**UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

Form 10-K

**þ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended January 3, 2010**

Commission file number: 1-14260

The GEO Group, Inc.

(Exact name of registrant as specified in its charter)

Florida

*(State or other jurisdiction of
incorporation or organization)*

**One Park Place, Suite 700,
621 Northwest 53rd Street
Boca Raton, Florida**

(Address of principal executive offices)

65-0043078

*(I.R.S. Employer
Identification No.)*

33487-8242

(Zip Code)

**Registrant's telephone number (including area code):
(561) 893-0101**

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class

Name of Each Exchange on Which Registered

Common Stock, \$0.01 Par Value

New York Stock Exchange

Indicate by a check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by a check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by a check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing

requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the 51,019,511 shares of common stock held by non-affiliates of the registrant as of June 28, 2009 (based on the last reported sales price of such stock on the New York Stock Exchange on such date of \$18.56 per share) was approximately \$946,922,124.

As of February 16, 2010, the registrant had 51,629,408 shares of common stock outstanding.

Certain portions of the registrant's annual report to security holders for fiscal year ended January 3, 2010 are incorporated by reference into Part III of this report. Certain portions of the registrant's definitive proxy statement pursuant to Regulation 14A of the Securities Exchange Act of 1934 for its 2010 annual meeting of shareholders are incorporated by reference into Part III of this report.

PART I

Item 1. Business

As used in this report, the terms we, us, our, GEO and the Company refer to The GEO Group, Inc., its consolidated subsidiaries and its unconsolidated affiliates, unless otherwise expressly stated or the context otherwise requires.

General

We are a leading provider of government-outsourced services specializing in the management of correctional, detention and mental health and residential treatment facilities in the United States, Canada, Australia, South Africa and the United Kingdom. We operate a broad range of correctional and detention facilities including maximum, medium and minimum security prisons, immigration detention centers, minimum security detention centers and mental health and residential treatment facilities. We also provide secure transportation services for offender and detainee populations as contracted. Our correctional and detention management services involve the provision of security, administrative, rehabilitation, education, health and food services, primarily at adult male correctional and detention facilities. Our mental health and residential treatment services, which are operated through our wholly-owned subsidiary GEO Care, Inc., which we refer to as GEO Care, involve the delivery of quality care, innovative programming and active patient treatment, primarily at privatized state mental health facilities. We also develop new facilities based on contract awards, using our project development expertise and experience to design, construct and finance what we believe are state-of-the-art facilities that maximize security and efficiency.

As of the fiscal year ended January 3, 2010, we managed 57 facilities totaling approximately 52,800 beds worldwide and we had an additional 4,325 beds under development at three facilities, including an expansion and renovation of one vacant facility which we currently own, the expansion of one facility we currently own and operate and a new 2,000-bed facility which we will manage upon completion. We maintained an average companywide facility occupancy rate of 94.6% for the fiscal year ended January 3, 2010, excluding facilities that are either idle or under development.

At our correctional and detention facilities in the U.S. and internationally, we offer services that go beyond simply housing offenders in a safe and secure manner. The services we offer to inmates at most of our managed facilities include a wide array of in-facility rehabilitative and educational programs. Such programs include basic education through academic programs designed to improve inmates' literacy levels and enhance the opportunity to acquire General Education Development certificates and also include vocational training for in-demand occupations to inmates who lack marketable job skills. We offer life skills/transition planning programs that provide job search training and employment skills, anger management skills, health education, financial responsibility training, parenting skills and other skills associated with becoming productive citizens. We also offer counseling, education and/or treatment to inmates with alcohol and drug abuse problems at most of the domestic facilities we manage.

Our mental health facilities and residential treatment services primarily involve the provision of acute mental health and related administrative services to mentally ill patients that have been placed under public sector supervision and care. At these mental health facilities we employ psychiatrists, physicians, nurses, counselors, social workers and other trained personnel to deliver active psychiatric treatment designed to diagnose, treat and rehabilitate patients for community reintegration.

Business Segments

We conduct our business through four reportable business segments: our U.S. corrections segment; our International services segment; our GEO Care segment; and our Facility construction and design segment. We have identified these four reportable segments to reflect our current view that we operate four distinct business lines, each of which constitutes a material part of our overall business. The U.S. corrections segment primarily encompasses our U.S.-based privatized corrections and detention business. The International services segment primarily consists of our privatized corrections and detention operations in South Africa, Australia and the

Table of Contents

United Kingdom. International services reviews opportunities to further diversify into related foreign-based governmental-outsourced services on an ongoing basis. Our GEO Care segment, which is operated by our wholly-owned subsidiary GEO Care, comprises our privatized mental health and residential treatment services business, all of which is currently conducted in the U.S. Our Facility construction and design segment primarily consists of contracts with various state, local and federal agencies for the design and construction of facilities for which we have been, or expect to be, awarded management contracts. Financial information about these segments for fiscal years 2009, 2008 and 2007 is contained in Note 17 Business Segments and Geographic Information of the Notes to Consolidated Financial Statements included in this Form 10-K and is incorporated herein by this reference.

Recent Developments

On February 12, 2009, we announced the retirement of John G. O'Rourke, our Chief Financial Officer. He retired effective August 2, 2009 and was succeeded by Brian R. Evans, our then current Vice President, Finance, Treasurer and Chief Accounting Officer. On July 31, 2009, Mr. Ronald A. Brack was appointed as our Vice President, Chief Accounting Officer and Controller effective August 3, 2009. Mr. Brack joined us in May 2005 and has held the positions of Assistant Controller and Vice President and Controller during his four year tenure.

Just Care Inc. Acquisition

Our mental health subsidiary, GEO Care, acquired Just Care, Inc. which we refer to as Just Care, a provider of detention healthcare focusing on the delivery of medical and mental health services. Just Care manages the 354-bed Columbia Regional Care Center located in Columbia, South Carolina. This facility houses medical and mental health residents for the State of South Carolina and the State of Georgia as well as special needs detainees under custody of the U.S. Marshals Service and U.S. Immigration and Customs Enforcement. This facility is operated by Just Care under a long-term lease with the State of South Carolina. We paid \$38.4 million, net of cash acquired, at closing on September 30, 2009.

Liquidity and capital resources

On October 20, 2009, we completed a private offering of \$250.0 million in aggregate principal amount of our 73/4% Senior Notes due 2017 which we refer to as the 73/4% Senior Notes. These senior unsecured notes pay interest semi-annually in cash in arrears on April 15 and October 15 of each year, beginning on April 15, 2010. In connection with the issuance of the 73/4% Senior Notes, we also executed three interest swap agreements effective November 3, 2009 for an aggregate notional amount of \$75.0 million and a fourth interest rate swap with a \$25.0 million notional amount effective January 6, 2010. We realized proceeds of \$246.4 million at the close of the private offering, net of the discount on the notes of \$3.6 million. A portion of these proceeds was used to fund the repurchase of our \$150.0 million aggregate principal amount of 81/4% Senior Notes due 2013 which we refer to as the 81/4% Senior Notes for which we commenced a cash tender offer announced on October 5, 2009. As of November 19, 2009, all of the 81/4% Senior Notes had been redeemed.

In October 2009, and again in December 2009, we completed amendments to our Third Amended and Restated Credit Agreement through the execution of Amendment Nos. 5, 6 and 7, which we collectively refer to as the Senior Credit Facility. These amendments, among other things, allowed us to issue up to \$300.0 million of unsecured debt without having to repay outstanding borrowings on our Senior Credit Facility, modified the aggregate size of the credit facility from \$240.0 million to \$330.0 million, extended the maturity of the revolving portion of the Senior Credit Facility, which we refer to as the Revolver, to 2012, modified the permitted maximum total leverage and maximum senior secured leverage financial ratios, eliminated the annual capital expenditures limitation and made several technical revisions to certain definitions therein. As of January 3, 2010 we had the ability to borrow approximately \$217 million from the excess capacity on the Revolver after considering our debt covenants. Upon the execution of Amendment

No. 6, we also had the ability to increase our borrowing capacity under the Senior Credit Facility by another \$200.0 million subject to lender demand, market conditions and existing borrowings.

Table of Contents***Facility activations***

The following table sets forth new projects that were activated during the fiscal year ended January 3, 2010:

Facility	Location	Activation	Total Beds	Start date
Robert A. Deyton Detention Facility	Lovejoy, GA	192-bed Expansion	768	First Quarter 2009
Broward Transition Center	Deerfield Beach, FL	100-bed Expansion and New contract	700	Second Quarter 2009
Florida Civil Commitment Center(1)	Arcadia, FL	40-bed Expansion and Replacement facility	720	Second Quarter 2009
Harmondsworth Immigration Removal Centre(2)	London, England	New contract	260	Third Quarter 2009
Graceville Correctional Facility	Graceville, FL	384-bed Expansion	1,884	Third Quarter 2009
Parklea Correctional Centre	Parklea, NSW, Australia	New contract	823	Fourth Quarter 2009
Northwest Detention Center	Tacoma, WA	545-bed Expansion and New contract	1,575	Fourth Quarter 2009
Columbia Care Regional Center	Columbia, SC	354-bed New contract	354	Fourth Quarter 2009

(1) This 720-bed facility replaced the adjacent 680-bed facility.

(2) The Harmondsworth Immigration and Removal Centre will be expanded by 360 beds bringing its capacity to 620 beds when the expansion is completed in June 2010.

In addition to the activations in the table above, we also announced contract awards during the fiscal year 2009 and 2010 as follows:

In April 2009, The GEO Group Australia Pty. Ltd., our wholly owned subsidiary which we refer to as GEO Australia, was awarded a new contract by the New South Wales, Department of Corrective Services for the continued management and operation of the 790-bed Junee Correctional Centre. GEO Australia has managed the minimum-to-medium security Centre since its opening in 1993. The new contract has a term of 15 years, inclusive of renewal options.

On May 4, 2009, we announced that we executed a contract with Bexar County, Texas Commissioners Court for the continued operation of the 688-bed Central Texas Detention Facility located in San Antonio, Texas. This facility, which is owned by Bexar County, houses detainees predominately for the U.S. Marshals Service. We have managed this facility since 1988. The new contract will have a term of ten years, effective April 29, 2009.

In Georgia, the Department of Corrections issued an RFP for 1,000 in-state beds. On February 22, 2010, we announced that the State of Georgia issued a notice of intent to award a contract to our company for the development and operation of a new 1,000-bed facility, which is expandable to 2,500 beds. Under the terms of the intended award,

GEO would finance, build, and operate the new \$60 million dollar facility under a long-term ground lease. The award is subject to obtaining approval of the proposed ground lease from the General Assembly. We expect this new 1,000-bed facility to generate approximately \$19 million dollars in annualized operating revenues once completed.

Contract terminations

Effective June 15, 2009, our management contract with Fort Worth Community Corrections Facility located in Fort Worth, Texas was assigned to another party. Prior to this termination, we leased this facility (lease was due to expire August 2009) and the customer was the Texas Department of Criminal Justice.

On September 8, 2009, we exercised our contractual right to terminate our contracts for the operation and management of the Newton County Correctional Center, referred to as Newton County, located in Newton, Texas and the Jefferson County Downtown Jail, referred to as Jefferson County, located in Beaumont, Texas.

Table of Contents

We managed Newton County and Jefferson County until the contracts terminated effective on November 2, 2009 and November 9, 2009, respectively.

In October 2009, we received a 60-day notice from the California Department of Corrections and Rehabilitation of its intent to terminate the management contract between us and them for the management of our company-owned McFarland Community Correctional Facility.

We do not expect that the termination of these contracts will have a material adverse impact, individually or in aggregate, on our financial condition, results of operations or cash flows.

Quality of Operations

We operate each facility in accordance with our company-wide policies and procedures and with the standards and guidelines required under the relevant management contract. For many facilities, the standards and guidelines include those established by the American Correctional Association, or ACA. The ACA is an independent organization of corrections professionals, which establishes correctional facility standards and guidelines that are generally acknowledged as a benchmark by governmental agencies responsible for correctional facilities. Many of our contracts in the United States require us to seek and maintain ACA accreditation of the facility. We have sought and received ACA accreditation and re-accreditation for all such facilities. We achieved a median re-accreditation score of 99.4% taking into consideration our most recent accreditation hearing in January 2010. Approximately 70.5%, excluding discontinued operations, of our 2009 U.S. corrections revenue was derived from ACA accredited facilities. We have also achieved and maintained certification by the Joint Commission on Accreditation for Healthcare Organizations, or JCAHO, for our mental health facilities and two of our correctional facilities. We have been successful in achieving and maintaining accreditation under the National Commission on Correctional Health Care, or NCCHC, in a majority of the facilities that we currently operate. The NCCHC accreditation is a voluntary process which we have used to establish comprehensive health care policies and procedures to meet and adhere to the ACA standards. The NCCHC standards, in most cases, exceed ACA Health Care Standards.

Business Development Overview

We intend to pursue a diversified growth strategy by winning new clients and contracts, expanding our government services portfolio and pursuing selective acquisition opportunities. Our primary potential customers are governmental agencies responsible for local, state and federal correctional facilities in the United States and governmental agencies responsible for correctional facilities in Australia, South Africa and the United Kingdom. Other primary customers include state agencies in the United States responsible for mental health facilities, and other foreign governmental agencies. We achieve organic growth through competitive bidding that begins with the issuance by a government agency of a request for proposal, or RFP. We primarily rely on the RFP process for organic growth in our U.S. and international corrections operations as well as in our mental health and residential treatment services business.

Our state and local experience has been that a period of approximately sixty to ninety days is generally required from the issuance of a request for proposal to the submission of our response to the request for proposal; that between one and four months elapse between the submission of our response and the agency's award for a contract; and that between one and four months elapse between the award of a contract and the commencement of facility construction or management of the facility, as applicable.

Our federal experience has been that a period of approximately sixty to ninety days is generally required from the issuance of a request for proposal to the submission of our response to the request for proposal; that between twelve and eighteen months elapse between the submission of our response and the agency's award for a contract; and that between four and eighteen weeks elapse between the award of a contract and the commencement of facility

construction or management of the facility, as applicable.

If the state, local or federal facility for which an award has been made must be constructed, our experience is that construction usually takes between nine and twenty-four months to complete, depending on

Table of Contents

the size and complexity of the project. Therefore, management of a newly constructed facility typically commences between ten and twenty-eight months after the governmental agency's award.

We believe that our long operating history and reputation have earned us credibility with both existing and prospective customers when bidding on new facility management contracts or when renewing existing contracts. Our success in the RFP process has resulted in a pipeline of new projects with significant revenue potential. During 2009, we activated eight new or expansion projects representing an aggregate of 2,698 additional beds compared to the activation of eight new or expansion projects representing an aggregate of 6,120 beds during 2008.

In addition to pursuing organic growth through the RFP process, we will from time to time selectively consider the financing and construction of new facilities or expansions to existing facilities on a speculative basis without having a signed contract with a known customer. We also plan to leverage our experience to expand the range of government-outsourced services that we provide. We will continue to pursue selected acquisition opportunities in our core services and other government services areas that meet our criteria for growth and profitability. We have engaged and intend in the future to engage independent consultants to assist us in developing privatization opportunities and in responding to requests for proposals, monitoring the legislative and business climate, and maintaining relationships with existing customers.

Facility Design, Construction and Finance

We offer governmental agencies consultation and management services relating to the design and construction of new correctional and detention facilities and the redesign and renovation of older facilities. As of January 3, 2010, we had provided services for the design and construction of forty-five facilities and for the redesign and renovation and expansion of twenty-eight facilities.

Contracts to design and construct or to redesign and renovate facilities may be financed in a variety of ways. Governmental agencies may finance the construction of such facilities through the following:

- a one time general revenue appropriation by the governmental agency for the cost of the new facility;
- general obligation bonds that are secured by either a limited or unlimited tax levy by the issuing governmental entity; or
- revenue bonds or certificates of participation secured by an annual lease payment that is subject to annual or bi-annual legislative appropriations.

We may also act as a source of financing or as a facilitator with respect to the financing of the construction of a facility. In these cases, the construction of such facilities may be financed through various methods including the following:

- funds from equity offerings of our stock;
- cash on hand and/or cash flows from our operations;
- borrowings by us from banks or other institutions (which may or may not be subject to government guarantees in the event of contract termination); or
- lease arrangements with third parties.

If the project is financed using direct governmental appropriations, with proceeds of the sale of bonds or other obligations issued prior to the award of the project, then financing is in place when the contract relating to the construction or renovation project is executed. If the project is financed using project-specific tax-exempt bonds or other obligations, the construction contract is generally subject to the sale of such bonds or obligations. Generally, substantial expenditures for construction will not be made on such a project until the tax-exempt bonds or other obligations are sold; and, if such bonds or obligations are not sold, construction and therefore, management of the facility, may either be delayed until alternative financing is procured or the development of the project will be suspended or entirely cancelled. If the project is self-financed by us, then financing is generally in place prior to the commencement of construction.

Table of Contents

Under our construction and design management contracts, we generally agree to be responsible for overall project development and completion. We typically act as the primary developer on construction contracts for facilities and subcontract with bonded National and/or Regional Design Build Contractors. Where possible, we subcontract with construction companies that we have worked with previously. We make use of an in-house staff of architects and operational experts from various correctional disciplines (e.g. security, medical service, food service, inmate programs and facility maintenance) as part of the team that participates from conceptual design through final construction of the project. This staff coordinates all aspects of the development with subcontractors and provides site-specific services.

When designing a facility, our architects use, with appropriate modifications, prototype designs we have used in developing prior projects. We believe that the use of these designs allows us to reduce the potential of cost overruns and construction delays and to reduce the number of correctional officers required to provide security at a facility, thus controlling costs both to construct and to manage the facility. Our facility designs also maintain security because they increase the area under direct surveillance by correctional officers and make use of additional electronic surveillance.

The following table sets forth current expansion and development projects at January 3, 2010:

Facilities Under Construction	Additional Beds	Capacity Following Expansion/ Construction	Estimated Completion Date	Customer	Financing
North Lake Correctional Facility, Michigan(1)	1,225	1,755	Q2 2010	Federal or Various States	GEO
Northwest Detention Center, Washington(2)	n/a	1,575	Q2 2010	Federal	GEO
Aurora ICE Processing Center, Colorado(3)	1,100	1,532	Q2 2010	Federal	GEO
Broward Transition Center, Florida(4)	n/a	n/a	Q3 2010	Federal	GEO
Blackwater River Correctional Facility, Florida(5)	2,000	2,000	Q2 2010	DMS	Third party
Total	4,325				

- (1) We currently do not have a customer for this facility but are marketing these beds to various federal and state agencies.
- (2) Construction of the additional 545 beds was completed in the fourth quarter 2009. The ongoing construction at this facility is to renovate the existing building and expand space available for administrative and medical offices as well as court rooms.
- (3) We do not yet have customers for these expansion beds.
- (4) We are currently operating this facility and have a management contract for 700 beds. The ongoing construction at this facility is for a new administration building and other renovations to the existing structure.
- (5) We do not yet have a signed management contract for this facility but we expect to have one in place prior to the facility's estimated completion date.

Competitive Strengths

Long-Term Relationships with High-Quality Government Customers

We have developed long-term relationships with our government customers and have been successful at retaining our facility management contracts. We have provided correctional and detention management services to the United States Federal Government for 23 years, the State of California for 22 years, the State of Texas for approximately 22 years, various Australian state government entities for 18 years and the State of Florida for approximately 16 years. These customers accounted for 63.5% of our consolidated revenues for the fiscal year ended January 3, 2010. Our strong operating track record has enabled us to achieve a high renewal rate for contracts, thereby providing us with a stable source of revenue. Our government customers typically satisfy their payment obligations to us through budgetary appropriations.

Table of Contents

Diverse, Full-Service Facility Developer and Operator

We have developed comprehensive expertise in the design, construction and financing of high quality correctional, detention and mental health facilities. In addition, we have extensive experience in overall facility operations, including staff recruitment, administration, facility maintenance, food service, healthcare, security, supervision, treatment and education of inmates. We believe that the breadth of our service offerings gives us the flexibility and resources to respond to customers' needs as they develop. We believe that the relationships we foster when offering these additional services also help us win new contracts and renew existing contracts.

Unique Privatized Mental Health Growth Platform

We are the only publicly-traded U.S. corrections company currently operating in the privatized mental health and residential treatment services business. We believe that our target market of state and county mental health hospitals represents a significant opportunity. Through our GEO Care subsidiary, we have been able to grow this business to approximately 1,900 beds and \$121.8 million in revenues from 325 beds and \$31.7 million in revenues in 2004.

Sizeable International Business

We believe that our international presence gives us a unique competitive advantage that has contributed to our growth. Leveraging our operational excellence in the U.S., our international infrastructure allows us to aggressively target foreign opportunities that our U.S.-based competitors without overseas operations may have difficulty pursuing. Our International services business generated \$137.2 million revenue in 2009, representing 12.0% of our consolidated 2009 revenues. We believe we are well positioned to continue benefiting from foreign governments' initiatives to outsource correctional services.

Experienced, Proven Senior Management Team

Our Chief Executive Officer, George C. Zoley, and our President, Wayne H. Calabrese, have worked together at our company for more than 20 years and have established a track record of growth and profitability. Under their leadership, our annual consolidated revenues from continuing operations have grown from \$40.0 million in 1991 to \$1.1 billion in 2009. Dr. Zoley is one of the pioneers of the industry, having developed and opened what we believe to be one of the first privatized detention facilities in the U.S. in 1986. In addition to senior management, our operational and facility level management has significant operational experience. Brian R. Evans, who recently became our Chief Financial Officer, has been with our company for over eight years, mostly serving as our Chief Accounting Officer and Vice President-Finance during a period of significant growth.

Regional Operating Structure

We operate three regional U.S. offices and three international offices that provide administrative oversight and support to our correctional and detention facilities and allow us to maintain close relationships with our customers and suppliers. Each of our three regional U.S. offices is responsible for the facilities located within a defined geographic area. We believe that our regional operating structure is unique within the U.S. private corrections industry and provides us with the competitive advantage of having close proximity and direct access to our customers and our facilities. We believe this proximity increases our responsiveness and the quality of our contacts with our customers. We believe that this regional structure has facilitated the rapid integration of our prior acquisitions, and we also believe that our regional structure and international offices will help with the integration of any future acquisitions.

Business Strategies

Provide High Quality, Essential Services at Lower Costs

Our objective is to provide federal, state and local governmental agencies with high quality, essential services at a lower cost than they themselves could achieve. We have developed considerable expertise in the management of facility security, administration, rehabilitation, education, health and food services. Our quality

Table of Contents

is recognized through many accreditations including that of the American Correctional Association, which has certified facilities representing approximately 70.5% of our U.S. corrections revenue as of year-end 2009.

Maintain Disciplined Operating Approach

We manage our business on a contract by contract basis in order to maximize our operating margins. We typically refrain from pursuing contracts that we do not believe will yield attractive profit margins in relation to the associated operational risks. In addition, we generally have not in the past engaged in extensive facility development without having a corresponding management contract award in place, although we have increasingly begun to do so more recently in select situations to pursue what we believe are attractive business development opportunities. We have also elected not to enter certain international markets with a history of economic and political instability. We believe that our strategy of emphasizing lower risk, higher profit opportunities helps us to consistently deliver strong operational performance, lower our costs and increase our overall profitability.

Expand Into Complementary Government-Outsourced Services

We intend to capitalize on our long term relationships with governmental agencies to become a more diversified provider of government-outsourced services. These opportunities may include services which leverage our existing competencies and expertise, including the design, construction and management of large facilities, the training and management of a large workforce and our ability to service the needs and meet the requirements of government customers. We believe that government outsourcing of currently internalized functions will increase largely as a result of the public sector's desire to maintain quality service levels amid governmental budgetary constraints. We believe that our successful expansion into the mental health and residential treatment services sector through GEO Care is an example of our ability to deliver higher quality services at lower costs in new areas of privatization.

Pursue International Growth Opportunities

As a global provider of privatized correctional services, we are able to capitalize on opportunities to operate existing or new facilities on behalf of foreign governments. We currently have international operations in Australia, Canada, South Africa and the United Kingdom. On January 28, 2009 we announced that our wholly-owned U.K. subsidiary, The GEO Group UK Ltd., referred to as GEO UK, signed a contract with the United Kingdom Border Agency for the management and operation of the Harmondsworth Immigration Removal Centre in London, England. We began operating the Harmondsworth Immigration Removal Centre in June 2009. On October 1, 2009, our wholly-owned Australian subsidiary announced that it had been selected by Corrective Services New South Wales to operate and manage the 823-bed Parklea Correctional Centre in Australia. We began operating the Parklea Correctional Centre in October 2009. We intend to further penetrate the current markets we operate in and to expand into new international markets which we deem attractive.

Selectively Pursue Acquisition Opportunities

We consider acquisitions that are strategic in nature and enhance our geographic platform on an ongoing basis. In November 2005, we acquired Correctional Services Corporation, or CSC, bringing over 8,000 additional adult correctional and detention beds under our management. In January 2007, we acquired CentraCore Properties Trust, or CPT, bringing the 7,743 beds we had been leasing from CPT, as well as an additional 1,126 beds leased to third parties, under our ownership. In September 2009, our wholly-owned mental health subsidiary, GEO Care, acquired Just Care, a provider of detention healthcare focusing on the delivery of medical and mental health services. Just Care manages the 354-bed Columbia Regional Care Center in Columbia, South Carolina. We plan to continue to review acquisition opportunities that may become available in the future, both in the privatized corrections, detention, mental health and residential treatment services sectors, and in complementary government-outsourced services areas.

Table of Contents**Facilities**

The following table summarizes certain information as of January 3, 2010 with respect to facilities that GEO (or a subsidiary or joint venture of GEO) operated under a management contract, had an award to manage or was in the process of expanding:

- (1) GEO also owns a facility in Baldwin, Michigan, North Lake Correctional Facility, that was not in use during fiscal year 2009. This 530-bed facility is undergoing a 1,225-bed expansion.
- (2) GEO provides services at this facility through various Inter-Governmental Agreements, or IGAs, through the various counties and other jurisdictions.
- (3) The full term of this contract expired in December 2009 and was extended until December 12, 2011.
- (4) The contract for this facility only requires GEO to provide maintenance services.
- (5) GEO provides comprehensive healthcare services to nine (9) government-operated prisons under this contract.
- (6) GEO Care acquired the management contracts for Columbia Regional Care Center on September 30, 2009 in connection with its business acquisition of Just Care

Government Contracts Terminations, Renewals and Competitive Re-bids

Generally, we may lose our facility management contracts due to one of three reasons: the termination by a government customer with or without cause at any time; the failure by a customer to renew a contract with us upon the expiration of the then current term; or our failure to win the right to continue to operate under a contract that has been competitively re-bid in a procurement process upon its termination or expiration. Our facility management contracts typically allow a contracting governmental agency to terminate a contract with or without cause at any time by giving us written notice ranging from 30 to 180 days. If government agencies were to use these provisions to terminate, or renegotiate the terms of their agreements with us, our financial condition and results of operations could be materially adversely affected. See Risk Factors We are subject to the loss of our facility management contracts due to terminations, non-renewals or competitive re-

Table of Contents

bids, which could adversely affect our results of operations and liquidity, including our ability to secure new facility management contracts from other government customers .

Aside from our customers' unilateral right to terminate our facility management contracts with them at any time for any reason, there are two points during the typical lifecycle of a contract which may result in the loss by us of a facility management contract with our customers. We refer to these points as contract renewals and contract re-bids. Many of our facility management contracts with our government customers have an initial fixed term and subsequent renewal rights for one or more additional periods at the unilateral option of the customer. We count each government customer's right to renew a particular facility management contract for an additional period as a separate renewal. For example, a five-year initial fixed term contract with customer options to renew for five separate additional one-year periods would, if fully exercised, be counted as five separate renewals, with one renewal coming in each of the five years following the initial term. As of January 3, 2010, eleven of our facility management contracts representing 10,407 beds are scheduled to expire on or before December 31, 2010, unless renewed by the customer at its sole option. These contracts represented 19.3% of our consolidated revenues for the fiscal year ended January 3, 2010. We undertake substantial efforts to renew our facility management contracts. Our historical facility management contract renewal rate exceeds 90%. However, given their unilateral nature, we cannot assure you that our customers will in fact exercise their renewal options under existing contracts. In addition, in connection with contract renewals, either we or the contracting government agency have typically requested changes or adjustments to contractual terms. As a result, contract renewals may be made on terms that are more or less favorable to us than those in existence prior to the renewals.

We define competitive re-bids as contracts currently under our management which we believe, based on our experience with the customer and the facility involved, will be re-bid to us and other potential service providers in a competitive procurement process upon the expiration or termination of our contract, assuming all renewal options are exercised. Our determination of which contracts we believe will be competitively re-bid may in some cases be subjective and judgmental, based largely on our knowledge of the dynamics involving a particular contract, the customer and the facility involved. Competitive re-bids may result from the expiration of the term of a contract, including the initial fixed term plus any renewal periods, or the early termination of a contract by a customer. Competitive re-bids are often required by applicable federal or state procurement laws periodically in order to encourage competitive pricing and other terms for the government customer. Potential bidders in competitive re-bid situations include us, other private operators and other government entities. While we are pleased with our historical win rate on competitive re-bids and are committed to continuing to bid competitively on appropriate future competitive re-bid opportunities, we cannot in fact assure you that we will prevail in future competitive re-bid situations. Also, we cannot assure you that any competitive re-bids we win will be on terms more favorable to us than those in existence with respect to the expiring contract.

As of January 3, 2010, six of our facility management contracts representing 9.1% and \$103.4 million of our fiscal year 2009 consolidated revenues are subject to competitive re-bid in 2010. The following table sets forth the number of facility management contracts that we currently believe will be subject to competitive re-bid in each of the next five years and thereafter, and the total number of beds relating to those potential competitive re-bid situations during each period:

Year	Re-bid	Total Number of Beds up for Re-bid
2010	6	5,537
2011	6	4,119
2012	4	3,122

Edgar Filing: GEO GROUP INC - Form 10-K

2013	1	178

Table of Contents

Competition

We compete primarily on the basis of the quality and range of services we offer; our experience domestically and internationally in the design, construction, and management of privatized correctional and detention facilities; our reputation; and our pricing. We compete directly with the public sector, where governmental agencies responsible for the operation of correctional, detention and mental health and residential treatment facilities are often seeking to retain projects that might otherwise be privatized. In the private sector, our U.S. corrections and International services business segments compete with a number of companies, including, but not limited to: Corrections Corporation of America; Cornell Companies, Inc.; Management and Training Corporation; Louisiana Corrections Services, Inc.; Emerald Companies; Community Education Centers; LaSalle Corrections; Group 4 Securicor; Kaylx; and Serco. Our GEO Care business segment competes with a number of different small-to-medium sized companies, reflecting the highly fragmented nature of the mental health and residential treatment services industry. Some of our competitors are larger and have more resources than we do. We also compete in some markets with small local companies that may have a better knowledge of the local conditions and may be better able to gain political and public acceptance.

Employees and Employee Training

At January 3, 2010, we had 13,026 full-time employees. Of our full-time employees, 248 were employed at our headquarters and regional offices and 12,778 were employed at facilities and international offices. We employ management, administrative and clerical, security, educational services, health services and general maintenance personnel at our various locations. Approximately 623 and 1,860 employees are covered by collective bargaining agreements in the United States and at international offices, respectively. We believe that our relations with our employees are satisfactory.

Under the laws applicable to most of our operations, and internal company policies, our correctional officers are required to complete a minimum amount of training. We generally require at least 40 hours of pre-service training before an employee is allowed to assume their duties plus an additional 120 hours of training during their first year of employment in our domestic facilities, consistent with ACA standards and/or applicable state laws. In addition to the usual 160 hours of training in the first year, most states require 40 or 80 hours of on-the-job training. Florida law requires that correctional officers receive 520 hours of training. We believe that our training programs meet or exceed all applicable requirements.

Our training program for domestic facilities typically begins with approximately 40 hours of instruction regarding our policies, operational procedures and management philosophy. Training continues with an additional 120 hours of instruction covering legal issues, rights of inmates, techniques of communication and supervision, interpersonal skills and job training relating to the particular position to be held. Each of our employees who has contact with inmates receives a minimum of 40 hours of additional training each year, and each manager receives at least 24 hours of training each year.

At least 160 hours of training are required for our employees in Australia and South Africa before such employees are allowed to work in positions that will bring them into contact with inmates. Our employees in Australia and South Africa receive a minimum of 40 hours of refresher training each year. In the United Kingdom, our corrections employees also receive a minimum of 240 hours prior to coming in contact with inmates and receive additional training of approximately 25 hours annually.

Business Regulations and Legal Considerations

Many governmental agencies are required to enter into a competitive bidding procedure before awarding contracts for products or services. The laws of certain jurisdictions may also require us to award subcontracts on a competitive

basis or to subcontract or partner with businesses owned by women or members of minority groups.

Table of Contents

Certain states, such as Florida, deem correctional officers to be peace officers and require our personnel to be licensed and subject to background investigation. State law also typically requires correctional officers to meet certain training standards.

The failure to comply with any applicable laws, rules or regulations or the loss of any required license could have a material adverse effect on our business, financial condition and results of operations. Furthermore, our current and future operations may be subject to additional regulations as a result of, among other factors, new statutes and regulations and changes in the manner in which existing statutes and regulations are or may be interpreted or applied. Any such additional regulations could have a material adverse effect on our business, financial condition and results of operations.

Insurance

The nature of our business exposes us to various types of third-party legal claims, including, but not limited to, civil rights claims relating to conditions of confinement and/or mistreatment, sexual misconduct claims brought by prisoners or detainees, medical malpractice claims, claims relating to employment matters (including, but not limited to, employment discrimination claims, union grievances and wage and hour claims), property loss claims, environmental claims, automobile liability claims, contractual claims and claims for personal injury or other damages resulting from contact with our facilities, programs, personnel or prisoners, including damages arising from a prisoner's escape or from a disturbance or riot at a facility. In addition, our management contracts generally require us to indemnify the governmental agency against any damages to which the governmental agency may be subject in connection with such claims or litigation. We maintain a broad program of insurance coverage for these general types of claims, except for claims relating to employment matters, for which we carry no insurance. There can be no assurance that our insurance coverage will be adequate to cover all claims to which we may be exposed.

