PART 1 FINANCIAL INFORMATION
ITEM 1 FINANCIAL STATEMENTS
EVANS BANCORP, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2010 AND 2009

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies followed by Evans Bancorp, Inc. (the Company), a financial holding company, and its two direct, wholly-owned subsidiaries: (i) Evans Bank, National Association (the Bank), and the Bank s subsidiaries, Evans National Leasing, Inc. (ENL), Evans National Holding Corp. (ENHC) and Suchak Data Systems, Inc. (SDS); and (ii) Evans National Financial Services, Inc. (ENFS), and ENFS s subsidiary, The Evans Agency, Inc. (TEA) and TEA s subsidiaries, Frontier Claims Services, Inc. (FCS) and ENB Associates Inc. (ENBA), in the preparation of the accompanying interim unaudited consolidated financial statements conform with U.S. generally accepted accounting principles (GAAP) and with general practice within the industries in which it operates. Except as the context otherwise requires, the Company and its direct and indirect subsidiaries are collectively referred to in this report as the Company.

The accompanying consolidated financial statements are unaudited. In the opinion of management, all adjustments necessary for a fair presentation of the Company s financial position and results of operations for the interim periods have been made. Certain reclassifications have been made to the 2009 unaudited consolidated financial statements to conform to the presentation used in 2010.

The results of operations for the three and nine month periods ended September 30, 2010 are not necessarily indicative of the results to be expected for the full year. The accompanying unaudited consolidated financial statements should be read in conjunction with the Audited Consolidated Financial Statements and the Notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2009. The Company has evaluated subsequent events for potential recognition and/or disclosure through the date of filing.

2. SECURITIES

The amortized cost of securities and their approximate fair value at September 30, 2010 and December 31, 2009 were as follows:

Held to Maturity:				
Debt securities				
U.S. government agencies	35			35
States and political subdivisions	3,129	19	(50)	3,098
Total	$ 3,164	$ 19	$ (50)	$ 3,133

Available for sale securities with a total fair value of $67.9 million and $65.2 million at September 30, 2010 and December 31, 2009, respectively, were pledged as collateral to secure public deposits and for other purposes required or permitted by law.

The Company uses the Federal Home Loan Bank of New York (FHLBNY) as its primary source of overnight funds and also has several long-term advances with FHLBNY. The Company had a total of $27.0 million and $46.1 million in borrowed funds with FHLBNY at September 30, 2010 and December 31, 2009, respectively. The Company has placed sufficient collateral in the form of residential and commercial real estate loans at FHLBNY that meet FHLB collateral requirements. As a member of the Federal Home Loan Bank (FHLB) System, the Bank is required to hold stock in FHLBNY. The Bank held $2.0 million and $2.7 million in FHLBNY stock as of September 30, 2010 and December 31, 2009, respectively, at fair value.

The scheduled maturities of debt and mortgage-backed securities at September 30, 2010 are summarized below. All maturity amounts are contractual maturities. Actual maturities may differ from contractual maturities because certain issuers have the right to call or prepay obligations with or without call premiums.

FHLMC						
CMO S			981	(20)	981	(20)
Total mortgage-backed securities	$ 3,079	$ (1)	$ 1,061	$ (21)	$ 4,140	$ (22)
Held To Maturity:						
Debt securities:						
States and political subdivisions	$ 695	$ (50)	$	$	$ 695	$ (50)
Total temporarily impaired securities	$ 18,954	$ (139)	$ 1,061	$ (21)	$ 20,015	$ (160)

Management has assessed the securities available for sale in an unrealized loss position at September 30, 2010 and December 31, 2009 and determined the decline in fair value below amortized cost to be temporary. In making this determination, management considered the period of time the securities were in a loss position, the percentage decline in comparison to the securities amortized cost, and the financial condition of the issuer (primarily government or government-sponsored enterprises). In addition, management does not intend to sell these securities and it is not more likely than not that the Company will be required to sell these securities before recovery of their amortized cost. Management believes the decline in fair value is primarily related to market interest rate fluctuations and not to the credit deterioration of the individual issuers.

The Company has not recorded any other-than-temporary impairment charges in 2010 or 2009, the gross unrealized losses amounted to less than 0.1% of the total fair value of the securities portfolio at September 30, 2010 and December 31, 2009, and the gross unrealized loss position decreased by $148 thousand from December 31, 2009 to September 30, 2010. Nevertheless, it remains possible that there could be deterioration in the asset quality of the securities portfolio in the future. The credit worthiness of the Company s portfolio is largely reliant on the ability of U.S. government sponsored agencies such as FHLB, Federal National Mortgage Association (FNMA), Government National Mortgage Association (GNMA), and Federal Home Loan Mortgage Corporation (FHLMC), and municipalities throughout New York State to meet their obligations. In addition, dysfunctional markets could materially alter the liquidity, interest rate, and pricing risk of the portfolio. The relatively stable past performance is not a guarantee for similar performance of the Company s securities portfolio going forward.

3. FAIR VALUE MEASUREMENTS

The Company follows the provisions of ASC Topic 820, Fair Value Measurements and Disclosures. Those provisions relate to financial assets and liabilities carried at fair value and fair value disclosures related to financial assets and liabilities. ASC Topic 820 defines fair value, expands related disclosure requirements and specifies a hierarchy of valuation techniques based on the nature of the inputs used to develop the fair value measures. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

There are three levels of inputs to fair value measurements:

Level 1, meaning the use of quoted prices for identical instruments in active markets;

Level 2, meaning the use of quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active or are directly or indirectly observable; and

Level 3, meaning the use of unobservable inputs.

Observable market data should be used when available.

At September 30, 2010 and December 31, 2009, the estimated fair values of the Company s financial instruments were as follows:

	September 30, 2010		December 31, 2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in thousands)		(in thousands)	
Financial assets:				
Cash and cash equivalents	$ 18,003	$ 18,003	$ 12,983	$ 12,983
Securities	$ 99,247	$ 99,269	$ 79,018	$ 78,987
Loans and leases, net	$ 495,489	$ 511,337	$ 482,597	$ 491,590
Financial liabilities:				
Deposits	$ 535,286	$ 536,368	$ 499,508	$ 499,912
Other borrowed funds and securities sold under agreements to repurchase	$ 36,197	$ 37,557	$ 51,816	$ 52,362
Junior subordinated debentures	$ 11,330	$ 11,330	$ 11,330	$ 11,330

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practical to estimate that value.

Cash and Cash Equivalents. For these short-term instruments, the carrying amount is a reasonable estimate of fair value. Cash and Cash Equivalents includes interest-bearing deposits at other banks.

Securities. Fair values for available-for-sale securities are determined using independent pricing services and market-participating brokers. The pricing service and brokers use a variety of techniques to arrive at fair value including market maker bids, quotes, and pricing models. Inputs to their pricing models include recent trades, benchmark interest rates, spreads, and actual and projected cash flows. Management obtains a single market quote or price estimate for each security. These quoted prices reflect current information based on orderly transactions. These are considered Level 2 inputs under ASC 820.

The Company holds certain municipal bonds as held-to-maturity. These bonds are generally small in dollar amount and are issued only by certain local municipalities within the Company s market area. The original terms are negotiated directly and on an individual basis. These bonds are not traded on the open market and management intends to hold the bonds to maturity. The fair value of held-to-maturity securities is estimated by discounting the future cash flows using the current rates at which similar agreements would be made with municipalities with similar credit ratings and for the same remaining maturities.

Loans and Leases, net. The fair value of fixed rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities, net of the appropriate portion of the allowance for loan losses. For variable rate loans, the carrying amount is a reasonable estimate of fair value. This fair value calculation is not necessarily indicative of the exit price, as defined in ASC 820.

Deposits. The fair value of demand deposits, NOW accounts, muni-vest accounts and regular savings accounts is the amount payable on demand at the reporting date. The fair value of time deposits is estimated using the rates currently

offered for deposits of similar remaining maturities.

Other Borrowed Funds and Securities Sold Under Agreement to Repurchase. The fair value of the short-term portion of other borrowed funds approximates its carrying value. The fair value of the long-term portion of other borrowed funds is estimated using a discounted cash flow analysis based on the Company s current incremental borrowing rates for similar types of borrowing arrangements.

Junior Subordinated Debentures. The carrying amount of Junior Subordinated Debentures is a reasonable estimate of fair value due to the fact that they bear a floating interest rate that adjusts on a quarterly basis.

