MARKET VECTORS MUNICIPAL INCOME ETFs

Dear Shareholder:

We are pleased to present this semi-annual report for municipal income exchange-traded funds of the Market Vectors ETF Trust for the six-month period ended October 31, 2013.

Currently, many municipal bond closed-end funds (CEFs) trade at deep discounts to net asset value. This may mean potential opportunities for investors in a bond market that is both uncertain and difficult to navigate.

Just over two years ago we launched Market Vectors CEF Municipal Income ETF (XMPT), the first-of-its-kind exchange-traded fund. The Fund seeks to track, before fees and expenses, the S-Network Municipal Bond Closed-End Fund IndexSM (CEFMX). This index is net asset weighted and holds actively managed both unleveraged and leveraged, as well as investment grade and high-yield, municipal bond CEFs.

The rules-based index methodology capitalizes on the tendency of closed-end fund share prices, at times of market stress, to deviate from the value of their underlying holdings. It does this by assigning greater positions weight to CEFs trading at a discount, and less to those trading at a premium: the wider the discount, the greater the weight; the higher the premium, the lower the weight. It is important to remember that XMPT is subject to the risks of the underlying funds in which it invests.

For investors looking for value in an uncertain municipal bond market, assigning a greater weight to CEFs trading at discounts potentially enhances both yield and the opportunity for capital appreciation. In addition, having a portfolio of CEFs managed by leading fixed income managers not only reduces single fund risk, but also provides diversification by asset, strategy and manager.

MARKET VECTORS MUNICIPAL INCOME ETFs

Going forward, we will, as always, continue to seek out and evaluate the most attractive opportunities for you as a shareholder, and we encourage you stay in touch with us through the videos, email subscriptions and podcasts available on our website (<http://www.vaneck.com>).

You may, in particular, be interested in subscribing to Muni Nation[®], our weekly blog on the municipal bond market by Jim Colby, Portfolio Manager and Senior Municipal Strategist responsible for Market Vectors municipal bond investments. And, of course, should you have any questions, please contact us at 1.888.MKT.VCTR or visit www.marketvectorsetfs.com.

Thank you for participating in the Market Vectors ETF Trust. On the following pages, you will find the performance comparison of each of the funds for the six months ended October 31, 2013. You will also find their financial statements. We value your continuing confidence in us and look forward to helping you meet your investment goals in the future.

*Jan F. van Eck
Trustee and President
Market Vectors ETF Trust*

November 13, 2013

Represents the opinions of the investment adviser. Past performance is no guarantee of future results. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

S-Network Municipal Bond Closed-End Fund IndexSM (CEFMXTR) is composed of shares of municipal closed-end funds listed in the United States that are principally engaged in asset management processes designed to produce

federally tax-exempt annual yield.

2

Management Discussion

The six-month period ended October 31, 2013 was characterized by some significant blows both to the fixed-income market and the municipal bond market. The first to strike both markets hit at the end of Mayⁱ, when the Federal Reserve Bank (the “Fed”) chairman, Ben Bernanke, suggested that the Fed could slow the pace of its bond purchases as part of a tapering of its monetary stimulus package – long-term interest rates rose sharply and continued to rise through to the middle of Octoberⁱⁱ, after which they stabilized when the Federal Reserve said it would continue with its bond buying program subject to certain indicators.

Two further blows struck the municipal bond market in particular soon thereafter, although neither came as a complete surprise. On Thursday, July 18, Detroit filed for bankruptcyⁱⁱⁱ, subsequently defaulting on more than \$600 million of ‘unsecured’ general obligation bonds on October^{iv}. Then, toward the end of August, an article in Barron’s^v, raised doubts about Puerto Rico’s abilities to cover its debts, and the specter of a further possible default. And on October 3, Moody’s downgraded \$6.8 billion of Puerto Rico sales tax bonds^{vi}.

While the Fed’s statement on September 18ⁱⁱ that, in the absence of evidence of sustainable improvement in the economy, it would maintain the pace of monthly bond buying helped produce a rally of sorts^{viii}, the six-month period as a whole was marked by monthly outflows from both U.S. municipal mutual funds and ETFs. Over the whole six months, these outflows amounted to some \$52.28 billion.

Source: Van Eck Global. Returns based on NAV. The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Funds reflect temporary waivers of expenses and/or fees. Had the Funds incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Funds will fluctuate so that an investor’s shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than performance data quoted.

