Cautionary Note Concerning Forward-Looking Statements

This annual report on Form 10-K contains certain statements relating to future events of our intentions, beliefs, expectations, predictions for the future and other matters that are “forward-looking” statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended.

These statements:

- use forward-looking terminology;
- are based on various assumptions made by us; and
- may not be accurate because of risks and uncertainties surrounding the assumptions that are made.

Factors listed in this section - as well as other factors not included - may cause actual results to differ significantly from the forward-looking statements included in this annual report on Form 10-K. There is no guarantee that any of the events anticipated by the forward-looking statements in this annual report on Form 10-K will occur, or if any of the events occurs, there is no guarantee what effect it will have on our operations or financial condition.

We will not update the forward-looking statement contained in this annual report on Form 10-K, unless otherwise required by law.

Forward-Looking Statements

These forward-looking statements are generally accompanied by words such as “anticipate,” “believe,” “could,” “estimate,” “expect,” “goal,” “intend,” “may,” “might,” “plan,” “potential,” “predict,” “project,” “will,” “would,” or other words that convey uncertainty of future events or outcomes, including, without limitation, our transaction with Weyerhaeuser Real Estate Company (WRECO). These forward-looking statements include, but are not limited to, statements regarding expected benefits of the WRECO transaction, integration plans and expected synergies therefrom, and our anticipated future financial and operating performance and results, including our estimates for growth.

Forward-looking statements are based on a number of factors, including the expected effect of:

- the economy;
- laws and regulations;
- adverse litigation outcome and the adequacy of reserves;
- changes in accounting principles;
- projected benefit payments; and
- projected tax rates and credits.

Risks, Uncertainties and Assumptions

The major risks and uncertainties – and assumptions that are made – that affect our business and may cause actual results to differ from these forward-looking statements include, but are not limited to:

- the effect of general economic conditions, including employment rates, housing starts, interest rate levels, availability of financing for home mortgages and strength of the U.S. dollar;
- market demand for our products, which is related to the strength of the various U.S. business segments and U.S. and international economic conditions;
- levels of competition;
- the successful execution of our internal performance plans, including restructuring and cost reduction initiatives;
- global economic conditions;

- raw material prices;
- energy prices;

- 2 -

- the effect of weather;
- the risk of loss from earthquakes, volcanoes, fires, floods, droughts, windstorms, hurricanes, pest infestations and other natural disasters;
- transportation costs;
- federal and state tax policies;
- the effect of land use, environment and other governmental regulations;
- legal proceedings;
- risks relating to any unforeseen changes to or effects on liabilities, future capital expenditures, revenues, expenses, earnings, synergies, indebtedness, financial condition, losses and future prospects;
- the risk that disruptions from the transaction with WRECO will harm our business;
- our ability to achieve the benefits of the transaction with WRECO in the estimated amount and the anticipated timeframe, if at all;
- our ability to integrate WRECO successfully and to achieve the anticipated synergies therefrom;
- change in accounting principles;
- risks related to unauthorized access to our computer systems, theft of our customer's confidential information or other forms of cyber-attack; and
- other factors described in "Risk Factors."

Explanatory Note

On the Closing Date, TRI Pointe Homes consummated the previously announced Merger with WRECO. In the Merger, TRI Pointe issued 129,700,000 shares of TRI Pointe common stock to the former holders of WRECO common shares, together with cash in lieu of any fractional shares. On the Closing Date, WRECO became a wholly-owned subsidiary of TRI Pointe. Immediately following the consummation of the Merger, the ownership of TRI Pointe common stock on a fully diluted basis was as follows: (i) the WRECO common shares held by former Weyerhaeuser shareholders were converted into the right to receive, in the aggregate, approximately 79.6% of the then outstanding TRI Pointe common stock, (ii) the TRI Pointe common stock outstanding immediately prior to the consummation of the Merger represented approximately 19.4% of the then outstanding TRI Pointe common stock, and (iii) the outstanding equity awards of WRECO and TRI Pointe employees represented the remaining 1.0% of the then outstanding TRI Pointe common stock. On the Closing Date, Weyerhaeuser paid TRI Pointe an adjustment amount of \$31.5 million in cash in accordance with the Transaction Agreement.

As used in this annual report on Form 10-K, unless the context otherwise requires:

- "Closing Date" refers to July 7, 2014;
- "Exchange Act" refers to the Securities Exchange Act of 1934, as amended;
- "GAAP" refers to U.S. generally accepted accounting principles.
- "legacy TRI Pointe" refers to the operations of TRI Pointe Homes, Inc. before the Closing Date;
- "Merger" refers to the merger of a wholly-owned subsidiary of TRI Pointe with and into WRECO, with WRECO surviving the merger and becoming a wholly-owned subsidiary of TRI Pointe.
- "SEC" refers to the United States Securities and Exchange Commission;
- "Transaction Agreement" refers to the agreement dated as of November 3, 2013 by and among Weyerhaeuser, TRI Pointe, WRECO, and a wholly-owned subsidiary of TRI Pointe;
- "TRI Pointe" refers to TRI Pointe Homes, Inc., a Delaware corporation;
- "We," "us," "our," or "the Company" refer to TRI Pointe and its consolidated subsidiaries; and
- "Weyerhaeuser" refers to Weyerhaeuser Company, the former parent of WRECO;
- "WRECO" refers to Weyerhaeuser Real Estate Company, which following the Closing Date was renamed "TRI Pointe Holdings, Inc."

The following discussion and analysis should be read in conjunction with our audited consolidated financial statements and related notes thereto contained elsewhere in this annual report on Form 10-K. The section entitled "Risk Factors" set forth in Part I, Item 1A of this annual report on Form 10-K discuss some of the important risk factors that may affect our business, results of operations and financial condition. You should carefully consider those risks, in addition to the information in this annual report on Form 10-K, before deciding to invest in, or maintain your investment in, our common stock.

part i

Item 1. Business

Our Company

TRI Pointe was founded in April 2009, towards the end of an unprecedented downturn in the national homebuilding industry, by our current management team (Messrs. Bauer, Mitchell and Grubbs) with over a century of collective industry experience. Since our formation, we have grown from a fee homebuilder in Southern California to a regionally focused national homebuilder with a portfolio of six quality homebuilding brands operating in 10 markets across eight states, including Maracay Homes in Arizona; Pardee Homes in California and Nevada; Quadrant Homes in Washington; Trendmaker Homes in Texas; TRI Pointe Homes in California and Colorado; and Winchester Homes in Maryland and Virginia.

Our growth strategy is to continue to capitalize on high demand in selected “core” markets with favorable population and employment growth as a result of proximity to job centers or primary transportation corridors. As of December 31, 2014, our operations consisted of 108 active selling communities and 29,718 lots owned or controlled.

Our company was founded by the members of our management team, who have worked together for over 20 years. They have firmly established our company’s core values of quality, integrity and excellence, which are the driving forces behind our innovative designs and strong customer commitment. Given our regional focus, our management team employs a disciplined, hands-on approach, leveraging strong local market relationships and established reputation to source acquisitions, achieve land entitlements (which provide basic development rights to the owner) and deliver quality homes on budget and on schedule.

Our construction expertise across an extensive product offering allows us flexibility to pursue a wide array of land acquisition opportunities and appeal to a broad range of potential homebuyers, including entry-level, first time move-up and move-up homes. As a result, we build across a variety of base sales price points, ranging from approximately \$167,000 to \$2.2 million, and home sizes, ranging from approximately 1,000 to 6,500 square feet. Cutting edge product development as well as exemplary customer service are key components of the lifestyle connection we seek to establish with each individual homebuyer. Additionally, we believe our diversified product strategy enables us to adapt quickly to changing market conditions and to optimize returns while strategically reducing portfolio risk.

Our Competitive Strengths

We believe the following strengths will provide us with a significant competitive advantage in implementing our business strategy:

Experienced and Proven Leadership

Douglas Bauer, our Chief Executive Officer, Thomas Mitchell, our President and Chief Operating Officer, and Michael Grubbs, our Chief Financial Officer, have worked together for over 20 years and have a successful track record of managing and growing a public homebuilding company. Their combined real estate industry experience includes land acquisition, financing, entitlement, development, construction, marketing and sales of single-family detached and attached homes in communities in a variety of markets. In addition, each homebuilding company is managed by presidents who have substantial industry knowledge and local market expertise. The average homebuilding experience of these presidents exceeds 20 years. We believe that our management team’s prior experience, extensive relationships and strong local reputation provide us with a competitive advantage in being able to secure projects, obtain entitlements, build quality homes and complete projects within budget and on schedule.

Focus on High Growth Core Markets

Our business is well-positioned to capitalize on the broader national housing market recovery. We are focused on the design, construction and sale of innovative single-family detached and attached homes in major metropolitan areas in California, Colorado, Houston, Phoenix and Tucson, Las Vegas, the Washington, D.C. metro area and the Puget Sound region of Washington State. These markets are generally characterized by high job growth and increasing populations, creating strong demand for new housing, and we believe they represent attractive homebuilding markets with opportunities for long-term growth. Moreover, our management team has deep local market knowledge of the homebuilding and development industries. We believe this experience and strong relationships with local market participants enable us to efficiently source, entitle and close on land.

Attractive Land Positions to Support Future Growth

We believe that we have strong land positions strategically located within our core markets. We select communities with convenient access to metropolitan areas that are generally characterized by diverse economic and employment bases and demographics that we believe will support long-term growth.

Strong Operational Discipline and Controls

Our management team possesses significant operating expertise, including previously running another large public homebuilder. The perspective gained from that experience has helped shape the strict discipline and hands-on approach with which our company is managed. Our strict operating discipline including financial accountability at the project management level is a key part of our strategy to maximize returns while minimizing risk.

Our Business Strategy

Our business strategy is focused on the design, construction and sale of premium single-family homes through our portfolio of six quality brands across eight states, including Maracay Homes in Arizona; Pardee Homes in California and Nevada; Quadrant Homes in Washington; Trendmaker Homes in Texas; TRI Pointe Homes in California and Colorado; and Winchester Homes in Maryland and Virginia. Our business strategy is driven by the following:

Acquire Attractive Land Positions While Reducing Risk

We believe that our reputation and extensive relationships with land sellers, master plan developers, financial institutions, brokers and other builders will enable us to continue to acquire well-positioned land parcels in our target markets and provide us access to a greater number of acquisition opportunities. We believe our expertise in land development and planning enables us to create desirable communities that meet or exceed our target customer's expectations, while operating at competitive costs.

Increase Market Position in Growth Markets

We believe that there are significant opportunities to profitably expand in our existing and target markets, and we continually review our selection of markets based on both aggregate demographic information and our own operating results. We use the results of these reviews to re-allocate our investments to those markets where we believe we can maximize our profitability and return on capital over the next several years. While our primary growth strategy has focused on increasing our market position in our existing markets, we may, on an opportunistic basis, explore expansion into other markets through organic growth or acquisition.

Provide Superior Design and Homeowner Experience and Service

We consider ourselves a "progressive" homebuilder driven by exemplary customer experience, cutting-edge product development and exceptional execution. Our core operating philosophy is to provide a positive, memorable experience to our homeowners through active engagement in the building process, tailoring our product to the buyer's lifestyle needs and enhancing communication, knowledge and satisfaction. We believe that the new generation of home buying families has different ideas about the kind of home buying experience it wants. As a result, our selling process focuses on the homes' features, benefits, quality and design in addition to the traditional metrics of price and square footage. In addition, we devote significant resources to the research and design of our homes to better meet the needs of our buyers. Through our "TRI-ê Green" and "Living Smart" platforms, we provide homes that we believe are earth-friendly, enhance homeowners' comfort, promote a healthier lifestyle and deliver tangible operating cost savings versus less efficient resale homes. Collectively, we believe these steps enhance the selling process, lead to a more

satisfied homeowner and increase the number of buyers referred to our communities.

- 6 -

Offer a Diverse Range of Products

We are a builder with a wide variety of product lines that enable us to meet the specific needs of each of our core markets, which we believe provides us with a balanced portfolio and an opportunity to increase market share. We have demonstrated expertise in effectively building homes across product offerings from entry-level through first-time and second-time “move-up” housing. We spend extensive time studying and designing our products through the use of architects, consultants and homeowner focus groups for all levels and price points in our target markets. We believe our diversified product strategy enables us to best serve a wide range of buyers, adapt quickly to changing market conditions and optimize performance and returns while strategically reducing portfolio risk. Within each of our core markets we determine the profile of buyers we hope to address and design neighborhoods and homes with the specific needs of those buyers in mind.

Focus on Efficient Cost Structure and Target Attractive Returns

We believe that our homebuilding platform and our focus on controlling costs position us well to generate attractive returns for our shareholders. Our experienced management team is vigilant in maintaining its focus on controlling costs. We competitively bid each phase of development while maintaining strong relationships with our trade partners by managing production schedules closely and paying our vendors on time.

We combine decentralized management in those aspects of our business where we believe detailed knowledge of local market conditions is critical (such as governmental processing, construction, land acquisition, land development and sales and marketing), with centralized management in those functions where we believe central control is required (such as approval of land acquisitions, financial, treasury, human resources and legal matters). We have also made significant investments in systems and infrastructure to operate our business efficiently and to support the planned future growth of our company as a result of executing our expansion strategy.

Utilize Prudent Leverage

Our ongoing financial strategy includes redeployment of cash flows from continuing operations and debt to provide us with the financial flexibility to access capital on the best terms available. In that regard, we expect to employ prudent levels of leverage to finance the acquisition and development of our lots and construction of our homes. As of December 31, 2014, we had \$274.7 million of outstanding notes payable and \$887.5 million of outstanding senior notes as well as \$170.6 million in cash and cash equivalents and \$153.2 million available under our unsecured revolving credit facility.

Owned and Controlled Lots

As of December 31, 2014, we owned or controlled, pursuant to land option contracts or purchase contracts, an aggregate of 29,718 lots. Excluded from owned and controlled lots are those related to note 8 of the notes to our consolidated financial statements included elsewhere in this annual report on Form 10-K. The following table presents certain information with respect to our owned and controlled lots as of December 31, 2014⁽¹⁾.

	Lots Owned	Lots Controlled	Lots Owned and Controlled
Maracay	1,280	705	1,985

(1) Year of first delivery for future periods is based upon management's estimates and is subject to change.

(2)

The number of homes to be built at completion is subject to change, and there can be no assurance that we will build these homes.

- (3) Owned lots as of December 31, 2014 include owned lots in backlog as of December 31, 2014.
- (4) Backlog consists of homes under sales contracts that had not yet been delivered, and there can be no assurance that delivery of sold homes will occur.
- (5) Of the total homes subject to pending sales contracts that have not been delivered as of December 31, 2014, 610 homes are under construction, 141 homes have completed construction, and 281 homes have not started construction.
- (6) Sales price range reflects base price only and excludes any lot premium, buyer incentives and buyer-selected options, which may vary from project to project. Sales prices for homes required to be sold pursuant to affordable housing requirements are excluded from sales price range. Sales prices reflect current pricing and might not be indicative of past or future pricing.

Acquisition Process

As of December 31, 2014, we had 108 active selling communities and 25,535 owned lots under various stages of development. We believe that our current inventory of owned and controlled lots will be adequate to supply our homebuilding operations for the foreseeable future.

Our acquisition process generally includes the following steps to reduce development and market cycle risk:

- review of the status of entitlements and other governmental processing, including title reviews;
 - limitation on the size of an acquisition to minimize investment levels in any one project;
 - completion of due diligence on the land parcel prior to committing to the acquisition;
 - preparation of detailed budgets for all cost categories;
 - completion of environmental reviews and third-party market studies;
 - utilization of options, joint ventures and other land acquisition arrangements, if necessary; and
 - employment of centralized control of approval over all acquisitions through a land committee process.
- Before purchasing a land parcel, we also engage outside architects and consultants to help review our proposed acquisition and design our homes and communities.

We acquire land parcels pursuant to purchase agreements that are often structured as option contracts. These option contracts require us to pay non-refundable deposits, which can vary by transaction, and entitle (but do not obligate) us to acquire the land typically at fixed prices. The term within which we can exercise our option varies by transaction and our acquisition is often contingent upon the completion of entitlement or other work with regard to the land (such as “backbone” improvements, which include the installation of main roads or sewer mains). Depending upon the transaction, we may be required to purchase all of the land involved at one time or we may have a right to acquire identified groups of lots over a specified timetable. In some transactions, a portion of the consideration that we pay for the land may be in the form of a share of the profits of a project after we receive an agreed to level of profits from the project. In limited instances such as when we acquire land from a master developer that is part of a larger project, the seller may have repurchase rights entitling it to repurchase the land from us under circumstances when we do not develop the land by an outside deadline (unless the delay is caused by certain circumstances outside our control), or when we seek to sell the land directly to a third party or indirectly through a change in control of our company. Repurchase rights typically allow the seller to repurchase the land at the price that we paid the seller to acquire the land plus the cost of improvements that we have made to the land and less some specified discount.

Homebuilding, Marketing and Sales Process

Our homes range in size from approximately 1,000 to 6,500 square feet. The prices of our homes also vary substantially. Base sales prices for our homes range from approximately \$167,000 to \$2.2 million. The average sales price of our owned homes delivered was approximately \$531,000 and \$415,000, for years ended December 31, 2014 and 2013, respectively.

In California, we typically develop community phases based upon projected sales, and we construct homes in each phase whether or not they have been pre-sold. We have the ability to control the timing of construction of subsequent phases in the same community based on sales activity in the prior phase, market conditions and other factors. We also will attempt to delay much of the customization of a home until a qualified buyer has been approved, so as to enable the buyer to tailor the home to such buyer’s specifications; however, we will complete the build out of any unsold homes in a particular phase where deemed appropriate for marketing purposes of such home. In our other regions we typically develop communities on a lot by lot basis driven by sales demand.

The design of our homes is limited by factors such as zoning requirements, building codes and energy efficiency laws. As a result, we contract with a number of architects and other consultants in connection with the design process. Substantially all of our construction work is done by subcontractors with us acting as the general contractor. We also enter into contracts as needed with design professionals and other service providers who are familiar with local market conditions and requirements. We do not have long-term contractual commitments with our subcontractors, suppliers or laborers. We maintain strong and long-standing relationships with many of our subcontractors. We believe that our relationships have been enhanced through both maintaining our schedules and making timely payment to our subcontractors. By dealing fairly, we are able to keep our key subcontractors attentive to our projects.

Backlog

Backlog units reflects the number of homes, net of actual cancellations experienced during the period, for which we have entered into a sales contract with a customer but for which we have not yet delivered the home. Homes in backlog are generally delivered within three to nine months, although we may experience cancellations of sales contracts prior to delivery. For information concerning backlog units, the dollar value and average sales price by segment, see Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in this annual report on Form 10-K.

Sales and Marketing

In connection with the sale and marketing of our homes, we make extensive use of advertising and other promotional activities, including the website of each of our six regional brands, mass-media advertisements, brochures, direct mail and the placement of signboards in the immediate areas of our developments.

We sell our homes through our own sales representatives and through independent real estate brokers. Our in-house sales force typically works from sales offices located in model homes close to or in each community. Sales representatives assist potential buyers by providing them with basic floor plans, price information, development and construction timetables, tours of model homes, and the selection of options. Sales personnel are licensed by the applicable real estate bodies in their respective markets, are trained by us and generally have had prior experience selling new homes in the local market. Our personnel, along with subcontracted marketing and design consultants, carefully design exteriors and interiors of each home to coincide with the lifestyles of targeted homebuyers.

As of December 31, 2014, we owned 221 model homes that were either completed or under construction. Generally, we build model homes at each project and have them professionally decorated to display design features. We believe that model homes play a significant role in helping homebuyers understand the efficiencies and value provided by each floor plan type. Interior decorations vary among our models and are selected based upon the lifestyles of our targeted homebuyers. Structural changes in design from the model homes are not generally permitted, but homebuyers may select various other optional construction and design amenities. In addition to model homes, customers can gain an understanding of the various design features and options available to them using design centers. At each design center, customers can meet with a designer and are shown the standard and upgraded selections available to them.

We typically sell homes using sales contracts that include cash deposits by the purchasers. However, purchasers can generally cancel sales contracts if they are unable to sell their existing homes, if they fail to qualify for financing, or under certain other circumstances. Although cancellations can delay the sale of our homes, they have historically not had a material impact on our operating results. The cancellation rate of buyers who contracted to buy a home but did not close escrow (as a percentage of overall orders) was approximately 16% and 15% during the years ended December 31, 2014 and 2013, respectively. Cancellation rates are subject to a variety of factors beyond our control such as adverse economic conditions and increases in mortgage interest rates. Our inventory of completed and unsold production homes was 288 and 179 homes as of December 31, 2014 and 2013, respectively.

Customer Financing

We seek to assist our homebuyers in obtaining financing by arranging with mortgage lenders to offer qualified buyers a variety of financing options. Substantially all homebuyers utilize long-term mortgage financing to purchase a home and mortgage lenders will usually make loans only to qualified borrowers. In November 2014 we announced the creation of TRI Pointe Solutions, made up of "TRI Pointe Connect" and "TRI Pointe Assurance," a suite of home buyer services that will provide end-to-end support throughout the closing process. "TRI Pointe Connect," was formed as a joint venture with imortgage, provides mortgage related services, while "TRI Pointe Assurance," a wholly-owned TRI

Pointe company, acts as a title agency for First American Title Insurance Company.

Quality Control and Customer Service

We pay particular attention to the product design process and carefully consider quality and choice of materials in order to attempt to eliminate building deficiencies. The quality and workmanship of the subcontractors we employ are monitored and we make regular inspections and evaluations of our subcontractors to seek to ensure that our standards are met.

We maintain quality control and customer service staff whose role includes providing a positive experience for each customer throughout the pre-sale, sale, building, delivery and post-delivery periods. These employees are also responsible for providing after sales customer service. Our quality and service initiatives include taking customers on a comprehensive tour of their home prior to delivery and using customer survey results to improve our standards of quality and customer satisfaction.

Warranty Program

In the normal course of business, we incur warranty-related costs associated with homes that have been delivered to homebuyers. Estimated future direct warranty costs are accrued and charged to cost of sales in the period when the related homebuilding revenues are recognized while indirect warranty overhead salaries and related costs are charged to cost of sales in the period incurred. Amounts are accrued based upon our historical rates. We assess the adequacy of our warranty accrual on a quarterly basis and adjust the amounts as appropriate for current quantitative and qualitative factors. Factors that affect the warranty accruals include the number of homes delivered, historical and anticipated rates of warranty claims and cost per claim. Although we consider the warranty accruals reflected in our consolidated balance sheet to be adequate, actual future costs could differ significantly from our currently estimated amounts. Our warranty accrual is included in accrued expenses and other liabilities in the accompanying consolidated balance sheets.

We maintain general liability insurance designed to protect us against a portion of our risk of loss from construction-related claims. We also generally require our subcontractors and design professionals to indemnify us for liabilities arising from their work, subject to various limitations. However, such indemnity is significantly limited with respect to certain subcontractors that are added to our general liability insurance policy. We record expected recoveries from insurance carriers when proceeds are probable and estimable. Warranty insurance receivables are recorded in receivables on the accompanying consolidated balance sheet.

There can be no assurance that the terms and limitations of the limited warranty will be effective against claims made by homebuyers, that we will be able to renew our insurance coverage or renew it at reasonable rates, that we will not be liable for damages, cost of repairs, and/or the expense of litigation surrounding possible construction defects, soil subsidence or building related claims or that claims will not arise out of uninsurable events or circumstances not covered by insurance and not subject to effective indemnification agreements with certain subcontractors.

Seasonality

We have experienced seasonal variations in our quarterly operating results and capital requirements. We typically take orders for more homes in the first half of the fiscal year than in the second half, which creates additional working capital requirements in the second and third quarters to build our inventories to satisfy the deliveries in the second half of the year. We expect this seasonal pattern to continue over the long-term, although it may be affected by volatility in the homebuilding industry.

Raw Materials

Typically, all of the raw materials and most of the components used in our business are readily available in the United States. Most are standard items carried by major suppliers. However, a rapid increase in the number of homes started could cause shortages in the availability of such materials or in the price of services, thereby leading to delays in the delivery of homes under construction. We continue to monitor the supply markets to achieve the best prices available.

Our Financing Strategy

We intend to employ both debt and equity as part of our ongoing financing strategy, coupled with redeployment of cash flows from continuing operations, to provide us with the financial flexibility to access capital on the best terms available. In that regard, we expect to employ prudent levels of leverage to finance the acquisition and development of our lots and construction of our homes. As of December 31, 2014, we had \$274.7 million of outstanding notes payable and \$887.5 million of outstanding senior notes as well as \$170.6 million in cash and cash equivalents and \$153.2 million available under our unsecured revolving credit facility. Our board of directors will consider a number of

factors when evaluating our level of indebtedness and when making decisions regarding the incurrence of new indebtedness, including the purchase price of assets to be acquired with debt financing, the estimated market value of our assets and the ability of particular assets, and our company as a whole, to generate cash flow to cover the expected debt service. As a means of sustaining our long-term financial health and limiting our exposure to unforeseen dislocations in the debt and financing markets, we currently expect to remain conservatively capitalized. However, our charter does not contain a limitation on the amount of debt we may incur and our board of directors may change our target debt levels at any time without the approval of our stockholders.

We intend to finance future acquisitions and developments with the most advantageous source of capital available to us at the time of the transaction, which may include a combination of common and preferred equity, secured and unsecured corporate level debt, property-level debt and mortgage financing and other public, private or bank debt.

Segments

The Company's operations are organized into six reportable segments: Maracay, consisting of operations in Arizona; Pardee, consisting of operations in California and Nevada; Quadrant, consisting of operations in Washington; Trendmaker, consisting of operations in Texas; TRI Pointe, consisting of operations in California and Colorado; and Winchester, consisting of operations in Maryland and Virginia. For financial information about our segments, see Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Note 4 to the consolidated financial statements included in this annual report on Form 10-K.

Government Regulation and Environmental Matters

We are subject to numerous local, state, federal and other statutes, ordinances, rules and regulations concerning zoning, development, building design, construction and similar matters which impose restrictive zoning and density requirements, the result of which is to limit the number of homes that can be built within the boundaries of a particular area. Projects that are not entitled may be subjected to periodic delays, changes in use, less intensive development or elimination of development in certain specific areas due to government regulations. We may also be subject to periodic delays or may be precluded entirely from developing in certain communities due to building moratoriums or "slow-growth" or "no-growth" initiatives that could be implemented in the future. Local governments also have broad discretion regarding the imposition of development fees and exactions for projects in their jurisdiction. Projects for which we have received land use and development entitlements or approvals may still require a variety of other governmental approvals and permits during the development process and can also be impacted adversely by unforeseen health, safety and welfare issues, which can further delay these projects or prevent their development.

We are also subject to a variety of local, state, federal and other statutes, ordinances, rules and regulations concerning the environment. The particular environmental laws which apply to any given homebuilding site vary according to multiple factors, including the site's location, its environmental conditions and the present and former uses of the site, as well as adjoining properties. Environmental laws and conditions may result in delays, may cause us to incur substantial compliance and other costs, and can prohibit or severely restrict homebuilding activity in environmentally sensitive regions or areas. In addition, in those cases where an endangered or threatened species is involved, environmental rules and regulations can result in the restriction or elimination of development in identified environmentally sensitive areas. From time to time, the United States Environmental Protection Agency and similar federal or state agencies review homebuilders' compliance with environmental laws and may levy fines and penalties for failure to strictly comply with applicable environmental laws or impose additional requirements for future compliance as a result of past failures. Any such actions taken with respect to us may increase our costs. Further, we expect that increasingly stringent requirements will be imposed on homebuilders in the future. Environmental regulations can also have an adverse impact on the availability and price of certain raw materials such as lumber. California is especially susceptible to restrictive government regulations and environmental laws.

Under various environmental laws, current or former owners of real estate, as well as certain other categories of parties, may be required to investigate and clean up hazardous or toxic substances or petroleum product releases, and may be held liable to a governmental entity or to third parties for related damages, including for bodily injury, and for investigation and clean-up costs incurred by such parties in connection with the contamination. A mitigation system may be installed during the construction of a home if a cleanup does not remove all contaminants of concern or to address a naturally occurring condition such as methane. Some buyers may not want to purchase a home with a mitigation system.

Refer to Part I, Item 1A. "Risk Factors" of this annual report on Form 10-K for risks related to government regulation and environmental matters.

Competition

Competition in the homebuilding industry is intense, and there are relatively low barriers to entry into our business. Homebuilders compete for, among other things, home buying customers, desirable land parcels, financing, raw materials and skilled labor. Increased competition could hurt our business, as it could prevent us from acquiring attractive land parcels on which to build homes or make such acquisitions more expensive, hinder our market share expansion, and lead to pricing pressures on our homes that may adversely impact our margins and revenues. Our competitors may independently develop land and construct housing units that are superior or substantially similar to our products. Furthermore, several of our primary competitors are significantly larger, have longer operating histories and may have greater resources or lower cost of capital than ours; accordingly, they may be able to compete more effectively in one or more of the markets in which we operate. Many of these competitors also have longstanding relationships with subcontractors and suppliers in the markets in which we operate. We also compete for sales with individual resales of existing homes and with available rental housing.

Employees

As of December 31, 2014, we had 961 employees, 397 of whom were executive, management and administrative personnel, 232 of whom were sales and marketing personnel and 332 of whom were involved in field construction. Although none of our employees are covered by collective bargaining agreements, certain of the subcontractors engaged by us are represented by labor unions or are subject to collective bargaining arrangements. We believe that our relations with our employees and subcontractors are good.

Our Offices

Our principal executive offices are located at 19540 Jamboree Road, Suite 300, Irvine, California 92612. Our main telephone number is (949) 438-1400. Our internet website is www.TRIPointeGroup.com. We will make available through our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports filed or furnished pursuant to Section 13(d) or 15(d) of the Exchange Act as soon as reasonably practicable after filing with, or furnishing to, the SEC. Copies of these reports, and any amendment to them, are available free of charge upon request. The information contained in, or that can be accessed through, our website is not incorporated by reference and is not a part of this annual report on Form 10-K.

Item 1A. Risk Factors

You should carefully consider the following risk factors, which address the material risks concerning our business, together with the other information contained in this annual report on Form 10-K. If any of the risks discussed in this annual report on Form 10-K occur, our business, liquidity, financial condition and results of operations (individually and collectively referred to in these risk factors as "Financial Performance") could be materially and adversely affected, in which case the trading price of our common stock could decline significantly and you could lose all or a part of your investment. Some statements in this annual report on Form 10-K, including statements in the following risk factors, constitute forward-looking statements. Please refer to the initial section of this annual report on Form 10-K entitled "Cautionary Note Concerning Forward-Looking Statements."