Commitments to extend credit and standby letters of credit. As described in Note 7 Contingent Liabilities and Commitments to these Unaudited Consolidated Financial Statements, the Company was a party to financial instruments with off-balance sheet risk at September 30, 2010 and December 31, 2009. Such financial instruments consist of commitments to extend permanent financing and letters of credit. If the options are exercised by the prospective borrowers, these financial instruments will become interest-earning assets of the Company. If the options expire, the Company retains any fees paid by the counterparty in order to obtain the commitment or guarantee. The fair value of commitments is estimated based upon fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate commitments, the fair value estimation takes into consideration an interest rate risk factor. The fair value of guarantees and letters of credit is based on fees currently charged for similar agreements. The fair value of these off-balance sheet items at September 30, 2010 and December 31, 2009 approximates the recorded amounts of the related fees, which are not considered material.

The following table presents the fair-value hierarchy levels for those financial instruments disclosed in the previous table which are measured at fair value on both a recurring and non-recurring basis at September 30, 2010 and December 31, 2009:

	Fair Value Measurement			
	Level 1	**Level 2**	**Level 3**	**Fair Value**
September 30, 2010				
Securities available-for-sale:				
U.S. government agencies	$	$ 27,438	$	$ 27,438
States and political subdivisions		37,790		37,790
Mortgage-backed securities		29,408		29,408
FHLB stock		1,975		1,975
FRB stock		920		920
Net impaired loans			7,077	7,077
December 31, 2009				
Securities available-for-sale:				
U.S. government agencies	$	$ 19,712	$	$ 19,712
States and political subdivisions		37,730		37,730
Mortgage-backed securities		14,837		14,837
FHLB stock		2,663		2,663
FRB stock		912		912
Net impaired loans			7,611	7,611

Certain assets are measured at fair value on a nonrecurring basis; that is, they are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). For the Company, these include impaired loans and goodwill and intangible assets. The Company evaluates and values impaired loans at the time the loan is identified as impaired, and the fair values of such loans are estimated using Level 3 inputs in the fair value hierarchy. Fair value is estimated based on the value of the collateral securing these loans. Collateral may consist of real estate and/or business assets including equipment, inventory and/or accounts receivable and the value of these assets is determined based on appraisals by qualified licensed appraisers hired by the Company. Appraised and reported values

may be discounted based on management s historical knowledge, changes in market conditions from the time of valuation, estimated costs to sell, and/or management s expertise and knowledge of the client and the client s business. Impaired loans had a gross value of $9.5 million, with a valuation allowance of $2.4 million, at September 30, 2010, compared to a gross value for loans and leases of $8.8 million, with a valuation allowance of

Table of Contents

$1.2 million, at December 31, 2009. The changes in Level 3 assets measured at estimated fair value during the nine months ended September 30, 2010 are as follows:

Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

Net impaired loans December 31, 2009	7,611
Included in earnings/change in net assets	(3,058)
Sales, settlements, and payments	(1,796)
Transfers into Level 3, net	4,320
Net impaired loans September 30, 2010	7,077

The Company measures the fair value of its reporting units annually, as of December 31st, using Level 3 inputs, utilizing the market value and income methods to determine if its goodwill and intangible assets are impaired. When using the cash flow models, management considers historical information, the Company s operating budget, and the Company s strategic goals in projecting net income and cash flows for the next five years. Due to the fact that the Company s stock price was below the book value per share at September 30, 2010, management performed a goodwill impairment test at September 30, 2010. Management valued TEA, the reporting unit with goodwill, using cash flow modeling techniques. The fair value of TEA substantially exceeded its carrying value in the test. As a test for reasonableness, management also ascribed a value to the total Company by adjusting the market capitalization by accounting for stock market volatility and a control premium. Management did not use other transactions for comparable valuation multiples to earnings for the total Company because there was not a meaningful sample of similar transactions to gain any comfort from using them for valuation purposes. The methodology used in the third quarter 2010 test was identical to those used in the test performed as of December 31, 2009 and described in more detail in the Application of Critical Accounting Estimates section of Item 7 Management s Discussion and Analysis of Financial Condition and Results of Operations in the Annual Report on Form 10-K for the year ended December 31, 2009. There were no impairment charges as a result of the tests performed on September 30, 2010 and December 31, 2009.

4. ALLOWANCE FOR LOAN AND LEASE LOSSES

The provision for loan and lease losses represents the amount charged against the Bank s earnings to maintain an allowance for probable loan and lease losses based on management s evaluation of the loan and lease portfolio at the balance sheet date. Factors considered by the Bank s management in establishing the allowance include: the collectability of individual loans and leases, current loan and lease concentrations, charge-off history, delinquent loan and lease percentages, the fair value of the collateral, input from regulatory agencies, and general economic conditions.

On a quarterly basis, management of the Bank meets to review and determine the adequacy of the allowance for loan and lease losses. In making this determination, the Bank s management analyzes the ultimate collectability of the loans and leases in its portfolio by incorporating feedback provided by the Bank s internal loan and lease staff, an independent internal loan and lease review function and information provided by examinations performed by regulatory agencies.

The analysis of the allowance for loan and lease losses is composed of two components: specific credit allocation and general portfolio allocation. The specific credit allocation includes a detailed review of each impaired loan and allocation is made based on this analysis. Factors may include the appraisal value of the collateral, the age of the appraisal, the type of collateral, the performance of the loan to date, the performance of the borrower s business based on financial statements, and legal judgments involving the borrower. The general portfolio allocation consists of an assigned reserve percentage based on the historical loss experience and other qualitative factors of the loan or lease category.

The general portfolio allocation is segmented into pools of loans with similar characteristics. Separate pools of loans include similar types of loans as well as pools that contain loans with similar credit characteristics. These

14

credit characteristics include debtor cash flow and payment history. The qualitative factors applied to the general portfolio allocation reflect management s evaluation of various conditions. The conditions evaluated include the following: industry and regional conditions; seasoning of the loan and lease portfolio and changes in the composition of and growth in the loan and lease portfolio; the strength and duration of the business cycle; existing general economic and business conditions in the lending areas; credit quality trends in non-accruing loans and leases; timing of the identification of downgrades; historical loan and lease charge-off experience; and the results of bank regulatory examinations.

The following table sets forth information regarding the allowance for loan and lease losses for the nine month periods ended September 30, 2010 and 2009. It should be noted that on June 30, 2009, the Company placed its direct financing lease portfolio into held-for-sale status, thereby reducing the allowance for lease losses to zero. The market value was determined to be $7.2 million less than the book value. The portfolio was subsequently placed back into held-for-investment as of September 30, 2009 after management determined that a greater value for the portfolio would be realized by keeping it rather than selling it. The portfolio was re-classified as held-for-investment using the same $7.2 million mark. Since that time, leases that are determined to have zero value are applied to the remaining mark, rather than charged off through allowance. As of September 30, 2010, the Company had an allowance for lease losses of $1.1 million and a remaining mark of $2.1 million. Leases written off against the mark were $0.3 million and $2.0 million for the three and nine months ended September 30, 2010, compared with $1.4 million in the three and nine month periods ended September 30, 2009.

Allowance for loan and lease losses

	Nine months ended September 30,	
	2010	2009
	(in thousands)	
Beginning balance, January 1	$ 6,971	$ 6,087
Charge-offs:		
Real estate	(154)	(35)
Direct financing leases		(9,483)
Commercial	(223)	(280)
Consumer loans	(3)	(12)
Other	(45)	(35)
Total charge-offs	(425)	(9,845)
Recoveries:		
Real estate	1

Commercial		9
Consumer loans		1
Other	17	16
Total recoveries	18	238
Net charge-offs	(407)	(9,607)
Provision for loan and lease losses	2,535	9,583

Ending balance, September 30	$ 9,099	$ 6,063
Ratio of allowance for loan and lease loss to total loans and leases	1.80%	1.27%

Table of Contents

5. PER SHARE DATA

The common stock per share information is based upon the weighted average number of shares outstanding during each period. The Company had 1,257 and 3,121 dilutive shares for the three and nine month periods ended September 30, 2010. This compares with 10,295 and 3,642 dilutive shares for the three and nine month periods ended September 30, 2009.

Potential common shares that would have the effect of increasing diluted earnings per share are considered to be anti-dilutive and not included in calculating diluted earnings per share. For the three and nine months periods ended September 30, 2010 there were approximately 269,340 and 172,764 shares, respectively, that were not included in calculating diluted earnings per share because their effect was anti-dilutive. There were 264,989 and 171,578 potentially anti-dilutive shares for the three and nine month periods ended September 30, 2009.