Short Municipal Index ETF/Pre-Refunded Municipal Bond ETF

On the short end of the curve, there was less selling pressure on short and pre-refunded municipal bonds than there was on intermediate, long or high yield municipal bonds.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

Among short municipals (“munis”), the education sector contributed most to the total return of the Short Municipal Index ETF, while of the nine sectors detracting from performance, the electric sector was the greatest detractor. In terms of state, North Carolina contributed the most to the total return of the fund, while Puerto Rico was the greatest detractor.

While munis from New Jersey contributed most to the total return of the Pre-Refunded Municipal Bond ETF, a single muni from Nebraska (which is escrowed to maturity), because of its generally longer duration, was the greatest detractor from the fund’s performance.

MARKET VECTORS MUNICIPAL INCOME ETFs

Intermediate Municipal Index ETF

Puerto Rico's downgrade^x in October contributed to price volatility for intermediates. There also seemed to be some evidence of forced selling by institutions to keep in line with investment grade mandates. While munis from no state contributed positively to the total return of the fund, those from both New York and Puerto Rico were the greatest detractors from performance. The two sectors with the largest weightings in the index, local general obligation and state general obligation, were also the two largest sectors detracting from performance.

Long Municipal Index ETF

The long end of the curve was hard hit^x during the six months ended October 31, 2013. Because of the steepness of the municipal yield curve, when rates rose, the effect was particularly severe in this end of the curve. While no sector contributed positively to the fund's total return, the hospital sector was the greatest detractor from performance. Only a single muni from Kansas contributed positively to performance. California and New York were the two worst performing states.

High-Yield Municipal Index ETF

There has been little new high-yield^{xi} issuance in the past couple of years. This has led a degree of constraint in terms of supply and demand. There was a dramatic dislocation^{xii} in the market when rates rose that was primarily attributable to the situation in Puerto Rico. This was reflected in the fund by the fact that Puerto Rico was the worst performing state/U.S. territory and the single largest detractor from its performance.

CEF Municipal Income ETF

Having traded at a premium almost consistently for much of the past two years, towards the end of the six months ended October 31, 2013, municipal closed-end funds (CEFs) experienced a narrowing of premiums^{xiii} and a dramatic widening of discounts. As many municipal CEFs use leverage they have tended to see more dramatic price moves than regular municipal bonds, especially when something impacts the market.

CEF MUNICIPAL INCOME ETF (XMPT)

PERFORMANCE COMPARISON

October 31, 2013 (unaudited)

Total Return	Share Price ¹	NAV	CEFMXTR ²
Six Months	(13.11)%	(12.80)%	(12.63) %
One Year	(14.32)%	(14.00)%	(13.66) %
Life* (annualized)	3.47 %	3.55 %	3.97 %
Life* (cumulative)	8.17 %	8.36 %	9.39 %

**since 7/12/11*

Commencement date for the Market Vectors CEF Municipal Income ETF was 7/12/11.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (7/12/11) to the first day of secondary market trading in shares of the Fund (7/13/11), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.79% / Net Expense Ratio 0.40%

Van Eck Associates Corporation (the "Adviser") has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes, extraordinary expenses and Acquired Fund Fees and Expenses) from exceeding 0.40% of the Fund's average daily net assets per year until at least September 1, 2014. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

S-Network Municipal Bond Closed-End Fund IndexSM is calculated and maintained by S-Network Global Indexes, LLC. S-Network does not sponsor, endorse, or promote the Fund and bears no liability with respect to the Fund or any security.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

S-Network Municipal Bond Closed-End Fund IndexSM (CEFMXTR) is composed of shares of municipal closed-end funds listed in the United States that are principally engaged in asset management processes designed to produce federally tax-exempt annual yield.

HIGH-YIELD MUNICIPAL INDEX ETF (HYD)

PERFORMANCE COMPARISON

October 31, 2013 (unaudited)

The Investment Management Agreement between Market Vectors ETF Trust and Van Eck Associates Corporation (the "Adviser") provides that the Adviser will pay all expenses of the Fund, except for the fee payment under the Investment Management Agreement, interest expense, offering costs, trading expenses, taxes and extraordinary expenses.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Barclays Inc. does not sponsor, endorse, or promote the Fund and bears no liability with respect to any such Fund or security.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Barclays Municipal Pre-Refunded–Treasury-Escrowed Index (LMPETR) is comprised of pre-refunded and escrowed-to-maturity municipal securities secured by an escrow or trust account containing obligations that are directly issued or unconditionally guaranteed by the U.S. government. The escrowed securities consist solely of U.S. Treasury obligations. To be included in the Index, bonds must have a nominal maturity of 1-30 years; outstanding par value of at least \$7 million; issued as part of transaction of at least \$75 million in value; fixed rate coupon and denominated in U.S. dollars.