Risks Related to Our Business

Our long-term growth depends upon our ability to successfully identify and acquire desirable land parcels for residential buildout.

Our future growth depends upon our ability to successfully identify and acquire attractive land parcels for development of our single-family homes at reasonable prices and with terms that meet our underwriting criteria. Our ability to acquire land parcels for new single-family homes may be adversely affected by changes in the general availability of land parcels, the willingness of land sellers to sell land parcels at reasonable prices, competition for available land parcels, availability of financing to acquire land parcels, zoning and other market conditions. If the supply of land parcels appropriate for development of single-family homes is limited because of these factors, or for any other reason, our ability to grow could be significantly limited, and the number of homes that we build and sell could decline. Additionally, our ability to begin new projects could be impacted if we elect not to purchase land parcels under option contracts. To the extent that we are unable to purchase land parcels in a timely manner or enter into new contracts for the purchase of land parcels at reasonable prices, our home sales revenue and Financial Performance could be negatively impacted.

Our quarterly results of operations may fluctuate because of the seasonal nature of our business and other factors.

We have experienced seasonal fluctuations in quarterly results of operations and capital requirements that can have a material and adverse impact on our consolidated results of operations and financial condition. We typically experience the highest new home order activity during the first and second quarters, although sales velocity is also highly dependent on the number of active selling communities, timing of new community openings and other market factors, including seasonal natural disasters such as hurricanes, tornadoes, floods and fires. Since it typically takes four to six months to construct a new home, the number of homes delivered and associated home sales revenue typically increases in the third and fourth quarters as new home orders sold earlier in the year convert to home deliveries. We believe that this type of seasonality reflects the historical tendency of homebuyers to purchase new homes in the spring and summer with deliveries scheduled in the fall or winter, as well as the scheduling of construction to accommodate seasonal weather conditions in certain markets. We expect this seasonal pattern to continue over the long-term, although it may be affected by market cyclicity, but there can be no assurance that historical seasonal patterns will continue to exist in future reporting periods. In addition, as a result of seasonal variability, our historical performance may not be a meaningful indicator of future results.

Seasonality also requires us to finance construction activities in advance of the receipt of sales proceeds. In many cases, we may not be able to recapture increased costs by raising prices because prices are established upon signing the purchase contract. Accordingly, there is a risk that we will invest significant amounts of capital in the acquisition and development of land and construction of homes that we do not sell at anticipated pricing levels or within anticipated time frames. If, due to market conditions, construction delays or other causes, we do not complete sales of our homes at anticipated pricing levels or within anticipated time frames, our Financial Performance could be

materially and adversely affected.

Our business is cyclical and subject to risks associated with the real estate industry, and adverse changes in general economic or business conditions could reduce the demand for homes and materially and adversely affect us.

The residential homebuilding and land development industry is cyclical and is substantially affected by adverse changes in general economic or business conditions that are outside of our control, including changes in:

- short- and long-term interest rates;
- the availability and cost of financing for real estate industry participants, including financing for acquisitions, construction and permanent mortgages;
- unanticipated increases in expenses, including, without limitation, insurance costs, labor and materials costs, development costs, real estate assessments and other taxes and costs of compliance with laws, regulations and governmental policies;

- changes in enforcement of laws, regulations and governmental policies, including, without limitation, health, safety, environmental, labor, employment, zoning and tax laws, governmental fiscal policies and the Americans with Disabilities Act of 1990;
- consumer confidence generally and the confidence of potential homebuyers and others in the real estate industry in particular;
- financial conditions of buyers and sellers of properties, particularly residential homes and land suitable for development of residential homes;
- the ability of existing homeowners to sell their existing homes at prices that are acceptable to them;
- the U.S. and global financial systems and credit markets, including stock market and credit market volatility;
- private and federal mortgage financing programs and federal and state regulation of lending practices;
- the cost of construction, labor and materials;
- federal and state income tax provisions, including provisions for the deduction of mortgage interest payments and capital gain tax rates;
- housing demand from population growth, household formation and demographic changes (including immigration levels and trends in urban and suburban migration);
- the supply of available new or existing homes and other housing alternatives, such as condominiums, apartments and other residential rental property;
- competition from other real estate investors with significant capital, including other real estate operating companies and developers and institutional investment funds;
- employment levels and job and personal income growth and household debt-to-income levels;
- the rate of inflation;
- real estate taxes; and
- the supply of and demand for developable land in our current and expected markets.

Adverse changes in these or other general economic or business conditions may affect our business nationally or in particular regions or localities. During the recent economic downturn, several of the markets we serve, and the U.S. housing market as a whole, experienced a prolonged decrease in demand for new homes, as well as an oversupply of new and existing homes available for sale. Demand for new homes is affected by weakness in the resale market because many new homebuyers need to sell their existing homes in order to buy a home from us. In addition, demand may be adversely affected by alternatives to new homes, such as rental properties and existing homes. In the event of another economic downturn or if general economic conditions should worsen, our home sales could decline and we could be required to write down or dispose of assets or restructure our operations or debt, any of which could have a material adverse effect on our Financial Performance.

Adverse changes in economic or business conditions can also cause increased home order cancellation rates, diminished demand and prices for our homes, and diminished value of our real estate investments. These changes can also cause us to take longer to build homes and make it more costly for us to do so. We may not be able to recover any of the increased costs by raising prices because of weak market conditions and increasing pricing pressure. Additionally, the price of each home we sell is usually set several months before the home is delivered, as many customers sign their home purchase contracts before or early in the construction process. The potential difficulties described above could impact our customers' ability to obtain suitable financing and cause some homebuyers to cancel or refuse to honor their home purchase contracts altogether.

Because most of our homebuyers finance the purchase of their homes, the terms and availability of mortgage financing can affect the demand for and the ability to complete the purchase of a home, which could materially and adversely affect us.

Our business depends on the ability of our homebuyers to obtain financing for the purchase of their homes. Many of our homebuyers must sell their existing homes in order to buy a home from us. Since 2009, the U.S. residential mortgage market as a whole has experienced significant instability due to, among other things, defaults on subprime and other loans, resulting in the declining market value of such loans. In light of these developments, lenders, investors, regulators and other third parties questioned the adequacy of lending standards and other credit requirements for several loan programs made available to borrowers before the recent downturn. This has led to tightened credit requirements and an increase in indemnity claims for mortgages. Deterioration in credit quality among subprime and other nonconforming loans has caused most lenders to eliminate subprime mortgages and most other loan products that do not conform to Federal National Mortgage Association (“Fannie Mae”), Federal Home Loan Mortgage Corporation (“Freddie Mac”), Federal Housing Administration (the “FHA”) or Veterans Administration (the “VA”) standards. Fewer loan products and tighter loan qualifications, in turn, make it more difficult for a borrower to finance the purchase of a new home or the purchase of an existing home from a potential buyer who wishes to purchase one of our homes. If our potential homebuyers or the buyers of our homebuyers’ existing homes cannot obtain suitable financing, our Financial Performance could be materially and adversely affected.

Interest rate increases or changes in federal lending programs or other regulations could lower demand for our homes, which could materially and adversely affect us.

Substantially all purchasers of our homes finance their acquisitions with mortgage financing. Rising interest rates, decreased availability of mortgage financing or of certain mortgage programs, higher down payment requirements or increased monthly mortgage costs may lead to reduced demand for our homes. Increased interest rates can also hinder our ability to realize our backlog because our home purchase contracts provide customers with a financing contingency. Financing contingencies allow customers to cancel their home purchase contracts in the event that they cannot arrange for adequate financing. As a result, rising interest rates can decrease our home sales and mortgage originations. Any of these factors could have a material adverse effect on our Financial Performance.

In addition, as a result of the turbulence in the credit markets and mortgage finance industry, the federal government has taken on a significant role in supporting mortgage lending through its conservatorship of Fannie Mae and Freddie Mac, both of which purchase home mortgages and mortgage-backed securities originated by mortgage lenders, and its insurance of mortgages originated by lenders through the FHA and the VA. The availability and affordability of mortgage loans, including consumer interest rates for such loans, could be adversely affected by a curtailment or cessation of the federal government's mortgage-related programs or policies. The FHA may continue to impose stricter loan qualification standards, raise minimum down payment requirements, impose higher mortgage insurance premiums and other costs, and/or limit the number of mortgages it insures. Due to federal budget deficits, the U.S. Treasury may not be able to continue supporting the mortgage-related activities of Fannie Mae, Freddie Mac, the FHA and the VA at present levels, or it may revise significantly the federal government's participation in and support of the residential mortgage market. Because the availability of Fannie Mae, Freddie Mac, FHA- and VA-backed mortgage financing is an important factor in marketing and selling many of our homes, any limitations, restrictions or changes in the availability of such government-backed financing could reduce our home sales, which could have a material adverse effect on our Financial Performance.

Furthermore, in July 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act was signed into law. This legislation provides for a number of new requirements relating to residential mortgages and mortgage lending practices, many of which are to be developed further by implementing rules. These include, among others, minimum standards for mortgages and lender practices in making mortgages, limitations on certain fees and incentive

arrangements, retention of credit risk and remedies for borrowers in foreclosure proceedings. The effect of such provisions on lending institutions will depend on the rules that are ultimately enacted. However, these requirements, as and when implemented, are expected to reduce the availability of loans to borrowers and/or increase the costs to borrowers to obtain such loans. Any such reduction could result in a decline of our home sales, which could have a material adverse effect on our Financial Performance.

Any limitation on, or reduction or elimination of, tax benefits associated with owning a home would have an adverse effect upon the demand for our home products, which could be material to our business.

Changes in federal income tax laws may affect demand for new homes. Current tax laws generally permit significant expenses associated with owning a home, primarily mortgage interest expense and real estate taxes, to be deducted for the purpose of calculating an individual's federal, and in many cases, state, taxable income. Various proposals have been publicly discussed to limit mortgage interest deductions and to limit the exclusion of gain from the sale of a principal residence. If such proposals were enacted without offsetting provisions, the after-tax cost of owning a new home would increase for many of our potential customers. Enactment of any such proposal may have an adverse effect on the homebuilding industry in general, as the loss or reduction of homeowner tax deductions could decrease the demand for new homes.

We face numerous risks associated with controlling, purchasing, holding and developing land.

We acquire land for expansion into new markets and for replacement of land inventory and expansion within our current markets. Risks inherent in controlling, purchasing, holding and developing land parcels for new home construction are substantial and increase when demand for consumer housing decreases. Moreover, the market value of our land and housing inventories depends on market conditions and may decline after purchase, and the measures we employ to manage inventory risk may not be adequate to insulate our operations from a severe drop in inventory values. In addition, inventory carrying costs can be significant and can result in reduced margins or losses in a poorly performing community or market. We may have bought and developed, or acquired options on, land at a cost that we will not be able to recover fully or on which we cannot build and sell homes profitably. When market conditions are such that land values are not appreciating, existing option agreements may become less desirable, at which time we may elect to forfeit deposits and pre-acquisition costs and terminate the agreements.

The valuation of real property is inherently subjective and based on the individual characteristics of each property. Factors such as changes in regulatory requirements and applicable laws (including in relation to land development and building regulations, taxation and planning), political conditions, environmental conditions and requirements, the condition of financial markets, both local and national economic conditions, the financial condition of customers, potentially adverse tax consequences, and interest and inflation rate fluctuations subject valuations of real property to uncertainty. Moreover, all valuations of real property are made on the basis of assumptions that may not prove to accurately reflect economic or demographic conditions. If housing demand decreases below what we anticipated when we acquired our inventory, our profitability may be materially and adversely affected and we may not be able to recover our costs when we build and sell houses, land and lots.

The U.S. housing markets experienced dynamic demand and supply patterns in recent years due to volatile economic conditions, including increased amounts of home and land inventory that entered certain housing markets from foreclosure sales or short sales. In certain periods of market weakness, we have sold homes and land for lower margins or at a loss and have recognized significant inventory impairment charges, and such conditions may recur. Write-downs and impairments have had an adverse effect on our Financial Performance. We review the value of our land holdings on a periodic basis. Further material write-downs and impairments in the value of inventory may be required, and we may sell land or homes at a loss, which could materially and adversely affect our Financial Performance.

Adverse weather and natural disasters may increase costs, cause project delays and reduce consumer demand for housing.

As a homebuilder and land developer, we are subject to the risks associated with numerous weather-related events and natural disasters that are beyond our control. These weather-related events and natural disasters include, but are not limited to, severe storms, droughts, floods, wildfires, landslides, soil subsidence, hurricanes, tornadoes and earthquakes. The occurrence of any of these events could damage our land and projects, cause delays in, or prevent, completion of our projects, reduce consumer demand for housing, and cause shortages and price increases in labor or raw materials, any of which could materially and adversely affect our sales and profitability. We have substantial operations in Southern and Northern California that have historically experienced significant earthquake activity and seasonal wildfires. Our markets in Colorado have also experienced seasonal wildfires, floods and soil subsidence. In addition, our Washington market has historically experienced significant earthquake, volcanic and seismic activity and our Texas market occasionally experiences extreme weather conditions such as tornadoes and hurricanes.

In addition to directly damaging our land or projects, earthquakes, hurricanes, tornadoes, volcanoes, floods, wildfires or other natural events could damage roads and highways providing access to those assets or affect the desirability of our land or projects, thereby materially and adversely affecting our ability to market homes or sell land in those areas

and possibly increasing the cost to complete construction of our homes.

Certain of the areas in which we operate, particularly in California, have experienced drought conditions from time to time. The Governor of California has proclaimed a Drought State of Emergency warning that drought conditions may place drinking water supplies at risk in many California communities; negatively impact the state's economy and environment; and increase greatly the risk of wildfires across the state. These conditions may cause us to incur additional costs and we may not be able to complete construction on a timely basis if they were to continue for an extended period of time.

There are some risks of loss for which we may be unable to purchase insurance coverage. For example, losses associated with landslides, earthquakes and other geologic events may not be insurable and other losses, such as those arising from terrorism, may not be economically insurable. A sizeable uninsured loss could materially and adversely affect our Financial Performance.

- 27 -

We may be unable to find and retain suitable contractors and subcontractors at reasonable rates.

Substantially all of our construction work is performed by subcontractors with us acting as the general contractor. Accordingly, the timing and quality of our construction depend on the availability, cost and skill of contractors and subcontractors and their employees.

The residential construction industry experiences serious shortages of skilled labor from time to time. The difficult operating environment during the recent downturn in the United States has resulted in the failure of the businesses of some contractors and subcontractors and may result in further failures. In addition, reduced levels of homebuilding in the United States have caused some skilled tradesmen to leave the real estate industry to take jobs in other industries. These shortages can be more severe during periods of strong demand for housing or during periods following natural disasters that have a significant impact on existing residential and commercial structures. While we anticipate being able to obtain sufficient reliable contractors and subcontractors during times of material shortages and believe that our relationships with contractors and subcontractors are good, we do not have long-term contractual commitments with any contractors or subcontractors, and there can be no assurance that skilled contractors, subcontractors or tradesmen will continue to be available in the areas in which we conduct our operations. If skilled contractors and subcontractors are not available on a timely basis for a reasonable cost, or if contractors and subcontractors are not able to recruit sufficient numbers of skilled employees, our development and construction activities may suffer from delays and quality issues, which could lead to reduced levels of customer satisfaction and materially and adversely affect our Financial Performance.

Moreover, some of the subcontractors engaged by us are represented by labor unions or are subject to collective bargaining arrangements. A strike or other work stoppage involving any of our subcontractors could also make it difficult for us to retain subcontractors for their construction work. In addition, union activity could result in higher costs for us to retain our subcontractors. Access to qualified labor at reasonable rates may also be affected by other circumstances beyond our control, including: (i) shortages of qualified tradespeople, such as carpenters, roofers, electricians and plumbers; (ii) high inflation; (iii) changes in laws relating to employment and union organizing activity; (iv) changes in trends in labor force migration; and (v) increases in contractor, subcontractor and professional services costs. The inability to contract with skilled contractors and subcontractors at reasonable rates on a timely basis could materially and adversely affect our Financial Performance.

The supply of skilled labor may be adversely affected by changes in immigration laws and policies.

The timing and quality of our construction activities depend upon the availability, cost and skill of contractors and subcontractors and their employees. The supply of labor in the markets in which we operate could be adversely affected by changes in immigration laws and policies as well as changes in immigration trends. Accordingly, it cannot be assured that a sufficient supply of skilled labor will be available to us in the future. The lack of adequate supply of skilled labor could materially and adversely affect our Financial Performance.

We could be responsible for employment-related liabilities with respect to our contractors' employees.

Several other homebuilders have received inquiries from regulatory agencies concerning whether homebuilders using contractors are deemed to be employers of the employees of such contractors under certain circumstances. Although contractors are independent of the homebuilders that contract with them under normal management practices and the terms of trade contracts and subcontracts within the homebuilding industry, if regulatory agencies reclassify the employees of contractors as employees of homebuilders, homebuilders using contractors could be responsible for wage and hour labor laws, workers' compensation and other employment-related liabilities of their contractors. Even if we are not deemed to be joint employers with our contractors, we may be subject to legislation, such as recently enacted California Labor Code Section 2810.3, that requires us to share liability with our contractors for the payment

of wages and the failure to secure valid workers' compensation coverage.

We may incur costs and liabilities if our subcontractors engage in improper construction practices or install defective materials.

Despite our quality control efforts, we may discover that our subcontractors were engaging in improper construction practices or installing defective materials in our homes. When we discover these issues, we, generally through our subcontractors, repair the homes in accordance with our new home warranty and as required by law. We reserve a percentage of the sales price of each home we sell to provide the customer service to our homebuyers. These reserves are established based on market practices, our historical experiences, and our judgment of the qualitative risks associated with the types of homes built. However, the cost of satisfying our warranty and other legal obligations in these instances may be significantly higher than our warranty reserves, and we may be unable to recover the cost of repair from such subcontractors. Regardless of the steps we take, we can in some instances be subject to fines or other penalties, and our reputation may be materially and adversely affected.

- 28 -

Raw material shortages and price fluctuations could cause delays and increase our costs.

We require raw materials to build our homes. The residential construction industry experiences serious raw material shortages from time to time, including shortages in supplies of insulation, drywall, cement, steel, lumber and other building materials. These shortages can be more severe during periods of strong demand for housing or during periods following natural disasters that have a significant impact on existing residential and commercial structures. The cost of raw materials may also be materially and adversely affected during periods of shortages or high inflation. Shortages and price increases could cause delays in and increase our costs of home construction. We generally are unable to pass on increases in construction costs to customers who have already entered into home purchase contracts. Sustained increases in construction costs may adversely affect our gross margins, which in turn could materially and adversely affect our Financial Performance.

Utility shortages or price increases could have an adverse impact on operations.

Certain of the markets in which we operate, including California, have experienced power shortages, including mandatory periods without electrical power, as well as significant increases in utility costs. Additionally, municipalities may restrict or place moratoriums on the availability of utilities, such as water and sewer taps. We may incur additional costs and may not be able to complete construction on a timely basis or at all if such utility shortages, restrictions, moratoriums and rate increases continue. In addition, these utility issues may adversely affect the local economies in which we operate, which may reduce demand for housing in those markets. Our Financial Performance may be materially and adversely impacted if further utility shortages, restrictions, moratoriums or rate increases occur in our markets.

Some of our markets may be adversely affected by declining oil prices.

The significant decline in oil prices that began in 2014 may adversely affect the economies in our Colorado and Houston markets, as energy is an important employment sector in both of those markets. As a result, demand for our homes may be reduced in these markets and our Financial Performance could be negatively impacted.

Government regulations and legal challenges may delay the start or completion of our communities, increase our expenses or limit our building or other activities.

The approval of numerous governmental authorities must be obtained in connection with our development activities, and these governmental authorities often have broad discretion in exercising their approval authority. We incur substantial costs related to compliance with legal and regulatory requirements, and any increase in legal and regulatory requirements may cause us to incur substantial additional costs, or in some cases cause us to determine that certain communities are not feasible for development.

Various federal, state and local statutes, ordinances, rules and regulations concerning building, health and safety, environment, land use, zoning, density requirements, sales and similar matters apply to or affect the housing industry. Projects that are not entitled may be subjected to periodic delays, changes in use, less intensive development or elimination of development in certain specific areas due to government regulations. We may also be subject to periodic delays or may be precluded entirely from developing in certain communities due to building moratoriums or “slow-growth” or “no-growth” initiatives that could be implemented in the future. Local governments also have broad discretion regarding the imposition of development fees and exactions for projects in their jurisdiction. Projects for which we have received land use and development entitlements or approvals may still require a variety of other governmental approvals and permits during the development process and can also be impacted adversely by unforeseen environmental, health, safety and welfare issues, which can further delay these projects or prevent their development. We may also be required to modify our existing approvals because of changes in local circumstances or

applicable law. Further, we may experience delays and increased expenses as a result of legal challenges to our proposed communities, or to permits or approvals required for such communities, whether brought by governmental authorities or private parties. As a result, home sales could decline and costs could increase, which could materially and adversely affect our Financial Performance.

We may be unable to obtain suitable bonding for the development of our housing projects.

We are often required to provide bonds to governmental authorities and others to ensure the completion of our projects. If we are unable to obtain required bonds in the future for our projects, or if we are required to provide credit enhancements with respect to our current or future bonds, our Financial Performance could be materially and adversely affected.

- 29 -

We are subject to environmental laws and regulations that may impose significant costs, delays, restrictions or liabilities.

We are subject to a variety of local, state and federal statutes, rules and regulations concerning land use and the protection of health and the environment, including those governing discharge of pollutants to water and air, impact on wetlands, protection of flora and fauna, handling of or exposure to hazardous materials, including asbestos, and cleanup of contaminated sites. We may be liable for the costs of removal, investigation, mitigation or remediation of hazardous or toxic substances located at any property currently or formerly owned, leased or occupied by us, or at third-party sites to which we have sent or send wastes for disposal, whether or not we caused or knew of such conditions. These conditions can also give rise to claims by governmental authorities or other third parties, including for personal injury, property damage and natural resources damages. Insurance coverage for such claims is nonexistent or impractical. The presence of any of these conditions, or the failure to address any of these conditions properly, or any significant environmental incident, may materially and adversely affect our ability to develop our properties or sell our homes, lots or land in affected communities or to borrow using the affected land as security, or impact our reputation. Environmental impacts have been identified at certain of our active communities, some of which will need to be addressed prior to or during development. We could incur substantial costs in excess of amounts budgeted by us to address such impacts or other environmental or hazardous material conditions that may be discovered in the future at our properties. Any failure to adequately address such impacts or conditions could delay, impede or prevent our development projects.

The particular impact and requirements of environmental laws and regulations that apply to any given community vary greatly according to the community location, the site's environmental conditions and the development and use of the site. Any failure to comply with applicable requirements could subject us to fines, penalties, third-party claims or other sanctions. We expect that these environmental requirements will become increasingly stringent in the future. Compliance with, or liability under, these environmental laws and regulations may result in delays, cause us to incur substantial compliance and other costs and prohibit or severely restrict development, particularly in environmentally sensitive areas. In those cases where an endangered or threatened species is involved and related agency rulemaking and litigation are ongoing, the outcome of such rule-making and litigation can be unpredictable and can result in unplanned or unforeseeable restrictions on, or the prohibition of, development and building activity in identified environmentally sensitive areas. In addition, project opponents can delay or impede development activities by bringing challenges to the permits and other approvals required for projects and operations under environmental laws and regulations.

As a result, we cannot assure that our costs, obligations and liabilities relating to environmental matters will not materially and adversely affect our Financial Performance.

Changes in global or regional climate conditions and governmental response to such changes may limit, prevent or increase the costs of our planned or future growth activities.

Projected climate change, if it occurs, may exacerbate the scarcity or presence of water and other natural resources in affected regions, which could limit, prevent or increase the costs of residential development in certain areas. In addition, a variety of new legislation is being enacted, or considered for enactment, at the federal, state and local level relating to energy and climate change, and as climate change concerns continue to grow, legislation and regulations of this nature are expected to continue. This legislation relates to items such as carbon dioxide emissions control and building codes that impose energy efficiency standards. Government mandates, standards or regulations intended to mitigate or reduce greenhouse gas emissions or projected climate change impacts could result in prohibitions or severe restrictions on land development in certain areas, increased energy and transportation costs, and increased compliance expenses and other financial obligations to meet permitting or land development or home construction-related requirements that we may be unable to fully recover (due to market conditions or other factors), any of which could

cause a reduction in our homebuilding gross margins and materially and adversely affect our Financial Performance. Energy-related initiatives could similarly affect a wide variety of companies throughout the United States and the world, and because our results of operations are heavily dependent on significant amounts of raw materials, these initiatives could have an indirect adverse impact on our Financial Performance to the extent the manufacturers and suppliers of our materials are burdened with expensive cap and trade or other climate related regulations.

As a result, climate change impacts, and laws and land development and home construction standards, and/or the manner in which they are interpreted or implemented, to address potential climate change concerns could increase our costs and have a long-term adverse impact on our Financial Performance. This is a particular concern in the western United States, where some of the most extensive and stringent environmental laws and residential building construction standards in the country have been enacted. For example, California has enacted the Global Warming Solutions Act of 2006 to achieve the goal of reducing greenhouse gas emissions to 1990 levels by 2020. As a result, California has adopted and is expected to continue to adopt significant regulations to meet this goal.

We may be unable to develop our communities successfully or within expected timeframes.

Before a community generates any revenue, time and material expenditures are required to acquire land, obtain development approvals and construct significant portions of project infrastructure, amenities, model homes and sales facilities. It can take several years from the time we acquire control of a property to the time we make our first home sale on the site. Our costs or the time required to complete development of our communities could increase beyond our estimates after commencing the development process. Delays in the development of communities expose us to the risk of changes in market conditions for homes. A decline in our ability to successfully develop and market our communities and to generate positive cash flow from these operations in a timely manner could materially and adversely affect our Financial Performance and our ability to service our debt and to meet our working capital requirements.

Poor relations with the residents of our communities could negatively impact our sales and reputation.

Residents of communities developed by us rely on us to resolve issues or disputes that may arise in connection with the operation or development of our communities. Efforts we make to resolve these issues or disputes could be deemed unsatisfactory by the affected residents, and subsequent actions by these residents could materially and adversely affect sales and our reputation. In addition, we could be required to make material expenditures related to the settlement of such issues or disputes or to modify our community development plans, which could materially and adversely affect our Financial Performance.

The homebuilding industry is highly competitive, and if our competitors are more successful or offer better value to our customers, our business could decline.

We operate in a very competitive environment that is characterized by competition from a number of other homebuilders and land developers in each geographical market in which we operate. There are relatively low barriers to entry into our business. We compete with numerous large national and regional homebuilding companies and with smaller local homebuilders and land developers for, among other things, homebuyers, desirable land parcels, financing, raw materials and skilled management and labor resources. If we are unable to compete effectively in our markets, our business could decline disproportionately to the businesses of our competitors and our Financial Performance could be materially and adversely affected.

Increased competition could hurt our business by preventing us from acquiring attractive land parcels on which to build homes or making acquisitions more expensive, hindering our market share expansion and causing us to increase our selling incentives and reduce our prices. Additionally, an oversupply of homes available for sale or a discounting of home prices could materially and adversely affect pricing for homes in the markets in which we operate.

We also compete with the resale, or “previously owned,” home market, the size of which has increased significantly due to the large number of homes that have been foreclosed on, that could be foreclosed on due to the recent economic downturn or that could be offered for sale due to other reasons.

We may be at a competitive disadvantage with respect to larger competitors whose operations are more geographically diversified than ours, as these competitors may be better able to withstand any future regional downturn in the housing market. Due to historical and other factors, some competitors may have a competitive advantage in marketing their products, securing materials and labor at lower prices and allowing their homes to be delivered to customers more quickly and at more favorable prices. This competitive advantage could materially and adversely reduce our market share and limit our ability to continue to expand our business as planned.

Increases in our cancellation rate could have a negative impact on our home sales revenue and homebuilding margins.

Our backlog reflects homes that may close in future periods. We have received a deposit from a homebuyer for each home reflected in our backlog, and generally we have the right, subject to certain exceptions, to retain the deposit if the homebuyer fails to comply with his or her obligations under the purchase contract, including as a result of state and local law, the homebuyer's inability to sell his or her current home or the homebuyer's inability to make additional deposits required under the purchase contract. Home order cancellations can result from a number of factors, including declines or slow appreciation in the market value of homes, increases in the supply of homes available to be purchased, increased competition and use of sales incentives by competitors, higher mortgage interest rates, homebuyers' inability to sell their existing homes, homebuyers' inability to obtain suitable mortgage financing, including providing sufficient down payments, and adverse changes in local, regional or national economic conditions. In these circumstances, homebuyers may terminate their existing purchase contracts in order to negotiate for a lower price or because they cannot, or will not, complete the purchase. Our cancellation rate was 16% and 15% for the years ended December 31, 2014 and 2013, respectively.

Cancellation rates may rise significantly in the future. If uncertain economic conditions continue, if mortgage financing becomes less available or if current homeowners find it difficult to sell their current homes, more homebuyers may cancel their purchase contracts. An increase in the level of home order cancellations could have a material and adverse impact on our Financial Performance.

Homebuilding is subject to products liability, home warranty and construction defect claims and other litigation in the ordinary course of business that can be significant and may not be covered by insurance.

As a homebuilder, we are currently subject to home warranty, products liability and construction defect claims arising in the ordinary course of business, in addition to other potentially significant lawsuits, arbitration proceedings and other claims, including breach of contract claims, contractual disputes, personal injury claims and disputes relating to defective title or property misdescription. In connection with the Merger, we also assumed responsibility for a substantial amount of WRECO's pending and potential lawsuits, arbitration proceedings and other claims, as well as any future claims relating to WRECO. Furthermore, since WRECO self-insured a significant portion of its general liability exposure relating to its operations outside of California and Nevada prior to the Merger, it is likely that some of these claims will not be covered by insurance.

There can be no assurance that any current or future developments undertaken by us will be free from defects once completed. Construction defects may occur on projects and developments and may arise during a significant period of time after completion. Defects arising on a development attributable to us may lead to significant contractual or other liabilities. For these and other reasons, we establish warranty, claim and litigation reserves that we believe are adequate based on historical experience in the markets in which we operate and judgment of the risks associated with the types of homes, lots and land we sell. We also obtain indemnities and insurance as an "additional insured" from contractors and subcontractors generally covering claims related to damages resulting from faulty workmanship and materials.

