(Zip Code)

Registrant's telephone number, including Area Code: 901-523-4444

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class -----	Name of Exchange on which Registered -----
\$0.625 PAR VALUE COMMON CAPITAL STOCK (INCLUDING RIGHTS ATTACHED THERETO)	NEW YORK STOCK EXCHANGE, INC.

Securities registered pursuant to Section 12(g) of the Act: NONE

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

X YES NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (Section 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. X

At February 22, 2002, the aggregate market value of the voting stock of the registrant held by non-affiliates of the registrant was approximately \$4.26 billion.

At February 22, 2002, the registrant had 125,853,984 shares of common stock

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

outstanding.

DOCUMENTS INCORPORATED BY REFERENCE:

1. Portions of Proxy Statement furnished to shareholders in connection with Annual Meeting of Shareholders scheduled for 4/16/02 - Parts I, II, III and IV.

PART I

ITEM 1 BUSINESS

General.

First Tennessee National Corporation (the "Corporation") is a Tennessee corporation incorporated in 1968. The Corporation is registered as a bank holding company under the Bank Holding Company Act of 1956, as amended, and elected, effective March 13, 2000, to become a financial holding company pursuant to the provisions of the Gramm-Leach-Bliley Act. See "Supervision and Regulation - Financial Modernization Legislation" below. At December 31, 2001, the Corporation had total assets of \$20.6 billion and ranked second in terms of total assets among Tennessee-headquartered bank holding companies and ranked 32nd nationally.

Through its principal subsidiary, First Tennessee Bank National Association (the "Bank"), and its other banking and banking-related subsidiaries, the Corporation provides a broad range of financial services. The Corporation is engaged in the commercial banking business. Significant operations are also conducted in the mortgage banking, capital markets, and transaction processing divisions, which are described in more detail in the response to Item 7 of Part II hereof and Note 22 to the Consolidated Financial Statements. During 2001 approximately 65% of revenues were provided by fee income and approximately 35% of revenues were provided by net interest income. As a financial holding company, the Corporation coordinates the financial resources of the consolidated enterprise and maintains systems of financial, operational and administrative control that allow coordination of selected policies and activities.

The Bank is a national banking association with principal offices in Memphis, Tennessee. It received its charter in 1864 and operates primarily on a regional basis. During 2001 it generated gross revenue (net interest income plus noninterest income) of approximately \$1.97 billion and contributed 98% of consolidated net income from continuing operations. At December 31, 2001, the Bank had \$20.2 billion in total assets, \$13.4 billion in total deposits, and \$10.0 billion in net loans. Within the State of Tennessee at September 30, 2001, the Bank ranked second in terms of total assets and ranked first in deposit market share. Nationally, it ranked 48th among banks in terms of total assets as of September 30, 2001. On September 30, 2001, the Corporation's subsidiary banks had 443 banking locations (187 financial centers and 256 free-standing ATMs) in 21 Tennessee counties, including all of the major metropolitan areas of the state, 20 banking locations (including 14 free-standing ATMs) in Mississippi and 8 banking locations (including 4 free-standing ATMs) in Arkansas, and consumer finance offices in 12 states nationwide. First Horizon Home Loan Corporation, a subsidiary of the Bank, and its affiliates, at December 31, 2001, provided mortgage banking services through approximately 136 offices in 31 states and ranked in the top 20 nationally in retail mortgage loan originations and mortgage loan servicing. First Tennessee Capital Markets (which changed its name in January 2002 to FTN Financial Capital Markets), a division of the Bank, had

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

at December 31, 2001, offices in 8 states and ranked as one of the leading underwriters of U.S. agency debt.

The Corporation provides the following services through its subsidiaries:

- general banking services for consumers, businesses, financial institutions, and governments
- mortgage banking services
- capital markets--primarily sales and underwriting of bank-eligible securities and

2

- securities eligible for underwriting by financial subsidiaries, mortgage loans and advisory services, and equity research.
- transaction processing - credit card merchant processing, nationwide check clearing services, and remittance processing
- trust, fiduciary, and agency services
- credit card products
- discount brokerage and brokerage
- venture capital
- equipment finance
- investment and financial advisory services, including investment advisor to First Funds, a family of mutual funds
- mutual fund sales as agent
- insurance sales as agent
- private mortgage reinsurance
- consumer finance lending

An element of the Corporation's business strategy is to seek acquisitions and consider divestitures that would enhance long-term shareholder value. The Corporation has a department charged with this responsibility which is constantly reviewing and developing opportunities to achieve this element of the Corporation's strategy. Acquisitions and divestitures which closed during the past three years are described in Note 2 to the Consolidated Financial Statements contained in an Appendix to the Corporation's Proxy Statement furnished to shareholders in connection with the Annual Meeting of Shareholders scheduled for April 16, 2002 (herein referred to, including such Appendix, as the "2002 Proxy Statement"), which note is incorporated herein by reference.

All of the Corporation's subsidiaries are listed in Exhibit 21. The Bank has filed notice with the Comptroller of the Currency ("Comptroller") as a government securities broker/dealer. The Capital Markets division of the Bank is registered with the Securities and Exchange Commission ("SEC") as a municipal securities dealer with municipal securities offices in Memphis, Tennessee; Los Angeles, California; Mobile, Alabama; Chicago, Illinois; Overland Park, Kansas; Dallas, Texas; and New York, New York, and additional offices in Nashville, Tennessee and Cleveland, Ohio. The subsidiary banks are supervised and regulated as described below. Highland Capital Management Corp., Martin and Company, Inc. and First Tennessee Advisory Services, a separately identifiable department of the Bank, are registered with the SEC as investment advisers. First Tennessee Brokerage, Inc. is registered as an investment adviser in Tennessee, Texas and Virginia. Hickory Venture Capital Corporation is licensed as a Small Business Investment Company. First Tennessee Brokerage, Inc. and First Tennessee Securities Corporation are registered as broker-dealers with the SEC and all states where they conduct business for which registration is required. First Horizon Home Loan Corporation is licensed as a mortgage lender (or exempt from licensing) in all states where it does business and is regulated by the

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

Comptroller as well as various state regulators. First Tennessee Insurance Services ("FTIS"), a department of the Bank with offices in Dandridge, Tennessee, is licensed in all states where it does business for which licensing is required. FT Reinsurance Company is licensed by the state of South Carolina as a monoline insurance company. FT Insurance Corporation is licensed as an insurance agency in Alabama. First Horizon Insurance Services, Inc., Polk & Sullivan Group, Inc., Mann, Smith & Cummings, Inc., MASMIC, Inc., Merritt & McKenzie, Inc., Frost Specialty Risk, Inc., and Van Meter Insurance, Inc. are licensed as insurance agencies in all states where they do business for which licensing is required. First Tennessee Brokerage, Inc. is licensed as an insurance agency in the states where it does business for which licensing is

3

required for the sale of annuity products. First Tennessee Securities Corporation and all of the subsidiaries listed in the second preceding sentence are financial subsidiaries under the Gramm-Leach-Bliley Act.