We currently maintain a general liability policy and excess liability policy for all U.S. corrections operations with limits of \$62.0 million per occurrence and in the aggregate. A separate \$35.0 million limit applies to medical professional liability claims arising out of correctional healthcare services. Our wholly owned subsidiary, GEO Care, is insured under their own program for general liability and medical professional liability with a specific loss limit of \$35.0 million per occurrence and in the aggregate. We are uninsured for any claims in excess of these limits. For most casualty insurance policies, we carry substantial deductibles or self-insured retentions \$3.0 million per occurrence for general liability and hospital professional liability, \$2.0 million per occurrence for workers' compensation and \$1.0 million per occurrence for automobile liability. We also maintain insurance to cover property and other casualty risks including, workers' compensation, environmental liability and automobile liability.

With respect to our operations in South Africa, United Kingdom and Australia, we utilize a combination of locally-procured insurance and global policies to meet contractual insurance requirements and protect the Company. Our Australian subsidiary is required to carry tail insurance on a general liability policy providing an extended reporting period through 2011 related to a discontinued contract.

In addition, certain of our facilities located in Florida and determined by insurers to be in high-risk hurricane areas carry substantial windstorm deductibles. Since hurricanes are considered unpredictable future events, no reserves have been established to pre-fund for potential windstorm damage. Limited commercial availability of certain types of insurance relating to windstorm exposure in coastal areas and earthquake exposure mainly in California may prevent us from insuring some of our facilities to full replacement value.

Of the reserves discussed above, our most significant insurance reserves relate to workers' compensation and general liability claims. These reserves are undiscounted and were \$27.2 million and \$25.5 million as of January 3, 2010 and December 28, 2008, respectively. We use statistical and actuarial methods to estimate amounts for claims that have

been reported but not paid and claims incurred but not reported. In applying these methods and assessing their results, we consider such factors as historical frequency and severity of claims at each of our facilities, claim development, payment patterns and changes in the nature of our business, among other factors. Such factors are analyzed for each of our business segments. Our estimates may be impacted by such factors as increases in the market price for medical services and unpredictability of the

Table of Contents

size of jury awards. We also may experience variability between our estimates and the actual settlement due to limitations inherent in the estimation process, including our ability to estimate costs of processing and settling claims in a timely manner as well as our ability to accurately estimate our exposure at the onset of a claim. Because we have high deductible insurance policies, the amount of our insurance expense is dependent on our ability to control claims experience. If actual losses related to insurance claims significantly differ from estimates, our financial condition, results of operations and cash flows could be materially impacted.

International Operations

Our international operations for fiscal years 2009 and 2008 consisted of the operations of our wholly-owned Australian subsidiaries, our wholly owned subsidiary in the United Kingdom, and South African Custodial Management Pty. Limited, our consolidated joint venture in South Africa, which we refer to as SACM. In Australia, our wholly-owned subsidiary, GEO Australia, currently manages five facilities and provides comprehensive healthcare services to nine government operated prisons. We operate one facility in South Africa through SACM. During Fourth Quarter 2004, we opened an office in the United Kingdom to pursue new business opportunities throughout Europe. On March 6, 2006, we were awarded a contract to manage the operations of the 198-bed Campsfield House in Kidlington, England and on June 29, 2009, GEO UK assumed management functions of the 260-bed Harmondsworth Immigration Removal Centre in London, England. The Centre will be expanded by 360 beds during fiscal year 2010 and will be managed by our subsidiary under a three-year contract. See Item 7 for more discussion related to the results of our international operations. Financial information about our operations in different geographic regions appears in Item 8. Financial Statements Note 17 Business Segment and Geographic Information.

Business Concentration

Except for the major customers noted in the following table, no other single customer made up greater than 10% of our consolidated revenues, excluding discontinued operations, for these years.

Customer	2009	2008	2007
Various agencies of the U.S. Federal Government	31%	28%	27%
Various agencies of the State of Florida	16%	17%	16%

Available Information

Additional information about us can be found at www.geogroup.com. We make available on our website, free of charge, access to our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, our annual proxy statement on Schedule 14A and amendments to those materials filed or furnished pursuant to Section 13(a) or 15(d) of the Securities and Exchange Act of 1934 as soon as reasonably practicable after we electronically submit such materials to the Securities and Exchange Commission, or the SEC. In addition, the SEC makes available on its website, free of charge, reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC, including GEO. The SEC's website is located at <http://www.sec.gov>. Information provided on our website or on the SEC's website is not part of this Annual Report on Form 10-K.

Item 1A. Risk Factors

The following are certain risks to which our business operations are subject. Any of these risks could materially adversely affect our business, financial condition, or results of operations. These risks could also cause our actual

results to differ materially from those indicated in the forward-looking statements contained herein and elsewhere.

Table of Contents

Risks Related to Our High Level of Indebtedness

We are currently incurring significant indebtedness in connection with substantial ongoing capital expenditures. Capital expenditures for these existing and future projects may materially strain our liquidity.

As of January 3, 2010, we were in the process of constructing or expanding three facilities representing 4,325 total beds. We are providing the financing for two of the three facilities representing 2,325 beds. Remaining capital expenditures related to these and other projects under development are expected to be \$37.7 million, all of which we expect to spend in 2010. We intend to finance these and future projects using our own funds, including cash on hand, cash flow from operations and borrowings under our \$330.0 million Revolver. As of January 3, 2010, we had \$47.5 million outstanding in letters of credit and \$58.0 million in borrowings outstanding under the Revolver. Consequently, we had the ability to borrow approximately \$217 million under our Revolver after considering our debt covenants. In addition, we have an ability to borrow \$200.0 million under the accordion feature of our Senior Credit Facility subject to lender demand and prevailing market conditions. While we believe we currently have adequate borrowing capacity under our Senior Credit Facility to fund all of our committed capital expenditure projects, we may need additional borrowings or financing from other sources in order to complete potential capital expenditures related to new projects in the future. We cannot assure you that such borrowings or financing will be made available to us on satisfactory terms, or at all. In addition, the large capital commitments that these projects will require over the next 12-18 month period may materially strain our liquidity and our borrowing capacity for other purposes. Capital constraints caused by these projects may also cause us to have to entirely refinance our existing indebtedness or incur more indebtedness. Such financing may have terms less favorable than those we currently have in place, or not be available to us at all. In addition, the concurrent development of these and other large capital projects exposes us to material risks. For example, we may not complete some or all of the projects on time or on budget, which could cause us to absorb any losses associated with any delays.

Our significant level of indebtedness could adversely affect our financial condition and prevent us from fulfilling our debt service obligations.

We have a significant amount of indebtedness. Our total consolidated long-term indebtedness as of January 3, 2010 was \$457.5 million, excluding non-recourse debt of \$112.0 million and capital lease liability balances of \$15.1 million. We had the ability to borrow approximately \$217 million under the Revolver, after considering our debt covenants, subject to our satisfying the relevant borrowing conditions under the Senior Credit Facility with respect to the incurrence of additional indebtedness.

Our substantial indebtedness could have important consequences. For example, it could:

require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, and other general corporate purposes;

limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;

increase our vulnerability to adverse economic and industry conditions;

place us at a competitive disadvantage compared to competitors that may be less leveraged; and

limit our ability to borrow additional funds or refinance existing indebtedness on favorable terms.

If we are unable to meet our debt service obligations, we may need to reduce capital expenditures, restructure or refinance our indebtedness, obtain additional equity financing or sell assets. We may be unable to restructure or refinance our indebtedness, obtain additional equity financing or sell assets on satisfactory terms or at all. In addition, our ability to incur additional indebtedness will be restricted by the terms of our Senior Credit Facility and the indenture governing our outstanding 73/4% Senior Notes.

Table of Contents

Despite current indebtedness levels, we may still incur more indebtedness, which could further exacerbate the risks described above. Future indebtedness issued pursuant to our universal shelf registration statement could have rights superior to those of our existing or future indebtedness.

The terms of the indenture governing the 73/4% Senior Notes and our Senior Credit Facility restrict our ability to incur but do not prohibit us from incurring significant additional indebtedness in the future. As of January 3, 2010, we had the ability to borrow approximately \$217 million under the Revolver, subject to our satisfying the relevant borrowing conditions under the Senior Credit Facility and the indenture governing the 73/4% Senior Notes. We also have an ability to borrow an additional \$200.0 million under the accordion feature of our Senior Credit Facility subject to lender demand, prevailing market conditions and satisfying relevant borrowing conditions. Also, we may refinance all or a portion of our indebtedness, including borrowings under our Senior Credit Facility and/or the 73/4% Senior Notes. The terms of such refinancing may be less restrictive and permit us to incur more indebtedness than we can now. If new indebtedness is added to our, and our subsidiaries', current debt levels, the related risks that we, and they, would face related to our level of indebtedness could intensify.

The covenants in the indenture governing our 73/4% Senior Notes and our Senior Credit Facility impose significant operating and financial restrictions which may adversely affect our ability to operate our business.

The indenture governing the 73/4% Senior Notes and our Senior Credit Facility impose significant operating and financial restrictions on us and certain of our subsidiaries, which we refer to as restricted subsidiaries. These restrictions limit our ability to, among other things:

incur additional indebtedness;

pay dividends and or distributions on our capital stock, repurchase, redeem or retire our capital stock, prepay subordinated indebtedness, make investments;

issue preferred stock of subsidiaries;

guarantee other indebtedness;

create liens on our assets;

transfer and sell assets;

make capital expenditures above certain limits;

create or permit restrictions on the ability of our restricted subsidiaries to make dividends or make other distributions to us;

enter into sale/leaseback transactions;

enter into transactions with affiliates; and

merge or consolidate with another company or sell all or substantially all of our assets.

These restrictions could limit our ability to finance our future operations or capital needs, make acquisitions or pursue available business opportunities. In addition, our Senior Credit Facility requires us to maintain specified financial ratios and satisfy certain financial covenants, including maintaining our total leverage ratio, maximum senior secured

leverage ratio and a minimum interest coverage ratio. Some of these financial ratios become more restrictive over the life of the Senior Credit Facility. We may be required to take action to reduce our indebtedness or to act in a manner contrary to our business objectives to meet these ratios and satisfy these covenants. We could also incur additional indebtedness having even more restrictive covenants. Our failure to comply with any of the covenants under our Senior Credit Facility and the indenture governing the 73/4% Senior Notes, or any other indebtedness, could prevent us from being able to draw on our Revolver, cause an event of default under such documents and result in an acceleration of all of our outstanding indebtedness. If all of our outstanding indebtedness were to be accelerated, we likely would not be

Table of Contents

able to simultaneously satisfy all of our obligations under such indebtedness, which would materially adversely affect our financial condition and results of operations.

Servicing our indebtedness will require a significant amount of cash. Our ability to generate cash depends on many factors beyond our control.

Our ability to make payments on our indebtedness and to fund planned capital expenditures will depend on our ability to generate cash in the future. This, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control.

Our business may not be able to generate sufficient cash flow from operations or future borrowings may not be available to us under our Senior Credit Facility or otherwise in an amount sufficient to enable us to pay our indebtedness or new debt securities, or to fund our other liquidity needs. We may need to refinance all or a portion of our indebtedness on or before maturity. However, we may not be able to complete such refinancing on commercially reasonable terms or at all.

Because portions of our senior indebtedness have floating interest rates, a general increase in interest rates will adversely affect cash flows.

Borrowings under our Senior Credit Facility bear interest at a variable rate. As a result, to the extent our exposure to increases in interest rates is not eliminated through interest rate protection agreements, such increases will result in higher debt service costs which will adversely affect our cash flows. We do not currently have any interest rate protection agreements in place to protect against interest rate fluctuations related to our Senior Credit Facility. Based on borrowings of \$213.0 million outstanding under the Senior Credit Facility as of January 3, 2010, a one percent increase in the interest rate applicable to the Senior Credit Facility, would increase our annual interest expense by \$2.1 million.

We depend on distributions from our subsidiaries to make payments on our indebtedness. These distributions may not be made.

We generate a substantial portion of our revenues from distributions on the equity interests we hold in our subsidiaries. Therefore, our ability to meet our payment obligations on our indebtedness is substantially dependent on the earnings of our subsidiaries and the payment of funds to us by our subsidiaries as dividends, loans, advances or other payments. Our subsidiaries are separate and distinct legal entities and, unless they expressly guarantee any indebtedness of ours, they are not obligated to make funds available for payment of our other indebtedness in the form of loans, distributions or otherwise. Our subsidiaries' ability to make any such loans, distributions or other payments to us will depend on their earnings, business results, the terms of their existing and any future indebtedness, tax considerations and legal or contractual restrictions to which they may be subject. If our subsidiaries do not make such payments to us, our ability to repay our indebtedness may be materially adversely affected. For the fiscal year ended January 3, 2010, our subsidiaries accounted for 50.1% of our consolidated revenue, and, as of January 3, 2010, our subsidiaries accounted for 59.0% of our total segment assets.

Risks Related to Our Business and Industry

We do not have management contracts with clients to operate new beds at two facilities that we are currently expanding and cannot assure you that such contracts will be obtained. Failure to obtain management contracts for these new beds will subject us to carrying costs with no corresponding management revenue.

We are currently in the process of expanding two facilities to add additional beds that we do not yet have corresponding management contracts to operate. While we are working diligently with a number of different customers for the use of these remaining beds, we cannot in fact assure you that contracts for the beds will be secured on a timely basis, or at all. While these facilities are vacant, we estimate that we will incur carrying costs ranging from approximately \$1.0 million to \$1.5 million per facility, per fiscal quarter. Failure to secure management contracts for these projects could have a material adverse impact on our financial condition,

Table of Contents

results of operations and/or cash flows. In addition, in order to secure management contracts for these expanded beds, we may need to incur significant capital expenditures to renovate or further expand these facilities to meet potential clients' needs.

The prevailing negative conditions in the capital markets could prevent us from obtaining financing, which could materially harm our business.

Our ability to obtain additional financing is highly dependent on the conditions of the capital markets, among other things. The capital and credit markets have recently been experiencing significant volatility and disruption. The recent downturn in the equity and debt markets, the tightening of the credit markets, the general economic slowdown and other macroeconomic conditions, such as the current global recession could prevent us from raising additional capital or obtaining additional financing on satisfactory terms, or at all. If we need, but cannot obtain adequate capital as a result of negative conditions in the capital markets or otherwise, our business, results of operations and financial condition could be materially adversely affected. Additionally, such inability to obtain capital could prevent us from pursuing attractive business development opportunities, including new facility constructions or expansions of existing facilities, and business or asset acquisitions.

We are subject to the loss of our facility management contracts, due to terminations, non-renewals or competitive re-bids, which could adversely affect our results of operations and liquidity, including our ability to secure new facility management contracts from other government customers.

We are exposed to the risk that we may lose our facility management contracts primarily due to one of three reasons: the termination by a government customer with or without cause at any time; the failure by a customer to exercise its unilateral option to renew a contract with us upon the expiration of the then current term; or our failure to win the right to continue to operate under a contract that has been competitively re-bid in a procurement process upon its termination or expiration. Our facility management contracts typically allow a contracting governmental agency to terminate a contract with or without cause at any time by giving us written notice ranging from 30 to 180 days. If government agencies were to use these provisions to terminate, or renegotiate the terms of their agreements with us, our financial condition and results of operations could be materially adversely affected.

Aside from our customers' unilateral right to terminate our facility management contracts with them at any time for any reason, there are two points during the typical lifecycle of a contract which may result in the loss by us of a facility management contract with our customers. We refer to these points as contract renewals and contract re-bids. Many of our facility management contracts with our government customers have an initial fixed term and subsequent renewal rights for one or more additional periods at the unilateral option of the customer. We count each government customer's right to renew a particular facility management contract for an additional period as a separate renewal. For example, a five-year initial fixed term contract with customer options to renew for five separate additional one-year periods would, if fully exercised, be counted as five separate renewals, with one renewal coming in each of the five years following the initial term. As of January 3, 2010, eleven of our facility management contracts representing 10,407 beds are scheduled to expire on or before December 31, 2010, unless renewed by the customer at its sole option. These contracts represented 19.3% of our consolidated revenues for the fiscal year ended January 3, 2010. We undertake substantial efforts to renew our facility management contracts. Our historical facility management contract renewal rate exceeds 90%. However, given their unilateral nature, we cannot assure you that our customers will in fact exercise their renewal options under existing contracts. In addition, in connection with contract renewals, either we or the contracting government agency have typically requested changes or adjustments to contractual terms. As a result, contract renewals may be made on terms that are more or less favorable to us than those in existence prior to the renewals.

We define competitive re-bids as contracts currently under our management which we believe, based on our experience with the customer and the facility involved, will be re-bid to us and other potential service providers in a competitive procurement process upon the expiration or termination of our contract, assuming all renewal options are exercised. Our determination of which contracts we believe will be competitively re-

Table of Contents

bid may in some cases be subjective and judgmental, based largely on our knowledge of the dynamics involving a particular contract, the customer and the facility involved. Competitive re-bids may result from the expiration of the term of a contract, including the initial fixed term plus any renewal periods, or the early termination of a contract by a customer. Competitive re-bids are often required by applicable federal or state procurement laws periodically in order to further competitive pricing and other terms for the government customer. Potential bidders in competitive re-bid situations include us, other private operators and other government entities. As of January 3, 2010, six of our facility management contracts representing 9.1% and \$103.4 million of our fiscal year 2009 consolidated revenues are subject to competitive re-bid in 2010. While we are pleased with our historical win rate on competitive re-bids and are committed to continuing to bid competitively on appropriate future competitive re-bid opportunities, we cannot in fact assure you that we will prevail in future re-bid situations. Also, we cannot assure you that any competitive re-bids we win will be on terms more favorable to us than those in existence with respect to the expiring contract.

For additional information on facility management contracts that we currently believe will be competitively re-bid during each of the next five years and thereafter, please see *Business Government Contracts Terminations, Renewals and Re-bids* . The loss by us of facility management contracts due to terminations, non-renewals or competitive re-bids could materially adversely affect our financial condition, results of operations and liquidity, including our ability to secure new facility management contracts from other government customers.

Our growth depends on our ability to secure contracts to develop and manage new correctional, detention and mental health facilities, the demand for which is outside our control.

Our growth is generally dependent upon our ability to obtain new contracts to develop and manage new correctional, detention and mental health facilities, because contracts to manage existing public facilities have not to date typically been offered to private operators. Public sector demand for new privatized facilities in our areas of operation may decrease and our potential for growth will depend on a number of factors we cannot control, including overall economic conditions, governmental and public acceptance of the concept of privatization, government budgetary constraints, and the number of facilities available for privatization.

In particular, the demand for our correctional and detention facilities and services could be adversely affected by changes in existing criminal or immigration laws, crime rates in jurisdictions in which we operate, the relaxation of criminal or immigration enforcement efforts, leniency in conviction, sentencing or deportation practices, and the decriminalization of certain activities that are currently proscribed by criminal laws or the loosening of immigration laws. For example, any changes with respect to the decriminalization of drugs and controlled substances could affect the number of persons arrested, convicted, sentenced and incarcerated, thereby potentially reducing demand for correctional facilities to house them. Similarly, reductions in crime rates could lead to reductions in arrests, convictions and sentences requiring incarceration at correctional facilities. Immigration reform laws which are currently a focus for legislators and politicians at the federal, state and local level also could materially adversely impact us. Various factors outside our control could adversely impact the growth of our GEO Care business, including government customer resistance to the privatization of mental health or residential treatment facilities, and changes to Medicare and Medicaid reimbursement programs.

We may not be able to meet state requirements for capital investment or locate land for the development of new facilities, which could adversely affect our results of operations and future growth.

Certain jurisdictions, including California, where we have a significant amount of operations, have in the past required successful bidders to make a significant capital investment in connection with the financing of a particular project. If this trend were to continue in the future, we may not be able to obtain sufficient capital resources when needed to compete effectively for facility management contracts. Additionally, our success in obtaining new awards and contracts may depend, in part, upon our ability to locate land that can be leased or acquired under favorable terms.

Otherwise desirable locations may be in or near populated areas and, therefore, may generate legal action or other forms of opposition from residents in areas surrounding a

Table of Contents

proposed site. Our inability to secure financing and desirable locations for new facilities could adversely affect our results of operations and future growth.

We depend on a limited number of governmental customers for a significant portion of our revenues. The loss of, or a significant decrease in business from, these customers could seriously harm our financial condition and results of operations.

We currently derive, and expect to continue to derive, a significant portion of our revenues from a limited number of governmental agencies. Of our governmental clients, three customers accounted for over 50% of our consolidated revenues for the fiscal year ended January 3, 2010. In addition, the three federal governmental agencies with correctional and detention responsibilities, the Bureau of Prisons, U.S. Immigration and Customs Enforcement, which we refer to as ICE, and the U.S. Marshals Service, accounted for 30.9% of our total consolidated revenues for the fiscal year ended January 3, 2010, with the Bureau of Prisons accounting for 5.2% of our total consolidated revenues for such period, ICE accounting for 11.9% of our total consolidated revenues for such period, and the U.S. Marshals Service accounting for 13.8% of our total consolidated revenues for such period. Also, government agencies from the State of Florida accounted for 16.0% of our total consolidated revenues for the fiscal year ended January 3, 2010. The loss of, or a significant decrease in, business from the Bureau of Prisons, ICE, U.S. Marshals Service, the State of Florida or any other significant customers could seriously harm our financial condition and results of operations. We expect to continue to depend upon these federal and state agencies and a relatively small group of other governmental customers for a significant percentage of our revenues.

A decrease in occupancy levels could cause a decrease in revenues and profitability.

While a substantial portion of our cost structure is generally fixed, most of our revenues are generated under facility management contracts which provide for per diem payments based upon daily occupancy. Several of these contracts provide minimum revenue guarantees for us, regardless of occupancy levels, up to a specified maximum occupancy percentage. However, many of our contracts have no minimum revenue guarantees and simply provide for a fixed per diem payment for each inmate/detainee/patient actually housed. As a result, with respect to our contracts that have no minimum revenue guarantees and those that guarantee revenues only up to a certain specified occupancy percentage, we are highly dependent upon the governmental agencies with which we have contracts to provide inmates, detainees and patients for our managed facilities. Under a per diem rate structure, a decrease in our occupancy rates could cause a decrease in revenues and profitability. When combined with relatively fixed costs for operating each facility, regardless of the occupancy level, a material decrease in occupancy levels at one or more of our facilities could have a material adverse effect on our revenues and profitability, and consequently, on our financial condition and results of operations.

State budgetary constraints may have a material adverse impact on us.

According to the Center on Budget and Policy Priorities, the imbalance between available revenues and the funding needed for services led most states to face budget gaps in fiscal year 2009. The vast majority of states also faced or are facing additional shortfalls in fiscal year 2010. At January 3, 2010, we had ten state correctional clients: Florida, Mississippi, Louisiana, Virginia, Indiana, Texas, Oklahoma, New Mexico, Arizona, and California. In response to the budget crisis, the State of California issued payment deferrals, also called promissory notes or IOU s, to pay its vendors, creditors, and employees. During our fiscal year ended 2009, we received IOU s from the State of California that totaled \$6.7 million, all of which were settled in cash by the end of our fiscal year. Although we received payment for these IOU s, we cannot assure you that any payment deferrals received in the future will be repaid timely or at all. If state budgetary constraints persist or intensify, our ten state customers' ability to pay us may be impaired and/or we may be forced to renegotiate our management contracts with those customers on less favorable terms and our financial condition, results of operations or cash flows could be materially adversely impacted. In addition, budgetary

constraints at states that are not our current customers could prevent those states from outsourcing correctional, detention or mental health service opportunities that we otherwise could have pursued.

Table of Contents

Competition for inmates may adversely affect the profitability of our business.

We compete with government entities and other private operators on the basis of cost, quality and range of services offered, experience in managing facilities, and reputation of management and personnel. Barriers to entering the market for the management of correctional and detention facilities may not be sufficient to limit additional competition in our industry. In addition, some of our government customers could assume the management of a facility currently managed by us upon the termination of the corresponding management contract or, if such customers have capacity at the facilities which they operate, they may take inmates currently housed in our facilities and transfer them to government operated facilities. Since we are paid on a per diem basis with no minimum guaranteed occupancy under some of our contracts, the loss of such inmates and resulting decrease in occupancy could cause a decrease in both our revenues and our profitability.

We are dependent on government appropriations, which may not be made on a timely basis or at all and may be adversely impacted by budgetary constraints at the federal, state and local levels.

Our cash flow is subject to the receipt of sufficient funding of and timely payment by contracting governmental entities. If the contracting governmental agency does not receive sufficient appropriations to cover its contractual obligations, it may terminate our contract or delay or reduce payment to us. Any delays in payment, or the termination of a contract, could have a material adverse effect on our cash flow and financial condition, which may make it difficult to satisfy our payment obligations on our indebtedness, including the 73/4% Senior Notes and the Senior Credit Facility, in a timely manner. In addition, as a result of, among other things, recent economic developments, federal, state and local governments have encountered, and may continue to encounter, unusual budgetary constraints. As a result, a number of state and local governments are under pressure to control additional spending or reduce current levels of spending which could limit or eliminate appropriations for the facilities that we operate. Additionally, as a result of these factors, we may be requested in the future to reduce our existing per diem contract rates or forego prospective increases to those rates. Budgetary limitations may also make it more difficult for us to renew our existing contracts on favorable terms or at all. Further, a number of states in which we operate are experiencing significant budget deficits for fiscal year 2010. We cannot assure that these deficits will not result in reductions in per diems, delays in payment for services rendered or unilateral termination of contracts.

Public resistance to privatization of correctional and detention facilities could result in our inability to obtain new contracts or the loss of existing contracts, which could have a material adverse effect on our business, financial condition and results of operations.

The management and operation of correctional and detention facilities by private entities has not achieved complete acceptance by either government agencies or the public. Some governmental agencies have limitations on their ability to delegate their traditional management responsibilities for such facilities to private companies and additional legislative changes or prohibitions could occur that further increase these limitations. In addition, the movement toward privatization of correctional and detention facilities has encountered resistance from groups, such as labor unions. Changes in governing political parties could also result in changes to previously established views of privatization. Increased public resistance to the privatization of correctional and detention facilities in any of the markets in which we operate, as a result of these or other factors, could have a material adverse effect on our business, financial condition and results of operations.

Our GEO Care business, which has become a material part of our consolidated revenues, poses unique risks not associated with our other businesses.

Our wholly-owned subsidiary, GEO Care, operates our mental health and residential treatment services division. This business primarily involves the delivery of quality care, innovative programming and active patient treatment at

privatized state mental health facilities, jails, sexually violent offender facilities and long-term care facilities. GEO Care's business has increased substantially over the last few years, both in general and as a percentage of our overall business. For the fiscal year ended January 3, 2010, GEO Care generated \$121.8 million in revenues, representing 10.7% of our consolidated revenues from continuing operations. GEO Care's business poses several material risks unique to the operation of privatized mental

Table of Contents

health facilities and the delivery of mental health and residential treatment services that do not exist in our core business of correctional and detention facilities management, including, but not limited to, the following:

the concept of the privatization of the mental health and residential treatment services provided by GEO Care has not yet achieved general acceptance by either government agencies or the public, which could materially limit GEO Care's growth prospects;

GEO Care's business is highly dependent on the continuous recruitment, hiring and retention of a substantial pool of qualified physicians, nurses and other medically trained personnel which may not be available in the quantities or locations sought, or on the employment terms offered;

GEO Care's business model often involves taking over outdated or obsolete facilities and operating them while it supervises the construction and development of new, more updated facilities; during this transition period, GEO Care may be particularly vulnerable to operational difficulties primarily relating to or resulting from the deteriorating nature of the older existing facilities; and

the facilities operated by GEO Care are substantially dependent on government funding, including in some cases the receipt of Medicare and Medicaid funding; the loss of such government funding for any reason with respect to any facilities operated by GEO Care could have a material adverse impact on our business.

Adverse publicity may negatively impact our ability to retain existing contracts and obtain new contracts.

Any negative publicity about an escape, riot or other disturbance or perceived poor conditions at a privately managed facility may result in publicity adverse to us and the private corrections industry in general. Any of these occurrences or continued trends may make it more difficult for us to renew existing contracts or to obtain new contracts or could result in the termination of an existing contract or the closure of one or more of our facilities, which could have a material adverse effect on our business.

We may incur significant start-up and operating costs on new contracts before receiving related revenues, which may impact our cash flows and not be recouped.

When we are awarded a contract to manage a facility, we may incur significant start-up and operating expenses, including the cost of constructing the facility, purchasing equipment and staffing the facility, before we receive any payments under the contract. These expenditures could result in a significant reduction in our cash reserves and may make it more difficult for us to meet other cash obligations, including our payment obligations on the 73/4% Senior Notes and the Senior Credit Facility. In addition, a contract may be terminated prior to its scheduled expiration and as a result we may not recover these expenditures or realize any return on our investment.

Failure to comply with extensive government regulation and applicable contractual requirements could have a material adverse effect on our business, financial condition or results of operations.

The industry in which we operate is subject to extensive federal, state and local regulation, including educational, environmental, health care and safety laws, rules and regulations, which are administered by many regulatory authorities. Some of the regulations are unique to the corrections industry, and the combination of regulations affects all areas of our operations. Corrections officers are customarily required to meet certain training standards and, in some instances, facility personnel are required to be licensed and are subject to background investigations. Certain jurisdictions also require us to award subcontracts on a competitive basis or to subcontract with businesses owned by members of minority groups. We may not always successfully comply with these and other regulations to which we are subject and failure to comply can result in material penalties or the non-renewal or termination of facility

management contracts. In addition, changes in existing regulations could require us to substantially modify the manner in which we conduct our business and, therefore, could have a material adverse effect on us.

In addition, private prison managers are increasingly subject to government legislation and regulation attempting to restrict the ability of private prison managers to house certain types of inmates, such as inmates

Table of Contents

from other jurisdictions or inmates at medium or higher security levels. Legislation has been enacted in several states, and has previously been proposed in the United States House of Representatives, containing such restrictions. Although we do not believe that existing legislation will have a material adverse effect on us, future legislation may have such an effect on us.

Governmental agencies may investigate and audit our contracts and, if any improprieties are found, we may be required to refund amounts we have received, to forego anticipated revenues and we may be subject to penalties and sanctions, including prohibitions on our bidding in response to Requests for Proposals, or RFPs, from governmental agencies to manage correctional facilities. Governmental agencies we contract with have the authority to audit and investigate our contracts with them. As part of that process, governmental agencies may review our performance of the contract, our pricing practices, our cost structure and our compliance with applicable laws, regulations and standards. For contracts that actually or effectively provide for certain reimbursement of expenses, if an agency determines that we have improperly allocated costs to a specific contract, we may not be reimbursed for those costs, and we could be required to refund the amount of any such costs that have been reimbursed. If a government audit asserts improper or illegal activities by us, we may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeitures of profits, suspension of payments, fines and suspension or disqualification from doing business with certain governmental entities. Any adverse determination could adversely impact our ability to bid in response to RFPs in one or more jurisdictions.

In addition to compliance with applicable laws and regulations, our facility management contracts typically have numerous requirements addressing all aspects of our operations which we may not be able to satisfy. For example, our contracts require us to maintain certain levels of coverage for general liability, workers compensation, vehicle liability, and property loss or damage. If we do not maintain the required categories and levels of coverage, the contracting governmental agency may be permitted to terminate the contract. In addition, we are required under our contracts to indemnify the contracting governmental agency for all claims and costs arising out of our management of facilities and, in some instances, we are required to maintain performance bonds relating to the construction, development and operation of facilities. Facility management contracts also typically include reporting requirements, supervision and on-site monitoring by representatives of the contracting governmental agencies. Failure to properly adhere to the various terms of our customer contracts could expose us to liability for damages relating to any breaches as well as the loss of such contracts, which could materially adversely impact us.

We may face community opposition to facility location, which may adversely affect our ability to obtain new contracts.

Our success in obtaining new awards and contracts sometimes depends, in part, upon our ability to locate land that can be leased or acquired, on economically favorable terms, by us or other entities working with us in conjunction with our proposal to construct and/or manage a facility. Some locations may be in or near populous areas and, therefore, may generate legal action or other forms of opposition from residents in areas surrounding a proposed site. When we select the intended project site, we attempt to conduct business in communities where local leaders and residents generally support the establishment of a privatized correctional or detention facility. Future efforts to find suitable host communities may not be successful. In many cases, the site selection is made by the contracting governmental entity. In such cases, site selection may be made for reasons related to political and/or economic development interests and may lead to the selection of sites that have less favorable environments.

Our business operations expose us to various liabilities for which we may not have adequate insurance.

The nature of our business exposes us to various types of third-party legal claims, including, but not limited to, civil rights claims relating to conditions of confinement and/or mistreatment, sexual misconduct claims brought by prisoners or detainees, medical malpractice claims, claims relating to employment matters (including, but not limited

to, employment discrimination claims, union grievances and wage and hour claims), property loss claims, environmental claims, automobile liability claims, contractual claims and claims for personal injury or other damages resulting from contact with our facilities, programs, personnel or prisoners,

Table of Contents

including damages arising from a prisoner's escape or from a disturbance or riot at a facility. In addition, our management contracts generally require us to indemnify the governmental agency against any damages to which the governmental agency may be subject in connection with such claims or litigation. We maintain insurance coverage for these general types of claims, except for claims relating to employment matters, for which we carry no insurance. However, we generally have high deductible payment requirements on our primary insurance policies, including our general liability insurance, and there are also varying limits on the maximum amount of our overall coverage. As a result, the insurance we maintain to cover the various liabilities to which we are exposed may not be adequate. Any losses relating to matters for which we are either uninsured or for which we do not have adequate insurance could have a material adverse effect on our business, financial condition or results of operations. In addition, any losses relating to employment matters could have a material adverse effect on our business, financial condition or results of operations.

We may not be able to obtain or maintain the insurance levels required by our government contracts.

Our government contracts require us to obtain and maintain specified insurance levels. The occurrence of any events specific to our company or to our industry, or a general rise in insurance rates, could substantially increase our costs of obtaining or maintaining the levels of insurance required under our government contracts, or prevent us from obtaining or maintaining such insurance altogether. If we are unable to obtain or maintain the required insurance levels, our ability to win new government contracts, renew government contracts that have expired and retain existing government contracts could be significantly impaired, which could have a material adverse effect on our business, financial condition and results of operations.

