**Fund Distributions and Managed Distribution Plan:** Your Fund has been paying a regular 6.5 cent per share monthly distribution on its common stock since July 1997. In February 2008, the Board of Directors adopted a Managed Distribution Plan, which provides for the Fund to continue to make a monthly distribution on its common stock of 6.5 cents per share. Under the Managed Distribution Plan, the Fund will distribute all available investment income to shareholders, consistent with the Fund's primary investment objective. If and when sufficient investment income is not available on a monthly basis, the Fund will distribute long-term capital gains and/or return capital to its shareholders in order to maintain the 6.5 cent per share distribution level.

To the extent that the Fund uses capital gains and/or returns of capital to supplement its investment income, you should not draw any conclusions about the Fund's investment performance from the amount of the Fund's distributions or from the terms of the Fund's Managed Distribution Plan.

The Fund estimates that it has not distributed more than its income and capital gains in the current year to date; however, a portion of your distribution for the full year may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with yield or income.

The amounts and sources of distributions reported in monthly statements from the Fund are only estimates and are not provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund's investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. In early 2011, the Fund will send you a Form 1099-DIV for the calendar year 2010 that will tell you how to report these distributions for federal income tax purposes.

The Board may amend, suspend or terminate the Managed Distribution Plan without prior notice to shareholders if it deems such action to be in the best interests of the Fund and its shareholders. For example, the Board might take such action if the Plan had the effect of shrinking the Fund's assets to a level that was determined to be detrimental to Fund shareholders. The suspension or termination of the Plan could have the effect of creating a trading discount (if the Fund's stock is trading at or above net asset value) or widening an existing trading discount.

The Managed Distribution Plan is described in a Question and Answer format on your Fund's website <http://www.dnpselectincome.com>, and discussed in the Board of Directors section of this report.

---

November 4, 2010

**Dear Fellow Shareholders:**

**Performance Review:** Consistent with its primary objective of current income, the Fund declared three monthly distributions of 6.5 cents per share of common stock during the third quarter of 2010. The 6.5 cent per share monthly rate, without compounding, would be 78 cents annualized, or a 7.95% common stock distribution yield based on the September 30, 2010, closing price of \$9.81 per share. That yield compares favorably with the yields of 4.26% on the Dow Jones Utility Index and 4.25% on the S&P Utilities Index. Please refer to the portion of this letter captioned

About Your Fund Distribution Policy for important information about the anticipated sources and characterization of the Fund's distributions for 2010.

The Fund performed well during the quarter ended September 30, 2010, as measured by total return (income plus change in market price). In absolute terms, the Fund had a total return of 11.7%. In relative terms, the Fund exceeded the 10.2% return of a composite of the S&P Utilities Index and the Barclays Capital U.S. Utility Bond Index that reflects the stock and bond ratio of the Fund.

Likewise, the Fund's year-to-date performance through September 30, 2010 has been favorable. During this period, your Fund's total return of 17.1% exceeded the 4.3% return of the S&P Utilities Index and the 6.2% return of the stock and bond composite referred to above.

On a longer-term basis, as of September 30, 2010, your Fund had a five-year cumulative total return of 30.1%, which exceeded the 22.2% return of the composite of the S&P Utilities Index and the Barclays Capital U.S. Utility Bond Index, reflecting the stock and bond ratio of the Fund. In comparison, the S&P Utilities Index had a total return during that period of 13.2%. It is important to note that the composite and index returns stated here and below include no fees or expenses, whereas the Fund's returns are net of expenses.

The table below compares the performance of your Fund to various market benchmarks.

For the period indicated through September 30, 2010	Cumulative Total Return*				
	DNP Select Income Fund Inc.		Composite Index	S&P Utilities Index	Barclays Capital U.S. Utility Bond Index
	Market	NAV			
One year	20.4%	22.6%	11.9%	11.9%	12.1%
Five years	30.1%	33.6%	22.2%	13.2%	44.9%

\* Total return includes dividends reinvested in the Fund or index, as applicable. The Composite Index is a composite of the returns of the S&P Utilities Index and the Barclays Capital U.S. Utility Bond Index, weighted to reflect the stock and bond ratio of the Fund. Performance returns for the S&P Utilities Index and Barclays Capital U.S. Utility Bond Index were obtained from Bloomberg LLP. Fund returns were obtained from the Administrator of the Fund. Past performance is not indicative of future results.

**Update on Utility Industry Regulation:** As you are well aware, your Fund invests in the stocks and bonds of utilities—electric, gas, communication, and water companies. Although the characteristics of these companies have evolved over time, they still tend to share certain common features: they generally have a franchise or defined service territory; they usually have an obligation to serve those within that franchise; their services and products are likely considered a necessity; and scale provides efficiencies that tend toward provider concentration.

Because of the importance of utilities in everyday life, utilities are generally subject to the oversight of state regulatory bodies—public utility or corporation commissions. These bodies are charged with ensuring that customers receive reliable service at a fair price and that service providers earn sufficient returns to maintain and improve their business. Those regulatory goals persist in the current period, although there has been a trend toward regulation that fosters competition with a somewhat lighter hand on oversight. Your Fund managers have frequently stated in these pages that we favor companies that are subject to reasonable regulatory oversight because such regulation can enable those companies to generate more dependable earnings and dividends.

