ability to interfere in its financial and operational activities. Usually the equity interest in a subsidiary is more than 50%.

Investments in associates and joint ventures are accounted for under the equity method of accounting in the individual and consolidated interim financial information (see Note 12). An associate is an investment, in which an investor has significant influence, that is, has the power to participate in the financial and operating decisions of the investee but does not exercise control. A joint venture is an investment in which the shareholders have the right to net assets on behalf of a joint control. Joint control is the agreement, which establish that decisions about the relevant activities of the investee require the consent from the parties that share control.

Other investments are stated at acquisition cost less provision for losses, unless the loss is considered temporary.

***h. Property, Plant, and Equipment***

Property, plant, and equipment is recognized at acquisition or construction cost, including financial charges incurred on property, plant, and equipment under construction, as well as maintenance costs resulting from scheduled plant outages and estimated costs to remove, to decommission, or to restore assets (see Notes 2.n and 20), less accumulated depreciation and, when applicable, less provision for losses (see Note 13).

Depreciation is calculated using the straight-line method, over the periods mentioned in Note 13, taking into account the estimated useful lives of the assets, which are reviewed annually.

Leasehold improvements are depreciated over the shorter of the lease contract term and useful life of the property.

***i. Leases***

**Finance Leases**

Certain lease contracts transfer substantially all the risks and benefits associated with the ownership of an asset to the subsidiaries. These contracts are characterized as finance leases, and assets thereunder are capitalized at lease commencement at their fair value or, if lower, present value of the minimum lease payments under the contracts. The items recognized as assets are depreciated and amortized using the lower of the straight-line method over the lower of the useful lives applicable to each group of assets or the contract terms, as mentioned in Notes 13 and 14. Financial charges under the finance lease contracts are allocated to profit or loss over the lease contract term, based on the amortized cost and the effective interest rate method of the related lease obligation (see Note 15.i).

**Operating Leases**

There are lease transactions where the risks and benefits associated with the ownership of the asset are not transferred and where there is no purchase option, or the purchase option at the end of the contract is equivalent to the market value of the leased asset. Payments made under an operating lease contract are recognized as cost or expense in the income statement on a straight-line basis over the term of the lease contract (see Note 34.c).

***j. Intangible Assets***

Intangible assets include assets acquired by the Company and its subsidiaries from third parties, according to the criteria below (see Note 14):

Goodwill is shown as intangible assets corresponding to the positive difference between the amount paid or payable to the seller and the fair value of the identified assets and liabilities assumed of the acquired entity. Goodwill is tested annually for impairment. Goodwill is allocated to the business segments, which represent the lowest level that goodwill is monitored by the Company for impairment testing purposes (see Note 14.i).

Other intangible assets acquired from third parties, such as software, technology, and commercial property rights, are measured at the total acquisition cost and amortized using straight-line method, over the periods mentioned in Note 14, taking into account their useful life, which is reviewed annually.

The Company and its subsidiaries have not recognized intangible assets that were generated internally. The Company and its subsidiaries have goodwill and brands acquired in business combinations, which are evaluated as intangible assets with indefinite useful life (see Note 14 items i and v).

***k. Other Assets***

Other assets are stated at the lower of cost and realizable value, including, if applicable, interest earned, monetary changes and changes in exchange rates incurred or less a provision for loss and, if applicable, adjustment to present value.

***l. Financial Liabilities***

The Company and its subsidiaries' financial liabilities include trade payables and other payables, loans, debentures, finance leases and derivative financial instruments. Financial liabilities are classified as financial liabilities at fair value through profit or loss or financial liabilities at amortized cost. The financial liabilities at fair value through profit or loss refer to derivative financial instruments, subscription warrants, and financial liabilities designated as hedged items in a fair value hedge relationship upon initial recognition (see Note 2.c Fair Value Hedge). The financial liabilities at amortized cost are stated at the initial transaction amount plus related charges and net of amortization and transaction costs. The charges are recognized in profit or loss using the effective interest rate method.

Transaction costs incurred and directly attributable to the activities necessary for contracting loans or for issuing bonds, as well as premiums and discounts upon issuance of debentures and other debt, are allocated to the instrument and amortized to profit or loss over its term, using the effective interest rate method (see Note 15.j).

***m. Income and Social Contribution Taxes on Income***

Current and deferred income tax ( IRPJ ) and social contribution on net income tax ( CSLL ) are calculated based on their current rates, considering the value of tax incentives. Taxes are recognized based on the rates of IRPJ and CSLL provided for by the laws enacted on the last day of the interim financial information. The current rates in Brazil are 25% for IRPJ and 9% for CSLL. For further details about recognition and realization of IRPJ and CSLL, see Note 9.

For purposes of disclosure, deferred tax assets were offset against the deferred tax liability, IRPJ and CSLL, in the same taxable entity and the same taxation authority.

***n. Provision for Asset Retirement Obligation Fuel Tanks***

The subsidiary Ipiranga has the legal obligation to remove the underground fuel tanks located at Ipiranga-branded service stations after a certain period. The estimated cost of the obligation to remove these fuel tanks is recognized as

a liability when the tanks are installed. The estimated cost is recognized in property, plant, and equipment and depreciated over the respective useful lives of the tanks. The amounts recognized as a liability are monetarily restated using the National Consumer Price Index ( IPCA ) until the respective tank is removed (see Note 20). An increase in the estimated cost of the obligation to remove the tanks could result in negative impact in future results. The estimated removal cost is reviewed and updated annually or when there is significant change in its amount and change in the estimated costs are recognized in income statements when they become known.

***o. Provisions for Tax, Civil, and Labor Risks***

A provision for tax, civil and labor risks is recognized for quantifiable risks, when the chance of loss is more-likely-than-not in the opinion of management and internal and external legal counsel, and the amounts are recognized based on the evaluation of the outcomes of the legal proceedings (see Note 21).

***p. Post-Employment Benefits***

Post-employment benefits granted and to be granted to employees, retirees, and pensioners are based on an actuarial calculation prepared by an independent actuary and reviewed by management, using the projected unit credit method (see Note 19.b). The actuarial gains and losses are recognized in cumulative other comprehensive income in the Valuation adjustments and presented in the statement of shareholders equity.

**Table of Contents****Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)***q. Other Liabilities**

Other liabilities are stated at known or measurable amounts plus, if applicable, related charges, monetary restatement, and changes in exchange rates incurred. When applicable, other liabilities are recognized at present value, based on interest rates that reflect the term, currency, and risk of each transaction.

**r. Foreign Currency Transactions**

Foreign currency transactions carried out by the Company or its subsidiaries are remeasured into their functional currency at the exchange rate prevailing at the date of each transaction. Outstanding monetary assets and liabilities of the Company and its subsidiaries are translated using the exchange rate at the date of the reporting period. The effect of the difference between those exchange rates is recognized in profit or loss until the conclusion of each transaction.

**s. Basis for Translation of Interim Financial Information of Foreign Subsidiaries**

Assets and liabilities of the foreign subsidiaries, denominated in currencies other than that of the Company (functional currency: Brazilian Real), which have administrative autonomy, are translated using the exchange rate at the end of the reporting period. Revenues and expenses are translated using the average exchange rate of each year and shareholders' equity is translated at the historical exchange rate of each transaction affecting shareholders' equity. Gains and losses resulting from changes in these foreign investments are directly recognized in shareholders' equity in cumulative other comprehensive income in the cumulative translation adjustments and will be recognized in profit or loss if these investments are disposed of. The balance in cumulative other comprehensive income and presented in the shareholders' equity as cumulative translation adjustments on June 30, 2018 was a gain of R\$ 97,449 (gain of R\$ 53,061 on December 31, 2017) see Note 25.g Cumulative Translation Adjustments.

The foreign subsidiaries with functional currency different from the Company and which have administrative autonomy are listed below:

| <b>Subsidiary</b>                           | <b>Functional currency</b> | <b>Location</b> |
|---|----------------------------|-----------------|
| Oxiteno México S.A. de C.V.                 | Mexican Peso               | Mexico          |

|--------------------------|-------------|-----------|
| Oxiten Uruguay S.A. (i)  | U.S. Dollar | Uruguay   |
| Oxiten Andina, C.A. (ii) | Bolivar     | Venezuela |

- (i) The subsidiary Oxiten Uruguay S.A. ( Oxiten Uruguay ) determined its functional currency as the U.S. dollar ( US\$ ), as its inventory sales, purchases of raw material inputs, and financing activities are performed substantially in this currency.
- (ii) According the definition and general guidance of IAS 29, the characteristics of the economic environment of Venezuela indicate that this country is a hyperinflationary economy. As a result, the financial information of Oxiten Andina, C.A. ( Oxiten Andina ) was adjusted by the Venezuelan Consumer Price Index. On January 26, 2018, the Venezuelan Central Bank issued Foreign Exchange Regulation No. 39, altering the Venezuelan foreign exchange markets and regulating the DICOM Tipo de Cambio Complementario Flotante de Mercado Supplemental (Floating Market Exchange) as the legally recognized type of exchange rate, being the Bolivar traded as of June 30, 2018 at the variable exchange rate of 115,000.00 VEF/US\$ for sale and 114,712.50 VEF/US\$ for purchase.

Assets and liabilities of the other foreign subsidiaries, which do not have administrative autonomy, are considered an extension of the activities of their parent company and are translated using the exchange rate at the end of the reporting period. Gains and losses resulting from changes in these foreign investments are directly recognized as financial income or loss. The loss recognized in income for the six-month period ended June 30, 2018 amounted to R\$ 6,105 (R\$ 3,455 gain for the six-month period ended June 30, 2017).