With respect to certain general liability exposures, including construction defects and related claims and product liability claims, interpretation of underlying current and future trends, assessment of claims and the related liability and reserve estimation process require us to exercise significant judgment due to the complex nature of these exposures, with each exposure often exhibiting unique circumstances. Furthermore, once claims are asserted for construction defects, it is difficult to determine the extent to which the assertion of these claims will expand geographically. Plaintiffs may seek to consolidate multiple parties in one lawsuit or seek class action status in some of these legal proceedings with potential class sizes that vary from case to case. Consolidated and class action lawsuits can be costly to defend and, if we were to lose any consolidated or certified class action suit, it could result in substantial liability.

In addition to difficulties with respect to claim assessment and liability and reserve estimation, some types of claims may not be covered by insurance or may exceed applicable coverage limits. Furthermore, contractual indemnities with contractors and subcontractors can be difficult to enforce, and we may also be responsible for applicable self-insured retentions with respect to our insurance policies. This is particularly true in our markets where we include our subcontractors on our general liability insurance and our ability to seek indemnity for insured claims is significantly limited. Furthermore, any product liability or warranty claims made against us, whether or not they are viable, may lead to negative publicity, which could impact our reputation and future home sales.

We also currently conduct a material portion of our business in California, one of the most highly regulated and litigious jurisdictions in the United States, which imposes a ten year, strict liability tail on many construction liability claims. As a result, our potential losses and expenses due to litigation, new laws and regulations may be greater than those of our competitors who have smaller California operations.

For these reasons, although we actively manage our claims and litigation and actively monitor our reserves and insurance coverage, because of the uncertainties inherent in these matters, we cannot provide assurance that our insurance coverage, indemnity arrangements and reserves will be adequate to cover liability for any damages, the cost of repairs and litigation, or any other related expenses surrounding the current claims to which we are subject or any future claims that may arise. Such damages and expenses, to the extent that they are not covered by insurance or redress against contractors and subcontractors, could materially and adversely affect our Financial Performance.

Because real estate investments are relatively illiquid, our ability to promptly sell one or more properties for reasonable prices in response to changing economic, financial and investment conditions may be limited and we may be forced to hold non-income producing properties for extended periods of time.

Real estate investments are relatively difficult to sell quickly. As a result, our ability to promptly sell one or more properties in response to changing economic, financial and investment conditions is limited and we may be forced to hold non-income producing assets for an extended period of time. We cannot predict whether we will be able to sell any property for the price or on the terms that we set or whether any price or other terms offered by a prospective purchaser would be acceptable to us. We also cannot predict the length of time needed to find a willing purchaser and to close the sale of a property.

Fluctuations in real estate values may require us to write-down the book value of our real estate assets.

The homebuilding industry is subject to significant variability and fluctuations in real estate values. As a result, we may be required to write-down the book value of our real estate assets in accordance with GAAP, and some of those write-downs could be material. Any material write-downs of assets could have a material adverse effect on our Financial Performance.

The geographic concentration of our operations in certain regions subjects us to an increased risk of loss of revenue or decreases in the market value of our land and homes in those regions from factors which may affect any of those regions.

Our operations are currently confined to Arizona, California, Colorado, Maryland, Nevada, Texas, Virginia and Washington. Because our operations are limited to these areas, a prolonged economic downturn in one or more of these areas, particularly within California, could have a material adverse effect on our Financial Performance and could have a disproportionately greater impact on us than other homebuilders with more diversified operations. Moreover, some or all of these regions could be affected by:

- severe weather;
- natural disasters (such as earthquakes or fires);
- shortages in the availability of, or increased costs in obtaining, land, equipment, labor or building supplies;
- changes to the population growth rates and therefore the demand for homes in these regions; and
- changes in the regulatory and fiscal environment.

For the year ended December 31, 2014, we generated a significant amount of our revenues and profits from our California real estate inventory. During the downturn from 2008 to 2010, land values, the demand for new homes and home prices declined substantially in California. In addition, California is facing significant unfunded liabilities and may raise taxes and increase fees to meet these obligations. If these conditions in California persist or worsen, it could materially and adversely affect our Financial Performance.

Inflation could materially and adversely affect us by increasing the costs of land, raw materials and labor, negatively impacting housing demand, raising our costs of capital, and decreasing our purchasing power.

Inflation could materially and adversely affect us by increasing costs of land, raw materials and labor. We may respond to inflation by increasing the sales prices of land or homes in order to offset any such increases in costs, maintain satisfactory margins or realize a satisfactory return on our investment. However, if the market continues to have an oversupply of homes relative to demand, prevailing market prices may prevent us from doing so. In addition, inflation is often accompanied by higher interest rates, which historically have had a negative impact on housing demand and the real estate industry generally and which could materially and adversely impact potential customers' ability to obtain mortgage financing on favorable terms. In such an environment, we may not be able to raise prices

sufficiently to keep up with the rate of inflation and our margins and returns could decrease. Additionally, if we are required to lower home prices to meet demand, the value of our land inventory may decrease. Inflation may also raise our costs of capital and decrease our purchasing power, making it more difficult to maintain sufficient funds to operate our business. Current or future efforts by the government to stimulate the economy may increase the risk of significant inflation and its adverse impact on our Financial Performance.

Acts of war, terrorism or outbreaks of contagious disease may seriously harm our business.

Acts of war, any outbreak or escalation of hostilities between the United States and any foreign power, acts of terrorism, or outbreaks of contagious diseases such as Ebola may cause disruption to the U.S. economy, or the local economies of the markets in which we operate, cause shortages of building materials, increase costs associated with obtaining building materials, result in building code changes that could increase costs of construction, affect job growth and consumer confidence, or cause economic changes that we cannot anticipate, all of which could reduce demand for our homes and materially and adversely impact our Financial Performance.

We are subject to other litigation, which could materially and adversely affect us.

Lawsuits, claims and proceedings have been, or in the future may be, instituted or asserted against us in the normal course of business. Moreover, in connection with the Merger, we also assumed responsibility for a substantial amount of WRECO's pending and potential lawsuits, arbitration proceedings and other claims, as well as any future claims relating to WRECO. Some of these claims may result in significant defense costs and potentially significant judgments against us, some of which are not, or cannot be, insured against. We generally intend to defend ourselves vigorously. However, we cannot be certain of the ultimate outcomes of any claims that may arise. To resolve these matters, we may have to pay significant fines, judgments, or settlements, which, if uninsured, or if the fines, judgments and settlements exceed insured levels, could adversely impact our earnings and cash flows, thereby materially and adversely affecting us. Certain litigation or the resolution of certain litigation may affect the availability or cost of some of our insurance coverage, which could materially and adversely impact us, expose us to increased risks that would be uninsured, and materially and adversely impact our ability to attract directors and officers.

Information technology failures and data security breaches could harm our business.

We use information technology and other computer resources to carry out important operational and marketing activities as well as maintain our business records. Many of these resources are provided to us or are maintained on our behalf by third-party service providers pursuant to agreements that specify certain security and service level standards. Our ability to conduct our business may be materially and adversely impaired if our computer resources are compromised, degraded, damaged or fail, whether due to a virus or other harmful circumstance, intentional penetration or disruption of our information technology resources by a third-party, natural disaster, hardware or software corruption or failure or error (including a failure of security controls incorporated into or applied to such hardware or software), telecommunications system failure, service provider error or failure, intentional or unintentional personnel actions (including the failure to follow our security protocols), or lost connectivity to its networked resources.

A significant and extended disruption in the functioning of these resources could damage our reputation and cause us to lose customers, sales and revenue, result in the unintended public disclosure or the misappropriation of proprietary, personal and confidential information (including information about our homebuyers and business partners), and require us to incur significant expense to address and resolve these kinds of issues. The release of confidential information may also lead to litigation or other proceedings against us by affected individuals, business partners and/or regulators, and the outcome of such proceedings, which could include penalties or fines, could materially and adversely affect our Financial Performance. In addition, the costs of maintaining adequate protection against such threats, depending on their evolution, pervasiveness and frequency and/or government-mandated standards or obligations regarding protective efforts, could be material to our Financial Performance.

A major health and safety incident relating to our business could be costly in terms of potential liabilities and reputational damage.

Building sites are inherently dangerous, and operating in the homebuilding and land development industry poses certain inherent health and safety risks. Due to health and safety regulatory requirements and the number of our projects, health and safety performance is critical to the success of all areas of our business.

Any failure in health and safety performance may result in penalties for non-compliance with relevant regulatory requirements or litigation, and a failure that results in a major or significant health and safety incident is likely to be costly in terms of potential liabilities incurred as a result. Such a failure could generate significant negative publicity and have a corresponding impact on our reputation, our relationships with relevant regulatory agencies, governmental

authorities and local communities, and our ability to win new business, which in turn could materially and adversely affect our Financial Performance.

- 34 -

Risks Related to the Merger

For additional information concerning the WRECO transaction, please refer to Notes 1 and 2, Notes to Consolidated Financial Statements included in Part I, Item 8 of this annual report on Form 10-K.

Our integration of WRECO may not be successful or the anticipated benefits from the Merger may not be realized.

As a result of the consummation of the Merger, we have significantly more sales, assets and employees than we did prior to the consummation of the transaction. The integration process requires us to expend significant capital and significantly expand the scope of our operations and financial systems. Our management is being required to devote a significant amount of time and attention to the process of integrating the operations of TRI Pointe and WRECO. A significant degree of difficulty and management involvement is inherent in that process. These difficulties include, but are not limited to:

- integrating the operations of WRECO while carrying on our ongoing operations;
- managing a significantly larger company than before the consummation of the Merger;
- the possibility of faulty assumptions underlying our expectations regarding the integration process;
- coordinating a greater number of diverse businesses and businesses located in a greater number of geographic locations;
- integrating two separate business cultures, which may prove to be incompatible;
- retaining the necessary personnel associated with WRECO;
- creating uniform standards, controls, procedures, policies and information systems and controlling the costs associated with such matters;
- integrating information technology, purchasing, accounting, finance, sales, billing, payroll and regulatory compliance systems; and
- lacking a history of a major integration.

There is no assurance that WRECO will be successfully or cost-effectively integrated. The integration process may cause an interruption of, or loss of momentum in, the activities of our business. All of the risks associated with the integration process could be exacerbated by the fact that we may not have a sufficient number of employees with the requisite expertise to integrate the businesses or to operate our business after the Merger. If our management is not able to manage the integration process effectively, or if any significant business activities are interrupted as a result of the integration process, our Financial Performance may be materially and adversely affected.

Even if we combine the two business operations successfully, it may not be possible to realize the full benefits of the increased sales volume and other benefits, including the expected synergies that are expected to result from the Merger, or realize these benefits within the time frame that is expected. For example, the benefits from the transaction may be offset by costs incurred or delays in integrating the companies. If we fail to realize the benefits we anticipate from the transaction, our Financial Performance may be materially and adversely affected.

Our tax sharing agreement with WRECO's former parent restricts our ability to undertake significant actions.

In connection with the WRECO transaction, we entered into a tax sharing agreement (the "Tax Sharing Agreement") with Weyerhaeuser. The Tax Sharing Agreement generally restricts our and our affiliates' ability to take certain actions that could cause the transaction and related transactions to fail to qualify as tax-free transactions. In particular, for a two-year period following the Closing Date, our and our affiliates' ability to undertake any of the following is restricted:

- enter into any agreement, understanding or arrangement pursuant to which any person would (directly or indirectly) acquire, or have the right to acquire, our capital stock or WRECO capital stock (excepting certain limited circumstances set forth in the Tax Sharing Agreement);
- merge or consolidate TRI Pointe or WRECO with any other person;
- liquidate or partially liquidate TRI Pointe or WRECO;
- cause or permit TRI Pointe or WRECO to be treated as other than a corporate taxpayer for U.S. federal income tax purposes; or
- cause or permit WRECO to discontinue its engagement in the Real Estate Business (as defined in the Transaction Agreement).

If we intend to take any such restricted action, Weyerhaeuser will be required to cooperate with us in obtaining an Internal Revenue Service ruling or an unqualified tax opinion reasonably acceptable to Weyerhaeuser to the effect that such action will not affect the status of the transactions as tax-free transactions. However, if we take any of the actions above and those actions result in tax-related losses to Weyerhaeuser, then we generally will be required to indemnify Weyerhaeuser for such losses, without regard to whether Weyerhaeuser had given us prior consent.

Due to these restrictions and indemnification obligations under the Tax Sharing Agreement, we will be limited in our ability to pursue strategic transactions, equity or convertible debt financings or other transactions that may otherwise be in our best interests. Also, our potential indemnity obligation to Weyerhaeuser might discourage, delay or prevent a change of control during this two-year period that our stockholders may consider favorable to our ability to pursue strategic transactions, equity or convertible debt financings or other transactions that may otherwise be in our best interests.

The historical financial information of WRECO may not be representative of its results or financial condition if it had been operated independently of Weyerhaeuser and, as a result, is not a reliable indicator of its future results.

As discussed in Note 1, Notes to Consolidated Financial Statements, the Merger is treated as a reverse acquisition and WRECO is considered the accounting acquirer. Accordingly, WRECO is reflected as the predecessor and acquirer and therefore consolidated financial statements included in this annual report on Form 10-K reflect the historical consolidated financial statements of WRECO for all periods presented and do not include the historical financial statements of legacy TRI Pointe prior to the Closing Date. Prior to the consummation of the Merger, WRECO was a business segment of Weyerhaeuser. Consequently, the historical financial information included in this annual report on Form 10-K was derived from the consolidated financial statements and accounting records of WRECO and reflects all direct costs as well as assumptions and allocations made by management of Weyerhaeuser. The financial position, results of operations and cash flows of WRECO presented may be different from those that would have resulted had WRECO been operated independently of Weyerhaeuser during the applicable periods or at the applicable dates. For example, in preparing the financial statements of WRECO, Weyerhaeuser made allocations of Weyerhaeuser corporate general and administrative expense deemed to be attributable to WRECO. However, these allocations reflect the corporate general and administrative expense attributable to WRECO operated as part of a larger organization and do not necessarily reflect the corporate general and administrative expense that would be incurred by WRECO had it been operated independently. Further, WRECO's historical financial information does not reflect changes in WRECO's operations expected to occur in connection with the Merger. As a result, the historical financial information of

WRECO is not a reliable indicator of future results.

- 36 -

We may be unable to provide the same types and levels of benefits, services and resources to WRECO that Weyerhaeuser provided, or may be unable to provide them at the same cost.

As a separate reporting segment of Weyerhaeuser, WRECO received benefits and services from Weyerhaeuser and benefitted from Weyerhaeuser's financial strength and extensive business relationships. There can be no assurance that we will be able to replace those resources adequately or replace them at the same cost. If we are not able to replace the resources provided by Weyerhaeuser, or to replace them at the same cost or are delayed in replacing the resources provided by Weyerhaeuser, our results of operations may be materially and adversely impacted.

Risks Related to Conflicts of Interest

The Starwood Fund has the right to nominate one member of our board of directors and its interests may not be aligned with yours.

Pursuant to an Investor Rights Agreement, VII/TPC Holdings, L.L.C., a private equity fund managed by an affiliate of the Starwood Capital Group (the "Starwood Fund"), has the right to nominate one member of our board of directors for as long as it owns at least 5% of our outstanding common stock. The Starwood Fund's interests may not be fully aligned with yours and this could lead to a strategy that is not in your best interests. Barry Sternlicht, our Chairman of the Board, is also the Chairman and Chief Executive Officer of Starwood Capital Group and Chris Graham, another member of our board of directors, is also a Senior Managing Director at Starwood Capital Group. As a result, Messrs. Sternlicht and Graham will devote only a portion of their business time to their duties with our board of directors and will devote a majority of their business time to their duties with Starwood Capital Group and its affiliates and other commitments. Moreover, we have engaged, and in the future may engage in transactions, such as land purchases, with Starwood Capital Group, Starwood Property Trust (which is managed by Starwood Capital Group) or their affiliates that could present an actual or perceived conflict of interest. As a result, Messrs. Sternlicht and Graham may recuse themselves from actions of our board of directors with respect to approval of these transactions.

As previously disclosed in a Form 8-K that we filed with the SEC on September 5, 2014, the Starwood Fund has informed us that it has pledged certain of its shares of our common stock as collateral in connection with a margin loan. We are not a party to the margin loan documents; however, a foreclosure on the pledged shares could materially and adversely affect the price of our common stock. In addition, the pledged shares of our common stock and margin loan could present an actual or perceived conflict of interest with respect to Messrs. Sternlicht and Graham.

Risks Related to Our Indebtedness

Our use of leverage in executing our business strategy exposes us to significant risks.

We employ what we believe to be prudent levels of leverage to finance the acquisition and development of our lots and construction of our homes. Our existing indebtedness is recourse to us and we anticipate that future indebtedness will likewise be recourse.

Our board of directors considers a number of factors when evaluating our level of indebtedness and when making decisions regarding the incurrence of new indebtedness, including the purchase price of assets to be acquired with debt financing, the estimated market value of such assets and the ability of the particular assets, and our company as a whole, to generate cash flow to cover the expected debt service. As a means of sustaining our long-term financial health and limiting our exposure to unforeseen dislocations in the debt and financing markets, we currently expect to remain conservatively capitalized. However, our charter does not contain a limitation on the amount of debt we may incur, and our board of directors may change target debt levels at any time without the approval by our stockholders.

Incurring substantial debt could subject us to many risks that, if realized, would materially and adversely affect our Financial Performance, including the risks that:

- it may be more difficult for us to satisfy our obligations with respect to our debt or to our other creditors;
- our cash flow from operations may be insufficient to make required payments of principal of and interest on our debt, which is likely to result in acceleration of our debt;
- our debt may increase our vulnerability to adverse economic and industry conditions, including fluctuations in market interest rates, with no assurance that investment yields will increase with higher financing cost, particularly in the case of debt with a floating interest rate;

- our debt may limit our ability to obtain additional financing to fund capital expenditures and acquisitions, particularly when the availability of financing in the capital markets is limited;
- we may be required to dedicate a portion of our cash flow from operations to payments on our debt, thereby reducing funds available for operations and capital expenditures, future investment opportunities or other purposes;
- in the case of secured indebtedness, we could lose our ownership interests in our land parcels or other assets because defaults thereunder may result in foreclosure actions initiated by lenders;
- our debt may limit our ability to buy back our common stock or pay cash dividends;
- our debt may limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate, thereby limiting our ability to compete with companies that are not as highly leveraged; and
- the terms of any refinancing may not be as favorable as the terms of the debt being refinanced.

We cannot make any assurances that our business will generate sufficient cash flow from operations or that future borrowings will be available to us through capital markets financings or otherwise in an amount sufficient to enable us to service or refinance our indebtedness, or to fund our other liquidity needs. We may also need to refinance all or a portion of our existing or future indebtedness on or before its maturity, and we cannot make any assurances that we will be able to refinance any of our indebtedness on commercially reasonable terms or at all. If, at the time of any refinancing, prevailing interest rates or other factors result in higher interest rates on the refinanced debt, increases in interest expense could materially and adversely affect our cash flows and results of operations. If we are unable to refinance our debt on acceptable terms, we may be forced to dispose of our assets on disadvantageous terms, potentially resulting in significant losses.

We may incur additional indebtedness in order to finance our operations or to repay existing indebtedness. If we cannot service our indebtedness, we will risk losing to foreclosure some or all of our assets that may be pledged to secure our obligations and we may have to take actions such as selling assets, seeking additional debt or equity financing or reducing or delaying capital expenditures, strategic acquisitions, investments and alliances. We cannot make any assurances that any such actions, if necessary, could be effected on commercially reasonable terms or at all, or on terms that would be advantageous to our stockholders or on terms that would not require us to breach the terms and conditions of our existing or future debt agreements. Additionally, unsecured debt agreements may contain specific cross-default provisions with respect to specified other indebtedness, giving the unsecured lenders the right to declare a default if we are in default under other loans in some circumstances. Defaults under our debt agreements could materially and adversely affect our Financial Performance.

We may require significant additional capital in the future and may not be able to secure adequate funds on acceptable terms.

The expansion and development of our business following the Merger may require significant additional capital, which we may be unable to obtain, to fund our operating expenses, including working capital needs.

We expect to meet our current capital requirements with existing cash and cash equivalents, borrowings under our existing unsecured revolving credit facility and cash flow from operations (including sales of our existing and future homes and land). Additionally, in connection with the Merger, we assumed WRECO's obligations as issuer of senior notes. The net proceeds from the sale of the senior notes was approximately \$861.3 million, approximately \$743.7 million of which was paid to WRECO's former parent as part of the WRECO transaction and the remaining \$117.6 million of which was retained by us to be used for general corporate purposes. Accordingly, while we assumed the obligations as issuer of the entire aggregate principal amount of the notes, we retained only a relatively small portion of the net proceeds.

We may fail to generate sufficient cash flow from the sales of our homes and land to meet our cash requirements. To a large extent, our cash flow generation ability is subject to general economic, financial, competitive, legislative and regulatory factors and other factors that are beyond our control. Further, our capital requirements may vary materially

from those currently planned if, for example, our revenues do not reach expected levels or we have to incur unforeseen capital expenditures and make investments to maintain our competitive position. If this is the case, we may need to refinance all or a portion of our debt on or before its maturity, or obtain additional equity or debt financing sooner than anticipated, which could materially and adversely affect our liquidity and financial condition if financing cannot be secured on reasonable terms. As a result, we may have to delay or abandon some or all of our development and expansion plans or otherwise forego market opportunities.

Our access to additional third-party sources of financing will depend, in part, on:

- general market conditions;
- the market's perception of our growth potential, including relative to other opportunities;
- with respect to acquisition and/or development financing, the market's perception of the value of the land parcels to be acquired and/or developed;
- our current debt levels;
- our current and expected future earnings;
- our cash flow; and
- the market price per share of our common stock.

During the recent economic downturn, domestic financial markets experienced unusual volatility, uncertainty and a restricting of liquidity in both the investment grade debt and equity capital markets. Credit spreads for major sources of capital widened significantly during the U.S. credit crisis as investors demanded a higher risk premium. In the event of another economic downturn or if general economic conditions should worsen, potential lenders may be unwilling or unable to provide us with suitable financing or may charge us prohibitively high fees in order to obtain financing. Moreover, due to the restrictions under the Tax Sharing Agreement, we are also currently limited in our ability to pursue equity or convertible debt financings. As a result, depending on market conditions at the relevant time, we may have to rely more heavily on less efficient forms of debt financing that require a larger portion of our cash flow from operations to service, thereby reducing funds available for our operations, future business opportunities and other purposes. Consequently, there is substantial uncertainty regarding our ability to access the credit and capital markets in order to attract financing on reasonable terms. Investment returns on our assets and our ability to make acquisitions could be materially and adversely affected by our inability to secure additional financing on reasonable terms, if at all. Additionally, if we cannot obtain additional financing to fund the purchase of land under our option contracts or purchase contracts, we may incur contractual penalties and fees. Any difficulty in obtaining sufficient capital for planned development expenditures could also cause project delays and any such delay could result in cost increases. Any of the foregoing factors could materially and adversely affect our Financial Performance.

Our current financing arrangements contain, and our future financing arrangements likely will contain, restrictive covenants relating to our operations.

Our current financing arrangements contain, and the financing arrangements we may enter into in the future will likely contain, covenants affecting our ability to, among other things:

- incur or guarantee additional indebtedness;
- make certain investments;
- reduce liquidity below certain levels;
- pay dividends or make distributions on our capital stock;
- sell assets, including capital stock of restricted subsidiaries;
- agree to payment restrictions affecting our restricted subsidiaries;
- consolidate, merge, sell or otherwise dispose of all or substantially all of our assets;
- enter into transactions with our affiliates;
- incur liens;
- engage in sale-leaseback transactions; and
- designate any of our subsidiaries as unrestricted subsidiaries.

If we fail to meet or satisfy any of these covenants in our debt agreements, we would be in default under these agreements, which could result in a cross-default under other debt agreements, and our lenders could elect to declare outstanding amounts due and payable, terminate their commitments, require the posting of additional collateral and enforce their respective interests against existing collateral. A default also could significantly limit our financing alternatives, which could cause us to curtail our investment activities and/or dispose of assets when we otherwise would not choose to do so. If we default on several of our debt agreements or any single significant debt agreement, it could materially and adversely affect our Financial Performance. These and certain other restrictions could also limit our ability to plan for or react to market conditions, meet capital needs or make acquisitions or otherwise restrict our activities or business plans.

Higher interest rates may materially and adversely affect our cash flows and results of operations.

We employ what we believe to be prudent levels of leverage to finance the acquisition and development of our lots and construction of our homes. Some of our current debt has, and any additional debt we subsequently incur may have, a floating rate of interest. Higher interest rates could increase debt service requirements on our current floating rate debt and on any floating rate debt we may subsequently incur, and could reduce funds available for operations, future business opportunities or other purposes. If we need to repay existing debt during periods of rising interest rates, we could be required to refinance our then-existing debt on unfavorable terms, or liquidate one or more of our assets to repay such debt at times which may not permit realization of the maximum return on such assets and could result in a loss. The occurrence of either or both of these events could materially and adversely affect our cash flows and results of operations.

Failure to hedge effectively against interest rate changes may materially and adversely affect our Financial Performance.

We may obtain one or more forms of interest rate protection—in the form of swap agreements, interest rate cap contracts or similar agreements—to hedge against the possible negative effects of interest rate fluctuations. However, we cannot assure you that any hedging will adequately relieve the adverse effects of interest rate increases or that counterparties under these agreements will honor their obligations thereunder. In addition, we may be subject to risks of default by hedging counterparties. Adverse economic conditions could also cause the terms on which we borrow to be unfavorable. We could be required to liquidate one or more of our assets at times which may not permit us to receive an attractive return on our assets in order to meet our debt service obligations. Failure of our hedging mechanisms could materially and adversely affect our Financial Performance.

Risks Related to Our Organization and Structure

We are and will continue to be dependent on key personnel and certain members of our management team.

Our business involves complex operations and requires a management team and employee workforce that is knowledgeable and expert in many areas necessary for its operations. Our success and ability to obtain, generate and manage opportunities depends to a significant degree upon the contributions of key personnel, including, but not limited to, Douglas Bauer, our Chief Executive Officer, Thomas Mitchell, our President and Chief Operating Officer, and Michael Grubbs, our Chief Financial Officer and Treasurer. Our investors must rely to a significant extent upon the ability, expertise, judgment and discretion of this management team and other key personnel, and their loss or departure could be detrimental to our future success. Although we have entered into employment agreements with Messrs. Bauer, Mitchell and Grubbs, there is no guarantee that these executives will remain employed with us and we have not adopted a succession plan. Additionally, key employees working in the real estate, homebuilding and construction industries are highly sought after and failure to attract and retain such personnel may materially and adversely affect the standards of our future service and may have a material and adverse impact on our Financial

Performance.

Our ability to retain our management team and key personnel or to attract suitable replacements should any members of our management team leave is dependent on the competitive nature of the employment market. The loss of services from any member of our management team or key personnel, or the potential that they could have competing obligations and will only spend a portion of their time working for us, could materially and adversely impact our business, financial condition and results of operations. Further, the process of attracting and retaining suitable replacements for key personnel whose services we may lose would result in transition costs and would divert the attention of other members of our management from existing operations. Moreover, such a loss could be negatively perceived in the capital markets.

Although we are currently considering our insurance coverage, we have not obtained key man life insurance that would provide us with proceeds in the event of death or disability of any of our key personnel.

Termination of the employment agreements with the members of our management team could be costly and prevent a change in control of our company.

Our amended and restated employment agreements with Messrs. Bauer, Mitchell and Grubbs each provide that if their employment with us terminates under certain circumstances, we may be required to pay them significant amounts of severance compensation, thereby making it costly to terminate their employment. Furthermore, these provisions could delay or prevent a transaction or a change in control of our company that might involve a premium paid for shares of our common stock or otherwise be in the best interests of our stockholders, which could adversely affect the market price of our common stock.

Certain anti-takeover defenses and applicable law may limit the ability of a third-party to acquire control of us.

Our charter and bylaws and Delaware law contain provisions that may delay or prevent a transaction or a change in control of our company that might involve a premium paid for shares of our common stock or otherwise be in the best interests of our stockholders, which could adversely affect the market price of our common stock. Certain of these provisions are described below.

Selected provisions of our charter and bylaws.

Our charter and/or bylaws contain anti-takeover provisions that:

- authorize our board of directors, without further action by the stockholders, to issue up to 50,000,000 shares of preferred stock in one or more series, and with respect to each series, to fix the number of shares constituting that series and establish the rights and other terms of that series;
- require that actions to be taken by our stockholders may be taken only at an annual or special meeting of our stockholders and not by written consent;
- specify that special meetings of our stockholders can be called only by our board of directors, the chairman of our board of directors or our chief executive officer (or if there is no chief executive officer, the president);
- establish advance notice procedures for stockholders to submit nominations of candidates for election to our board of directors and other proposals to be brought before a stockholders meeting;
- provide that our bylaws may be amended by our board of directors without stockholder approval;
- allow our directors to establish the size of our board of directors by action of our board, subject to a minimum of three members;
- provide that vacancies on our board of directors or newly created directorships resulting from an increase in the number of our directors may be filled only by a majority of directors then in office, even though less than a quorum;
- do not give the holders of our common stock cumulative voting rights with respect to the election of directors; and
- prohibit us from engaging in certain business combinations with any "interested stockholder" unless specified conditions are satisfied as described below under "—Selected provisions of Delaware law."

Selected provisions of Delaware law.

We have opted out of Section 203 of the Delaware General Corporation Law, which regulates corporate takeovers. However, our charter contains provisions that are similar to Section 203. Specifically, our charter provides that we may not engage in certain "business combinations" with any "interested stockholder" for a three-year period following the time that the person became an interested stockholder, unless:

- prior to the time that person became an interested stockholder, our board of directors approved either the business combination or the transaction which resulted in the person becoming an interested stockholder;
- upon consummation of the transaction which resulted in the person becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction

commenced, excluding certain shares; or

· at or subsequent to the time the person became an interested stockholder, the business combination is approved by our board of directors and by the affirmative vote of at least $66\frac{2}{3}\%$ of the outstanding voting stock which is not owned by the interested stockholder.

- 41 -

Generally, a business combination includes a merger, consolidation, asset or stock sale or other transaction resulting in a financial benefit to the interested stockholder. Subject to certain exceptions, an interested stockholder is a person who, together with that person's affiliates and associates, owns, or within the previous three years owned, 15% or more of our voting stock. However, in the case of our company, the Starwood Fund and any of its affiliates and subsidiaries and any of their permitted transferees receiving 15% or more of our voting stock will not be deemed to be interested stockholders regardless of the percentage of our voting stock owned by them. This provision could prohibit or delay mergers or other takeover or change in control attempts with respect to us and, accordingly, may discourage attempts to acquire us.