SHORT MUNICIPAL INDEX ETF (SMB)

PERFORMANCE COMPARISON

October 31, 2013 (unaudited)

Total Return	Share Price¹	NAV	LMT1TR²	
Six Months	(0.95)%	(0.39)%	0.13	%
One Year	(0.27)%	0.24 %	0.99	%
Five Years	3.61 %	3.63 %	4.28	%
Life* (annualized)	3.16 %	3.21 %	3.81	%
Life* (cumulative)	19.36 %	19.72 %	23.71	%

*since 2/22/08

Commencement date for the Market Vectors Short Municipal Index ETF was 2/22/08.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (2/22/08) to the first day of secondary market trading in shares of the Fund (2/26/08), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Annual Fund Operating Expenses 0.20%

The Investment Management Agreement between Market Vectors ETF Trust and Van Eck Associates Corporation (the "Adviser") provides that the Adviser will pay all expenses of the Fund, except for the fee payment under the Investment Management Agreement, interest expense, offering costs, trading expenses, taxes and extraordinary expenses.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Barclays AMT-Free Short Continuous Municipal Index (LMT1TR) is comprised of bonds that must be rated investment-grade (Baa3/BBB- or higher) by at least two of the following ratings agencies: Moody’s, S&P, Fitch. If only two of the three agencies rate the security, the lower rating is used to determine index eligibility. If only one of the three agencies rates a security, the rating must be investment-grade. They must have an outstanding par value of at least \$7 million and be issued as part of a transaction of at least \$75 million. The bonds must be fixed rate, have a dated-date within the last five years, and must be at least one year but less than six years from their maturity date. Remarketed issues, taxable municipal bonds, AMT municipal bonds, bonds with floating rates, and derivatives, are excluded from the benchmark.

MARKET VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, May 1, 2013 to October 31, 2013.

Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled “Expenses Paid During Period.”

Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on the Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as fees on purchase payments. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Beginning Account Value May 1, 2013	Ending Account Value October 31, 2013	Annualized Expense Ratio During Period	Expenses Paid During the Period*

Hypothetical**	\$1,000.00	\$ 1,024.20	0.20	%	\$ 1.02

Expenses are equal to the Fund's annualized expense ratio (for the six months ended October 31, 2013) multiplied by
 * the average account value over the period, multiplied by the number of days in the most recent fiscal half year
 divided by the number of days in the fiscal year (to reflect the one-half year period).

** Assumes annual return of 5% before expenses

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

October 31, 2013 (unaudited)

Note 1—Fund Organization—Market Vectors ETF Trust (the “Trust”) is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of October 31, 2013, offers fifty three investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: CEF Municipal Income ETF (“CEF Municipal”), High-Yield Municipal Index ETF (“High-Yield”), Intermediate Municipal Index ETF (“Intermediate”), Long Municipal Index ETF (“Long”), Pre-Refunded Municipal Index ETF (“Pre-Refunded”) and Short Municipal Index ETF (“Short”), each a “Fund” and collectively the “Funds”. Each Fund’s investment objective is to replicate as closely as possible, before fees and expenses, the price and yield performance of its Index. The Funds (except CEF Municipal) expect to use a sampling approach in seeking to achieve their objectives. Sampling means that Van Eck Associates Corporation (the “Adviser”) uses quantitative analysis to select bonds and other securities that represent a sample of securities in the Index in terms of key risk factors, performance attributes and other characteristics. The number of securities in each Fund will be based upon several factors, including asset size of the Fund. The Adviser generally expects each Fund to hold less than the total number of securities in the Index, but reserves the right to hold as many securities as it believes necessary to achieve the Fund’s investment objective. CEF Municipal seeks to achieve its objectives through a portfolio of securities in substantially the same weighting as its index.