Our international operations expose us to risks which could materially adversely affect our financial condition and results of operations.

For the fiscal year ended January 3, 2010, our international operations accounted for 12.0% of our consolidated revenues from continuing operations. We face risks associated with our operations outside the United States. These risks include, among others, political and economic instability, exchange rate fluctuations, taxes, duties and the laws or regulations in those foreign jurisdictions in which we operate. In the event that we experience any difficulties arising from our operations in foreign markets, our business, financial condition and results of operations may be materially adversely affected.

We conduct certain of our operations through joint ventures, which may lead to disagreements with our joint venture partners and adversely affect our interest in the joint ventures.

We conduct our operations in South Africa through our consolidated joint venture, SACM, and through our 50% owned joint venture South African Custodial Services Pty. Limited referred to as SACS. We may enter into additional joint ventures in the future. Although we have the majority vote in our consolidated joint venture, SACM, through our ownership of 62.5% of the voting shares, we share equal voting control on all significant matters to come before SACS. These joint venture partners, as well as any future partners, may have interests that are different from ours which may result in conflicting views as to the conduct of the business of the joint venture. In the event that we have a disagreement with a joint venture partner as to the resolution of a particular issue to come before the joint venture, or as to the management or conduct of the business of the joint venture in general, we may not be able to resolve such disagreement in our favor and such disagreement could have a material adverse effect on our interest in the joint venture or the business of the joint venture in general.

We are dependent upon our senior management and our ability to attract and retain sufficient qualified personnel.

We are dependent upon the continued service of each member of our senior management team, including George C. Zoley, our Chairman and Chief Executive Officer, Wayne H. Calabrese, our Vice Chairman and President, and Brian R. Evans, our Chief Financial Officer. The unexpected loss of Dr. Zoley, Mr. Calabrese or Mr. Evans could materially adversely affect our business, financial condition or results of operations.

Table of Contents

In addition, the services we provide are labor-intensive. When we are awarded a facility management contract or open a new facility, depending on the service we have been contracted to provide, we may need to hire operating management, correctional officers, security staff, physicians, nurses and other qualified personnel. The success of our business requires that we attract, develop and retain these personnel. Our inability to hire sufficient qualified personnel on a timely basis or the loss of significant numbers of personnel at existing facilities could have a material effect on our business, financial condition or results of operations.

Our profitability may be materially adversely affected by inflation.

Many of our facility management contracts provide for fixed management fees or fees that increase by only small amounts during their terms. While a substantial portion of our cost structure is generally fixed, if, due to inflation or other causes, our operating expenses, such as costs relating to personnel, utilities, insurance, medical and food, increase at rates faster than increases, if any, in our facility management fees, then our profitability could be materially adversely affected.

Various risks associated with the ownership of real estate may increase costs, expose us to uninsured losses and adversely affect our financial condition and results of operations.

Our ownership of correctional and detention facilities subjects us to risks typically associated with investments in real estate. Investments in real estate, and in particular, correctional and detention facilities, are relatively illiquid and, therefore, our ability to divest ourselves of one or more of our facilities promptly in response to changed conditions is limited. Investments in correctional and detention facilities, in particular, subject us to risks involving potential exposure to environmental liability and uninsured loss. Our operating costs may be affected by the obligation to pay for the cost of complying with existing environmental laws, ordinances and regulations, as well as the cost of complying with future legislation. In addition, although we maintain insurance for many types of losses, there are certain types of losses, such as losses from earthquakes, riots and acts of terrorism, which may be either uninsurable or for which it may not be economically feasible to obtain insurance coverage, in light of the substantial costs associated with such insurance. As a result, we could lose both our capital invested in, and anticipated profits from, one or more of the facilities we own. Further, even if we have insurance for a particular loss, we may experience losses that may exceed the limits of our coverage.

Risks related to facility construction and development activities may increase our costs related to such activities.

When we are engaged to perform construction and design services for a facility, we typically act as the primary contractor and subcontract with other companies who act as the general contractors. As primary contractor, we are subject to the various risks associated with construction (including, without limitation, shortages of labor and materials, work stoppages, labor disputes and weather interference) which could cause construction delays. In addition, we are subject to the risk that the general contractor will be unable to complete construction at the budgeted costs or be unable to fund any excess construction costs, even though we typically require general contractors to post construction bonds and insurance. Under such contracts, we are ultimately liable for all late delivery penalties and cost overruns.

The rising cost and increasing difficulty of obtaining adequate levels of surety credit on favorable terms could adversely affect our operating results.

We are often required to post performance bonds issued by a surety company as a condition to bidding on or being awarded a facility development contract. Availability and pricing of these surety commitments is subject to general market and industry conditions, among other factors. Recent events in the economy have caused the surety market to become unsettled, causing many reinsurers and sureties to reevaluate their commitment levels and required returns. As

a result, surety bond premiums generally are increasing. If we are unable to effectively pass along the higher surety costs to our customers, any increase in surety costs could adversely affect our operating results. In addition, we may not continue to have access to surety credit or be able to secure bonds economically, without additional collateral, or at the levels required for any potential

Table of Contents

facility development or contract bids. If we are unable to obtain adequate levels of surety credit on favorable terms, we would have to rely upon letters of credit under our Senior Credit Facility, which would entail higher costs even if such borrowing capacity was available when desired, and our ability to bid for or obtain new contracts could be impaired.

We may not be able to successfully identify, consummate or integrate acquisitions.

We have an active acquisition program, the objective of which is to identify suitable acquisition targets that will enhance our growth. The pursuit of acquisitions may pose certain risks to us. We may not be able to identify acquisition candidates that fit our criteria for growth and profitability. Even if we are able to identify such candidates, we may not be able to acquire them on terms satisfactory to us. We will incur expenses and dedicate attention and resources associated with the review of acquisition opportunities, whether or not we consummate such acquisitions. Additionally, even if we are able to acquire suitable targets on agreeable terms, we may not be able to successfully integrate their operations with ours. We may also assume liabilities in connection with acquisitions that we would otherwise not be exposed to.

Adverse developments in our relationship with our employees could adversely affect our business, financial condition or results of operations.

At January 3, 2010, approximately 19% of our workforce was covered by collective bargaining agreements. While only approximately 19% of our workforce schedule is covered by collective bargaining agreements, increases in organizational activity or any future work stoppages could have a material adverse effect on our business, financial condition, or results of operations.

Risks Related to the 73/4% Senior Notes

The notes and the related guarantees are effectively subordinated to our and the subsidiary guarantors' senior secured indebtedness and the indebtedness of our subsidiaries that do not guarantee the notes.

The notes and the related guarantees are unsecured and therefore will be effectively subordinated to our secured indebtedness, including borrowings under our Senior Credit Facility, to the extent of the value of the assets securing such indebtedness. As of January 3, 2010, borrowings under our Senior Credit Facility were \$213.0 million. In addition, the indenture governing the notes will allow us and the subsidiary guarantors to incur a significant amount of additional indebtedness and to secure indebtedness, including any indebtedness incurred under credit facilities. In the event we or the guarantors become the subject of a bankruptcy, liquidation, dissolution, reorganization or similar proceeding, our assets and the assets of the guarantors securing indebtedness could not be used to pay you until after all secured claims against us and the guarantors have been fully paid. In addition, the notes and the related guarantees will be effectively subordinated to all existing and future liabilities of our subsidiaries that do not guarantee the notes, including the trade payables.

We may not be able to repurchase the notes in the event of a change of control because the terms of our indebtedness or lack of funds may prevent us from doing so.

Upon a change of control, each holder of the notes will have the right to require us to repurchase their notes at 101% of their principal amount, plus accrued and unpaid interest, and, liquidated damages, if any, to the date of repurchase. The terms of the Senior Credit Facility limit our ability to repurchase the notes in the event of a change of control. Any future agreement governing any of our indebtedness may contain similar restrictions and provisions. Accordingly, it is possible that restrictions in the Senior Credit Facility or other indebtedness that may be incurred in the future will not allow the required repurchase of notes upon a change of control. Even if such repurchase is

permitted by the terms of our then existing indebtedness, we may not have sufficient funds available to satisfy our repurchase obligations.

Table of Contents

Fraudulent conveyance laws may permit courts to void the subsidiary guarantees of the notes in specific circumstances, which would interfere with the payment of the subsidiary guarantees.

Under the federal bankruptcy laws and comparable provisions of state fraudulent transfer laws, any guarantee made by any of our subsidiaries could be voided, or claims under the guarantee made by any of our subsidiaries could be subordinated to all other obligations of any such subsidiary, if the subsidiary, at the time it incurred the obligations under any guarantee:

incurred the obligations with the intent to hinder, delay or defraud creditors; or

received less than reasonably equivalent value, or did not receive fair consideration, in exchange for incurring those obligations; and

(1) was insolvent or rendered insolvent by reason of that incurrence;

(2) was engaged in a business or transaction for which the subsidiary's remaining assets constituted unreasonably small capital; or

(3) intended to incur, or believed that it would incur, debts beyond its ability to pay those debts as they mature.

In addition, any payment by that guarantor pursuant to its guarantee could be voided and required to be returned to the guarantor, or to a fund for the benefit of the creditors of the guarantor. In any such case, your right to receive payments in respect of the notes from any such guarantor would be effectively subordinated to all indebtedness and other liabilities of that guarantor.

A legal challenge to the obligations under any guarantee on fraudulent conveyance grounds could focus on any benefits received in exchange for the incurrence of those obligations. We believe that each of our subsidiaries making a guarantee received reasonably equivalent value for incurring the guarantee, but a court may disagree with our conclusion or elect to apply a different standard in making its determination. The measures of insolvency for purposes of the fraudulent transfer laws vary depending on the law applied in the proceeding to determine whether a fraudulent transfer has occurred. Generally, however, an entity would be considered insolvent if:

the sum of its debts, including contingent liabilities, is greater than the fair saleable value of all of its assets;

the present fair saleable value of its assets is less than the amount that would be required to pay its probable liabilities on its existing debts, including contingent liabilities, as they become absolute and mature; or

it cannot pay its debts as they become due.

We cannot assure you, however, as to what standard a court would apply in making these determinations. If a guarantee of the notes is voided as a fraudulent conveyance or is found to be unenforceable for any other reason, you will not have a claim against the guarantor.

Risks Related to our Common Stock

Fluctuations in the stock market as well as general economic, market and industry conditions may harm the market price of our common stock.

The market price of our common stock has been subject to significant fluctuation. The market price of our common stock may continue to be subject to significant fluctuations in response to operating results and other factors, including:

actual or anticipated quarterly fluctuations in our financial results, particularly if they differ from investors expectations;

changes in financial estimates and recommendations by securities analysts;

Table of Contents

general economic, market and political conditions, including war or acts of terrorism, not related to our business;

actions of our competitors and changes in the market valuations, strategy and capability of our competitors;

our ability to successfully integrate acquisitions and consolidations; and

changes in the prospects of the privatized corrections and detention industry.

In addition, the stock market in recent years has experienced price and volume fluctuations that often have been unrelated or disproportionate to the operating performance of companies. These fluctuations, may harm the market price of our common stock, regardless of our operating results.

Future sales of our common stock in the public market could adversely affect the trading price of our common stock that we may issue and our ability to raise funds in new securities offerings.

Future sales of substantial amounts of our common stock in the public market, or the perception that such sales could occur, could adversely affect prevailing trading prices of our common stock and could impair our ability to raise capital through future offerings of equity or equity-related securities. We cannot predict the effect, if any, that future sales of shares of common stock or the availability of shares of common stock for future sale will have on the trading price of our common stock.

Various anti-takeover protections applicable to us may make an acquisition of us more difficult and reduce the market value of our common stock.

We are a Florida corporation and the anti-takeover provisions of Florida law impose various impediments to the ability of a third party to acquire control of our company, even if a change of control would be beneficial to our shareholders. In addition, provisions of our articles of incorporation may make an acquisition of us more difficult. Our articles of incorporation authorize the issuance by our Board of Directors of blank check preferred stock without shareholder approval. Such shares of preferred stock could be given voting rights, dividend rights, liquidation rights or other similar rights superior to those of our common stock, making a takeover of us more difficult and expensive. We also have adopted a shareholder rights plan, commonly known as a poison pill, which could result in the significant dilution of the proportionate ownership of any person that engages in an unsolicited attempt to take over our company and, accordingly, could discourage potential acquirers. In addition to discouraging takeovers, the anti-takeover provisions of Florida law and our articles of incorporation, as well as our shareholder rights plan, may have the impact of reducing the market value of our common stock.

Failure to maintain effective internal controls in accordance with Section 404 of the Sarbanes-Oxley Act of 2002 could have an adverse effect on our business and the trading price of our common stock.

If we fail to maintain the adequacy of our internal controls, in accordance with the requirements of Section 404 of the Sarbanes-Oxley Act of 2002, as such standards are modified, supplemented or amended from time to time, our exposure to fraud and errors in accounting and financial reporting could materially increase. Also, inadequate internal controls would likely prevent us from concluding on an ongoing basis that we have effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act of 2002. Such failure to achieve and maintain effective internal controls could adversely impact our business and the price of our common stock.

We may issue additional debt securities that could limit our operating flexibility and negatively affect the value of our common stock.

In the future, we may issue additional debt securities which may be governed by an indenture or other instrument containing covenants that could place restrictions on the operation of our business and the execution of our business strategy in addition to the restrictions on our business already contained in the agreements governing our existing debt. In addition, we may choose to issue debt that is convertible or

Table of Contents

exchangeable for other securities, including our common stock, or that has rights, preferences and privileges senior to our common stock. Because any decision to issue debt securities will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of any future debt financings and we may be required to accept unfavorable terms for any such financings. Accordingly, any future issuance of debt could dilute the interest of holders of our common stock and reduce the value of our common stock.

Because we have no current plans to pay dividends, shareholders will benefit from an investment in our common stock only if it appreciates in value.

We currently intend to retain our future earnings, if any, to finance the further expansion and continued growth of our business and do not have any current plans to pay any cash dividends. As a result, the success of an investment in our common stock will depend upon any future appreciation in its value. There is no guarantee that our common stock will appreciate in value or even maintain the price at which shareholders purchase their shares.

Item 1B. *Unresolved Staff Comments*

None.

Item 2. *Properties*

Our corporate offices are located in Boca Raton, Florida, under a 10 1/2 -year lease which was renewed in October 2007. The current lease has two 5-year renewal options and expires in March 2018. In addition, we lease office space for our eastern regional office in Charlotte, North Carolina; our central regional office in New Braunfels, Texas; and our western regional office in Carlsbad, California. We also lease office space in Sydney, Australia, in Sandton, South Africa, and in Berkshire, England, through our overseas affiliates to support our Australian, South African, and UK operations, respectively. We consider our office space adequate for our current operations.

See the Facilities listing under Item 1 for a list of the correctional, detention and mental health properties we own or lease in connection with our operations.

Item 3. *Legal Proceedings*

On September 15, 2006, a jury in an inmate wrongful death lawsuit in a Texas state court awarded a \$47.5 million verdict against us. In October 2006, the verdict was entered as a judgment against us in the amount of \$51.7 million. The lawsuit, captioned Gregorio de la Rosa, Sr., et al., v. Wackenhut Corrections Corporation, (cause no. 02-110) in the District Court, 404th Judicial District, Willacy County, Texas, is being administered under the insurance program established by The Wackenhut Corporation, our former parent company, in which we participated until October 2002. Policies secured by us under that program provide \$55.0 million in aggregate annual coverage. In October 2009, this case was settled in an amount within the insurance coverage limits and the insurer has now paid the settlement amount. On February 8, 2010, the Court of Appeals, 13th District of Texas, entered judgment dismissing the appeal and the case has been concluded.

In June 2004, we received notice of a third-party claim for property damage incurred during 2001 and 2002 at several detention facilities that our Australian subsidiary formerly operated. The claim (No. SC 656 of 2006 to be heard by the Supreme Court of the Australian Capital Territory) relates to property damage caused by detainees at the detention facilities. The notice was given by the Australian government's insurance provider and did not specify the amount of damages being sought. In August 2007, legal proceedings in this matter were formally commenced when we were served with notice of a complaint filed against us by the Commonwealth of Australia seeking damages of up to approximately AUD 18 million or \$16.2 million, plus interest. We believe that we have several defenses to the

allegations underlying the litigation and the amounts sought and intend to vigorously defend our rights with respect to this matter. We have established a reserve based on our estimate of the most probable loss based on the facts and circumstances known to date and the advice of our legal counsel in connection with this matter. Although the outcome of this matter cannot be

Table of Contents

predicted with certainty, based on information known to date and our preliminary review of the claim, we believe that, if settled unfavorably, this matter could have a material adverse effect on our financial condition, results of operations and cash flows. We are uninsured for any damages or costs that we may incur as a result of this claim, including the expenses of defending the claim.

The nature of our business exposes us to various types of claims or litigation against us, including, but not limited to, civil rights claims relating to conditions of confinement and/or mistreatment, sexual misconduct claims brought by prisoners or detainees, medical malpractice claims, claims relating to employment matters (including, but not limited to, employment discrimination claims, union grievances and wage and hour claims), property loss claims, environmental claims, automobile liability claims, indemnification claims by our customers and other third parties, contractual claims and claims for personal injury or other damages resulting from contact with our facilities, programs, personnel or prisoners, including damages arising from a prisoner's escape or from a disturbance or riot at a facility. Except as otherwise disclosed above, we do not expect the outcome of any pending claims or legal proceedings to have a material adverse effect on our financial condition, results of operations or cash flows.

During the fourth fiscal quarter of 2009, the Internal Revenue Service (IRS) completed its examination of our U.S. federal income tax returns for the years 2002 through 2005. Following the examination, the IRS notified us that it proposes to disallow a deduction that we realized during the 2005 tax year. We have appealed this proposed disallowed deduction with the IRS's appeals division and believe we have valid defenses to the IRS's position. However, if the disallowed deduction were to be sustained on appeal, it could result in a potential tax exposure of up to \$15.4 million. We believe in the merits of our position and intend to defend our rights vigorously, including our rights to litigate the matter if it cannot be resolved favorably at the IRS's appeals level. If this matter is resolved unfavorably, it may have a material adverse effect on our financial position, results of operations and cash flows.

Item 4. *Submission of Matters to a Vote of Security Holders*

No matters were submitted to a vote of our shareholders during the quarter ended January 3, 2010.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our common stock trades on the New York Stock Exchange under the symbol GEO. The following table shows the high and low prices for our common stock, as reported by the New York Stock Exchange, for each of the four quarters of fiscal years 2009 and 2008. The prices shown have been rounded to the nearest \$1/100. The approximate number of shareholders of record as of February 16, 2010 is 113, which includes shares held in street name.

Quarter	2009		2008	
	High	Low	High	Low
First	\$ 19.25	\$ 11.18	\$ 28.71	\$ 22.01
Second	18.56	13.06	29.48	22.10
Third	20.56	17.22	26.96	18.00
Fourth	22.41	19.75	21.62	12.65

We did not buy back any of our common stock during 2009 or 2008. We did not pay any cash dividends on our common stock for fiscal years 2009 and 2008. Future dividends, if any, will depend, on our future earnings, our capital requirements, our financial condition and on such other factors as our Board of Directors may take into consideration. On February 22, 2010, we announced that our Board of Directors approved a stock repurchase program for up to \$80.0 million of GEO common stock effective through March 31, 2011. See the Liquidity and Capital Resources section in Item 7 of Management's Discussion and Analysis for further description of our stock repurchase program. In addition to these factors, the indenture governing our \$250.0 million 73/4% Senior Notes, and our Senior Credit Facility also place material restrictions on our ability to pay dividends. See the Liquidity and Capital Resources section in Item 7 of Management's Discussion and Analysis and Note 13-Debt in Item 8 Financial Statements and Supplementary Data, for further description of these restrictions.

Equity Compensation Plan Information

The following table sets forth information about our common stock that may be issued upon the exercise of options, warrants and rights under all of our equity compensation plans as of January 3, 2010, including our 1994 Second Stock Option Plan, our 1999 Stock Option Plan, our 2006 Stock Incentive Plan and our 1995 Non-Employee Director Stock Option Plan. Our shareholders have approved all of these plans.

(1) Our fiscal year ends on the Sunday closest to the calendar year end. The fiscal year ended January 3, 2010 contained 53 weeks.

(2) Compensated resident days are calculated as follows: (a) for per diem rate facilities the number of beds occupied by residents on a daily basis during the fiscal year; and (b) for fixed rate facilities the capacity of the facility multiplied by the number of days the facility was in operation during the fiscal year.

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

Introduction

The following discussion and analysis provides information which management believes is relevant to an assessment and understanding of our consolidated results of operations and financial condition. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of numerous factors including, but not limited to, those described above under *Item 1A. Risk Factors*, and *Forward-Looking Statements Safe Harbor* below. The discussion should be read in conjunction with the consolidated financial statements and notes thereto.

We are a leading provider of government-outsourced services specializing in the management of correctional, detention and mental health and residential treatment facilities in the United States, Australia, South Africa, the United Kingdom and Canada. We operate a broad range of correctional and detention facilities including maximum, medium and minimum security prisons, immigration detention centers,

Table of Contents

minimum security detention centers and mental health and residential treatment facilities. Our correctional and detention management services involve the provision of security, administrative, rehabilitation, education, health and food services, primarily at adult male correctional and detention facilities. Our mental health and residential treatment services involve the delivery of quality care, innovative programming and active patient treatment, primarily at privatized state mental health facilities. We also develop new facilities based on contract awards, using our project development expertise and experience to design facilities, construct and finance what we believe are state-of-the-art facilities that maximize security and efficiency.

As of the fiscal year ended January 3, 2010, we managed 57 facilities totaling approximately 52,800 beds worldwide and had an additional 4,325 beds under development at three facilities, including an expansion and renovation of one vacant facility which we own, the expansion of one facility we currently own and operate and a new 2,000-bed facility which we will manage upon completion. For the fiscal year ended January 3, 2010, we had consolidated revenues of \$1.1 billion and we maintained an average companywide facility occupancy rate of 94.6%.

Contract Awards and Facility Activations

On March 29, 2009, we completed the intake of 192 detainees in the expansion of the 576-bed Robert A. Deyton Detention Facility in Lovejoy, Georgia. We manage this facility under a 20-year contract, inclusive of three five-year option periods, with the Office of the Federal Detention Trustee. We lease this facility from Clayton County under a 20-year agreement, with two five-year renewal options and house detainees under custody of the United States Marshals Service.

In April 2009, GEO Australia, our wholly owned subsidiary, was awarded a new contract by the New South Wales, Department of Corrective Services for the continued management and operation of the 790-bed Junee Correctional Centre. GEO Australia has managed this minimum-to-medium security center since its opening in 1993. The new contract has a term of 15 years, inclusive of renewal options.

On April 23, 2009, we announced a contract award by ICE for the continued management of the Broward Transition Center, which we own, located in Deerfield Beach, Florida. The new contract has an initial term of one year, effective April 1, 2009, with four one-year renewal option periods. Under the terms of the new agreement, the contract capacity at this detention center was increased from 600 to 700 beds, and the transportation responsibilities will be expanded.

Also in April 2009, we opened the new \$62.0 million Florida Civil Commitment Center replacement facility in Arcadia, Florida, which we refer to as FCCC. The new facility has a capacity of 720 residents, and it was specifically designed to provide treatment services to sexually violent predators in a highly secure facility. FCCC is operated by GEO Care, our wholly-owned subsidiary, under a management contract with the Florida Department of Children and Families.

On May 4, 2009, we announced that we executed a contract with Bexar County, Texas Commissioners' Court for the continued operation of the 688-bed Central Texas Detention Facility located in San Antonio, Texas. This facility, which is owned by Bexar County, houses detainees predominately for the U.S. Marshals Service. We have managed this facility since 1988. The new contract will have a term of ten years and became effective April 29, 2009.

On June 29, 2009, we announced that our wholly owned U.K. subsidiary, GEO UK, assumed management functions at the 260-bed Harmondsworth Immigration Removal Centre located in London, England. Our subsidiary manages and operates this removal centre under a three-year contract with the United Kingdom Border Agency. Additionally, this removal centre will be expanded by 360 beds bringing its capacity to 620 beds when the expansion is completed in June 2010.

On July 1, 2009, we announced the opening of a 384-bed expansion of the 1,500-bed Graceville Correctional Facility in Graceville, Florida. We operate this correctional facility under a managed-only contract with the State of Florida Department of Management Services and completed intake of inmates during the third quarter of 2009.

Table of Contents

On October 1, 2009, our wholly-owned Australian subsidiary announced that it had been selected by Corrective Services New South Wales to operate and manage the 823-bed Parklea Correctional Centre in Australia. The contract has a term of five years with one three-year extension option. We began operating this facility on October 31, 2009.

On October 20, 2009, we announced a contract award by ICE for the continued management of our Northwest Detention Center located in Tacoma, Washington. This detention center houses immigration detainees for ICE. The new contract has an initial term of one year effective October 24, 2009, with four one-year renewal option periods. Under the terms of the new agreement, the contract capacity at this detention center was increased from 1,030 to 1,575 beds, and the transportation responsibilities will be expanded.

Critical Accounting Policies

We believe that the accounting policies described below are critical to understanding our business, results of operations and financial condition because they involve the more significant judgments and estimates used in the preparation of our consolidated financial statements. We have discussed the development, selection and application of our critical accounting policies with the audit committee of our Board of Directors, and our audit committee has reviewed our disclosure relating to our critical accounting policies in this Management's Discussion and Analysis of Financial Condition and Results of Operations.

Our consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States. As such, we are required to make certain estimates, judgments and assumptions that we believe are reasonable based upon the information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. We routinely evaluate our estimates based on historical experience and on various other assumptions that our management believes are reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. If actual results significantly differ from our estimates, our financial condition and results of operations could be materially impacted.

Other significant accounting policies, primarily those with lower levels of uncertainty than those discussed below, are also critical to understanding our consolidated financial statements. The notes to our consolidated financial statements contain additional information related to our accounting policies and should be read in conjunction with this discussion.

Revenue Recognition

Facility management revenues are recognized as services are provided under facility management contracts with approved government appropriations based on a net rate per day per inmate or on a fixed monthly rate. Certain of our contracts have provisions upon which a portion of the revenue is based on our performance of certain targets, as defined in the specific contract. In these cases, we recognize revenue when the amounts are fixed and determinable and the time period over which the conditions have been satisfied has lapsed.

Construction revenues are recognized from our contracts with certain customers to perform construction and design services (project development services) for various facilities. In these instances, we act as the primary developer and subcontract with bonded National and/or Regional Design Build Contractors. These construction revenues are recognized as earned on a percentage of completion basis measured by the percentage of costs incurred to date as compared to the estimated total cost for each contract. Provisions for estimated losses on uncompleted contracts and changes to cost estimates are made in the period in which we determine that such losses and changes are probable. Typically, we enter into fixed price contracts and do not perform additional work unless approved change orders are in place. Costs attributable to unapproved change orders are expensed in the period in which the costs are incurred if we

believe that it is not probable that the costs will be recovered through a change in the contract price. If we believe that it is probable that the costs will be recovered through a change in the contract price, costs related to unapproved change orders are expensed in the period in which they are incurred, and contract revenue is recognized to the extent of the costs

Table of Contents

incurred. Revenue in excess of the costs attributable to unapproved change orders is not recognized until the change order is approved. Changes in job performance, job conditions, and estimated profitability, including those arising from contract penalty provisions, and final contract settlements, may result in revisions to estimated costs and income, and are recognized in the period in which the revisions are determined. As the primary contractor, we are exposed to the various risks associated with construction, including the risk of cost overruns. Accordingly, we record our construction revenue on a gross basis and include the related cost of construction activities in Operating Expenses.

In instances where we provide project development services and subsequent management services, we evaluate these arrangements to determine if there are multiple elements that require separate accounting treatment and could result in a deferral of revenues. Generally, our arrangements result in no delivered elements at the onset of the agreement but rather these elements are delivered over the contract period as the project development and management services are performed. Project development services are not provided separately to a customer without a management contract and therefore, the value of the project development deliverable, is determined using the residual method.

Reserves for Insurance Losses

The nature of our business exposes us to various types of third-party legal claims, including, but not limited to, civil rights claims relating to conditions of confinement and/or mistreatment, sexual misconduct claims brought by prisoners or detainees, medical malpractice claims, claims relating to employment matters (including, but not limited to, employment discrimination claims, union grievances and wage and hour claims), property loss claims, environmental claims, automobile liability claims, contractual claims and claims for personal injury or other damages resulting from contact with our facilities, programs, personnel or prisoners, including damages arising from a prisoner's escape or from a disturbance or riot at a facility. In addition, our management contracts generally require us to indemnify the governmental agency against any damages to which the governmental agency may be subject in connection with such claims or litigation. We maintain a broad program of insurance coverage for these general types of claims, except for claims relating to employment matters, for which we carry no insurance. There can be no assurance that our insurance coverage will be adequate to cover all claims to which we may be exposed.

We currently maintain a general liability policy and excess liability policy for all U.S. corrections operations with limits of \$62.0 million per occurrence and in the aggregate. A separate \$35.0 million limit applies to medical professional liability claims arising out of correctional healthcare services. Our wholly owned subsidiary, GEO Care, is insured under their own program for general liability and medical professional liability with a specific loss limit of \$35.0 million per occurrence and in the aggregate. We are uninsured for any claims in excess of these limits. For most casualty insurance policies, we carry substantial deductibles or self-insured retentions \$3.0 million per occurrence for general liability and hospital professional liability, \$2.0 million per occurrence for workers' compensation and \$1.0 million per occurrence for automobile liability. We also maintain insurance to cover property and other casualty risks including, workers' compensation, environmental liability and automobile liability.

With respect to our operations in South Africa, the United Kingdom and Australia, we utilize a combination of locally-procured insurance and global policies to meet contractual insurance requirements and protect the Company. Our Australian subsidiary is required to carry tail insurance on a general liability policy providing an extended reporting period through 2011 related to a discontinued contract.

In addition, certain of our facilities located in Florida and determined by insurers to be in high-risk hurricane areas carry substantial windstorm deductibles. Since hurricanes are considered unpredictable future events, no reserves have been established to pre-fund for potential windstorm damage. Limited commercial availability of certain types of insurance relating to windstorm exposure in coastal areas and earthquake exposure mainly in California may prevent us from insuring some of our facilities to full replacement value.

Of the reserves discussed above, our most significant insurance reserves relate to workers' compensation and general liability claims. These reserves are undiscounted and were \$27.2 million and \$25.5 million as of January 3, 2010 and December 28, 2008, respectively. We use statistical and actuarial methods to estimate

Table of Contents

amounts for claims that have been reported but not paid and claims incurred but not reported. In applying these methods and assessing their results, we consider such factors as historical frequency and severity of claims at each of our facilities, claim development, payment patterns and changes in the nature of our business, among other factors. Such factors are analyzed for each of our business segments. Our estimates may be impacted by such factors as increases in the market price for medical services and unpredictability of the size of jury awards. We also may experience variability between our estimates and the actual settlement due to limitations inherent in the estimation process, including our ability to estimate costs of processing and settling claims in a timely manner as well as our ability to accurately estimate our exposure at the onset of a claim. Because we have high deductible insurance policies, the amount of our insurance expense is dependent on our ability to control our claims experience. If actual losses related to insurance claims significantly differ from our estimates, our financial condition, results of operations and cash flows could be materially impacted.

Income Taxes

Deferred income taxes are determined based on the estimated future tax effects of differences between the financial statement and tax basis of assets and liabilities given the provisions of enacted tax laws. Significant judgments are required to determine the consolidated provision for income taxes. Deferred income tax provisions and benefits are based on changes to the assets or liabilities from year to year. Realization of our deferred tax assets is dependent upon many factors such as tax regulations applicable to the jurisdictions in which we operate, estimates of future taxable income and the character of such taxable income. Based on our estimate of future earnings and our favorable earnings history, management currently expects full realization of the deferred tax assets net of any recorded valuation allowances. Additionally, judgment must be made as to certain tax positions which may not be fully sustained upon review by tax authorities. If actual circumstances differ from our assumptions, adjustments to the carrying value of deferred tax assets or liabilities may be required, which may result in an adverse impact on the results of our operations and our effective tax rate. Valuation allowances are recorded related to deferred tax assets based on the more likely than not criteria. Management has not made any significant changes to the way we account for our deferred tax assets and liabilities in any year presented in the consolidated financial statements. To the extent that the provision for income taxes increases/decreases by 1% of income before income taxes, equity in earnings of affiliate and discontinued operations, consolidated income from continuing operations would have decreased/increased by \$1.0 million, \$0.9 million and \$0.6 million, respectively, for the years ended January 3, 2010, December 28, 2008 and December 30, 2007.

Property and Equipment

As of January 3, 2010, we had \$998.6 million in long-lived property and equipment held for use. Property and equipment are stated at cost, less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets. Buildings and improvements are depreciated over 2 to 40 years. Equipment and furniture and fixtures are depreciated over 3 to 10 years. Accelerated methods of depreciation are generally used for income tax purposes. Leasehold improvements are amortized on a straight-line basis over the shorter of the useful life of the improvement or the term of the lease. We perform ongoing evaluations of the estimated useful lives of the property and equipment for depreciation purposes. The estimated useful lives are determined and continually evaluated based on the period over which services are expected to be rendered by the asset. Maintenance and repairs are expensed as incurred. Interest is capitalized in connection with the construction of correctional and detention facilities. Capitalized interest is recorded as part of the asset to which it relates and is amortized over the asset's estimated useful life.

We review long-lived assets to be held and used for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be fully recoverable. If a long-lived asset is part of a group that includes other assets, the unit of accounting for the long-lived asset is its group. Generally, we group our assets by

facility for the purposes of considering whether any impairment exists. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the asset or asset group and its eventual disposition. When considering the future cash flows of a facility, we make assumptions based on historical experience with our customers, terminal growth rates and

Table of Contents

weighted average cost of capital. While these estimates do not generally have a material impact on the impairment charges associated with managed-only facilities, the sensitivity increases significantly when considering the impairment on facilities that are either owned or leased by us. Events that would trigger an impairment assessment include deterioration of profits for a business segment that has long-lived assets, or when other changes occur that might impair recovery of long-lived assets such as the termination of a management contract. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less costs to sell. Measurement of an impairment loss for long-lived assets that management expects to hold and use is based on the fair value of the asset.