We may change our operational policies, investment guidelines and our business and growth strategies without stockholder consent, which may subject us to different and more significant risks in the future.

Our board of directors will determine our operational policies, investment guidelines and our business and growth strategies. Our board of directors may make changes to, or approve transactions that deviate from, those policies, guidelines and strategies without a vote of, or notice to, our stockholders. This could result in us conducting operational matters, making investments or pursuing different business or growth strategies than those contemplated currently. Under any of these circumstances, we may expose ourselves to different and more significant risks in the future, which could have a material adverse effect on our Financial Performance.

If we fail to maintain an effective system of internal controls, we may not be able to accurately determine our financial results or prevent fraud. As a result, our stockholders could lose confidence in our financial results, which could materially and adversely affect us and the market price of our common stock.

Prior to the completion of the Merger, WRECO was a wholly-owned subsidiary of an SEC reporting company. Accordingly, WRECO had not assessed its internal control over financial reporting on a standalone basis. Further, the control environment for certain key processes such as income taxes, payroll, legal, treasury management and information technology were established and maintained by WRECO's former parent and did not transfer to WRECO upon the close of the Merger. Due to the timing of the transaction, the significance of WRECO compared to legacy TRI Pointe and the transition of the key processes and related controls that were maintained by WRECO's former parent, we felt it was impracticable to complete a meaningful assessment of internal control over financial reporting of WRECO. In addition, as a result of the changes to legacy TRI Pointe's accounting policies and internal controls over financial reporting, the timing of those changes and the continued integration with WRECO, the Company felt it was not practical for management to assess internal control over financial reporting of legacy TRI Pointe in a way that would be useful to the readers of this annual report. As a result, this annual report on Form 10-K does not contain management's report on internal control over financial reporting. In addition, a control system, no matter how well conceived and operated can provide only reasonable, not absolute, assurance that the objectives of the control system are met. The design of control systems reflects resource constraints and the benefits of controls must be considered in relationship to their costs. Accordingly, there can be no assurance that all control issues or fraud will be detected. We cannot be certain that we will be successful in maintaining adequate internal control over our financial reporting and financial processes. Furthermore, as we continue to grow our business, our internal controls will become more complex, and we will require significantly more resources to ensure that our internal controls remain effective. Additionally, the existence of any material weakness or significant deficiency would require management to devote significant time and incur significant expense to remediate any such material weaknesses, or significant deficiencies and management may not be able to remediate any such material weaknesses or significant deficiencies in a timely manner. The existence of any material weakness in our internal control over financial reporting could result in errors in our financial statements that could require us to restate our financial statements, cause us to fail to meet our reporting obligations, and cause stockholders to lose confidence in our reported financial information, all of which could materially and adversely affect us and the market price for our common stock.

We are no longer an “emerging growth company” and as a result are subject to additional disclosure and other obligations.

As a result of the consummation of the Merger, we no longer qualify for status as an “emerging growth company” under the Jumpstart Our Business Startups (“JOBS”) Act. As an emerging growth company, we were permitted to take advantage of exemptions from certain reporting and other requirements applicable to public companies, including, but not limited to, the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002 relating to internal control over financial reporting. Because we no longer qualify as an emerging growth company, we are now subject to additional disclosure and other obligations that will place significant demands on our management, administrative, operational and accounting resources and cause us to incur significant one-time and ongoing expenses. As discussed above, this annual report on Form 10-K does not contain management’s report on internal control over financial reporting, we expect to incur significant one-time and ongoing expenses in connection with meeting the auditor attestation requirement in 2015 and beyond. Further, there is no assurance that our independent auditor will be able to provide an unqualified attestation report on internal control over financial reporting. If our independent auditor is unable to provide an unqualified attestation report, investors could lose confidence in the reliability of our financial statements, and our stock price could be materially and adversely affected.

Changes in accounting rules, assumptions and/or judgments could delay the dissemination of our financial statements and cause us to restate prior period financial statements.

Accounting rules and interpretations for certain aspects of our operations are highly complex and involve significant assumptions and judgment. These complexities could lead to a delay in the preparation and dissemination of our financial statements. Furthermore, changes in accounting rules and interpretations or in our accounting assumptions and/or judgments, such as asset impairments, could significantly impact our financial statements. In some cases, we could be required to apply a new or revised standard retroactively, resulting in restating prior period financial statements. Any of these circumstances could have a material adverse effect on our Financial Performance.

Our joint venture investments could be materially and adversely affected by lack of sole decision making authority, reliance on co-venturers' financial condition and disputes between us and our co-venturers.

We have co-invested, and we may co-invest in the future, with third parties through partnerships, joint ventures or other entities, acquiring non-controlling interests in or sharing responsibility for managing the affairs of land acquisition and/or developments. We will not be in a position to exercise sole decision-making authority regarding the land acquisitions and/or developments undertaken by our current joint ventures and any future joint ventures in which we may co-invest, and our investment may be illiquid due to our lack of control. Investments in partnerships, joint ventures or other entities may, under certain circumstances, involve risks not present when a third-party is not involved, including the possibility that partners or co-venturers might become bankrupt, fail to fund their share of required capital contributions or otherwise meet their contractual obligations, make poor business decisions or block or delay necessary decisions. Partners or co-venturers may have economic or other business interests or goals which are inconsistent with our business interests or goals, and may be in a position to take actions contrary to our policies or objectives. Such investments may also have the potential risk of impasses on decisions, such as a sale, because neither us nor the partner or co-venturer would have full control over the partnership or joint venture. Disputes between us and partners or co-venturers may result in litigation or arbitration that would increase our expenses and prevent our officers and/or directors from focusing their time and effort on our business. In addition, we may in certain circumstances be liable for the actions of its third-party partners or co-venturers.

Risks Related to Ownership of Our Common Stock

We do not intend to pay dividends on our common stock for the foreseeable future.

We currently intend to retain our future earnings, if any, to finance the development and expansion of our business and, therefore, do not intend to pay cash dividends on our common stock for the foreseeable future. Any future determination to pay dividends will be at the discretion of our board of directors and will depend on our financial condition, results of operations, capital requirements, restrictions contained in any financing instruments and such other factors as our board of directors deems relevant. Accordingly, you may need to sell your shares of our common stock to realize a return on your investment, and you may not be able to sell your shares at or above the price you paid for them.

Future sales of our common stock or other securities convertible into our common stock could cause the market value of our common stock to decline and could result in dilution of your shares.

Our board of directors is authorized, without stockholder approval, to cause us to issue additional shares of our common stock or to raise capital through the issuance of preferred stock (including equity or debt securities convertible into common stock), options, warrants and other rights, on terms and for consideration as our board of directors in its sole discretion may determine. Sales of substantial amounts of our common stock could cause the market price of our common stock to decrease significantly. We cannot predict the effect, if any, of future sales of our

common stock, or the availability of our common stock for future sales, on the value of our common stock. Sales of substantial amounts of our common stock by the Starwood Fund or another large stockholder or otherwise, or the perception that such sales could occur, may adversely affect the market price of our common stock.

- 43 -

Future offerings of debt securities, which would rank senior to our common stock in the event of our bankruptcy or liquidation, and future offerings of equity securities that may be senior to our common stock for the purposes of dividend and liquidating distributions, may adversely affect the market price of our common stock.

In the future, we may attempt to increase our capital resources by making additional offerings of debt securities or additional offerings of equity securities. Upon bankruptcy or liquidation, holders of our debt securities and shares of preferred stock and lenders with respect to other borrowings will receive a distribution of our available assets prior to the holders of our common stock. Additional equity offerings may dilute the holdings of our existing stockholders or reduce the market price of our common stock, or both. Our preferred stock, if issued, could have a preference on liquidating distributions or a preference on dividend payments or both that could limit our ability to make a dividend distribution to the holders of our common stock. Our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control. As a result, we cannot predict or estimate the amount, timing or nature of our future offerings, and purchasers of our common stock bear the risk of our future offerings reducing the market price of our common stock and diluting their ownership interest in our company.

Non-U.S. holders may be subject to United States federal income tax on gain realized on the sale or disposition of shares of our common stock.

We believe we are and will remain a “United States real property holding corporation” for United States federal income tax purposes. As a result, a non-U.S. holder generally will be subject to United States federal income tax on any gain realized on a sale or disposition of shares of our common stock, and a purchaser of the stock generally will be required to withhold and remit to the Internal Revenue Service (the “IRS”) 10% of the purchase price, unless our common stock is regularly traded on an established securities market (such as the New York Stock Exchange) and such non-U.S. holder did not actually or constructively hold more than 5% of our common stock at any time during the shorter of (a) the five-year period preceding the date of the sale or disposition and (b) the non-U.S. holder's holding period in such stock. A non-U.S. holder also will be required to file a United States federal income tax return for any taxable year in which it realizes a gain from the disposition of our common stock that is subject to United States federal income tax.

No assurance can be given that our common stock will remain regularly traded in the future. Non-U.S. holders should consult their tax advisors concerning the consequences of disposing of shares of our common stock.

Item 1B. Unresolved Staff Comments

Not Applicable.

Item 2. Properties

We lease our corporate headquarters located in Irvine, California. Our homebuilding division offices are located in leased space in the markets where we conduct business.

We believe that such properties, including the equipment located therein, are suitable and adequate to meet the needs of our businesses.

Item 3. Legal Proceedings

We are involved in various claims and litigation arising in the ordinary course of business. We do not believe that any such claims and litigation will have a material adverse effect upon our results of operations or financial position.

Item 4. Mine Safety Disclosures

Not applicable.

part ii

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is listed on the New York Stock Exchange (“NYSE”) under the ticker symbol “TPH” and began trading on January 31, 2013. The following table sets forth the high and low intra-day sales prices per share of our common stock for the periods indicated, as reported by the NYSE.

	2014	
Quarter Ended	High	Low
March 31	\$20.00	\$16.19
June 30	\$17.45	\$14.71
September 30	\$16.45	\$12.78
December 31	\$15.42	\$12.59

	2013	
Quarter Ended	High	Low
March 31	\$21.25	\$17.50
June 30	\$21.18	\$14.24
September 30	\$17.22	\$13.95
December 31	\$20.29	\$13.43

The following performance graph shows a comparison of the cumulative total returns to stockholders of the Company, as compared with the Standard & Poor’s 500 Composite Stock Index and the Dow Jones Industry Group-U.S. Home Construction Index.

The performance graph and related information shall not be deemed to be “soliciting material” or to be “filed” with the Securities and Exchange Commission, nor shall such information be incorporated by reference into any filing under the Securities Act of 1933 or Securities Exchange Act of 1934, each as amended, except to the extent that we specifically incorporate it by reference.

Comparison of the Cumulative Total Stockholders' Return Among TRI Pointe Homes, Inc., the Standard & Poor's 500 Composite Stock Index and the Dow Jones Industry Group-U.S. Home Construction Index

The above graph is based upon common stock and index prices calculated as of the dates indicated. The Company's common stock closing price on December 31, 2014 was \$15.25 per share. The stock price performance of the Company's common stock depicted in the graph above represents past performance only and is not necessarily indicative of future performance.

As of February 27, 2015, we had 113 holders of record of our common stock. We currently intend to retain our future earnings, if any, to finance the development and expansion of our business and, therefore, do not intend to pay cash dividends on our common stock for the foreseeable future. Any future determination to pay dividends will be at the discretion of our board of directors and will depend on our financial condition, results of operations, capital requirements, restrictions contained in any financing instruments and such other factors as our board of directors deems relevant. Accordingly, you may need to sell your shares of our common stock to realize a return on your investment, and you may not be able to sell your shares at or above the price you paid for them. See Part I, Item 1A, "Risk Factors—Risks Related to Ownership of Our Common Stock—we do not intend to pay dividends on our common stock for the foreseeable future" of this annual report on Form 10-K.

Item 6. Selected Financial Data

The following sets forth our selected financial and operating data on a historical basis. You should read the following summary of selected financial data in conjunction with our consolidated financial statements and the related notes and with "Management's Discussion and Analysis of Financial Condition and Results of Operations," which are included elsewhere in this annual report on Form 10-K.

WRECO Transaction

For a description of the Merger, please see the “Explanatory Note” appearing before Part I, Item 1 of this annual report on Form 10-K. The Merger is accounted for in accordance with Accounting Standards Codification (“ASC”) Topic 805, Business Combinations (“ASC 805”). For accounting purposes, the Merger is treated as a “reverse acquisition” and WRECO is considered the accounting acquirer. Accordingly, WRECO is reflected as the predecessor and acquirer and therefore the accompanying consolidated financial statements reflect the historical consolidated financial statements of WRECO for all periods presented and do not include the historical financial statements of legacy TRI Pointe prior to the Closing Date. Subsequent to the Closing Date and on a go forward basis, the consolidated financial statements reflect the results of the combined company.

⁽¹⁾Includes \$343.3 million of impairment and related charges for Coyote Springs, a large master planned community north of Las Vegas, Nevada that was owned by Pardee and excluded under the Transaction Agreement.

⁽²⁾The tax benefit was primarily the result of a loss from continuing operations due to the Coyote Springs impairment.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following in conjunction with the sections of this annual report on Form 10-K entitled "Explanatory Note," "Risk Factors," "Cautionary Note Concerning Forward-Looking Statements," "Selected Financial Data," "Business" and our historical financial statements and related notes thereto included elsewhere in this annual report on Form 10-K. This discussion contains forward-looking statements reflecting current expectations that involve risks and uncertainties. Actual results and the timing of events may differ materially from those contained in these forward-looking statements due to a number of factors, including those discussed in the section entitled "Risk Factors" and elsewhere in this annual report on Form 10-K.

For a description of the Merger, please see the "Explanatory Note" appearing before Part I, Item 1 of this annual report on Form 10-K. The Merger is accounted for in accordance with ASC 805. For accounting purposes, the Merger is treated as a "reverse acquisition" and WRECO is considered the accounting acquirer. Accordingly, WRECO is reflected as the predecessor and acquirer and therefore the accompanying consolidated financial statements reflect the historical consolidated financial statements of WRECO for all periods presented and do not include the historical financial statements of legacy TRI Pointe prior to the Closing Date. Subsequent to the Closing Date and on a go forward basis, the consolidated financial statements reflect the results of the combined company.

(1)Includes \$343.3 million of impairment and related charges for Coyote Springs, a large master planned community north of Las Vegas, Nevada that was owned by Pardee and excluded under the Transaction Agreement.

(2)The tax benefit was primarily the result of a loss from continuing operations due to the Coyote Springs impairment. Year Ended December 31, 2014 Compared to Year Ended December 31, 2013

Net New Home Orders, Average Selling Communities and Monthly Absorption Rates by Segment

	Year Ended December 31, 2014			Year Ended December 31, 2013			Percentage Change		
	Net New Home Orders	Average Selling Communities	Monthly Absorption Rates	Net New Home Orders	Average Selling Communities	Monthly Absorption Rates	Net New Home Orders	Average Selling Communities	Monthly Absorption Rates
Maracay	385	16.4	2.0	488	12.8	3.2	(21)%	28 %	(38)%
Pardee	970	20.2	4.0	1,152	17.9	5.4	(16)%	13 %	(25)%
Quadrant	337	12.2	2.3	354	12.2	2.4	(5)%	0 %	(5)%
Trendmaker	557	24.0	1.9	649	22.0	2.5	(14)%	9 %	(21)%
TRI Pointe	359	9.2	3.3	—	—	—	N/A	N/A	N/A
Winchester	339	17.1	1.7	412	20.6	1.7	(18)%	(17)%	(1)%
Total	2,947	99.1	2.5	3,055	85.5	3.0	(4)%	16 %	(17)%

Net new home orders for the year ended December 31, 2014 decreased 4% to 2,947, compared to 3,055 during the prior year. The decrease in net new home orders was due to a decrease in our monthly absorption rate in each of our segments which reported in the comparable prior year. Our overall absorption rate for the year ended December 31, 2014 was 29.7 per average selling community (2.5 monthly), compared to 35.7 per average selling community (3.0 monthly) during the prior year period. Net new home orders decreased at Maracay and Winchester due to the overall softening market conditions in the Arizona, Maryland and Virginia markets compared to the prior year. Trendmaker's net new home orders and absorption pace declined mainly due to a focus on margin and selling price over sales pace and a slowdown in the premium housing market in Houston that was driven by falling oil prices. Pardee's absorption rate decreased compared to the prior year but remained strong overall at 4.0 orders per month per community.

Backlog Units, Dollar Value and Average Sales Price by Segment (dollars in thousands)

	As of December 31, 2014			As of December 31, 2013			Percentage Change		
	Backlog Units	Dollar Value	Average Sales Price	Backlog Units	Dollar Value	Average Sales Price	Backlog Units	Dollar Value	Average Sales Price
Maracay	105	\$40,801	\$ 389	116	\$42,068	\$ 363	(10)%	(3)%	7 %
Pardee	218	147,044	675	280	171,077	611	(22)%	(14)%	10 %
Quadrant	113	51,568	456	96	44,262	461	18 %	17 %	(1)%
Trendmaker	218	114,948	527	222	108,491	489	(2)%	6 %	8 %
TRI Pointe	243	192,802	793	—	—	—	N/A	N/A	N/A
Winchester	135	105,933	785	183	141,166	771	(26)%	(25)%	2 %
Total	1,032	\$653,096	\$ 633	897	\$507,064	\$ 565	15 %	29 %	12 %

Backlog units reflects the number of homes, net of actual cancellations experienced during the period, for which we have entered into a sales contract with a customer but for which we have not yet delivered the home. Homes in backlog are generally delivered within three to nine months, although we may experience cancellations of sales contracts prior to delivery. Our cancellation rate of buyers who contracted to buy a home but did not close escrow (as a percentage of overall orders) was 16% for the year ended December 31, 2014 as compared to 15% during the prior year period. The dollar value of backlog was approximately \$653.1 million as of December 31, 2014, an increase of \$146.0 million, or 29%, compared to \$507.1 million as of December 31, 2013. This increase is due to an increase in the number of homes in backlog of 135, or 15%, to 1,032 homes as of December 31, 2014 from 897 homes as of December 31, 2013, in addition to an increase in the average sales price of homes in backlog of \$68,000, or 12%, to \$633,000 as of December 31, 2014 compared to \$565,000 as of December 31, 2013. The increase in the number of homes in backlog and the average sales price of homes in backlog was mainly the result of the addition of TRI Pointe, which had 243 homes in backlog and an average sales price in backlog of \$793,000 as of December 31, 2014. The increase associated with the addition of TRI Pointe in the current year was partially offset by decreases in backlog at Maracay, Pardee, Trendmaker and Winchester. These decreases were in line with the new home order decreases discussed above and the result of the same market conditions.

New Homes Delivered, Homes Sales Revenue and Average Sales Price by Segment (dollars in thousands)

	Year Ended December 31, 2014			Year Ended December 31, 2013			Percentage Change		
	New Homes Delivered	Home Sales Revenue	Average Sales Price	New Homes Delivered	Home Sales Revenue	Average Sales Price	New Homes Delivered	Home Sales Revenue	Average Sales Price
Maracay	396	\$150,689	\$381	463	\$145,822	\$315	(15)%	3%	21%
Pardee	1,032	486,176	471	1,183	477,956	404	(13)%	2%	17%
Quadrant	320	134,304	420	363	116,270	320	(12)%	16%	31%
Trendmaker	561	278,038	496	585	260,566	445	(4)%	7%	11%
TRI Pointe	404	324,219	803	—	—	—	N/A	N/A	N/A
Winchester	387	272,848	705	345	217,816	631	12%	25%	12%
Total	3,100	\$1,646,274	\$531	2,939	\$1,218,430	\$415	6%	35%	28%

Home sales revenue increased \$427.8 million, or 35%, to \$1.6 billion for the year ended December 31, 2014 from \$1.2 billion for the prior year period. The increase was comprised of: (i) \$342.3 million related to an increase in average sales price of \$116,000 per home to \$531,000 for the year ended December 31, 2014 from \$415,000 in the prior year; and (ii) \$85.5 million due to a 6% increase in homes delivered to 3,100 for the year ended December 31, 2014 from 2,939 in the prior year. The increase in the average sales price and new home deliveries was primarily attributable to the addition of legacy TRI Pointe with no comparable amounts in the prior year period. In addition, the average sales price of homes delivered increased at all of our reporting segments due to a change in product mix with a shift to a more move-up product in certain markets and price increases in certain markets.

Homebuilding Gross Margins (dollars in thousands)

	Year Ended December 31, 2014		Year Ended December 31, 2013	
	\$	%	\$	%
Home sales	\$1,646,274	100.0%	\$1,218,430	100.0%
Cost of home sales	1,316,470	80.0%	948,561	77.9%

Edgar Filing: TRI Pointe Homes, Inc. - Form 10-K

Homebuilding impairments and lot option abandonments	2,147	0.1	%	1,719	0.1	%
Homebuilding gross margin	327,657	19.9	%	268,150	22.0	%
Add: interest in cost of home sales	28,354	1.7	%	25,584	2.1	%
Add: impairments and lot option abandonments	2,147	0.1	%	1,719	0.1	%
Add: purchase accounting adjustments	17,225	1.0	%	—	0.0	%
Adjusted homebuilding gross margin ⁽¹⁾	\$375,383	22.8	%	\$295,453	24.2	%
Homebuilding gross margin percentage	19.9	%		22.0	%	
Adjusted homebuilding gross margin percentage ⁽¹⁾	22.8	%		24.2	%	

⁽¹⁾Non-GAAP financial measure (as discussed below).

Our homebuilding gross margin percentage decreased to 19.9% for the year ended December 31, 2014 as compared to 22.0% for the prior year period. This decrease was primarily due to a \$17.2 million or 105 basis point non-cash purchase accounting adjustment related to the fair value increase to legacy TRI Pointe's inventory as result of the Merger. Excluding interest in cost of home sales, homebuilding impairment charges and the non-cash purchase accounting adjustments, adjusted homebuilding gross margin percentage was 22.8% for the year ended December 31, 2014, compared to 24.2% for the prior year period. The decrease in the adjusted homebuilding gross margin was due to price incentives in some of our markets that have experienced softening market conditions as discussed above.

Adjusted homebuilding gross margin is a non-GAAP financial measure. We believe this information is meaningful as it isolates the impact that leverage and non-cash charges have on homebuilding gross margin and permits investors to make better comparisons with our competitors, who adjust gross margins in a similar fashion. See the table above reconciling this non-GAAP financial measure to homebuilding gross margin, the nearest GAAP equivalent.

Land and Lot Gross Margins (dollars in thousands)

	Year Ended December 31,			
	2014	%	2013	%
Land and lot sales	\$47,660	100.0%	\$52,261	100.0 %
Cost of land and lot sales	37,560	78.8 %	38,052	72.8 %
Land and lot impairments and lot option abandonments	346	0.7 %	343,660	657.6 %
Land and lot gross margin	9,754	20.5 %	(329,451)	(630.4)%
Add: interest in cost of land and lot sales	23,791	49.9 %	11,087	21.2 %
Add: impairments of land and lot assets	346	0.7 %	343,660	657.6 %
Adjusted land and lot gross margin ⁽¹⁾	\$33,891	71.1 %	\$25,296	48.4 %
Land and lot gross margin percentage	20.5 %		(630.4)%	
Adjusted land and lot gross margin percentage ⁽¹⁾	71.1 %		48.4 %	

⁽¹⁾ Non-GAAP financial measure (as discussed below).

Our land and lot gross margin percentage increased to 20.5% for the year ended December 31, 2014 as compared to (630.4)% for the prior year period. Results for the year ended December 31, 2013 include \$343.3 million of impairment and related charges for Coyote Springs, a large master planned community north of Las Vegas, Nevada. Under the terms of the Transaction Agreement, certain assets and liabilities of WRECO and its subsidiaries were excluded from the transaction and retained by Weyerhaeuser, including assets and liabilities relating to the Coyote Springs Property. Excluding interest in cost of land and lot sales and land and lot impairment charges, adjusted land and lot gross margin percentage was 71.1% for the year ended December 31, 2014, compared to 48.4% for the prior year period.

Adjusted land and lot gross margin is a non-GAAP financial measure. We believe this information is meaningful as it isolates the impact that leverage and non-cash charges have on land and lot gross margin and permits investors to make better comparisons with our competitors, who adjust gross margins in a similar fashion. See the table above reconciling this non-GAAP financial measure to land and lot gross margin, the nearest GAAP equivalent.

Sales and Marketing, General and Administrative Expense (dollars in thousands)

As a
Percentage of

Edgar Filing: TRI Pointe Homes, Inc. - Form 10-K

	Year Ended		Home Sales	
	December 31,		Revenue	
	2014	2013	2014	2013
Sales and marketing	\$103,600	\$94,521	6.3 %	7.8 %
General and administrative ("G&A")	82,373	74,244	5.0 %	6.1 %
Total sales and marketing and G&A	\$185,973	\$168,765	11.3 %	13.9 %

- 52 -

Sales and marketing expense decreased to 6.3% of home sales revenue for the year ended December 31, 2014 from 7.8% of home sales revenue for the year ended December 31, 2013 mainly due to the addition of TRI Pointe which has a lower sales and marketing expense as a percentage of home sales revenue due primarily to higher average sales prices per community. Sales and marketing expense increased \$9.1 million, or 10%, to \$103.6 million for the year ended December 31, 2014 from \$94.5 million for the prior year period. The increase in sales and marketing expense was related primarily to the addition of the homebuilding operations conducted directly by TRI Pointe for the period from July 7, 2014 through December 31, 2014, representing \$9.7 million of sales and marketing expenses, with no comparable amounts in the prior year period.

General and administrative expense decreased to 5.0% of home sales revenue for the year ended December 31, 2014 from 6.1% of home sales revenue for the same period in the prior year. The decrease was mainly due to greater operating leverage as a result of the 28% increase in the average sales prices of homes delivered during the year ended December 31, 2014, primarily as a result of the addition of legacy TRI Pointe, along with higher average selling prices across all of our existing segments. General and administrative expenses increased \$8.2 million, or 11%, to \$82.4 million for the year ended December 31, 2014 from \$74.2 million for the prior year. This increase was due primarily to the addition of TRI Pointe for the period from July 7, 2014 through December 31, 2014, representing \$16.5 million of general and administrative expenses, offset by cost savings initiatives to reduce duplicate corporate and divisional overhead costs and expenses during the year. Prior to the Merger, a portion of G&A expenses was based on an allocation from Weyerhaeuser, which may not have been indicative of the actual levels of G&A that would have been incurred by WRECO had it operated independently, or of expenses to be incurred in the future.

Total sales and marketing and G&A (“SG&A”) expense increased \$17.3 million, or 10%, to \$186.0 million for the year ended December 31, 2014 from \$168.7 million in the prior year period, but improved to 11.3% of home sales revenue from 13.9% for the years ended December 31, 2014 and 2013, respectively.

Restructuring Charges

Restructuring charges decreased to \$10.5 million for the year ended December 31, 2014 compared to \$10.9 million in the same period in the prior year. The restructuring charges for the year ended December 31, 2014 primarily relate to a plan initiated to reduce duplicate corporate and divisional overhead costs and expenses as a result of the Merger. Employee-related costs incurred during the year ended December 31, 2014 included employee retention and severance-related expenses of \$8.3 million and stock-based compensation expense of \$947,000 for employees terminated during the period. Lease termination costs of \$1.3 million for the year ended December 31, 2014 relate to contract terminations in both the current and prior years related to general cost reduction initiatives. The restructuring charges for the year ended December 31, 2013 relate to \$5.7 million of employee-related costs incurred in connection with the expected Merger and \$5.2 million of lease termination costs as a result of general cost reduction initiatives.

Transaction Expenses

As a result of the Merger, the Company has incurred advisory, financing, integration and other transaction costs during the year ended December 31, 2014 of \$18.0 million. We do not expect to incur additional transaction-related costs in 2015.

Interest

Interest, which was incurred principally to finance the Merger, land acquisitions, land development and home construction, totaled \$41.7 million and \$22.7 million for the years ended December 31, 2014 and 2013, respectively. The capitalized portion of interest incurred was \$39.0 million and \$19.1 million for the years ended December 31, 2014 and 2013, respectively. The increase in interest incurred during the year ended December 31, 2014 as compared

to the prior year period was primarily attributable to an increase in our outstanding debt and higher interest rates as a result of the issuance of the senior notes in connection with the Merger.

Interest expense was \$2.7 million and \$3.6 million during the years ended December 31, 2014 and 2013, respectively. Interest expense is included in other income (expense), net on the consolidated statements of operations.

Income Tax

For the year ended December 31, 2014, we have recorded a tax provision of \$43.8 million based on an effective tax rate of 34.2%. For the year ended December 31, 2013, we recorded a tax benefit of \$86.2 million based on an effective tax rate of 36.3%. The increase in our provision for income tax was primarily the result of the increase in income from operations for the year ended December 31, 2014. Loss from operations for the year ended December 31, 2013 included a \$343.3 million impairment charge related to Coyote Springs which was an excluded asset per the Transaction Agreement.

Lots Owned or Controlled by Segment

Excluded from owned and controlled lots are those related to Note 8, Investments in Unconsolidated Entities. The table below summarizes our lots owned or controlled by segment as of the dates presented:

	December 31,		Increase (Decrease)	
	2014	2013	Amount	%
Lots Owned				
Maracay	1,280	1,118	162	14 %
Pardee ⁽²⁾	17,354	17,950	(596)	(3)%
Quadrant	973	864	109	13 %
Trendmaker	805	679	126	19 %
TRI Pointe	2,868	—	2,868	N/A
Winchester	2,255	2,105	150	7 %
Total	25,535	22,716	2,819	12 %
Lots Controlled⁽¹⁾				
Maracay	705	1,189	(484)	(41)%
Pardee ⁽²⁾	285	1,026	(741)	(72)%
Quadrant	571	520	51	10 %
Trendmaker	1,268	1,074	194	18 %
TRI Pointe	858	—	858	N/A

Trendmaker	649	22.0	2.5	522	18.3	2.4	24 %	20 %	3 %	

Edgar Filing: TRI Pointe Homes, Inc. - Form 10-K

TRI Pointe	—	—	—	—	—	—	N/A	N/A	N/A
Winchester	412	20.6	1.7	389	15.8	2.1	6 %	30	% (19)%
Total	3,055	85.5	3.0	2,665	71.9	3.1	15 %	19	% (4)%

Net new home orders for the year ended December 31, 2013 increased 15% to 3,055, compared to 2,665 during the prior year period. Our overall absorption rate for the year ended December 31, 2013 was 35.7 per average selling community (3.0 monthly), compared to 37.1 per average selling community (3.1 monthly) during the prior year period. The increase in net new home orders was primarily due to more active selling communities resulting in higher net new home activity among most segments, with the most significant increases occurring at Pardee and Trendmaker, reflecting improved market conditions primarily in the Inland Empire (Riverside County), Los Angeles/Ventura and the Houston markets. The year over year decrease at Quadrant was primarily due to a lower absorption rate.