Expenditures for research and development activities were not material for the years 1999, 2000 or 2001.

Neither the Corporation nor any of its significant subsidiaries is dependent upon a single customer or very few customers.

At December 31, 2001, the Corporation and its subsidiaries had 9,861 full-time-equivalent employees, not including contract labor for certain services.

For additional information on the business of the Corporation, refer to the Management's Discussion and Analysis and Glossary sections contained in the 2002 Proxy Statement, which sections are incorporated herein by reference.

Supervision and Regulation.

The following summary sets forth certain of the material elements of the regulatory framework applicable to bank holding companies and financial holding companies and their subsidiaries and to companies engaged in securities and insurance activities and provides certain specific information about the Corporation. The bank regulatory framework is intended primarily for the protection of depositors and the Federal Deposit Insurance Funds and not for the protection of security holders. In addition, certain activities of the Corporation and its subsidiaries are subject to various securities and insurance laws and are regulated by the Securities and Exchange Commission and the state insurance departments of the states in which they operate. To the extent that the following information describes statutory and regulatory provisions, it is qualified in its entirety by express reference to each of the particular statutory and regulatory provisions. A change in applicable statutes, regulations or regulatory policy may have a material effect on the business of the Corporation.

General

The Corporation is a bank holding company and financial holding company within the meaning of the Bank Holding Company Act of 1956, as amended (the "BHCA") and is registered with the Board of Governors of the Federal Reserve System (the "Federal Reserve"). The Corporation is subject to the regulation and supervision of and examination by the Federal Reserve under the BHCA. The Corporation is required to file with the Federal Reserve annual reports and such additional information as the Federal Reserve may require pursuant to the BHCA.

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

Under the BHCA, prior to March 13, 2000, bank holding companies could not in general directly or indirectly acquire the ownership or control of more than 5% of the voting shares or substantially all of the assets of any company, including a bank, without the prior approval of the Federal Reserve, and the BHCA also generally limited the types of activities in which a bank holding company and its subsidiaries could engage to banking and activities found by the Federal Reserve to be so closely related to banking as to be a proper incident thereto. Since March 13, 2000, eligible bank holding companies that elect to become financial holding companies may affiliate with securities firms and insurance companies and engage in activities that are "financial

4

in nature"generally without the prior approval of the Federal Reserve. See "-Financial Modernization Legislation" below.

In addition, the BHCA permits the Federal Reserve to approve an application by a bank holding company to acquire a bank located outside the acquirer's principal state of operations without regard to whether the transaction is prohibited under state law. See " --Interstate Banking and Branching Legislation." The Tennessee Bank Structure Act of 1974, among other things, prohibits (subject to certain exceptions) a bank holding company from acquiring a bank for which the home state is Tennessee (a "Tennessee bank") if, upon consummation, the company would directly or indirectly control 30% or more of the total deposits in insured depository institutions in Tennessee. As of June 30, 2001, the Corporation estimates that it held approximately 16% of such deposits. Subject to certain exceptions, the Tennessee Bank Structure Act prohibits a bank holding company from acquiring a bank in Tennessee which has been in operation for less than five years. Tennessee law permits a Tennessee bank to establish branches in any county in Tennessee. See also "- Interstate Banking and Branching Legislation" below.

The Corporation's subsidiary banks (the "Subsidiary Banks") are subject to supervision and examination by applicable federal and state banking agencies. The Bank and First National Bank of Springdale, Springdale, Arkansas, are national banking associations subject to regulation and supervision by the Comptroller as their primary federal regulator. In addition, the Subsidiary Banks are insured by, and subject to regulation by, the Federal Deposit Insurance Corporation (the "FDIC"). The Subsidiary Banks are also subject to various requirements and restrictions under federal and state law, including requirements to maintain reserves against deposits, restrictions on the types and amounts of loans that may be granted and the interest that may be charged thereon and limitations on the types of investments that may be made, activities that may be engaged in, and types of services that may be offered. Various consumer laws and regulations also affect the operations of the Subsidiary Banks. In addition to the impact of regulation, commercial banks are affected significantly by the actions of the Federal Reserve as it attempts to control the money supply and credit availability in order to influence the economy.

Payment of Dividends

The Corporation is a legal entity separate and distinct from its banking and other subsidiaries. The principal source of cash flow of the Corporation, including cash flow to pay dividends on its stock or principal (premium, if any) and interest on debt securities, is dividends from the Subsidiary Banks. There are statutory and regulatory limitations on the payment of dividends by the Subsidiary Banks to the Corporation, as well as by the Corporation to its shareholders.

Each Subsidiary Bank that is a national bank is required by federal law

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

to obtain the prior approval of the Comptroller for the payment of dividends if the total of all dividends declared by the board of directors of such Subsidiary Bank in any year will exceed the total of (i) its net profits (as defined and interpreted by regulation) for that year plus (ii) the retained net profits (as defined and interpreted by regulation) for the preceding two years, less any required transfers to surplus. A national bank also can pay dividends only to the extent that retained net profits (including the portion transferred to surplus) exceed bad debts (as defined by regulation).

If, in the opinion of the applicable federal bank regulatory authority, a depository institution or a holding company is engaged in or is about to engage in an unsafe or unsound practice (which, depending on the financial condition of the depository institution or holding company, could include the payment of dividends), such authority may require that such

5

institution or holding company cease and desist from such practice. The federal banking agencies have indicated that paying dividends that deplete a depository institution's or holding company's capital base to an inadequate level would be such an unsafe and unsound banking practice. Moreover, the Federal Reserve, the Comptroller and the FDIC have issued policy statements which provide that bank holding companies and insured depository institutions generally should only pay dividends out of current operating earnings.