***t. Use of Estimates, Assumptions and Judgments***

The preparation of the interim financial information requires the use of estimates, assumptions, and judgments for the accounting of certain assets, liabilities, and income. Therefore, the Company and subsidiaries management use the best information available at the time of preparation of the interim financial information, as well as the experience of past and current events, also considering assumptions regarding future events. The interim financial information therefore include estimates, assumptions, and judgments related mainly to determining the fair value of financial instruments (Notes 2.c, 2.l, 4, 15 and 33), the determination of the estimated losses on doubtful accounts (Notes 2.d, 5 and 33), the determination of provisions for losses of inventories (Notes 2.e and 6), the determination of deferred IRPJ and CSLL amounts (Notes 2.m and 9), the determination of control in subsidiaries (Notes 2.g, 2.s, 3 and 12.a), the determination of joint control in joint venture (Notes 2.g, 12.a and 12.b), the determination of significant influence in associates (Notes 2.g and 12.c), the determination of exchange rate used to translation of Oxiteno Andina information (Note 2.s), the useful lives of property, plant, and equipment (Notes 2.h and 13), the useful lives of intangible assets, and the determination of the recoverable amount of goodwill (Notes 2.j and 14), provisions for assets retirement obligations (Notes 2.n and 20), provisions for tax, civil, and labor risks (Notes 2.o and 21), estimates for the preparation of actuarial reports (Notes 2.p and 19.b) and the determination of fair value of subscription warrants indemnification (Notes 24 and 33). The actual result of the transactions and information may differ from their estimates.

***u. Impairment of Assets***

The Company and its subsidiaries review, every report period, the existence of any indication that an asset may be impaired and annually test intangible assets with undefined useful life. If there is an indication, the Company and its subsidiaries estimate the recoverable amount of the asset. Assets that cannot be evaluated individually are grouped in the smallest group of assets that generate cash flow from continuous use and that are largely independent of cash flows of other assets (cash generating units - CGU ). The recoverable amount of assets or CGUs corresponds to the greater of their fair value net of applicable direct selling costs and their value in use.

The fair value less costs of disposal is determined by the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date, net of costs of removing the asset, and direct incremental costs to bring an asset into condition for its sale, legal costs, and taxes.

To assess the value in use, the Company and its subsidiaries consider the projections of future cash flows, trends, and outlooks, as well as the effects of obsolescence, demand, competition, and other economic factors. Such cash flows are discounted to their present values using the discount rate before tax that reflects market conditions for the period of impairment testing and the specific risks of the asset or CGU being evaluated. In cases where the expected

discounted future cash flows are less than their carrying amount, an impairment loss is recognized for the amount by which the carrying value exceeds the fair value of these assets. Losses for impairment of assets are recognized in profit or loss. In case goodwill has been allocated to a CGU, the recognized losses are first allocated to reduce the corresponding goodwill. If the goodwill is not enough to absorb such losses, the surplus is allocated to the assets on a pro-rata basis. An impairment of goodwill cannot be reversed. For other assets, impairment losses may be reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if the impairment had not been recognized.

No impairment was recognized in the present period (see Note 14.i).

**v. *Business Combination***

A business combination is accounted applying the acquisition method. The cost of the acquisition is measured based on the consideration transferred and to be transferred, measured at fair value at the acquisition date. In a business combination, the assets acquired and liabilities assumed are measured in order to classify and allocate them accordingly to the contractual terms, economic circumstances and relevant conditions on the acquisition date. The non-controlling interest in the acquired is measured based on its interest in identifiable net assets acquired. Goodwill is measured as the excess of the consideration transferred and to be transferred over the fair value of net assets acquired (identifiable assets and liabilities assumed, net). After the initial recognition, goodwill is measured at cost less any accumulated impairment losses. For impairment testing purposes, goodwill is allocated to the Company's operating segments. When the cost of the acquisition is lower than the fair value of net assets acquired, a gain is recognized directly in the income statement. Costs related to the acquisition are recorded in the income statement when incurred.

**w. *Statements of Value Added***

As required by Brazilian Corporate Law, the Company and its subsidiaries prepare the individual and consolidated statements of value added ( DVA ) according to CPC 09 Statement of Value Added, as an integral part of the interim financial information as applicable to publicly-traded companies, and as supplemental information for the International Financial Reporting Standards ( IFRS ), which does not require the presentation of DVA.

**x. *Statements of Cash Flows Indirect Method***

The Company and its subsidiaries prepared its individual and consolidated statements of cash flows in accordance with IAS 7 (CPC 03) Cash Flow Statement. The Company and its subsidiaries present the interest paid on loans and debentures in financing activities. The Company and its subsidiaries present financial investments on a net basis of income and redemptions in the investment activities.

**y. *Adoption of the Pronouncements Issued by CPC and IASB***

## a) Classification and measurement of financial instruments:

The Company and its subsidiaries evaluated the classification and measurement of financial instruments and, based on its business model, concluded that the target is achieved, receiving contractual cash flows and selling financial assets (hold for collect and sell). The Company and its subsidiaries evaluated all the stages for the recognition of their revenues from contracts with customers and based on their diagnosis did not identify material measurement impacts resulting from the adoption of this standard (see Note 2.a).

In relation to the presentation in the income statement, the Company and its subsidiaries evaluated that certain expenses, allocated as selling and marketing until December 31, 2017, should be better presented as a reduction of revenue, substantially in relation to the amortization expenses of exclusive contracts to operate Ipiranga service station.

The Company and its subsidiaries adopted retrospectively the impacts of the IFRS 9 and 15.

**3. Principles of Consolidation, Investments in Subsidiaries and Acquisition**

**a) Principles of Consolidation**

In the preparation of the consolidated interim financial information the investments of one company in another, balances of asset and liability accounts, revenues transactions, costs and expenses were eliminated, as well as the effects of transactions conducted between the companies. Non-controlling interests in subsidiaries are presented within consolidated shareholders' equity and net income.

Consolidation of a subsidiary begins when the parent company obtains direct or indirect control over a company and ceases when the parent company loses control of a company. Income and expenses of a subsidiary acquired are included in the consolidated income statement and other comprehensive income from the date the parent company gains the control. Income and expenses of a subsidiary, in which the parent company loses control, are included in the consolidated income statement and other comprehensive income until the date the parent company loses control.

When necessary, adjustments are made to the interim financial information of subsidiaries to bring their accounting policies into line with the Company's accounting policies.

Since 2003, Ultrapar has adopted a stock plan in which the executive has the usufruct of shares held in treasury. The Deferred Stock Plan provides for the transfer of the ownership of the shares to those eligible members of management after five to seven years from the initial concession of the rights subject to uninterrupted employment of the participant during the period. The volume of shares and the executives eligible are determined by the Board of Directors, and there is no mandatory annual grant. The total number of shares to be used in the plan is subject to the number of shares in treasury. Ultrapar's Board of Directors does not have a stock plan. The fair value of the awards were determined on the grant date based on the market value of the shares on the B3 S.A. Brasil, Bolsa, Balcão ( B3 ), the Brazilian Securities, Commodities and Futures Exchange and the amounts are amortized between five to seven years from the grant date.

- (ii) Consist of certain gains and income that are not taxable under applicable tax legislation, such as the reimbursement of taxes and the reversal of certain provisions;
  
- (iii) Brazilian tax law allows for an alternative method of taxation for companies that generated gross revenues of up to R\$ 78 million in their previous fiscal year. Certain subsidiaries of the Company adopted this alternative form of taxation, whereby income and social contribution taxes are calculated on a basis equal to 32% of operating revenues, as opposed to being calculated based on the effective taxable income of these subsidiaries. The adjustment to estimated income represents the difference between the taxation under this alternative method and the income and social contribution taxes that would have been paid based on the effective statutory rate applied to the taxable income of these subsidiaries;
  
- (iv) Interest on equity is an option foreseen in Brazilian corporate law to distribute profits to shareholders, calculated based on the long-term interest rate ( TJLP ), which does not affect the income statement, but is deductible for purposes of IRPJ and CSLL, being taxable to the beneficiary and deductible to the entity that pays.

On December 31, 2017, the Company tested the balances of goodwill shown in the table above for impairment. The determination of value in use involves assumptions, judgments, and estimates of cash flows, such as growth rates of revenues, costs and expenses, estimates of investments and working capital, and discount rates. The assumptions about growth projections and future cash flows are based on the Company's business plan of its operating segments, as well as comparable market data, and represent management's best estimate of the economic conditions that will exist over the economic life of the various CGUs, to which goodwill is related. The main key-assumptions used by the Company to calculate the value in use are described below:

Period of evaluation: the evaluation of the value in use is calculated for a period of five years (except the Extrafarma segment), after which we calculate the perpetuity, considering the possibility of carrying the business on indefinitely. For the Extrafarma segment, a period of 10 years was used due to its expansion plan and a four-year period to maturity of new stores were considered.

Discount and real growth rates: on December 31, 2017, the discount and real growth rates used to extrapolate the projections ranged from 9.6% to 12.7% and from 0% to 1% p.a., respectively, depending on the CGU analyzed. For the subsidiary Oxiteno Andina, due to the macroeconomic scenario in Venezuela, the discount rate used was 803.8%.

Revenue from sales and services, costs and expenses, and gross margin: for 2018, the budget prepared by management and approved by the Board of Directors was considered. In subsequent periods, the Company considers the forecast of the general inflation or price index predicted in the contracts.

Opening of new commercial points (investments): for 2018, the budget prepared by the management and approved by the Board of Directors was considered. In subsequent periods, the Company considers the expansion plans of each business unit, which also considers the commercial establishments closed in the previously years.

The goodwill impairment tests and net assets of the Company and its subsidiaries did not result in the recognition of impairment for the year ended December 31, 2017. The Company assessed a sensitivity analysis of discount and growth rate of perpetuity, due to their significant impact on cash flows and value in use. An increase of 0.5 percentage points in the discount rate or a decrease of 0.5 percentage points in the growth rate of the perpetuity of the cash flow of each business segment would not result in the recognition of impairment.