6. SEGMENT INFORMATION

The Company is comprised of two primary business segments, banking and insurance agency activities. The following tables set forth information regarding these segments for the three and nine month periods ended September 30, 2010 and 2009.

	Three Months Ended September 30, 2010 (in thousands)		
	Banking Activities	**Insurance Agency Activities**	**Total**
Net interest income (expense)	$ 6,286	($53)	$ 6,233
Provision for loan and lease losses	1,012		1,012
Net interest income (expense) after provision for loan and lease losses	5,274	(53)	5,221
Non-interest income	1,348		1,348
Insurance service and fees		1,775	1,775
Non-interest expense	5,095	1,354	6,449
Income before income taxes	1,527	368	1,895
Income tax provision	474	143	617
Net income	$ 1,053	$ 225	$ 1,278

Income tax (benefit) provision	(1,444)	588	(856)
Net (loss) income	($1,599)	$ 935	($664)

7. CONTINGENT LIABILITIES AND COMMITMENTS

The unaudited consolidated financial statements do not reflect various commitments and contingent liabilities, which arise in the normal course of business, and which involve elements of credit risk, interest rate risk and liquidity risk. These commitments and contingent liabilities consist of commitments to extend credit and standby letters of credit. A summary of the Bank s commitments and contingent liabilities is as follows:

	September 30, 2010	December 31, 2009
	(in thousands)	
Commitments to extend credit	$ 105,544	$ 90,994
Standby letters of credit	3,750	3,316
Total	$ 109,294	$ 94,310

Commitments to extend credit and standby letters of credit include some exposure to credit loss in the event of nonperformance of the customer. The Bank s credit policies and procedures for credit commitments and financial guarantees are the same as those for extensions of credit that are recorded on the Company s unaudited consolidated balance sheets. Because these instruments have fixed maturity dates, and because they may expire without being

drawn upon, they do not necessarily represent cash requirements of the Bank. The Bank has not incurred any losses on its commitments during the past two years.

Certain lending commitments for construction residential mortgage loans are considered derivative instruments under the guidelines of GAAP. The changes in the fair value of these commitments, due to interest rate risk, are not recorded on the consolidated balance sheets as the fair value of these derivatives is not considered material.

The Company is subject to possible litigation proceedings in the normal course of business. As of September 30, 2010 and December 31, 2009, there were no claims pending against the Company that management considered material.

Table of Contents

8. NET PERIODIC BENEFIT COSTS

On January 31, 2008, the Bank froze its defined benefit pension plan. The plan covered substantially all Company employees. The plan provides benefits that are based on the employees compensation and years of service. Under the freeze, eligible employees will receive at retirement the benefits already earned through January 31, 2008, but do not accrue any additional benefits. As a result, service cost is no longer incurred.

The Bank used an actuarial method of amortizing prior service cost and unrecognized net gains or losses which result from actual expense and assumptions being different than those that are projected. The amortization method the Bank used recognized the prior service cost and net gains or losses over the average remaining service period of active employees. The Bank contributed $150,000 to its defined benefit pension plan in July 2010.

The Bank also maintains a nonqualified supplemental executive retirement plan covering certain members of the Company s senior management. The Bank uses an actuarial method of amortizing unrecognized net gains or losses which result from actual expense and assumptions being different than those that are projected. The amortization method the Bank uses recognizes the net gains or losses over the average remaining service period of active employees.

The following table presents the net periodic cost for the Bank s defined benefit pension plan and supplemental executive retirement plan for the nine month periods ended September 30, 2010 and 2009:

	Nine months ended September 30, (in thousands)			
	Pension Benefits		**Supplemental Executive Retirement Plan**	
	2010	2009	2010	2009
Service cost	$	$	$ 123	$ 45
Interest cost	161	161	141	135
Expected return on plan assets	(146)	(127)		
Amortization of prior service cost			65	42
Amortization of the net loss	26	42	8	10
Net periodic cost	$ 41	$ 76	$ 337	$ 232

9. RECENT ACCOUNTING PRONOUNCEMENTS

Accounting Standards Update (ASU) 2010-20, ***Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*****.** The main objective of the ASU is to provide financial statement users with greater transparency about an entity s allowance for credit losses and the credit quality of its financing receivables. The ASU is intended to provide additional information to assist financial statement users in assessing an entity s credit risk exposures and evaluating the adequacy of its allowance for credit losses. To achieve that objective, an entity should provide disclosures on a disaggregated basis, including portfolio segment and class of financing receivable. The ASU lists a number of additional disclosures that will be required to be provided by entities once the ASU is adopted. The new guidance is effective for interim periods ending after December 15, 2010. The Company will adopt ASU 2010-20 for the year ended December 31, 2010. The ASU will have a significant impact on the amount of information disclosed by the Company about the credit quality of its loans and leases and the allowance for loan and lease losses.

ITEM 2 MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q may contain certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), that involve substantial risks and uncertainties. When used in this report, or in the documents incorporated by reference herein, the words anticipate, believe, estimate, expect, intend, may, plan, seek, and similar expressions identify such forward-looking statements. These forward-looking statements include statements regarding the Company s business plans, prospects, growth and operating strategies, statements regarding the asset quality of the Company s loan and investment portfolios, and estimates of the Company s risks and future costs and benefits.

These forward-looking statements are based largely on the expectations of the Company s management and are subject to a number of risks and uncertainties, including but not limited to general economic conditions, either nationally or in the Company s market areas, that are worse than expected; increased competition among depository or other financial institutions; inflation and changes in the interest rate environment that reduce the Company s margins or reduce the fair value of financial instruments; changes in laws or government regulations affecting financial institutions (such as the Dodd-Frank Wall Street Reform and Consumer Protection Act, discussed in greater detail below), including changes in regulatory fees and capital requirements; the Company s ability to enter new markets successfully and capitalize on growth opportunities; the Company s ability to successfully integrate acquired entities; changes in accounting pronouncements and practices, as adopted by financial institution regulatory agencies, the Financial Accounting Standards Board and the Public Company Accounting Oversight Board; changes in consumer spending, borrowing and saving habits; changes in the Company s organization, compensation and benefit plans; and other factors discussed elsewhere in this Quarterly Report on Form 10-Q, as well as in the Company s periodic reports filed with the SEC, in particular the Risk Factors discussed in Item 1A of the Company s Annual Report on Form 10-K for the fiscal year ended December 31, 2009. Many of these factors are beyond the Company s control and are difficult to predict. Because of these and other uncertainties, the Company s actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein. Forward-looking statements speak only as of the date they are made. The Company undertakes no obligation to publicly update or revise forward-looking information, whether as a result of new, updated information, future events or otherwise.

APPLICATION OF CRITICAL ACCOUNTING ESTIMATES

The Company s Unaudited Consolidated Financial Statements included in this Quarterly Report on Form 10-Q are prepared in accordance with U.S. GAAP and follow general practices within the industries in which it operates. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the Company s Unaudited Consolidated Financial Statements and Notes. These estimates, assumptions and judgments are based on information available as of the date of the Unaudited Consolidated Financial Statements. Accordingly, as this information changes, the Unaudited Consolidated Financial Statements could reflect different estimates, assumptions and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments, and as such, have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by other third-party sources, when available. When third-party information is not available, valuation adjustments are estimated in good faith by management primarily through the use of internal cash flow modeling techniques. Refer to Note 3 Fair Value Measurements to the Company s Unaudited Consolidated Financial Statements included in Item 1 of this Quarterly Report on Form 10-Q for further detail on fair value measurement.

Significant accounting policies followed by the Company are presented in Note 1 Organization and Summary of

20

Significant Accounting Policies to the Audited Consolidated Financial Statements included in Item 8 in its Annual Report on Form 10-K for the year ended December 31, 2009. These policies, along with the disclosures presented in the other Notes to the Company s Audited Consolidated Financial Statements contained in its Annual Report on Form 10-K and in this financial review, provide information on how significant assets and liabilities are presented in the Company s Unaudited Consolidated Financial Statements and how those values are determined.

Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions and estimates underlying those amounts, management has identified the determination of the allowance for loan and lease losses and valuation of goodwill to be the accounting areas that require the most subjective or complex judgments, and as such, could be most subject to revision as new information becomes available.