In addition, under the Federal Deposit Insurance Act ("FDIA"), an FDIC-insured depository institution may not make any capital distributions (including the payment of dividends) or pay any management fees to its holding company or pay any dividend if it is undercapitalized or if such payment would cause it to become undercapitalized.

At December 31, 2001, under dividend restrictions imposed under applicable federal laws, the Subsidiary Banks, without obtaining regulatory approval, could legally declare aggregate dividends of approximately \$275.6 million. Under Tennessee law, the Corporation is not permitted to pay dividends if, after giving effect to such payment, it would not be able to pay its debts as they become due in the usual course of business or the Corporation's total assets would be less than the sum of its total liabilities plus any amounts needed to satisfy any preferential rights if the Corporation was dissolving.

The payment of dividends by the Corporation and the Subsidiary Banks may also be affected or limited by other factors, such as the requirement to maintain adequate capital above regulatory guidelines and debt covenants.

Transactions with Affiliates

There are various legal restrictions on the extent to which the Corporation and its nonbank subsidiaries (including for purposes of this paragraph, in certain situations, subsidiaries of the Subsidiary Banks) can borrow or otherwise obtain credit from the Subsidiary Banks. There are also legal restrictions on the Subsidiary Banks' purchases of or investments in the securities of and purchases of assets from the Corporation and its nonbank subsidiaries, a Subsidiary Bank's loans or extensions of credit to third parties collateralized by the securities or obligations of the Corporation and its nonbank subsidiaries, the issuance of guaranties, acceptances and letters of credit on behalf of the Corporation and its nonbank subsidiaries, and certain bank transactions with the Corporation and its nonbank subsidiaries, or with respect to which the Corporation and its nonbank subsidiaries act as agent, participate or have a financial interest. Subject to certain limited exceptions, a Subsidiary Bank (including for purposes of this paragraph all subsidiaries of

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

such Subsidiary Bank) may not extend credit to the Corporation or to any other affiliate (other than another Subsidiary Bank and certain exempted affiliates) in an amount which exceeds 10% of the Subsidiary Bank's capital stock and surplus and may not extend credit in the aggregate to all such affiliates in an amount which exceeds 20% of its capital stock and surplus. Further, there are legal requirements as to the type, amount and quality of collateral which must secure such extensions of credit by the Subsidiary Banks to the Corporation or to such other affiliates. Also, extensions of credit and other transactions between a Subsidiary Bank and the Corporation or such other affiliates must be on terms and under circumstances, including credit standards, that are substantially the same or at least as favorable to such Subsidiary Bank as those prevailing at the time for comparable transactions with non-affiliated companies. Also, the Corporation and its subsidiaries are prohibited from engaging in certain tie-in arrangements in connection with any extension of credit, lease or sale of property or furnishing of services.

6

Capital Adequacy

The Federal Reserve has adopted risk-based capital guidelines for bank holding companies. The minimum guideline for the ratio of total capital ("Total Capital") to risk-weighted assets (including certain off-balance-sheet items, such as standby letters of credit) is 8%, and the minimum ratio of Tier 1 Capital (defined below) to risk-weighted assets is 4%. At least half of the Total Capital must be composed of common stock, minority interests in the equity accounts of consolidated subsidiaries, noncumulative perpetual preferred stock and a limited amount of cumulative perpetual preferred stock, less goodwill and certain other intangible assets ("Tier 1 Capital"). The remainder may consist of qualifying subordinated debt, certain types of mandatory convertible securities and perpetual debt, other preferred stock and a limited amount of loan loss reserves. At December 31, 2001, the Corporation's consolidated Tier 1 Capital and Total Capital ratios were 8.43% and 11.41%, respectively.

The Federal Reserve Board, the FDIC and the OCC have adopted rules to incorporate market and interest-rate risk components into their risk-based capital standards and that explicitly identify concentration of credit risk and certain risks arising from non-traditional activities, and the management of such risks, as important factors to consider in assessing an institution's overall capital adequacy. Under the market risk requirements, capital is allocated to support the amount of market risk related to a financial institution's ongoing trading activities for banks with relatively large trading activities. Institutions will be able to satisfy this additional requirement, in part, by issuing short-term subordinated debt that qualifies as Tier 3 capital. The amount of the Corporation's trading activities does not presently require an allocation of capital.

In addition, the Federal Reserve has established minimum leverage ratio guidelines for bank holding companies. These guidelines provide for a minimum ratio of Tier 1 Capital to quarterly average assets, less goodwill and certain other intangible assets (the "Leverage Ratio"), of 3% for bank holding companies that meet certain specific criteria, including having the highest regulatory rating. All other bank holding companies generally are required to maintain a Leverage Ratio of at least 3%, plus an additional cushion of 100 to 200 basis points. The Corporation's Leverage Ratio at December 31, 2001 was 6.86%. The guidelines also provide that bank holding companies experiencing internal growth or making acquisitions will be expected to maintain strong capital positions substantially above the minimum supervisory levels without significant reliance on intangible assets. Furthermore, the Federal Reserve has indicated that it will consider a "tangible Tier 1 Capital leverage ratio" (deducting all

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

intangibles) and other indicia of capital strength in evaluating proposals for expansion or new activities.

Each of the Subsidiary Banks is subject to risk-based and leverage capital requirements similar to those described above adopted by the Comptroller. The Corporation believes that each of the Subsidiary Banks was in compliance with applicable minimum capital requirements as of December 31, 2001. Neither the Corporation nor any of the Subsidiary Banks has been advised by any federal banking agency of any specific minimum Leverage Ratio requirement applicable to it.

Failure to meet capital guidelines could subject a bank to a variety of enforcement remedies, including the termination of deposit insurance by the FDIC, and to certain restrictions on its business and in certain circumstances to the appointment of a conservator or receiver. See "--Prompt Corrective Action."

The federal banking regulators have adopted a final rule which amends their regulatory capital standards regarding certain recourse obligations, direct credit substitutes, residual interests

7

and other positions in securitized transactions that expose banking organizations to credit risk. The final rule, which is effective January 1, 2002 treats recourse obligations and direct credit substitutes more consistently than the current risk-based capital standards, and introduces a credit ratings-based approach to assigning risk weights within a securitization. In addition, the rule imposes a "dollar-for-dollar" capital charge on residual interests and a concentration limit of 25% of Tier 1 capital on credit-enhancing interest-only strips, a subset of residual interests. The Corporation does not expect the adoption of this final rule to have a material effect on the financial condition or results of operations of the Bank or the Corporation.

