ITEM 9. REGULATION FD DISCLOSURE.

The following information is furnished pursuant to Item 12, "Results of Operations and Financial Condition."

## Edgar Filing: LILLY ELI & CO - Form 8-K

On April 22, 2003, Eli Lilly and Company (the "registrant" or "company") issued a press release regarding its results of operations for the quarter ended March 31, 2003, including, among other things, an income statement for that quarter and a consolidated balance sheet as of March 31, 2003. In addition, on the same day the company will hold a teleconference for analysts and media to discuss the first quarter results. The teleconference will be web cast on the company's web site. The press release and related financial statements are attached to this Form 8-K as Exhibit 99.

The company uses non-GAAP financial measures, such as adjusted (or "normalized") net income and diluted earnings per share. For the current quarter the measures exclude the impact of restructurings, asset impairments, and other special charges as described in the attached press release. These items may be highly variable, difficult to predict, and of a size that could have substantial impact on the company's reported operations for a period.

Management believes that these non-GAAP measures provide useful information to investors. Among other things, they may help investors evaluate the company's operations period over period and identify operating trends that could otherwise be masked by the excluded items. Management uses these measures internally to evaluate the performance of the business, including to allocate resources and to evaluate results relative to incentive compensation targets.

Investors should consider these non-GAAP measures in addition to, not as a substitute for, or as superior to, measures of financial performance prepared in accordance with GAAP. For the reasons described above for use of non-GAAP measures, the company's earnings guidance is subject to adjustment for certain matters, such as those identified above, as to which prospective quantification generally is not feasible.
