Item 1.01

Entry into a Material Definitive Agreement.

On September 24, 2007, United States Special Operations Command, or USSOCOM, awarded AeroVironment, Inc. a three-year contract to develop and deliver a Global Observer aircraft to demonstrate the ability to operate an aircraft in the stratosphere for up to seven days without landing. This contract initiates a Joint Capabilities Technology Demonstration, or JCTD. The JCTD is sponsored by multiple U.S. government organizations, with USSOCOM designated as the Technical Manager to lead the JCTD by the Deputy Under Secretary of Defense for Advanced Systems and Concepts.

The base contract, which will be funded under a cost-plus fixed-fee arrangement, provides for the development and delivery of the initial Global Observer aircraft with a launch recovery element, and is valued at approximately \$57 million. The contract also includes options for the development and delivery of up to two additional Global Observer aircraft and one additional launch and recovery element, resulting in a total potential contract value of approximately \$108 million. Specific deliverables under the contract, including certain software and intellectual property related to Global Observer's power and propulsion system, will be separately funded and owned by AeroVironment. Tooling and other capital required for aircraft manufacturing will also be separately funded and owned by AeroVironment.