In January 2001, the Basel Committee proposed its second draft of a new capital adequacy framework. The new capital framework would consist of minimum capital requirements, a supervisory review process and the effective use of market discipline. In its proposal for minimum capital requirements, the Committee set out options from which banks could choose depending on the complexity of their business and the quality of their risk management. A standardized approach would refine the current measurement framework and introduce the use of external credit assessments to determine a bank's capital charge. Banks with more advanced risk management capabilities could make use of an internal risk-rating based approach. Under this approach, some of the key elements of credit risk, such as the probability of default of the borrower, would be estimated internally by a bank. The Committee is also proposing an explicit capital charge for operational risk to provide for problems like internal systems failure.

The supervisory review aspect of the new framework would seek to ensure that a bank's capital position is consistent with its overall risk profile and strategy. The supervisory review process would also encourage early supervisory intervention when a bank's capital position deteriorates. The third aspect of the new framework, market discipline, would call for detailed disclosure of a bank's capital adequacy in order to encourage high disclosure standards and to enhance the role of market participants in encouraging banks to hold adequate capital. Banks must also disclose how they evaluate their own capital adequacy.

To address concerns within the banking industry that compliance with the new framework would be costly and result in increased regulatory burden, the

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

Basel Committee agreed in June 2001 to modify some of its earlier proposals. A third draft of the proposed capital rules is expected to be issued and finalized during 2002. Implementation of some form of the new guidelines is expected in 2005. The Corporation cannot predict at this time whether the new capital adequacy framework will be adopted or in what form, or the effect it would have on the financial condition or results of operations of the Bank or the Corporation.

Holding Company Structure and Support of Subsidiary Banks

Because the Corporation is a holding company, its right to participate in the assets of any subsidiary upon the latter's liquidation or reorganization will be subject to the prior claims of the subsidiary's creditors (including depositors in the case of the Subsidiary Banks) except to the extent that the Corporation may itself be a creditor with recognized claims against the subsidiary. In addition, depositors of a bank, and the FDIC as their subrogee, would be entitled to priority over the creditors in the event of liquidation of a bank subsidiary.

Under Federal Reserve policy, the Corporation is expected to act as a source of financial strength to, and to commit resources to support, each of the Subsidiary Banks. This support may be required at times when, absent such Federal Reserve policy, the Corporation may not be inclined to provide it. In addition, any capital loans by a bank holding company to any of its

8

subsidiary banks are subordinate in right of payment to deposits and to certain other indebtedness of such subsidiary bank. In the event of a bank holding company's bankruptcy, any commitment by the bank holding company to a federal bank regulatory agency to maintain the capital of a subsidiary bank will be assumed by the bankruptcy trustee and entitled to a priority of payment.

Cross-Guarantee Liability

Under the FDIA, a depository institution insured by the FDIC can be held liable for any loss incurred by, or reasonably expected to be incurred by, the FDIC after August 9, 1989 in connection with (i) the default of a commonly controlled FDIC-insured depository institution or (ii) any assistance provided by the FDIC to any commonly controlled FDIC-insured depository institution "in danger of default." "Default" is defined generally as the appointment of a conservator or receiver and "in danger of default" is defined generally as the existence of certain conditions indicating that a default is likely to occur in the absence of regulatory assistance. The FDIC's claim for damages is superior to claims of shareholders of the insured depository institution or its holding company but is subordinate to claims of depositors, secured creditors and holders of subordinated debt (other than affiliates) of the commonly controlled insured depository institution. The Subsidiary Banks are subject to these cross-guarantee provisions. As a result, any loss suffered by the FDIC in respect of any of the Subsidiary Banks would likely result in assertion of the cross-guarantee provisions, the assessment of such estimated losses against the Corporation's other Subsidiary Banks and a potential loss of the Corporation's investment in such Subsidiary Banks.

Prompt Corrective Action

The FDIA requires, among other things, the federal banking regulators to take "prompt corrective action" in respect of FDIC-insured depository institutions that do not meet minimum capital requirements. Under the FDIA, insured depository institutions are divided into five capital tiers: "well

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized" and "critically undercapitalized." Under applicable regulations, an institution is defined to be well capitalized if it maintains a Leverage Ratio of at least 5%, a Tier 1 Capital ratio of at least 6% and a Total Capital ratio of at least 10% and is not subject to a directive, order or written agreement to meet and maintain specific capital levels. An institution is defined to be adequately capitalized if it meets all of its minimum capital requirements as described above. An institution will be considered undercapitalized if it fails to meet any minimum required measure, significantly undercapitalized if it has a Total Risk-Based Capital ratio of less than 6%, a Tier 1 Risk-Based Capital ratio of less than 3% or a Leverage Ratio of less than 3% and critically undercapitalized if it fails to maintain a level of tangible equity equal to at least 2% of total assets. An institution may be deemed to be in a capitalization category that is lower than is indicated by its actual capital position if it receives an unsatisfactory examination rating.

The FDIA generally prohibits an FDIC-insured depository institution from making any capital distribution (including payment of dividends) or paying any management fee to its holding company if the depository institution would thereafter be undercapitalized. Undercapitalized depository institutions are subject to restrictions on borrowing from the Federal Reserve System. In addition, undercapitalized depository institutions are subject to growth limitations and are required to submit capital restoration plans. An insured depository institution's holding company must guarantee the capital plan, up to an amount equal to the lesser of 5% of the depository institution's assets at the time it becomes undercapitalized or the amount of the capital deficiency when the institution fails to comply with the plan, for the plan to be accepted by the applicable federal regulatory authority. The federal banking agencies may not accept a capital plan without

9

determining, among other things, that the plan is based on realistic assumptions and is likely to succeed in restoring the depository institution's capital. If a depository institution fails to submit an acceptable plan, it is treated as if it is significantly undercapitalized.

Significantly undercapitalized depository institutions may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become adequately capitalized, requirements to reduce total assets and cessation of receipt of deposits from correspondent banks. Critically undercapitalized depository institutions are subject to appointment of a receiver or conservator, generally within 90 days of the date on which they become critically undercapitalized.

The Corporation believes that at December 31, 2001 all of the Subsidiary Banks had sufficient capital to qualify as "well capitalized" under the regulatory capital requirements discussed above.