The Funds’ commencement of operations dates and their respective Indices are presented below:

Fund	Commencement of Operations	Index
CEF Municipal	July 12, 2011	S-Network Municipal Bond Closed-End Fund Index SM
High-Yield	February 4, 2009	Barclays Municipal Custom High Yield Composite Index
Intermediate	December 4, 2007	Barclays AMT-Free Intermediate Continuous Municipal Index
Long	January 2, 2008	Barclays AMT-Free Long Continuous Municipal Index
Pre-Refunded	February 2, 2009	Barclays Municipal Pre-Refunded-Treasury-Escrowed Index
Short	February 22, 2008	Barclays AMT-Free Short Continuous Municipal Index

Note 2—Significant Accounting Policies—The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The following is a summary of significant accounting policies followed by the Funds.

Security Valuation—The Funds value their investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price.

Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Debt securities for which market quotations are readily available are valued on the basis of quotations furnished by an independent pricing service approved by the Board of Trustees or provided by securities dealers. The pricing services may use valuation models or matrix pricing, which consider: (i) yield or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date or (ii) quotations from bond dealers to determine current value and are categorized as Level 2 in the fair value hierarchy. Money market fund investments are valued at net asset value and are categorized as Level 1 in the fair value hierarchy. Short-term obligations with more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of the Adviser appointed by the Board of Trustees. The Pricing Committee provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments for which market prices are not readily available. The Pricing Committee employs various methods for

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of its investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

Federal Income Taxes—It is each Fund's policy to comply with the provisions of the Internal Revenue Code **B.** applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

Dividends and Distributions to Shareholders—Dividends to shareholders from net investment income, if any, are declared and paid at least monthly by each Fund. Distributions of net realized capital gains, if any, generally are declared and paid annually. Income dividends and capital gain distributions are determined in accordance with income tax regulations, which may differ from such amounts determined in accordance with GAAP.

Restricted Securities—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund’s Schedule of Investments.

Use of Derivative Instruments—The Funds may make investments in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter (“OTC”) derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the investment adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments outstanding during the period ended October 31, 2013.

Other—Security transactions are accounted for on trade date. Transactions in certain securities may take longer than the customary settlement cycle to be completed. The counterparty is required to collateralize such trades with cash in excess of the market value of the transaction, which is held at the custodian and marked to market daily. Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date.

F. The Funds record distributions received in excess of income from underlying investments as a reduction of cost of investments and/or an increase in realized gain. Such amounts are based upon estimates if actual amounts are not available, and actual amounts of income, realized gain and return of capital may differ from estimated amounts. Interest income, including amortization of premiums and discounts, is accrued as earned. Interest income is generally not earned on debt securities in default or upon determination that the income is not realizable.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

Note 3—Investment Management and Other Agreements—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of each Fund's average daily net assets. The High Yield, Intermediate, Long, Pre-Refunded and Short Funds utilize a unitary management fee where the Adviser is responsible for all expenses of the Funds, except the fee payment under the Investment Management Agreement, interest expenses, offering costs, trading expenses, taxes and extraordinary expenses. For CEF Municipal, the Adviser voluntarily waived its fees and assumed certain fund expenses during this period to limit total annual operating expenses to the expense cap listed below.

The current management fee rate, expense cap and the amounts waived/assumed by the Adviser for the period ended October 31, 2013 are as follows:

Fund	Expense Cap	Management Fee Rate	Waiver of Management Fees	Expenses Assumed by the Adviser
CEF Municipal *	0.40 %	0.40 %	\$ 48,556	\$ —

The Adviser has agreed, at least until September 1, 2014, to voluntarily waive or limit its fees and to assume as its *own expense certain expenses otherwise payable by the Fund so that the Fund's total annual operating expenses do not exceed the expense cap, excluding interest expense.

The current unitary management fee rates for the period ended October 31, 2013 are as follows:

Fund	Unitary Management Fee Rate
High-Yield	0.35 %
Intermediate	0.24
Long	0.24
Pre-Refunded	0.24
Short	0.20

In addition, Van Eck Securities Corporation, an affiliate of the Adviser, acts as the Funds' Distributor. Certain officers and a Trustee of the Trust are officers, directors or stockholders of the Adviser and Distributor.