Allowance for Loan and Lease Losses

The allowance for loan and lease losses represents management s estimate of probable losses in the Company s loan and lease portfolio. Determining the amount of the allowance for loan and lease losses is considered a critical accounting estimate because it requires significant judgment on the part of management and the use of estimates related to the amount and timing of expected future cash flows on impaired loans and leases, estimated losses on pools of homogeneous loans and leases based on historical loss experience and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The loan and lease portfolio also represents the largest asset type on the Company s Unaudited Consolidated Balance Sheets. Note 1 to the Audited Consolidated Financial Statements included in Item 8 in the Company s Annual Report on Form 10-K for the year ended December 31, 2009, describes the methodology used to determine the allowance for loan and lease losses.

Goodwill

The amount of goodwill reflected in the Company s Unaudited Consolidated Financial Statements is required to be tested by management for impairment on at least an annual basis. The test for impairment of goodwill on the identified reporting unit is considered a critical accounting estimate because it requires judgment on the part of management and the use of estimates related to the growth assumptions and market multiples used in the valuation model. The goodwill impairment testing is typically performed annually on December 31st. Since the stock price of the Company was below the book value per share at September 30, 2010, another goodwill impairment test was performed. No impairment charges were incurred as a result of the test and the fair value of the tested reporting unit substantially exceeded its fair value.

RECENT LEGISLATION

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act) was signed into law on July 21, 2010. The Act contains numerous and wide-ranging reforms to the structure and operation of the U.S. financial system. Among the Act s significant regulatory changes are (i) the imposition of more stringent capital requirements on bank holding companies by, among other things, imposing leverage ratios and prohibiting new trust preferred issuances from counting as Tier 1 capital; (ii) making permanent the temporary increase in FDIC deposit insurance coverage from $100,000 to $250,000 and providing for unlimited deposit insurance on noninterest-bearing transaction accounts, together with an increase in the minimum Deposit Insurance Fund reserve requirement and a change in the assessment base from deposits to net assets; (iii) the creation of the Bureau of Consumer Financial Protection, a new financial consumer protection agency, which is empowered to promulgate new consumer protection regulations and revise existing regulations in many areas of consumer compliance; (iv) provisions permitting states to adopt stricter consumer protection laws and permitting state attorneys general to enforce rules issued by the Bureau of Consumer Financial Protection; (v) increased regulation of derivatives and hedging transactions and restrictions on the Company s ability to engage in certain proprietary trading and investing activities; (vi) limitations on debit card interchange fees; (vii) the imposition of new disclosure and other requirements related to corporate governance and executive compensation; and (viii) the creation of the Financial Stability Oversight Council, with responsibility for identifying and monitoring systemic risks posed by financial firms, activities and practices.

The Company is currently evaluating the potential impact of the Act on its business, financial condition and results of operations. Management expects that some provisions of the Act may have adverse effects on the Company, such

as the cost of complying with the numerous new regulations and disclosure and reporting requirements mandated by the Act. Portions of the Act become effective at different times, and many of the Act s provisions consist of general statements directing various regulators to issue more detailed rules. Consequently, the full scope of the Act s impact on the financial system in general and the Company in particular cannot be predicted at this time.

ANALYSIS OF FINANCIAL CONDITION

Loan and Lease Activity

Total loans and leases grew to $504.6 million at September 30, 2010, reflecting a $1.6 million or 0.3% increase from June 30, 2010 and a 3.1% increase from December 31, 2009. Loans secured by real estate were $410.6 million at September 30, 2010, an increase of $0.5 million or 0.1% from June 30, 2010 and a $21.1 million or 5.4% increase from December 31, 2009. The two portfolios that grew the most in the second quarter were construction loans and commercial and industrial (C&I) loans.

In 2008 and 2009, some of the Bank s larger banking competitors and the conduit markets curtailed their lending activities somewhat and consequently created opportunities in the local commercial real estate market for smaller banks, such as the Bank. The increased opportunities resulted in the Bank s strong commercial real estate growth rates. Given the Bank s experienced and local lending team, its history of low commercial real estate losses, and knowledge of its customers, management feels comfortable that its growth in commercial real estate over the past couple years has put quality assets on the balance sheet. However, the Company s strategy has shifted to a more diverse loan portfolio not as heavily reliant on commercial real estate for growth. This is evidenced in the lack of growth in commercial and multi-family real estate loans in the third quarter while C&I loans increased $4.4 million, or 7.1% from June 30, 2010. C&I loans traditionally provide banks with a better opportunity to gain new commercial deposits and establish deeper relationships.

The national direct financing lease portfolio declined $3.9 million during the third quarter and has declined $12.7 million year-to-date to $18.7 million at September 30, 2010 as the Company ceased lease originations in the second quarter of 2009 and is winding down the portfolio and exiting this business line. In the third quarter of 2009, the Company announced that it had ceased its marketing efforts to sell the portfolio and intends to service the portfolio until maturity. The national direct financing lease portfolio currently comprises 3.7% of the Company s total loan and lease portfolio, down from 4.5% at June 30, 2010 and 6.4% at December 31, 2009.

Residential 1-4 family real estate loans decreased $1.3 million from June 30, 2010 and $2.2 million from December 31, 2009. Recent efforts by the federal government to stimulate housing demand in the face of the economic recession have lowered residential home mortgage rates and resulted in stronger consumer real estate demand. 2009 was the high point of the Bank s residential mortgage demand, with demand slowing somewhat in 2010 as the low rate environment has been in place for so long that many of the consumers who would be candidates to re-finance have already done so. Although demand has abated in 2010 somewhat, it is still higher than the typical volume previously experienced in the Company s history. Given the low fixed rates and long terms of the loans being originated, the Company has sold many of its originated residential mortgage loans. This, along with prepayments from existing customers re-financing their homes, has resulted in decreased consumer real estate balances at September 30, 2010 when compared with June 30, 2010 and December 31, 2009.

The Bank sells these fixed rate residential mortgages to FNMA, while maintaining the servicing rights for those mortgages. During the three month period ended September 30, 2010, the Bank sold mortgages to FNMA totaling $2.8 million, as compared with $4.0 million sold during the three month period ended September 30, 2009. During the nine month period ended September 30, 2010, the Bank sold mortgages to FNMA totaling $7.6 million, as compared with $12.6 million during the nine month period ended September 30, 2009. Sales to FNMA decreased due to a decline in originations. At September 30, 2010, the Bank had a loan servicing portfolio principal balance of $41.3 million upon which it earns servicing fees, as compared with $40.3 million at June 30, 2010 and $37.4 million at December 31, 2009. The value of the mortgage servicing rights for that portfolio was $0.3 million at September 30, 2010, compared with $0.4 million at June 30, 2010 and $0.3 million at December 31, 2009. The value of the mortgage servicing rights has not increased in perfect correlation to the increase in the size of the servicing portfolio because the historic low interest rate environment portends more prepayments and refinancing of loans in the servicing portfolio with higher coupon rates, reducing the amount of time the Company has to earn servicing fees from FNMA.

Residential mortgage loans held-for-sale were $0.7 million at September 30, 2010, compared with

$0.3 million at June 30, 2010 and $0.3 million at December 31, 2009. The Company has never been contacted by FNMA to repurchase any loans due to improper documentation or fraud.

Loan and Lease Portfolio Composition

The following table presents selected information on the composition of the Company s loan and lease portfolio in dollar amounts and in percentages as of the dates indicated.

	September 30, 2010	December 31, 2009
	(in thousands)	
Mortgage loans on real estate:		
Residential 1-4 family	$ 78,591	$ 80,775
Commercial and multi-family	255,621	244,242
Construction	30,764	21,010
Second mortgages	6,439	7,813
Home equity lines of credit	39,179	35,633
Total real estate loans	410,594	389,473
Direct financing leases	18,745	31,486
Commercial and industrial loans	66,576	60,345
Consumer loans	2,905	2,957
Other	5,453	4,782
Net deferred loan origination costs	315	525
	504,588	489,568
Allowance for loan losses	(9,099)	(6,971)
Loans, net	$ 495,489	$ 482,597

Other loans include $0.9 million and $0.2 million at September 30, 2010 and December 31, 2009, respectively, of overdrawn deposit accounts classified as loans.

Leasing Portfolio

Net loan and lease charge-offs were $0.2 million and $0.4 million for the three and nine month periods ended September 30, 2010 as compared with $0.1 million and $9.6 million in the three and nine month periods ended September 30, 2009. Nearly all of the net charge-offs for 2009 was in the Company s leasing portfolio. What follows is an explanation of the sequence of events for ENL over the past 18 months, followed by a table illustrating the history of the leasing portfolio s accounting over the past 15 months.