Interstate Banking and Branching Legislation

The Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 (the "IBBEA") authorizes interstate acquisitions of banks and bank holding companies without geographic limitation beginning one year after enactment. In addition, since June 1, 1997, a bank may merge with a bank in another state as long as neither of the states has opted out of interstate branching between the date of enactment of the IBBEA and May 31, 1997. Tennessee did not opt out of interstate branching. The IBBEA further provides that states may enact laws permitting interstate merger transactions prior to June 1, 1997. Tennessee did not enact such a law. A bank may establish and operate a de novo branch in a

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

state in which the bank does not maintain a branch if that state explicitly permits de novo branching. Effective July 1, 2001, Tennessee permits de novo branching on a reciprocity basis. Once a bank has established branches in a state through an interstate merger transaction, the bank may establish and acquire additional branches at any location in the state where any bank involved in the interstate merger transaction could have established or acquired branches under applicable federal or state law. A bank that has established a branch in a state through de novo branching may establish and acquire additional branches in such state in the same manner and to the same extent as a bank having a branch in such state as a result of an interstate merger. If a state opts out of interstate branching within the specified time period, no bank in any other state may establish a branch in the opting out of state, whether through an acquisition or de novo.

Financial Modernization Legislation

The Gramm-Leach-Bliley Act was enacted into law on November 12, 1999. The Act repeals or modifies a number of significant provisions of current laws, including the Glass-Steagall Act and the Bank Holding Company Act of 1956, which impose restrictions on banking organizations' ability to engage in certain types of activities. The Act generally allows bank holding companies such as the Corporation broad authority to engage in activities that are financial in nature or incidental to such a financial activity, including insurance underwriting and brokerage; merchant banking; securities underwriting, dealing and market-making; real estate development; and such additional activities as the Federal Reserve in consultation with the Secretary of the Treasury determines to be financial in nature or incidental thereto. A bank holding company may engage in these activities directly or through subsidiaries by qualifying as a "financial holding company." To qualify a bank holding company must file a declaration with the Federal Reserve and certify that all of its subsidiary depository institutions are well-managed and well-capitalized. The Act also permits national banks such as the Bank to engage in certain

10

of these activities through financial subsidiaries. To control or hold an interest in a financial subsidiary, a national bank must meet the following requirements: (1) the national bank must receive approval from the Comptroller for the financial subsidiary to engage in the activities, (2) the national bank and its depository institution affiliates must each be well-capitalized and well-managed, (3) the aggregate consolidated total assets of all of the national bank's financial subsidiaries must not exceed 45% of the national bank's consolidated total assets or, if less, \$50 billion, (4) the national bank must have in place adequate policies and procedures to identify and manage financial and operational risks and to preserve the separate identities and limited liability of the national bank and the financial subsidiary, and (5) if the financial subsidiary will engage in principal transactions and the national bank is one of the one hundred largest banks, the national bank must have outstanding at least one issue of unsecured long-term debt that is currently rated in one of the three highest investment grade rating categories (or if in the second fifty largest banks, an alternative requirement is that the national bank has a current long-term issuer credit rating within the three highest investment grade rating categories). No new financial activity may be commenced under the Act unless the national bank and all of its depository institution affiliates have at least "satisfactory" CRA ratings. Certain restrictions apply if the bank holding company or the national bank fails to continue to meet one or more of the requirements listed above. In addition, the Act contains a number of other provisions that may affect the Bank's operations, including functional regulation of the Bank's securities and investment management operations by the SEC and the Bank's insurance operations by the States and limitations on the use

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

and disclosure to third parties of customer information. The Act generally became effective March 11, 2000, although certain provisions took effect later, such as functional regulation (May 12, 2001, except for certain matters), and compliance with privacy regulations was required by July 1, 2001. The Corporation has elected to become a financial holding company and currently, the Bank has eight financial subsidiaries. The Corporation cannot predict at this time the potential effect that the Act will have on its business and operations, although the Corporation expects that the general effect of the Act will be to increase competition in the financial services industry generally.

FDIC Insurance Assessments; DIFA

The FDIC reduced the insurance premiums it charges on bank deposits insured by the Bank Insurance Fund ("BIF") to the statutory minimum of \$2,000 for "well capitalized" banks, effective January 1, 1996. Premiums related to deposits assessed by the Savings Association Insurance Fund ("SAIF"), including savings association deposits acquired by banks, continued to be assessed at a rate of between 23 cents and 31 cents per \$100 of deposits. On September 30, 1996, the Deposit Insurance Funds Act of 1996 ("DIFA") was enacted and signed into law. DIFA provided for a special assessment to recapitalize the SAIF to bring the SAIF up to statutory required levels. The assessment imposed a one-time fee to banks that own previously acquired thrift deposits of \$.526 per \$100 of thrift deposits they held at March 31, 1995. The pre-tax cost to the Corporation of the one-time assessment in the third quarter of 1996 was \$3.8 million. DIFA further provides for assessments to be imposed on insured depository institutions with respect to deposits insured by the BIF (in addition to assessments currently imposed on depository institutions with respect to SAIF-insured deposits) to pay for the cost of Financing Corporation ("FICO") bonds. All banks are being assessed to pay the interest due on FICO bonds since January 1, 1997. The cost to the Corporation on an annual basis has been immaterial.

Under the FDIA, insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe and unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by a federal bank regulatory agency.

11

Depositor Preference

Federal law provides that deposits and certain claims for administrative expenses and employee compensation against an insured depository institution would be afforded a priority over other general unsecured claims against such an institution, including federal funds and letters of credit, in the "liquidation or other resolution" of such an institution by any receiver.

Securities Regulation

Certain of the Corporation's subsidiaries are subject to various securities laws and regulations and capital adequacy requirements promulgated by the regulatory and exchange authorities of the jurisdictions in which they operate.

The Corporation's registered broker-dealer subsidiaries are subject to the SEC's net capital rule, Rule 15c3-1. That rule requires the maintenance of minimum net capital and limits the ability of the broker-dealer to transfer large amounts of capital to a parent company or affiliate. Compliance with the rule could limit operations that require intensive use of capital, such as

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

underwriting and trading.