Impact of Future Accounting Pronouncements

The following accounting standards have implementation dates subsequent to the fiscal year ended January 3, 2010 and as such, have not yet been adopted by us:

In October 2009, the FASB issued ASU No. 2009-13 which provides amendments to revenue recognition criteria for separating consideration in multiple element arrangements. As a result of these amendments, multiple deliverable arrangements will be separated more frequently than under existing GAAP. The amendments, among other things, establish the selling price of a deliverable, replace the term fair value with selling price and eliminate the residual method so that consideration would be allocated to the deliverables using the relative selling price method. This amendment also significantly expands the disclosure requirements for multiple element arrangements. This guidance will become effective for us prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. We do not anticipate that the adoption of this standard will have a material impact on our financial position, results of operations or cash flows.

In December 2009, the FASB issued ASU No. 2009-17, previously known as FAS No. 167, Amendments to FASB Interpretation No. FIN 46(R) (SFAS No. 167). ASU No. 2009-17 amends the manner in which entities evaluate whether consolidation is required for VIEs. The consolidation requirements under the revised guidance require us to consolidate a VIE if the entity has all three of the following characteristics (i) the power, through voting rights or similar rights, to direct the activities of a legal entity that most significantly impact the entity's economic performance, (ii) the obligation to absorb the expected losses of the legal entity (iii) the right to receive the expected residual returns of the legal entity. Further, this guidance requires that companies continually evaluate VIEs for consolidation, rather than assessing based upon the occurrence of triggering events. As a result of adoption, which becomes effective for interim and annual periods beginning after November 15, 2009, companies are required to enhance disclosures about how their involvement with a VIE affects its financial statements and exposure to risks. We do not anticipate that the adoption of this standard will have a material impact on our financial position, results of operations and cash flows.

Results of Operations

The following discussion should be read in conjunction with our consolidated financial statements and the notes to the consolidated financial statements accompanying this report. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited to, those described under Item 1A. Risk Factors and those included in other portions of this report.

The discussion of our results of operations below excludes the results of our discontinued operations for all periods presented.

For the purposes of the discussion below, 2009 means the 53 weeks fiscal year ended January 3, 2010, 2008 means the 52 week fiscal year ended December 28, 2008, and 2007 means the 52 weeks fiscal year ended December 30, 2007. Our fiscal quarters in the fiscal years discussed below are referred to as First Quarter, Second Quarter, Third Quarter

and Fourth Quarter.

Table of Contents

2009 versus 2008

Revenues

	2009	% of Revenue	2008 (Dollars in thousands)	% of Revenue	\$ Change	% Change
U.S. corrections	\$ 784,066	68.7%	\$ 711,038	68.2%	\$ 73,028	10.3%
International services	137,171	12.0%	128,672	12.3%	8,499	6.6%
GEO Care	121,818	10.7%	117,399	11.3%	4,419	3.8%
Facility construction and design	98,035	8.6%	85,897	8.2%	12,138	14.1%
Total	\$ 1,141,090	100.0%	\$ 1,043,006	100.0%	\$ 98,084	9.4%

U.S. corrections

The increase in revenues for U.S. corrections in 2009 compared to 2008 is primarily attributable to project activations, capacity increases and per diem rate increases at existing facilities and new management contracts. The most significant increases to revenue were as follows: (i) revenues increased \$24.1 million in total due to the activation of three new contracts in Third and Fourth Quarter 2008 for the management of Joe Corley Detention Facility in Conroe, Texas, Northeast New Mexico Detention Facility in Clayton, New Mexico and Maverick County Detention Facility in Maverick, Texas; (ii) revenues increased \$24.6 million in 2009 as a result of our opening of our Rio Grande Detention Center in Laredo, Texas in Fourth Quarter 2008; (iii) revenues increased \$6.1 million as a result of the 500-bed expansion of East Mississippi Corrections Facility in Meridian, Mississippi, which was completed in October 2008; (iv) revenues increased \$5.1 million at the Robert A. Deyton Detention Facility in Lovejoy, Georgia as a result of the 192-bed activation in January 2009; (v) revenues increased \$6.1 million at the Broward Transition Center due to an increase in per diem rates and population; (vi) we experienced an increase of revenues of \$9.9 million related to contract modifications and additional services at our South Texas Detention Complex in Pearsall, Texas; (vii) approximately \$8.2 million of the increase is attributable to per diem increases, other contract modifications, award fees and population increases. Overall, we did experience slight increases over the 52-week period ended December 28, 2008 related to the additional week in the 53-week period ended January 3, 2010. These increases were offset by a decrease in revenues of \$20.6 million due to the termination of our management contract at the Sanders Estes Unit in Venus, Texas, Newton County Correctional Center in Newton, Texas, Jefferson County Downtown Jail in Beaumont, Texas, Fort Worth Community Corrections Facility in Fort Worth, Texas, and the Tri-County Justice & Detention Center in Ullin, Illinois.

The number of compensated mandays in U.S. corrections facilities increased by 1.2 million to 14.5 million mandays in 2009 from 13.3 million mandays in 2008 due to the addition of new facilities and capacity increases. We look at the average occupancy in our facilities to determine how we are managing our available beds. The average occupancy is calculated by taking compensated mandays as a percentage of capacity. The average occupancy in our U.S. correction and detention facilities was 94.6% of capacity in 2009, excluding the terminated contract for Tri-County Justice & Detention Center which was terminated effective August 2008. The average occupancy in our U.S. correction and detention facilities was 96.4% in 2008 not taking into account the 1,221 beds activated in 2009 at four facilities in our U.S. Corrections segment.

International services

Revenues for our international services segment during 2009 increased over the prior year due to several reasons including: (i) new contracts in Australia and in the United Kingdom for the management of the Parklea Correctional Centre in Sydney, Australia and the Harmondsworth Immigration Removal Centre in London, England which contributed an incremental \$4.1 million and \$8.1 million of revenues, respectively, (ii) our contract in South Africa for the management of Kutama-Sinthumule Correcional Centre contributed an increase in revenues over the prior year of \$1.2 million mainly due to contractual increases linked to the South African inflationary index, and (iii) we also experienced an increase in revenues of \$4.8 million, in aggregate,

Table of Contents

at certain facilities managed by our Australian subsidiary due to contractual increases linked to the inflationary index. These increases were offset by unfavorable fluctuations in foreign exchange currency rates for the Australian Dollar, South African Rand and British Pound. These unfavorable fluctuations in foreign exchange rates resulted in a decrease of revenues over 2008 of \$9.9 million.

GEO Care

The increase in revenues for GEO Care in 2009 compared to 2008 is primarily attributable to the revenues from our newly acquired contract for the management of Columbia Regional Care Center in Columbia, South Carolina which generated \$7.5 million of revenues. We also experienced combined increases of \$3.1 million at South Florida Evaluation and Treatment in Miami, Florida and Treasure Coast Forensic Treatment Center in Stuart, Florida as a result of increases in population. These increases were offset by the loss of revenues from the termination of our management contract with the South Florida Evaluation and Treatment Center Annex in July 2008. This contract generated \$7.5 million of revenues in 2008.

Facility construction and design

The increase in revenues from the Facility construction and design segment in 2009 compared to 2008 is mainly due to an increase of \$91.3 million related to the construction of Blackwater River Correctional Facility, in Milton, Florida which commenced in First Quarter 2009. This increase over the same period in the prior year was offset by decreases in construction activities at four facilities: (i) the completion of construction for the South Florida Evaluation and Treatment Center in Miami, Florida in Third Quarter 2008 decreased revenues by \$6.8 million; (ii) the completion of construction of our Northeast New Mexico Detention Facility in Clayton, New Mexico in Third Quarter 2008 decreased revenues by \$15.4 million, (iii) the completion of Florida Civil Commitment Center in Second Quarter decreased revenues by \$33.9 million and (iv) the completion of Graceville Correctional Facility in Third Quarter 2009 which decreased revenues by \$21.9 million.

Operating Expenses

		% of Segment		% of Segment		% Change
	2009	Revenues	2008	Revenues	\$ Change	
	(Dollars in thousands)					
U.S. corrections	\$ 565,291	72.1%	\$ 516,963	72.7%	\$ 48,328	9.3%
International services	127,964	93.3%	116,985	90.9%	10,979	9.4%
GEO Care	106,447	87.4%	103,140	87.9%	3,307	3.2%
Facility construction and design	97,654	99.6%	85,571	99.6%	12,083	14.1%
Total	\$ 897,356	78.6%	\$ 822,659	78.9%	\$ 74,697	9.1%

Operating expenses consist of those expenses incurred in the operation and management of our correctional, detention and mental health and GEO Care facilities and expenses incurred in our Facility construction and design segment.

U.S. corrections

Overall, operating expenses remained fairly consistent with fiscal 2008 with slight decreases as a percentage of revenues due to decreases in travel costs of \$3.3 million in fiscal 2009. The most significant increases to operating expense were related to new management contracts, new facility activations and increases in population from expansion beds which were activated during the fiscal year. Such projects include Joe Corley Detention Facility, Northeast New Mexico Detention Facility, Maverick County Detention Facility, Rio Grande Detention Center, East Mississippi Corrections Facility and Robert A. Deyton Detention Facility. These contracts contributed \$40.8 million of the increase to our operating expenses. Certain of our other facilities also experienced increases in expenses associated with increases in population and contract modifications resulting in additional services. These increases were partially offset by decreases in expenses as a

Table of Contents

result of facility closures for Jefferson County Downtown Jail, Newton County Correctional Center, Fort Worth Community Corrections Facility, Sanders Estes Unit and Tri County Justice & Detention Center.

International services

Expenses increased at all of our international subsidiaries consistent with the revenue increases. The costs associated with the new contracts in the United Kingdom and Australia accounted for a combined increase of \$15.1 million, including start up costs of \$3.0 million. Start up costs are non-recurring costs for training, additional staffing requirements, overtime and other costs of transitioning a new management contract. The increase in expenses in 2009 was significantly offset by the impact of foreign exchange currency rates. Overall, operating expenses for international services facilities increased slightly as a percentage of segment revenues in 2009 compared to 2008 mainly due to the start up costs in Australia and the United Kingdom.

GEO Care

Operating expenses for residential treatment increased \$3.3 million in 2009 as compared to 2008. The increase in expenses in 2009 was primarily due to our acquisition of Columbia Regional Care Center in Fourth Quarter. We also experienced higher costs at Florida Civil Commitment Center due to start up costs associated with the transfer of patients into the new facility.

Facility construction and design

Generally, the operating expenses from the Facility construction and design segment are offset by a similar amount of revenues. Our overall increase in operating expenses relates to the construction of the Blackwater River Correctional Facility which increased expenses by \$91.3 million. This increase was offset by decreases related to the completion of several facilities and expansions including South Florida Evaluation and Treatment Center, Northeast New Mexico Detention Facility, Florida Civil Commitment Center and Graceville Correctional Facility.

Depreciation and amortization

	2009	% of Segment Revenue	2008 (Dollars in thousands)	% of Segment Revenue	\$ Change	% Change
U.S. corrections	\$ 35,955	4.6%	\$ 34,010	4.8%	\$ 1,945	5.7%
International services	1,448	1.1%	1,556	1.2%	(108)	(6.9)%
GEO Care	1,903	1.6%	1,840	1.6%	63	3.4%
Facility construction and design						
Total	\$ 39,306	3.4%	\$ 37,406	3.6%	\$ 1,900	5.1%

US Corrections

The increase in depreciation and amortization for U.S. corrections in 2009 compared to 2008 is primarily attributable to the opening of our Rio Grande Detention Center in Fourth Quarter 2008 which increased depreciation expense by \$1.9 million.

International Services

Depreciation and amortization as a percentage of segment revenue in 2009 was consistent with 2008.

GEO Care

The increase in depreciation and amortization for GEO Care in 2009 compared to 2008 is primarily due to our acquisition of Just Care.

Table of Contents**Other Unallocated Operating Expenses**

	2009	% of Revenue	2008	% of Revenue	\$ Change	% Change
	(Dollars in thousands)					
General and Administrative Expenses	\$ 69,240	6.1%	\$ 69,151	6.6%	\$ 89	0.1%

General and administrative expenses comprise substantially all of our other unallocated expenses. General and administrative expenses consist primarily of corporate management salaries and benefits, professional fees and other administrative expenses. General and administrative expenses remained consistent in the fiscal year ended January 3, 2010 as compared to the fiscal year ended December 28, 2008 but decreased as a percentage of revenues. The decrease as a percentage of revenues is primarily due to corporate cost savings initiatives including those to reduce travel costs which were \$2.3 million less in 2009 and also by the increase in revenues which increased at a higher rate than general and administrative expenses. These savings were partially offset by increases in employee benefits and labor costs.

Non Operating Income and Expense***Interest Income and Interest Expense***

	2009	% of Revenue	2008	% of Revenue	\$ Change	% Change
	(Dollars in thousands)					
Interest Income	\$ 4,943	0.4%	\$ 7,045	0.7%	\$ (2,102)	(29.8)%
Interest Expense	\$ 28,518	2.5%	\$ 30,202	2.9%	\$ (1,684)	(5.6)%

The majority of our interest income generated in 2009 and 2008 is from the cash balances at our Australian subsidiary. The decrease in the current period over the same period last year is mainly attributable to currency exchange rates and, to a lesser extent, lower interest rates.

The decrease in interest expense of \$1.7 million is primarily attributable to a decrease in LIBOR rates which reduced the interest expense on our Term Loan B by \$4.0 million. This decrease was offset by increased expense related to the amortization of deferred financing fees associated with the amendments to our Senior Credit Facility. This increase resulted in incremental amortization of \$1.6 million. In addition, we also had more indebtedness outstanding in 2009 related to our 73/4% Senior Notes which resulted in an increase to interest expense of \$1.9 million. Capitalized interest in 2009 and 2008 was \$4.9 million and \$4.3 million, respectively. Total borrowings at January 3, 2010 and December 28, 2008, excluding non-recourse debt and capital lease liabilities, were \$457.5 million and \$382.1 million, respectively.

In November 2009, we entered into interest rate swap agreements with respect to a notional amount of \$75.0 million of the 73/4% Senior Notes which resulted in a savings in interest expense of approximately \$0.5 million for the fiscal quarter ended January 3, 2010.

Provision for Income Taxes

	2009	Effective Rate (Dollars in thousands)	2008	Effective Rate
Income Tax Provision	\$ 41,991	40.1%	\$ 33,803	37.3%

The effective tax rate during 2009 was 40.1%, compared to 37.3% in 2008, due to an increase in the reserve for uncertain tax positions. The effective tax rate in 2008 included one-time state tax benefits.

Equity in Earnings of Affiliate

	2009	% of Revenue	2008	% of Revenue (Dollars in thousands)	\$ Change	% Change
Equity in Earnings of Affiliate	\$ 3,517	0.3%	\$ 4,623	0.4%	\$ (1,106)	(23.9)%

Table of Contents

Equity in earnings of affiliates represent the earnings of SACS in 2009 and 2008 and reflects an overall decrease in earnings related to unfavorable foreign currency exchange rates partially offset by additional revenues due to contractual increases.

2008 versus 2007***Revenues***

	2008	% of Revenue	2007	% of Revenue	\$ Change	% Change
	(Dollars in thousands)					
U.S. corrections	\$ 711,038	68.2%	\$ 629,339	64.5%	\$ 81,699	13.0%
International services	128,672	12.3%	127,991	13.1%	681	0.5%
GEO Care	117,399	11.3%	110,165	11.3%	7,234	6.6%
Facility construction and design	85,897	8.2%	108,804	11.1%	(22,907)	(21.1)%
Total	\$ 1,043,006	100.0%	\$ 976,299	100.0%	\$ 66,707	6.8%

U.S. corrections

The increase in revenues for U.S. corrections in 2008 compared to 2007 is primarily attributable to new facility openings, capacity increases at existing facilities and full year operations relative to recent openings and expansions from 2007. The most significant increases to revenue were as follows: (i) revenues increased \$56.2 million in total due to the opening or expansion of seven facilities in 2008 which include activations at the Robert A. Deyton Detention Facility, Rio Grande Detention Center, Joe Corley Detention Facility and the Northeast New Mexico Detention Facility and expansions of the LaSalle Detention Facility, Central Arizona Correctional Facility and at the East Mississippi Correctional Facility; (ii) revenues increased \$28.8 million in 2008 due to increases at our California facilities, South Texas Detention Complex, New Castle Correctional Facility and at the Northwest Detention Center related to contract modifications and enhanced services; (iii) revenues increased by \$21.6 million due to the full year operation of 2007 activations and expansions that occurred at the Graceville Correctional Facility, Val Verde Correctional Facility and the Moore Haven Correctional Facility. These and other increases were offset by decreases in revenues of \$34.8 million due to the termination of our management contracts at Taft Correctional Institution, Coke County Juvenile Justice Center and Dickens County Correctional Center.

The number of compensated mandays in U.S. corrections facilities increased by 805,200 to 13.3 million mandays in 2008 from 12.5 million mandays in 2007 due to the addition of new facilities and capacity increases. We look at the average occupancy in our facilities to determine how we are managing our available beds. The average occupancy is calculated by taking compensated mandays as a percentage of capacity. The average occupancy in our U.S. correction and detention facilities was 95.7% of capacity in 2008, excluding the terminated contracts for the Coke County Juvenile Justice Center, the Dickens County Correctional Center, and the Taft Correctional Institution. The average occupancy in our U.S. correction and detention facilities was 96.1% in 2007, excluding our new contracts at the Joe Corley Detention Facility, Rio Grande Detention Center, Robert A. Deyton Detention Facility and the Maverick County Detention Facility.

International services

Revenues for our International services segment during fiscal year 2008 increased by \$4.8 million over fiscal year 2007 due to increases in contractual rates at some of our facilities in Australia and also in South Africa. We also experienced a favorable increase in revenues of \$1.9 million over the prior year due to the overall strengthening of the Australian dollar during fiscal year 2008. This favorable variance was offset during fiscal year 2008 by a decrease in revenues of \$2.9 million related to the expansion in 2007 of the Campsfield House Immigration Removal Centre which was completed in September 2008. We also experienced a decrease in revenues in fiscal year 2008 compared to fiscal year 2007 due to unfavorable foreign

Table of Contents

exchange currency fluctuations in the South African Rand and the British Pound which resulted in a combined decrease of \$3.2 million.

GEO Care

The increase in revenues for GEO Care in 2008 compared to 2007 is primarily attributable to two items: (i) the Treasure Coast Forensic Center in Stuart, Florida which commenced operation in March 2007, increased revenues by \$7.5 million; and (ii) the Florida Civil Commitment Center in Arcadia, Florida contributed an increase of \$2.6 million, both due to increases in population. This favorable increase was partially offset by \$2.4 million due to the loss of the contract with the SFETC Annex.

Facility construction and design

The decrease in revenues from construction activities is primarily attributable to the completion of construction at two facilities: (i) the South Florida Evaluation and Treatment Center in Miami, Florida, which was completed in Second Quarter 2008, decreased revenues by \$19.3 million; and (ii) the Northeast New Mexico Detention Facility in Clayton, New Mexico which was completed in Third Quarter 2008 and decreased revenues by \$25.6 million. These decreases over the same period in the prior year were offset by increases in construction revenue for the expansion of the Graceville Correctional Facility in Graceville, Florida which commenced in First Quarter 2008 and increased revenues by \$4.0 million and the construction of the Florida Civil Commitment Center in Arcadia, Florida which increased revenues by \$22.1 million.

Operating Expenses

	2008	% of Segment Revenues	2007 (Dollars in thousands)	% of Segment Revenues	\$ Change	% Change
U.S. corrections	\$ 516,963	72.7%	\$ 464,617	73.8%	\$ 52,346	11.3%
International services	116,985	90.9%	116,259	90.8%	726	0.6%
GEO Care	103,140	87.9%	98,557	89.5%	4,583	4.7%
Facility construction and design	85,571	99.6%	109,070	100.2%	(23,499)	(21.5)%
Total	\$ 822,659	78.9%	\$ 788,503	80.8%	\$ 34,156	4.3%

Operating expenses consist of those expenses incurred in the operation and management of our correctional, detention and mental health and GEO Care facilities and expenses incurred in our Facility construction and design segment.

U.S. corrections

The increase U.S. corrections operating expenses in 2008 compared to 2007 is primarily attributable to new facility openings, capacity increases at existing facilities and the normalization of openings and expansions from 2007. The most significant increases to operating expenses were as follows: (i) operating expenses increased \$43.3 million in total due to the opening or expansion of seven facilities in 2008 which include activations at the Robert A. Deyton

Detention Facility, Rio Grande Detention Facility, Joe Corley Detention Facility and the Northeast New Mexico Detention Facility and expansions of the LaSalle Detention Center, Central Arizona Correctional Facility and at the East Mississippi Correctional Facility; (ii) operating expenses increased \$19.2 million in 2008 due to increases at our California facilities, South Texas Detention Center, New Castle Correctional Facility and at the Northwest Detention Center related to contract modifications and enhanced services; (iii) operating expenses increased by \$17.9 million due to the normalization of 2007 activations and expansions that occurred at the Graceville Correctional Facility, Val Verde Correctional Facility and the Moore Haven Correctional Facility; (iv) operating expenses increased by \$3.6 million for the year ended December 28, 2008 due to changes in general liability and workers compensation reserves. The remaining increase in operating expenses is the result of increases in wages and employee benefits as well as general increases in operating costs. These increases were partially offset by decreases of \$31.0 million related

Table of Contents

to the termination of our management contracts at Coke County Juvenile Justice Center, Taft Correctional Institution and Dickens County Correctional Center which were terminated prior to fiscal 2008. Beginning 2008, we changed our vacation policy for certain employees allowing these employees to use their vacation regardless of their service period but within the fiscal year. The 2008 change in our vacation policy resulted in a \$3.7 million decrease in vacation expense in the fiscal year ended 2008 compared to the fiscal year ended 2007.

International services

Operating expenses for international services facilities remained consistent as a percentage of segment revenues in 2008 compared to 2007. On December 22, 2008, we announced the closure of our U.K.-based transportation division, Recruitment Solutions International which we refer to as RSI. We purchased RSI, which provided transportation services to The Home Office Nationality and Immigration Directorate, for \$2.3 million, including transaction costs, in 2006. The operating loss of this business are reported as discontinued operations and is not presented in the segment information above.

GEO Care

Operating expenses for residential treatment increased \$4.6 million in 2008 as compared to 2007 primarily attributable to increased population at the Treasure Coast Forensic Center and Florida Civil Commitment Center as mentioned above. This positive variance was offset by a decrease due to the closure of our 100-bed South Florida Evaluation and Treatment Center Annex which was effective July 31, 2008. Overall, expenses as a percentage of revenue partly decreased as a result of a decrease in startup costs which were \$0.6 million in 2008 compared to \$1.9 million in 2007.

Facility construction and design

Operating expenses for facility construction and design decreased \$23.5 million during fiscal year 2008 compared to fiscal year 2007 primarily due to a decrease in costs associated with our facilities under construction as a result of reduced activity as discussed above.

Depreciation and amortization

	2008	% of Segment Revenue	2007 (Dollars in thousands)	% of Segment Revenue	\$ Change	% Change
U.S. corrections	\$ 34,010	4.8%	\$ 30,401	4.8%	\$ 3,609	11.9%
International services	1,556	1.2%	1,351	1.1%	205	15.2%
GEO Care	1,840	1.6%	1,466	1.3%	374	25.5%
Facility construction and design						
Total	\$ 37,406	3.6%	\$ 33,218	3.4%	\$ 4,188	12.6%

US Corrections

The increase in depreciation and amortization for U.S. corrections in 2008 compared to 2007 is primarily attributable to the following items: (i) depreciation increased \$0.9 million due to the reactivation and expansion of the LaSalle Detention Facility discussed above, (ii) depreciation increased \$0.7 million related to the opening of the Rio Grande Detention Center discussed above and, (iii) depreciation increased \$0.8 million due to the expansion of the Val Verde Correctional Facility discussed above.

International Services

Depreciation and amortization as a percentage of segment revenue in 2008 was consistent with 2007.

Table of Contents***GEO Care***

The increase in depreciation and amortization for GEO Care in 2008 compared to 2007 is primarily due to the Treasure Coast Forensic Treatment Center expansion in September 2007.

Other Unallocated Operating Expenses***General and Administrative Expenses***

	2008	% of Revenue	2007	% of Revenue	\$ Change	% Change
	(Dollars in thousands)					
General and Administrative Expenses	\$ 69,151	6.6%	\$ 64,492	6.6%	\$ 4,659	7.2%

General and administrative expenses comprise substantially all of our other unallocated expenses. General and administrative expenses consist primarily of corporate management salaries and benefits, professional fees and other administrative expenses. General and administrative expenses increased by \$4.7 million in the fiscal year ended December 28, 2008 as compared to the fiscal year ended December 30, 2007, and remained consistent as a percentage of revenues. The increase in general and administrative costs is mainly due to increases in corporate travel and increases in direct labor costs as a result of increased wages and related increases in employee benefits.

Non Operating Income and Expense***Interest Income and Interest Expense***

	2008	% of Revenue	2007	% of Revenue	\$ Change	% Change
	(Dollars in thousands)					
Interest Income	\$ 7,045	0.7%	\$ 8,746	0.9%	\$ (1,701)	(19.4)%
Interest Expense	\$ 30,202	2.9%	\$ 36,051	3.7%	\$ (5,849)	(16.2)%

The decrease in interest income in 2008 compared to 2007 is primarily attributable to the decrease in interest rates for the period as well as the decrease in cash in 2008 as compared to 2007. In First Quarter 2009, one of the lenders elected to prepay its interest rate swap obligation to us at the call option price which approximated the fair value of the interest rate swap on the call dates.

The decrease in interest expense is primarily attributable to a significant decrease in LIBOR rates. We also experienced an increase in the amount of interest capitalized in connection with the construction of our correctional and detention facilities. Capitalized interest is recorded as part of the asset to which it relates and is amortized over the asset's estimated useful life. During fiscal years ended 2008 and 2007, we capitalized \$4.3 million and \$2.9 million of interest expense, respectively. This was partially offset by an increase in debt in 2008 as compared to 2007.

Provision for Income Taxes

	2008	Effective Rate (Dollars in thousands)	2007	Effective Rate
Income Tax Provision	\$ 33,803	37.3%	\$ 22,049	38.0%

The effective tax rate during 2008 was 37.3% as a result of one-time state tax benefits of \$1.6 million. We expect our tax rate in the future to increase to 38.7% as these benefits are non-recurring in nature.

Equity in Earnings of Affiliate

	2008	% of Revenue	2007	% of Revenue (Dollars in thousands)	\$ Change	% Change
Equity in Earnings of Affiliate	\$ 4,623	0.4%	\$ 2,151	0.2%	\$ 2,472	114.9%

Table of Contents

Equity in earnings of affiliates represent the earnings of SACS in 2008 and 2007 and reflect contractual increases partially offset by unfavorable foreign currency translation. These results also include the impact of a one-time tax benefit of \$1.9 million.

Financial Condition

Capital Requirements

Our current cash requirements consist of amounts needed for working capital, debt service, supply purchases, investments in joint ventures, and capital expenditures related to the development of new correctional, detention and/or mental health facilities. In addition, some of our management contracts require us to make substantial initial expenditures of cash in connection with opening or renovating a facility. Generally, these initial expenditures are subsequently fully or partially recoverable as pass-through costs or are billable as a component of the per diem rates or monthly fixed fees to the contracting agency over the original term of the contract. Additional capital needs may also arise in the future with respect to possible acquisitions, other corporate transactions or other corporate purposes.

We are currently developing a number of projects using company financing. We estimate that the remaining capital expenditures related to these existing capital projects will be \$37.7 million to be spent in 2010. Capital expenditures related to facility maintenance costs are expected to range between \$10.0 million and \$15.0 million. In addition to these current estimated capital requirements for 2010, we are currently in the process of bidding on, or evaluating potential bids for the design, construction and management of a number of new projects. In the event that we win bids for these projects and decide to self-finance their construction, our capital requirements in 2010 and/or 2011 could materially increase.

Liquidity and Capital Resources

We plan to fund all of our capital needs, including our capital expenditures, from cash on hand, cash from operations, borrowings under our Senior Credit Facility and any other financings which our management and Board of Directors, in their discretion, may consummate. Our primary source of liquidity to meet these requirements is cash flow from operations and borrowings from the \$330.0 million Revolver under our Senior Credit Facility (see discussion below).

As of January 3, 2010, we had a total of \$457.5 million of consolidated debt outstanding, excluding \$112.0 million of non-recourse debt and capital lease liability balances of \$15.1 million. As of January 3, 2010, we also had outstanding eight letters of guarantee totaling \$8.9 million under separate international credit facilities. Based on our debt covenants and the amount of indebtedness we have outstanding, as of February 16, 2010, we had the ability to borrow an additional approximately \$217 million under our Revolver after considering debt covenants. We also have the ability to borrow \$200.0 million under the accordion feature of our Senior Credit Facility subject to lender demand and market conditions. Our significant debt service obligations could have material consequences. See Risk Factors Risks Related to Our High Level of Indebtedness.

Our management believes that cash on hand, cash flows from operations and borrowings under our Senior Credit Facility will be adequate to support our capital requirements for 2010 and 2011 disclosed above. However, we are currently in the process of bidding on, or evaluating potential bids for, the design, construction and management of a number of new projects. In the event that we win bids for these projects and decide to self-finance their construction, our capital requirements in 2010 and/or 2011 could materially increase. In that event, our cash on hand, cash flows from operations and borrowings under the Senior Credit Facility may not provide sufficient liquidity to meet our capital needs through 2010 and 2011 and we could be forced to seek additional financing or refinance our existing indebtedness. There can be no assurance that any such financing or refinancing would be available to us on terms equal to or more favorable than our current financing terms, or at all.

In the future, our access to capital and ability to compete for future capital-intensive projects will also be dependent upon, among other things, our ability to meet certain financial covenants in the indenture governing

Table of Contents

the 73/4% Senior Notes and in our Senior Credit Facility. A substantial decline in our financial performance could limit our access to capital pursuant to these covenants and have a material adverse affect on our liquidity and capital resources and, as a result, on our financial condition and results of operations. In addition to these foregoing potential constraints on our capital, a number of state government agencies have been suffering from budget deficits and liquidity issues. While the company expects to be in compliance with its debt covenants, if these constraints were to intensify, our liquidity could be materially adversely impacted as could our compliance with these debt covenants.

We have entered into individual executive retirement agreements with our two top executives. These agreements provide each executive with a lump sum payment upon retirement. Under the agreements, the executives may retire at any time after reaching the age of 55. Both of the executives reached the eligible retirement age of 55 in 2005. However, under the retirement agreements, retirement may be taken at any time at the individual executive's discretion. In the event that both executives were to retire in the same year, we believe we will have funds available to pay the retirement obligations from various sources, including cash on hand, operating cash flows or borrowings under our Revolver. Based on our current capitalization, we do not believe that making these payments in any one period, whether in separate installments or in the aggregate, would materially adversely impact our liquidity.

On February 22, 2010, we announced that our Board of Directors approved a stock repurchase program for up to \$80.0 million of our common stock effective through March 31, 2011. The stock repurchase is intended to be implemented through purchases made from time to time in the open market or in privately negotiated transactions, in accordance with applicable Securities and Exchange requirements. The program may also include repurchases from time to time from executive officers or directors of vested restricted stock and/or vested stock options. The stock repurchase program does not obligate us to purchase any specific amount of our common stock and may be suspended or extended at any time at the our discretion. As of February 16, 2010, GEO had 51.6 million shares outstanding.

We are also exposed to various commitments and contingencies which may have a material adverse effect on our liquidity. See Item 3. Legal Proceedings.

The Senior Credit Facility

On October 5, 2009, on October 15, 2009, and again on December 4, 2009, we completed certain amendments to our Senior Credit Facility. These amendments, among other things, modified the aggregate size of the Revolver from \$240.0 million to \$330.0 million, extended the maturity of the Revolver to 2012, modified the permitted maximum total leverage and maximum senior secured leverage financial ratios, eliminated the annual capital expenditures limitation and made several technical revisions to certain definitions therein. Our Senior Credit Facility is now comprised of a \$155.0 million Term Loan B bearing interest at LIBOR plus 2.00% and maturing in January 2014 and the \$330.0 million Revolver which currently bears interest at LIBOR plus 3.25% and matures in September 2012. Also, upon the execution these amendments we have the ability to increase our borrowing capacity under the Senior Credit facility by another \$200.0 million subject to lender demand, market conditions and existing borrowings.

As of January 3, 2010, we had \$155.0 million outstanding under the Term Loan B, and our \$330.0 million Revolver had \$58.0 million outstanding in loans, \$47.5 million outstanding in letters of credit and approximately \$217 million available for borrowings, which we refer to as our Unused Revolver, after considering our debt covenants. We intend to use future borrowings from the Revolver for the purposes permitted under the Senior Credit Facility, including for general corporate purposes.

Indebtedness under the Revolver bears interest in each of the instances below at the stated rate:

Interest Rate under the Revolver

LIBOR borrowings	LIBOR plus 2.75% to 3.50%.
Base rate borrowings	Prime Rate plus 1.75% to 2.50%.
Letters of credit	2.75% to 3.50%.
Unused Revolver	0.50% to 0.75%.

Table of Contents

We are required to maintain the following Total Leverage Ratios, as computed at the end of each fiscal quarter for the immediately preceding four quarter-period:

Period	Total Leverage Ratio
Through the penultimate day of fiscal year 2010	≤ 4.00 to 1.00
From the last day of the fiscal year 2010 through the penultimate day of fiscal year 2011	≤ 3.75 to 1.00
From the last day of the fiscal year 2011 through the penultimate day of fiscal year 2012	≤ 3.25 to 1.00
Thereafter	≤ 3.00 to 1.00

The Credit Agreement also requires us to maintain the following Senior Secured Leverage Ratios, as computed at the end of each fiscal quarter for the immediately preceding four quarter-period:

Period	Senior Secured Leverage Ratio
Through the penultimate day of fiscal year 2011	≤ 3.00 to 1.00
From the last day of the fiscal year 2011 through the penultimate day of fiscal year 2012	≤ 2.50 to 1.00
From the last day of the fiscal year 2012 through the penultimate day of fiscal year 2013	≤ 2.25 to 1.00
Thereafter	≤ 2.00 to 1.00

The foregoing covenants replace the corresponding covenants previously included in the credit agreement governing our Senior Credit Facility (referred to as the Credit Agreement).

