CYTRX REPORTS 2001 FINANCIAL PERFORMANCE
Reports Positive Cash Flow for Year

Atlanta, Georgia - (PR NEWSWIRE) - March 26, 2002 - CytRx Corporation (NASDAQ/NM: CYTR) today announced its financial performance for the 12-month period ended December 31, 2001. For the year, the Company reported a net loss of \$931,000 (\$0.09 per share) compared to 2000's loss of \$348,000 (\$0.04 per share). Loss from continuing operations in 2001 totaled \$931,000 (\$0.09 per share) compared to a loss of \$1,147,000 (\$0.12 per share) realized in 2000. Total revenues for 2001 were \$4,399,000 versus \$3,328,000 in 2000.

For the fourth quarter of 2001, CytRx reported net income of \$2,448,000 (\$0.23 per share) compared to net income of \$1,161,000 (\$0.11 per share) reported for the comparable period in 2000. Total revenues for the fourth quarter of 2001 were \$3,899,000 versus \$2,290,000 in 2000. The Company noted that revenues for the fourth quarter of 2001 includes a \$3,750,000 signature payment by Vical, Incorporated for their license of CytRx's TranzFect technology, while the fourth quarter of 2000 includes a \$2,000,000 signature payment by Merck & Co., Inc. for their license of TranzFect.

CytRx reported positive operating cash flow for 2001, with cash balances of \$5.3 million at December 31, 2001, as compared to \$3.8 million at December 31, 2000. The Company noted that the disparity between its reported net loss and cash flow for 2001 is primarily due to non-cash expense charges of \$1.4 million recorded during 2001 related to the issuance of stock purchase warrants to its investment banker and other consultants.

Jack J. Luchese, CytRx's President & CEO, commented, "Our activities during 2001 have set the stage for a reinvigoration of CytRx in 2002 and beyond. With the license to Vical this year and the license to Merck in 2000, we now have two strategic partnerships for TranzFect and one for CRL-8761, our food animal growth promoter. We filed two important grant applications for CRL-5861 (FLOCOR) that if approved may aid in future development activities in the sickle cell

area. We also expanded the potential of CRL-5861 by initiating or completing pre-clinical studies in cancer, muscular dystrophy and spinal cord compression injury. And now, our proposed merger with Global Genomics Capital will add a genomics component to CytRx to create an exciting portfolio of technologies."