The rapid deterioration of the portfolio, the lack of strategic fit in the Company s community banking business model, and the sensitivity of direct financing leases to the economic environment led management to make the strategic decision in April 2009 to exit the national direct financing lease business and market the portfolio for sale. This decision resulted in the classification of the leasing portfolio as held-for-sale and the portfolio being marked to its market value at June 30, 2009. The mark-to-market adjustment was $7.2 million. At September 30, 2009, management determined to keep the lease portfolio, terminated its plans to actively market the portfolio for sale, and the portfolio was placed back into held-for-investment at the revised carrying amount as of June 30, 2009. The difference between the principal value and the carrying value, initially created by the mark-to-market adjustment at June 30, 2009, reduces over time as individual leases deteriorate, become uncollectible, and are written off. The allowance for lease losses was zero at June 30, 2009 when the portfolio was classified as held-for-sale and reported at its fair market value. With the portfolio classified as held-for-investment at September 30, 2010, the portfolio has been

evaluated in accordance with the Company s normal credit review policies in determining the appropriate allowance for lease losses. During the third quarter of 2010, $0.3 million in leases were deemed uncollectible and the difference between the principal value and carrying value of the leases declined from $2.4 million to $2.1 million. This is a decline in the quarterly write-offs from $0.6 million in the second quarter of 2010 and $1.1 million in the first quarter of 2010. Non-performing leases of $2.4 million at September 30, 2010 have declined from $2.9 million at December 31, 2009, but remained flat compared with $2.4 million at June 30, 2010. Leases still accruing but delinquent 31 days or more were $0.4 million at September 30, 2010, an increase from $0.2 million at June 30, 2010 and $0.3 million at December 31, 2009. With charge-offs continuing to reduce the remaining mark

23

Table of Contents

on the leasing portfolio and non-accruing and delinquent leases not correspondingly declining, management determined that an additional $0.3 million in reserve for lease losses was appropriate at September 30, 2010.

Non-Performing Loans and Leases

Total non-performing loans and leases, defined as accruing loans and leases greater than 90 days past due and non-accrual loans and leases, totaled $9.9 million, or 1.96% of total loans and leases outstanding, at September 30, 2010, compared with $11.1 million, or 2.20% of total loans and leases outstanding at June 30, 2010 and $12.9 million, or 2.64% at December 31, 2009. In the third quarter, two loans totaling $1.4 million were removed from the 90 days past due and still accruing category. One of the loans, for $0.8 million, was extended under normal terms after administrative delays caused the loan to go past its original maturity date, and is no longer categorized as a non-performing loan. The other loan, for $0.6 million, was a construction loan and was put on nonaccrual status and is still considered a non-performing loan. Most of the rest of the decline in nonperforming loans in the quarter ($0.2 million) is attributable to charge-offs of previously non-performing loans.

Non-accruing mortgage loans on real estate were $5.1 million as of September 30, 2010, up from $4.5 million at June 30, 2010 and $4.3 million at December 31, 2009. The increase is primarily attributable to the aforementioned downgrade of a $0.6 million construction loan from the former Waterford portfolio.

Non-accruing direct financing leases were $2.4 million at September 30, 2010, flat compared with the $2.4 million balance at June 30, 2010, but lower than the $2.9 million balance at December 31, 2009. Most of the Company s direct financing lease write-offs are coming from those in non-accruing status. Thus far in 2010, leasing write-offs have outpaced the rate of formerly performing leases being placed into non-accrual status, resulting in the decrease in non-accruing leases.

Non-accruing commercial and industrial loans were $1.7 million at September 30, 2010, compared with $1.9 million at June 30, 2010 and $1.4 million at December 31, 2009. The decrease in the quarter was related to the charge-off of a commercial and industrial loan for $0.2 million. The increase since December was primarily caused by the downgrading of two commercial loan relationships in the second quarter.

Table of Contents

Loans 90 days past due and still accruing were $0.5 million at September 30, 2010, a decrease from $2.0 million at June 30, 2010 and $4.1 million at December 31, 2009. The two loans remaining in this category are more than 90 days past the initial maturity. The Bank intends to either extend the loans under normal underwriting criteria and market terms or receive payment in full. The delay in refinancing or repayment is generally due to administrative, legal, or other processing matters, and not due to the ability to pay or creditworthiness of the borrower. Of the matured loans that made up this balance at December 31, 2009, March 31, 2010, and June 30, 2010, all except the construction loan for $0.6 million at June 30, 2010 that went into nonaccrual were renewed under normal underwriting criteria and market terms or paid in full.
The following table sets forth information regarding non-performing loans and leases as of the dates specified.

	September 30, 2010	December 31, 2009
	(in thousands)	
Non-accruing loans and leases:		
Mortgage loans on real estate		
Residential 1-4 family	$ 816	$ 1,076
Commercial and multi-family	2,102	2,713
Construction	1,966	417
Second mortgages	74	
Home equity lines of credit	189	128
Total mortgage loans on real estate	5,147	4,334
Direct financing leases	2,372	2,905
Commercial and industrial loans	1,661	1,400
Consumer loans	200	197
Total non-accruing loans and leases	$ 9,380	$ 8,836
Accruing loans and leases 90+ days past due	523	4,112
Total non-performing loans and leases	$ 9,903	$ 12,948
Total non-performing loans and leases as a percentage of total assets	1.50%	2.09%
Total non-performing loans and leases as a percentage of total loans and leases	1.96%	2.64%

For the three and nine month periods ended September 30, 2010, gross interest income that would have been reported on non-accruing loans and leases had they been current was $186 thousand and $506 thousand, respectively. For the three and nine month periods ended September 30, 2009, gross interest income that would have been reported on non-accruing loans and leases had they been current was $70 thousand and $287 thousand, respectively. The amount has increased year-over-year to the higher level of non-accruing loans and leases. There was $13 thousand and $53 thousand of interest income on non-accruing loans and leases included in net income for the three and nine month periods ended September 30, 2010. There was $71 thousand and $200 thousand of interest income on non-accruing loans and leases included in net income for the three and nine month periods ended September 30, 2009. This amount

has decreased as more loans and leases were added to non-accruing status in the prior year than in the current year, resulting in more loans and leases in 2009 that earned income prior to be putting in non-accruing status

The Company had $1.6 million in loans and leases that were restructured in a troubled debt restructuring at September 30, 2010, compared with $1.9 million at June 30, 2010 and $2.2 million at December 31, 2009. $0.5 million, $0.6 million, and $0.9 million of the troubled debt restructurings at September 30, 2010, June 30, 2010, and December 31, 2009, respectively, were in non-accrual. All of the restructurings were undertaken in an effort to

maximize the Company s ability to collect on loans and leases where borrowers were experiencing financial issues. The general practice of the Company is to work with borrowers so that they are able to pay back their loan or lease in full. If a borrower continues to be delinquent or cannot meet the terms of a troubled debt restructuring, the loan or lease will be placed in nonaccrual or charged off.

The allowance for loan and lease losses totaled $9.1 million or 1.80% of total loans and leases outstanding at September 30, 2010, as compared with $8.3 million or 1.65% of total loans and leases outstanding at June 30, 2010, and $7.0 million or 1.42% of total loans and leases outstanding as of December 31, 2009. The allowance increase this year has resulted from a $2.5 million provision for loan and lease losses while maintaining fairly low charge-off levels at 0.11% of average loans and leases, or $0.4 million. The provision has resulted from an upward trend in loans categorized as special mention or substandard in the Company s internal credit ratings, loan growth, and additional reserve needed for the leasing portfolio as non-performing leases have not declined in tandem with the roll-off of the portfolio. However, despite the relatively high level of provision for loan and lease losses, the Company s charge-off level had remained better than industry averages at $0.4 million, or 0.11% of average loans and leases for the year to date.

At September 30, 2010, the Company had $35.1 million in loans remaining from its FDIC-assisted acquisition of Waterford Village Bank (Waterford) in July 2009. $2.2 million, or 6.4%, of the loans in the former Waterford portfolio are non-accruing and considered non-performing. The indemnification asset, which represents the expected proceeds from FDIC loss share claims related to former Waterford loans which are charged off, was $0.9 million at September 30, 2010, compared with $1.0 million at June 30, 2010 and $1.4 million at December 31, 2009. The asset declines as losses are reimbursed by the FDIC or losses are not incurred as initially recorded.

The adequacy of the Company s allowance for loan and lease losses is reviewed quarterly by the Company s management with consideration given to loan and lease concentrations, charge-off history, delinquent loan and lease percentages, regulatory considerations, and general economic conditions. Management believes the allowance for loan and lease losses is adequate for losses from existing loans and leases.