All of the obligations under the Senior Credit Facility are unconditionally guaranteed by each of our existing material domestic subsidiaries. The Senior Credit Facility and the related guarantees are secured by substantially all of our present and future tangible and intangible assets and all present and future tangible and intangible assets of each guarantor, as specified in the Credit Agreement. In addition, the Senior Credit Facility contains certain customary representations and warranties, and certain customary covenants that restrict our ability to be party to certain transactions, as further specified in the Credit Agreement. Events of default under the Senior Credit Facility include, but are not limited to, (i) our failure to pay principal or interest when due, (ii) our material breach of any representation or warranty, (iii) covenant defaults, (iv) bankruptcy, (v) cross default to certain other indebtedness, (vi) unsatisfied final judgments over a specified threshold, (vii) material environmental state of claims which are asserted against it, and (viii) a change of control. Our failure to comply with any of the covenants under its Senior Credit Facility could cause an event of default under such documents and result in an acceleration of all of outstanding senior secured indebtedness. We believe we were in compliance with all of the covenants of the Senior Credit Facility as of January 3, 2010.

8 1/4% Senior Notes

On October 5, 2009, we announced the commencement of a cash tender offer for our \$150.0 million aggregate principal amount of 8 1/4% Senior Notes. Holders who validly tendered their Notes before the early tender date, which expired at 5:00 p.m. Eastern Standard time on October 19, 2009, received a 103% cash payment for their note which included an early tender premium of 3%. Holders who tendered their notes after the early tender date, but before the

expiration date of 11:59 p.m., Eastern Standard time on November 2, 2009 which we refer to as the Early Expiration Date, received 100% cash payment for their note. Holders of the 8 1/4% Senior Notes accepted for purchase received accrued and unpaid interest up to, but not including, the applicable payment date. Valid early tenders received by us represented \$130.2 million aggregate principal amount of the 8 1/4% Senior Notes which was 86.8% of the outstanding principal balance. We settled these notes on October 20, 2009 by paying \$136.9 million to the trustee. Also on October 20, 2009, we announced the call for redemption for all notes not tendered by the Expiration Date. We financed the tender offer and redemption with a portion of the net cash proceeds from our offering of \$250.0 million aggregate principal 7 3/4% Senior Notes, which closed on October 20, 2009. As of November 19, 2009, all of the 8 1/4% Senior Notes had been redeemed.

Table of Contents***73/4% Senior Notes***

On October 20, 2009, we completed a private offering of \$250.0 million in aggregate principal amount of our 73/4% Senior Notes due 2017. These senior unsecured notes pay interest semi-annually in cash in arrears on April 15 and October 15 of each year, beginning on April 15, 2010. We realized net proceeds of \$246.4 million at the close of the transaction, net of the discount on the notes of \$3.6 million. We used the net proceeds of the offering to fund the repurchase of all of its 81/4% Senior Notes due 2013 and pay down part the Revolver.

The 73/4% Senior Notes and the guarantees will be unsecured, unsubordinated obligations of GEO and the guarantors and will rank as follows: pari passu with any unsecured, unsubordinated indebtedness of GEO and the guarantors; senior to any future indebtedness of GEO and the guarantors that is expressly subordinated to the notes and the guarantees; effectively junior to any secured indebtedness of GEO and the guarantors, including indebtedness under the our Senior Credit Facility, to the extent of the value of the assets securing such indebtedness; and effectively junior to all obligations of our subsidiaries that are not guarantors. After October 15, 2013, we may, at our option, redeem all or a part of the 73/4% Senior Notes upon not less than 30 nor more than 60 days notice, at the redemption prices (expressed as percentages of principal amount) set forth below, plus accrued and unpaid interest and Liquidated Damages, if any, on the 73/4% Senior Notes redeemed, to the applicable redemption date, if redeemed during the 12-month period beginning on October 15 of the years indicated below:

Year	Percentage
2013	103.875%
2014	101.938%
2015 and thereafter	100.000%

Before October 15, 2013, we may redeem some or all of the 73/4% Senior Notes at a redemption price equal to 100% of the principal amount of each note to be redeemed plus a make-whole premium described under Description of Notes Optional Redemption together with accrued and unpaid interest. In addition, at any time prior to October 15, 2012, we may redeem up to 35% of the notes with the net cash proceeds from specified equity offerings at a redemption price equal to 107.750% of the principal amount of each note to be redeemed, plus accrued and unpaid interest, if any, to the date of redemption.

The indenture governing the notes contains certain covenants, including limitations and restrictions on us and our restricted subsidiaries ability to: incur additional indebtedness or issue preferred stock; make dividend payments or other restricted payments; create liens; sell assets; enter into transactions with affiliates; and enter into mergers, consolidations, or sales of all or substantially all of our assets. As of the date of the indenture, all of our subsidiaries, other than CSC of Tacoma, LLC, GEO International Holdings, Inc., certain dormant domestic subsidiaries and all foreign subsidiaries in existence on the date of the indenture, were restricted subsidiaries. In addition, there is a cross-default provision which becomes enforceable upon failure of payment of indebtedness at final maturity. Our unrestricted subsidiaries will not be subject to any of the restrictive covenants in the indenture. We believe we were in compliance with all of the covenants of the Indenture governing the 73/4% Senior Notes as of January 3, 2010.

Non-Recourse Debt***South Texas Detention Complex***

We have a debt service requirement related to the development of the South Texas Detention Complex, a 1,904-bed detention complex in Frio County, Texas acquired in November 2005 from CSC. CSC was awarded the contract in

February 2004 by the Department of Homeland Security, ICE, for development and operation of the detention center. In order to finance its construction, South Texas Local Development Corporation, which we refer to as STLDC, was created and issued \$49.5 million in taxable revenue bonds. Additionally, we have outstanding \$5.0 million of subordinated notes which represents the principal amount of financing provided to STLDC by CSC for initial development. These bonds mature in February 2016 and have fixed coupon rates between 4.11% and 5.07%.

Table of Contents

We have an operating agreement with STLDC, the owner of the complex, which provides us with the sole and exclusive right to operate and manage the detention center. The operating agreement and bond indenture require the revenue from our contract with ICE be used to fund the periodic debt service requirements as they become due. The net revenues, if any, after various expenses such as trustee fees, property taxes and insurance premiums are distributed to us to cover operating expenses and management fees. We are responsible for the entire operations of the facility including all operating expenses and are required to pay all operating expenses whether or not there are sufficient revenues. STLDC has no liabilities resulting from its ownership. The bonds have a ten year term and are non-recourse to us. The bonds are fully insured and the sole source of payment for the bonds is the operating revenues of the center. At the end of the ten year term of the bonds, title and ownership of the facility transfers from STLDC to us. We have determined that we are the primary beneficiary of STLDC and consolidate the entity as a result.

On February 2, 2009, we made a payment of \$4.4 million for the current portion of our periodic debt service requirement in relation to STLDC operating agreement and bond indenture. As of January 3, 2010, the remaining balance of the debt service requirement is \$36.7 million, of which \$4.6 million is due within the next twelve months. Also as of January 3, 2010, included in current restricted cash and non-current restricted cash is \$6.2 million and \$8.2 million, respectively, as funds held in trust with respect to the STLDC for debt service and other reserves.

Northwest Detention Center

On June 30, 2003, CSC arranged financing for the construction of the Northwest Detention Center in Tacoma, Washington, referred to as the Northwest Detention Center, which was completed and opened for operation in April 2004 and acquired by us in November 2005. In connection with the original financing, CSC of Tacoma LLC, a wholly owned subsidiary of CSC, issued a \$57.0 million note payable to the Washington Economic Development Finance Authority, which we refer to as WEDFA, an instrumentality of the State of Washington, which issued revenue bonds and subsequently loaned the proceeds of the bond issuance back to CSC for the purposes of constructing the Northwest Detention Center. The bonds are non-recourse to us and the loan from WEDFA to CSC is non-recourse to us. These bonds mature in February 2014 and have fixed coupon rates between 3.20% and 4.10%.

The proceeds of the loan were disbursed into escrow accounts held in trust to be used to pay the issuance costs for the revenue bonds, to construct the Northwest Detention Center and to establish debt service and other reserves. On October 1, 2009, CSC of Tacoma LLC made a payment from its restricted cash account of \$5.7 million for the current portion of its periodic debt service requirement in relation to the WEDFA bid indenture. As of January 3, 2010, the remaining balance of the debt service requirement is \$31.6 million, of which \$5.9 million is classified as current in the accompanying balance sheet.

As of January 3, 2010, included in current restricted cash and non-current restricted cash is \$7.1 million and \$2.2 million, respectively, of funds held in trust with respect to the Northwest Detention Center for debt service and other reserves.

Australia

In connection with the financing and management of one Australian facility, our wholly owned Australian subsidiary financed the facility's development and subsequent expansion in 2003 with long-term debt obligations, which are non-recourse to us and total \$45.4 million and \$38.1 million at January 3, 2010 and December 28, 2008, respectively. As a condition of the loan, we are required to maintain a restricted cash balance of AUD 5.0 million, which, at January 3, 2010, was \$4.5 million. The term of the non-recourse debt is through 2017 and it bears interest at a variable rate quoted by certain Australian banks plus 140 basis points. Any obligations or liabilities of the subsidiary are matched by a similar or corresponding commitment from the government of the State of Victoria.

Table of Contents***Guarantees***

In connection with the creation of SACS, we entered into certain guarantees related to the financing, construction and operation of the prison. We guaranteed certain obligations of SACS under its debt agreements up to a maximum amount of 60.0 million South African Rand, or \$8.2 million, to SACS' senior lenders through the issuance of letters of credit. Additionally, SACS is required to fund a restricted account for the payment of certain costs in the event of contract termination. We have guaranteed the payment of 60% of amounts which may be payable by SACS into the restricted account and provided a standby letter of credit of 8.4 million South African Rand, or \$1.1 million, as security for our guarantee. Our obligations under this guarantee are indexed to the CPI and expire upon the release from SACS of its obligations in respect of the restricted account under its debt agreements. No amounts have been drawn against these letters of credit, which are included in our outstanding letters of credit under the Revolver.

We have agreed to provide a loan, if necessary, of up to 20.0 million South African Rand, or \$2.7 million, referred to as the Standby Facility, to SACS for the purpose of financing the obligations under the contract between SACS and the South African government. No amounts have been funded under the Standby Facility, and we do not currently anticipate that such funding will be required by SACS in the future. Our obligations under the Standby Facility expire upon the earlier of full funding or release from SACS of its obligations under its debt agreements. The lenders' ability to draw on the Standby Facility is limited to certain circumstances, including termination of the contract.

We have also guaranteed certain obligations of SACS to the security trustee for SACS lenders. We have secured our guarantee to the security trustee by ceding our rights to claims against SACS in respect of any loans or other finance agreements, and by pledging our shares in SACS. Our liability under the guarantee is limited to the cession and pledge of shares. The guarantee expires upon expiration of the cession and pledge agreements.

In connection with a design, build, finance and maintenance contract for a facility in Canada, we guaranteed certain potential tax obligations of a not-for-profit entity. The potential estimated exposure of these obligations is CAD 2.5 million, or \$2.4 million commencing in 2017. We have a liability of \$1.5 million and \$1.3 million related to this exposure as of January 3, 2010 and December 28, 2008, respectively. To secure this guarantee, we purchased Canadian dollar denominated securities with maturities matched to the estimated tax obligations in 2017 to 2021. We have recorded an asset and a liability equal to the current fair market value of those securities on our balance sheet. We do not currently operate or manage this facility.

At January 3, 2010, we also had outstanding eight letters of guarantee totaling \$8.9 million under separate international facilities. We do not have any off balance sheet arrangements.

Derivatives

In November 2009, we executed three interest rate swap agreements in the aggregate notional amount of \$75.0 million. We have designated these interest rate swaps as hedges against changes in the fair value of a designated portion of the 73/4% Senior Notes due 2017 (73/4% Senior Notes) due to changes in underlying interest rates. These interest rate swaps, which have payment, expiration dates and call provisions that mirror the terms of the 73/4% Senior Notes, effectively convert \$75.0 million of the 73/4% Senior Notes into variable rate obligations. Each of the swaps has a termination clause that gives the lender the right to terminate the interest rate swaps at fair market value if they are no longer a lender under the Credit Agreement. In addition to the termination clause, these interest rate swaps also have call provisions which specify that the lender can elect to settle the swap for the call option price. Under these interest rates swaps, we receive a fixed interest rate payment from the financial counterparties to the agreements equal to 73/4% per year calculated on the notional \$75.0 million amount, while we make a variable interest rate payment to the same counterparties equal to the three-month LIBOR plus a fixed margin of between 4.24% and 4.29%, also calculated on the notional \$75.0 million amount. Changes in the fair value of the interest rate

swaps are recorded in earnings along with related designated changes in the value of the Notes. Effective January 6, 2010, we executed a

Table of Contents

fourth swap agreement relative to a notional amount of \$25.0 million of the 73/4% Senior Notes. (See Note 20). There was no material ineffectiveness of our interest rate swaps for the fiscal years presented.

Our Australian subsidiary is a party to an interest rate swap agreement to fix the interest rate on the variable rate non-recourse debt to 9.7%. We have determined the swap to be an effective cash flow hedge. Accordingly, we record the value of the interest rate swap in accumulated other comprehensive income, net of applicable income taxes. There was no ineffectiveness of this interest rate swap for the fiscal years presented. The Company does not expect to enter into any transactions during the next twelve months which would result in the reclassification into earnings or losses associated with this swap currently reported in accumulated other comprehensive loss.

Contractual Obligations and Off Balance Sheet Arrangements

The following is a table of certain of our contractual obligations, as of January 3, 2010, which requires us to make payments over the periods presented.

Contractual Obligations	Total	Payments Due by Period			More Than 5 Years
		Less Than 1 Year	1-3 Years	3-5 Years	
		(In thousands)			
Long-term debt obligations	\$ 250,028	\$ 28	\$	\$	\$ 250,000
Term Loan B	154,963	3,650	7,300	144,013	
Revolver	58,000		58,000		
Capital lease obligations (includes imputed interest)	24,437	1,930	3,866	3,868	14,773
Operating lease obligations	134,460	18,041	31,982	18,501	65,936
Non-recourse debt	113,724	15,241	32,697	36,130	29,656
Estimated interest payments on debt(a)	188,242	30,144	56,087	43,287	58,724
Estimated funding of pension and other post retirement benefits	16,206	10,223	406	543	5,034
Estimated construction commitments	37,700	37,700			
Estimated tax payments for uncertain tax positions(b)	5,116		5,116		
Total	\$ 982,876	\$ 116,957	\$ 195,454	\$ 246,342	\$ 424,123

(a) Due to the uncertainties of future LIBOR rates, the variable interest payments on our credit facility and swap agreements were calculated using a LIBOR rate of .30% based on our estimated interest rates for fiscal 2010.

(b) State income tax payments are reflected net of the federal income tax benefit.

We do not have any additional off balance sheet arrangements which would subject us to additional liabilities.

Cash Flow

Cash and cash equivalents as of January 3, 2010 was \$33.9 million, compared to \$31.7 million as of December 28, 2008. During Fiscal 2009 we used cash flows from operations to fund all of our operating expenses and used cash on

hand, net cash proceeds from the issuance of our 73/4% Senior Notes and cash flow from operations to fund \$149.8 million in capital expenditures

Cash provided by operating activities of continuing operations in 2009, 2008 and 2007 was \$125.1 million, \$74.4 million, and \$75.0 million, respectively. Cash provided by operating activities of continuing operations in 2009 was positively impacted by an increase in net income of \$7.1 million in addition to \$39.3 million of depreciation and amortization expense. These increases reflect the opening of new facilities as previously discussed and improved financial performance at existing facilities. Cash provided by operating activities of continuing operations in 2008 was positively impacted by an increase in net income of \$17.1 million in

Table of Contents

addition to \$37.4 million of depreciation and amortization expense. Cash provided by operating activities of continuing operations in 2007 was positively impacted by an increase in net income of \$11.8 million in addition to \$33.2 million of depreciation and amortization expense.

Cash provided by operating activities of continuing operations was positively impacted in 2009 by a decrease in accounts receivable of \$6.9 million, an increase in our deferred income tax benefits of \$10.0 million, and non-cash expense of \$6.8 million related to the write-off of deferred financing fees and the expenses associated with the tender offer for our 81/4% Senior Notes. Cash provided by operating activities of continuing operations was negatively impacted in 2008 by an increase in accounts receivable of \$29.6 million and more non-cash earnings in the prior year attributable to our investment in our South Africa joint venture, SACS. Cash provided by operating activities of continuing operations was negatively impacted in 2007 by an increase in accounts receivable of \$10.6 million and increases in our deferred income tax provision of \$5.1 million.

Cash used in investing activities of continuing operations in 2009 of \$185.3 million consists of our investment in Just Care Inc, of \$38.4 million as well as capital expenditures of \$149.8 million. Of the aggregate \$149.8 million in capital expenditures, \$138.3 million related to development capital expenditures and approximately \$11.5 million related to maintenance capital expenditures. We are currently developing a number of projects using company financing. We estimate our remaining capital requirements for these projects to be \$37.7 million, which will be spent through 2010.

Cash used in investing activities of continuing operations in 2008 of \$131.6 million includes capital expenditures of \$131.0 million, of which \$119.3 million related to development capital expenditures and approximately \$11.7 million related maintenance capital expenditures. Cash used in investing activities of continuing operations in 2007 was \$518.9 million due to our cash investment in CPT of \$410.5 million and capital expenditures of \$115.2 million.

Cash provided by financing activities in 2009 was \$52.0 million and reflects cash proceeds from the issuance of our 73/4% Senior Notes of \$250.0 million and Revolver borrowings of \$83.0 million. These proceeds were offset by payments of \$150.0 million for repayment of our 81/4% Senior Notes, payments of \$99.0 million on our Revolver and payments on non-recourse debt and Term Loan B of \$17.8 million. Cash proceeds from our 73/4% Senior Notes were primarily used to pay down our 81/4% Senior Notes and our Revolver and to pay down our Revolver. We intend to use cash flows from operations and future borrowings under our Revolver to fund the project discussed above and other projects we may announce during fiscal 2010. We believe the institutions and banks included in our lender group will be able to fund their commitment to our Revolver. However, we can provide no assurance regarding their solvency or ability to honor their commitments. Failure to honor a commitment could materially impact our ability to meet our future capital needs and complete the projects discussed above.

Cash provided by financing activities in 2008 was \$53.7 million and reflects proceeds received from net borrowings of \$74.0 million under our Revolver. Borrowings under our \$240.0 million Revolver were primarily used to fund \$119.3 million of development capital expenditures in fiscal 2008. Cash provided by financing activities in 2007 was \$372.3 million and reflects proceeds received from the equity offering of \$227.5 million as well as cash proceeds of \$387.0 million from our Term Loan B and the Revolver. These cash flows from financing activities are offset by payments on the Term Loan B of \$202.7 million, payments on the Revolver of \$22.0 million and payments on other long term debt of \$12.6 million.

Inflation

We believe that inflation, in general, did not have a material effect on our results of operations during 2009, 2008 and 2007. While some of our contracts include provisions for inflationary indexing, inflation could have a substantial adverse effect on our results of operations in the future to the extent that wages and salaries, which represent our largest expense, increase at a faster rate than the per diem or fixed rates received by us for our management services.

Outlook

The following discussion of our future performance contains statements that are not historical statements and, therefore, constitute forward-looking statements within the meaning of the Private Securities Litigation

Table of Contents

Reform Act of 1995. Our forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those stated or implied in the forward-looking statement. Please refer to Item 1A. Risk Factors in this Annual Report on Form 10-K, the Forward-Looking Statements Safe Harbor, as well as the other disclosures contained in this Annual Report on Form 10-K, for further discussion on forward-looking statements and the risks and other factors that could prevent us from achieving our goals and cause the assumptions underlying the forward-looking statements and the actual results to differ materially from those expressed in or implied by those forward-looking statements.

With state and federal prison populations growing by approximately 16% since 2000, the private corrections industry has played an increasingly important role in addressing U.S. detention and correctional needs. The number of State and Federal prisoners housed in private facilities has increased by 47% since the year 2000 with the Federal government and states such as Arizona, Texas and Florida accounting for a significant portion of the increase. At year-end 2008, 8.0% of the estimated 1.6 million State and Federal prisoners incarcerated in the United States were held in private facilities, up from 6.3% in 2000. In addition to our strong positions in Texas and Florida and in the U.S. market in general, we believe we are the only publicly traded U.S. correctional company with international operations. With the existing operations in South Africa, Australia, and the United Kingdom beginning, we believe that our international presence positions us to capitalize on growth opportunities within the private corrections and detention industry in new and established international markets.

We intend to pursue a diversified growth strategy by winning new customers and contracts, expanding our government services portfolio and pursuing selective acquisition opportunities. We achieve organic growth through competitive bidding that begins with the issuance by a government agency of a request for proposal, or RFP. We primarily rely on the RFP process for organic growth in our U.S. and international corrections operations as well as in our mental health and residential treatment services. We believe that our long operating history and reputation have earned us credibility with both existing and prospective clients when bidding on new facility management contracts or when renewing existing contracts. Our success in the RFP process has resulted in a pipeline of new projects with significant revenue potential. In 2009, we activated eight new or expansion projects representing 2,698 additional beds. This compares to the eight new or expansion projects activated in 2008 representing 6,120 new beds. As of January 3, 2010, we have three facilities under various stages of development or pending commencement of operations which represent 4,325 beds. In addition to pursuing organic growth through the RFP process, we will from time to time selectively consider the financing and construction of new facilities or expansions to existing facilities on a speculative basis without having a signed contract with a known customer. We also plan to leverage our experience to expand the range of government-outsourced services that we provide. We will continue to pursue selected acquisition opportunities in our core services and other government services areas that meet our criteria for growth and profitability.

Revenue

Domestically, we continue to be encouraged by the number of opportunities that have recently developed in the privatized corrections and detention industry. Overcrowding at corrections facilities in various states, most recently California and Arizona and increased demand for bed space at federal prisons and detention facilities are two of the factors that have contributed to the greater number of opportunities for privatization. However, these positive trends may in the future be impacted by government budgetary constraints. According to the National Conference on State Legislatures, as of November 30, 2009, thirty-nine states were projecting that general fund revenues in fiscal year 2010 will be lower than in fiscal year 2009 and 35 states projected budget gaps in fiscal year 2011 with the sum of those budget imbalances totaling \$55.5 billion. As a result of budgetary pressures, state correctional agencies may pursue a number of cost savings initiatives which may include the early release of inmates, changes to parole laws and sentencing guidelines, and reductions in per diem rates and/or the scope services provided by private operators. These potential cost savings initiatives could have a material adverse impact on our current operations and/or our ability to

pursue new business opportunities. Additionally, if state budgetary constraints, as discussed above, persist or intensify, our state customers' ability to pay us may be impaired and/or we may be forced to renegotiate our management contracts on less favorable terms and our financial condition results of operations or cash flows could be

Table of Contents

materially adversely impacted. We plan to actively bid on any new projects that fit our target profile for profitability and operational risk. Although we are pleased with the overall industry outlook, positive trends in the industry may be offset by several factors, including budgetary constraints, unanticipated contract terminations, contract non-renewals, and/or contract re-bids. Additionally, several of our management contracts are up for renewal and/or re-bid in 2010. Although we have historically had a relative high contract renewal rate, there can be no assurance that we will be able to renew our management contracts scheduled to expire in 2010 on favorable terms, or at all. Also, while we are pleased with our track record in re-bid situations, we cannot assure that we will prevail in any such future situations.

Internationally, in the United Kingdom and in Australia, we recently began the operation and management under two new contracts with an aggregate of 1,083 beds. These projects commenced operations the second half of fiscal year 2009. In South Africa, we have bid on projects for the design, construction and operation of four 3,000-bed prison projects totaling 12,000 beds. Requests for Proposal were issued in December 2008 and we submitted our bids on the projects at the end of May 2009. We expect preferred bidders to be announced in the first half of 2010 and anticipate final close to occur within six months thereafter. No more than two prison projects can be awarded to any one bidder. We believe that additional opportunities will become available in international markets and plan to actively bid on any opportunities that fit our target profile for profitability and operational risk.

With respect to our mental health/residential treatment services business conducted through our wholly-owned subsidiary, GEO Care, we are currently pursuing a number of business development opportunities. In September 2009, we acquired Just Care, and began management of the 354-bed Columbia Care Regional Center in the fourth fiscal quarter. In addition, we continue to expend resources on informing state and local governments about the benefits of privatization and we anticipate that there will be new opportunities in the future as those efforts begin to yield results. We believe we are well positioned to capitalize on any suitable opportunities that become available in this area.

Operating Expenses

Operating expenses consist of those expenses incurred in the operation and management of our correctional, detention and mental health facilities. Labor and related cost represented 52.4% of our operating expenses in the fiscal year 2009. Additional significant operating expenses include food, utilities and inmate medical costs. In 2009, operating expenses totaled 78.6% of our consolidated revenues. Our operating expenses as a percentage of revenue in 2010 will be impacted by the opening of any new facilities. We also expect our results in 2010 to reflect increases to interest expense due to higher rates related to incremental borrowings on our Senior Credit Facility, more average indebtedness and less capitalized interest due to a decrease in construction activity. We also expect increases to depreciation expense due to the carrying costs we will incur for two newly constructed and expanded facilities for which we have no corresponding management contract for the expansion beds. We expect that a portion of these increases may be offset by a savings to depreciation expense. We are currently reviewing the useful lives for our owned facilities and expect that some of the lives of these assets may increase as a result. Overall, excluding any start-up expenses, depreciation expense and interest expense, we anticipate that operating expenses as a percentage of our revenue will remain relatively flat, consistent with our fiscal year ended January 3, 2010.

General and Administrative Expenses

General and administrative expenses consist primarily of corporate management salaries and benefits, professional fees and other administrative expenses. In 2009, general and administrative expenses totaled 6.1% of our consolidated revenues. We expect general and administrative expenses as a percentage of revenue in 2010 to be generally consistent with our general and administrative expenses for 2009. We expect business development costs to remain consistent as we pursue additional business development opportunities in all of our business lines and build the corporate infrastructure necessary to support our mental health residential treatment services business. We also plan to

continue expending resources from time to time on the evaluation of potential acquisition targets.

Forward-Looking Statements Safe Harbor

This report and the documents incorporated by reference herein contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are any statements that are not based on historical information. Statements other than statements of historical facts included in this report, including, without limitation, statements regarding our future financial position, business strategy, budgets, projected costs and plans and objectives of management for future operations, are forward-looking statements. Forward-looking statements generally can be identified by the use of forward-looking terminology such as may, will, expect, anticipate, intend, plan, believe, estimate or continue or the negative of such words or variations of such words and similar expressions. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions, which are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements and we can give no assurance that such forward-looking statements will prove to be correct. Important factors that could cause actual results to differ materially from those expressed or implied by the forward-looking statements, or cautionary statements, include, but are not limited to:

our ability to timely build and/or open facilities as planned, profitably manage such facilities and successfully integrate such facilities into our operations without substantial additional costs;

the instability of foreign exchange rates, exposing us to currency risks in Australia, the United Kingdom, and South Africa, or other countries in which we may choose to conduct our business;

our ability to reactivate the North Lake Correctional Facility;

an increase in unreimbursed labor rates;

our ability to expand, diversify and grow our correctional and mental health and residential treatment services;

our ability to win management contracts for which we have submitted proposals and to retain existing management contracts;

our ability to raise new project development capital given the often short-term nature of the customers commitment to use newly developed facilities;

our ability to estimate the government's level of dependency on privatized correctional services;

our ability to accurately project the size and growth of the U.S. and international privatized corrections industry;

our ability to develop long-term earnings visibility;

our ability to obtain future financing at competitive rates;

our exposure to rising general insurance costs;

our exposure to state and federal income tax law changes internationally and domestically;

our exposure to claims for which we are uninsured;

our exposure to rising employee and inmate medical costs;

our ability to maintain occupancy rates at our facilities;

our ability to manage costs and expenses relating to ongoing litigation arising from our operations;

our ability to accurately estimate on an annual basis, loss reserves related to general liability, workers compensation and automobile liability claims;

our ability to identify suitable acquisitions, and to successfully complete and integrate such acquisitions on satisfactory terms;

Table of Contents

the ability of our government customers to secure budgetary appropriations to fund their payment obligations to us; and

other factors contained in our filings with the Securities and Exchange Commission, or the SEC, including, but not limited to, those detailed in this annual report on Form 10-K, our Form 10-Qs and our Form 8-Ks filed with the SEC.

We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise. All subsequent written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by the cautionary statements included in this report.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

Interest Rate Risk

We are exposed to market risks related to changes in interest rates with respect to our Senior Credit Facility. Payments under the Senior Credit Facility are indexed to a variable interest rate. Based on borrowings outstanding under the Senior Credit Facility portion of \$213.0 million as of January 3, 2010 for every one percent increase in the interest rate applicable to the Senior Credit Facility, our total annual interest expense would increase by \$2.1 million.

In November 2009, we executed three interest rate swap agreements in the aggregate notional amount of \$75.0 million. These interest rate swaps, which have payment, expiration dates and call provisions that mirror the terms of the Notes, effectively convert \$75.0 million of the Notes into variable rate obligations. Under these interest rate swaps, we receive a fixed interest rate payment from the financial counterparties to the agreements equal to 73/4% per year calculated on the notional \$75.0 million amount, while we make a variable interest rate payment to the same counterparties equal to the three-month LIBOR plus a fixed margin of between 4.235% and 4.29%, also calculated on the notional \$75.0 million amount. Effective January 6, 2010, we executed a fourth swap agreement relative to a notional amount of \$25.0 million of our 73/4% Senior Notes (See Note 20). For every one percent increase in the interest rate applicable to our aggregate notional \$100 million of swap agreements relative to the 73/4% Senior Notes, our annual interest expense would increase by \$1.0 million.

We have entered into certain interest rate swap arrangements for hedging purposes, fixing the interest rate on our Australian non-recourse debt to 9.7%. The difference between the floating rate and the swap rate on these instruments is recognized in interest expense within the respective entity. Because the interest rates with respect to these instruments are fixed, a hypothetical 100 basis point change in the current interest rate would not have a material impact on our financial condition or results of operations.

Additionally, we invest our cash in a variety of short-term financial instruments to provide a return. These instruments generally consist of highly liquid investments with original maturities at the date of purchase of three months or less. While these instruments are subject to interest rate risk, a hypothetical 100 basis point increase or decrease in market interest rates would not have a material impact on our financial condition or results of operations.

Foreign Currency Exchange Rate Risk

We are exposed to market risks related to fluctuations in foreign currency exchange rates between the U.S. Dollar, the Australian Dollar, the Canadian Dollar, the South African Rand and the British Pound currency exchange rates. Based upon our foreign currency exchange rate exposure as of January 3, 2010 with respect to our international operations,

every 10 percent change in historical currency rates would have a \$5.0 million effect on our financial position and a \$0.8 million impact on our results of operations over the next fiscal year.

Item 8. *Financial Statements and Supplementary Data*

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

To the Shareholders of
The GEO Group, Inc.:

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States. They include amounts based on judgments and estimates.

Representation in the consolidated financial statements and the fairness and integrity of such statements are the responsibility of management. In order to meet management's responsibility, the Company maintains a system of internal controls and procedures and a program of internal audits designed to provide reasonable assurance that our assets are controlled and safeguarded, that transactions are executed in accordance with management's authorization and properly recorded, and that accounting records may be relied upon in the preparation of financial statements.

The consolidated financial statements have been audited by Grant Thornton LLP, independent registered public accountants, whose appointment by our Audit Committee was ratified by our shareholders. Their report expresses a professional opinion as to whether management's consolidated financial statements considered in their entirety present fairly, in conformity with accounting principles generally accepted in the United States, the Company's financial position and results of operations. Their audit was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States). The effectiveness of our internal control over financial reporting as of January 3, 2010 has been audited by Grant Thornton LLP, independent registered public accountants, as stated in their report which is included in this Form 10-K.

The Audit Committee of the Board of Directors meets periodically with representatives of management, the independent registered public accountants and our internal auditors to review matters relating to financial reporting, internal accounting controls and auditing. Both the internal auditors and the independent registered certified public accountants have unrestricted access to the Audit Committee to discuss the results of their reviews.

**MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL
OVER FINANCIAL REPORTING**

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is a process designed under the supervision of the Company's Chief Executive Officer and Chief Financial Officer that: (i) pertains to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the Company's assets; (ii) provides reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements for external reporting in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures are being made only in accordance with authorization of the Company's management and directors; and (iii) provides reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Management has assessed the effectiveness of the Company's internal control over financial reporting as of January 3, 2010. In making its assessment of internal control over financial reporting, management used the criteria set forth by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission in Internal Control Integrated Framework.

The Company evaluated, with the participation of its Chief Executive Officer and Chief Financial Officer, its internal control over financial reporting as of January 3, 2010, based on the *COSO Internal Control Integrated Framework*. Based on this evaluation, the Company's management concluded that as of January 3, 2010, its internal control over financial reporting is effective in providing reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Grant Thornton LLP, the independent registered public accounting firm that audited the financial statements included in this Annual Report on Form 10-K, has issued an attestation report on our internal control over financial reporting.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders of
The GEO Group, Inc.

We have audited The GEO Group, Inc. and subsidiaries (the Company) internal control over financial reporting as of January 3, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, The GEO Group, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of January 3, 2010, based on criteria established in *Internal Control-Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of The GEO Group, Inc. and subsidiaries as of January 3, 2010 and December 28, 2008, and the related consolidated statements of income, shareholders' equity and comprehensive income and cash flows for each of the three years in the period ended January 3, 2010, and our report dated February 22, 2010 expressed an unqualified opinion on those financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and
Shareholders of The GEO Group, Inc.