Backlog Units, Dollar Value and Average Sales Price by Segment (dollars in thousands)

	As of December 31, 2013			As of December 31, 2012			Percentage Change		
	Backlog	Average	Average	Backlog	Average	Average	Backlog	Average	Average
	Units	Dollar Value		Units	Dollar Value		Units	Dollar Value	
Maracay	116	\$42,068	\$ 363	91	\$24,761	\$ 272	28 %	70 %	33 %
Pardee	280	171,077	611	311	129,770	417	(10)%	32 %	46 %
Quadrant	96	44,262	461	105	32,106	306	(9)%	38 %	51 %
Trendmaker	222	108,491	489	158	70,326	445	41 %	54 %	10 %
TRI Pointe	—	—	—	—	—	—	N/A	N/A	N/A
Winchester	183	141,166	771	116	85,534	737	58 %	65 %	5 %
Total	897	\$507,064	\$ 565	781	\$342,497	\$ 439	15 %	48 %	29 %

Our cancellation rate of buyers who contracted to buy a home but did not close escrow (as a percentage of overall orders) was 15% for the years ended December 31, 2013 and 2012. The dollar value of backlog was approximately \$507.1 million as of December 31, 2013, an increase of \$164.6 million, or 48%, compared to \$342.5 million as of December 31, 2012. This increase reflects an increase in the average sales price of homes in backlog of \$126,000, or 29%, to \$565,000 as of December 31, 2013 compared to \$439,000 as of December 31, 2012, along with an increase in the number of homes in backlog of 116, or 15%, to 897 homes as of December 31, 2013 from 781 homes as of December 31, 2012. The increase in average sales price of homes in backlog is attributable to the introduction of new products with larger square footage at higher prices in newly opened selling communities and higher prices at existing communities from price increases.

New Homes Delivered, Homes Sales Revenue and Average Sales Price by Segment (dollars in thousands)

	Year Ended December 31, 2013			Year Ended December 31, 2012			Percentage Change		
	New	Home	Average	New	Home	Average	New	Home	Average
	Homes	Sales	Sales	Homes	Sales	Sales	Homes	Sales	Sales
Maracay	463	\$145,822	\$ 315	389	\$103,222	\$ 265	19 %	41 %	19 %
Pardee	1,183	477,956	404	681	270,583	397	74 %	77 %	2 %
Quadrant	363	116,270	320	415	121,311	292	(13)%	(4)%	10 %
Trendmaker	585	260,566	445	477	199,933	419	23 %	30 %	6 %
TRI Pointe	—	—	—	—	—	—	N/A	N/A	N/A
Winchester	345	217,816	631	352	175,547	499	(2)%	24 %	26 %
Total	2,939	\$1,218,430	\$ 415	2,314	\$870,596	\$ 376	27 %	40 %	10 %

Home sales revenue increased \$347.8 million, or 40%, to \$1.2 billion for the year ended December 31, 2013 from \$870.6 million for the prior year period. The increase was comprised of: (i) \$257.6 million related to a 27% increase in the number of homes delivered to 2,939 for the year ended December 31, 2013 from 2,314 for the year ended December 31, 2012, and (ii) an increase in revenue of \$90.2 million related to a \$39,000 increase in the average sales price of homes delivered to \$415,000 for the year ended December 31, 2013 from \$376,000 for the year ended December 31, 2012.

Homebuilding Gross Margins (dollars in thousands)

	Year Ended December 31,			
	2013	%	2012	%
Home sales	\$1,218,430	100.0 %	\$870,596	100.0 %
Cost of home sales	948,561	77.9 %	690,578	79.3 %
Homebuilding impairments and lot option abandonments	1,719	0.1 %	3,319	0.4 %
Homebuilding gross margin	268,150	22.0 %	176,699	20.3 %
Add: interest in cost of home sales	25,584	2.1 %	19,706	2.3 %
Add: impairments and lot option abandonments	1,719	0.1 %	3,319	0.4 %
Adjusted homebuilding gross margin ⁽¹⁾	\$295,453	24.2 %	\$199,724	22.9 %
Homebuilding gross margin percentage	22.0 %		20.3 %	
Adjusted homebuilding gross margin percentage ⁽¹⁾	24.2 %		22.9 %	

⁽¹⁾ Non-GAAP financial measure (as discussed below).

Our homebuilding gross margin percentage increased to 22.0% for the year ended December 31, 2013 as compared to 20.3% for the prior year period. The increase was due to a higher priced product mix from new selling communities and the implementation of price increases at rates that exceeded cost increases. Excluding interest in cost of home sales and homebuilding impairment charges, adjusted homebuilding gross margin percentage was 24.2% for the year ended December 31, 2013, compared to 22.9% for the prior year period. The increase in the adjusted homebuilding gross margin was consistent with the change in non-adjusted homebuilding gross margin.

Adjusted homebuilding gross margin is a non-GAAP financial measure. We believe this information is meaningful as it isolates the impact that leverage and non-cash charges have on homebuilding gross margin and permits investors to make better comparisons with our competitors, who adjust gross margins in a similar fashion. See the table above reconciling this non-GAAP financial measure to homebuilding gross margin, the nearest GAAP equivalent.

Land and Lot Gross Margins (dollars in thousands)

	Year Ended December 31,			
	2013	%	2012	%
Land and lot sales	\$52,261	100.0 %	\$192,489	100.0 %
Cost of land and lot sales	38,052	72.8 %	116,143	60.3 %
Land and lot impairments and lot option abandonments	343,660	657.6 %	168	0.1 %
Land and lot gross margin	(329,451)	(630.4)%	76,178	39.6 %
Add: interest in cost of land and lot sales	11,087	21.2 %	10,586	5.5 %
Add: impairments of land and lot assets	343,660	657.6 %	168	0.1 %
Adjusted land and lot gross margin ⁽¹⁾	25,296	48.4 %	\$86,932	45.2 %
Land and lot gross margin percentage	(630.4 %)		39.6 %	
Adjusted land and lot gross margin percentage ⁽¹⁾	48.4 %		45.2 %	

⁽¹⁾ Non-GAAP financial measure (as discussed below).

Our land and lot gross margin percentage decreased to (630.4)% for the year ended December 31, 2013 as compared to 39.6% for the prior year period. Results for the year ended December 31, 2013 include \$343.3 million of impairment charges for Coyote Springs, a large master planned community north of Las Vegas, Nevada. Under the terms of the Transaction Agreement, certain assets and liabilities of WRECO and its subsidiaries were excluded from the transaction and retained by Weyerhaeuser, including assets and liabilities relating to the Coyote Springs

Property. Excluding interest in cost of land and lot sales and land and lot impairment charge, adjusted land and lot gross margin percentage was 48.4% for the year ended December 31, 2013, compared to 45.2% for the prior year period.

Adjusted land and lot gross margin is a non-GAAP financial measure. We believe this information is meaningful as it isolates the impact that leverage and non-cash charges have on land and lot gross margin and permits investors to make better comparisons with our competitors, who adjust gross margins in a similar fashion. See the table above reconciling this non-GAAP financial measure to land and lot gross margin, the nearest GAAP equivalent.

- 56 -

Sales and Marketing, General and Administrative Expense (dollars in thousands)

	Year Ended		As a	
	December 31,		Percentage of	
	2013	2012	2013	2012
Sales and marketing	\$94,521	\$78,022	7.8 %	9.0 %
General and administrative ("G&A")	74,244	75,583	6.1 %	8.7 %
Total sales and marketing and G&A	\$168,765	\$153,605	13.9%	17.6%

Sales and marketing expense decreased to 7.8% of home sales revenue for the year ended December 31, 2013 from 9.0% of home sales revenue for the year ended December 31, 2012 mainly due to a 40% increase in home sales revenue from 2012 to 2013. Sales and marketing expense increased \$16.5 million, or 21%, to \$94.5 million for the year ended December 31, 2013 from \$78.0 million for the prior year. The increase in sales and marketing expense was primarily attributable to variable costs, such as sales commissions and closing costs, related to a 27% increase in the number of homes delivered, and additional expenses associated with 49 new community openings during the year ended December 31, 2013, an increase of 75% over the year ended December 31, 2012.

General and administrative expense decreased to 6.1% of home sales revenue for the year ended December 31, 2013 from 8.7% of home sales revenue for the same period in the prior year. The decrease was mainly due to the fixed nature of general and administrative costs benefited from a 40% increase in home sales revenue from 2012 to 2013. General and administrative expenses decreased \$1.3 million, or 2%, to \$74.2 million for the year ended December 31, 2013 from \$75.6 million for the prior year largely due to lower employee variable compensation costs for 2013 compared to 2012.

Total sales and marketing and G&A ("SG&A") expense increased \$15.2 million, or 10%, to \$168.8 million for the year ended December 31, 2013 from \$153.6 million in the prior year, but improved to 13.9% of home sales revenue from 17.6% for the years ended December 31, 2013 and 2012, respectively.

Restructuring Charges

Restructuring charges increased to \$10.9 million for the year ended December 31, 2013 compared to \$2.5 million in the prior year. The \$8.4 million increase includes a \$5.1 million increase in employee-related costs such as severance and retention, primarily incurred in connection with the pending Merger, and a \$3.3 million increase in lease termination costs related to contract terminations resulting from general cost reduction initiatives.

Interest

Interest, which was incurred principally to finance land acquisitions, land development and home construction, totaled \$22.7 million and \$27.1 million for years ended December 31, 2013 and 2012, respectively. The capitalized portion of interest incurred was \$19.1 million and \$22.1 million for the years ended December 31, 2013 and 2012, respectively. The decrease in interest incurred during the year ended December 31, 2013 as compared to the prior year period was primarily attributable to replacing third party debt with debt payable to Weyerhaeuser, which resulted in a more favorable interest rate on the mix of average outstanding debt.

Interest expense was \$3.6 million and \$5.0 million during the years ended December 31, 2013 and 2012, respectively. Interest expense is included in other income (expense), net on the consolidated statements of

operations.

Income Tax

For the year ended December 31, 2013, we recorded a tax benefit of \$86.2 million based on an effective tax rate of 36.3%. For the year ended December 31, 2012, we recorded a tax provision of \$38.9 million based on an effective tax rate of 39.1%. The tax benefit in 2013 was primarily the result of a loss from continuing operations due to the Coyote Springs impairment. The 2013 effective tax rate decreased to 36.3% from 39.1% in 2012 due primarily to a reduction in state income taxes in 2013 resulting from a change in revenue mix by state, partially offset by an increase to the rate (providing an increase in the tax benefit when applied to the pretax loss) for federal tax credits.

Lots Owned or Controlled by Segment

Excluded from owned and controlled lots are those related to Note 8, Investments in Unconsolidated Entities. The table below summarizes our lots owned or controlled by segment as of the dates presented:

	December 31,		Increase (Decrease)	
	2013	2012	Amount	%
Lots Owned				
Maracay	1,118	735	383	52 %
Pardee ⁽²⁾	17,950	19,119	(1,169)	(6 %) %
Quadrant	864	910	(46)	(5 %) %
Trendmaker	679	567	112	20 %
TRI Pointe	—	—	—	N/A
Winchester	2,105	2,190	(85)	(4 %) %
Total	22,716	23,521	(805)	(3 %) %
Lots Controlled⁽¹⁾				
Maracay	1,189	845	344	41 %
Pardee ⁽²⁾	1,026	408	618	151 %
Quadrant	520	496	24	5 %
Trendmaker	1,074	1,014	60	6 %
TRI Pointe	—	—	—	N/A
Winchester	1,088	914	174	19 %
Total	4,897	3,677	1,220	33 %
Total Lots Owned or Controlled⁽¹⁾	27,613	27,198	415	2 %

⁽¹⁾As of December 31, 2013 and 2012, lots controlled included lots that were under land option contracts or purchase contracts.

⁽²⁾As of December 31, 2013 and 2012, excludes 10,686 lots owned and 56,413 lots controlled relating to Coyote Springs, which were excluded assets per the Transaction Agreement.

Liquidity and Capital Resources

Overview

Our principal uses of capital for the year ended December 31, 2014 were operating expenses, land purchases, land development, home construction and the repayment of debt payable to Weyerhaeuser. We used funds generated by our operations and available borrowings to meet our short-term working capital requirements. We remain focused on generating positive margins in our homebuilding operations and acquiring desirable land positions in order to maintain a strong balance sheet and keep us poised for growth. As of December 31, 2014, we had \$170.6 million of cash and cash equivalents. We believe we have sufficient cash and sources of financing for at least the next twelve months.

Our board of directors will consider a number of factors when evaluating our level of indebtedness and when making decisions regarding the incurrence of new indebtedness, including the purchase price of assets to be acquired with debt financing, the estimated market value of our assets and the ability of particular assets, and our company as a whole, to

generate cash flow to cover the expected debt service. Our charter does not contain a limitation on the amount of debt we may incur and our board of directors may change our target debt levels at any time without the approval of our stockholders.

- 58 -

Assumption of Senior Notes

On the Closing Date, TRI Pointe assumed WRECO's obligations as issuer of \$450 million aggregate principal amount of its 4.375% Senior Notes due 2019 ("2019 Notes") and \$450 million aggregate principal amount of its 5.875% Senior Notes due 2024 ("2024 Notes" and together with the 2019 Notes, the "Senior Notes"). The 2019 Notes were issued at 98.89% of their aggregate principal amount and the 2024 Notes were issued at 98.15% of their aggregate principal amount. The net proceeds of approximately \$861.3 million, after debt issuance costs and discounts, from the offering were deposited into two separate escrow accounts following the closing of the offering on June 13, 2014. Upon release of the escrowed funds on the Closing Date, and prior to the consummation of the Merger, WRECO paid approximately \$743.7 million in cash to the former direct parent entity of WRECO, which cash was retained by Weyerhaeuser and its subsidiaries (other than WRECO and its subsidiaries). The payment consisted of the \$739 million Payment Amount (as defined in the Transaction Agreement) as well as approximately \$4.7 million in payment of all unpaid interest on the debt payable to Weyerhaeuser that accrued from November 3, 2013 to the Closing Date. The remaining \$117.6 million of proceeds was retained by TRI Pointe and used for general corporate purposes.

The 2019 Notes and 2024 Notes mature on June 15, 2019 and June 15, 2024, respectively. Interest is payable semiannually in arrears on June 15 and December 15. As of December 31, 2014, \$9.9 million and \$13.4 million of interest was paid on the 2019 Notes and the 2024 Notes, respectively. As of December 31, 2014, no principal has been paid on the Senior Notes, and there was \$23.7 million of capitalized debt financing costs related to the Senior Notes, included in other assets on our consolidated balance sheet. These costs will amortize over the respective lives of the Senior Notes.

Unsecured Revolving Credit Facility

In June 2014, the Company entered into an unsecured \$425 million revolving credit facility (the "Facility") with various lenders, with one lender serving as the administrative agent for the Facility. The Facility matures on July 1, 2018, and contains a sublimit of \$75 million for letters of credit. The Company may borrow under the Facility in the ordinary course of business to fund its operations, including its land development and homebuilding activities. Borrowings under the Facility will be governed by, among other things, a borrowing base. The Facility contains customary affirmative and negative covenants, including financial covenants relating to consolidated tangible net worth, leverage, and liquidity or interest coverage. Interest rates on borrowings will be based on either a daily Eurocurrency base rate or a Eurocurrency rate, in either case, plus a spread ranging from 2.15% to 2.85% depending on the Company's leverage ratio.

As of December 31, 2014 the outstanding balance under the Facility was \$260 million with an interest rate of 2.71% per annum and \$153.2 million of availability after considering the borrowing base provisions and outstanding letters of credit. At December 31, 2014 we had outstanding letters of credit of \$11.8 million. These letters of credit were issued to secure various financial obligations. We believe it is not probable that any outstanding letters of credit will be drawn upon.

Seller Financed Loans

As of December 31, 2014, the Company had \$14.7 million outstanding related to seller financed loans to acquire lots for the construction of homes. Principal and interest payments on these loans are due at various maturity dates, including at the time individual homes associated with the acquired land are delivered. The seller financed loans will accrue interest at a weighted average rate of 6.96% per annum, with interest calculated on a daily basis. Any remaining unpaid balance on these loans is due in May 2016.

Covenant Compliance

Under our Facility, we are required to comply with certain financial covenants, including, but not limited to, those set forth in the table below (dollars in thousands):

	Actual at December 31, 2014	Covenant Requirement at December 31, 2014
Financial Covenants		
Consolidated Tangible Net Worth (Not less than \$850.0 million plus 50% of net income and 50% of the net proceeds from equity offerings after June 30, 2014)	\$1,287,415	\$ 876,196
Leverage Test (Not to exceed 55%)	44	% <55%
Interest Coverage Test (Not less than 1.5:1.0)	4.95	>1.5

As of December 31, 2014 we were in compliance with all of these financial covenants.

Leverage Ratios

We believe that our leverage ratios provide useful information to the users of our financial statements regarding our financial position and cash and debt management. The ratio of debt-to-capital and the ratio of net debt-to-capital are calculated as follows (dollars in thousands):

	December 31,	
	2014	2013
Notes payable and other borrowings	\$274,677	\$—
Senior Notes	887,502	—
Debt payable to Weyerhaeuser	—	834,589
Total debt	1,162,179	834,589
Stockholders' equity	1,454,180	797,096
Total capital	\$2,616,359	\$1,631,685
Ratio of debt-to-capital ⁽¹⁾	44.4	% 51.1
Total debt	\$1,162,179	\$834,589
Less: Cash and cash equivalents	(170,629)	(4,510)
Net debt	991,550	830,079
Stockholders' equity	1,454,180	797,096
Total capital	\$2,445,730	\$1,627,175

Edgar Filing: TRI Pointe Homes, Inc. - Form 10-K

Ratio of net debt-to-capital⁽²⁾ 40.5 % 51.0 %

- (1) The ratio of debt-to-capital is computed as the quotient obtained by dividing debt by the sum of total debt plus equity.
- (2) The ratio of net debt-to-capital is computed as the quotient obtained by dividing net debt (which is debt less cash and cash equivalents) by the sum of net debt plus equity. The most directly comparable GAAP financial measure is the ratio of debt-to-capital. We believe the ratio of net debt-to-capital is a relevant financial measure for investors to understand the leverage employed in our operations and as an indicator of our ability to obtain financing. See the table above reconciling this non-GAAP financial measure to the ratio of debt-to-capital.

Cash Flows—Year Ended December 31, 2014 Compared to Year Ended December 31, 2013

For the year ended December 31, 2014 as compared to the year ended December 31, 2013, the comparison of cash flows is as follows:

- Net cash used in operating activities increased by \$92.4 million to \$113.4 million in 2014 from a use of \$21.0 million in 2013. The change was primarily comprised of an increase in real estate inventories of \$276.3 million in 2014 compared to an increase of \$165.5 million in 2013. Other offsetting activity included net income of \$84.2 million in 2014 compared to a net loss of \$149.5 million in 2013. The net loss in 2013 was due primarily to \$345.5 million of non-cash impairment and related charges, offset by a deferred tax benefit of \$108.9 million which was primarily related to the impairment charge.
 - Net cash provided by investing activities was \$44.7 million in 2014 compared to \$8.3 million of cash used in 2013. Cash provided by investing activities for 2014 was primarily related to cash acquired in the Merger.
 - Net cash provided by financing activities increased to \$234.8 million in 2014 from \$28.6 million in 2013. The change was primarily a result of (i) proceeds from the issuance of Senior Notes, and (ii) borrowings from notes payable, offset by (iii) payments on debt payable to Weyerhaeuser.
- As of December 31, 2014, our cash and cash equivalents balance was \$170.6 million.

Cash Flows—Year Ended December 31, 2013 Compared to Year Ended December 31, 2012

For the year ended December 31, 2013 as compared to the year ended December 31, 2012, the comparison of cash flows is as follows:

- Net cash used in operating activities increased by \$83.8 million to a use of \$21.0 million in 2013 from a source of \$62.8 million in 2012. The change was primarily comprised of an increase in real estate inventories of \$165.5 million in 2013 compared to an increase of \$74.9 million in 2012. This change was partially offset by a source of receivables of \$44.7 million in 2013 compared to a use of \$11.8 million in 2012. Other offsetting activity included a net loss of \$149.5 million in 2013 compared to net income of \$61.5 million in 2012. The net loss in 2013 was due primarily to \$345.5 million of non-cash impairment and related charges, offset by a deferred tax benefit of \$108.9 million which was primarily related to the impairment charge. There was a deferred tax loss of \$38.0 million in 2012.
 - Net cash used in investing activities increased \$6.2 million to \$8.3 million in 2013 from \$2.1 million in 2012, primarily due to an increase in property and equipment purchases to \$10.4 million in 2013 from \$3.5 million in 2012. These additional purchases related to both model furnishings acquired for new selling communities and leasehold improvements made in connection with regional office relocations.
 - Net cash flow from financing activities increased \$87.3 million to \$28.6 million in 2013 from a use of \$58.7 million in 2012. The change was primarily comprised of the net loan borrowings from Weyerhaeuser.
- As of December 31, 2013, our cash and cash equivalents balance was \$4.5 million.

Off-Balance Sheet Arrangements

In the ordinary course of business, we enter into land option contracts in order to procure lots for the construction of our homes. We are subject to customary obligations associated with entering into contracts for the purchase of land and improved lots. These purchase contracts typically require a cash deposit and the purchase of properties under these contracts is generally contingent upon satisfaction of certain requirements by the sellers, including obtaining applicable property and development entitlements. We also utilize option contracts with land sellers as a method of acquiring land in staged takedowns, to help us manage the financial and market risk associated with land holdings, and to reduce the use of funds from our corporate financing sources. Option contracts generally require a non-refundable deposit for the right to acquire lots over a specified period of time at pre-determined prices. We generally have the right at our discretion to terminate our obligations under both purchase contracts and option

contracts by forfeiting our cash deposit with no further financial responsibility to the land seller. When market conditions are such that land values are not appreciating, existing option agreements may become less desirable, at which time we may elect to forfeit deposits and pre-acquisition costs and terminate the agreements. As of December 31, 2014, we had \$52.2 million of non-refundable cash deposits pertaining to land option contracts and purchase contracts with an aggregate remaining purchase price of approximately \$457.9 million (net of deposits).

Our utilization of land option contracts is dependent on, among other things, the availability of land sellers willing to enter into option takedown arrangements, the availability of capital to financial intermediaries to finance the development of optioned lots, general housing market conditions, and local market dynamics. Options may be more difficult to procure from land sellers in strong housing markets and are more prevalent in certain geographic regions.

As of December 31, 2014, we had \$153.2 million of availability under our secured revolving credit facilities after considering the borrowing base provisions and outstanding letters of credit.

Contractual Obligations Table

The following table summarizes our future estimated cash payments under existing contractual obligations as of December 31, 2014, including estimated cash payments due by period. Our purchase obligations primarily represent commitments for land purchases under land purchase and land option contracts with non-refundable deposits.

Contractual Obligations	Payments Due by Period				
	Total	Less Than 1 Year	1-3 Years	4-5 Years	After 5 Years
	(dollars in thousands)				
Long-term debt principal payments ⁽¹⁾	\$1,174,677	\$260,200	\$14,477	\$450,000	\$450,000
Long-term debt interest payments	345,901	54,198	92,250	68,367	131,086
Operating leases ⁽²⁾	36,679	7,255	13,079	7,945	8,400
Purchase obligations ⁽³⁾	457,888	269,071	180,596	4,634	3,587
Total	\$2,015,145	\$590,724	\$300,402	\$530,946	\$593,073

⁽¹⁾For a more detailed description of our long-term debt, please see Note 13 of the notes to our consolidated financial statements included elsewhere in this annual report on Form 10-K.

⁽²⁾For a more detailed description of our operating leases, please see Note 15 of the notes to our consolidated financial statements included elsewhere in this annual report on Form 10-K.

⁽³⁾Includes \$457.9 million (net of deposits) of the remaining purchase price for all land options contracts and purchase contracts as of December 31, 2014. For a more detailed description of our land purchase and option contracts, please see the discussion set forth above in the section entitled “—Off-Balance Sheet Arrangements.”

Inflation

Our homebuilding operations can be adversely impacted by inflation, primarily from higher land, financing, labor, material and construction costs. In addition, inflation can lead to higher mortgage rates, which can significantly affect the affordability of mortgage financing to homebuyers. While we attempt to pass on cost increases to customers through increased prices, when weak housing market conditions exist, we are often unable to offset cost increases with higher selling prices.

Seasonality

Historically, the homebuilding industry experiences seasonal fluctuations in quarterly operating results and capital requirements. We typically experience the highest new home order activity in spring and summer, although this activity is also highly dependent on the number of active selling communities, timing of new community openings and other market factors. Since it typically takes four to six months to construct a new home, we deliver more homes in the second half of the year as spring and summer home orders convert to home deliveries. Because of this seasonality, home starts, construction costs and related cash outflows have historically been highest in the second and third

quarters, and the majority of cash receipts from home deliveries occur during the second half of the year. We expect this seasonal pattern to continue over the long-term, although it may be affected by volatility in the homebuilding industry.

- 62 -

Critical Accounting Policies

Our financial statements have been prepared in accordance with GAAP. The preparation of these financial statements requires our management to make estimates and judgments that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of costs and expenses during the reporting period. On an ongoing basis, our management evaluates its estimates and judgments, including those which impact our most critical accounting policies. Our management bases its estimates and judgments on historical experience and on various other factors that we believe to be reasonable under the circumstances. Actual results may differ from our estimates under different assumptions or conditions. Our management believes that the following accounting policies are among the most important to the portrayal of our financial condition and results of operations and require among the most difficult, subjective or complex judgments:

Real Estate Inventories and Cost of Sales

Real estate inventories consist of land, land under development, homes under construction, completed homes and model homes and are stated at cost, net of impairment losses. We capitalize direct carrying costs, including interest, property taxes and related development costs to inventories. Field construction supervision and related direct overhead are also included in the capitalized cost of inventories. Direct construction costs are specifically identified and allocated to homes while other common costs, such as land, land improvements and carrying costs, are allocated to homes within a community based upon their anticipated relative sales or fair value. In accordance with ASC Topic 835, Interest (“ASC 835”), homebuilding interest capitalized as a cost of inventories owned is included in costs of sales as related units or lots are sold. To the extent our debt exceeds our qualified assets as defined in ASC 835, we expense a portion of the interest incurred by us. Qualified assets represent projects that are actively under development. Homebuilding cost of sales is recognized at the same time revenue is recognized and is recorded based upon total estimated costs to be allocated to each home within a community. Any changes to the estimated costs are allocated to the remaining undelivered lots and homes within their respective community. The estimation and allocation of these costs requires a substantial degree of judgment by management.

The estimation process involved in determining relative sales or fair values is inherently uncertain because it involves estimating future sales values of homes before delivery. Additionally, in determining the allocation of costs to a particular land parcel or individual home, we rely on project budgets that are based on a variety of assumptions, including assumptions about construction schedules and future costs to be incurred. It is common that actual results differ from budgeted amounts for various reasons, including construction delays, increases in costs that have not been committed or unforeseen issues encountered during construction that fall outside the scope of existing contracts, or costs that come in less than originally anticipated. While the actual results for a particular construction project are accurately reported over time, a variance between the budget and actual costs could result in the understatement or overstatement of costs and have a related impact on gross margins between reporting periods. To reduce the potential for such variances, we have procedures that have been applied on a consistent basis, including assessing and revising project budgets on a periodic basis, obtaining commitments from subcontractors and vendors for future costs to be incurred and utilizing the most recent information available to estimate costs.

If there are indications of impairment, we perform a detailed budget and cash flow review of our real estate assets to determine whether the estimated remaining undiscounted future cash flows of the community are more or less than the asset’s carrying value. If the undiscounted cash flows are more than the asset’s carrying value, no impairment adjustment is required. However, if the undiscounted cash flows are less than the asset’s carrying value, the asset is deemed impaired and is written down to fair value. These impairment evaluations require us to make estimates and assumptions regarding future conditions, including timing and amounts of development costs and sales prices of real estate assets, to determine if expected future undiscounted cash flows will be sufficient to recover the asset’s carrying value.

When estimating undiscounted cash flows of a community, we make various assumptions, including: (i) expected sales prices and sales incentives to be offered, including the number of homes available, pricing and incentives being offered by us or other builders in other communities, and future sales price adjustments based on market and economic trends; (ii) expected sales pace and cancellation rates based on local housing market conditions, competition and historical trends; (iii) costs expended to date and expected to be incurred including, but not limited to, land and land development costs, home construction costs, interest costs, indirect construction and overhead costs, and selling and marketing costs; (iv) alternative product offerings that may be offered that could have an impact on sales pace, sales price and/or building costs; and (v) alternative uses for the property.

Many assumptions are interdependent and a change in one may require a corresponding change to other assumptions. For example, increasing or decreasing sales absorption rates has a direct impact on the estimated per unit sales price of a home, the level of time sensitive costs (such as indirect construction, overhead and carrying costs), and selling and marketing costs (such as model maintenance costs and advertising costs). Depending on the underlying objective of the community, assumptions could have a significant impact on the projected cash flow analysis. For example, if our objective is to preserve operating margins, our cash flow analysis will be different than if the objective is to increase sales. These objectives may vary significantly from community to community and over time. If assets are considered impaired, impairment is determined by the amount the asset's carrying value exceeds its fair value. Fair value is determined based on estimated future cash flows discounted for inherent risks associated with real estate assets. These discounted cash flows are impacted by expected risk based on estimated land development, construction and delivery timelines; market risk of price erosion; uncertainty of development or construction cost increases; and other risks specific to the asset or market conditions where the asset is located when assessment is made. These factors are specific to each community and may vary among communities. We perform a quarterly review for indicators of impairment. For the years ended December 31, 2014, 2013 and 2012 we recorded real estate inventory impairment charges of \$931,000, \$341.1 million and \$735,000, respectively. The impairment charge in 2013 is primarily related to the impairment of Coyote Springs, which was an excluded asset per the Transaction Agreement.

Home Sales and Profit Recognition

In accordance with ASC 360, Property, Plant, and Equipment, revenues from home sales and other real estate sales are recorded and a profit is recognized when the respective units are delivered. Home sales and other real estate sales are delivered when all conditions of escrow are met, including delivery of the home or other real estate asset, title passage, appropriate consideration is received and collection of associated receivables, if any, is reasonably assured. Sales incentives are a reduction of revenues when the respective unit is delivered. When it is determined that the earnings process is not complete, the sale and the related profit are deferred for recognition in future periods. The profit we record is based on the calculation of cost of sales, which is dependent on our allocation of costs, as described in more detail above in the section entitled "Real Estate Inventories and Cost of Sales."