Employee Benefits and Private Pension Plan (Consolidated)****a. ULTRAPREV- Associação de Previdência Complementar**

In February 2001, the Company's Board of Directors approved the adoption of a defined contribution pension plan to be sponsored by the Company and each of its subsidiaries. Participating employees have been contributing to this plan, managed by Ultraprev Associação de Previdência Complementar ( Ultraprev ), since August 2001. As participating employees retire, they may choose to receive either (i) a monthly sum ranging between 0.5% and 1.0% of their respective accumulated fund in Ultraprev or (ii) a fixed monthly amount which will exhaust their respective accumulated fund over a period of 5 to 25 years. The sponsoring company does not take responsibility for guaranteeing amounts or the duration of the benefits received by the retired employee. For the six-month period ended June 30, 2018, the subsidiaries contributed R\$ 12,202 (R\$ 12,262 for the six-month period ended June 30, 2017) to Ultraprev, which is recognized as expense in the income statement. ***a.1) Provisions for Tax Matters and Social Security***

a.1.1) On October 7, 2005, the subsidiaries Cia. Ultragaz and Bahiana filed for and obtained a preliminary injunction to recognize and offset PIS and COFINS credits on LPG purchases, against other taxes levied by the RFB, notably IRPJ and CSLL. The decision was confirmed by a trial court on May 16, 2008. Under the preliminary injunction, the subsidiaries made escrow deposits for these debits which amounted to R\$ 491,927 as of June 30, 2018 (R\$ 483,485 as of December 31, 2017). On July 18, 2014, a second instance unfavorable decision was published and the subsidiaries suspended the escrow deposits, and started to pay income taxes from that date. To revert the court decision, the subsidiaries presented a writ of prevention which was dismissed on December 30, 2014, and the subsidiaries appealed this decision on February 3, 2015. Appeals were also presented to the respective higher courts (STJ and STF) whose final trial are pending.

a.1.2) The subsidiaries Oxiteno S.A., Oxiteno Nordeste, Cia. Ultragaz, Tequimar, Tropical Transportes Ipiranga Ltda., EMCA, IPP and Extrafarma filed for a preliminary injunction seeking the deduction of ICMS from their PIS and COFINS tax bases. On March 15, 2017, in a decision with general repercussion, the Federal Supreme Court (STF) decided that the ICMS does not make up the calculation of PIS and COFINS tax bases. Therefore, supported by its legal advisors, on May 31, 2017, Oxiteno Nordeste and IPP reversed the provision in the amount of R\$ 109,463.

The Company emphasizes that it is possible for the STF to restrict the effects of the judgment or to decide that the effectiveness will be reached after its final decision or other time that may be fixed. Despite the favorable context, until there is effective final decision, the causes may be reassessed, which could result in the recognition of new provisions in the future.

***a.2) Provisions for Civil, Environmental and Regulatory Claims***

a.2.1) The Company and its subsidiaries maintained provisions for lawsuits and administrative proceedings, mainly derived from contracts entered into with customers and former services providers, as well as proceedings related to environmental and regulatory issues in the amount of R\$ 89,952 as of June 30, 2018 (R\$ 89,296 as of December 31, 2017).

***a.3) Provisions for Labor Matters***

a.3.1) The Company and its subsidiaries maintained provisions of R\$ 85,167 as of June 30, 2018 (R\$ 82,425 as of December 31, 2017) for labor litigation filed by former employees and by employees of our service providers mainly contesting the non-payment of labor rights.

**33. Risks and Financial Instruments (Consolidated)**

**Risk Management and Financial Instruments Governance**

The main risks to which the Company and its subsidiaries are exposed reflect strategic/operational and economic/financial aspects. Operational/strategic risks (including, but not limited to, demand behavior, competition, technological innovation, and material changes in the industry structure) are addressed by the Company's management model. Economic/financial risks primarily reflect default of customers, behavior of macroeconomic variables, such as exchange and interest rates, as well as the characteristics of the financial instruments used by the Company and its subsidiaries and their counterparties. These risks are managed through control policies, specific strategies, and the establishment of limits.

The Company has a policy for the management of resources, financial instruments, and risks approved by its Board of Directors ( Policy ). In accordance with the Policy, the main objectives of financial management are to preserve the value and liquidity of financial assets and ensure financial resources for the development of the business, including expansions. The main financial risks considered in the Policy are risks associated with currencies, interest rates, credit, and selection of financial instruments. Governance of the management of financial risks and financial instruments follows the segregation of duties below:

Implementation of the management of financial assets, instruments, and risks is the responsibility of the financial area, through its treasury department, with the assistance of the tax and accounting departments.

Supervision and monitoring of compliance with the principles, guidelines, and standards of the Policy is the responsibility of the Risk and Investment Committee, which is composed of members of the Company's Executive Board ( Committee ). The Committee holds regular meetings and is in charge, among other responsibilities, of discussing and monitoring the financial strategies, existing exposures, and significant transactions involving investment, fundraising, or risk mitigation. The Committee monitors the risk standards established by the Policy through a monitoring map on a monthly basis.

Changes in the Policy or revisions of its standards are subject to the approval of the Board of Directors of Ultrapar.

Continuous improvement of the Policy is the joint responsibility of the Board of Directors, the Committee, and the financial area.

The internal audit department audits the compliance with the requirements of the Policy.

**Table of Contents****Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)***Currency Risk**

Most transactions of the Company, through its subsidiaries, are located in Brazil and, therefore, the reference currency for risk management is the Brazilian Real. Currency risk management is guided by neutrality of currency exposures and considers the transactional, accounting, and operational risks of the Company and its subsidiaries and their exposure to changes in exchange rates. The Company considers as its main currency exposures the assets and liabilities in foreign currency and the short-term flow of net sales in foreign currency of Oxiteno.

The Company and its subsidiaries use exchange rate hedging instruments (especially between the Brazilian Real and the U.S. dollar) available in the financial market to protect their assets, liabilities, receipts, and disbursements in foreign currency and net investments in foreign operations. Hedge is used in order to reduce the effects of changes in exchange rates on the Company's income and cash flows in Brazilian Reais within the exposure limits under its Policy. Such foreign exchange hedging instruments have amounts, periods, and rates substantially equivalent to those of assets, liabilities, receipts, and disbursements in foreign currencies to which they are related. Assets and liabilities in foreign currencies are stated below, translated into Brazilian Reais:

Scenarios I, II and III were based on 10%, 25% and 50% variations, respectively, applied on the net position of the Company exposed to the currency risk, simulating the effects of appreciation and devaluation of the Real in the income statement and the shareholders' equity:

The table below shows, in the three scenarios, the effects of exchange rate changes on the net liability position of R\$ 1,943.7 million in foreign currency as of June 30, 2018:

The Company and its subsidiaries adopt policies for borrowing and investing financial resources and for capital cost minimization. The financial investments of the Company and its subsidiaries are primarily held in transactions linked to the CDI, as set forth in Note 4. Borrowings primarily relate to financing from Banco do Brasil, as well as debentures and borrowings in foreign currency, as shown in Note 15.

The Company attempts to maintain its financial interest assets and liabilities at floating rates.

The table below shows the incremental expenses and income that would be recognized in financial income as of June 30, 2018, due to the effect of floating interest rate changes in different scenarios.

For sensitivity analysis of floating interest rate risk, the Company used the accumulated amount of the reference indexes (CDI, TJLP, LIBOR, THIE and SELIC) as a base scenario up to June 30, 2018. Scenarios I, II and III were based on 10%, 25% and 50% variations, respectively, applied in the floating interest rate of the base scenario:

**Table of Contents****Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)***Credit Risks**

The financial instruments that would expose the Company and its subsidiaries to credit risks of the counterparty are basically represented by cash and bank deposits, financial investments, hedging instruments (see Note 4), and trade receivables (see Note 5).

**Credit risk of financial institutions** Such risk results from the inability of financial institutions to comply with their financial obligations to the Company and its subsidiaries due to insolvency. The Company and its subsidiaries regularly conduct a credit review of the institutions with which they hold cash and cash equivalents, financial investments, and hedging instruments through various methodologies that assess liquidity, solvency, leverage, portfolio quality, etc. Cash and cash equivalents, financial investments, and hedging instruments are held only with institutions with a solid credit history, chosen for safety and soundness. The volume of cash and cash equivalents, financial investments, and hedging instruments are subject to maximum limits by each institution and, therefore, require diversification of counterparties.

**Government credit risk** The Company's policy allows investments in government securities from countries classified as investment grade AAA or Aaa by specialized credit rating agencies and in Brazilian government bonds. The volume of such financial investments is subject to maximum limits by each country and, therefore, requires diversification of counterparties.

The credit risk of cash, cash equivalents and financial investments is summarized below:

| <b>Counterparty credit rating</b> | <b>Fair value</b> |                   |
|-----------------------------------|-------------------|-------------------|
|                                   | <b>06/30/2018</b> | <b>12/31/2017</b> |

| A                                 | 448,849           | 192,638           |

| <b>Total</b>                      | <b>6,119,267</b>  | <b>6,369,928</b>  |

**Customer credit risk** Such risks are managed by each business unit through specific criteria for acceptance of customers and their credit rating and are additionally mitigated by the diversification of sales. No single customer or group accounts for more than 10% of total revenue.

The Company maintained the following allowance for estimated losses on doubtful accounts on trade receivables:

**Table of Contents****Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)***Liquidity Risk**

The Company and its subsidiaries' main sources of liquidity derive from (i) cash, cash equivalents, and financial investments, (ii) cash generated from operations and (iii) financing. The Company and its subsidiaries believe that these sources are sufficient to satisfy their current funding requirements, which include, but are not limited to, working capital, capital expenditures, amortization of debt, and payment of dividends.

The Company and its subsidiaries periodically examine opportunities for acquisitions and investments. They consider different types of investments, either directly, through joint ventures, or through associated companies, and finance such investments using cash generated from operations, debt financing, through capital increases, or through a combination of these methods.

The Company and its subsidiaries believe to have enough working capital and sources of financing to satisfy their current needs. The gross indebtedness due over the next twelve months totals R\$ 4,673.1 million, including estimated interests on loans (for quantitative information, see Note 15). Furthermore, the investment plan for 2018 totals R\$ 2,676 million, and until June 30, 2018, the amount of R\$ 1,040.5 million had been realized. As of June 30, 2018, the Company and its subsidiaries had R\$ 5,970.1 million in cash, cash equivalents, and short-term financial investments (for quantitative information, see Note 4).