We have audited the accompanying consolidated balance sheets of The GEO Group, Inc. and subsidiaries (the Company) as of January 3, 2010 and December 28, 2008, and the related consolidated statements of income, shareholders' equity and comprehensive income and cash flows for each of the three years in the period ended January 3, 2010. Our audits of the basic financial statements included the financial statement schedule listed in the index appearing under Item 15. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of The GEO Group, Inc. and subsidiaries as of January 3, 2010 and December 28, 2008, and the results of their operations and their cash flows for each of the three years in the period ended January 3, 2010 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Note 18, the Company adopted new accounting guidance on January 1, 2007 related to the accounting for uncertainty in income tax reporting.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), The GEO Group, Inc. and subsidiaries' internal control over financial reporting as of January 3, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated February 22, 2010 expressed an unqualified opinion thereon.

THE GEO GROUP, INC.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
For the Fiscal Years Ended January 3, 2010, December 28, 2008, and December 30, 2007**

1. Summary of Business Operations and Significant Accounting Policies

The GEO Group, Inc., a Florida corporation, and subsidiaries (the Company, or GEO) is a leading developer and manager of privatized correctional, detention and mental health residential treatment services facilities located in the United States, Australia, South Africa, the United Kingdom and Canada. The Company operates a broad range of correctional and detention facilities including maximum, medium and minimum security prisons, immigration detention centers, minimum security detention centers and mental health and residential treatment facilities. We also provide secure transportation services for offender and detainee populations as contracted. As of the fiscal year ended January 3, 2010, GEO managed 57 facilities totaling approximately 52,800 beds worldwide and had an additional 4,325 beds under development at three facilities, including an expansion and renovation of one vacant facility which we own, the expansion of one facility we currently own and operate and a new 2,000-bed facility which we will manage upon completion.

The consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States. The significant accounting policies of the Company are described below.

Fiscal Year

The Company's fiscal year ends on the Sunday closest to the calendar year end. Fiscal year 2009 included 53 weeks. Fiscal years 2008 and 2007 each included 52 weeks. The Company reports the results of its South African equity affiliate, South African Custodial Services Pty. Limited, (SACS), and its consolidated South African entity, South African Custodial Management Pty. Limited (SACM) on a calendar year end, due to the availability of information.

Basis of Presentation

The consolidated financial statements include the accounts of the Company and all controlled subsidiaries. Investments in 50% owned affiliates, which the Company does not control, are accounted for under the equity method of accounting. Intercompany transactions and balances have been eliminated in consolidation.

Reclassifications

Certain prior year amounts related to the Company's noncontrolling interest in consolidated subsidiary have been reclassified to reflect the implementation of recent accounting rules related to the accounting for such interests in consolidated financial statements, which the Company adopted on December 29, 2008. All prior year amounts have been conformed to the current year presentation.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company's significant estimates include reserves for self-insured retention related to general liability insurance, workers' compensation

insurance, auto liability insurance, medical malpractice insurance, employer group health insurance, percentage of completion and estimated cost to complete for construction projects, stock based compensation, and allowance for doubtful accounts. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. While the Company believes that such estimates are reasonable when considered in conjunction with the consolidated financial statements taken as a

Table of Contents

THE GEO GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

whole, the actual amounts of such estimates, when known, will vary from these estimates. If actual results significantly differ from the Company's estimates, the Company's financial condition and results of operations could be materially impacted.

Cash and Cash Equivalents

Cash and cash equivalents include all interest-bearing deposits or investments with original maturities of three months or less. The Company maintains cash and cash equivalents with various financial institutions. These financial institutions are located throughout the United States, Australia, South Africa, Canada and the United Kingdom. A significant portion of the Company's unrestricted cash held at the Company and its subsidiaries is maintained with a small number of banks and, accordingly, the Company is subject to credit risk.

Accounts Receivable

The Company extends credit to the governmental agencies it contracts with and other parties in the normal course of business as a result of billing and receiving payment for services thirty to sixty days in arrears. Further, the Company regularly reviews outstanding receivables, and provides estimated losses through an allowance for doubtful accounts. In evaluating the level of established loss reserves, the Company makes judgments regarding its customers' ability to make required payments, economic events and other factors. As the financial condition of these parties change, circumstances develop or additional information becomes available, adjustments to the allowance for doubtful accounts may be required. The Company also performs ongoing credit evaluations of customers' financial condition and generally does not require collateral. The Company maintains reserves for potential credit losses, and such losses traditionally have been within its expectations.

Notes Receivable

The Company has notes receivable from its former joint venture partner in the United Kingdom related to a subordinated loan extended to the joint venture partner while an active member of the partnership. The balance outstanding as of January 3, 2010 and December 28, 2008 was \$3.5 million and \$3.4 million, respectively. The notes bear interest at a rate of 13%, have semi-annual payments due June 15 and December 15 through June 2018.

Restricted Cash

The Company's restricted cash balances are attributable to: (i) amounts held in escrow or in trust in connection with the 1,904-bed South Texas Detention Complex in Frio County, Texas and the 1,545-bed Northwest Detention Center in Tacoma, Washington, (ii) certain cash restriction requirements at the Company's wholly owned Australian subsidiary related to the non recourse debt and other guarantees, and (iii) amounts restricted in December 2009 to fund the GEO Group Deferred Compensation Plan. See Notes 13 and 16.

Property and Equipment

Property and equipment is stated at cost, less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets. Buildings and improvements are depreciated over 2 to 40 years. Equipment and furniture and fixtures are depreciated over 3 to 10 years. Accelerated methods of

depreciation are generally used for income tax purposes. Leasehold improvements are amortized on a straight-line basis over the shorter of the useful life of the improvement or the term of the lease. The Company performs ongoing evaluations of the estimated useful lives of the property and equipment for depreciation purposes. The estimated useful lives are determined and continually evaluated based on the

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

period over which services are expected to be rendered by the asset. Maintenance and repairs are expensed as incurred. Interest is capitalized in connection with the construction of correctional and detention facilities. Capitalized interest is recorded as part of the asset to which it relates and is amortized over the asset's estimated useful life.

The Company reviews long-lived assets to be held and used for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be fully recoverable. If a long-lived asset is part of a group that includes other assets, the unit of accounting for the long-lived asset is its group. Generally, the Company groups its assets by facility for the purposes of considering whether any impairment exists. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the asset or asset group and its eventual disposition. When considering the future cash flows of a facility, the Company makes assumptions based on historical experience with its customers, terminal growth rates and weighted average cost of capital. While these estimates do not generally have a material impact on the impairment charges associated with managed-only facilities, the sensitivity increases significantly when considering the impairment on facilities that are either owned or leased by the Company. Events that would trigger an impairment assessment include deterioration of profits for a business segment that has long-lived assets, or when other changes occur that might impair recovery of long-lived assets such as the termination of a management contract. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less costs to sell. Measurement of an impairment loss for long-lived assets that management expects to hold and use is based on the fair value of the asset.

Assets Held Under Capital Leases

Assets held under capital leases are recorded at the lower of the net present value of the minimum lease payments or the fair value of the leased asset at the inception of the lease. Amortization expense is recognized using the straight-line method over the shorter of the estimated useful life of the asset or the term of the related lease and is included in depreciation expense.

Goodwill and Other Intangible Assets

Acquired intangible assets are recognized separately if the benefit of the intangible asset is obtained through contractual or other legal rights, or if the intangible asset can be sold, transferred, licensed, rented or exchanged, regardless of the Company's intent to do so. The Company has intangible assets as a result of business combinations in 2009 and in prior fiscal years and also in connection with the purchase of additional shares in the Company's consolidated joint venture. The Company's finite-lived intangible assets are primarily related to acquired facility management contracts and are amortized on a straight-line basis over the expected life of each contractual relationship. These intangible assets are amortized using a straight-line method. The Company reviews finite-lived intangible assets for impairment whenever an event occurs or circumstances change which indicate that the carrying amount of such assets may not be fully recoverable.

The Company's goodwill is subject to an annual impairment test. For the purposes of impairment testing, the Company determines the recoverability of goodwill by comparing its carrying value to the fair value of the reporting unit, which is the same as the operating segment. The Company performed its annual impairment test, on the measurement date, for the fiscal year ended January 3, 2010 and did not identify any impairment in the carrying value of its goodwill. In the fiscal year ended December 28, 2008, the Company wrote off goodwill of \$2.3 million associated with the termination of its transportation services business in the United Kingdom. There were no impairment charges recorded

in the fiscal year ended December 30, 2007. See Notes 4 and 9.

Table of Contents

THE GEO GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Variable Interest Entities

The Company evaluates its joint ventures and other entities in which it has a variable interest (a VIE), generally in the form of investments, loans, guarantees, or equity in order to determine if it is the primary beneficiary of the entity by considering qualitative and quantitative factors. Qualitative factors include evaluating distribution terms, proportional voting rights, decision making ability, and the capital structure. Quantitatively, the Company evaluates financial forecasts under various scenarios to determine which variable interest holders would absorb over 50% of the expected losses of the entity.

The Company does not consolidate its 50% owned South African joint venture in SACS, a VIE. The Company has determined it is not the primary beneficiary of SACS since it does not absorb a majority of the entity's estimated losses nor does it receive a majority of the entity's expected returns. Additionally, the Company does not have the ability to exercise significant influence over SACS. As such, this entity is accounted for as an equity affiliate. SACS was established in 2001, to design, finance and build the Kutama Sinthumule Correctional Centre and was subsequently, awarded a 25 year contract to design, construct, manage and finance a facility in Louis Trichardt, South Africa. To fund the construction of the prison, SACS obtained long-term financing from the government which is fully guaranteed, except in the event of default, for which the government provides an 80% guarantee. The Company's maximum exposure for loss under this contract is limited to its investment in joint venture of \$12.2 million at January 3, 2010 and its guarantees related to SACS discussed in Note 13.

The Company consolidates South Texas Local Development Corporation (STLDC), a VIE. STLDC was created to finance construction for the development of a 1,904-bed facility in Frio County, Texas. STLDC issued \$49.5 million in taxable revenue bonds and has an operating agreement with STLDC, the owner of the complex, which provides it with the sole and exclusive right to operate and manage the detention center. The operating agreement and bond indenture require the revenue from the contract be used to fund the periodic debt service requirements as they become due. The net revenues, if any, after various expenses such as trustee fees, property taxes and insurance premiums are distributed to the Company to cover operating expenses and management fees. The Company is responsible for the entire operations of the facility including all operating expenses and is required to pay all operating expenses whether or not there are sufficient revenues. The bonds have a ten-year term and are non-recourse to the Company. At the end of the ten-year term of the bonds, title and ownership of the facility transfers from STLDC to the Company. See Note 13.

Noncontrolling interest in Subsidiary

On December 29, 2009, the Company adopted new accounting standards related to the reporting of noncontrolling interests. These standards clarify the classification of noncontrolling interests in the consolidated statements of financial position and the accounting for and reporting of transactions between the reporting entity and the holders of noncontrolling interests. The Company has applied these standards retrospectively in the presentation of its consolidated balance sheets for all periods presented by reflecting its noncontrolling interest, discussed further below, as a separate component of equity. The income attributable to the noncontrolling interest is not material to the Company's results of operations and is not presented separately.

The Company includes the results of operations and financial position of South African Custodial Management Pty. Limited (SACM or the joint venture), its majority-owned subsidiary, in its consolidated financial statements. SACM

was established in 2001 to operate correctional centers in South Africa. The joint venture currently provides security and other management services for the Kutama Sinthumule Correctional Centre in the Republic of South Africa under a 25-year management contract which commenced in February 2002. On October 29, 2008, the Company, along with one other joint venture partner, executed a Sale of Shares Agreement for the purchase of a portion of the remaining noncontrolling shares of SACM which changed the Company's share in the profits of the joint venture from 76.25% to 88.75%. All of the

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

noncontrolling shares of the third joint venture partner were allocated between the Company and the second joint venture partner on a pro rata basis based on their respective ownership percentages. There were no changes in the Company's ownership percentage of the consolidated subsidiary during the fiscal year ended January 3, 2010.

Fair Value Measurements

The Company carries certain of its assets and liabilities at fair value, measured on a recurring basis, in the accompanying consolidated balance sheets. The Company also has certain assets and liabilities which are not carried at fair value in its accompanying balance sheets and discloses the fair value measurements for those assets and liabilities in Note 11. In fiscal 2009, the Company adopted accounting standards which establish a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels which distinguish between assumptions based on market data (observable inputs) and the Company's assumptions (unobservable inputs). The level in the fair value hierarchy within which the respective fair value measurement falls is determined based on the lowest level input that is significant to the measurement in its entirety. Level 1 inputs are quoted market prices in active markets for identical assets or liabilities, Level 2 inputs are other than quotable market prices included in Level 1 that are observable for the asset or liability either directly or indirectly through corroboration with observable market data. Level 3 inputs are unobservable inputs for the assets or liabilities that reflect management's own assumptions about the assumptions market participants would use in pricing the asset or liability.

Revenue Recognition

Facility management revenues are recognized as services are provided under facility management contracts with approved government appropriations based on a net rate per day per inmate or on a fixed monthly rate. Certain of the Company's contracts have provisions upon which a portion of the revenue is based on the performance of certain targets, as defined in the specific contract. In these cases, the Company recognizes revenue when the amounts are fixed and determinable and the time period over which the conditions have been satisfied has lapsed. In many instances, the Company is a party to more than one contract with a single entity. In these instances, each contract is accounted for separately.

The Company earns construction revenue from its contracts with certain customers to perform construction and design services (project development services) for various facilities. In these instances, the Company acts as the primary developer and sub contracts with bonded National and/or Regional Design Build Contractors. These construction revenues are recognized as earned on a percentage of completion basis measured by the percentage of costs incurred to date as compared to the estimated total cost for each contract. This method is used because the Company considers costs incurred to date to be the best available measure of progress on these contracts. Provisions for estimated losses on uncompleted contracts and changes to cost estimates are made in the period in which the Company determines that such losses and changes are probable. Typically, the Company enters into fixed price contracts and does not perform additional work unless approved change orders are in place. Costs attributable to unapproved change orders are expensed in the period in which the costs are incurred if the Company believes that it is not probable that the costs will be recovered through a change in the contract price. If the Company believes that it is probable that the costs will be recovered through a change in the contract price, costs related to unapproved change orders are expensed in the period in which they are incurred, and contract revenue is recognized to the extent of the costs incurred. Revenue in excess of the costs attributable to unapproved change orders is not recognized until the change order is approved. Construction costs include all direct material and labor costs and those indirect costs related to contract performance.

Changes in job performance, job conditions, and estimated profitability, including those arising from contract penalty provisions, and final contract settlements, may result in revisions to estimated costs and income, and are recognized in the period in which the revisions are determined. As the primary contractor, the Company is exposed to the various risks associated with construction, including the risk of cost

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

overruns. Accordingly, the Company records its construction revenue on a gross basis. The related cost of construction activities is included in Operating Expenses.

When evaluating multiple element arrangements for certain contracts where the Company provides project development services to its clients in addition to standard management services, the Company follows provisions established by FASB ASC. This revenue recognition guidance related to multiple deliverables in an arrangement provides guidance on determining if separate contracts should be evaluated as a single arrangement and if an arrangement involves a single unit of accounting or separate units of accounting and if the arrangement is determined to have separate units, how to allocate amounts received in the arrangement for revenue recognition purposes. In instances where the Company provides these project development services and subsequent management services, generally, the arrangement results in no delivered elements at the onset of the agreement. The elements are delivered over the contract period as the project development and management services are performed. Project development services are not provided separately to a customer without a management contract and therefore, the value of the project development deliverable, is determined using the residual method.

Lease Revenue

The Company owns two facilities that are leased to unrelated third parties. The first lease has an initial term which expires in July 2013 with an option to terminate in July 2010. The second lease has a term of ten years and expires in January 2018. Both of these leases have options to extend for up to three additional five-year terms. The carrying value of these assets included in property and equipment at January 3, 2010 and December 28, 2008 was \$51.8 million and \$53.0 million, respectively, net of accumulated depreciation of \$3.4 million and \$2.2 million, respectively. The Company also receives a small amount of rental income related to the sublease of an office space for which both the sublease and the Company's obligation under the original lease expire November 2010. Rental income received on these leases for the fiscal years ended January 3, 2010, December 28, 2008 and December 30, 2007 was \$5.9 million, \$5.7 million and \$4.0 million, respectively.

Fiscal Year	Annual Rental (In thousands)
2010	\$ 6,151
2011	6,321
2012	6,452
2013	6,586
2014	6,725
Thereafter	16,740
	\$ 48,975

Income Taxes

Deferred income taxes are determined based on the estimated future tax effects of differences between the financial statement and tax basis of assets and liabilities given the provisions of enacted tax laws. Significant judgments are required to determine the consolidated provision for income taxes. Deferred income tax provisions and benefits are based on changes to the assets or liabilities from year to year. Realization of the Company's deferred tax assets is dependent upon many factors such as tax regulations applicable to the jurisdictions in which it operates, estimates of future taxable income and the character of such taxable income. Based on the Company's estimate of future earnings and its favorable earnings history, management currently expects full realization of the deferred tax assets net of any recorded valuation allowances. Additionally, judgment must be made as to certain tax positions which may not be fully sustained upon review by tax

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

authorities. If actual circumstances differ from the Company's assumptions, adjustments to the carrying value of deferred tax assets or liabilities may be required, which may result in an adverse impact on the results of operations and the Company's effective tax rate. Valuation allowances are recorded related to deferred tax assets based on more likely than not criteria. Management has not made any significant changes to the way the Company accounts for its deferred tax assets and liabilities in any year presented in the consolidated financial statements.

Earnings Per Share

Basic earnings per share is computed by dividing income from continuing operations by the weighted-average number of common shares outstanding. The calculation of diluted earnings per share is similar to that of basic earnings per share, except that the denominator includes dilutive common share equivalents such as share options and restricted shares.

Direct Finance Leases

The Company accounts for the portion of its contracts with certain governmental agencies that represent capitalized lease payments on buildings and equipment as investments in direct finance leases. Accordingly, the minimum lease payments to be received over the term of the leases less unearned income are capitalized as the Company's investments in the leases. Unearned income is recognized as income over the term of the leases using the effective interest method.

Reserves for Insurance Losses

The nature of the Company's business exposes it to various types of third-party legal claims, including, but not limited to, civil rights claims relating to conditions of confinement and/or mistreatment, sexual misconduct claims brought by prisoners or detainees, medical malpractice claims, claims relating to employment matters (including, but not limited to, employment discrimination claims, union grievances and wage and hour claims), property loss claims, environmental claims, automobile liability claims, contractual claims and claims for personal injury or other damages resulting from contact with the Company's facilities, programs, personnel or prisoners, including damages arising from a prisoner's escape or from a disturbance or riot at a facility. In addition, the Company's management contracts generally require it to indemnify the governmental agency against any damages to which the governmental agency may be subject in connection with such claims or litigation. The Company maintains a broad program of insurance coverage for these general types of claims, except for claims relating to employment matters, for which the Company carries no insurance. There can be no assurance that the Company's insurance coverage will be adequate to cover all claims to which it may be exposed. The Company currently maintains a general liability policy and excess liability policy for all U.S. corrections operations with limits of \$62.0 million per occurrence and in the aggregate. A separate \$35.0 million limit applies to medical professional liability claims arising out of correctional healthcare services. The Company's wholly owned subsidiary, GEO Care, Inc., is insured under their own program for general liability and medical professional liability with a specific loss limit of \$35.0 million per occurrence and in the aggregate. The Company is uninsured for any claims in excess of these limits. For most casualty insurance policies, the Company carries substantial deductibles or self-insured retentions \$3.0 million per occurrence for general liability and hospital professional liability, \$2.0 million per occurrence for workers' compensation and \$1.0 million per occurrence for automobile liability. The Company also maintains insurance to cover property and other casualty risks including workers' compensation, environmental liability and automobile liability.

With respect to its operations in South Africa, United Kingdom and Australia, the Company utilizes a combination of locally-procured insurance and global policies to meet contractual insurance requirements and

Table of Contents

THE GEO GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

protect the Company. The Company's Australian subsidiary is required to carry tail insurance on a general liability policy providing an extended reporting period through 2011 related to a discontinued contract.

In addition, certain of the Company's facilities located in Florida and determined by insurers to be in high-risk hurricane areas carry substantial windstorm deductibles. Since hurricanes are considered unpredictable future events, no reserves have been established to pre-fund for potential windstorm damage. Limited commercial availability of certain types of insurance relating to windstorm exposure in coastal areas and earthquake exposure mainly in California may prevent the Company from insuring some of its facilities to full replacement value.

Of the reserves discussed above, the Company's most significant insurance reserves relate to workers' compensation and general liability claims. These reserves are undiscounted and were \$27.2 million and \$25.5 million as of January 3, 2010 and December 28, 2008, respectively. The Company uses statistical and actuarial methods to estimate amounts for claims that have been reported but not paid and claims incurred but not reported. In applying these methods and assessing their results, the Company considers such factors as historical frequency and severity of claims at each of its facilities, claim development, payment patterns and changes in the nature of its business, among other factors. Such factors are analyzed for each of the Company's business segments. The Company's estimates may be impacted by such factors as increases in the market price for medical services and unpredictability of the size of jury awards. The Company also may experience variability between its estimates and the actual settlement due to limitations inherent in the estimation process, including the Company's ability to estimate costs of processing and settling claims in a timely manner as well as its ability to accurately estimate its exposure at the onset of a claim. Because the Company has high deductible insurance policies, the amount of its insurance expense is dependent on its ability to control claims experience. If actual losses related to insurance claims significantly differ from estimates, the Company's financial condition, results of operations and cash flows could be materially impacted.

Debt Issuance Costs

Debt issuance costs totaling \$17.9 million and \$9.6 million at January 3, 2010, and December 28, 2008, respectively, are included in other non-current assets in the consolidated balance sheets and are amortized to interest expense using the effective interest method, over the term of the related debt.

Comprehensive Income

The Company's comprehensive income is comprised of net income, foreign currency translation adjustments, net unrealized loss on derivative instruments, and pension liability adjustments in the Consolidated Statements of Shareholders' Equity and Comprehensive Income.

Concentration of Credit Risk

At times the Company may have significant amounts of cash and cash equivalents at financial institutions that are in excess of federally insured limits. Other than cash, financial instruments that potentially subject the Company to concentrations of credit risk consist principally of trade accounts receivable, a direct finance lease receivable, long-term debt and financial instruments used in hedging activities. The Company's cash management and investment policies restrict investments to low-risk, highly liquid securities, and the Company performs periodic evaluations of the credit standing of the financial institutions with which it deals.

Foreign Currency Translation

The Company's foreign operations use their local currencies as their functional currencies. Assets and liabilities of the operations are translated at the exchange rates in effect on the balance sheet date and

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

shareholders' equity is translated at historical rates. Income statement items are translated at the average exchange rates for the year. The positive (negative) impact of foreign currency fluctuation is included in shareholders' equity as a component of accumulated other comprehensive income, net of income tax, and totaled \$10.7 million, \$(10.7) million and \$2.9 million for the fiscal years ended January 3, 2010, December 28, 2008 and December 30, 2007, respectively. The cumulative income (loss) on foreign currency translation recorded as a component of shareholders' equity as of January 3, 2010 and December 28, 2008 was \$4.8 million and (\$5.8) million, respectively.

Derivatives

The Company's primary objective in holding derivatives is to reduce the volatility of earnings and cash flows associated with changes in interest rates. The Company measures its derivative financial instruments at fair value and records derivatives as either assets or liabilities on the balance sheet. For derivatives that are designed as and qualify as effective cash flow hedges, the portion of gain or loss on the derivative instrument effective at offsetting changes in the hedged item is reported as a component of accumulated other comprehensive income and reclassified into earnings when the hedged transaction affects earnings. For derivative instruments that are designated as and qualify as effective fair value hedges, the gain or loss on the derivative instrument as well as the offsetting gain or loss on the hedged item attributable to the hedged risk is recognized in current earnings as interest income (expense) during the period of the change in fair values.

The Company formally documents all relationships between hedging instruments and hedge items, as well as its risk-management objective and strategy for undertaking various hedge transactions. This process includes attributing all derivatives that are designated as cash flow hedges to floating rate liabilities and attributing all derivatives that are designated as fair value hedges to fixed rate liabilities. The Company also assesses whether each derivative is highly effective in offsetting changes in the cash flows of the hedged item. Fluctuations in the value of the derivative instruments are generally offset by changes in the hedged item; however, if it is determined that a derivative is not highly effective as a hedge or if a derivative ceases to be a highly effective hedge, the Company will discontinue hedge accounting prospectively for the affected derivative.

Stock-Based Compensation Expense

The Company recognizes the cost of stock based compensation awards based upon the grant date fair value of those awards. The Company uses a Black-Scholes option valuation model to estimate the fair value of each option awarded. The impact of forfeitures that may occur prior to vesting is also estimated and considered in the amount recognized.

The fair value of stock-based awards was estimated using the Black-Scholes option-pricing model with the following weighted average assumptions for fiscal years ending 2009, 2008 and 2007, respectively:

	2009	2008	2007
Risk free interest rates	2.00%	2.87%	4.80%
Expected term	4-5years	4-5years	4-5years
Expected volatility	41%	41%	40%
Expected dividend			

Expected volatilities are based on the historical and implied volatility of the Company's common stock. The Company uses historical data to estimate award exercises and employee terminations within the valuation model. The expected term of the awards represents the period of time that awards granted are expected to be outstanding and is based on historical data and expected holding periods. The risk-free rate is based on the rate for five year U.S. Treasury Bonds, which is consistent with the expected term of the awards. See Note 3.

THE GEO GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Recent Accounting Pronouncements

Effective in July 2009, any changes to the source of authoritative U.S. GAAP promulgated by the Financial Accounting Standards Board (FASB) are communicated through Accounting Standards Updates (ASU). ASU s are published for all authoritative U.S. GAAP promulgated by the FASB, regardless of the form in which such guidance may have been issued prior to release of the FASB ASC (e.g., FASB Statements, EITF Abstracts, FASB Staff Positions, etc.). FASB ASU s are also issued for amendments to the SEC content in the FASB ASC as well as for editorial changes.

The Company implemented the following accounting standards in the fiscal year ended January 3, 2010:

In December 2007, the FASB issued new guidance for the accounting of business combinations. This updated guidance clarifies the initial and subsequent recognition, subsequent accounting, and disclosure of assets and liabilities arising from contingencies in a business combination. This guidance requires that assets acquired and liabilities assumed in a business combination that arise from contingencies be recognized at fair value at the acquisition date if it can be determined during the measurement period. If the acquisition-date fair value of an asset or liability cannot be determined during the measurement period, the asset or liability will only be recognized at the acquisition date if it is both probable that an asset existed or liability has been incurred at the acquisition date, and if the amount of the asset or liability can be reasonably estimated. This requirement became effective for the Company as of December 29, 2008, the first day of its fiscal year. Additionally, this guidance, applies the concept of fair value and more likely than not criteria to accounting for contingent consideration, and pre-acquisition contingencies. The impact from the adoption of this change did not have a material effect on the Company s financial condition, results of operations or cash flows.

In April 2008, the FASB issued guidance relative to goodwill and other intangible assets which amends the factors that must be considered when developing renewal or extension assumptions used to determine the useful life over which to amortize the cost of a recognized intangible asset. This amendment requires an entity to consider its own assumptions about renewal or extension of the term of the arrangement, consistent with its expected use of the asset. This statement is effective for financial statements in fiscal years beginning after December 15, 2008 and as such, became effective for the Company on December 29, 2008. The impact from the adoption of this change did not have a material effect on the Company s financial condition, results of operations or cash flows.

In March 2008, the FASB issued guidance to companies relative to disclosures about its derivative and hedging activities which requires entities to provide greater transparency about (i) how and why an entity uses derivative instruments, (ii) how derivative instruments are accounted for, and (iii) how derivative instruments and related hedged items affect an entity s financial position, results of operations and cash flows. This guidance was effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008 and as such, became effective for the Company on December 29, 2008. The impact from the adoption of this change did not have a material effect on the Company s financial condition, results of operations or cash flows.

In August 2009, the FASB issued ASU No. 2009-5, which amends guidance relative to fair value measurements and disclosures to provide clarification that in circumstances in which a quoted price in an active market for the identical liability is not available, an entity is required to measure fair value utilizing one or more of the following techniques: (1) a valuation technique that uses the quoted market price of an identical liability or similar liabilities when traded as

assets; or (2) another valuation technique that is consistent with the principles set forth in this topic, such as a present value technique. This revised guidance was effective for the Company's first reporting period after August 2009, which for the Company was September 28, 2009. The adoption of ASU No. 2009-5 did not have a material impact on the Company's financial position, results of operations or cash flows.

In addition to these standards, the Company also adopted standards as discussed in Note 1 and Note 20.

Table of Contents

THE GEO GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following accounting standards have implementation dates subsequent to the fiscal year ended January 3, 2010 and as such, have not yet been adopted by the Company:

In October 2009, the FASB issued ASU No. 2009-13 which provides amendments to revenue recognition criteria for separating consideration in multiple element arrangements. As a result of these amendments, multiple deliverable arrangements will be separated more frequently than under existing GAAP. The amendments, among other things, establish the selling price of a deliverable, replace the term fair value with selling price and eliminate the residual method so that consideration would be allocated to the deliverables using the relative selling price method. This amendment also significantly expands the disclosure requirements for multiple element arrangements. This guidance will become effective for the Company prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. The Company does not anticipate that the adoption of this standard will have a material impact on its financial position, results of operations or cash flows.

In December 2009, the FASB issued ASU No. 2009-17, previously known as FAS No. 167, Amendments to FASB Interpretation No. FIN 46(R) (SFAS No. 167). ASU No. 2009-17 amends the manner in which entities evaluate whether consolidation is required for VIEs. The consolidation requirements under the revised guidance require a company to consolidate a VIE if the entity has all three of the following characteristics (i) the power, through voting rights or similar rights, to direct the activities of a legal entity that most significantly impact the entity's economic performance, (ii) the obligation to absorb the expected losses of the legal entity (iii) the right to receive the expected residual returns of the legal entity. Further, this guidance requires that companies continually evaluate VIEs for consolidation, rather than assessing based upon the occurrence of triggering events. As a result of adoption, which becomes effective for interim and annual periods beginning after November 15, 2009, companies are required to enhance disclosures about how their involvement with a VIE affects its financial statements and exposure to risks. The Company does not anticipate that the adoption of this standard will have a material impact on its financial position, results of operations and cash flows.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****2. Business Acquisition**

On September 30, 2009, the Company's wholly-owned mental health subsidiary, GEO Care, Inc. (GEO Care), acquired Just Care, Inc. (Just Care), a provider of detention healthcare focusing on the delivery of medical and mental health services. Just Care manages the 354-bed Columbia Regional Care Center located in Columbia, South Carolina. This facility houses medical and mental health residents for the State of South Carolina and the State of Georgia as well as special needs detainees under custody of the U.S. Marshals Service and U.S. Immigration and Customs Enforcement. This facility is operated by Just Care under a long-term lease with the State of South Carolina. The Company paid \$38.4 million, net cash acquired, which was funded by available borrowings from the revolving loan portion (the Revolver) of the Company's Third Amended and restated Credit Agreement (the Senior Credit Facility). The purchase price was allocated to the identifiable assets acquired and liabilities assumed based on their estimated fair values, with the excess purchase price recorded as goodwill, none of which is deductible for Federal Income Tax purposes. The allocation of the purchase price is summarized below:

Current assets, net of cash acquired	\$ 3,774
Property and equipment	15,781
Facility management contracts	6,600
Goodwill	17,729
Deferred tax asset	286
Other non-current assets	69
 Total assets acquired	 \$ 44,239
 Current liabilities	 \$ (4,699)
Deferred tax liability	(731)
Non current liabilities	(423)
 Total liabilities assumed	 \$ (5,853)
 Net assets acquired	 \$ 38,386

In connection with its purchase of Just Care, the Company recorded certain assets and liabilities based on information available up through February 22, 2010, the date these financial statements were issued. The Company expects that additional information about facts and circumstances surrounding the fair value of certain of these assets and liabilities will be finalized during 2010. As a result, the provisional amounts recorded may be adjusted retrospectively to reflect the new information about facts and circumstances existing at the acquisition date that would have affected amounts recognized in goodwill. The Company does not expect these adjustments, if required, will have a material impact on its results of operations or financial position.

3. Equity Incentive Plans

The Company had awards outstanding under four equity compensation plans at January 3, 2010: The Wackenhut Corrections Corporation 1994 Stock Option Plan (the 1994 Plan); the 1995 Non-Employee Director Stock Option Plan (the 1995 Plan); the Wackenhut Corrections Corporation 1999 Stock Option Plan (the 1999 Plan); and The GEO Group, Inc. 2006 Stock Incentive Plan (the 2006 Plan and, together with the 1994 Plan, the 1995 Plan and the 1999 Plan, the Company Plans).

On April 29, 2009, the Company s Board of Directors adopted and its shareholders approved several amendments to the 2006 Plan, including an amendment providing for the issuance of an additional 1,000,000 shares of the Company s common stock which increased the total amount of shares of common stock issuable pursuant to awards granted under the plan to 2,400,000 and specifying that up to 1,083,000 of such total shares pursuant to awards granted under the plan may constitute awards other than stock options

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

and stock appreciation rights, including shares of restricted stock. See *Restricted Stock* below for further discussion. On June 26, 2009, the Company's Compensation Committee of the Board of Directors approved a grant of 163,000 restricted stock awards to certain employees. Additionally, on October 28, 2009, the Company's Compensation Committee of the Board of Directors approved a grant of 439,500 stock option awards. As of January 3, 2010, the Company had 553,044 shares of common stock available for issuance pursuant to future awards that may be granted under the plan of which up to 236,344 were available for the issuance of awards other than stock options.

Except for 846,656 shares of restricted stock issued under the 2006 Plan as of January 3, 2010, all of the awards previously issued under the Company Plans consisted of stock options. Although awards are currently outstanding under all of the Company Plans, the Company may only grant new awards under the 2006 Plan.

Under the terms of the Company Plans, the vesting period and, in the case of stock options, the exercise price per share, are determined by the terms of each plan. All stock options that have been granted under the Company Plans are exercisable at the fair market value of the common stock at the date of the grant. Generally, the stock options vest and become exercisable ratably over a four-year period, beginning immediately on the date of the grant. However, the Board of Directors has exercised its discretion to grant stock options that vest 100% immediately for the Chief Executive Officer. In addition, stock options granted to non-employee directors under the 1995 Plan became exercisable immediately. All stock options awarded under the Company Plans expire no later than ten years after the date of the grant.