Note 4—Investments—For the period ended October 31, 2013, the cost of purchases and proceeds from sales of investments other than U.S. government obligations and short-term obligations (excluding in-kind transactions described in Note 6) were as follows:

Fund	Cost of Investments Purchased	Proceeds from Investments Sold
CEF Municipal	\$1,143,023	\$2,293,687
High-Yield	63,081,732	34,937,719
Intermediate	31,477,400	365,000
Long	5,035,099	1,496,250
Pre-Refunded	14,994,945	12,379,975
Short	29,380,052	600,000

73

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

Note 5—Income Taxes—As of October 31, 2013, for Federal income tax purposes, the identified cost of investments owned, net unrealized appreciation (depreciation), gross unrealized appreciation, and gross unrealized depreciation of investments were as follows:

Fund	Cost of Investments	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)
CEF Municipal	\$30,578,146	\$4,041	\$(4,274,625)	\$(4,270,584)
High-Yield	835,988,074	19,775,405	(60,183,851)	(40,408,446)
Intermediate	581,524,539	11,449,154	(12,852,325)	(1,403,171)
Long	80,691,469	1,581,715	(4,265,859)	(2,684,144)
Pre-Refunded	33,582,749	487,963	(2,119)	485,844
Short	219,133,848	2,130,557	(1,500,159)	630,398

The tax character of dividends paid to shareholders during the year ended April 30, 2013 were as follows:

Fund	Tax-Exempt Dividends April 30, 2013	Ordinary Income April 30, 2013	Long-Term Capital Gains April 30, 2013
CEF Municipal	\$751,369	\$ 5,039	\$ 3,427
High-Yield	43,970,570	571,631	—
Intermediate	15,867,110	19,690	65,310
Long	4,054,246	27,494	—
Pre-Refunded	518,140	—	—
Short	2,443,328	738	108,284

The tax character of current year distributions will be determined at the end of the current fiscal year.

On December 22, 2010 the Regulated Investment Company Modernization Act of 2010 (the “Act”) was enacted, which changed various technical rules governing the tax treatment of regulated investment companies. The changes are generally effective for taxable years beginning after the date of enactment. One of the more prominent changes addresses capital loss carryforwards. Under the Act, each Fund will be permitted to carry forward capital losses incurred in taxable years beginning after the date of enactment for an unlimited period. However, any losses incurred during those future taxable years will be required to be utilized prior to the losses incurred in the pre-enactment

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

taxable years, which carry an expiration date. As a result of this ordering rule, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital loss carryforwards will retain their character as either short-term or long-term capital losses rather than being considered all short-term as permitted under previous regulation.

At April 30, 2013, the Funds had capital loss carryforwards available to offset future capital gains, as follows:

Fund	Post-Effective-No	Post-Effective-No	Amount Expiring in the Year Ended April 30,		
	Expiration	Expiration	April	April	April
	Short-Term	Long-Term	2019	2018	2017
	Capital Losses	Capital Losses			
CEF Municipal	215,513	—	\$ —	\$ —	\$ —
Long	261,318	—	78,825	1,554,202	603,978
Pre-Refunded	129,222	—	—	—	—
Short	32,634	21,742	—	—	—

The Funds recognize the tax benefits of uncertain tax positions only where the position is “more-likely-than-not” to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds’ tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for open tax years (tax years ended 2010 - 2013), or expected to be taken in the Funds’ current tax year. Therefore, no provision for income tax is required in the Funds’ financial statements.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the period ended October 31, 2013, the Funds did not incur any interest or penalties.

Note 6—Capital Share Transactions—As of October 31, 2013, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Shares are issued and redeemed by the Funds only in Creation Units, consisting of 100,000 shares, except for CEF Municipal, which has Creation Units consisting of 50,000 shares, or multiples thereof. The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds’ underlying index plus a small amount of cash. For the period ended October 31, 2013, the Funds had in-kind contributions and redemptions as follows:

Fund	In-Kind Contributions	In-Kind Redemptions
CEF Municipal	\$ 7,386,251	\$ 1,305,537
High-Yield	—	224,491,684
Intermediate	76,139,510	218,885,258
Long	13,787,665	46,868,501
Pre-Refunded	—	—
Short	21,082,452	28,507,564

Note 7—Concentration and Other Risks—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a “passive” or index approach to achieve each Fund’s investment objective. The Funds (except CEF Municipal) use a sampling approach in which the Adviser uses quantitative analysis to select bonds that represent a sample of securities in the index in terms of key risk factors, performance attributes and other characteristics. Each Fund is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. Investments in municipal securities involve risks similar to those of investing in any fund of fixed income securities traded on exchanges, such as market fluctuations caused by factors such as economic and political developments, changes in interest rates and perceived trends in security prices.