Investing Activities

Total securities were $99.3 million at September 30, 2010, reflecting a $2.1 million, or 2.16%, increase from $97.2 million at June 30, 2010 and a $20.3 million, or 25.7%, increase from $79.0 million at December 31, 2009. In the second quarter of 2010, the Company raised net proceeds of $13.4 million through a registered offering of shares of its common stock and experienced deposit growth that outpaced loan growth. With cash and interest-bearing deposits at correspondent banks paying close to zero in this historically low interest rate environment, management purchased investment securities of various types and maturities to better utilize the excess capital. Compared with December 31, 2009, as of September 30, 2010, the Company added $7.7 million in U.S. government-sponsored agency bonds, $0.1 million in tax-advantaged municipal bonds, and $14.6 million in U.S. government-sponsored mortgage-backed securities. Securities and interest-bearing deposits at correspondent banks made up 16.9% of the Bank s total average interest earning assets in the third quarter of 2010, compared with 15.1% in the second quarter of 2010 and 15.6% in the third quarter of 2009.

Due to the mix of the investment security purchases made in 2010, the Company s concentration in tax-advantaged municipal bonds decreased from 51.7% at December 31, 2009 to 39.8% at September 30, 2010 and the concentration in government-sponsored mortgage-backed securities increased from 18.8% at December 31, 2009 to 29.6% at September 30, 2010. U.S. government-sponsored agency bonds of various types comprised 27.6% of the portfolio at September 30, 2010 versus 25.0% at December 31, 2009. As a member of both the Federal Reserve System and FHLBNY, the Bank is required to hold stock in those entities. These investments made up 2.9% of the portfolio at September 30, 2010 versus 4.5% at December 31, 2009. The credit quality of the securities portfolio as a whole is believed to be strong as the portfolio is in an overall unrealized net gain position, with no individual securities in a significant unrealized loss position. With interest rates at historical lows, the unrealized gain position of the investment portfolio increased from $1.6 million and $2.7 million at December 31, 2009 and June 30, 2010, respectively, to $3.5 million at September 30, 2010.

The Company monitors extension and prepayment risk in the securities portfolio to limit potential exposures. The average expected life of the securities portfolio was 3.4 years as of September 30, 2010 compared with 3.6 years at

June 30, 2010 and 3.2 years as of December 31, 2009. Available-for-sale securities with a total fair value of $67.9

million, $69.9 million, and $65.2 million at September 30, 2010, June 30, 2010 and December 31, 2009, respectively, were pledged as collateral to secure public deposits and for other purposes required or permitted by law. The Company has no direct exposure to subprime mortgages, nor does the Company hold private mortgage-backed securities, credit default swaps, or FNMA or FHLMC preferred stock investments in its investment portfolio.

Funding Activities

Total deposits at September 30, 2010 were $535.3 million, reflecting a $0.3 million, or 0.1%, decrease from June 30, 2010, but a $35.8 million, or 7.2%, increase from December 31, 2009. Demand deposits at September 30, 2010 were $94.8 million, reflecting a $1.1 million or 1.1% decrease from June 30, 2010, but a $7.0 million or 7.9% increase from December 31, 2009. Demand deposit balances fluctuate day-to-day based on the high volume of transactions normally associated with the demand product, and therefore average demand deposit growth is a better measure of sustained growth. Average demand deposits during the three month period ended September 30, 2010 were 7.9% higher than the second quarter of 2010 and 10.8% higher than the prior year s third quarter. Most of the Company s growth in demand deposits has come from commercial customers.

In 2010, the Company s deposit growth vehicle has shifted from the premium money market savings product to its complementary Better Checking and Better Savings products, which are included in the NOW and regular savings deposit categories on the financial statements, respectively. The Better Checking product, introduced in the fourth quarter of 2009, is unique in the Bank s Western New York footprint as it pays a premium interest rate as a reward to customers who demonstrate a deep relationship with the Company as evidenced by regular use of their debit card, use of direct deposit, and electronic statements. Overall, NOW deposits increased $4.7 million, or 18.4%, in the third quarter, and $14.8 million, or 94.6% for the first nine months of the year. Regular savings deposits increased $3.6 million, or 1.5%, in the third quarter of 2010 after the Better Savings product was introduced during the second quarter. Regular savings deposits of $242.9 million at September 30, 2010 are up $13.3 million from the end of last year.

The Company experienced a decline in its muni-vest savings product in the third quarter. The Company s muni-vest savings portfolio includes a small number of municipal customers. The balance of the portfolio can experience a large amount of volatility based on property tax inflow seasonality and the specific circumstances of a small number of rate-sensitive municipal customers. Muni-vest deposits were $22.8 million at September 30, 2010, $27.7 million at June 30, 2010, and $23.4 million at December 31, 2009. Time deposits were $144.4 million at September 30, 2010, compared with $147.0 million at June 30, 2010 and $143.0 million at December 31, 2009. After a successful promotion of 5 year certificates of deposit in the second quarter, market interest rates fell further in the third quarter. The lower rates on the long end of the yield curve have once again reduced the consumer demand for longer-term deposits.

Short-term borrowings, which typically include the Bank s overnight line of credit and other advances with the FHLBNY and other short-term notes, remained at $0.1 million at September 30, 2010, unchanged from $0.1 million at June 30, 2010. However, this does represent a significant decrease from $19.1 million at December 31, 2009. Because the Company s deposit growth has outpaced its loan growth this year and with the injection of cash from the common stock offering in the second quarter of 2010, the Bank s outstanding overnight line of credit with FHLBNY, which was $19.1 million at December 31, 2009, was reduced to zero at June 30, 2010 and September 30, 2010. Long-term borrowings at September 30, 2010 remained unchanged from the June 30, 2010 balance of $27.0 million, and down slightly from $27.2 million at December 31, 2009.

ANALYSIS OF RESULTS OF OPERATIONS

Average Balance Sheet

The following tables present the significant categories of the assets and liabilities of the Company, interest income and interest expense, and the corresponding yields earned and rates paid for the periods indicated. The assets and liabilities are presented as daily averages. The average loan and lease balances include both performing and non-performing loans and leases. Investments are included at amortized cost. Yields are presented on a non-tax-equivalent basis.

<u>Net Income</u>

Net income for the third quarter of 2010 was $1.3 million, or $0.31 per diluted share, compared with a net income of $2.4 million, or $0.87 per diluted share, in the third quarter of 2009. The decrease in net income was largely due to a higher provision for loan and lease losses, the gain on bargain purchase related to the Waterford acquisition recognized in last year s third quarter, and higher non-interest expenses. The provision for loan and lease losses increased from $0.6 million to $1.0 million year-over-year. Included in the 2010 third quarter was a $0.3 million provision for the Company s discontinued leasing portfolio. There was no provision for leasing in last year s third quarter. The reasons for the increased provision are discussed above under Analysis of Financial Condition Leasing Portfolio. For the year-to-date period, net income in 2010 was $4.4 million, or $1.26 per diluted share, compared with a net loss of ($0.7) million, or ($0.24) per diluted share in 2009. The significant increase in net income was largely due to a lower provision for loan and lease losses in the first nine months of 2010. For the nine

month period ended September 30, 2009 and September 30, 2010, the provision for loan and lease loss decreased from $9.6 million to $2.5 million, respectively. The Company incurred significantly higher provision for lease losses in the first two quarters of 2009 when compared with the first two quarters of 2010, which more than offset the increased provision in the third quarter of 2010. Also, for the year-to-date comparative, there was a $2.0 million goodwill impairment charge related to the Company s leasing reporting unit in the first quarter of 2009. The return on average equity was 7.93% and 10.43% for the three and nine month periods ended September 30, 2010, compared with 22.45% and (1.98%) in the same periods in 2009. Return on average equity decreased for the three month comparison due to lower net income in the 2010 third quarter and higher average equity for the 2010 third quarter from the secondary common stock offering in May 2010. The increase in return on average equity for the nine month period is due to higher net income in 2010.

Net operating income (as defined in the following Supplemental Non-GAAP Disclosure) is net income adjusted for what management considers non-operating items. Net operating income for the three and nine month periods ended September 30, 2010 was $1.4 million, or $0.34 per diluted share, and $4.8 million, or $1.38 per diluted share, respectively, compared with a net operating income of $2.2 million, or $0.77 per diluted share, and $0.5 million, or $0.19 per diluted share in the same periods for 2009. The decrease in the three month comparison is due to the increase in leasing provision and non-interest expenses related to investments in people and infrastructure. The increase in the nine month comparison is due to the decrease in the provision for loan and lease losses as well as the increase in net interest income.