Stock Options

A summary of the activity of the Company's stock options plans is presented below:

	Shares (In thousands)	Wtd. Avg. Exercise Price	Wtd. Avg. Remaining Contractual Term	Aggregate Intrinsic Value (In thousands)
Options outstanding at December 28, 2008	2,808	\$ 8.03	4.60	\$ 29,751
Granted	448	21.00		
Exercised	(372)	3.92		
Forfeited/Canceled	(77)	21.86		
Options outstanding at January 3, 2010	2,807	\$ 10.26	4.80	\$ 32,592
Options exercisable at January 3, 2010	2,211	\$ 7.62	3.67	\$ 31,538

The aggregate intrinsic value in the table above represents the total pretax intrinsic value (i.e., the difference between the Company's closing stock price on the last trading day of fiscal year 2009 and the exercise price, times the number

of shares that are in the money) that would have been received by the option holders had all option holders exercised their options on January 3, 2010. This amount changes based on the fair value of the company's stock. The total intrinsic value of options exercised during the fiscal years ended January 3, 2010, December 28, 2008, and December 30, 2007 was \$6.2 million, \$2.9 million, and \$6.2 million respectively.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table summarizes information about the exercise prices and related information of stock options outstanding under the Company Plans at January 3, 2010:

Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding	Wtd. Avg. Remaining Contractual Life	Wtd. Avg. Exercise Price	Number Exercisable	Wtd. Avg. Exercise Price
2.63 2.81	6,000	0.3	\$ 2.63	6,000	\$ 2.63
3.10 3.10	367,500	1.1	3.10	367,500	3.10
3.17 3.98	149,892	3.0	3.20	149,892	3.20
4.67 4.90	415,638	3.3	4.67	415,638	4.67

21.07 21.56	728,500	8.1	21.27	284,900	21.37
21.64 28.24	3,000	7.5	21.66	1,400	21.65
Total	2,806,957	4.8	\$ 10.26	2,211,199	\$ 7.62

For the years ended January 3, 2010 and December 28, 2008 and December 30, 2007, the amount of stock-based compensation expense related to stock options was \$1.8 million, \$1.5 million and \$0.9 million, respectively. The weighted average grant date fair value of options granted during the fiscal years ended January 3, 2010, December 28, 2008 and December 30, 2007 was \$7.41, \$6.58 and \$8.73 per share, respectively.

The following table summarizes the status of the Company's non-vested shares as of January 3, 2010 and changes during the fiscal year ending January 3, 2010:

	Number of Shares	Wtd. Avg. Grant Date Fair Value
Options non-vested at December 28, 2008	426,716	\$ 7.58
Granted	447,500	7.41
Vested	(234,058)	7.54
Forfeited	(44,400)	8.61
Options non-vested at January 3, 2010	595,758	\$ 7.39

As of January 3, 2010, the Company had \$3.8 million of unrecognized compensation costs related to non-vested stock option awards that are expected to be recognized over a weighted average period of 3.1 years. The total fair value of shares vested during the fiscal years ended January 3, 2010, December 28, 2008 and December 30, 2007, was \$1.8 million, \$1.2 million, and \$1.2 million respectively. Proceeds received from stock options exercises for 2009, 2008 and 2007 was \$1.5 million, \$0.8 million and \$1.2 million, respectively. Tax benefits realized from tax deductions associated with option exercises and restricted stock activity for 2009, 2008 and 2007 totaled \$0.6 million, \$0.8 million and \$3.1 million, respectively.

Restricted Stock

Shares of restricted stock become unrestricted shares of common stock upon vesting on a one-for-one basis. The cost of these awards is determined using the fair value of the Company's common stock on the date of the grant and compensation expense is recognized over the vesting period. The shares of restricted stock

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

granted under the 2006 Plan vest in equal 25% increments on each of the four anniversary dates immediately following the date of grant. A summary of the activity of restricted stock is as follows:

	Shares	Wtd. Avg. Grant date Fair value
Restricted stock outstanding at December 28, 2008	425,684	\$ 19.54
Granted	168,000	18.66
Vested	(176,597)	18.27
Forfeited/Canceled	(33,987)	20.45
Restricted stock outstanding at January 3, 2010	383,100	\$ 19.66

During the fiscal year ended January 3, 2010, December 28, 2008 and December 30, 2007, the Company recognized \$3.5 million, \$3.0 million and \$2.5 million, respectively, of compensation expense related to its outstanding shares of restricted stock. As of January 3, 2010, the Company had \$5.2 million of unrecognized compensation expense that is expected to be recognized over a weighted average period of 2.4 years.

4. Discontinued Operations

The termination of any of the Company's management contracts by expiration or otherwise, may result in the classification of the operating results of such management contract, net of taxes, as a discontinued operation. The Company presents such events as discontinued operations so long as the financial results can be clearly identified, the operations and cash flows are completely eliminated from ongoing operations, and so long as the Company does not have any significant continuing involvement in the operations of the component after the disposal or termination transaction. Historically, the Company has classified operations as discontinued in the period they are announced as normally all continuing cash flows cease within three to six months of that date. During the fiscal year 2008, the Company discontinued operations at certain of its domestic and international subsidiaries. The results of operations, net of taxes, and the assets and liabilities of these operations, each as further described below, have been reflected in the accompanying consolidated financial statements as discontinued operations for all periods presented. Assets, primarily consisting of accounts receivable, and liabilities have been presented separately in the accompanying consolidated balance sheets for all periods presented.

U.S. corrections. On November 7, 2008, the Company announced its receipt of notice for the discontinuation of its contract with the State of Idaho, Department of Correction (Idaho DOC) for the housing of approximately 305 out-of-state inmates at the managed-only Bill Clayton Detention Center (the Detention Center) effective January 5, 2009. On August 29, 2008, the Company announced its discontinuation of its contract with Delaware County, Pennsylvania for the management of the county-owned 1,883-bed George W. Hill Correctional Facility effective December 31, 2008.

International services. On December 22, 2008, the Company announced the closure of its U.K.-based transportation division, Recruitment Solutions International (RSI). As a result of the termination of its transportation business in the United Kingdom, the Company wrote off assets of \$2.6 million including goodwill of \$2.3 million.

GEO Care. On June 16, 2008, the Company announced the discontinuation by mutual agreement of its contract with the State of New Mexico Department of Health for the management of the Fort Bayard Medical Center effective June 30, 2008.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following are the revenues related to discontinued operations for the periods presented (in thousands):

	2009	2008	2007
	(In thousands)		
Revenues International services	\$	\$ 1,806	\$ 2,326
Revenues U.S. corrections	210	43,784	42,617
Revenues GEO Care		1,806	4,546

5. Property and Equipment

Property and equipment consist of the following at fiscal year end:

	Useful Life (Years)	2009	2008
		(In thousands)	
Land		\$ 60,331	\$ 49,686
Buildings and improvements	2 to 40	797,185	765,103
Leasehold improvements	1 to 29	95,696	68,845
Equipment	3 to 10	63,382	55,007
Furniture and fixtures	3 to 7	11,731	9,033
Facility construction in progress		129,956	56,574
		\$ 1,158,281	\$ 1,004,248
Less accumulated depreciation and amortization		(159,721)	(125,632)
		\$ 998,560	\$ 878,616

The Company's construction in progress primarily consists of development costs associated with the Facility construction and design segment for contracts with various federal, state and local agencies for which we have management contracts. Interest capitalized in property and equipment was \$4.9 million and \$4.3 million for the fiscal years ended January 3, 2010 and December 28, 2008, respectively.

Depreciation expense was \$36.3 million, \$31.9 million and \$29.8 million for the fiscal years ended January 3, 2010, December 28, 2008 and December 30, 2007, respectively.

At both January 3, 2010 and December 28, 2008, the Company had \$18.2 million of assets recorded under capital leases including \$17.5 million related to buildings and improvements, \$0.6 million related to equipment and \$0.1 million related to leasehold improvements. Capital leases are recorded net of accumulated amortization of \$3.9 million and \$3.1 million, at January 3, 2010 and December 28, 2008, respectively. Depreciation expense related

to capital leases for the fiscal years ended January 3, 2010, December 28, 2008 and December 30, 2007 was \$0.8 million, \$0.9 million and \$1.0 million, respectively and is included in Depreciation and Amortization in the accompanying statements of income.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****6. Assets Held for Sale**

The Company records its assets held for sale at the lower of cost or estimated fair value. The Company estimates fair value by using third party appraisers or other valuation techniques. As of January 3, 2010 and December 28, 2008, the Company's assets held for sale consisted of the following:

Fiscal Year	Carrying Value (In thousands)
Buildings and improvements	\$ 3,083
Land	1,265
Assets held for sale	\$ 4,348

The Company's assets held for sale consist of two assets. On March 17, 2008, the Company purchased its former Coke County Juvenile Justice Center (the Center) at a cost of \$3.1 million. In October 2008, the Company established a formal plan to sell the asset and began active discussions with certain parties interested in purchasing the Center. The Company has identified a buyer and expects to sell the facility in 2010 however, this sale is subject to the buyer obtaining financing. If the buyer is unable to obtain financing, the Company will need to locate another buyer for the Center. There can be no assurance that the prospective buyer can obtain the financing, no assurance that the Company will be able to locate another buyer in the event that this buyer is not able to obtain the financing and no assurance that the Center will be sold for its carrying value of \$3.1 million. Secondly, in conjunction with the acquisition of CSC, the Company acquired land associated with a program that had been discontinued by CSC in October 2003. The carrying value of the land is \$1.3 million. These assets are included within the segment assets of U.S. Corrections and are recorded at their net realizable value of \$4.3 million at January 3, 2010. Since these assets are held for sale, no depreciation has been recorded during the fiscal year ended January 3, 2010.

7. Investment in Direct Finance Leases

The Company's investment in direct finance leases relates to the financing and management of one Australian facility. The Company's wholly-owned Australian subsidiary financed the facility's development with long-term debt obligations, which are non-recourse to the Company.

The future minimum rentals to be received are as follows:

Fiscal Year	Annual Repayment (In thousands)
2010	\$ 7,475

2011		7,503
2012		7,538
2013		7,726
2014		7,882
Thereafter		19,436
Total minimum obligation	\$	57,560
Less unearned interest income		(16,641)
Less current portion of direct finance lease		(3,757)
Investment in direct finance lease	\$	37,162

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****8. Derivative Financial Instruments**

The Company's primary objective in holding derivatives is to reduce the volatility of earnings and cash flows associated with changes in interest rates. The Company measures its derivative financial instruments at fair value.

In November 2009, the Company executed three interest rate swap agreements (the Agreements) in the aggregate notional amount of \$75.0 million. The Company has designated these interest rate swaps as hedges against changes in the fair value of a designated portion of the 73/4% Senior Notes due 2017 (73/4% Senior Notes) due to changes in underlying interest rates. The Agreements, which have payment, expiration dates and call provisions that mirror the terms of the Notes, effectively convert \$75.0 million of the Notes into variable rate obligations. Each of the swaps has a termination clause that gives the lender the right to terminate the interest rate swaps at fair market value if they are no longer a lender under the Credit Agreement. In addition to the termination clause, the Agreements also have call provisions which specify that the lender can elect to settle the swap for the call option price. Under the Agreements, the Company receives a fixed interest rate payment from the financial counterparties to the agreements equal to 73/4% per year calculated on the notional \$75.0 million amount, while it makes a variable interest rate payment to the same counterparties equal to the three-month LIBOR plus a fixed margin of between 4.24% and 4.29%, also calculated on the notional \$75.0 million amount. Changes in the fair value of the interest rate swaps are recorded in earnings along with related designated changes in the value of the Notes. Effective January 6, 2010, the Company executed a fourth swap agreement in the notional amount of \$25.0 million (See Note 20). There was no material ineffectiveness of these interest rate swaps for the fiscal year ended January 3, 2010.

The Company's Australian subsidiary is a party to an interest rate swap agreement to fix the interest rate on the variable rate non-recourse debt to 9.7%. The Company has determined the swap, which has a notional amount of \$50.9 million, payment and expiration dates, and call provisions that coincide with the terms of the non-recourse debt to be an effective cash flow hedge. Accordingly, the Company records the change in the value of the interest rate swap in accumulated other comprehensive income, net of applicable income taxes. Total net unrealized gain (loss) recognized in the periods and recorded in accumulated other comprehensive income, net of tax, related to these cash flow hedges was \$1.2 million, (\$3.5) million and \$1.3 million for the fiscal years ended January 3, 2010, December 28, 2008 and December 30, 2007, respectively. The total value of the swap asset as of January 3, 2010 and December 28, 2008 was \$2.0 million and \$0.2 million, respectively, and is recorded as a component of other assets in the accompanying consolidated balance sheets. There was no material ineffectiveness of this interest rate swap for the fiscal periods presented. The Company does not expect to enter into any transactions during the next twelve months which would result in the reclassification into earnings or losses associated with this swap currently reported in accumulated other comprehensive income (loss).

During the fiscal year ended January 3, 2010, the Company received proceeds of \$1.7 million for the settlement of an aggregate notional amount of \$50.0 million of interest rate swaps related to its 81/4% Senior Notes due 2013 (81/4% Senior Notes). The lenders to these swap agreements elected to prepay their obligations at the call option price which equaled the fair value at the respective call dates.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****9. Goodwill and Other Intangible Assets, Net**

Changes in the Company's goodwill balances for 2009 were as follows (in thousands):

	Balance as of December 28, 2008	Goodwill Resulting from Business Combination	Foreign Currency Translation	Balance as of January 3, 2010
U.S. corrections	\$ 21,692	\$	\$	\$ 21,692
International services	510		159	669
GEO Care		17,729		17,729
Total Segments	\$ 22,202	\$	\$ 159	\$ 40,090

Intangible assets consisted of the following (in thousands):

	Useful Life in Years	U.S. Corrections	International Services	GEO Care	Total
Facility management contracts	7-17	\$ 14,450	\$ 1,875	\$	\$ 16,325
Covenants not to compete	4	1,470			1,470
Gross carrying value of December 28, 2008		\$ 15,920	\$ 1,875	\$	\$ 17,795
Facility management contracts acquired	1-13			6,600	6,600
Foreign currency translation			593		593
Gross carrying value as of January 3, 2010		15,920	2,468	6,600	24,988
Accumulated amortization expense		(7,026)	(157)	(226)	(7,409)
Net carrying value at January 3, 2010		8,894	2,311	6,374	17,579

Amortization expense was \$2.0 million, \$1.8 million and \$2.2 million for the fiscal years ended January 3, 2010, December 28, 2008 and December 30, 2007, respectively and primarily related to the U.S. corrections amortization of intangible assets for acquired management contracts. The Company's weighted average useful life related to the

acquired facility management contracts is 12.46 years.

Estimated amortization expense for fiscal year 2010 through fiscal year 2014 and thereafter are as follows (in thousands):

Fiscal Year	U.S.		International		Total Expense Amortization			
	Corrections - Expense Amortization		Services - Expense Amortization	GEO Care - Expense Amortization				
2010	\$	1,335	\$	135	\$	901	\$	2,371
2011		1,335		135		847		2,317

2014		606		135		427		1,168
Thereafter		3,795		1,636		2,834		8,265
	\$	8,894	\$	2,311	\$	6,374	\$	17,579

10. Fair Value of Assets and Liabilities

The Company is required to measure certain of its financial assets and liabilities at fair value on a recurring basis. The Company does not have any financial assets and liabilities which it carries and measures

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

at fair value using Level 1 techniques, as defined above. The investments included in the Company's Level 2 fair value measurements consist of an interest rate swap held by our Australian subsidiary and also an investment in Canadian dollar denominated fixed income securities. The Company does not have any Level 3 financial assets or liabilities upon which the value is based on unobservable inputs reflecting the Company's assumptions.

The following table provides a summary of the Company's significant financial assets (there are no such liabilities for any period presented) carried at fair value and measured on a recurring basis as of January 3, 2010 (in thousands):

	Carrying Value at January 3, 2010	Fair Value Measurements at January 3, 2010		
		Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Interest rate swap derivative assets	\$ 2,020	\$	\$ 2,020	\$
Investments other than derivatives	1,527		1,527	
Liabilities:				
Interest rate swap derivative liabilities	\$ 1,887	\$	\$ 1,887	\$

11. Financial Instruments

The Company balance sheet reflects certain financial instruments at carrying value. The following table presents the carrying values of those instruments and the corresponding fair values at January 3, 2010:

	January 3, 2010	
	Carrying Value	Estimated Fair Value
Assets:		
Cash and cash equivalents	\$ 33,856	\$ 33,856
Restricted cash	34,068	34,068
Liabilities:		
Borrowings under the Senior Credit Facility	\$ 212,963	\$ 203,769
73/4% Senior Notes	250,000	255,000
Non-recourse debt	113,724	113,360

The fair values of the Company's Cash and cash equivalents and Restricted cash approximate the carrying values of these assets at January 3, 2010. The fair values of publicly traded debt and other non-recourse debt are based on market prices, where available. The fair value of the non-recourse debt related to the Company's Australian subsidiary

is estimated using a discounted cash flow model based on current Australian borrowing rates for similar instruments. The fair value of the borrowings under the Senior Credit Facility is based on an estimate of trading value considering the company's borrowing rate, the undrawn spread and similar trades.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****12. Accrued Expenses**

Accrued expenses consisted of the following (dollars in thousands):

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****The Senior Credit Facility***

On October 5, 2009, on October 15, 2009, and again on December 4, 2009, the Company completed amendments to the Senior Credit Facility through the execution of Amendment Nos. 5, 6, and 7, respectively, to the Amended and Restated Credit Agreement (Amendment No. 5 , Amendment No. 6 , and/ or Amendment No. 7) between the Company, as Borrower, certain of its subsidiaries, as Grantors, and BNP Paribas, as Lender and as Administrative Agent. Amendment No. 5 to the Credit Agreement, among other things, effectively permitted the Company to issue up to \$300.0 million of unsecured debt without having to repay outstanding borrowings on our Senior Credit Facility. Amendment No. 6 to the Credit Agreement, among other things, modified the aggregate size of the Revolver from \$240.0 million to \$330.0 million, extended the maturity of the Revolver to 2012, modified the permitted maximum total leverage and maximum senior secured leverage financial ratios and eliminated the annual capital expenditures limitation. With the execution of Amendment No. 6, the Senior Credit Facility is now comprised of a \$155.0 million Term Loan B bearing interest at LIBOR plus 2.00% and maturing in January 2014 and the \$330.0 million Revolver which currently bears interest at LIBOR plus 3.25% and matures in September 2012. Also, upon the execution of Amendment No. 6, we have the ability to increase our borrowing capacity under the Senior Credit Facility by another \$200.0 million subject to lender demand, market conditions and existing borrowings. Amendment No. 7 to the Credit Agreement made several technical revisions to certain definitions therein.

As of January 3, 2010, the Company had \$155.0 million outstanding under the Term Loan B, and the Company's \$330.0 million Revolver had \$58.0 million outstanding in loans, \$47.5 million outstanding in letters of credit, and as of November 30, 2009, we had the ability to borrow approximately \$217 million from the excess capacity on the Revolver after considering our debt covenants. The Company intends to use future borrowings from the Revolver for the purposes permitted under the Senior Credit Facility, including for general corporate purposes. The weighted average interest rates on outstanding borrowings under the Senior Credit Facility as of January 3, 2010 and December 28, 2008 were 2.62% and 3.24%, respectively.

Indebtedness under the Revolver bears interest in each of the instances below at the stated rate:

	Interest Rate under the Revolver
LIBOR borrowings	LIBOR plus 2.75% to 3.50%.
Base rate borrowings	Prime Rate plus 1.75% to 2.50%.
Letters of credit	2.75% to 3.50%.
Unused Revolver	0.50% to 0.75%.

In the fiscal year ended January 3, 2010, the Company capitalized \$5.5 million of debt issuance costs related to the amendments discussed above which will be amortized over the remaining term of the Revolver.

The Company is required to maintain the following Total Leverage Ratios, as computed at the end of each fiscal quarter for the immediately preceding four quarter-period:

Period	Total Leverage Ratio
---------------	-----------------------------

Through the penultimate day of fiscal year 2010	≤ 4.00 to 1.00
From the last day of the fiscal year 2010 through the penultimate day of fiscal year 2011	≤ 3.75 to 1.00
From the last day of the fiscal year 2011 through the penultimate day of fiscal year 2012	≤ 3.25 to 1.00
Thereafter	≤ 3.00 to 1.00

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Credit Agreement also requires the Company to maintain the following Senior Secured Leverage Ratios, as computed at the end of each fiscal quarter for the immediately preceding four quarter-period:

Period	Senior Secured Leverage Ratio
Through the penultimate day of fiscal year 2011	≤ 3.00 to 1.00
From the last day of the fiscal year 2011 through the penultimate day of fiscal year 2012	≤ 2.50 to 1.00
From the last day of the fiscal year 2012 through the penultimate day of fiscal year 2013	≤ 2.25 to 1.00
Thereafter	≤ 2.00 to 1.00

The foregoing covenants replace the corresponding covenants previously included in the Credit Agreement.

All of the obligations under the Senior Credit Facility are unconditionally guaranteed by each of the Company's existing material domestic subsidiaries. The Senior Credit Facility and the related guarantees are secured by substantially all of the Company's present and future tangible and intangible assets and all present and future tangible and intangible assets of each guarantor, as specified in the Credit Agreement. In addition, the Senior Credit Facility contains certain customary representations and warranties, and certain customary covenants that restrict the Company's ability to be party to certain transactions, as further specified in the Credit Agreement. Events of default under the Senior Credit Facility include, but are not limited to, (i) the Company's failure to pay principal or interest when due, (ii) the Company's material breach of any representation or warranty, (iii) covenant defaults, (iv) bankruptcy, (v) cross default to certain other indebtedness, (vi) unsatisfied final judgments over a specified threshold, (vii) material environmental state of claims which are asserted against it, and (viii) a change of control. The Company's failure to comply with any of the covenants under its Senior Credit Facility could cause an event of default under such documents and result in an acceleration of all of outstanding senior secured indebtedness. The Company believes it was in compliance with all of the covenants of the Senior Credit Facility as of January 3, 2010.

8 1/4% Senior Notes

On October 5, 2009, the Company announced the commencement of a cash tender offer for its \$150.0 million aggregate principal amount of 8 1/4% Senior Notes. Holders who validly tendered their 8 1/4% Senior Notes before the early tender date, which expired at 5:00 p.m. Eastern Standard time on October 19, 2009, received a 103% cash payment for their note which included an early tender premium of 3%. Holders who tendered their notes after the early tender date, but before the expiration date of 11:59 p.m., Eastern Standard time on November 2, 2009 (Early Expiration Date), received 100% cash payment for their note. Holders of the 8 1/4% Senior Notes accepted for purchase received accrued and unpaid interest up to, but not including, the applicable payment date. Valid early tenders received by the Company represented \$130.2 million aggregate principal amount of the 8 1/4% Senior Notes which was 86.8% of the outstanding principal balance. The Company settled these notes on October 20, 2009 by paying \$136.9 million to the trustee. Also on October 20, 2009, GEO announced the call for redemption for all notes not tendered by the Expiration Date. The Company financed the tender offer and redemption with a portion of the net cash proceeds from its offering of \$250.0 million aggregate principal 7 3/4% Senior Notes, which closed on October 20, 2009. As of November 19, 2009, all of the 8 1/4% Senior Notes had been redeemed. As a result of the

tender offer and redemption, the Company incurred a loss of \$6.8 million related to the tender premium and deferred costs associated with the 8 1/4% Senior Notes.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****73/4% Senior Notes***

On October 20, 2009, the Company completed a private offering of \$250.0 million in aggregate principal amount of its 73/4% Senior Notes due 2017. These senior unsecured notes pay interest semi-annually in cash in arrears on April 15 and October 15 of each year, beginning on April 15, 2010. The Company realized net proceeds of \$246.4 million at the close of the transaction, net of the discount on the notes of \$3.6 million. The Company used the net proceeds of the offering to fund the repurchase of all of its 81/4% Senior Notes due 2013 and pay down part of the Revolver.

The 73/4% Senior Notes and the guarantees will be unsecured, unsubordinated obligations of The GEO Group Inc., and the guarantors and will rank as follows: pari passu with any unsecured, unsubordinated indebtedness of GEO and the guarantors; senior to any future indebtedness of GEO and the guarantors that is expressly subordinated to the notes and the guarantees; effectively junior to any secured indebtedness of GEO and the guarantors, including indebtedness under the Company's Senior Credit Facility, to the extent of the value of the assets securing such indebtedness; and effectively junior to all obligations of the Company's subsidiaries that are not guarantors. After October 15, 2013, the Company may, at its option, redeem all or a part of the 73/4% Senior Notes upon not less than 30 nor more than 60 days' notice, at the redemption prices (expressed as percentages of principal amount) set forth below, plus accrued and unpaid interest and liquidated damages, if any, on the 73/4% Senior Notes redeemed, to the applicable redemption date, if redeemed during the 12-month period beginning on October 15 of the years indicated below:

Year	Percentage
2013	103.875%
2014	101.938%
2015 and thereafter	100.000%

Before October 15, 2013, the Company may redeem some or all of the 73/4% Senior Notes at a redemption price equal to 100% of the principal amount of each note to be redeemed plus a make-whole premium described under Description of Notes - Optional Redemption together with accrued and unpaid interest. In addition, at any time prior to October 15, 2012, the Company may redeem up to 35% of the notes with the net cash proceeds from specified equity offerings at a redemption price equal to 107.750% of the principal amount of each note to be redeemed, plus accrued and unpaid interest, if any, to the date of redemption.

The indenture governing the notes contains certain covenants, including limitations and restrictions on the Company's and its restricted subsidiaries' ability to: incur additional indebtedness or issue preferred stock; make dividend payments or other restricted payments; create liens; sell assets; enter into transactions with affiliates; and enter into mergers, consolidations, or sales of all or substantially all of the Company's assets. As of the date of the indenture, all of the Company's subsidiaries, other than CSC of Tacoma, LLC, GEO International Holdings, Inc., certain dormant domestic subsidiaries and all foreign subsidiaries in existence on the date of the indenture, were restricted subsidiaries. In addition, there is a cross-default provision which becomes enforceable upon failure of payment of indebtedness at final maturity. The Company's unrestricted subsidiaries will not be subject to any of the restrictive covenants in the indenture. The Company believes it was in compliance with all of the covenants of the Indenture governing the 73/4% Senior Notes as of January 3, 2010.

Non-Recourse Debt

South Texas Detention Complex:

The Company has a debt service requirement related to the development of the South Texas Detention Complex, a 1,904-bed detention complex in Frio County, Texas, acquired in November 2005 from Correctional

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Services Corporation (CSC). CSC was awarded the contract in February 2004 by the Department of Homeland Security, U.S. Immigration and Customs Enforcement (ICE) for development and operation of the detention center. In order to finance its construction, South Texas Local Development Corporation was created and issued \$49.5 million in taxable revenue bonds. These bonds mature in February 2016 and have fixed coupon rates between 4.11% and 5.07%. Additionally, the Company is owed \$5.0 million of subordinated notes by STLDC which represents the principal amount of financing provided to STLDC by CSC for initial development.

The Company has an operating agreement with STLDC, the owner of the complex, which provides it with the sole and exclusive right to operate and manage the detention center. The operating agreement and bond indenture require the revenue from the contract with ICE be used to fund the periodic debt service requirements as they become due. The net revenues, if any, after various expenses such as trustee fees, property taxes and insurance premiums are distributed to the Company to cover operating expenses and management fees. The Company is responsible for the entire operation of the facility including all operating expenses and is required to pay all operating expenses whether or not there are sufficient revenues. STLDC has no liabilities resulting from its ownership. The bonds have a ten-year term and are non-recourse to the Company. The bonds are fully insured and the sole source of payment for the bonds is the operating revenues of the center. At the end of the ten-year term of the bonds, title and ownership of the facility transfers from STLDC to the Company. The Company has determined that it is the primary beneficiary of STLDC and consolidates the entity as a result. The carrying value of the facility as of January 3, 2010 and December 28, 2008 was \$27.2 million and \$27.9 million, respectively and is included in property and equipment in the accompanying balance sheets.

On February 2, 2009, STLDC made a payment from its restricted cash account of \$4.4 million for the current portion of its periodic debt service requirement in relation to the STLDC bond indenture. As of January 3, 2010, the remaining balance of the debt service requirement under the STLDC financing agreement is \$36.7 million, of which \$4.6 million is due within the next twelve months. Also, as of January 3, 2010, included in current restricted cash and non-current restricted cash is \$6.2 million and \$8.2 million, respectively, of funds held in trust with respect to the STLDC for debt service and other reserves.

Northwest Detention Center

On June 30, 2003, CSC arranged financing for the construction of the Northwest Detention Center in Tacoma, Washington, referred to as the Northwest Detention Center, which was completed and opened for operation in April 2004. The Company began to operate this facility following its acquisition in November 2005. In connection with the original financing, CSC of Tacoma LLC, a wholly owned subsidiary of CSC, issued a \$57.0 million note payable to the Washington Economic Development Finance Authority, referred to as WEDFA, an instrumentality of the State of Washington, which issued revenue bonds and subsequently loaned the proceeds of the bond issuance back to CSC of Tacoma LLC for the purposes of constructing the Northwest Detention Center. The bonds are non-recourse to the Company and the loan from WEDFA to CSC is non-recourse to the Company. These bonds mature in February 2014 and have fixed coupon rates between 3.20% and 4.10%.

The proceeds of the loan were disbursed into escrow accounts held in trust to be used to pay the issuance costs for the revenue bonds, to construct the Northwest Detention Center and to establish debt service and other reserves. On October 1, 2009, CSC of Tacoma LLC made a payment from its restricted cash account of

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

\$5.7 million for the current portion of its periodic debt service requirement in relation to the WEDFA bond indenture. As of January 3, 2010, the remaining balance of the debt service requirement is \$31.6 million, of which \$5.9 million is classified as current in the accompanying balance sheet.

As of January 3, 2010, included in current restricted cash and non-current restricted cash is \$7.1 million and \$2.2 million, respectively, of funds held in trust with respect to the Northwest Detention Center for debt service and other reserves.

Australia

The Company's wholly-owned Australian subsidiary financed the development of a facility and subsequent expansion in 2003 with long-term debt obligations. These obligations are non-recourse to the Company and total \$45.4 million and \$38.1 million at January 3, 2010 and December 28, 2008, respectively. The term of the non-recourse debt is through 2017 and it bears interest at a variable rate quoted by certain Australian banks plus 140 basis points. Any obligations or liabilities of the subsidiary are matched by a similar or corresponding commitment from the government of the State of Victoria. As a condition of the loan, the Company is required to maintain a restricted cash balance of AUD 5.0 million, which, at January 3, 2010, was \$4.5 million. This amount is included in restricted cash and the annual maturities of the future debt obligation is included in non-recourse debt.

Debt repayment schedules under capital lease obligations, long-term debt and non-recourse debt are as follows:

Fiscal Year	Capital Leases	Long -Term Debt	Non- Recourse (In thousands)	Revolver	Term Loan	Total Annual Repayment
2010	\$ 1,930	\$ 28	\$ 15,241	\$	\$ 3,650	\$ 20,849
2011	1,933		15,975		3,650	21,558
2012	1,933		16,722	58,000	3,650	80,305
2013	1,933		17,600		144,013	163,546
2014	1,935		18,530			20,465
Thereafter	14,773	250,000	29,656			294,429
	\$ 24,437	\$ 250,028	\$ 113,724	\$ 58,000	\$ 154,963	\$ 601,152

Current portion	(705)	(28)	(15,241)		(3,650)	(19,624)
Interest imputed on Capital Leases	(9,313)					(9,313)
Interest rate swap		(1,887)				(1,887)
Non-current portion	\$ 14,419	\$ 244,547	\$ 96,791	\$ 58,000	\$ 151,313	\$ 565,070

Guarantees

In connection with the creation SACS, the Company entered into certain guarantees related to the financing, construction and operation of the prison. The Company guaranteed certain obligations of SACS under its debt agreements up to a maximum amount of 60.0 million South African Rand, or \$8.2 million, to SACS senior lenders through the issuance of letters of credit. Additionally, SACS is required to fund a restricted account for the payment of certain costs in the event of contract termination. The Company has guaranteed the payment of 60% of amounts which may be payable by SACS into the restricted account and provided a standby letter of credit of 8.4 million South African Rand, or \$1.1 million, as security for its guarantee. The Company's obligations under this guarantee expire upon SACS release from its obligations in

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

respect of the restricted account under its debt agreements. No amounts have been drawn against these letters of credit, which are included in the Company's outstanding letters of credit under its Revolver.

The Company has agreed to provide a loan, of up to 20.0 million South African Rand, or \$2.7 million, to SACS for the purpose of financing SACS' obligations under its contract with the South African government. No amounts have been funded under this guarantee, and the Company does not currently anticipate that such funding will be required by SACS in the future. The Company's obligations relative to this guarantee expire upon SACS' fulfillment of its contractual obligations.

The Company has also guaranteed certain obligations of SACS to the security trustee for SACS' lenders. The Company secured its guarantee to the security trustee by ceding its rights to claims against SACS in respect of any loans or other finance agreements, and by pledging the Company's shares in SACS. The Company's liability under the guarantee is limited to the cession and pledge of shares. The guarantee expires upon expiration of the cession and pledge agreements.

In connection with a design, build, finance and maintenance contract for a facility in Canada, the Company guaranteed certain potential tax obligations of a not-for-profit entity. The potential estimated exposure of these obligations is Canadian Dollar (CAD) 2.5 million, or \$2.4 million, commencing in 2017. The Company has a liability of \$1.5 million and \$1.3 million related to this exposure as of January 3, 2010 and December 28, 2008, respectively. To secure this guarantee, the Company has purchased Canadian dollar denominated securities with maturities matched to the estimated tax obligations in 2017 to 2021. The Company has recorded an asset and a liability equal to the current fair market value of those securities on its consolidated balance sheet. The Company does not currently operate or manage this facility.