Your local public utility or corporation commission, of course, is only one form of regulatory oversight to which utility companies and your Fund's investments are exposed. For example, the production of greenhouse gases (GHGs) is an evolving focus of regulation at both the state and national level. Beginning about a decade ago, environmental groups petitioned the federal Environmental Protection Agency (EPA) to regulate carbon dioxide (CO<sub>2</sub>) found in tailpipe emissions under the Clean Air Act. In 2003, the EPA declined to assert itself in that arena, and subsequent lower-court litigation upheld that decision. In 2007, however, the Supreme Court rejected the EPA's reasons for refusing to regulate CO<sub>2</sub>, and ordered the agency to make a determination whether tailpipe emissions contribute to air pollution that endangers health or welfare. Later in 2007, the EPA found there was a positive endangerment to welfare and submitted its findings to the White House, but the EPA subsequently withdrew its proposals. Finally, in 2010 the EPA made public new findings that CO<sub>2</sub> does indeed contribute to air pollution that could endanger public health and welfare.

CO<sub>2</sub> is the by-product of almost every form of combustion, and is one of several other by-products broadly called GHGs. Although the debate about global warming and the possible impact of combustion by-products on the environment is not completely settled, governments around the world are taking initiatives to limit the amount of GHGs produced. In this country, several state and local governments have enacted GHG emission regulation. Because it hardly seems possible that a piecemeal approach by state and local governments could be an effective regulatory regime, the United States Congress is the logical entity to craft national regulation that encompasses a broad swath of American industry. However, the issues surrounding GHGs are so contentious that your managers consider it unlikely that Congress will be able to resolve those issues during the lame duck session following the November elections. Further, as a result of the change in the leadership in the House of Representatives at the mid-term elections, GHG legislation could be on the Congressional sidelines until 2013.

The absence of new Congressional legislation has left the EPA free to broaden its regulatory reach from CO<sub>2</sub> tailpipe emissions to electric utility smokestack and industrial facility GHG emissions, and the EPA is taking an active role in writing new regulations to implement programs to reduce various emissions. We believe that most of the financial impact from the new regulations will not be felt for several years but will start to influence investment decisions by utility companies right now. In turn, the new regulations will influence investment decisions by your Fund managers now, and as we continue to monitor developments.

**Your Fund and Aspects of its Regulation:** Turning from the regulation of the utility industry to the regulation of your Fund, investors can take note of the substantial federal regulation of the activities of registered investment companies such as DNP. Among other things, the Investment Company Act of 1940 (the 1940 Act) seeks to protect investors by mandating extensive disclosure regarding a fund's structure, operations, financial condition, and investment policies when shares of the fund are initially offered to the public, and thereafter on a regular periodic basis. This shareholder report is part of that process.

A different form of oversight touching your Fund is conducted by the Nationally Recognized Statistical Rating Organizations, Moody's Investors Service (Moody's) and Standard & Poor's Financial Services (S&P). Your Fund has preferred stock outstanding that is currently rated AAA by S&P and Aaa by Moody's. The Fund's preferred stock is a form of leverage that enables the Fund to borrow at short-term rates and invest at longer-term rates. Currently, longer-term rates are higher than short-term rates so leverage is making a significant contribution to the earnings of the Fund and is providing support for the common stock distribution. (For a more complete description of your Fund's leverage see the About Your Fund's Leverage section below.)

S&P has recently released for public comment certain proposed changes to its methodology for rating certain securities, including the preferred stock of closed-end investment companies like the Fund. The proposed new methodology would limit the ability of certain types of securities to maintain a AAA rating. Securities potentially affected include some of the most complex and least understood asset-backed and structured vehicles, many of which experienced substantial losses during the market turmoil associated with the Great Recession. Although your Fund's preferred shares have continuously paid their dividends during all market conditions, if the proposed new methodology is implemented as proposed, your Fund's preferred shares could have their S&P rating reduced. Any change in ratings could impact the cost of leverage because the preferred dividend rates are tied to the Moody's and S&P ratings. Your managers believe that the preferred stock of closed-end investment companies, because of their regulation under the 40 Act, should be treated differently from the securities of asset-backed and structured vehicles and accordingly we plan to submit comments to S&P on the proposed changes in methodology. Additional information may be available later this year or early next year.

**Board of Directors Meeting:** At the regular November 2010 Board of Directors meeting, the Board declared the following monthly distributions:

Cents Per Share	Record Date	Payable Date
6.5	December 31	January 10
6.5	January 31	February 10
6.5	February 28	March 10

**About Your Fund's Distribution Policy:** At the February 2008 Board of Directors meeting, the Board reaffirmed the current 6.5 cent per share monthly distribution rate and formalized the monthly distribution process by adopting a Managed Distribution Plan (MDP). The Board reviews the operation of the MDP on a quarterly basis, with the most recent review having been conducted in November 2010. The MDP is described in a Question and Answer format on your Fund's web site: <http://www.dnpselectincome.com>.