Warranty Reserves

In the normal course of business, we incur warranty-related costs associated with homes that have been delivered to homebuyers. Estimated future direct warranty costs are accrued and charged to cost of sales in the period when the related homebuilding revenues are recognized while indirect warranty overhead salaries and related costs are charged to cost of sales in the period incurred. Amounts are accrued based upon our historical rates. We assess the adequacy of our warranty accrual on a quarterly basis and adjust the amounts as appropriate for current quantitative and qualitative factors. Factors that affect the warranty accruals include the number of homes delivered, historical and anticipated rates of warranty claims and cost per claim. Although we consider the warranty accruals reflected in our consolidated balance sheet to be adequate, actual future costs could differ significantly from our currently estimated amounts. Our warranty accrual is included in accrued liabilities in the accompanying consolidated balance sheets.

Stock-Based Compensation

We account for share-based awards in accordance with ASC 718, Compensation-Stock Compensation ("ASC 718"). ASC 718 requires that the cost resulting from all share-based payment transactions be recognized in the financial statements. ASC 718 requires all entities to apply a fair-value-based measurement method in accounting for share-based payment transactions with employees.

Income Taxes

We account for income taxes in accordance with ASC Topic 740, Income Taxes (“ASC 740”). Deferred tax assets and liabilities are recorded based on future tax consequences of both temporary differences between the amounts reported for financial reporting purposes and the amounts deductible for income tax purposes, and are measured using enacted tax rates expected to apply in the years in which the temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in earnings in the period when the changes are enacted.

Each quarter we assess our deferred tax assets to determine whether all or any portion of the assets is more likely than not unrealizable under ASC 740. We are required to establish a valuation allowance for any portion of the asset we conclude is more likely than not to be unrealizable. Our assessment considers, among other things, the nature, frequency and severity of our current and cumulative losses, forecasts of our future taxable income, the duration of statutory carryforward periods and tax planning alternatives. Due to uncertainties inherent in the estimation process, it is possible that actual results may vary from estimates.

We classify any interest and penalties related to income taxes as part of income tax expense. As of December 31, 2014, the Company has liabilities for gross unrecognized tax benefits of \$14.9 million the majority of which were assumed in connection with the Merger.

Goodwill

In connection with the Merger, \$139.3 million of goodwill has been recorded as of December 31, 2014. We have completed the majority of our business combination accounting as of December 31, 2014 and expect to complete the remainder in the first quarter of 2015. In accordance with ASC Topic 350, Intangibles-Goodwill and Other (“ASC 350”), we will evaluate goodwill for possible impairment annually or more frequently if events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Based on our qualitative analysis, we have concluded as of December 31, 2014, our goodwill was not impaired.

Related Party Transactions

Prior to the Merger, WRECO was a wholly-owned subsidiary of Weyerhaeuser. Weyerhaeuser provided certain services including payroll processing and related employee benefits, other corporate services such as corporate governance, cash management and other treasury services, administrative services such as government relations, tax, internal audit, legal, accounting, human resources and equity-based compensation plan administration, lease of office space, aviation services and insurance coverage. WRECO was allocated a portion of Weyerhaeuser corporate general and administrative costs on either a proportional cost or usage basis.

During the year ended December 31, 2014 and prior to the Merger, WRECO sold \$4.8 million of mineral rights and \$21.2 million of land to Weyerhaeuser.

As of December 31, 2013, there were balances owed to Weyerhaeuser including accounts payable to Weyerhaeuser of \$18.9 million, which is recorded in accounts payable on the accompanying consolidated balance sheet, \$16.6 million of income tax liability to Weyerhaeuser, which is recorded in accrued expenses and other liabilities on the accompanying balance sheet and \$834.6 million of debt payable to Weyerhaeuser, which is recorded on the face of the accompanying balance sheet. All amounts owed to Weyerhaeuser were settled on the Closing Date in connection with the Merger, other than liabilities related to a tax sharing agreement.

Recently Issued Accounting Standards

In April 2014, the FASB issued amendments to Accounting Standards Update 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity. The update requires that a disposal representing a strategic shift that has (or will have) a major effect on an entity’s financial results or a business activity classified as held for sale should be reported as discontinued operations. The amendments also expand the disclosure requirements for discontinued operations and add new disclosures for individually significant dispositions that do not qualify as discontinued operations. The amendments are effective prospectively for fiscal years, and interim reporting periods within those years, beginning after December 15, 2014 (early adoption is permitted only for disposals that have not been previously reported). The implementation of the amended guidance is not expected to have a material impact on our consolidated financial position or results of operations.

In May 2014, the FASB issued Accounting Standards Update 2014-09, Revenue from Contracts with Customers (“ASU 2014-09”). The core principle of ASU 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps: identify the contract(s) with a customer; identify the performance obligations in the contract; determine the

transaction price; allocate the transaction price to the performance obligations in the contract; and recognize revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 supersedes the revenue-recognition requirements in ASC Topic 605, Revenue Recognition, most industry-specific guidance throughout the industry topics of the accounting standards codification, and some cost guidance related to construction-type and production-type contracts. ASU 2014-09 is effective for public entities for the annual periods ending after December 15, 2016, and for annual and interim periods thereafter. Early adoption is not permitted. Companies may use either a full retrospective or a modified retrospective approach to adopt ASU 2014-09. We are currently evaluating the approach for implementation and the potential impact of adopting this guidance on our consolidated financial statements.

In August 2014, the FASB issued Accounting Standards Update No. 2014-15 (“ASU 2014-15”), Presentation of Financial Statements — Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern, which requires management to evaluate, in connection with preparing financial statements for each annual and interim reporting period, whether there are conditions or events, considered in the aggregate, that raise substantial doubt about an entity’s ability to continue as a going concern within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued when applicable) and provide related disclosures. ASU 2014-15 is effective for the annual period ending after December 15, 2016, and for annual and interim periods thereafter. Early adoption is permitted. We believe the adoption of this guidance will not have a material effect on our consolidated financial statements.

In February 2015, the FASB issued Accounting Standards Update No. 2015-02 (“ASU 2015-02”), Consolidation (Topic 810): Amendments to the Consolidation Analysis, which requires management to evaluate, in connection with preparing financial statements for each annual and interim reporting period, whether they should consolidate certain legal entities, specifically limited partnerships and similar legal entities, and evaluating fee arrangements and related parties for primary beneficiary determination. ASU 2014-15 is effective for the annual period and interim periods within those annual periods ending after December 15, 2015. Early adoption is permitted. We believe the adoption of this guidance will not have a material effect on our consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risks related to fluctuations in interest rates on our outstanding debt. We did not utilize swaps, forward or option contracts on interest rates or commodities, or other types of derivative financial instruments as of or during the year ended December 31, 2014. We have not entered into and currently do not hold derivatives for trading or speculative purposes. Many of the statements contained in this section are forward looking and should be read in conjunction with our disclosures under the heading “Cautionary Note Concerning Forward-Looking Statements.”

The table below details the principal amount and the average interest rates for the outstanding debt for each category based upon the expected maturity or disposition dates. The fair value of our debt, which consists of our unsecured revolving credit facility, seller financed loans and Senior Notes, is based on quoted market prices for the same or similar instruments as of December 31, 2014.

December 31,	Expected Maturity Date							Total	Estimated Fair Value
	2015	2016	2017	2018	2019	Thereafter			
	(dollars in thousands)								
Liabilities:									
Variable rate debt	\$260,000	\$—	\$—	\$—	\$—	\$—	\$—	\$260,000	\$260,000
Weighted average interest rate	2.7	% 0.0	% 0.0	% 0.0	% 0.0	% 0.0	% 0.0	2.7	% 2.7
Fixed rate debt	\$200	\$14,477	\$—	\$—	\$450,000	\$450,000	\$914,677	\$911,302	
Weighted average interest rate	7.0	% 7.0	% 0.0	% 0.0	4.4	% 5.9	% 5.2	% 5.2	%

Based on the current interest rate management policies we have in place with respect to our outstanding debt, we do not believe that the future market rate risks related to the above securities will have a material adverse impact on our financial position, results of operations or liquidity. For a more detailed description of our long-term debt, please see Note 13 of the notes to our consolidated financial statements included elsewhere in this annual report on Form 10-K.

Item 8. Financial Statements and Supplementary Data

See Item 15 included in this report.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

We have established disclosure controls and procedures to ensure that information we are required to disclose in the reports we file or submit under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and accumulated and communicated to management, including the Chief Executive Officer (the “Principal Executive Officer”) and Chief Financial Officer (the “Principal Financial Officer”), as appropriate, to allow timely decisions regarding required disclosure. Under the supervision and with the participation of senior management, including our Principal Executive Officer and Principal Financial Officer, we evaluated our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Exchange Act. Based on this evaluation, our Principal Executive Officer and Principal Financial Officer concluded

that our disclosure controls and procedures were effective as of December 31, 2014.

Management's Report on Internal Control Over Financial Reporting

This annual report does not contain management's report on internal control over financial reporting due to the nature and timing of changes to the Company's internal controls as a result of the Merger with WRECO that was completed on July 7, 2014. WRECO was deemed to be the acquiring company for accounting purposes and the transaction was accounted for as a reverse acquisition in accordance with generally accepted accounting principles ("GAAP"). Accordingly, for all purposes, including reporting with the SEC, our financial statements for periods prior to the Merger reflect the historical results of WRECO, and not those of TRI Pointe, and our financial statements for all subsequent periods reflect the results of the combined company.

As a result of the Merger, WRECO's corporate accounting and finance personnel, and executive management team were replaced by TRI Pointe's corporate accounting and finance personnel, and executive management team. However, the accounting policies of legacy TRI Pointe were largely replaced by those of the accounting acquirer, WRECO. In addition, there were changes to the internal control over financial reporting framework of legacy TRI Pointe as a result of adopting certain controls of WRECO. Further, the control environment for certain key processes such as income taxes, payroll, legal, treasury management and information technology were established and maintained by WRECO's former parent which did not transfer to WRECO upon the close of the Merger. Due to the timing of the transaction, the significance of WRECO compared to legacy TRI Pointe and the transition of the key processes and related controls that were maintained by WRECO's former parent, we felt it was impracticable to complete a meaningful assessment of internal control over financial reporting of WRECO as of December 31, 2014. In addition, as a result of the changes to legacy TRI Pointe's accounting policies and internal controls over financial reporting, the timing of those changes and the continued integration with WRECO, the Company felt it was not practical for management to assess internal control over financial reporting of legacy TRI Pointe in a way that would be useful to the readers of this annual report.

Our management is currently assessing and implementing our internal controls over financial reporting using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO 2013) in Internal Control — Integrated Framework. We expect to complete this assessment during 2015. Our annual report on Form 10-K for the year ended December 31, 2015 will include a management's report on internal control over financial reporting.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies and procedures may deteriorate.

Changes in Internal Control Over Financial Reporting

As discussed above, following the consummation of the Merger, there were changes to legacy TRI Pointe's internal controls over financial reporting (as defined in Rules 13a-15 and 15d-15 under the Exchange Act) that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. These changes in 2014 were largely related to legacy TRI Pointe adopting certain controls around the financial statement close, treasury, land acquisition and valuation, payroll, income taxes, and information technology processes of WRECO. The Company expects further changes to our internal controls over financial reporting in 2015 as our management continues to assess the impact of the Merger on our existing internal control structure and whether additional controls will be appropriate to address new or increased risks that may affect the reliability of our financial reporting and the preparation of our financial statements for our stockholders and other external users. Management expects to complete this assessment during 2015.

As noted above, our management's assessment of our internal control over financial reporting is not complete, and, accordingly, our management may identify material weaknesses as part of its assessment.

Item 9B. Other Information

None.

part iII

Item 10. Directors, Executive Officers and Corporate Governance

The information required in response to this item is incorporated by reference from the information contained in our 2015 Proxy Statement under the captions “Board of Directors,” “Management,” “Section 16(a) Beneficial Ownership Reporting Compliance,” and “Corporate Governance.”

Item 11. Executive Compensation

The information required in response to this item is incorporated by reference to our 2015 Proxy Statement under the captions “Executive Compensation,” and “Corporate Governance – Compensation Committee Interlocks and Insider Participation.”

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholders

The information required in response to this item is incorporated by reference to our 2015 Proxy Statement under the captions “Ownership of TRI Pointe Common Stock” and “Equity Compensation Plan Information.”

Item 13. Certain Relationships and Related Party Transactions, and Director Independence

The information required in response to this item is incorporated by reference to our 2015 Proxy Statement under the caption “Certain Relationships and Related Party Transactions.”

Item 14. Principal Accountant Fees and Services

The information required in response to this item is incorporated by reference to our 2015 Proxy Statement under the caption “Audit Committee Matters.”

part iV

Item 15. Exhibits, Financial Statements and Financial Statement Schedules

(a) The following documents are filed as part of this annual report on Form 10-K:

(1) Financial Statements:

	Page:
<u>Reports of Independent Registered Public Accounting Firms</u>	71
<u>Consolidated Balance Sheets as of December 31, 2014 and 2013</u>	73
<u>Consolidated Statements of Operations for the years ended December 31, 2014, 2013 and 2012</u>	74
<u>Consolidated Statement of Equity for the years ended December 31, 2014, 2013 and 2012</u>	75
<u>Consolidated Statements of Cash Flows the years ended December 31, 2014, 2013 and 2012</u>	76
<u>Notes to Consolidated Financial Statements</u>	77

(2) Financial Statement Schedules

All other schedules have been omitted since the required information is presented in the financial statements and the related notes or is not applicable.

(3) Exhibits

The exhibits filed or furnished as part of this annual report on Form 10-K are listed in the Index to Exhibits immediately preceding those exhibits, which Index is incorporated in this Item by reference.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

TRI Pointe Homes, Inc.

We have audited the accompanying consolidated balance sheet of TRI Pointe Homes, Inc. as of December 31, 2014, and the related consolidated statements of operations, equity, and cash flows for the year ended December 31, 2014. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of TRI Pointe Homes, Inc. at December 31, 2014, and the consolidated results of its operations and cash flows for the year ended December 31, 2014, in conformity with U.S. generally accepted accounting principles.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholder

Weyerhaeuser Real Estate Company:

We have audited the accompanying consolidated balance sheet of Weyerhaeuser Real Estate Company and subsidiaries as of December 31, 2013, and the related consolidated statements of operations, changes in equity, and cash flows for each of the years in the two-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Weyerhaeuser Real Estate Company and subsidiaries as of December 31, 2013, and the results of their operations and their cash flows for each of the years in the two-year period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

TRI POINTE HOMES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization and Summary of Significant Accounting Policies

Organization

TRI Pointe Homes, Inc. is engaged in the design, construction and sale of innovative single-family homes through its portfolio of six quality brands across eight states, including Maracay Homes in Arizona, Pardee Homes in California and Nevada, Quadrant Homes in Washington, Trendmaker Homes in Texas, TRI Pointe Homes in California and Colorado and Winchester Homes in Maryland and Virginia.

Basis of Presentation

The accompanying financial statements have been prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) as contained within the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”).

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries as described in “Reverse Acquisition” below. All significant intercompany accounts have been eliminated upon consolidation. Certain prior period amounts have been reclassified to conform to current period presentation. Subsequent events have been evaluated through the date the financial statements were issued.

Unless the context otherwise requires, the terms “we”, “us”, “our” and “the Company” refer to TRI Pointe Homes, Inc. (and its consolidated subsidiaries).

Reverse Acquisition

On July 7, 2014 (the “Closing Date”), TRI Pointe Homes, Inc. consummated the previously announced merger (the “Merger”) of our wholly-owned subsidiary, Topaz Acquisition, Inc. (“Merger Sub”), with and into Weyerhaeuser Real Estate Company (“WRECO”), with WRECO surviving the Merger and becoming our wholly-owned subsidiary, as contemplated by the Transaction Agreement, dated as of November 3, 2013 (the “Transaction Agreement”), by and among us, Weyerhaeuser Company (“Weyerhaeuser”), the Company, WRECO and Merger Sub. The Merger is accounted for in accordance with ASC Topic 805, Business Combinations (“ASC 805”). For accounting purposes, the Merger is treated as a “reverse acquisition” and WRECO is considered the accounting acquirer. Accordingly, WRECO is reflected as the predecessor and acquirer and therefore the accompanying consolidated financial statements reflect the historical consolidated financial statements of WRECO for all periods presented and do not include the historical financial statements of TRI Pointe prior to the Closing Date. Subsequent to the Closing Date, the consolidated financial statements reflect the results of the combined company.

See Note 2, Merger with Weyerhaeuser Real Estate Company, for further information on the Merger. In the Merger, each issued and outstanding WRECO common share was converted into 1.297 shares of TRI Pointe common stock. The historical issued and outstanding WRECO common shares (100,000,000 common shares for all periods presented prior to the Merger) have been recast (as 129,700,000 common shares of the Company for all periods prior to the Merger) in all periods presented to reflect this conversion.

Use of Estimates

Our financial statements have been prepared in accordance with GAAP. The preparation of these financial statements requires our management to make estimates and judgments that affect the reported amounts of assets and liabilities and the disclosures of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from our estimates.

Cash and Cash Equivalents and Concentration of Credit Risk

We define cash and cash equivalents as cash on hand, demand deposits with financial institutions, and short-term liquid investments with an initial maturity date of less than three months. The Company's cash balances exceed federally insurable limits. The Company monitors the cash balances in its operating accounts and adjusts the cash balances as appropriate; however, these cash balances could be impacted if the underlying financial institutions fail or are subject to other adverse conditions in the financial markets. To date, the Company has experienced no loss or lack of access to cash in its operating accounts.

Real Estate Inventories and Cost of Sales

Real estate inventories consist of land, land under development, homes under construction, completed homes and model homes and are stated at cost, net of impairment losses. We capitalize direct carrying costs, including interest, property taxes and related development costs to inventories. Field construction supervision and related direct overhead are also included in the capitalized cost of inventories. Direct construction costs are specifically identified and allocated to homes while other common costs, such as land, land improvements and carrying costs, are allocated to homes within a community based upon their anticipated relative sales or fair value. In accordance with ASC Topic 835, Interest (“ASC 835”), homebuilding interest capitalized as a cost of inventories owned is included in costs of sales as related units or lots are sold. To the extent our debt exceeds our qualified assets as defined in ASC 835, we expense a portion of the interest incurred by us. Qualified assets represent projects that are actively under development. Homebuilding cost of sales is recognized at the same time revenue is recognized and is recorded based upon total estimated costs to be allocated to each home within a community. Any changes to the estimated costs are allocated to the remaining undelivered lots and homes within their respective community. The estimation and allocation of these costs requires a substantial degree of judgment by management.

The estimation process involved in determining relative sales or fair values is inherently uncertain because it involves estimating future sales values of homes before delivery. Additionally, in determining the allocation of costs to a particular land parcel or individual home, we rely on project budgets that are based on a variety of assumptions, including assumptions about construction schedules and future costs to be incurred. It is common that actual results differ from budgeted amounts for various reasons, including construction delays, increases in costs that have not been committed or unforeseen issues encountered during construction that fall outside the scope of existing contracts, or costs that come in less than originally anticipated. While the actual results for a particular construction project are accurately reported over time, a variance between the budget and actual costs could result in the understatement or overstatement of costs and have a related impact on gross margins between reporting periods. To reduce the potential for such variances, we have procedures that have been applied on a consistent basis, including assessing and revising project budgets on a periodic basis, obtaining commitments from subcontractors and vendors for future costs to be incurred and utilizing the most recent information available to estimate costs.

If there are indications of impairment, we perform a detailed budget and cash flow review of our real estate assets to determine whether the estimated remaining undiscounted future cash flows of the community are more or less than the asset’s carrying value. If the undiscounted cash flows are more than the asset’s carrying value, no impairment adjustment is required. However, if the undiscounted cash flows are less than the asset’s carrying value, the asset is deemed impaired and is written down to fair value. These impairment evaluations require us to make estimates and assumptions regarding future conditions, including timing and amounts of development costs and sales prices of real estate assets, to determine if expected future undiscounted cash flows will be sufficient to recover the asset’s carrying value.

When estimating undiscounted cash flows of a community, we make various assumptions, including: (i) expected sales prices and sales incentives to be offered, including the number of homes available, pricing and incentives being offered by us or other builders in other communities, and future sales price adjustments based on market and economic trends; (ii) expected sales pace and cancellation rates based on local housing market conditions, competition and historical trends; (iii) costs expended to date and expected to be incurred including, but not limited to, land and land development costs, home construction costs, interest costs, indirect construction and overhead costs, and selling and marketing costs; (iv) alternative product offerings that may be offered that could have an impact on sales pace, sales price and/or building costs; and (v) alternative uses for the property.

Many assumptions are interdependent and a change in one may require a corresponding change to other assumptions. For example, increasing or decreasing sales absorption rates has a direct impact on the estimated per unit sales price of

a home, the level of time sensitive costs (such as indirect construction, overhead and carrying costs), and selling and marketing costs (such as model maintenance costs and advertising costs). Depending on the underlying objective of the community, assumptions could have a significant impact on the projected cash flow analysis. For example, if our objective is to preserve operating margins, our cash flow analysis will be different than if the objective is to increase sales. These objectives may vary significantly from community to community and over time. If assets are considered impaired, impairment is determined by the amount the asset's carrying value exceeds its fair value. Fair value is determined based on estimated future cash flows discounted for inherent risks associated with real estate assets. These discounted cash flows are impacted by expected risk based on estimated land development, construction and delivery timelines; market risk of price erosion; uncertainty of development or construction cost increases; and other risks specific to the asset or market conditions where the asset is located when assessment is made. These factors are specific to each community and may vary among communities. We perform a quarterly review for indicators of impairment. For the years ended December 31, 2014, 2013 and 2012 we recorded impairment charges of \$931,000, \$341.1 million and \$735,000, respectively. The impairment charge in 2013 was primarily related to the impairment of the Coyote Springs Property, which was an excluded asset per the Transaction Agreement.

Revenue Recognition

In accordance with ASC Topic 360, Property, Plant, and Equipment, revenues from home sales and other real estate sales are recorded and a profit is recognized when the respective units are delivered. Home sales and other real estate sales are delivered when all conditions of escrow are met, including delivery of the home or other real estate asset, title passage, appropriate consideration is received and collection of associated receivables, if any, is reasonably assured. Sales incentives are a reduction of revenues when the respective unit is delivered. When it is determined that the earnings process is not complete, the sale and the related profit are deferred for recognition in future periods. The profit we record is based on the calculation of cost of sales, which is dependent on our allocation of costs, as described in more detail above in the section entitled “Real Estate Inventories and Cost of Sales.”

Warranty Reserves

In the normal course of business, we incur warranty-related costs associated with homes that have been delivered to homebuyers. Estimated future direct warranty costs are accrued and charged to cost of sales in the period when the related homebuilding revenues are recognized while indirect warranty overhead salaries and related costs are charged to cost of sales in the period incurred. Amounts are accrued based upon our historical rates. We assess the adequacy of our warranty accrual on a quarterly basis and adjust the amounts as appropriate for current quantitative and qualitative factors. Factors that affect the warranty accruals include the number of homes delivered, historical and anticipated rates of warranty claims and cost per claim. Although we consider the warranty accruals reflected in our consolidated balance sheet to be adequate, actual future costs could differ significantly from our currently estimated amounts. Our warranty accrual is included in accrued expenses and other liabilities in the accompanying consolidated balance sheets.

Investments in Unconsolidated Entities

We have investments in unconsolidated entities over which we have significant influence that we account for using the equity method with taxes provided on undistributed earnings. We record earnings and accrue taxes in the period that the earnings are recorded by our affiliates. Under the equity method, our share of the unconsolidated entities' earnings or loss is included in equity in income (loss) of unconsolidated entities in the accompanying consolidated statement of operations. We evaluate our investments in unconsolidated entities for impairment when events and circumstances indicate that the carrying value of the investment may not be recoverable.

Variable Interest Entities

The Company accounts for variable interest entities in accordance with ASC Topic 810, Consolidation (“ASC 810”). Under ASC 810, a variable interest entity (“VIE”) is created when: (a) the equity investment at risk in the entity is not sufficient to permit the entity to finance its activities without additional subordinated financial support provided by other parties, including the equity holders; (b) the entity's equity holders as a group (i) lack the direct or indirect ability to make decisions about the entity, (ii) are not obligated to absorb expected losses of the entity or (iii) do not have the right to receive expected residual returns of the entity; or (c) the entity's equity holders have voting rights that are not proportionate to their economic interests, and the activities of the entity involve, or are conducted on behalf of, the equity holder with disproportionately few voting rights. If an entity is deemed to be a VIE pursuant to ASC 810, the enterprise that has both (a) the power to direct the activities of a VIE that most significantly impact the entity's economic performance and (b) the obligation to absorb the expected losses of the entity or right to receive benefits from the entity that could be potentially significant to the VIE is considered the primary beneficiary and must consolidate the VIE.

Under ASC 810, a non-refundable deposit paid to an entity is deemed to be a variable interest that will absorb some or all of the entity's expected losses if they occur. Our land purchase and lot option deposits generally represent our maximum exposure to the land seller if we elect not to purchase the optioned property. In some instances, we may also expend funds for due diligence, development and construction activities with respect to optioned land prior to takedown. Such costs are classified as inventories owned, which we would have to write off should we not exercise the option. Therefore, whenever we enter into a land option or purchase contract with an entity and make a non-refundable deposit, a VIE may have been created. In accordance with ASC 810, we perform ongoing reassessments of whether we are the primary beneficiary of a VIE.

Stock-Based Compensation

We account for share-based awards in accordance with ASC Topic 718, Compensation-Stock Compensation ("ASC 718"). ASC 718 requires that the cost resulting from all share-based payment transactions be recognized in the financial statements. ASC 718 requires all entities to apply a fair-value-based measurement method in accounting for share-based payment transactions with employees.

Sales and Marketing Expense

Sales and marketing costs incurred to sell real estate projects are capitalized if they are reasonably expected to be recovered from the sale of the project or from incidental operations and are incurred for tangible assets that are used directly through the selling period to aid in the sale of the project or services that have been performed to obtain regulatory approval of sales. All other selling expenses and other marketing costs are expensed in the period incurred.

Restructuring Charges

Restructuring charges are incurred related to the Merger in addition to general cost reduction initiatives. These charges are comprised of employee retention and severance-related expenses and lease termination costs. We account for restructuring charges in accordance with ASC Topic 420, Exit or Disposal Cost Obligations or ASC Topic 712 – Compensation – Nonretirement Postemployment Benefits.

Income Taxes

We account for income taxes in accordance with ASC Topic 740, Income Taxes (“ASC 740”). Deferred tax assets and liabilities are recorded based on future tax consequences of both temporary differences between the amounts reported for financial reporting purposes and the amounts deductible for income tax purposes, and are measured using enacted tax rates expected to apply in the years in which the temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in earnings in the period when the changes are enacted.

Each quarter we assess our deferred tax assets to determine whether all or any portion of the assets is more likely than not unrealizable under ASC 740. We are required to establish a valuation allowance for any portion of the asset we conclude is more likely than not to be unrealizable. Our assessment considers, among other things, the nature, frequency and severity of our current and cumulative losses, forecasts of our future taxable income, the duration of statutory carryforward periods and tax planning alternatives. Due to uncertainties inherent in the estimation process, it is possible that actual results may vary from estimates.

We classify any interest and penalties related to income taxes as part of income tax expense. As of December 31, 2014, the Company has liabilities for gross unrecognized tax benefits of \$14.9 million the majority of which were assumed in connection with the Merger.

Goodwill

In connection with the Merger, \$139.3 million of goodwill has been recorded as of December 31, 2014. We have completed the majority of our business combination accounting as of December 31, 2014 and expect to complete the remainder in the first quarter of 2015. In accordance with ASC Topic 350, Intangibles-Goodwill and Other (“ASC 350”), we will evaluate goodwill for possible impairment annually or more frequently if events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Based on our qualitative analysis, we have concluded as of December 31, 2014, our goodwill was not impaired.

Recently Issued Accounting Standards

In April 2014, the FASB issued amendments to Accounting Standards Update 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity. The update requires that a disposal representing a strategic shift that has (or will have) a major effect on an entity’s financial results or a business activity classified as held for sale should be reported as discontinued operations. The amendments also expand the disclosure requirements

for discontinued operations and add new disclosures for individually significant dispositions that do not qualify as discontinued operations. The amendments are effective prospectively for fiscal years, and interim reporting periods within those years, beginning after December 15, 2014 (early adoption is permitted only for disposals that have not been previously reported). The implementation of the amended guidance is not expected to have a material impact on our consolidated financial position or results of operations.

In May 2014, the FASB issued Accounting Standards Update 2014-09, Revenue from Contracts with Customers (“ASU 2014-09”). The core principle of ASU 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps: identify the contract(s) with a customer; identify the performance obligations in the contract; determine the transaction price; allocate the transaction price to the performance obligations in the contract; and recognize revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 supersedes the revenue-recognition requirements in ASC Topic 605, Revenue Recognition, most industry-specific guidance throughout the industry topics of the accounting standards codification, and some cost guidance related to construction-type and production-type contracts. ASU 2014-09 is effective for public entities for the annual periods ending after December 15, 2016, and for annual and interim periods thereafter. Early adoption is not permitted. Companies may use either a full retrospective or a modified retrospective approach to adopt ASU 2014-09. We are currently evaluating the approach for implementation and the potential impact of adopting this guidance on our consolidated financial statements.

In August 2014, the FASB issued Accounting Standards Update No. 2014-15 (“ASU 2014-15”), Presentation of Financial Statements — Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern, which requires management to evaluate, in connection with preparing financial statements for each annual and interim reporting period, whether there are conditions or events, considered in the aggregate, that raise substantial doubt about an entity’s ability to continue as a going concern within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are available to be issued when applicable) and provide related disclosures. ASU 2014-15 is effective for the annual period ending after December 15, 2016, and for annual and interim periods thereafter. Early adoption is permitted. We believe the adoption of this guidance will not have a material effect on our consolidated financial statements.