At January 3, 2010, the Company also had eight letters of guarantee outstanding under separate international facilities relating to performance guarantees of its Australian subsidiary totaling \$8.9 million. The Company does not have any off balance sheet arrangements other than those previously disclosed.

14. Commitments and Contingencies***Operating Leases***

The Company leases correctional facilities, office space, computers and transportation equipment under non-cancelable operating leases expiring between 2010 and 2028. The future minimum commitments under these leases are as follows:

Fiscal Year	Annual Rental (In thousands)
2010	\$ 18,041
2011	17,618
2012	14,364
2013	10,916

2014	7,585
Thereafter	65,936
	\$ 134,460

The Company's corporate offices are located in Boca Raton, Florida, under a 10 1/2 -year lease which was renewed in October 2007. The current lease has two 5-year renewal options and expires in March 2018. In addition, The Company leases office space for its regional offices in Charlotte, North Carolina; New Braunfels, Texas; and Carlsbad, California. The Company also leases office space in Sydney, Australia, Sandton, South Africa, and Berkshire, England through its overseas affiliates to support its Australian, South African, and UK

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

operations, respectively. These rental commitments are included in the table above. Certain of these leases contain escalation clauses and as such, the Company has recognized the rental expense on a straight-line basis related to those leases. Minimum rent expense associated with the Company's leases having initial or remaining non-cancelable lease terms in excess of one year was \$18.7 million, \$18.5 million and \$15.2 million for fiscal years 2009, 2008 and 2007, respectively.

Litigation, Claims and Assessments

On September 15, 2006, a jury in an inmate wrongful death lawsuit in a Texas state court awarded a \$47.5 million verdict against the Company. In October 2006, the verdict was entered as a judgment against the Company in the amount of \$51.7 million. The lawsuit, captioned Gregorio de la Rosa, Sr., et al., v. Wackenhut Corrections Corporation, (cause no. 02-110) in the District Court, 404th Judicial District, Willacy County, Texas, is being administered under the insurance program established by The Wackenhut Corporation, the Company's former parent company, in which the Company participated until October 2002. Policies secured by the Company under that program provide \$55.0 million in aggregate annual coverage. In October 2009, this case was settled in an amount within the insurance coverage limits and the insurer will pay the full settlement amount.

In June 2004, the Company received notice of a third-party claim for property damage incurred during 2001 and 2002 at several detention facilities that its Australian subsidiary formerly operated. The claim (No. SC 656 of 2006 to be heard by the Supreme Court of the Australian Capital Territory) relates to property damage caused by detainees at the detention facilities. The notice was given by the Australian government's insurance provider and did not specify the amount of damages being sought. In August 2007, legal proceedings in this matter were formally commenced when the Company was served with notice of a complaint filed against it by the Commonwealth of Australia seeking damages of up to approximately AUD 18 million or \$16.2 million, plus interest. The Company believes that it has several defenses to the allegations underlying the litigation and the amounts sought and intends to vigorously defend its rights with respect to this matter. The Company has established a reserve based on its estimate of the most probable loss based on the facts and circumstances known to date and the advice of legal counsel in connection with this matter. Although the outcome of this matter cannot be predicted with certainty, based on information known to date and the Company's preliminary review of the claim and related reserve for loss, the Company believes that, if settled unfavorably, this matter could have a material adverse effect on its financial condition, results of operations or cash flows. The Company is uninsured for any damages or costs that it may incur as a result of this claim, including the expenses of defending the claim.

During the fourth fiscal quarter of 2009, the Internal Revenue Service (IRS) completed its examination of the Company's U.S. federal income tax returns for the years 2002 through 2005. Following the examination, the IRS notified the Company that it proposes to disallow a deduction that the Company realized during the 2005 tax year. The Company has appealed this proposed disallowed deduction with the IRS's appeals division and believes it has valid defenses to the IRS's position. However, if the disallowed deduction were to be sustained on appeal, it could result in a potential tax exposure to the Company of up to \$15.4 million. The Company believes in the merits of its position and intends to defend its rights vigorously, including its rights to litigate the matter if it cannot be resolved favorably at the IRS's appeals level. If this matter is resolved unfavorably, it may have a material adverse effect on the Company's financial position, results of operations and cash flows.

The nature of the Company's business exposes it to various types of claims or litigation against the Company, including, but not limited to, civil rights claims relating to conditions of confinement and/or mistreatment, sexual misconduct claims brought by prisoners or detainees, medical malpractice claims, claims relating to employment matters (including, but not limited to, employment discrimination claims, union grievances and wage and hour claims), property loss claims, environmental claims, automobile liability claims,

Table of Contents

THE GEO GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

indemnification claims by its customers and other third parties, contractual claims and claims for personal injury or other damages resulting from contact with the Company's facilities, programs, personnel or prisoners, including damages arising from a prisoner's escape or from a disturbance or riot at a facility. Except as otherwise disclosed above, the Company does not expect the outcome of any pending claims or legal proceedings to have a material adverse effect on its financial condition, results of operations or cash flows.

Collective Bargaining Agreements

The Company had approximately 19% of its workforce covered by collective bargaining agreements at January 3, 2010. Collective bargaining agreements with four percent of employees are set to expire in less than one year.

Contract Terminations

Effective June 15, 2009, the Company's management contract with Fort Worth Community Corrections Facility located in Fort Worth, Texas was assigned to another party. Prior to this termination, the Company leased this facility (lease was due to expire August 2009) and the customer was the Texas Department of Criminal Justice (TDCJ).

On September 8, 2009, the Company exercised its contractual right to terminate its contracts for the operation and management of the Newton County Correctional Center (Newton County) located in Newton, Texas and the Jefferson County Downtown Jail (Jefferson County) located in Beaumont, Texas. The Company managed Newton County and Jefferson County until the contracts terminated effective on November 2, 2009 and November 9, 2009, respectively.

In October 2009, the Company received a 60-day notice from the California Department of Corrections and Rehabilitation (CDCR) of its intent to terminate the management contract between the Company and the CDCR for the management of its company-owned McFarland Community Correctional Facility.

The Company does not expect that the termination of these contracts will have a material adverse impact, individually or in aggregate, on its financial condition, results of operations or cash flows.

Commitments

As of January 3, 2010, the Company was in the process of constructing or expanding three facilities representing 4,325 total beds. The Company is providing the financing for two of the three facilities, representing 2,325 beds. Remaining capital expenditures related to these and other projects are expected to be \$37.7 million through 2010. The financing for the 2,000-bed facility is being provided for by a third party for state ownership. GEO is managing the construction of this project with total construction costs of \$113.8 million, of which \$90.2 million has been completed through 2009, and \$23.6 million of which remains to be completed through the first quarter of 2011.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****15. Shareholders Equity***Earnings Per Share*

Basic and diluted earnings per share (EPS) were calculated for the fiscal years ended January 3, 2010, December 28, 2008 and December 30, 2007 as follows (in thousands, except per share data):

Fiscal Year	2009	2008	2007
	(In thousands, except per share data)		
Income from continuing operations	\$ 66,300	\$ 61,453	\$ 38,089
Basic earnings per share:			
Weighted average shares outstanding	50,879	50,539	47,727
Per share amount	\$ 1.30	\$ 1.22	\$ 0.80
Diluted earnings per share:			
Weighted average shares outstanding	50,879	50,539	47,727
Effect of dilutive securities:			
Employee and director stock options and restricted stock	\$ 1,043	\$ 1,291	\$ 1,465
Weighted average shares assuming dilution	51,922	51,830	49,192
Per share amount	\$ 1.28	\$ 1.19	\$ 0.77

For the fiscal year ended January 3, 2010, 69,492 weighted average shares of stock underlying options and 107 weighted average shares of restricted stock were excluded from the computation of diluted EPS because the effect would be anti-dilutive.

For the fiscal year December 28, 2008, 372,725 weighted average shares of stock underlying options and 8,986 weighted average shares of restricted stock were excluded from the computation of diluted EPS because the effect would be anti-dilutive.

For the fiscal year December 30, 2007, no shares of stock underlying options or shares of restricted stock were excluded from the computation of diluted EPS because their effect would have been anti-dilutive.

Preferred Stock

In April 1994, the Company's Board of Directors authorized 30 million shares of blank check preferred stock. The Board of Directors is authorized to determine the rights and privileges of any future issuance of preferred stock such

as voting and dividend rights, liquidation privileges, redemption rights and conversion privileges.

Rights Agreement

On October 9, 2003, the Company entered into a rights agreement with EquiServe Trust Company, N.A., as rights agent. Under the terms of the rights agreement, each share of the Company's common stock carries with it one preferred share purchase right. If the rights become exercisable pursuant to the rights agreement, each right entitles the registered holder to purchase from the Company one one-thousandth of a share of Series A Junior Participating Preferred Stock at a fixed price, subject to adjustment. Until a right is exercised, the holder of the right has no right to vote or receive dividends or any other rights as a shareholder as a result of holding the right. The rights trade automatically with shares of our common stock, and may only be exercised in connection with certain attempts to acquire the Company. The rights are designed to protect the interests of the Company and its shareholders against coercive acquisition tactics and encourage potential acquirers to negotiate with our Board of Directors before attempting an acquisition. The rights may, but are not intended to, deter acquisition proposals that may be in the interests of the Company's shareholders.

Table of Contents

THE GEO GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

16. Retirement and Deferred Compensation Plans

The Company has two noncontributory defined benefit pension plans covering certain of the Company's executives. Retirement benefits are based on years of service, employees' average compensation for the last five years prior to retirement and social security benefits. Currently, the plans are not funded. The Company purchased and is the beneficiary of life insurance policies for certain participants enrolled in the plans. There were no significant transactions between the employer or related parties and the plan during the periods presented.

The Company's former Chief Financial Officer, John G. O'Rourke retired in August 2009. As a result of his retirement, the Company paid \$3.2 million, representing 100% of the discounted value of the benefit as of his retirement date and including a gross up of \$1.2 million for certain taxes as specified in the agreement. Including the benefits paid to Mr. O'Rourke in August 2009, the Company paid a total of \$3.3 million in the fiscal year ended January 3, 2010 related to its defined benefit pension plans.

As of January 3, 2010, the Company had non-qualified deferred compensation agreements with two key executives. These agreements were modified in 2002, and again in 2003. The current agreements provide for a lump sum payment when the executives retire, no sooner than age 55. As of January 3, 2010, both executives had reached age 55 and are eligible to receive the payments upon retirement.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table summarizes key information related to the Company's pension plans and retirement agreements. The table illustrates the reconciliation of the beginning and ending balances of the benefit obligation showing the effects during the periods presented attributable to each of the following: service cost, interest cost, plan amendments, termination benefits, actuarial gains and losses. The Company's liability relative to its pension plans and retirement agreements was \$16.2 million and \$19.3 million as of January 3, 2010 and December 28, 2008 and is included in Other Non-Current liabilities in the accompanying balance sheets. The assumptions used in the Company's calculation of accrued pension costs are based on market information and the Company's historical rates for employment compensation and discount rates, respectively.

	2009	2008
Change in Projected Benefit Obligation		
Projected Benefit Obligation, Beginning of Year	\$ 19,320	\$ 17,938

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The amount included in other accumulated comprehensive income as of January 3, 2010 that is expected to be recognized as a component of net periodic benefit cost in fiscal year 2010 is \$0.1 million.

The benefit payments reflected in the table below represent the Company's obligations to employees that are eligible for retirement or have already retired and are receiving deferred compensation benefits:

Fiscal Year	Pension Benefits (In thousands)
2010	\$ 10,223
2011	166
2012	240
2013	237
2014	306
Thereafter	5,034
	\$ 16,206

The Company also maintains the GEO Group Inc., Deferred Compensation Plan ("Deferred Compensation Plan"), a non-qualified deferred compensation plan for employees who are ineligible to participate in its qualified 401(k) plan. Eligible employees may defer a fixed percentage of their salary and the Company matches employee contributions up to a certain amount based on the employee's years of service. Payments will be made at retirement age of 65, at termination of employment or earlier depending on the employee's elections. Effective December 18, 2009, the Company established a rabbi trust; the purpose of which is to segregate the assets of the Deferred Compensation Plan from the Company's cash balances. The funds in the rabbi trust will not be available to the Company for any purpose other than to fund the Deferred Compensation Plan; however, these funds may be available to the Company's creditors in the event the Company becomes insolvent. On December 28, 2009, the Company transferred \$2.9 million in cash to the trust which is reflected as restricted cash in the accompanying balance sheet as of January 3, 2010. All future employee and employer contributions relative to the Deferred Compensation Plan will be made directly to the rabbi trust. The Company recognized expense related to its contributions of \$0.1 million, \$0.1 million and \$0.3 million in fiscal years 2009, 2008 and 2007, respectively. The liability for this plan at January 3, 2010 and December 28, 2008 was \$4.7 million and \$4.0 million, respectively.

17. Business Segment and Geographic Information***Operating and Reporting Segments***

The Company conducts its business through four reportable business segments: U.S. corrections segment; International services segment; GEO Care segment; and Facility construction and design segment. The Company has identified these four reportable segments to reflect the current view that the Company operates four distinct business lines, each of which constitutes a material part of its overall business. The U.S. corrections segment primarily

encompasses U.S.-based privatized corrections and detention business. The International services segment primarily consists of privatized corrections and detention operations in South Africa, Australia and the United Kingdom. The GEO Care segment, which is operated by the Company's wholly-owned subsidiary GEO Care, Inc., comprises privatized mental health and residential treatment services business, all of which is currently conducted in the U.S. The Facility construction and design segment consists of contracts with various state, local and federal agencies for the design and construction of facilities for which the Company has management contracts. Generally, the assets and revenues from the Facility construction and design segment are offset by a similar amount of liabilities and expenses. Disclosures for business segments are as follows (in thousands).

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The segment information presented in the prior periods has been reclassified to conform to the current presentation:

Fiscal Year	2009	2008	2007
		(In thousands)	
Revenues:			
U.S. corrections	\$ 784,066	\$ 711,038	\$ 629,339
International services	137,171	128,672	127,991
GEO Care	121,818	117,399	110,165
Facility construction and design	98,035	85,897	108,804
Total revenues	\$ 1,141,090	\$ 1,043,006	\$ 976,299
Depreciation and amortization:

Operating income from segments	204,428	182,941	154,578
General and Administrative Expenses	(69,240)	(69,151)	(64,492)
Total operating income	\$ 135,188	\$ 113,790	\$ 90,086
		2009	2008
Segment assets:			
U.S. corrections		\$ 1,145,571	\$ 1,093,880
International services		95,659	69,937
GEO Care		107,908	21,169
Facility construction and design		13,736	10,286
Total segment assets		\$ 1,362,874	\$ 1,195,272

Fiscal year 2009 U.S. corrections segment operating income includes the \$1.7 million increase in the Company's insurance reserve compared to \$2.7 million increase in fiscal year 2008 and a \$0.9 million reduction in 2007.

The increase in operating income in the U.S. corrections segment over each of the fiscal years ended 2009, 2008 and 2007 is attributable to new facilities and expansions of existing facilities. The decrease in operating revenues over those same periods in the International services segment was due to overall unfavorable foreign exchange currency fluctuations as well as significant start up costs incurred to transition new management contracts. The increase in the operating revenues in the GEO Care segment was related to

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

the 2009 acquisition of Just Care, Inc., in 2009 and increases in population and capacity at other facilities during 2008 and 2009.

Assets in the Company's Facility construction and design segment are primarily made up of accounts receivable, which includes trade receivables and construction retainage receivable. Accounts receivable balances were \$13.7 million and \$10.3 million as of January 3, 2010 and December 28, 2008, respectively.

Pre-Tax Income Reconciliation of Segments

The following is a reconciliation of the Company's total operating income from its reportable segments to the Company's income before income taxes, equity in earnings of affiliates and discontinued operations, in each case, during the fiscal years ended January 3, 2010, December 28, 2008, and December 30, 2007, respectively.

Fiscal Year Ended	2009	2008	2007
	(In thousands)		
Operating income from segments	\$ 204,428	\$ 182,941	\$ 154,578
Unallocated amounts:			
General and administrative expense	(69,240)	(69,151)	(64,492)
Net interest expense	(23,575)	(23,157)	(27,305)
Costs related to early extinguishment of debt	(6,839)		(4,794)
Income before income taxes, equity in earnings of affiliates and discontinued operations	\$ 104,774	\$ 90,633	\$ 57,987

Asset Reconciliation

The following is a reconciliation of the Company's reportable segment assets to the Company's total assets as of January 3, 2010 and December 28, 2008, respectively.

	2009	2008
Reportable segment assets	\$ 1,362,874	\$ 1,195,272
Cash	33,856	31,655
Deferred income tax	17,020	21,757
Restricted cash	34,068	32,697
Assets of discontinued operations		7,240
Total assets	\$ 1,447,818	\$ 1,288,621

Geographic Information

The Company's international operations are conducted through (i) the Company's wholly owned Australian subsidiary, The GEO Group Australia Pty. Ltd., through which the Company has management contracts for four correctional facilities, two police custody centers and also provides comprehensive healthcare services to eight government-operated prisons; (ii) the Company's consolidated joint venture in South Africa, SACM, through which the Company manages one correctional facility; and (iii) the Company's wholly-owned subsidiary in the United Kingdom, The GEO Group UK Ltd., through which the Company manages two facilities including the Campsfield House Immigration Removal Centre and the Harmondsworth Immigration Removal Centre.

Sources of Revenue

The Company derives most of its revenue from the management of privatized correction and detention facilities. The Company also derives revenue from the management of GEO Care facilities and from the construction and expansion of new and existing correctional, detention and GEO Care facilities. All of the Company's revenue is generated from external customers.

Fiscal Year	2009	2008	2007
		(In thousands)	
Revenues:			
Correction and detention	\$ 921,237	\$ 839,710	\$ 757,330

Equity in Earnings of Affiliates

Equity in earnings of affiliates for 2009, 2008 and 2007 include one of the joint ventures in South Africa, SACS. This entity is accounted for under the equity method and the Company's investment in SACS is presented as a component

of other non-current assets in the accompanying consolidated balance sheets.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A summary of financial data for SACS is as follows:

Fiscal Year	2009	2008	2007
		(In thousands)	
Statement of Operations Data			
Revenues	\$ 37,736	\$ 35,558	\$ 36,720
Operating income	14,958	13,688	14,976
Net income	7,034	9,247	4,240
Balance Sheet Data			
Current assets	33,808	18,421	21,608
Noncurrent assets	47,453	37,722	53,816
Current liabilities	2,888	2,245	6,120
Non-current liabilities	53,877	41,321	62,401
Shareholders' equity	24,496	12,577	6,903

As of January 3, 2010 and December 28, 2008, the Company's investment in SACS was \$12.2 million and \$6.2 million, respectively. The investment is included in other non-current assets in the accompanying consolidated balance sheets.

Business Concentration

Except for the major customers noted in the following table, no other single customer made up greater than 10% of the Company's consolidated revenues for the following fiscal years.

Customer	2009	2008	2007
Various agencies of the U.S. Federal Government	31%	28%	27%
Various agencies of the State of Florida	16%	17%	16%

Credit risk related to accounts receivable is reflective of the related revenues.

Accrued compensation	4,438	4,658
Other, net	644	835
Total asset	\$ 17,020	\$ 17,340

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The components of the net non-current deferred income tax asset as of January 3, 2010 are as follows:

	2009	2008
	(In thousands)	
Deferred compensation		\$ 7,923
Other, net		3,787
Net operating losses		3,484
Tax credits		2,961
Deferred loan costs		2,360
Bond discount		(1,094)
Residual U.S. tax liability on un-repatriated foreign earnings		(1,915)
Intangible assets		(3,740)
Valuation allowance		(4,577)
Depreciation		(4,772)
Total asset		\$ 4,417

The components of the net non-current deferred income tax liability as of January 3, 2010 are as follows:

	2009	2008
	(In thousands)	
Deferred compensation	\$ 7,955	
Net operating losses	6,150	
Tax credits	4,203	
Other, net	2,654	
Deferred loan costs	2,211	
Bond discount	(916)	
Residual U.S. tax liability on unrepatriated foreign earnings	(1,775)	
Valuation allowance	(5,587)	
Intangible assets	(5,521)	
Depreciation	(16,434)	(14)
Total liability	\$ (7,060)	\$ (14)

Deferred income taxes should be reduced by a valuation allowance if it is not more likely than not that some portion or all of the deferred tax assets will be realized. On a periodic basis, management evaluates and determines the amount of the valuation allowance required and adjusts such valuation allowance accordingly. At fiscal year end 2009 and 2008, the Company has a valuation allowance of \$6.0 million and \$4.8 million, respectively related to deferred tax

assets for foreign net operating losses and state tax credits. The valuation allowance increased by \$1.2 million during the fiscal year ended January 3, 2010 primarily due to additional net operating losses at an international subsidiary that will likely not be realized. In the fiscal year ended January 3, 2010, the Company implemented new guidance relative to the accounting for business combinations and as such, for years beginning after December 15, 2008, the Company records the reduction of a valuation allowance related to business acquisitions as a reduction of income tax expense.

The Company provides income taxes on the undistributed earnings of non-U.S. subsidiaries except to the extent that such earnings are indefinitely invested outside the United States. At January 3, 2010, \$8.4 million of accumulated undistributed earnings of non-U.S. subsidiaries were indefinitely invested. At the existing U.S. federal income tax rate, additional taxes (net of foreign tax credits) of \$3.0 million would have to be provided if such earnings were remitted currently.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

At fiscal year end 2009, the Company had \$4.9 million of Federal net operating loss carryforwards which begin to expire in 2020 and \$4.8 million of combined net operating loss carryforwards in various states which begin to expire in 2015.

Also at fiscal year end 2009 the Company had \$14.0 million of foreign operating losses which carry forward indefinitely and \$6.3 million of state tax credits which begin to expire in 2010. The Company has recorded a full and partial valuation allowance against the deferred tax assets related to the foreign operating losses and state tax credits, respectively.

In fiscal 2008, the Company's equity affiliate SACS recognized a one time tax benefit of \$1.9 million related to a change in the tax treatment applicable to the affiliate with retroactive effect. Under the tax treatment, expenses which were previously disallowed are now deductible for South African tax purposes. The one time tax benefit relates to an increase in the deferred tax assets of the affiliate as a result of the change in tax treatment.

The Company recognizes the cost of employee services received in exchange for awards of equity instruments based upon the grant date fair value of those awards. The exercise of non-qualified stock options which have been granted under the Company's stock option plans give rise to compensation income which is includable in the taxable income of the applicable employees and deducted by the Company for federal and state income tax purposes. Such compensation income results from increases in the fair market value of the Company's common stock subsequent to the date of grant. At fiscal year end 2009 the deferred tax asset net of a valuation allowance related to unexercised stock options and restricted stock grants was \$2.2 million.

The Company implemented guidance relative to accounting for uncertainties in income taxes, effective at the beginning of the Company's fiscal year ended December 30, 2007. The Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows in (dollars in thousands):

	2009	2008
	(In thousands)	
Balance at Beginning of Period	\$ 5,889	\$ 5,417
Additions based on tax positions related to the current year	479	1,877
Additions for tax positions of prior years	4,854	659
Reductions for tax positions of prior years	(1,877)	(1,809)
Reductions as result of a lapse of applicable statutes of limitations		(169)
Settlements	(3,398)	(86)
Balance at End of Period	\$ 5,947	\$ 5,889

All amounts in the reconciliation are reported on a gross basis and do not reflect a federal tax benefit on state income taxes. Inclusive of the federal tax benefit on state income taxes the ending balance as of January 3, 2010 is \$5.6 million. Included in the balance at January 3, 2010 is \$0.5 million related to tax positions for which the ultimate deductibility is highly certain, but for which there is uncertainty about the timing of such deductibility. Under deferred tax accounting, the timing of a deduction does not affect the annual effective tax rate but does affect the timing of tax payments. Absent a decrease in the unrecognized tax benefits related to the reversal of these timing related tax positions, the Company does not anticipate any significant increase or decrease in the unrecognized tax benefits within 12 months of the reporting date.

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Additions for tax positions of prior years reported in the reconciliation for 2009 include amounts related to proposed federal audit adjustments for the years 2002 through 2005, which the Company has appealed. The balance at January 3, 2010 includes \$5.1 million of unrecognized tax benefits which, if ultimately recognized, will reduce the Company's annual effective tax rate.

The Company is subject to income taxes in the U.S. federal jurisdiction, and various states and foreign jurisdictions. Tax regulations within each jurisdiction are subject to the interpretation of the related tax laws and regulations and require significant judgment to apply. With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for the years before 2002. The Internal Revenue Service (IRS) commenced an examination of the Company's U.S. income tax returns for 2006 through 2008 in the fourth quarter of 2009 that is anticipated to be completed by the end of 2011.

During the fourth fiscal quarter of 2009, the Internal Revenue Service (IRS) completed its examination of the Company's U.S. federal income tax returns for the years 2002 through 2005. Following the examination, the IRS notified the Company that it proposes to disallow a deduction that the Company realized during the 2005 tax year. The Company has appealed this proposed disallowed deduction with the IRS's appeals division and believes it has valid defenses to the IRS's position. However, if the disallowed deduction were to be sustained on appeal, it could result in a potential tax exposure to the Company of up to \$15.4 million. The Company believes in the merits of its position and intends to defend its rights vigorously, including its rights to litigate the matter if it cannot be resolved favorably at the IRS's appeals level. If this matter is resolved unfavorably, it may have a material adverse effect on the Company's financial position, results of operations and cash flows.

During the fiscal years ended January 3, 2010, December 28, 2008 and December 30, 2007, the Company recognized \$0.1 million, \$0.4 million and \$0.6 million in interest and penalties. The Company had accrued \$2.0 million and \$1.9 million for the payment of interest and penalties at January 3, 2010, and December 28, 2008, respectively. The Company classifies interest and penalties as interest expense and other expense, respectively.

19. Selected Quarterly Financial Data (Unaudited)

The Company's selected quarterly financial data is as follows (in thousands, except per share data):

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter

Net income per share	\$ 0.24	\$ 0.27	\$ 0.31	\$ 0.32

- (1) Operating income for First, Second, Third and Fourth Quarters 2009 includes start up costs of \$1.2 million, \$0.6 million, \$1.0 million and \$2.1 million, respectively for new facility management contracts. Start up costs in fiscal 2008 were \$1.7 million, \$2.3 million, \$2.8 million and \$1.4 million in First, Second, Third and Fourth Quarters, respectively.
- (2) Income from continuing operations for 2009 includes a loss of \$6.8 million on extinguishment of debt related to the tender premium and write off of deferred financing costs associated with the tender call of the company's 8 1/4% Senior Notes.
- (3) Operating income for Third and Fourth Quarters 2008 includes the effects of a change in our vacation policy for certain employees which conformed to a fiscal year-end based policy. The new policy allows employees to use vacation regardless of service period but within the fiscal year. Our results for fiscal Fourth Quarter ended December 28, 2008 include a one-time tax benefit related to our equity affiliate of \$1.9 million.
- (4) Third Quarter results reflect increases to insurance reserves of \$1.7 million, and \$2.7 million 2009 and 2008 respectively.

20. Subsequent event***Evaluation of subsequent events***

In May 2009, the FASB issued guidance which introduces the concept of financial statements being *available to be issued* and requires the disclosure of the date through which an entity has evaluated subsequent events and the basis

for that date as either the date the financial statements were issued or were available to be

Table of Contents**THE GEO GROUP, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

issued. This standard became effective for the Company in the fiscal year ended January 3, 2010. The Company evaluated all events and transactions that occurred after January 3, 2010 up through February 22, 2010, the date the Company issued these financial statements. During this period, the Company did not have any material recognizable subsequent events; however, the Company did have unrecognizable subsequent events as discussed further below. The implementation of this standard did not have a significant impact on the Company's financial condition, results of operations or cash flows.

Interest rate swap

Effective January 6, 2010, the Company executed an interest rate swap agreement (the Agreement) in the notional amount of \$25.0 million. The Company has designated this interest rate swap as a hedge against changes in the fair value of a designated portion of the 73/4% Senior Notes due to changes in underlying interest rates. The Agreement, which has payments, expiration dates and call provisions that mirror the terms of the 73/4% Senior Notes, effectively converts \$25.0 million of the principal into variable rate obligations. The Swap has a termination clause that gives the lender the right to terminate the interest rate swap at fair market value if the lender is no longer a party to the Credit Agreement. In addition to the termination clause, the Agreement also has call provisions which specify that the lender can elect to settle the swap for the call option price. Under the Agreement, the Company receives a fixed interest rate payment from the financial counterparty to the agreement equal to 73/4% per year calculated on the notional \$25.0 million amount, while it makes a variable interest rate payment to the same counterparty equal to the three-month LIBOR plus a fixed margin of 4.16%, also calculated on the notional \$25.0 million amount. Changes in the fair value of the interest rate swap are recorded in earnings along with related designated changes in the value of the 73/4% Senior Notes.

Stock repurchase program

On February 22, 2010, the Company announced that its Board of Directors approved a stock repurchase program for up to \$80.0 million of the Company's common stock effective through March 31, 2011. The stock repurchase is intended to be implemented through purchases made from time to time in the open market or in privately negotiated transactions, in accordance with applicable Securities and Exchange requirements. The program may also include repurchases from time to time from executive officers or directors of vested restricted stock and/or vested stock options. The stock repurchase program does not obligate GEO to purchase any specific amount of its common stock and may be suspended or extended at any time at the company's discretion.

Contract award

In Georgia, the Department of Corrections issued an RFP for 1,000 in-state beds. On February 22, 2010, the Company announced that the State of Georgia issued a notice of intent to award a contract to the Company for the development and operation of a new 1,000-bed facility, which is expandable to 2,500 beds. Under the terms of the intended award, the Company would finance, build, and operate the new \$60 million dollar facility under a long-term ground lease. The award is subject to obtaining approval of the proposed ground lease from the General Assembly. The Company expects this new 1,000-bed facility to generate approximately \$19 million dollars in annualized operating revenues once completed.

21. Condensed Consolidating Financial Information

On October 20, 2009, the Company completed an offering of \$250.0 million aggregate principal amount of its 73/4% Senior Notes due 2017 (the Original Notes). The Original Notes were sold to qualified institutional buyers in accordance with Rule 144A under the Securities Act of 1933, as amended (the Securities Act), and outside the United States only to non-U.S. persons in accordance with Regulation S

Table of Contents

THE GEO GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

promulgated under the Securities Act. In connection with the sale of the Original Notes, the Company entered into a Registration Rights Agreement with the initial purchasers of the Original Notes party thereto, pursuant to which the Company and its Subsidiary Guarantors (as defined below) agreed to file a registration statement with respect to an offer to exchange the Original Notes for a new issue of substantially identical notes registered under the Securities Act (the Exchange Notes , and together with the Original Notes, the 73/4% Senior Notes). The 73/4% Senior Notes are fully and unconditionally guaranteed on a joint and several senior unsecured basis by the Company and certain of its wholly-owned domestic subsidiaries (the Subsidiary Guarantors).

The following condensed consolidating financial information, which has been prepared in accordance with the requirements for presentation of Rule 3-10(d) of Regulation S-X promulgated under the Securities Act, presents the condensed consolidating financial information separately for:

- (i) The GEO Group, Inc., as the issuer of the 73/4% Senior Notes;

- (ii) The Subsidiary Guarantors, on a combined basis, which are guarantors of the 73/4% Senior Notes;

- (iii) The Company's other subsidiaries, on a combined basis, which are not guarantors of the 73/4% Senior Notes (the Subsidiary Non-Guarantors);

- (iv) Consolidating entries and eliminations representing adjustments to (a) eliminate intercompany transactions between or among the Company, the Subsidiary Guarantors and the Subsidiary Non-Guarantors and (b) eliminate the investments in the Company's subsidiaries; and

- (v) The Company and its subsidiaries on a consolidated basis.

Table of Contents

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, referred to as the Exchange Act), as of the end of the period covered by this report. On the basis of this review, our management, including our Chief Executive Officer and our Chief Financial Officer, has concluded that as of the end of the period covered by this report, our disclosure controls and procedures were effective to give reasonable assurance that the information required to be disclosed in our reports filed with the Securities and Exchange Commission, or the SEC, under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and to ensure that the information required to be disclosed in the reports filed or submitted under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, in a manner that allows timely decisions regarding required disclosure.

It should be noted that the effectiveness of our system of disclosure controls and procedures is subject to certain limitations inherent in any system of disclosure controls and procedures, including the exercise of judgment in designing, implementing and evaluating the controls and procedures, the assumptions used in identifying the likelihood of future events, and the inability to eliminate misconduct completely. Accordingly, there can be no assurance that our disclosure controls and procedures will detect all errors or fraud. As a result, by its nature, our system of disclosure controls and procedures can provide only reasonable assurance regarding management's control objectives.

Internal Control Over Financial Reporting

(a) *Management's Annual Report on Internal Control Over Financial Reporting*

See Item 8. Financial Statements and Supplemental Data Management's Report on Internal Control over Financial Reporting for management's report on the effectiveness of our internal control over financial reporting as of January 3, 2010.

(b) *Attestation Report of the Registered Public Accounting Firm*

See Item 8. Financial Statements and Supplemental Data Report of Independent Registered Certified Public Accountants for the report of our independent registered public accounting firm on the effectiveness of our internal control over financial reporting as of January 3, 2010.

(c) *Changes in Internal Control over Financial Reporting*

Our management is responsible for reporting any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the period to which this report relates that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Management believes that there have not been any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the period to which this

report relates that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. *Other Information*

None.

Table of Contents**PART III****Items 10, 11, 12, 13 and 14**

The information required by Items 10, 11, 12 (except for the information required by Item 201(d) of Regulation S-K which is included in Part II, Item 5 of this report), 13 and 14 of Form 10-K will be contained in, and is incorporated by reference from, the proxy statement for our 2010 annual meeting of shareholders, which will be filed with the SEC pursuant to Regulation 14A within 120 days after the end of the fiscal year covered by this report.

PART IV**Item 15. Exhibits, and Financial Statement Schedules***(a)(1) Financial Statements.*

The consolidated financial statements of GEO are filed under Item 8 of Part II of this report.

(2) Financial Statement Schedules.

Schedule II Valuation and Qualifying Accounts Page 130

All other schedules specified in the accounting regulations of the Securities and Exchange Commission have been omitted because they are either inapplicable or not required.