The table below presents a summary of financial liabilities as of June 30, 2018 by the Company and its subsidiaries, listed by maturity. The amounts disclosed in this table are the contractual undiscounted cash outflows, and, therefore, these amounts may be different from the amounts disclosed on the balance sheet as of June 30, 2018.

**Capital Management**

The Company manages its capital structure based on indicators and benchmarks. The key performance indicators related to the capital structure management are the weighted average cost of capital, net debt / EBITDA, interest coverage, and indebtedness / equity ratios. Net debt is composed of cash, cash equivalents, and financial investments (see Note 4) and loans, including debentures (see Note 15). The Company can change its capital structure depending on the economic and financial conditions, in order to optimize its financial leverage and capital management. The Company seeks to improve its return on invested capital by implementing efficient working capital management and a selective investment program.

**Selection and Use of Financial Instruments**

In selecting financial investments and hedging instruments, an analysis is conducted to estimate rates of return, risks involved, liquidity, calculation methodology for the carrying value and fair value, and a review is conducted of any documentation applicable to the financial instruments. The financial instruments used to manage the financial resources of the Company and its subsidiaries are intended to preserve value and liquidity.

The Policy contemplates the use of derivative financial instruments only to cover identified risks and in amounts consistent with the risk (limited to 100% of the identified risk). The risks identified in the Policy are described in the above sections, and are subject to risk management. In accordance with the Policy, the Company and its subsidiaries can use forward contracts, swaps, options, and futures contracts to manage identified risks. Leveraged derivative instruments are not permitted. Because the use of derivative financial instruments is limited to the coverage of identified risks, the Company and its subsidiaries use the term *hedging instruments* to refer to derivative financial instruments.

As mentioned in the section *Risk Management and Financial Instruments Governance*, the Committee monitors compliance with the risk standards established by the Policy through a risk map, including the use of hedging instruments, on a monthly basis. In addition, the internal audit department verifies the compliance with the requirements of the Policy.

**Notes to the Individual and Consolidated Interim Financial Information**

*(In thousands of Brazilian Reais, unless otherwise stated)*

The fair value of financial instruments, including currency and interest hedging instruments, was determined as follows:

The fair value of cash and bank deposit balances are identical to their carrying values.

Financial investments in investment funds are valued at the value of the fund unit as of the date of the interim financial information, which corresponds to their fair value.

Financial investments in CDBs (Bank Certificates of Deposit) and similar investments offer daily liquidity through repurchase at the yield curve and the Company calculates their fair value through methodologies commonly used for mark to the market.

The fair value of trade receivables and trade payables are approximate to their carrying values.

The subscription warrants indemnification were measured based on the share price of Ultrapar (UGPA3) at the interim financial information date and are adjusted to the Company's dividend yield, since the exercise is only possible starting in 2020 onwards and they are not entitled to dividends until then. The number of shares of subscription warrants indemnification is also adjusted according to the changes in the amounts of provision for tax, civil, and labor risks and contingent liabilities related to the period prior to January 31, 2014. (See Note 24).

The fair value calculation of notes in the foreign market (see Note 15.b) is based on the quoted price in an active market.

The fair value of other financial investments and financing was determined using calculation methodologies commonly used for mark-to-market reporting, which consist of calculating future cash flows associated with each instrument adopted and adjusting them to present value at the market rates as of June 30, 2018 and December 31, 2017. For some cases where there is no active market for the financial instrument, the Company and its subsidiaries can use quotes provided by the transaction counterparties.

The interpretation of market information on the choice of calculation methodologies for the fair value requires considerable judgment and estimates to obtain a value deemed appropriate to each situation. Consequently, the estimates presented do not necessarily indicate the amounts that may be realizable in the current market.

Financial instruments were classified as financial assets or liabilities measured at amortized cost, except (i) all exchange rate and interest rate hedging instruments, which are measured at fair value through profit or loss, (ii) financial investments classified as measured at fair value through profit or loss, (iii) financial investments that are classified as measured at fair value through other comprehensive income (see Note 4), (iv) loans and financing measured at fair value through profit or loss (see Note 15), (v) guarantees to customers that have vendor arrangements (see Note 15.k), which are measured at fair value through profit or loss, and (vi) subscription warrants indemnification, which are measured at fair value through profit or loss (see Note 24). Cash, banks, and trade

receivables are classified as measured at amortized cost. Trade payables and other payables are classified as financial liabilities measured at amortized cost.

### **Sensitivity Analysis of Derivative Financial Instruments**

The Company and its subsidiaries use derivative financial instruments only to hedge against identified risks and in amounts consistent with the risk (limited to 100% of the identified risk). Thus, for purposes of sensitivity analysis of market risks associated with financial instruments, as required by CVM Instruction 475/08, the Company analyzes the hedging instrument and the hedged item together, as shown on the charts below.

For the sensitivity analysis of foreign exchange hedging instruments, management adopted as a likely scenario the Real/U.S. dollar exchange rates at maturity of each swap, projected by U.S dollar futures contracts quoted on B3 as of June 29, 2018. As a reference, the exchange rate for the last maturity of foreign exchange hedging instruments is R\$ 6.59 in the likely scenario. Scenarios II and III were estimated with a 25% and 50% additional appreciation or depreciation of the Brazilian Real against the likely scenario, according to the risk to which the hedged item is exposed.

**Table of Contents****Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)*

Based on the balances of the hedging instruments and hedged items as of June 29, 2018, the exchange rates were replaced, and the changes between the new balance in Brazilian Reais and the original balance in Brazilian Reais as of June 29, 2018 were calculated in each of the three scenarios. The table below shows the change in the values of the main derivative instruments and their hedged items, considering the changes in the exchange rate in the different scenarios:

For sensitivity analysis of hedging instruments for interest rates in Brazilian Reais, the Company used the futures curve of the DI x Pre contract quoted on B3 as of June 29, 2018 for each of the swap and debt (hedged item) maturities, to determine the likely scenarios. Scenarios II and III were estimated based on a 25% and 50% deterioration, respectively, of the likely scenario pre-fixed interest rate.

Based on the three scenarios of interest rates in Brazilian Reais, the Company estimated the values of its debt and hedging instruments according to the risk which is being hedged (variations in the pre-fixed interest rates in Brazilian Reais), by projecting them to future value at the contracted rates and bringing them to present value at the interest rates of the estimated scenarios. The result are shown in the table below:

The minimum purchase commitment clause provided for a minimum annual consumption of 205 thousand tons in 2018. Should the minimum purchase commitment not be met, the subsidiary would be liable for a fine based on the current ethylene price for the quantity not purchased. According to contractual conditions and tolerances, there are no material issues regarding the minimum purchase commitment.

iii) Subsidiary Oxiteno S.A. has a supply agreement with Braskem S.A., valid until 2023, which establishes and regulates the conditions for supply of ethylene to Oxiteno based on the international market for this product. The minimum purchase is 22,050 tons of ethylene semiannually. <sup>1</sup> Under IFRS, consolidated net earnings includes net earnings attributable to non-controlling shareholders of the controlled companies

<sup>2</sup> Calculated in Reais based on the weighted average of the number of shares over the period, net of shares held in treasury

<sup>3</sup> Adjusted EBITDA and excluding the trucker's strike impact of R\$ 189 million in 2Q18 and the R\$ 286 million fine relating to CADE's rejection of the Liquigás acquisition in 1Q18

**Net revenues** Total of R\$ 22,646 million (+19%), due to growth in revenues across all the businesses. Compared with 1Q18, net revenues increased by 9%, again due to improved revenues from all the businesses. In the first half of the year, net revenues amounted to R\$ 43,397 million, 16% higher year-over-year.

**Adjusted EBITDA** Total of R\$ 718 million (-6%). Excluding the effect of the strike, Adjusted EBITDA would have been R\$ 907 million (+18%), mainly due to higher EBITDA at Oxiteno, Ultragas and Ultracargo. In relation to 1Q18, Adjusted EBITDA ex-strike and CADE fine, increased by 14%. In 1H18, Ultrapar's Adjusted EBITDA ex-strike and fine amounted to R\$ 1,701 million, a 1% year-over-year decrease.

**Depreciation and amortization<sup>4</sup>** Total of R\$ 290 million (-1%), due to lower amortization of contractual assets with customers at Ipiranga, partially offset by investments made over the past 12 months. Compared with 1Q18, total depreciation and amortization costs and expenses declined by 3%. In 1H18, depreciation and amortization totaled R\$ 589 million, a growth of 1% in relation to 1H17.

**Financial results** Ultrapar reported net debt on June 30, 2018 of R\$ 8.9 billion (2.55x LTM Adjusted EBITDA) compared with R\$ 6.2 billion on June 30, 2017 (1.61x LTM Adjusted EBITDA). The increased leverage mainly reflects the lower EBITDA, higher investments and the increase in working capital in the period. If we exclude the effect of the fine in relation to the aborted Liquigás acquisition, leverage would have been 2.29x in 2Q18 and 2.16x in 1Q18. Ultrapar's net financial expenses were R\$ 64 million, R\$ 48 million less than in 2Q17 due to the lower Interbank Rate (CDI) year-over-year, in spite of increased net debt, and to the depreciation in Ultrapar's shares relative

to the subscription warrant (issued in association with Extrafarma), despite variation effects in the periods under review. In relation to 1Q18, the net financial expenses fell R\$ 43 million due to the same factors cited previously. In the first half of the year, net financial expenses amounted to R\$ 171 million, a decrease of 27% compared with 1H17.

**Net earnings** Total of R\$ 241 million (+2%), due to the reduction in financial expenses net despite the reduction in EBITDA. In relation to 1Q18, net earnings increased by 230%, mainly due to the payment of the fine of R\$ 286 million following CADE's rejection of the proposal to acquire Liquigás in 1Q18. In 1H18, net income totaled R\$ 314 million, 47% less than 1H17. Excluding the effect of the fine, net earnings would have been R\$ 502 million in 1H18.

