ASA LTD Form N-30B-2 July 31, 2002

ASA LIMITED
(INCORPORATED IN THE REPUBLIC OF SOUTH AFRICA)

36 WIERDA ROAD WEST WIERDA VALLEY, SANDTON SOUTH AFRICA

TO THE SHAREHOLDERS:

At May 31, 2002 the company's net assets were equivalent to \$41.51 per share. This compares with \$21.97 per share at November 30, 2001 the end of the Company's previous fiscal year. The most recent net asset value similarly calculated was \$38.71 per share at june 20, 2002 at which date our shares sold at market price of \$35.70 per share, a discount of 7.8% to the net asset value.

Net investment income for the six months ended May 31, 2002 was equivalent to \$.30 per share vs. \$.65 for the same period last year that included special dividends received from our platinum holdings. The Board of Directors declared a second quarter dividend of \$.15 per share on May 9, 2002 payable May 24, 2002 to shareholders of record on May 17, 2002.

As noted in the November 30, 2001 annual report to shareholders, effective October 1, 2001 the Company is subject to a capital gains tax on the gains realized on the disposal of South African and foreign securities. The capital gains tax will be levied on realized gains based on the appreciation in value of the securities based on a "time apportionment" method considering the total holding period before and after October 31, 2001 of each security. Only that portion of the total appreciation (gain) apportioned to the period after October 31 will be taxable.

At May 31, 2002, this liability is approximately \$6,400,000 or \$.67 per share and is included as a deferred liability in the accompanying financial statements. We are continuing our efforts to seek exemption from capital gains tax and will advise our shareholders when final resolution is reached with the South African government.

Gold has come a long way since the dismal day on April 2, 2001 when its price based on the afternoon London fix bottomed at \$255.95. By May 31st of this year gold reached a price of \$327.05 then subsequently traded back to \$322.10 on Friday, June 14th, for a net gain to June from April 2, 2001 of 25.8%. Since April 2, 2001 gold has been outperforming the Dow Jones Industrial Stock Average. The Philadelphia Gold and Silver Index (XAU) has in turn been outperforming gold, rising 60% from 47.55 on April 2, 2001 to 75.50 on June 14, 2002. In January, 2001 the ratio of the XAU to the gold price was at a record low of .16 but on June 14 it stood at .23 considerably higher, but much lower then the ratio of .38 it reached in 1996.

Central Bank gold sales have become subdued. The Bank of England is out of the market and the only major seller, the Swiss National Bank has been selling gold carefully. De-hedging by the miners, such as Anglo Gold and Newmonth has added significantly to demand offsetting a contraction in fabrication, traditionally the biggest single source of gold demand. Gold appears to be responding to a weaker dollar and tensions in the Near East and Kashmir. The weaker dollar in turn seems to reflect a disappointing United States stock market and a record negative trade balance. As long as the dollar remains weak it should support the gold price.

The South African rand bottomed at 13.6 rand to the dollar on December 20th and is currently trading at 10.3 rand to the dollar, an improvement of 24%. A stronger rand places pressure on gold mining profits. This pressure should be more than offset by the firmer gold price.

A Mineral and Petroleum Resources Development Bill will be tabled soon in the South African Parliament. The mining industry and investors are concerned regarding the interpretation and application of this bill, which basically forces the mining companies to exploit their mineral resources promptly or lose them. This threatens the ability of mines to undertake long term planning with respect to their development. The Platinum mining companies are particularly threatened by its provisions. We are watching the bills' terms as it moves into final form

1

and encouraged by media reports that the Parliamentary committee overseeing the bill, prior to its passing into law, will give serious consideration to the concerns of the mining industry and investors.

In 2002 we added Newcrest Mining to our portfolio. Newcrest operates established gold operations in Western Australia and Indonesia. It also produces both copper and gold in New South Wales. Additional property in New South Wales and southwestern Australia is currently under development. These developments should eventually push annual production from its present level of 645,000 ounces to over 1 million ounces.

We are pleased to announce that on June 14, 2002 the Company completed the development of its website. It can be accessed on the Internet at www.asaltd.com and contains a wealth of information about the Company, including current NAV and market price data as well as historical dividend payments, financial reports, notices and press releases. Shareholders who would like to receive more detailed financial information should contact LGN Associates, P.O. Box 269, Florham Park, NJ, (973-377-3535).

I would also like to call to your attention the availability of the Dividend Reinvestment Plan. Any inquiries in regard to the plan should be directed to Equiserve Trust Company, N.A., Dividend Reinvestment Plan, P.O. Box 43081, Providence, R.I., 02940-3081, U.S.A. Equiserve is now able to communicate with shareholders through the Internet. The only requirement for shareholder participation is use of a personal computer and access to an electronic mail package. The Equiserve address is equiserve@equiserve.com and access is available 24-hours a day. In addition, Equiserve has estalished a Response Center to respond to shareholders' questions in a timely manner. The telephone number is 781-575-2723. The Response Center is available Monday through Friday between 8:30 a.m. and 7 p.m. (Eastern Standard Time).

June 24, 2002