High-Yield invests in non-investment grade securities, often referred to as “junk bonds.” Economic downturns may disrupt the high yield market and impair the ability of issuers to repay principal and interest. These high yield securities may involve greater risks and considerations not typically associated with investing in U.S. government bonds and other high quality fixed-income securities. Also, an increase in interest rates would likely have an adverse impact on the value of such obligations. Moreover, high yield securities may be less liquid due to the extent that there is no established retail secondary market and because of a decline in the value of such securities. High-Yield may not be able to sell bonds at desired prices and that large purchases or sales of certain high-yield bond issues may cause substantial fluctuations in share price, yield and total return.

CEF Municipal invests in closed-end funds that may trade at a discount or premium to their net asset value. A closed-end fund may be leveraged as part of its investment strategy. As a result, the Fund may be indirectly exposed to the effects of leverage through its investment in the underlying funds. Investments in underlying funds that use leverage may cause the value of the Fund's shares to be more volatile than if the Fund invested in underlying funds that do not utilize leverage.

Note 8—Trustee Deferred Compensation Plan—The Trust has a Deferred Compensation Plan (the “Plan”) for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

Effective September 1, 2010, High Yield, Intermediate, Long, Pre-Refunded and Short Funds adopted a unitary management fee where the Adviser is responsible for all expenses of the Funds. Therefore, the expense for the Plan for these Funds are included in “Management fees” in the Statements of Operations. The liability for the Plan is shown as “Deferred Trustee fees” in the Statements of Assets and Liabilities for amounts accrued through September 1, 2010 and in “Due to Adviser” for amounts accrued after September 1, 2010.

For CEF Municipal, the expense for the Plan is included in “Trustees’ fees and expenses” in the Statements of Operations. The liability for the Plan is shown as “Deferred Trustee fees” in the Statements of Assets and Liabilities.

MARKET VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

Note 9—Share Split—On October 10, 2008, the Board of Trustees of the Market Vectors ETF Trust approved a split of the shares for Intermediate, Long, and Short. The share splits took place for shareholders of record as of the close of business on October 21, 2008, and were payable on October 23, 2008. Fund shares began trading on a split-adjusted basis on October 24, 2008. Intermediate and Long split their shares five-for-one, and Short split its shares three-for-one.

Note 10—Bank Line of Credit—Certain Funds may participate in a \$200 million committed credit facility (“Facility”) to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the period ended October 31, 2013, the following Funds borrowed under this facility:

Fund	Days Outstanding	Average Daily Loan Balance	Average Interest Rate
High-Yield	30	3,217,533	1.61
Long	21	346,334	1.61
Short	4	3,483,000	1.59

As of October 31, 2013, the Funds had no outstanding loan balances.

Note 11—Custodian Fees—The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the period ended October 31, 2013, there were no offsets of custodian fees.

Note 12—Recent Accounting Pronouncements—The Funds have adopted Accounting Standards Update (“ASU”) No. 2011-11, Balance Sheet (Topic 210) Disclosures about Offsetting Assets and Liabilities, as clarified by ASU No. 2013-01 “Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities” which requires entities to disclose gross and net information about derivative instruments, repurchase and reverse-repurchase agreements, and securities borrowing and lending transactions that are either: (1) offset in accordance with GAAP, or (2) subject to enforceable master netting arrangement or similar agreements, irrespective of whether they are offset in accordance with GAAP.

Edgar Filing: MARKET VECTORS ETF TRUST - Form N-CSRS

In addition, ASU No. 2011-11 requires disclosure of collateral received and posted in connection with master netting agreements or similar arrangements. As of October 31, 2013, there were no financial instruments which required additional disclosure.

Note 13—Subsequent Events—The Funds have evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued.