**Operational cash flow** Total of R\$ 630 million in 1H18 compared with R\$ 970 million in 1H17, due to the payment of a contractual fine on the cancellation of the Liquigás acquisition in March 2018 and insurance reimbursements during 2017.

<sup>4</sup> *Includes amortization of contractual assets with customers' exclusive rights*

<sup>1</sup> Starting in Dec/17, total volume includes ICONIC, the lubricants JV with Chevron

<sup>2</sup> Fuel oils, arla 32, kerosene, lubricants and greases

**Operational performance** The truckers strike paralyzed fuel sales, reducing volume at Ipiranga by 4% in the quarter. Therefore, Otto cycle volume fell 7% year-over-year, although partially compensated by expansion in the service station network. On the other hand, despite the strike, diesel volume increased by 3% due to higher sales to the large consumer and TRR (Retail Wholesale Resellers) segments. In relation to 1Q18, volumes increased by 7%, a growth of 17% in diesel and a reduction of 2% in Otto cycle, reflecting seasonal fluctuations between periods and the strike. In the first half of the year, Ipiranga registered sales volume of 11,320 thousand m<sup>3</sup>, 1% reduction over 1H17.

**Net revenues** Total of R\$ 19,068 million (+18%), principally due to fuel cost variations and Ipiranga's strategy of constant innovation in service and convenience at the service stations in spite of reduced sales volume. In 1Q18, net revenues increased by 9% in tandem with higher sales volume and variations in fuel costs. In 1H18, net revenues were R\$ 36,584 million, 15% higher than in 1H17.

**Cost of goods sold** Total of R\$ 18,314 million (+20%), mainly due to fuel cost variation, despite lower sales volume. In relation to 1Q18, cost of goods sold increased 10%, in line with growth in volume and changes in fuel costs. In 1H18, cost of goods sold totaled R\$ 34,888 million, a growth of 16% in relation to 1H17.

**Sales, general and administrative expenses (SG&A)** Total of R\$ 541 million (+7%), mainly due to higher expenses of R\$ 35 million with respect to the consolidation of the results of ICONIC, the association with Chevron in the lubricants business, which began operations in December 2017. These expenses include non-recurring expenditures of R\$ 10 million in the realization of synergies. Excluding this effect, SG&A expenses were unchanged year-over-year due to lower expenditures with marketing programs, despite the increase in unitary freight costs, in turn reflecting the increase in diesel costs. Compared with 1Q18, SG&A expenses declined by 1% in spite of greater provisions for doubtful debts and higher unitary freight charges, reflecting the increase in volume. In 1H18, SG&A expenses amounted to R\$ 1,090 million, 11% greater than 1H17. Excluding the expenses related to ICONIC, SG&A expenses were up by 3% compared with first half 2017 and in line with inflation for the period.

**Adjusted EBITDA** Total of R\$ 402 million (-29%). Ipiranga's Adjusted EBITDA was impacted by the strike with an estimated negative effect of R\$ 163 million due to the loss on inventory following the reduction in diesel prices, the loss of sales during the period of the strike itself and higher non-recurring costs involving the normalization of operating conditions post-strike. Excluding these effects, Adjusted EBITDA amounted to R\$ 565 million, almost in line with 2Q17 thanks to efforts to restore results to normal levels. In relation to 1Q18, Adjusted EBITDA decreased by 31% due to the truckers' stoppage and despite higher sales volume. If we exclude the impacts of the strike, Adjusted EBITDA would have reduced by 4% compared with 1Q18. In the first half of the year, Ipiranga's EBITDA amounted to R\$ 987 million, a decline of 21% year-over-year.

**Investments** A total of R\$ 164 million was invested, allocated mainly to expansion and maintenance of the service station and franchise network. Out of total investments, R\$ 77 million were applied in property, plant and equipment and additions to intangible assets, R\$ 81 million to contractual assets with customers (exclusive rights) and R\$ 6 million for financing clients and rental advances, net of repayments. Ipiranga ended 2Q18 with 8,044 service stations (+4%), adding 301 service stations in the past 12 months. In the first half of the year, investments amounted to R\$ 421 million.

**Operational performance** Specialty chemicals sales volume reported a 1% increase year-over-year, despite a reduction of 2% in the domestic market, again mainly a reflection of the truckers' strike. Conversely, sales volume of specialty chemicals to export markets grew 5%, primarily in the United States. Commodities increased 31% compared with 2Q17 due to stronger demand for these products. In relation to 1Q18, total sales volume grew 7%, an increase of 46% in commodity volumes while specialty chemical volume was flat, influenced by the same factors already described. In the first half of the year, sales volume was 373 thousand tons, a decrease of 1% compared with 1H17.

**Net revenues** Total of R\$ 1,181 million (+33%) due to (i) higher sales volume in the period, (ii) average US Dollar prices 12% higher, reflecting increased raw material costs on an annual comparative basis, and (iii) the devaluation of 12% in the Real relative to the US Dollar (equivalent to R\$ 0.39/US\$). In relation to 1Q18, net revenues increased by 18% due to higher sales volume, the 11% depreciation in the Real against the US Dollar (equivalent to R\$ 0.36/US\$), attenuated by the effects of the strike and by the greater share of commodities in the sales mix. In 1H18, net revenues were R\$ 2,180 million, 21% higher than 1H17.

**Cost of goods sold** Total of R\$ 922 million (+26%) due to (i) higher volumes sold, (ii) a 12% depreciation in the Real against the US Dollar, (iii) pre-operational costs with the new Pasadena plant, and (iv) an increase in raw material costs on a year-over-year basis. Compared with 1Q18, the cost of goods sold increased 12%, reflecting the increase in sales volume, the 11% devaluation of the Real against the US Dollar as well as greater pre-operational costs of the new unit in the USA. In 1H18, cost of goods sold amounted to R\$ 1,746 million, a growth of 20% in relation to 1H17.

**Sales, general and administrative expenses (SG&A)** Total of R\$ 178 million (+13%), mainly due to higher international freight expenses reflecting the 12% devaluation of the Real against the US Dollar and increased pre-marketing expenses at the new Pasadena plant. Compared with 1Q18, SG&A expenses increased by 7%, largely due to the same factors applying to the year-on-year comparison. In the first half of the year, SG&A expenses amounted to R\$ 344 million, 10% higher than the same period in 2017.

**EBITDA** Oxiteno's EBITDA amounted to R\$ 121 million (+258%), due to (i) higher sales volume in the period, (ii) weaker FX rates with the Real depreciating 12% against the US Dollar, and (iii) higher unitary margins in US Dollars. These effects more than compensated the impact of the strike, with a loss estimated at R\$ 13 million on the

result for the quarter. In relation to 1Q18, EBITDA increased by 136% due to higher sales volume and an 11% devaluation in the Real against the US Dollar despite the impact of the strike above mentioned. In the first half, EBITDA amounted to R\$ 172 million, a year-over-year increase of 19%.

**Investments** Investment in the period was R\$ 153 million, mainly allocated to the new alkoxylation plant in Pasadena and production unit maintenance. Investments in 1H18 were R\$ 290 million.

**Operational performance** The bottled segment reported a 1% increase in volume compared with the same period in 2017, due to the result of commercial initiatives largely concentrated in the Center-West and the Northeast. The bulk segment registered a decline of 4% in volume due to strike action by the truckers as well as programmed reductions by an industrial client. In relation to 1Q18, sales volumes grew 8%, with an increase of 11% and 3% in the bottled and bulk segments, respectively, mainly due to seasonal factors between periods and despite the impacts of the strike. In the first half of the year, Ultragaz sales volume amounted to 854 thousand tons, a reduction of 1% in relation to 1H17.

**Net revenues** Total of R\$ 1,765 million (+20%), mainly due to readjustments in LPG costs. In relation to 1Q18, net revenues increased 9%, largely reflecting higher sales volume in the period. In 1H18, net revenues were R\$ 3,391 million, 20% higher than 1H17.

**Cost of goods sold** Total of R\$ 1,544 million (+25%), mainly due to readjustments in LPG costs but attenuated by lower freight costs due to the sourcing of products from more distant hubs in the second quarter of 2017. Compared with 1Q18, the cost of goods sold increased 8% largely due the seasonal increase in volumes. In 1H18, the cost of goods sold amounted to R\$ 2,976 million, a growth of 26% in relation to 1H17.

**Sales, general and administrative expenses (SG&A)** Total of R\$ 135 million (-18%) due to the (i) effect of a one-off reevaluation of the provision for estimated losses with a reversal of R\$ 9 million in 2Q18, (ii) lower freight expenditures reflecting the migration of clients from delivery CIF to FOB, (iii) lower marketing expenses, and (iv) lower expenditures with strategic consultancies. In relation to 1Q18, SG&A expenses increased 3% due to higher depreciation and amortization costs. If depreciation and amortization are excluded, SG&A expenses would have decreased 1%. In the first half of the year, SG&A expenses amounted to R\$ 266 million, 15% less than the same period in 2017.

**EBITDA** Total of R\$ 148 million (+23%), due to commercial differentiation and innovation initiatives and the reduction in costs and expenses, despite the impact of the strike on the business, estimated at R\$ 10 million. In 1Q18, Ultragaz's EBITDA was affected by the payment of a fine of R\$ 286 million following the decision of the anti-trust authority (CADE) to reject Ultragaz's acquisition of Liquigás. Excluding this effect, EBITDA would have increased by 28% quarter-over-quarter due to higher sales volume. In the first half, Ultragaz's EBITDA, ex-Liquigás fine, amounted to R\$ 264 million, a growth of 13% compared with 1H17.

**Investments** Ultragas invested R\$ 54 million, allocated mainly to clients in the bulk segment, gas bottles and IT with a focus on the strategy of differentiation and innovation at Ultragas. In the first half of the year, investments totaled R\$ 116 million.