2. Merger with Weyerhaeuser Real Estate Company

In the Merger, TRI Pointe issued 129,700,000 shares of TRI Pointe common stock to the former holders of WRECO common shares, together with cash in lieu of any fractional shares. On the Closing Date, WRECO became a wholly-owned subsidiary of TRI Pointe. Immediately following the consummation of the Merger, the ownership of TRI Pointe common stock on a fully diluted basis was as follows: (i) the WRECO common shares held by former Weyerhaeuser shareholders were converted into the right to receive, in the aggregate, approximately 79.6% of the then outstanding TRI Pointe common stock, (ii) the TRI Pointe common stock outstanding immediately prior to the consummation of the Merger represented approximately 19.4% of the then outstanding TRI Pointe common stock, and (iii) the outstanding equity awards of WRECO and TRI Pointe employees represented the remaining 1.0% of the then outstanding TRI Pointe common stock. On the Closing Date, the former direct parent entity of WRECO paid TRI Pointe \$31.5 million in cash in accordance with the Transaction Agreement. Following the Merger, WRECO changed its name to TRI Pointe Holdings, Inc.

Assumption of Senior Notes

On the Closing Date, TRI Pointe assumed WRECO’s obligations as issuer of \$450 million aggregate principal amount of its 4.375% Senior Notes due 2019 (the “2019 Notes”) and \$450 million aggregate principal amount of its 5.875% Senior Notes due 2024 (the “2024 Notes” and together with the 2019 Notes, the “Senior Notes”). Additionally, WRECO and certain of its subsidiaries (collectively, the “Guarantors”) entered into supplemental indentures pursuant to which they guaranteed TRI Pointe’s obligations with respect to the Senior Notes. The Guarantors also entered into a joinder agreement to the Purchase Agreement, dated as of June 4, 2014, among WRECO, TRI Pointe, and the initial

purchasers of the Senior Notes (collectively, the “Initial Purchasers”), pursuant to which the Guarantors became parties to the Purchase Agreement. Additionally, TRI Pointe and the Guarantors entered into joinder agreements to the Registration Rights Agreements, dated as of June 13, 2014, among WRECO and the Initial Purchasers with respect to the Senior Notes, pursuant to which TRI Pointe and the Guarantors were joined as parties to the Registration Rights Agreements.

The net proceeds of \$861.3 million from the offering of the Senior Notes were deposited into two separate escrow accounts following the closing of the offering on June 13, 2014. Upon release of the escrowed funds on the Closing Date and prior to the consummation of the Merger, WRECO paid \$743.7 million in cash to its former direct parent, which cash was retained by Weyerhaeuser and its subsidiaries (other than WRECO and its subsidiaries). The payment consisted of the \$739.0 million Payment Amount (as defined in the Transaction Agreement) as well as \$4.7 million in payment of all unpaid interest on the debt payable to Weyerhaeuser that accrued from November 3, 2013 to the Closing Date. The remaining \$117.6 million of proceeds was retained by TRI Pointe.

Transaction Expenses

Advisory, financing, integration and other transaction costs directly related to the Merger, excluding the impact of restructuring costs and purchase accounting adjustments, totaled \$18.0 million for the year ended December 31, 2014. We do not expect to incur additional transaction-related costs in 2015.

Fair Value of Assets Acquired and Liabilities Assumed

The following table summarizes the calculation of the fair value of the total consideration transferred and the provisional amounts recognized as of the Closing Date (in thousands, except shares and closing stock price):

Calculation of consideration transferred	
TRI Pointe shares outstanding	31,632,533
TRI Pointe closing stock price on July 7, 2014	\$15.85
Consideration attributable to common stock	\$501,376
Consideration attributable to TRI Pointe	
equity awards	1,072
Total consideration transferred	\$502,448
Assets acquired and liabilities assumed	
Cash and cash equivalents	\$53,800
Accounts receivable	654
Real estate inventories	539,677
Intangible asset	17,300
Goodwill	139,304
Other assets	28,060
Total assets acquired	778,795
Accounts payable	26,105
Accrued expenses and other liabilities	23,114
Notes payable and other borrowings	227,128
Total liabilities assumed	276,347
Total net assets acquired	\$502,448

Cash and cash equivalents, accounts receivable, other assets, accounts payable, accrued payroll liabilities, and accrued expenses and other liabilities were generally stated at historical carrying values given the short-term nature of these assets and liabilities. Notes payable and other borrowings are stated at carrying value due to the limited amount of time since the notes payable and other borrowings were entered into prior to the Closing Date.

The Company determined the fair value of real estate inventories on a community-by-community basis primarily using a combination of market-comparable land transactions, land residual analysis and discounted cash flow models. The estimated fair value is significantly impacted by estimates related to expected average selling prices, sales pace, cancellation rates and construction and overhead costs. Such estimates must be made for each individual community and may vary significantly between communities.

The fair value of the acquired intangible asset was determined based on a valuation performed by an independent valuation specialist. The \$17.3 million intangible asset is related to the TRI Pointe trade name which is deemed to have an indefinite useful life.

Goodwill is primarily attributed to expected synergies from combining WRECO's and TRI Pointe's existing businesses, including, but not limited to, expected cost synergies from overhead savings resulting from streamlining certain redundant corporate functions, improved operating efficiencies, including provision of certain corporate level administrative and support functions at a lower cost than was historically allocated to WRECO for such services by its former direct parent, and growth of ancillary operations in various markets as permitted under applicable law, including a mortgage business, a title company and other ancillary operations. The Company also anticipates

opportunities for growth through expanded geographic and customer segment diversity and the ability to leverage additional brands. The acquired goodwill is not deductible for income tax purposes.

The Company has completed the majority of its business combination accounting as of December 31, 2014 and expects to complete the remainder in the first quarter of 2015. As of December 31, 2014, the Company had not completed its final review of the valuation of acquired inventory, investments in unconsolidated entities, income taxes and deferred income tax assets and liabilities, and certain other assets and liabilities. Final determinations of the values of assets acquired and liabilities assumed may result in adjustments to the values presented above and a corresponding adjustment to goodwill.

Supplemental Pro Forma Information (Unaudited)

The following represents unaudited pro forma operating results as if the acquisition had been completed as of January 1, 2013 (in thousands, except per share amounts):

	Year Ended December	
	31, 2014	2013
Total revenues	\$1,865,723	\$1,532,667
Net income (loss)	\$88,416	\$91,028
Earnings per share - basic	\$0.55	\$0.56
Earnings per share - diluted	\$0.55	\$0.56

The unaudited pro forma operating results have been determined after adjusting the operating results of TRI Pointe to reflect the purchase accounting and other acquisition adjustments including interest expense associated with the debt used to fund a portion of the Merger. The unaudited pro forma results do not reflect any cost savings, operating synergies or other enhancements that we may achieve as a result of the Merger or the costs necessary to integrate the operations to achieve these cost savings and synergies. Accordingly, the unaudited pro forma amounts are for comparative purposes only and may not necessarily reflect the results of operations had the Merger been completed at the beginning of the period or be indicative of the results we will achieve in the future.

3. Restructuring Charges

In connection with the Merger, the Company initiated a restructuring plan to reduce duplicate corporate and divisional overhead costs and expenses. In addition, WRECO previously recognized restructuring expenses related to general cost reduction initiatives. Restructuring costs were comprised of the following (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Employee-related costs	\$9,211	\$5,736	\$573
Lease termination costs	1,332	5,202	1,887
Total	\$10,543	\$10,938	\$2,460

Employee-related costs incurred during the year ended December 31, 2014 included employee retention and severance-related expenses of \$8.3 million and stock-based compensation expense of \$947,000 for employees terminated during the period. Employee retention and severance-related expenses were \$5.7 million and \$573,000 for the years ended December 31, 2013 and 2012, respectively. Lease termination costs of \$1.3 million, \$5.2 million and \$1.9 million during the years ended December 31, 2014, 2013 and 2012, respectively, relate to contract terminations as a result of general cost reduction initiatives.

Changes in employee-related restructuring reserves were as follows (in thousands):

Edgar Filing: TRI Pointe Homes, Inc. - Form 10-K

	Year Ended December 31,		
	2014	2013	2012
Accrued employee-related costs, beginning of period	\$4,336	\$28	\$104
Current year charges	8,264	5,736	573
Payments	(8,756)	(1,428)	(649)
Accrued employee-related costs, end of period	\$3,844	\$4,336	\$28

Changes in lease termination related restructuring reserves were as follows (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Accrued lease termination costs, beginning of period	\$3,506	\$2,335	\$3,674
Current year charges	1,332	5,202	1,887
Payments	(3,444)	(4,031)	(3,226)
Accrued lease termination costs, end of period	\$1,394	\$3,506	\$2,335

Employee and lease termination restructuring reserves are included in accrued expenses and other liabilities on our consolidated balance sheets.

4. Segment Information

Our operations consist of six homebuilding companies where we acquire and develop land and construct and sell single-family homes. In accordance with ASC Topic 280, Segment Reporting, in determining the most appropriate reportable segments, we considered similar economic and other characteristics, including product types, average selling prices, gross profits, production processes, suppliers, subcontractors, regulatory environments, land acquisition results, and underlying demand and supply. Based on our aggregation analysis, we have not exercised any aggregation of our operating segments, which are represented by the following six reportable segments: Maracay, consisting of operations in Arizona; Pardee, consisting of operations in California and Nevada; Quadrant, consisting of operations in Washington; Trendmaker, consisting of operations in Texas; TRI Pointe, consisting of operations in California and Colorado; and Winchester, consisting of operations in Maryland and Virginia.

Corporate is a non-operating segment that develops and implements company-wide strategic initiatives and provides support to our homebuilding reporting segments by centralizing certain administrative functions, such as marketing, legal, accounting, treasury, insurance and risk management, information technology and human resources, to benefit from economies of scale. Our Corporate non-operating segment also includes general and administrative expenses related to operating our corporate headquarters. A portion of the expenses incurred by Corporate is allocated to the homebuilding reporting segments.

The reportable segments follow the same accounting policies as our consolidated financial statements described in Note 1. Operational results of each reportable segment are not necessarily indicative of the results that would have been achieved had the reportable segment been an independent, stand-alone entity during the periods presented.

Total revenues and income from continuing operations before income taxes for each of our reportable segments were as follows (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Total revenues			
Maracay	\$ 150,689	\$ 145,822	\$ 103,222
Pardee	525,381	519,074	356,489
Quadrant	145,377	127,237	127,785
Trendmaker	281,270	260,566	298,396
TRI Pointe	324,208	—	—
Winchester	276,691	222,013	184,414
	\$ 1,703,616	\$ 1,274,712	\$ 1,070,306
Income (loss) from continuing operations before taxes			
Maracay	\$ 10,845	\$ 10,438	\$ 5,347
Pardee	74,898	(258,138)	87,691
Quadrant	9,028	1,504	(2,851)
Trendmaker	31,684	28,452	29,472
TRI Pointe	19,272	—	—
Winchester	24,612	24,561	18,537
Corporate ⁽¹⁾	(42,375)	(44,271)	(38,567)
	\$ 127,964	\$ (237,454)	\$ 99,629
Impairments and lot option abandonments			
Maracay	\$ 443	\$ 203	\$ 181
Pardee	306	343,661	133
Quadrant	1,059	1,146	2,575
Trendmaker	45	7	—
TRI Pointe	49	—	—
Winchester	613	431	702
Corporate	—	—	—
	\$ 2,515	\$ 345,448	\$ 3,591

⁽¹⁾Includes \$18.0 million of Merger related transaction costs and \$5.5 million of restructuring charges for the year ended December 31, 2014.

Total real estate inventories and total assets for each of our reportable segments, as of the date indicated, were as follows (in thousands):

	Year Ended December 31,	
	2014	2013
Real estate inventories		
Maracay	\$153,577	\$131,380
Pardee	924,362	875,618
Quadrant	153,493	113,088
Trendmaker	176,696	130,973
TRI Pointe	613,666	—
Winchester	258,389	214,467
	\$2,280,183	\$1,465,526
Total assets		
Maracay	\$170,932	\$138,552
Pardee	1,000,489	976,262
Quadrant	167,796	125,456
Trendmaker	195,829	134,628
TRI Pointe	764,001	—
Winchester	281,547	234,419
Corporate and Other	332,930	301,147
	\$2,913,524	\$1,910,464

5. Earnings Per Share

The following table sets forth the components used in the computation of basic and diluted earnings per share (in thousands, except share and per share amounts):

	Year Ended December 31,		
	2014	2013	2012
Numerator:			
Income from continuing operations	\$84,197	\$(151,293)	\$60,719
Discontinued operations, net of income taxes	—	1,838	762
Net income	\$84,197	\$(149,455)	\$61,481
Denominator:			
Basic weighted-average shares outstanding	145,044,351	129,700,000	129,700,000
Effect of dilutive shares:			
Stock options and unvested restricted stock units	486,938	—	—
Diluted weighted-average shares outstanding	145,531,289	129,700,000	129,700,000
Earnings per share			

Edgar Filing: TRI Pointe Homes, Inc. - Form 10-K

Basic			
Continuing operations	\$0.58	\$(1.17) \$0.47
Discontinued operations	—	0.02	—
Net earnings per share	\$0.58	\$(1.15) \$0.47
Diluted			
Continuing operations	\$0.58	\$(1.17) \$0.47
Discontinued operations	—	0.02	—
Net earnings per share	\$0.58	\$(1.15) \$0.47
Antidilutive stock options not included			
in diluted earnings per share	1,295,280	—	—

In the Merger, each issued and outstanding WRECO common share was converted into 1.297 shares of TRI Pointe common stock. The historical issued and outstanding WRECO common shares (100,000,000 common shares for all periods presented prior to the Merger) have been recast (as 129,700,000 common shares of the Company for all periods prior to the Merger) in all periods presented to reflect this conversion. See Note 2, Merger with Weyerhaeuser Real Estate Company, for further information on the Merger.

6. Receivables, Net

Receivables, net consisted of the following (in thousands):

	Year Ended December 31,	
	2014	2013
Accounts receivable, net	\$9,771	\$8,649
Warranty insurance receivable (Note 15)	10,047	12,489
Notes and contracts receivable	300	39,259
Total receivables	\$20,118	\$60,397

7. Real Estate Inventories

Real estate inventories consisted of the following (in thousands):

	December 31,	
	2014	2013
Real estate inventories owned:		
Homes completed or under construction	\$461,712	\$308,856
Land under development	1,391,303	760,731
Land held for future development	245,673	264,120
Model homes	103,270	53,351
Total real estate inventories owned	2,201,958	1,387,058
Real estate inventories not owned:		
Land purchase and land option deposits	44,155	38,788
Consolidated inventory held by VIEs	34,070	39,680
Total real estate inventories not owned	78,225	78,468
Total real estate inventories	\$2,280,183	\$1,465,526

Homes completed or under construction is comprised of costs associated with homes in various stages of construction and includes direct construction and related land acquisition and land development costs. Land under development primarily consists of land acquisition and land development costs, which include capitalized interest and real estate taxes, associated with land undergoing improvement activity. Land held for future development principally reflects land acquisition and land development costs related to land where development activity has not yet begun or has been

suspended, but is expected to occur in the future.

Real estate inventories not owned represents deposits related to land purchase and land option agreements as well as consolidated inventory held by a VIE. For further details, see Note 9, Variable Interest Entities.

- 87 -

Interest incurred, capitalized and expensed were as follows (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Interest incurred	\$41,706	\$22,674	\$27,038
Interest capitalized	(38,975)	(19,081)	(22,059)
Interest expensed	\$2,731	\$3,593	\$4,979
Capitalized interest in beginning inventory	\$138,233	\$155,823	\$164,056
Interest capitalized as a cost of inventory	38,975	19,081	22,059
Interest previously capitalized as a cost of inventory, included in cost of sales	(52,747)	(36,671)	(30,292)
Capitalized interest in ending inventory	\$124,461	\$138,233	\$155,823

Interest is capitalized to real estate inventory during development and other qualifying activities. Interest that is capitalized to real estate inventory is included in cost of home sales as related units are delivered. Interest that is expensed as incurred is included in other income (expense).

Real estate inventory impairments and land option abandonments

Real estate inventory impairments and land option abandonments consisted of the following (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Real estate inventory impairments	\$931	\$341,086	\$735
Land option abandonments and pre-acquisition costs	1,584	4,362	2,856
	\$2,515	\$345,448	\$3,591

Impairments of homebuilding assets and related charges relate primarily to projects or communities held for development. Within a community that is held for development, there may be individual homes or parcels of land that are currently held for sale. Impairment charges recognized as a result of adjusting individual held-for-sale assets within a community to estimated fair value less cost to sell are also included in the total impairment charges above.

In addition to owning land and residential lots, we also have option agreements to purchase land and lots at a future date. We have option deposits and capitalized pre-acquisition costs associated with the optioned land and lots. When the economics of a project no longer support acquisition of the land or lots under option, we may elect not to move forward with the acquisition. Option deposits and capitalized pre-acquisition costs associated with the assets under option may be forfeited at that time. Charges for such forfeitures are expensed to cost of sales.

The homebuilding impairment charge in 2013 is primarily related to the \$340.3 million impairment of the Coyote Springs Property in December 2013. Under the terms of the Transaction Agreement, certain assets and liabilities of WRECO and its subsidiaries were excluded from the transaction and retained by Weyerhaeuser, including assets and liabilities relating to the Coyote Springs Property described in Note 9.

8. Investments in Unconsolidated Entities

As of December 31, 2014, we held equity investments in six active real estate partnerships or limited liability companies. Our participation in these entities may be as a developer, a builder, or an investment partner. Our ownership percentage varies from 7% to 55%, depending on the investment, with no controlling interest held in any of these investments.

- 88 -

Investments Held

Our cumulative investment in entities accounted for on the equity method, including our share of earnings and losses, consisted of the following (in thousands):

	December 31,	
	2014	2013
Limited partnerships and limited liability company interests	\$ 13,710	\$ 18,454
General partnership interests	3,095	2,469
Total	\$ 16,805	\$ 20,923

Unconsolidated Financial Information

Aggregated assets, liabilities and operating results of the entities we account for as equity-method investments are provided below. Because our ownership interest in these entities varies, a direct relationship does not exist between the information presented below and the amounts that are reflected on our consolidated balance sheets as our investment in unconsolidated entities or on our consolidated statement of operations as equity in (loss) income of unconsolidated entities.

Assets and liabilities of unconsolidated entities (in thousands):

	December 31,	
	2014	2013
Assets		
Cash	\$ 17,154	\$ 10,459
Receivables	9,550	9,443
Real estate inventories	95,500	254,505
Other assets	620	535
Total assets	\$ 122,824	\$ 274,942
Liabilities and equity		
Accounts payable and other liabilities	\$ 10,914	\$ 76,248
Company's equity	16,805	20,923
Outside interests' equity	95,105	177,771
Total liabilities and equity	\$ 122,824	\$ 274,942

Results of operations from unconsolidated entities (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Net sales	\$ 606	\$ 6,271	\$ 15,855
Other operating income (expense)	(4,290)	(7,521)	(12,244)
Other income (expense)	(2)	(18)	(220)
Net income (loss)	\$ (3,686)	\$ (1,268)	\$ 3,391
Company's equity in (loss) income of unconsolidated entities	\$ (288)	\$ 2	\$ 2,490

9. Variable Interest Entities

In the ordinary course of business, we enter into land option agreements in order to procure land and residential lots for future development and the construction of homes. The use of such land option agreements generally allows us to reduce the risks associated with direct land ownership and development, and reduces our capital and financial commitments. Pursuant to these land option agreements, we generally provide a deposit to the seller as consideration for the right to purchase land at different times in the future, usually at predetermined prices. Such deposits are recorded as land purchase and land option deposits under real estate inventories not owned in the accompanying consolidated balance sheets.

- 89 -

We analyze each of our land option agreements and other similar contracts under the provisions of ASC 810 to determine whether the land seller is a VIE and, if so, whether we are the primary beneficiary. Although we do not have legal title to the underlying land, if we are determined to be the primary beneficiary of the VIE, we will consolidate the VIE in our financial statements and reflect its assets as real estate inventory not owned included in our real estate inventories, its liabilities as debt (nonrecourse) held by VIEs in accrued expenses and other liabilities and the net equity of the VIE owners as noncontrolling interests on our consolidated balance sheets. In determining whether we are the primary beneficiary, we consider, among other things, whether we have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance. Such activities would include, among other things, determining or limiting the scope or purpose of the VIE, selling or transferring property owned or controlled by the VIE, or arranging financing for the VIE.

Creditors of the entities with which we have land option agreements have no recourse against us. The maximum exposure to loss under our land option agreements is limited to non-refundable option deposits and any capitalized pre-acquisition costs. In some cases, we have also contracted to complete development work at a fixed cost on behalf of the land owner and budget shortfalls and savings will be borne by us.

The following provides a summary of our interests in land option agreements (in thousands):

	December 31, 2014			December 31, 2013		
	Deposits	Remaining Purchase Price	Consolidated Inventory Held by VIEs	Deposits	Remaining Purchase Price	Consolidated Inventory Held by VIEs
Consolidated VIEs	\$8,071	\$43,432	\$34,070	\$6,979	\$34,724	\$39,680
Unconsolidated VIEs	13,309	129,637	N/A	7,102	75,171	N/A
Other land option agreements	30,846	284,819	N/A	31,686	321,240	N/A
Total	\$52,226	\$457,888	\$34,070	\$45,767	\$431,135	\$39,680

Unconsolidated VIEs represent land option agreements that were not consolidated because we were not the primary beneficiary. Other land option agreements were not considered VIEs. Included in other land option agreements as of December 31, 2013, was a \$1.0 million deposit with a remaining purchase price of \$105.2 million related to a large master planned community north of Las Vegas, Nevada ("Coyote Springs") which was excluded from the Merger.

In addition to the deposits presented in the table above, our exposure to loss related to our land option contracts consisted of capitalized pre-acquisition costs of \$5.3 million and \$4.8 million as of December 31, 2014 and 2013, respectively. These pre-acquisition costs were included in real estate inventories as land under development on our consolidated balance sheets.

10. Goodwill and Other Intangible Assets

In connection with the Merger, \$139.3 million of goodwill has been recorded as of December 31, 2014. We have completed the majority of our business combination accounting as of December 31, 2014 and expect to complete the remainder in the first quarter of 2015. For further details on the goodwill recorded during the quarter, see Note 2, Merger with Weyerhaeuser Real Estate Company.

Edgar Filing: TRI Pointe Homes, Inc. - Form 10-K

We have two intangible assets recorded as of December 31, 2014, including an existing trade name from the acquisition of Maracay in 2006 which has a 20 year useful life and a new trade name, TRI Pointe, resulting from the Merger which has an indefinite useful life. For further details on the TRI Pointe trade name see Note 2, Merger with Weyerhaeuser Real Estate Company.

Goodwill and other intangible assets consisted of the following (in thousands):

	December 31, 2014			December 31, 2013		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Goodwill	\$ 139,304	\$ —	\$ 139,304	\$—	\$ —	\$ —
Trade names	27,979	(4,720)	23,259	10,679	(4,185)	6,494
	\$ 167,283	\$ (4,720)	\$ 162,563	\$ 10,679	\$ (4,185)	\$ 6,494

- 90 -

The remaining useful life of our amortizing intangible asset related to Maracay was 11.2 and 12.2 years as of December 31, 2014 and 2013, respectively. Amortization expense related to this intangible asset was \$534,000 for the year ended December 31, 2014 and 2013, respectively, and was charged to sales and marketing expense. Our indefinite life intangible asset related to TRI Pointe is not amortizing.

Expected amortization of our intangible asset related to Maracay for the next five years and thereafter is (in thousands):

	December 31, 2014
2015	\$ 534
2016	534
2017	534
2018	534
2019	534
Thereafter	3,289
Total	\$ 5,959

11. Other Assets

Other assets consisted of the following (in thousands):

	December 31,	
	2014	2013
Prepaid expenses	\$29,111	\$8,590
Refundable fees and other deposits	15,581	19,566
Development rights, held for future use or sale	7,409	9,090
Deferred loan costs on Senior Notes	23,686	—
Operating properties and equipment, net	11,719	17,386
Income tax receivable	10,713	—
Other	7,186	8,999
	\$105,405	\$63,631

12. Accrued Expenses and Other Liabilities

Accrued expenses and other liabilities consisted of the following (in thousands):

December 31,

Edgar Filing: TRI Pointe Homes, Inc. - Form 10-K

	2014	2013
Accrued payroll and related costs	\$24,717	\$48,232
Warranty reserves (Note 15)	33,270	24,449
Estimated cost for completion	54,437	53,160
Customer deposits	14,229	13,432
Debt (nonrecourse) held by VIEs (Note 9)	9,512	6,571
Income tax liability to Weyerhaeuser (Note 18)	15,659	16,577
Liability for uncertain tax positions (Note 17)	13,797	—
Accrued interest on Senior Notes and notes payable	3,059	—
Accrued insurance expense	9,180	—
Other	32,149	28,261
	\$210,009	\$190,682

13. Senior Notes and Notes Payable and Other Borrowings

Senior Notes

Senior notes consisted of the following (in thousands):

	December 31,	
	2014	2013
4.375% Senior Notes due June 15, 2019, net of discount	\$445,501	\$ —
5.875% Senior Notes due June 15, 2024, net of discount	442,001	—
	\$887,502	\$ —

As discussed in Note 2, Merger with Weyerhaeuser Real Estate Company, on the Closing Date, TRI Pointe assumed WRECO's obligations as issuer of the 2019 Notes and the 2024 Notes (collectively, the "Senior Notes"). The 2019 Notes were issued at 98.89% of their aggregate principal amount and the 2024 Notes were issued at 98.15% of their aggregate principal amount. The net proceeds of approximately \$861.3 million, after debt issuance costs and discounts, from the offering were deposited into two separate escrow accounts following the closing of the offering on June 13, 2014. Upon release of the escrowed funds on the Closing Date, and prior to the consummation of the Merger, WRECO paid approximately \$743.7 million in cash to the former direct parent entity of WRECO, which cash was retained by Weyerhaeuser and its subsidiaries (other than WRECO and its subsidiaries). The payment consisted of the \$739 million Payment Amount (as defined in the Transaction Agreement) as well as approximately \$4.7 million in payment of all unpaid interest on the debt payable to Weyerhaeuser that accrued from November 3, 2013 to the Closing Date. The remaining \$117.6 million of proceeds was retained by TRI Pointe and used for general corporate purposes.

The 2019 Notes and the 2024 Notes mature on June 15, 2019 and June 15, 2024, respectively. Interest is payable semiannually in arrears on June 15 and December 15. As of December 31, 2014, no principal has been paid on the Senior Notes, and there was \$23.7 million of capitalized debt financing costs, included in other assets on our consolidated balance sheet, related to the Senior Notes that will amortize over the lives of the Senior Notes. Accrued interest related to the Senior Notes was \$1.9 million as of December 31, 2014.

Notes Payable and Other Borrowings

Notes payable and other borrowings consisted of the following (in thousands):

	December 31,	
	2014	2013
Unsecured revolving Credit Facility	\$260,000	\$—
Seller financed loans	14,677	—
Debt payable to Weyerhaeuser	—	834,589
	\$274,677	\$834,589

Unsecured Revolving Credit Facility

In June 2014, the Company entered into an unsecured \$425 million revolving credit facility (the "Credit Facility") with various lenders, with one lender serving as the administrative agent for the Credit Facility. The Credit Facility matures on July 1, 2018, and contains a sublimit of \$75 million for letters of credit. The Company may borrow under the

Credit Facility in the ordinary course of business to fund its operations, including its land development and homebuilding activities. Borrowings under the Credit Facility will be governed by, among other things, a borrowing base. Interest rates on borrowings under the Credit Facility will be based on either a daily Eurocurrency base rate or a Eurocurrency rate, in either case, plus a spread ranging from 2.15% to 2.85%, depending on the Company's leverage ratio. As of December 31, 2014, the outstanding balance under the Credit Facility was \$260 million with an interest rate of 2.71% per annum and \$153.2 million of availability after considering the borrowing base provisions and outstanding letters of credit. Accrued interest related to the Credit Facility was \$620,000 as of December 31, 2014.

At December 31, 2014 we had outstanding letters of credit of \$11.8 million. These letters of credit were issued to secure various financial obligations. We believe it is not probable that any outstanding letters of credit will be drawn upon.

Seller Financed Loans

As of December 31, 2014, the Company had \$14.7 million outstanding related to seller financed loans to acquire lots for the construction of homes. Principal and interest payments on these loans are due at various maturity dates, including at the time individual homes associated with the acquired land are delivered. The seller financed loans accrue interest at a weighted average rate of 6.96% per annum, with interest calculated on a daily basis. Any remaining unpaid balance on these loans is due in May 2016. Accrued interest on these loans were \$517,000 as of December 31, 2014.

Debt Payable to Weyerhaeuser

WRECO had a revolving promissory note payable to Weyerhaeuser prior to the Closing Date on July 7, 2014. This note payable was settled at the close of the Merger. WRECO paid interest on the unpaid balance of the principal at a per annum rate of LIBOR plus 1.70%. Debt payable to Weyerhaeuser was \$834.6 million at December 31, 2013. See Note 18, Related Party Transactions, for further details.

Interest Incurred

During the years ended December 31, 2014 and 2013, the Company incurred interest of \$41.7 million and \$22.7 million, respectively, related to all notes payable, Senior Notes and debt payable to Weyerhaeuser outstanding during the period. Of the interest incurred, \$39.0 million and \$19.1 million was capitalized to inventory for the years ended December 31, 2014 and 2013, respectively. Included in interest incurred was amortization of deferred financing and Senior Note discount costs of \$2.4 million for the year ended December 31, 2014. Accrued interest related to all outstanding debt at December 31, 2014 was \$3.1 million. Accrued interest related to the debt payable with Weyerhaeuser was \$4.3 million as of December 31, 2013, and is recorded in accounts payable on the accompanying consolidated balance sheet.

Covenant Requirements

The Senior Notes contain covenants that restrict our ability to, among other things, create liens or other encumbrances, enter into sale and leaseback transactions, or merge or sell all or substantially all of our assets. These limitations are subject to a number of qualifications and exceptions.

Under the Credit Facility, the Company is required to comply with certain financial covenants, including but not limited to (i) a minimum consolidated tangible net worth; (ii) a maximum total leverage ratio; and (iii) a minimum interest coverage ratio.

The Company was in compliance with all applicable financial covenants as of December 31, 2014 and December 31, 2013.

14. Fair Value Disclosures Fair Value Measurements

ASC Topic 820, Fair Value Measurements and Disclosures, defines “fair value” as the price that would be received for selling an asset or paid to transfer a liability in an orderly transaction between market participants at measurement date

and requires assets and liabilities carried at fair value to be classified and disclosed in the following three categories:

- Level 1—Quoted prices for identical instruments in active markets
- Level 2—Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are inactive; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets at measurement date
- Level 3—Valuations derived from techniques where one or more significant inputs or significant value drivers are unobservable in active markets at measurement date

Fair Value of Financial Instruments

A summary of assets and liabilities at December 31, 2014 and 2013, related to our financial instruments, measured at fair value on a recurring basis, is set forth below (in thousands):

	Hierarchy	December 31, 2014		December 31, 2013	
		Book Value	Fair Value	Book Value	Fair Value
Receivables (a)	Level 3	\$20,118	\$20,118	\$60,397	\$60,390
Senior Notes (b)	Level 2	887,502	896,625		
Notes payable and other borrowings (c)	Level 3	274,677	274,677		

At December 31, 2014 and 2013, the carrying value of cash and cash equivalents approximated fair value.