Certain of the Corporation's subsidiaries are registered investment advisers who are regulated under the Investment Advisers Act of 1940. These subsidiaries, among other activities, provide investment advice to investment companies regulated under the Investment Company Act of 1940. Advisory contracts with these investment companies automatically terminate under these laws upon an assignment of the contract by the investment adviser unless appropriate consents are obtained. Subsidiaries of the Corporation are subject to certain restrictions in their dealings with investment companies advised by a subsidiary of the Corporation.

Insurance Activities

Subsidiaries of the Corporation sell various types of insurance as agent in a number of the states. Insurance activities are subject to regulation by the states in which such business is transacted. Although most of such regulation focuses on insurance companies and their insurance products, insurance agents and their activities are also subject to regulation by the states, including, among other things, licensing and marketing and sales practices.

Competition.

The Corporation and its subsidiaries face substantial competition in all aspects of the businesses in which they engage from national and state banks located in Tennessee and large out-of-state banks as well as from savings and loan associations, credit unions, other financial institutions, consumer finance companies, trust companies, investment counseling firms, money market mutual funds, insurance companies, securities firms, mortgage banking companies and others. For certain information on the competitive position of the Corporation and the Bank, refer to the "General" subsection above of this Item 1. Also, refer to the subsections entitled "Supervision and Regulation" and "Effect of Governmental Policies," both of which are relevant to an analysis of the Corporation's competitors. Due to the intense competition in the financial industry, the Corporation makes no representation that its competitive position has remained constant, nor can it predict whether its position will change in the future.

12

Sources and Availability of Funds.

Specific reference is made to the Management's Discussion and Analysis and Glossary sections, including the subsection entitled "Deposits, Other Sources of Funds, and Liquidity Management," contained in the 2002 Proxy Statement, which sections are incorporated herein by reference.

Effect of Governmental Policies.

The Bank is affected by the policies of regulatory authorities, including the Federal Reserve System and the Comptroller. An important function of the Federal Reserve System is to regulate the national money supply.

Among the instruments of monetary policy used by the Federal Reserve are: purchases and sales of U.S. Government securities in the marketplace; changes in the discount rate, which is the rate any depository institution must pay to borrow from the Federal Reserve; and changes in the reserve requirements of depository institutions. These instruments are effective in influencing economic and monetary growth, interest rate levels and inflation.

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

The monetary policies of the Federal Reserve System and other governmental policies have had a significant effect on the operating results of commercial banks in the past and are expected to continue to do so in the future. Because of changing conditions in the national economy and in the money market, as well as the result of actions by monetary and fiscal authorities, it is not possible to predict with certainty future changes in interest rates, deposit levels, loan demand or the business and earnings of the Corporation and the Bank or whether the changing economic conditions will have a positive or negative effect on operations and earnings.

Various bills are from the time to time introduced in the United States Congress and the Tennessee General Assembly and other state legislatures, and regulations are proposed by the regulatory agencies which could affect the business of the Corporation and its subsidiaries. It cannot be predicted whether or in what form any of these proposals will be adopted or the extent to which the business of the Corporation and its subsidiaries may be affected thereby.

Statistical Information Required by Guide 3.

The statistical information required to be displayed under Item I pursuant to Guide 3, "Statistical Disclosure by Bank Holding Companies," of the Exchange Act Industry Guides is incorporated herein by reference to the Consolidated Financial Statements and the notes thereto and the Management's Discussion and Analysis and Glossary sections in the 2002 Proxy Statement; certain information not contained in the 2002 Proxy Statement, but required by Guide 3, is contained in the tables immediately following:

ITEM 2
PROPERTIES

The Corporation has no properties that it considers materially important to its financial statements.

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

ITEM 3 LEGAL PROCEEDINGS

The Corporation is a party to no material pending legal proceedings the nature of which are required to be disclosed pursuant to the Instructions contained in the Form of this Report.

ITEM 4 SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted during the fourth quarter of 2001 to a vote of security holders, through the solicitation of proxies or otherwise.

ITEM 4A EXECUTIVE OFFICERS OF REGISTRANT

The following is a list of executive officers of the Corporation as of March 1, 2002. The executive officers are elected at the April meeting of the Corporation's Board of Directors following the annual meeting of shareholders for a term of one year and until their successors are elected and qualified.

Name and Age -----	Offices and Positions - Year First Elected to Office -----
Charles G. Burkett Age: 50	President - Retail Financial Services/Memphis Financial Services of the Corporation and the Bank (2001)
J. Kenneth Glass Age: 55	President and Chief Operating Officer of the Corporation and the Bank (2001)
Herbert H. Hilliard Age: 54	Executive Vice President, Risk Management (2001) and Government Relations and CRA (1988) of the Corporation and the Bank
Ralph Horn Age: 60	Chairman of the Board (1996) and Chief Executive Officer (1994) of the Corporation and the Bank
Harry A. Johnson, III Age: 53	Executive Vice President (1990) and General Counsel (1988) of the Corporation and the Bank

17

James F. Keen Age: 51	Senior Vice President and Corporate Controller of the Corporation (1988) and the Bank (2001) and principal accounting officer
Larry B. Martin Age: 54	President - Business Financial Services of the Corporation and the Bank (2001)
Sarah L. Meyerrose	Executive Vice President, Employee Services

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

Age: 46	(1998) and Wealth Management (2001) of the Corporation and the Bank.
John P. O'Connor, Jr. Age: 58	Executive Vice President of the Corporation (1990) and the Bank (1987) and Chief Credit Officer (1988)
Elbert L. Thomas, Jr. Age: 53	Executive Vice President (1995) and Chief Financial Officer (1995) of the Corporation and the Bank

Each of the executive officers has been employed by the Corporation or its subsidiaries during each of the last five years. From 1991 through July 2001, Mr. Horn also served as President of the Corporation and the Bank. Prior to July of 2001, Mr. Glass was President-Retail Financial Services of the Corporation and the Bank. Prior to April of 2000, Mr. Glass was Executive Vice President of the Corporation and prior to April of 1999, he was President-Tennessee Banking Group of the Bank. The Personnel Division changed its name to the Employee Services Division in April of 1999. Prior to June of 1998, Ms. Meyerrose was President, Kingsport/Bristol of the Bank. Prior to July of 2001, Mr. Burkett was Executive Vice President, Manager Affluent Market of the Bank. Prior to July of 2001, Mr. Martin was Chairman and CEO-Knoxville of the Bank.