<sup>1</sup> *Monthly average*

**Operational performance** Ultracargo's average storage was up by 8% compared with 2Q17, due to the increase in available capacity in Santos, following the partial resumption of activities at the terminal in June 2017, when 67.5 thousand m<sup>3</sup> of the 151.5 thousand m<sup>3</sup> shut down since the fire in April 2015 returned to operations, and to increased ethanol handling at the Santos and Suape terminals. These effects were offset by a reduction in fuel handling, particularly at the Aratu terminal. Compared with 1Q18, average storage at Ultracargo terminals increased by 9%, reflecting increased handling activity at all terminals, more especially involving ethanol operations, partially compensated by reduced fuels handling. In the first half of the year, Ultracargo's average storage grew 6% compared with 2H17.

**Net revenues** Total of R\$ 127 million in 2Q18 (+19%), driven by increased average storage following the partial resumption of activities at the Santos terminal mentioned previously, as well as greater handling activities at terminals and at higher average prices. In relation to 1Q18, net revenues increased 9%, in line with average storage performance in the quarter with greater handling through the terminals. In 1H18, net revenues amounted to R\$ 243 million, 17% more than 1H17.

**Cost of services provided** Total of R\$ 61 million (+13%) due to greater expenditures with the partial resumption of the Santos terminal, in addition to increased IPTU property taxes in 2018. Compared with 1Q18, cost of services provided increased 3%, due to greater expenditures with payroll and third party services in Santos. In 1H18, the cost of services rendered totaled R\$ 120 million, a growth of 15% compared with 1H17.

**Sales, general and administrative expenses (SG&A)** Total of R\$ 24 million (-16%). In 2Q18, SG&A expenses were influenced by a non-recurring credit of R\$ 8 million with respect to a port management fee charged improperly. In relation to 1Q18, SG&A expenses fell 17% due to the same factors as described above. In the first half of the year, SG&A expenses amounted to R\$ 52 million, 2% less than the same period in 2017.

**EBITDA** Total of R\$ 54 million (+108%) due to (i) higher average storage in the period, reflecting the partial resumption of activities at the Santos terminal, (ii) higher average prices at the terminals, (iii) R\$ 18 million with the fire-related expenses in 2Q17 arising from the Santos incident, and (iv) the receipt of a credit of R\$ 8 million with respect to a port management fee charged improperly. The increase of EBITDA in 2Q18 was partially attenuated by the sale of non-operating assets amounting to R\$ 5 million in 2Q17. In relation to 1Q18, EBITDA increased by 32% due to greater handling activities at the terminals and higher prices at the Suape and Rio de Janeiro terminals. In the

first half of 2018, Ultracargo's EBITDA amounted to R\$ 95 million, a growth of 99% in relation to 1H17.

**Investments** Ultracargo invested R\$ 28 million in the period, mainly allocated to the expansion at the Itaqui terminal and maintenance and modernization of safety systems and processes at terminals. In the first half of the year, investments amounted to R\$ 50 million.

**Operational performance** Extrafarma ended 2Q18 with 406 stores (86 openings and 21 closures in the past 12 months, equivalent to an increase of 19%). At the end of 2Q18, 54% of the stores were still at the maturing stage (operating for less than three years) compared with 47% in 2Q17, reflecting the accelerated expansion of the network. Compared with 1Q18, Extrafarma opened 8 new drugstores (closing 3) and continued its expansion, more particularly in São Paulo.

In addition, a new retail system was implemented in June 2018, an important landmark in the development of Extrafarma's technological platform. The system is designed to further enhance operating excellence, with gains in productivity, and inventory management, providing a better shopping experience for customers and strengthening the foundations for growth.

**Gross revenue** Total of R\$ 559 million (+16%), due to the growth of 17% in retail sales, a reflection of the larger average number of stores (23% greater), the annual readjustment in medicine prices and more intense promotional activities in the period. However, these effects were attenuated by the non-recurring events of the strike and the substitution of the retail system, which temporarily affected operations during the installation and stabilization phases. In relation to 1Q18, gross revenue grew 3% due to the higher average number of stores and promotional activity in the quarter, partially offset by the non-recurring events already mentioned. In the first half of the year, gross revenue at Extrafarma amounted to R\$ 1,101 million, 15% more than the same period in 2017.

**Cost of goods sold and gross profit** Cost of goods sold amounted to R\$ 369 million (+20%), mainly due to greater sales volume and the annual readjustment in medicine prices. Gross profit was R\$ 160 million (+9%), largely due to increased sales in the period although partially offset by more intensive promotional activities and the network's more extensive geographical coverage. In relation to 1Q18, cost of goods sold and gross profit reported 3% and 5% growth, respectively, due to improved sales in the period. In 1H18, cost of goods sold amounted to R\$ 728 million and gross profit R\$ 313 million, 19% and 7%, respectively above 1H17.

**Sales, general and administrative expenses (SG&A)** Total of R\$ 184 million (+21%) reflecting the 23% higher average number of stores in operation. Excluding the effect of new stores, SG&A expenses increased by 1% on an annual comparative basis and below inflation rates for the period, mainly due to higher expenditures with publicity and advertising and increased freight logistics costs, mitigated by initiatives implemented by Extrafarma for improving productivity and reducing expenses. In relation to 1Q18, SG&A expenses grew 8% due to the higher average number of stores and greater outlays on publicity and advertising. In 1H18, SG&A expenses amounted to R\$

353 million, a 17% increase over 1H17.

**EBITDA** A negative R\$ 7 million compared to the positive R\$ 9 million in 2Q17, due to the (i) larger number of new and maturing stores, (ii) non-recurring events related to the implementation and stabilization of the new retail system and the truckers strike, amounting to R\$ 7 million, (iii) greater promotional activity, and (iv) the network's more extensive geographical coverage. Excluding the effects of the new stores and non-recurring events, EBITDA would have been a positive R\$ 10 million in 2Q18 compared with EBITDA of R\$ 9 million in 2Q17. Compared with 1Q18, EBITDA decreased due to the non-recurring events already mentioned. In the first half of the year, Extrafarma's EBITDA was a negative R\$ 7 million against an EBITDA of R\$ 13 million in 1H17.

**Investments** Extrafarma invested R\$ 23 million, allocated largely to the opening of new stores and to IT focused on improving the shopping experience and operational excellence. In the first half of the year, Extrafarma invested R\$ 39 million.

*Early in the quarter, all our businesses reported positive trends with improving results. However, an unprecedented nationwide truckers' strike in May caused several sectors of the Brazilian economy to incur substantial losses. The fuel distribution market was one of the worst affected, not only due to the blockading of the distribution terminals, which prevented us from delivering products, but also because of an immediate and significant reduction in diesel prices. The strike affected practically all the Company's businesses, mainly Ipiranga, generating financial impacts of*

*approximately R\$ 200 million for Ultrapar. In spite of the enormous operational difficulties during the strike, our teams worked tirelessly to minimize the impacts on our clients and to reestablish operating conditions. With these conditions now reestablished, our focus again reverts to initiatives of differentiation and innovation and the continued strengthening of the relationship with our stakeholders, essential pillars supporting the generation of long-term value.*

Ultrapar reported an Adjusted EBITDA of R\$ 718 million and net income of R\$ 241 million in 2Q18. The results for the period reflect the impact of the truckers strike on practically all the company's businesses, but particularly at Ipiranga.

**Truckers Strike strike**

The truckers strike occurred in May 2018 and affected Ultrapar as follows:

| R\$ million  | Estimated impact of the strike in EBITDA |                             |            |

<sup>1</sup> From the one-off inventory loss of R\$ 147 million in Ipiranga, R\$ 123 million impacted the 2Q18 results and R\$ 24 million in July of 2018, due to the booking of inventory at average cost.

At Ipiranga, blockades at the distribution terminals during the strike prevented delivery of products, having an estimated operational impact of 4% on sales volume. This together with extraordinary costs related to logistics and security totaled R\$ 40 million. In addition, the reduction of R\$ 0.46/liter on the price of diesel generated a one-off inventory loss of R\$ 147 million: R\$ 123 million in May and June and R\$ 24 million in July due to the booking of inventory at average cost.

At Oxiteno, the strike caused a temporary stoppage at four production units (Mauá, Suzano, Tremembé and Triunfo) due to the impossibility of delivering products. The estimated impact on domestic sales volume was 6 thousand tons corresponding to a loss of approximately R\$ 13 million in the quarter.

At Ultragaz, difficulties of product delivery centered round the bulk segment, resulting in an estimated loss of 7 thousand tons. The effect of strike-related losses on EBITDA was R\$ 10 million.

At Extrafarma, there were logistical problems in receiving and distributing products in addition to decreased customer traffic through the stores during the strike, resulting in lower sales with an impact on EBITDA of R\$ 3 million.

### **Executive Summary**

#### **Ipiranga**

Ipiranga reported volumes of 5,859 thousand m<sup>3</sup> in the quarter, a reduction of 1% in relation to 2Q17, with a decrease of 7% in Otto cycle and a growth of 3% in diesel, both impacted by the strike, although partially offset by the expansion in the resellers' network and large clients. Adjusted EBITDA at Ipiranga was R\$ 402 million, 29% less than 2Q17. The strike had an impact of R\$ 163 million in the quarter due to loss on inventory with the reduction in diesel prices, loss of sales during the period of strike action and higher non-recurring costs over the same period, required for normalizing operations.

#### **Oxitenó**

Oxitenó reported volumes of 193 thousand tons in 2Q18, an increase of 6% year-over-year, reflecting higher sales of commodities. Oxitenó's EBITDA amounted to R\$ 121 million, a growth of 258% in relation to 2Q17, due to (i) higher sales volume, (ii) weaker exchange rates with the Real suffering a 12% devaluation against the US Dollar, and (iii) the higher level of unitary margins in US Dollars. These effects more than compensated higher pre-operational expenditures at the new unit in the USA and the impact of the truckers' strike, estimated at R\$ 13 million in 2Q18.