- a. The estimated fair value of our receivables was based on the discounted value of the expected future cash flows using current rates for similar receivables. The book value of our receivables equaled the fair value as of December 31, 2014 due to the short-term nature of the remaining receivables.
- b. The estimated fair value of our Senior Notes at December 31, 2014 is based on quoted market prices.
- c. We believe that the carrying value of our notes payable and other borrowings approximates fair value.

Fair Value of Nonfinancial Assets

Nonfinancial assets include items such as real estate inventories and long-lived assets that are measured at fair value on a nonrecurring basis with events and circumstances indicating the carrying value is not recoverable. The following table presents impairment charges and the remaining net fair value for nonfinancial assets that were measured during the periods presented (in thousands):

	Hierarchy	Year Ended December 31, 2014		Year Ended December 31, 2013	
		Impairment Charge	Net of Impairment	Impairment Charge	Net of Impairment
Real estate inventories	Level 3	\$931	\$ 20,329	\$341,086	\$ 21,528

The homebuilding impairment charge as of December 31, 2013 was primarily related to the impairment of Coyote Springs in December 2013. Under the terms of the Transaction Agreement, certain assets and liabilities of WRECO and its subsidiaries were excluded from the transaction and retained by Weyerhaeuser, including assets and liabilities relating to the Coyote Springs Property. Consequently, WRECO recognized a \$340.3 million impairment charge in the fourth quarter of 2013 for the impairment of the Coyote Springs Property. In addition, WRECO wrote off \$3.0 million of option deposits and pre-acquisition costs related to the Coyote Springs Property.

15. Commitments and Contingencies

Legal Matters

Lawsuits, claims and proceedings have been and may be instituted or asserted against us in the normal course of business, including actions brought on behalf of various classes of claimants. We are also subject to local, state and federal laws and regulations related to land development activities, house construction standards, sales practices, employment practices and environmental protection. As a result, we are subject to periodic examinations or inquiry by agencies administering these laws and regulations.

We record a reserve for potential legal claims and regulatory matters when they are probable of occurring and a potential loss is reasonably estimable. We accrue for these matters based on facts and circumstances specific to each matter and revise these estimates when necessary.

In view of the inherent difficulty of predicting outcomes of legal claims and related contingencies, we generally cannot predict their ultimate resolution, related timing or eventual loss. If our evaluations indicate loss contingencies that could be material are not probable, but are reasonably possible, we will disclose their nature with an estimate of a possible range of losses or a statement that such loss is not reasonably estimable.

Warranty

Warranty reserves are accrued as home deliveries occur. Our warranty reserves on homes delivered will vary based on product type and geographic area and also depending on state and local laws. The warranty reserve is included in accrued expenses and other liabilities on our consolidated balance sheets and represents expected future costs based on our historical experience over previous years. Estimated warranty costs are charged to cost of home sales in the period in which the related home sales revenue is recognized.

We maintain general liability insurance designed to protect us against a portion of our risk of loss from construction-related claims. We also generally require our subcontractors and design professionals to indemnify us for liabilities arising from their work, subject to various limitations. However, such indemnity is significantly limited with respect to certain subcontractors that are added to our general liability insurance policy. Included in our warranty reserve accrual are allowances to cover our estimated costs of self-insured retentions and deductible amounts under these policies and estimated costs for claims that may not be covered by applicable insurance or indemnities. Estimation of these accruals include consideration of our claims history, including current claims and estimates of claims incurred but not yet reported. In addition, we record expected recoveries from insurance carriers when proceeds are probable and estimable. Outstanding warranty insurance receivables were \$10.0 million and \$12.5 million as of December 31, 2014 and December 31, 2013, respectively. Warranty insurance receivables are recorded in receivables on the accompanying consolidated balance sheet.

There can be no assurance that the terms and limitations of the limited warranty will be effective against claims made by homebuyers, that we will be able to renew our insurance coverage or renew it at reasonable rates, that we will not be liable for damages, cost of repairs, and/or the expense of litigation surrounding possible construction defects, soil subsidence or building related claims or that claims will not arise out of uninsurable events or circumstances not covered by insurance and not subject to effective indemnification agreements with certain subcontractors.

Warranty reserves consisted of the following (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Warranty reserves, beginning of period	\$24,449	\$24,485	\$26,404
Warranty reserves accrued	11,659	8,102	5,423
Liabilities assumed in the Merger	7,481	—	—
Adjustments to pre-existing reserves	199	1,933	2,650
Warranty expenditures	(10,518)	(10,071)	(9,992)
Warranty reserves, end of period	\$33,270	\$24,449	\$24,485

Performance Bonds

We obtain surety bonds in the normal course of business with various municipalities and other government agencies to secure completion of certain infrastructure improvements of our projects. As of December 31, 2014 and December 31, 2013, the Company had outstanding surety bonds totaling \$355.2 million and \$280.6 million, respectively. If any such performance bonds or letters of credit are called, we would be obligated to reimburse the issuer of the performance bond or letter of credit. We do not believe that a material amount of any currently outstanding performance bonds or letters of credit will be called. Performance bonds do not have stated expiration dates. Rather, we are released from the performance bonds as the underlying performance is completed.

Operating Leases

Office Space, Buildings and Equipment

We lease certain property and equipment under non-cancelable operating leases. Office leases are for terms up to nine years and generally provide renewal options for terms up to an additional five years. In most cases, we expect that, in the normal course of business, leases that expire will be renewed or replaced by other leases. Equipment leases are typically for terms of three to four years. The future minimum rental payments under operating leases, which primarily consist of office leases having initial or remaining noncancelable lease terms in excess of one year, are as follows (in thousands):

2015	\$7,255
2016	7,094
2017	5,985
2018	4,075
2019	3,870
Thereafter	8,400
	\$36,679

For the years ended December 31, 2014, 2013 and 2012, rental expense was \$4.9 million, \$5.1 million and \$5.4 million, respectively.

Our minimum sublease rental income due to us in future periods under noncancellable sublease arrangements for office space and other buildings and equipment for the next five years and thereafter are as follows (in thousands):

2015	\$624
2016	711
2017	535
2018	—
2019	—
Thereafter	—
	\$1,870

Model Homes

As part of our model home activities, we sell selected model homes to third parties at fair value and lease them back at market lease payments for periods approximating six months to three years. For the years ended December 31, 2014, 2013 and 2012, rental expense was \$0.6 million, \$0.7 million and \$0.9 million, respectively. As of December 31, 2014 our only model home commitments were \$205,000 payable in 2015.

Ground Leases

In 1987, we obtained two 55-year ground leases of commercial property that provided for three renewal options of ten years each and one 45-year renewal option. We exercised the three 10-year extensions on one of these ground leases extending the lease through 2071. The commercial buildings on these properties have been sold and the ground leases have been sublet to the buyers.

- 96 -

For one of these leases, we are responsible for making lease payments to the land owner, and we collect sublease payments from the buyers of the buildings. Our lease commitments under this ground lease, which extends through 2071, were (in thousands):

2015	\$2,224
2016	2,224
2017	2,224
2018	2,224
2019	2,224
Thereafter	79,148
	\$90,268

This ground lease has been subleased through 2041 to the buyers of the commercial buildings. Our lease commitments through 2041 total \$60.1 million as of December 31, 2014, and are fully offset by sublease receipts under the noncancellable subleases.

For the second lease, the buyers of the buildings are responsible for making lease payments directly to the land owner. However, we have guaranteed the performance of the buyers/lessees. As of December 31, 2014, guaranteed future payments on the lease, which expires in 2041, were \$11.4 million.

Purchase Obligations

In the ordinary course of business, we enter into land option contracts in order to procure lots for the construction of our homes. We are subject to customary obligations associated with entering into contracts for the purchase of land and improved lots. These purchase contracts typically require a cash deposit and the purchase of properties under these contracts is generally contingent upon satisfaction of certain requirements by the sellers, including obtaining applicable property and development entitlements. We also utilize option contracts with land sellers as a method of acquiring land in staged takedowns, to help us manage the financial and market risk associated with land holdings, and to reduce the use of funds from our corporate financing sources. Option contracts generally require a non-refundable deposit for the right to acquire lots over a specified period of time at pre-determined prices. We generally have the right at our discretion to terminate our obligations under both purchase contracts and option contracts by forfeiting our cash deposit with no further financial responsibility to the land seller. As of December 31, 2014, we had \$52.2 million of non-refundable cash deposits pertaining to land option contracts and purchase contracts with an aggregate remaining purchase price of approximately \$457.9 million (net of deposits).

Our utilization of land option contracts is dependent on, among other things, the availability of land sellers willing to enter into option takedown arrangements, the availability of capital to financial intermediaries to finance the development of optioned lots, general housing market conditions, and local market dynamics. Options may be more difficult to procure from land sellers in strong housing markets and are more prevalent in certain geographic regions.

16. Stock-Based Compensation 2013 Long-Term Incentive Plan

The Company's stock compensation plan, the 2013 Long-Term Incentive Plan (the "2013 Incentive Plan"), was adopted by legacy TRI Pointe in January 2013 and amended with the approval of our stockholders in 2014. The 2013 Incentive Plan provides for the grant of equity-based awards, including options to purchase shares of common stock, stock appreciation rights, common stock, restricted stock, restricted stock units and performance awards. The 2013 Incentive Plan will automatically expire on the tenth anniversary of its effective date. Our board of directors may terminate or amend the 2013 Incentive Plan at any time, subject to any requirement of stockholder approval required by applicable law, rule or regulation.

As amended, the number of shares of our common stock that may be issued under the 2013 Incentive Plan is 11,727,833 shares. To the extent that shares of our common stock subject to an outstanding option, stock appreciation right, stock award or performance award granted under the 2013 Incentive Plan are not issued or delivered by reason of the expiration, termination, cancellation or forfeiture of such award or the settlement of such award in cash, then such shares of our common stock generally shall again be available under the 2013 Incentive Plan. As of December 31, 2014 there were 10,886,069 shares available for future grant under the 2013 Incentive Plan.

Converted Awards

Under the Transaction Agreement, each outstanding Weyerhaeuser equity award held by an employee of WRECO was converted into a similar equity award with TRI Pointe, based on the final exchange ratio of 2.1107 (the “Exchange Ratio”), rounded down to the nearest whole number of shares of common stock. The Company filed a registration statement on Form S-8 (Registration No. 333-197461) on July 16, 2014 to register 4,105,953 shares related to these equity awards. The converted awards have the same terms and conditions as the Weyerhaeuser equity awards except that all performance share units were surrendered in exchange for time-vesting restricted stock units without any performance-based vesting conditions or requirements and the exercise price of each converted stock option is equal to the original exercise price divided by the Exchange Ratio. There will be no future grants under the WRECO equity incentive plans. Refer to TRI Pointe’s Registration Statement on Form S-4, as amended (Registration No. 333-193248), for additional information on the Merger, the option exchange ratio and the treatment of equity awards under the Transaction Agreement.

The following table presents compensation expense recognized related to all stock-based awards (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Total stock-based compensation	\$7,679	\$5,002	\$3,854

As of December 31, 2014, total unrecognized stock-based compensation related to all stock-based awards was \$10.9 million and the weighted average term over which the expense was expected to be recognized was 2.24 years.

Summary of Stock Option Activity

The following table presents a summary of stock option awards for the year ended December 31, 2014:

	2014	Weighted Average Exercise Price Per Share	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value (in 000's)
Options outstanding at December 31, 2013 (1)	285,900	\$ 17.04	9.1	\$ 827
Granted	154,598	16.17	9.3	—
Assumed in the Merger	3,379,275	12.62	5.9	8,885
Exercised	(15,229)	11.34		
Forfeited	(481,995)	13.24		
Options outstanding at December 31, 2014	3,322,549	13.08	6.0	7,841
Options exercisable at December 31, 2014	1,813,003	12.27	4.0	5,573

⁽¹⁾Options outstanding at December 31, 2013 reflect outstanding options for the legal acquirer, TRI Pointe.

As discussed above, on July 7, 2014, the Company assumed an aggregate of 3,379,275 stock options, along with 726,678 restricted stock units discussed below, as a result of the Merger. The stock option awards assumed generally vest ratably over four years of continuous service and have a 10-year contractual term. Award provisions for awards granted in 2014, 2013, 2012 and 2011 at WRECO require an accelerated vesting schedule in the event of retirement

eligibility or involuntary termination and will generally vest upon retirement for employees who retire at age 62 or older, but stop vesting for other voluntary terminations, including early retirement prior to age 62. The share-based compensation expense for individuals meeting the retirement eligibility requirements is recognized over a required service period that is less than the stated four-year vesting period.

Under ASC 805, for share-based payment awards held by employees of the accounting acquirer (WRECO), the legal exchange of the accounting acquirer awards for the legal acquirer (TRI Pointe) awards is considered, from an accounting perspective, to be a modification of the accounting acquirer's outstanding awards. The modification was accounted for pursuant to ASC 718. The modification resulted in incremental stock-based compensation for the year ended December 31, 2014, of \$722,000.

The fair value of stock option awards assumed in the Merger was determined by using an option-based model with the following assumptions:

	2014	2013	2012	2011
	Grants	Grants	Grants	Grants
Dividend yield	2.92 %	2.23 %	2.94 %	2.48 %
Expected volatility	31.71 %	38.00 %	40.41 %	38.56 %
Risk-free interest rate	1.57 %	0.92 %	1.01 %	2.65 %
Expected life (in years)	4.97	4.97	5.33	5.73

Expected volatility assumptions for all stock options are based on the historical volatility of similar companies' stock prices from a trailing period equal to the expected life of the stock option and ending on the date of grant or date assumed. Historical data from TRI Pointe were used to estimate option exercise and employee terminations within the valuation model of all stock options and the risk-free rate for all stock options is based on the United States Treasury yield curve over a period matching the expected term of each option.

Summary of Restricted Stock Unit Activity

The following table presents a summary of restricted stock units ("RSUs") for the year ended December 31, 2014:

	2014	Weighted Average Grant Date Fair Value Per Share	Aggregate Intrinsic Value (in 000's)
Nonvested RSUs at December 31, 2013 ⁽¹⁾	145,517	\$ 17.68	\$ 2,900
Granted	274,287	15.33	4,183
Assumed in the Merger	726,678	15.74	11,082
Vested	(59,326)	15.85	
Forfeited	(204,447)	15.74	
Nonvested RSUs at December 31, 2014	882,709	15.62	13,461

⁽¹⁾ Nonvested RSUs at December 31, 2013 reflect nonvested RSUs for the legal acquirer, TRI Pointe.

As discussed above, on July 7, 2014, the Company assumed an aggregate of 726,678 restricted stock units, along with 3,379,275 stock options, as a result of the Merger. Restricted stock units assumed in the Merger generally vest ratably over four years of continuous service. Award provisions require an accelerated vesting schedule in the event of retirement eligibility or involuntary termination. The share-based compensation expense for individuals meeting the retirement eligibility requirements is recognized over a required service period that is less than the stated four-year

vesting period. There was no incremental expense resulting from the modification of the RSU awards on July 7, 2014 because the fair value before and after the modification was the same.

On April 7, 2014, the Company granted an aggregate of 217,839 restricted stock units to employees, officers and directors. The restricted stock units granted to employees and officers on April 7, 2014 ratably vest annually on the anniversary of the grant date over a three year period. The restricted stock units granted to directors on April 7, 2014 vest on January 31, 2015, except the restricted stock units granted to directors who left the board upon the closing of the Merger vested on the date they left the board based on the number of days served in 2014. The fair value of each restricted stock award granted on April 7, 2014 was measured using a price of \$16.17 per share, which was the closing stock price on the date of grant. Each award will be expensed on a straight-line basis over the vesting period.

On August 5, 2014, the Company granted an aggregate of 56,448 restricted stock units to members of its board of directors. The restricted stock units granted to directors on August 5, 2014 vest in their entirety on May 1, 2015. The fair value of each restricted stock award granted on August 5, 2014 was measured using \$13.34 per share, which was the closing stock price on the date of grant. Each award will be expensed on a straight-line basis over the vesting period.

As restricted stock units vest, a portion of the shares awarded is generally withheld to cover employee taxes. As a result, the number of restricted stock units vested and the number of shares of TRI Pointe common stock issued will differ.

17. Income Taxes

The provision (benefit) for income tax attributable to income (loss) from continuing operations before income taxes consisted of (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Current:			
Federal	\$(109,565)	\$21,773	\$1,457
State	5,339	1,646	122
Total current taxes	(104,226)	23,419	1,579
Deferred:			
Federal	147,797	(107,651)	33,446
State	196	(1,929)	3,885
Total deferred taxes	147,993	(109,580)	37,331
Total income tax expense (benefit)	\$43,767	\$(86,161)	\$38,910

The Company's provision (benefit) for income taxes was different from the amount computed by applying the statutory federal income tax rate of 35% to the underlying income before income taxes as a result of the following (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Taxes at the U.S. federal statutory rate	\$44,788	\$(83,109)	\$34,870
State income taxes, net of federal tax impact	3,822	(859)	3,964
Tax loss on the sale of WRI	(5,786)	—	—
Non deductible transaction costs	2,594	—	—
Other, net	(1,651)	(2,193)	76
Total income tax expense (benefit)	\$43,767	\$(86,161)	\$38,910
Effective income tax rate	34.2 %	36.3 %	39.1 %

Excluded from the calculation of our effective income tax rate for 2012 is a \$400,000 benefit for the 2012 Energy Efficiency Credit that was not extended retroactively in law until the American Taxpayer Relief Act of 2012 was enacted in January 2013.

Deferred taxes consisted of the following at December 31, 2014 and 2013 (in thousands):

	Year Ended December 31,	
	2014	2013
Deferred tax assets:		
Impairment and other valuation reserves	\$ 110,816	\$ 230,430
Incentive compensation	2,646	15,892
Indirect costs capitalized	27,202	17,068
Net operating loss carryforwards (state)	29,975	34,000
Transaction costs	2,610	—
State taxes	1,368	—
Other costs and expenses	17,230	21,970
Gross deferred tax assets	191,847	319,360
Valuation allowance	(6,233)	(8,300)
Deferred tax assets, net of valuation allowance	185,614	311,060
Deferred tax liabilities:		
Interest capitalized	(2,590)	(3,040)
Basis difference in inventory	(14,029)	(14,007)
Fixed assets	(555)	—
Intangibles	(8,944)	(2,463)
Other	(1,675)	(2,567)
Deferred tax liabilities	(27,793)	(22,077)
Net deferred tax assets	\$ 157,821	\$ 288,983

In connection with the Merger, the Company acquired \$16.8 million of net deferred tax assets and assumed \$15.5 million of liabilities for uncertain tax positions.

The Company accounts for income taxes in accordance with ASC 740, which requires an asset and liability approach for measuring deferred taxes based on temporary differences between the financial statements and tax bases of assets and liabilities using enacted tax rates for the years in which taxes are expected to be paid or recovered. Each quarter we assess our deferred tax asset to determine whether all or any portion of the asset is more likely than not unrealizable under ASC 740. We are required to establish a valuation allowance for any portion of the asset we conclude is more likely than not to be unrealizable. Our assessment considers, among other things, the nature, frequency and severity of our current and cumulative losses, forecasts of our future taxable income, the duration of statutory carryforward periods and tax planning alternatives.

As of December 31, 2014, the Company had state net operating loss carryforward of \$679.4 million, which will expire between 2015 and 2034. We had a valuation allowance related to deferred tax assets of \$6.2 million and \$8.3 million as of December 31, 2014 and December 31, 2013, respectively, related to certain state net operating loss carryforwards as the tax benefits from those state losses are not more likely than not to be realized. The decrease in the valuation allowance in 2014 is principally due to the expiration of state net operating loss carryovers on which a full valuation allowance was previously recorded.

The Company will continue to evaluate both positive and negative evidence in determining the need for a valuation allowance against its deferred tax assets. Changes in positive and negative evidence, including differences between the Company's future operating results and the estimates utilized in the determination of the valuation allowance, could result in changes in the Company's estimate of the valuation allowance against its deferred tax assets. The accounting for deferred taxes is based upon estimates of future results. Differences between the anticipated and actual outcomes

of these future results could have a material impact on the Company's consolidated results of operations or financial position. Also, changes in existing federal and state tax laws and tax rates could affect future tax results and the valuation allowance against the Company's deferred tax assets.

Unrecognized tax benefits represent potential future obligations to taxing authorities if uncertain tax positions we have taken on previously filed tax returns are not sustained. These amounts represent the gross amount of exposure in individual jurisdictions and do not reflect any additional benefits expected to be realized if such positions were not sustained, such as federal deduction that could be realized if an unrecognized state deduction was not sustained.

The Company files income tax returns in the U.S., including federal and multiple state and local jurisdictions. The Company's tax years 2010-2014 will remain open to examination by the federal and state authorities for three and four years, respectively, from the date of utilization of any net operating loss or credit carryforwards.

WRECO was part of the consolidated federal group of Weyerhaeuser NR Company, the Former Parent, through the tax period ended July 7, 2014. During 2013, the IRS completed the examination of the consolidated federal income tax returns for the taxable years 2008-2010. During April 2014, Weyerhaeuser NR Company's 2012 consolidated federal income tax return was opened for examination. At this point, no adjustments are expected. In connection with the Merger, the Former Parent retained the obligation for uncertain tax positions arising through July 7, 2014. As a result, there is no liability for WRECO's uncertain tax positions at July 7, 2014. No new uncertain tax positions were identified with respect to WRECO at December 31, 2014. Under the Tax Sharing Agreement, any additional tax liabilities that may arise as a result of the tax examinations of the pre-Merger periods are reimbursed by the Former Parent.

The following table summarizes the activity related to the Company's gross unrecognized tax benefits (in thousands):

	Year Ended December 31,	
	2014	2013
Balance at beginning of year	\$—	\$ —
Increase due to Merger	16,716	—
Increases (Decreases) related to current year tax positions	(1,859)	—
Balance at end of year	\$14,857	\$ —

The amount of unrecognized tax benefit that, if recognized and realized, would affect the effective tax rate is none as of December 31, 2014. Management believes it is reasonably possible that the total amount of unrecognized tax benefits will decrease within the next 12 months.

The Company classifies interest and penalties related to income taxes as part of income tax expense. Accrued interest and penalties are included within the related liabilities in the balance sheet. The Company has recorded \$48,000 of unpaid interest as a result of uncertain tax positions as of December 31, 2014.

Prior to the Merger, WRECO was included in the Weyerhaeuser NR Company consolidated federal income tax return and certain state income tax filings. Income taxes were allocated using the pro rata method, which means our tax provisions and resulting income tax receivable from or payable to Weyerhaeuser NR Company represent the income tax amounts allocated to us on pro rata share method based upon our actual results. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between financial statement carrying amounts of assets and liabilities and their respective tax bases and for operating loss and tax credit carryforwards which exist for Weyerhaeuser NR Company and are attributable to our operations.

If we were to calculate income taxes using the separate return method, the effect on pro forma unaudited income from continuing operations and pro forma unaudited earnings per share would be as follows (in thousands, except per share amounts):

	Year Ended December 31,		
	2014	2013	2012
Income (loss) from continuing operations before taxes as reported in the accompanying financial statements	\$127,964	\$(237,454)	\$99,629

Edgar Filing: TRI Pointe Homes, Inc. - Form 10-K

(Provision) benefit for income taxes assuming computation on a separate return basis	(49,553)	86,161	(38,910)
Pro forma income (loss) from continuing operations	\$78,411	\$(151,293)	\$60,719

Pro forma earnings per share - basic	\$0.54	\$(1.17)	\$0.47
Pro forma earnings per share - diluted	\$0.54	\$(1.17)	\$0.47

Assuming computation on a separate return basis, our income tax provision would have increased by \$5.8 million for the year ended December 31, 2014 related to the tax loss on the sale of Weyerhaeuser Realty Investors, Inc. to Weyerhaeuser NR Company that would not have provided a benefit to our income tax provision assuming computation on a separate return basis. There would be no change to our income tax provision for the years ended December 31, 2013 and 2012.

Refer to Note 18, Related Party Transactions, for a description of the tax sharing agreement between TRI Pointe and Weyerhaeuser.

18. Related Party Transactions

Prior to the Merger, WRECO was a wholly-owned subsidiary of Weyerhaeuser. Weyerhaeuser provided certain services including payroll processing and related employee benefits, other corporate services such as corporate governance, cash management and other treasury services, administrative services such as government relations, tax, internal audit, legal, accounting, human resources and equity-based compensation plan administration, lease of office space, aviation services and insurance coverage. WRECO was allocated a portion of Weyerhaeuser corporate general and administrative costs on either a proportional cost or usage basis.

Weyerhaeuser-allocated corporate general and administrative expenses were as follows (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Weyerhaeuser-allocated costs	\$10,735	\$22,884	\$20,547

These expenses may not be indicative of the actual level of expense WRECO would have incurred if it had operated as an independent company or of expenses expected to be incurred in the future after the Closing Date.

During the year ended December 31, 2014 and prior to the Merger, WRECO sold \$4.8 million of mineral rights and \$21.2 million of land to Weyerhaeuser.

As of December 31, 2013, there were balances owed to Weyerhaeuser including accounts payable to Weyerhaeuser of \$18.9 million, which is recorded in accounts payable on the accompanying consolidated balance sheet, \$16.6 million of income tax liability to Weyerhaeuser, which is recorded in accrued expenses and other liabilities on the accompanying balance sheet and \$834.6 million of debt payable to Weyerhaeuser, which is recorded on the face of the accompanying balance sheet. All amounts owed to Weyerhaeuser were settled on the Closing Date in connection with the Merger.

TRI Pointe has certain liabilities with Weyerhaeuser related to a tax sharing agreement executed in connection with the Merger. The liabilities under the tax sharing agreement relate to a portion of the California net operating loss generated prior to the Merger that are expected to be realized after July 7, 2014; federal tax credits generated prior to the Merger that are expected to be realized after July 7, 2014; and deductions for stock option awards granted through December 31, 2013 that are expected to be realized after July 7, 2014. As of December 31, 2014, we had an income tax liability to Weyerhaeuser of \$15.7 million which is recorded in accrued expenses and other liabilities on the accompanying balance sheet.

19. Discontinued Operations

On October 31, 2013, a wholly-owned subsidiary of WRECO, Weyerhaeuser Realty Investors, Inc., (“WRI”), was sold to Weyerhaeuser NR Company. The results of operations for WRI have been recorded as discontinued operations in the accompanying consolidated financial statements. Cash flows of WRI through the date of the sale to Weyerhaeuser remain fully consolidated in the accompanying consolidated statement of cash flow for the year ended December 31, 2013.

Earnings of discontinued operations is as follows (in thousands):

	Year Ended December 31,	
	2013	2012
Earnings before income taxes	\$—\$602	\$487
Gain on sale of discontinued operations	— 1,946	-
(Provision) benefit for income taxes	— (710)	275
Discontinued operations, net of income taxes	\$—\$1,838	\$762

On October 31, 2013, Weyerhaeuser NR Company acquired WRI for \$3.6 million. The purchase price was recorded as a reduction in the debt payable to Weyerhaeuser. The transaction resulted in a net gain of approximately \$1.9 million, which was recognized in the fourth quarter of 2013.

20. Supplemental Disclosure to Consolidated Statements of Cash Flow

The following are supplemental disclosures to the consolidated statements of cash flows (in thousands):

	Year Ended December 31,		
	2014	2013	2012
Supplemental disclosure of cash flow information:			
Cash paid (received) during the period for:			
Interest	\$42,969	\$18,811	\$26,763
Income taxes	\$43,005	\$(10,521)	\$(20,744)
Supplemental disclosures of noncash activities:			
Increase in real estate inventory due to distribution of land from an unconsolidated joint venture			
	\$5,052	\$—	\$—
Distribution to Weyerhaeuser of excluded assets and liabilities			
	\$126,687	\$—	\$—
Amounts owed to Weyerhaeuser related to the tax sharing agreement			
	\$15,688	\$—	\$—
Noncash settlement of debt payable to Weyerhaeuser			
	\$70,082	\$—	\$—
Amortization of senior note discount			
	\$804	\$—	\$—
Effect of net consolidation and de-consolidation of variable interest entities:			
Increase (decrease) in consolidated real estate inventory not owned			
	\$6,343	\$(7,411)	\$39,057
Increase (decrease) in deposits on real estate under option or contract and other assets			
	\$780	\$3,005	\$(4,511)
Increase in debt held by variable interest entities			
	\$—	\$—	\$7,293
(Increase) decrease in noncontrolling interests			
	\$(7,123)	\$4,406	\$(41,839)
Merger:			
Fair value of assets, excluding cash acquired			
	\$724,995	\$—	\$—
Liabilities assumed			
	\$276,347	\$—	\$—

21. Results of Quarterly Operations (Unaudited)

The following table presents our unaudited quarterly financial data. As discussed in Note 1, the Merger was treated as a reverse acquisition and WRECO is considered the accounting acquirer. Accordingly, WRECO is reflected as the predecessor and acquirer and therefore consolidated financial statements included in this Annual Report on Form 10-K reflect historical consolidated financial statements of WRECO for all periods presented, and do not include the historical financial statements of legacy TRI Pointe prior to the Closing Date. As a result, quarterly financial data presented in the following table for periods prior to the third quarter of 2014 will differ from amounts previously reported on the Form 10-Q from the same periods.

Edgar Filing: TRI Pointe Homes, Inc. - Form 10-K

In our opinion, this information has been prepared on a basis consistent with that of our audited consolidated financial statements and all necessary material adjustments, consisting of normal recurring accruals and adjustments, have been included to present fairly the unaudited quarterly financial data. Our quarterly results of operations for these periods are not necessarily indicative of future results of operations (in thousands, except per share amounts):

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2014				
Total revenues	\$248,132	\$342,563	\$477,920	\$635,001
Cost of homes sales and other	195,595	267,937	387,721	506,101
Impairments and lot option abandonments	468	104	552	1,391
Gross margin	\$52,069	\$74,522	\$89,647	\$127,509
Income (loss) from continuing operations	\$7,581	\$24,225	\$10,965	\$41,426
Discontinued operations, net of income taxes	—	—	—	—
Net income	\$7,581	\$24,225	\$10,965	\$41,426
Earnings (loss) per share