PART II

ITEM 5

MARKET FOR THE REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

(a) Market for the Corporation's Common Stock:

The Corporation's common stock, \$0.625 par value, is listed and trades on the New York Stock Exchange, Inc. under the symbol FTN. As of December 31, 2001, there were 9,338 shareholders of record of the Corporation's common stock. Additional information called for by this Item is incorporated herein by reference to the Summary of Quarterly Financial Information Table, the Selected Financial and Operating Data Table, Note 18 to the Consolidated Financial Statements, and the "Deposits, Other Sources of Funds, and Liquidity Management" subsection of the Management's Discussion and Analysis section contained in the 2002 Proxy Statement and to the "Payment of Dividends" and "Transactions with Affiliates" subsections contained in Item 1 of Part I of this Form 10-K, which is incorporated herein by reference.

(b) Sale of Unregistered Securities:

18

During 2001 there were no sales of shares of the Corporation's common stock without registration under the Securities Act of 1933, as amended.

(c) Description of the Corporation's Capital Stock:

Authorized Capital Stock. The authorized capital stock of the Corporation currently consists of 5,000,000 shares of preferred stock, without par value ("preferred stock"), which may be issued from time to time by resolution of the Corporation's Board of Directors (the "Board") and 400,000,000 shares of common stock, \$0.625 par value (the "common stock"). As of December 31, 2001 there were 125,865,188 shares of common stock and no shares of

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

preferred stock outstanding. As of that date, approximately 30.4 million shares of common stock were reserved for issuance under various employee stock plans and the Corporation's dividend reinvestment plan, and no shares of preferred stock were reserved for issuance. Although shares have been reserved for issuance under the employee stock plans, the plans generally permit the Corporation to repurchase shares on the open market or privately for issuance under such plans. The Board has authorized management to repurchase shares from time to time for the plans. A total of 7.2 million shares were repurchased and 4.4 million shares were issued for the plans in 2001. Pursuant to Board authority, the Corporation plans to continue to purchase shares from time to time for the plans and will evaluate the level of capital and take action designed to generate or use capital as appropriate for the interest of the shareholders. Also, the Corporation has announced that the Board approved the repurchase of up to 9.5 million shares by December 31, 2004, subject to market conditions, accumulation of excess equity and prudent capital management. During 2001, 2.3 million shares were repurchased pursuant to this authority. Also, the Corporation has on file with the SEC one effective shelf registration pursuant to which it may offer from time to time, at its discretion, senior or subordinated debt securities, preferred stock, including depository shares, and common stock at an aggregate initial offering price not to exceed \$225 million (net of prior issuances) and another effective shelf registration pursuant to which up to \$200 million of capital securities (guaranteed preferred beneficial interests in the Corporation's subordinated debentures) is available for issuance.

Preferred Stock. The Board is authorized, without further action by the shareholders, to provide for the issuance of up to 5,000,000 shares of preferred stock, from time to time in one or more series and, with respect to each such series, has the authority to fix the powers (including voting power), designations, preferences and relative, participating, optional or other special rights and the qualifications, limitations or restrictions thereof.

Common Stock. The Board is authorized to issue a maximum of 400,000,000 shares of common stock. The holders of the common stock are entitled to receive, ratably, such dividends as may be declared by the Board from funds legally available therefor, provided that if any shares of preferred stock are at the time outstanding, the payment of dividends on common stock or other distributions (including purchases of common stock) may be subject to the declaration and payment of full cumulative dividends, and the absence of arrearages in any mandatory sinking fund, on outstanding shares of preferred stock. The holders of the outstanding shares of common stock are entitled to one vote for each such share on all matters presented to shareholders and are not entitled to cumulate votes for the election of directors. Upon any dissolution, liquidation or winding up of the Corporation resulting in a distribution of assets to the shareholders, the holders of common stock are entitled to receive such assets ratably according to their respective holdings after payment of all liabilities and obligations and satisfaction of the liquidation preferences of any shares of preferred stock at the time outstanding. The shares of common stock have no preemptive, redemption, subscription or conversion rights. Under the Corporation's Charter, the

Board is authorized to issue authorized shares of common stock without further action by the shareholders. However, the common stock is traded on the New York Stock Exchange, Inc. which requires shareholder approval of the issuance of additional shares of common stock in certain situations. The Transfer Agent for the common stock is Wells Fargo Bank Minnesota, N.A.

The Board is divided into three classes, which results in approximately

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

one third of the directors being elected each year. In addition, the Charter and the Bylaws, among other things, generally give to the Board the authority to fix the number of directors on the Board and to remove directors from and fill vacancies on the Board, other than removal for cause and the filling of vacancies created thereby which are reserved to shareholders exercising at least a majority of the voting power of all outstanding voting stock of the Corporation. To change these provisions of the Bylaws, other than by action of the Board, and to amend these provisions of the Charter or to adopt any provision of the Charter inconsistent with such Bylaw provisions, would require approval by the holders of at least 80% of the voting power of all outstanding voting stock. Such classification of the Board and such other provisions of the Charter and the Bylaws may have a significant effect on the ability of the shareholders of the Corporation to change the composition of an incumbent Board or to benefit from certain transactions which are opposed by the Board.

Shareholder Protection Rights Plan. On October 20, 1998, the Board adopted a Shareholder Protection Rights Agreement (the "Rights Plan") and declared a dividend of one right on each share of common stock outstanding on November 2, 1998, or issued thereafter and prior to the time the rights separate and thereafter pursuant to options and convertible securities outstanding at the time the rights separate. The Rights Plan became operative upon the expiration on September 18, 1999 of a substantially identical plan that was adopted in 1989.

Until the earlier of (i) the 10th business day (subject to certain adjustments by the Board) after commencement of a tender or exchange offer which, if consummated, would result in a person or group owning 10% or more (but not more than 50%) of the outstanding shares of common stock (an "Acquiring Person") and (ii) the tenth business day (the "Flip-in Date") after the first date of public announcement by the Corporation that a person has become an Acquiring Person, the Rights will be evidenced by the common stock certificates, will automatically trade with the common stock, and will not be exercisable. Thereafter, separate rights certificates will be distributed, and each right will entitle its holder to purchase one one-hundredth of a share of Participating Preferred Stock having economic and voting terms similar to those of one share of common stock for \$150.00, subject to adjustment (the "Exercise Price").