#### **Ultragaz**

Ultragaz reported volumes of 444 thousand tons, flat year-over-year, with 1% growth in the bottled segment and a reduction of 4% in the bulk business, this segment being the most affected by the strike. Ultragaz's EBITDA amounted to R\$ 148 million (+23%), principally due to commercial initiatives and a reduction in costs and expenses.

#### **Ultracargo**

Average storage at Ultracargo increased by 8% in relation to 2Q17, reflecting the partial resumption of activities at the Santos terminal in June 2017 and increased ethanol handling. Ultracargo's EBITDA amounted to R\$ 54 million in the quarter, an increase of 108% over 2Q17 due to greater average storage and higher tariffs.

#### **Extrafarma**

Extrafarma ended 2Q18 with 406 stores, opening 86 units in the last 12 months, 8 of them in the quarter. EBITDA in 2Q18 was negative at R\$ 7 million, mainly due to the high percentage of new and maturing stores. Additionally, results were influenced by the truckers' strike together with the implementation of a new retail management system, which temporarily affected Extrafarma's operations during the installation and stabilization phases.

<sup>1</sup> Starting in Dec/17, total volume includes ICONIC, the lubricants JV with Chevron

<sup>2</sup> Fuel oils, arla 32, kerosene, lubricants and greases

**Operational performance** The truckers' strike paralyzed fuel sales, reducing volume at Ipiranga by 4% in the quarter. Therefore, Otto cycle volume fell 7% year-over-year, although partially compensated by expansion in the service station network. On the other hand, despite the strike, diesel volume increased by 3% due to higher sales to the large consumer and TRR (Retail Wholesale Resellers) segments. In relation to 1Q18, volumes increased by 7%, a growth of 17% in diesel and a reduction of 2% in Otto cycle, reflecting seasonal fluctuations between periods and the strike. In the first half of the year, Ipiranga registered sales volume of 11,320 thousand m<sup>3</sup>, 1% reduction over 1H17.

**Net revenues** Total of R\$ 19,068 million (+18%), principally due to fuel cost variations and Ipiranga's strategy of constant innovation in service and convenience at the service stations in spite of reduced sales volume. In 1Q18, net revenues increased by 9% in tandem with higher sales volume and variations in fuel costs. In 1H18, net revenues were R\$ 36,584 million, 15% higher than in 1H17.

**Cost of goods sold** Total of R\$ 18,314 million (+20%), mainly due to fuel cost variation, despite lower sales volume. In relation to 1Q18, cost of goods sold increased 10%, in line with growth in volume and changes in fuel costs. In 1H18, cost of goods sold totaled R\$ 34,888 million, a growth of 16% in relation to 1H17.

**Sales, general and administrative expenses (SG&A)** Total of R\$ 541 million (+7%), mainly due to higher expenses of R\$ 35 million with respect to the consolidation of the results of ICONIC, the association with Chevron in the lubricants business, which began operations in December 2017. These expenses include non-recurring expenditures of R\$ 10 million in the realization of synergies. Excluding this effect, SG&A expenses were unchanged year-over-year due to lower expenditures with marketing programs, despite the increase in unitary freight costs, in turn reflecting the increase in diesel costs. Compared with 1Q18, SG&A expenses declined by 1% in spite of greater provisions for doubtful debts and higher unitary freight charges, reflecting the increase in volume. In 1H18, SG&A expenses amounted to R\$ 1,090 million, 11% greater than 1H17. Excluding the expenses related to ICONIC, SG&A expenses were up by 3% compared with first half 2017 and in line with inflation for the period.

**Adjusted EBITDA** Total of R\$ 402 million (-29%). Ipiranga's Adjusted EBITDA was impacted by the strike with an estimated negative effect of R\$ 163 million due to the loss on inventory following the reduction in diesel prices, the loss of sales during the period of the strike itself and higher non-recurring costs involving the normalization of operating conditions post-strike. Excluding these effects, Adjusted EBITDA amounted to R\$ 565 million, almost in line with 2Q17 thanks to efforts to restore results to normal levels. In relation to 1Q18, Adjusted EBITDA decreased by 31% due to the truckers' stoppage and despite higher sales volume. If we exclude the impacts of the strike, Adjusted EBITDA would have reduced by 4% compared with 1Q18. In the first half of the year, Ipiranga's EBITDA amounted to R\$ 987 million, a decline of 21% year-over-year.

**Investments** A total of R\$ 164 million was invested, allocated mainly to expansion and maintenance of the service station and franchise network. Out of total investments, R\$ 77 million were applied in property, plant and equipment and additions to intangible assets, R\$ 81 million to contractual assets with customers (exclusive rights) and R\$ 6 million for financing clients and rental advances, net of repayments. Ipiranga ended 2Q18 with 8,044 service stations (+4%), adding 301 service stations in the past 12 months. In the first half of the year, investments amounted to R\$ 421 million.

**Operational performance** Specialty chemicals sales volume reported a 1% increase year-over-year, despite a reduction of 2% in the domestic market, again mainly a reflection of the truckers' strike. Conversely, sales volume of specialty chemicals to export markets grew 5%, primarily in the United States. Commodities increased 31% compared with 2Q17 due to stronger demand for these products. In relation to 1Q18, total sales volume grew 7%, an increase of 46% in commodity volumes while specialty chemical volume was flat, influenced by the same factors already described. In the first half of the year, sales volume was 373 thousand tons, a decrease of 1% compared with 1H17.

**Net revenues** Total of R\$ 1,181 million (+33%) due to (i) higher sales volume in the period, (ii) average US Dollar prices 12% higher, reflecting increased raw material costs on an annual comparative basis, and (iii) the devaluation of 12% in the Real relative to the US Dollar (equivalent to R\$ 0.39/US\$). In relation to 1Q18, net revenues increased by 18% due to higher sales volume, the 11% depreciation in the Real against the US Dollar (equivalent to R\$ 0.36/US\$), attenuated by the effects of the strike and by the greater share of commodities in the sales mix. In 1H18, net revenues were R\$ 2,180 million, 21% higher than 1H17.

**Cost of goods sold** Total of R\$ 922 million (+26%) due to (i) higher volumes sold, (ii) a 12% depreciation in the Real against the US Dollar, (iii) pre-operational costs with the new Pasadena plant, and (iv) an increase in raw material costs on a year-over-year basis. Compared with 1Q18, the cost of goods sold increased 12%, reflecting the increase in sales volume, the 11% devaluation of the Real against the US Dollar as well as greater pre-operational costs of the new unit in the USA. In 1H18, cost of goods sold amounted to R\$ 1,746 million, a growth of 20% in relation to 1H17.

**Sales, general and administrative expenses (SG&A)** Total of R\$ 178 million (+13%), mainly due to higher international freight expenses reflecting the 12% devaluation of the Real against the US Dollar and increased pre-marketing expenses at the new Pasadena plant. Compared with 1Q18, SG&A expenses increased by 7%, largely due to the same factors applying to the year-on-year comparison. In the first half of the year, SG&A expenses amounted to R\$ 344 million, 10% higher than the same period in 2017.

**EBITDA** Oxiteno's EBITDA amounted to R\$ 121 million (+258%), due to (i) higher sales volume in the period, (ii) weaker FX rates with the Real depreciating 12% against the US Dollar, and (iii) higher unitary margins in US Dollars. These effects more than compensated the impact of the strike, with a loss estimated at R\$ 13 million on the result for the quarter. In relation to 1Q18, EBITDA increased by 136% due to higher sales volume and an 11% devaluation in the Real against the US Dollar despite the impact of the strike above mentioned. In the first half, EBITDA amounted to R\$ 172 million, a year-over-year increase of 19%.

**Investments** Investment in the period was R\$ 153 million, mainly allocated to the new alkoxylation plant in Pasadena and production unit maintenance. Investments in 1H18 were R\$ 290 million.

**Operational performance** The bottled segment reported a 1% increase in volume compared with the same period in 2017, due to the result of commercial initiatives largely concentrated in the Center-West and the Northeast. The bulk segment registered a decline of 4% in volume due to strike action by the truckers as well as programmed reductions by an industrial client. In relation to 1Q18, sales volumes grew 8%, with an increase of 11% and 3% in the bottled and bulk segments, respectively, mainly due to seasonal factors between periods and despite the impacts of the strike. In the first half of the year, Ultragaz sales volume amounted to 854 thousand tons, a reduction of 1% in relation to 1H17.

**Net revenues** Total of R\$ 1,765 million (+20%), mainly due to readjustments in LPG costs. In relation to 1Q18, net revenues increased 9%, largely reflecting higher sales volume in the period. In 1H18, net revenues were R\$ 3,391 million, 20% higher than 1H17.

**Cost of goods sold** Total of R\$ 1,544 million (+25%), mainly due to readjustments in LPG costs but attenuated by lower freight costs due to the sourcing of products from more distant hubs in the second quarter of 2017. Compared with 1Q18, the cost of goods sold increased 8% largely due the seasonal increase in volumes. In 1H18, the cost of goods sold amounted to R\$ 2,976 million, a growth of 26% in relation to 1H17.

**Sales, general and administrative expenses (SG&A)** Total of R\$ 135 million (-18%) due to the (i) effect of a one-off reevaluation of the provision for estimated losses with a reversal of R\$ 9 million in 2Q18, (ii) lower freight expenditures reflecting the migration of clients from delivery CIF to FOB, (iii) lower marketing expenses, and (iv) lower expenditures with strategic consultancies. In relation to 1Q18, SG&A expenses increased 3% due to higher depreciation and amortization costs. If depreciation and amortization are excluded, SG&A expenses would have decreased 1%. In the first half of the year, SG&A expenses amounted to R\$ 266 million, 15% less than the same period in 2017.