The following dividends from net investment income were declared and paid subsequent to October 31, 2013:

Fund	Ex-Date	Record Date	Payable Date	Per Share
CEF Municipal	11/1/13	11/5/13	11/7/13	\$0.1210
High-Yield	11/1/13	11/5/13	11/7/13	\$0.1438
Intermediate	11/1/13	11/5/13	11/7/13	\$0.0494
Long	11/1/13	11/5/13	11/7/13	\$0.0648
Pre-Refunded	11/1/13	11/5/13	11/7/13	\$0.0199
Short	11/1/13	11/5/13	11/7/13	\$0.0232

MARKET VECTORS ETF TRUST

APPROVAL OF INVESTMENT MANAGEMENT AGREEMENT

(unaudited)

At a meeting held on September 11, 2013, (the “Meeting”), the Board of Trustees (the “Board”) of Market Vectors ETF Trust (the “Trust”), including all of the Trustees that are not interested persons of the Trust (the “Independent Trustees”), approved an investment management agreement between the Trust and Van Eck Associates Corporation (the “Adviser”) (the “Investment Management Agreement”) with respect to the Market Vectors Puerto Rico Municipal Index ETF (the “Fund”).

The Board’s approval of the Investment Management Agreement was based on a comprehensive consideration of all of the information available to the Trustees and was not the result of any single factor. Some of the factors that figured particularly in the Trustees’ deliberations and how the Trustees considered those factors are described below, although individual Trustees may have evaluated the information presented differently, giving different weights to various factors.

In advance of the Meeting, the Trustees received materials from the Adviser, including expense information for other funds. The Adviser provided the Trustees with information regarding, among other things, the various aspects of the Fund’s proposed investment program, fee arrangements and service provider arrangements. The Independent Trustees’ consideration of the Investment Management Agreement was based, in part, on information obtained through discussions with management of the Fund and the Adviser at the Meeting, information obtained at other meetings of the Trustees and/or based on their review of the materials provided by the Adviser, including the background and experience of the portfolio managers and others proposed to be involved in the management of the Fund. In evaluating the terms of the Investment Management Agreement and the proposal for the Fund to adopt a unitary fee structure, the Trustees considered the risks being assumed by the Adviser under the unitary fee structure arrangement and the potential expense stability that may inure to the benefit of shareholders of the Fund. The Trustees also considered the terms and scope of services that the Adviser would provide under the Investment Management Agreement, including the Adviser’s agreement to pay all of the direct expenses of the Fund (excluding interest expense, offering costs, trading expenses, taxes and extraordinary expenses).

In addition, the Trustees were given data on the exchange-traded fund market and expense ratios of other funds. The Trustees considered the benefits, other than the fees under the Investment Management Agreement, that the Adviser would receive from serving as adviser to the Fund, including any it may receive from providing administrative services to the Fund and from an affiliate of the Adviser serving as distributor to the Fund. The Trustees did not consider historical information about the cost of the services provided by the Adviser or the profitability of the Fund to the Adviser because the Fund had not yet commenced operations. In addition, because the Fund had not yet commenced operations, the Trustees could not consider the historical performance or the quality of services previously provided to the Fund, although they concluded that the nature, quality, and extent of the services to be provided by the Adviser were appropriate based on the Trustees’ knowledge of the Adviser and its personnel and the operations of the other series of the Trust.

The Independent Trustees were advised by and met in executive session with their independent counsel at the Meeting as part of their consideration of the Investment Management Agreement.

In voting to approve the Investment Management Agreement, the Trustees, including the Independent Trustees, concluded that the terms of the Investment Management Agreement are reasonable and fair in light of the services to be performed, the fees paid by certain other funds, expenses to be incurred and such other matters as the Trustees considered relevant in the exercise of their reasonable judgment. The Trustees further concluded that the Investment Management Agreement is in the interest of the Fund and the Fund's shareholders.

This report is intended for the Funds' shareholders. It may not be distributed to prospective investors unless it is preceded or accompanied by a Market Vectors ETF Trust (the "Trust") Prospectus, which includes more complete information. An investor should consider the investment objective, risks, and charges and expenses of the Funds carefully before investing. The prospectus contains this and other information about the investment company. Please read the prospectus carefully before investing.

Additional information about the Trust's Board of Trustees/Officers and a description of the policies and procedures the Trust uses to determine how to vote proxies relating to portfolio securities are provided in the Statement of Additional Information. The Statement of Additional Information and information regarding how the Trust voted proxies relating to portfolio securities during the most recent twelve month period ending June 30 is available, without charge, by calling 1.888.MKT.VCTR, or by visiting vaneck.com, or on the Securities and Exchange Commission's website at <http://www.sec.gov>.

The Trust files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Trust's Form N-Qs are available on the Commission's website at <http://www.sec.gov> and may be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 1.202.942.8090. The Funds' complete schedules of portfolio holdings are also available by calling 1.888.MKT.VCTR or by visiting vaneck.com.