From 2004 to 2008, the Fund made use of realized gains offset by tax loss carryforwards to supplement its investment income. When the Fund utilizes tax loss carryforwards, distributions to shareholders derived from realized gains are treated as ordinary income for tax purposes under the Internal Revenue Code (IRC). Until 2008, the treatment of the Fund's realized gains as ordinary income for tax purposes enabled the Fund to maintain its monthly income only distribution rate. In 2008, however, the Fund exhausted the tax loss carryforwards it had previously generated.

In the absence of tax loss carryforwards, some of the Fund's monthly distributions could be made from either realized gains and treated as taxable gains rather than ordinary income, or return of capital and not taxed. Shareholders are required to reduce the cost basis of their shares by the amount of the return of capital so that, when the shares are ultimately sold, they will have properly accounted for the return of capital. In 2009 there was a return of capital.

Due to the significant market dislocation in 2008 and 2009, the Fund accumulated approximately \$100 million in tax loss carryforwards as of December 31, 2009. The Fund estimates that it has not distributed more than its income and capital gains in the current year to date; however, a portion of your distribution for the full year may be a return of capital.

**About Your Fund Leverage:** Fund management reports quarterly to the Board about the composition of the Fund's leverage and its contribution to the income available for distribution to common shareholders. As of September 30, 2010 the Fund's leverage consisted of Remarketed Preferred Stock (RP) in the amount of \$200 million, Auction Preferred Stock (APS) in the amount of \$200 million, and debt in the amount of \$600 million. On that date the total amount of leverage represented approximately 39% of the Fund's total assets.

The use of leverage enables the Fund to borrow at short-term rates and invest at longer-term rates. Currently and historically, the term structure of interest rates is upward sloping (longer-term rates are higher than shorter-term rates). As a result, leverage is currently making a significant contribution to the earnings of the Fund. The use of leverage also can make the Fund's share price more volatile than it would be otherwise.

Early in 2008 disruptions in the short-term fixed income markets resulted in failures in the periodic auctions and remarketings of all closed-end funds' preferred shares, including the preferred shares of your Fund. After reviewing options for resolving preferred share illiquidity, in March 2009 management arranged a \$1 billion credit facility with a commercial bank. Subsequently, the Fund utilized the credit facility to redeem \$300 million of RP and \$300 million of APS.

Fund management is continuing to pursue the goal of ultimately redeeming the preferred stock that remains outstanding in a manner that is consistent with the interests of all shareholders, is long-term oriented, and would not lead to restrictions in the Fund's investment process or reduce the pool of investment alternatives. The Fund is limited in its ability to use debt to refinance all of its outstanding preferred stock because of the asset coverage requirements of the 1940 Act and related SEC rules, and by guidelines established by the rating agencies as a condition of maintaining the AAA rating of the preferred stock. Accordingly, the exact timing of any share redemptions is uncertain, and it is unlikely that all of the Fund's outstanding preferred stock will be retired in the near future. The Fund will announce any redemption through press releases and postings to its website.

**Automatic Distribution Reinvestment Plan and Direct Deposit Service** The Fund has a distribution reinvestment plan available as a benefit to all registered shareholders and also offers direct deposit service through electronic funds transfer to all registered shareholders currently receiving a monthly distribution check. These services are offered through BNY Mellon Shareowner Services. For more information and/or an authorization form on automatic distribution reinvestment or direct deposit, please contact BNY Mellon Shareowner Services (1-877-381-2537 or <http://stock.bankofny.com>). Information on these services is also available on the Fund's website at the address noted below.

**Visit us on the Web** You can obtain the most recent shareholder financial reports and distribution information at our website, <http://www.dnpselectincome.com>.

We appreciate your interest in DNP Select Income Fund Inc., and we will continue to do our best to be of service to you.

(a) All or a portion of this security has been segregated as collateral for the committed facility agreement and made available for loan.

(b) All or a portion of this security has been loaned.

The percentage shown for each investment category is the total value of that category as a percentage of the net assets applicable to common stock of the Fund.

The accompanying notes are an integral part of this Statement of Net Assets.

- (1) The Fund's investments are carried at fair value which is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. The three-tier hierarchy of inputs established to classify fair value measurements for disclosure purposes is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment spreads, credit risks, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in these securities. The following is a summary of the inputs used to value each of the Fund's investments at September 30, 2010.

	Level 1	Level 2
Common stocks	\$1,898,155,323	
Preferred stocks	146,144,645	
Bonds		\$712,065,618
Total	\$2,044,299,968	\$712,065,618

- (2) At December 31, 2009, the Fund's most recent fiscal tax year end, based on a tax cost of investments of \$2,567,571,369, the Fund had gross unrealized appreciation of \$215,591,538 and gross unrealized depreciation of \$116,131,200.

Other information regarding the Fund is available in the Fund's most recent semi-annual and annual reports. This information is available on the Fund's website at [www.dnpselectincome.com](http://www.dnpselectincome.com) or the Securities and Exchange Commission's website at [www.sec.gov](http://www.sec.gov).