Supplemental Reporting of Non-GAAP Results of Operations

To provide investors with greater understanding of the Company s operating results, in addition to the results measured in accordance with U.S. generally accepted accounting principles (GAAP), the Company provides supplemental reporting on net operating income and diluted net operating earnings per share which excludes items that management believes to be non-operating in nature. Specifically, net operating income and diluted net operating earnings per share exclude gains and losses on the sale and call of securities and the non-cash impairment and amortization of acquisition-related goodwill and intangible assets. This non-GAAP information is being disclosed because management believes that providing these non-GAAP financial measures provides investors with information useful in understanding the Company s financial performance, its performance trends, and financial position. While the Company s management uses these non-GAAP measures in its analysis of the Company s performance, this information should not be viewed as a substitute for financial results determined in accordance with GAAP or considered to be more important than financial results determined in accordance with GAAP, nor is it necessarily comparable with non-GAAP measures which may be presented by other companies. The reconciliation of net operating income and diluted net operating earnings per share to GAAP net income (loss) and GAAP diluted earnings (loss) per share is presented in the following table.

Table of Contents

Other Results of Operations

Net interest income was $6.2 million during the third quarter of 2010, up $0.1 million, or 2.2% from the trailing second quarter of 2010, and $0.2 million, or 4.4%, higher than $6.0 million in the third quarter of 2009. For the year-to-date, net interest income of $18.4 million in 2010 was 11.4% higher than the $16.5 million in net interest income earned in the same period in 2009. While the net interest margin continues to contract, interest-earning asset growth has allowed the Company to sustain its net interest income growth. Core loans, which are defined as total loans and leases less direct financing leases, were $485.8 million at September 30, 2010, an increase of 1.2% (4.8% annualized) from $480.3 million at June 30, 2010 and 6.1% from $458.1 million at December 31, 2009. The Company experienced growth in its commercial and industrial portfolio, offset by a decrease in its residential mortgage balances due to refinancing activity and the sale of most originations to FNMA. Investment securities were $99.2 million at September 30, 2010, up 2.1% from $97.2 million at the end of the second quarter of 2010 and 25.6% from $79.0 million at the end of 2009. The Company raised $13.4 million in capital in May 2010 which it intends to use to support future loan growth. In the interim, the Company has used the capital to purchase investment securities. Partially offsetting the increase in core loans and investment securities was the continuing decline in direct financing lease balances after the Company discontinued this business line in the second quarter of 2009. Direct financing leases were $18.7 million at September 30, 2010, compared with $22.7 million at June 30, 2010 and $31.5 million at December 31, 2009.

The Company s net interest margin was 4.18% in the third quarter of 2010, but the margin continues to contract, as it was 4.21% in the 2010 second quarter and 4.43% in the 2009 third quarter. The Company s net interest margin for the third quarter of 2010 was impacted by two former Waterford loans that were impaired at the time of acquisition that

paid off in full in the quarter. The recovery of those loans was recognized into interest income, boosting net interest margin by 5 basis points. Adjusting for those two Waterford loans, net interest margin for the quarter would have been 4.13%, continuing a trend of net interest margin compression of 6-9 basis points per quarter. For the year-to-date period, net interest margin decreased from 4.33% in 2009 to 4.22% in 2010. While loan rates remain stable, investment security yields continue to decline as the yield curve flattens among long-term low inflation rate expectations in the marketplace. Investment securities also make up a larger portion of the Company s interest earning assets during the third quarter of 2010 than in past quarters as a result of the Company s

Table of Contents

May 2010 capital raise. On the funding side, while the Company has been successful in attracting new customers, most of that success has come in the premium rate Better Checking, Better Savings, and business money market accounts. While these products have put some pressure on the net interest margin, the Company expects to benefit in the longer term from the deep customer relationships that these products provide. With rates at a low level for such an extended period, there is limited benefit available going forward in more beneficial deposit pricing while asset yields continue to decline.

The provision for loan and lease losses increased from $0.6 million in the third quarter of 2009 and $0.3 million in the second quarter of 2010 to $1.0 million in the third quarter of 2010, primarily due to the $0.3 million provision for leases. The provision for the Company s core loan portfolio was $0.7 million in the third quarter of 2010, compared with $0.3 million in the second quarter of 2010 and $0.6 million in the third quarter of 2009. The increase in the provision for loan losses in the third quarter of 2010 versus the second quarter of 2010 was due to an increased amount of loan downgrades in the Company s internal credit risk ratings during the quarter. The provision for the Company s leasing portfolio was $0.3 million in the third quarter 2010, compared with $0 in the second quarter of 2010 and the third quarter of 2009. Despite not originating any new leases since the second quarter of 2009 and another $0.3 million in net write-offs in the third quarter of 2010, leasing nonaccruals were flat at September 30, 2010 compared with June 30, 2010 and 31 or more days delinquent leases increased from $0.2 million to $0.4 million. With charge-offs continuing to reduce the remaining mark on the leasing portfolio and non-accruing and delinquent leases not correspondingly declining, management determined that an additional $0.3 million in reserve for lease losses was appropriate at September 30, 2010.

For the nine-month period ended September 30, 2010, the provision for loan and lease losses was $2.5 million, compared with $9.6 million for the same period in 2009. The decline is largely due to the leasing portfolio, which was impaired with a mark-to-market adjustment in the second quarter of 2009 when the Company announced its intention to market the portfolio for sale. Management has since decided to hold the portfolio through maturity. The provision for lease losses was $1.1 million for the nine month period ended September 30, 2010, compared with $6.8 million in the prior year period. The provision for the core loan portfolio has also declined in 2010. The provision for loan losses was $1.4 million for the nine month period ended September 30, 2010, compared with $2.8 million in the prior year period. The provision was higher in 2009 because of higher loan growth, a larger increase in criticized loans according to the Company s internal credit ratings, and a larger increase in qualitative loss factors due to the economic recession.

Non-interest income, which represented 33.4% of total revenue, compared with 39.1% in the prior year third quarter, declined 18.4%, or $0.7 million to $3.1 million when compared with the third quarter of 2009. The decrease is primarily attributable to a gain on bargain purchase of $0.7 million recognized in the third quarter of 2009 related to the Waterford acquisition in an FDIC-assisted transaction in July 2009.

The largest portion of the Company s non-interest income is insurance service and fee revenue from The Evans Agency (TEA). Insurance agency revenue of $1.8 million was flat for this year s third quarter when compared with the 2009 third quarter. The revenue is higher than the $1.6 million in the second quarter of 2010 due to the seasonality of the revenue. The soft insurance market and macro-economic conditions continue to put downward pressure on TEA s revenue in personal and commercial property and casualty insurance commissions.

For the nine-month period ended September 30, 2010, non-interest income declined to $9.8 million, from $11.1 million in 2009. $0.7 million of the year-over-year decline is attributable to the bargain purchase gain related to the Waterford acquisition in July 2009. Deposit service charges declined $0.2 million from $1.7 million to $1.5 million, reflecting an industry-wide trend related to consumer behavior and new regulation. Other income declined from $2.5 million in the first nine months of 2009 to $2.3 million in 2010. This decline is a result of reduced non-compliance and late fees charged to ENL customers as the portfolio rolls off. TEA revenue remained flat for the nine month period ended September 30, 2010 when compared to the prior year period at $5.7 million.

Total non-interest expenses were $6.4 million for the third quarter of 2010, an increase of $0.7 million, or 11.3%, from $5.8 million in the third quarter of 2009. The increase is primarily due to higher salary and employee benefits. The largest component of the increase was in salaries and employee benefits, which increased 15.3%, or $0.5 million, to $3.7 million for the third quarter of 2010 compared with the prior year third quarter. Salaries and benefits were higher because of annual merit raises and the addition of new employees including commercial loan officers and

branch employees retained in the acquisition of Waterford. Another portion of the increase is a result of annual

bonus accruals in the third quarter of 2010. After the losses recorded in the first two quarters of 2009, the Company determined that it would not pay out bonuses to any employees for 2009 and thus suspended its normal bonus accrual for the remainder of 2009.

For the year-to-date period, non-interest expenses decreased $0.2 million to $19.4 million in 2010 due primarily to the goodwill impairment charge related to the Company s leasing reporting unit in the first quarter of 2009. Excluding the $2.0 million goodwill impairment charge, non-interest expenses increased $1.9 million, or 10.6%, from 2009 to 2010, primarily due to the reasons discussed in the quarterly comparison above.