The Rights will expire on the earliest of (i) the Exchange Time (defined below), (ii) December 31, 2009, and (iii) the date on which the Rights are redeemed as described below. The Board may amend the Rights Plan in any respect prior to the Flip-in Date. The Board may, at its option, at any time prior to the close of business on the Flip-in Date, redeem all the Rights at a price of \$0.001 per Right.

If a Flip-in Date occurs, each Right (other than Rights beneficially owned by the Acquiring Person or its affiliates, associates or transferees, which Rights will become void) will entitle its holder to purchase a number of shares of common stock or Participating Preferred Stock having a market value of twice the Exercise Price for an amount in cash equal to the then-current Exercise Price. In addition, the Board may, at its option, at any time after a Flip-in Date, elect to exchange the Rights (other than Rights beneficially owned by the Acquiring Person or its affiliates, associates or transferees) for shares of common stock or a Participating Preferred Stock

at an exchange ratio of one share of common stock or 1/100th of a share of Participating Preferred Stock per Right (the "Exchange Time").

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

Also, if after an Acquiring Person controls the Corporation's Board of Directors, the Corporation is involved in a merger or sells more than 50% of its assets or earning power or is involved with an Acquiring Person in certain self-dealing transactions (or has entered into an agreement to do any of the foregoing) and, in the case of a merger, the Acquiring Person will receive different treatment than all other shareholders, each Right will entitle its holder to purchase a number of shares of common stock of the Acquiring Person having a market value of twice the Exercise Price for an amount in cash equal to the then-current Exercise Price.

The Rights will not prevent a takeover of the Corporation. The Rights, however, may have certain anti-takeover effects. The Rights may cause substantial dilution to a person or group that acquires 10% or more of the outstanding common stock unless the Rights are first redeemed by the Corporation's Board.

ITEM 6 SELECTED FINANCIAL DATA

The information called for by this Item is incorporated herein by reference to the Selected Financial and Operating Data table in the 2002 Proxy Statement.

ITEM 7 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

The information called for by this Item is incorporated herein by reference to the Management's Discussion and Analysis section, Glossary section, and the Consolidated Historical Statements of Income and Consolidated Average Balance Sheets and Related Yields and Rates tables in the 2002 Proxy Statement.

ITEM 7A QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information called for by this Item is incorporated herein by reference to Note 1 to the Consolidated Financial Statements and the "Risk Management-Interest Rate Risk Management" subsection of the Management's Discussion and Analysis section contained in the 2002 Proxy Statement.

ITEM 8 FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The information called for by this Item is incorporated herein by reference to the Consolidated Financial Statements and the notes thereto and to the Summary of Quarterly Financial Information table in the 2002 Proxy Statement.

21

ITEM 9 CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

The information called for by this Item is inapplicable.

PART III

ITEM 10 DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

The information called for by this Item as it relates to directors and nominees for director of the Corporation is incorporated herein by reference to the "Election of Directors" section of the Corporation's 2002 Proxy Statement (excluding the Audit Committee Report, the Audit Committee Charter, and the statements regarding the independence of members of the Audit Committee). The information required by this Item as it relates to executive officers of the Corporation is incorporated herein by reference to Item 4A in Part I of this Report. The information required by this Item as it relates to compliance with Section 16(a) of the Securities Exchange Act of 1934 is incorporated herein by reference to the "Section 16(a) Beneficial Ownership Reporting Compliance" section of the 2002 Proxy Statement.

ITEM 11 EXECUTIVE COMPENSATION

The information called for by this Item is incorporated herein by reference to the "Executive Compensation" section of the 2002 Proxy Statement (excluding the Board Compensation Committee Report and the Total Shareholder Return Performance Graph).

ITEM 12 SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The information called for by this Item is incorporated herein by reference to the "Stock Ownership Information and Table" section of the 2002 Proxy Statement.

The Corporation is unaware of any arrangements which may result in a change in control of the Corporation.

ITEM 13 CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

The information called for by this Item is incorporated herein by reference to the "Certain Relationships and Related Transactions" section of the 2002 Proxy Statement.

PART IV

ITEM 14 EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

22

(a) The following documents are filed as a part of this Report:

Financial Statements:

- Consolidated Statements of Condition as of December 31, 2001 and 2000
- Consolidated Statements of Income for the years ended December 31, 2001, 2000 and 1999.
- Consolidated Statements of Shareholders' Equity for the years ended December 31, 2001, 2000, and 1999.
- Consolidated Statements of Cash Flows for the years ended December 31, 2001, 2000, and 1999.

Edgar Filing: FIRST TENNESSEE NATIONAL CORP - Form 10-K405

- Notes to the Consolidated Financial Statements
 - Report of Independent Public Accountants
- The consolidated financial statements of the Corporation, the notes thereto, and the report of independent public accountants, in the 2002 Proxy Statement, as listed above, are incorporated herein by reference.

Financial Statement Schedules: Not applicable.

Exhibits:

Exhibits marked with an "*" represent a management contract or compensatory plan or arrangement required to be identified and filed as an exhibit.

- (3) (i) Restated Charter of the Corporation, as amended, incorporated herein by reference to Exhibit 3(i) to the Corporation's 1997 Annual Report on Form 10-K.
- (3) (ii) Bylaws of the Corporation, as amended and restated.
- (4) (a) Shareholder Protection Rights Agreement, dated as of October 20, 1998, between the Corporation and First Tennessee Bank National Association, as Rights Agent, including as Exhibit A the forms of Rights Certificate and Election to Exercise and as Exhibit B the form of Articles of Amendment designating Participating Preferred Stock, incorporated herein by reference to Exhibits 1, 2, and 3 to the Corporation's Registration Statement on Form 8-A filed 10-23-98.
- (4) (b) The Corporation and certain of its consolidated subsidiaries have outstanding certain long-term debt. See Note 10 in the Corporation's 2002 Proxy Statement. None of such debt exceeds 10% of the total assets of the Corporation and its consolidated subsidiaries. Thus, copies of constituent instruments defining the rights of holders of such debt are not required to be included as exhibits. The Corporation agrees to furnish copies of such instruments to the Securities and Exchange Commission upon request.
- * (10) (a) Management Incentive Plan, as amended and restated, incorporated herein by reference to Exhibit 10(a) to the Corporation's Quarterly Report on Form 10-Q for the quarter ended 9-30-01.
- * (10) (b) 2000 Employee Stock Option Plan, as amended and restated, incorporated herein by reference to Exhibit 10(b) to the Corporation's 2000 Annual Report on Form 10-K.