**EBITDA** Total of R\$ 148 million (+23%), due to commercial differentiation and innovation initiatives and the reduction in costs and expenses, despite the impact of the strike on the business, estimated at R\$ 10 million. In 1Q18, Ultragaz's EBITDA was affected by the payment of a fine of R\$ 286 million following the decision of the anti-trust authority (CADE) to reject Ultragaz's acquisition of Liquigás. Excluding this effect, EBITDA would have increased by 28% quarter-over-quarter due to higher sales volume. In the first half, Ultragaz's EBITDA, ex-Liquigás fine, amounted to R\$ 264 million, a growth of 13% compared with 1H17.

**Investments** Ultragas invested R\$ 54 million, allocated mainly to clients in the bulk segment, gas bottles and IT with a focus on the strategy of differentiation and innovation at Ultragas. In the first half of the year, investments totaled R\$ 116 million.

<sup>1</sup> *Monthly average*

**Operational performance** Ultracargo's average storage was up by 8% compared with 2Q17, due to the increase in available capacity in Santos, following the partial resumption of activities at the terminal in June 2017, when 67.5 thousand m<sup>3</sup> of the 151.5 thousand m<sup>3</sup> shut down since the fire in April 2015 returned to operations, and to increased ethanol handling at the Santos and Suape terminals. These effects were offset by a reduction in fuel handling, particularly at the Aratu terminal. Compared with 1Q18, average storage at Ultracargo terminals increased by 9%, reflecting increased handling activity at all terminals, more especially involving ethanol operations, partially compensated by reduced fuels handling. In the first half of the year, Ultracargo's average storage grew 6% compared with 2H17.

**Net revenues** Total of R\$ 127 million in 2Q18 (+19%), driven by increased average storage following the partial resumption of activities at the Santos terminal mentioned previously, as well as greater handling activities at terminals and at higher average prices. In relation to 1Q18, net revenues increased 9%, in line with average storage performance in the quarter with greater handling through the terminals. In 1H18, net revenues amounted to R\$ 243 million, 17% more than 1H17.

**Cost of services provided** Total of R\$ 61 million (+13%) due to greater expenditures with the partial resumption of the Santos terminal, in addition to increased IPTU property taxes in 2018. Compared with 1Q18, cost of services provided increased 3%, due to greater expenditures with payroll and third party services in Santos. In 1H18, the cost of services rendered totaled R\$ 120 million, a growth of 15% compared with 1H17.

**Sales, general and administrative expenses (SG&A)** Total of R\$ 24 million (-16%). In 2Q18, SG&A expenses were influenced by a non-recurring credit of R\$ 8 million with respect to a port management fee charged improperly. In relation to 1Q18, SG&A expenses fell 17% due to the same factors as described above. In the first half of the year, SG&A expenses amounted to R\$ 52 million, 2% less than the same period in 2017.

**EBITDA** Total of R\$ 54 million (+108%) due to (i) higher average storage in the period, reflecting the partial resumption of activities at the Santos terminal, (ii) higher average prices at the terminals, (iii) R\$ 18 million with the fire-related expenses in 2Q17 arising from the Santos incident, and (iv) the receipt of a credit of R\$ 8 million with respect to a port management fee charged improperly. The increase of EBITDA in 2Q18 was partially attenuated by

the sale of non-operating assets amounting to R\$ 5 million in 2Q17. In relation to 1Q18, EBITDA increased by 32% due to greater handling activities at the terminals and higher prices at the Suape and Rio de Janeiro terminals. In the first half of 2018, Ultracargo's EBITDA amounted to R\$ 95 million, a growth of 99% in relation to 1H17.

**Investments** Ultracargo invested R\$ 28 million in the period, mainly allocated to the expansion at the Itaqui terminal and maintenance and modernization of safety systems and processes at terminals. In the first half of the year, investments amounted to R\$ 50 million.

**Operational performance** Extrafarma ended 2Q18 with 406 stores (86 openings and 21 closures in the past 12 months, equivalent to an increase of 19%). At the end of 2Q18, 54% of the stores were still at the maturing stage (operating for less than three years) compared with 47% in 2Q17, reflecting the accelerated expansion of the network. Compared with 1Q18, Extrafarma opened 8 new drugstores (closing 3) and continued its expansion, more particularly in São Paulo.

In addition, a new retail system was implemented in June 2018, an important landmark in the development of Extrafarma's technological platform. The system is designed to further enhance operating excellence, with gains in productivity, and inventory management, providing a better shopping experience for customers and strengthening the foundations for growth.

**Gross revenue** Total of R\$ 559 million (+16%), due to the growth of 17% in retail sales, a reflection of the larger average number of stores (23% greater), the annual readjustment in medicine prices and more intense promotional activities in the period. However, these effects were attenuated by the non-recurring events of the strike and the substitution of the retail system, which temporarily affected operations during the installation and stabilization phases. In relation to 1Q18, gross revenue grew 3% due to the higher average number of stores and promotional activity in the quarter, partially offset by the non-recurring events already mentioned. In the first half of the year, gross revenue at Extrafarma amounted to R\$ 1,101 million, 15% more than the same period in 2017.

**Cost of goods sold and gross profit** Cost of goods sold amounted to R\$ 369 million (+20%), mainly due to greater sales volume and the annual readjustment in medicine prices. Gross profit was R\$ 160 million (+9%), largely due to increased sales in the period although partially offset by more intensive promotional activities and the network's more extensive geographical coverage. In relation to 1Q18, cost of goods sold and gross profit reported 3% and 5% growth, respectively, due to improved sales in the period. In 1H18, cost of goods sold amounted to R\$ 728 million and gross profit R\$ 313 million, 19% and 7%, respectively above 1H17.

**Sales, general and administrative expenses (SG&A)** Total of R\$ 184 million (+21%) reflecting the 23% higher average number of stores in operation. Excluding the effect of new stores, SG&A expenses increased by 1% on an annual comparative basis and below inflation rates for the period, mainly due to higher expenditures with publicity and advertising and increased freight logistics costs, mitigated by initiatives implemented by Extrafarma for

improving productivity and reducing expenses. In relation to 1Q18, SG&A expenses grew 8% due to the higher average number of stores and greater outlays on publicity and advertising. In 1H18, SG&A expenses amounted to R\$ 353 million, a 17% increase over 1H17.

**EBITDA** A negative R\$ 7 million compared to the positive R\$ 9 million in 2Q17, due to the (i) larger number of new and maturing stores, (ii) non-recurring events related to the implementation and stabilization of the new retail system and the truckers' strike, amounting to R\$ 7 million, (iii) greater promotional activity, and (iv) the network's more extensive geographical coverage. Excluding the effects of the new stores and non-recurring events, EBITDA would have been a positive R\$ 10 million in 2Q18 compared with EBITDA of R\$ 9 million in 2Q17. Compared with 1Q18, EBITDA decreased due to the non-recurring events already mentioned. In the first half of the year, Extrafarma's EBITDA was a negative R\$ 7 million against an EBITDA of R\$ 13 million in 1H17.

**Investments** Extrafarma invested R\$ 23 million, allocated largely to the opening of new stores and to IT focused on improving the shopping experience and operational excellence. In the first half of the year, Extrafarma invested R\$ 39 million.

<sup>3</sup> Adjusted EBITDA and excluding the trucker's strike impact of R\$ 189 million in 2Q18 and the R\$ 286 million fine relating to CADE's rejection of the Liquigás acquisition in 1Q18

**Net revenues** Total of R\$ 22,646 million (+19%), due to growth in revenues across all the businesses. Compared with 1Q18, net revenues increased by 9%, again due to improved revenues from all the businesses. In the first half of the year, net revenues amounted to R\$ 43,397 million, 16% higher year-over-year.

**Adjusted EBITDA** Total of R\$ 718 million (-6%). Excluding the effect of the strike, Adjusted EBITDA would have been R\$ 907 million (+18%), mainly due to higher EBITDA at Oxiteno, Ultragas and Ultracargo. In relation to 1Q18, Adjusted EBITDA ex-strike and CADE fine, increased by 14%. In 1H18, Ultrapar's Adjusted EBITDA ex-strike and fine amounted to R\$ 1,701 million, a 1% year-over-year decrease.

**Depreciation and amortization<sup>4</sup>** Total of R\$ 290 million (-1%), due to lower amortization of contractual assets with customers at Ipiranga, partially offset by investments made over the past 12 months. Compared with 1Q18, total depreciation and amortization costs and expenses declined by 3%. In 1H18, depreciation and amortization totaled R\$ 589 million, a growth of 1% in relation to 1H17.

**Financial results** Ultrapar reported net debt on June 30, 2018 of R\$ 8.9 billion (2.55x LTM Adjusted EBITDA) compared with R\$ 6.2 billion on June 30, 2017 (1.61x LTM Adjusted EBITDA). The increased leverage mainly reflects the lower EBITDA, higher investments and the increase in working capital in the period. If we exclude the effect of the fine in relation to the aborted Liquigás acquisition, leverage would have been 2.29x in 2Q18 and 2.16x in 1Q18. Ultrapar's net financial expenses were R\$ 64 million, R\$ 48 million less than in 2Q17 due to the lower Interbank Rate (CDI) year-over-year, in spite of increased net debt, and to the depreciation in Ultrapar's shares relative to the subscription warrant (issued in association with Extrafarma), despite variation effects in the periods under review. In relation to 1Q18, the net financial expenses fell R\$ 43 million due to the same factors cited previously. In

the first half of the year, net financial expenses amounted to R\$ 171 million, a decrease of 27% compared with 1H17.

**Net earnings** Total of R\$ 241 million (+2%), due to the reduction in financial expenses net despite the reduction in EBITDA. In relation to 1Q18, net earnings increased by 230%, mainly due to the payment of the fine of R\$ 286 million following CADE's rejection of the proposal to acquire Liquigás in 1Q18. In 1H18, net income totaled R\$ 314 million, 47% less than 1H17. Excluding the effect of the fine, net earnings would have been R\$ 502 million in 1H18.

**Operational cash flow** Total of R\$ 630 million in 1H18 compared with R\$ 970 million in 1H17, due to the payment of a contractual fine on the cancellation of the Liquigás acquisition in March 2018 and insurance reimbursements during 2017.