As a result of the increase in non-interest expenses and the decrease in non-interest income, the efficiency ratio, excluding goodwill impairment and intangible amortization, increased to 66.57% for the third quarter of 2010, from 56.95% in the third quarter of 2009. The Company s efficiency ratio for the second quarter of 2010 was 69.72%. For the year-to-date, the efficiency ratio was 66.54% in 2010, compared with 61.26% in 2009.

Income tax expense was $0.6 million and $1.9 million for the three and nine month periods ended September 30, 2010, respectively. These figures represent an effective tax rate of 32.6% and 30.1% for the three and nine month periods ended September 30, 2010, respectively, compared with 27.7% and 56.3% in the three and nine month periods ended September 30, 2009. The Company s effective tax rate is higher in the third quarter of 2010 compared with an effective tax rate of 26.6% in the second quarter of 2010. The Company typically files its tax returns in the third quarter, resulting in the effective tax rate varying based on how the tax return differs from the previously estimated tax provision. The Company also recorded adjustments related to the completion of its normal IRS and New York State tax audits. The effective tax rates in 2009 were significantly impacted by the losses incurred in the Company s leasing reporting unit.

CAPITAL

The Company consistently maintains regulatory capital ratios measurably above the federal well capitalized standard, including a Tier 1 leverage ratio of 9.99% at September 30, 2010. This is a significant increase from the 7.80% at December 31, 2009 due to the Company s successful registered common stock offering in May 2010 generating net proceeds to the Company of $13.4 million. Book value per share of the Company s common stock was $15.72 at September 30, 2010, compared with $15.44 at June 30, 2010, and $16.34 at December 31, 2009. While earnings increased the book value of the Company, the 1.2 million additional shares issued in the May 2010 common stock offering at $12.00 per share diluted the book value per share. Tangible book value per share at September 30, 2010 was $13.39, compared with $13.05 at June 30, 2010 and $12.72 at December 31, 2009 as earnings growth offset the stock offering s dilution.

On August 17, 2010, the Board of Directors of the Company declared a semi-annual cash dividend of $0.20 per share on the Company s outstanding common stock. The dividend was paid on October 6, 2010 to shareholders of record as of September 13, 2010. The $0.20 dividend was equal to the previous dividend paid on April 27, 2010.

LIQUIDITY

The Bank utilizes cash flows from the investment portfolio and federal funds sold balances to manage the liquidity requirements related to loan demand and deposit fluctuations. The Bank also has many borrowing options. As a member of the FHLB the Bank is able to borrow funds at competitive rates. Advances of up to $84.5 million can be drawn on the FHLB via an Overnight Line of Credit Agreement between the Bank and the FHLB. An amount equal to 25% of the Bank s total assets could be borrowed through the advance programs under certain qualifying circumstances. The Bank also has the ability to purchase up to $14.0 million in federal funds from its correspondent banks. By placing sufficient collateral in safekeeping at the Federal Reserve Bank, the Bank could borrow at the discount window. The Bank s liquidity needs also can be met by more aggressively pursuing time deposits, or accessing the brokered time deposit market, including the Certificate of Deposit Account Registry Service (CDARS) network. The Company s primary source of liquidity is dividends from the Bank. Additionally, the Company has access to capital markets as a funding source, as evidenced by its recent registered public offering of common stock, described above under Capital.

Cash flows from the Bank s investment portfolio are laddered, so that securities mature at regular intervals, to provide funds from principal and interest payments at various times as liquidity needs may arise. Contractual maturities are also laddered, with consideration as to the volatility of market prices. At September 30, 2010,

33

approximately 3.3% of the Bank s securities had contractual maturity dates of one year or less and approximately 21.7% had maturity dates of five years or less.

Management, on an ongoing basis, closely monitors the Company s liquidity position for compliance with internal policies, and believes that available sources of liquidity are adequate to meet funding needs in the normal course of business. As part of that monitoring process, management calculates the 90-day liquidity each month by analyzing the cash needs of the Bank. Included in the calculation are liquid assets and potential liabilities. Management stresses the potential liabilities calculation to ensure a strong liquidity position. Included in the calculation are assumptions of some significant deposit run-off as well as funds needed for loan closing and investment purchases. At September 30, 2010, in the Company s internal stress test, the Company had net short-term liquidity of $60.6 million as compared with $43.2 million at December 31, 2009.

Management does not anticipate engaging in any activities, either currently or in the long term, for which adequate funding would not be available and which would therefore result in significant pressure on liquidity. However, continued economic recession could negatively impact the Company s liquidity.

The Company believes that the Bank maintains a sufficient level of U.S. government and government agency securities and New York State municipal bonds that can be pledged as collateral for municipal deposits.

Table of Contents

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Additional information responsive to this Item is contained in the Liquidity section of Management s Discussion and Analysis of Financial Condition and Results of Operations, which information is incorporated herein by reference.
Market risk is the risk of loss from adverse changes in market prices and/or interest rates of the Bank s financial instruments. The primary market risk the Company is exposed to is interest rate risk. The core banking activities of lending and deposit-taking expose the Bank to interest rate risk, which occurs when assets and liabilities reprice at different times and by different amounts as interest rates change. As a result, net interest income earned by the Bank is subject to the effects of changing interest rates. The Bank measures interest rate risk by calculating the variability of net interest income in future periods under various interest rate scenarios using projected balances for interest-earning assets and interest-bearing liabilities. Management s philosophy toward interest rate risk management is to limit the variability of net interest income to changes in net interest rates. The balances of financial instruments used in the projections are based on expected growth from forecasted business opportunities, anticipated prepayments of loans, and expected maturities of investment securities, loans and deposits. Management supplements the modeling technique described above with analysis of market values of the Bank s financial instruments and changes to such market values given changes in the interest rates.
The Bank s Asset-Liability Committee, which includes members of senior management, monitors the Bank s interest rate sensitivity with the aid of a model that considers the impact of ongoing lending and deposit taking activities, as well as interrelationships in the magnitude and timing of the repricing of financial instruments, including the effect of changing interest rates on expected prepayments and maturities. When deemed prudent, management has taken actions, and intends to do so in the future, to mitigate exposure to interest rate risk through the use of on- or off-balance sheet financial instruments. Possible actions include, but are not limited to, changing the pricing of loan and deposit products, and modifying the composition of interest-earning assets and interest-bearing liabilities, and other financial instruments used for interest rate risk management purposes.
The following table demonstrates the possible impact of changes in interest rates on the Bank s net interest income over a 12-month period of time:

SENSITIVITY OF NET INTEREST INCOME TO CHANGES IN INTEREST RATES

Calculated (decrease) increase
in projected annual net interest income
(in thousands)

	September 30, 2010	December 31, 2009
Changes in interest rates		
+200 basis points	$ 29	($807)
+100 basis points	825	92
-100 basis points	470	577
-200 basis points	N/A	N/A

Many assumptions were utilized by management to calculate the impact that changes in interest rates may have on the Bank s net interest income. The more significant assumptions related to the rate of prepayments of mortgage-related assets, loan and deposit volumes and pricing, and deposit maturities. The Bank assumed immediate changes in rates including 200 basis point rate changes. In the event that the 200 basis point rate changes cannot be achieved, the applicable rate changes are limited to lesser amounts such that interest rates cannot be less than zero. These assumptions are inherently uncertain and, as a result, the Bank cannot precisely predict the impact of changes in interest rates on net interest income. Actual results may differ significantly due to the timing, magnitude, and frequency of interest rate changes in market conditions and interest rate differentials (spreads) between maturity/repricing categories, as well as any actions such as those previously described, which management may

take to counter such changes. In light of the uncertainties and assumptions associated with the process, the amounts presented in the table and changes in such amounts are not considered significant to the Bank s projected net interest income.

ITEM 4 CONTROLS AND PROCEDURES

DISCLOSURE CONTROLS AND PROCEDURES

The Company s management, with the participation of the Company s principal executive officer and principal financial officer, evaluated the effectiveness of the design and operation of the Company s disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of September 30, 2010 (the end of the period covered by this Report). Based on that evaluation, the Company s principal executive and principal financial officers concluded that as of September 30, 2010 the Company s disclosure controls and procedures were effective.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

No changes in the Company s internal control over financial reporting were identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 or Rule 15d-15 under the Exchange Act that occurred during the fiscal quarter ended September 30, 2010 that have materially affected, or are reasonably likely to materially affect, the Company s internal control over financial reporting.
